Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

**STS 321 (F) Unsettled Futures: Time, Crisis, and Science Fiction from the Margins (DPE)**

**Cross-listings:** STS 321 AMST 321

**Secondary Cross-listing**

Societies around the globe are now confronting a triple crisis that threatens not only political orders but also the very existence of certain forms of life: (1) financial collapse(s) that have increased the awareness and severity of mass inequality, (2) climate change and mass extinctions, and (3) the rise of white supremacy and ethno-nationalisms that threaten BIPOC lives and representative democracies. These material and political challenges have depleted many of the cultural resources that enable imagining non-apocalyptic futures. Yet, these crises are not novel. Many groups in the periphery--geographic, economic, and cultural--were and are already living through the uneven distribution of the apocalypse. Science fiction (SF) has emerged as a privileged symbolic field for the expression of hopes and anxieties that drive both culture and tech industries. Whether seen as a form of productive pessimism or liberatory theory, SF from the margins is deployed as a political tool for enacting change in the present. In this course, we will survey the history of SF as a variable and theoretical orientation constituted through the unfolding of uneven global encounters. We will analyze SF in the Cold War, Anthropocene, decolonization movements, and postcolonial and Indigenous landscapes, reading major works in SF and science and technology studies (STS) that address the politics of crisis, apocalypse, and global futures. In addition to novels and short stories, this course will incorporate film, graphic novels, music videos, video games, and other science fiction subgenres.

This interdisciplinary seminar invites students to pursue sociohistorical analysis and sustained critical discussion of the transhumanist movement and its overriding aims: the augmentation, transformation, and eventual transcendence of human biological constitution; the realization, through speculative technoscientific means, of an enhanced or even "postbiological existence"--a "posthuman condition," "Humanity 2.0." Through close readings of primary historical documents, transhumanist texts, scholarship on transhumanism, works of science-fiction film, literature, and popular culture, we will position the movement as an empirical conduit through which to explore the sociohistorical conditions under which transhumanist ideas and practices have emerged, circulated, and taken up residence. To that end, we will consider the ties of transhumanism to eugenics and massive investments in pharmaceuticals, anti-aging medicine, and so-called "GNR" technologies (i.e. genetics, nanotechnology, and artificial intelligence and robotics); the movement's affinities with neoliberalism and what some have pointed to as transhumanism's racialized subtext of whiteness. We will furthermore devote considerable attention to the technological singularity, the figure of the cyborg, mind-uploading, space colonization, and cryonic suspension, all of which, like transhumanism broadly, suggest that science and technology have in some sense come to operate as powerful

channeling agents for the very sorts of beliefs, practices, and forms of association that theorists of secularization expected modernity to displace. Lastly, throughout the course of the seminar we will take transhumanism as a provocation to think broadly and seriously about religion, technology, embodiment, and ways of being human.

### **STS 340 Science, Religion, and the (post)colony: Critical approaches to the global history of knowledge (DPE)**

Histories of science and religion have been deeply intertwined with colonial and postcolonial history. Colonial claims to legitimacy were often rooted in perceptions of scientific and technological superiority, and colonial expansion often marched in lockstep with missionary activity and forced conversions. In the process, race and human difference emerged as concepts at the intersection of scientific and religious discourses and was forged within the colonial framework. This colonial history of science and religion impacted how scientific and religious thought, practices and institutions developed through the period of decolonization and into today. Similarly, the attendant history of race and human difference continues to influence postcolonial and contemporary discourses around race, ethnicity, identity and migration. In this course, we will trace key moments in the history of science and religion and their relation to coloniality. We will start in the sixteenth century with the rise of modern European empires, move into the height of modern colonialism, indigenous genocides and chattel slavery, and trace decolonization from the middle of the nineteenth into today. Throughout, we will investigate how science and religion emerged as concepts, practices and institutions, and how these narratives impacted, and were impacted by colonial expansion and history. We will pay particular attention to questions of race, gender, sexuality and human difference as key concepts and practices that emerged at the intersections of science, religion and (post)colonialism

### **STS 349 (F) The Politics of Algorithms**

**Cross-listings:** STS 349 AMST 349 PSCI 331

Secondary Cross-listing

Every day, you interact with or through computer algorithms. In ways often obscure to users, they structure communication or conduct in social media, education, healthcare, shopping, entertainment, dating, urban planning, policing, criminal sentencing, political campaigns, government regulation, and war. Moving from the emergence of cybernetics during World War II through such contemporary examples as facial recognition software, this seminar approaches algorithms as complex technological artifacts that have social histories and political effects. Asking *how* algorithms are political and what that tells us about politics today (particularly in the U.S.), we will consider how their design expresses forms of power and their deployment shapes ways of living. What behaviors do different algorithms solicit, reward, discourage, or stigmatize? What kinds of selfhood and relationships do they

promote or thwart? How do various algorithms influence political partisanship and beliefs and intersect with existing hierarchies of race, class, gender, and sexuality? When inequities are built into a design, can that be addressed by rooting out "bias," or do such efforts miss something more inherent in the kinds of artifacts algorithms are or what they can be in a capitalist economy? Might developments in artificial intelligence transform our sense of the human or even threaten the species? Many of the seminar's themes, including democracy, power, inequality, judgment, deliberation, publicity, subjectivity, and agency, are central to political theory, but readings and course materials will also be drawn from such fields as media theory, surveillance studies, sociology, American studies, critical data science, film, and contemporary art. The course neither requires nor teaches any computer science skills.

**Requirements/Evaluation:** Class attendance and participation, regular short posts or exercises, and either three eight-page essays or one 8-page essay and one longer final paper.

### STS 350 Emotions

Philosophy is often described as *thinking about thinking*: variously conceived inquiries into the nature, scope and limits of human reasoning have always been at its heart. Without challenging the centrality of such projects for philosophy, this tutorial will focus on a less emphasized, but equally essential aspect of our lives: emotions. What are emotions, and how should we think about them? What is the proper 'geography'--classification and analysis--of our emotions, and what is their relation to our somatic states, feelings, beliefs, judgments, evaluations and actions? Do we have any control over our emotions? Could we (individually and socially) educate and cultivate them? How are conscious and unconscious emotions related to a person's action, character, and her social world? In addressing these substantive questions, we will also consider which methodological approach--if a single one can be privileged--we should adopt for examining emotions. We will try to determine what is the scope and nature of an adequate theory of emotions, what are the desiderata for such a theory, and what should count as evidence in its favor. We will examine a variety of philosophical and scientific theories of emotion, as well as some issues concerning normative aspects of emotions: the role of emotions in a good life, and the concept of emotional maturity.

### STS 353 (S) Is Science Native to Turtle Island? The History of Native Science in North America (DPE)

**Cross-listings:** STS 353 AMST 353

Secondary Cross-listing

Settler sciences and technologies deployed by Europeans colonizing Turtle Island (what settlers called North America) were introduced as weapons of Indigenous termination. From medical violation, to anthropological theft, and industrial pollution, settler technoscience objectified and appropriated Indigenous people and lands, and attempted to displace Indigenous knowledge in the pursuit of settler supremacy. Indigenous bodies were cast as victims, objects and sometimes the tools of this project. And yet, as tools and objects, Indigenous peoples took up settler technoscience in a multitude of ways that failed (both purposefully and not) to adhere to the colonizing mission, incorporating Indigenous knowledges and orientations, subverting settler science as a source of authority, and positioning science as a site of Indigenous sovereignty. The practice of taking up science as a tool of decolonization has become explicit in recent decades as expressly Native sciences now shape tribal funding, college education, and negotiations with international governing bodies. This course will trace the history of Native science across different nations and disciplines from the antebellum period when settler sciences were taking shape in civilian institutions to the present when Native science is professionalizing and being codified. We will read primary sources and scientific treatises by Indigenous leaders, activists, and scientists alongside secondary sources in Indigenous science and technology studies (STS), history, and postcolonial and queer theory.

### **STS 355 (S) Foucault: Confessions of the Flesh**

**Cross-listings:** REL 355 STS 355 COMP 359

Secondary Cross-listing

The French philosopher, historian, and social critic, **Michel Foucault** (1926-1984) has had a massive influence across a range of disciplines. Indeed, in 2019, Google Scholar ranked Foucault as **the number one most highly cited scholar in the Humanities and Social Sciences**. While many of his contemporaries have faded in importance, Foucault's writings on power, madness, the history of sexuality, and the structures of domination and governmentality have become central to the theoretical canon of a range of academic disciplines. To be a scholar in the humanities today is often to be in Foucault's shadow. But despite the many references to his work, Foucault is frequently misunderstood and subsequent scholars often attribute to him positions he would have repudiated. Now almost forty years after his death, his work is also long overdue for a reappraisal as we come to understand Foucault better as a person and especially as the final, and posthumous, volume of his History of Sexuality, ***Confessions of the Flesh***, has only just appeared and been translated into English. In this course we will mainly read Foucault supplemented with occasional contextual readings. Although we will touch on his earlier writings, this seminar will emphasize his middle-to-late period (beginning with ***The Archaeology of Knowledge***) and including selections from his later monographs, lectures, interviews, and short writings. It will culminate in the unfinished intellectual and political project that occupied Foucault in his last days. We will think with and often against Foucault, focusing primarily on questions of power, knowledge, truth, and addressing his later emancipatory gesture toward "technologies of the self." We will also appraise the methodologies that Foucault described as "archaeology" and "genealogy." We will historicize Foucault in his life and cultural context and ask how much of his arguments still apply today. What blind-spots did he have? Which of his ideas are worth consolidating and which need repudiating? How might we go beyond Foucault?

### **STS 364 (S) Mental Health and Illness: Philosophical Considerations**

**Cross-listings:** STS 364 PHIL 364

#### **Secondary Cross-listing**

This course will raise and discuss a number of philosophical questions concerning our current understanding of mental health and mental illness. We will begin by examining the general concepts of health and disease, and then apply them to human psychology. Throughout the course, our focus will be on the best theoretical and practical knowledge we now have to diagnose, explain, and alleviate mental illness. Some of the questions that we will discuss are: What is psychopathology and what are its causes? Is it possible to have systematic knowledge of subjective experience? If so, is that knowledge importantly different in kind or in rigor from the knowledge we gain through physics, chemistry or geology? Are there metaphysical and

ideological assumptions in contemporary psychiatry, and if so, could and should they be avoided? What is the basis on which current psychiatric diagnostic manuals are organized? Is that principle of organization justifiable or not? Do particular case histories offer good explanations of psychopathology? In framing and answering these questions, we will discuss subjective experience (or phenomenology) of mental illness; holism vs. reductionism; functional, historical and structural explanations of psychopathology; theory formation, evidence, and the role of values in psychology and psychiatry; the diversity and disunity of psychotherapeutic approaches; relationship between knowers and the known; and relationship between theoretical knowledge in psychiatry and the practices of healing.

This class engages with the methods of medical anthropology & medical sociology to help students design and implement ethnographic projects that explore health on campus or our wider community. Along the way we consider how disruptive moments like COVID-19 can reveal underlying social inequalities of healthcare access, health outcomes, and well-being; for which we propose innovative and student-focussed solutions. Students will learn and use design thinking, data visualization, and participatory ethnography while engaging with a variety of qualitative methods such as semi-structured interviews, focus groups, and qualitative surveys. We situate and explore our ethnographic projects within a campus and wider communities that are always already structured by power, privilege, and intersectional identities that shape health and well-being. We explore the field of narrative medicine and medical anthropology by developing and practicing skills in active listening, open dialogue, mindfulness, empathy, and curiosity that can profoundly shape ethnographic as well as the patient/provider encounters. For context, we read ethnographic case studies that explore a variety of topics including how structural racism and implicit bias shape clinical medicine & medical education in the US, how concepts of sexual citizenship can reshape our understanding of campus sexual assault, how the spread of US psychiatry has shaped a global landscape of mental health, and how queer activism responded to the HIV/AIDS crisis in the US. Our goals are to create participatory research projects that both explore and alter our habitual practices and individual ways of seeing the world around us.

**Requirements/Evaluation:** Weekly attendance, 3 written fieldnotes (3000 words), weekly writing & fieldwork exercises in class and out of class, a final presentation that includes data visualizations and analysis of research findings.

As far as we know, the technological singularity has not yet arrived. Therefore, humans remain a part of our current computation pipeline. However, the role humans play varies greatly: self-driving cars aim to have human involvement only in development and emergencies, whereas educational tools are built for constant human involvement. In this course, we broadly explore human work within computational systems through topics such as crowdsourcing, educational technology, citizen science, human computation, open-source software, micro-labor markets, and online gaming. Students should expect broad exposure to a wide variety of human computing topics and group projects on building and evaluating computational systems that use human work.

**Class Format:** Lectures will be held on Wednesday and Friday each week. Conference sections will each meet once per week. Students should sign up for the lecture section and one conference.

#### Secondary Cross-listing

Human-Computer Interaction (HCI) principles are practiced in the design and evaluation of most software, greatly impacting the lives of anyone who uses interactive technology and other products. There are many ways to design and build applications for people, so what methods can increase the likelihood that our design is the most useful, intuitive, and enjoyable? This course provides an introduction to the field of human-computer interaction, through a user-centered approach to designing and evaluating interactive systems. HCI draws on methods from computer science, the social and cognitive sciences, and interaction design. In this course we will use these methods to: ideate and propose design problems, study existing systems and challenges, explore design opportunities and tradeoffs, evaluate and improve designs, and communicate design problems and solutions to varying audiences.

**Cross-listings:** ENGL 376 STS 377 AMST 376

Secondary Cross-listing

This course examines representations of American landscapes in selected texts from the British colonial era to the present. Critical approaches will include narrative theory, formalism, eco-criticism, and science and technology studies. The central questions are: (1) How do authors adapt narrative and poetic forms to the representation of particular landscapes? (2) How do literary landscape representations change when new technologies arise for traversing and transforming them? (3) What effects can literary landscapes have on the landscapes we live in? Landscapes include settlements, cities, wildernesses, "frontiers," suburbia, and infrastructural scenes. Relevant technologies include the postal service, the railroad, the telegraph and telephone, the automobile, commercial aviation, and Skype. Texts may include: letters of Columbus, American Indian creation stories, early American religious texts, captivity narratives, slave narratives, and poems, short stories, and novels from the 17th to the 21st centuries, as different from one another as Dickinson's "Nature-sometimes sears a Sapling-" and Annie Proulx's *Brokeback Mountain*.

Artificial intelligence (AI) is already transforming society and every industry today. In order to ensure that AI serves the collective needs of humanity, we as computer scientists must guide AI so that it has a positive impact on the human experience. This course is an introduction to harnessing the power of AI so that it benefits people and communities. We will cover a number of general topics such as: agency and initiative, AI and ethics, bias and transparency, confidence and errors, human augmentation and amplification, trust and explainability, and mixed-initiative systems. We explore these topics via readings and projects across the AI spectrum, including: dialog and speech-controlled systems, computer vision, data science, recommender systems, text summarization, and UI personalization, among others.

In this course we will examine the various ways Black scholars, artists, & writers use science fiction and visionary fiction to imagine freedom and new world orders. We will focus on the role of history, particularly slavery, in the Black radical imagination. "Freedom" is the keyword throughout the course. We will grapple with the various and sometimes conflicting meanings and uses of freedom as it relates to blackness, gender, sexuality, class and ability. We will explore multiple forms of scholarship and cultural productions, including film, music, novels, short-stories, art, poetry, and other academic texts. All students will be asked to discover and develop their writerly voices through various critical, creative, experimental and performative assignments.

Are Feminism and Science compatible commitments? What do these nouns mean when paired with one another, when capitalized (or not), when pluralized (or not), and when deployed by a range of authors in different disciplines? Scholars of feminist science and technology studies (FSTS) have addressed these questions in their studies of scientific objectivity, technological vulnerability, environmentalism, and the makings (or doings) of race as well as gender. We will explore these questions and topics with a view to identifying the range of ethical, political, and epistemological practices within feminist and critical technoscience. We will read theoretical texts in FSTS, such as Donna Haraway's "Situated Knowledges" and Safiya Umoja Noble's "A future for intersectional black feminist technology studies." We will also read case studies, such as Pat Treusch's "The Art of Failure in Robotics" and Emily Martin's "The Egg and the Sperm: How Science Has Constructed a Romance Based on Stereotypical Male-Female Roles." While our preliminary readings will be set in advance, students will help shape the syllabus as we advance toward a better understanding of feminist technoscience's potentials and limitations at a time when technical change often outpaces careful consideration of its consequences.

**Requirements/Evaluation:** discussion participation; five response papers (~2 pages); mid-semester essay (8 pages); annotated bibliography; final essay (12-15 pages + in-class presentation)

We will examine and elucidate several branches of feminist theory. We will also examine feminist accounts of contemporary technoscientific work as well as critical STS with a focus on race.

## SELF-INSTRUCTIONAL LANGUAGES (Div I)

### American Sign Language

Administrative Director: Shaina Adams-EI Guabli

The Self-Instructional Languages Program (SILP) enables students to study important foreign languages relevant to their academic interests but not taught in regular courses at Williams. The program can field a limited number of courses per year; a Self-Instructional Languages course will be scheduled only if and when at least two students are accepted for study and a tutor/examiner have been contracted. In the past, we have offered one-year long Elementary Hebrew, Hindi, Korean, Persian, Portuguese, and Swahili courses. In 2022-23, American Sign Language has been added to the offerings. Students work independently with standard language textbooks and audio materials for roughly ten hours per week and attend twice-weekly group review sessions with tutors who are native speakers. Language faculty from other institutions provide the course syllabus, conduct the exams, and determine the final grades. An organizational meeting for enrolled students is held the first week of each semester.

**Interested students must complete an [application](#) and have it approved before registering for a course.** More information can be found on the [Self-Instructional Languages site](#).

Note that like other elementary language courses, the Self-Instructional Languages courses are hyphenated, meaning no credit is given for the first semester if the second semester is not completed. Students must normally begin a course in the fall semester. It cannot be taken Pass/Fail.

A consecutive year of intermediate language study will be considered only upon petition of those students completing a full year of elementary study with the Self-Instructional Languages Program and as long as a minimum of two students are enrolled to continue their language study.

All courses adhere to the guidelines of the National Association of Self-Instructional Language Programs (NASILP).

#### CRSL 101 (F) American Sign Language

**Interested students must complete an application through the Self-Instructional Languages Program and have it approved before registering for this course.** Introduction to the alphabet and language structure with emphasis on communicative skills. Students will receive a foundation in the language, be able to hold simple conversations, and use a range of vocabulary related to daily activities and transactions. Students must be highly motivated in self-instructional learning, and will work with an outside tutor/examiner. This is a hyphenated course and requires a full-year of study in order to receive credit. More information can be found on the Self-Instructional Languages site.

**Class Format:** Twice weekly review sessions

## SELF-INSTRUCTIONAL LANGUAGES (Div I)

### SWAHILI

**Administrative Director: Shaina Adams-EI Guabli**

The Self-Instructional Languages Program (SILP) enables students to study important foreign languages relevant to their academic interests but not taught in regular courses at Williams. The program can field a limited number of courses per year; a Self-Instructional Languages course will be scheduled only if and when at least two students are accepted for study and a tutor/examiner have been contracted. In the past, we have offered one-year long Elementary Hebrew, Hindi, Korean, Persian, Portuguese, and Swahili courses. In 2022-23, American Sign Language has been added to the offerings. Students work independently with standard language textbooks and audio materials for roughly ten hours per week and attend twice-weekly group review sessions with tutors who are native speakers. Language faculty from other institutions provide the course syllabus, conduct the exams, and determine the final grades. An organizational meeting for enrolled students is held the first week of each semester.

**Interested students must complete an [application](#) and have it approved before registering for a course.** More information can be found on the [Self-Instructional Languages site](#).

Note that like other elementary language courses, the Self-Instructional Languages courses are hyphenated, meaning no credit is given for the first semester if the second semester is not completed. Students must normally begin a course in the fall semester. It cannot be taken Pass/Fail.

A consecutive year of intermediate language study will be considered only upon petition of those students completing a full year of elementary study with the Self-Instructional Languages Program and as long as a minimum of two students are enrolled to continue their language study.

All courses adhere to the guidelines of the National Association of Self-Instructional Language Programs (NASILP).

#### **CRSW 101 (F) Elementary Swahili**

**Interested students must complete an application through the Self-Instructional Languages Program and have it approved before registering for this course.** Introduction to the alphabet and language structure with emphasis on communicative skills. Students will receive a foundation in the language, be able to hold simple conversations, use a range of vocabulary related to daily activities and transactions, and gain familiarity with basic, frequently used grammatical structures and the writing system of the language. Students must be highly motivated in self-instructional learning, and will work with an outside tutor/examiner. This is a hyphenated course and requires a full-year of study in order to receive credit. More information can be found on the Self-Instructional Languages site.

**Class Format:** Twice-weekly review sessions

The disciplines of anthropology and sociology aim to teach students how to enter into the social/cultural worlds of others, how to grasp those worlds from the viewpoints of their inhabitants, and how to articulate those denizens' habits of mind, worldviews, and values to broader audiences.

**Anthropology** critically analyzes social forms and practices in all their local and global diversity, illuminating the cultural grounding of the ideologies, narratives, and structures in which we are all implicated. **Archaeology** extends this analysis to social formations of the historical and prehistorical past. **Sociology** studies the nature and trajectories of modernity, examining the intricacies of industrial and post-industrial societies and the dilemmas that confront individuals in modern social systems. These disciplines introduce students to classical and contemporary theories that illuminate the contours and contradictions of social experience. The Anthropology & Sociology program promotes a critical engagement with these theories while at the same time bringing evidence and case studies into conversation with theory.

The Department emphasizes qualitative fieldwork in its many forms. We teach students how to formulate, frame, and address intellectual problems. We also teach students the empirical methods widely used in anthropology, sociology, and other related disciplines, including, but not limited to ethnography, participant observation, interviewing, discourse and visual analysis, archival research, oral history, and archaeological methods.

Because the program emphasizes critical thinking skills to assess social claims made by others, and the application of anthropological and sociological skills to present day concerns, undergraduate training in Anthropology or Sociology has proven invaluable to majors pursuing a range of careers, including public policy, diplomacy, international development, marketing, social media development, K-12 education, journalism, medicine, and law.

### MAJORS

The department offers separate majors in both Anthropology and Sociology, with a broad and diverse array of courses in both disciplines. The department is committed, however, to the unity of the social sciences. To this end, Anthropology and Sociology offer joint core courses in methodology

and theory, as well as several elective courses in common. All joint courses are designated "ANSO."

## **Requirements**

For the degree in Anthropology or Sociology, students must complete a minimum of nine courses as outlined below:

### **Core Courses**

Majors in both disciplines must take a sequence of four core courses. Three of these are joint (ANSO) courses. The sequences are:

#### **Anthropology**

ANTH 101 How to Be Human

#### **Sociology**

SOC 101 Invitation to Sociology

#### **Joint Courses**

ANSO 205 Ways of Knowing

ANSO 305 Social Theory

ANSO 402 Senior Seminar

### **Elective Courses**

Majors in Anthropology or Sociology must take five elective courses from the course listings of their respective disciplines or from the joint ANSO listings. Two of the courses chosen are normally at the 300 level or above. In close consultation with their departmental advisors, students may take some selected courses from other disciplines to fulfill major requirements in either Anthropology or Sociology.

Majors in each wing of the department are allowed to count up to two courses in the other wing towards fulfillment of their major requirements.

## **STATISTICS AND DATA ANALYSIS**

In addition to the nine total courses required for the major, it is recommended that Anthropology and Sociology majors take Statistics 101 or a comparable course in statistics and data analysis.

## **AREA STUDIES CONCENTRATION**

Students who wish to combine a major in Anthropology or Sociology with an Area Studies concentration are encouraged to do so. Courses taken to satisfy an Area Studies requirement may be counted toward the major with prior approval of a student's departmental advisor. The only exception to this rule is the Area Studies senior seminar, which cannot ordinarily be counted toward the Anthropology or Sociology degree.

## **LANGUAGE STUDY, STUDY ABROAD, AND WINTER STUDY**

Departmental advisors will help interested students integrate a major with study abroad, foreign language study, or field research during the winter study period. The department encourages Williams students to take advantage of established foreign study programs in Egypt, Japan, India, Hong Kong, and other countries. Because some foreign study programs do not offer courses that can be counted toward the Anthropology or Sociology degrees, however, sophomores planning to study abroad in junior year must consult with the departmental advisor before declaring a major.

## **FAQ**

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

### **Can your department or program typically pre-approve courses for major/concentration credit?**

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). We welcome discussions of curricular plans for those major who travel abroad in their junior year. However, typically, students don't have access to all the salient information until **AFTER** they have taken the course.

### **What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description, and complete syllabus including readings/assignments. The syllabus and readings/assignment information is required in cases when the course title and description are not sufficient to ascertain whether a course should count towards the major. We also request information on course hours.

### **Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

Yes. We credit two, and in special cases three courses.

### **Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

Yes. The expectation is for an intellectually rigorous semester-long course with a paper/exam component.

**Are there specific major requirements that cannot be fulfilled while on study away?**

Yes. ANSO 205, ANSO 305 and ANSO 402 are almost always taken in the department.

**Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

Yes. ANSO 305 is offered in the fall and ANSO 205 and ANSO 402 only in the spring. We advise our majors to be aware if they plan to spend all or part of their junior year abroad.

**Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:**

In one case, a student had assumed that he could take the equivalent of ANSO 205 abroad, and was disappointed to discover that was not the case. He ended up taking ANSO 205 his senior year.

**THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY**

Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W31-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.

**SOC 101 (F)(S) Invitation to Sociology (DPE)**

This course provides students with an introduction to sociological analysis and an overview of sociology as a discipline. We will focus on the relationship of individuals to the social world and become acquainted with systematic institutional analysis. Students will explore the intersection of biography, history, culture, and social structure as seen in the work of classical and contemporary social thinkers, including Marx, Durkheim, Weber, Simmel, and Goffman. Special consideration will be given to the social and cultural problems of capitalism, rationality and irrationality in modern institutions and organizations, the psychological dilemmas facing the individual in modern society, and the problem of social order and conflict.

**Requirements/Evaluation:** Thoughtful and consistent participation, reading responses, and a final project and presentation

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** first-year students and sophomores

**Expected Class Size:** 30

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course interrogates the social construction of identities, and how these differences manifest unequally in institutions. To familiarize themselves with the practice of sociology, students will sketch a research program that looks beyond individual-level explanations to address a social phenomena or social problem of interest.

**Cross-listings:** STS 210 SOC 210

**Primary Cross-listing**

Do we control our technologies, or do our technologies control us? This course will explore different philosophies of technological progress, particularly

the constructivist and determinist theories, by examining major technological systems that shaped modern society, such as the telegraph system, the electric grid, radio and television broadcasting, and the internet. Each of these innovations entailed the construction of a complex network designed to serve a mix of public and business interests, and each resulted in wide-ranging and often unforeseen changes to people's lives. Guided by pertinent readings in the history and philosophy of technology, we will look critically at the forms and consequences of technological change, seeking answers to a series of complex and important questions: Is the course of technological progress an inevitable byproduct of scientific and engineering advances, or is it contingent on social and political circumstances and choices? Does technological change reinforce the social and political status quo or challenge it? Are technological and social progress synonymous, or is there a tension between the two? One of the goals of the course will be to provide students with a more informed and critical perspective on the technological upheavals that continue to shape society today.

This course is organized around three distinct, but overlapping, concerns. The first concern is how polluting facilities like landfills, industrial sites, and sewage treatment plants are disproportionately located in communities of color. The second concern is the underlying, racist rationales for how corporations, in collaboration with state agencies, plot manufacturers of pollution. The final concern is how the environmental crises outlined in the first two sections of the course are experienced in the body. In reviewing a range of Black cultural productions--like literature, scholarship, music, and film--we will not only consider how environmental disparities physically affect human bodies, but also how embodiments of eco-crises lend to imaginaries of the relationship between the self and the natural world.

### **SOC 212 (S) Understanding Social Media**

**Cross-listings:** STS 214 SOC 212

### Primary Cross-listing

Over just the last twenty years--beginning with Friendster and MySpace and continuing through Facebook and Twitter, Snapchat and Instagram--the rise of social media has had a profound influence on the way we live. It has given a new rhythm to our daily routines, shaped the way we inform ourselves and converse with others, and transformed media and entertainment, politics and public discourse, and many other aspects of culture. This seminar course will undertake a broad and critical examination of social media, looking at it from historical, economic, legal, social, and phenomenological perspectives. The topics addressed will include social media's effects on self-image and self-formation, its influence on protest movements and political campaigns, its use as a conduit for news and propaganda, and the way commercial interests and technical characteristics have shaped its design and use. Through pertinent readings and lively discussions, and drawing on students' own experiences with social media, the course will illuminate social media's benefits and drawbacks while providing a foundation for thinking about possible legal, regulatory, and personal responses to this far-reaching and still unfolding social phenomenon.

### SOC 216 (F) The City

Modern humans have moved to the city, a site with concentrated powers of various kinds, this move has effected irreversible change in human life. We will examine these forces through readings in urban theories as well as ethnographic studies. We will address themes such as the organization of urban life, the political economy of cities, housing and homelessness, and urban planning. The city is also the chief site of cultural production and meaning, and our scope of interest will range from studying subcultures, to reading graffiti, to analyzing monuments. Bearing in mind the inexorable social change of past decades, we will reconsider some classical thought on urban life in the context of postmodern discourse, conceptualize the post-industrial and global city, and conclude with an examination of the problems faced by cities in developing countries. This course is designed to provide students with a comprehensive introduction to urban studies. Students will become familiarized with both classical and modern urban theories, and in reading ethnographies they will have an opportunity to understand some fundamental methodological approaches to the study of the city.

### SOC 217 (F) Inequality in a Classless Society: The Soviet Experiment and its Aftermath (DPE)

**Cross-listings:** ECON 107 SOC 217

### Secondary Cross-listing

All societies have to come up with some way of distributing wealth and income. In turn, individuals and groups comprising these societies grapple with,

justify, and at times contest their place in social and economic hierarchy. Complex as they are, such processes are all the more pressing in societies built on the explicit promise of economic equality, as was the case in the USSR and socialist Eastern Europe. Using the combined perspectives offered by economics, history, and sociology, this course will trace the practices and lived realities of social differentiation and income/wealth distribution brought about by the socialist experiment and intensifying after its demise. We will explore the life of class in these supposedly classless societies, and its reconfiguration after 1991, approaching class as, simultaneously, a matter of social classification, consumption differences, cultural identity, economic policy, and political power. We will study how the economic and political developments of late-socialism and the transition period generated class-based differences in all walks of life, and ask what these experiments have to teach us about inequalities and persistent social and economic divisions closer to home.

Moreover, by crossing disciplinary lines, we hope it will offer a particularly valuable perspective on such issues. Thus, we felt that it should naturally serve as a DPE course.

### **SOC 218 (S) Law and Modern Society**

This class is designed to introduce students to the field of law and society. The course begins with an overview of the various theoretical perspectives on the subject, including Durkheimian, Marxist, Foucauldian, and Weberian analyses of law and society; as well as the work of those following in the different theoretical schools established by these scholars. Informed by the theoretical overview, the next part of the course considers empirical research in selected areas of law, including tort law, criminal trial procedures, abortion and divorce law, "community justice," and the adjudication of drug offenses. Recognizing that understandings of our own legal practices are enlightened through comparisons to other legal systems, the second half of the course is primarily historical/comparative in focus. In this section, through an exploration of several case studies, American legal processes and habits are compared with related legal practices in such places as Japan, England, Scotland, Ireland, Australia, Germany, Norway, and Canada.

### **SOC 219 (S) Images and Society**

"This is obvious!" is what we say when we believe our point is irrefutable. But images are far less obvious than we may like to think. This course will create a forum for discussing the role of images in our lives, as well as the place of the visual in social inquiry. It will explore the variety of ways in which images--and even vision itself--are shaped by the social and cultural context in which they are embedded, develop skills for critical analysis of existing representations, and address the analytical possibilities and limitations of the study of signs and images. The course will touch upon a range

of visual material, from advertising to paintings, but the bulk of the course is dedicated to photography, both as an object of visual analysis and as, increasingly, a research method in social sciences. Topics for discussion include debates around truth in photography and the politics of representation, changing uses of photography in institutional settings, different photographic cultures and their anthropological and sociological significance, as well as the use of photography in social research. Primary sources for the discussions will be drawn from a variety of spheres, from Soviet propaganda posters to Indian studio portraiture, and will include the images we encounter in everyday life, media, politics, academia, "high" art and pop culture.

### **SOC 221 (S) Money and Intimacy (WS)**

Does money matter in affectionate relationships? Can dollars buy love and care? What impact does market economics have on intimate relationships? This course will examine these questions and their relevance over the course of history, considering what forces have contributed to the shift in thinking about them, and, most importantly, how sociological research and knowledge helps us understand their current status. We will look into a wide range of aspects of private life that require actors to mix personal affairs with financial transactions, including romantic encounters, marriages (and divorces), families of various kinds and compositions, child adoptions, and outsourced care for dependents to name just a few. Intimacy carries different value and content in these contexts, as so does handling exchanges within them, and negotiating the balance of intimate and economic exchanges also necessitates applying diverse strategies *vis-à-vis* the external social world. The course will simultaneously look into the changing character of the economy as it has responded to shifting social values. We will specifically focus on how previously private concerns have penetrated the public sphere and shaped the evolution of what has been dubbed 'emotional capitalism'. People skills, teamwork, emotional labor, commodification of intimacy, care, sex, and body parts, are only few examples of the central concepts at stake. Naturally, a reflection on the growth of new technologies and social media will enrich many of the discussed themes.

**Requirements/Evaluation:** Each student will be expected to submit five or six 5-6-page essays and five or six brief responses. In addition, each student will be expected to actively participate in tutorial discussions. There will be no final paper or exams.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Anthropology and Sociology majors

This course will examine the historical development and use of the nuclear bomb. Among other features of the early atomic age, the course will look at the Manhattan Project, the delivery of the bombs for combat, and the destructive effects of the bomb's initial use in Hiroshima and Nagasaki and ongoing testing in the Marshall Islands. The class will investigate the role of the nuclear arms race in the Cold War, the consequences of nuclear production on specific communities, and the implications of the atomic age on our critical understanding of technological innovation more generally. We will also consider the saliency of competing narratives interpreting America's decision (and continuing policies) to build, use, and stockpile nuclear weapons. Employing both sociological and historical perspectives, we will explore the interactions between science, politics, and culture in the nuclear age.

### **SOC 228 (S) The Panopticon: Surveillance, Power, and Inequality (DPE)**

**Cross-listings:** STS 229 SOC 228

Primary Cross-listing

Surveillance is built into the very fabric of modern life. From CCTV cameras, to supermarket loyalty cards, to the massive gathering of personal data on social media sites, people participate in today's "surveillance societies" just by doing everyday activities. This course uses the metaphor of the "Panopticon" as a doorway to engagement with traditional and new forms of surveillance. First described by philosopher and social theorist Jeremy Bentham, the Panopticon is a physical structure that enables one observer to see all inhabitants without those inhabitants knowing when they are being observed. In *Discipline and Punish*, Michel Foucault famously expanded thinking on the Panopticon as a metaphor for the "disciplinary" power that lies at the heart of inequality in modern society. Since Bentham and Foucault's time, however, surveillance technologies have changed significantly. To what extent does the concept of the Panopticon give us purchase on today's surveillance societies? How does watching people with new digital and algorithmic surveillance technologies shape the exercise of power and, in turn, (re)produce forms of inequality? Can privacy, convenience, and safety ever be truly balanced? Topics include: the historical origins and expansion of surveillance in modern societies, policing and state surveillance, and social media surveillance.

Among other topics, it will consider the concrete case of surveillance by police in Baltimore City and the question of if and when surveillance is appropriate there, given the city's ongoing crisis of citizen and police violence. Students will discuss police surveillance in a context shaped by racial segregation and class inequality.

**Cross-listings:** AMST 233 SOC 230

**Primary Cross-listing**

On the surface, remembering generally confronts us as a deeply personal act. What is more private than nostalgic reverie or the secrets of a dark and painful past? Yet even "individual" memories take shape through social frameworks, and we also remember "collectively" through shared myths, narratives, traditions, and the like. This course will explore the social dimensions of memory and remembering as well as their inevitable counterpart--forgetting. How do social frameworks inform our individual understandings of the past and shape our sense of selfhood? How and why are figures from the past cast as heroes or villains? How do collectivities celebrate past glories, and how do they deal with shameful or embarrassing episodes? How do economic and political power relations shape struggles over the past? In an increasingly global society, can we speak of "cosmopolitan" or "transcultural" forms of memory? Topics will include autobiographical memory and self-identity; memorials, museums, and monuments; reputations, commemorations, and collective trauma; silence, denial, and forgetting; and transitional justice, official apologies, and reparations.

**Requirements/Evaluation:** thoughtful and consistent class participation; an autobiographical essay (4-5 pages); four response papers (2 pages each); and a research paper (8-10 pages) with class presentation

**SOC 234 (S) How Emotions Work**

What could be more personal and unique than one's own emotions? Over the last century, sociologists, anthropologists, historians, and social psychologists have challenged this taken for granted view of emotion, revealing just how much context, institutional structures, and history shape feeling. Emotion does not just emerge from an individual's brain and body; it is also a product of intersubjective dynamics outside the individual. In this deeply interdisciplinary course, students explore how societies shape emotion. Beginning with psychological research on the brain/body connection, we build a capacious model for how social context, norms, and institutions interact with individual psychology to produce both conscious and unconscious forms of feeling. As the course progresses, we zoom further out from the individual level and unpack emotional dynamics at the national, cross-cultural, and civilizational levels. Along the way, we take a deeper look at specific emotions, including love, shame, sympathy, sadness, and happiness. The course concludes by focusing on a pressing social problem--the seemingly global crisis of mental illness on college and university campuses. What is causing this crisis? What can we do to address this issue right here in our community?

Although fewer than 1% of Americans have a degree from the country's top 30 colleges and universities, 39% of Fortune 500 CEOs, 41% of federal judges, 44% of the writing and editorial staff at the *New York Times*, 64% of Davos attendees, and 100% of Supreme Court justices do. Is this a positive sign that the United States is governed by its most talented and capable members who have risen through hard work and equal opportunity? Or a negative one pointing to the power of a corrupt and self-selecting elite? This course explores the theme of meritocracy--rule by the intelligent--in comparative perspective. We will look at both old and new arguments regarding the proper role and definition of merit in political society as well as take the measure of meritocracy in present-day Singapore, France, and the United States. The course concludes with a focus on the current debate over American meritocracy and inequality.

The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider's view of America--one that sheds light on persisting qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors' respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race.

We think of the freedom to move as a mark of privilege. In the United States, passing a driving test, owning a car, and getting a passport are milestones that signal modernity and freedom. Likewise, we think of restrictions on movement as the domain of the underprivileged, such as the current and formerly incarcerated. But as the Covid-19 pandemic reveals, there have always been two sides to immobility: privileged as well as involuntary immobility. There are correspondingly two sides to mobility: those who move because they want to and others because they have no choice. In this class, students will explore conceptions of mobility as adventurous, free, and modern (as with jet-setting international elites). They will compare and contrast when mobility can be threatening, exclusionary, and limited (as recognized by the Black Lives Matter movement). This class invites students to interpret their environment through the lens of mobility and inequality in the time of coronavirus. Drawing on sociology, anthropology, cultural studies, geography, and migration studies, this interdisciplinary course offers a beginning conversation on the causes and consequences of the freedom to move--or to stay still.

Long before the invention of the passport, states or state-like entities sought to document and manage populations and discipline bodies. This course invites students to critically reflect on documentation practices and systemic violence, particularly against racial, ethnic, sexual, and political minorities. Students will explore identity-making through documentary practices such as the three-generation life history, a biographical form that Soviet-allied countries used to reward loyalty and punish disloyalty. Labels, such as a criminal record or pre-existing health conditions, also trail or precede individuals their whole lives. Students will grapple with what happens when the paper trail goes cold--when identification documents are invalidated, birth certificates withheld, household registries purged, and archives destroyed. Students will explore the rise of surveillance and biometric data alongside the actors, technologies, and industries that try to circumvent them in places such as the Xinjiang Uyghur Autonomous Region and along the US-Mexico border. In this project-based course, students will exhume paper trails and imagine alternative ways to create, alter, and subvert them.

The world's got problems. These problems don't respect national boundaries. This class looks at how activists have engaged across borders and with transnational institutions in order to address transnational problems like class inequality, sexism, homophobia, climate change, and more. It asks: what are the different forms that transnational activism takes and how have transnational activists advanced their goals? Why and how have transnational activists' efforts failed? What are the practical and ethical difficulties associated with transnational activism? What does ethical transnational activism look like, and can it also be effective? While focusing especially on the role of transnational activism in combating sex and gender-based inequities, we will also engage with activism that targets the other axes of oppression with which sex and gender-based oppressions are inextricably entwined.

This course examines the relationship between religious and environmental thought in America. Exploring a broad range of practices, symbols, and beliefs, we will examine the religious roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have writers, thinkers, and artists from different religious and cultural backgrounds shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? How have they influenced each other to produce distinctively American forms of eco-spirituality? In pursuit of these questions, we will consider a diverse array of topics and cases, including struggles to protect Native American

### **SOC 303 (S) Cultures of Climate Change**

**Cross-listings:** ENVI 303 SOC 303

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about what climate change means? How does something as complex as climate change become a "problem" in the first place? And what can its many proposed "solutions" tell us about the role of culture in environmental policy, politics, and decision-making. This course will explore a broad array of factors, from religion to race, class to colonialism. Emphasizing ethnographic and historical accounts of climate change as lived experience, it will apply a range of theories from the social sciences and humanities to case studies from around the world.

### **SOC 308 (S) What is Power?**

**Cross-listings:** SOC 308 PSCI 306 STS 308 REL 308

**Secondary Cross-listing**

*What is power?* Despite the importance of notions of power across the social sciences, there is a broad lack of consensus. Is power essentially domination or resistance? Is it freedom, empowerment, privilege, or oppression? Are there forms of unequal social power which are morally neutral or even good? Is power the kind of thing held by individuals, races, genders, classes, discourses, causal mechanisms, institutions, or social structures? What is the connection between social and physical power? Does power obey laws? How does power relate to technology? Or knowledge? Or agency? Or ideology? This course begins with the observation that power is often described as a causal relation--an individual's power is supposed to equal their capacity to produce a change in someone else's behavior. This suggests that the better we can understand the nature of cause and effect, the better we can understand power. Fortunately, in recent decades philosophers have made significant progress in theorizing causation. Hence, this seminar will put two very different bodies of theory in conversation: **critical theory about power** and **philosophy of science about cause and effect**. We will touch on classic philosophical accounts of power and causation, but focus our attention on more recent developments in philosophy of science, political theory, and other fields. The insights we gain in this course from analyzing the nature of power should empower us to more effectively transform society. It will help students in the social sciences to understand the nature of causation in the social world, and it will help students interested in political action to better understand the nature of power. Thinkers to be considered may include: Aristotle, Amy Allen, Hannah Arendt, Bourdieu, Judith Butler, Nancy Cartwright, Foucault, Gramsci, Byung-Chul Han, Han Feizi, Giddens, Steven Lukes, Machiavelli, J.L. Mackie, Marx, Nietzsche, and Max Weber. **(Note that in 2023 this course will also fulfill the senior seminar requirement for STS)**

Why the political furor over monuments? What would a feminist city look like? Does racial justice require integration? This course trains your focus on space and place, asking you to take a socioecological perspective on race, gender, and other axes of privilege and marginalization. In it, we examine how ideas about race, gender and more shape space as well as how the design of space reinforces social constructs and power relations. After examining specific regions (the city, the suburb, the country) and their relation to one another, we examine specific sites (public transport, public toilets, libraries, houses). The course enables students to better understand the tenacity of inequity by drawing attention to its spatial dimension while at the same time introducing students to -- and providing students tools to engage in -- spatial interventions designed to disrupt vicious social-spatial cycles.

### **SOC 326 (S) Being Mortal**

One of the defining features of the human condition is our awareness of our own mortality. How do we cope with this awareness? How does it influence our social institutions? We will begin by exploring how social theorists such as Emile Durkheim, Max Weber, Ernest Becker, and Peter Berger grappled with mortality and its significance for human social life. We will then turn to the social institutions that structure our confrontation with mortality today. How, why, and with what consequences has death been "sequestered" in modern Western societies and set aside from the social world of the living? What rites and rituals remain for coping with death and dying, and how do our cultural assumptions influence the experiences of grief, loss, and mourning? How does modern medicine--which is oriented toward cure but must ultimately confront the inescapable realities of aging and death--deal with mortality? How have hospice, palliative care, and debates over physician-assisted suicide changed the landscape in recent years? How do societies cope with collective losses in the aftermath of wars, disasters, and atrocities? Our focus will be on the United States, but we will also consider cross-cultural comparisons.

### **SOC 329 (F) Work and the Future of Capitalism**

What does it mean to work? How does capitalism shape the way we work? What might work look like in the future? In this three-part course, students engage with global capitalism's past, present, and future, asking analytic and normative questions about work and the trajectory of capitalism. The first part of the course examines the historical origins of capitalism and leading theories about what capitalism is and how it stratifies the world into racialized social classes. A central theme in part one will be how capitalist labor relations shape meaning and subjectivity, particularly the experience of dignity. In part two, we examine recent and emerging trends in capitalist labor, such as the death of the career, the rise of the "gig" economy, platform capitalism, and even the seemingly inevitable end of work itself as entire occupations become automated by machine learning. A key question will be how these transformations exacerbate and/or alleviate longstanding inequalities from capitalism's 19th century past. The course concludes by asking students to imagine a better vision for work in the next century. Should we continue to work at all? What kinds of productive activity should we value, and how would we go about taming, eroding, or even smashing capitalism to allow them to flourish?

We live in a world of nation-states. The world map, according to journalist Joshua Keating, is "itself as an institution, an exclusive club of countries" that rarely accepts new members. Throughout the course, we question how countries conquered the world and became the taken-for-granted political unit. We do so, paradoxically, by looking at contemporary nations that do not appear on the world map. These include nations without statehood, such as Somaliland; those that span countries, including indigenous nations across the US and Canada; and nations that have lost their countries, such as Palestine and South Vietnam. By interrogating "nowheres," we tease out what it means to be a country, and pinpoint when and why the definitions do not apply uniformly. Students will reflect on why the world map has been so remarkably static since the end of the Cold War. We will further probe the social, political, and human costs of the exceptions to this general rule. Students will raise questions and attempt answers to what our interconnected world means for "nowheres" looming on the horizon--nation-states that, as a result of climate change, will soon vanish.

**SOC 338 (F) Transhumanism: Religion, Technoscience, Obsolescence**

**Cross-listings:** HSCI 338 SOC 338 STS 338 REL 338

**Primary Cross-listing**

This interdisciplinary seminar invites students to pursue sociohistorical analysis and sustained critical discussion of the transhumanist movement and its overriding aims: the augmentation, transformation, and eventual transcendence of human biological constitution; the realization, through speculative technoscientific means, of an enhanced or even "postbiological existence"--a "posthuman condition," "Humanity 2.0." Through close readings of primary historical documents, transhumanist texts, scholarship on transhumanism, works of science-fiction film, literature, and popular culture, we will position the movement as an empirical conduit through which to explore the sociohistorical conditions under which transhumanist ideas and practices have emerged, circulated, and taken up residence. To that end, we will consider the ties of transhumanism to eugenics and massive investments in pharmaceuticals, anti-aging medicine, and so-called "GNR" technologies (i.e. genetics, nanotechnology, and artificial intelligence and robotics); the movement's affinities with neoliberalism and what some have pointed to as transhumanism's racialized subtext of whiteness. We will furthermore devote considerable attention to the technological singularity, the figure of the cyborg, mind-uploading, space colonization, and cryonic suspension, all of which, like transhumanism broadly, suggest that science and technology have in some sense come to operate as powerful channeling agents for the very sorts of beliefs, practices, and forms of association that theorists of secularization expected modernity to displace. Lastly, throughout the course of the seminar we will take transhumanism as a provocation to think broadly and seriously about religion, technology, embodiment, and ways of being human.

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the war Russia is currently waging on Ukraine, or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through

ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Bulgaria, Poland, and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

**Requirements/Evaluation:** 5-page paper every other week, written comments on the partner's paper in alternate weeks

**Prerequisites:** none

**Writing Skills Notes:** This is a tutorial course, with plenty of opportunities to work on writing and argumentation. Tutorial papers receive written feedback from both the instructor and the tutorial partner, and are workshopped during the tutorial meetings.

**Difference, Power, and Equity Notes:** Students will learn to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. We will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

**SOC 362 (S) Stories We Tell (WS)**

**Cross-listings:** SOC 362 COMP 362

**Primary Cross-listing**

From The Moth to StoryCorps to Williams College's own Storytime, stories are ubiquitous in contemporary society. Indeed, sociologists have argued that social life is itself "storied"--that we locate ourselves within familiar narrative structures, using them to "construct" identities and "tell" our lives. Stories, in this view, are not only the stuff of literature, but also the very fabric of social life: the foundation for individual and collective identities. This course grapples with the role of stories and storytelling in modern social life. What role do stories play in constituting personal identity? What cultural templates structure the stories we tell? Why are memoirs so popular, and how can we explain the more recent resurgence of interest in oral forms of storytelling? What role does storytelling play in politics and social movements? Specific topics will include confessional culture, podcasts, memoir, politics, and social change. Along the way, we will pay explicit attention to medium, and consider how sociologists might learn from journalists, documentarians, and memoirists to convey stories from their own research.

**Requirements/Evaluation:** 5-page paper every other week; written comments on a partner's paper in alternate weeks

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** if overenrolled, students will be asked to submit a short statement of interest

**Expected Class Size:** 10

**Writing Skills Notes:** As a tutorial, this course includes consistent opportunities to develop skills in writing and argumentation. Partners will alternate between receiving detailed written feedback (from both the instructor and a peer) and offering constructive comments. At the end of the semester, students will have the opportunity to revise one of their essays, implementing and solidifying what they have learned.

**Not offered current academic year**

**SOC 380 (S) Who Cares? (DPE)**

What does it mean to care--about a person, a situation, or a cause? We often assume that care arises spontaneously and organically. Yet both feelings of care and acts of care always take shape in social contexts. In this course, we will uncover and critically interrogate the norms surrounding caring, caregiving, and care-receiving in our own communities. What social factors influence our willingness to offer care, and to accept it from others? Why is caregiving so heavily gendered and racialized? Is care inevitably corrupted by capitalism? Specific topics will include domestic work and reproductive labor; child welfare and foster care; therapy and mental health care; the discourse of self-care; and social movements that center around enacting care. The course will culminate in a significant experiential learning component: as a class, we will work collaboratively to design and implement a project that pushes or challenges the "care norms" in the northern Berkshires.

**Requirements/Evaluation:** thoughtful and consistent class participation; weekly journal entries (1-2 pages each); collaboratively designed experiential learning project; and a final paper (6-8 pages)

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** if overenrolled, students will be asked to submit a short statement of interest

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course centers the relationship between structural inequality and the cultural norms surrounding caregiving and care-receiving. Throughout the semester, we will reflect on how care norms both reflect and perpetuate larger systems of inequality, especially race and gender. Through a student-designed experiential learning project, we will strive to create social change in the local community.

**Cross-listings:** SOC 390 PSCI 380

**Secondary Cross-listing**

Something has happened to America over the past fifteen years. Large minorities of young adults, especially young men, are now celibate. Cohabitation has skyrocketed but marriage is disappearing, and the country's birth rate is at an all-time low. Not surprisingly, loneliness has become epidemic. A similar story can be told for most other developed countries. The implications for political polarization, economic growth, social insurance programs, public health, military defense, even national survival are grim. What is the cause of this loss of faith in the future? Can public policy reverse these trends? This course is an investigation into relations between the sexes in the developed world, the fate of children and the family, and government attempts to shape them. The course investigates family models in historical and comparative context; the family and the welfare state; the economics of sex, gender, marriage, and class inequality; the dramatic value and behavioral changes of Gen Z around sex, cohabitation, and parenthood; and state policies to encourage partnership/marriage and childbearing in both left-wing (Scandinavia) and right-wing (Central Europe) variants.

**SOC 16 (W) The Lives of Infamous Men**

Michel Foucault is famous for his analysis of how power and knowledge are interwoven in institutions such as the prison or the clinic. Less well known are the life stories that Foucault exhumed from the archives of these institutions. These stories, such as that of a parricidal peasant assumed to be insane and an intersex individual raised in a convent but later legally identified as a man, provoke questions about the self, identity, knowledge, power, and resistance. We will explore the violence done to lives when they are made to conform to the neatness of the archive and ask how we might do justice to these lives as historians. This class will include a research project in which students will collaborate to curate a biographical exhibit in the Williams Library.

### MAJOR IN STATISTICS

The major in Statistics is designed to meet three goals: to introduce some of the central ideas of information and data science, to develop problem-solving ability by teaching students to combine creative thinking with rigorous reasoning, and to develop interdisciplinary skills by applying statistics to an application area of interest.

### REQUIREMENTS (10 courses plus colloquium)

The major in Statistics consists of ten courses plus a colloquium requirement. The major includes courses in mathematics, computer science and statistics. Students interested in continuing their study of statistics in graduate school should strongly consider taking Math 350/351 in addition to the other requirements.

### Mathematics (2 courses)

MATH 150 or 151 Multivariable Calculus or equivalent high school course

MATH 250 Linear Algebra

Except in unusual circumstances, students planning to major in statistics should complete the calculus sequence (MATH 130, 140, 150/151)

before the spring of the sophomore year, at the latest. MATH 150 is a prerequisite for STAT 201 and MATH 250 is a prerequisite for STAT 346.

### **Computer Science (1 course)**

CSCI 134 Intro to Computer Science or CSCI 135 Diving into the Deluge of Data or CSCI 136 Data Structures and Advanced Programming or some other course in the Computer Science Department with prior approval of the Math/Stat department.

### **Core Courses (4 courses)**

STAT 201 Statistics and Data Analysis, STAT 202 Introduction to Statistical Modeling or STAT 302 Applied Statistical Modeling

STAT 346 Regression and Forecasting

STAT 341 Probability

STAT 360 Inferential Statistics

### **Continuation (2 courses)**

Any two courses among the 300 or 400 level courses in the department with a STAT prefix.

### **Capstone Course (1 course)**

The capstone course is a 400-level STAT course taken in the senior year. Although the specific methodological emphasis of the course may vary from year to year, an in-depth project with both a written report and an oral presentation is typically part of the capstone course.

### **Pass/Fail policies during the Academic Year 2020-2021**

Information about the Department of Mathematics and Statistics Pass/Fail policies during the Academic Year 2020-2021 can be found [here](#).

### **Colloquium Requirement**

Participation in the Department Colloquium, in which each senior major presents a talk on a mathematical or statistical topic of their choice. Each major must also attend at least 20 colloquia (15 during the Academic Year 2020-2021), and up to 5 attendances may be counted in their junior year. Up to 5 colloquia in mathematics or computer science may also be counted. Students engaged in study away may petition the department in advance to count up to 5 suitable colloquia attendances from their study away program.

### **PLACEMENT**

Students with an AP Stat score of 5 or 4 are placed in the advanced introductory course Stat 202.

### **NOTES**

**Substitutions, Study Abroad, and Transfer Credit:** In some cases, and with prior permission of the Mathematics and Statistics Department, appropriate courses from other institutions may be substituted for the application and continuation requirements, but at least eight courses must be taken from the Department of Mathematics and Statistics at Williams.

These can, with prior permission, include courses taken away. Students with transfer credit should contact the department about special arrangements.

**Double Counting:** No course may count towards two different majors.

**Early Senior Capstone Course:** In exceptional circumstances, with the prior permission of the department, a student may be allowed to satisfy the Senior Capstone Course requirement in the junior year, provided that the student has completed at least three 300-level statistics courses before enrolling in the capstone course.

**Planning Courses:** Core courses are normally offered every year. Other 300 and 400 level statistics courses are offered on an irregular basis. Students should check with the department before planning far into the future.

**Course Admission:** Courses are normally open to all students meeting the prerequisites, subject to any course caps. Students with questions about the level at which courses are conducted are invited to consult department faculty.

### **FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in many cases, though students should be sure to contact the department.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description, and complete syllabus including readings/assignments.

**Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study**

away?

No.

**Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

Yes. They have to be approved MATH/STAT courses.

**Are there specific major requirements that cannot be fulfilled while on study away?**

Yes. Colloquium requirement, Senior Seminar requirement.

**Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

Yes. The highly cumulative structure of the major.

**Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:**

None to date.

## THE DEGREE WITH HONORS IN STATISTICS

The degree with honors in Statistics is awarded to the student who has demonstrated outstanding intellectual achievement in a program of study which extends beyond the requirements of the major. The principal considerations for recommending a student for the degree with honors will be: Mastery of core material and skills, breadth and, particularly, depth of knowledge beyond the core material, ability to pursue independent study of statistics, originality in methods of investigation, and, where appropriate, creativity in research.

An honors program normally consists of two semesters (STAT 493 and 494) and a winter study (WSP 031) of independent research, culminating in a thesis and a presentation. During the Academic Year 2020-2021 the winter study requirement for the honors program in Statistics is waved. One of STAT 493 or STAT 494 can count as a continuation course, but not both. Neither counts as the 400-level senior capstone course.

An honors program in actuarial studies requires significant achievement on four appropriate examinations of the Society of Actuaries.

Highest honors will be reserved for the rare student who has displayed exceptional ability, achievement or originality. Such a student usually will have written a thesis or pursued actuarial honors. In all cases, the award of honors and highest honors is the decision of the Department.

## STAT 101 (F)(S) Elementary Statistics and Data Analysis (QFR)

It is impossible to be an informed citizen in today's world without an understanding of data. Whether it is opinion polls, unemployment rates, salary differences between men and women, the efficacy of vaccines, etc, we need to be able to interpret and gain information from statistics. This course will introduce the common methods used to analyze and present data with an emphasis on interpretation and informed decision making.

**STAT 201 (F)(S) Statistics and Data Analysis (QFR)**

Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped back, "Data, data, data! I can't make bricks without clay." In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves computational programming and incorporates modern statistical techniques.

**Requirements/Evaluation:** weekly homework and projects, midterm exams, and a final exam.

**STAT 202 (F)(S) Introduction to Statistical Modeling (QFR)**

Data come from a variety of sources: sometimes from planned experiments or designed surveys, sometimes by less organized means. In this course we'll explore the kinds of models and predictions that we can make from both kinds of data, as well as design aspects of collecting data. We'll focus on model building, especially multiple regression, and talk about its potential to answer questions about the world -- and about its limitations. We'll emphasize applications over theory and analyze real data sets throughout the course.

**Requirements/Evaluation:** Homework problems; quizzes; exams; a final project (on a topic that interests you!). Participation matters! Engagement with your peers is an important part of learning, of being a statistician in the Real World...and of your evaluation in this course. While your assignments will be submitted (and graded) individually, you'll be responsible for giving and receiving peer feedback, contributing to class discussions, and working together with classmates on practice problems.

**Prerequisites:** MATH 140 and STAT 101/161/201/AP Statistics 4/5, or permission of instructor.

**Enrollment Limit:** 40

**Enrollment Preferences:** Prospective Statistics majors and more senior students

**STAT 302 (S) Applied Statistical Modeling (QFR)**

Data may come from various sources and studies with different purpose of analysis. Statistical modeling provides a unified framework to embrace different data types, and focuses on the goals of understanding relationships, assessing differences and making predictions. We will explore different types of statistical models (linear regression, ANOVA, logistic regression etc), and focus on their conditions, the interactive modeling process, as well as the statistical inference tools for drawing conclusions from them. Throughout the course, real datasets will be modeled for interesting questions about the world, and the limitations will be addressed as well.

**Requirements/Evaluation:** weekly homework assignments, quizzes, exams and a course project.

### **STAT 310 (F) Data Visualization (QFR)**

This course is about preparing, visualizing, reporting and presenting different types of data. We will start with creating common plots (e.g., barcharts, histograms, density plots, boxplots, time series and lattice plots), but also discuss visualizing results of statistical models, such as linear or logistic regression models. We will use the ggplot library in R but then switch to the plotly library for interactive graphs with mouse-over and click events. Using R's shiny and DT libraries, we will learn how to create and publish web-apps and dashboards that explore datasets and support online filtering. We will end the class with creating web apps that contain multiple graphs or maps which react to user inputs (such as selecting which variables to plot) or provide real time monitoring of streaming data. Throughout, we will use version control software (Github) to organize and keep track of our code. This course will be taught in a semi-flipped style. While the instructor will introduce certain topics, students will often be responsible for reading material ahead of time and then work individually or in pairs to reproduce material or implement it on their own data.

**Requirements/Evaluation:** Grading will almost entirely be based on class participation, individual and team-work, project presentations and the student's portfolio.

**Prerequisites:** Stat 201/202/302; Good knowledge of R

**Enrollment Limit:** 15

**Enrollment Preferences:** Preference may be given to stats majors who need the course in order to graduate, but then random selection.

### **STAT 315 (S) Applied Machine Learning (QFR)**

How does Netflix recommend films based on your viewing history? How does Facebook group its users and send out targeted ads? How did Google select from thousands of search terms to predict flu? Machine learning (ML) is a rapidly growing field that is concerned with algorithms and models to find patterns in data and solve these practical problems at the intersection between statistics, data science and computer science. This course provides a broad introduction to ideas and methods in machine learning, with emphasis on statistical intuitions and practical data analysis. Topics including regularized regression, SVM, supervised/unsupervised learning, text analysis, neural networks will be covered. Students will use R extensively throughout the course while getting introduced to some ML tools in Python.

**Class Format:** Students cannot take both STAT 315 and STAT 442. Only one of the two can be taken for credit.

**Requirements/Evaluation:** weekly homework, one class project, and two or three exams

**Prerequisites:** MATH 140, and STAT 201/202, or equivalent; or permission of instructor. Students cannot take both STAT 315 and STAT 442. Only one of the two can be taken for credit.

**STAT 319 (S) Statistical Computing (QFR)**

This course introduces a variety of computational and data-centric topics of applied statistics, which are broadly useful for acquiring, manipulating, visualizing, and analyzing data. We begin with the R language, which will be used extensively throughout the course. Then we'll introduce a variety of other useful tools, including the UNIX environment, scripting analyses using bash, databases and the SQL language, alternative data formats, techniques for visualizing high-dimensional data, and text manipulation using regular expressions. We'll also cover some modern statistical techniques along the way, which are made possible thanks to advances in computational power. This course is strongly computer oriented, and assignments will be project-based.

**Requirements/Evaluation:** based primarily on projects, homework, and exams

**Prerequisites:** STAT 201 or 202 and CSCI 134, 135, or 136

**STAT 335 (S) Biostatistics and Epidemiology (QFR)**

Epidemiology is the study of disease and disability in human populations, while biostatistics focuses on the development and application of statistical methods to address questions that arise in medicine, public health, or biology. This course will begin with epidemiological study designs and core concepts in epidemiology, followed by key statistical methods in public health research. Topics will include multiple regression, analysis of categorical data (two sample methods, sets of 2x2 tables, RxC tables, and logistic regression), survival analysis (Cox proportional hazards model), and a brief introduction to regression with correlated data.

**Requirements/Evaluation:** evaluation will be primarily based on weekly homework, two midterm exams, a final exam, and a data analysis project

**Prerequisites:** STAT 201, STAT 202 and MATH 140, or permission of instructor

**Enrollment Limit:** 15

The historical roots of probability lie in the study of games of chance. Modern probability, however, is a mathematical discipline that has wide applications in a myriad of other mathematical and physical sciences. Drawing on classical gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables (both discrete and continuous), distribution and expectation, independence, laws of large numbers, and the well-known Central Limit Theorem. Many interesting and important applications will also be

presented, including some from classical Poisson processes, random walks and Markov Chains.

**Requirements/Evaluation:** homework, classwork, and exams

### **STAT 342 (S) Introduction to Stochastic Processes (QFR)**

Stochastic processes are mathematical models for random phenomena evolving in time or space. Examples include the number of people in a queue at time  $t$  or the accumulated claims paid by an insurance company in an interval of time  $t$ . This course introduces the basic concepts and techniques of stochastic processes used to construct models for a variety of problems of practical interest. The theory of Markov chains will guide our discussion as we cover topics such as martingales, random walks, Poisson process, birth and death processes, and Brownian motion.

### **STAT 344 (F) Statistical Design of Experiments (QFR)**

When you hear the word experiment you might be picturing white lab coats and pipettes, but businesses, especially e-commerce, are constantly experimenting as well. How do you get the most out of both scientific and business investigations? By doing the right experiment in the first place. We'll explore the techniques used to plan experiments that are both efficient and statistically sound. We'll learn how to analyze the data that come from these experiments and the conclusions we can draw from that analysis. We'll look at both classical tools like fractional factorial designs as well as optimal design, and see how these two frameworks differ in their philosophy and in what they can do. Throughout the course, we'll make extensive use of both R and JMP software to work with real-world data.

**Requirements/Evaluation:** Homework problems--both individual and in groups, midterm, final, and projects (on topics that interest you!).

**Prerequisites:** STAT 161 or 201 or 202, or equivalent, and Math 140 or equivalent, or permission of instructor

**STAT 346 (F)(S) Regression Theory and Applications (QFR)**

This course focuses on the building of empirical models through data in order to predict, explain, and interpret scientific phenomena. Regression modeling is the most widely used method for analyzing and predicting a response data and for understand the relationship with explanatory variables. This course provides both theoretical and practical training in statistical modeling with particular emphasis on simple linear and multiple regression, using R to develop and diagnose models. The course covers the theory of multiple regression and diagnostics from a linear algebra perspective with emphasis on the practical application of the methods to real data sets. The data sets will be taken from a wide variety of disciplines.

**Requirements/Evaluation:** Weekly homework, theory and data analysis exams, final course project.

To better understand complex processes, we study how variables are related to one another, and how they work in combination. Therefore, we want to make inferences about more than one variable at time? Elementary statistical methods might not apply. In this course, we study the tools and the intuition that are necessary to analyze and describe such data sets. Topics covered will include data visualization techniques for high dimensional data sets, parametric and non-parametric techniques to estimate joint distributions, techniques for combining variables, as well as classification and clustering algorithms.

**STAT 356 (F) Time Series Analysis (QFR)**

Time series -- data collected over time -- crop up in applications from economics to engineering to transit. But because the observations are generally not independent, we need special methods to investigate them. This course will include exploratory methods and modeling for time series, including descriptive methods and checking for significance, and a foray into the frequency domain. We will emphasize applications to a variety of real data, explored using R.

**Requirements/Evaluation:** Evaluation is primarily based on quizzes and projects (on topics that interest you!). You'll be given the opportunity to assess your own work and resubmit/reattempt assignments as you gain mastery of a topic. Participation matters! Engagement with your peers is an important part of learning, of being a statistician in the Real World...and of your evaluation in this course. While most assignments will be submitted (and graded) individually, you'll be responsible for giving and receiving peer feedback, contributing to live and online discussions, and working together with classmates on practice problems.

### **STAT 358 (S) Introduction to Categorical Data Analysis (QFR)**

This course focuses on methods for analyzing categorical response data. In contrast to continuous data, categorical data consist of observations classified into two or more categories. Traditional tools of statistical data analysis (such as linear regression) are not designed to handle such data and pose inappropriate assumptions. We will develop methods specifically designed for modeling categorical data, with applications in the social and biological sciences as well as in medical research, engineering and economics. This course has two parts. The first part will discuss statistical inference for parameters of categorical distributions (Bernoulli, Binomial, Multinomial, Poisson) and for measures of association arising in contingency tables (difference and ratio of proportions and odds ratios). Inferential methods covered include Wald, score and likelihood ratio tests and confidence intervals, as well as the bootstrap. The longer second part will focus on statistical modeling of categorical response data via generalized linear models, with a heavy focus on logistic regression models with both quantitative and categorical predictors and their interactions. Model fitting and inference will be based on maximum likelihood and carried out via R.

**Requirements/Evaluation:** Weekly homework assignments consisting of exercises from the textbook as well as data analysis problems, carried out using R. Occasional short in-class quizzes at the beginning of class. One Midterm (with both in-class and take-home component). Final Project with presentation. Final exam. Homework accounts for roughly 15% of the grade, quizzes for another 15%, midterm (in-class and take-home combined) and final for about 30% each, and project for the remaining 10%.

How do we estimate unknown parameters and express the uncertainty we have in our estimate? Is there an estimator that works best? Many topics from introductory statistics such as random variables, the central limit theorem, point and interval estimation and hypotheses testing will be revisited and put on a more rigorous mathematical footing. The focus is on maximum likelihood estimators and their properties. Bayesian and computer

intensive resampling techniques (e.g., the bootstrap) will also be considered.

### **STAT 365 (F) Bayesian Statistics (QFR)**

The Bayesian approach to statistical inference represents a reversal of traditional (or frequentist) inference, in which data are viewed as being fixed and model parameters as unknown quantities. Interest and application of Bayesian methods have exploded in recent decades, being facilitated by recent advances in computational power. We begin with an introduction to Bayes' Theorem, the theoretical underpinning of Bayesian statistics which dates back to the 1700's, and the concepts of prior and posterior distributions, conjugacy, and closed-form Bayesian inference. Building on this, we introduce modern computational approaches to Bayesian inference, including Markov chain Monte Carlo (MCMC), Metropolis-Hastings sampling, and the theory underlying these simple and powerful methods. Students will become comfortable with modern software tools for MCMC using a variety of applied hierarchical modeling examples, and will use R for all statistical computing.

### **STAT 368 (S) Modern Nonparametric Statistics (QFR)**

Many statistical procedures and tools are based on a set of assumptions, such as normality or other parametric models. But, what if some or all of these assumptions are not valid and the adopted models are miss-specified? This question leads to an active and fascinating field in modern statistics called nonparametric statistics, where few assumptions are made on data's distribution or the model structure to ensure great model flexibility and robustness. In this course, we start with a brief overview of classic rank-based tests (Wilcoxon, K-S test), and focus primarily on modern nonparametric inferential techniques, such as nonparametric density estimation, nonparametric regression, selection of smoothing parameter (cross-validation), bootstrap, randomization-based inference, clustering, and nonparametric Bayes. Throughout the semester we will examine these new methodologies and apply them on simulated and real datasets using R.

**STAT 372 (S) Longitudinal Data Analysis** (QFR)

This course explores modern statistical methods for drawing scientific inferences from longitudinal data, i.e., data collected repeatedly on experimental units over time. The independence assumption made for most classical statistical methods does not hold with this data structure because we have multiple measurements on each individual. Topics will include linear and generalized linear models for correlated data, including marginal and random effect models, as well as computational issues and methods for fitting these models. As time permits, we will also investigate joint modeling of longitudinal and time-to-event data. We will consider many applications in the social and biological sciences.

In both science and industry today, the ability to collect and store data can outpace our ability to analyze it. Traditional techniques in statistics are often unable to cope with the size and complexity of today's data bases and data warehouses. New methodologies in Statistics have recently been developed, designed to address these inadequacies, emphasizing visualization, exploration and empirical model building at the expense of traditional hypothesis testing. In this course we will examine these new techniques and apply them to a variety of real data sets.

**STAT 19 (W) Chess and Speed Chess**

This course will present a fast and fun introduction to chess, speed chess, and multi-player variants of classical chess. We'll begin with the rules of chess, and a study of classical openings, theory, checkmates, and endgames. These concepts will be practiced through in-class games. We will always make use of chess clocks, limiting a player's total thinking time. Chess clocks are an important part of tournament chess and speed chess, and are critically important in several chess variants we'll explore. This will open up your eyes to the high-paced, social, and extremely fun nature of recreational chess. Students will immensely enjoy learning and playing these variants, and will be surprised at how much fun chess can be. The course will culminate in a series of informal tournaments among the class.

#### THE MAJOR IN SPANISH

Students who major in Spanish can expect to acquire linguistic fluency along with in-depth knowledge of the cultures of Spain and Latin America. Through the study of the major writers and historical events of the Spanish-speaking world, our program offers training in literary analysis and linguistic expression, as well as a deep appreciation of Hispanic civilizations.

The major consists of nine courses above the 102 level. In exceptional circumstances, the Department may decide to accept RLSP 101-102 for the Spanish major. One of the nine courses must be the 400-level senior seminar taken during the student's final year at the College; another must be a course that substantially focuses on literature or cultural texts produced before 1800. Students entering at the 200-level may, with the permission of the Department, choose as part of their major program one course not conducted in Spanish but offered by faculty in Romance Languages or another Department or Program, such as Latino/a Studies, Comparative Literature, History, etc., provided that the subject matter relate to and broaden their study of Spanish. Students entering at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program. Working with a member of the Spanish faculty, the student will formulate a curricular plan that will ensure balance and coherence in courses taken prior to declaring a major in Spanish. This is especially imperative for students who are planning to spend a part or all of their junior year in Latin America or Spain.

#### THE DEGREE WITH HONORS IN SPANISH

Students majoring in Spanish may apply to be admitted to the Honors Program in Spanish upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal. Two routes are available to those who wish to apply for the degree with honors.

The first of these involves the writing of a senior thesis.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader).

This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether they can proceed with the thesis, and if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent compiling a more detailed bibliography and reading.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493-W31-494). The thesis will be written in Spanish and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in Spanish. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

The second route is a group of three clearly related courses (offered by the Department of Romance Languages or by other departments, such as History, Art, Philosophy, English, etc.), only one of which may be counted in the nine courses comprising the major. One of the courses will be an Independent Study (plus senior year WSP 30) in the spring of the senior year, at the end of which the student will write an essay that synthesizes the

content of the three related courses. Students may apply for this route by November 2 of the senior year.

In the case of both routes to the degree with honors, the department's recommendation for graduation with honors will be based on the originality and thoroughness of the finished project.

## THE CERTIFICATE IN SPANISH

The Certificate in Spanish Language and Culture consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher. Those so interested should express their intent to the chair of the department by March 1 or earlier.

For students with no prior Spanish background, the course sequence will consist of Spanish 101-102, Spanish 103 and 104, and three courses in Spanish above the 104 level, with at least one of these courses at the 200-level or higher taken at Williams. If the student starts out the sequence at Spanish 103, in addition to the three courses in Spanish beyond the 104 level (including a 200-level course or higher), two electives may be taken in other departments. One elective should be in Spanish or Latin-American cultural history (art, literature, drama, music) and the other in Spanish or Latin-American intellectual, political, or social history. Spanish 200, 201, or 208 can be counted for the elective requirement.

Electives may be considered from a variety of departments and programs. However, students should consult with the chair of Romance Languages before making any enrollment decisions.

## PLACEMENT

Students come to study Spanish at Williams with a wide range of backgrounds and prior experiences. Some will have studied Spanish for many years in high school and earlier. Others will have grown up speaking Spanish with family and friends but had little opportunity to study the language at school. Others have lived in Spanish-speaking countries or otherwise studied in immersive contexts. And for others, Spanish is a brand-new language that they are eager to begin learning.

Whatever your previous experience with Spanish, *¡Bienvenida! ¡Bienvenido!* We are glad to have you with us. In order to figure out the most appropriate point of entry, we ask that all students who wish to begin their study of Spanish in the new academic year take the department's placement exam when it is offered during First Days. The only students who don't need to take the placement exam are those who qualify as "true beginners," those with no previous experience of Spanish and for whom 101-102 is obviously the right choice. Everyone else should take the placement test. After you do, the Registrar's Office will notify you of the level and/or course the Spanish faculty have recommended for you. You should free to reach out to the department chair, your recommended instructor, or any other faculty member if you have questions or concerns about your placement.

## STUDY ABROAD

Spanish majors, as well as non-majors interested in further exposure to the language and the culture, are strongly encouraged to study in Spain or Latin America for either a semester or a full year. We recommend that you start planning for study abroad as early as possible, and that you speak to our faculty early on to go over the many possible destinations and programs available to you. In recent years, Williams students have studied in such varied and far-flung locations as Buenos Aires, Havana, Lima, Barcelona, and Madrid. Those who are interested in Madrid may wish to consider the Hamilton College program, with which we maintain consortial ties. Credit for up to four courses can be granted at the discretion of the Department for study overseas. Those four courses count towards the certificate or the major in Spanish. Students interested in study abroad should consult with a member of the department at their earliest convenience.

## FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

### **Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in some cases, provisional approval can be granted (students should be sure to contact the department for details).

### **What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description, and complete syllabus, including readings/assignments. If it is a program we are familiar with, the course title and description are enough. If it is a new program/new type of course we need all the available materials (syllabus, assignments, etc.).

### **Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

Yes. Four maximum.

### **Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

Yes. They have to be courses that focus on language, culture, history, or politics of the target language/culture.

### **Are there specific major requirements that cannot be fulfilled while on study away?**

Yes. Our Senior Seminars are required for the major.

### **Are there specific major requirements in your department/program that students should be particularly aware of when weighing study**

away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

**Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:**

This hardly ever happens but could happen if a student doesn't seek out pre-approval from a faculty member.

### **RLSP 103 (F) Intensive Intermediate Spanish**

**RLSP 103 (F) Intensive Intermediate Spanish.** This course is a continuation of Spanish 101-102. It is designed to help students improve their proficiency in each of the major skill-groups (listening, speaking, reading and writing) while providing an introduction to the cultures of the Spanish-speaking world. Classroom activities and homework are designed to increase vocabulary and improve your ability to handle daily life in a Spanish-speaking country, to express your views on complex subjects such as art and politics, and to increase your knowledge of the cultural

traditions of Latin America and Spain. Film screenings and readings in Hispanic literature, culture and politics will provide material for in-class discussion and some writing assignments. This course provides the linguistic and cultural training that is necessary to engage the diverse Spanish-speaking communities of Latin America, Spain and the US; it will help to prepare students for further literary and cultural studies as well as provide skills that are increasingly essential in fields such as medicine, law, and education. **Conducted in Spanish.**

**Class Format:** Class meets four hours a week: three times with the professor (either in the morning or at noon) and one time in the afternoon with the TA.

**Requirements/Evaluation:** Regular attendance and active in-class participation, workbook exercises and weekly compositions, quizzes, midterm and final exams.

**Prerequisites:** RLSP 101-102 or by Spanish placement exam

**Enrollment Limit:** 20

**Enrollment Preferences:** If the course is over-subscribed, priority will be given to first-year students and others with a demonstrable commitment to study of Spanish.

**Expected Class Size:** 20

#### **RLSP 104 (S) Intensive Intermediate Spanish, Upper Level**

This course is a continuation of Spanish 103. During the spring semester we resume our work to expand your proficiency in each of the major skill-groups (listening, speaking, reading and writing) while increasing familiarity with the vibrant cultures of the Spanish-speaking world. Students in both sections of RLSP 104 can once again expect to sample a variety of written and audiovisual media -- poems and short fiction, essays, journalism, blogs and film -- to deepen their understanding of Hispanic cultures. However, Section 2 will have a more distinct focus on cinema: we will watch a series of classic and contemporary films and develop the specialized vocabulary and skills needed to analyze them in class discussions and student writing. Regardless of which section you are in, students in Spanish 104 can expect to write regularly and to meet with their professor, teaching associate and classmates in varying combinations for four hours each week. This course is designed to prepare students for further literary and cultural studies in Spanish -- including the challenges of study abroad -- and to hone communication skills that are increasingly essential in professional fields such as medicine, law, and education. *Pasajes Lengua* and its accompanying *Cuaderno de Práctica* will once again serve as our primary texts. Conducted in Spanish. For students who have not taken Spanish 103 at Williams, the departmental placement exam is required for enrollment in 104.

**Class Format:** Students will spend 4 hours per week in class in engagement with their Professor, Teaching Associate (TA), and classmates. In addition to the regular MWF classes with their Professor, students will meet for one additional hour per week with the TA. As will be explained in the course syllabus and at the first class meeting, this additional hour with the TA will take place at a time (to be decided during the first weeks of class) that is mutually beneficial for the TA and students.

**Requirements/Evaluation:** Weekly 1- to 2-page compositions, daily homework and class participation, oral reports, unit exams and a final exam.

**Prerequisites:** RLSP 103 or by Spanish placement exam

**Enrollment Limit:** 20

**Enrollment Preferences:** If the course is over-subscribed, priority will be given to first-year students and others with a demonstrable commitment to study of Spanish.

### **RLSP 105 (F) Advanced Grammar, Composition, Conversation**

In this course students will refine their knowledge of Spanish grammar and vocabulary towards further fluency in speaking and writing. The focus of the class is grammar through active engagement with relevant cultural, literary, and political materials centered for the most part on Spain. Students will produce regular grammar and composition exercises as well as oral reports. They will also meet with the Teaching Associate, in smaller groups, weekly.

**Class Format:** students must participate in TA sessions once a week.

**Requirements/Evaluation:** regular grammar and composition assignments, a mid-term, occasional quizzes, oral reports; active participation and regular attendance required.

**Prerequisites:** RLSP 104, or results of the Williams College Placement Test, or permission of instructor

### **RLSP 106 (S) Advanced Grammar and Composition through Literature**

This course is designed for advanced students who wish to further polish and refine their grammatical, lexical, and writing skills in Spanish. The course may be taken immediately after 104, by placement exam results, or even after students have begun to sample the Department's literature and culture offerings at the 200- and 300-level. Classic works of short fiction by celebrated Latin American authors such as Gabriel García Márquez and Julio Cortázar will be discussed; selected Latin American films will be viewed as well. For written and oral assignments: weekly essays, in-class presentations, and language-laboratory activities. *Conducted in Spanish.*

**Class Format:** Discussion.

**Requirements/Evaluation:** a weekly essay based on the stories read in class, written lab exercises, participation in the grammatical and literary discussions, quizzes, a mid-term and a final

**Prerequisites:** RLSP 104, any course 201+, placement exam or permission of instructor

### **RLSP 107 (F) Advanced Grammar and Conversation**

How is Spanish language relevant to my academic field? What linguistic and cultural resources should I acquire to effectively communicate my academic interests in this language? How do I prepare for a professional presentation in Spanish? What are the limitations of the academic language at the moment of interacting with people in the community? The Advanced Grammar course 107 will provide cultural and linguistic resources to address the questions above and other common concerns that students have around their proficiency and skills to communicate effectively. This course focuses on helping students to advance their cultural and communicative skills in Spanish, as they share their professional interests with other

students. The class will discuss four general topics -medicine, history and human rights, art, and environmental issues-, which will create the context for students to conduct oral presentations and activities around their own academic fields. Another important emphasis of the course will be to connect students' professional interests to current issues of social justice in USA, Latino America and other world countries. To expand their cultural and linguistic knowledge, participants will prepare two different types of oral activities for the class: formal-academic presentations and non-formal activities that use colloquial registers. The RLSP 107 course will require a constant and committed collaboration between participants.

**Class Format:** Students should expect to meet with the professor three times per week during the scheduled class hours. One hour of practice with the TA will be added at agreed-upon times once the enrollment is fully established.

**Requirements/Evaluation:** Regular grammar and composition assignments, a mid-term exam and a final project; intense reading, active participation and regular attendance required.

**Prerequisites:** RLSP 104, placement exam results, permission of instructor or Department Chair

**Enrollment Limit:** 20

**Enrollment Preferences:** Spanish majors and certificate students, current and potential.

### **RLSP 201 (F) The Spanish Labyrinth**

How can you learn to separate the stereotypical images of Spain from reality? How can we talk about one "Spain", when the country a complex composite of ancient and diverse cultural remnants mixed with recent influxes of immigrants and separatist movements? How has the vulnerable peninsula survived centuries of violent upheavals and divisiveness; dramatic economic rises and collapses? How has the Covid-19 pandemic affected Spain's health system, demographics, and international economy? This course aims to offer students a strong foundation in Spanish issues, whether they have already spent time abroad, or hope to do so in the future. In this course we will approach Spain by studying examples of its literary and artistic production, from periods of brilliant cultural exchange, and times of censorship, repression, and crisis. Some topics of focus will be the Inquisition, the Civil War, contemporary Spain's obsession with its own recent past, and its uncertain future as it begins to recover from the effects of Covid. Secondary texts will also be provided for historical and socio-political background and reference. *Conducted in Spanish.*

**Requirements/Evaluation:** Conducted entirely in Spanish, Active regular participation in class discussions. Each student will give one presentation and, on a separate occasion, also be a discussion leader. Two short writing assignments (2-3 pp) and one final essay (10-12 pp). Students are encouraged to use office hours (or by appointment meetings) at different points in the semester to help each one with questions, approaches to homework and class participation, and to provide additional feedback and practice for writing and oral expression.

**Prerequisites:** RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

### **RLSP 202 (S) Introduction to the Analysis of Literature in Spanish (WS)**

This course is intended for students who are considering a major in Spanish, including those who have recently completed RLSP 105, 107, or 200. Using a textbook, *Aproximaciones al estudio de la literatura hispánica*, we will study the fundamentals of genre analysis while reading selected works of prose, poetry, and drama from Latin America and Spain. In addition to studying the principles and techniques of literary analysis, this course will continue to develop your speaking, oral, writing, and reading comprehension skills. *Conducted in Spanish.*

**Class Format:** Students are expected to be active participants at all scheduled class meetings, which will be used for discussion and collaborative analysis of literary texts.

**Requirements/Evaluation:** Assignments will include four essays (from 4 to 6 pages each); a number of short writing assignments; a mid-term and a final exam; and consistent preparation and class participation.

**Prerequisites:** RLSP 105, 107, 200, 209, or placement exam results indicating readiness for a 200-level course

**Enrollment Limit:** 20

**Enrollment Preferences:** first- and second-year students who are considering the major in Spanish

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Each student will write four essays on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide three 2-page critiques of their partner's papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise each of the papers and submit a final version.

### **RLSP 204 (S) Hispanic/Bilingual Communities in USA: language and identity**

"Hispanic/Bilingual Communities in USA: language and identity" is a course for Heritage Learners with two different profiles: those who have acquired Spanish at home and those who have been learning the language at school. Students' own sense of affective connection with the language through their families will guide our reflection on Spanish as a social component that unifies multiple Hispanic communities in the USA. We will also discuss the dialectal, sociolectal and generational differences between the members of those speaking communities, and the implications of considering these groups as homogenous. The course will address the role that media, institutions and cultural products play in preserving and (re)defining Spanish in the USA. We will review the language and its variation through TV programs, music, magazines, and literature. Heritage Learners already have an important foundation of linguistic knowledge that prepares them for interaction in Spanish. In this course they will be asked to further extend their resources through constant grammar and vocabulary practice. The course requires writing reports and larger texts, and the reading of an important amount of specialized texts in Spanish. Many of the daily activities will require teamwork. The course will meet 2 times per week: M, W, 1 hour 15 minutes per session. Students who have taken Spanish 209 can also register for this course.

**Requirements/Evaluation:** Evaluation will be based on class participation, daily assignments, essays, projects and one parcial exam.

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** sophomores, juniors, majors, or concentrators.

### **RLSP 206 (S) Latin-American Civilizations**

An introduction to the multiple elements constituting Latin-American culture. Class assignments include readings from selected Latin-American essayists and screenings of classic films. Particular focus on the conflict between local and foreign cultural traditions. Areas to be considered: Spanish Catholicism, the influence of European liberalism and U.S. expansion, the Indian and African contribution, and the cultural impact of social revolution in Mexico and Cuba. *Conducted in Spanish.*

**Class Format:** In-person

**Requirements/Evaluation:** two essays on assigned topics, response journals, one oral presentation, active discussion of the ideas and the facts presented in class, a midterm, and a final

### **RLSP 211 (S) A Survey of Spanish Literature from the 11th to the 17th Centuries**

This course will introduce the student to some of the major works of Spanish literature from its beginnings through the Golden Age. We will study the

historical context in which the works were written as well as the literary history of the periods in question. Students will learn methods of textual analysis through readings of relevant literary criticism. Readings will include selected canonical prose, poetry, and drama of the periods; special emphasis will be given to the myth of the coexistence of three religions in Iberia and the often misguided idea of dividing this literature into the categories of 'medieval' and 'Renaissance'. *Conducted in Spanish.* This course fulfills the pre-1800 requirement for the Spanish major

**Requirements/Evaluation:** evaluation will be based on class participation, short paper assignments, and a final paper

### **RLSP 216 (S) Latin American Environmental Literature and Cultural Production (DPE)**

**Cross-listings:** RLSP 216 ENVI 233

#### **Primary Cross-listing**

This foundational course explores a wide array of ecocultural texts from Latin America, ranging from accounts of Europeans' first arrival to the crisis of mass extinction and anthropogenic climate change today. In between we consider an eclectic mix of styles and genres, including poetry, essays, prose fiction and speeches produced by a varied group of cultural agents. We read classic texts by canonical figures (José Martí's "Our América," the *Popol vuh*), which take on new meaning in the current context, as well as some little-known gems of ecological consciousness. Readings and discussion trace connections between environmental thought and the region's long and multi-layered history of colonialism, and students are encouraged to develop their own positions by responding to some of the leading theoretical discourses that animate the field of Latin American ecocriticism: decolonial and creole ecologies, ecofeminism, transcultural materialism, and postdevelopment. *Conducted in English.*

**Requirements/Evaluation:** Students will write and revise three formal essays over the course of the semester. There will also be shorter written assignments and intermittent discussion-leading.

**Prerequisites:** None.

**Enrollment Limit:** 15

**Enrollment Preferences:** Preference given to students majoring in Spanish or Environmental Studies.

**Difference, Power, and Equity Notes:** This course meets the goals of the DPE requirement in that it focalizes the current environmental crisis through the long history of political, economic and cultural struggles in Latin America. We examine the genealogies of environmental culture, tracing the emergence of ecofeminism, for example, through generations of writers. We also examine the phenomenon of creolization and its relationship to the environmental cultures of Latin America's originary peoples.

**Cross-listings:** RLSP 220 WGSS 222

**Primary Cross-listing**

From the early twentieth century to the present day, the radical changes in the lives of Spanish women have clearly reflected the tug of war between progress and tradition in recent Spanish history. The dramatic upheavals in Spanish politics have marked and transformed the lives of women to such a great extent that one can often gauge the political and social climate of any given historical moment by considering how the role of women was defined by the law, the Catholic church, education, and other social and political institutions. Using literary and historical texts as well as films, newspapers and other media, this course will look at the transformations in the public and private lives of Spanish women during the following periods: the turn of the century, the Second Republic, the Spanish Civil War, the Franco years, the transition to democracy, and the present day.

### **RLSP 228 (S) Velázquez, Goya, and Picasso**

**Cross-listings:** ARTH 228 RLSP 228

**Primary Cross-listing**

This course will provide an introduction to three major Spanish painters--Velázquez, Goya, and Picasso--who lived and worked, respectively, in the 17th, 18th, 19th and 20th centuries. Though these painters are world famous, they are rarely studied comparatively, and in the context of their Spanish artistic roots. The syllabus will cover the historical and social contexts in which they started working, and how they followed, and departed from, artistic conventions of the time. Through specific paintings, we will consider the historical evolution of the artists' relationship to their patrons and subjects, from the elite status of Velázquez within the royal court, to Goya's dramatic rise with the reigns of Charles III, and Charles IV, and his subsequent exile to France. Picasso was free of royal patronage and also lived in France, yet despite this freedom he remained deeply connected to the themes and concerns of his Spanish artistic predecessors. In addition to key paintings including Velázquez's "Las Meninas" and other royal portraits, Goya's "Maja Desnuda" and his series "The Disasters of War," Picasso's "Guernica," and his own 20th century reinterpretation of "Las Meninas," we will focus on the artists' shared subjects of portraits and war, and consider the following issues: How does the role of the Spanish artist change over the periods covered? How did the artist exercise his freedom whilst under the scrutiny of the court and the Catholic Church? How were these painters' lives and work shaped by key historical events such as the Inquisition, Napoleon's invasion of Spain, or the Spanish Civil War? How does the work of art evolve in its role from private royal commission to public display in museums open to all? We will read short literary pieces from each period, primary materials such as letters and other documents, and historical and critical works. All readings will be in English. Knowledge of Spanish is encouraged, but not required.

**RLSP 230 (F) Mexican Literature and Cultural Production (DPE) (WS)**

This course will offer a survey of the rich and varied cultural production of Mexico, from the pre-Hispanic past to the present. Students will explore a variety of literary genres (pre-Hispanic poetry, creation stories and songs; chronicles of conquest; short works of prose fiction and novels; and modern poetry and essays) as well as other kinds of cultural production within a framework of historical contextualization and formal analysis. The course meets twice per week. *Conducted in Spanish.*

**Requirements/Evaluation:** Each student will write three 4- to 5-page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide three 2-page critiques of their partner's papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise each of the papers and submit a final version. Excellent preparation, active and engaged participation in class discussions.

**Prerequisites:** RLSP 105, placement exam results, permission of instructor.

**RLSP 231 (F) Indigenous Writers of Colonial Mexico and Peru (DPE) (WS)**

This course examines the writings of 16th and 17th Century Indigenous authors of New Spain and colonial Peru. We will study the works of well-known Indigenous writers such as Hernando de Alvarado Tezozomoc, Fernando de Alva Ixtlilxochitl, El "Inca" Garcilaso de la Vega, and Guaman Poma de Ayala, as well as writings by lesser-known and anonymous Indigenous authors. Our focus on the historical contexts and formal aspects of their works will be supplemented and enhanced by a study of the critical methods of textual analysis that are particularly relevant to Indigenous texts, as facilitated by a set of selected critical readings. The course, in short, will aim to interrogate the idea of a "Spanish lettered city" (a colonial city dominated by Spanish men of letters) and will explore the possibilities of an "alter-native" lettered city, one in which Indigenous writing flourishes during times of crisis. *Conducted in Spanish.*

**Requirements/Evaluation:** Each student will write four 4- to 5-page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide three 2-page critiques of their partner's papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise the first three papers and submit a final version. ### **RLSP 251 (F) Somos Sur: US-Mexico-Central American Borderlines (WS)**

What are borderlands? How have they been created? How do they affect the life of those who cross or are being crossed by these borders? This course focuses on the cultural production that explores US-Mexico-Central American borderlands and the diverse policies and practices that (re)create and (re)image these borders. In consideration of some of the dictatorships in Central America, the NAFTA agreement and post 9/11 policies, as well as war zones and the drug war; we will explore the concepts of citizenship, migration, nationalism, and (in)visibility in its intersection with gender, racial positioning, and social class. Drawing upon cultural studies, feminist theory, history, and ethnography we will examine materials such as photography, installation art, journalism, literature, film, and music. This interdisciplinary approach aims to shed light on the causes and consequences of the political, cultural, and economic narratives involved in our current understanding of these fronteras. This class is conducted in Spanish; readings will be in both English and Spanish.

### **RLSP 259 Violent States, Violent Subjects: Nation-Building and War in 19th Century Latin America (DPE) (WS)**

Although the massive, mechanized wars of the 20th century often overshadow earlier conflicts, the 19th century was also a period of widespread bloodshed in Latin America. First, of course, came the carnage of the Independence Wars, which was followed by decades of civil war (Mexico, Argentina, Peru, Uruguay, Colombia, Venezuela) and two bitter international wars--the Paraguayan War (1864-1870) and the Pacific War (1879-1883)--each of which would have a lasting impact on the countries involved. The restoration of peace brought economic development and new opportunities for dominant groups, but also the return of some of the most violent practices of the colonial period: indigenous peoples were conquered, their lands settled by whites or used for grazing cattle, and blacks (often despite the official abolition of slavery) met with new forms of exclusion, exploitation, and physical violence. In this tutorial we will explore the literary links between some of the violent conflicts listed above and the foundation of national identities in Latin America, reading texts that probe the social and ethical implications of State-sponsored violence. Issues to be explored include militarism and the development of nationalism; genocide and the national community; torture, truth and testimony; and the notion of 'civilization.' We will read one or two key precursors and a variety of 19th century texts that may include works by Juan Francisco Manzano, Esteban Echeverría, Ricardo Palma, Rosa Guerra, Dorotea Duprat de Lassere and Juan Crisóstomo Centurión, and Lucio V. Mansilla. In addition, we will read a few contemporary texts, written in the aftermath of the late-20th century dictatorships in the Southern Cone, that actively reflect on the long history of State-sponsored violence in Latin America (Ricardo Piglia, Diamela Eltit, Augusto Roa Bastos). Students will work in trios throughout the semester,

each group meeting with the instructor once a week. Each week one of the students will present a 5-page paper on the assigned reading and one will be designated the official respondent, whose job is to lead a discussion of the paper. The third member of the group will turn in a revision of the previous week's paper. Prerequisites: one 200-level RLSP course or permission of instructor. Heritage learners, international students and second-language learners are all heartily welcome. Conducted in Spanish.

**Class Format:** Conducted in Spanish.

**Requirements/Evaluation:** Each student will write and revise a minimum of three five-page papers during the course of the semester. Students will be evaluated on the basis of their preparation for each tutorial meeting as evidenced by the quality and frequency of their engagement with the material, including their classmates' written work. Essays will be graded after they have been revised and submitted to the professor.

**Prerequisites:** Any 200-level Spanish course.

**Enrollment Limit:** 12

**Enrollment Preferences:** Priority given to Spanish majors.

**Expected Class Size:** 12

**Writing Skills Notes:** Students will practice writing throughout the semester, and will receive abundant feedback on their written work from their tutorial partners and the instructor. We are altering the tutorial format from the standard duos to trios of students, so that students will have ample opportunity to revise their written work.

**Difference, Power, and Equity Notes:** This course focuses on issues of diversity, power and privilege within the internal and regional constitution of Latin American countries. We will read with an awareness of some of the ways that differences of race, class, nationality and gender may be mobilized in times of conflict, and consider how the collective narratives that are constructed and imposed in the aftermath tend to deal with those conflicts.

### **RLSP 264 (S) Outcasts of the Lettered City: Nation-Building and the Margins in 19th Century Latin America (DPE) (WS)**

Bandits, vagabonds, runaway slaves, and unruly women. Defeated soldiers. Afro-Colombian rivermen. Indigenous Americans and their white captives. Latin American cultural production of the 19th century is conventionally studied in terms of the urban intellectuals' projects of nation-formation in the aftermath of the long struggle for independence from Spain. This course examines that process from the outside, considering instead a series of literary and other writings that represent the marginalized others of the desired nation-state, the women and men, many of them Afro-descended, Indigenous and mixed race, who found themselves excluded from the new national community--or who preferred a life on the pampas, deep in the jungle, or somewhere else outside the confines of bourgeois society. Primary readings will be selected from among the following: Simón Rodríguez, *American Societies in 1828*, Juan Francisco Manzano, *Autobiography of a Slave*; Domingo F. Sarmiento, *Facundo. Civilization and Barbarism in the Argentine Republic*; José Hernández, *Martín Fierro*; Flora Tristán, *Peregrinations of a Pariah*; Juan Crisóstomo Centurión, *Viaje nocturno*, Federico Gamboa, *Santa*; Candelario Obeso, *Popular Songs of My Land*; Cirilo Villaverde, *Cecilia Valdés*, Lucio V. Mansilla, *Excursion to the Ranquel Indians*. We will also read a number of critical essays by leading scholars in the field of 19th century Latin American literature.

**Requirements/Evaluation:** Students will write and revise approximately 20 double-spaced pages, in Spanish, over the course of the semester. Students will also prepare 10-15 minutes responses to their classmates' work. We will read 100-150 pages of Spanish prose each week and well as critical essays, which will often be in English.

**Prerequisites:** Any 200-level course with an RLSP prefix or permission of instructor.

**Enrollment Limit:** 12

**Enrollment Preferences:** Spanish majors and potential Spanish majors.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** This course is conducted as a tutorial. The number of students in each unit (pairs or triplets) depends on how many students enroll, but whatever our structure turns out to be, each student can anticipate multiple opportunities to write and revise their individual essays in response to feedback from their classmate and professor, as well as to serve as the respondent offering feedback on other students' work. Thus we emphasize editing and revision as essential parts of the writing process.

**Difference, Power, and Equity Notes:** This course examines structures of exclusion in 19th century Latin America -- the reproduction and

perpetuation of socio-economic and institutional structures based on racial, gendered and class-based hierarchies established during the colonial era -- and the spaces that historical individuals have been able to occupy within and around them.

### **RLSP 280 (S) From Roma to Yalhalhj: Race and Identity Politics Through Contemporary Mexican Cultural Production (WS)**

In 2017, the National Institute of Statistics in Mexico (INEGI) used for the first time a color palette to measure individuals' skin tone. The study showed that "Mexicans who were classified by the interviewers as having darker skin tones tend to have lower levels of education and are worse off economically than their lighter-skinned counterparts" (Zizumbo and Flores, 2017). Raising controversy among those who would like to think of Mexico as a post-racial nation and those who recognize social inequality and discrimination on the basis of skin tone, the debate resonates in the way Mexican citizenship and cultural identity are both represented in mainstream media, even with the intention of showing diversity. The prevalent whitewashing dominating mass media in Mexico extends from advertisements to films, promoting an image of wealth and education intrinsically related to not only skin tone but also with race/ethnic positionality and gender. This course will explore the representation of these variables and their intersections through the analysis of photography, films, novels, paintings, reality shows, telenovelas, advertising campaigns, and music videos. In addition, we will take into account questions of representation, agency, and visibility addressed by cultural producers from pueblos originarios who do not consider themselves Mexican citizens. This class will be conducted in Spanish.

### **RLSP 301 (S) Cervantes' "Don Quijote"**

We will devote the semester to the study of one novel: Miguel de Cervantes' *Don Quijote*, published in the early part of the 17th century. We will try to understand the reasons for the novel's immense and ongoing influence. We will study Cervantes' handling of issues that continue to have relevance to our lives today: relationships, the role of fiction in life, the shapes of mental illness, how we show people who we think we are, how our governments, families and friends decide who we are, the fun and annoyance of going on a road trip with someone, the meaning of justice, and the meaning of storytelling, to name a few. In the process, we will set things in context to understand what was going on in Cervantes' world. Finally, we will find that even an entire semester was not enough to engage fully with this extraordinary work. *Conducted in English using a contemporary translation.*

### **RLSP 303 (S) Cervantes' "Don Quijote"**

A close study, in Spanish, of one of the most influential and early European novels. *Don Quijote* by Miguel de Cervantes (1547-1616 C.E) was a hit in its day in the seventeenth century, and has not ceased to influence artists and thinkers since. Moving between humorous and serious tones, Cervantes takes on several issues in the *Quijote*: the point of fiction in real life, the complications of relationships between men and women, the meaning of madness, the experience of religious co-existence, the shapes of friendship, and the task of literary criticism, just to name a few. We will read the book in a fine unabridged edition, and set it in several relevant contexts to better understand its original intellectual horizon as well as the reasons for its continuing relevance.

### **RLSP 307 (F) The Short Stories of Miguel de Cervantes**

We will conduct a close study of the collection of short stories known as *Las novelas ejemplares* written by Miguel de Cervantes (1547-1616 CE). The stories, though not as famous as *Don Quijote*, are as innovative and dynamic as the author's best-known novel. We will set them in the context of the political and artistic landscape of Spain in the early part of the 17th century to better understand their nature and function. In particular, we will pay attention to how social and individual identities are shaped in the stories, and the ways in which our own assumptions about identity work alongside those of these texts.

**Class Format:** Conducted in Spanish.

**Requirements/Evaluation:** Regular attendance and active participation; two short essays or four reaction papers; one final project of 8-10 pages or the equivalent in close consultation with the instructor.

**Prerequisites:** Any RLSP 200-level class taken at Williams, or results of the placement test, or permission of instructor.

### **RLSP 308 (S) Survey of Colonial Latin American Literature from 1492 to the Early 19th Century (DPE) (WS)**

This course will focus on major works of Spanish American literature from 1492 through the first part of the 19th century. Readings will include narrative texts such as *Cartas de relación*, chronicles of conquest, religious texts, and indigenous annals, as well as poetry and drama. While many of the texts will focus on colonial Mexico, we will also study texts from Central and South America. We will focus on the historical contexts and formal aspects of these works, and study methods of textual analysis that are particularly relevant to these texts via selected critical readings. Special attention will be given to colonial encounters and the clash of cultures that produced new identities and textualities under Spanish colonial rule. The course meets twice per week. *Conducted in Spanish.*

**Requirements/Evaluation:** Each student will write three 4-6 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide three 2-page critiques of their partner's papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise each of the papers and submit a final version. Excellent preparation and class participation.

**Prerequisites:** One RLSP course at the 200-level or above or permission of instructor

### **RLSP 319 (S) Dictatorship and the Latin-American Novel (DPE)**

Military dictatorship is among the most crucial factors in Latin-American society and history, and some of the continent's leading novelists have taken it upon themselves to depict the experience in their work. In this course we will examine both the fact of dictatorship itself and the diverse representation thereof in Spanish-American fiction. Novels by García Márquez, Vargas Llosa, Poniatowska, and Tomas Eloy Martínez will be closely studied.

Students will also read *Absalom! Absalom!* by Faulkner, whose influence on Latin-American authors' techniques of representation has been decisive and profound.

**Class Format:** In-person.

**Requirements/Evaluation:** three 8-page papers, response journals, an oral report, a final 3-page paper, and class participation

**Prerequisites:** RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

**Difference, Power, and Equity Notes:** This course focuses on the ultimate sort of power--namely, military dictatorship. And it focuses on the historical fact of such a phenomenon within the U.S. political sphere of influence--Latin America. This course focuses on the writings of one of the most revered women writers in Hispanic Letters, Sor Juana Inés de la Cruz, who was regarded by her contemporaries as the Tenth Muse. Our exploration and study of Sor Juana's writings will focus on the different genres in which she wrote--prose, poetry, and drama--and it will include a survey and analysis of the historical context in which she wrote, the formal aspects of her writings, and critical essays about her work written by leading scholars in the field of Latin American literature. Near the end of the semester, the course will conclude by expanding its focus to examine the ways in which Sor Juana's work has influenced contemporary Latin American and U.S. Latina authors. *Conducted in Spanish.*

**Requirements/Evaluation:** Each student will write three 5-7 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide two 2-page critiques of their partner's papers as a form of feedback. ### **RLSP 388 (S) La Regenta: Masculinity in Crisis in Nineteenth-Century Spain**

This seminar is an in-depth study of arguably the most remarkable Spanish novel of the nineteenth century: *La Regenta* (1885) by Leopoldo Alas (alias Clarín, 1852-1901). We will spend the semester living with the most eccentric, repressed, confused, sometimes arrogant, and sometimes humble inhabitants of the fictional city of Vetusta (based on the real city of Oviedo) and immerse ourselves in Spanish history and culture through a story of adultery. In the grand tradition of nineteenth-century novels about fallen women, *La Regenta* in fact reveals the seamy underside of society, the profound anxieties of masculinity and identity formation, as well as where our biases and assumptions about both successful and failed relationships come from today.

### **RLSP 401 (F) Climate Changes (Latin America): Aesthetics, Politics, Science**

**Cross-listings:** RLSP 401 ENVI 301

Primary Cross-listing

In her 2007 book, *In Catastrophic Times: Resisting the Coming Barbarism*, philosopher Isabelle Stengers offers a chilling observation: "we are more badly equipped than ever for putting to work the solutions defined as necessary" to avoid the most devastating effects of global warming--the extinction of 25 to 75% of existing species; an increase in sea levels that will drown island nations and coastal cities; the breakdown of agricultural systems, leading to widespread famine; and the recurrence of powerful hurricanes and other so-called "natural" disasters. All of this, as Stengers and others point out, will create human upheaval, conflict and suffering on an unprecedented scale. This senior seminar examines works of literature, art and film that Latin Americans have produced in response to the catastrophic times in which we live. We will discuss the political, economic, and cultural histories that have led to our present moment, including neoliberalism, dictatorship, and the rise and fall of the leftwing Pink Tide. Through works of new and experimental fiction, poetry, film, performance and visual art, we will consider the lives and work of environmental activists, including Berta Cáceres and others who were murdered because of their outspoken opposition to extractive capitalism, examine the struggle for the decolonization of environmental knowledge, an epistemological battle increasingly waged on behalf of all living things, and experience the politics of mourning for the hundreds of thousands of life-forms disappearing from the planet. Cultural texts to be explored throughout the semester may include: *La vorágine* (José Eustasio Rivera, Colombia, 1924); *Distancia de rescate* (Samanta Schweblin, Argentina, 2014); *Lo que sueño Sebastián* (Rodrigo Rey Rosa, Guatemala, 1995); *Serras da desordem* (Andrea Tonacci, Brazil, 2006); *Boi Neón* (Gabriel Mascaro, Brazil, 2015); *American Fork* (George Handley, USA, 2018).

**Requirements/Evaluation:** rigorous preparation and participation in class discussions, oral presentations and discussion-leading, response papers, one 5- to 7-page paper and one 15- to 20-page paper

**Prerequisites:** one 300-level course in the department, evidence of a successful direct-enroll experience at a local university in Latin America or Spain, or permission of instructor

#### **RLSP 404 (F) Spain's Tale of Two Cities:Madrid and Barcelona (DPE)**

The ancient rivalries between Madrid and Barcelona may be best known because of their internationally watched soccer teams, but there's much more to the story than meets the eye in a stadium. Barcelona, immortalized for world audiences in George Orwell's classic *Homage to Catalonia*(1938), has a complicated political and cultural history. Catalans have a fascinating and unique culture and language. Their identity has often been cause for political unrest in their relationship with the rest of Spain, and even amongst Catalans themselves. In recent years, tensions with Spain's capital, Madrid, home to the central government and the Royal family, have filled headlines and divided politicians and even families. In this senior seminar we will focus on these two cities in their own right, and explore the counterpoints between them. We will consider the historical roots of lesser known aspects of Catalan culture and identity in order to tease out some of the myriad perspectives that are at play in Spain today. Materials will come from many different media: historical pieces, music, art and architecture, classic novels and films, recent fiction and essays by second generation authors who have been raised by immigrant parents in both cities, and media pieces. We will also invite cultural observers and players to be guest speakers and help us stay up to date as we follow this ever evolving relationship that keeps journalists and politicians on tenterhooks.

**Requirements/Evaluation:** This course will be conducted entirely in Spanish. Students will be expected to participate actively in weekly online classes. There will be two short writing assignments of 3-5 pp. Each student will prepare a presentation for one of our class meetings, and be a discussion leader for part of another meeting. Students will be expected to schedule office hours with me individually, and to work on an independent research project towards the end of the semester which will culminate in a final paper of 10-15 pp.

**Prerequisites:** Students should be seniors on the road to fulfilling their degree requirements for the Spanish major.

**Enrollment Limit:** 11

**Enrollment Preferences:** Senior Spanish Majors. This is the 20-21 Senior Seminar for the Spanish Major.

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** This course fulfills the DPE requirement because it compares two rival cities and the struggles for power between a majority (Spanish) and minority (Catalan) culture and language. We will also read texts by first generation authors for whom Spanish and Catalan are dominant but secondary languages and cultures. The syllabus seeks to offer a multiplicity of perspectives in order to help students critically engage with centuries-old patterns of difference and exclusion.

#### **RLSP 405 (F) Alternative American Literatures: From the Indigenous Chronicle to the Latin American & Chic. Novel (DPE) (WS)**

Do the Americas have a common literature? If so, is it possible to trace their roots and continuity from the colonial era to the present? Literary critic Martin Lienhard suggests that it is indeed possible to trace the origin of a literature common to Latin America from the colonial era and into present by focusing on what he calls "alternative literatures"--literatures that relativize the importance of Europeanized and Creole literatures and valorize the richness of oral traditions in the Americas. Such literatures, he asserts, are closely tied to marginalized sectors of society. In this course, we will take Lienhard's concept of "alternative literatures" as a point of departure to pursue our own examinations of how these "alternative literatures" are

constituted. While the primary aim of this course is to focus on the writings of Latin American authors, we will end by exploring the relationship between "alternative" Latin American literatures and Chicana/o/x literatures. Readings will include narrative texts such as *Cartas de relación*, chronicles of conquest, religious texts, indigenous annals, poetry, and drama, as well as contemporary Latin American and Chicana/o/x novels.

**Requirements/Evaluation:** Four essays, class presentations, active participation, and regular attendance required

**Prerequisites:** any 300-level RLSP course or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Senior Spanish Majors.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** Each student will write four 4-6 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide three 2-page critiques of their partner's papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise each of the papers and submit a final version.

**Difference, Power, and Equity Notes:** This course will highlight intellectual production of indigenous peoples of the Americas under Spanish colonial rule as well as the writings of more contemporary minority authors of Latin America. It will explore the new identities and textualities that emerge as a result of the encounter and subsequent conquest of the Americas. As such, students will gain critical skills to analyze a diversity of Spanish-American colonial texts from the 16th century as well as more contemporary narrative texts.

#### **RLSP 407 (F) Gender, Race and Nature: Ecocritical Examinations of Latin American Culture (DPE)**

This senior seminar brings an ecocritical focus to the study of Latin American cultural production. We are particularly interested in works of literature and other kinds of cultural texts that critique, subvert, or transcend conventionally Eurocentric and patriarchal conceptualizations of the human and its relation to non-human being. Rhetorical tropes linked to extractivist economic practices and their alternatives will be identified and analyzed over the course of the semester as we sample a wide range of literary and non-literary texts (poetry, narrative prose, essay, film, painting, woodcuts, music, digital media) produced throughout the 20th and 21st centuries. We will also read and discuss writings by leading ecocritics and decolonial theorists including Silvia Rivera Cusicanqui, Eduardo Gudynas, Mary Louise Pratt, Walter Mignolo, and more.

**Requirements/Evaluation:** Thorough preparation and active class participation, discussion-leading, one 5-7 page paper and one 15-20 page paper as well as a paper proposal, abstract, bibliography, and draft.

**Prerequisites:** Study abroad, one or more RLSP courses at the 200+ level, or permission of instructor.

**Enrollment Limit:** 19

**Enrollment Preferences:** Senior Spanish majors, then other interested students.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** This course brings decolonial theory and ecocriticism together in an approach to Latin American cultural production.

## THEATRE (Div I)

Chair: Professor Omar Sangare

- Robert E. Baker-White, Professor of Theatre
- Sean Devare, Arthur Levitt, Jr. '52 Artist-in-Residence
- Amy S. Holzapfel, Professor of Theatre; on leave Fall 2022
- James L. Pethica, Senior Lecturer in English and Theatre; affiliated with: English, Theatre; on leave Spring 2023
- Shanti Pillai, Assistant Professor of Theatre
- Barbara Samuels, Visiting Assistant Professor of Theatre
- Omar A. Sangare, Chairperson and Professor of Theatre

The Department of Theatre is committed to the merging of embodied practice and scholarship in the fields of theatre and performance studies. The curriculum is dedicated to the study, practice, appreciation, and interpretation of theatre, performance, and other time-based arts. The major in Theatre emphasizes the collaborative nature of the theatre and performance making by drawing upon courses offered by faculty of the Language, Literature, Music, and Art Departments. Although students will be equipped to proceed to graduate and professional schools in theatre, the major is primarily directed toward those interested in studying theatre and performance as artistic phenomenon and as interpretive tools. Because a deep understanding of theatre requires training and experience with the synthesis on stage, the major includes curricular study of production and performance, as well as continued participation in departmental stage production.

The production arm of the Department of Theatre operates under the supervision of the departmental faculty. Major departmental productions as well as laboratory and experimental productions of all kinds are mounted on the new stages of the '62 Center for Theatre and Dance. Participation in acting or technical work is open to all members of the Williams College community. Students majoring in Theatre will be asked to consult regularly with departmental advisors in devising the sequence of courses and production participation that will constitute their major.

### MAJOR

**The Major in Theatre consists of nine courses, including the following:**

Theatre 101 The Art of Playing: An Introduction to Theatre and Performance

Theatre 201 Worldbuilding: Staging and Design For The Theater

Theatre 301 Embodied Archives: Global Theatre & Performance Histories

Theatre 406 Practicing Theory: Senior Seminar

Five additional elective courses must be taken from the department's other offerings (including courses cross-listed with Theatre). Two of the five electives must be taken at the 200-level or higher by the end of the student's junior year, and an additional two of the five must be taken at the 300-level or higher by the time of graduation. Substitutions of other Williams' courses, or of Study Abroad courses, may be made only with the consent of the department Chair. Students should consult with the department Chair regularly in planning a balance of practice and scholarship in their elective choices and in mapping a route through the major.

### Production Requirement for the Theatre Major:

All majors in Theatre are required to participate in a *minimum of four* department productions. Participation in at least *one* of these four must be in stage management. Assignment to productions in stage management must be made in consultation with the department Chair. Students participating in a production will be enrolled in THEA 290-299: Theatre Department Production as a partial-credit, fifth course, admitted by permission of the department Chair and evaluated on a Pass/Fail basis only. Students remaining in the course beyond the sixth week of the start of a term will be graded by the instructor. Enrollment is by audition or appointment within the Theatre department. Students who do not wish to enroll for credit will be given the opportunity by the department to be removed from the course. Rehearsals for productions are scheduled TBA, based on the availability of the ensemble, and do not conflict with other academic commitments, such as evening courses or evening exams. The department normally produces three productions per academic year. Students may enroll in multiple productions in the same semester and may repeat a production course by permission of the department Chair. *For each departmental production they participate in, a student will receive a partial credit of .5 on their College transcript. Production credits do not accrue, nor do they count towards a student's 32 required course credits for graduation.*

### THE DEGREE WITH HONORS IN THEATRE

Candidates for Honors will apply for admission through the submission of a portfolio to the Department Chair by February of their junior year, as well as a description of their proposed project. The project description is a written essay of approximately 750-1000 words that describes in detail the nature, goals, methodology and approximate budget, if applicable, of the proposed course of study to be undertaken in the pursuit of Honors. When developing their project proposal, candidates are encouraged to familiarize themselves with successful past Honors projects from materials provided by the Department. The portfolio will be comprised of four parts:

The first part will include a list of the courses students have taken relevant to their work towards the major. This list will include courses offered by the Theatre Department, but may also include classes taken in other Departments. Students should also list and describe relevant independent studies and production credits.

The second part of the portfolio will include a selection of materials developed for these courses and productions listed in Part 1. The selection should include at least three papers or samples of other written work, and might also include design projects, director's notebooks, studio art projects, actor's journals or other forms of documentation of the candidate's work. For students who have taken a semester away, it is particularly important that they provide the Department with a detailed picture of their activities while studying off-campus. Course descriptions and syllabi should be submitted in addition to a list of courses taken and activities performed.

The third part of the portfolio is an annotated bibliography of approximately twelve dramatic or critical texts the student has read, and that the student feels have had particular relevance in their Theatre education to date. Annotations should be based upon a particular angle of engagement with the text, that reflects the area or areas that the student has chosen to emphasize in their theatrical training. For instance, one might choose to write from the point of view of an actor, a designer, a director, a playwright, or a dramaturg. Generally, annotations should be one or two paragraphs long.

The portfolio should conclude with a retrospective essay that reflects on the materials that are being submitted. Students should look for connections between the various aspects of their work, state any theoretical positions that they have come to embrace, assess their strengths and weaknesses, and discuss their educational goals for their work with the Department during their Senior year.

The portfolio will be examined alongside the student's record and their project description; a determination will then be made as to admission into the Honors program. Students intending to apply for Honors should meet with the Department Chair or designated Honors Coordinator by the end of the fall semester of their junior year. Once a student is admitted to the Honors program, the department Chair will assign an Honors Project Advisor, who will work with the student to specify a timeline and work program for the completion of the Honors Project. At a minimum, this will entail enrollment in Theatre 493 or 494, plus W32, plus one other course offered either within the department or elsewhere that the candidate and thesis advisor designate as contributing specifically to the overall goals of the honors work. This honors elective may not fulfill any other portion of the Theatre Major, or any other major the student may be pursuing. All honors candidates will present their completed projects to the Department Honors Committee for evaluation.

## **STUDY ABROAD**

The Theatre Department attempts to work individually with majors and prospective majors who desire to study abroad. In general, with careful planning it is usually quite easy for students to complete the major in Theatre if they study abroad for one semester of their junior year. For those wishing to study abroad for more than one semester of junior year, a more complicated situation may arise, but one that can often be successfully managed through close consultation with the department chair. Students are encouraged to consult with the chair early in their Williams careers if they anticipate a combination of Theatre major and study abroad.

## **FAQ**

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in many cases, though students should be sure to contact the department.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description, and complete syllabus, including readings/assignments.

**Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

No.

**Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

Yes.

**Are there specific major requirements that cannot be fulfilled while on study away?**

Yes.

**Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

Yes.

**Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:**

None to date.

## **THE NATIONAL THEATRE INSTITUTE**

The Department of Theatre is affiliated with the National Theatre Institute, which offers additional theatre study through its resident semester program. The Institute is fully accredited by Connecticut College and is a member of the Twelve-College Exchange. Limited numbers of Williams students can therefore be selected to take a full semester of intensive theatre study at the NTI, located at the Eugene O'Neill Memorial Theatre Centre in Waterford, Connecticut. During the semester, students from participating colleges live and work as members of a theatre company gaining experience with professional theatre artists in a workshop environment. Early application is essential.

## **THEA 100 (S) ADAPTING TO THE LANGUAGE OF THE CAMERA**

The course will focus on the creation of screen character and introducing different acting techniques. By means of improvisation, concentration exercises and games, the class will attempt to create a common film vocabulary and understanding through effective analysis of the recorded on-camera scenes. The course will culminate in the presentation of scenes from classical and contemporary film or television. In addition, the students will research one of the masters of the cinema movies -- for example, Charlie Chaplin, Orson Welles, Alfred Hitchcock, Ingmar Bergman, Akira Kurosawa, Federico Fellini, Kathryn Bigelow, Francis Ford Coppola, Spike Lee, Darren Aronofsky, etc. The student will give a brief oral report and write a one to three page paper.

**Requirements/Evaluation:** The course requires active participation by students in all physical and vocal exercises, rehearsals, concentration exercises, class discussion, oral reports and prepared showings. Therefore, attendance is mandatory in both the Research and Writing Section and the Acting Workshop.

## **THEA 101 (F) The Art of Playing: An Introduction to Theatre and Performance**

**Cross-listings:** THEA 101 COMP 151 GBST 116

Primary Cross-listing

This is an introduction to the global art and practice of making theatre. Students will learn about the history, aesthetics, and approaches to the performer's labor associated with select performance forms from around the world. Emphasis will be on the analysis of embodied practices and the relationship between the stage and everyday life. Through readings, audiovisual materials, performance exercises, and discussions we will engage with theatre as a constantly evolving art form, sharpening our analytical skills through theoretical approaches from performance studies. Central to our exploration will be excavating the Eurocentric assumptions that conventionally shape the practice and study of theater in the United States. We will seek ways to decolonize our perspectives and ask critical questions about performance's potential to enact strategies of anti-racism and anti-imperialism. This course, open to all students, is a gateway to the major in Theatre, and is a prerequisite for THEA 201, THEA 204, THEA 301, and THEA 401.

### **THEA 104 (F) Greek Literature: Performance, Conflict, Desire**

**Cross-listings:** CLAS 101 COMP 101 THEA 104

#### **Secondary Cross-listing**

In the *Iliad*, Paris' desire for the famously beautiful Helen leads to the Trojan War, the devastating conflict between the Trojans and the Greeks retold and reimagined time and again in ancient Greek literature. The stories of Troy and its aftermath were performed not only as epic poems (as in the *Iliad* and the *Odyssey*), but also evoked by lyric song, dramatized on the tragic stage, and recounted in oratory. Beginning with the Homeric epics, this course explores the recurring and ever-shifting debates, longings, hostilities, and aspirations that drive Greek literature and shape its reception, paying special attention to questions of performance context and audience. We will consider, for example, how the competitive and erotically-charged environment of the Greek symposium is crucial for understanding both Sappho's songs and the philosophical dialogues of Plato and Xenophon. The nexus of performance, conflict, and desire will give us a distinct perspective on many important topics within the study of Greek culture, including the construction of personal and collective identity, the workings of Athenian democracy, and the development of literary genres. This course will include readings from the works of, e.g., Homer, Sappho, Herodotus, Aeschylus, Sophocles, Euripides, Aristophanes, Thucydides, and Plato, and assignments will incorporate interactive and experiential elements, such as recitations, staged readings, and debates. All readings are in translation.

**Requirements/Evaluation:** two medium-length essays, final exam, active participation, preparation for and participation in debates and staged readings (short writing assignments, in-class presentations).

### **THEA 150 (S) The Broadway Musical (DPE)**

**Cross-listings:** MUS 150 THEA 150

#### **Secondary Cross-listing**

Named for a specific road but enjoying a global impact, the Broadway musical has intersected with multiple styles and societal concerns over the past century. In this course, we explore the American musical theater's roots and relationship to opera, operetta, vaudeville, minstrelsy, and Tin Pan Alley. Traveling through the genre's history, we will encounter a wide range of musical styles, including ragtime, jazz, rock, and hip hop, and will explore several genre transformations, such as movies made into musicals and musicals into movies. We will develop a range of analytical skills as we investigate connections between choreography, lyrics, music, staging, and production. Throughout the semester, we will consider the genre's representations and reflections of ethnicity, race, sexuality, and class. The syllabus includes representative works by Gilbert and Sullivan, Cohan, Gershwin, Kern, Weill, Rodgers and Hammerstein, Lerner and Loewe, Bernstein, Sondheim, Lloyd Webber, and Miranda, with particular focus on such works as Showboat, Oklahoma!, Guys and Dolls, West Side Story, Hair, Rent, and Hamilton.

**Difference, Power, and Equity Notes:** We will develop skills aimed at analyzing and interpreting how perceptions of race, gender, and class shaped, and were shaped by, Broadway. We will consider the extent to which, for example, blackface minstrelsy and ethnic-based humor persisted and how specific musicals aimed to engage with critical social and political issues throughout the genre's history. Musicals have played a major role in the contested and ongoing endeavor to define "America."

**Cross-listings:** ARTS 201 THEA 201

#### **Primary Cross-listing**

This course examines designers' creative processes as they investigate a theatrical text and then dream-into-being the fictional worlds of a hypothetical production. Class will consist of several practical projects in multiple areas of design. We will practice a two-pronged technique in response to a text: developing a personal, intuitive creative response while simultaneously supporting all logistical requirements, resulting in an inventive yet dramaturgically sound design. Emphasis will be on folding this individual work process into a larger group collaboration by refining methods of communication, presentation, and group critique.

**Requirements/Evaluation:** Coursework is group class discussion and critiques, paired with several hands-on projects throughout the term.

### **THEA 209 (S) Realism: Scene Study**

A studio in the acting, craft, and performance of realism. How do we perform in the present moment? How do we act with purpose and intention? What makes something look and feel like it is happening for the first time? When might acting require us to do *less* rather than more? In this studio, we will explore tools and methods used by actors to tell truthful stories and convey the close imitation of reality on stage. Beginning with basic techniques and exercises, we will move into more advanced scene studies based on short scenes from works by contemporary U.S. playwrights, including: Branden Jacobs-Jenkins, Bess Wohl, Amy Herzog, Annie Baker, Dominique Morisseau, Eboni Booth, Quiara Alegría Hudes, Jackie Sibblies Drury, Lauren Yee, Mona Mansour, Martyna Majok, Taylor Mac, and others. As a contribution to the class, students will conduct and share independent research on the genre of realism and its expression within various forms of time-based visual media, including theatre, film, TV, and social media. As a final project, students will perform two- or three-person scenes in front of an invited audience.

**Requirements/Evaluation:** weekly journal writing; active participation in class exercises and discussion; independent research and 15-minute group oral presentation; a midterm, off-book performance of a short scene; a final, off-book performance of a longer scene

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** Theatre majors, preference given to those who have taken Thea 101. Otherwise please contact instructor for permission.

### **THEA 211 (S) Performing Greece**

**Cross-listings:** CLAS 211 COMP 248 THEA 211

**Secondary Cross-listing**

Modern readers often encounter Homer, Sappho, Sophocles, and the Greek orators through written texts, yet their first ancient audiences experienced the words of these authors not in silence and solitude, but in live performance contexts. This course, therefore, will take up performance as a critical lens for interpreting ancient Greek literature, situating these works within a rich culture of song, dance, speech, and debate. We will survey the evidence for the musical, visual, and embodied aspects of Greek literature, and also reflect on the rewards and limits of enlivening the ancient world through the reconstruction and re-imagining of its performative dimensions. Our attention to performance will give us a distinct perspective on many important topics within the study of Greek culture, including the construction of personal and collective identities, the workings of Athenian democracy,

and the development of literary genres, and it will also enable us to consider the reception and reperformance of Greek myth and literature from new angles. All readings are in translation.

**Requirements/Evaluation:** active participation in class, short essays/projects (2-5 pages each, 5 total, including a longer final essay/project)

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** first-year students and sophomores and majors in Classics, Comparative Literature, and Theatre

**Expected Class Size:** 10-12

### **THEA 214 (S) Writing for Stage and Screen**

**Cross-listings:** THEA 214 ENGL 214

Primary Cross-listing

This studio/workshop course is designed for students interested in a semester-long immersion in the practice of dramatic writing for theater, film, television and audio. Students should expect to write most days. Our focus will be on the fundamentals of story, and the cultivation of each writer's individual voice. In addition to reading existing dramatic texts of various genres and forms, and completing weekly prompts and exercises exploring character, dialogue, structure, theme, conflict and world building, students will work toward a longer final project. Students will present their own work regularly, and respond to each other's work. The course will culminate in a staged reading of excerpts for the campus community.

**Requirements/Evaluation:** a daily journal; weekly writing exercises; peer responses; a ten-minute piece; a final 20-30 minute piece; attendance and class participation

**Prerequisites:** students are asked to submit a brief statement describing their interest and any past experience (if applicable) in writing for the stage and/or screen

**Enrollment Limit:** 18

**Enrollment Preferences:** Theatre and English majors; Comparative Literature majors

**Expected Class Size:** 14

**Grading:** yes pass/fail option, no fifth course option

### **THEA 215 (F) Performance Ethnography (DPE)**

**Cross-listings:** GBST 215 DANC 214 ANTH 215 AMST 214 THEA 215

Secondary Cross-listing

The course aims to explore the theory, practice, and ethics of ethnographic research with a focus on dance, movement, and performance. Traditionally considered to be a method of research in anthropology, ethnography is the descriptive and analytical study of a particular community through fieldwork, where the researcher immerses herself in the culture of the people that she researches. In this course students will be introduced to (i) critical theory that grounds ethnography as a research methodology, (ii) readings in ethnographic studies of dance and performance practices from different parts of the world, and (iii) field research in the local community for their own ethnographic projects. This is primarily a discussion-based seminar course and may include fieldwork, attendance at live performances, film screenings, workshop with guest artists etc. No previous dance or performance experience is assumed or required.

**Class Format:** community-based field work

**Requirements/Evaluation:** class participation, reading responses, fieldwork and field notes, short papers, and final essay

**Prerequisites:** none

**Enrollment Limit:** 15

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** This course focuses on ethnographic research with an emphasis on the ethics of doing ethnography in field sites and making performances based on that research. In fieldwork and performance work, there is a difference in social, cultural, and political (broadly conceived) power between researcher and interlocutors. In the course, students' critical analytical skills are developed for them to be self-reflective about these power differentials and to address issues of social inequality.

**Cross-listings:** ASIA 216 GBST 214 ASST 214 THEA 216 AMST 213 ASIA 214 DANC 216

Secondary Cross-listing

The course aims to explore dance and movement-based performances as mediums through which identities in Asian and Asian-American (including South-Asian) communities are cultivated, expressed, and contested. It will orient students towards "reading" and analyzing live and mediated performances within historical, social, and political frameworks. Students will explore how socio-historical contexts influence the processes through which dance performances are invested with particular sets of meanings, and how artists use performance to reinforce or resist stereotypical representations. Core readings will be drawn from Dance, Performance, Asian, and Asian American Studies, and will engage with issues such as nation formation, race and ethnicity, appropriation, tradition and innovation among other topics. This is primarily a discussion-based seminar course, and might also include film screenings, discussion with guest artists and scholars, and opportunities for creative projects. No previous dance experience is required.

**Requirements/Evaluation:** reading responses, essays, in-class writing assignments, class participation, and group presentations.

**Difference, Power, and Equity Notes:** This course introduces students to the role of performance in nation formation in Asia and the history of Asian-Americans in the US through analysis of dance performances and practices. Student will explore how race was central to the formation of Asian and the American nation, and how social and legal discriminatory practices against minorities influenced popular culture. The assigned material provide examples of how artists address these inequalities and differences in social power.

**THEA 218 (F) Ritual, Pattern and Intuition: writing and devising for performance**

Together, we will (re)discover alternative forms of writing and devising plays, to question the gender, racial and heteronormative bias in contemporary western narratology. In this class you will build and expand your dramaturgical toolbox to thoughtfully understand and engage with new plays, you'll explore your own individual artistic voice and process through creative experiments and generative writing exercises, and finally, you'll write/create a new performance project to be workshopped throughout the semester, culminating in a final presentation. This is a process driven class in which we will interrogate our existing habits and thought patterns to intuitively embrace new narrative structures. Through ritual, pattern and alternative forms of dramaturgy, we'll explore new ways to generate and organize content. We'll develop new work through weekly writing exercises and creative

processes stimulated by design elements and influences from artists of other mediums. We'll critically consider and celebrate the work of artists existing outside of white heteropatriarchy. We'll collectively strategize non-hierarchical forms of the curation and presentation of performance.

**Requirements/Evaluation:** Weekly writing projects leading up to a longer final project, research and writing notebook compiled throughout the semester, peer responses; attendance and class participation

**Prerequisites:** Students are asked to write a personal statement about their experience with collaborative practice and include questions that they would desire to pursue in the course.

**Enrollment Limit:** 12

**Enrollment Preferences:** In instance of over-enrollment, preference will be given to Seniors, Juniors, & Sophomores in the Theatre Major.

### **THEA 220 (F) Greek Tragedy**

**Cross-listings:** CLAS 202 COMP 220 THEA 220

Secondary Cross-listing

Ancient Greek tragedy was a cultural phenomenon deeply embedded in its 5th-century Athenian context, yet it is also a dramatic form that resonates powerfully with 21st-century artists and audiences. This course examines tragedy on both levels. We will read such plays as Aeschylus' [Agamemnon], Sophocles' [Electra], and Euripides' [Medea] in English translation, considering their literary and dramatic features as well as their relationship to civic, social, and ritual contexts. We will discuss such topics as the construction of gender and identity on the dramatic stage, the engagement between tragedy and other literary genres, and the distinctive styles of the three major Athenian playwrights. We will also survey a set of recent productions and adaptations of these plays, with a particular focus on versions by women, people of color, and non-Western playwrights and producers. We will reflect on how a dramatic form largely produced by and for Athenian citizen men became a creative resource for a remarkably diverse range of 21st-century artists, and explore how modern productions offer fresh perspectives on ancient material.

### **THEA 222 (S) Solo Performance**

In this tutorial, students will study the process of the creation of one-person performance pieces and will work individually or in collaboration to create original solo works. Each student will perform their own piece at the end of the semester in a final public performance. Students will learn about developing a general production concept and scenic vision, choosing or writing a script, building a character, designing (set, lighting, costume, and sound), publicity, and combining all aspects of theatrical craft to create a successful solo piece. Course time will be divided between class discussion and individual rehearsals with the instructor. Students interested in acting, directing, writing, producing, dramaturgy, design, stage management, and criticism are all welcome.

**Requirements/Evaluation:** creating a script, building a character, developing various aspects of design, performing a solo piece, and writing a self-evaluation at the end of the semester

**THEA 226 (S) Gender and the Dancing Body (DPE)**

**Cross-listings:** AMST 226 WGSS 226 THEA 226 DANC 226

**Secondary Cross-listing**

This course posits that the dancing body is a particularly rich site for examining the history of gender and sexuality in America and beyond. The aim of the course is to explore ideas related to gender and sexuality as prescribed by dominant cultural, social, and religious institutions, and how dance has been used to challenge those normative ideologies. We will examine a wide range of dance genres, from stage performances to popular forms to dance on television, with particular attention to the intersections of race and class with gender. This is primarily a discussion-based seminar course and will also include film screenings, discussions with guest artists, and opportunities for creative projects. No previous dance experience required.

**Requirements/Evaluation:** class participation, reading responses, essays, in-class writing assignments, and group presentations

**Difference, Power, and Equity Notes:** In the course, students will explore the concept of gender as a social construction and how the body's historical associations to markers of gender and sexuality lead to differences in socio-political power. The assigned texts and viewings provide examples of how bodies and their movements make meaning in a network of power relationships, and how artists use dance to address social inequalities such as sexism, racism, and transmisogyny, to imagine a more just world.

**THEA 228 (S) Performance Practices of Global Youth Cultures**

**Cross-listings:** GBST 228 THEA 228

**Primary Cross-listing**

This course investigates how young people engage in a variety of performance practices to define social identities and reflect on critical issues. We begin by examining how scholars and media have defined "youth" by way of questioning assumptions about the inherent universality of this social category. We will then explore how young people have thought about and represented themselves. Taking seriously music, dance, fashion, and ritualized uses of public space (including in the virtual realm), we will explore examples of how youth have used performance practices to engage in political activism, subvert hegemonic norms, reconfigure urban geographies, and engage in critical identity politics. Our inquiry will include attention to how youth practices travel globally and adopt new localized political meanings, as well as the ways in which the subversive potential of performances can be subsumed by the normalizing mandates of global capital. Our work in class will be based upon readings, discussions, and audiovisual materials from various parts of the world. Throughout the semester students will turn an analytical eye towards their own practices and modes of consumption. For final projects students will engage in ethnographic research about specific youth cultures in the region and on the Williams campus.

### **THEA 230 Performance Practices of India (DPE)**

This course explores ancient and contemporary performance practices in India. Our objects of study will include the text and performance of Sanskrit plays, contemporary and experimental theater productions, as well as forms of dance and ritual. We will discuss dramaturgical structure, staging, acting conventions, gender representation, performer training, the experience and role of the audience, as well as mythological and political themes. Thinking historically and ethnographically, we will seek to understand the aesthetics and social purposes of these practices, in addition to the relationship that performance has with everyday life, contested concepts of the nation, and caste. Throughout the semester we will interrogate the ways in which Western categories such as "classical," "folk," "religious," "traditional," and even the distinction between "dance/theater/music/visual arts" are not indigenous or accurate concepts for organizing thinking about performance in this part of the world.

**Requirements/Evaluation:** Evaluation will be based on participation in discussion, reading responses, an oral presentation, and one 10-page paper.

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** preference for seniors and juniors

**Difference, Power, and Equity Notes:** We will examine British colonial edicts that prohibited performance practices as a form of social control as well as in the name of Christian morality. From here we will explore how upper-caste Independence era artists and leaders sought to reinvent the arts as

vessels of "Indian" identity, at the cost of further marginalizing hereditary performance communities. We will also interrogate how the Indian state has promoted narrow visions of "femininity" and how artists contest religious nationalism

### **THEA 233 (F) Theatre Masters: Become One of Them**

**Cross-listings:** THEA 233 ENGL 235

#### **Primary Cross-listing**

How well do you know Stanislavsky, Strasberg or Adler? This tutorial offers an exploration of the most notable theatre artists from the past and present. Students will select a specific master with a unique theatrical style, and will study that iconic artist's particular method or approach. Students will be encouraged to choose any master who had made a significant contribution to theatre -- such as Constantine Stanislavsky, Stella Adler, Sanford Meisner, Lee Strasberg, Bertolt Brecht, Michael Chekhov, Jerzy Grotowski, Tadeusz Kantor, Pina Bausch, Tadashi Suzuki, Anne Bogart, etc. Each student will conclude their exploration by writing a script and presenting the essence of their research in a brief performance (for the camera) -- portraying the legendary icon at work, in a social situation, or in solitude. You learn more about others when you become them, if only for a moment.

**Cross-listings:** GBST 246 THEA 246 AMST 249

#### **Primary Cross-listing**

This seminar will explore contemporary Asian American plays, stand-up comedy, performance art, and spoken word with an eye to how artists *do* politics through their cultural labor. We will begin with a brief survey of images from popular media to identify legacies of Orientalism. From here we will move towards examining the ways in which Asian American artists from various eras subvert stereotypes and pursue projects of social justice. In watching performances and reading scripts, essays, and interviews, we will attend to narratives, acting methods, theatrical design, spectatorship, and the political economy of cultural production that shapes how Asian American artists make and show work. In addition, we will explore how artists stake political claims in the public sphere through teaching and community organizing.

**Requirements/Evaluation:** two 5-page critical essays, reading responses, class presentations, and active discussion participation

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** sophomores, juniors, and seniors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Difference, Power, and Equity Notes:** Course fosters critical engagement with artistic practices that seek to address the concerns of populations in the US who have historically had unequal access to resources and audiences for representing themselves and their political concerns. Students will ask questions about how Asian American artists address legacies of Orientalism, as well as how they facilitate community engagement and approach

projects of social justice.

**THEA 250 (S) Feminist Theatres: A Global Perspective (DPE) (WS)**

**Cross-listings:** ENGL 253 WGSS 250 THEA 250

**Primary Cross-listing**

What makes a work of theatre feminist? How do plays, social practices, and performances engage with different models of feminism: liberal, radical, materialist, intersectional, reluctant? Why has feminism mattered to theatre makers of the past? Should it still matter to us now? If so, what forms might future feminist theatres and performance practices take? In this tutorial, students will work in pairs to examine the political relation of models of feminism to plays and performances by theatre artists, companies, and collaboratives from across the globe, from the late-twentieth century to today. Interrogating feminism's own legacies of exclusionary and biased tactics, we will focus on the racialized and class-based aspects of feminist performance practices and the history of radical and intersectional feminism in theatre. Artists, companies, and movements to be considered may include: Spiderwoman Theatre, The WOW Café, Héléne Cixous, Adrienne Kennedy, Caryl Churchill, Sphinx Theatre Company, Wendy Wasserstein, Ntozake Shange, Griselda Gambaro, Manjula Padmanabhan, Cherrie Moraga, Karen Finley, Suzan-Lori Parks, Young Jean Lee, Lisa Kron, Tori Sampson, Arethusa Speaks, Women's Project and Productions, Sarah DeLappe, and others. Close reading and analysis of source material will occur alongside engagement with critical essays and writings by: Audre Lorde, Judith Butler, bell hooks, Gloria Anzaldúa, Kimberlé Crenshaw, Eve K. Sedgwick, Gayatri Spivak, Jill Dolan, Sue-Ellen Case, José E. Muñoz, and Donna Haraway. This course will follow a standard tutorial format, with students alternating the presentation and reading of a series of 5-page papers.

**Requirements/Evaluation:** students will meet with instructor in pairs for an hour each week; they will write a 5-page paper every other week (five in all), and comment on their partner's papers in alternate weeks; emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and critical written and oral response

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Theatre majors; WGSS majors; ART majors; COMP majors. Students from all majors are welcome and invited to contact Prof. Holzapfel about their interest in the class: ash2@williams.edu

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Writing Skills Notes:** As a tutorial, this course will require extensive practice in writing, editing, and revising. Emphasis be directed towards building and developing a compelling argument, providing thorough evidence for one's interpretation, and fluidly integrating theory into one's argumentation.

**Difference, Power, and Equity Notes:** This tutorial examines intersections between gender, race, sexuality, class, and ethnicity in relation to theatre's ongoing engagement with feminism. We will consider how articulations of difference, power, and equity arise and are, in fact, prioritized in quite different ways within the politics of feminism itself, leading to their variable expressions through art.

**THEA 252 (S) Stop Making Sense: Absurd(ist) Theatre in Historical Context (WS)**

**Cross-listings:** THEA 252 COMP 256 ENGL 256

**Primary Cross-listing**

We want to make sense of things. In nearly all of our academic pursuits, the point of analysis is to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek). We will follow standard practice in tutorial pairs, as each week one

student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

**Requirements/Evaluation:** Evaluation will be based on weekly tutorial papers/response papers, and active participation in weekly tutorial sessions.

**Prerequisites:** None

### **THEA 253 (F) Shakespeare alone/together: Interpretation and Performance of Soliloquies and Major Speeches**

Shakespeare alone/together: Interpretation and Performance of Soliloquies and Major Speeches Many of Shakespeare's most intricate and challenging theatrical moments are contained within speech acts performed by an actor alone. These include true soliloquies, where the performer literally occupies the stage by him- or herself, and major speeches, where, although addressing other present characters, that performer still must carry the dramatic action for a significant time on their own. In both circumstances of course, the actor is actually always in the company of others--the audience. Such virtuosic talking presents unique challenges and opportunities for the Shakespearean actor. This class will investigate these challenges in two registers. First, each student will perform a series of speeches from the Shakespeare canon, focusing on vocal and physical approaches to characterization, and exploration of various modes of delivery. Second, for each set of speeches, the entire class will read selections from the critical literature on the play in question, and students will then be asked to re-interpret their performative delivery based on insights from the scholarship. In-class critiques will accompany all performances.

**Requirements/Evaluation:** Evaluation will be based on weekly presentation of performance material; participation in in-class critique of peer performances; weekly readings as assigned; short analytical papers to accompany performance projects.

**Prerequisites:** Theatre 101 or one college-level acting class or permission of instructor.

**Enrollment Limit:** 12

**Enrollment Preferences:** Theatre or English majors or prospective majors.

### **THEA 254 (F) PHYSICAL VOICE & ACTING**

This course is an advanced acting class where students explore the integration of performance and vocal expression. Through the process of integrating voice work and physical acting methods, students develop the breath to support their play, availability, intention, and objectives. The goal is to inspire students to listen and respond with the whole body, to allow action to have voice at any moment, and for the voice to be fully supported by the body. It is an embodied practical class where we will explore the power of voice and its range: the quiet intimate voice, the sung and deep voice, and the dance of articulation via heightened contemporary texts. Overall the goal is to integrate intention and action via breath and voice. Time outside of class to develop a practice is required. Physical engagement, reading, writing, and spoken reflection are core components of the class. Students will also be lead in the process of examining and developing a decolonizing practice to do with our relationship to time and product.

**Class Format:** On Fridays students will work independently in small groups.

**Requirements/Evaluation:** Weekly one-page reflection papers, bi-weekly readings, in-class presentations of one short physical theatre solo, one monologue, and one scene. Evaluation will be based on attendance, level of engagement in all studio exercises, participation in class discussion about artistic process, and demonstration of growing vocal and physical articulation.

**Prerequisites:** No prerequisites.

**Enrollment Limit:** 14

**Enrollment Preferences:** Enrollment preferences will be theatre majors and prospective theatre majors.

**Expected Class Size:** 14

### **THEA 255 (S) Performing Shakespeare**

This tutorial course will challenge students to interpret and perform characters and scenes from a considerable variety of Shakespeare's work for the stage. Working in pairs, students will function as both directors and actors, bringing scene-work-in-progress first to the instructor for critique/revision, and subsequently to other members of the class for more general discussion. Written assignments, explicating and contextualizing artistic choices, will accompany presentations. Over the course of the semester, assignments will ask students to grapple with particular challenges of Shakespeare's drama (including, for instance, the technical aspects of speaking the verse, and the accompanying challenge of performing in the Elizabethan tradition of "open space"). Other assignments will ask students to consider specific interpretive traditions (feminist, phenomenological, queer studies, post-modern) in preparing their work for presentation. Plays studied will include tragedies (*Macbeth*, *Anthony and Cleopatra*, *Othello*), comedies (*The Merchant of Venice*, *A Midsummer Night's Dream*, *Twelfth Night*), and histories (*Richard II*, *Richard III*); theorists assigned for additional readings may include Shirley Nelson Garner, Alan Sinfield, Harry Berger Jr., Arthur Little, Jr., Janet Adelman, William Worthen, Laurence Senelick, Bert States, and Stephen Greenblatt.

**Class Format:** in addition to weekly tutorial meetings, several group "lab" sessions will bring all course members together for larger collaborative work

**Requirements/Evaluation:** weekly performance presentations, weekly 3-page analytical papers, active participation in oral critique

**Prerequisites:** one college level acting class or significant comparable experience (permission of instructor)

### **THEA 256 (S) The Expressive Body**

This course aims to allow students to develop the body's capacities for expression and reflect on the experience of movement. On one hand, we will enhance our potential as performers -- both in the rehearsal process and on stage. On the other, we will explore how training our corporeal intelligence can enrich our everyday lives. Studio sessions will seek to cultivate strength, endurance, flexibility, alignment, and balance so that we can gradually expand the body's range of safe possibilities as we begin to work with images, gesture, and emotions. Exercises will be drawn from a range of movement and theatrical techniques including yoga, Bharatanatyam, contemporary dance, Grotowski, butoh, and Schechner's Rasaboxes. Integral to our work will be consideration of the relationship between words, objects, and moving. Concurrently, we will read, write, and discuss some significant ideas about the consciousness of the body to expand our understandings of ourselves from various perspectives. The spirit of the class is one of bold investigation and refined observation in the context of supportive camaraderie as we all grapple with encountering the new, the surprising, and the wonderfully unexpected.

**Class Format:** includes both studio sessions and reading and discussion

**Requirements/Evaluation:** includes participation in studio exercises, in-class performance of monologues and group movement compositions, journal reflections, and two 2-page reading responses

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** seniors and juniors in the major

### **THEA 266 (S) Playwriting and Production: Exploration of Playwright as Theater Maker**

This course will examine the role of the playwright as collaborator in the new play production process with discussions of collaborative practice. Through writing exercises and critical response time in class we will focus on writing short plays that will culminate in a final presentation collaboratively produced by the class. Group work both during class time and outside hours will be necessary for facilitating full class critical response time and artistic process time with the plays. We will explore case studies of the production of new plays. A writing and research notebook will be a requirement for the class to encourage self-motivation skills as a theater maker outside of the classroom time. Writing and collaborative practice time will be supplemented with weekly reading or viewing assignments of new plays, critical theory, and research for discussions of structure and practice. Self-selected research readings, media, and art will be a large component of the course over the semester.

**Requirements/Evaluation:** weekly writing projects leading up to a longer final project, research and writing notebook compiled throughout the semester, peer responses; a short piece created with peers; attendance and class participation

**Prerequisites:** THEA 101 or permission from instructor; All students are asked to write a personal statement about their experience with collaborative practice and include questions that they would desire to pursue in the course.

**Enrollment Limit:** 12

**Enrollment Preferences:** In instance of over-enrollment, preference will be given to Seniors, Juniors, & Sophomores in the Theatre Major.

### **THEA 267 (S) Performance Studies: An Introduction (DPE)**

**Cross-listings:** DANC 267 WGSS 267 COMP 267 THEA 267

Secondary Cross-listing

Since the 1980s, performance studies has emerged as an interdisciplinary field of inquiry, with origin tales in theater and anthropology, in communications and philosophy. What might theorizing "performance" as mode, analytic, and object of study have to offer scholarship in the interdisciplinary humanities? In this seminar, we will read texts formative of performance studies, paired with multimedia performance examples, where performance speaks to staged theatrics as well as the presentation of everyday life. We will ask, how are race, gender, sexuality, and nation produced as the effects of legal, political, historical, social, and cultural scripts? And--an important partner question--how do discourses and practices of race, gender, sexuality, and nation in fact produce legal, political, historical, social, and cultural effects? This seminar is an introduction to performance studies, an interdisciplinary field in conversation with theater studies, gender studies, anthropology, philosophy, literary theory, visual studies, dance studies, ethnic studies, queer theory, and postcolonial studies. Students will study and experiment with performance while reading theoretical texts to grapple with concepts including ritual, restored behavior, performativity, mimicry, liveness, the body, objecthood, archive, movement, matter, and affect.

### **THEA 270 Stop Making Sense: Absurd(ist) Theatre in Historical Context (WS)**

In most academic work the point of analysis is to make sense, to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? How and when have strategies of nonsense, circular reasoning, linguistic obfuscation, and intentional theatrical absence been employed to disguise, or deflect attention from, specific didactic (even political) agendas? What role specifically does theatre, theatricality, or performativity play in the presentation of art that refuses understanding? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek, Richard Foreman). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

**Requirements/Evaluation:** Standard tutorial requirements; weekly paper or response paper from each member of the tutorial pair. Evaluation based on improvement in written expression and engaged contribution to weekly discussions.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** Theatre, English, and Comparative Literature majors and prospective majors.

**Expected Class Size:** 10

**Grading:**

**Distributions:** (D1) (WS)

**Writing Skills Notes:** This tutorial will demand writing from each student each week (either a primary paper or a shorter response paper), and each student will receive regular, extensive feedback including a focus on strategies for successful persuasive argumentation.

### **THEA 272 (S) Theatre & Environment: Site, Nature, Eco-performance, Utopia (DPE)**

**Cross-listings:** THEA 272 ENVI 271

Primary Cross-listing

What is theatre's relation to the environment, whether natural or social? How does the site, place, or ecology of a performance change its meaning and reception? What role can live performance play in grassroots campaigns for climate action or environmental justice? How can we use theatre to, in the words of adrienne maree brown, "practice, in every possible way, the world we want to see?" In this combined seminar/studio course, participants will work collaboratively to create a series of mini-performances based on four categories: site, nature/ecology, eco-performance, and utopia.

Acknowledging the deep inequities (racial, gendered, ethnic, class-based) that constitute *all* human and environmental interaction, we will work to understand how art's relationship to the environment is itself shaped by the historical legacies of empire and global capitalism. As a contribution to the work of the studio, each student will share independent research on an artist, activist movement, or collective of their choice, such as: Hito Steyerl, Ellie Ga, Marta Rosler, Joan Jonas, Paul Chan, Theaster Gates, Bread and Puppet, Punch Drunk, En Garde Arts, Artchoke Dance, Talking Birds, Extinction Rebellion, Greenpeace, and others. As a special project in the class, we will collaborate with The Zilkha Center to create performances that engage directly with topics relevant to the campus and surrounding community. This is a seminar and maker's course that invites students to create, develop, perform, and share their work with each other and, in some cases, public audiences.

**Class Format:** This is a maker-based studio and seminar course that requires deep collaboration on the creation, development, and performing of original works of live performance.

**Requirements/Evaluation:** Creation and presentation of a series of four mini-performance pieces; a 15-minute independent oral presentation on a chosen artist or collective; weekly journal writing; deep and active participation and collaboration.

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** if overenrolled, preference will be given to Theatre majors and Environmental Studies majors

**Difference, Power, and Equity Notes:** This course interrogates the deep inequities, injustices (racial, gendered, ethnic, and class-based), and power relations that constitute all of humanity's relation with earth's environment, ecosystem, and ecology. Students will not only study artists and collectives engaged with the work of environmental justice, accountability, and action, they will also make such art themselves.

### **THEA 274 Performing Utopia**

How is performance utopian by design? How do we perform utopias in our daily lives? This course examines the performative dimensions of utopia and the utopian aspirations of performance. According to Jill Dolan, performance can be a utopian prompt, a space and time to imagine new forms of sociality and ways of being in the world. Using a case-study model, we will consider how different modes of performance--theatre, dance, film, art, and, more recently, social media--have helped produce and sustain utopian socialities in and across shifting temporalities in the U.S. imaginary, including: the Shakers, Harmony, Oneida, Drop City, Soul City, The Farm, as well as recent "intentional communities" that envision "opting out" as a new way of inhabiting earth in the Anthropocene. Alongside such real-world examples, we will consider how performance itself has been theorized as a productively utopian (and also dystopian) realm by critics like Jill Dolan, Miranda Joseph, and Jose E. Muñoz, and artists and companies like Bread and Puppet, The Living Theatre, Rachel Rosenthal, Miguel Gutierrez, Guillermo Gómez-Peña, Faye Driscoll, Theaster Gates, Nick Cave, and Taylor Mac. As a way of gaining knowledge through embodied practice, students will work collaboratively each week to envision, create, and perform everyday "mini-utopias" that rise and fall ephemerally. Students will be required to attend a weekend field trip to The Shaker Museum in Hancock, MA, and may as well, when relevant, be asked to attend various live performances or exhibitions at local arts institutions throughout the term.

**Class Format:** This course will contain a studio component

**Requirements/Evaluation:** In-class writing and participation; collaborative, weekly creations of "mini-utopias"; a 6-8 page midterm paper based on independent, archival research; leading of a 10-minute in-class discussion; and a final, 15-minute collaborative performance, or other creative presentation, developed from case-study research and inclusive of an invited audience.

### **THEA 275 (S) American Drama: Hidden Knowledge (WS)**

The Buddha is said to have identified three things that cannot stay hidden: the sun, the moon, and the truth. What's the secret? Who is lying? Who is breaking the rules? American drama abounds with hidden knowledge and false representations. (This is not surprising: theatre is always on some level a deceptive practice, a place where one person pretends to be another, and where what is spoken is always open to skeptical scrutiny. We might say theatre is always lying as much as lying is always theatre.) This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty-first. Beginning with excerpted critical and historical writings on secrecy and lying (*The Adventures of Pinocchio*, Machiavelli's *The Prince*, Thomas Carlson's *Lying and Deception: Theory and Practice*, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Eugene O'Neill, Edward Albee, Sarah Ruhl, Arthur Miller, Amy Herzog, Susan Glaspell, Sophie Treadwell, Annie Baker, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what can we learn in particular from *American* drama about a national relationship to honesty and its opposites.

**Requirements/Evaluation:** weekly papers/response papers; weekly meeting with instructor and tutorial partner

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Theatre and English majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Weekly papers will prompt extensive commentary. The amount of writing in the course will be substantial and well spaced, followed by timely evaluation and suggestions for improvement. The course requires multiple assignments, each returned with comments which address writing problems and strategies, as appropriate. Student will receive guidance on structure, style, argumentation, and other significant aspects of writing throughout the semester.

### **THEA 283 (F) The Actor-Creator: Introduction to Physical Theatre Tools**

**Cross-listings:** THEA 283 ARTS 383

#### **Primary Cross-listing**

This course is an introductory course to the Jacques Lecoq Pedagogy which was born in France and uses observation as a first creative tool. The body is at the heart of this pedagogy and we will have rigorous physical training in order to become more expressive, more precise, and more creative. Improvisation will be the key tool to learn and discover how to write theater on our feet. In the course, we will first observe life: spaces and people. What are the specifics of the different spaces that exist around us and how do they change the body that is in them? Then, we will look at the actor's body. How do you enhance its presence? What brings life to this body? How can we allow ourselves to start using the body as a creative tool that will be able to transform and write? We will next observe the body within the elements. What kind of character will come out of fire? Or of air? What happens when air meets fire? By letting the elements transform us we will find specificity in the character's physicality and relationships. Then we will look at painting, poetry, and music; How can we translate a poem on stage? How do words move? And colors? Is yellow's rhythm the same as brown? We will end the course by working with full masks created by the students/artists and also brought by the teacher. Mask work is an incredible tool to help actors articulate their thoughts, and feelings, and craft their acting. What stories will come out of that? Who's destiny will we learn about? This will be an occasion to bring forth stories you are interested in, that touch you and move you. This course is open to anyone who is interested in creating live performances. Whether you are a writer, a painter, a director, a musician, or an actor you are welcome to bring your fierce and curious artist spirit to create theater that will be telling the stories that matter to you today.

**Requirements/Evaluation:** Attendance and active participation in each class session. Assigned project and scene work (solo and in small groups). Creation of physical performance objects (masks, etc.) Solo and group presentation of assigned work in class.

### **THEA 284 (F) Global Digital Performance (DPE)**

This course explores the ways in which digital technologies are shaping performance practices. We will consider theater, dance and performance art, as well as the use of social media in political movements and everyday life. We will begin by examining the long history of mediatization in performance. From painting, puppetry and photography to video, VR and Tik Tok, performers' bodies have always been, in some sense, "mediated." We will interrogate the affects and power relations at stake in questions of "liveness," paying particular attention to how the representation of bodies is embroiled in longstanding imperialist projects of representing the "Other," racialized and gendered modes of viewing, and global regimes of neoliberal surveillance. On the other hand, we will examine the role digital communication platforms play in political resistance. We will apply our growing understanding of the pitfalls and potential of digital technologies to examining the aesthetic strategies and political projects of artists and their audiences from various parts of the world. Throughout our work we will acknowledge how access to new technologies, as well as the meaning given to their use, vary between national, cultural, and class contexts. This includes keeping in mind the "digital divide" so that we can chip away at our common sense assumptions that the internet and digital art making are inherently democratic.

**Requirements/Evaluation:** reading responses, class presentations, short digital performance projects, and active discussion participation

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** Theatre majors; Art majors; Global Studies concentrators. This course is open and welcoming to all students. Please be in touch with Prof. Pillai or Prof. Holzapfel with questions or to express interest in the course.

**Expected Class Size:** 10

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** This course interrogates the role of artistic and social practices of digital performance in producing and sustaining power structures (state, imperial, colonial, neoliberal) and inequities (racial, gendered, class-based). Focus will include the ways that interactions between makers and users in the virtual realm replicate or contest the inequitable social, racialized, and gendered dynamics that organize daily life offline.

## **THEA 285 (S) Lighting Design for Performance**

**Cross-listings:** DANC 285 THEA 285

Primary Cross-listing

The artistic, intellectual, and practical roles of a designer vary widely, from the spectacle of Broadway to the do-it-yourself ingenuity of downtown theater to the conceptual frame of the art gallery space. This course explores the art and techniques of lighting design for performance. This course will cover the conceptual methodology for development of a design based in textual analysis and research. We will discuss light as an ephemeral substance and the visual content upon which we incorporate it into the theatrical world. Students will delve into how we use lighting to help to tell a story, influence the audience, and create a world unseen to many. By the end of the course, students will be able to answer the question of 'how do color, form, texture, and motion impact our emotions in everyday life and onstage?' We will explore the various tools that are used to implement such a design including the use of movement, color, intensity, and texture as compositional and storytelling tools; and the translation of concept into technical drawings and paperwork used to make an artist's design into a reality. The class format will be a combination of lectures, discussions, and studio work.

**Requirements/Evaluation:** Committed participation in class discussion and feedback; and the thoughtful, timely completion and presentation of multiple projects of varying scales, focusing on lighting design, considered both individually and when working in tandem. Students are expected to complete hours on the lighting hang, focus and tech of pre-determined department productions and are expected to attend Theater Department productions.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** students who have completed THEA 101, 102, 201 or 244, ARTS 100, or equivalent course or practical experience in the performing or studio arts

### **THEA 287 Design for Film & Television**

The production designer is responsible for creating, controlling, and managing 'the look' of films and narrative television from page to screen. This hands-on course explores the processes of production design, art direction, and lighting direction processes as related to design for film and television. From initial Production Design sketches and 'Feel-Boards' to accommodating desired cinematographic angles when designing a studio set, design for film requires a designer to shape an entire visual world while keeping in mind the story as a whole. The goal of this course is to provide an initial understanding of the Production Design process in practice through studio work and instruction.

**Class Format:** This class will be a combination of instruction and in class studio work.

**Requirements/Evaluation:** committed participation in class discussion and feedback; and the thoughtful, timely completion and presentation of multiple design projects of varying scales, focusing on scenic and lighting design, considered both individually and when working in tandem

**Prerequisites:** THEA 201, THEA 285, ARTS 100, or permission from instructor with equivalent experience

### **THEA 288 (F) Storyboarding: Translating the Text into the Visual**

In this class, we will explore using pictures to tell stories. With an emphasis on the flow of story arc over time, we will examine existing texts with episodic and sequential structures (such as picture books, comics, albums, film, theater, and opera) and interpret them into storyboards of various 2D and/or 3D visual media. The focus here is on developing and communicating complete dramaturgically-based visual ideas with an eye towards big-picture concepts. This class is geared towards all students interested in time-based visual narratives such as directing/designing/creating/writing for film and theater. No previous artistic expertise is required, but know that the bulk of the work here will be hands-on art projects, presentations, and group critique and discussion in a studio art class format.

**Requirements/Evaluation:** Coursework is comprised of text comprehension, group discussion/critique, and biweekly studio-style art projects.

**Prerequisites:** THEA 101 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** theater majors, art majors

**Expected Class Size:** 6

**Grading:** yes pass/fail option, yes fifth course option

### **THEA 289 (F) Set Design for Stage and Film**

In this class, we will examine the similarities and differences in creating environments for performance in theater and for film by completing several set design projects that investigate each form. Creative thinking and problem-solving is the focus, but research, drafting, and model-building will be key components of this process. What is unique about design with audience and performer in the same space? What is unique about design for the frame of the camera? and how do we maximize the impact of each as visual designers?

**Requirements/Evaluation:** art project-based class. grades dependent on completion of projects, participation in group class discussion and critique, and improvement in skills/response to feedback over the semester.

**Prerequisites:** theater experience is preferred, but please contact instructor with any questions

**Enrollment Limit:** 12

**Enrollment Preferences:** In instance of over-enrollment, preference will be given to Seniors, Juniors, & Sophomores in the Theatre Majors & Art Majors

### **THEA 290 (S) Theatre Department Production**

Participation in the production program is offered as a partial credit fifth course, is open to all students, and can only be taken on a Pass/Fail basis. Theatre Majors are required to participate in four department productions, and must serve as stage manager for one of them. Depending on their role in the production process, students will be admitted to Theatre Production courses by permission of the department Chair, following casting and the assembly of the artistic and production team. Students may participate in a production in one of three major roles: stage management, performing (actor or actress, musician, dancer, etc.), or non-performing (director, designer, dramaturge, choreographer, music director, production manager, etc.). Stage managers or performers should expect to be in rehearsals, generally scheduled during the evening hours from 6-10PM, for up to twenty hours per week during a five to ten-week long production process, as well as up to ten hours per day during tech weekend and up to six hours per day during the performance run of the show. Non-performing roles may be expected to be involved in the production process before the start of rehearsals, participating in meetings, auditions, as well as a post-mortem process for each show. Entrance into a production for actors and major artistic roles are based on competitive auditions or prior experience. There is no online registration. Repeatable course numbers are designated as follows: 291 (Stage Management Production I); 292 (Stage Management Production II); 293 (Stage Management Production III); 294 (Performing Role Production I); 295 (Performing Role Production II); 296 (Performing Role Production III); 297 (Non-Performing Role Production I); 298 (Non-Performing Role Production II); 299 (Non-Performing Role Production III). Evening courses and exams will take precedence over half credit courses. Students may still participate in department productions even if they choose not to enroll for credit.

**Class Format:** half credit, fifth course option only

**Requirements/Evaluation:** participation in the collaboration, commitment to being a team player, dedication to the artistic process, and participation in the final public performance event

**Prerequisites:** none

**Enrollment Limit:** none

**Enrollment Preferences:** none

**Expected Class Size:** 40

**Grading:** pass/fail option only

### **THEA 301 (S) Performing Archives: From Research to Adaptation (DPE)**

This course introduces students to methods of historical research and creative adaptation in the global archives of performance and theatre. What is an archive? What is a repertoire? How does embodied knowledge get acquired, stored, and transferred over time? Who owns, or curates, the artistic remnants and shared traditions of the past? Practicing the skills of a dramaturg and performance historian, students will engage with the archives and repertoires of global theatre and performance, learning how to access, research, interpret, and gain deeper understandings of the artistic past. Then, examining how select historical sources and materials been taken up--adapted, appropriated, recycled, or re-appropriated--by contemporary artists, students will themselves work towards the creation, development, and performance of their own artistic approaches to the historical archive. While attending to theatre's formal aspects, we will at the same time focus on the relationship of performance to politics, as well as to the enduring legacies of empire, state power, colonialism, and private capital in which they are historically embedded and by which they have been shaped. If and when possible, we will encounter archival sources housed in College Archives and WCMA. This course is required for Theatre majors and is a prerequisite

for THEA 401.

**Class Format:** This class is a combined studio/seminar. Students will be required to present and share their creative responses to the material studied in the course.

**Requirements/Evaluation:** active participation in class; a midterm creative adaptation project and accompanying "dramaturgy casebook"; participation as discussion leader for one class; a final creative adaptation or performance project and accompanying "dramaturgy casebook."

**Prerequisites:** Theatre 101 or 201, or by written permission of instructor

**Enrollment Limit:** 14

**Enrollment Preferences:** Theatre majors

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** This course works to dismantle the ongoing bias in theatre studies that positions textual and literary forms of theatre in the globalized north as the dominant sites of knowledge transfer, status, and value in our field. Instead, theatre and performance are approached as diverse forms of repertoire and embodied knowledge that must be analyzed in relation to the structures of social inequity and power in which they historically arise.

Bears. Cubs. Otters. Pups. Twinks. Radical Fairies. Leathermen. Mollies. Drag queens. Dandies. Sisters of Perpetual Indulgence. Gay men, including gay trans men, have organized themselves into various subcultures within their community for centuries. This seminar is devoted to exploring these subcultures in (a mostly US-context) in greater detail using ethnographic texts, anthropological studies, historical accounts (including oral histories), and media. Topics include cruising and flagging, the anthropological significance of gay bars, histories of bath house culture, rural vs urban queer experiences, the ball scene, drag, diva worship, the reclamation of "fabulousness and faggotry," the leadership roles of trans women and effeminate gay men in activist movements, gay gentrification, the growth of gay consumerism/ gay tourism/homonationalism, hierarchies of masculinity in the gay community (i.e., masc for masc culture), HIV/AIDS and the politics of PrEP, chemsex, the role of racialized dating "preferences," genealogies of BDSM and leather culture, sexual health and discourses of "risk," the politics of barebacking and other sexual practices, queering consent, and the effects of hookup apps on gay culture. In addition to lectures, and discussions, there will also be some low-key performance-studies based exercises in queer praxis (e.g., drag workshops, mock debates, animal improvisation, role playing, etc.)

**Class Format:** There will be some minor performance elements such as workshops during class.

**Requirements/Evaluation:** Quizzes, journaling assignment, short diva report, 10 page research paper on a gay subcultural group

This course is an intensive study of costume design. Costume designers are always aware of the world around them. They look, listen, reflect, and record. They use inspiration, research, imagination, and innovation for their creations. They simultaneously observe the smallest detail while also picturing the larger world surrounding the pieces they develop. The course focuses on the designer's process, which entails in part: script analysis, collaboration, research, color theory, basic design principles, rendering techniques, fabric research, organizational skills, and presentation of designs.

**Requirements/Evaluation:** multiple design assignments including a detailed final design project, costume labs, image and research files, costume sketchbook, short papers, committed participation, and attendance; students are required to attend two to three Theatre department or approved performances during the semester; students will also be expected to partake in intelligent critiques of fellow classmates' design work

### **THEA 315 (F) Inhabited Theatrical Environments: Scenic Design for Performance**

**Cross-listings:** THEA 315 ARTS 313

### Primary Cross-listing

How do you develop a point of view and translate it to the stage? What is an effectively inhabited space for performance? We will explore the different ways a scenic environment provides the visual foundation for live theatrical events in theaters as well as site-specific shows. In addition to working intuitively, this course combines critical readings of texts to contextualize works for the current moment. Research will be at the center of our work -- deepening skills to source, curate, and present personal points of view as designers and creators. This work will serve to expand our imaginations to the aesthetic possibilities of performance. Students will also develop a basic knowledge of model building and drafting. Class time is a combination of discussions of theatrical texts, student project presentations, and studio work.

**Requirements/Evaluation:** Creative projects preparation and presentation. Active participation in class and critique sessions. Occasional writing assignments to accompany design work.

### THEA 321 (S) Arts Organizing in Africa and the Diaspora (DPE)

**Cross-listings:** THEA 321 MUS 323 DANC 323

### Secondary Cross-listing

At the heart of this class is the question, how do artists and organizations use the performing arts to effect social change in their communities? Drawing from a number of case studies from throughout Africa and the African Diaspora, we will first endeavor to understand and contextualize issues related to education, social uplift, the environment, and the economy as they relate to specific communities. We will then examine how a series of organizations (from grassroots campaigns to multinational initiatives) utilize the performing arts in response to those issues. Among the issues we will discuss at length are: -How do performers and organizations navigate the interplay between showcasing the performance talents of individuals and groups and foregrounding an issue or cause? More broadly, what dilemmas emerge as social and aesthetic imperatives intermingle? -What are the dynamics between people acting on a local level within their communities and their various international partnerships and audiences? -How can government or NGO sponsorship help and/or hinder systemic change? By the end of the semester, students will be equipped with conceptual frameworks and critical vocabularies that can help them ascertain the functions of performance within larger organizations and in service to complex societal issues. Throughout the course, we will watch and listen to a variety of performances from traditional genres to hip-hop, however this class is less about learning to perform or analyze any particular genre than it is about thinking through how performance is used as a vehicle for social change. Case studies will include youth outreach and uplift in Tanzania through the United African Alliance, campaigns to promote girls' education in Benin and Zimbabwe, community-wide decolonizing initiatives through the Yole!Africa Center in the Democratic Republic of Congo, and the cultural reclamation of a mining town in Suriname through the arts organization, Stichting Kibii.

**Requirements/Evaluation:** Four case study profiles, midterm essay (5-7pages), and a final project. Regular participation in class discussion.

**Difference, Power, and Equity Notes:** This course interrogates on a fundamental level issues of power and equity. Using the performing arts as a critical lens, we discuss a series of social and environmental challenges that communities of African descent face. These are in direct dialogue with global systems of power and economic factors. Issues include: environment, education, local communities' interactions with multinational corporations, and representational politics in performance.

This studio course seeks to promote art making that transgresses the boundaries between the visual and performing arts to see a life that animates both bodies and objects. Cultivating various approaches to the experience of embodiment and kinesthetic responses to objects, props, and clothing, students will perform sculptures and sculpt performances indoors and outdoors. Exploring relationships between time and space will support creating works that suggest and invite movement, encourage interaction, and investigate the physical potency inherent in objects, people, and performance. Emphasis will be made on collaborative process and developing dialogue between actors, dancers, and visual artists.

**Requirements/Evaluation:** Evaluation will be based on participation in studio exercises, bi-weekly collaborative group projects, a final solo work to be performed at the end of the semester, and five 2-page reflection essays.

**Prerequisites:** Students must have completed at least one course either in Theatre or in Studio Art.

### **THEA 339 (F) Introduction to Dramaturgy**

The dramaturge is a major collaborator in theatre, playing the multi-faceted role of producer, curator, historian, literary manager, cultural critic, audience educator, community engager, and all-around supporter of a production process. Working closely with fellow theatre-makers, the dramaturge helps to shape a production, tell a story, and facilitate the rewarding process of creating a world on stage. This studio-based course will introduce students to the fundamentals of dramaturgy, including: new play development, production research and support, curatorship, literary management, educational outreach, criticism and journalism, social and community engagement, and adaptation. Assignments over the term will be hands-on, practical, creative, and project-based and include independent writing, research, oral presentation, as well as group work. We will also read new plays and discuss urgent topics in the theatre industry. During some terms, we may collaborate as dramaturges on departmental productions. As a culminating project, students will complete a creative adaptation and dramaturgical casebook for a source material of their own choosing. Students may be asked to attend live performances and exhibitions when relevant.

**Class Format:** studio course with seminar components

**Requirements/Evaluation:** Assignments will be creative and project-based and will range from making image galleries to writing program notes and educational study guides. In-class writing and participation in class discussion will occur daily. A major project over the term will include the assembly of a production casebook, including: research and historical summary; timeline; artist's bio; educational guide; image gallery; program note; community outreach strategy; lobby design and curatorship; critical/theoretical perspective; and creative adaptation.

### **THEA 340 (S) Shakespeare on Page, Stage and Screen: Text to Performance (WS)**

**Cross-listings:** THEA 340 ENGL 345 COMP 343

Primary Cross-listing

Four centuries on, Shakespeare still challenges us. How should we weigh the respective claims of our own era's concerns--with matters of gender, sexuality, race, class, or materiality, for instance--against historicist attention to the cultural, political and theatrical circumstances in which his plays were actually written? And when it comes to realizing the text in dramatic performance, such challenges--and opportunities--multiply further. Critical fidelity to Shakespeare's times, language and theatrical milieu prioritizes a historical authenticity that can be constraining or even sterilizing. At the other extreme, staging the plays with the primary aim of making them "speak to our times" risks revisionary absorption in our own interests. We will focus on six Shakespeare plays, from different genres and periods of his career: *Romeo and Juliet*, *Henry V*, *Twelfth Night*, *Hamlet*, *Antony and Cleopatra*, and *A Midsummer Night's Dream*. Proceeding with each from close reading of the text, we will attend to the demands and opportunities of both interpretation and performance, and assess a range of recent film and stage productions.

**Requirements/Evaluation:** Three papers ranging from 4 to 7 pages; several short reading responses and regular discussion board postings; class participation.

**Cross-listings:** AMST 358 THEA 341 LATS 341 WGSS 347 SOC 340

#### **Secondary Cross-listing**

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

As Gertrude Stein once remarked, "The hardest thing is to know one's present moment." What is going on in the world of theatre and performance

today? What are the hot topics in our current artistic landscape? Who are the writers, performers, and directors of the past two decades? This seminar will consider both experimental and mainstream drama and performance from the twenty-first century, focusing on topics such as: post-dramatic theatre, devised performance, social practice, participatory and immersive theatre, hyper-naturalism, post-identity performance, and weird theatre. Artists and collectives to be considered may include: Suzan-Lori Parks, Will Eno, Richard Maxwell and the NYC Players, Young Jean Lee, Annie Baker, Lucas Hnath, Branden Jacobs-Jenkins, Quiara Alegria Hudes, Anne Washburn, Taylor Mac, Lynn Nottage, Stephen Adly Guirgus, Miguel Gutierrez, Elevator Repair Service, The Wooster Group, and Nature Theatre of Oklahoma. As a final project, students will work individually or in small groups to create a script or short performance that addresses the question: "What is the most important story to be telling through performance right now?" Students may be required to attend theatre, dance, and other performances at the '62 Center and beyond.

### **THEA 387 (S) Ibsen, Chekhov and the emergence of Modern drama**

**Cross-listings:** COMP 387 THEA 387 ENGL 309

Primary Cross-listing

This course will center on the plays of Henrik Ibsen and Anton Chekhov, key figures in the development of Modern European drama. Prospective readings will include Ibsen's *A Doll's House* (1879), *The Wild Duck* (1884), *Rosmersholm* (1886) and *Hedda Gabler* (1890); Chekhov's *The Seagull* (1896), *Uncle Vanya* (1900), *Three Sisters* (1901) and *The Cherry Orchard* (1904); along with August Strindberg's *Creditors* (1889) and Oscar Wilde's *An Ideal Husband* (1894). We will chart the development of dramatic realism and naturalism, and situate these plays in the context of the late-nineteenth century "ache of modernism", with supplemental readings that highlight changing conceptions of identity and subjectivity, emerging strains and contestations over gender and sexuality, and the wider sociological, political and technological changes of the period. The course will also be centrally concerned with these playwrights' innovative explorations of the investigations of theatre's capacities and limitations in representing social reality and the 'performance' of selfhood.

### **THEA 388 (F) Research: A Window into Design Dramaturgy**

This class combines the targeted playreading skills of a designer with deep dives into visual research. How to gain a foundation of historical research for a specific theatrical work? How to interpret this research through an added lens of specific artistic movement or style? In this class, we will develop skills to source, curate, and present images that both deepen our understanding of a text as designers and visual thinkers, as well as free our

imaginings to the aesthetic possibilities of the text. Bi-weekly research projects paired with historically-based dramatic literature provide the main structure of the work. Class time is a combination of discussions of theatrical texts, paired with student project presentations and critiques.

**Requirements/Evaluation:** Coursework is dramatic literature comprehension and group discussion/critique, combined with biweekly research projects.

### **THEA 393 (F) Staging Identities**

**Cross-listings:** THEA 393 ENGL 393

Primary Cross-listing

The construction of selfhood is always to some extent a performative act--as Shakespeare's Jacques says, "All the world's a stage / And all the men and women merely players[.]" That performance is inherently dual, since constituted both for the audience of the wider social world, and for the self who seeks to act. Drama as a genre, with its constant negotiation of the competing claims of illusion and the operations of reality, is invariably interested in the exploration of social identity, in the tensions between public and private selfhood, and in the functions of 'performance'. In this course we will examine theatre's response to the challenge of self-fashioning in the modern era, and consider the wider ontological status of performance as a category within the context of twentieth century drama and theatrical staging. Readings will include Shakespeare's *Hamlet* and plays by Chekhov, Pirandello, Churchill, Shepard, Lori-Parks, Beckett, Walcott, Pinter and others, along with selected criticism, theory, and psychoanalytical writings.

### **THEA 401 (F) Senior Seminar: Practicing Theory**

This class constitutes a culminating course of study for the Theater major. It aims to delve deep into consideration of the relationship between theory and practice, between text and performance, between performer and audience, and between aesthetics and politics. We will explore a selection of influential ideas and methodologies that have shaped both making theater and thinking about theater in various historical periods and cultural contexts. Seminar members will read and consider both theoretical and artistic texts. Through discussion and experimentation, we will endeavor to understand how theater engages with cultural, social, and philosophical issues that link the stage with the realities and fantasies of everyday life. Throughout the semester, focus will be maintained on the contributions of the members themselves, in both scholarly contributions to seminar sessions, and in artistic contributions through the presentation of assigned creative projects.

This seminar provides an overview of queer, women of color feminist, decolonial, and critical ethnic studies critiques of orthodox Marxism. Beginning with core texts from the tradition, we will examine a range of forms of labor and social positions that complicate Marx's emphasis on the white male industrial factory worker. In the first part of the seminar, we will study seminal texts that center reproduction, racial slavery, care and domestic work, indentured servitude, sex work, and migrant labor, and in the second half, we will turn to an array of practices that respond to and offer strategies to survive under racial capitalism. This seminar will equip students with critical understandings of the ways racial capitalism has centrally relied on the mass elimination, capture, and recruitment of different racialized and gendered bodies in and beyond the U.S. and how, through performance, the capitalist system of value and life under these conditions can be undone and reimagined.

### **THEA 455 (S) Advanced Practicum**

This independently designed practicum offers an opportunity for students to gain practical, hands-on experience in theatre at an advanced level by receiving course credit for serving as an assistant to a faculty member on a Theatre Department production. Students interested in assisting a faculty member or guest artist on a production in any non-acting capacity--directing, design (costume, lighting, multimedia, scenic, sound), dramaturgy, or technical management--may enroll in the Advanced Practicum, pending the approval of a designated faculty advisor as well as the Department Chair. Working closely with the faculty advisor, the student will both serve as an assistant on the production and design a curriculum of readings and assignments intended to complement the experience of the assistantship. If funding allows, practitioners in the professional theatre will be invited as guest evaluators. Though the nature of each assistantship will vary according to the demands of each production, the experience of the assistantship will ideally simulate that which a student might undertake within the professional theatre.

**THEA 13 (W) Stitch Circle: Knitting as Social Practice**

Do you knit? Have you ever wanted to learn how to knit? In this studio course, intended for both beginners and more advanced knitters, students will come together to experience the joy, fun, contemplative practice, and social activity of the stitch circle. Working with The Spin-Off yarn shop in North Adams, students will select an accomplishable project suited to their unique skill level (scarves, hats, blankets, mittens, socks, tea cozies, etc.). Establishing our class as a knitting circle, we will gain practice as knitters, working towards the completion of our individual projects. But we will also spend time in the circle discussing and learning about knitting as a social practice, one often involving women or historically marginalized social groups. During the term, students conduct independent research on a particular knitting practice, form, or cultural/regional type of knitting, sharing their discoveries with the group in the form of a brief oral presentation and accompanying poster. Each student will also be responsible for curating a "playlist" of music chosen for each circle. At the end of the term, we will share our knitting projects and research with the community by way of a class exhibition. Students should be prepared to spend time knitting outside of class. A field trip to The Spin-Off shop to select and obtain materials is mandatory. We may also take a field trip to a nearby fiber animals farm and fiber mill to learn about the process of raising animals for wool as well as spinning, carding, dyeing, and manufacturing wool.

### **THEA 15 (W) The Red Nose Clown**

The Red Nose clown. This intensive will push students to find their most vulnerable self. To be in front of an audience without their social mask but rather with the smallest mask in theater, the Red nose. The red nose reveals the naive, the idiot, the most evident state of an actor before it starts acting. To be stupid, really stupid, not act stupid is the hardest task for an actor. To be true, to go beyond the "trying to be" but really just be there in front of an audience in the present moment is a gift for any artist. The red nose allows us to see humanity in its most disconstructed state. It makes us laugh, because we are all living off balance trying to keep up with all the bumps along the road and pretending that we've got it all figured out. The clown doesn't pretend, it tries hard to survive. And somehow that makes us laugh. This intensive will guide you to see and be seen by an audience. To try to be the best at something even if you're not, to live through the "flop", the failure of success. You will discover your "idiot" and interact with other clowns to create pieces that will be shared with an audience. To make us laugh. Or maybe smile? Or maybe cry... Humanity is so complex and the clown flirts with its intimacy to remind us that it's ok to fall, it's ok to want to be the best, to be pretentious because we care so much. The clown is not ironic. It is sincere... and it is that sincerity that touches us and makes us laugh and understand one another more.

### **THEA 22 (W) A Filmmaker's Workshop**

This 4 week filmmaking workshop will culminate in screening of 6- 8 short films which are written, acted, directed and edited by students. The class is taught by actress Jessica Hecht and her husband director/writer Adam Bernstein. The project was offered in 2019 and accommodated 30 WS students. We would love to offer it once again with a slightly deeper focus on writing and direction. The key to this project is collaboration in the creative process. Each week there will be approx 8 hours of in class time and 10 -12 hours of practical work outside of class. The week we shoot ( week 3) will be the most demanding. Supplemental reading and film viewing is recommended. We will offer a set of resource materials. The weekly structure is as follows: WEEK ONE : Fundamentals of filmmaking -The Writer's Approach Our first week allows students to look at several examples of shorts films and experiment with writing prompts and improv exercises to build familiarity with how to structure a story. The week culminates in the formation of groups (4-5 students each) whose interest in a specific area of production has been noted. Scripts will be generated from these groups. We will read and discuss changes with each group. All students participate as needed but will have more responsibility in one self chosen area. WEEK TWO: Fundamentals of TV and Film Direction The skills of screen acting vs acting on stage As scripts are being refined, participants will be schooled in basic shots, the director's role and the actor's preparation. Scripts are due by mid week, casting is completed by Friday WEEK THREE: Shooting a Film Groups are schooled in the organization of a shoot and the essential jobs of the crew. Films are shot over three days - a Final Pro vs AVID editing workshop completes the week. WEEK FOUR: Completing the Filmmaking Process. Films are edited and music added for the first 3 days of week. A public screening is organized to com

## TUTORIAL PROGRAM

The Tutorial Program offers students a distinctive opportunity to take a heightened form of responsibility for their own intellectual development. No student is required to take a tutorial course, but any student with the appropriate qualifications and interests is invited to do so.

Tutorials place much greater weight than regular courses—or even small seminars—on student participation. They aim to teach students how to develop and present arguments; listen carefully, and then refine their positions in the context of a challenging discussion; and respond quickly and cogently to critiques of their work. Tutorials place particular emphasis on developing analytical skills, writing abilities, and the talents of engaging in rigorous conversation and oral debate.

Since the program's inception in 1988, students have ranked tutorials among the most demanding—and rewarding—courses they have taken at Williams. While not designed to be more difficult than other courses, tutorials are nonetheless challenging, with frequent writing assignments and the expectation that students will be well prepared to participate actively and effectively in weekly discussions. At the same time, students have consistently placed tutorials among the most enriching and consequential courses they have taken. They have appreciated the close attention to their writing and argumentation skills; the opportunity to be held accountable, in a detailed way, for the extended implications of their ideas; the chance to develop their oral abilities as they engage in debate; and the close intellectual bonds tutorials build between teachers and students, and students with each other. Many students have formed important advising and mentoring relationships with their tutorial teachers.

The ways in which particular tutorials are conducted vary across the disciplines, but here is a description of how most tutorials at Williams are organized:

Tutorials are usually limited to 10 students. At the start of term, the instructor divides the students into pairs. Each pair meets weekly with the instructor for roughly one hour. Many tutorial courses begin and end the term with a group seminar, and in a few departments, instructors hold weekly group meetings of all tutorial members to provide background information designed to facilitate the students' independent work. But at the heart of every tutorial is the weekly meeting between the instructor and two students. At these weekly meetings, one student delivers a prepared essay or presentation (e.g., an analysis of a text or work of art, a discussion of a problem set, a report on laboratory exercises, etc.) pertaining to the assignment for that week, while the other student—and then the instructor—offer a critique. In the following week, students switch roles. Typically, students write five or six essays (usually in the range of 4-7 pages) during the term, and offer five or six critiques of their partners' work.

### Registration

Students pre-register for tutorials as they would any other course. Because of limited enrollments and the special logistical arrangements involved in organizing tutorials, students may not drop a tutorial after 4:00 pm on the day before the first scheduled organizational meeting of the semester. It is important that students determine, before the start of the term, their interest in and commitment to the course, and consult with the instructor if necessary.

Tutorials may not be taken on a pass/fail basis.

### AFR 159 (F) *Crossing the Color Line: A History of Passing* (DPE) (WS)

**Cross-listings:** AFR 159 HIST 159

#### Secondary Cross-listing

In June 2015, Rachel Dolezal emerged as a media spectacle and the subject of national scrutiny after her *white* parents stated publicly that Dolezal is a white woman *passing as black*. Their insistence that Dolezal is white came in the wake of her reports to local news media and police that she had been the victim of several hate crimes. To critics, Dolezal is a fraud who has committed cultural appropriation. Yet, for her supporters, Dolezal's racial identification as a black woman is authentic and indisputable, since race is not based on biology but rather is a social construction. For both groups as well as impartial observers, many wondered curiously why a white woman had chosen to pass as black, especially given that historically it has been African Americans who opted to *become* white. Inspired by the controversy surrounding Dolezal, this tutorial will explore the history of passing in the United States. Whereas our attention will primarily be focused on black-to-white passing, we will expand our understandings of passing by emphasizing the variety of ways that identities have been shaped through the crossing of boundaries--class, ethnic, gender, intellectual, political, religious, and sexual. To accomplish our goals, we will read and cross-examine fictional and nonfictional as well as primary and secondary historical accounts of boundary-crossers. We will also screen several films that engage the theme of passing.

**Requirements/Evaluation:** Weekly formal response papers and written critiques.

**Prerequisites:** None.

**Enrollment Limit:** 10

**Enrollment Preferences:** First and second-year students will be prioritized, followed by history majors. Should the course be overenrolled, students will be asked to complete an enrollment questionnaire.

**Writing Skills Notes:** Students will be required to complete formal writing assignments each week, alternating between response papers (4 pages) and written critiques (2-pages) of their peers' work. Students will receive substantial feedback on their writing skills, with verbal and written suggestions for improvement. Students also will receive feedback from their tutorial partners.

**Difference, Power, and Equity Notes:** Narratives of racial passing provocatively raise questions about the construction, logics, reinforcement, and subversion of racial categories and identities. Tutorial students will have the opportunity to deconstruct the meanings of race and identity in addition to thinking culturally, historically, and ontologically about the implications and value of these constructs. In essence, we will theorize racial identity, reconsidering, if not challenging, its stable notions of identic intelligibility.

**Cross-listings:** AFR 208 AMST 208 REL 262

#### **Primary Cross-listing**

The concept of time has been one of the most examined, yet least explicitly theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory--which involves thinking about time--time itself has rarely been the subject of sustained inquiry. This may be due to its abstractness as an idea, and the level of analysis its conceptualization demands, or because time in the Black experience cannot be understood outside of the meaning of race, which itself is not completely tangible. In this tutorial, "Time and Blackness," we will explore how Black writers across a number of genres--spiritual autobiography, fiction, memoir, literary criticism, and cultural theory--understand time, and create paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in Black writings? How does race shape the ways Black writers conceive the experience of time? And, finally, to what can we attribute the recent surge in explicit, theoretical examinations of "time and blackness"?

**Secondary Cross-listing**

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the current digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. Further, students will explore how the dialogues created between objects, individuals, and space often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

**Difference, Power, and Equity Notes:** This course explores issues of agency, authenticity, and appropriation as it applies to African artifacts displayed within the contexts of Western art museums. Through discussions of cultural capital, rights of seeing, and the politics of representation, students will analyze how the meaning of "African art" has been largely dictated by a Western museum culture and how this hegemony is currently being disrupted through strategic exhibition and display practices and narratives.

**Cross-listings:** HIST 480 GBST 480 AFR 381

**Secondary Cross-listing**

The Media have long played important roles in African societies. As early as the second half of the 19th century, African intellectuals were using print technology to address the people. As radio technology was in its infancy during the first half of the twentieth century, Africans were gathering around re-diffusion stations and later around single receivers to listen to news and entertainment programming. In this tutorial, we will examine these histories of media and media technologies on the continent. Ultimately, we will explore the roles that media played in serving particular community needs and how communities also adapted new media technologies to fit local conditions. Media content has historically been determined based on standards beyond viewers', readers' and listeners' control. We will examine the influences that editors and political leaders on the continent have exerted on content as well as what forces they responded to. We will also further explore the media's role in major events on the continent, from governmental changes to the ending of apartheid in South Africa and the role that media have played in areas of conflict.

**Requirements/Evaluation:** Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular feedback and critiques- both oral and written - from the professor, as well as oral critiques from tutorial partners.

**Difference, Power, and Equity Notes:** Modern media developed in Africa as means of control and cultivating dutiful colonial subjects. However, media then emerged as sites of contestation and even tools with which colonial subjects challenged colonial rule. They have continued to be revealing sites for issues of gender, race, class, and ethnicity. As such, this course immensely explores diversity, power and equity and how these all-important societal concerns are expressed through the media in Africa.

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

**Class Format:** Students will be assigned a tutorial partner, and tutorial pairs will meet with the professor for one hour each week at a regularly scheduled meeting time.

**Cross-listings:** REL 269 STS 269 ASIA 269 ANTH 269

**Secondary Cross-listing**

This course provides a social analysis of and practical engagement with mindfulness in the US today. It considers the modern applications of Buddhist meditation as a tool to improve awareness of the related processes of mind, behavior, and emotions within landscapes structured by racism, sexism, and other systemic inequalities. We consider how mindfulness relates to Buddhist discourses as well as the rapid rise of fields like contemplative neuroscience, affective neuroscience, and integrative neurobiology. How can mindfulness help people communicate more effectively--be they doctors or patients, teachers or students? How has the exploding research on mindfulness and meditation since 2000 help us understand the intersection of human emotions, behaviors, and relationships? We train in a variety of Buddhist meditation practices through the semester including forest bathing, mindfulness, compassion meditation, while unpacking the subjective experience of our minds and emotions first-hand. Students will be asked to train in mindfulness practices the entire semester while studying models of the mind developed by research in clinical and evolutionary psychology, affective neuroscience, and interpersonal neuroscience.

**Requirements/Evaluation:** weekly tutorial papers and discussion

**Prerequisites:** A prior class or some experience with meditation is recommended

**Cross-listings:** HIST 109 ARAB 109

**Secondary Cross-listing**

The Iranian Revolution was a major turning point in world history that resulted in the establishment of the Islamic Republic of Iran. This tutorial will evaluate the causes and impact of the revolution and how this seminal event continues to have widespread repercussions around the globe. The first weeks will explore the history of pre-revolutionary Iran with special attention to religious and intellectual trends such as the ideas of Ayatollah Ruhollah Khomeini, Jalal al-e Ahmad, and Ali Shariati. We will then evaluate the revolution itself including the US hostage crisis, the downfall of the Shah Muhammad Reza Pahlavi Shah, and how Khomeini's vision of society became paramount. Finally, we will explore the aftermath of the revolution including Iran's geopolitics, the nature of the theocratic system in Iran as well as how the revolution impacted every day lives of Iranians in Iran and abroad particularly how they reflect on the revolution in memoirs, films, and literature.

**Requirements/Evaluation:** Weekly meetings. Weekly papers - either a 5 page primary paper or a 2-3 page response paper.

**ARTH 206 (S) What is Islamic Art? (DPE) (WS)**

**Cross-listings:** REL 204 ARTH 206

**Primary Cross-listing**

Through a deep engagement with primary sources--visual, performative and textual--this tutorial introduces students to global cultures that have participated in the production of Islamic art and culture through the centuries. Through a diverse set of readings, we will discuss how Islamic art is viewed today. How did, for instance, Colonialism and Orientalism from the 18th to the 20th centuries create an entrenched narrative for the study of the field, that continues to hold sway to this day? How have Muslim cultures defined their own artistic production? In particular, how can specific artworks, such as figural painting or palace architecture, be understood as "Islamic"? What are some key scholarly debates around the term "Islamic Art"? The tutorial is specifically designed keeping in mind the period of soul-searching the field is currently going through, even to the point of questioning the very term "Islamic art" and its epistemological parameters. By familiarizing students to an important discipline in art history, the aim of the tutorial is to provide alternate methodologies as well as epistemologies that run parallel to more mainstream or familiar avenues of study.

**Requirements/Evaluation:** focused bi-monthly writing assignments, 5-7 pages in length, and bi-monthly peer response papers, 2 pages in length.

**Prerequisites:** none

It is designed to teach students how to make clear, well-articulated arguments. Students will receive extensive feedback every other week on their writing assignments from the instructor and their peers. There will also be a comprehensive mid-semester review from the instructor.

**Difference, Power, and Equity Notes:** In addition to introducing students to an important field of art history, the tutorial analyzes how Islamic art was codified and examined during the colonial and post-colonial periods, and how that understanding has come to define the field over the last century. This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the current digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. Further, students will explore how the dialogues created between objects, individuals, and space often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

**Secondary Cross-listing**

This tutorial offers a survey of Japanese art and visual culture across time and media, with particular attention to two areas: the links between different artistic media, and the relationship between art and its audience. We'll begin with early court diaries and related scroll paintings as examples of "private" art. Then we'll move through progressively more public visual media of the 17th through 21st centuries: Kanô screen painting; nô, kabuki, and puppet theater; premodern architecture; popular woodblock prints; turn-of-the-century photography; and finally some examples of contemporary popular culture like comics, animation, and/or film. We will focus on the specificities of each medium while simultaneously developing formal visual reading skills that can work across different media.

**Class Format:** Students will meet with the instructor in pairs or trios for 75 minutes each week. This tutorial is offered simultaneously at the 300 level for undergraduates and at the 500 level for graduate students: graduate students will be paired with other graduate students and undergraduates with undergraduates.

**Requirements/Evaluation:** For undergraduates: weekly participation, 5 short written assignments in alternate weeks (ranging from 1 to 5 pages), and several 1-page peer critiques. For graduate students: weekly participation and 3-4 short written exercises that build toward a final 15-page research paper.

In this studio tutorial class, students will create studio art projects by using materials that are mainly not bought but found, repurposed, and/or overlooked and ubiquitous. In this time of extreme material production and consumption, with a great deal being thrown out and unrecoverable, how can we make intentional, creative meaning from what is around us? This class is concerned with impacts on the environment but also with how consumer culture has wielded profound influence in the current production of studio art. How can we engage with our major concerns--aesthetic, topical, critical--and use what is around us mindfully and creatively with desired impact? Some of the artists we will look at: William Pope L., Ana Mendieta, David Hammons, Tania Bruguera, and the Yes Men. This class is a hands-on studio class with weekly assignments.

#### **Secondary Cross-listing**

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "pasts" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, mesology and mythology, amnesia and nostalgia, and diaspora and settlement in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave

filmmakers from these three "post" societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or COMP and language learners wishing to take the course in Chinese should register under CHIN.

British colonial rule in South Asia shaped economy and society in fundamental ways. As resistance to colonial rule emerged in the late nineteenth century, "nationalist" writers developed a critique of its economic impact via taxation, fiscal policy, trade, and many other policies. In their turn, supporters of British rule, "apologists," argued that British rule had laid the foundations of economic growth by securing property rights, enforcing contracts, and developing infrastructure. The debate between "nationalists" and "apologists" has never quite ended, but after the recent growth of the Indian economy it has lost some of its emotional charge. Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. This course extends the background derived from previous chemistry courses to the understanding of organic reaction mechanisms. Correlations between structure and reactivity are examined in terms of kinetic and thermodynamic parameters including: solvent effects, isotope effects, stereochemical specificity, linear free energy relationships, acid/base theory, delocalized bonding, and aromaticity. For the first 6 weeks, the class meets once a week for an introductory lecture. A second tutorial meeting between the instructor and 2 other students occurs early the following week, for example during the laboratory time period. During this time, students work through and present solutions to an assigned problem set. For the remaining 6 weeks, students execute a self-designed set of laboratory experiments that revolve around physical organic methods. Students present and critique results each week (in the hour time slot). The experiments culminate in a final paper.

How is the historical "pasts" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, mesology and mythology, amnesia and nostalgia, and diaspora and settlement in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or COMP and language learners wishing to take the course in Chinese should register under CHIN.

**Requirements/Evaluation:** attendance and participation, five 5-page papers, five peer-review and critique papers, revisions on selected papers.

**Writing Skills Notes:** Students will write a 5-page paper every other week for a total of five papers. On weeks when they are not writing papers, they are expected to critique their tutorial partner's paper as peer reviewers. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. Students are also required to revise key paragraphs, sections, and papers throughout the semester.

**Difference, Power, and Equity Notes:** This course provides students with the opportunity to analyze and critique the following entangled modernist dualisms: present and past; memory and representations; diaspora and settlement; transnationalism and localism. By discussing texts produced from the PRC, Hong Kong, Taiwan, and other diaspora areas in these "post" societies, this course asks students to explore how literary and cinematic

narratives invoke (and erase) differences, and challenge (and consolidate) borders.

Consciousness is considered as the 'last great mystery of science.' In this course we are going to delve into one of the most well-studied areas of this mystery, that is visual consciousness. Do you really perceive everything you look at? Are you aware of everything you see? Is our visual experience a grand illusion? We will start our investigation of such questions by reading about various approaches in understanding human consciousness. Then, we are going to apply these approaches to perception, and discuss theoretical and empirical controversies in visual consciousness. Finally, we are going to focus on evaluating empirical studies that attempt to resolve such controversies. The goal of this course is to build a bridge between theory and experimentation by learning how to interpret the results of scientific studies to shed light on theoretical and philosophical debates in the literature.

First uttered by Soviet leader Nikita Khrushchev in 1956, the phrase "cult of personality" was formulated to discredit the hero-worship that accompanied Joseph Stalin's iron-fisted rule of the Soviet Union. Since then, the phrase has gained currency as a condemnation of a variety of seemingly all-powerful leaders in oppressive political regimes, including China's Mao Zedong, Iran's Ayatollah Khomeini, and the ruling Kim family in North Korea. In this course, we will examine the phenomenon of the cult of personality from a variety of perspectives, beginning with the cult surrounding Stalin and ending with that of Vladimir Putin. Our course material will encompass scholarship from multiple disciplines, including history, sociology, political science, cultural and media studies, as well as artistic expression typically labeled propaganda in literature, the visual arts, and film. Although our course will begin in the Soviet Union and end in contemporary Russia, we will explore how the cult of personality has been adapted and updated for different cultural and political purposes in fascist Germany and Spain, China, Iran, North Korea, and Cuba. *All readings will be in English, and all films will have English subtitles.*

**COMP 256 (S) Stop Making Sense: Absurd(ist) Theatre in Historical Context (WS)**

**Cross-listings:** THEA 252 COMP 256 ENGL 256

**Secondary Cross-listing**

We want to make sense of things. In nearly all of our academic pursuits, the point of analysis is to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

### **COMP 320 (S) Kafka (WS)**

"It's so Kafkaesque!" We love to use the most famous Austro-Hungarian-Czech-Jewish writer of all time to characterize puzzling and dispiriting situations. But close examination of Franz Kafka's work and life reveals a multi-dimensional world that goes far beyond the cliché. Jewish in an increasingly anti-Semitic environment, German-speaking surrounded by Czech-speakers, deeply alone in a family that didn't understand him, Kafka produced texts that simultaneously demand and refuse to be interpreted. In this tutorial we will begin with intensive readings of selected short stories and parables, then move on to an exploration of Kafka's own words from diaries and letters, as well as secondary sources. The course will conclude with discussions of how Kafka's texts and their contexts might relate to contemporary conditions and/or to students' own lives and thoughts. This will be a modified tutorial, with five groups of three students apiece. Conducted in English.

**Class Format:** the class will be divided into groups of 3. At each weekly meeting, one of the 3 will present a 5-page paper, another will present a formal response, and the third will participate actively in discussion. Students will incorporate at least one of their papers into a final project that links their discussions of Kafka to their own interests and/or to contemporary issues.

**Requirements/Evaluation:** Three 5-page papers, three 1-2 page responses, one final project, discussion leading. Evaluation: Tutorial papers will receive extensive comments, but no grade; the instructor will meet with individual students at least twice during the semester to discuss how things are going for them. Responses will not be evaluated by the instructor, but instead will function well or less well in the context of the discussion. The final project will receive a grade, and the final grade will be determined by the overall trajectory of the student's learning.

This tutorial offers a survey of Japanese art and visual culture across time and media, with particular attention to two areas: the links between different artistic media, and the relationship between art and its audience. We'll begin with early court diaries and related scroll paintings as examples of "private" art. Then we'll move through progressively more public visual media of the 17th through 21st centuries: Kanō screen painting; nô, kabuki, and puppet theater; premodern architecture; popular woodblock prints; turn-of-the-century photography; and finally some examples of contemporary popular culture like comics, animation, and/or film. We will focus on the specificities of each medium while simultaneously developing formal visual reading skills that can work across different media.

**Class Format:** Students will meet with the instructor in pairs or trios for 75 minutes each week. This tutorial is offered simultaneously at the 300 level for undergraduates and at the 500 level for graduate students: graduate students will be paired with other graduate students and undergraduates with undergraduates.

**Requirements/Evaluation:** For undergraduates: weekly participation, 5 short written assignments in alternate weeks (ranging from 1 to 5 pages), and several 1-page peer critiques. For graduate students: weekly participation and 3-4 short written exercises that build toward a final 15-page research paper.

**Prerequisites:** No previous knowledge of Japanese art or culture is required. Students with similar preparation and interests will be paired with one another.

Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

British colonial rule in South Asia shaped economy and society in fundamental ways. As resistance to colonial rule emerged in the late nineteenth century, "nationalist" writers developed a critique of its economic impact via taxation, fiscal policy, trade, and many other policies. In their turn, supporters of British rule, "apologists," argued that British rule had laid the foundations of economic growth by securing property rights, enforcing contracts, and developing infrastructure. The debate between "nationalists" and "apologists" has never quite ended, but after the recent growth of the Indian economy it has lost some of its emotional charge. We will use this opportunity to revisit the controversy.

These systems provide pro-poor policy instruments that can balance trade and labor market reforms, fiscal adjustments (such as reduced general subsidies) and other economic policies aimed at enabling better market performance. In addition, social protection systems help vulnerable people to cope with shocks to their livelihoods, promoting resilience, human capital development and sometimes high-return risk-taking. In times of crisis, these systems are more important than ever. From March to June 2020, the World Bank identified 195 countries that have adapted and expanded their social protection systems to respond to the COVID-19 pandemic. This tutorial offers the opportunity to explore how shock-responsive social protection systems can better enable developing countries to respond to global and local shocks in a manner that minimizes the medium- to long-term costs of the resulting crises. The tutorial examines how developing countries build social protection systems to tackle poverty, vulnerability and social exclusion that result from global and local shocks. Topics include how the design and implementation of effective interventions both respond to crises and strengthen long-term developmental outcomes. The tutorial focuses on country responses to the COVID-19 pandemic as both a relevant case study and an example of the kinds of global crises to which national social protection systems must be able to respond in the future.

### **ECON 538 (S) Resilience and Macroeconomic Policy**

Despite tremendous improvements in combating global hunger and child mortality, an increasing number of the world's population continue to live in fragile conditions, buffeted by climate change, conflict, forced migration, weak governance, and state inability to deliver basic services to its citizens. Setting macroeconomic policy is difficult in such countries. Not only are decisions affected by policymakers' distorted incentives and governments' internal conflicts, fragility also weakens policy transmission mechanisms and constrains policy spaces. This course aims at identifying the causes and consequences of fragility and at discussing how policies should be changed to enhance resilience in such countries. The course will, first, look into the

definition and characteristics of fragility, its numerical representation, and its causes and main consequences. The course will also highlight how policy is made in states of fragility, in particular, fiscal policy, monetary policy, exchange rate policy, export promotion policy, etc.), as well as consider policy interactions. Finally, the course will focus on efforts to mitigate fragility and enhance resilience in such countries, including the role of structural policies and that of international financial institutions.

### **ENGL 131 (S) All About Sonnets (WS)**

Fourteen lines in a fixed pattern. When Sir Thomas Wyatt introduced the sonnet to England in the 1500s with his translations of Petrarch, the form quickly became entrenched in English, and has been in regular use ever since. Originally penned as expressions of idealized love, sonnets soon expanded to address other kinds of emotionally intense relationships--to God, Nature, art, a particular place, the State, oppressors--while still, obsessively, returning to love in all its myriad forms. This makes the sonnet, deeply personal though it is, also a kind of pocket-sized literary tradition, as each new generation of poets extends, disrupts, and comments upon the whole history of sonnets. "A sonnet is a moment's monument," wrote D.G. Rossetti (in, of course, a sonnet)--speaking of the sonnet's tendency to offer just a snapshot of the poet's mental and emotional state--but the tradition of producing numbered sequences of sonnets can also string those moments into a kind of narrative. Similarly, while the sonnet is founded in strong feeling, it is also obsessed with logic, delighting in logical argumentation, contradictions and paradoxes. This course will focus on a broad range of sonnets, historically, geographically and thematically, as well as criticism and theory relating to sonnets. Studying sonnets that are variously inspiring, devastating, and lol funny, we will become Sonnet Experts, while developing broadly useful skills in careful reading, concise writing and sound argumentation. Poets will include Shakespeare, Wordsworth, Keats, Elizabeth Barret Browning, DG and Christina Rossetti, Claude McKay, Edna St. Vincent Millay, John Berryman, Seamus Heaney, Vikram Seth, and many, many more. No prior experience with poetry is presumed.

**Class Format:** first week in regular class meetings, followed by weekly tutorial meetings in pairs

### **ENGL 234 (F) The Video Essay**

While people today are subject to an unprecedented flood of moving images, few have had the chance to think critically about film and video. Fewer

still have had the opportunity to think *with* the medium, exploiting the resources of film and video in their efforts to understand how these media work on viewers. The Video Essay offers a chance to do that. After being introduced to the fundamentals of film analysis and receiving training in the use of Adobe Premiere Pro, students will spend the term alternately making short video essays and commenting on the essays produced by their partners. Note that this is primarily a course in film analysis: students will not shoot any original material. No prior experience is required.

**Class Format:** We will meet together for three weeks, then break into groups of four. Students in each group will alternate weekly between creating video essays on film topics, and writing commentaries on the essays of their partner.

**Requirements/Evaluation:** four written exercises (1-2 pages); five video essays, increasing from two to six minutes; and four written commentaries on one's partner's video essays.

### **ENGL 256 (S) Stop Making Sense: Absurd(ist) Theatre in Historical Context (WS)**

**Cross-listings:** THEA 252 COMP 256 ENGL 256

#### **Secondary Cross-listing**

We want to make sense of things. In nearly all of our academic pursuits, the point of analysis is to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

**Requirements/Evaluation:** Evaluation will be based on weekly tutorial papers/response papers, and active participation in weekly tutorial sessions.

## **ENGL 290 (F) Technologies of Friendship**

**Cross-listings:** ENGL 290 STS 290

### **Secondary Cross-listing**

Contemporary friendships--whether among roommates, near neighbors, or friends living thousands of miles apart--are highly mediated. We communicate and signal our attachment through Zoom windows, apps, and social media platforms, and we create ambiguous relationships with people whom we "follow" or "friend" without having met in person. Sometimes we text as much as we talk even with intimate friends, and carrying on in-person friendships has been complicated in myriad ways by the Covid-19 pandemic. But friendships have always been mediated, and in this tutorial we will examine how writers across centuries have described the tools and technologies of friendship: some perhaps quaint or sentimental (for example the written letter) and others creepy or invasive (for example Apple's "Find My" app or social media's "suggestions"). We will ask common and important questions, such as "Can one have too many friends?"; "Are long-distance friendships sustainable?"; and "What health risks do we take for friendship, and what other risks do technologies of friendship carry?" Readings will include works of fiction and journalism, and scholarship from psychology, the history of technology, and science and technology studies. The technologies we will consider include emojis, coffeehouses, memes, letters, telephones, video games, and social media.

## **ENGL 343 (S) Whitman and Dickinson in Context (WS)**

In this tutorial, we will read closely the works of two of the most influential and experimental poets in the nineteenth-century U.S., Walt Whitman and Emily Dickinson. In addition to studying in depth their poems and other writings--in Whitman's case, his essays, in Dickinson's, her letters--we will delve into some of the major critical debates surrounding their work, both individually and when compared to one another. For example, Whitman is often viewed as perhaps the most public nineteenth-century American poet, whereas Dickinson is regarded as perhaps the most "private." We will interrogate this assumption, exploring how each poet represents publicity and privacy in their work, as well as their efforts to "perform" and/or reform an American self. We will also examine how each poet engages questions of gender and sexuality, as well as contemporary debates surrounding such issues as abolition, slavery, women's suffrage, temperance, and settler colonialism. We will consider what role their whiteness plays in their poetry and personas. Finally, we will explore Whitman and Dickinson's relation to significant literary and philosophical movements of the period, including transcendentalism and the culture of sentiment. Throughout the course, emphasis will be on analyzing and generating interpretations of Whitman and Dickinson's works, constructing critical arguments in dialogue with other critics, formulating cogent written critiques, and carrying on an oral debate about a variety of interpretations. Students will meet with the instructor in pairs for an hour each week. They will alternate between writing 5- to 7-page papers and commentaries on their partner's papers.

**Requirements/Evaluation:** five 5- to 7-page papers, final paper, oral presentation and critique

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Most sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

This course examines the relationship between religious and environmental thought in America. Exploring a broad range of practices, symbols, and beliefs, we will examine the religious roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have writers, thinkers, and artists from different religious and cultural backgrounds shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? How have they influenced each other to produce distinctively American forms of eco-spirituality? In pursuit of these questions, we will consider a diverse array of topics and cases, including struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoorsmanship, Catholic climate activism, Jewish eco-mysticism, atheist biology, Buddhist therapy, and more.

How do humans and animals shape each other's lives? People encounter animals in farms, laboratories, zoos, wildernesses, and backyards, on purpose and by chance. They treat animals as family members, entertainment, food, vectors of disease, and objects of scientific wonder. Drawing on the works of biologists, philosophers, and feminist science and technology studies scholars, this tutorial will examine our relationships with animals and help clarify our responsibilities to them. We will ask: What are the social and environmental consequences of consuming animals? Should humans swim with dolphins, feed manatees, use gene-editing to create species that can survive climate change? Should moral standing depend upon the ability to communicate or the ability to experience emotions like grief and joy? What can animal models tell us about human health and society, and when is animal otherness too large a gap to bridge? What might human violence toward animals tell us about sexism, racism, or capitalism, and what will human-animal relationships look like in the future?

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference

emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the war Russia is currently waging on Ukraine, or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Bulgaria, Poland, and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

The Media have long played important roles in African societies. As early as the second half of the 19th century, African intellectuals were using print technology to address the people. As radio technology was in its infancy during the first half of the twentieth century, Africans were gathering around re-diffusion stations and later around single receivers to listen to news and entertainment programming. In this tutorial, we will examine these histories of media and media technologies on the continent. Ultimately, we will explore the roles that media played in serving particular community needs and how communities also adapted new media technologies to fit local conditions. Media content has historically been determined based on standards beyond viewers', readers' and listeners' control. We will examine the influences that editors and political leaders on the continent have exerted on content as well as what forces they responded to. We will also further explore the media's role in major events on the continent, from governmental changes to the ending of apartheid in South Africa and the role that media have played in areas of conflict.

**GEOS 111 (F) Radical Science- How Geology Changed the Way We See the World (WS)**

Copernicus shocked Europe when he suggested that the Earth is not the center of the universe. Hutton and other geologists made an equally radical proposal more than two centuries later when they introduced the concept of deep time and argued that the Earth was much older than 6,000 years, as determined by biblical scholars. Several decades later, Darwin and Wallace shook the foundation of western philosophy once more when they proposed that organisms evolved. When geologists reinterpreted landscape features once attributed to the great flood as evidence for past continental glaciation, the concept of extreme climate change through time sprang to life. During the 20th century, the permanence of Earth's geography was challenged by the continental drift hypothesis, which was initially rejected for decades until it reemerged as plate tectonic theory. This tutorial explores how geologic breakthroughs challenged western views of humans as the center of creation living in a world with limited change. ### **HIST 159 (F) Crossing the Color Line: A History of Passing (DPE) (WS)**

**Cross-listings:** AFR 159 HIST 159

#### **Primary Cross-listing**

In June 2015, Rachel Dolezal emerged as a media spectacle and the subject of national scrutiny after her *white* parents stated publicly that Dolezal is a white woman *passing as black*. Their insistence that Dolezal is white came in the wake of her reports to local news media and police that she had been the victim of several hate crimes. To critics, Dolezal is a fraud who has committed cultural appropriation. Yet, for her supporters, Dolezal's racial identification as a black woman is authentic and indisputable, since race is not based on biology but rather is a social construction. For both groups as

well as impartial observers, many wondered curiously why a white woman had chosen to pass as black, especially given that historically it has been African Americans who opted to *become* white. Inspired by the controversy surrounding Dolezal, this tutorial will explore the history of passing in the United States. Whereas our attention will primarily be focused on black-to-white passing, we will expand our understandings of passing by emphasizing the variety of ways that identities have been shaped through the crossing of boundaries--class, ethnic, gender, intellectual, political, religious, and sexual. To accomplish our goals, we will read and cross-examine fictional and nonfictional as well as primary and secondary historical accounts of boundary-crossers. We will also screen several films that engage the theme of passing.

**Requirements/Evaluation:** Weekly formal response papers and written critiques.

**Prerequisites:** None.

**Enrollment Limit:** 10

**Enrollment Preferences:** First and second-year students will be prioritized, followed by history majors. Should the course be overenrolled, students will be asked to complete an enrollment questionnaire.

Students will receive substantial feedback on their writing skills, with verbal and written suggestions for improvement. Students also will receive feedback from their tutorial partners.

**Difference, Power, and Equity Notes:** Narratives of racial passing provocatively raise questions about the construction, logics, reinforcement, and subversion of racial categories and identities. Tutorial students will have the opportunity to deconstruct the meanings of race and identity in addition to thinking culturally, historically, and ontologically about the implications and value of these constructs. In essence, we will theorize racial identity, reconsidering, if not challenging, its stable notions of identic intelligibility.

### **HIST 166 (F) Cold War Films (WS)**

This history tutorial utilizes popular film as a vehicle to explore American Cold War culture. The Cold War was an intense period of political, ideological, cultural, and military struggle between the United States and the Soviet Union that took place after the Second World War. For every nuclear test, arms sale, or military operation, there was a propaganda ploy, rhetorical barb, or diplomatic ultimatum to match. Amidst this hostile competition between two incompatible ways of life--communism and capitalism; totalitarianism and democracy--an atmosphere marked by panic, secrecy, insecurity, paranoia, surveillance, and conformity pervaded American life. Given the vast cultural influence of movies, film during this era served as a vital ideological battleground. Moreover, cinema offers us a window into the cultural landscape of Cold War America, for film reflects, interprets, and shapes national identity in complex ways. The films examined in this course (for the most part, Hollywood productions from the mid-1940s to the mid-1960s) serve as unique historical documents and as cultural texts illuminating the ways filmmakers and audiences negotiated the challenges presented by the Cold War struggle. The films assigned for this course focus on a range of topics, including anticommunism, competing visions of Americanism, religion, the Hollywood Ten, J. Edgar Hoover and the FBI, the nuclear arms race, brainwashing, gender, race relations, and the eventual unravelling of the Cold War consensus. The historical analysis of film requires not only a close reading of the movies themselves, but also a clear understanding of the historical context in which they appeared. The readings paired with each film will help to clarify this context and offer interpretations of the films with which we will engage.

**Requirements/Evaluation:** Students will be required to complete formal writing assignments each week, alternating between 4-page reading response papers and 2-page critiques of their peers' work. These writing assignments will be evaluated alongside preparedness for and performance in tutorial discussions.

**HIST 480 (F) Media and Society in Africa** (DPE) (WS)

**Cross-listings:** HIST 480 GBST 480 AFR 381

**Primary Cross-listing**

The Media have long played important roles in African societies. As early as the second half of the 19th century, African intellectuals were using print technology to address the people. As radio technology was in its infancy during the first half of the twentieth century, Africans were gathering around re-diffusion stations and later around single receivers to listen to news and entertainment programming. In this tutorial, we will examine these histories of media and media technologies on the continent. Ultimately, we will explore the roles that media played in serving particular community needs and how communities also adapted new media technologies to fit local conditions. Media content has historically been determined based on standards beyond viewers', readers' and listeners' control. We will examine the influences that editors and political leaders on the continent have exerted on content as well as what forces they responded to. We will also further explore the media's role in major events on the continent, from governmental changes to the ending of apartheid in South Africa and the role that media have played in areas of conflict.

**Requirements/Evaluation:** Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

**Prerequisites:** This course open to all students

**Enrollment Limit:** 10

**Enrollment Preferences:** Preference will be given to history majors and students with prior experience with African history. If the course is over-enrolled, students may be asked to complete a questionnaire to determine enrollment

Students will receive regular feedback and critiques- both oral and written - from the professor, as well as oral critiques from tutorial partners.

**Difference, Power, and Equity Notes:** Modern media developed in Africa as means of control and cultivating dutiful colonial subjects. However, media then emerged as sites of contestation and even tools with which colonial subjects challenged colonial rule. They have continued to be revealing sites for issues of gender, race, class, and ethnicity. As such, this course immensely explores diversity, power and equity and how these all-important societal concerns are expressed through the media in Africa.

### Primary Cross-listing

Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. We will also examine contemporary arguments for Taiwan as part of China. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

### HIST 487 (F) Archive Stories (WS)

What is an archive? What stories are to be found in the archives and what stories do we tell ourselves about the meaning and function of the archive? For many years now, and certainly since the publication of the French theorist Jacques Derrida's essay, *Archive Fever*, historians, archivists, and cultural theorists have been asking questions *about* the archive as much as they have been engaged in the actual practice of archiving, or making use of material found in archives. This tutorial considers some of those questions. It is *not* a hands-on course about how to use an archive, nor a celebration of material found in archives. Rather it consists of a series of broad enquiries into the history of the archive, the politics of collecting, and the political and social function of the archive in various societies. Each week a specific topic will be addressed, collectively illustrative of the breadth of recent enquiries into the logic of the archive. Topics will include, amongst others: the urge to archive in the Renaissance; the nature of the historian's encounter with "the past" in the archive; the function of the archive in the creation of the modern nation state; the power relations embodied in the colonial archive; the construction of contemporary group identities through the practices of archiving; the recent desire to archive everything, not merely the written document; and the new archives of cyberspace.

### **HIST 488 (F) Sites of Memory and American Wars (WS)**

This tutorial will examine the ways that U.S. military ventures have been memorialized through a variety of physical sites, including landscapes, monuments and statues, museums, and other depictions. Given the enormous national conversation and reconsideration of many of these sites over the last decade, we will ask such questions as: How and why has the memorialization of U.S. wars changed since the country's founding? Who determines what is preserved and what stories are told? What is the relationship between individual experiences, collective memories, and national narratives? What do "sites of memory" tell us about society's views of wars and soldiers and about the United States? Throughout, we will pay attention to how these sites reflect historical understandings of the time and have also served as focal points of social and political protests.

**Class Format:** Students will be assigned a tutorial partner, and tutorial pairs will meet with the professor for one hour each week at a regularly scheduled meeting time.

**Requirements/Evaluation:** This course follows a typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. ### **HIST 491 (S) The Suburbs (WS)**

**Cross-listings:** AMST 490 ENVI 491 HIST 491

#### **Primary Cross-listing**

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

**Class Format:** Students will be assigned a tutorial partner, and tutorial pairs will meet with the professor for one hour each week at a regularly scheduled meeting time.

### **HIST 492 (S) Making Race in Early Modern Europe (DPE)**

In modern scholarship, racism has most often been portrayed as a child of the European Enlightenment, a set of ideas about embodied human difference and its heritability that arose after the abandonment of the Biblical account of human creation and the rise of a new natural science. This tutorial asks: what racial ideas and practices preceded the Enlightenment? Beginning in the late Middle Ages, Europeans participated in enormous economic and cultural transformations, including increased global mobility and the establishment of new, transoceanic empires. Intensified interactions with people in the Americas, Africa, and Asia shaped European understandings of human difference, as did the burgeoning Atlantic economy and its cruelties. In this tutorial, we will place the emergence of modern racism in a long-term perspective, reconstructing the deep history out of which Enlightenment racial theory emerged. Proceeding both chronologically and thematically, we will consider how the major global transformations of the sixteenth through eighteenth centuries shaped European racial understandings with enduring consequence. In the process, we will develop a conceptual vocabulary to describe in a historically sensitive manner how embodied human difference has been interpreted differently across space and time. Throughout, we will read a variety of historical primary sources in conjunction with recent scholarship. Ultimately, our historical study will afford a comparative perspective on contemporary views of races and racism.

**Requirements/Evaluation:** Attendance and active participation; weekly tutorial papers (5 "long" papers and 5 responses).

**Prerequisites:** 200- or 300-level History classes

**Enrollment Limit:** 10

**Enrollment Preferences:** Junior and seniors; History majors.

**Expected Class Size:** 10

**Difference, Power, and Equity Notes:** The aim of the tutorial is threefold: (i) to introduce students to the comparative study of race across time and place, in order to help them contextualize and historicize the racial dispensation of the contemporary US; (ii) to treat the history of race not just as a history of ideas and theories, but of practices of race- and knowledge-making; (iii) to advance our understanding of the past through a dialectical process of empirical research and theoretical interpretation.

### **HIST 495 (S) The Medieval World System: Globalization before 1500 (WS)**

In recent years, scholars have turned increasing attention to global history in the pre-modern period. This tutorial takes as its focus the global Middle Ages: roughly speaking, the period between 500 and 1500 CE. This was a period that saw mass-produced consumer goods cross from China to India, East Africa, and the Middle East, inspiring admiration and imitation in multiple different markets. It saw games, music, and forms of literature become popular across continents, and saw religious communities forge networks spanning thousands of kilometers. To study the global Middle Ages is to place exchange and networks, both commercial and cultural, at the heart of our analysis. We will read and analyze many accounts by medieval travelers, merchants, and pilgrims who crossed Afro-Eurasia, alongside works by modern historians and archaeologists who have pieced together the patterns of movement and exchange that tied together the diverse societies of pre-modern Afro-Eurasia.

**Requirements/Evaluation:** Students will meet in pairs with the instructor once a week. Discrete geometry is one of the oldest and most consistently vibrant areas of mathematics, stretching from the Platonic Solids of the ancient Greeks to the modern day applications of convex optimization and linear programming. In this tutorial we will learn about polygons and their higher-dimensional cousins, polyhedra and polytopes, and the various ways to describe, compute, and classify such objects. We will learn how these objects and ideas can be applied to other areas, from computation and optimization to studying areas of math like algebraic geometry. Throughout this course we will be engaging with mathematical work and literature from as old as 500 BCE and as recent as "posted to the internet yesterday."

**Requirements/Evaluation:** Evaluation will be based primarily on participation, problem sets, oral presentations, a written midterm exam, an oral final exam, and a final project

**MUS 275 (S) Shakespeare through Music (WS)**

The plays of William Shakespeare are replete with references to music, and in his day included singing and even dancing as part of the narrative. As his plays entered the global canon, composers and choreographers, along with musicians and dancers, have contributed as avidly to interpreting Shakespeare's plots and characters as have theater directors and actors across the world. This tutorial course will focus on three plays--the tragedies *Romeo and Juliet* and *Othello*, and the comedy *Midsummer Night's Dream*--in order to compare and contrast a broad range of ways in which music works to tell these stories and portray these characters. We will consider these three plays in genres ranging from symphony orchestra, opera, and

ballet to film scores, modern dance, jazz, musical theater, and popular song. Music from the Renaissance to the present day will be explored, including composers such as Purcell, Mendelssohn, Tchaikovsky, Verdi, Prokofiev, Bernstein, Britten, Ellington, and Costello. We will also examine film scores ranging from the silent era through such directors as Max Reinhardt, Orson Welles, Franco Zeffirelli, and Baz Luhrmann. Through comparative analysis of different approaches to relating Shakespeare's plays through music, this tutorial aims to develop both critical listening to music and critical thinking about music.

**Requirements/Evaluation:** each student will write five 6- to 7-page essays, and provide five peer reviews; evaluation will be based on the quality of written work and discussion

**Prerequisites:** none

**Secondary Cross-listing**

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

### **PHIL 109 (F) Skepticism and Relativism (WS)**

Intellectually, we are ready skeptics and relativists. We doubt, we point out that no one can be certain in what she believes, and we are suspicious of declarations of transcendent reason or truth (unless they are our own). Emboldened by our confidence in skeptical arguments, we claim that knowledge is inevitably limited, that it depends on one's perspective, and that everything one believes is relative to context or culture. No domain of inquiry is immune to this destructive skepticism and confident relativism. Science is only "true" for some people, agnosticism is the only alternative to foolish superstition, and moral relativism and, consequently, nihilism are obvious. But is the best conclusion we can come to with respect to our intellectual endeavors that skepticism always carries the day and that nothing at all is true? In this tutorial, we will investigate the nature of skepticism and the varieties of relativism it encourages. Our readings will come primarily from philosophy, but will be supplemented with material from anthropology, physics, psychology, and linguistics. We will look at relativism with respect to reason and truth in general as well as with respect to science, religion, and morality. Along the way, we will need to come to grips with the following surprising fact. With few exceptions, thoroughgoing skepticism and relativism have not been the prevailing views of the greatest minds in the history of philosophy. Were they simply too unsophisticated and confused to understand what is for us the irresistible power of skepticism and relativism? Or might it be that our skepticism and relativism are the result of our own laziness and failure? Of course, this question cannot really be answered, nor is there any value in trying to answer it, and any "answer" will only be "true" for you. Right?

**Requirements/Evaluation:** participants will present substantial written work in the tutorial every other week, and will be responsible for commenting on their tutorial partner's work.

### **PHIL 122 (F) Philosophical Approaches to Contemporary Moral Issues (WS)**

In this tutorial we will examine a number of prominent and controversial social issues, using our study of them both as an opportunity to better understand the moral dimensions of those issues in and of themselves, and to consider the ways in which selected classical and contemporary moral theories characterize and address those moral dimensions. Topics will depend to some extent on student interest, but are likely to include concerns that fall under such headings as euthanasia, conscientious eating, abortion, the ethics of protest, and Covid-19. The course will use a case-based approach to examine these issues, and so in most weeks we will (1) read philosophical articles focused on a key concept or set of arguments central to the issue, and (2) consider in detail one morally complex case in which the concept or arguments have special application or relevance. In addition, we will devote several class meetings interspersed throughout the semester to reading foundational sources in ethical theory.

**Class Format:** Groups of three students (rather than the more conventional two students) will meet weekly with the professor.

**Requirements/Evaluation:** three tri-weekly tutorial papers and two short papers, oral commentaries, and tutorial discussion

**Prerequisites:** none; this course is suitable for first-year students

**Enrollment Limit:** 15

**Enrollment Preferences:** first-year students, sophomores, Philosophy majors, and those who have previously been dropped from the course for over-enrollment

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will write three tutorial papers of 5-7 pages in length, one of which they will revise and resubmit, as well as two 2-3

page papers. In each, students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

What gives an individual life meaning? Pleasure? Success in fulfilling desires? Flourishing in ways distinctive to a rational agent or a human being (including, for example, developing rational capacities and self-mastery, succeeding in worthwhile projects, cultivating relationships, living morally, developing spiritually)? Can we be mistaken about how well our lives are going, or about what has value? What are the main sources of uncertainty here? Does the fact that our lives will end threaten their meaning? Can science contribute to our understanding of these issues? We'll examine these and related questions through historical and contemporary readings.

**Class Format:** This tutorial will meet on a fixed weekly schedule agreed to by the instructor and participants.

**Requirements/Evaluation:** Four or five tutorial papers (5-6 pages in length), five or six critiques (2-3 pages in length), and one rewrite.

**Prerequisites:** None. This tutorial is an appropriate first course in PHIL.

**PHIL 211 (S) Ethics of Public Health (WS)**

From questions about contact tracing apps to racial and age disparities in health risk and outcomes, the COVID-19 pandemic has foregrounded the importance of ethics as a key concern in public health policies and activities. Moreover, the ethical issues that are implicated in responses to the pandemic reflect the range of those manifested across the field of public health as a whole. In this course, we will survey the ethics of public health through the lens of the COVID-19 pandemic, investigating concepts and arguments that are central to the ethics of public health research and practice. For example, we will examine the ethics of disease surveillance, treatment and vaccine research, resource allocation and rationing, compulsion and voluntariness in public health measures, and social determinants of health outcomes, among other topics. To do this, we will need to become familiar with key ethical theories; think deeply about such concepts as privacy, paternalism and autonomy, exploitation, cost-benefit analysis and justice; and compare the function of these concepts in the context of the COVID-19 pandemic with the way they work in responses to other public health concerns.

**Requirements/Evaluation:** Biweekly 5-7 page papers, oral commentaries, and tutorial discussions.

### **PHIL 213 (F) Biomedical Ethics (WS)**

Much like the construction of medical knowledge itself, it is from specific cases that general principles of biomedical ethics arise and are systematized into a theoretical framework, and it is to cases they must return, if they are to be both useful and comprehensible to those making decisions within the biomedical context. In this tutorial we will exploit this characteristic of biomedical ethics by using a case-based approach to examining core concepts of the field. The first portion of the course will be devoted to developing and understanding four moral principles which have come to be accepted as canonical: respect for autonomy, beneficence, nonmaleficence, and justice. The remainder of the course will consider key concepts at the core of medical ethics and central issues for the field, such as privacy and confidentiality, the distinction between killing and "letting die," and therapy vs. research. To this end, each week we will (1) read philosophical material focused on one principle or concept, and (2) consider in detail one bioethics case in which the principle or concept has special application or relevance. In some weeks, students will be asked to choose from a small set which case they would like to address; in others the case will be assigned.

We often associate modern faith in the prospects of universal human dignity, rational autonomy, the rights of man, individual liberty, democracy, open scientific inquiry and social and political progress with the Enlightenment. How can we reconcile this faith with the persistence of domination today? Critical theory aims not merely to understand the "struggles and wishes of the age" as Marx one described it, but with emancipation from domination. Understood in this way, critical theory is identified closely with the intellectual tradition of the Frankfurt School. In this tutorial, will read works in critical theory from the 18th century to the present, some from the Frankfurt tradition, and some not. We will focus on particular topics, examples of which are the following: normative critique, capitalism, authoritarianism, mass culture, enlightenment and reason, progress, violence, the domination of nature, white supremacy, patriarchy and colonialism.

If we think of Michel Foucault as engaged in writing histories, or genealogies, of his own present designed to undercut the sense of the obviousness of certain practices and ways of thinking, categorizing, and knowing, we can easily imagine that he might now be questioning different aspects of our contemporary "present" than the ones standardly associated with his name, namely, panopticons and surveillance, discipline, criminalization, the biopolitics of health, the normal and the abnormal, etc. In this course we address the question: How is the present we find ourselves living today different from the one that the author Foucault wrote about in the 1960s, 70s and early 80s before his untimely death in 1984? What differentiates today from yesterday? And what present practices and ways of thinking and knowing might be questioned using Foucault's tools, genealogy in particular, for resisting unnecessary constraints on freedom and the perpetuation of unnecessary suffering? What is his legacy today? In this tutorial you will read from a selection of Foucault's texts (books, lectures, interviews) in order to acquire a firm grasp of his method of "critique" and his way of looking at the interconnections between forms of power and the knowledge associated with particular disciplines. We will also read more recent work by Foucault inspired scholars on topics such as the biopolitics of gender, the genealogy of terrorism, the informational person (how we become our data), and neoliberal subjects.

### **PHLH 351 (F) Racism in Public Health (DPE)**

In the face of a global pandemic and increased police brutality, states and counties across the nation have declared racism a public health crisis. This push to identify systemic racism as a high priority in public health action and policy is an important symbolic and political move. It names the faults of histories, systems and institutions but also brings to the spotlight the individual and community responsibility to dismantle racism in the US. In this tutorial, we will examine racism in public health policy, practice and research through an investigation of several mediums of evidence and information, ranging from peer reviewed literature to news editorials, podcasts and documentaries. We will explore specific pathways by which racism functions in the disciplines of biostatistics, epidemiology, social & behavioral sciences, health policy & management and environmental health sciences while also examining the dynamics of power and history in research and community practice. We will also gain skills in speaking across differences and articulation of how our own perceptions and lived experiences of race and racism impact our study of public health. This tutorial will most likely elicit uncomfortable and hard conversations about race and requires an openness to self-reflection and the practice of listening and articulation.

**PSCI 261 (F) The Arab-Israeli Conflict (WS)**

This tutorial will cover the Arab-Israeli dispute--from both historical and political science perspectives--from the rise of the Zionist movement in the late nineteenth century to the present day. It will examine the various explanations that scholars have offered for why the conflict has persisted for so long, how it has evolved over time, the role that outside powers have played in shaping it, and how its perpetuation (or settlement) is likely to impact Middle East politics in the future. More specifically, the class will examine the origins of the Zionist movement; the role that the First World War played in shaping the dispute; the period of the British mandate; the rise of Palestinian nationalism; the Second World War and the creation of the state of Israel; the 1948, 1956, 1967, and 1973 Arab-Israeli wars; Israel's 1982 invasion of Lebanon and its consequences; the promise and ultimate collapse of the Oslo peace process during the 1990s and early 2000s; the rise of groups such as Hamas, Hezbollah, and Palestinian Islamic Jihad; the rightward shift in Israeli politics since 2000; the intensification of Israeli-Iranian antagonism and its implications; the shift in Israel's relations with the Sunni Arab world that has occurred in recent years; and the future of the conflict.

### **PSCI 280 (S) Silicon Valley: Digital Transformation and Democracy (WS)**

Nearly every country in the world seeks to drive economic growth by promoting digital technologies. The universal model is Silicon Valley. In this tutorial, students will examine the origins of the Silicon Valley model and other countries' attempts to emulate it. Departing from "just so" stories of technological determinism, we take up the lens of comparative political economy to investigate the politics that allowed US tech firms to shape economic policy to meet their interests. It is no accident that tech became a symbol for economic growth in the 1970s, precisely when it also began to build powerful alliances in Washington. After investigating the origins of the Silicon Valley model, we trace attempts to adopt it in Europe and Asia, which highlight the model's political contingencies and some of the more salient conflicts over the tech sector. We focus on the ways in which the Silicon Valley model can threaten social welfare through economic inequality and precarious employment, and engage a variety of perspectives, including workplace ethnography, to examine these threats, as well as potential regulatory responses. The course concludes by considering what policies could be appropriate for supporting, while also regulating, the tech sector in the twenty-first century.

### **PSCI 291 (S) American Political Events (WS)**

Scandals. Wars and assassinations. Contested elections, Supreme Court decisions, and constitutional amendments. As large as they loom in our daily experience and our historical memory, these sorts of events--concrete, discrete things that happen in and around the political world--are often underestimated as catalysts of political change. Indeed, in the study of American political development, we often look to complex processes and underlying causes as explanations for how and why ideas, institutions, and policies both emerge and evolve. Yet for all our focus on long-term and subtle causal mechanisms, events often serve as political turning points in ways that vary over time, last for extended periods of time, and are not always entirely predictable at the time. Beginning from the presumption that change often has proximate as well as latent causes, this tutorial focuses on events as critical junctures in American politics. Our concern with these events is not with why they happened as or when they did but, rather, with how they altered the American political order once they did--with how they caused shifts in political alignments, created demands for political action, or resulted in a reordering of political values. Over the course of the semester, we will look at ten different types of events, ranging from those that seem

bigger than government and politics (economic collapse) to those that are the daily grist of government and politics (speeches), in each instance juxtaposing two different occurrences of a particular category of event. In so doing, we will seek to use controversial and consequential moments in American politics as a window into deeper questions about political change and the narratives we tell about it.

### **PSCI 344 (S) Palestinian Nationalism**

Palestinian Nationalism: This tutorial will cover the history, bases of support, objectives, and accomplishments and failures of Palestinian nationalism over the past century. It will address how the Palestinian nation has been defined, who has defined it, what factions and classes have controlled its organizations, and the reasons why it has failed to achieve its goals. The tutorial will address the evolution of Palestinian nationalism historically and thematically, employing both primary and secondary sources. The readings will consist mostly of Palestinian authors, with an emphasis on documents, histories, and political analyses. Two questions will anchor the tutorial: how is the nation defined and what, if any, class interests are folded into various definitions?

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

Consciousness is considered as the 'last great mystery of science.' In this course we are going to delve into one of the most well-studied areas of this mystery, that is visual consciousness. Do you really perceive everything you look at? Are you aware of everything you see? Is our visual experience a grand illusion? We will start our investigation of such questions by reading about various approaches in understanding human consciousness. Then, we are going to apply these approaches to perception, and discuss theoretical and empirical controversies in visual consciousness. Finally, we are going to focus on evaluating empirical studies that attempt to resolve such controversies. The goal of this course is to build a bridge between theory and experimentation by learning how to interpret the results of scientific studies to shed light on theoretical and philosophical debates in the literature.

**Secondary Cross-listing**

Through a deep engagement with primary sources--visual, performative and textual--this tutorial introduces students to global cultures that have participated in the production of Islamic art and culture through the centuries. Through a diverse set of readings, we will discuss how Islamic art is viewed today. How did, for instance, Colonialism and Orientalism from the 18th to the 20th centuries create an entrenched narrative for the study of the field, that continues to hold sway to this day? How have Muslim cultures defined their own artistic production? In particular, how can specific artworks, such as figural painting or palace architecture, be understood as "Islamic"? What are some key scholarly debates around the term "Islamic Art"? The tutorial is specifically designed keeping in mind the period of soul-searching the field is currently going through, even to the point of questioning the very term "Islamic art" and its epistemological parameters. By familiarizing students to an important discipline in art history, the aim of the tutorial is to provide alternate methodologies as well as epistemologies that run parallel to more mainstream or familiar avenues of study.

There will also be a comprehensive mid-semester review from the instructor.

**Difference, Power, and Equity Notes:** In addition to introducing students to an important field of art history, the tutorial analyzes how Islamic art was codified and examined during the colonial and post-colonial periods, and how that understanding has come to define the field over the last century. The concept of time has been one of the most examined, yet least explicitly theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory--which involves thinking about time--time itself has rarely the subject of sustained inquiry. This may be due to its abstractness as an idea, and the level of analysis its conceptualization demands, or because time in the Black experience cannot be understood outside of the meaning of race, which itself is not completely tangible. In this tutorial, "Time and Blackness," we will explore how Black writers across a number of genres--spiritual autobiography, fiction, memoir, literary criticism, and cultural theory--understand time, and create paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in Black writings? How does race shape the ways Black writers conceive the experience of time? And, finally, to what can we attribute the recent surge in explicit, theoretical examinations of "time and blackness"?

First uttered by Soviet leader Nikita Khrushchev in 1956, the phrase "cult of personality" was formulated to discredit the hero-worship that accompanied Joseph Stalin's iron-fisted rule of the Soviet Union. Since then, the phrase has gained currency as a condemnation of a variety of seemingly all-powerful leaders in oppressive political regimes, including China's Mao Zedong, Iran's Ayatollah Khomeini, and the ruling Kim family in North Korea. In this course, we will examine the phenomenon of the cult of personality from a variety of perspectives, beginning with the cult surrounding Stalin and ending with that of Vladimir Putin. Our course material will encompass scholarship from multiple disciplines, including history, sociology, political science, cultural and media studies, as well as artistic expression typically labeled propaganda in literature, the visual arts, and film. Although our course will begin in the Soviet Union and end in contemporary Russia, we will explore how the cult of personality has been adapted and updated for different cultural and political purposes in fascist Germany and Spain, China, Iran, North Korea, and Cuba. *All readings will be in English, and all films will have English subtitles.*

And how do these encounters with difference impact current events, such as the war Russia is currently waging on Ukraine, or the persistent tensions between East and West Germans? **SOC 221 (S) Money and Intimacy (WS)**

Does money matter in affectionate relationships? Can dollars buy love and care? What impact does market economics have on intimate relationships? This course will examine these questions and their relevance over the course of history, considering what forces have contributed to the shift in thinking about them, and, most importantly, how sociological research and knowledge helps us understand their current status. We will look into a wide range of aspects of private life that require actors to mix personal affairs with financial transactions, including romantic encounters, marriages (and divorces), families of various kinds and compositions, child adoptions, and outsourced care for dependents to name just a few. Intimacy carries different value and content in these contexts, as so does handling exchanges within them, and negotiating the balance of intimate and economic exchanges also necessitates applying diverse strategies *vis-à-vis* the external social world. The course will simultaneously look into the changing character of the economy as it has responded to shifting social values. We will specifically focus on how previously private concerns have penetrated the public sphere and shaped the evolution of what has been dubbed 'emotional capitalism'. People skills, teamwork, emotional labor, commodification of intimacy, care, sex, and body parts, are only few examples of the central concepts at stake. Naturally, a reflection on the growth of new technologies and social media will enrich many of the discussed themes.

**Difference, Power, and Equity Notes:** This class fulfills the Difference, Power, and Equity requirement because it will explore the ways that

mindfulness can address the growing epidemic of anxiety, depression, and other mental health issues we find in the US today. We study mindfulness from an intersectional perspective and relate its benefits to intersecting inequities and intergenerational trauma in the US today.

### **STS 290 (F) Technologies of Friendship**

**Cross-listings:** ENGL 290 STS 290

#### **Primary Cross-listing**

Contemporary friendships--whether among roommates, near neighbors, or friends living thousands of miles apart--are highly mediated. We communicate and signal our attachment through Zoom windows, apps, and social media platforms, and we create ambiguous relationships with people whom we "follow" or "friend" without having met in person. Sometimes we text as much as we talk even with intimate friends, and carrying on in-person friendships has been complicated in myriad ways by the Covid-19 pandemic. But friendships have always been mediated, and in this tutorial we will examine how writers across centuries have described the tools and technologies of friendship: some perhaps quaint or sentimental (for example the written letter) and others creepy or invasive (for example Apple's "Find My" app or social media's "suggestions"). We will ask common and important questions, such as "Can one have too many friends?"; "Are long-distance friendships sustainable?"; and "What health risks do we take for friendship, and what other risks do technologies of friendship carry?" Readings will include works of fiction and journalism, and scholarship from psychology, the history of technology, and science and technology studies. The technologies we will consider include emojis, coffeehouses, memes, letters, telephones, video games, and social media.

**Requirements/Evaluation:** Students will write essays and critique their partner's essays in alternate weeks.

#### **Secondary Cross-listing**

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

Essays will be discussed during tutorial meetings and written feedback from the professor will be provided for each essay. At the end of the semester, students will choose one of their prior essays to revise as their final submission. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**THEA 252 (S) Stop Making Sense: Absurd(ist) Theatre in Historical Context (WS)**

**Cross-listings:** THEA 252 COMP 256 ENGL 256

**Primary Cross-listing**

We want to make sense of things. In nearly all of our academic pursuits, the point of analysis is to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

**Requirements/Evaluation:** Evaluation will be based on weekly tutorial papers/response papers, and active participation in weekly tutorial sessions.

**WGSS 322 (S) Introduction to Critical Theory: The Enlightenment and Its Critics (DPE) (WS)**

**Cross-listings:** PHIL 321 WGSS 322

**Secondary Cross-listing**

We often associate modern faith in the prospects of universal human dignity, rational autonomy, the rights of man, individual liberty, democracy, open scientific inquiry and social and political progress with the Enlightenment. How can we reconcile this faith with the persistence of domination today? Critical theory aims not merely to understand the "struggles and wishes of the age" as Marx one described it, but with emancipation from domination. Understood in this way, critical theory is identified closely with the intellectual tradition of the Frankfurt School. In this tutorial, will read works in critical theory from the 18th century to the present, some from the Frankfurt tradition, and some not. We will focus on particular topics, examples of which are the following: normative critique, capitalism, authoritarianism, mass culture, enlightenment and reason, progress, violence, the domination of nature, white supremacy, patriarchy and colonialism.

**Class Format:** students will work in pairs and meet for 75 minutes each week with the professor

**Requirements/Evaluation:** Each student will write and present a 5 or 6-page paper every other week and a commentary on their partner's essay on alternate weeks; evaluations are based on written work as well as level of preparation and the quality of intellectual engagement in tutorial meetings

If we think of Michel Foucault as engaged in writing histories, or genealogies, of his own present designed to undercut the sense of the obviousness of certain practices and ways of thinking, categorizing, and knowing, we can easily imagine that he might now be questioning different aspects of our contemporary "present" than the ones standardly associated with his name, namely, panopticons and surveillance, discipline, criminalization, the biopolitics of health, the normal and the abnormal, etc. In this course we address the question: How is the present we find ourselves living today different from the one that the author Foucault wrote about in the 1960s, 70s and early 80s before his untimely death in 1984? What differentiates today from yesterday? And what present practices and ways of thinking and knowing might be questioned using Foucault's tools, genealogy in particular, for resisting unnecessary constraints on freedom and the perpetuation of unnecessary suffering? What is his legacy today? In this tutorial you will read from a selection of Foucault's texts (books, lectures, interviews) in order to acquire a firm grasp of his method of "critique" and his way of looking at the interconnections between forms of power and the knowledge associated with particular disciplines. We will also read more recent work by Foucault inspired scholars on topics such as the biopolitics of gender, the genealogy of terrorism, the informational person (how we become our data), and neoliberal subjects.

**Class Format:** I may use a seminar format at least twice during the semester.

**Requirements/Evaluation:** evaluation will be based on written work (six 5- to 6-page papers, and six 2-3 page commentaries on their partner's papers) as well as the quality and level of preparation and intellectual engagement in our weekly meetings.

# WILLIAMS-EXETER PROGRAMME AT OXFORD UNIVERSITY

Director: Professor Bojana Mladenovic

## THE PROGRAMME

Williams College offers a year-long program of studies at Oxford University in cooperation with Exeter College (founded in 1314), one of the constituent colleges of the University. Williams students will be enrolled as Visiting Students at Exeter and as such will be undergraduate members of the University, eligible for access to virtually all of its facilities, libraries, and resources. As Visiting Students in Oxford, students admitted to the Programme will be fully integrated into the intellectual and social life of one of the world's great universities.

Although students on the Programme will be members of Exeter College, entitled to make full use of Exeter facilities (including the College Library), dine regularly in Hall, and join all College clubs and organizations on the same terms as other undergraduates at Exeter, students will reside in Ephraim Williams House, a compound of four buildings owned by Williams College, roughly 1.4 miles north of the city centre. Up to six students from Exeter College will normally reside in Ephraim Williams House each year, responsible for helping to integrate Williams students into the life of the College and the University. A resident director (and member of the Williams faculty) administers Ephraim Williams House, oversees the academic program, and serves as both the primary academic and personal advisor to Williams students in Oxford.

Students on the Williams-Exeter Programme are required to be in residence in Oxford from Monday, 27 September 2021, until all academic work for Trinity term is complete (potentially as late as at least 25 June 2022) with two breaks for vacations between the three terms. Students enroll for the full academic year, which consists of three eight-week terms of instruction: MICHAELMAS TERM (10 October to 4 December 2021), HILARY TERM (16 January to 12 March 2022), and TRINITY TERM (24 April to 18 June 2022). Students are expected to be in residence to write their first tutorial papers in the week before the eight weeks of instruction begin (0th Week) and to remain in residence during the week after the term ends (9th Week) in order to sit final examinations. Between the three terms there are two intervening five week vacations, during which students may be expected to continue reading as preparation for their upcoming tutorials. Students are required to arrive in Oxford by 27 September 2021 for Programme orientation. Please note these dates will be slightly different for the 22-23 WEPO class.

For more general information on the Williams-Exeter Programme, go to [exeter.williams.edu](http://exeter.williams.edu).

## THE TUTORIAL SYSTEM

Undergraduate instruction at Oxford University is largely carried out through individual or small-group tutorials, in which students meet weekly with their tutor to present and discuss an essay they have written, based on an extensive amount of reading undertaken from an assigned reading list they will receive at the beginning of each term. In addition to the weekly tutorial, students are usually expected to attend a course of lectures offered by the University that corresponds to the material being addressed in their tutorials.

Each student will plan a course of study for the three terms of the academic year in consultation with the director of the Programme. In their capacity as the Tutor for Visiting Students at Exeter College, the director, working closely with Exeter's subject tutors, will arrange the teaching for the students, monitor student progress, be in regular contact with the student's tutors, supervise the examinations that students sit at the end of each academic term, and report on each student's academic progress to the Senior Tutor at Exeter College. There are no "add/drop" periods at Oxford; once a student has made a commitment to a particular tutorial course, and the director has then secured a tutor to teach that course, students cannot back out or change the terms of the tutorial. All tutorials at Oxford are graded, although in exceptional circumstances a tutorial may be converted to pass/fail before the end of the fourth week of term with the permission of the Programme director.

Students are required to enroll in two tutorial courses during Michaelmas term and two tutorials during Hilary Term (each consisting of eight individual tutorial meetings and generally requiring the preparation of eight essays). During Trinity term, students may choose to enroll in either one or two tutorial courses. Although some students take the minimum five tutorial courses, many have enrolled in two tutorials per term for a total of six tutorials over their time at Oxford.

## GRADES AND CREDIT

Grades for each tutorial course reflect the grade assigned to all eight tutorial sessions, including their related essays, considered together, as well as the grade for the final examination. Final examinations last three hours and are always sat in the ninth week of term, following the eight weeks of instruction. For some tutorial courses, tutors may elect to offer the student the option of a final paper or project in lieu of an examination.

Upon satisfactory completion of the requirements for the Williams-Exeter Programme at Oxford University, students receive academic credit for a regular Williams academic year, with each eight-session tutorial plus final examination counting as the equivalent of 1.6 regular semester courses taken at Williams. Grades eventually become a part of their Williams transcript and will be included in the computation of their Grade Point Average.

Tutorial courses in Oxford may be used toward fulfilling the divisional distribution requirement; a student may earn a maximum of three distribution requirements, with no more than one from each division, for the year. All tutorial courses at Oxford meet the Williams College "Writing Intensive" designation, except for those in the studio arts, mathematics, and the sciences. Tutorial courses in Oxford may also be used to meet major requirements. Students are encouraged to check with their department chair(s) to confirm official department policy.

## THE COURSE OF STUDY

In addition to the opportunity to pursue British and Commonwealth Studies, Williams students in Oxford will be able to pursue tutorials in fields in which Oxford is particularly noted (Economics, English Literature, Mathematics, Modern History, Philosophy, Politics, Classics, Theology, the Natural Sciences, etc.). Exeter College also has fellows that are committed to teaching Williams students in three fields: English Language and Literature (with a focus on English literature, 1550-1830 and interests in the rise of the novel and women's writing); History (with interests in medieval and pre-modern Middle East, North Africa, Central Asia, and Eurasia more broadly); and Medical Law and Ethics (with interests in ethics and regulation of emerging technologies such as gene drive and use of artificial intelligence in medical care). Students are thus encouraged to consider undertaking at least one tutorial course in these fields as part of their course of study.

Students should consult the document "How to Make Preliminary Tutorial Choices for WEPO" to get a sense of some of the standard "papers" (courses) available to students studying on the Williams-Exeter Programme at Oxford. The tutorials listed there represent a selection of some of the papers that comprise the Oxford degrees in various subjects and that are taught in tutorial format, although most are not offered every Oxford term. It needs to be emphasized that this is only a partial list, that the tutorial offerings at Oxford University are incredibly rich, and that one of the attractions of the Programme is that it enables students to define, develop, and pursue their academic interests. Students are therefore encouraged to explore all the courses offered at Oxford even if they are not listed in this Catalog.

Tutorial courses are not offered every term and are often accompanied by scheduled lectures. It is therefore imperative that students consult the relevant "faculty" webpages to make sure when the lectures and/or tutorials they wish to take are actually offered. Sometimes, where appropriate, prerequisites are also listed. It must be noted that study in the sciences is not normally accompanied by laboratory work; science majors seeking major credit for tutorials in the sciences should discuss this situation with their major advisors. Students interested in learning more about the possible courses of study available at Oxford should contact the Director of International Education and Study Away.

A full summary of the list of courses offered by subject can be found at: [ox.ac.uk/admissions/undergraduate/courses/course-listing](https://ox.ac.uk/admissions/undergraduate/courses/course-listing). Detailed descriptions of all the courses listed in can be found on the websites of respective departments or faculties the links of which can be found at: [ox.ac.uk/about/departments-a-z](https://ox.ac.uk/about/departments-a-z).

## NON-CREDIT FOREIGN LANGUAGE STUDY

In addition to their regular tutorial courses, students may begin or continue the study of a wide range of foreign languages on a non-credit basis through a variety of arrangements available through the University as well as a number of other educational and cultural institutions in the city of Oxford. Students may put funds from their Programme Cultural Subsidy towards such study.

## APPLICATION

Admission to the Programme is competitive. Students must apply to the The Office of International Education and Study Away by the prescribed deadline (February 1st) and, prior to applying, should consult with the chair of their major department. Any questions students might have about curricular offerings at Oxford can also be raised with the director of the Programme in Oxford. In addition to completing the formal application form, students can expect to be interviewed at Williams and will subsequently need to complete an application for Visiting Student status at Oxford University. All admissions to the Programme are subject to approval by Exeter College. Students can expect to be notified of acceptance before Spring Break. It is normally expected that they will have completed the College's distribution requirement by the end of their sophomore year. In making its decisions, the Admissions Committee of the Williams-Exeter Programme at Oxford University takes student GPA into account, with a general expectation of a minimum GPA of 3.0. More importantly, we expect all applicants to have demonstrated capacity for rigorous independent work and extensive essay writing, and look favorably on those students whose intellectual maturity, curiosity and enthusiasm would best prepare them for a demanding course of study in Oxford. All applicants must identify two Williams faculty members who are willing to provide references. Because of the emphasis at Oxford on weekly written work for each tutorial course, at least one of those faculty members should be able to offer an assessment of the applicant's writing ability.

- Sofia E. Zepeda, Assistant Professor at Williams-Mystic; affiliated with: Williams-Mystic Program, History

The Williams-Mystic Semester offers students a unique opportunity to explore the ocean, travel the Atlantic, Pacific, and Gulf coasts, and conduct original active research of their own design in the humanities and sciences. Williams-Mystic is considered the coastal and ocean studies campus of Williams College. Sophomores, juniors, and seniors of all majors welcome to apply. A term at Williams-Mystic includes credit for one semester plus one Winter Study requirement, as well as writing skills course credit and physical education credit. Four Williams courses are offered as an interdisciplinary curriculum in the semester-long program based at Mystic Seaport, in Mystic, Connecticut: Americans and the Maritime Environment, Literature of the Oceans, Marine Policy, and either Marine Ecology or Oceanographic Processes. Travel includes an offshore voyage on the open ocean sailing aboard a tall ship, a seminar along the Pacific Coast, and a Louisiana field seminar, all of which are cross-disciplinary and interdisciplinary exercises. Students live in historic, cooperative, co-ed houses at Mystic Seaport, the world's largest maritime museum, and have full access to world-class maritime collections, a maritime library, a state-of-the-art Marine Sciences teaching and research center, and diverse coastal habitats (where field research can be undertaken in a wide variety of environments, ranging from tide pools and salt marshes to sandy beaches and estuaries). Students also participate in maritime skills under professional instruction, with choices such as ship carving, music of the sea, shipsmithing, or small boat handling and sailing. Williams-Mystic seeks candidates who are willing to try new things and work in a compelling academic environment. No sailing experience necessary. Participation in Williams-Mystic can also be used in partial fulfillment of the Maritime Studies Concentration at Williams. Admission is competitive, and interested students should email [wmadmissions@williams.edu](mailto:wmadmissions@williams.edu), call [860-572-5359](tel:860-572-5359), or visit the [Williams-Mystic site](#).

#### **Secondary Cross-listing**

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.

**ENGL 231 (F)(S) Literature of the Sea (DPE)**

**Cross-listings:** MAST 231 ENGL 231

**Secondary Cross-listing**

The ocean, and human relationships with it, have been central features of literatures and cultures around the world for more than a thousand years. But since literary study is typically based around authors' homelands, careful examination of the oceanic experience is often pushed to the periphery--an "empty space" to be crossed between nations, a "vast darkness" antithetical to human life, or a mirror for land-borne concerns. Increasingly, however, scholars and readers are centering the sea and stories about it as a means stepping outside human frameworks of space and time, situating the complex emotions and narratives inspired by the ocean into a complex network of geologic history and teeming other-than-human life. This course examines a wide range of texts and perspectives on the ocean and human relationships with it. Doing so will help us consider how literature both plays into and subverts dominant viewpoints of the ocean. Through texts that consider 19th-century whaling, the Middle Passage, the postcolonial Caribbean, and islands throughout the Pacific Ocean, we will explore a range of questions, including: What can we learn from examining efforts to write about the ocean? How do ocean stories help individuals understand themselves, their communities, and their place in global environments? What can the range of cultural and literary perspectives on our "single, global ocean" reveal about the ways different people are both connected with and profoundly distant from each other? Most importantly, we will practice, as a classroom community, different strategies for carefully reading texts while connecting them to cultural traditions, surrounding environments, and personal experiences.

**Class Format:** weekly roundtable discussions, including coastal and near-shore field trips and multiple field seminars.

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

**Class Format:** This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

**Requirements/Evaluation:** Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

**Prerequisites:** none

**Enrollment Limit:** 23

**Enrollment Preferences:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Expected Class Size:** 22

**Grading:** no pass/fail option, no fifth course option

**Writing Skills Notes:** Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

**Difference, Power, and Equity Notes:** Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

Part of the Williams-Mystic Coastal and Ocean Studies Program, this course provides an introduction to physical, geological, chemical, and biological oceanography. Using local field sites as well as places visited on field seminars, we will investigate why the Earth has oceans, why they are salty, how they move and flow, reasons for sea level change on both long and short timescales, and how our oceans interact with the atmosphere to control

global climate. We will emphasise societal interactions with the ocean, and will consider coastal processes including land loss. We will apply an environmental justice and anti-racist lens to our discussions. Field work will take place on shores in southern New England, as well as during field seminars on the Atlantic ocean, the West Coast and the Mississippi River Delta. This course is in the Oceans and Climate group for the Geosciences major.

**Cross-listings:** HIST 352 MAST 352

**Secondary Cross-listing**

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

**Class Format:** Seminars, discussions, and field seminars

**Requirements/Evaluation:** Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

**Prerequisites:** None

Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

### **Primary Cross-listing**

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.

# WILLIAMS PROGRAM IN TEACHING

Director: Susan Engel

The Program in Teaching offers a coordinated cluster of courses, advising and field work that give students the opportunity to study the ideas, questions, and practices involved in good teaching at all levels. The Program seeks to promote and facilitate an exchange of ideas about teachers, learners, and schools, within and beyond the Williams campus. The Program offers a range of opportunities including courses on education, intensive supervised student teaching, workshops, advising, lecture series, and ongoing peer groups for those who teach.

Students may participate in a variety of ways, ranging from taking one course to a sustained in-depth study of teaching and learning geared to those who want to become teachers or educational psychologists. We seek to connect students with one another, to bring in expert teachers to provide mentoring, and to create links across the curriculum so that students can see the vital connections between what they study (French, Algebra or Biology, for example) and the process of teaching those topics to elementary and high school students. The Program is open to any student interested in education and offers opportunities for all levels of interest, including those who want to find out about certification and graduate study.

No specific major is required to participate—although some lend themselves easily to certification, such as Mathematics, English, Biology, American History, or French, almost all of our majors can provide the basis of teacher certification. Alternately, students can major in Psychology, take a concentration of courses in a different field, and then pursue that content area more intensively in graduate work. More information can be found at [program-in-teaching.williams.edu](http://program-in-teaching.williams.edu).

#### Secondary Cross-listing

Along with jazz, pragmatism stands as the greatest uniquely American contribution to world culture. As the music wails in the background, we will study the classic pragmatists: William James, C. S. Peirce, and John Dewey. We will continue with the contemporary inheritors of the tradition: Cornel West, Richard Rorty, and Hilary Putnam. Although it has influenced both analytic and continental philosophy, pragmatism is a powerful third philosophical movement. Always asking what practical difference would it make, our authors investigate the central questions and disputes of philosophy, from epistemology and metaphysics to ethics and religion. Rather than seeing philosophy as an esoteric discipline, the pragmatic philosophers (with the possible exception of Peirce) see philosophy as integral to our culture and see themselves as public intellectuals.

### PSYC 333 (S) Children's Minds (WS)

Humans stand out in the animal world for their capacity to develop ideas and consider those of other people. Where does this capacity come from, and how does it develop? Why do some people seem more inclined to consider ideas than others? What can schools do to foster the pursuit of ideas? Young children ask questions, tell stories, speculate, invent, and predict. By middle childhood, they are capable of constructing ideas about any number of complex topics: death, justice, infinity, and the nature of time, to name four. Yet by adolescence only some people are disposed to pursue ideas. We will examine data on children who collect objects (such as bugs or rocks) and information (about things like dinosaurs, contagion, and

death), and examine the role such collections play in the capacity to construct ideas. We will consider research on how and when children puzzle over philosophical problems (for example, identity and fairness), how they learn to plan, their ability to learn from thought experiments, their emerging conception of what an idea is, and what they know about knowledge and its role in shaping beliefs and making decisions. We will also spend time looking at individual and cultural variation, as well as the influence of adults. We will read work in developmental, educational and cognitive psychology, as well as anthropology.

**Requirements/Evaluation:** Each week one member of the tutorial pair will write a 5-7 page essay answering a specific question, and the other member of the pair will write a response. The goal is for each student to write 5-6 papers, and 5-6 responses during the term.

Primary Cross-listing

This course will examine social psychological theories and research that are relevant to the understanding of stereotypes, prejudice, and discrimination. We will take a variety of social psychological perspectives, emphasizing sociocultural, cognitive, personality, or motivational explanations. We will examine the impact that stereotypes and prejudice have on people's perceptions of and behaviors toward particular groups or group members and will explore a variety of factors that tend to exacerbate or weaken this impact. We also will consider some of the sources of stereotypes, prejudice, and discrimination and some of the processes through which they are maintained, strengthened, or revised. In addition, we will examine some of the effects that stereotypes, prejudice, and discrimination can have on members of stereotyped groups, as well as some implications of the social psychological research findings for issues such as education and business and government policies. A major component of this course will be the examination of classic and ongoing empirical research.

#### **AFR 318 (F) Defining and Disrupting the School-to-Prison Pipeline**

**Cross-listings:** PSYC 334 AFR 318

### Primary Cross-listing

The school-to-prison pipeline describes a system of processes that pushes children out of school into jails and prisons. This course will explore the pipeline and the relationships between school, prison, and society. We will begin with the history and creation of the modern-day school-to-prison pipeline, focusing on the educational and public policies that encourage the criminalization of "others", with particular emphasis on folks of color and under-resourced communities. We will also look to firsthand accounts from those pushed into the pipeline to humanize the topic and engage in thoughtful and compassionate discussion. Together, we will define "school" and "prison", identifying how these definitions are aligned with the most current iteration of the pipeline, and how they can help us as we work to dismantle it.

**Cross-listings:** AFR 324 PSYC 337

### Primary Cross-listing

What makes special education "special"? This course will explore the role, purpose, and function of special education in the United States. Given special education's assumption of dis/ability (Baglieri, 2012), we will also create collective and individual frameworks for discussing and deconstructing dis/ability. This course will examine history, policy, and pedagogy related to special education; we will also discuss how law and school practices have systemically and systematically excluded students of color from general education classrooms, leading to the overrepresentation of Black, Indigenous, and Latinx children in special education. We will listen to narratives shared by people with dis/abilities and our educational histories to understand how personal connections to special education influence our current beliefs and future practice.

### AFR 358 (F) Mapping Anti-Bias Education

**Cross-listings:** PSYC 377 AFR 358

### Primary Cross-listing

In this course, we will use theories and data to define anti-bias education in childhood contexts and examine its application across U.S. schools and childcare centers, families, and the media environment. We will ask ourselves: What do we know about the need for anti-bias education among non-marginalized and marginalized children, including those who are minoritized for their ethnic-racial, gender, and/or sexual identities? How are

various biases and identities shaped in childhood? Which media-based and interpersonal interventions can be effective with anti-bias education and why? What are some of the contemporary hesitations and challenges around implementing anti-bias education for educators, families, and children? What are some of the practices that marginalized families are already implementing? As we explore approaches and possibilities for anti-bias education across children's ecosystems, we will propose innovative recommendations for research and practice that have the potential to yield positive outcomes for today's children.

**Primary Cross-listing**

In this course, we will work to synthesize what we know about some of the key socializing forces for U.S. Black youth today. We will focus on how families, entertainment media, and the news can socialize Black children. Drawing on a range of theories and data we will examine how family members communicate about issues of identity and how media can come into play. What do we know about how U.S. Black families communicate about identity? What gaps remain in our knowledge, and how can we find the answers? What can we learn about today's media content when we apply research-informed lenses? What predictions can we make about its potential uses and effects among Black families? We will identify central research areas that warrant further attention and consider which methodologies would best work to fill those gaps. We will prioritize approaches that highlight the agency and strength of U.S. Black families and of youth themselves.

### **PSYC 101 (F)(S) Introductory Psychology**

An introduction to the major subfields of psychology: behavioral neuroscience, cognitive, developmental, social, and psychological disorders and treatment. The course aims to acquaint students with the major methods, theoretical points of view, and findings of each subfield. Important concepts are exemplified by a study of selected topics and issues within each of these areas.

**Class Format:** Lectures will be presented during the scheduled time. To complement the lectures, students will participate in two short discussions/laboratory experiences that will be offered at a variety of times outside the lecture period.

**Requirements/Evaluation:** five unit quizzes, a final exam, and two brief lab reports (or related brief reports, depending on the availability of labs)

### **PSYC 272 (S) Psychology of Education**

This course introduces students to a broad range of theories and research on education. What can developmental research tell us about how children learn? What models of teaching work best, and for what purposes? How do we measure the success of various education practices? What is the best way to describe the psychological processes by which children gain information and expertise? What accounts for individual differences in learning, and how do teachers (and schools) address these individual needs? How do social and economic factors shape teaching practices and the educational experiences of individual students? The course will draw from a wide range of literature (research, theory, and first-hand accounts) to consider key questions in the psychology of education. Upon completion of the course, students should be familiar with central issues in pre-college education and know how educational research and the practice of teaching affect one another.

**Class Format:** discussion

**Requirements/Evaluation:** two exams and a final project

### **PSYC 332 (F) Children's Mathematical Thinking and Learning**

Are babies statistical experts? Will I ever be good at calculus? What are we born with and what do we learn? Before children are ever taught formal mathematics in a classroom, they are confronted with situations where they must use their informal understanding of geometry, space, and number to successfully navigate their environments. In this course we read and discuss both foundational and cutting-edge articles from neuroscience, cognitive science, education, and psychology to understand how humans bridge this gap between the informal and formal mathematical worlds. We will also tackle questions such as: How do culture and language affect numerical understanding? What are the sources of children's mathematical misconceptions? What are the effects of early environmental input or input deprivation on mathematical development? What do we know about gender differences in math achievement? How do stereotypes, prejudice, and math anxiety affect math performance? For your laboratory component, you will work with a small group of other students to develop an original research project that tests a specific hypothesis about children's mathematical thinking and learning. Data will be collected either online or in community schools, with the permission of parents, teachers, and children. Your results will be written-up in for your final paper, which will be in the style of an empirical journal article.

**Class Format:** community-based data collection in local schools

**Requirements/Evaluation:** class participation, discussion leader, weekly open-notes reading quizzes, individual 12- to 15-page final paper based on empirical group research project

**Prerequisites:** PSYC 201 and PSYC 232 or permission of the instructor

### PSYC 338 (S) Inquiry, Invention and Ideas

Children tinker, explore and create, but some more than others, and under some conditions more than others. What leads children to investigate, invent and build their own ideas? We will examine the development of curiosity, invention, and the ability to have or construct an idea. We will also look at what accounts for individual differences between children, including the role of intelligence, creativity, social cues, and opportunity. We will look at how these processes unfold at home and in school, and discuss the educational implications of the research we read, and the research we conduct.

### **PSYC 372 (F) Advanced Seminar in Teaching and Learning**

This advanced seminar will give students an opportunity to connect theory to practice. Each student will have a teaching placement in a local school, and participate in both peer and individual supervision. In addition, we will read a range of texts that examine different approaches to teaching, as well as theory and research on the process of education. What is the best way to teach? How do various theories of child development and teaching translate into everyday practices with students? Students will be encouraged to reflect on and modify their own teaching practices as a result of what we read as well as their supervision. Questions we will discuss include: What is the relationship between educational goals and curriculum development? What is the relation between substance (knowledge, skills, content) and the interpersonal dynamic inherent in a classroom setting? How do we assess teaching practices and the students' learning? What does it take to be an educated person?

**Requirements/Evaluation:** this course involves a field placement, weekly readings, as well as seminar discussion, supervision, and a graded journal

### **PSYC 373 (F) Critical Issues in Learning and Teaching**

In this seminar we will take a deep dive into several key topics in education. We will examine psychological research as well as a range of other materials (essays, film, recordings of children and personal experiences) to help answer a series of questions, including: Does the kind or quality of schooling have a measurable impact on children? How do you create curriculum? How does one conduct high quality classroom observations? What do good teachers have in common? What is the best way to help teachers get better at what they do? Can remote learning work well in K-12 settings?

**Class Format:** Students will meet in small groups with the professor. Each group will meet for a tutorial-like session once a week. We will use students' papers as a jumping off point for our discussions.

**Requirements/Evaluation:** Regular class attendance and full participation, five 5-page papers, and regular written responses to other students' papers. We will also do a variety of in-class activities that may require some independent preparation (gathering materials, or doing brief interviews) and some coordination with one another outside of class time.

## Winter Study Specials

SPEC, short for Specials, are courses with topics that are outside our academic department areas of study OR are being sponsored by the Winter Study Committee.

### **SPEC 99 (W) Independent Study: Special**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

### **Winter Study -----**

### **SPEC 11 (W) Investing: Real money in a Real Fund**

As we explore the world of investing, we'll focus on how to think about valuation, including both public and private firms/investments. Along the way, we'll touch on a host of topics: basic financial accounting, investment instruments, corporate capital structure, portfolio theory, equity and fixed income markets, derivatives, securities analysis, portfolio management, market efficiency, the role of benchmarks, non-financial drivers (ESG, etc.) and algorithmic trading versus fundamental investing. We'll conclude with some thoughts on behavioral finance and its impact on markets. Students will present/teach various topics in the first two weeks culminating in investment pitches to invest the Williams Investment Group's funds. Students will continue to work as a group to actively manage a live brokerage account for the balance of the year through Thanksgiving of 2023. During winter study, will meet three times each week (likely T/Th/F) for two hours each time. Students should expect to put in as least as much time out of class as in.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** There are no prerequisites. Students will apply for spots via two very short short answer questions. There's no mathematical prerequisite, but a comfort with basic algebra and Excel is helpful.

**Enrollment Limit:** 24

**Enrollment Preferences:** Preference will be given to Sophomores and First-years, with a slight nod to students exploring a possible interest in finance.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** David '90 P'20, a Founding Partner of Triangle Peak Partners, a venture capital firm, graduated from Williams with Honors in Mathematics. He worked for Bain & Co., MAC Group, and Faye Sarofim & Co. He also holds an MBA from Stanford University.

### **SPEC 12 (W) Connecting the Dots: Intro to Career Development**

In this course, students will identify and reflect on their skills, interests, values, and motivations and apply this self-knowledge to their search for

meaningful work. Together, the class will embark on a path of career exploration, to uncover and expand knowledge of potential paths. Students will practice lifelong career development skills, from identifying and building their network of mentors, to uncovering the hidden job market, to crafting compelling stories in resumes, cover letters and interviews, and more. Sessions will consist of lectures, group and individual activities, panels, and group discussions. Utilizing activities inspired by Kate Brooks' "You Majored in What?" Burnett and Evans' "Designing Your Life," and the 2022 update of Dick Bolles' classic "What Color is your Parachute?," each meeting will be active and engaging. Because career and personal development happens in every aspect of a student's college experience, we'll feature several visitors from within the Williams College community (peers, alumni, faculty, and staff) to foster networking connections and help students pursue their interests on campus this spring and beyond. Homework will include reading career theory, watching videos, listening to podcasts, working on resumes, cover letters, and internship search action plans, conducting informational interview in fields of interest, planning group and individual presentations on emerging topics in career development, a 2-5 page final reflective paper, and developing their framework for an e-portfolio that they can continue to use throughout their time at Williams. Because of the iterative nature of reflection and exploration, this course has something for students at every stage. However, students who are just getting started articulating potential career aspirations and/or are open to uncover new career paths may benefit most.

**Requirements/Evaluation:** Short paper and final project or presentation.

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** First year students and those who are undecided about their career paths.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Janine Oliver, Director of Career Education, is a high energy idealist. Her background as a special education teacher, mental health counselor, experiential/outdoor educator, and confused college student informs her work as a career educator.

The London Fund's proprietary Echo Chamber methodology and investment approach help students drive the creation of an investment memo and echo memo for two real investments. The class will meet 4 days a week for 3 hours a day. External influencers and lecturers will contribute to the class lectures. Out-of-class work includes competitive research on investments, financial modeling, and social network browsing.

### **SPEC 14 (W) Food Justice and the Righteous Entrepreneur**

The pandemic and the simultaneous racial reckoning and awaking that the country has experienced over the last two-plus years have highlighted the fragility of our food system, the thin line between food security and insecurity for so many, and the structural and systemic inequalities that create these realities. DC Central Kitchen, an iconic, food-based social enterprise that was founded in 1989 to turn the notion of charity on its head, has been at the forefront these issues for over three decades. The Kitchen's CEO, Mike Curtin '86, will lead the class on an exploration of food access, food justice and economic opportunity through the lens of DC Central Kitchen's growth and evolution. We will also work through DC Central Kitchen's Eight Rules for Righteous Entrepreneurs, principles that have defined the organization's impact. The class will also discuss the basics of nonprofit management and the roles social enterprise and innovation can have in disrupting a more traditional nonprofit structure. The main text for the class will be [Food Fighters, DC Central Kitchen's First Twenty Five years on the Front Lines of Hunger and Poverty] by Alex Moore, the Kitchen's Chief Development Officer. This will be supplemented by readings and other materials provided by guests who are also engaged in the fight against hunger and for systemic changes to our food system and access to economic opportunity and liberation. Guest speakers will engage with students, share their work and challenge students to look at food justice from environmental, legal, political, racial and economic perspectives. Past guests have included and will include chef and humanitarian, Jose Andres; Pulitzer Prize winning author, Marcia Chatalain; former US Deputy Secretary of Agriculture, Kathleen Merrigan '80; Congressman Jim McGovern; food and racial justice activist, Chris Bradshaw; and several DC Central Kitchen alumni and staff.

### **SPEC 15 (W) Past Patterns, Future Visions: Data in the Museum**

The course introduces students to analyzing and visualizing humanities data with a focus on questions that are critical to the future of art museums and other cultural heritage institutions: How can the format and content of museum metadata, especially collections catalogs, be used to promote works of art, and the people and cultures who created them, that have been marginalized? How can museums use data and data analysis in ways that are transparent, accessible, and allow for critique? How can we use data visualization and data storytelling to make museum collections more accessible and welcoming? Students will spend about six hours a week in class learning tools and approaches to humanities data and discussing case studies of museum and cultural heritage data projects at institutions like the Getty and National Gallery of Art. We will use the Williams College Museum of Art Data set, often alongside data sets from other museums, to explore different approaches to data using methods like mapping, text analysis, and network modeling. Outside of class, students will have short readings on different approaches to humanities data and the challenges of humanities data, as well as short assignments that work toward the final project. The final project will be a data analysis and visualization project, with accompanying project journal, on a topic of the student's choice incorporating WCMA's data set.

**Requirements/Evaluation:** Final project or presentation

**Prerequisites:** There are no prerequisites. However, students will find the class more approachable if they have already worked with data in spreadsheet formats like google sheets or excel (for example, sorting content and using basic formulas).

### **SPEC 16 (W) Stress reduction and focus-finding with kanban: managing self and workflows in small steps**

This course will give students guided instruction and direct practice in using a series of tools intended to help them reduce their stress, improve their focus, and get more out of their learning time. This is the daily practice of personal Kanban and Kata. Using the flipped classroom model, students will spend their time outside of class encountering learning content so that their time in class can be spent practicing and doing the skills of Kanban-Kata, so as to apply the tools of stress reduction to their own lives. As they learn these valuable tools and processes, rooted in an Agile framework, students will also be learning a set of sought after career skills that many companies (most of the technology and finance sectors) hire consultants to deliver to industry leaders. Because of the premium employers put on this collaborative skill-set in the current hiring market, students will benefit from this course not only by learning a proven way to decrease stress and increase focus in their own lives but by establishing a foundation of readiness to enter team-based work environments upon graduation from Williams. Students will read selections from the following works: J. Smart, *Sooner, Safer, Happier*; M. Rother, *KATA*; L. Tilman, *Agility*; Benson & Barry, *Personal Kanban Mapping Work Navigating Life*; C. Walker, *From Contempt to Curiosity*; and S. Tendon, *Hyper-Productivity for Knowledge Work Performance*. Students will leave the course with the following abilities: 1. Better visualize your work to clear your mind: Create your workspace; Modify your workspace as circumstances change; Sort your work items. 2. Better flow your work to create progress: Leverage Work In Progress [WIP] limits; Break stressors down into smaller pieces. 3. Better attack your challenges: Understand current state of challenge; Define target state/resolution. Students leave the course able to continue running their personal organization system thereafter.

**Requirements/Evaluation:** Final project or presentation.

**Prerequisites:** Willingness to try new things and to welcome a sense of play in the pursuit of knowledge.

**Enrollment Limit:** 15

**Enrollment Preferences:** seniors, juniors, sophomores, then first-years

### **SPEC 17 (W) Personal Resilience in the Face of the Climate Crisis**

Climate anxiety has been demonstrated to negatively impact students worldwide. Hickman et al. (2021), for example, reported that 59% of young people are very or extremely worried about climate change, and 45% say it impacts their daily functioning (2021). In the face of very real environmental challenges, this response is understandable but can lead to feelings of helplessness and inaction. This course seeks to explore the concept of resilience while developing practices for students' own well-being so they can be part of climate solutions. This course will build personal climate resilience in two ways. First, by exploring stories of hope through readings and local field trips, students will learn from people who see reason for action and have found concrete ways to promote equity and resilience in their own communities. The primary text will be "All We Can Save," a book composed of essays, poetry, and art of women leading climate adaptation and mitigation strategies. Local field trips will visit organizations focusing on food sovereignty, material reuse, and environmental justice. Second, students will learn concrete skills in both self-care and personal climate action. Taking small steps in the right direction like these can help students regain a sense of agency that is often lost in the face of issues as large as climate change. The course will meet 3x a week for 2-3 hours at a time. The classes will rotate between reading discussions, field trips, and skill development classes. Out of class work will involve readings, preparing for the paper and presentation, and selected local events. The means of evaluation include a short essay exploring an author from the text in more depth, as well as sharing a personal resilience skill that they currently practice with the Williams community in the form of an interactive demonstration.

### **SPEC 18 (W) Call-In Walk-In Training for Peer Health**

This course is the full training for students who would like to cover Call In Walk In (CIWI) shifts in the Peer Health Office (Paresky 212). Students should either already be a member of Peer Health, or have an interest in joining Peer Health, as those students will get priority acceptance. Topics that we will cover include alcohol and other drug use; sex, STIs and contraception; rape, sexual assault and Title IX compliance; mental health; stress and sleep; healthy and unhealthy relationships, etc. Students will meet various on- and off-campus resources for referral. Homework/Outside of Class Work: occasional readings, video viewings, information gathering, requested attendance at campus-wide educational events. Reading Materials: will be provided in class

**Requirements/Evaluation:** Final project or presentation.

**Prerequisites:** none

**Enrollment Limit:** 24

**Enrollment Preferences:** Current active members of Peer Health will be chosen first; beyond that, class is open to any student interested in promoting the health and wellness of the student body and/or providing a helping role on campus (RASAN, SAPA, JA, HC/NLT, SAAC, etc)

### **SPEC 19 (W) Exploring Healthcare**

Experience in a healthcare environment is essential to exploring the health professions. Through this experiential course, students have an opportunity to clarify their understanding of the rewards and challenges of the practice of allopathic and osteopathic medicine, veterinary medicine, dentistry, allied health professions, or public health. Students will participate in an intensive shadowing internship through a self-identified placement in a geographic location of their choosing. Generally, a shadowing experience focuses on provider-patient interactions within out-patient and in-patient settings. These experiences provide students with the opportunity to observe clinical interactions and to learn about the systems within which healthcare is delivered. Students will be introduced to fundamental concepts related to patient interviewing, diagnosis, and medical decision making. Students will also be introduced to core concepts of population health, providing a broad perspective on health outcomes within a geographic region, and expand their perspective on the individual clinical interactions which they observe. This course will encourage participants to reflect on their healthcare experiences with a dual focus: from the perspective of the individual provider-patient relationship and within a systems-level context. Weekly didactic sessions will focus on the challenges and experiences of healthcare professionals in the Berkshires or nationally, and these sessions will now be offered remotely so that they can be attended by both on-site and off-site students and to facilitate a broader range of speakers. By the end of the course, students will demonstrate greater understanding of the fundamentals of patient-provider interactions, clinical diagnosis, patient interviewing, and/or factors affecting the health of individuals and communities. They will write a final reflective paper on their experiences. Students are welcome to participate in self-sourced shadowing or volunteering internships in a geographic area where they have housing and transportation. Learn more about sourcing your own shadowing opportunity here. Additionally, we are currently assessing the interest level and capacity for facilitating placements through the '68

Center. **Please fill out this interest form**

### **SPEC 20 (W) Getting to the Big Ideas**

What is the central idea behind any creative enterprise and how does one discover it? What is the artistic inspiration that fuels the creative journey? In this course, we will attend to these questions through an unearthing of the collaborative process of creative discernment. Led by the Emmy-Award Producer and Williams Alumnus Frank Doelger '75 (*Rome*, *John Adams* and *Game of Thrones*), and in conversation with award-winning documentary filmmaker and Professor of Africana Studies Rhon Manigault-Bryant, students will consider multiple narrative forms as they take a deep dive into the big ideas that generate stories. The course is informed by the work of African American science fiction writer Octavia E. Butler (1947-2006). With her collection *Blood Child and Other Stories* as a springboard, and a dynamic scaffolding process, we will explore the manifold creative decisions that inform the transformation of stories from one medium to the other. Each week, student groups will tackle the logistics that drive the creative process, including character formation, animation, music, and storyline. They will develop stories as writers and designers (week one); directors and composers (week two) and producers (week three), and at the end of the course present a culminating project of their collaborative storytelling journey. That final project--the creation of a lookbook--visually tells the stories creatives in a format that is used throughout the television and film industries. Informed by the tutorial style 15 students will be placed into groups of 3, and together will design the lookbook. The entire class will meet twice per week from 11am to 1pm, and each trio will have their own individual meeting times with the instructor(s) for 1.5 hours between 11am and 3pm. Groups will also meet a minimum of 2 hours outside of organized class time. Experts throughout the film and television industries will be "zoomed" in at no additional cost to students.

### **SPEC 21 (W) Career Exploration: Winter Study Internships!**

Internships amplify academic learning, empower professional development, and increase students' career options. SPEC 21 offers students the opportunity to learn beyond the classroom by providing substantive applied learning experiences focusing on issues such as racial justice/social justice, non-profit/community service, government/policy/law, environment, education & many more! Students have the option of applying to the designated SPEC 21 WS internships posted on Handshake, or to submit self-sourced WS internships. For WS 2022, remote, hybrid, and on-site internship opportunities are eligible. Each student will intern for 5 days per week working on project(s) for 3 1/2-4 weeks. Previous WS Internship Sponsors include: Stockbridge Munsee Community Band of Mohican peoples, Berkshire County Chapter, NAACP, Vera Institute of Justice, Nuclear

Age Peace Foundation, and many others! Throughout the month, students will reflect upon their experiences: Impressions about the organization and its workplace culture. Insights about the structure of their role, the organization and the industry. Professionally-What they have learned about themselves within a professional environment; may solidify an interest in a particular industry and build upon this experience when pursuing future opportunities or support the decision to change direction and explore a new industry. Academically-Future course selection, selection of major, and enhanced, grounded, contributions to class discussions. Williams College Alumni/Parents and other employers will be recruited as Winter Study (WS) Internship Sponsors and create meaningful projects/experiences during the month of January. It is expected that our WS Sponsors will mentor the Williams intern(s) during the course, meet with intern(s) on a regular basis to discuss projects/goals/challenges for the week, and support students' success.

**Requirements/Evaluation:** Short paper and final project or presentation. Students must write a short paper that will become a public record and used as a resource by future students or create a 3-5 minute video; weekly assignments will include completing a Career Action Plan and responding to three questions posted to the EphLink WS Discussion Group. In addition, SPEC 21 winter study interns will have the opportunity to participate in a Winter Study Internship/Summer Experience Fair, career panel discussions, or '68 Center workshops.

**Prerequisites:** Interested students must attend an information meeting in late September or early October and follow up with Dawn Dellea if they have questions about specific WS internships listed in the SPEC 21 syllabus or self-sourced WS internships.

### **SPEC 23 (W) Climate Change Science and Solutions: A Practical Guide for protecting our Climate**

The course couples climate change science with a rigorous investigation into solutions that are fair and equitable, economically and technologically feasible, and supported by research in social psychology and behavioral change. It covers the physical basis of global climate change, measurements and climate models, and links them with the psychology of risk perception, social influence, and collective action. The course is motivated by the fact that despite broad scientific consensus on the origins and risks posed by climate change, public and governmental mobilization around the issue has remained remarkably limited. The course is conducted seminar style and includes individual and group projects. We start with the global carbon cycle and the role of greenhouse gasses in the atmosphere. Climate scientists use powerful models and large amounts of data to track past and predict future changes in the climate. We will look at the building blocks of these models and how they feed into reports such as the Intergovernmental Panel on Climate Change (IPCC) Assessment. Next, we will examine climate change solutions. In individual and group projects we will take a look at renewable energy, sustainable farming and forest management practices, dietary changes, and more to assess their potential for reducing carbon emissions, costs, socio-economic fairness, and political acceptance. This will help us become knowledgeable in designing climate solutions at different scales, for diverse communities and various cost constraints. I also plan for us to visit a few sites and hear from guest speakers. Your final project will be a presentation of a realistic and impactful action to combat climate change that uses the scientific, technical, cultural, and climate justice knowledge gained in the course. Your peers will have the opportunity to critically examine your proposal, ask questions and together practice being effective advocates for climate change action.

**SPEC 26 (W) Entrepreneurship Essentials: the Mindset, the Method, the Reality**

Entrepreneurship is the art and science of generating and applying ideas that solve real-world problems. In this course, students will learn the entrepreneurial method and discover where ideas come from and how they are vetted through the customer discovery process. Students will visit numerous Start Ups and meet dozens of entrepreneurs and their co-founders, funders, and employees to learn what happens, what to watch out for, and how to think about entrepreneurial opportunities. The course will begin in WT (3hrs/day, 9 days) with a review of the idea development tools used in today's startup environment, particularly those pioneered by the Stanford d.School such as the Business Model Canvas and Design Thinking. Particular focus will be on customer discovery and how one determines if an idea is worth pursuing, the "pivots" along the way, and the adaptive mentality needed in a startup. We will also look at the creative process from a personal perspective - how can each student learn to think creatively and what actions can they take. We will compare the creative process in different disciplines to see what is different and what is the same. The second half of the course will take place in San Francisco where we will tap into the strong Bay Area alumni network allowing us to visit start-ups and fast-growing tech companies to compare how they approach their markets. We will look at the influence of company culture, different financing models, and the entrepreneurial ecosystem of the Bay Area. Students will also be given a consulting project from an alumni-run company addressing a current and as yet unsolved problem. **SPEC 27 (W) Arab-American & African-American Communities of Detroit: An Exploration through Interfaith Dialogue**

The Chaplains' Office's Winter Study Course looks at two significant people movements in Michigan -- African Americans during the Northern Migration and Arab Americans, particularly from Syria and Lebanon. These people will give students an opportunity for interfaith dialogue in the context of cultural and ethnic differences. This trip will look at issues related to the environment, poverty and racism in the context of the diversity of religious and spiritual perspectives. This trip allows students to learn from those who are doing the social justice and humanitarian work in an area with a rich but complex history. We hope this course will inspire students to learn more about these issues and how surface explanations are not the ones that lead to solutions. Throughout the entire trip, students will be invited to reflect on questions of ethnicity and race, privilege, and social justice. To this end, students will visit numerous religious and cultural locations, including the Charles H. Wright and the Arab American National museums. Students will also meet with religious leaders about their experiences with social justice in their communities. Instructors: The Rev. **SPEC 28 (W) Prosecutorial Discretion: Exploring Prejudice, Race and Bias in the Justice System**

For aspiring law students and attorneys, judges or policy makers, civil rights advocates or academics, a keen understanding of the prosecution function is imperative. Prosecutorial decision making is the very core of the criminal justice system. And yet--unlike other arms of the justice system, such as law enforcement or the judiciary--prosecutors have little or no oversight or checks and balances on their decisions and authority. Students will explore the U.S. Constitution's guarantees of Due Process and Equal Protection and aspects of the 4th, 5th and 6th Amendments. Students will read selected works and cases which illustrate the potential for--and consequences of--a justice system vulnerable to unchecked prejudice, racism and bias. Students are encouraged to collaborate with the instructor (available days and evenings) and classmates in their preparation of a 5-7 page research paper. Each student will also do a brief oral presentation sharing their research and findings. This course will require approximately 20 hours of work per week, which includes 6 hours of class time. ### **SPEC 29 (W) Down the Road and Across the World: Transformative Education in Pittsfield Public Schools**

By the time you graduate high school, you will have spent somewhere around 12,600 hours sitting in classrooms. When you're a student, you only experience one class at a time-but have you ever thought about the work that goes into running an entire district? From choosing a curriculum to training new teachers, from spending a \$65 million budget to hiring over 2,000 employees, there are countless decisions that district administrators need to make each day. How do they design a school system that meets the needs of thousands of students, and what is their role in creating a more equitable society-starting in pre-school? Over the course of your Winter Study, you will work closely with Judy Rush, Curriculum Director, and Ryan Buggy '19, Equity of Learning District Data Coordinator at Pittsfield Public Schools. Each week, we will explore a new topic within K-12 education, such as the use of data to eliminate identity-based opportunity gaps, the alignment of instructional practices with scientific evidence, and the different services we provide to meet the needs of a diverse range of students. Throughout the entire month, you will also try your hand at creating curriculum resources for our teachers-and even get a chance to use them yourself with students of your own. We will meet once a week virtually and twice a week in person for a total of ~12 hours. During virtual sessions, we will check in on the curriculum design projects and discuss readings from texts such as *The Knowledge Gap* by Natalie Wexler, *Solving Disproportionality and Achieving Equity* by Edward Fergus, and *Culturally Responsive Teaching and the Brain* by Zaretta Hammond. Then, during our in-person sessions, you will have the opportunity to sit-in on meetings between educational administrators and ask questions about their roles. You will also spend some time in the classroom, seeing what it's like to teach in a high-needs public school district, and discuss it with your peers over dinner.

**Requirements/Evaluation:** Short paper and final project or presentation.

**Prerequisites:** None

**Enrollment Limit:** 10

### **SPEC 33 (W) Community Arts in Education**

In this course, students will explore the diverse opportunities that fall within community arts and education. As part of the exploration students will research the work of artist educators and arts education programs in a variety of community contexts, develop skills to plan, implement and evaluate arts education programming, and document creative processes and arts education program outcomes. Examine the opportunities for artist-educators in a variety of settings. Develop skills as community arts practitioners including program design, implementation, documentation and assessment. Explore education theories grounded in social justice education with a focus on diversity, equity, and inclusion. Explore the creative process as a means of activism, community development, and youth development. Explore flexible strategies in arts integration across art forms Students will explore community arts education examples across a variety of settings, matching individual interests and career paths. Each student will participate in the design and implementation of a community arts education program providing a practical, real-world experience that links theory and practice. We will meet as a class 3 days a week for 2-3 hours. Each class will have: -a hands on exploration of arts based strategies that can be used flexibly to foster learning, -discussion of the readings/viewings -students will draw from the Integrating the Arts Across the Curriculum text, and a series of video examples. -writing/reflection -students will design their own mini-workshop based on their area of interest Students will have about 7-8 hours of class time and will also have the opportunity to present their final workshop plans

**Requirements/Evaluation:** Final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** I would prefer a limit of about 15 students in order to be able to allow for presentations of student workshop ideas engaging the class in experiential exploration.

### **SPEC 34 (W) Reading, Writing, and Eating**

You may have heard that the way to one's heart is through their stomach. How can something as fundamental as food help us understand more about our identity? How can food help us write creatively and convincingly about who we are, whom and what we love, and what we stand for? In this course, we will read about growing, eating, and cooking food, as well as about dining out. We will write in response to the texts we're reading and to the food we're eating. Our goal is to learn how to engage in critical analysis and self-inquiry to better understand writing skills like argument, analysis, grammar, and style, and how to write the personal for a public audience. This course is designed to support students who need extra instruction in the fundamentals of English composition, especially students for whom English is an additional language. Readings and texts will include excerpts from Zauner's Crying in H Mart, Lee's "Coming Home Again," Laymon's Heavy, Foster Wallace's "Consider the Lobster," Chang's The Next Thing You Eat, and more. We'll meet for six hours each week, and the class will occupy significantly more time outside of the classroom-roughly twenty hours a week-during which you'll be engaged in the writing process, the eating experience, and reading for class. There will be at least one group meal at a local restaurant. Students will write three major assignments: a narrative nonfiction essay and two longform reviews.

### **SPEC 35 (W) Making & Managing Choice with Design Thinking**

The course will introduce Design Thinking (or Designery Thinking) as a practice for making and managing choice across a broad range of meaning-making scenarios, from problem-solving to innovation. Design Thinking enables people to create multiple opportunities for positive change that may consist--in a worst-case scenario--in failing fast, and failing cheaply. While learning and practicing Design Thinking participants will develop empathic listening, problem framing, divergent and convergent thinking, creative and analytical problem-solving, risk and failure management, visualizing information, and cross-disciplinary teamwork, among other skills. The course consists of daily (Monday through Friday) 75-minute *sessions* of instruction, followed by approximately 3 hours of self-directed, practical *fieldwork* in teams of 5 to 6 people. Each session will consist of four components: 1. a presentation, recap, or variant of the framework of Design Thinking (including references for further reading, listening, or viewing as appropriate); 2. a description of a specific practice within the framework; 3. illustrations of that specific practice with real-world examples; 4. a description of the self-directed fieldwork assignment, with clarifications as required. Following the first fieldwork assignment, each session will begin with Q&A on challenges or other considerations that arise from the previous sessions' assignment(s). Each team may choose a practical topic to work on in the field for the duration of the course. The topics may be original with each team or shared. We suggest topics familiar enough to the participants to avoid steep learning curves, but not to the point of risking too much bias during the problem framing. The instructor will provide a template for teams to present the outcome of their project during the last session. Failed projects will be integral to the learning experience, and accepted as deliverables.

**Requirements/Evaluation:** Final project or presentation.

**Enrollment Limit:** 30

**Enrollment Preferences:** Applied arts or applied sciences majors

**Expected Class Size:** NA

**Grading:** pass/fail only

### **SPEC 36 (W) Thinking About Thinking About Healthcare?**

This class will focus on current topics in healthcare (e.g. burnout, health disparities, holistic therapies, communication, health literacy) with the primary objective aimed at exploring career options within the larger healthcare setting. Required reading, viewing, and/or listening assignments will inform classroom discussions. Relevant readings will be taken from books, academic journals, and periodicals. Students will be asked to write weekly reflections that will be used as a tool to contextualize course content and note areas that are of particular interest (or disinterest). Classes will be held primarily in person on Monday, Tuesday, and Thursday evenings between 7 and 9 pm with a (non-mandatory) field trip to a local mobile health van at a time and date to be determined (likely on a weekday during business hours). Selected scheduled classes may be held remotely via Zoom as needed. In-person class time will consist of a combination of short lectures, classroom discussion, and invited talks by individuals who are currently working or who have extensive experience in a broad spectrum of healthcare fields. This class is best suited for any student who is interested in pursuing a career or advanced degree in a healthcare or healthcare adjacent field, or students who are interested in learning about the wide variety of health-related careers that are possible. However, anyone with an interest in healthcare is encouraged to sign up.

### **SPEC 37 (W) Drum2Talk: Rhythm, Relationship, and Race**

The students will create music cooperatively in drum circles using West African percussion instruments and participate in guided conversations about Race in America. Recognizing that racism has a profound impact on the lives of ALL Americans, the course will offer many opportunities to engage in and benefit from the emotionally healing aspects of rhythmic expression. The course will be expected to engage with selected readings and audio/visual from the deep breath of literature and media materials on Race, Identity, and Wellness. Additionally, drawing on our class conversations, the students will write and reflect daily in their journals. Although the journals are only for the eyes of the author, the students will submit a 2-page "Reflection of Position paper" due at the beginning and end of the course. The students will learn several important West African Ensemble pieces and the cultural context they fit into their country of origin. The participants will develop and practice the skills of Drum Circle Facilitation in their expected regular small group practice/"jam" sessions outside of the class. They will develop and use rhythmic improvisational skills. They will be able to publicly perform these West African Drum Ensemble rhythms. The students will be expected to have daily conversations with others outside of the course on issues around Race in America, reflect on those conversations in their journals daily, and summarize the essence of those conversations in the class.

**Requirements/Evaluation:** Regular appropriate full participation in discussion about the readings, media materials, and the drumming. Writing reflections in their journal from the frequent conversations they will be expected to have with persons outside of the course. There will be a public performance of the rhythms and music learned during the process of the course.

**Prerequisites:** This course is primarily for those with NO EXPERIENCE playing West African instruments however all levels and ranges of experience are welcomed and will gain in skill level. The primary focus is participation in conversations about Race and Racism.

**Enrollment Limit:** 16

**Enrollment Preferences:** 1.) Those with a stated STRONG desire to engage in conversation on race and identity. 2.) Those willing to explore their own family's relationship to the issues of racism.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Otha is a Drum Circle Facilitator working with a wide range of clients from corporate thru all levels of education, and Wellness. He has taught music at various schools in New England, including Williams College. He has toured as a Concert Pianist.

### **SPEC 95 (W) Gaudino Fellowship: Immersive Engagement and Reflection**

The Gaudino Fund is offering Gaudino Fellowships for a group of 2 to 4 students during Winter Study, based upon a proposed domestic or foreign collaborative project. Student teams should organize their proposed projects around two main components: direct encounter with otherness and self-reflection. Projects will be evaluated on whether they subject the students to "uncomfortable learning", i.e. having an experience that challenges and perhaps alters one's view of what it is to live a good life and the group's commitment to incorporate separate home stays for each fellow as part of

their project, either joint or separate work/engagement internships, and a structure to facilitate collaborative action and learning. The team selected will be guided and overseen by the Gaudino Scholar who will conduct appropriate preparatory discussions and follow-up sessions to optimize and help students articulate lessons learned from the overall experience. The intent of the program is to open the student to an understanding (of both the familiar and unfamiliar), and to a development of empathy, that could not be achieved without the fellowship experience. N.B. Each prospective team needs to meet with the Gaudino Scholar as early as possible, but no later than September, and submit their group application by September 30. Application guidelines can be found at [winterstudy.williams.edu](http://winterstudy.williams.edu). Each student is expected to write a short (3-4 page) self-reflection before leaving for WSP, keep a journal of their experience, as well as write a 8-10 page paper by the end of the Winter Study period reflecting on their experiences and what has changed in the student's perceptions and beliefs from the opening essay. They will also meet the other members of the team on a weekly basis during Winter Study and regularly update the Gaudino Scholar by email and/or Skype calls. The team that receives the Gaudino Fellowship will give a brief presentation to the Board about their experience at the Board's spring meeting in April. The team whose project is approved will receive the Gaudino Fellow designation. In addition, students on Financial Aid will receive Gaudino funding from a minimum of 50% to a maximum of 90% of the budget for the project up to \$2,500, as determined by the Financial Aid office. No additional funding for students' projects will be provided by the College.

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** selection is made on basis of proposal

**Expected Class Size:** NA

## WOMEN'S, GENDER AND SEXUALITY STUDIES (Div II)

Chair: Associate Professor Gregory Mitchell

### Advisory Committee

- Maria Elena Cepeda, Professor of Latina/o Studies; affiliated with: Latina/o Studies, Women, Gender & Sexuality Studies, American Studies
- Marshall Green, Assistant Professor of Women's, Gender and Sexuality Studies
- Bethany Hicok, Lecturer in English; affiliated with: English, Women, Gender & Sexuality Studies
- Kieran Honderich, Lecturer in Women's, Gender and Sexuality Studies; affiliated with: Women, Gender & Sexuality Studies, Public Health
- Abram J. Lewis, Visiting Assistant Professor of Women's, Gender and Sexuality Studies
- Gregory C. Mitchell, Chair and Associate Professor of Women's, Gender and Sexuality Studies and Faculty Affiliate in Anthropology/Sociology; affiliated with: Women, Gender & Sexuality Studies, Anthropology & Sociology
- Masooma Mukhtari, Visiting Schumann Fellow and Lecturer in Women's, Gender, and Sexuality Studies
- Greta F. Snyder, Visiting Assistant Professor of Women's, Gender, and Sexuality Studies

Women's, Gender and Sexuality Studies can be defined as the study of how gender is constructed, how it is inflected by differences of race, ethnicity, sexuality, class, and so on, how gender affects the experiences and situations of men and women, and how assumptions about gender influence the construction of knowledge and experience. Scholarship in Women's, Gender and Sexuality Studies has brought neglected material into established fields and raised important methodological questions that cross disciplinary boundaries and challenge established intellectual frameworks. The program in Women's, Gender and Sexuality Studies thus includes courses from a wide variety of disciplines that focus in a coherent way on gender issues and/or sexuality issues, as well as core courses that acquaint students with the interdisciplinarity of the field.

### THE MAJOR

The Women's, Gender and Sexuality Studies major encourages students' exposure to the interdisciplinary character of feminist and sexuality-focused scholarship. In addition, majors are required to gain some knowledge of methods within a field or discipline (3 courses in one of the categories listed below), to appreciate the importance of diversity (racial, sexual, class, ethnic, national, etc.) in scholarship on gender and sexuality, to gain exposure to feminist and/or queer theory, and to pursue work at an advanced level (3 courses at the 300-level).

In order to ensure that students reflect about the paths that they choose through the major, each major will be assigned to an advisor in the spring of the sophomore year. With the advisor, the student will establish a revisable course of study for the following two years. Students interested in declaring a major should contact the Chair of the Program.

### Required Courses

**The major consists of at least 9 courses. The following are required:**

WGSS 101 Introduction to Women's, Gender and Sexuality Studies

WGSS 202 Foundations in Sexuality Studies

WGSS 400-level Junior/Senior Seminar in Women's, Gender and Sexuality Studies. The seminar explores topics in Women's, Gender and Sexuality Studies, and varies from year to year. Majors may take more than one seminar, space permitting.

In addition to these three required courses, students are required to take six electives. In consultation with their major advisor and with approval from the chair, these six elective courses should include:

Courses from at least 3 different disciplinary traditions.

At least 3 courses at the 300-level.

At least 1 course that emphasizes feminist/queer theories and/or methodologies.

At least 1 course that emphasizes a diversity of racial, sexual, religious, and/or cultural identities and practices.

In the final semester of their senior year, all majors will be required to write a reflective intellectual autobiography of their WGSS major, in which they explain how their courses meet the goals of the major, and analyze the relationship among the courses they have taken, the papers they have written, and the research projects undertaken.

## THE DEGREE WITH HONORS

Honors in Women's, Gender and Sexuality Studies may be granted to majors after an approved candidate completes an honors project, delivers a public presentation of the work, and is awarded honors by the Women's, Gender and Sexuality Studies Committee. The honors project may be fall semester (plus winter study) or a year-long project. It may consist of a conventional research thesis of 40-70 pages or of other modes of presentation (e.g., art, music, poetry, theater, fiction). Proposals for non-thesis projects should include evidence of experience and competence in the chosen mode.

**A student may become a candidate for honors in Women's, Gender and Sexuality Studies after the following criteria are met:**

In April of the junior year, submission and Women's, Gender and Sexuality Studies Committee approval of a 4- to 6-page project proposal, in which the ideas, aim, general methodology, and preliminary bibliography for the project are outlined and a faculty advisor is named; prior to submission of this proposal, students must consult with a reference librarian.

**At the end of the junior year, cumulative grade point average of 3.5 from courses taken in the major;**

In the first week of classes of the senior year, submission and approval by the faculty advisor and second reader of a 5- to 10-page "Plan of Action" (an overview of what has already been completed and a schedule of what needs to be accomplished to finish the project). Where appropriate, students pursuing honors will continue to consult with the second reader over the course of the semester(s).

All honors work, including the public presentation, will be evaluated by the Women's, Gender and Sexuality Studies Committee. It will decide on the awarding of honors; the advisor will award the grade(s).

## STUDY ABROAD

The Williams College Women's, Gender and Sexuality Studies Program encourages potential majors to study abroad in order to enhance their education and gain international perspectives on gender and women's issues and feminism. There are many excellent study abroad opportunities offering students a variety of possible experiences: among them cultural immersion, field work, intensive language learning, independent study, participation in another educational system. There are several semester-long programs with a specific focus on women and/or gender administered by other U.S. Colleges that would especially enrich the educational experience of our majors:

Antioch College: Comparative Women's Studies in Europe fall semester

Augsburg College, Center for Global Education: Crossing Borders: Gender and Social Change in Mesoamerica fall semester; and Social and Environmental Justice in Latin America spring semester

School for International Training: The Balkans: Women and Democratization, fall or spring semester

Jamaica: Gender and Development, fall or spring semester

Mali: Gender and Development, fall or spring semester

The Netherlands: Identity, Gender and Sexuality, fall or spring semester

## FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description, complete syllabus, including readings/assignments, and exams or other written work. Depends on the level for which the student is seeking major credit (200- vs 300-).

**Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

No.

**Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

No.

**Are there specific major requirements that cannot be fulfilled while on study away?**

Yes. 101 and 402 cannot be fulfilled abroad.

**Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

No.

**Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:**

None to date.

**WGSS 101 (F)(S) Introduction to Women's, Gender & Sexuality Studies (DPE) (WS)**

This course is designed to initiate you into the pleasures, pains and perplexities of critical thinking about gender and the situations of women across the globe. We will survey a wide variety of writers and issues--historical and contemporary, theoretical and practical. Above all, the course is intended as an exploration of the tremendous diversity of thought contained under the general rubrics of feminist and gender studies and a vehicle for developing skills in writing and research as well as analytical tools for further work in the field. The goal is not to bring about a specific point of view, but rather to learn to analyze issues critically using the methods and frameworks that feminist theory and queer theory have developed as academic disciplines.

**Class Format:** Mix of lectures and seminars

**Requirements/Evaluation:** Participation during class and in online forums, weekly reading responses, two short essays with revisions, and a final research paper

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** WGSS majors and potential WGSS majors

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** required course for the Women's, Gender and Sexuality Studies major

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** This course requires significant attention to the craft of writing. Essential to this craft is the process of editing and rewriting materials with feedback from peers and professors. Students are expected to focus on improving analytical skills, critical thinking, and argumentation through attention to the writing process. They are also expected to give meaningful critical feedback on the writing of their peers.

**Difference, Power, and Equity Notes:** This course meets the DPE requirement because it asks students to reflect critically on issues of gender and sexuality around the world in a comparative contextual framework. Students will be asked in seminar space to discuss the operation of difference and power within as well as across different gender, class, racial, and sexual identities while learning in lecture meetings about feminist and queer studies' history, activism, and theory.

**WGSS 103 (F) Breeding Controversy: Technologies and Ideologies of Population Control (DPE)**

**Cross-listings:** WGSS 103 STS 102

### Secondary Cross-listing

What is "good breeding?" For whom is birth control "liberating?" This course traces the surprising ways that concepts of population growth and decline from the natural sciences come to inform social discourses on "overpopulation" in the twentieth and twenty-first centuries. Science and politics mix to decide: who should be able to reproduce--and, consequently, who might not be born--so that some may live more prosperously? By studying the history of eugenics movements, contraceptive technologies in the context of development, and the racialized cultures of reproductive medicine, we will analyze how scientific ways of thinking about human lives reflect and reproduce social inequities. We will use the tools of feminist technoscience studies to understand how science, culture, power, and politics intersect to create new technologies of "selection" that are far from natural. New literatures in critical race STS, black feminist thought, and critical theory will inform our discussions.

**Requirements/Evaluation:** Weekly paper or response and in-class debate.

**Prerequisites:** None.

**Enrollment Limit:** 10

**Enrollment Preferences:** Freshmen. If over-enrolled, students will submit a short paragraph stating their interest in the course.

**Expected Class Size:** 10

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 103 (D2) STS 102 (D2)

**Difference, Power, and Equity Notes:** This course will demonstrate how scientific knowledges also reflect biases organized along lines of social difference, including race, gender, class and nation. Readings in critical race theory will give students a deeper appreciation of these issues.

### WGSS 105 (F)(S) American Girlhoods (DPE) (WS)

**Cross-listings:** WGSS 105 ENGL 105

### Secondary Cross-listing

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

**Requirements/Evaluation:** at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 105 (D2) ENGL 105 (D1)

**Writing Skills Notes:** Students do at least 20 pages of writing (4-5 papers) and are required to revise several papers. We also devote significant class time to talking about successful academic writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equality and power and what kinds of literary and cultural forms writers utilize to illuminate these differences.

Nene Leaks, Issa Rae, Zendaya, Oprah Winfrey, Lavern Cox and Joy Reid have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed--these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

**Cross-listings:** WGSS 113 ENGL 113 AMST 113

**Secondary Cross-listing**

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

**WGSS 127 (S) Spring Grass: A Peek into Inequality in China (DPE) (WS)**

**Cross-listings:** ASIA 127 WGSS 127 CHIN 427 ASST 127

**Secondary Cross-listing**

*Spring Grass (Chuncao)* is a Chinese novel written by award-winning author Qiu Shanshan (1958-). Using the literary techniques of social realism, the novel chronicles the life of a young rural woman from 1961 to 2001. Spring Grass, the protagonist of the novel, was born in a rural village to a mother who preferred sons over daughters. At a young age, Spring Grass was deprived of the opportunity to attend school. Against all odds, she managed to marry for love, venture into the city, and become an enterprising migrant worker. This novel not only reflects the struggles of women in contemporary China but also captures the economic transformation of modern China since 1978 when the Reform and Open-Door Policy (*gaige kaifang*) was initiated. The novel was adapted into a television drama series and became an instant hit in 2008. This course takes an interdisciplinary, cultural studies and humanistic approach to studying a literary text, using literature as a means to help students better understand social and cultural issues. Through close readings of the novel, the eponymous TV drama series, documentaries, films, and short stories depicting rural life and women's roles in China, as well as in-depth discussions of both primary and secondary sources that deal with the cultural, historical, and socioeconomic background of the unfolding story of Spring Grass, this course aims to provide a window for students to examine the issues of inequality in the Chinese village and society at large. Why would mothers be harsh to their own daughters and bar girls' right to education? Why would young people leave their village and migrate to the city? Why would migrant workers leave their children behind in the village? Why would economic developments in China exacerbate the problem of gender inequality in society? Why would the ideology and cultural logic behind Mao Zedong's proclamation "women can hold up half of the sky" add more burden to women rather than truly liberate them? Why would city people discriminate against country folks? After taking this course, students will gain a deeper understanding of the issues related to gender inequality (*nannü bu pingdeng*) and the urban/rural-gap (*chengxiang chabie*) in China. Throughout the course, they are also encouraged to critically think about how to achieve equity in different societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or WGSS and language learners wishing to take the course in Chinese should register under CHIN.

**Requirements/Evaluation:** active participation in tutorial meetings, five 4-5 page tutorial papers, five 2-page critiques, online writing portfolio as the final project.

**Prerequisites:** For students registering under CHIN, the prerequisite is CHIN 402 or a language proficiency interview conducted by the instructor. For students registering under ASST or WGSS, there is no prerequisite.

**Enrollment Limit:** 10

**Enrollment Preferences:** Enrollment priorities will be given to freshmen and sophomores who register under ASST or WGSS, and to Chinese language learners who register under CHIN.

**Writing Skills Notes:** Writing is taught using the writing-as-process pedagogical approach. The writing process consists of invention, composition, and revision. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. The instructor gives detailed feedback to students' first drafts and students are required to turn in a revised version. At the end of the semester, students will compile an online writing portfolio to include their best works.

**Difference, Power, and Equity Notes:** The issue of "inequality," including both gender inequality and regional inequality is the driving force behind the readings and discussions of this tutorial. Students are guided to develop an empathetic way of interpreting a literary work that features a rural woman/migrant worker. They will critically analyze the sources of inequality in the Chinese cultural context and explore ways to address such inequality.

From Beyoncé's Coachella performance to Donald Trump's social media antics, spectacles captivate us. Spectacles may be live shows, media events, or even everyday performances ranging from interactive advertisements to viral video sensations. But what are the uses of spectacle? Why are some compelling while others fall flat? How do spectacles control society or maintain social norms? And, importantly for our purposes, how does

spectacle shape gender in society? Or from another angle, how does sexuality infuse spectacle? This tutorial introduces students to theories of spectacle ranging from the ancient Greeks to Marxist-inspired thinkers in the 20th century. In particular, we will examine how feminist thinkers have contributed to this literature and how theories of spectacle relate to questions of gender and sexuality. Our weekly readings focus on pairings of theoretical readings with writing on popular cultural examples and case studies. Some possible topics include sporting events, charity ad campaigns, music videos, political events, and social media.

They are also expected to give meaningful critical feedback on the writing of their peers. Students will select past response papers for development and rewriting.

The course invites students to consider the range of ways in which "knowledge" about women's, femme's and non-binary lives has been constructed in text, and how this knowledge determines and impacts the we have and make. The first half of the course is organized around a deep reading of Sara Ahmed's recent theoretical book, *Living a Feminist Life*, while the second half of the course will examine a spectrum of women's life writing-poetry, music, journalism, theory, and memoir-to discover how text continues to shape feminist lives, and how femmes' lived experience in turn shapes feminist discourse. Course materials for the second half of the semester will be generated in part through discussion and students' suggestions. Key texts will include Jamaica Kincaid's *A Small Place*, Audre Lorde's *Sister Outsider*, Djamilia Boupacha's memoir, Ana Lily Amirpour's film *A Girl Walks Home Alone at Night*, Sara Ahmed's *Living a Feminist Life*, Valerie Solanas's *SCUM Manifesto*, and bell hooks's *Teaching to Transgress*. In their writing for this course, students will consider how their own intimate relationships-with parents, partners, children, neighbors, or friends-can become sites of feminist activism, and sources of strength and knowledge to be carried into the broader world of public engagement and intervention. In the final weeks of the course, we will collectively interrogate the (false) boundary between writing and living as modes of feminist praxis.

For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment's meaning in the century that followed. Central themes in this course include the contested interpretations of "birthright citizenship," "due process," "privileges and immunities," "equal protection," and "life, liberty or property"; the rise, fall, and rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality.

**Secondary Cross-listing**

This course explores key themes in the expression of gender and sexuality through music. It draws from primarily 21st century examples, across cultures and genres, ranging from pop boy bands to Indian bhangra dance to the musical avant-garde. Themes will include: communicating gendered ideals, dance and embodiment, transgressive performances, biography and subjectivity, intersectionality, music and sexual violence, and marketing. We will explore the ways in which ideas and identities related to sex and gender are formulated and mobilized in music's performance and consumption. Inevitably, issues of sound and stagecraft intersect with factors such as race, age, and class, further informing these experiences. Students will consider their own processes of identifying and interpreting expressions of gender and sexuality in sound and movement, and contemplate the role of culture and society in informing those interpretations.

Mythologized as the land of the aurora borealis and the midnight sun, Scandinavia's five distinct nations--Iceland, Norway, Sweden, Denmark, and Finland--are often mistakenly associated with blond-haired and blue-eyed uniformity. Modern Scandinavia, however, is a place of great social and cultural diversity. From medieval Viking sagas to contemporary Nordic rap, the Scandinavian literary tradition is rich in tales of global exploration, childhood imagination, sexual revolution, and multicultural confrontation. Through readings of nineteenth-century drama, twentieth-century novels, and twenty-first century cinema, we will investigate a wide range of issues on class, ethnicity, and identity, including the indigenous reindeer-herding Sámi people, Danish colonialism and the Greenlandic Inuit, Norwegian collaboration and resistance during World War II, and Nordic emigration (to North America) and immigration (from Africa, Asia, Latin America, and the Middle East). Discussion will also focus on Scandinavia's leadership in gender equality and sexual liberation, Scandinavian political isolation and integration (into both the UN and the EU), and the global effects of Nordic pop (ABBA to Björk), glamour (Greta Garbo to Alicia Vikander), technology (Volvo to Nokia), design (IKEA to H&M), and activism (Alfred Nobel to Greta Thunberg). Readings to include works by Henrik Ibsen, August Strindberg, Hans Christian Andersen, Karen Blixen, Astrid Lindgren, Halldór Laxness, Reidar Jönsson, and Peter Høeg. Films to include works by Ingmar Bergman, Lasse Hallström, Bille August, Colin Nutley, Lukas Moodysson, Josef Fares, Tomas Alfredson, and Tomas Vinterberg. *All readings and discussions in English.*

In 1883, Maupassant called on his fellow war veterans and writers to join him in speaking out against warfare and violence, crying "Let us dishonor war!" From the Gallic Wars against Caesar (during the first century BC) to recent terrorist attacks in France (at the opening of the twenty-first century), the French literary tradition is rich in texts that bear witness to war and speak out against its monstrous inhumanity. While war literature in France can be traced back to ancient and medieval texts on Vercingétorix, Charlemagne, William the Conqueror, and Joan of Arc, this course will focus specifically on literary representations of war during the nineteenth- and twentieth-centuries, from the Napoleonic Wars, to the First and Second World Wars, to the Algerian and Cold Wars, and the "War on Terror." Discussions will examine the impact of war on soldiers and civilians, patriotism and pacifism, history and memory; the implications of war as invasion and conquest, occupation and resistance, victory and defeat; the relationship of war to gender, sexuality, and ethnicity; and the role of war in colonialism and genocide. Readings to include novels, short stories, and poems by Balzac, Stendhal, Hugo, Rimbaud, Daudet, Maupassant, Zola, Cocteau, Wiesel, Duras, Camus, and Fanon. Films to include works by Resnais, Renoir, Carion, Jeunet, Malle, Angelo, Pontecorvo, and Duras. *Conducted in French.*

This course will offer an introduction to the burgeoning interdisciplinary field of sexuality studies in part through examining historical, legal, literary, filmic, cultural studies, sociological, and popular texts, as well as work done under the umbrella of queer theory. It explores the role of race, class, religion, science, region, and nation in the construction of modern gender and sexual identities and in the lived experiences of dissident genders and sexualities. We will examine a range of issues, including histories and strategies of resistance; transgender and intersex theory and activism; critiques of the white racial hegemony of lesbian and gay studies; the consequences of gay marriage; the politics of AIDS and its theoretical implications; globalization and sexuality; the rise of queer visibility and its relation to commodity culture; and recent conceptualizations of homonormativity. The goal of the course is not to achieve any kind of political or intellectual consensus, but to have rigorous debate over some of the key issues in queer studies.

Questions to be covered include: How does the family function as an economic unit? How do individuals allocate time between the labor market and the household? How have changes in family structure affected women's employment, and vice-versa? What are possible explanations for gender differences in labor force participation, occupational choice, and earnings? What is the role of government in addressing gender issues in the home and the workplace? How successful are government policies that primarily affect women (e.g., AFDC/TANF, parental leave, subsidization of child care)? The course will focus on the current experience of women in the United States, but will place these gender differences in a historical and cross-cultural context.

Colorism, skin color discrimination where light skin is privileged over dark skin, is not a new phenomenon, but globally entrenched in our society and one of the many vestiges of white supremacy. For Black Americans of all backgrounds, colorism is a familiar and a living legacy concretized by the institution of slavery in the Americas. Although some believe that we are "post-color," similarly to those that naively believe we are "post-race," one can look to the recent example of misogynoir (misogyny directed at Black women) and skin color politics that Meghan Markle, the Duchess of Sussex, has faced at the hands of the British Monarchy, that her light-skinned color, biraciality, and class privileges couldn't protect her from. Alternatively, we can look at the numerous examples of colorism and anti-Black racism that tennis icon Serena Williams is subjected to because of her dark-brown skin complexion and body shape. One cannot fully understand the issue of colorism without understanding that it is an outgrowth or an extension of anti-Black racism firmly rooted in white supremacy, and so insidious that it impacts all aspects of Black life. Examining colorism through literary texts and music, provides a depth of understanding that both compliments and expands these empirical studies. Literature and music provide the narratives and rhythm that paint a vivid picture of the many ways that colorism impacts the lives of Black people. Through the methods of literary and rhetorical criticism we will examine the works of five Black women authors and music artists that take up issues around colorism and passing. We will explore, Toni Morrison's, *The Origins of Others* (2017), Brit Bennett's, *The Vanishing Half* (2020), Tressie McMillian Cottom's, *Thick* (2019), Marita Golden's, *Don't Play in the Sun* (2004), Yaba Blay's, *One Drop: Shifting the Lens on Race* (2021), Nina Simone's, "Four Women" (1966) and "Young, Gifted and Black" (1958), Sara Martin's, "Mean Tight Mama" (1927), India.Arie's, "Brown Skin" (2001), Azealia Banks' "Liquorice" (2012), and Beyoncé's "Creole" (2012), "Formation" (2016) and "Brown Skin Girl" (2020). By examining colorism in both literature and music, it will give first year students a foundational and nuanced understanding of skin tone bias and equip them with the tools to critically engage literary and music texts.

**Requirements/Evaluation:** Three, short papers (4-5 pages) discussing aspects of the readings and songs; three response papers to tutorial partner's papers (2 pages long); two, video essays; two, Twitter threads explaining aspects of one of the books and one of the songs; and a curated playlist of songs that would serve as accompaniment to one of the texts from the class.

#### **Secondary Cross-listing**

The practice of colorism, or skin color discrimination, is very familiar to people of color globally. Often described as intra-racial racism, colorism within

the Black American context is part of the colonial legacy of institutionalized slavery where the vestiges of white supremacy have created color castes among Blacks that still, to this day, have serious consequences for those on the darkest end of the color spectrum. The impact of this practice is far-reaching, influencing everything from romantic partnering, economic and educational attainment, and perceptions of beauty, attractiveness, and criminality. Although the vast majority of colorism scholarship is empirically based, there is much that we can glean from a literary investigation of this practice by analyzing the works of renowned writer, theorist, and folklorist Toni Morrison. Her work is particularly useful in examining issues of skin color, as this topic has been persistent yet underexplored in Morrison's writings. Employing the methods of literary and rhetorical criticism, this tutorial will investigate five Morrison novels, *The Bluest Eye* (1970), *Sula* (1973), *Song of Solomon* (1977), *Love* (2003) and *God Help the Child* (2015), and some of her non-fiction writings. In our discussions of each text, we will examine the problem of the "color complex" at the intersections of race, gender, sexuality, class and sexual violence, and how the characters manage these overlapping issues. We will bring the novels into conversation with social science articles on the practices of colorism in daily life. Because the tutorial blends different kinds of investigations into colorism, it will equip first year students with tools to critically engage and interrogate fictional literature; help them identify the real and nuanced ways that color discrimination affects Black communities; and consider how Morrison, one of our foremost writers, bridges literary creativity with ethnographic observation.

#### **Primary Cross-listing**

In this course, we explore cultural texts that attempt to come to terms with--or exploit--the revolution in contemporary genetics with a particular focus on gender, race, class, and sexuality. The mapping of the human genome in 2001 opened incredible opportunities for medicine, law, and society, but it also, as Alice Wexler has written, "opened a vast arena for contests of power over what it means to be human, who has the power to define what is normal, [and] who has access to what resources and when." Wexler was writing before the final sequencing of the human genome. Now we have CRISPR technology, ushering in a new, more pressing set of ethical concerns. We are currently in the midst of a "global race to genetically modify humans," as the anthropologist Eben Kirksey has documented in his new book *The Mutant Project*. How will we come to define the human? Who gets to decide? Our writers and filmmakers make clear that genetic medicine cannot be thought apart from a profit-driven American health care system or family and gender dynamics. Joanna Rudnick's documentary *In the Family*, for instance, explores the personal and political issues associated with hereditary breast cancer and the patenting of genes. Octavia Butler's Afro-futurist novel *Dawn* explores black female sexuality, reproduction, and the survival of the species in her character's encounter with a genetically enhanced alien species. The film *Gattaca* shows us a fully realized dystopian society where genetically modified humans are the norm--a society that now "has discrimination down to a science." The transgender artist Tamara Pertamina, on the other hand, "hopes to decolonize the science of genetic engineering," as Kirksey has written, with her performance artist projects. Our texts come from a number of different genres, including the memoir, science fiction, film, documentary, art, and non-fiction writing at the intersections of science, medicine, philosophy, anthropology, and law.

Although some protest that the U.S. is heading toward European-style socialism, social welfare programs in the U.S. differ in important ways from those in other wealthy and democratic nations. This course focuses on the adoption and development of policies to address poverty and inequality in the U.S. The issues we will explore include: What is poverty, and how do Americans perceive its dangers to individuals as well as the political community? What economic, historical, and sociological theories have been advanced to explain poverty? Why has the U.S. adopted some approaches to reduce poverty but not others? What enduring political conflicts have shaped the U.S. welfare state?

**Cross-listings:** WGSS 211 ECON 105

**Primary Cross-listing**

This course will present a feminist economic analysis of the global economy, and some of the urgent issues facing women in the Global South. The course will start by developing theoretical resources: these will include feminist critiques of economic theory, work on care labor and the shifting boundaries between markets, governments, households and the environment, and discussions of intersectionality and difference. Then we will discuss a series of interlinked issues which may include the contradictory effects of structural adjustment and its successors; the informal sector and global value chains; the economics of sex work and global sex trafficking; climate change; and migration. We will finish by looking at community-based activism, non-governmental organizations, and the possibilities for North/South alliances.

### **WGSS 213 (S) Race, Gender, and the Alien Body: Octavia Butler's Science Fiction**

**Cross-listings:** STS 213 WGSS 213 AFR 213

#### **Secondary Cross-listing**

Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947-2006) is among the most highly regarded science fiction writers. Butler's uncanny ability to imagine the future anew and to merge those ruminations with her experiences as an African American woman provide powerful commentary on—and often disrupt—modern understandings of race, gender, and human embodiment. We will explore questions such as: What role does 'gender' play in Butler's fiction? How does Butler's treatment of the 'alien' cause us to reconsider what it means to be human? How does Butler incorporate 'race' and the concept of 'other' into her fiction, and how do these techniques help us situate contemporary discussions of a post-race society? We will examine the relationship between Butler's visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best-selling text *Kindred* (1979), the haunting dystopian novel *Parable of the Sower* (1994), the popular vampire text *Fledgling* (2005), and the collection *Bloodchild and Other Stories* (1996). We will also explore contemporary engagement with Butler's work including the relationship between the main character from her book *Dawn* (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler's work broadly, and with particular attention to how the concepts 'race,' 'gender,' 'alien' and 'body' are interrogated in her writings.

**Cross-listings:** COMP 257 GBST 213 WGSS 214 RUSS 213

### Secondary Cross-listing

Since Vladimir Putin's rise to power, the media has highlighted events in Russia that at first glance resemble oddly sexualized jokes. At the same time that the Kremlin has reinstated authoritarian policy reminiscent of the Soviet Union, the Western press has chronicled Putin's topless vacations in Siberia, protests by the feminist collectives Pussy Riot and Femen, a 2011 ban on women's lacy underwear, federal legislation from 2013 prohibiting "homosexual" propaganda, and a 2017 court decision that outlawed a meme of Putin as a "gay clown." This course examines the Putin regime's ongoing attempts to police gender expression and private sexual behavior, as well as how Russian citizens' performance of gender and sexuality has changed in the past twenty years. We will consider gender and sexuality as distinctive features of Putinism, which have contributed to a biopolitical turn in official policy and inspired resistance and protest among Russian feminists and queers. *All readings will be in English, and all films will have English subtitles.*

### WGSS 216 (F) Women Behaving Badly: Deviant Women in Early Modern French Literature (DPE)

**Cross-listings:** RLFR 216 WGSS 216

### Secondary Cross-listing

Female deviance often implies resisting a dominant and oppressive patriarchal status quo embedded within cultural and historical backgrounds. This course explores female characters in early modern French literature who refuse to conform to established gender roles. Defying social constructs of femininity, through either judicious negotiations or more aggressive and violent behavior, is an important trope in the writings of both male and female authors of the seventeenth and eighteenth centuries. What constitutes deviant behavior, however, depends on social definitions of gender roles, which evolve over time. In this course, we will first examine women's place within the historical and socio-cultural context of the *Ancien Régime*, which will lead to an examination of female behavior censured during the seventeenth and eighteenth centuries. We will then reflect on how we, as modern readers, perceive such deviancy at it relates to the past. Finally, we will discuss the relevance of studying deviant women in light of current events, such as the #MeToo movement, which has led to a new level of consciousness and empathy for the plight of marginalized groups. Potential readings to include Corneille's *Médée*, Madame de la Fayette's *Princesse de Clèves*, Laclos's *Liaisons dangereuses*, and Isabelle de Charrière's *Lettre à Mistriss Henley*.

**Requirements/Evaluation:** active class participation, one presentation (8-10 minutes), three to four papers (3-5 pages), and a longer final paper

**Secondary Cross-listing**

The purpose of this course is to explore the unexpected recent confluence of the American and Russian far-right movements, among advocates for authoritarianism in both countries who have traditionally understood the 'other' superpower to be an implacable enemy. How have nationalist movements in the United States come to see the Russian Federation as a vanguard for 'whiteness' and traditional masculinity in European identity, overturning the perception of Russia as a racial Other that was prevalent among American conservatives during the Cold War? What are the affinities between the imperial and openly patriarchal aspirations of Putinism and the goals of American religious Reconstructionism, with its interpretation of the Confederacy as a God-given model for racial separatism and gender complementarianism? We will discuss repressive historical legacies and homophobia in both countries, devoting particular attention to debates about protest art and the removal of monuments, and to movements that situate themselves in opposition to neoliberal forms of ethno-nationalism.

**Requirements/Evaluation:** On average, there will be 100 pages of reading per week. Over the course of the semester, students will be required to view three films, which will be discussed in class. From the early twentieth century to the present day, the radical changes in the lives of Spanish women have clearly reflected the tug of war between progress and tradition in recent Spanish history. The dramatic upheavals in Spanish politics have marked and transformed the lives of women to such a great extent that one can often gauge the political and social climate of any given historical moment by considering how the role of women was defined by the law, the Catholic church, education, and other social and political institutions. Using literary and historical texts as well as films, newspapers and other media, this course will look at the transformations in the public and private lives of Spanish women during the following periods: the turn of the century, the Second Republic, the Spanish Civil War, the Franco years, the transition to democracy, and the present day.

Secondary Cross-listing

This course posits that the dancing body is a particularly rich site for examining the history of gender and sexuality in America and beyond. The aim of the course is to explore ideas related to gender and sexuality as prescribed by dominant cultural, social, and religious institutions, and how dance has been used to challenge those normative ideologies. We will examine a wide range of dance genres, from stage performances to popular forms to dance on television, with particular attention to the intersections of race and class with gender. This is primarily a discussion-based seminar course and will also include film screenings, discussions with guest artists, and opportunities for creative projects. No previous dance experience required.

**Cross-listings:** PHIL 228 STS 228 WGSS 228

Secondary Cross-listing

In this course we will explore the ways in which feminist approaches to moral thinking have influenced both the methodology and the content of contemporary bioethics. The first portion of the course will address the emergence of the "Ethics of Care," critically assessing its origins in feminist theory, its development within the context of the caring professions, and its potential as a general approach to bioethical reasoning. The second portion of the course will use feminist philosophy to inform our understanding of the ways in which gender structures the individual's interactions with the health care system. To do this we will explore topics that might traditionally be considered "women's issues" in healthcare, such as medicine and body image (e.g., cosmetic surgery, eating disorders), reproductive and genetic technologies, and research on women and their health care needs. In addition we'll also look at feminist analyses of topics that traditionally have not been regarded as "gendered," such as resource allocation and end of life issues.

**WGSS 231 (S) Art, Life, and Death: Locating Women in Italian Renaissance Art (WS)**

**Cross-listings:** ARTH 231 WGSS 231

Secondary Cross-listing

Renaissance art is the stuff of blockbuster museum exhibitions, mass tourist pilgrimage, and record auction prices. From our modern vantage point, the cultural accomplishment of the 15th and 16th centuries in Italy clearly has the ability to astound. Calling to mind the inimitable imagination of

Botticelli, the scientific genius of Leonardo, or the superhuman creativity of Michelangelo brings into focus an inspiring narrative of individual accomplishment, innovation, and progress (ideals we easily understand and may well share). This is an important story we still tell of human achievement. This tutorial explores a critical question: where are the women in this narrative? Women were not typically artists, so how might we bring their roles, force, and power into focus? To do this, we will turn away from the grand historical narrative we so easily recognize and enter a more foreign world: a realm of everyday experience in which art-never created for its own sake-was powerful, and mattered to people. Art shaped realities and mediated the fundamental questions and of life and death, from power, sexuality, love, desire, and self-definition, to mortality and communion with divinity. When we approach Renaissance art on its own terms, our picture expands to include women, their lives, and what they themselves wanted to see. In addition to secondary scholarship, we will pay close attention to primary sources (including images themselves), giving students ample chance to forge original arguments: one of the central goals of the tutorial.

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media and ask the crucial question: do Muslim women need saving? We will then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism--the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam around women, gender, and sexuality and on Muslim women's own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.

From fear of the Shari'a to its implementation in so called "Islamic countries," Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari'a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

### **WGSS 244 (F) Actually Existing Alternative Economies (DPE)**

Capitalism has a way of constricting our imaginations so that we come to believe the only possible form of economic institution is one based on profit seeking, competition and individualism. However movements in countries including Brazil, France, Canada and Spain--and now parts of the U.S.--are demonstrating otherwise. Theorists, practitioners and social activists are adopting labels including 'Solidarity Economy' and 'New Economy' to group together economic activities based on ideals of human provisioning, social justice and environmental sustainability. They point out that many of these activities are already taking place and are often crucial to our lives, but are rendered invisible by economic theory. In the words of Brazilian popular educator and economist Marcos Arruda, 'a solidarity economy does not arise from thinkers or ideas; it is the outcome of the concrete historical struggle of the human being to live and to develop him/herself as an individual and a collective.' Feminist geographers Julie Graham and Katherine Gibson developed practices of 'mapping' local economies with communities in Australia and Western Massachusetts in ways that bring to light the invisible resources and practices of provisioning and solidarity, and challenge what they describe, drawing on the work of feminist theorist Sharon Marcus, as a 'script' of local helplessness to resist the 'rape' of their economies by the forces of global capitalism. Do these proposed discursive practices actually present realistic possibilities for producing sustained economic change? In this tutorial we will learn and debate about some of the activities being named and built under the label of solidarity economy, such as the networks of worker-owned cooperatives in Mondragon, Spain, the growth of local currencies and time exchanges, fair trade organizations and different ways of organizing care work. We will look at some of the history and debates around worker-owned cooperatives, ranging from Victorian England through African-American experiences throughout the 20th century and examples in post-Independence Africa, to the recent establishment of Cooperation Jackson in Jackson, Mississippi. The ILO has argued that co-ops are a particularly appropriate form to African development. Is this plausible, and what role might they play in AIDS-affected communities? Why has the recent U.S. growth of the solidarity economy been so concentrated in communities of color, and how is it gendered? We will visit some examples in New York or Boston.

**Requirements/Evaluation:** six papers of 5-7 pages, six written responses to partner's papers, participation in tutorial discussion

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** open to sophomores and above

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** The course fulfills the DPE requirement because of its central focus on the diversity of economic institutions within and across countries and the power imbalances that call them into being and challenge some of their survival. The course considers ways the hegemonic discourse of economics tends to render that diversity invisible, and tools, both analytical and activist, for bringing it out into view. It teaches tools to evaluate economic institutions in terms of equity and solidarity.

This tutorial considers India's multiple and intersecting identities, in relation to climate emergencies, resource scarcities, and ongoing struggles for power and status across very different parts of India. We examine the intersectional identities that produce solidarity and opposition within landscapes always already structured by power and inequity. How do communal and individual identities such as gender, class, caste, sexuality or religion shape social conflict and ongoing struggles for power in India today? We examine key moments in Indian history that continue to produce social conflict and fluidity such as Partition, the riots in Gujarat, Hyderabad, and Delhi that have shaped the modern landscape of communal identity, as well as the contested border such as Ladakh as well as Jammu & Kashmir. Our readings will include ethnographic, sociological, historical fiction, and oral history. Students choose their own topics to delve into for final weeks of the semester.

**Class Format:** Meeting weekly in pairs with tutorial partner to discuss texts and student essays.

**Cross-listings:** MUS 278 WGSS 248

Secondary Cross-listing

The story of the gypsy *femme fatale* Carmen has endured for over 150 years. In Western culture and beyond, she exemplifies the seductive, exotic, independent, and dangerous woman who drives an upstanding man to a life of crime and finally murder. This course explores a broad array of treatments of this archetypal and problematic narrative, starting with Prosper Mérimée's 1845 novella on which Bizet based his famous 1875 opera *Carmen*. We will consider various staged and film versions of the opera itself, including Francesco Rosi's stunning 1984 movie, and discuss various other film transformations of the story, from DeMille's 1915 silent film through Hammerstein's 1954 all-black musical *Carmen Jones*, to the MTV version *A Hip Hopera* of 2004. Comic approaches will also be assessed, from Charlie Chaplin's *Carmen Burlesque* of 1915 through Spike Jones' 1952 *Carmen Murdered!* and *The Naked Carmen* of 1970. We will explore provocative dance interpretations ranging from Carlos Saura's 1983 flamenco version through David Bourne's choreography in his 2001 gay reading called *The Car Man*. Our journey concludes with a comparison of two post-colonial sub-Saharan African films--the Senegalese director Ramaka's *Karmen Gei* (2001) and *U-Carmen eKhayelitsha* (2005) by the South African director Dornford-May--that push critical reaction to Bizet's story and music beyond Western cultural boundaries.

**Class Format:** After four initial 75-minute group meetings to discuss Mérimée's novella and Bizet's music, students will meet with the instructor in pairs for one hour each week. The scheduled class time is obligatory only for the first two weeks, after which weekly pair meetings will be individually scheduled.

**Requirements/Evaluation:** Each student will write a 5- to 6-page essay every other week (five in all), and provide 2-page written and oral peer reviews in alternate weeks; evaluation will be based on the quality of written work, discussions, and oral presentation.

**Prerequisites:** None; ability to read music useful but not necessary

**Cross-listings:** ENGL 253 WGSS 250 THEA 250

Secondary Cross-listing

What makes a work of theatre feminist? How do plays, social practices, and performances engage with different models of feminism: liberal, radical, materialist, intersectional, reluctant? Why has feminism mattered to theatre makers of the past? Should it still matter to us now? If so, what forms might future feminist theatres and performance practices take? In this tutorial, students will work in pairs to examine the political relation of models of feminism to plays and performances by theatre artists, companies, and collaboratives from across the globe, from the late-twentieth century to today. Interrogating feminism's own legacies of exclusionary and biased tactics, we will focus on the racialized and class-based aspects of feminist performance practices and the history of radical and intersectional feminism in theatre. Artists, companies, and movements to be considered may include: Spiderwoman Theatre, The WOW Café, Hélène Cixous, Adrienne Kennedy, Caryl Churchill, Sphinx Theatre Company, Wendy Wasserstein, Ntozake Shange, Griselda Gambaro, Manjula Padmanabhan, Cherríe Moraga, Karen Finley, Suzan-Lori Parks, Young Jean Lee, Lisa Kron, Tori Sampson, Arethusia Speaks, Women's Project and Productions, Sarah DeLappe, and others. Close reading and analysis of source material will occur alongside engagement with critical essays and writings by: Audre Lorde, Judith Butler, bell hooks, Gloria Anzaldúa, Kimberlé Crenshaw, Eve K. Sedgwick, Gayatri Spivak, Jill Dolan, Sue-Ellen Case, José E. Muñoz, and Donna Haraway. This course will follow a standard tutorial format, with students alternating the presentation and reading of a series of 5-page papers.

**Requirements/Evaluation:** students will meet with instructor in pairs for an hour each week; they will write a 5-page paper every other week (five in all), and comment on their partner's papers in alternate weeks; emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and critical written and oral response

**Prerequisites:** none

**WGSS 251 (F) Arab Women Memoirs: Writing Feminist History (DPE) (WS)**

**Cross-listings:** WGSS 251 COMP 252 ARAB 252

**Secondary Cross-listing**

This course reviews selected autobiographical writings by Arab women writers from the wave of independence in the 20th century to the contemporary Arab uprisings, passing through all the transformations that globalization and the technosphere have instigated. We will examine the role that first-voice narrative plays in shaping literature, history and thought, while providing a space to reclaim cultural, social and political agency. Focusing on the different articulations of self-representation, our discussion will address how these women reflect on the shifting discourses of identities, gender, nationalism, religion, feminism, sexuality, politics, borders and their histories. Questions we will address include: How did these memoirs contribute to the development of Arab feminist consciousness? In addition to the memoirs, we will look at women's blogs and watch films that focus on first-person narrative to discuss related topics, such as, visual testimonies, virtual political participation and feminist resistance in the technosphere. Required texts may include: Fadwa Tuqan (*A Mountainous Journey: An Autobiography*), Fatima Mernissi (*Dreams of Trespass: Tales of a Harem Girlhood*), Radwa Ashour (*The Journey*), Fadia Faqir and Shirley Eber (*In the House of Silence: Autobiographical Essays by Arab Women Writers*), and Assia Djébar (*Fantasia*), as well as critical essays and selections from autobiographical writings that reflect the diversity of Arab women in the Middle East and the diaspora.

**Requirements/Evaluation:** students will write the following: three response papers (2-3 pages), at least 6 journal entries (300 words per entry) and a final analytical research essay (7-10 pages). They will have a final performance project.

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Arabic Studies majors

**Writing Skills Notes:** In addition to writing several short papers, a final research paper, a reflection on their final performance project, students will write six journals. The combination of research writing, personal reflection echoes the creative non-fiction genre of the course. It also provides students with the opportunity to reflect on forms of history/memory writing.

**Difference, Power, and Equity Notes:** Gender inequality, sexism, and the intersection of colonialism, nationalism and capitalism are the heart of this course. The memoirs of Arab women writers from the late 19th century to the present continue to depict the history of women's movement and the struggle for women's rights in the Arab-speaking world while addressing the different hierarchies of power and domination that regulate them to second class citizens. Students will learn DPE vocabulary and critical terminology.

**WGSS 255 (S) "Illness" in Modern and Contemporary Chinese Literature and Culture (DPE)**

**Cross-listings:** COMP 254 CHIN 253 WGSS 255

**Secondary Cross-listing**

From early modern anxieties about China's status as the "sick man of Asia" to contemporary concerns regarding the prospect of transnational pandemics, "illnesses" and their related stories have played a critical role in making and contesting individual psychologies and Chinese modernity in the 20th and 21st centuries. Actual illnesses, from tuberculosis to AIDS to the Novel Coronavirus, constitute not only social realities that trouble political and popular minds in their own right; but further provide powerful metaphors for exploring issues of human rights, national identity, and transnational circulation. This course examines how Chinese literature in the 20th and 21st centuries writes and visualizes "illness"--a universal human experience that is nevertheless heavily bounded by culture and history. Specifically, we examine the cultural and social meaning of "illness"; the relationship between illness on the one hand, and the politics of body, gender, and class on the other; we ask how infectious disease, and mental illness are defined, represented, and understood in both male and female writers' analytical essays and fictional writings in the 20th century; we examine how metaphorical "illness" such as infectious cannibalism and fin-de-siècle "viruses," are imagined and interpreted by key culture figures ranging from the founding father of modern literature (Lu Xun), to the winner of the 2012 Nobel Prize in Literature (Mo Yan). Throughout the course, we will focus on the interplay between literature canons (fictions, essays, and dramas) and popular media and genres: blockbuster cinemas and art house films, popular novels, photographs and posters, etc.

**Class Format:** All regular course meetings will be conducted in person.

**Requirements/Evaluation:** Evaluation will be based on 1) ACTIVE in-class discussion; 2) Publishing GLOW Discussion posts based on reading (Graded as Complete or Incomplete); 3) three short papers (3-5 pages); 4) the final project (including an abstract, a presentation, and a paper or other form of project).

This course examines one of the most important concepts in the analysis of sex and gender and efforts to envision sexual and gender justice; the concept of power; from multiple feminist perspectives. At the core of feminism lies the critique of inequitable power relations. Some feminists claim that power itself is the root of all evil and that a feminist world is one without power. Others portray the feminist agenda as one of taking power, or of reconstructing society by exercising a specifically feminist mode of power. In this course, we will look at feminist critiques of power, how feminists have employed notions of power developed outside of the arena of feminist thought, and efforts to develop specifically feminist ideas of power. Along the way, we will ask: Are some concepts of power more useful to feminism? Can certain forms of power be considered more feminist than others? How can feminist power be realized? Thinkers we will engage include Judith Butler, Audre Lorde, Catherine MacKinnon, Hannah Arendt, and Patricia Hill Collins.

Short writing assignments like the proposal, outline, and abstract build on one another and culminate in a final essay that goes through the process of drafting and, after peer and teacher review, revision.

**Difference, Power, and Equity Notes:** This course requires students to focus on what power does and should look like from the perspective of

difference, exploring the relationship between power and equity in the process. Students will reflect on and discuss the working of power in their own lives, why certain forms of power are more or less visible to particular groups, and how different ideas about power promote different interests in society at large.

### **WGSS 261 (S) Lost Voices of Medieval and Renaissance Women (WS)**

**Cross-listings:** MUS 261 WGSS 261

#### **Secondary Cross-listing**

Remarkably few female voices from the first 1500 years of music in the West are audible today; most of the extant music and poetry of these centuries was composed by men to communicate male perspectives on matters worldly and divine. In this course we will listen to the experiences and viewpoints of medieval and Renaissance women as expressed through their poetry and song. We will ask how these women, whose lives were shaped either by the requirements of monastic culture or by the complex dynamics of aristocratic court culture, negotiated their places and made their voices heard within the patriarchal society of their time. We will examine how the contrasting environments of church and court informed the different outlooks, ideas, and aesthetics expressed in the words and music of their songs. Along the way, we will critically assess how these lost voices have been recreated to speak to us today through recordings and film. Our exploration begins in Byzantium and travels through Germany to France, Spain, and Italy. Along the way we encounter the Greek chant of the 9th century Byzantine abbess Kassia, the Latin poetry, chant, and sacred music drama of the 12th century German polymath St. Hildegard of Bingen, and the elegant poems and courtly melodies of the Countess of Dia and Queen Blanche of Castile in 12th and 13th century France. Heading south, we explore 14th century sacred polyphony at the royal convent of Las Huelgas in northern Spain, and voyage cross the Mediterranean to sample the lively musical life of 15th and 16th century cloistered female communities in northern Italy. We conclude our journey with a comparison of three remarkable 16th century women: the archduchess Margaret of Austria, Governor of the Hapsburg Netherlands, and poet-composer of French chansons; Sister Leonora d'Este, an Italian princess who spent her life enclosed in a Venetian convent, and likely authored a collection of anonymous Latin motets; and Maddelena Casulana, a northern Italian composer of madrigals, and the first woman to publish music under her own name. Her introduction to her first book of madrigals encapsulates the aim of this course: "I want to show the world, as much as I can in this profession of music, the vain error of men that they alone possess the gifts of intellect and artistry, and that such gifts are never given to women."

Indigenous women, Two Spirit and trans people have always stood on the frontlines of decolonization struggles in the Americas, from treaty negotiations to self defense against settler invasion, to the Standing Rock Sioux struggle against the Dakota Access Pipeline, to creating independent databases and mutual support networks amongst the loved ones of Missing and Murdered Indigenous Women, Girls, Trans and Two Spirit people. This course maps out some of the intellectual and political interventions of Indigenous feminists in analyzing and struggling against genocide, heteropatriarchy, conquest and racial capitalism in settler states like the US and Canada. This course will focus on how Indigenous women, Two Spirit and trans people have analyzed and struggled against the imposition of colonial constructs of gender and sexuality that mark Indigenous lives and

lands as sites of extraction. It will examine how carceral regimes of control produced by the intertwined histories of conquest and Transatlantic slavery have been imposed upon Indigenous lives through the child protection system and the prison industrial complex. Students will be invited to consider how Indigenous feminist practices 'make a future' (Brant 1981) against and beyond the settler state. This course aims to familiarize students with historical and contemporary Indigenous feminist works, as well as provide an overview of Indigenous feminist political formations, poetry, fiction, and making practices. Pedagogically, this course will also facilitate the development and sharpening of skills in social analysis, writing and argumentation.

The world's got problems. These problems don't respect national boundaries. This class looks at how activists have engaged across borders and with transnational institutions in order to address transnational problems like class inequality, sexism, homophobia, climate change, and more. It asks: what are the different forms that transnational activism takes and how have transnational activists advanced their goals? Why and how have transnational activists' efforts failed? What are the practical and ethical difficulties associated with transnational activism? What does ethical transnational activism look like, and can it also be effective? While focusing especially on the role of transnational activism in combating sex and gender-based inequities, we will also engage with activism that targets the other axes of oppression with which sex and gender-based oppressions are inextricably entwined.

Since the 1980s, performance studies has emerged as an interdisciplinary field of inquiry, with origin tales in theater and anthropology, in communications and philosophy. What might theorizing "performance" as mode, analytic, and object of study have to offer scholarship in the interdisciplinary humanities? In this seminar, we will read texts formative of performance studies, paired with multimedia performance examples, where performance speaks to staged theatrics as well as the presentation of everyday life. We will ask, how are race, gender, sexuality, and nation produced as the effects of legal, political, historical, social, and cultural scripts? And--an important partner question--how do discourses and practices of race, gender, sexuality, and nation in fact produce legal, political, historical, social, and cultural effects? This seminar is an introduction to performance studies, an interdisciplinary field in conversation with theater studies, gender studies, anthropology, philosophy, literary theory, visual studies, dance studies, ethnic studies, queer theory, and postcolonial studies. Students will study and experiment with performance while reading theoretical texts to grapple with concepts including ritual, restored behavior, performativity, mimicry, liveness, the body, objecthood, archive, movement, matter, and affect.

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

This tutorial provides students with the chance to investigate in-depth three of the most astonishing works of art created during the entire Middle Ages: the Bayeux Tapestry (c.1077-1082), the Cappella Palatina (c.1130s-1166), and the Psalter of Christina of Markyate (1120s-1160s). Created within a hundred years of each other all within territories controlled by the Normans--a warrior dynasty that settled in northern France in the 10th century and then expanded north into England and south into Italy in the 11th and 12th centuries--each of these works is unprecedentedly ambitious in scale, dazzling in its material properties, and survives in its original wholeness, a rarity in the medieval world. Despite these similarities, however, each work is very different from the other two and so sheds light on very different aspects of Norman experience, across Europe. The Bayeux Tapestry, likely made by female embroiderers for a baronial hall, is a giant textile (over 70 meters long) that in gruesome and fascinating detail tells the story of the Norman invasion of England by William the Conqueror in 1066. The Cappella Palatina in Palermo, in turn, commissioned by King Roger II, is a royal chapel covered in sumptuous mosaics that reveals through its decoration and ritual the dynamic interaction of Islamic, Byzantine, and Latin Christian traditions in the multicultural Norman kingdom of Sicily in the 12th century. And the Psalter of Christina of Markyate, a large prayerbook made for the use of a female recluse in southern England, contains 40 full-page paintings and 215 decorated initials, a vast and inventive program of imagery that through its creative profundity helped reshape private devotional art and culture for centuries to come. Through their variety, then, these three objects--an embroidery, a building, and a book--give students insight into the rich array of concerns and aspirations, from the political to the spiritual and from the public to the private, that gave substance and meaning to 11th- and 12th-century European life, for women as well as men. What is more, these three remarkable works of art have been the focus of much interesting scholarship in recent years, so an exploration of some of that literature provides a compelling introduction to the discipline of art history itself, past and present.

To loosely paraphrase the feminist Emma Goldman, "If I can't dance, I don't want to be part of your revolution." Designed for intermediate/advanced ballet dancers, in this course students will explore different topics in past and current ballet history through the lens of famous ballets, dancers, choreographers, etc. In Fall 2019, we will focus on some of the notable female figures in the world of ballet: while ballet is often perceived as a primarily "female" art form--and indeed, there are many more females vying for positions in ballet companies than males--historically, women have held far fewer leadership positions than men, and have had fewer choreographic opportunities. In addition to technique classes, variations and/or ensemble

sections from selected ballets will be taught and coached to students. This is primarily a studio course, although readings relevant to our coursework will be assigned. These assignments will offer historical context, as well as provide rigorous looks at some of the ways in which ballet hasn't always lived up to its potential as a dance form for all people regardless of class, race, and gender. We'll consider basic information-the plotlines of the ballets-as well as more subtle ideas-famous dancers' takes on these roles, the socio-political aspects of the works themselves and the times they were created in. Viewings will also be assigned to allow students to fully explore and grasp the ballets and to provide additional contextualization. Students will submit (informal) written responses to the assignments. The class may go on one or two field trips to attend performances and will write response papers when applicable. This course MAY BE REPEATED for general academic credit (but not for additional WGSS major credit). ANY student with adequate prior training is welcome to this class! Material will be introduced at an intermediate/advanced level, and individuals will be assessed on their own personal progress.

**Requirements/Evaluation:** quality of participation and progress (throughout the semester) in classes, rehearsals, presentations, and assignment responses

This course examines various forms of sexual labor around the world in order to better understand how gendered and sexual performances are used in a variety of cultures and contexts for material benefit. Our topics include "traditional" forms of sex work such as street prostitution, pornography, and escorting as well as other forms of sexualized performances for benefit such as stripping or camming. We also discuss current issues and debates about discourses of "sex trafficking." Course readings come from a range of fields, but focus most heavily on anthropology, sociology, American studies, and gender studies. The readings for this class will frequently foreground the lived experiences of sex workers from a variety of nations, races, classes, religions, and backgrounds in order to explore the broader social implications of our subject matter. The format is largely discussion-based, with short lectures supplementing the reading with summaries of current scholarly and activist debates. We have a variety of guest speakers to share their diverse lived experiences related to this topic.

**Requirements/Evaluation:** midterm essay exam, short quizzes, participation, Marco Polo video chat posts

**Secondary Cross-listing**

In postwar West Germany, a thorough examination of the Nazi past took a backseat to economic recovery and repairing the country's international standing, whereas to some extent the reverse was true for the East. An authoritarian democracy, an emphasis on consumerism and the qualitatively different experiences of younger generations led them to question whether the Federal Republic was a restoration or a new beginning? In the East, the cold war led to an increasingly Stalinist interpretation of communist principles, while communist ideals were upheld as an antidote to Nazism and the new materialism. This tutorial will cover a wide range of social protest as reflected in literature and film of the two Germanies: critical responses to the Holocaust in the two countries, the 1968 student revolution, anti-capitalist terrorism by the Baader-Meinhof gang, the feminist and gay rights movements, reformers and repression under Ulbricht and Honecker in the GDR, minority rights and environmental activists. Authors will include: Peter Weiss, *Die Ermittlung*, Heinrich Böll, *Und sagte kein einziges Wort*, Gisela Elsner, *Riesenzwerge*, Emine Sevgi Özdamar, *Das Leben ist eine Karawanserei*, Volker Braun, *Unvollendete Geschichte*, Alice Schwarzer, *Der kleine Unterschied und seine großen Folgen*, Christian Kracht, *Faserland*, Thomas Brussig, *Wasserfarben*. Films may include: Gerhard Klein, "Berlin-Ecke Schönhauser," Ulrich Plenzdorf, "Die Legende von Paul und Paula," Rainer Werner Fassbinder, "Angst essen Seele auf," Reinhard Hauff, "Messer im Kopf," Uli Edel, "Der Baader- Meinhof Komplex," Margarethe v. Gay men, including gay trans men, have organized themselves into various subcultures within their community for centuries. This seminar is devoted to exploring these subcultures in (a mostly US-context) in greater detail using ethnographic texts, anthropological studies, historical accounts (including oral histories), and media. Topics include cruising and flagging, the anthropological significance of gay bars, histories of bath house culture, rural vs urban queer experiences, the ball scene, drag, diva worship, the reclamation of "fabulousness and faggotry," the leadership roles of trans women and effeminate gay men in activist movements, gay gentrification, the growth of gay consumerism/ gay tourism/homonationalism, hierarchies of masculinity in the gay community (i.e., masc for masc culture), HIV/AIDS and the politics of PrEP, chemsex, the role of racialized dating "preferences," genealogies of BDSM and leather culture, sexual health and discourses of "risk," the politics of barebacking and other sexual practices, queering consent, and the effects of hookup apps on gay culture. In addition to lectures, and discussions, there will also be some low-key performance-studies based exercises in queer praxis (e.g., drag workshops, mock debates, animal improvisation, role playing, etc.)

What does feminist theory have to offer the study and practice of religion? How have participants in various religious traditions helped to produce and enact different kinds of feminist approaches to critique and transform religions? Feminisms and religions have a long though often troubled history of interconnection. In this course, we shall explore a range of feminist analyses that have either emerged out of particular religious contexts or have been applied to the study of religious traditions and practices. The course prioritizes attention to the intersections and interactions of gender, race, ethnicity, sexuality, and nationality (among other factors) with religion.

**Requirements/Evaluation:** weekly GLOW posts before class, one "position paper" for class discussion (3 pages), a research question with rationale for interest and potential action plan (1 page), exploratory research statement (2 pages), essay on interpretive approach to research project (3 pages), participation in writing workshop on 7-page early drafts of final papers, one 15-page final paper.

### **WGSS 308 (S) Parenting for a Feminist-Queer-Trans World (DPE)**

Perhaps you want to understand your own experience being parented; perhaps you are a parent, or hope to become one, and you want to reflect on your intentions; perhaps you want to understand what various scholars, activists, and activist-scholars have said about how parenting matters. This class will provide you with the time, information, and other resources necessary to explore the following question: what difference does it make when we put "feminist," "queer" and/or "trans" in front of parenting? More specifically, how do these modifiers change the forms and practice of parenting, ideally and in fact? What are the associated philosophies and structures that justify and enable these forms and practices? In this course, we will

conceptualize parenting in a capacious way, as a kind of ongoing relationship that can obtain not only between an adult and a child they are "raising," but also between adults who are not conventionally considered "related." The purpose of this class is threefold: 1) to enable you to develop your own parenting philosophy, 2) to use "parenting" as a window to explore differences in feminist, queer, and trans thought, and 3) to use "parenting" as a springboard for imagining better institutional arrangements and articulating societal ideals. To realize these goals, we will mine our experiences, talk to lots of parents, and engage both scholarly and popular resources on parenting.

**Requirements/Evaluation:** One 6 page book review; Three contributions to resource compendium; One episode for the group podcast; One 10 page final essay

**Prerequisites:** None

**Enrollment Limit:** 20

**Enrollment Preferences:** WGSS majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** We will be looking at the difference that understanding parenting differently, and/or practicing it with feminist, trans, and queer goals in mind does/might make in relation to the ends of equity and inclusion. We will also be attentive, however, to differences in ideas about what feminist, trans and queer parenting entails -- and how relations of power internal to groups make certain ideas about what feminist, queer, and/or trans parenting entails more accessible than others.

### **WGSS 309 (S) Feminist Disability Studies: Bodyminds in Place and Space (DPE)**

**Cross-listings:** WGSS 309 AMST 303

#### **Primary Cross-listing**

In this course we will engage anti-racist feminist theory, disability (or 'crip') theory, and human geography to think critically about disability. We will draw on critical geographies of disability to understand the built environment and institutional design; geographic scales of the body and the bodymind; spaces of the home and institutions; and im/mobility and spatial access. We will also consider how disability is shaped by (and shapes) practices of care and mutual aid; experiences of embodiment and impairment; and structures of vulnerability and agency. The course will trace, historically, how ableism has been produced through slavery, colonization, surveillance, and incarceration as well as through movements like eugenics and white liberal feminism. The course will also analyze disability's construction through medicalized notions of wellness, illness, pathology, and cure. Throughout the course, we will consider disability as intersecting with gender, race and ethnicity, queerness, trans\*ness, fatness, class, nationality, and citizenship. Most centrally, we will ask: What is the spatiality of dis/ability, and how can space be occupied and reappropriated for radically inclusive uses? How can we understand both normality and deviance as socially constructed concepts that nonetheless have real, and uneven, implications for people's lives?

**Class Format:** This class will be taught online only.

**Requirements/Evaluation:** Student participation; two short (2-pg) reflection papers; two longer (4-5-pg) papers; and a final (12-15 pg) research paper

**Prerequisites:** None

**Enrollment Limit:** 15

### **WGSS 311 (F) Trans Film and Media (DPE)**

**Cross-listings:** AMST 364 WGSS 311

#### **Primary Cross-listing**

This course provides an introduction to contemporary trans culture and politics via the lens of film and other (mostly visual) media. We'll focus mainly on media production in the U.S. since the early 1990s, as this moment is usually understood as inaugurating contemporary "transgender" politics; additionally, the 90s saw a profusion of diversity in popular representation generally. This class has two main priorities: first, to use visual media as a lens for surveying major developments in trans studies, politics, and representation over the last few decades; second, to develop a critical repertoire for thinking about our current conjuncture of "trans visibility" in particular. By tracking a longer history of both popular and alternative trans media production, this course will question the vanguardism and celebratory progress narratives associated with "trans tipping point" visibility conditions. Drawing from perspectives in WGSS, American studies, and ethnic studies, we will especially situate trans representation in relation to the institutionalization of minority difference under neoliberal capitalism. In line with scholarship, we'll approach trans representation as interlocking with structures like race, heteropatriarchy, dis/ability, immigration, and nationality and empire.

**Class Format:** There will also be some lecturing.

**Requirements/Evaluation:** Students will have ongoing short discussion post assignments, one midterm essay of 5-6 pages, and a final group media-making project with min. 6 pages of analytic writing to accompany their creative work.

**Prerequisites:** WGSS 101 or 202 would be helpful but are not required. Other background in WGSS or the humanities is also helpful.

**Enrollment Limit:** 20

**Enrollment Preferences:** Enrollment preference can go to WGSS majors and 3rd & 4th years. Statements of interest are welcome.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

*An American Family* was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the *An American Family* series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 14- to 18-page research

paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

This course focuses on the politics of personal style among women of color in the digital era. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno-racial identity, neoliberal capitalism and class inform standards of beauty and ideas about the body, we will examine a variety of materials including commercial websites, podcasts, histories, personal narratives, ethnographies, and sociological case studies. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions among others: What are some of the everyday functions of personal style among women of color in the US and globally? How do Latina/x, Black, Arab American and Asian American female aesthetics reflect the specific circumstances of their creation? What role do transnational media and popular culture play in the development and circulation of gendered and raced aesthetic forms? How might the belief in personal style as activist strategy complicate traditional understandings of feminist political activity?

Why the political furor over monuments? What would a feminist city look like? Does racial justice require integration? This course trains your focus on space and place, asking you to take a socioecological perspective on race, gender, and other axes of privilege and marginalization. In it, we examine how ideas about race, gender and more shape space as well as how the design of space reinforces social constructs and power relations. After examining specific regions (the city, the suburb, the country) and their relation to one another, we examine specific sites (public transport, public toilets, libraries, houses). The course enables students to better understand the tenacity of inequity by drawing attention to its spatial dimension while at the same time introducing students to -- and providing students tools to engage in -- spatial interventions designed to disrupt vicious social-spatial cycles.

This course explores the figure of the New Woman, a professional, political, independent, and modern woman, that rises in Germany right at the end of World War I and thrives during the Weimar Republic. Acclaimed as the epitome of Weimar Modernity, the New Woman is nevertheless greeted with great ambivalence: whether a liberated and emancipated woman for some, or a dangerous and promiscuous woman loathed by others, she is perceived as threatening to the patriarchal order. A closer look at artworks by Otto Dix, Christian Schad, and Hannah Höch, films by Fritz Lang and Georg Wilhelm Pabst, poems by Gottfried Benn, Else Lasker-Schüler, and Kurt Tucholsky, novels by Erich Kästner, Vicky Baum, and Irmgard Keun, as well as plays by Frank Wedekind and Bertolt Brecht, will provide a more precise picture of the New Woman's various incarnations, ranging from actresses (Marlene Dietrich), singers (Margo Lion and Claire Waldorf), and dancers (Anita Berber) to prostitutes, and suggest that the New Woman serves as the vessel of male anxieties and represents the contradictions of modernity. *Taught in German.*

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 20th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. By examining representations and presentations of Black masculinities, we will pursue questions such as: How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men's sexuality inform representations of Black masculinities? What is the future of Black Gender? We will trouble the relationship between manhood and masculinity by examining the ways in which masculinity can move across various kinds of bodies. In addition to reading critical and creative texts, we will view films and engage other kinds of media. Students will be responsible for 2 short papers and a final project.

Although sometimes claimed as part of a set of immutable "Asian values," the Chinese family has not remained fixed or stable over time. In this course, we will use the framework of "family" to gain insight into gender, generation, and sexuality in different historical periods. Beginning in the late imperial period (16th-18th Centuries), we will examine the religious, marital, sexual, and child-rearing practices associated with traditional ideals of family. We will also examine the wide variety of "heterodox" practices that existed alongside these ideals, debates over and critiques of gender, family, and sexuality in the twentieth century and in China today.

Whether presented as maternal saints, divas, video vixens, or bitches, black female celebrities navigate a tumultuous terrain in popular culture. This course considers the ways that black female celebrities such as Oprah, Rihanna, Nicki Minaj, Beyoncé, Janet Jackson, and Michelle Obama negotiate womanhood and sexuality, and the popular landscapes through which we witness that negotiation. It also engages contemporary black feminist scholarship, which most frequently presents the presentation of black female bodies in popular media forms as exploitive. We will review historical stereotypes of black women in popular media forms, discuss the history of the "politics of respectability" within black culture, engage black feminist responses to these types, and examine theoretical approaches to assess social constructions of womanhood and sexuality. We will also consider provocative questions relevant to discussions of contemporary black sexual politics: Should we view these women as feminists? Are they merely representatives of cultural commodification and control of black women's bodies? Do these women best exemplify the reiteration of problematic characterizations? Are they positive models for demonstrating female empowerment, agency, or "fierceness?" This course explores the histories of representation of black female figures in popular culture, and in so doing, troubles contemporary considerations of black womanhood and sexuality.

#### **Secondary Cross-listing**

We often associate modern faith in the prospects of universal human dignity, rational autonomy, the rights of man, individual liberty, democracy, open scientific inquiry and social and political progress with the Enlightenment. How can we reconcile this faith with the persistence of domination today? Critical theory aims not merely to understand the "struggles and wishes of the age" as Marx one described it, but with emancipation from domination. Understood in this way, critical theory is identified closely with the intellectual tradition of the Frankfurt School. In this tutorial, will read works in critical theory from the 18th century to the present, some from the Frankfurt tradition, and some not. We will focus on particular topics, examples of which are the following: normative critique, capitalism, authoritarianism, mass culture, enlightenment and reason, progress, violence, the domination of nature, white supremacy, patriarchy and colonialism.

**Class Format:** students will work in pairs and meet for 75 minutes each week with the professor

**Requirements/Evaluation:** Each student will write and present a 5 or 6-page paper every other week and a commentary on their partner's essay on alternate weeks; evaluations are based on written work as well as level of preparation and the quality of intellectual engagement in tutorial meetings

Austen and Eliot profoundly influenced the course of the novel by making internal consciousness crucial to narrative form. In this course we will explore Austen's innovative aesthetic strategies and the ways in which Eliot assimilated and transformed them. By placing each writer's work in its political and philosophical context-in Austen's case, reactions to the aftermath of the French Revolution, in Eliot's, to the failed mid-century European revolutions and the pressures of British imperialism-we will consider how each writer conceives social and historical exigencies to shape comedies and dramas of consciousness. Readings will include Austen's *Pride and Prejudice*, *Emma*, *Mansfield Park*, and *Persuasion*; Eliot's *The Mill on the Floss*, *The Lifted Veil*; and *Daniel Deronda*; selected letters and prose; and critical essays.

At roughly fifty-year intervals, Britain produced three brilliant female novelists -- Jane Austen, George Eliot, and Virginia Woolf -- who would each become renowned, in her own way, for her ability to combine minutely detailed social observation with a rich depiction of the inner lives of her characters. This course will examine some of their major fiction-- with an emphasis on Austen and Eliot -- with special attention to the nature and implications of their narrative methods for representing the consciousnesses of characters, and of the authorial narrative voices that mediate among them. Questions to be considered: how is our understanding of novelistic characters and consciousness shaped by our real-life experience in interpreting the thoughts and character of others, and vice versa? Do "omniscient" narrators lay claim to a privileged kind of knowing presumed to be unavailable either to their character or to readers, or are they modelling humanly available interpretive stances toward a world of others? How do these authors' preoccupations with interior thought relate to their focus on women's experience? Possible texts include Austen's *Emma and Persuasion*, Eliot's *Middlemarch*, *Daniel Deronda*, and *The Lifted Veil*, and Woolf's *The Waves*.

**Secondary Cross-listing**

The title of this course comes from Adrienne Rich's 1969 poem "Tear Gas," grounding our study in 1960s, 70s, and 80s feminist activist poetry but also in our current moment to answer a fundamental question: what can poetry do for us? In this period, feminist activist poets were at the center of a revolutionary social justice movement that changed the world. Feminist presses published much of the new poetry. This course focuses on the theory and practice of feminist poetry and print culture during this period, and how feminist experiments in language changed how we understand American poetry. We focus on the theoretical writings and poetry chapbooks of a diverse group of poets who powered the movement, including Audre Lorde, Mitsuye Yamada, Nelly Wong, Robin Morgan, June Jordan, Joy Harjo, Gloria Anzaldúa, Sonia Sanchez, Adrienne Rich, Judy Grahn, and Pat Parker. We also read the work of some later feminist theorists, such as Sara Ahmed. We spend time in the archives, analyzing documents from the period, including feminist magazines and original publications of poetry chapbooks often published by the period's many feminist presses and consider how such attention allows us to construct alternative narratives for feminism and American poetry. Writing at the intersections of race, class, gender, and sexuality, and of multiple social justice movements (Civil Rights, anti-Vietnam War, LGBTQ activism, and Black Power), these poets gave us a new language to "hear," not only ourselves, but the experience and pain of others, and, in so doing, they moved personal experience into public discourse around issues of inequality and human flourishing in a democratic society.

**Requirements/Evaluation:** short analysis papers (4-5 pages), creative (1-2 pages), Perusall annotations, longer final researched paper (10-12 pages) or alternative digital project, curated exhibition of archival materials in Special Collections

**WGSS 331 (F) Queer Europe: Sexualities and Politics since 1850 (DPE)**

**Cross-listings:** HIST 332 WGSS 331

**Secondary Cross-listing**

This course explores the construction, articulation, and politics of queer sexual desire in Europe from the mid-nineteenth century to the present. By placing queer sexualities in their broader social and political context, the course examines the ways in which sexuality has become central to questions of identity, both personal and national, in modern European society. Topics include: ways of thinking about the queer past; women's "friendships" in Victorian Britain; the role of the new science of sexology in specifying various "sexual perversions"; the rise of sexual undergrounds in the context of European urbanization; the birth of campaigns for "homosexual emancipation"; attempts to regulate and suppress "deviant" sexualities, especially under the fascist and Nazi regimes in the 1930s; the effects of the postwar consumer revolution on the practices of sexual selfhood; the postwar "sex change" debates; the politics of 1950s homophile organizing and the 1970s Gay Liberation Movement; and recent debates about migrant queer identities in an increasingly multicultural Europe. The course will focus primarily on experiences in Britain, France, and Germany, but with some detours to Italy and Russia. Readings will be drawn from sexological texts, political tracts, memoirs, and the writings of recent historians and theorists. Several films will be screened and will also be central to our discussions of the changing meanings of sexual selfhood in modern European societies.

**Class Format:** This course will be taught as a discussion course, with discussions focused on the assigned readings.

**Requirements/Evaluation:** The class will be taught entirely in discussion mode and students will be expected regularly to contribute to the discussion of the readings and films for the course. Evaluation will be based on the quality of those contributions, the posting of three 3-page graded response papers on the readings (chosen by the students) and two interpretive essays of approximately 8 pages each.

**Prerequisites:** None; open to all students.

**Cross-listings:** AMST 369 WGSS 332

### **Primary Cross-listing**

From classical mythology to reality TV, bodies and minds that depart from the ordinary have long been sources of popular fascination. In recent history, people marked as "disabled" have been subject to medical scrutiny, labeled deficient or defective, and often barred from full participation in society. And yet, what counts as "disability"--and who counts as disabled--varies greatly depending on cultural and historical context. Arguably, disability has more to do with social conditions than with any innate characteristics of disabled people themselves. This class introduces disability studies, situating disability within its historical, political, and cultural contexts. As a WGSS course, we'll center queer and feminist perspectives; this class also emphasizes recent work. Echoing arguments in gender and sexuality studies, scholars have insisted that disability is not a natural or biological fact, but a socially constructed category. As such, scholars and activists have challenged medical models that conceptualize disability as an individual defect in need of elimination. They have also questioned the idea that disability is simply a minority identity -- to the contrary, disability is a condition that most humans will experience at some point in our lives. This class frames "disability" broadly--encompassing not just conditions of physical impairment, but a wide range of bodily, sensory, cognitive, emotional, and behavioral differences and capacities. This class also centers how disability is produced intersectionally through regimes like race, capitalism, and empire. Topics include: theories of embodiment, eugenics, institutionalization and incarceration, neurodivergence, mad studies, the politics of health, storytelling and narrative, disability justice activism, neoliberalism, biopolitics, and crip theory. Along with scholarly writings, we'll consider activist texts, popular press, fiction, memoir, and a variety of other media.

**Requirements/Evaluation:** Students will submit three short reading response papers (2-3 pgs), ongoing brief/informal forum posts, and a longer final research paper (10-12 pgs); students will also work in small groups to facilitate a section of class twice per term.

## **WGSS 333 (S) The Nineteenth-Century British Novel**

**Cross-listings:** ENGL 333 WGSS 333

### **Secondary Cross-listing**

In nineteenth-century Britain, the novel took on the world. Shaking off its early disrepute, and taking advantage of growing literacy and innovations in production and distribution, it achieved in this period an unrivalled synthesis of mass appeal and aesthetic and social ambition. Its representational aspirations were breathtaking: attempting to comprehend in its pages the dizzying complexity of new social, political, and economic structures, as well as to delineate in finest detail the texture of individual lives and minds. In an age obsessed with the social, it engaged directly with the most compelling issues of the day, including industrialization and the gap between rich and poor, the role of women, nationalism and imperialism, and more broadly, the very nature of historical change itself. But it did so, for the most part, by telling fine-grained stories of ordinary men and women, people trying to make a living, worrying about their families and their neighbors, facing illness and death, and falling in--and sometimes out of--love. Since so many of these stories remain highly accessible works of popular culture, we will work hard to focus on what is strange and specific about the fiction of the nineteenth century, while also recognizing the roots of much that is modern in our own culture. We will also take seriously their social ambitions, looking especially at the ways they formulate, promote, and contest their readers' understanding of themselves as subjects and agents of an ongoing social history. Likely authors include Jane Austen, Walter Scott, Charlotte Bronte, Charles Dickens, Anthony Trollope, and George Eliot.

**Requirements/Evaluation:** Heavy (but entertaining!) reading load. Flexible writing requirement includes options for short essays, weekly journal,

creative work, and research paper. Students must complete 4 units of writing, with the research paper, if chosen, counting for two. ### **WGSS 335 (S) Michelangelo: Self and Sexuality (WS)**

**Cross-listings:** ARTH 331 WGSS 335

#### **Secondary Cross-listing**

Who are artists? We each have different answers to this question, but our responses would probably share some common assumptions about human individuality and the centrality of the self to artistic creation. In this tutorial, we will take a critical lens to these ideas by studying the life, work, and passions of the Italian artist, Michelangelo Buonarroti (1475-1564). Michelangelo is a towering archetype of the autonomous artistic self: the distinctive personality who telegraphs individual beliefs, feelings, and desires through the creative act. His lifelong engagement with the physicality, beauty, and sensuality of the (male) human body has encouraged the connection between the man and his work on the most intimate levels of pleasure and desire. Ironically, Michelangelo would not have understood our modern conceptions of artistic selfhood or sexuality, but his own Renaissance moment was obsessed with questions surrounding the nature of human identity and subjectivity. His artistic practice--from painting to poetry--wrestles with them in countless, fascinating ways. Students' writing and critical conversation will venture into the spaces between man and myth, selfhood and self-fashioning, artist and patron, past and present.

#### **Secondary Cross-listing**

If we think of Michel Foucault as engaged in writing histories, or genealogies, of his own present designed to undercut the sense of the obviousness of

certain practices and ways of thinking, categorizing, and knowing, we can easily imagine that he might now be questioning different aspects of our contemporary "present" than the ones standardly associated with his name, namely, panopticons and surveillance, discipline, criminalization, the biopolitics of health, the normal and the abnormal, etc. In this course we address the question: How is the present we find ourselves living today different from the one that the author Foucault wrote about in the 1960s, 70s and early 80s before his untimely death in 1984? What differentiates today from yesterday? And what present practices and ways of thinking and knowing might be questioned using Foucault's tools, genealogy in particular, for resisting unnecessary constraints on freedom and the perpetuation of unnecessary suffering? What is his legacy today? In this tutorial you will read from a selection of Foucault's texts (books, lectures, interviews) in order to acquire a firm grasp of his method of "critique" and his way of looking at the interconnections between forms of power and the knowledge associated with particular disciplines. We will also read more recent work by Foucault inspired scholars on topics such as the biopolitics of gender, the genealogy of terrorism, the informational person (how we become our data), and neoliberal subjects.

The course introduces students to anthropological literature of Brazil as well as Brazilian novels and films. Its focus is on understanding the history and contemporary culture of Brazil through attention to racial justice, including the country's unique history and legacies of slavery in comparative context. It also examines questions of gender, including the history of feminism in Brazil and current debates related women's equality such as Brazil's abortion laws, domestic violence, sexual tourism, and job opportunities for women. Lastly, we also examine LGBT history in Brazil and dive into writing about queer culture there. NOTE: Students must also commit to registering for a winter study travel course with a trip to Rio de Janeiro, during which time students will visit important historical sites, museums, and relevant cultural attractions. They will also meet collectively with faculty members from several universities and NGOs to learn about the research and projects our Brazilian hosts are engaged in. Students also have their own individual exploratory research projects there related to social justice, which are integral to the seminar. **Cross-listings:** ENGL 340 AMST 340 WGSS 340 COMP 342

Elizabeth Bishop has emerged as one of the most important poets of the 20th century. She is admired not only for her dazzling mastery of the craft but also her adventurous life as a world traveler. Her more than two decades living in Brazil and translating the culture and literature of that country for a North American audience, for instance, make her life and work a rich focal point for cross-cultural study. At the center of the course will be Bishop's

stunning meditations on childhood, memory, travel, lesbian sexuality, gender identity, ecology, and race and class in the U.S. and Brazil. We will look at how Bishop intertwines personal and global historical encounters in order to raise serious ethical questions about our shared history of conquest and sense of place in the Americas from the 16th century to the Cold War period of the twentieth. What is ultimately at stake in our claiming of a "home"? We also read a number of the writers in North and South America who were closely connected to Bishop, from Robert Lowell and Ernest Hemingway in North America, to Pablo Neruda and Clarice Lispector in South America. Ultimately, we study how craft, poetic process, and an ethical eye on the world can open up the study of poetry and poetics in the 21st century.

This course investigates how sexual identities, desires, and acts are represented and reproduced in U.S. literary and popular culture. Focusing on 1880-1940 (when, in the U.S. the terms "homosexual" and "heterosexual" came to connote discrete sexual identities), we will explore what it means to read and theorize "queerly." Among the questions we will ask are: What counts as "sex" or "sexual identity" in a text? Are there definably queer and/or transgender writing styles or cultural practices? What does sexuality have to do with gender? How are sexual subjectivities intertwined with race, ethnicity, class, and other identities and identifications? Why has "queerness" proven to be such a powerful and sometimes powerfully contested concept? We will also explore what impact particular literary developments--the move from realism to modernism-- and historical events such as the rise of sexology, first-wave feminism and the Harlem Renaissance--have had on queer cultural production. The class will also introduce students to some of the most influential examples of queer literary and cultural theory. Readings may include works by authors such as Sarah Orne Jewett, Henry James, Willa Cather, Sui Sin Far, Langston Hughes, Richard Bruce Nugent, Gertrude Stein, F. Scott Fitzgerald, and Nella Larsen, as well as queer literary theory and critique by scholars such as Butler, Coviello, Ferguson, Foucault, Freeman, Freud, Lorde, Love, Muñoz, Rich, Rodriguez, Ross, and Sedgwick.

This tutorial examines representations of and resistance to racial-sexual violence in American society, from colonial America to contemporary US culture. Interdisciplinary texts cover history, politics, literature, film, feminist studies, American studies, lgbtq and ethnic/black studies. Books include *Southern Horrors*; *Intimate Matters*; *Scenes of Subjection*; *Trauma and Recovery*; *The Delectable Negro*; *At the Dark End of the Street*; films include *Birth of a Nation*; *Bush Mama*; *To Kill a Mockingbird*. The primary focus is on racial and sexual vulnerability to violence and mobilization for freedom from the 18th-21st centuries.

#### **Secondary Cross-listing**

Subsequent to the National Socialist suppression of sexual expression, the intersections of politics and art in the post-World War II era reflected an organic embeddedness within the context of the city of Berlin. This course reflects upon this history to understand Berlin's present, its contradictory mix of new and old, "deep history" and nostalgia. Often described as an island moored within the communist territory of East Germany during the years of the Berlin Wall, West-Berlin became the city towards which many queer artists, musicians, and activists gravitated in order to avoid the involuntary conscription in the Bundeswehr, as an unexpected outcome of the government's plan to boost population in the former capital. We will focus on the excavation and recognition of inter/cultural positions that challenge German nationalism, at the same time that the country reestablished itself as a world power. Over the semester, we will rethink Berlin with respect to the once nascent geopolitics of the European Union, and the city's social fluctuations and periods of migration as registered through audiovisual and performative forms in advance of and in the decades following the fall of the wall in 1989. Focusing on art, performance, and film, we will examine the architectural, discursive, and cultural spaces in which these forms of creative and political expression take shape--from art museums and theater houses to occupied buildings, from independent publishing imprints and

collaborative nonprofit organizations to night clubs. This course will examine the changing city with respect to activism, collectivity, alienation, solidarity, and belonging.

### **WGSS 345 (F) The Pedagogy of Liberation (DPE)**

Education is inherently political, and politics necessarily involves pedagogy. *Who* should teach, *what* is taught, *how* it is taught, and *why* it is taught are questions hotly debated at all levels and in all sites of education because the answers have implications for societal reproduction or transformation. Politicians, activists, even family members at the dinner table all seek to educate in ways that incline us toward particular political positions. At the heart of this class stands the question: if different pedagogies point us in different political directions, then what kind of pedagogy or pedagogies serve the end of liberation from oppression and why? Are there certain pedagogical "goods" that reliably serve the goal of liberation across sites? Or do different sites require different approaches? To begin to answer these questions, we will engage a variety of thinker-teachers and groups known for their commitment to a "pedagogy of liberation." While feminist thinkers will be foregrounded, we may also look to thinker-teachers who and groups that do not claim this label. In addition to engaging texts which reflect on different aspects of radical pedagogy (content, form, method, etc.) and radical pedagogy in different settings (the college classroom, the social movement headquarters, the home), we will witness radical pedagogy in practice. Moreover, we will enact various radical pedagogical strategies in our own classroom and beyond.

**Requirements/Evaluation:** Perusall, aspirational learning statement, syllabus co-construction and reflection, class facilitation, interview project and reflection, one-on-one discussions

In this course we will examine the various ways scholars and filmmakers have used ethnography as a critical tool for understanding the intersections

of race, place, space, gender and sexuality. We will foreground studies that examine unfamiliar sites of Black struggle, resistance, and survival. We will examine Black gender variant and sexual minorities and how they produce, reproduce and struggle for spaces and places of desire, community, pleasure, love, and loss. We will explore these stories through primarily ethnographic modalities. We will discuss the political and ethical ramifications of these ethnographic narratives paying particular attention to the usefulness and limitations of both 'Thin' and 'Thick' descriptions. We will use ethnography to center debates regarding the politics of representation of racialized queer space, place, and people through both filmic and written accounts. All students will be asked to discover and develop their ethnographic voices through various critical, creative, experimental and performative assignments.

**Primary Cross-listing**

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

This course in linguistics provides an introduction to linguistic anthropology, sociolinguistics, and folklore studies using topics and approaches related to gender and sexuality. It is a methods course based in empirical research principles, but a basic familiarity with the broad strokes of queer/feminist theory may be helpful. One goal of the class will be learning to read and write in IPA (International Phonetic Alphabet) and how to construct and use IPA "change charts." We then build on this as we turn to sociolinguistics as students will learn how to do Discourse Analysis and Conversation Analysis, using WGSS-oriented topics (e.g., upspeak, vocal fry, so-called "gay voice," the gendered nature of turn-taking and interrupting.) We then turn to an extended unit on queer folklore and folklife, learning how anthropologists and folklorists use motif type indexes (e.g., Propp Functions, Thompson Type Index, etc) to study oral narratives and how feminist/queer theorists can use these to analyze gender in folk/fairytales and other stories. We also read several linguistic anthropologists' ethnographies of queer communities' language practices in global context. The semester concludes with a unit on LGBT slang, argots, and profanity.

**Requirements/Evaluation:** IPA Quizzes (reading/writing), Conversation Analysis/Turntaking Transcription Assignment, Urban Legends Tale Type Analysis, Short Analytical Paper on Feminist/Queer Folk Figures

Around 1845, three sisters in a remote town in Yorkshire effectively converted their father's humble parsonage into a family writers' colony. In 1846, each published her first novel--two of which would go on to become major classics. Within 8 years, all three sisters were dead, but by then they had produced seven of the most formally innovative, socially challenging, original and powerful works in English fiction. We will read them all, from Charlotte's best-selling love story, Jane Eyre, to the underrated Anne's brilliant and disturbing anatomy of an abusive marriage, The Tenant of Wildfell Hall, to Emily's singular masterpiece Wuthering Heights, as well as their poetry and selections from the voluminous fantasy fiction they created together as children. We will also read Elizabeth Gaskell's acclaimed 1857 Life of Charlotte Bronte, the first full-length biography of a woman novelist by a woman novelist, which began the process of making the Brontës the cult figures they remain today. Reading these works together in the bicentennial year of Anne's birth, we will consider how their shared efforts helped all three sisters to push through boundaries few other women writers had dared to challenge. In a similar spirit of collaboration, we will mix critical and creative writing in our responses to these works.

This course spans Divisions I, II, and III in its exploration of the representation of disability and Latina/o/x identity in the contemporary US context. Employing Angharad Valdivia's (2020) notion of "marking presence" to describe the intentional ways in which Latina/o/x subjects gain and hold on to mainstream media space, the class places the fields of Disability Studies, Latina/o/x Studies, Gender Studies and Media Studies into conversation. We address the following questions and others: What does media reveal to us about the place of disability and Latinidad in contemporary US life, particularly as these categories intersect with questions of gender, sexuality, national identity and citizenship? How might we read Latinidad and disability *into* media texts in which they are not otherwise centered? What are the advantages of deploying mainstream media presence as a claim to power for disabled Latina/o/x individuals, particularly those who are multiply marginalized? What are the limitations of such an approach? We will focus on these questions, as well as deploy various media examples (podcasts, social media, film, television and music) alongside scholarly texts to explore topics impacting the Latina/o/x communities such as the relationship between migration and trauma, the gendered archetype of the Latina "Loca," disability in academia, temporality and disability ("Crip Time"), the politics of self-care amongst Latinas/xs in the neoliberal context, and the very legal, cultural, and social category of "disabled" itself within dominant society as well as Latina/o/x communities.

**Cross-listings:** WGSS 362 AFR 300 ENVI 300 AMST 362

Secondary Cross-listing

This course will ask, what other socioecological models exist? We will weave together a study of differing, yet often converging or synergistic traditions of Black/Womanist eco-feminism that often confronts the social constructions of race, gender, class and sexuality, dominant religion as a means of social control, imperialism, capitalism, and colonialism; Ecosocialism which often frames ecology in terms of a mode of production beyond or outside of capitalism; and Indigenous perspectives on resistance to capitalist extraction, imperialism, and colonialism. Given ongoing struggles against the

extraction of land and labor, the urgent calls raised in the present-day "climate strike," the COVID-19 Pandemic, Black-led pandemic rebellions, along with long(er) histories of land-based peoples around the planet opposing racial capitalism, settler colonialism, and imperialism, this class will explore not only what those in opposition to both extractivism and expropriation resist, but also what we want. We will critique binaries, settler notions of time and explore theories of change. Additionally, this class will look to an array of literature, film, sound, and other forms of cultural production in order to not just "locate," but describe and reveal rebel ecological visions emerging "from below." Ultimately this class will consider how the above ecological praxis can work simultaneously and within a sense of plurality, examining what we can learn from the work of activists, intellectuals, and defenders on the frontline. This course is an extension of Dr. Guess' concept of a "rebel ecology."

This class engages with the methods of medical anthropology & medical sociology to help students design and implement ethnographic projects that explore health on campus or our wider community. Along the way we consider how disruptive moments like COVID-19 can reveal underlying social inequalities of healthcare access, health outcomes, and well-being; for which we propose innovative and student-focussed solutions. Students will learn and use design thinking, data visualization, and participatory ethnography while engaging with a variety of qualitative methods such as semi-structured interviews, focus groups, and qualitative surveys. We situate and explore our ethnographic projects within a campus and wider communities that are always already structured by power, privilege, and intersectional identities that shape health and well-being. We explore the field of narrative medicine and medical anthropology by developing and practicing skills in active listening, open dialogue, mindfulness, empathy, and curiosity that can profoundly shape ethnographic as well as the patient/provider encounters. For context, we read ethnographic case studies that explore a variety of topics including how structural racism and implicit bias shape clinical medicine & medical education in the US, how concepts of sexual citizenship can reshape our understanding of campus sexual assault, how the spread of US psychiatry has shaped a global landscape of mental health, and how queer activism responded to the HIV/AIDS crisis in the US. Our goals are to create participatory research projects that both explore and alter our habitual practices and individual ways of seeing the world around us.

**WGSS 376 (S) Sex, Gender, and the Law in U.S. History (DPE)**

This course explores how the law in America has defined and regulated gender and sexuality. We will evaluate how the law has dictated different roles for men and women, how sexual acts have been designated as legal or illegal, and the ways that race, class, and nationality have complicated the definition and regulation of gender and sexuality. We will examine how assumptions about gender and sexuality have informed the creation and development of American law, contested interpretations of the Constitution, and the changing meanings of citizenship; We will consider how seemingly gender neutral laws have yielded varied effects for men and women across race and class divides, challenging some differences while naturalizing others. Finally, we will examine the power and shortcomings of appeals to formal legal equality waged by diverse groups and individuals. Throughout

the course, we will consider the various methodologies and approaches of the interdisciplinary field of legal history. Topics to be covered will include the Constitution, slavery, marriage, divorce, custody, inheritance, immigration, sexual violence, reproduction, abortion, privacy, suffrage, jury duty, work, and military service.

**Requirements/Evaluation:** four papers, including three 4- to 6-page papers, and one final paper of 8-10 pages

Much maligned as a popular or "low" genre at its inception in the late eighteenth century, the gothic form has persisted in its popularity as well as crossed into "higher" forms of modernism, postmodernism, and postcolonialism. In this course, we will read key texts in the gothic mode—Frankenstein, Jane Eyre, and Wuthering Heights among others—and follow the ways in which they are revisited and rewritten by contemporary American and Caribbean writers, filmmakers, and artists. Particularly, we will examine how these texts subvert the realist leanings of Anglo-American narrative fiction and its assumptions of enlightenment rationalism by way of two main processes: narrative hypertrophy and feminist revisions of horror. The class will take up select contemporary criticism on the gothic and horror in literature, film, and art. In *Black Feminist Thought* Patricia Hill Collins powerfully illustrates how "portraying African-American women as stereotypical mammies, matriarchs, welfare recipients, and hot mommas has been essential to the political economy of domination fostering Black women's oppression." This course

explores how similar social constructions of race and womanhood have evolved in Latin American countries affected by slavery and colonialism. We begin by revisiting Collins' seminal text, as well as the work of other feminist scholars, as a starting point from which to deconstruct controlling images of Black women in Latin American nations. We will then explore clips from films, television series, advertisements, and comic strips to analyze different iterations of stereotypes and their impact on Afro-Latin American women's life chances. The second component of this course will engage with Black women's resistance throughout Latin America. We will engage songs, poetry, and empirical data on Black women's resistance to examine they how have and continue to challenge stereotypes, educate the public, and construct their own narratives of black womanhood.

As slaves and free women, activists, domestics, artists and writers, African Americans have played exciting and often unexpected roles in U.S. political, social, and cultural history. In this course we will examine black women's lives from the earliest importation of slaves from Africa and the Caribbean through to the expansion of slavery, the Civil War, freedom, Jim Crow, the Civil Rights movements, and up to the present day. Consistent themes we will explore are the significance of gender in African American history and the changing roles and public perceptions of black women both inside and outside the black community. We will read and discuss a combination of primary and secondary sources; we will also consider music, art, and literature, as well as more standard "historical" texts.

In this course we will examine the various ways Black scholars, artists, & writers use science fiction and visionary fiction to imagine freedom and new world orders. We will focus on the role of history, particularly slavery, in the Black radical imagination. "Freedom" is the keyword throughout the course. We will grapple with the various and sometimes conflicting meanings and uses of freedom as it relates to blackness, gender, sexuality, class and ability. We will explore multiple forms of scholarship and cultural productions, including film, music, novels, short-stories, art, poetry, and other academic texts. All students will be asked to discover and develop their writerly voices through various critical, creative, experimental and performative assignments.

Let us not take it for granted that life exists more fully in what is commonly thought big than in what is commonly thought small" ("Modern Fiction"). Virginia Woolf's fiction represents a self-conscious and highly experimental challenge to the conventions of Victorian and Edwardian fiction, in an effort to re-center the novel on lived experience. This course will explore the evolution of the innovative fictional forms by which she tried to bridge the gap between the experience of consciousness and its representation in language. We will also consider the links between Woolf's concern with in the fluidity of consciousness and her interest in gender fluidity and androgyny. We will read most of the major novels, probably including *The Voyage Out*, *Jacob's Room*, *Mrs. Dalloway*, *To the Lighthouse*, *Orlando*, *The Waves*, and *Between the Acts*, together with selected short fiction and critical essays.

### **WGSS 390 (S) Black Trans Studies**

Black people have a significant stake in thinking about and theorizing the body in relation to self-definition, state regulation, and physical and social death among other phenomena. In 2021 we have seen both the institutionalization of transgender studies alongside the heightened visibility of transgender people. In the midst of multiple national crises (the COVID-19 pandemic, climate change, police brutality, and racial capitalism; all of which disproportionately impact Black and brown people), we are at a moment of reckoning. We are coming to terms with the ways race permeates all of our institutions, and more specifically how anti-Blackness is embedded within the social fabric of the US. What would it look like to understand transgender theory, transgender experiences, and transgender cultures through this lens? What might we learn from taking a focused look at how Blackness and transness come into conversation within the current context of the US settler-colonial state? How can we better understand the ways white supremacy shapes constructions of gender? How can that impact how we think about, study and engage with trans communities? In this class we will work to critically think about trans studies through a lens of race and racialization, with a specific focus on Blackness and Black trans experience(s). The course is divided into three major themes: Trans Studies, Trans People and Experiences, and Trans Cultures and Transness in Society. We will engage knowledge about transgender life across various mediums including: scholarly texts, film, fiction, social media and oral histories. While focusing on understanding Blackness and Black trans experience, we will take an intersectional approach, also engaging issues of class, sexuality, nationality and ability.

**Secondary Cross-listing**

Generations of Black people around the world have demanded restitution for the harms and legacies of enslavement, indigenous genocide and colonialism in order to advance social justice, new ways of living and freedom. In this way, freedom fighters, Black Power leaders, abolitionist movements, Pan-Africanists, maroons, Rastafarians, Black politicians, climate justice leaders, and revolutionary anti-capitalists have all put forward ideas on and approaches to reparations and reparatory justice. This course will analyze *'geographies of Black struggle'*, the differences and commonalities among these approaches, the political strategies and movements, including responses to global climate change and socio-environmental disasters that advance reparations as a just remedy *within* and *beyond* borders. We give particular attention to Pan-Africanist and Black feminist perspectives, as well as liberal and popular struggles for reparations within the African diaspora across space and time. Do Pan-Africanism and Black feminism offer new visions for reparations movements in the 21st century? Employing speeches, writings, audio-visual content and documentary film from and about these earlier and emerging movements and their leaders, we will draw long lines between historical circumstances and drivers, and examine Black (un)freedoms within the context of calls for reparation today.

**Requirements/Evaluation:** Attendance and Participation including serving as a class discussion leader (20%); Written double-spaced essay about and the legacies and role that Pan-Africanism or Black Feminist perspectives play in contemporary global reparations movement (8 pages plus bibliography) (25%); Research and creatively present using written text, flyer, video, audio-visuals or poster a profile of Pan-African feminist leader focusing on her ideas, movement activities, and role in the reparations movement including innovative ideas (max. 5 pages or 10 minutes) (25%); Final project: simulation activity of a Pan-African Congress on Reparations (30%)

**Cross-listings:** WGSS 401 COMP 401 GERM 401

**Secondary Cross-listing**

Western neoliberalism is a predatory excrement of late capitalism that overvalues competition, transferring the laws of the market to human relationships. It deliberately creates instability not only in the economic sphere but, more generally, in the social collective by encouraging dangerous risk-taking, fomenting crises and cementing systemic inequity, while suggesting to those under its sway that they are corporate 'entrepreneurs of self.' This model of self-management also extends into the sphere of intimate relationships. Of course, because predatory neoliberalism heavily favors a white investor model and is premised on white norms, the racialized body is considered a priori subaltern and subservient. Humanistic and artistic approaches (while not per se immune or outside of neoliberal constraints) effectively polemicize against neoliberalism, and suggest practices that resist its technocratic mindset. Looking at literature, cinema, and critical theory from a range of regions and disciplines, we will focus on Europe and the United States. Moreover, we will ask how forms of neoliberalism affect different regions of the world: Southeast Asia, Russia? Where and how can solidarity be reimagined beyond identity politics? Where is the boundary between animal and human in the neoliberal collective?

This seminar provides an overview of queer, women of color feminist, decolonial, and critical ethnic studies critiques of orthodox Marxism. Beginning with core texts from the tradition, we will examine a range of forms of labor and social positions that complicate Marx's emphasis on the white male

industrial factory worker. In the first part of the seminar, we will study seminal texts that center reproduction, racial slavery, care and domestic work, indentured servitude, sex work, and migrant labor, and in the second half, we will turn to an array of practices that respond to and offer strategies to survive under racial capitalism. This seminar will equip students with critical understandings of the ways racial capitalism has centrally relied on the mass elimination, capture, and recruitment of different racialized and gendered bodies in and beyond the U.S. and how, through performance, the capitalist system of value and life under these conditions can be undone and reimagined.

**Cross-listings:** WGSS 408 RLFR 412

#### **Secondary Cross-listing**

In 1834, Balzac wrote that "Paris is a veritable ocean. Sound it: you will never know its depth." The same can be said of the French nineteenth-century novel and its boundless ability to echo the past and illuminate the present. From the Romanticism of Stendhal and Hugo, and the Realism of Balzac and Flaubert, to the Naturalism of Zola and Maupassant, the novel became a forum for examining illicit sexuality, institutional misogyny, social injustice, criminal passions, revolutionary struggles, and Parisian pleasures in nineteenth-century France. Characters such as the imprisoned housewife Emma Bovary, the reluctant revolutionary Jean Valjean, the social-climbing lover Julien Sorel, the ambitious undergraduate Rastignac, and the domestically-abused Gervaise became synonymous with France's turbulent social and political landscape from the 1830s to the 1880s. And as recent film adaptations make clear, these desperate housewives and extreme makeovers continue to haunt our twenty-first century present. Reinterpreted by such actors as Gérard Depardieu, Isabelle Huppert, Uma Thurman, Claire Danes, and Jennifer Aniston, the nineteenth-century novel continues to sound out the scandalous and sensational depths of our own century. Readings to include novels by Balzac, Stendhal, Hugo, Flaubert, Maupassant, Zola. Films to include adaptations by Clément, Berri, August, Arteta, Lelouch, Chabrol. Conducted in French.

In the age of digital communications and mobile applications such as WhatsApp and Skype, transnational living has rapidly emerged as the norm as opposed to the exception. However, what does it really mean to "be transnational"? How are the lived experiences of transnational individuals and communities shaped by categories of difference such as gender, ethno-racial identity, sexuality, and class? What impacts do the growing number of transnational citizens and residents in the U.S. have on our understanding of "American" identity in the local, national, and global contexts? In this interdisciplinary seminar we will analyze recent theories regarding the origins and impacts of transnationalism. Particular attention will be paid throughout the semester to the intersections of gender, ethno-racial identity, sexuality, and class in connection with everyday transnational dynamics. The broad range of case studies examined includes Central American, Colombia, the Dominican Republic, Haiti, Indonesia, Jamaica, Mexico, the Middle East, and Peru.

Are Feminism and Science compatible commitments? What do these nouns mean when paired with one another, when capitalized (or not), when pluralized (or not), and when deployed by a range of authors in different disciplines? Scholars of feminist science and technology studies (FSTS) have addressed these questions in their studies of scientific objectivity, technological vulnerability, environmentalism, and the makings (or doings) of race as well as gender. We will explore these questions and topics with a view to identifying the range of ethical, political, and epistemological practices within feminist and critical technoscience. We will read theoretical texts in FSTS, such as Donna Haraway's "Situated Knowledges" and Safiya Umoja Noble's "A future for intersectional black feminist technology studies." We will also read case studies, such as Pat Treusch's "The Art of Failure in Robotics" and Emily Martin's "The Egg and the Sperm: How Science Has Constructed a Romance Based on Stereotypical Male-Female Roles." While our preliminary readings will be set in advance, students will help shape the syllabus as we advance toward a better understanding of feminist technoscience's potentials and limitations at a time when technical change often outpaces careful consideration of its consequences.

**WGSS 17 (W) The Lavender Blues: Queer Music Before World War II**

Some of the most famous American musical artists of the early twentieth century were not only "in the life" - meaning gay, bisexual, or transgender - but they sang about this life too. The most courageous of these artists? Women - queer white women and queer women of color. This course will introduce students to a little-known yet revolutionary moment in music history when pioneering artists sang boldly about sexual and gender fluidity and when women's voices literally took center stage. Each week our sessions will be anchored with a particular star whose life and music will lead us thematically to so much more. We'll start in vaudeville with the male impersonators, move on to the early blues and come home with the Jazz Age. Among other things we'll listen to recordings, watch videos, discuss the power of lyrics and language, learn the antecedents of modern-day drag, find out the stories behind the songs, discover how these songs influenced (and reflected) audiences and explore how this music evolved over time. We will sing a bit too! (But no vocal experience required.) Throughout we'll uncover what queer music history - and queer female artists - have to tell us about masculinity, femininity, gender fluidity, cross-dressing, homosexuality, love, race, religion and... fun. Students will be expected to keep a journal of ideas and reflection and do outside reading, viewing and listening. At least one group field trip is expected. For a final project students will write a 10-page paper, give a 10-minute in-class performance, or complete a comparable creative project inspired by the music/artists learned.

**WGSS 26 (W) Community Mobilization in Senegal for Public Health and Economic Empowerment**

This class will take a group of 6 students to Senegal to learn about successes and challenges in grassroots organizing, with a focus on the interrelated areas of public health -- especially Covid and HIV -- women's rights, and economic empowerment, including through cooperatives. We will build on established relationships in Senegal, where the instructor has taken several groups of students since 2006. That country has many lessons to teach, as a majority Muslim culture where women have created and continue to build cooperatively owned enterprises, a West African country that has had a good degree of success fighting Covid and consistently kept the rate of HIV prevalence under 1%, and a diverse culture with a democratic tradition of tolerance, even celebration of ethnic difference. Our hosts, ACI's Baobab Center, have a strong record of working with visiting scholars and students to teach them local languages and orient them to Senegalese culture, as well as a deep and well-respected history of capacity-building work with local groups working on HIV, public health, women's rights, and LGBTQ issues. We will spend our first week in Dakar, the capital, with students doing homestays with Senegalese families. We will attend Wolof classes and lectures on local issues as well as visiting NGOs. In our second week we will move inland to the town of Kaolack, where we will be hosted by the Association pour la Promotion de la Femme Sénégalaise, a 30-year-old group with an extensive record of empowerment of village women through strategies ranging from small-scale credit to popular education and theater.

## WRITING SKILLS (WS)

The Writing Skills (WS) requirement is to improve student writing proficiency across disciplines. Students in these courses will receive guidance on structure, style, argumentation, and other significant aspects of writing throughout the semester. This may be achieved through brief assignments spaced over the semester, sequenced assignments leading to a longer final paper, etc. WS courses may also include multiple drafts, peer review, conferences or class discussions designed to improve writing skills. (A course with a single long paper due at the end of the semester, but with no required or structured means of addressing writing issues, would not be considered a writing skills course.)

The primary function of the WS designation is to indicate that the course will provide consistent and ongoing feedback on students' writing. Thus, the amount of writing should be substantial and well spaced, followed by timely evaluation and suggestions for improvement. Specifically, a WS course should require multiple assignments, each returned with comments which address writing problems and strategies, as appropriate. Because WS course instructors must pay attention to students' writing skills as well as to their mastery of the content of the course, WS courses have a maximum enrollment of 19.

All students are required to take TWO WS courses: one by the end of sophomore year and one by the end of junior year. Students will benefit most from WS courses by taking them early in their college careers and are strongly encouraged to complete the requirement by the end of sophomore year.

### **AFR 104 (S) Race and a Global War: Africa during World War II (DPE) (WS)**

**Cross-listings:** AFR 104 HIST 104 GBST 104

#### **Secondary Cross-listing**

This course highlights African experiences of World War II. Although most histories have excluded Africa's role in the war, the continent and its people were at the center of major developments during in this global conflict. In fact, many Africans remember the Italian invasion of Ethiopia in 1935 as the start of the war. African servicemen fought alongside the Allied and Axis forces on major warfronts in Europe, Africa and Asia. African communities and individuals also established war charity campaigns to collect funds, which they sent to war ravaged societies in Europe. Indeed, African economies, despite their colonial statuses, kept European imperial nations afloat in their most hour of need. At the same time, African colonial subjects faced severe food shortages, the loss of working-age men to labor and military recruiters, and dramatically increased taxes. We will examine the impact of these and other wartime pressures on different African communities. How did African societies meet such challenges and how did they view the war? In this course we will examine the roles that women played during the war, and the various other ways that African communities met wartime demands. Other topics we will explore include the role of African women; colonial propaganda; political protest against the war; race and racial thought in the wartime era; war crimes; African American support for the liberation of Ethiopia; and the war's impact on decolonization across the continent. We will further study how Africans and outsiders have differently conceptualized the continent's role in the war by analyzing a variety of sources, including scholarly writings, archival materials, films, former soldiers' biographies, and propaganda posters.

They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course explores the colonial relationship during a major global crisis. Students will examine existing narratives of African contributions to the war and to come up with their own interpretations, and will be called to critically engage the question of why and how colonies made significant contributions to the Allied cause by producing needed materials and resources or by joining the fight. Africans made these contributions spite of various and complex inequities.

**Secondary Cross-listing**

This course analyzes the freedom struggle in the North during the twentieth century. Whereas black northerners drew from broader campaigns and traditions of black resistance, we will explore territorial distinctions in the region that otherwise have been flattened within the long history of civil rights discourse. To accomplish this aim, we will engage the following themes: black culture and radicalism; community formation and residential segregation; demographic and migratory transitions; deindustrialization and the war; gender and respectability politics; labor tensions and civil rights unionism; northern racial liberalism; and the influence of world affairs--all with an eye toward scrutinizing the freedom struggle in its northern variety.

**Requirements/Evaluation:** Students are expected to participate actively and will write three short essays (3-4 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (8-10 pages) in consultation with the instructor and will be required to submit a topic proposal.

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students and then sophomores who have not previously taken a 100-level seminar. If the course is overenrolled, students with junior and/or senior status will be removed automatically. Other students will complete a questionnaire.

Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course analyzes the long black freedom struggle in the North during the twentieth century. It examines black northerners' efforts to achieve citizenship and equality as well as their challenges and involvements with northern racial liberalism. It offers students the opportunity to think critically about how black resistance campaigns emerged and evolved as discriminatory racial practices persisted in spite of legal and legislative remedies.

**AFR 159 (F) Crossing the Color Line: A History of Passing (DPE) (WS)**

**Cross-listings:** AFR 159 HIST 159

**Secondary Cross-listing**

In June 2015, Rachel Dolezal emerged as a media spectacle and the subject of national scrutiny after her *white* parents stated publicly that Dolezal is a white woman *passing as black*. Their insistence that Dolezal is white came in the wake of her reports to local news media and police that she had been the victim of several hate crimes. To critics, Dolezal is a fraud who has committed cultural appropriation. Yet, for her supporters, Dolezal's racial identification as a black woman is authentic and indisputable, since race is not based on biology but rather is a social construction. For both groups as well as impartial observers, many wondered curiously why a white woman had chosen to pass as black, especially given that historically it has been African Americans who opted to *become* white. Inspired by the controversy surrounding Dolezal, this tutorial will explore the history of passing in the

United States. Whereas our attention will primarily be focused on black-to-white passing, we will expand our understandings of passing by emphasizing the variety of ways that identities have been shaped through the crossing of boundaries--class, ethnic, gender, intellectual, political, religious, and sexual. To accomplish our goals, we will read and cross-examine fictional and nonfictional as well as primary and secondary historical accounts of boundary-crossers. We will also screen several films that engage the theme of passing.

**Requirements/Evaluation:** Weekly formal response papers and written critiques.

**Prerequisites:** None.

**Enrollment Limit:** 10

**Enrollment Preferences:** First and second-year students will be prioritized, followed by history majors. Should the course be overenrolled, students will be asked to complete an enrollment questionnaire.

Students will receive substantial feedback on their writing skills, with verbal and written suggestions for improvement. Students also will receive feedback from their tutorial partners.

**Difference, Power, and Equity Notes:** Narratives of racial passing provocatively raise questions about the construction, logics, reinforcement, and subversion of racial categories and identities. Tutorial students will have the opportunity to deconstruct the meanings of race and identity in addition to thinking culturally, historically, and ontologically about the implications and value of these constructs. In essence, we will theorize racial identity, reconsidering, if not challenging, its stable notions of identic intelligibility.

Beginning with core texts from the tradition, we will examine a range of forms of labor and social positions that complicate Marx's emphasis on the white male industrial factory worker. In the first part of the seminar, we will study seminal texts that center reproduction, racial slavery, care and domestic work, indentured servitude, sex work, and migrant labor, and in the second half, we will turn to an array of practices that respond to and offer strategies to survive under racial capitalism. This seminar will equip students with critical understandings of the ways racial capitalism has centrally relied on the mass elimination, capture, and recruitment of different racialized and gendered bodies in and beyond the U.S. and how, through performance, the capitalist system of value and life under these conditions can be undone and reimagined.

This seminar explores labor history in relation to black people, spanning the colonial period to the early twenty-first century. Whereas the bulk of the course will analyze black labor and labor movements in the twentieth century, specifically focusing on the push for economic inclusion and mobility amid employment, societal and union-related racial discrimination, we will examine what involuntary black labor meant in the context of slavery and the construction of a capitalist economy. Likewise, we will devote attention to black workers with regard to such topics as antiunionism, deindustrialization, economic inequality, Fordism, informal economies, Jim and Jane Crow, labor radicalism and violence, New Deal and welfare, the rise of civil rights unionism, and slavery and capitalism, among other themes.

**Requirements/Evaluation:** Students are expected to participate actively and will write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages) in consultation with the instructor and will be required to submit a topic proposal and outline, an annotated bibliography, and a peer-reviewed draft of the final paper.

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the current digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. Further, students will explore how the dialogues created between objects, individuals, and space often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

The Media have long played important roles in African societies. As early as the second half of the 19th century, African intellectuals were using print technology to address the people. As radio technology was in its infancy during the first half of the twentieth century, Africans were gathering around re-diffusion stations and later around single receivers to listen to news and entertainment programming. In this tutorial, we will examine these histories of media and media technologies on the continent. Ultimately, we will explore the roles that media played in serving particular community needs and how communities also adapted new media technologies to fit local conditions. Media content has historically been determined based on standards beyond viewers', readers' and listeners' control. We will examine the influences that editors and political leaders on the continent have exerted on content as well as what forces they responded to. We will also further explore the media's role in major events on the continent, from governmental changes to the ending of apartheid in South Africa and the role that media have played in areas of conflict.

**Requirements/Evaluation:** Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

**Difference, Power, and Equity Notes:** Modern media developed in Africa as means of control and cultivating dutiful colonial subjects. However, media then emerged as sites of contestation and even tools with which colonial subjects challenged colonial rule. As such, this course immensely explores diversity, power and equity and how these all-important societal concerns are expressed through the media in Africa.

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

We think of the freedom to move as a mark of privilege. In the United States, passing a driving test, owning a car, and getting a passport are milestones that signal modernity and freedom. Likewise, we think of restrictions on movement as the domain of the underprivileged, such as the current and formerly incarcerated. But as the Covid-19 pandemic reveals, there have always been two sides to immobility: privileged as well as involuntary immobility. There are correspondingly two sides to mobility: those who move because they want to and others because they have no choice. In this class, students will explore conceptions of mobility as adventurous, free, and modern (as with jet-setting international elites). They will compare and contrast when mobility can be threatening, exclusionary, and limited (as recognized by the Black Lives Matter movement). This class invites students to interpret their environment through the lens of mobility and inequality in the time of coronavirus. Drawing on sociology, anthropology, cultural studies, geography, and migration studies, this interdisciplinary course offers a beginning conversation on the causes and consequences of the freedom to move--or to stay still.

*An American Family* was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the *An American Family* series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 14- to 18-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

Is "Asian American music" all music made by Asian Americans, music by Asian Americans specifically drawing on Asian heritage, or music engaging with Asian American issues? This course embraces all three definitions and the full diversity of Asian American musical experience. We will study the historical soundscapes of immigrant communities (Chinese opera in North America; Southeast Asian war refugees) and how specific traumatic political events shaped musical life (Japanese American internment camps). We will encounter works by major classical composers (Chou Wen-Chung; Chen Yi; Tan Dun; Bright Sheng) and will investigate the careers and reception of prominent classical musicians (Midori; Seiji Ozawa; Yo-Yo Ma). Afro-Asian fusions, inspired by civil rights protest movements, manifested in jazz (Jon Jang; Fred Ho; Anthony Brown; Hiroshima; Vijay Iyer) and hip hop (MC Jin; Awkwafina; Desi rappers). Asian Americans have been active in popular music at home and abroad (Don Ho; Yoko Ono; Wang Leehom; Mitski). Finally, we will investigate communal forms of Asian American music making that have crossed racialized and gendered boundaries (taiko drumming; Indonesian gamelan; belly dance; Suzuki method). This seminar is designed to develop research skills, as we pursue original fieldwork, archival research, and oral history interviews.

**Requirements/Evaluation:** Active class participation; two short papers (5-6 pp.) and a research term paper (12-15 pp.).

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Students with curricular experience in Asian American history or music studies.

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**Writing Skills Notes:** Students will write three papers during the semester: two 5-6 page papers and a 12-15 page research paper, written in stages. Students will receive detailed comments on each paper and at each stage of the research paper process, allowing them to build upon those comments in subsequent writing assignments.

**Difference, Power, and Equity Notes:** Political and cultural forces of exclusion not only determined Asian American musical participation in American music history but have shaped Asian American styles of music. We will study the history of Asian American political struggles as they have intersected with music and how Asian Americans have at certain points sought allegiance through music with other marginalized groups. We will explore as well popular media representations of Asian American musicians revealing race-based assumptions.

This seminar provides an overview of queer, women of color feminist, decolonial, and critical ethnic studies critiques of orthodox Marxism. Beginning with core texts from the tradition, we will examine a range of forms of labor and social positions that complicate Marx's emphasis on the white male industrial factory worker. In the first part of the seminar, we will study seminal texts that center reproduction, racial slavery, care and domestic work, indentured servitude, sex work, and migrant labor, and in the second half, we will turn to an array of practices that respond to and offer strategies to survive under racial capitalism. This seminar will equip students with critical understandings of the ways racial capitalism has centrally relied on the mass elimination, capture, and recruitment of different racialized and gendered bodies in and beyond the U.S. and how, through performance, the capitalist system of value and life under these conditions can be undone and reimagined.

**Requirements/Evaluation:** in-class discussion, short weekly posts, class presentation, final project

### **AMST 407 (S) Colonialism and Critical Theory (DPE) (WS)**

French philosopher Michel Foucault argued that "racism first develops with colonization, or in other words, with colonizing genocide." Many prominent philosophers have developed intellectual tools that can help us better understand the ongoing colonialisms that impact our world. At the same time, many of these same theorists--Foucault included--are criticized for failing to pay adequate attention to the colonialism that shaped their historical moments. Taking this paradox as our jumping-off point, this course will examine prominent philosophical and theoretical texts and assess their utility for understanding processes of colonialism, imperialism, and militarism. We will also explore how the interventions of Postcolonial Theory and Critical Indigenous Theory highlight gaps in prominent theories of political-economy, ideology, biopower, race, gender, sexuality, and more. How do ideas like orientalism, settler-colonialism, sovereignty, or decolonization challenge the traditional "canon" of critical theory? How do intellectual ideas evolve over time, and how can we use these tools to make sense of a complex world too-often organized around fundamental inequalities? In our class meetings students will develop the reading and discussion practices necessary to parse dense theoretical texts, and practice deploying theoretical concepts to better understand complex philosophical, ethical, and political questions.

**Requirements/Evaluation:** Assignments will include participatory discussion, weekly responses to assigned readings, a midterm essay exam, and a final paper.

**Prerequisites:** Introductory course in American Studies, History, Native and Indigenous Studies, English, or Philosophy; or some prior coursework on colonialism, postcolonial theory, or critical theory

**Enrollment Limit:** 15

**Writing Skills Notes:** This course will develop student writing skills through short reading-response papers and smaller "low stakes" writing assignments, combined with a semester-long project that will break the research and writing process into manageable components, including revision and peer review.

**Difference, Power, and Equity Notes:** This course explores the intersections of race, gender, sexuality, class, and other social structures often organized around inequality. **Cross-listings:** AMST 490 ENVI 491 HIST 491

**Secondary Cross-listing**

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

**Class Format:** Students will be assigned a tutorial partner, and tutorial pairs will meet with the professor for one hour each week at a regularly scheduled meeting time.

**Requirements/Evaluation:** typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

Indigenous movements for land, rights, and cultural preservation have spread to and originated in all corners of the world. However, the global nature of these movements at times obscures ways of being Indigenous in differing contexts. This course analyzes Indigeneity in both the United States and Russia today. Through reading and analyzing ethnography, theory, and literature, it focuses on Indigenous peoples in a comparative context. Rather than prioritizing concern with Indigenous peoples emerging from the US, it attempts to demonstrate what Indigeneity has been in both the United States and Russia and what it is and means today. It asks the following questions: what is Indigeneity and who is Indigenous; how is Indigenous identity constructed and by whom; and what convergences and divergences exist in Indigeneity between the US and Russia or for that matter in other contexts? To help answer these questions, in this course we will grapple with Indigeneity as a social category and other social formations, especially ethnicity, nationality, and race. Topics include: Indigeneity and the State, Revitalization and Resurgence, Indigenous People and Nature Protection, and Hemispheric and Global Indigenities.

**Requirements/Evaluation:** Weekly post to course Glow discussion page, 1 or 2 times leading class discussion on the assigned readings, 1 short presentation, 1 extended project with regular short writing submissions, 1 final paper and final presentation

**Prerequisites:** None

For the extended project, we will have both peer-review and instructor feedback for all project assignments. In peer-review and instructor feedback, comprehension of the material and the content of the writing, improvement in writing style and clarity, and development of voice will be discussed.

**Difference, Power, and Equity Notes:** In the course, students will learn about Indigeneity as a context-specific social formation. It understands Indigeneity as a category of difference with past and present importance. We will read about, discuss, and write about Indigeneity as a social category, along with other social categories it arose alongside (such as race, ethnicity, and nationality), and how it has been mobilized by both those who identify as Indigenous and by those who designate others as Indigenous.

This course provides a social analysis of and practical engagement with mindfulness in the US today. It considers the modern applications of Buddhist meditation as a tool to improve awareness of the related processes of mind, behavior, and emotions within landscapes structured by racism, sexism, and other systemic inequalities. We consider how mindfulness relates to Buddhist discourses as well as the rapid rise of fields like contemplative neuroscience, affective neuroscience, and integrative neurobiology. How can mindfulness help people communicate more effectively--be they doctors or patients, teachers or students? How has the exploding research on mindfulness and meditation since 2000 help us understand the intersection of human emotions, behaviors, and relationships? We train in a variety of Buddhist meditation practices through the semester including forest bathing, mindfulness, compassion meditation, while unpacking the subjective experience of our minds and emotions first-hand. Students will be asked to train in mindfulness practices the entire semester while studying models of the mind developed by research in clinical and evolutionary psychology, affective neuroscience, and interpersonal neuroscience.

This class engages with the methods of medical anthropology & medical sociology to help students design and implement ethnographic projects that explore health on campus or our wider community. Along the way we consider how disruptive moments like COVID-19 can reveal underlying social inequalities of healthcare access, health outcomes, and well-being; for which we propose innovative and student-focussed solutions. Students will learn and use design thinking, data visualization, and participatory ethnography while engaging with a variety of qualitative methods such as semi-structured interviews, focus groups, and qualitative surveys. We situate and explore our ethnographic projects within a campus and wider communities that are always already structured by power, privilege, and intersectional identities that shape health and well-being. We explore the field of narrative medicine and medical anthropology by developing and practicing skills in active listening, open dialogue, mindfulness, empathy, and curiosity that can profoundly shape ethnographic as well as the patient/provider encounters. For context, we read ethnographic case studies that explore a variety of topics including how structural racism and implicit bias shape clinical medicine & medical education in the US, how concepts of sexual citizenship can reshape our understanding of campus sexual assault, how the spread of US psychiatry has shaped a global landscape of mental health, and how queer activism responded to the HIV/AIDS crisis in the US. Our goals are to create participatory research projects that both explore and alter our habitual practices and individual ways of seeing the world around us.

**Requirements/Evaluation:** Weekly attendance, 3 written fieldnotes (3000 words), weekly writing & fieldwork exercises in class and out of class, a final presentation that includes data visualizations and analysis of research findings.

**Primary Cross-listing**

Deconstructing reductive Saharanism, which the course conceptualizes as a universalizing discourse about deserts, this course seeks to critically examine the myriad assumptions that are projected upon deserts across times and cultures. In addition to their depiction as dead and empty, deserts have become a canvas for the demonstration of religiosity, resilience, heroism and athleticism. Cultural production, particularly literature and film, do, however, furnish a critical space in which important questions can be raised about deserts' fundamental importance to different cultures and societies. Drawing on novels, films, and secondary scholarship, the course will help students understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the desert sub-genre of African, Euro-American, and Middle Eastern literatures. Whether grappling with transcontinental issues of climate change, cannibalization of biodiversity or overexploitation of natural resources, desert-focused cultural production invites us to interrogate the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature.

From Sufi rituals to revolutionary uprisings, music has long played a central role in the social, political, and religious life of the Arab world. This is especially audible in the modern era, when new technologies and institutions began to record, amplify, and broadcast the region's sounds, preserving centuries-old traditions while also producing new forms of popular music. This course introduces students to Arab musical genres and practices as they developed from the late nineteenth century. We will cover a broad geographical range, exploring the classical Andalusian repertoires of Algeria, ecstatic dervish chants in Egypt, patriotic pop tunes from Lebanon, and other topics. To highlight connections between musical traditions as well as their unique local features, we will ask questions such as: What can music tell us about interactions between sacred and secular life? How is music used to define social groups and negotiate identity, gender, and class? Which musical characteristics are associated with Arab "heritage" and "modernity," and how are these performed? In what ways does music shape everyday life in the Arab world? Class sessions and discussion will be based on academic readings and at-home listening assignments. No previous knowledge of Arabic or Arab music are required.

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Amazigh poetics in the Maghreb, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? What is the connection between the recent "boom" of English translations of Indigenous texts and neoliberalism, multiculturalism and neo-colonialism? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

**Requirements/Evaluation:** active class participation, several short response assignments (3-4 pages), two film reviews ( 1 page ), a performance project, and a final paper (7- to 10-pages)

**Writing Skills Notes:** This course will enable students to write weekly while engaging with various forms of writing skills: articulating arguments in

short response papers (3-4 pages each), developing visual criticism through writing two film reviews, (1 page each), journaling through writing a personal reflections on a performance project, and honing research language in producing a final paper of 7-10 pages. Instructor's feedback and peer review sessions will include review of drafts and argumentative structures.

**Difference, Power, and Equity Notes:** At the heart of this course is the history of global Indigenous struggle for liberation and decolonization. The various novels, short stories, poems, films and other texts that students will engage with narrate histories of colonial dispossession, racial oppression, economic subjugation and dehumanization of minoritized Indigenous communities in the Americas, North Africa and the Middle East.

**ARAB 402 (S) Travel Literature in Arabic: The World through Arab/Amazigh Eyes (DPE) (WS)**

Arabic travel literature is a very rich genre that spans different periods and geographies, reflecting Arab/Amazigh writers' understanding of themselves and the world around them. From India to Russia to Cuba and Namibia, Arabs/Amazighs have traveled the world and inscribed their observations about different people and cultures in a significant literary output. This course draws on poems, dictionary entries, short stories, novels, films, and memoirs to initiate students to the various ways Arab/Amazigh travelers--ancient and contemporary--made sense of other cultures through their experience-based or fictionalized travel accounts. Reading travel writings about West Asia, Turkey, Africa, Europe, and the Americas, students will have a complicated understanding not only of the Arabic-speaking world, but also of the forces that shaped travelers' representations of other people and their cultures. The course will build students' linguistic autonomy and provide them with the analytical skills they need to examine copious literary texts independently. Students enrolled in this course are required to use the language resources available on campus to improve their language skills in order to benefit maximally from the literary and intellectual opportunities offered in the texts under study.

**Requirements/Evaluation:** Weekly responses on Glow, active participation in class, one five-page essay, and one ten-page final paper. There is no exam in this course.

**Prerequisites:** 302 or equivalent.

**Enrollment Limit:** 10

**Enrollment Preferences:** Arabic major or students intending to major in Arabic. Students whose Arabic is strong enough to pursue a literary course in Arabic.

**Expected Class Size:** 6

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** Students will improve their writing in Arabic by: 1. Writing weekly responses on Glow (500 words per week; 250 words per session) 2. One five-page essay for the mid-term 3. one ten-page final research paper

**Difference, Power, and Equity Notes:** The course will help students understand how travel is enmeshed in power relations and discursive production about other people. Of all literary genres, travel literature is more likely to slip into exoticism, essentialization, and overgeneralization about people and place. However, an active reading that is aware of these slippages will also open up literary texts to a rich learning about geography, politics, history, landscape, and culture.

**ARAB 404 (F) Topics in Contemporary Arab Cultures (DPE) (WS)**

What issues do contemporary Arab societies and cultures face? Through an exploration of various current issues, this course will introduce you to questions that engage Arab thought in modern times. What issues are central to women and young people today? How do the Arabic language and Arab identity intersect within increasingly multilingual and multicultural communities? What issues do minority communities in Arab countries face? How does globalization impact Arab societies? How do literature and art continue to reflect aspirations, challenges, and defiance? The course will explore these and other issues as represented in the language of print, internet, television, movies, and social media, and we will employ linguistic and paralinguistic analysis of these resources. Taught in Arabic.

**Class Format:** The course involves two main sessions and a third to be organized as a group or broken into conversation sessions.

**Requirements/Evaluation:** Class participation, daily writing and reflections, blogs, quizzes, leading a class presentation and discussion, and a final project.

**Prerequisites:** ARAB 302 or equivalent.

**Enrollment Limit:** 18

**Enrollment Preferences:** If the course is overenrolled, preference will be given to Arabic majors.

**Expected Class Size:** 7

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** Students will engage in daily writing and reflections involving prose responses to discussion prompts, movies, YouTube videos, and articles. The students will also write blogs, commentaries, and a final project. The instructor will give daily feedback on students' writing as well as training in writing skills to advance their writing abilities.

**Difference, Power, and Equity Notes:** The students will engage in an exploration of social, political, and economic realities in Arab societies across state and community boundaries. They will examine similarities and differences across a variety of contexts involving differential power dynamics, biases, and gender roles. They will reflect on issues of power based on internal and external factors in Arab societies as positioned in a diverse region with unfolding political, social, and religious changes.

**ARAB 405 (F) From Page to Stage: Singers and Songwriters of Modern Arab Music (DPE) (WS)**

Since its earliest history, Arab music has accorded special status to the singing of poetry. Over the last century, many of the most popular songs across the Arab world were the result of poets, composers, and singers collaborating to turn written words into performable masterpieces. In this course, we will explore a variety of famous Arabic songs, examining how they were written, edited, performed, and, sometimes, censored and banned. Questions that we will ask in this course include: What is the process through which Arabic songs are made? Who is the "author" of the final song? How are song texts transformed when prepared for concert stages and recording studios? And what, in this process, shapes the success and popularity of a song? We will read song lyrics (poems) as literary texts to consider their language and poetic characteristics while also analyzing how songs can be used as a lens to think about politics, identity, religion, class, gender and broader topics related to modern Arab society. Students will become familiar with the lives and works of major singers, such as Umm Kulthum, Fairuz, and Marcel Khalife, and poets, such as Ahmad Shawqi, Nizar Qabbani, and Mahmoud Darwish. Readings and discussion will be in Arabic.

**Requirements/Evaluation:** Regular participation in class discussion; weekly listening assignments; biweekly one-page unit responses; final project/paper on a singer or songwriter from the twentieth or twenty-first century.

**Prerequisites:** ARAB 302 or equivalent.

**Enrollment Limit:** 19

**Enrollment Preferences:** If course is overenrolled, preference will be given to Arabic majors.

**Expected Class Size:** 8

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** Students will develop their Arabic writing skills by submitting one-page unit responses every two weeks and a final paper of 8-10 pages on a topic of their choice.

**Difference, Power, and Equity Notes:** Through the lens of music, this course critically examines topics such as media censorship, power dynamics related to gender, and representations of race and class.

**Cross-listings:** ARAB 413 GBST 413 HIST 413 ENVI 413

### Secondary Cross-listing

What have been the most consequential ideas of the last 100 years? This course will explore some of the more audacious and ambitious plans to alter natural and urban environments in the late 19th century to the early part of the 21st, specifically those that sought to improve the human condition through science, engineering, and technology. By building big bold things, politicians around the globe sought to bring prosperity to their nation and embark on a path of modernity and independence. Through an intellectual, political and environmental history of major construction projects such as the building of the Suez Canal and the Aswan Dam, extensive river valley developments in Iran, Turkey and Iraq, and utopian and futuristic city planning in western Asia, students will consider how, with the benefit of hindsight, to best evaluate the feasibility of such bold schemes. Who has benefitted and who has not, what have been some of the unanticipated consequences, what was sacrificed or neglected, and what do these projects tell us about the larger processes of global capitalism, decolonization, and climate change?

**Requirements/Evaluation:** A presentation, shorter writing assignments and a longer research paper (20-25 pages) in the end. Students will submit shorter drafts of final paper in order to receive constructive feedback prior to final submission.

**Prerequisites:** None

**Enrollment Limit:** 15

Prior to getting to that point, students will submit an annotated bibliography, a two page proposal, a five and eventually a 10 page draft. Each draft will receive extensive comments and suggestions from peers and instructor. In this way, the student will think about the process of writing and the best way to set themselves up for success.

**Difference, Power, and Equity Notes:** This course examines how a number of different nations in Africa and Asia sought to improve the living conditions of the masses through major construction project. Though ostensibly these schemes were supposed to improve the livelihood of all, often they primarily benefitted the few - the urban elite - and not the general population. This course will therefore explore how certain class, gender and racial lines were solidified and maintained through economic development plans.

### ARTH 206 (S) What is Islamic Art? (DPE) (WS)

**Cross-listings:** REL 204 ARTH 206

### Primary Cross-listing

Through a deep engagement with primary sources--visual, performative and textual--this tutorial introduces students to global cultures that have participated in the production of Islamic art and culture through the centuries. Through a diverse set of readings, we will discuss how Islamic art is viewed today. How did, for instance, Colonialism and Orientalism from the 18th to the 20th centuries create an entrenched narrative for the study of the field, that continues to hold sway to this day? How have Muslim cultures defined their own artistic production? In particular, how can specific artworks, such as figural painting or palace architecture, be understood as "Islamic"? What are some key scholarly debates around the term "Islamic Art"? The tutorial is specifically designed keeping in mind the period of soul-searching the field is currently going through, even to the point of questioning the very term "Islamic art" and its epistemological parameters. By familiarizing students to an important discipline in art history, the aim of the tutorial is to provide alternate methodologies as well as epistemologies that run parallel to more mainstream or familiar avenues of study.

**Requirements/Evaluation:** focused bi-monthly writing assignments, 5-7 pages in length, and bi-monthly peer response papers, 2 pages in length.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Art History majors and seniors, Religion majors

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

It is designed to teach students how to make clear, well-articulated arguments. Students will receive extensive feedback every other week on their writing assignments from the instructor and their peers. There will also be a comprehensive mid-semester review from the instructor.

**Difference, Power, and Equity Notes:** In addition to introducing students to an important field of art history, the tutorial analyzes how Islamic art was codified and examined during the colonial and post-colonial periods, and how that understanding has come to define the field over the last century. The course will encourage students to challenge longstanding biases and assumptions when studying these artworks.

### **ARTH 301 (F) Methods of Art History (WS)**

This course on the methods and historiography of art history offers art-history majors an overview of the discipline. The course surveys influential definitions of the discipline, the evolving tasks it has set itself, and the methods it has developed for implementing and executing them. Works of art will inevitably enter into our discussions, but the main objects of study will be texts about art as well as texts about methods for an historical study of art. The course is designed to offer a pluralistic perspective on key theoretical and methodological approaches to art history. Readings will regularly compare the Western discipline with frameworks from other parallel cultures. Topics include: style and periodization; iconography, narratology, and phenomenology; the social functions of images and the social history of art; the materiality of art; race, gender, and sexuality; the global scope of art and art history.

**Class Format:** In the fall of 2022, this class will meet in person. We will meet altogether once per week for a lecture. We will meet a second time each week in a seminar format.

**Requirements/Evaluation:** six 1,000-word analytical essays plus one 2,000-word writing project. Participation in class discussion. Attendance.

**Prerequisites:** any prior ARTH course (one or more 100-level ARTH course[s] recommended). In the absence of prior coursework in art history, permission of instructor is necessary for admission.

**Enrollment Limit:** 19

**Enrollment Preferences:** The course is limited to art-history and (with permission) art history/studio majors. If the course is over-enrolled, preference will be given to senior AH majors, then juniors. Second-year students intending to major in art may enroll with permission.

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Satisfies the ARTH 301 requirement for the art-history major. Will satisfy the methods/junior seminar requirement for the history/studio major, but students wishing to do so must have permission of instructor to enroll.

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Students submit one 1,000-word essay every other week, for a total of six short essays. In addition, they submit a 2,000 writing project at the end of term. The purpose of the essays is to analyze the arguments and rhetoric of influential art-historical scholarship and criticism. The subject of the course, then, is how to write as an art historian. We discuss not only the content of the essays we read and write but also the form, both in class and in office hours.

**Primary Cross-listing**

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative

period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the current digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. Further, students will explore how the dialogues created between objects, individuals, and space often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

**Difference, Power, and Equity Notes:** This course explores issues of agency, authenticity, and appropriation as it applies to African artifacts displayed within the contexts of Western art museums. Through discussions of cultural capital, rights of seeing, and the politics of representation, students will analyze how the meaning of "African art" has been largely dictated by a Western museum culture and how this hegemony is currently being disrupted through strategic exhibition and display practices and narratives.

*An American Family* was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the *An American Family* series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 14- to 18-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

The Cold War was far more complex than a military conflict, with battles waged more in the symbolic than in the physical realm. The Cold War was therefore "everywhere and nowhere," as new superpowers maneuvered to maintain geopolitical balance. Through a transnational lens this course considers the Cold War as an aesthetic phenomenon with many facets, to recover how artistic practices unfolded myriad--and often conflicting--ideas regarding power, cultural influence, modernization, and revolution.

**Requirements/Evaluation:** Active participation, leading discussion, and five four-page writing assignments.

**Prerequisites:** One ARTH course.

**Enrollment Limit:** 12

We will have five four-page writing assignments, spaced throughout the semester, which will incorporate our class discussions and research. Students will receive critical feedback on both form and content from their professor and from their peers.

**Difference, Power, and Equity Notes:** This course fulfills DPE requirements through historical and visual analyses that examine the contestations of power that defined the Cold War era and their ramifications in the shaping of notions such as modernism, modernization, progress, citizenship, and resistance. The course takes a transnational perspective to analyze diverse artistic practices in relation to race, gender, and class dynamics, and to issues of cultural imperialism, nationalism, revolutionary politics, and globalization.

**Secondary Cross-listing**

This tutorial offers a survey of Japanese art and visual culture across time and media, with particular attention to two areas: the links between different artistic media, and the relationship between art and its audience. We'll begin with early court diaries and related scroll paintings as examples of "private" art. Then we'll move through progressively more public visual media of the 17th through 21st centuries: Kanô screen painting; nô, kabuki, and puppet theater; premodern architecture; popular woodblock prints; turn-of-the-century photography; and finally some examples of contemporary popular culture like comics, animation, and/or film. We will focus on the specificities of each medium while simultaneously developing formal visual reading skills that can work across different media.

**Class Format:** Students will meet with the instructor in pairs or trios for 75 minutes each week. This tutorial is offered simultaneously at the 300 level for undergraduates and at the 500 level for graduate students: graduate students will be paired with other graduate students and undergraduates with undergraduates.

**Requirements/Evaluation:** For undergraduates: weekly participation, 5 short written assignments in alternate weeks (ranging from 1 to 5 pages), and several 1-page peer critiques. For graduate students: weekly participation and 3-4 short written exercises that build toward a final 15-page research paper.

**Prerequisites:** No previous knowledge of Japanese art or culture is required. Students with similar preparation and interests will be paired with one

another.

From palm leaf manuscripts to scrolls to Islamic codices, books have long served as vehicles of religious, cultural and artistic exchange in Asia. Owing both to their portability and status as finely crafted art objects, books have transmitted ideas across the continent, spreading courtly styles of painting from China to India, esoteric Buddhist teachings from Kashmir to Tibet and Mongolia, as well as the Quranic arts of calligraphy and illumination from Islamic South Asia to Southeast Asia. This co-taught seminar will highlight the interwoven history of book arts as it developed and disseminated across different regions of Asia. The course will also introduce students to the major art forms of the book, such as painting, calligraphy and illumination. The aim of the seminar is to understand the book as object while also investigating its content and its larger cultural significance. A number of class meetings will take place in the Chapin Library, where students will have the opportunity to study original manuscripts from the Special Collections. **ARTH 332 (S) Abstraction in Action: Global Modern and Contemporary Art (WS)**

Abstraction, be it gestural or geometrical, was a protagonist in the story of global modernisms and continues to be a powerful visual language in

contemporary art. The term "abstraction" may first appear straightforward, but its associations are quite complex: in varying historical contexts, abstraction has signaled formalist rupture, cultural co-optation, revolutionary politics, as well as racial, feminist, and queer critique. This object-oriented course will delve deeply into non-representation in global modern and contemporary art; we will supplement our careful study of artworks with primary documents, as well as with canonical theoretical frameworks and the reassessments that have sought to complicate these. This seminar is organized into two weekly sessions--a lecture and a discussion--to introduce key concepts and issues and to allow for ample group dialogue on these. Ultimately, the course seeks to revise and expand the cartographies and ontologies of abstraction in the 20th and 21st centuries. As such, it welcomes students with an interest in modern and contemporary art, yet does not require previous coursework in either.

This course will explore the various forms of installation and site-specific artworks created by Latinx artists for both museums and public space. We will examine the ways in which Latinx artists have used space as a material in the production of artworks and how this impacts the works' meanings and the viewer's experience. Within the context of U.S. Latinx culture and history, we will connect notions of space with ideas about cultural citizenship, civil rights, and social justice. A variety of art forms will be studied, from traditional to experimental, including murals, sculpture, performance, video, and several multimedia, interactive, or participatory projects. While establishing a historical lineage and theoretical frameworks for analyzing this growing genre, we will pay particular attention to how these works engage urban space and often challenge the institutional assumptions of museums and curatorial practice. This seminar examines connections between Latinx and Latin American art through a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time: LA/LA that opened in 2017. While the chronological span for the overall project reaches from Pre-Columbian art to present, we will focus on modern and contemporary art after the 1960s and consider key themes of art and activism, borders and diaspora, globalism and modernism, and popular culture and science fiction in the visual arts. Diverse in scope, these shows explored important developments in the arts of the Americas from the late-20th and 21st centuries, including, abstraction, Chicano muralism, Conceptual art, craft, feminist art, Kinetic art, Modernist design and architecture, social practice, and queer activism. Students will pursue individual research projects directly related to the art exhibitions we study, and examine photography, performance, painting, sculpture (including installation and participatory art), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history.

We will treat writing as a process; revision is built into the syllabus. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Course themes of art and activism, borders and diaspora, globalism and modernism in the visual arts and how they intersect with the exploration of difference, power, and equity and the various ways that artists have produced works and developed practices that critically probe this intersection. Through discussion, presentations, and writing assignments students will develop skills in analyzing artworks and exhibitions that respond to and/or document social inequality and social injustice.

This tutorial offers a survey of Japanese art and visual culture across time and media, with particular attention to two areas: the links between different artistic media, and the relationship between art and its audience. We'll begin with early court diaries and related scroll paintings as examples of "private" art. Then we'll move through progressively more public visual media of the 17th through 21st centuries: Kanô screen painting; nô, kabuki, and puppet theater; premodern architecture; popular woodblock prints; turn-of-the-century photography; and finally some examples of contemporary popular culture like comics, animation, and/or film. We will focus on the specificities of each medium while simultaneously developing formal visual reading skills that can work across different media.

**Class Format:** Students will meet with the instructor in pairs or trios for 75 minutes each week. This tutorial is offered simultaneously at the 300 level for undergraduates and at the 500 level for graduate students: graduate students will be paired with other graduate students and undergraduates with

undergraduates.

**Requirements/Evaluation:** For undergraduates: weekly participation, 5 short written assignments in alternate weeks (ranging from 1 to 5 pages), and several 1-page peer critiques. For graduate students: weekly participation and 3-4 short written exercises that build toward a final 15-page research paper.

**Prerequisites:** No previous knowledge of Japanese art or culture is required. Students with similar preparation and interests will be paired with one another.

**Enrollment Limit:** 10

**Enrollment Preferences:** Graduate Art students, followed by undergraduates majoring in Art History or Comparative Literature.

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of colonial and modern India through the history of its most important city.

**Requirements/Evaluation:** assessment will be based on class participation and weekly written responses to readings (2 pages), 2-3 short papers (4-5 pages), leading to an oral presentation and final paper (8-10 pages). All writing assignments are structured to build up the final paper.

How should people treat each other? What constitutes human nature and does it tend towards good or evil? What is the proper relationship between the individual and larger units of society, from the family to the state? These are some of the key questions that the school of thought that has come to be known as "Confucianism" addresses. As the dominant moral and political philosophy for thousands of years in much of East Asia, Confucianism has shaped our world, past and present, in innumerable ways. In this class we will focus on the foundational texts of the Confucian tradition: the *Analects* (purported to record the words of Confucius himself), the *Mengzi* (often romanized as "Mencius"), the writings of Xunzi, and the *Classic of Filial Piety*. Beyond those questions noted above, we will further examine how these texts construct their arguments; how they were first composed, compiled, and circulated; how they employ such key concepts as "humaneness" (*ren*), "moral power" (*de*), and "ritual propriety" (*li*); and how they functioned as part of the larger philosophical, linguistic, political, and historical context that we now think of as "early China."

**Secondary Cross-listing**

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "pasts" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, mesology and mythology, amnesia and nostalgia, and diaspora and settlement in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or COMP and language learners wishing to take the course in Chinese should register under CHIN.

**Requirements/Evaluation:** attendance and participation, five 5-page papers, five peer-review and critique papers, revisions on selected papers.

Detailed writing prompts will be provided to students to generate and organize ideas for each essay. Students are also required to revise key paragraphs, sections, and papers throughout the semester.

**Difference, Power, and Equity Notes:** This course provides students with the opportunity to analyze and critique the following entangled modernist dualisms: present and past; memory and representations; diaspora and settlement; transnationalism and localism. This course provides a social analysis of and practical engagement with mindfulness in the US today. It considers the modern applications of Buddhist meditation as a tool to improve awareness of the related processes of mind, behavior, and emotions within landscapes structured by racism, sexism, and other systemic inequalities. We consider how mindfulness relates to Buddhist discourses as well as the rapid rise of fields like contemplative neuroscience, affective neuroscience, and integrative neurobiology. How can mindfulness help people communicate more effectively--be they doctors or patients, teachers or students? How has the exploding research on mindfulness and meditation since 2000 help us understand the intersection of human emotions, behaviors, and relationships? We train in a variety of Buddhist meditation practices through the semester including forest bathing, mindfulness, compassion meditation, while unpacking the subjective experience of our minds and emotions first-hand. Students will be asked to train in mindfulness practices the entire semester while studying models of the mind developed by research in clinical and evolutionary psychology, affective neuroscience, and interpersonal neuroscience.

From palm leaf manuscripts to scrolls to Islamic codices, books have long served as vehicles of religious, cultural and artistic exchange in Asia. Owing both to their portability and status as finely crafted art objects, books have transmitted ideas across the continent, spreading courtly styles of painting from China to India, esoteric Buddhist teachings from Kashmir to Tibet and Mongolia, as well as the Quranic arts of calligraphy and illumination from Islamic South Asia to Southeast Asia. This co-taught seminar will highlight the interwoven history of book arts as it developed and disseminated across different regions of Asia. The course will also introduce students to the major art forms of the book, such as painting, calligraphy and illumination. The

aim of the seminar is to understand the book as object while also investigating its content and its larger cultural significance. A number of class meetings will take place in the Chapin Library, where students will have the opportunity to study original manuscripts from the Special Collections. Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. We will also examine contemporary arguments for Taiwan as part of China. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; *Dialogo*, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619, Rudolphine Tables 1627); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (*Principia Mathematica*: laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (*Miscellanea curiosa*, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (*Atlas Coelestis*, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); George Ellery Hale (Mt. First editions will be available in Williams' Chapin Library of rare books, where we will meet in an adjacent classroom. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the Gutenberg Bible (c. 1453) and a Shakespeare First Folio (1623, with a discussion of astronomical references in Shakespeare's plays). On weeks when they are not writing papers, they are expected to critique their tutorial partner's paper as peer reviewers. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. Students are also required to revise key paragraphs, sections, and papers throughout the semester.

**Difference, Power, and Equity Notes:** This course provides students with the opportunity to analyze and critique the following entangled modernist dualisms: present and past; memory and representations; diaspora and settlement; transnationalism and localism. By discussing texts produced from the PRC, Hong Kong, Taiwan, and other diaspora areas in these "post" societies, this course asks students to explore how literary and cinematic narratives invoke (and erase) differences, and challenge (and consolidate) borders.

### CLAS 214 (S) Athletics and Literature in Ancient Greece (WS)

**Cross-listings:** COMP 284 CLAS 214

### Primary Cross-listing

The modern Olympic games are one of the most visible traces of ancient Greek influence on contemporary culture. Less well-known, however, are the complex and challenging poems (originally songs) of Pindar and Bacchylides that celebrated the victors of the archaic Greek games. These victory odes are a rich source for the study of Greek culture, from their vivid descriptions of heroic feats to their philosophical claims about human life and divine favor. Athletic competition provides the impetus for these songs and constitutes one of their major themes, yet their significance extends far beyond a single athlete or festival. In this course, we will interrogate the relationship between athletics and literary production in the ancient Greek world. We will use both primary and secondary sources to develop familiarity with major festivals, games, events, and figures, and use that knowledge to contextualize our analysis of Greek literature. Ancient Greek athletic discourse will thus provide an entry point to broader reflections on the literary construction and representation of the body and its movement, as well as the interplay between literature and its cultural contexts.

**CLAS 330 (S) Plato (WS)**

**Cross-listings:** PHIL 330 CLAS 330

**Secondary Cross-listing**

Plato is one of the most important and influential thinkers in the history of the western tradition. His depiction of the trial and death of Socrates is one of the classics of western literature, and his views on ethics and politics continue to occupy a central place in our discussions 2400 years after they were written. It is, in fact, quite difficult to get through any course of study in the liberal arts without some familiarity with Plato. Nevertheless, comparatively few people realize that the views we commonly think of as "Platonic" represent only one strand in Plato's thought. For example, we commonly attribute to Plato a theory of the Forms on the basis of his claims in the so-called "middle dialogues" (mainly Republic, Phaedo, and Symposium). However, in his philosophically more sophisticated and notoriously difficult later dialogues (such as the Parmenides, Philebus, Sophist and Statesman), Plato engages in radical criticism and revision of his earlier views. In this course, we will spend the first third of the semester attempting to understand the metaphysics and epistemology in Plato's middle dialogues. We will spend the balance of the semester coming to grips with Plato's arguments in the later dialogues. We will read several complete dialogues in translation, and will also read a wide variety of secondary source material.

Consciousness is considered as the 'last great mystery of science.' In this course we are going to delve into one of the most well-studied areas of this mystery, that is visual consciousness. Do you really perceive everything you look at? Are you aware of everything you see? Is our visual experience a grand illusion? We will start our investigation of such questions by reading about various approaches in understanding human consciousness. Then, we are going to apply these approaches to perception, and discuss theoretical and empirical controversies in visual consciousness. Finally, we are going to focus on evaluating empirical studies that attempt to resolve such controversies. The goal of this course is to build a bridge between theory and experimentation by learning how to interpret the results of scientific studies to shed light on theoretical and philosophical debates in the literature.

It'd be perfectly natural to say "I might've left the stove on", then check the stove, then say "I didn't leave the stove on". But perform those exact same steps in a different order--check the stove, say "I didn't leave the stove on", then say "I might've left the stove on"--and something's gone quite wrong. Conversation is dynamic--the back and forth exchange of information is a process that grows and adapts to the surrounding context. The order in which you say things matters, and it matters for what you communicate what actions you take and what events happen around you. In this course, we will investigate dynamic communicative phenomena and discuss competing theoretical explanations about how they're interpreted. Of particular interest will be the extent to which discourse dynamics are built into the meanings of linguistic expressions vs. the extent to which they're consequences of our rational cognition. Is a sentence's relation to previously uttered sentences similar to its relation to extra-linguistic events? How much inference goes into interpreting what's said? In pursuing the answers to these questions, we will discuss both classic and contemporary theories from philosophy and linguistics.

This course has a clear purpose. If you had signed up for a course in biology, you would know that you were about to embark on the systematic study of living organisms. If you were registered for a course on the American Civil War, you would know that there had been an armed conflict between the northern and southern states in the 1860s. But if you decide you want to study "culture," what exactly is it that you are studying? The aim of this course is not to come up with handy and reassuring definitions for this word, but to show you why it is so hard to come up with such definitions. People fight about what the word "culture" means, and our main business will be to get an overview of that conceptual brawl. We will pay special attention to the conflict between those thinkers who see culture as a realm of freedom or equality or independence or critical thought and those thinkers who see culture as a special form of bondage, a prison without walls. The course will be organized around short theoretical readings by authors ranging from Matthew Arnold to Laura Mulvey, but we will also, in order to put our new ideas to the test, watch several films (mostly of the class's choosing) and listen to a lot of rock and roll. Why do you think culture matters? Once you stop to pose that question, there's no turning back.

First uttered by Soviet leader Nikita Khrushchev in 1956, the phrase "cult of personality" was formulated to discredit the hero-worship that accompanied Joseph Stalin's iron-fisted rule of the Soviet Union. Since then, the phrase has gained currency as a condemnation of a variety of seemingly all-powerful leaders in oppressive political regimes, including China's Mao Zedong, Iran's Ayatollah Khomeini, and the ruling Kim family in North Korea. In this course, we will examine the phenomenon of the cult of personality from a variety of perspectives, beginning with the cult surrounding Stalin and ending with that of Vladimir Putin. Our course material will encompass scholarship from multiple disciplines, including history, sociology, political science, cultural and media studies, as well as artistic expression typically labeled propaganda in literature, the visual arts, and film. Although our course will begin in the Soviet Union and end in contemporary Russia, we will explore how the cult of personality has been adapted and updated for different cultural and political purposes in fascist Germany and Spain, China, Iran, North Korea, and Cuba. *All readings will be in English, and all films will have English subtitles.*

At the same time as the individual human being in possession of a distinctive personality was taking on enormous importance in politics, philosophy, literature, and the visual arts, early modern Europeans were encountering unprecedented levels of cultural diversity. In this interdisciplinary course, we will consider these two developments both separately and together. As Renaissance humanists were acquiring a sophisticated understanding of the distance between the present and various European pasts (the recent medieval past and the remote history of antiquity), they were also coming into contact with non-European cultures in Africa, the Americas, and Asia via trade and economic development, imperial expansion, and religious conversion. Always at stake in these encounters was the question of who counted as an individual; the self was not considered to be intrinsic to human nature but rather the product of historical and cultural developments. Themes will include religious pluralism, the sacred and the secular, vernacularity, exploration and empire, the relationship between mind and body, slavery, trade, wealth, gender, self-fashioning, and style. We will consider such English writers as the Pearl poet, More, Marlowe, Spenser, Shakespeare, Browne, and Milton; such continental intellectuals as Descartes, Erasmus, Las Casas, and Castiglione; and such continental artists as Michelangelo, Velázquez, Bruegel, and Rembrandt.

Deconstructing reductive Saharanism, which the course conceptualizes as a universalizing discourse about deserts, this course seeks to critically examine the myriad assumptions that are projected upon deserts across times and cultures. In addition to their depiction as dead and empty, deserts have become a canvas for the demonstration of religiosity, resilience, heroism and athleticism. Cultural production, particularly literature and film, do, however, furnish a critical space in which important questions can be raised about deserts' fundamental importance to different cultures and societies. Drawing on novels, films, and secondary scholarship, the course will help students understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the desert sub-genre of African, Euro-American, and Middle Eastern literatures. Whether grappling with transcontinental issues of climate change, cannibalization of biodiversity or overexploitation of natural resources, desert-focused cultural production invites us to interrogate the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature.

Though European border management today seeks to limit and control movement, the Mediterranean region is a historical site of mediation between cultural differences and religious views. This course centers primarily on the works of migrant intellectuals and artists from North Africa and the Middle East, who have emerged from the Mediterranean region to become a significant part of the new voice of Europe. Borrowing from Deleuze and Guattari's definition of "minor literature" as literature that a "minority constructs within a major language" and in which "language is affected with a high coefficient of deterritorialization," we explore the political, cultural and anthropological effects of such literature in today's European public discourse. Today the Mediterranean has become a graveyard where black and brown bodies transit a hostile and deadly passage. Therefore, a centerpiece of this course will be an examination of the racist discourse in Europe in the light of the *Black Lives Matter's* quest for decolonizing knowledge. In this interdisciplinary course, we read both literary works (Ali Farah, Khatibi, Lakhous, Scego), and critical theory (Cassano, Chambers, Fanon, Hall, Theo Goldberg); we also analyze films, documentaries, podcasts, exhibits and museums of colonialism in Europe.

**Cross-listings:** THEA 252 COMP 256 ENGL 256

**Secondary Cross-listing**

We want to make sense of things. In nearly all of our academic pursuits, the point of analysis is to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

From Sufi rituals to revolutionary uprisings, music has long played a central role in the social, political, and religious life of the Arab world. This is especially audible in the modern era, when new technologies and institutions began to record, amplify, and broadcast the region's sounds, preserving centuries-old traditions while also producing new forms of popular music. This course introduces students to Arab musical genres and practices as

they developed from the late nineteenth century. We will cover a broad geographical range, exploring the classical Andalusian repertoires of Algeria, ecstatic dervish chants in Egypt, patriotic pop tunes from Lebanon, and other topics. To highlight connections between musical traditions as well as their unique local features, we will ask questions such as: What can music tell us about interactions between sacred and secular life? How is music used to define social groups and negotiate identity, gender, and class? Which musical characteristics are associated with Arab "heritage" and "modernity," and how are these performed? In what ways does music shape everyday life in the Arab world? Class sessions and discussion will be based on academic readings and at-home listening assignments. These victory odes are a rich source for the study of Greek culture, from their vivid descriptions of heroic feats to their philosophical claims about human life and divine favor. Athletic competition provides the impetus for these songs and constitutes one of their major themes, yet their significance extends far beyond a single athlete or festival. In this course, we will interrogate the relationship between athletics and literary production in the ancient Greek world. We will use both primary and secondary sources to develop familiarity with major festivals, games, events, and figures, and use that knowledge to contextualize our analysis of Greek literature. Ancient Greek athletic discourse will thus provide an entry point to broader reflections on the literary construction and representation of the body and its movement, as well as the interplay between literature and its cultural contexts.

Some of the greatest novels are really, really long--so long that they are too seldom read and taught. This course takes time to enjoy the special pleasures of novels of epic scope: the opportunity to immerse oneself in a wide and teeming fictional world; to focus sustained attention on the changeable fortunes of characters and societies over a long span of time; to appreciate the detailed grounding of lives in their social environment and historical moment; to experience the leisurely and urgent rhythms, with their elaborate patterning of build-ups and climaxes, that are possible in such works. We will read but two novels, both preoccupied with the disruption and evolution of lives and loves at moments of historic upheaval: *War and Peace* (1869), Leo Tolstoy's epic of the Napoleonic Wars, and *Parade's End* (1924-28), Ford Madox Ford's modernist masterpiece about World War I and its traumatic impact on English social life. Set a century apart, the novels are distinguished by vivid and scrupulous representation of their respective wars, by their shrewd accounts of political and social pressures informing the crises, and by their insight into the struggles of those whose lives are engulfed in global crisis. Tolstoy's and Ford's approaches to fictional representation, however, provide intriguing contrasts: one favors the lucidity of classic realism, the other the challenges of modernist innovation; one deploys a single multiplot novel, the other a tetralogy of shorter novels developing a single plot. We will discuss the differing strategies and effects of these two approaches, as well as the more general difficulties of reading and interpreting long fiction.

**COMP 297 (S) Present Pasts: The Politics of Memory in Contemporary Chinese Literatures and Films (DPE) (WS)**

**Cross-listings:** ASIA 228 COMP 297 CHIN 428

**Secondary Cross-listing**

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "pasts" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, mesology and mythology, amnesia and nostalgia, and diaspora and settlement in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or COMP and language learners wishing to take the course in Chinese should register under CHIN.

**Requirements/Evaluation:** attendance and participation, five 5-page papers, five peer-review and critique papers, revisions on selected papers.

**Writing Skills Notes:** Students will write a 5-page paper every other week for a total of five papers. On weeks when they are not writing papers, they are expected to critique their tutorial partner's paper as peer reviewers. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. Students are also required to revise key paragraphs, sections, and papers throughout the semester.

**Difference, Power, and Equity Notes:** This course provides students with the opportunity to analyze and critique the following entangled modernist dualisms: present and pasts; memory and representations; diaspora and settlement; transnationalism and localism. By discussing texts produced from the PRC, Hong Kong, Taiwan, and other diaspora areas in these "post" societies, this course asks students to explore how literary and cinematic narratives invoke (and erase) differences, and challenge (and consolidate) borders.

**COMP 320 (S) Kafka (WS)**

"It's so Kafkaesque!" We love to use the most famous Austro-Hungarian-Czech-Jewish writer of all time to characterize puzzling and dispiriting situations. But close examination of Franz Kafka's work and life reveals a multi-dimensional world that goes far beyond the cliché. Jewish in an increasingly anti-Semitic environment, German-speaking surrounded by Czech-speakers, deeply alone in a family that didn't understand him, Kafka produced texts that simultaneously demand and refuse to be interpreted. In this tutorial we will begin with intensive readings of selected short stories and parables, then move on to an exploration of Kafka's own words from diaries and letters, as well as secondary sources. The course will conclude with discussions of how Kafka's texts and their contexts might relate to contemporary conditions and/or to students' own lives and thoughts. This will be a modified tutorial, with five groups of three students apiece. Conducted in English.

**Class Format:** the class will be divided into groups of 3. At each weekly meeting, one of the 3 will present a 5-page paper, another will present a formal response, and the third will participate actively in discussion. Students will incorporate at least one of their papers into a final project that links their discussions of Kafka to their own interests and/or to contemporary issues.

**Requirements/Evaluation:** Three 5-page papers, three 1-2 page responses, one final project, discussion leading. Evaluation: Tutorial papers will receive extensive comments, but no grade; the instructor will meet with individual students at least twice during the semester to discuss how things are going for them. Responses will not be evaluated by the instructor, but instead will function well or less well in the context of the discussion. The final project will receive a grade, and the final grade will be determined by the overall trajectory of the student's learning.

**Primary Cross-listing**

This tutorial offers a survey of Japanese art and visual culture across time and media, with particular attention to two areas: the links between different artistic media, and the relationship between art and its audience. We'll begin with early court diaries and related scroll paintings as examples of "private" art. Then we'll move through progressively more public visual media of the 17th through 21st centuries: Kanō screen painting; nô, kabuki, and puppet theater; premodern architecture; popular woodblock prints; turn-of-the-century photography; and finally some examples of contemporary popular culture like comics, animation, and/or film. We will focus on the specificities of each medium while simultaneously developing formal visual reading skills that can work across different media.

**Class Format:** Students will meet with the instructor in pairs or trios for 75 minutes each week. This tutorial is offered simultaneously at the 300 level for undergraduates and at the 500 level for graduate students: graduate students will be paired with other graduate students and undergraduates with undergraduates.

**Requirements/Evaluation:** For undergraduates: weekly participation, 5 short written assignments in alternate weeks (ranging from 1 to 5 pages), and several 1-page peer critiques. For graduate students: weekly participation and 3-4 short written exercises that build toward a final 15-page research paper.

**Prerequisites:** No previous knowledge of Japanese art or culture is required. Students with similar preparation and interests will be paired with one another.

**Enrollment Limit:** 10

**Enrollment Preferences:** Graduate Art students, followed by undergraduates majoring in Art History or Comparative Literature.

**Cross-listings:** HIST 306 GBST 369 COMP 369 ARAB 369

**Primary Cross-listing**

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Amazigh poetics in the Maghreb, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? What is the connection between the recent "boom" of English translations of Indigenous texts and neoliberalism, multiculturalism and neo-colonialism? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Instructor's feedback and peer review sessions will include review of drafts and argumentative structures.

Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Capital, tradable ownership shares in long-lived corporations, invented in the 17th century, has connected people of different races, religions, and geographies. There are huge profits from such economic interactions, but also risks: of being cheated, deceived, or coerced. This course uses insights from the economics of incentives (principal-agent models, contracts, mechanism design) to investigate the interplay between capital, coercion, and resistance. The role of prejudice will be central, as will the rise of middlemen as enforcers of coercion. Case studies span the 17th century to the 20th and include: the spice trade and conflict in the Indian Ocean, capital markets and fraud in Amsterdam and London, the Atlantic trade in enslaved people, the Dutch "cultivation system" in Java, the slow end of slavery in Brazil, and colonial control and independence in Kenya. ### **ENGL 103 (W) The Art of the Undergraduate Essay (WS)**

Writing papers for college courses feels different -- and, for most people, more challenging -- than writing papers in high school. No longer can you get away with papers written according to the old formula, "tell-'em-what-you're-going-to-tell-'em, tell 'em, tell-em-what-you-told-'em" formula. Professors now assume that you will design complex arguments supported by subtle evidence and in-depth analysis. In this course, we will study and practice the art of the college essay. We will work in three disciplines or fields: literature, interdisciplinary social studies, and visual art/film. At the end of this intensive course, you will feel comfortable answering the prompts and assignments in a wide range of courses. Readings will be relatively short; assignments will be frequent; drafts and revisions will be built into the curriculum.

**Class Format:** During the visual art unit, we may visit local museums. Drop-in office hours will be available several afternoons every week.

**Requirements/Evaluation:** attendance and active classroom participation (including occasional field trips); daily writing exercises and several short papers; regular one-on-one meetings with professor for writing critiques.

### **ENGL 109 (F)(S) Narrating Change (WS)**

How do we narrate change? Change is radical (from radix, "root," thus pertaining to what is essential) when it alters how we experience, think, and act. If we change radically, and the structure of our experience is altered, how are we then to connect what comes before to what comes after? On the other hand, if change does not cause such a transformation in the self, then how is it experienced? In this class we will read memoirs (Mirza Ghalib), novels (Virginia Woolf; Chinua Achebe), lyric poetry (Charles Baudelaire; Faiz Ahmad Faiz; Teji Grover), historical narrative (W.E.B. Dubois), psychoanalytic theory (Sigmund Freud; Jean Laplanche), and philosophy of science (Thomas Kuhn; Reinhart Koselleck), to examine the ways human beings fashion to work through, think about, and represent change.

### **ENGL 111 (F) Poetry and Politics (WS)**

"Poets are the unacknowledged legislators of the world" wrote Shelley in his 1821 "Defence of Poetry," countering the widely held view of poetry's airy irrelevance to the material progress of humanity. His claims are echoed a century and a half later in Audre Lorde's "Poetry is Not a Luxury," in which she argues that poetry is a vital and essential part of her own political struggle as a Black lesbian feminist. But when W.B. Yeats--himself a very politically involved poet--writes in 1917 that "from the quarrel with others comes rhetoric; from the quarrel with ourselves comes poetry," he implies that poetry would suffer from too much involvement with the "quarrel with others" that is politics. And when W. H. Auden writes in 1939 that "poetry makes nothing happen" he appears to locate poetry's value precisely in its irrelevance to politics as such. This course will focus on the vexed relationship

between poetry and political struggle, reading predominantly poetry and poetics (writings about poetry) of the last two centuries in an effort to answer the questions: what can poetry do for politics? what does politics do for (or to) poetry? Is poetry essential to political struggle, or do poetry and politics mix only to the detriment of both, producing, on the one hand, bad poetry, and on the other, mere distractions from the "real" work of politics? The primary goal of the course is to make students better readers and appreciators of poetry, and better readers and writers of argumentative prose.

### **ENGL 112 (F) Introduction to Literary Criticism (WS)**

What determines meaning? How we interpret is inevitably inflected by our own priorities and preoccupations, by the contexts in which we read, by literary and other conventions, and by the historical and personal circumstances of a work's composition, as well as deriving from the particular words of a text and from the mutable life of language itself. So how to go about the task of reading literature well, and reading critically? This course will focus on key introductory methods and critical approaches, and is intended to develop your skills in reading, writing about, discussing and interpreting literary texts. Our readings--mainly short fiction and poetry, along with selected introductory work in critical theory--will invite increased self-consciousness about literary form, the functions of criticism, and the process of reading and interpretation. In the last weeks of the course, we will read longer texts, including at least one play and one novel.

**Requirements/Evaluation:** Three papers rising from 3-6 pages, discussion board postings, and contribution to class discussions.

**Prerequisites:** None

**Enrollment Limit:** 19

**Enrollment Preferences:** First-year students who have not taken or placed out of a 100-level ENGL course

**Expected Class Size:** 19

**Writing Skills Notes:** Three papers, rising from 3 pages for the first, to 6 pages for the last. Postings on Glow discussion boards. Extensive written feedback on longer papers, plus the option of revision.

### **ENGL 113 (F) The Feminist Poetry Movement (DPE) (WS)**

**Cross-listings:** WGSS 113 ENGL 113 AMST 113

**Primary Cross-listing**

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the

Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

**Writing Skills Notes:** Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

**Difference, Power, and Equity Notes:** The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

### **ENGL 114 (F) Literary Speakers (WS)**

The general purpose of this course is to develop students' skills as interpreters of poetry and short fiction. Its particular focus is on how--and with what effects--poets create the voices of their poems, and fiction writers create their narrators. We'll consider the ways in which literary speakers inform and entice, persuade and sometimes deceive, their audiences. Readings will include texts from various historical periods, with particular emphasis on twentieth-century writers (including works by James Joyce, Henry James, Vladimir Nabokov, Robert Frost, Toni Cade Bambara, Raymond Carver, and Seamus Heaney).

**Requirements/Evaluation:** 4 or 5 papers, of varying lengths, spaced throughout the term (about 15-20 pages total); detailed feedback will be provided on each paper, along with opportunities for revision. There will be no examinations in this course.

**Prerequisites:** None

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students and then sophomores who have not yet taken a 100-level course in English

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** There will be 4-5 papers assigned, spaced evenly throughout the term, ranging in length from 1-2 pages to about 5 pages. Detailed feedback will be provided on each paper. There will be opportunities for revisions, and for conferences before and after each paper. At least

two classes during the term will be specifically devoted to issues related to paper writing.

**ENGL 116 (F) The Remix: Adaptation and Revelation (WS)**

This course explores the ideas of remaking and adaptation. We examine twentieth and twenty-first-century fiction, poetry, film, and hybrid texts that interact with subject matter stretching from Greek mythology to New World castaway stories to global pandemics. What is the nature of the work they attempt? What is lost and gained in these re-visions? In response to these questions, emphasis is placed on critical reading and writing (and rewriting), as well as on research skills. Works considered throughout the term come from, among others, Jorge Luis Borges, Anne Carson, J.M. Coetzee, Alfonso Cuarón, and Natasha Trethewey.

**Requirements/Evaluation:** at least 20 pages of writing; GLOW posts; class participation

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Students will do at least 20 pages of writing (4 papers) and will be required to significantly revise one paper. Students will also provide two detailed editorial responses to the work of another student. Significant class time will be spent covering strategies for effective and persuasive academic writing. Throughout the semester, students will receive written feedback from the instructor with specific suggestions for revision and improvement.

**ENGL 117 (F) Introduction to Cultural Theory (WS)**

**Cross-listings:** ENGL 117 COMP 117

**Primary Cross-listing**

This course has a clear purpose. If you had signed up for a course in biology, you would know that you were about to embark on the systematic study of living organisms. If you were registered for a course on the American Civil War, you would know that there had been an armed conflict between the northern and southern states in the 1860s. But if you decide you want to study "culture," what exactly is it that you are studying? The aim of this course is not to come up with handy and reassuring definitions for this word, but to show you why it is so hard to come up with such definitions. People fight about what the word "culture" means, and our main business will be to get an overview of that conceptual brawl. We will pay special attention to the conflict between those thinkers who see culture as a realm of freedom or equality or independence or critical thought and those thinkers who see culture as a special form of bondage, a prison without walls. The course will be organized around short theoretical readings by authors ranging from Matthew Arnold to Laura Mulvey, but we will also, in order to put our new ideas to the test, watch several films (mostly of the class's choosing) and listen to a lot of rock and roll. Why do you think culture matters? Once you stop to pose that question, there's no turning back.

**Cross-listings:** COMP 111 ENGL 120

#### **Secondary Cross-listing**

Stories are one way that we make sense of the world; but how you tell a story is just as important as the events it relates. This course will examine literary narratives from a wide range of traditions, media, and genres, and work on reading them in more informed, more sophisticated, and more interesting ways. Texts will span classics (e.g. Homeric epic and/or *The Tale of Genji*), fiction ranging from nineteenth-century realism to postmodern experimentation (possibly including Tolstoy, Zola, Garcia Marquez, Toni Morrison, and/or Colson Whitehead), and visual literature from film and drama to graphic memoir (possibly including Art Spiegelman, Tezuka Osamu, and Alison Bechdel). We will also read some short works of literary theory from around the world to help us broaden our idea of what literature can be and do. All readings in English.

**Class Format:** The second half of the course may have a modified tutorial format, where small groups meet with the instructor once a week, with students' papers and responses forming the basis of the discussion.

**Requirements/Evaluation:** Regular attendance and participation in class; short and mid-length writing assignments spaced throughout the semester; revision of selected assignments after receiving instructor feedback.

### **ENGL 123 (F)(S) The Short Story (WS)**

The reading for this course will consist entirely of short stories by such writers as Poe, Hawthorne, James, Doyle, Hemingway, Faulkner, Gilman, Chopin, Cather, Toomer, McCullers, O'Connor, Borges, Nabokov, Kincaid, Saunders, Diaz, and Shepard. We will read one or two per class meeting; at the end of the course, we'll be reading one collection, by Raymond Carver. Reading short stories will allow us to pay close attention to the form of our texts, and to paragraphs, sentences, and words. The premise of the essays you will write is that short stories and short essays are both arts based on controlling the release of information and meaning, and that studying the two genres together will have reciprocal benefits for reading and writing.

**Class Format:** class meetings will be devoted almost entirely to discussion

**Requirements/Evaluation:** grades will be based on the five formal writing assignments, with rewards for improvement, plus class participation

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students who have not taken a 100-level English course; then sophomores who have not taken a 100-level English course

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** There will be five formal writing assignments, totaling about twenty pages. My response to each paper will include extensive marginal comments on technical issues, and a typed page of comments on the ideas and structure of the paper as a whole. Final grades will be determined by both the student's intellectual engagement and his or her increasing mastery of the art of writing essays.

### **ENGL 131 (S) All About Sonnets (WS)**

Fourteen lines in a fixed pattern. When Sir Thomas Wyatt introduced the sonnet to England in the 1500s with his translations of Petrarch, the form quickly became entrenched in English, and has been in regular use ever since. Originally penned as expressions of idealized love, sonnets soon expanded to address other kinds of emotionally intense relationships--to God, Nature, art, a particular place, the State, oppressors--while still, obsessively, returning to love in all its myriad forms. This makes the sonnet, deeply personal though it is, also a kind of pocket-sized literary tradition, as each new generation of poets extends, disrupts, and comments upon the whole history of sonnets. "A sonnet is a moment's monument," wrote D.G. Rossetti (in, of course, a sonnet)--speaking of the sonnet's tendency to offer just a snapshot of the poet's mental and emotional state--but the tradition of producing numbered sequences of sonnets can also string those moments into a kind of narrative. Similarly, while the sonnet is founded in strong feeling, it is also obsessed with logic, delighting in logical argumentation, contradictions and paradoxes. This course will focus on a broad range of sonnets, historically, geographically and thematically, as well as criticism and theory relating to sonnets. Studying sonnets that are variously inspiring, devastating, and lol funny, we will become Sonnet Experts, while developing broadly useful skills in careful reading, concise writing and sound argumentation. Poets will include Shakespeare, Wordsworth, Keats, Elizabeth Barret Browning, DG and Christina Rossetti, Claude McKay, Edna St. Vincent Millay, John Berryman, Seamus Heaney, Vikram Seth, and many, many more. No prior experience with poetry is presumed.

**Class Format:** first week in regular class meetings, followed by weekly tutorial meetings in pairs

**Requirements/Evaluation:** five tutorial essays 3-5 pages; five responses to partners tutorial essays; 10 sonnet paraphrases and/or "prose sonnets;" thoughtful participation in tutorial meetings

**Prerequisites:** none

**ENGL 138 (F) What is a Self? Investigations in Literature, Philosophy, and Psychology (WS)**

The experience of having a self (or a subjective point of view) informs and colors literally everything we think, see, and feel. And yet what is a self? Is it the unchanging essence of who we are as individuals? Or is it the historically contingent product of ever-changing cultural and political forces (like the media, gender norms, and ideologies about race, to name just a few)? Or, perhaps, is the belief that we have a self just one big illusion, as the Buddha suggested millennia ago and as modern philosophers and scientists have argued in their own different ways more recently? In this class, we'll explore the deep mystery of human existence that we call "the self" or "subjectivity," looking at various attempts to capture, represent, and explain it (even escape it!). Our investigations will be wide-ranging, looking at examples from literature, philosophy, religion, and psychology. Works we'll study include: Tim O'Brien's *The Things They Carried*, Toni Morrison's *Beloved*, and theoretical writings on the self by Plato, Thoreau, and Jean-Paul Sartre among others. We'll even try our hand at meditation, while learning about the Buddhist idea of "no self." Students who genuinely find the experience of the self puzzling and fascinating will get the most out of this class. Bring an open mind about what it is to have a mind in the first place.

**ENGL 150 (F)(S) Expository Writing (WS)**

Writing clearly is the most important skill you can learn in college. Do you suffer from writer's block? Do you receive consistent criticism of your writing without also learning strategies for how to improve? This course is for students who want to learn how to write a well-argued, intelligible essay based on close, critical analysis of texts. We will derive our method for mastering the complex art of writing from Atul Gawande's bestselling book, *The Checklist Manifesto*. In addition to sharpening your skills in reading, note-taking and literary analysis, this class will give you tools for generating drafts, peer editing, revising, and polishing your writing. The majority of the readings for this course will be literary essays, mostly contemporary, mostly American.

**Requirements/Evaluation:** Requirements include active class participation (including peer-editing), drafts and revisions of four to five papers totaling at least 20 pages. Overall evaluation will include improvement and effort.

**Prerequisites:** none

**Enrollment Limit:** 12

**ENGL 158 (F) Expository Writing: Contemporary Linked Stories (WS)**

In this expository writing and writing intensive course, we will read and write about several collections of linked short stories about altered states of mind and body, immigrant experiences, and the magic of everyday life. We will examine linked stories as a form organizing narratives that *can* stand alone, but that resonate powerfully with one another, sharing themes, settings, and sometimes even characters. Texts may include Denis Johnson's *Jesus' Son*, Bryan Washington's *Lot*, Carmen Maria Machado's *Her Body and Other Parties*, and Alice Munro's *Juliet* stories. Class time will be split nearly equally between analysis of the assigned texts and active work with student writing, including freewriting, rewriting, sentence and paragraph workshops, peer editing, and writing strategy sessions.

**Requirements/Evaluation:** 4 or 5 two-page assignments, two with required revisions; 4 five-page papers, all with required revisions; discussion participation; attendance.

**ENGL 159 (F) Other People's Lives: Contemporary American Memoir (WS)**

The goal of this course is to teach you how to write a clear, well-argued, intelligible and interesting analytical paper. We will spend most of our class time actively engaged in a variety of techniques to improve your critical reasoning and analytical skills, both written and oral. Though the skills you learn will be applicable to other disciplines, and a central purpose of the course is to improve all aspects of your writing, this is a literature class, designed partly to prepare you for upper level courses in the English Department, so we will, therefore, spend equal time on the interpretation of literature, in this case, contemporary American memoir, examining the ways in which recent American memoirists represent themselves through prose and the choices they make in shaping their life stories. Given the techniques shared by novelists and memoirists, how firm is the line between fiction and non-fiction? What are the sources of a memoirist's authority? What are the ethics of memoir-writing? What kind of relationships do memoirists seek with their readers, and how do they go about achieving them?

**Requirements/Evaluation:** Several short essays, most with drafts and revisions, one student-led class discussion, written comments on published and student work, active participation in discussions.

**Prerequisites:** None

Is Pinocchio alive? How about the Terminator, or the operating system in *Her*? This course explores our persistent interest in human simulacra (robots, puppets, dolls; but also automata and cyborgs) and what they suggest about human identity, independence, and free will. We'll look at a wide range of simulacra as they appear in literature, film, and, increasingly, in the actual world ("reborn" dolls, therapy robots). We will frame our explorations with readings in artificial intelligence, neurology, and psychoanalysis (Freud on the uncanny; Winnicott on transitional objects). Throughout, we will wonder: why this fascination with the almost living? How is it that we often care more for Wall-E or the Velveteen Rabbit than we do for real people?

The goal of this writing-skills gateway course is to advance our abilities as rigorous, subtle, and imaginative interpreters of poetry. Our focus will be on lyrics--relatively short poems in which a single speaker describes (often in intense language) his or her emotions, attitudes, or state of mind. Our readings will be drawn from a range of historical periods from the seventeenth century forward, with particular emphasis on poems written since the mid-nineteenth century. Among the poets likely to be studied are: Jonson, Wordsworth, Coleridge, Keats, Dickinson, Hardy, Owen, Yeats, Auden, Frost, Gluck, and Heaney. We will also discuss works by two poets at Williams: Lawrence Raab and Jessica Fisher.

At the same time as the individual human being in possession of a distinctive personality was taking on enormous importance in politics, philosophy, literature, and the visual arts, early modern Europeans were encountering unprecedented levels of cultural diversity. In this interdisciplinary course, we will consider these two developments both separately and together. As Renaissance humanists were acquiring a sophisticated understanding of the distance between the present and various European pasts (the recent medieval past and the remote history of antiquity), they were also coming into contact with non-European cultures in Africa, the Americas, and Asia via trade and economic development, imperial expansion, and religious conversion. Always at stake in these encounters was the question of who counted as an individual; the self was not considered to be intrinsic to human nature but rather the product of historical and cultural developments. Themes will include religious pluralism, the sacred and the secular, vernacularity, exploration and empire, the relationship between mind and body, slavery, trade, wealth, gender, self-fashioning, and style. We will consider such English writers as the Pearl poet, More, Marlowe, Spenser, Shakespeare, Browne, and Milton; such continental intellectuals as Descartes, Erasmus, Las Casas, and Castiglione; and such continental artists as Michelangelo, Velázquez, Bruegel, and Rembrandt.

Some of the greatest novels are really, really long--so long that they are too seldom read and taught. This course takes time to enjoy the special pleasures of novels of epic scope: the opportunity to immerse oneself in a wide and teeming fictional world; to focus sustained attention on the changeable fortunes of characters and societies over a long span of time; to appreciate the detailed grounding of lives in their social environment and historical moment; to experience the leisurely and urgent rhythms, with their elaborate patterning of build-ups and climaxes, that are possible in such works. We will read but two novels, both preoccupied with the disruption and evolution of lives and loves at moments of historic upheaval: *War and Peace* (1869), Leo Tolstoy's epic of the Napoleonic Wars, and *Parade's End* (1924-28), Ford Madox Ford's modernist masterpiece about World War I and its traumatic impact on English social life. Set a century apart, the novels are distinguished by vivid and scrupulous representation of their respective wars, by their shrewd accounts of political and social pressures informing the crises, and by their insight into the struggles of those whose lives are engulfed in global crisis. Tolstoy's and Ford's approaches to fictional representation, however, provide intriguing contrasts: one favors the lucidity of classic realism, the other the challenges of modernist innovation; one deploys a single multiplot novel, the other a tetralogy of shorter novels developing a single plot. We will discuss the differing strategies and effects of these two approaches, as well as the more general difficulties of reading and interpreting long fiction.

**ENGL 256 (S) Stop Making Sense: Absurd(ist) Theatre in Historical Context (WS)**

**Cross-listings:** THEA 252 COMP 256 ENGL 256

**Secondary Cross-listing**

We want to make sense of things. In nearly all of our academic pursuits, the point of analysis is to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

**Requirements/Evaluation:** Evaluation will be based on weekly tutorial papers/response papers, and active participation in weekly tutorial sessions.

### **ENGL 257 (F) The Personal Essay (WS)**

The personal essay as a literary form includes a wide range of genres including literary journalism, creative nonfiction and the lyric essay. (Note the exclusion of "memoir" or "autobiography" in this list. This course is NOT a course in memoir or autobiography.) As a Gateway to the English major, this course we will focus on critical methods and analytical writing skills that will serve students who want to pursue more advanced work in the department. We will consider the literary history of the personal essay from Montaigne to yesterday, attending primarily to writers from the 20th and 21st centuries, and from the U.S. The reading list may include: James Baldwin, James Agee, Annie Dillard, Audre Lorde, John McPhee, Joan Didion, Adrian NicholeLeBlanc, Jennifer S. Cheng, Anne Carson, Samuel Delaney, Maggie Nelson, Alexander Chee, Lydia Yuknavitch, Saidiya Hartman and Karen Green.

**Requirements/Evaluation:** Evaluation will be based on class participation, peer editing, writing and revision, with special attention given to the student's engagement in every aspect of the writing process.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

**ENGL 258 (F) Poetry and the City (WS)**

In this course we will consider poems generated out of the experiences of urban life. The city provides for poets a vivid mental and imaginative landscape in which to consider the relation of vice and squalor to glamour; the nature of anonymity and distinction; and the pressure of myriad bodies on individual and mass consciousness. We will explore ways in which the poet's role in the body politic emerges in representations of the city as a site both of civilized values and/or struggles for power marked by guile and betrayal. Taking into account the ways in which cities have been transformed over time by changing social and economic conditions, we will consider such issues as what the New York of the 1950s has to do with the London of the late eighteenth and early nineteenth centuries, and why poetry as a genre might be particularly suited to representing the shifting aspects and populations of urban life. Poets will include Dante, Pope, Swift, Blake, Wordsworth, Whitman, Baudelaire, Yeats, Crane, Moore, Hughes, Brooks, Lorca, Bishop, Ginsberg, Baraka, Ashbery, Yau, Bitsui, Rankine, and Diaz. We will also draw on essays by Simmel, Benjamin, Williams, and Canetti, photographs by Hines, Weegee, Abbott, and Nishino; the blues, as sung by Holliday and Vaughan; and films such as *Man with a Movie Camera*, *Rear Window*, and *Breathless*.

**Class Format:** discussion-based

**Requirements/Evaluation:** class participation; the course will require four 5-page essays in multiple drafts

**ENGL 279 (F) Introduction to Latinx Literature: From 'I Am Joaquín' to Borderless-Future Dreams (DPE) (WS)**

This course is designed to introduce you to Latinx literary and cultural production from the 1930s through the present. We will read and encounter some of the most urgent and exciting literary-artistic texts produced by Latinxs in the U.S., focusing our attention on the post-war period and the flourishing of the Chicano Movement-related cultural renaissance of the late 1960s and early 70s, along with the Movement's significant aftermaths. This focus highlights the significant contributions Chicano voices have made to Latinx literary studies and creates space for the incorporation of other Latin American-descended peoples (including Nuyoricans, Cubanos, Central Americans, Afro-Latinxs, and more). In addition to traditional narrative forms, we will also study poetry, films, photography, plays, murals, and performance art. In this way, you will gain a critical awareness of how Latinxs have historically engaged in various modes of artistic experiment to better question some of the twentieth and twenty-first centuries' most pressing global and local political issues (from migration to racism to coloniality to heterosexism to gentrification to U.S. imperialism and more). The course, at its core, will explore issues of identity-formation, particularly as they relate to Latinx struggles for equality on the fault lines of race, class, and gender/sexuality. Who and/or what is the Latinx subject, and how does the question of identity relate to struggles for cultural recognition and political equality? To what extent does the Latinx subject's political freedom rest upon practices and processes of identity-formation or, alternatively, dis-identification? As we explore these questions, we will also examine how Latinxs come to inhabit and articulate a sense of space and place in the shifting landscapes of culture--from the city to the campo to the cultural in-between of the border.

**Requirements/Evaluation:** Active participation in in-class and online discussion, four 4-5 page essays, writing-related homework assignments, and an in-class presentation.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

**ENGL 343 (S) Whitman and Dickinson in Context (WS)**

In this tutorial, we will read closely the works of two of the most influential and experimental poets in the nineteenth-century U.S., Walt Whitman and Emily Dickinson. In addition to studying in depth their poems and other writings--in Whitman's case, his essays, in Dickinson's, her letters--we will delve into some of the major critical debates surrounding their work, both individually and when compared to one another. For example, Whitman is often viewed as perhaps the most public nineteenth-century American poet, whereas Dickinson is regarded as perhaps the most "private." We will interrogate this assumption, exploring how each poet represents publicity and privacy in their work, as well as their efforts to "perform" and/or reform an American self. We will also examine how each poet engages questions of gender and sexuality, as well as contemporary debates surrounding such issues as abolition, slavery, women's suffrage, temperance, and settler colonialism. We will consider what role their whiteness plays in their poetry and

personas. Finally, we will explore Whitman and Dickinson's relation to significant literary and philosophical movements of the period, including transcendentalism and the culture of sentiment. Throughout the course, emphasis will be on analyzing and generating interpretations of Whitman and Dickinson's works, constructing critical arguments in dialogue with other critics, formulating cogent written critiques, and carrying on an oral debate about a variety of interpretations. Students will meet with the instructor in pairs for an hour each week. They will alternate between writing 5- to 7-page papers and commentaries on their partner's papers.

**Requirements/Evaluation:** five 5- to 7-page papers, final paper, oral presentation and critique

Deconstructing reductive Saharanism, which the course conceptualizes as a universalizing discourse about deserts, this course seeks to critically examine the myriad assumptions that are projected upon deserts across times and cultures. In addition to their depiction as dead and empty, deserts have become a canvas for the demonstration of religiosity, resilience, heroism and athleticism. Cultural production, particularly literature and film, do, however, furnish a critical space in which important questions can be raised about deserts' fundamental importance to different cultures and societies. Drawing on novels, films, and secondary scholarship, the course will help students understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the desert sub-genre of African, Euro-American, and Middle Eastern literatures. Whether

grappling with transcontinental issues of climate change, cannibalization of biodiversity or overexploitation of natural resources, desert-focused cultural production invites us to interrogate the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature.

But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

This course examines the relationship between religious and environmental thought in America. Exploring a broad range of practices, symbols, and beliefs, we will examine the religious roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have writers, thinkers, and artists from different religious and cultural backgrounds shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? How have they influenced each other to produce distinctively American forms of eco-spirituality? In pursuit of these questions, we will consider a diverse array of topics and cases, including struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoorsmanship, Catholic climate activism, Jewish eco-mysticism, atheist biology, Buddhist therapy, and more.

But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

How do humans and animals shape each other's lives? People encounter animals in farms, laboratories, zoos, wildernesses, and backyards, on purpose and by chance. They treat animals as family members, entertainment, food, vectors of disease, and objects of scientific wonder. Drawing on the works of biologists, philosophers, and feminist science and technology studies scholars, this tutorial will examine our relationships with animals and help clarify our responsibilities to them. We will ask: What are the social and environmental consequences of consuming animals? Should humans swim with dolphins, feed manatees, use gene-editing to create species that can survive climate change? Should moral standing depend upon the ability to communicate or the ability to experience emotions like grief and joy? What can animal models tell us about human health and society, and when is animal otherness too large a gap to bridge? What might human violence toward animals tell us about sexism, racism, or capitalism, and what will human-animal relationships look like in the future?

What have been the most consequential ideas of the last 100 years? This course will explore some of the more audacious and ambitious plans to alter natural and urban environments in the late 19th century to the early part of the 21st, specifically those that sought to improve the human condition through science, engineering, and technology. By building big bold things, politicians around the globe sought to bring prosperity to their nation and embark on a path of modernity and independence. Through an intellectual, political and environmental history of major construction projects such as the building of the Suez Canal and the Aswan Dam, extensive river valley developments in Iran, Turkey and Iraq, and utopian and futuristic city planning in western Asia, students will consider how, with the benefit of hindsight, to best evaluate the feasibility of such bold schemes. Who has benefitted and who has not, what have been some of the unanticipated consequences, what was sacrificed or neglected, and what do these projects tell us about the larger processes of global capitalism, decolonization, and climate change?

**ENVI 491 (S) The Suburbs (WS)**

**Cross-listings:** AMST 490 ENVI 491 HIST 491

**Secondary Cross-listing**

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

**Class Format:** Students will be assigned a tutorial partner, and tutorial pairs will meet with the professor for one hour each week at a regularly scheduled meeting time.

**Requirements/Evaluation:** typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

**GBST 104 (S) Race and a Global War: Africa during World War II (DPE) (WS)**

**Cross-listings:** AFR 104 HIST 104 GBST 104

**Secondary Cross-listing**

This course highlights African experiences of World War II. Although most histories have excluded Africa's role in the war, the continent and its people were at the center of major developments during in this global conflict. In fact, many Africans remember the Italian invasion of Ethiopia in 1935 as the start of the war. African servicemen fought alongside the Allied and Axis forces on major warfronts in Europe, Africa and Asia. African communities and individuals also established war charity campaigns to collect funds, which they sent to war ravaged societies in Europe. Indeed, African economies, despite their colonial statuses, kept European imperial nations afloat in their most hour of need. At the same time, African colonial subjects faced severe food shortages, the loss of working-age men to labor and military recruiters, and dramatically increased taxes. We will examine the impact of these and other wartime pressures on different African communities. How did African societies meet such challenges and how did they view the war? In this course we will examine the roles that women played during the war, and the various other ways that African communities met wartime demands. Other topics we will explore include the role of African women; colonial propaganda; political protest against the war; race and racial thought in the wartime era; war crimes; African American support for the liberation of Ethiopia; and the war's impact on decolonization across the continent. We will further study how Africans and outsiders have differently conceptualized the continent's role in the war by analyzing a variety of sources, including scholarly writings, archival materials, films, former soldiers' biographies, and propaganda posters.

Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course explores the colonial relationship during a major global crisis. Students will examine existing narratives of African contributions to the war and to come up with their own interpretations, and will be called to critically engage the question of why and how colonies made significant contributions to the Allied cause by producing needed materials and resources or by joining the fight. Africans made these contributions spite of various and complex inequities.

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore

themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of colonial and modern India through the history of its most important city.

Capital, tradable ownership shares in long-lived corporations, invented in the 17th century, has connected people of different races, religions, and geographies. There are huge profits from such economic interactions, but also risks: of being cheated, deceived, or coerced. This course uses insights from the economics of incentives (principal-agent models, contracts, mechanism design) to investigate the interplay between capital, coercion, and resistance. The role of prejudice will be central, as will the rise of middlemen as enforcers of coercion. Case studies span the 17th century to the 20th and include: the spice trade and conflict in the Indian Ocean, capital markets and fraud in Amsterdam and London, the Atlantic trade in enslaved people, the Dutch "cultivation system" in Java, the slow end of slavery in Brazil, and colonial control and independence in Kenya. Required readings for this class will be fifty or more pages per week, and will include historical case studies and excerpts from novels and diaries.

Indigenous movements for land, rights, and cultural preservation have spread to and originated in all corners of the world. However, the global nature of these movements at times obscures ways of being Indigenous in differing contexts. This course analyzes Indigeneity in both the United States and Russia today. Through reading and analyzing ethnography, theory, and literature, it focuses on Indigenous peoples in a comparative context. Rather than prioritizing concern with Indigenous peoples emerging from the US, it attempts to demonstrate what Indigeneity has been in both the United States and Russia and what it is and means today. It asks the following questions: what is Indigeneity and who is Indigenous; how is Indigenous identity constructed and by whom; and what convergences and divergences exist in Indigeneity between the US and Russia or for that matter in other contexts? To help answer these questions, in this course we will grapple with Indigeneity as a social category and other social formations, especially ethnicity, nationality, and race. Topics include: Indigeneity and the State, Revitalization and Resurgence, Indigenous People and Nature Protection, and Hemispheric and Global Indigenities.

Though European border management today seeks to limit and control movement, the Mediterranean region is a historical site of mediation between cultural differences and religious views. This course centers primarily on the works of migrant intellectuals and artists from North Africa and the Middle East, who have emerged from the Mediterranean region to become a significant part of the new voice of Europe. Borrowing from Deleuze and Guattari's definition of "minor literature" as literature that a "minority constructs within a major language" and in which "language is affected with a high coefficient of deterritorialization," we explore the political, cultural and anthropological effects of such literature in today's European public discourse. Today the Mediterranean has become a graveyard where black and brown bodies transit a hostile and deadly passage. Therefore, a centerpiece of this course will be an examination of the racist discourse in Europe in the light of the *Black Lives Matter's* quest for decolonizing knowledge. In this

interdisciplinary course, we read both literary works (Ali Farah, Khatibi, Lakhous, Scego), and critical theory (Cassano, Chambers, Fanon, Hall, Theo Goldberg); we also analyze films, documentaries, podcasts, exhibits and museums of colonialism in Europe.

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the war Russia is currently waging on Ukraine, or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Bulgaria, Poland, and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Amazigh poetics in the Maghreb, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? What is the connection between the recent "boom" of English translations of Indigenous texts and neoliberalism, multiculturalism and neo-colonialism? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

By building big bold things, politicians around the globe sought to bring prosperity to their nation and embark on a path of modernity and independence. Through an intellectual, political and environmental history of major construction projects such as the building of the Suez Canal and the Aswan Dam, extensive river valley developments in Iran, Turkey and Iraq, and utopian and futuristic city planning in western Asia, students will consider how, with the benefit of hindsight, to best evaluate the feasibility of such bold schemes. The Media have long played important roles in African societies. As early as the second half of the 19th century, African intellectuals were using print technology to address the people. As radio technology was in its infancy during the first half of the twentieth century, Africans were gathering around re-diffusion stations and later around single receivers to listen to news and entertainment programming. In this tutorial, we will examine these histories of media and media technologies on the continent. Ultimately, we will explore the roles that media played in serving particular community needs and how communities also adapted new media technologies to fit local conditions. Media content has historically been determined based on standards beyond viewers', readers' and listeners' control. We will examine the influences that editors and political leaders on the continent have exerted on content as well as what forces they responded to. We will also further explore the media's role in major events on the continent, from governmental changes to the ending of apartheid in South Africa and the role that media have played in areas of conflict.

As such, this course immensely explores diversity, power and equity and how these all-important societal concerns are expressed through the media in Africa.

### **GEOS 111 (F) Radical Science- How Geology Changed the Way We See the World (WS)**

Copernicus shocked Europe when he suggested that the Earth is not the center of the universe. Hutton and other geologists made an equally radical proposal more than two centuries later when they introduced the concept of deep time and argued that the Earth was much older than 6,000 years, as determined by biblical scholars. Several decades later, Darwin and Wallace shook the foundation of western philosophy once more when they proposed that organisms evolved. When geologists reinterpreted landscape features once attributed to the great flood as evidence for past continental glaciation, the concept of extreme climate change through time sprang to life. During the 20th century, the permanence of Earth's geography was challenged by the continental drift hypothesis, which was initially rejected for decades until it reemerged as plate tectonic theory. This tutorial explores how geologic breakthroughs challenged western views of humans as the center of creation living in a world with limited change. ### **GEOS 312 (F) Mass Extinctions: Patterns and Processes (WS)**

Over the last 541 million years of Earth history, five major mass extinctions have occurred, each dramatically changing the makeup and course of life on our planet. During some of these events, over 75% of all marine animal species went extinct; during others, groups like the dinosaurs vanished from the planet after tens of millions of years of ecological dominance. This tutorial course will explore the idea of extinction from the evolution of the concept in human thought to current research on the mechanisms and patterns of extinctions through time. We will examine what makes an extinction "mass", delve into the causes and consequences of the major mass extinction events of the Phanerozoic, and discuss the potential human-induced "6th extinction" event occurring in the present day. This course is in the Sediments and Life group for the Geosciences major.

### **HIST 104 (S) Race and a Global War: Africa during World War II (DPE) (WS)**

**Cross-listings:** AFR 104 HIST 104 GBST 104

#### **Primary Cross-listing**

This course highlights African experiences of World War II. Although most histories have excluded Africa's role in the war, the continent and its people were at the center of major developments during in this global conflict. In fact, many Africans remember the Italian invasion of Ethiopia in 1935 as the start of the war. African servicemen fought alongside the Allied and Axis forces on major warfronts in Europe, Africa and Asia. African communities and individuals also established war charity campaigns to collect funds, which they sent to war ravaged societies in Europe. Indeed, African economies, despite their colonial statuses, kept European imperial nations afloat in their most hour of need. At the same time, African colonial subjects

faced severe food shortages, the loss of working-age men to labor and military recruiters, and dramatically increased taxes. We will examine the impact of these and other wartime pressures on different African communities. How did African societies meet such challenges and how did they view the war? In this course we will examine the roles that women played during the war, and the various other ways that African communities met wartime demands. Other topics we will explore include the role of African women; colonial propaganda; political protest against the war; race and racial thought in the wartime era; war crimes; African American support for the liberation of Ethiopia; and the war's impact on decolonization across the continent. We will further study how Africans and outsiders have differently conceptualized the continent's role in the war by analyzing a variety of sources, including scholarly writings, archival materials, films, former soldiers' biographies, and propaganda posters.

**Requirements/Evaluation:** active participation in discussion, map quiz, 2 reading responses, and 3 essays (of about 5 pages)

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students and then sophomores who have not previously taken a 100-level seminar

**Writing Skills Notes:** Students will write two 3-5-page essays each written in two drafts with instructor comments. They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course explores the colonial relationship during a major global crisis. Students will examine existing narratives of African contributions to the war and to come up with their own interpretations, and will be called to critically engage the question of why and how colonies made significant contributions to the Allied cause by producing needed materials and resources or by joining the fight. Africans made these contributions spite of various and complex inequities.

**Cross-listings:** HIST 109 ARAB 109

**Primary Cross-listing**

The Iranian Revolution was a major turning point in world history that resulted in the establishment of the Islamic Republic of Iran. This tutorial will evaluate the causes and impact of the revolution and how this seminal event continues to have widespread repercussions around the globe. The first weeks will explore the history of pre-revolutionary Iran with special attention to religious and intellectual trends such as the ideas of Ayatollah Ruhollah Khomeini, Jalal al-e Ahmad, and Ali Shariati. We will then evaluate the revolution itself including the US hostage crisis, the downfall of the Shah Muhammad Reza Pahlavi Shah, and how Khomeini's vision of society became paramount. Finally, we will explore the aftermath of the revolution including Iran's geopolitics, the nature of the theocratic system in Iran as well as how the revolution impacted every day lives of Iranians in Iran and abroad particularly how they reflect on the revolution in memoirs, films, and literature.

**Requirements/Evaluation:** Weekly meetings. Weekly papers - either a 5 page primary paper or a 2-3 page response paper.

**Prerequisites:** No prerequisites.

**Enrollment Limit:** 10

**Enrollment Preferences:** First Years and Sophomores.

**Cross-listings:** GBST 117 HIST 117 ASIA 117

#### **Primary Cross-listing**

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of colonial and modern India through the history of its most important city.

**Requirements/Evaluation:** assessment will be based on class participation and weekly written responses to readings (2 pages), 2-3 short papers (4-5 pages), leading to an oral presentation and final paper (8-10 pages). All writing assignments are structured to build up the final paper.

### **HIST 122 (S) The Black Death (WS)**

In what ways does a pandemic change society? Historians and scientists still debate the development and impact of the second plague pandemic, also known as the Black Death, which decimated the people of Asia, Africa, and Europe in the mid-fourteenth century. For many medieval people, the plague was experienced as a terrifying judgment of God upon the world. In this class, we will see how the plague exposed and exacerbated divisions within society, encouraging new political movements, economic changes, and new forms of expression in art and literature. We will read multiple first-hand accounts of the plague, with an eye to seeing how medieval people tried to understand the calamity through science and religion, and how

modern scholars have interpreted the evidence of both written records and archaeology and related sciences. The Black Death is the first global pandemic that produced an extensive written record, and the sources offer us a detailed look at how multiple complex societies handled the crisis.

### **HIST 128 (F) Protest after Fascism: Youth, Revolution, and Protest in 1960s West Germany** (DPE) (WS)

The 1960s was a decade of youth and protest. University students in Paris, Belgrade, and Dar es Salaam took to the streets to call for political, economic, and social transformation. This first-year seminar dives into this decade of heady revolutionary fervor, by focusing on the stakes of political protest in postwar West Germany. It evaluates how West Germans formulated their political protests while living in a post-totalitarian and post-genocidal society and considers the extent to which West Germans youths -- despite operating in the international milieu of the "Global Sixties" -- displayed a specifically national set of anxieties. Students can expect to gain an introduction to postwar German history, as well as experience working with primary sources.

**Requirements/Evaluation:** Active participation in discussion, weekly 500-word discussion posts, two 5-6-page reading responses, and a final 10-12-page research paper

**Prerequisites:** None

**Enrollment Limit:** 19

**Enrollment Preferences:** First-year students and then sophomores who have not previously taken a 100-level seminar

Students receive detailed feedback on their writing on each of the shorter writing assignments and on all steps of the crafting of the final paper.

**Difference, Power, and Equity Notes:** This course investigates how West German youths wrestled with questions of national belonging and racial difference in the years after the Holocaust. In addition to evaluating how racial difference operated within after the Federal Republic of Germany after the Nazis' racial genocide of European Jewry, this course explores West German activists' conceptions of two populations that were seen to be racially different: the peoples of the 'Third World' and West Germany's Turkish migrants.

### **HIST 135 (F) The Coffeehouse from Arabia to the Enlightenment** (WS)

Invented in sixteenth-century Arabia, the coffeehouse soon made its way to Egypt and Istanbul and then to Western Europe. This institution offered a social space where men (and women) could congregate to discuss politics and ideas. Everywhere, it was an object of suspicion, yet its onward march proved unstoppable, and it even became one of the central spaces of the European Enlightenment, the eighteenth-century movement that laid the

foundations of modern Western secular thought. In this course, we will reconstruct the progress of the coffeehouse in order to understand what made it so special. Through its prism we will explore a crucial period in the history of Europe and the Middle East, and investigate how intercultural interactions and intellectual exchange shaped the modern world at a time of religious and political polarization.

**Requirements/Evaluation:** Attendance and participation; two 5-7-pp. papers (and a revision of each); final research project proposal and bibliography; a final, 10-12 pp. research paper; a final research presentation.

### **HIST 158 (S) North of Jim Crow, South of Freedom (DPE) (WS)**

**Cross-listings:** HIST 158 AFR 158

#### **Primary Cross-listing**

This course analyzes the freedom struggle in the North during the twentieth century. Whereas black northerners drew from broader campaigns and traditions of black resistance, we will explore territorial distinctions in the region that otherwise have been flattened within the long history of civil rights discourse. To accomplish this aim, we will engage the following themes: black culture and radicalism; community formation and residential segregation; demographic and migratory transitions; deindustrialization and the war; gender and respectability politics; labor tensions and civil rights unionism; northern racial liberalism; and the influence of world affairs--all with an eye toward scrutinizing the freedom struggle in its northern variety.

**Requirements/Evaluation:** Students are expected to participate actively and will write three short essays (3-4 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (8-10 pages) in consultation with the instructor and will be required to submit a topic proposal.

Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course analyzes the long black freedom struggle in the North during the twentieth century. It examines black northerners' efforts to achieve citizenship and equality as well as their challenges and involvements with northern racial liberalism. It offers students the opportunity to think critically about how black resistance campaigns emerged and evolved as discriminatory racial practices persisted in spite of legal and legislative remedies.

**HIST 159 (F) Crossing the Color Line: A History of Passing (DPE) (WS)**

**Cross-listings:** AFR 159 HIST 159

**Primary Cross-listing**

In June 2015, Rachel Dolezal emerged as a media spectacle and the subject of national scrutiny after her *white* parents stated publicly that Dolezal is a white woman *passing as black*. Their insistence that Dolezal is white came in the wake of her reports to local news media and police that she had been the victim of several hate crimes. To critics, Dolezal is a fraud who has committed cultural appropriation. Yet, for her supporters, Dolezal's racial identification as a black woman is authentic and indisputable, since race is not based on biology but rather is a social construction. For both groups as well as impartial observers, many wondered curiously why a white woman had chosen to pass as black, especially given that historically it has been African Americans who opted to *become* white. Inspired by the controversy surrounding Dolezal, this tutorial will explore the history of passing in the United States. Whereas our attention will primarily be focused on black-to-white passing, we will expand our understandings of passing by emphasizing the variety of ways that identities have been shaped through the crossing of boundaries--class, ethnic, gender, intellectual, political, religious, and sexual. To accomplish our goals, we will read and cross-examine fictional and nonfictional as well as primary and secondary historical accounts of boundary-crossers. We will also screen several films that engage the theme of passing.

**Requirements/Evaluation:** Weekly formal response papers and written critiques.

**Prerequisites:** None.

**Enrollment Limit:** 10

**Enrollment Preferences:** First and second-year students will be prioritized, followed by history majors. Should the course be overenrolled, students will be asked to complete an enrollment questionnaire.

Students will receive substantial feedback on their writing skills, with verbal and written suggestions for improvement. Students also will receive feedback from their tutorial partners.

**Difference, Power, and Equity Notes:** Narratives of racial passing provocatively raise questions about the construction, logics, reinforcement, and subversion of racial categories and identities. Tutorial students will have the opportunity to deconstruct the meanings of race and identity in addition to thinking culturally, historically, and ontologically about the implications and value of these constructs. In essence, we will theorize racial identity, reconsidering, if not challenging, its stable notions of identic intelligibility.

**HIST 166 (F) Cold War Films (WS)**

This history tutorial utilizes popular film as a vehicle to explore American Cold War culture. The Cold War was an intense period of political, ideological, cultural, and military struggle between the United States and the Soviet Union that took place after the Second World War. For every nuclear test, arms sale, or military operation, there was a propaganda ploy, rhetorical barb, or diplomatic ultimatum to match. Amidst this hostile competition between two incompatible ways of life--communism and capitalism; totalitarianism and democracy--an atmosphere marked by panic, secrecy, insecurity, paranoia, surveillance, and conformity pervaded American life. Given the vast cultural influence of movies, film during this era served as a vital ideological battleground. Moreover, cinema offers us a window into the cultural landscape of Cold War America, for film reflects, interprets, and shapes national identity in complex ways. The films examined in this course (for the most part, Hollywood productions from the

mid-1940s to the mid-1960s) serve as unique historical documents and as cultural texts illuminating the ways filmmakers and audiences negotiated the challenges presented by the Cold War struggle. The films assigned for this course focus on a range of topics, including anticommunism, competing visions of Americanism, religion, the Hollywood Ten, J. Edgar Hoover and the FBI, the nuclear arms race, brainwashing, gender, race relations, and the eventual unravelling of the Cold War consensus. The historical analysis of film requires not only a close reading of the movies themselves, but also a clear understanding of the historical context in which they appeared. The readings paired with each film will help to clarify this context and offer interpretations of the films with which we will engage.

**Requirements/Evaluation:** Students will be required to complete formal writing assignments each week, alternating between 4-page reading response papers and 2-page critiques of their peers' work. These writing assignments will be evaluated alongside preparedness for and performance in tutorial discussions.

### **HIST 306 (S) Indigenous Narratives: From the Fourth World to the Global South (DPE) (WS)**

**Cross-listings:** HIST 306 GBST 369 COMP 369 ARAB 369

#### **Secondary Cross-listing**

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Amazigh poetics in the Maghreb, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? What is the connection between the recent "boom" of English translations of Indigenous texts and neoliberalism, multiculturalism and neo-colonialism? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Instructor's feedback and peer review sessions will include review of drafts and argumentative structures.

**Difference, Power, and Equity Notes:** At the heart of this course is the history of global Indigenous struggle for liberation and decolonization. ## **HIST 367 (F) Black History is Labor History (DPE) (WS)**

**Cross-listings:** AFR 367 HIST 367

### **Primary Cross-listing**

This seminar explores labor history in relation to black people, spanning the colonial period to the early twenty-first century. It racializes the history of work by tracing the long story of black labor in the U.S. from the plantation to the plant. Whereas the bulk of the course will analyze black labor and labor movements in the twentieth century, specifically focusing on the push for economic inclusion and mobility amid employment, societal and union-related racial discrimination, we will examine what involuntary black labor meant in the context of slavery and the construction of a capitalist economy. Likewise, we will devote attention to black workers with regard to such topics as antiunionism, deindustrialization, economic inequality, Fordism, informal economies, Jim and Jane Crow, labor radicalism and violence, New Deal and welfare, the rise of civil rights unionism, and slavery and capitalism, among other themes.

**Requirements/Evaluation:** Students are expected to participate actively and will write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages) in consultation with the instructor and will be required to submit a topic proposal and outline, an annotated bibliography, and a peer-reviewed draft of the final paper.

**Prerequisites:** Recommended for students with sophomore standing or above and first-year students who both have taken a 200-level history course and have received instructor permission to enroll into the course.

**Enrollment Limit:** 25

**Enrollment Preferences:** HIST and AFR majors followed by students with sophomore, junior, or senior standing. If the course is overenrolled, students will be given a questionnaire and only first-year students who have completed a 200-level history course will be enrolled.

**Writing Skills Notes:** Students will be required to write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages). Throughout the semester, these writing assignments will total roughly 22-30 pages. Students can expect to have line-edited feedback on their papers with substantial and timely, writing-related suggestions for improvement.

**Difference, Power, and Equity Notes:** This course racializes the study of labor history, focusing on black people and their experiences in the United States from the plantation to the plant. It challenges students to confront and to redefine what it means to labor, grasping how slavery, segregation, and systemic inequalities amid black people's pursuit of citizenship, equality, and freedom have shaped their economic, political, and social conditions and identities.

## **HIST 385 (F) Latinx Activism: From the Local to the Transnational (DPE) (WS)**

**Cross-listings:** LATS 385 HIST 385

### **Primary Cross-listing**

Latinas/os/x's have long sought inclusion in the U.S. polity and society, while the meanings of inclusion and the means to achieve it have shifted historically. For Latinxs, activism is often shaped by the specific dynamics of each group's migration to the United States and by their arrival into a particular context. Home country politics and transnational connections can remain important. Yet local activism to meet immediate needs and to address critical issues becomes important as well. Working within existing structures, Latinx communities have at times questioned and challenged those existing structures, as activists have addressed a wide variety of often intersecting issues. This course roots itself in the historical progression of Puerto Rican and Mexican-American activism, before turning to the social and political movements of the late 1960s and 1970s, as shaped by Puerto

Ricans, Chicanos/as, Cubans, and Dominicans. The 1980s witnessed increased immigration from several Central and South American countries, arriving in the context of reactions to those political and social movements, as well as increased U.S. intervention in their countries of origin—a context that again shaped both local and transnational activism. Students' final projects will be anchored within this historical framing and within the lens of local and transnational activism, while moving forward in time to consider more contemporary dimensions of Latinx activism.

**Class Format:** This is a discussion-based and writing intensive course, so reading and full participation is important. Students will be expected to read each other's work and to provide thoughtful and constructive feedback.

**Requirements/Evaluation:** Class participation and presentations; several 3-4 page essays; final paper of 12-15 pages, as well as proposal, bibliography, and drafts

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** History majors and Latina/o Studies concentrators, seniors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** Several writing assignments of 3-4 pages provide the foundation for 12-15 page final papers. In consultation with the professor, students select a topic and submit a 3-4 page proposal with a bibliography. Students submit a draft for a workshop session with other students. A final presentation is another opportunity to hone arguments and use of evidence, as well as to receive feedback on revised drafts from the professor.

**Difference, Power, and Equity Notes:** This course examines how Latinx communities have sought inclusion in U.S. society and polity, in the face of marginalization based on race, ethnicity, class, gender, sexuality, and/or political perspective, as well as other intersecting markers of difference. Questions of difference, power, and equity are analyzed at the structural, community, and individual levels.

**HIST 413 (F) The Big Ideas: Intended and Unintended Consequence of Human Ambition (DPE) (WS)**

**Cross-listings:** ARAB 413 GBST 413 HIST 413 ENVI 413

**Primary Cross-listing**

What have been the most consequential ideas of the last 100 years? This course will explore some of the more audacious and ambitious plans to alter natural and urban environments in the late 19th century to the early part of the 21st, specifically those that sought to improve the human condition through science, engineering, and technology. By building big bold things, politicians around the globe sought to bring prosperity to their nation and embark on a path of modernity and independence. Through an intellectual, political and environmental history of major construction projects such as the building of the Suez Canal and the Aswan Dam, extensive river valley developments in Iran, Turkey and Iraq, and utopian and futuristic city planning in western Asia, students will consider how, with the benefit of hindsight, to best evaluate the feasibility of such bold schemes. Who has benefitted and who has not, what have been some of the unanticipated consequences, what was sacrificed or neglected, and what do these projects tell us about the larger processes of global capitalism, decolonization, and climate change?

**Requirements/Evaluation:** A presentation, shorter writing assignments and a longer research paper (20-25 pages) in the end. Students will submit shorter drafts of final paper in order to receive constructive feedback prior to final submission.

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** Seniors, especially History, Arabic and Environmental Studies majors.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Writing Skills Notes:** A 20-25 page research paper will be required at the end of the semester. Prior to getting to that point, students will submit an annotated bibliography, a two page proposal, a five and eventually a 10 page draft. Each draft will receive extensive comments and suggestions from peers and instructor. In this way, the student will think about the process of writing and the best way to set themselves up for success.

**Difference, Power, and Equity Notes:** This course examines how a number of different nations in Africa and Asia sought to improve the living conditions of the masses through major construction project. Though ostensibly these schemes were supposed to improve the livelihood of all, often they primarily benefitted the few - the urban elite - and not the general population. This course will therefore explore how certain class, gender and racial lines were solidified and maintained through economic development plans.

### **HIST 430 (S) Postcolonial Reparations: Trauma, History, and Memory after European Imperialism (DPE) (WS)**

**Cross-listings:** JWST 430 HIST 430

#### **Primary Cross-listing**

How have European states responded to calls to acknowledge and atone for the crimes of Empire? This course places recent calls for reparations in a historical context. Weaving together a wide-range of historical and contemporary case studies -- including the Conference on Jewish Material Claims Against Germany (1951), Germany's official recognition of the Herero Genocide (2021), and ongoing debates in France about the restitution of colonial-era looted art, this course investigates how the language and mechanisms of restorative justice have historically developed, evaluates which past efforts of restorative justice were successful and why, and examines what role historical memory and historians-as-activists should play in campaigns that seek reparations for colonial injustices. In doing so, it evaluates how activists have deployed scholarly vocabularies on memory, justice, and violence in a number of national and international contexts.

**Requirements/Evaluation:** Class participation, weekly 500-word discussion posts and a 20-page research paper

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** History majors, seniors, and then juniors

**Expected Class Size:** 10-15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** This is an intensive writing seminar for advanced history majors. We focus on how to write a journal-length piece of original historical research, while evaluating the strengths and weaknesses of other scholarly pieces. Students receive feedback on multiple drafts of their final research papers and participate in two workshop seminars in which they provide feedback on the papers of their peers.

**Difference, Power, and Equity Notes:** This course asks how contemporary political and social justice movements can -- or ought to -- address political and economic inequities between the Global South and North, introduces students to how questions of race and national belonging have informed contemporary debates on restorative justice, and exposes the persistence of some global and historically-situated inequities.

### **HIST 433 (F) Colonialism and the Jews (DPE) (WS)**

**Cross-listings:** JWST 433 HIST 433

#### **Primary Cross-listing**

Where are Jews in colonial history? Where is colonialism in Jewish history? In many ways, these questions haunt contemporary Jewish and often

world politics. Indeed, in the twenty-first century, the relationship between Jews and colonialism has been present in debates about Zionism, the history of capitalism, Jewish-Muslim relations, the wider Middle East, the future of European identity, the aims and roots of American empire, and the intersections of race and religion in colonial domination. And yet, typically, the subject of Jews and colonialism is more polemicized or avoided than probed. This course will seek to address this lacunae by introducing students to new historical scholarship that has begun tracing these questions. Students will consider the ways in which imperial legal forms, economic structures, and cultural and intellectual underpinnings shaped Jewish lives from the British antipodes to French North Africa, and throughout the Russian and Ottoman Empires, as well as in metropolitan Europe. Among other issues, we will ask: How did Jews become defined and define themselves in the colonial venture? In their various roles in colonial empires, are Jews best understood as subjects or agents of empire or are there more fruitful ways to conceptualize their engagement? What was the impact of anti-colonial struggles on modern Jewish politics and historical development? The course will approach this topic thematically rather than as a comprehensive survey. By introducing students to some of the key debates in this emerging field, we will consider what it takes to construct a successful historical argument and how to engage critically with works in an emerging field. A semester-long writing project will expand students capacities to pose thoughtful historical questions; conduct research and gather compelling evidence; read deeply and critically; carefully assess evidence; and write inquiry-based essays.

**Requirements/Evaluation:** Class participation; brief weekly writing on the readings; a final research paper written in stages, including two "research updates" ; an analysis of a source; a research proposal; a rough draft of one paper section; a rough draft of the paper; and a final 25-page paper.

**Prerequisites:** None; open to all students (however, a background in European history and/or Jewish Studies will be helpful).

**Enrollment Limit:** 15

**Enrollment Preferences:** Junior and Senior History Majors and Jewish Studies Concentrators

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

JWST 433 (D2) HIST 433 (D2)

**Writing Skills Notes:** Before each course, students will submit a 2-3 paragraph critique and a list of 3 questions for discussion. The final assignment will be a research paper (approximately 25 pages) or historiographical essay. Assignments en route to the final deadline, include: 1) two early "research updates" to document process and progress; 2) analysis of a source; 3) research proposal; 4) rough draft of a section; 5) draft of paper; 6) final paper. Only some work will be graded, but all will receive feedback.

**Difference, Power, and Equity Notes:** This course considers the complex ways that religion, ethnicity and national identities shaped the colonial and post-colonial world. Never controlling or collectively representing a European power, Jews were also rarely situated at the bottom of any colonial hierarchy, sometimes occupying more than one social or political role in a single colonial territory. This course provides insight into the many ways hierarchies of power could operate in colonial and post-colonial settings.

### **HIST 462 (S) For the Soul of Mankind: The Cold War and American Foreign Relations (WS)**

The United States emerged from the Second World War with unprecedented power and influence; for the first time it was poised to take on a level of global leadership that it had long shirked. Yet the U.S. faced an uncertain world, marked by the ascendance of the communist-led Soviet Union as a rival superpower, the impending decolonization of European empires, the emergence of a nuclear arms race, and a host of changes to domestic American life. What ensued was a 45-year Cold War--a battle for the soul of mankind--marked by American officials' relentless determination to combat the threat of communism at home and abroad. This course explores a range of scholarly approaches to that conflict, focusing on high-level diplomacy, hot wars, propaganda, the cultural cold war, and more. In addition to reading and discussing works that exemplify key approaches to studying America's Cold War, students will develop an original research topic and research and write a 20- to 25- page paper, based in primary sources, on a Cold War-related topic of their choosing.

**Requirements/Evaluation:** evaluation will be based on class participation, several short papers, and a 20- to 25-page research paper

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** Advanced history majors

**Expected Class Size:** 10-20

**Writing Skills Notes:** Students will produce a 20-25 page final paper through a series of scaffolded assignments, each of which will receive feedback from the professor as well as a group of peers. Assignments leading up to the final research paper include a 4-6 page historiography paper, a 2-3 page draft introduction, and a completed initial draft.

### **HIST 470 (S) Latinx Migrations: Stories and Histories (WS)**

**Cross-listings:** LATS 470 HIST 470

**Primary Cross-listing**

Latinx migration histories are often told with sweeping data and within broad historical contexts. While these are important, the voices of the people leaving their home countries and coming to the United States can be lost or buried. During the 1970s, the emerging subfield of social history asserted the need to craft histories that took into consideration the everyday lives of everyday people. Oral history emerged a key tool in capturing the personal stories too often missed in historical archives. At the same time, Puerto Rican Studies, Chicano Studies, and later, Latinx Studies emerged to tell the histories of groups too often omitted from or misrepresented in the scholarship. These fields relied on traditions of testimonios or storytelling. This course focuses on Latinx oral histories, autobiographies, and other first person narratives to explore how people are impacted by and experience those broad historical contexts, as well as how the decisions they make and the actions they take shape those broad historical contexts. This course examines first person narratives in the context of specific Latinx groups in particular historical, geographical, and social contexts, while interrogating the methodological and interpretive challenges of working with oral histories and other first-person primary sources.

**Requirements/Evaluation:** class participation and presentations; short writing assignments; proposal, bibliography, and drafts of final paper; final paper of 15 to 20 pages

**Prerequisites:** none

### **HIST 480 (F) Media and Society in Africa (DPE) (WS)**

**Cross-listings:** HIST 480 GBST 480 AFR 381

**Primary Cross-listing**

The Media have long played important roles in African societies. As early as the second half of the 19th century, African intellectuals were using print technology to address the people. As radio technology was in its infancy during the first half of the twentieth century, Africans were gathering around re-diffusion stations and later around single receivers to listen to news and entertainment programming. In this tutorial, we will examine these histories of media and media technologies on the continent. Ultimately, we will explore the roles that media played in serving particular community needs and how communities also adapted new media technologies to fit local conditions. Media content has historically been determined based on standards beyond viewers', readers' and listeners' control. We will examine the influences that editors and political leaders on the continent have exerted on content as well as what forces they responded to. We will also further explore the media's role in major events on the continent, from governmental changes to the ending of apartheid in South Africa and the role that media have played in areas of conflict.

**Requirements/Evaluation:** Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

**Prerequisites:** This course open to all students

**Enrollment Limit:** 10

**Enrollment Preferences:** Preference will be given to history majors and students with prior experience with African history. If the course is over-enrolled, students may be asked to complete a questionnaire to determine enrollment

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Writing Skills Notes:** Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular feedback and critiques- both oral and written - from the professor, as well as oral critiques from tutorial partners.

**Difference, Power, and Equity Notes:** Modern media developed in Africa as means of control and cultivating dutiful colonial subjects. However, media then emerged as sites of contestation and even tools with which colonial subjects challenged colonial rule. They have continued to be revealing sites for issues of gender, race, class, and ethnicity. As such, this course immensely explores diversity, power and equity and how these all-important societal concerns are expressed through the media in Africa.

**Cross-listings:** ASIA 481 HIST 481

Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. We will also examine contemporary arguments for Taiwan as part of China. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

### **HIST 487 (F) Archive Stories (WS)**

What is an archive? What stories are to be found in the archives and what stories do we tell ourselves about the meaning and function of the archive? For many years now, and certainly since the publication of the French theorist Jacques Derrida's essay, *Archive Fever*, historians, archivists, and cultural theorists have been asking questions *about* the archive as much as they have been engaged in the actual practice of archiving, or making use of material found in archives. This tutorial considers some of those questions. It is *not* a hands-on course about how to use an archive, nor a celebration of material found in archives. Rather it consists of a series of broad enquiries into the history of the archive, the politics of collecting, and the political and social function of the archive in various societies. Each week a specific topic will be addressed, collectively illustrative of the breadth of recent enquiries into the logic of the archive. Topics will include, amongst others: the urge to archive in the Renaissance; the nature of the historian's encounter with "the past" in the archive; the function of the archive in the creation of the modern nation state; the power relations embodied in the colonial archive; the construction of contemporary group identities through the practices of archiving; the recent desire to archive everything, not merely the written document; and the new archives of cyberspace.

**Requirements/Evaluation:** each student will write five 6- to 7-page essays, prepare five critiques of their tutorial partner's work, and write a final paper about their work on the Williams archives

### **HIST 488 (F) Sites of Memory and American Wars (WS)**

This tutorial will examine the ways that U.S. military ventures have been memorialized through a variety of physical sites, including landscapes, monuments and statues, museums, and other depictions. Given the enormous national conversation and reconsideration of many of these sites over the last decade, we will ask such questions as: How and why has the memorialization of U.S. wars changed since the country's founding? Who determines what is preserved and what stories are told? What is the relationship between individual experiences, collective memories, and national narratives? What do "sites of memory" tell us about society's views of wars and soldiers and about the United States? Throughout, we will pay attention to how these sites reflect historical understandings of the time and have also served as focal points of social and political protests.

**Class Format:** Students will be assigned a tutorial partner, and tutorial pairs will meet with the professor for one hour each week at a regularly scheduled meeting time.

**Requirements/Evaluation:** This course follows a typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay

on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors and students with previous coursework in History.

### **HIST 491 (S) The Suburbs (WS)**

**Cross-listings:** AMST 490 ENVI 491 HIST 491

#### **Primary Cross-listing**

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

**Class Format:** Students will be assigned a tutorial partner, and tutorial pairs will meet with the professor for one hour each week at a regularly scheduled meeting time.

**HIST 495 (S) The Medieval World System: Globalization before 1500 (WS)**

In recent years, scholars have turned increasing attention to global history in the pre-modern period. This tutorial takes as its focus the global Middle Ages: roughly speaking, the period between 500 and 1500 CE. This was a period that saw mass-produced consumer goods cross from China to India, East Africa, and the Middle East, inspiring admiration and imitation in multiple different markets. It saw games, music, and forms of literature become popular across continents, and saw religious communities forge networks spanning thousands of kilometers. To study the global Middle Ages is to place exchange and networks, both commercial and cultural, at the heart of our analysis. We will read and analyze many accounts by medieval travelers, merchants, and pilgrims who crossed Afro-Eurasia, alongside works by modern historians and archaeologists who have pieced together the patterns of movement and exchange that tied together the diverse societies of pre-modern Afro-Eurasia.

**Requirements/Evaluation:** Students will meet in pairs with the instructor once a week. How have European states responded to calls to acknowledge and atone for the crimes of Empire? This course places recent calls for reparations in a historical context. Weaving together a wide-range of historical and contemporary case studies -- including the Conference on Jewish Material Claims Against Germany (1951), Germany's official recognition of the Herero Genocide (2021), and ongoing debates in France about the restitution of colonial-era looted art, this course investigates how the language and mechanisms of restorative justice have historically developed, evaluates which past efforts of restorative justice were successful and why, and examines what role historical memory and historians-as-activists should play in campaigns that seek reparations for colonial injustices. In doing so, it evaluates how activists have deployed scholarly vocabularies on memory, justice, and violence in a number of national and international contexts.

**Writing Skills Notes:** This is an intensive writing seminar for advanced history majors. We focus on how to write a journal-length piece of original historical research, while evaluating the strengths and weaknesses of other scholarly pieces. Students receive feedback on multiple drafts of their final research papers and participate in two workshop seminars in which they provide feedback on the papers of their peers.

**Difference, Power, and Equity Notes:** This course asks how contemporary political and social justice movements can -- or ought to -- address political and economic inequities between the Global South and North, introduces students to how questions of race and national belonging have informed contemporary debates on restorative justice, and exposes the persistence of some global and historically-situated inequities.

**JWST 433 (F) Colonialism and the Jews (DPE) (WS)**

**Cross-listings:** JWST 433 HIST 433

**Secondary Cross-listing**

Where are Jews in colonial history? Where is colonialism in Jewish history? In many ways, these questions haunt contemporary Jewish and often world politics. Indeed, in the twenty-first century, the relationship between Jews and colonialism has been present in debates about Zionism, the history of capitalism, Jewish-Muslim relations, the wider Middle East, the future of European identity, the aims and roots of American empire, and the intersections of race and religion in colonial domination. And yet, typically, the subject of Jews and colonialism is more polemicized or avoided than

probed. This course will seek to address this lacunae by introducing students to new historical scholarship that has begun tracing these questions. Students will consider the ways in which imperial legal forms, economic structures, and cultural and intellectual underpinnings shaped Jewish lives from the British antipodes to French North Africa, and throughout the Russian and Ottoman Empires, as well as in metropolitan Europe. Among other issues, we will ask: How did Jews become defined and define themselves in the colonial venture? In their various roles in colonial empires, are Jews best understood as subjects or agents of empire or are there more fruitful ways to conceptualize their engagement? What was the impact of anti-colonial struggles on modern Jewish politics and historical development? The course will approach this topic thematically rather than as a comprehensive survey. By introducing students to some of the key debates in this emerging field, we will consider what it takes to construct a successful historical argument and how to engage critically with works in an emerging field. A semester-long writing project will expand students capacities to pose thoughtful historical questions; conduct research and gather compelling evidence; read deeply and critically; carefully assess evidence; and write inquiry-based essays.

**Requirements/Evaluation:** Class participation; brief weekly writing on the readings; a final research paper written in stages, including two "research updates" ; an analysis of a source; a research proposal; a rough draft of one paper section; a rough draft of the paper; and a final 25-page paper.

**Prerequisites:** None; open to all students (however, a background in European history and/or Jewish Studies will be helpful).

**Enrollment Limit:** 15

**Enrollment Preferences:** Junior and Senior History Majors and Jewish Studies Concentrators

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

JWST 433 (D2) HIST 433 (D2)

**Writing Skills Notes:** Before each course, students will submit a 2-3 paragraph critique and a list of 3 questions for discussion. The final assignment will be a research paper (approximately 25 pages) or historiographical essay. Assignments en route to the final deadline, include: 1) two early "research updates" to document process and progress; 2) analysis of a source; 3) research proposal; 4) rough draft of a section; 5) draft of paper; 6) final paper. Only some work will graded, but all will receive feedback.

**Difference, Power, and Equity Notes:** This course considers the complex ways that religion, ethnicity and national identities shaped the colonial and post-colonial world. Never controlling or collectively representing a European power, Jews were also rarely situated at the bottom of any colonial hierarchy, sometimes occupying more than one social or political role in a single colonial territory. This course provides insight into the many ways hierarchies of power could operate in colonial and post-colonial settings.

### **LATS 315 (S) Research Design in Geography: Social Science Perspectives (WS)**

How do you design a research project? Which methods of data collection and analysis are appropriate for research questions in Latinx Studies? This course provides an introduction to the process of designing and carrying out a research project, including related to Latinidades, or a plurality of Latinx identities. It introduces students to how social science knowledge is produced to understand the research process, how research emerges, and how we affect research. Course objectives for students are: 1) to design social science research effectively; 2) to critically evaluate the research design of others; 3) to strengthen their academic research and writing skills; and 4) to develop an appreciation for how knowledge is acquired, organized, and communicated. Students will iteratively develop an original research proposal involving several pieces of synthesis. Through applying different research methods to case studies in Latinx Studies, students will understand that the complexity of the issues affecting Latinx communities requires thoughtful research. Students will receive practical training in research protocols, organization methods, project management, and analytical approaches.

**Class Format:** This class will have short lectures with most of the time dedicated to group discussions. Students should expect to carry out research methods outside of class.

**Requirements/Evaluation:** Class participation. Assignments where students carry out research methods. Five writing assignments of various page lengths (1-10 pgs) compose students' research proposal project. Each component of the project will be revised by students after professor feedback. These revisions will culminate into a final paper (~20 pages). There will be a final exam.

**Prerequisites:** N/A

**Enrollment Limit:** 20

**Enrollment Preferences:** LATS concentrators or those intending to become LATS concentrators; juniors interested in a senior honors thesis;

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will have five writing assignments that build upon each other, from the statement of research topic, initial research questions, annotated bib, draft lit review, and proposed methodology. Students receive critical feedback on grammar, style, and argument and submit revised versions of their assignments. Students submit a completed research project proposal as their final paper.

**Cross-listings:** ARTH 358 LATS 358

#### **Primary Cross-listing**

This course will explore the various forms of installation and site-specific artworks created by Latinx artists for both museums and public space. We will examine the ways in which Latinx artists have used space as a material in the production of artworks and how this impacts the works' meanings and the viewer's experience. Within the context of U.S. Latinx culture and history, we will connect notions of space with ideas about cultural citizenship, civil rights, and social justice. A variety of art forms will be studied, from traditional to experimental, including murals, sculpture, performance, video, and several multimedia, interactive, or participatory projects. While establishing a historical lineage and theoretical frameworks for analyzing this growing genre, we will pay particular attention to how these works engage urban space and often challenge the institutional assumptions of museums and curatorial practice. Likewise, we will examine the important debates associated with various public art and museum installation controversies.

### **LATS 385 (F) Latinx Activism: From the Local to the Transnational (DPE) (WS)**

**Cross-listings:** LATS 385 HIST 385

#### **Secondary Cross-listing**

Latinas/os/x's have long sought inclusion in the U.S. polity and society, while the meanings of inclusion and the means to achieve it have shifted historically. For Latinxs, activism is often shaped by the specific dynamics of each group's migration to the United States and by their arrival into a

particular context. Home country politics and transnational connections can remain important. Yet local activism to meet immediate needs and to address critical issues becomes important as well. Working within existing structures, Latinx communities have at times questioned and challenged those existing structures, as activists have addressed a wide variety of often intersecting issues. This course roots itself in the historical progression of Puerto Rican and Mexican-American activism, before turning to the social and political movements of the late 1960s and 1970s, as shaped by Puerto Ricans, Chicanos/as, Cubans, and Dominicans. The 1980s witnessed increased immigration from several Central and South American countries, arriving in the context of reactions to those political and social movements, as well as increased U.S. intervention in their countries of origin--a context that again shaped both local and transnational activism. Students' final projects will be anchored within this historical framing and within the lens of local and transnational activism, while moving forward in time to consider more contemporary dimensions of Latinx activism.

**Class Format:** This is a discussion-based and writing intensive course, so reading and full participation is important. Students will be expected to read each other's work and to provide thoughtful and constructive feedback.

**Requirements/Evaluation:** Class participation and presentations; several 3-4 page essays; final paper of 12-15 pages, as well as proposal, bibliography, and drafts

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** History majors and Latina/o Studies concentrators, seniors

A final presentation is another opportunity to hone arguments and use of evidence, as well as to receive feedback on revised drafts from the professor.

**Difference, Power, and Equity Notes:** This course examines how Latinx communities have sought inclusion in U.S. society and polity, in the face of marginalization based on race, ethnicity, class, gender, sexuality, and/or political perspective, as well as other intersecting markers of difference. Questions of difference, power, and equity are analyzed at the structural, community, and individual levels.

### **LATS 410 (F) Arquivistas: An Archival Storytelling Course (DPE) (WS)**

Archival storytelling: the "creative practice of resurfacing hidden, untapped, and untold historical treasures and reimagining that content in various storytelling presentations that speak to modern-day audiences" (Arbo Radiko). In this generative writing and critical-practice course, students explore/inhabit the role of writers and storytellers as preservers of history and culture. With a focus on documenting and/or reimagining Latinidades, the course invites students to address: the unique narrative forms archives may take beyond collections of artifacts; how archives can inform the creation--and definition--of literary work; the relationship between archives and power; information the archivist/storyteller may choose to include or omit, reveal or conceal; how the archivist/storyteller might practice what scholars Michelle Caswell and Marika Cifor call "radical empathy," one that takes into account the diverse affective roles and responsibilities of the: archivist, records creator, records subject, records user, and community member. The course is designed to help students address the above through assignments that build towards final projects. Through the creative process, students learn to: research, compile, and analyze materials from various open-access repositories; identify and write emergent stories from collected material; and present these stories to the public using narrative elements and tools in the digital humanities. Projects may include virtual exhibits, data stories, annotated maps, historical fiction, ekphrastic poetry, finding aids, and interactive timelines. Projects may also examine the Latinx experience on campus, building on archival efforts initiated by students for the LATS Program 15th Anniversary Exhibit at Williams College Library.

**Requirements/Evaluation:** Assignments and in-class exercises; attendance; participation; peer review

**Prerequisites:** n/a

**Enrollment Limit:** 19

**Enrollment Preferences:** LATS concentrators; students who haven't taken creative-writing courses but are interested in the topic; students interested

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** Two five-page papers (each receiving critical feedback from professor on grammar, style, and argument); a midterm project proposal with critical feedback from professor and peers; one taxonomy glossary based on course readings and proposed project; one annotated bibliography; artist statement and notes on craft; one final paper submitted with corresponding creative project.

**Difference, Power, and Equity Notes:** This course examines various forms of difference, power, and equity related to creating and engaging archives. In exploring and creating archives themselves, students pay close attention to any omissions and concealments in the documentation of historical memory, particularly in relation to diverse Latinx experiences.

This seminar examines connections between Latinx and Latin American art through a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time: LA/LA that opened in 2017. While the chronological span for the overall project reaches from Pre-Colombian art to present, we will focus on modern and contemporary art after the 1960s and consider key themes of art and activism, borders and diaspora, globalism and modernism, and popular culture and science fiction in the visual arts. Diverse in scope, these shows explored important developments in the arts of the Americas from the late-20th and 21st centuries, including, abstraction, Chicano muralism, Conceptual art, craft, feminist art, Kinetic art, Modernist design and architecture, social practice, and queer activism. Students will pursue individual research projects directly related to the art exhibitions we study, and examine photography, performance, painting, sculpture (including installation and participatory art), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history.

**LATS 470 (S) Latinx Migrations: Stories and Histories (WS)**

**Cross-listings:** LATS 470 HIST 470

**Secondary Cross-listing**

Latinx migration histories are often told with sweeping data and within broad historical contexts. While these are important, the voices of the people leaving their home countries and coming to the United States can be lost or buried. During the 1970s, the emerging subfield of social history asserted the need to craft histories that took into consideration the everyday lives of everyday people. Oral history emerged a key tool in capturing the personal stories too often missed in historical archives. At the same time, Puerto Rican Studies, Chicano Studies, and later, Latinx Studies emerged to tell the histories of groups too often omitted from or misrepresented in the scholarship. These fields relied on traditions of testimonios or storytelling. This course focuses on Latinx oral histories, autobiographies, and other first person narratives to explore how people are impacted by and experience those broad historical contexts, as well as how the decisions they make and the actions they take shape those broad historical contexts. This course examines first person narratives in the context of specific Latinx groups in particular historical, geographical, and social contexts, while interrogating the methodological and interpretive challenges of working with oral histories and other first-person primary sources.

These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; *Dialogo*, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619, Rudolphine Tables 1627); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (*Principia Mathematica*: laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (*Miscellanea curiosa*, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (*Atlas Coelestis*, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); George Ellery Hale (Mt. Wilson Observatory 100" telescope, 1917; Palomar Observatory 200" telescope, 1948), Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe's expansion rate, 2000s). First editions will be available in Williams' Chapin Library of rare books, where we will meet in an adjacent classroom. We will also consider how such original materials are collected and preserved, and look at examples from the wider

world of rarities, such as a leaf from the Gutenberg Bible (c. 1453) and a Shakespeare First Folio (1623, with a discussion of astronomical references in Shakespeare's plays). Americans have been arguing intensely in recent years about how we should remember the leaders from our nation's past. Does Thomas Jefferson's statue belong on a university campus? Should college dorms be named for John C. Calhoun and Woodrow Wilson? Should Harriet Tubman's portrait replace Andrew Jackson's on the \$20 bill? In this course we will look at how people in the United States and elsewhere have used their leaders' images to hash out larger political issues of national identity, purpose, and membership. Why has historical commemoration gotten so contentious--or has it always been contentious? What's really at stake when we depict our leaders? How (if at all) should we reconcile contemporary morality with historical context in assessing the leaders from our past? To address these questions, we will study portrayals of some of the most famous leaders in American history--including Alexander Hamilton, Abraham Lincoln, and Martin Luther King, Jr. Our sources will include political speeches, literature, film, and journalism as well as monuments and museum exhibits; though our examples will be drawn mostly from the United States, our conceptual framework will be transnational. As a final assignment, students will write an 18-20 page research paper on a topic of their choice related to the core themes of the course.

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

### **MATH 393 (S) Research Topics in Combinatorics (WS) (QFR)**

Combinatorics provides techniques and tools to enumerate, examine, and investigate the existence of discrete mathematical structures with certain properties. There are numerous areas of applications including algebra, discrete geometry, and number theory. In this project-based research course students will work in small groups to learn combinatorial techniques and tools in order to develop research questions and begin tackling unsolved problems in combinatorics.

**Requirements/Evaluation:** Students will be evaluated through written drafts of a manuscript and its revisions and multiple in-class presentation.

**Prerequisites:** Math 355

**Enrollment Limit:** 19

**Enrollment Preferences:** Post-core mathematics majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (WS) (QFR)

**Writing Skills Notes:** The main goal of this course is to undertake original research in combinatorics, as such student assessment is based on developing positive collaboration skills, and improving technical written and oral skills in mathematics through manuscript draft submissions and in-class presentations. Students will provide multiple drafts of their manuscript and in right of this the course will be writing intensive.

**Quantative/Formal Reasoning Notes:** The main goal of this course is to undertake original research in the math field of mathematics. See above for more details.

### **MUS 214 (S) Divas and Dervishes: Introduction to Modern Arab Music and Performance (DPE) (WS)**

**Cross-listings:** MUS 214 ARAB 214 COMP 270

**Secondary Cross-listing**

From Sufi rituals to revolutionary uprisings, music has long played a central role in the social, political, and religious life of the Arab world. This is especially audible in the modern era, when new technologies and institutions began to record, amplify, and broadcast the region's sounds, preserving centuries-old traditions while also producing new forms of popular music. This course introduces students to Arab musical genres and practices as they developed from the late nineteenth century. We will cover a broad geographical range, exploring the classical Andalusian repertoires of Algeria, ecstatic dervish chants in Egypt, patriotic pop tunes from Lebanon, and other topics. To highlight connections between musical traditions as well as their unique local features, we will ask questions such as: What can music tell us about interactions between sacred and secular life? How is music used to define social groups and negotiate identity, gender, and class? Which musical characteristics are associated with Arab "heritage" and "modernity," and how are these performed? In what ways does music shape everyday life in the Arab world? Class sessions and discussion will be based on academic readings and at-home listening assignments. No previous knowledge of Arabic or Arab music are required.

**Requirements/Evaluation:** In-class participation, short essays (1 page) every two weeks, midterm presentation, and a final paper (12-14 pages).

**Prerequisites:** None

**Enrollment Limit:** 19

**Enrollment Preferences:** Arabic Studies and Music majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** Students will develop their writing skills by submitting one-page unit responses every two weeks and a final paper of 12-14 pages on a topic of their choice. Students will receive feedback on each writing assignment and have opportunities for multiple drafts and peer review during the semester.

**Difference, Power, and Equity Notes:** Through the lens of music, this course critically examines modern Arab society and power dynamics related to politics, gender, race, and class.

### **MUS 275 (S) Shakespeare through Music (WS)**

The plays of William Shakespeare are replete with references to music, and in his day included singing and even dancing as part of the narrative. As his plays entered the global canon, composers and choreographers, along with musicians and dancers, have contributed as avidly to interpreting Shakespeare's plots and characters as have theater directors and actors across the world. This tutorial course will focus on three plays--the tragedies *Romeo and Juliet* and *Othello*, and the comedy *Midsummer Night's Dream*--in order to compare and contrast a broad range of ways in which music works to tell these stories and portray these characters. We will consider these three plays in genres ranging from symphony orchestra, opera, and ballet to film scores, modern dance, jazz, musical theater, and popular song. Music from the Renaissance to the present day will be explored, including composers such as Purcell, Mendelssohn, Tchaikovsky, Verdi, Prokofiev, Bernstein, Britten, Ellington, and Costello. We will also examine film scores ranging from the silent era through such directors as Max Reinhardt, Orson Welles, Franco Zeffirelli, and Baz Luhrmann. Through comparative analysis of different approaches to relating Shakespeare's plays through music, this tutorial aims to develop both critical listening to music and critical thinking about music.

**Requirements/Evaluation:** each student will write five 6- to 7-page essays, and provide five peer reviews; evaluation will be based on the quality of written work and discussion

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Students majoring or planning to major in Music, English, or Theater.

**Expected Class Size:** 6

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Students will write five short essays of 6-7 pages each, and receive oral and written feedback addressign structure, argumentation, and style from their tutorial partner and the instructor on every essay.

### **MUS 316 (F) Music in Asian American History (DPE) (WS)**

**Cross-listings:** MUS 316 AMST 366

#### **Primary Cross-listing**

Is "Asian American music" all music made by Asian Americans, music by Asian Americans specifically drawing on Asian heritage, or music engaging with Asian American issues? This course embraces all three definitions and the full diversity of Asian American musical experience. We will study the historical soundscapes of immigrant communities (Chinese opera in North America; Southeast Asian war refugees) and how specific traumatic political events shaped musical life (Japanese American internment camps). We will encounter works by major classical composers (Chou Wen-Chung; Chen

Yi; Tan Dun; Bright Sheng) and will investigate the careers and reception of prominent classical musicians (Midori; Seiji Ozawa; Yo-Yo Ma). Afro-Asian fusions, inspired by civil rights protest movements, manifested in jazz (Jon Jang; Fred Ho; Anthony Brown; Hiroshima; Vijay Iyer) and hip hop (MC Jin; Awkwafina; Desi rappers). Asian Americans have been active in popular music at home and abroad (Don Ho; Yoko Ono; Wang Leehom; Mitski). Finally, we will investigate communal forms of Asian American music making that have crossed racialized and gendered boundaries (taiko drumming; Indonesian gamelan; belly dance; Suzuki method). This seminar is designed to develop research skills, as we pursue original fieldwork, archival research, and oral history interviews.

**Requirements/Evaluation:** Active class participation; two short papers (5-6 pp.) and a research term paper (12-15 pp.).

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Students with curricular experience in Asian American history or music studies.

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Writing Skills Notes:** Students will write three papers during the semester: two 5-6 page papers and a 12-15 page research paper, written in stages. Students will receive detailed comments on each paper and at each stage of the research paper process, allowing them to build upon those comments in subsequent writing assignments.

**Difference, Power, and Equity Notes:** Political and cultural forces of exclusion not only determined Asian American musical participation in American music history but have shaped Asian American styles of music. We will study the history of Asian American political struggles as they have intersected with music and how Asian Americans have at certain points sought allegiance through music with other marginalized groups. We will explore as well popular media representations of Asian American musicians revealing race-based assumptions.

### **MUS 475 (S) Hearing Through Seeing: Music and Visuality (WS)**

We hear music, but seldom is the experience purely aural -- the visual also plays a crucial role. Sound and sight converge when we observe musicians performing in concert venues, patterns of notes and rhythms on the musical score, pictures and text on album and sheet music covers, moving images on screens in films, music videos, and video games. A programmatic work conjures specific images, even whole narratives, in our "mind's eye," or imagination. A work of absolute music, such as a fugue or symphony, can do so as well, although what we envision here may be largely abstract. With hybrid genres, such as opera, musical theater, and dance, the musical and the visual jointly command our attention, often in a spectacular display. This seminar explores myriad ways that "seeing" mediates our experience of hearing, making, and understanding music. We will examine a broad range of topics, including synesthesia; visuality in performance and interpretation; visual metaphors such as line, color, and space in music analysis and criticism; music and representation; intersections between music and painting, sculpture, and architecture; operatic staging; illuminated music manuscripts; eye music and graphic notation; and sound and image in digital media.

**Class Format:** Students will give four presentations based on the subjects of their papers.

**Requirements/Evaluation:** evaluation will be based on three 5-6 page papers and presentations, a final 8-10 page paper and presentation, and class participation

**Prerequisites:** ability to read music

**Enrollment Limit:** 8

**Enrollment Preferences:** junior and senior music majors, and any student with a demonstrated interest in music

**Expected Class Size:** 8

**Grading:** no pass/fail option, yes fifth course option

**Secondary Cross-listing**

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

**PHIL 109 (F) Skepticism and Relativism (WS)**

Intellectually, we are ready skeptics and relativists. We doubt, we point out that no one can be certain in what she believes, and we are suspicious of declarations of transcendent reason or truth (unless they are our own). Emboldened by our confidence in skeptical arguments, we claim that knowledge is inevitably limited, that it depends on one's perspective, and that everything one believes is relative to context or culture. No domain of inquiry is immune to this destructive skepticism and confident relativism. Science is only "true" for some people, agnosticism is the only alternative to foolish superstition, and moral relativism and, consequently, nihilism are obvious. But is the best conclusion we can come to with respect to our intellectual endeavors that skepticism always carries the day and that nothing at all is true? In this tutorial, we will investigate the nature of skepticism and the varieties of relativism it encourages. Our readings will come primarily from philosophy, but will be supplemented with material from anthropology, physics, psychology, and linguistics. We will look at relativism with respect to reason and truth in general as well as with respect to science, religion, and morality. Along the way, we will need to come to grips with the following surprising fact. With few exceptions, thoroughgoing skepticism and relativism have not been the prevailing views of the greatest minds in the history of philosophy. Were they simply too unsophisticated and confused to understand what is for us the irresistible power of skepticism and relativism? Or might it be that our skepticism and relativism are the result of our own laziness and failure? Of course, this question cannot really be answered, nor is there any value in trying to answer it, and any "answer" will only be "true" for you. Right?

**Requirements/Evaluation:** participants will present substantial written work in the tutorial every other week, and will be responsible for commenting on their tutorial partner's work.

### **PHIL 117 (F)(S) Arguing about God (WS)**

"Faith is a fine invention," according to Emily Dickinson's poem, "when gentlemen can see; but microscopes are prudent in an emergency." This introduction to philosophy will see how far the microscopes of reason and logic can carry us in traditional arguments about the existence and nature of God. We will closely analyze classical arguments by Augustine, Avicenna, Aquinas, Anselm, Maimonides, Descartes, and others. Pascal's wager is a different approach: it argues that even though proof of the existence of God is unavailable, you will maximize your expected utility by believing. We will examine the wager in its original home of Pascal's *Pensees*, and look at William James' related article, "The Will to Believe." The millennia old problem of whether human suffering is compatible with God's perfection is called "the problem of evil." We will examine this issue in Hume's *Dialogues Concerning Natural Religion*, classic sources and contemporary articles. Students should be aware that, in the classic tradition, this class resembles a logic course.

**PHIL 118 (F)(S) Meaning, Communication and Society (DPE) (WS)**

The primary way we interact with others is through the use of language. We use language to communicate meanings in order to accomplish a variety of goals: to convey information, make requests, establish rules, utilize power, issue protests, and much more. We coordinate our lives through sounds from mouths, signs from hands, and squiggles on paper because somehow sounds, signs, and squiggles have *meanings*. This course is an investigation into how language is used to express meaning, and how such expression can have real interpersonal and societal impact. Using resources from philosophy and linguistics, we will study various ways in which literal and non-literal uses of language influence our social lives. Of particular interest will be how language can be used to establish, reinforce, and resist power relationships involving race and gender.

**Requirements/Evaluation:** Weekly short papers (500-1000 words), take-home midterm paper (5-6 pages), take-home final paper (7-8) pages, with comments on writing given on short papers and midterm

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Preference given to first year students and philosophy majors.

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** There will be short writing assignments that will receive comments on content, writing style, and argument structure every week except when midterm/final papers are due. The midterm/final papers will incorporate revisions from previous short papers.

**Difference, Power, and Equity Notes:** This course has a focus on the role of language in relationships involving power, oppression, and group inclusion between individuals belonging to various socio-political identities.

**PHIL 119 (S) Why Obey the Law?: On Justice and Freedom in Western Political Philosophy (WS)**

What social and political arrangements are most conducive to fostering human well-being and the common good? Are we legitimately bound by a social contract? What makes governmental and legal authority legitimate? Is democratic rule always best? What are some of the necessary conditions for democracy? We turn first to two of Plato's most famous dialogues, *The Apology* and *The Republic*. The remainder of the course is devoted to political writings by other figures in the Western philosophical tradition (egs. Hobbes, Locke, Rousseau, Marx, J.S. Mill, W.E.B Dubois, John Rawls, Charles Mills, Jurgen Habermas). While engaging these texts, we will continually reflect on their relevance for thinking about the problems facing liberal democracies today, particularly in the U.S.

**Class Format:** Class participation will consist of various individual and group exercises designed to give students hands on experiences thinking on their feet, collaborating with others, etc.

**Requirements/Evaluation:** Six short responses, 300-500 words each (first two are pass/fail), in which students will be asked to engage a particular part of the assigned text (egs., explaining what a passage means, drawing connections between different parts of the text, identifying an argument, responding to an argument, etc); two 6-page papers based on professors prompts; participation in a panel discussion, and general class participation.

**Prerequisites:** None. Open to any student interested in the sources of our current understandings of justice, freedom and the strengths and weaknesses of democratic governance structures.

**Enrollment Limit:** 19

**Enrollment Preferences:** In the case of over enrollment preference will be given to majors, first years and sophomores

### **PHIL 122 (F) Philosophical Approaches to Contemporary Moral Issues (WS)**

In this tutorial we will examine a number of prominent and controversial social issues, using our study of them both as an opportunity to better understand the moral dimensions of those issues in and of themselves, and to consider the ways in which selected classical and contemporary moral theories characterize and address those moral dimensions. Topics will depend to some extent on student interest, but are likely to include concerns that fall under such headings as euthanasia, conscientious eating, abortion, the ethics of protest, and Covid-19. The course will use a case-based approach to examine these issues, and so in most weeks we will (1) read philosophical articles focused on a key concept or set of arguments central to the issue, and (2) consider in detail one morally complex case in which the concept or arguments have special application or relevance. In addition, we will devote several class meetings interspersed throughout the semester to reading foundational sources in ethical theory.

**Class Format:** Groups of three students (rather than the more conventional two students) will meet weekly with the professor.

**Requirements/Evaluation:** three tri-weekly tutorial papers and two short papers, oral commentaries, and tutorial discussion

**Prerequisites:** none; this course is suitable for first-year students

**Enrollment Limit:** 15

**Enrollment Preferences:** first-year students, sophomores, Philosophy majors, and those who have previously been dropped from the course for over-enrollment

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will write three tutorial papers of 5-7 pages in length, one of which they will revise and resubmit, as well as two 2-3 page papers. In each, students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

**PHIL 126 (F) Paradoxes (WS)**

There are three grains of sand on my desk. This is unfortunate, but at least there isn't a heap of sand on my desk. That would be really worrisome. On the other hand, there *is* a heap of sand in my backyard. I don't know how exactly how many grains of sand are in this heap, but let's say 100,000. My daughter removes one grain of sand. I don't know why, she just does. It seems like there is still a heap of sand in my backyard. In fact, it seems like you can't change a heap of sand into something that isn't a heap of sand by removing one grain of sand. Right? But now we have a problem. By repeated application of the same reasoning, it seems that even after she removes 99,997 grains of sand--I don't know what she wants with all this sand, but I'm starting to worry about that girl--there is still a heap of sand in my backyard. But three grains isn't enough for a heap. So there is not a heap in my backyard. Now I'm confused. Where did my reasoning go wrong? What we have here is an example of the *sorites* paradox. It is a paradox, because I started with seemingly true statements and used valid reasoning to arrive at contradictory conclusions. We can learn a lot about logic, language, epistemology and metaphysics by thinking through and attempting to resolve paradoxes. In this class, we'll work together to think through some ancient and contemporary paradoxes. We'll also work on writing lucid prose that displays precisely the logical structure of arguments, engages in focused critique of these arguments, and forcefully presents arguments of our own. Other topics could include: Zeno's paradoxes of motion and plurality, the liar's paradox, the surprise-exam paradox, paradoxes of material constitution, *Newcomb's Problem*, and the *Prisoner's Dilemma*.

**Requirements/Evaluation:** (i) short response papers; (ii) midterm paper (~5-6 pages) (iii) Final term-paper (~10 pages) in multiple drafts; (iv) Active and informed participation in class discussions.

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** First and second year students. Prospective philosophy majors.

What gives an individual life meaning? Pleasure? Success in fulfilling desires? Flourishing in ways distinctive to a rational agent or a human being (including, for example, developing rational capacities and self-mastery, succeeding in worthwhile projects, cultivating relationships, living morally, developing spiritually)? Can we be mistaken about how well our lives are going, or about what has value? What are the main sources of uncertainty here? Does the fact that our lives will end threaten their meaning? Can science contribute to our understanding of these issues? We'll examine these and related questions through historical and contemporary readings.

**Class Format:** This tutorial will meet on a fixed weekly schedule agreed to by the instructor and participants.

**Requirements/Evaluation:** Four or five tutorial papers (5-6 pages in length), five or six critiques (2-3 pages in length), and one rewrite.

**PHIL 211 (S) Ethics of Public Health (WS)**

From questions about contact tracing apps to racial and age disparities in health risk and outcomes, the COVID-19 pandemic has foregrounded the importance of ethics as a key concern in public health policies and activities. Moreover, the ethical issues that are implicated in responses to the pandemic reflect the range of those manifested across the field of public health as a whole. In this course, we will survey the ethics of public health through the lens of the COVID-19 pandemic, investigating concepts and arguments that are central to the ethics of public health research and practice. For example, we will examine the ethics of disease surveillance, treatment and vaccine research, resource allocation and rationing, compulsion and voluntariness in public health measures, and social determinants of health outcomes, among other topics. To do this, we will need to become familiar with key ethical theories; think deeply about such concepts as privacy, paternalism and autonomy, exploitation, cost-benefit analysis and justice; and compare the function of these concepts in the context of the COVID-19 pandemic with the way they work in responses to other public health concerns.

**Requirements/Evaluation:** Biweekly 5-7 page papers, oral commentaries, and tutorial discussions.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** declared and prospective Philosophy majors and Public Health concentrators, students with a specific curricular need for the course, and students with a high level of interest who are unlikely to have an opportunity to take the course in a future term

**PHIL 213 (F) Biomedical Ethics (WS)**

Much like the construction of medical knowledge itself, it is from specific cases that general principles of biomedical ethics arise and are systematized into a theoretical framework, and it is to cases they must return, if they are to be both useful and comprehensible to those making decisions within the biomedical context. In this tutorial we will exploit this characteristic of biomedical ethics by using a case-based approach to examining core concepts of the field. The first portion of the course will be devoted to developing and understanding four moral principles which have come to be accepted as canonical: respect for autonomy, beneficence, nonmaleficence, and justice. The remainder of the course will consider key concepts at the core of medical ethics and central issues for the field, such as privacy and confidentiality, the distinction between killing and "letting die," and therapy vs. research. To this end, each week we will (1) read philosophical material focused on one principle or concept, and (2) consider in detail one bioethics case in which the principle or concept has special application or relevance. In some weeks, students will be asked to choose from a small set which case they would like to address; in others the case will be assigned.

**Requirements/Evaluation:** bi-weekly papers, oral commentaries, and tutorial discussions

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** PHIL majors, PHLH concentrators, those who have a curricular need for the course, those who have been dropped from the course in previous semesters due to over enrollment

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will write six tutorial papers of 5-7 pages in length, one of which they will revise and resubmit. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

**Cross-listings:** ENVI 244 PHIL 244

**Secondary Cross-listing**

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Most sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

**Requirements/Evaluation:** five essays (5-7 pages each) and five prepared oral responses to partners' essays; evaluation will be based on essays, oral responses, and quality of discussion

**Prerequisites:** ENVI 101 or one course in PHIL

**PHIL 321 (S) Introduction to Critical Theory: The Enlightenment and Its Critics (DPE) (WS)**

**Cross-listings:** PHIL 321 WGSS 322

**Primary Cross-listing**

We often associate modern faith in the prospects of universal human dignity, rational autonomy, the rights of man, individual liberty, democracy, open scientific inquiry and social and political progress with the Enlightenment. How can we reconcile this faith with the persistence of domination today? Critical theory aims not merely to understand the "struggles and wishes of the age" as Marx one described it, but with emancipation from domination.

Understood in this way, critical theory is identified closely with the intellectual tradition of the Frankfurt School. In this tutorial, will read works in critical theory from the 18th century to the present, some from the Frankfurt tradition, and some not. We will focus on particular topics, examples of which are the following: normative critique, capitalism, authoritarianism, mass culture, enlightenment and reason, progress, violence, the domination of nature, white supremacy, patriarchy and colonialism.

**Class Format:** students will work in pairs and meet for 75 minutes each week with the professor

**Requirements/Evaluation:** Each student will write and present a 5 or 6-page paper every other week and a commentary on their partner's essay on alternate weeks; evaluations are based on written work as well as level of preparation and the quality of intellectual engagement in tutorial meetings

**Prerequisites:** PHIL 202, Kant course, modern political theory, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Philosophy majors and students with background in modern political theory, or other relevant demonstrated background.

**Cross-listings:** WGSS 336 PHIL 326

**Primary Cross-listing**

If we think of Michel Foucault as engaged in writing histories, or genealogies, of his own present designed to undercut the sense of the obviousness of certain practices and ways of thinking, categorizing, and knowing, we can easily imagine that he might now be questioning different aspects of our contemporary "present" than the ones standardly associated with his name, namely, panopticons and surveillance, discipline, criminalization, the biopolitics of health, the normal and the abnormal, etc. In this course we address the question: How is the present we find ourselves living today different from the one that the author Foucault wrote about in the 1960s, 70s and early 80s before his untimely death in 1984? What differentiates today from yesterday? And what present practices and ways of thinking and knowing might be questioned using Foucault's tools, genealogy in particular, for resisting unnecessary constraints on freedom and the perpetuation of unnecessary suffering? What is his legacy today? In this tutorial you will read from a selection of Foucault's texts (books, lectures, interviews) in order to acquire a firm grasp of his method of "critique" and his way of looking at the interconnections between forms of power and the knowledge associated with particular disciplines. We will also read more recent work by Foucault inspired scholars on topics such as the biopolitics of gender, the genealogy of terrorism, the informational person (how we become our data), and neoliberal subjects.

**Class Format:** I may use a seminar format at least twice during the semester.

**Requirements/Evaluation:** evaluation will be based on written work (six 5- to 6-page papers, and six 2-3 page commentaries on their partner's papers) as well as the quality and level of preparation and intellectual engagement in our weekly meetings.

**Prerequisites:** Relevant background in critical theory, social theory, political theory or philosophy.

**Enrollment Preferences:** I will give preference to philosophy majors and to upper class students with a demonstrated background in critical theories. Some sophomores may be eligible.

### **PHIL 329 (F) Four Challenging Moral Philosophers (DPE) (WS)**

Elizabeth Anscombe, Philippa Foot, Amelie Rorty, and Cora Diamond all challenged the prevailing philosophical tenets of their times. Anscombe and Foot resurrected virtue ethics for Anglo-American philosophy and made moral psychology academically respectable. (Foot also invented the infamous trolley car thought experiment.) Rorty challenged the very concept of morality and questioned all moral theory. Diamond investigated the methodology of moral philosophy, paying special attention to the role of literature. In order to hit the ground running, students will be expected to read *The Women Are Up to Something: How Elizabeth Anscombe, Philippa Foot, Mary Midgley, and Iris Murdoch Revolutionized Ethics* by Benjamin J. B. Lipscomb before the first meeting, preferably over the summer.

### **PHIL 330 (S) Plato (WS)**

**Cross-listings:** PHIL 330 CLAS 330

#### **Primary Cross-listing**

Plato is one of the most important and influential thinkers in the history of the western tradition. His depiction of the trial and death of Socrates is one of the classics of western literature, and his views on ethics and politics continue to occupy a central place in our discussions 2400 years after they were written. It is, in fact, quite difficult to get through any course of study in the liberal arts without some familiarity with Plato. Nevertheless, comparatively few people realize that the views we commonly think of as "Platonic" represent only one strand in Plato's thought. For example, we commonly attribute to Plato a theory of the Forms on the basis of his claims in the so-called "middle dialogues" (mainly Republic, Phaedo, and Symposium). However, in his philosophically more sophisticated and notoriously difficult later dialogues (such as the Parmenides, Philebus, Sophist and Statesman), Plato engages in radical criticism and revision of his earlier views. In this course, we will spend the first third of the semester attempting to understand the

metaphysics and epistemology in Plato's middle dialogues. We will spend the balance of the semester coming to grips with Plato's arguments in the later dialogues. We will read several complete dialogues in translation, and will also read a wide variety of secondary source material.

**Class Format:** lecture/discussion; this class will be a roughly equal mixture of lectures, student presentations, and seminar discussion

It'd be perfectly natural to say "I might've left the stove on", then check the stove, then say "I didn't leave the stove on". But perform those exact same steps in a different order--check the stove, say "I didn't leave the stove on", then say "I might've left the stove on"--and something's gone quite wrong. Conversation is dynamic--the back and forth exchange of information is a process that grows and adapts to the surrounding context. The order in which you say things matters, and it matters for what you communicate what actions you take and what events happen around you. In this course, we will investigate dynamic communicative phenomena and discuss competing theoretical explanations about how they're interpreted. Of particular interest will be the extent to which discourse dynamics are built into the meanings of linguistic expressions vs. the extent to which they're consequences of our rational cognition. Is a sentence's relation to previously uttered sentences similar to its relation to extra-linguistic events? How much inference goes into interpreting what's said? In pursuing the answers to these questions, we will discuss both classic and contemporary theories from philosophy and linguistics.

**PSCI 160 (F) Refugees in International Politics (DPE) (WS)**

Globally, refugees seem to create, and be caught up in, chronic crisis. This course evaluates how this can be--how a crisis can be chronic, and for whom this chronic crisis is a solution. We investigate who refugees are, in international law and popular understanding; read refugee stories; examine international and national laws distinguishing refugees from other categories of migrants; evaluate international organizations' roles in managing population displacement; look at the way that images convey stereotypes and direct a type of aid; consider refugee camps in theory and example; and reflect on what exclusion, integration, and assimilation mean to newcomers and host populations. In whose interest is the prevailing system? Who might change it, and how?

**Requirements/Evaluation:** Ten essays: five lead, five response. The first two weeks' essay grades will be unrecorded.

More specifically, the class will examine the origins of the Zionist movement; the role that the First World War played in shaping the dispute; the period of the British mandate; the rise of Palestinian nationalism; the Second World War and the creation of the state of Israel; the 1948, 1956, 1967, and 1973 Arab-Israeli wars; Israel's 1982 invasion of Lebanon and its consequences; the promise and ultimate collapse of the Oslo peace process during the 1990s and early 2000s; the rise of groups such as Hamas, Hezbollah, and Palestinian Islamic Jihad; the rightward shift in Israeli politics since 2000; the intensification of Israeli-Iranian antagonism and its implications; the shift in Israel's relations with the Sunni Arab world that has occurred in recent years; and the future of the conflict.

**PSCI 280 (S) Silicon Valley: Digital Transformation and Democracy (WS)**

Nearly every country in the world seeks to drive economic growth by promoting digital technologies. The universal model is Silicon Valley. In this tutorial, students will examine the origins of the Silicon Valley model and other countries' attempts to emulate it. Departing from "just so" stories of technological determinism, we take up the lens of comparative political economy to investigate the politics that allowed US tech firms to shape economic policy to meet their interests. It is no accident that tech became a symbol for economic growth in the 1970s, precisely when it also began to build powerful alliances in Washington. After investigating the origins of the Silicon Valley model, we trace attempts to adopt it in Europe and Asia, which highlight the model's political contingencies and some of the more salient conflicts over the tech sector. We focus on the ways in which the Silicon Valley model can threaten social welfare through economic inequality and precarious employment, and engage a variety of perspectives, including workplace ethnography, to examine these threats, as well as potential regulatory responses. The course concludes by considering what policies could be appropriate for supporting, while also regulating, the tech sector in the twenty-first century.

**PSCI 291 (S) American Political Events (WS)**

Scandals. Wars and assassinations. Contested elections, Supreme Court decisions, and constitutional amendments. As large as they loom in our daily experience and our historical memory, these sorts of events--concrete, discrete things that happen in and around the political world--are often underestimated as catalysts of political change. Indeed, in the study of American political development, we often look to complex processes and underlying causes as explanations for how and why ideas, institutions, and policies both emerge and evolve. Yet for all our focus on long-term and subtle causal mechanisms, events often serve as political turning points in ways that vary over time, last for extended periods of time, and are not always entirely predictable at the time. Beginning from the presumption that change often has proximate as well as latent causes, this tutorial focuses on events as critical junctures in American politics. Our concern with these events is not with why they happened as or when they did but, rather, with how they altered the American political order once they did--with how they caused shifts in political alignments, created demands for political action, or resulted in a reordering of political values. Over the course of the semester, we will look at ten different types of events, ranging from those that seem bigger than government and politics (economic collapse) to those that are the daily grist of government and politics (speeches), in each instance juxtaposing two different occurrences of a particular category of event. In so doing, we will seek to use controversial and consequential moments in American politics as a window into deeper questions about political change and the narratives we tell about it.

But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Americans have been arguing intensely in recent years about how we should remember the leaders from our nation's past. Does Thomas Jefferson's statue belong on a university campus? Should college dorms be named for John C. Calhoun and Woodrow Wilson? Should Harriet Tubman's portrait replace Andrew Jackson's on the \$20 bill? In this course we will look at how people in the United States and elsewhere have used their leaders' images to hash out larger political issues of national identity, purpose, and membership. Why has historical commemoration gotten so contentious--or has it always been contentious? What's really at stake when we depict our leaders? How (if at all) should we reconcile contemporary morality with historical context in assessing the leaders from our past? To address these questions, we will study portrayals of some of the most famous leaders in American history--including Alexander Hamilton, Abraham Lincoln, and Martin Luther King, Jr. Our sources will include political speeches, literature, film, and journalism as well as monuments and museum exhibits; though our examples will be drawn mostly from the United States, our conceptual framework will be transnational. Consciousness is considered as the 'last great mystery of science.' In this course we are going to delve into one of the most well-studied areas of this mystery, that is visual consciousness. Do you really perceive everything you look at? Are you aware of everything you see? Is our visual experience a grand illusion? We will start our investigation of such questions by reading about various approaches in understanding human consciousness. Then, we are going to apply these approaches to perception, and discuss theoretical and empirical controversies in visual consciousness. Finally, we are going to focus on evaluating empirical studies that attempt to resolve such controversies. The goal of this course is to build a bridge between theory and experimentation by learning how to interpret the results of scientific studies to shed light on theoretical and philosophical debates in the literature.

### **REL 110 (S) Religion in Everyday Life (WS)**

When studying religions, people generally turn to studying scriptures, the life and teachings of the religion's founder, and the fundamental doctrines of the religion. What this approach does not allow us to understand, however, is the way that such religious traditions actually manifest themselves in the world. This course introduces students to an alternative approach to studying religion, by exploring the way these religions are lived and experienced by individuals and communities in a variety of contexts. We will see how religion intersects with people's lived experiences of gender, race, class, sexuality, and broader socio-cultural and political contexts. We will explore this approach to religion through an engagement with ethnography (the qualitative research method in the social-sciences generally described as "participant-observation"). Students will not only learn about the theory and practice of this methodology, but will also conduct their own ethnographic research project over the course of the semester. This will involve: designing a feasible project and research question, selecting local research sites and subjects, taking field-notes and conducting interviews, and finally analyzing data and writing an ethnographic essay.

**Class Format:** Semester-long community-based field research. Regular in-class peer-review exercises.

**Requirements/Evaluation:** regular reading responses, semester-long research project with frequent small assignments building up to the final product (class presentation and approximately 10-page paper)

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** first-year students and sophomores; students interested in Religious Studies

**Expected Class Size:** 10-12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will learn a specific mode of qualitative/ethnographic writing through a semester-long field-based project. This involves many scaffolded assignments of field-based research and writing, for which they receive very regular feedback from the instructor, as well as extensive peer-review exercises. There will be a number of readings on writing style and technique, as well as class discussion and workshopping activities. The final essay will itself be developed in multiple steps.

**Cross-listings:** REL 204 ARTH 206

**Secondary Cross-listing**

Through a deep engagement with primary sources--visual, performative and textual--this tutorial introduces students to global cultures that have participated in the production of Islamic art and culture through the centuries. Through a diverse set of readings, we will discuss how Islamic art is

viewed today. How did, for instance, Colonialism and Orientalism from the 18th to the 20th centuries create an entrenched narrative for the study of the field, that continues to hold sway to this day? How have Muslim cultures defined their own artistic production? In particular, how can specific artworks, such as figural painting or palace architecture, be understood as "Islamic"? What are some key scholarly debates around the term "Islamic Art"? The tutorial is specifically designed keeping in mind the period of soul-searching the field is currently going through, even to the point of questioning the very term "Islamic art" and its epistemological parameters. By familiarizing students to an important discipline in art history, the aim of the tutorial is to provide alternate methodologies as well as epistemologies that run parallel to more mainstream or familiar avenues of study.

**Requirements/Evaluation:** focused bi-monthly writing assignments, 5-7 pages in length, and bi-monthly peer response papers, 2 pages in length.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Art History majors and seniors, Religion majors

It is designed to teach students how to make clear, well-articulated arguments. Students will receive extensive feedback every other week on their writing assignments from the instructor and their peers. There will also be a comprehensive mid-semester review from the instructor.

**Difference, Power, and Equity Notes:** In addition to introducing students to an important field of art history, the tutorial analyzes how Islamic art was codified and examined during the colonial and post-colonial periods, and how that understanding has come to define the field over the last century. The course will encourage students to challenge longstanding biases and assumptions when studying these artworks.

**Cross-listings:** REL 269 STS 269 ASIA 269 ANTH 269

**Primary Cross-listing**

This course provides a social analysis of and practical engagement with mindfulness in the US today. It considers the modern applications of Buddhist meditation as a tool to improve awareness of the related processes of mind, behavior, and emotions within landscapes structured by racism, sexism, and other systemic inequalities. We consider how mindfulness relates to Buddhist discourses as well as the rapid rise of fields like contemplative neuroscience, affective neuroscience, and integrative neurobiology. How can mindfulness help people communicate more effectively--be they doctors or patients, teachers or students? How has the exploding research on mindfulness and meditation since 2000 help us understand the intersection of human emotions, behaviors, and relationships? We train in a variety of Buddhist meditation practices through the semester including forest bathing, mindfulness, compassion meditation, while unpacking the subjective experience of our minds and emotions first-hand. Students will be asked to train in mindfulness practices the entire semester while studying models of the mind developed by research in clinical and evolutionary psychology, affective neuroscience, and interpersonal neuroscience.

This course examines the relationship between religious and environmental thought in America. Exploring a broad range of practices, symbols, and beliefs, we will examine the religious roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have writers, thinkers, and artists from different religious and cultural backgrounds shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? How have they influenced each other to produce distinctively American forms of eco-spirituality? In pursuit of these questions, we will consider a diverse array of topics and cases, including struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoorsmanship, Catholic climate activism, Jewish eco-mysticism, atheist biology, Buddhist therapy, and more.

**Requirements/Evaluation:** Each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper.

How should people treat each other? What constitutes human nature and does it tend towards good or evil? How should we organize society, by focusing on laws and regulations, or on ritual and moral guidance? What is the nature of moral rulership? What is the proper relationship between the individual and larger units of society, from the family to the state? These are some of the key questions that the school of thought that has come to be known as "Confucianism" addresses. As the dominant moral and political philosophy for thousands of years in much of East Asia, Confucianism has shaped our world, past and present, in innumerable ways. In this class we will focus on the foundational texts of the Confucian tradition: the *Analects* (purported to record the words of Confucius himself), the *Mengzi* (often romanized as "Mencius"), the writings of Xunzi, and the *Classic of Filial Piety*.

Beyond those questions noted above, we will further examine how these texts construct their arguments; how they were first composed, compiled, and circulated; how they employ such key concepts as "humaneness" (*ren*), "moral power" (*de*), and "ritual propriety" (*li*); and how they functioned as part of the larger philosophical, linguistic, political, and historical context that we now think of as "early China."

**Requirements/Evaluation:** Evaluation is based on 4 short papers (3-4 pages each), one longer final paper (10-12 pages), and participation in class discussions.

### **RLSP 231 (F) Indigenous Writers of Colonial Mexico and Peru (DPE) (WS)**

This course examines the writings of 16th and 17th Century Indigenous authors of New Spain and colonial Peru. We will study the works of well-known Indigenous writers such as Hernando de Alvarado Tezozomoc, Fernando de Alva Ixtlilxochitl, El "Inca" Garcilaso de la Vega, and Guaman Poma de Ayala, as well as writings by lesser-known and anonymous Indigenous authors. Our focus on the historical contexts and formal aspects of their works will be supplemented and enhanced by a study of the critical methods of textual analysis that are particularly relevant to Indigenous texts, as facilitated by a set of selected critical readings. The course, in short, will aim to interrogate the idea of a "Spanish lettered city" (a colonial city dominated by Spanish men of letters) and will explore the possibilities of an "alter-native" lettered city, one in which Indigenous writing flourishes during times of crisis. *Conducted in Spanish.*

**Requirements/Evaluation:** Each student will write four 4- to 5-page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide three 2-page critiques of their partner's papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise the first three papers and submit a final version. Excellent preparation and active, engaged participation in class discussions is required.

**Prerequisites:** RLSP 105, 107, 200, or 202, placement exam results, or permission of instructor.

This course focuses on the writings of one of the most revered women writers in Hispanic Letters, Sor Juana Inés de la Cruz, who was regarded by her contemporaries as the Tenth Muse. Our exploration and study of Sor Juana's writings will focus on the different genres in which she wrote--prose, poetry, and drama--and it will include a survey and analysis of the historical context in which she wrote, the formal aspects of her writings, and critical essays about her work written by leading scholars in the field of Latin American literature. Near the end of the semester, the course will conclude by expanding its focus to examine the ways in which Sor Juana's work has influenced contemporary Latin American and U.S. Latina authors. *Conducted in Spanish.*

**Requirements/Evaluation:** Each student will write three 5-7 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide two 2-page critiques of their partner's papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise each of the papers and submit a final version. Excellent preparation and class participation is required.

**Primary Cross-listing**

Indigenous movements for land, rights, and cultural preservation have spread to and originated in all corners of the world. However, the global nature of these movements at times obscures ways of being Indigenous in differing contexts. This course analyzes Indigeneity in both the United States and Russia today. Through reading and analyzing ethnography, theory, and literature, it focuses on Indigenous peoples in a comparative context. Rather than prioritizing concern with Indigenous peoples emerging from the US, it attempts to demonstrate what Indigeneity has been in both the United States and Russia and what it is and means today. It asks the following questions: what is Indigeneity and who is Indigenous; how is Indigenous identity constructed and by whom; and what convergences and divergences exist in Indigeneity between the US and Russia or for that matter in other contexts? To help answer these questions, in this course we will grapple with Indigeneity as a social category and other social formations, especially ethnicity, nationality, and race. Topics include: Indigeneity and the State, Revitalization and Resurgence, Indigenous People and Nature Protection, and Hemispheric and Global Indigenities.

In peer-review and instructor feedback, comprehension of the material and the content of the writing, improvement in writing style and clarity, and development of voice will be discussed.

**Difference, Power, and Equity Notes:** In the course, students will learn about Indigeneity as a context-specific social formation. It understands Indigeneity as a category of difference with past and present importance. We will read about, discuss, and write about Indigeneity as a social category, along with other social categories it arose alongside (such as race, ethnicity, and nationality), and how it has been mobilized by both those who identify as Indigenous and by those who designate others as Indigenous.

First uttered by Soviet leader Nikita Khrushchev in 1956, the phrase "cult of personality" was formulated to discredit the hero-worship that accompanied Joseph Stalin's iron-fisted rule of the Soviet Union. Since then, the phrase has gained currency as a condemnation of a variety of seemingly all-powerful leaders in oppressive political regimes, including China's Mao Zedong, Iran's Ayatollah Khomeini, and the ruling Kim family in North Korea. In this course, we will examine the phenomenon of the cult of personality from a variety of perspectives, beginning with the cult surrounding Stalin and ending with that of Vladimir Putin. Our course material will encompass scholarship from multiple disciplines, including history, sociology, political science, cultural and media studies, as well as artistic expression typically labeled propaganda in literature, the visual arts, and film. Although our course will begin in the Soviet Union and end in contemporary Russia, we will explore how the cult of personality has been adapted and updated for different cultural and political purposes in fascist Germany and Spain, China, Iran, North Korea, and Cuba. *All readings will be in English, and all films will have English subtitles.*

**Cross-listings:** RUSS 348 GBST 348 SOC 348

**Secondary Cross-listing**

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the war Russia is currently waging on Ukraine, or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Bulgaria, Poland, and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

### **SOC 221 (S) Money and Intimacy (WS)**

Does money matter in affectionate relationships? Can dollars buy love and care? What impact does market economics have on intimate relationships? This course will examine these questions and their relevance over the course of history, considering what forces have contributed to the shift in thinking about them, and, most importantly, how sociological research and knowledge helps us understand their current status. We will look into a wide range of aspects of private life that require actors to mix personal affairs with financial transactions, including romantic encounters, marriages (and divorces), families of various kinds and compositions, child adoptions, and outsourced care for dependents to name just a few. Intimacy carries different value and content in these contexts, as so does handling exchanges within them, and negotiating the balance of intimate and economic exchanges also necessitates applying diverse strategies *vis-à-vis* the external social world. The course will simultaneously look into the changing character of the economy as it has responded to shifting social values. We will specifically focus on how previously private concerns have penetrated the public sphere and shaped the evolution of what has been dubbed 'emotional capitalism'. People skills, teamwork, emotional labor, commodification of intimacy, care, sex, and body parts, are only a few examples of the central concepts at stake. Naturally, a reflection on the growth of new technologies and social media will enrich many of the discussed themes.

**Requirements/Evaluation:** Each student will be expected to submit five or six 5-6-page essays and five or six brief responses. In addition, each student will be expected to actively participate in tutorial discussions. There will be no final paper or exams.

We think of the freedom to move as a mark of privilege. In the United States, passing a driving test, owning a car, and getting a passport are milestones that signal modernity and freedom. Likewise, we think of restrictions on movement as the domain of the underprivileged, such as the current and formerly incarcerated. But as the Covid-19 pandemic reveals, there have always been two sides to immobility: privileged as well as involuntary immobility. There are correspondingly two sides to mobility: those who move because they want to and others because they have no choice. In this class, students will explore conceptions of mobility as adventurous, free, and modern (as with jet-setting international elites). They will compare and contrast when mobility can be threatening, exclusionary, and limited (as recognized by the Black Lives Matter movement). This class invites students to interpret their environment through the lens of mobility and inequality in the time of coronavirus. Drawing on sociology, anthropology, cultural studies, geography, and migration studies, this interdisciplinary course offers a beginning conversation on the causes and consequences of the freedom to move--or to stay still.

**SOC 291 (S) Religion and Ecology in America (WS)**

**Cross-listings:** SOC 291 REL 291 ENVI 291

**Secondary Cross-listing**

This course examines the relationship between religious and environmental thought in America. Exploring a broad range of practices, symbols, and beliefs, we will examine the religious roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have writers, thinkers, and artists from different religious and cultural backgrounds shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? How have they influenced each other to produce distinctively American forms of eco-spirituality? In pursuit of these questions, we will consider a diverse array of topics and cases, including struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoorsmanship, Catholic climate activism, Jewish eco-mysticism, atheist biology, Buddhist therapy, and more.

**Requirements/Evaluation:** Each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper.

**Prerequisites:** ENVI 101 or instructor permission

**Enrollment Limit:** 10

**Enrollment Preferences:** Environmental Studies majors and concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Writing Skills Notes:** Each student will write five five-page papers and five two-page papers in this class. They will be given extensive weekly feedback on their writing in the form of one-on-one meetings and written comments, and they will be given multiple opportunities for revision. Emphasis will be placed on the mechanics of argumentation, logic and rhetoric, and the development of a distinctive voice.

**Cross-listings:** RUSS 348 GBST 348 SOC 348

**Primary Cross-listing**

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the war Russia is currently waging on Ukraine, or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Bulgaria, Poland, and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

In this course we will study some of the greatest figures in astronomy and consider their leadership in advancing progress in the field. We will consider their lives and works, especially as represented by original copies of their books and other publications. These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; *Dialogo*, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619, Rudolphine Tables 1627); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (*Principia Mathematica*: laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (*Miscellanea curiosa*, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (*Atlas Coelestis*, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); George Ellery Hale (Mt. Wilson Observatory 100" telescope, 1917; Palomar Observatory 200" telescope, 1948), Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe's expansion rate, 2000s). First editions will be available in Williams' Chapin Library of rare books, where we will meet in an adjacent classroom. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the Gutenberg Bible (c. 1453) and a Shakespeare First Folio (1623, with a discussion of astronomical references

in Shakespeare's plays). The course will be taught in collaboration between an astronomer and a rare-books librarian, with remote lectures by experts from around the world.

**Cross-listings:** REL 269 STS 269 ASIA 269 ANTH 269

**Secondary Cross-listing**

This course provides a social analysis of and practical engagement with mindfulness in the US today. It considers the modern applications of Buddhist meditation as a tool to improve awareness of the related processes of mind, behavior, and emotions within landscapes structured by racism, sexism, and other systemic inequalities. We consider how mindfulness relates to Buddhist discourses as well as the rapid rise of fields like contemplative neuroscience, affective neuroscience, and integrative neurobiology. How can mindfulness help people communicate more effectively--be they doctors or patients, teachers or students? How has the exploding research on mindfulness and meditation since 2000 help us understand the intersection of human emotions, behaviors, and relationships? We train in a variety of Buddhist meditation practices through the semester including forest bathing, mindfulness, compassion meditation, while unpacking the subjective experience of our minds and emotions first-hand. Students will be asked to train in mindfulness practices the entire semester while studying models of the mind developed by research in clinical and evolutionary psychology, affective neuroscience, and interpersonal neuroscience.

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

This class engages with the methods of medical anthropology & medical sociology to help students design and implement ethnographic projects that explore health on campus or our wider community. Along the way we consider how disruptive moments like COVID-19 can reveal underlying social inequalities of healthcare access, health outcomes, and well-being; for which we propose innovative and student-focussed solutions. Students will learn and use design thinking, data visualization, and participatory ethnography while engaging with a variety of qualitative methods such as semi-structured interviews, focus groups, and qualitative surveys. We situate and explore our ethnographic projects within a campus and wider communities that are always already structured by power, privilege, and intersectional identities that shape health and well-being. We explore the field of narrative medicine and medical anthropology by developing and practicing skills in active listening, open dialogue, mindfulness, empathy, and curiosity that can profoundly shape ethnographic as well as the patient/provider encounters. For context, we read ethnographic case studies that explore a variety of topics including how structural racism and implicit bias shape clinical medicine & medical education in the US, how concepts of sexual citizenship can reshape our understanding of campus sexual assault, how the spread of US psychiatry has shaped a global landscape of mental health, and how queer activism responded to the HIV/AIDS crisis in the US. Our goals are to create participatory research projects that both explore and alter our habitual practices and individual ways of seeing the world around us.

**Requirements/Evaluation:** Weekly attendance, 3 written fieldnotes (3000 words), weekly writing & fieldwork exercises in class and out of class, a final presentation that includes data visualizations and analysis of research findings.

**THEA 252 (S) Stop Making Sense: Absurd(ist) Theatre in Historical Context (WS)**

**Cross-listings:** THEA 252 COMP 256 ENGL 256

**Primary Cross-listing**

We want to make sense of things. In nearly all of our academic pursuits, the point of analysis is to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

**Requirements/Evaluation:** Evaluation will be based on weekly tutorial papers/response papers, and active participation in weekly tutorial sessions.

This seminar provides an overview of queer, women of color feminist, decolonial, and critical ethnic studies critiques of orthodox Marxism. Beginning with core texts from the tradition, we will examine a range of forms of labor and social positions that complicate Marx's emphasis on the white male industrial factory worker. In the first part of the seminar, we will study seminal texts that center reproduction, racial slavery, care and domestic work, indentured servitude, sex work, and migrant labor, and in the second half, we will turn to an array of practices that respond to and offer strategies to survive under racial capitalism. This seminar will equip students with critical understandings of the ways racial capitalism has centrally relied on the mass elimination, capture, and recruitment of different racialized and gendered bodies in and beyond the U.S. and how, through performance, the capitalist system of value and life under these conditions can be undone and reimagined.

This course is designed to initiate you into the pleasures, pains and perplexities of critical thinking about gender and the situations of women across the globe. We will survey a wide variety of writers and issues--historical and contemporary, theoretical and practical. Above all, the course is intended as an exploration of the tremendous diversity of thought contained under the general rubrics of feminist and gender studies and a vehicle for developing skills in writing and research as well as analytical tools for further work in the field. The goal is not to bring about a specific point of view, but rather to learn to analyze issues critically using the methods and frameworks that feminist theory and queer theory have developed as academic disciplines.

**Class Format:** Mix of lectures and seminars

**Requirements/Evaluation:** Participation during class and in online forums, weekly reading responses, two short essays with revisions, and a final research paper

Essential to this craft is the process of editing and rewriting materials with feedback from peers and professors. Students are expected to focus on improving analytical skills, critical thinking, and argumentation through attention to the writing process. They are also expected to give meaningful critical feedback on the writing of their peers.

**Difference, Power, and Equity Notes:** This course meets the DPE requirement because it asks students to reflect critically on issues of gender and sexuality around the world in a comparative contextual framework. Students will be asked in seminar space to discuss the operation of difference and power within as well as across different gender, class, racial, and sexual identities while learning in lecture meetings about feminist and queer studies' history, activism, and theory.

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

*An American Family* was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the *An American Family* series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. We often associate modern faith in the prospects of universal human dignity, rational autonomy, the rights of man, individual liberty, democracy, open scientific inquiry and social and political progress with the Enlightenment. How can we reconcile this faith with the persistence of domination today? Critical theory aims not merely to understand the "struggles and wishes of the age" as Marx one described it, but with emancipation from domination. Understood in this way, critical theory is identified closely with the intellectual tradition of the Frankfurt School. In this tutorial, will read works in critical theory from the 18th century to the present, some from the Frankfurt tradition, and some not. We will focus on particular topics, examples of which are the following: normative critique, capitalism, authoritarianism, mass culture, enlightenment and reason, progress, violence, the domination of nature, white supremacy, patriarchy and colonialism.

If we think of Michel Foucault as engaged in writing histories, or genealogies, of his own present designed to undercut the sense of the obviousness of certain practices and ways of thinking, categorizing, and knowing, we can easily imagine that he might now be questioning different aspects of our contemporary "present" than the ones standardly associated with his name, namely, panopticons and surveillance, discipline, criminalization, the biopolitics of health, the normal and the abnormal, etc. In this course we address the question: How is the present we find ourselves living today different from the one that the author Foucault wrote about in the 1960s, 70s and early 80s before his untimely death in 1984? What differentiates today from yesterday? And what present practices and ways of thinking and knowing might be questioned using Foucault's tools, genealogy in particular, for resisting unnecessary constraints on freedom and the perpetuation of unnecessary suffering? What is his legacy today? In this tutorial you will read from a selection of Foucault's texts (books, lectures, interviews) in order to acquire a firm grasp of his method of "critique" and his way of looking at the interconnections between forms of power and the knowledge associated with particular disciplines. We will also read more recent work by Foucault inspired scholars on topics such as the biopolitics of gender, the genealogy of terrorism, the informational person (how we become our data), and neoliberal subjects.

**Class Format:** I may use a seminar format at least twice during the semester.

**Requirements/Evaluation:** evaluation will be based on written work (six 5- to 6-page papers, and six 2-3 page commentaries on their partner's papers) as well as the quality and level of preparation and intellectual engagement in our weekly meetings.

**Prerequisites:** Relevant background in critical theory, social theory, political theory or philosophy.

**Enrollment Limit:** 10

**Enrollment Preferences:** I will give preference to philosophy majors and to upper class students with a demonstrated background in critical theories. Some sophomores may be eligible.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Writing Skills Notes:** This is a tutorial. Students will write five or six 5-6-page papers during the course of the the semester and receive significant feedback on each paper. At the end of each tutorial meeting the student is asked to reflect on how they would approach the paper differently if they were to rewrite it.

**Difference, Power, and Equity Notes:** In this course we address power and domination, reflect on the difference between them, and treat power relations as not only an inevitable feature of any society, but as both enabling and constraining. Moreover, we will read material that uses Foucauldian tools to address contemporary issues involving sexism and racism, digital surveillance, and the abolition of prisons.

This class engages with the methods of medical anthropology & medical sociology to help students design and implement ethnographic projects that explore health on campus or our wider community. Along the way we consider how disruptive moments like COVID-19 can reveal underlying social inequalities of healthcare access, health outcomes, and well-being; for which we propose innovative and student-focussed solutions. Students will learn and use design thinking, data visualization, and participatory ethnography while engaging with a variety of qualitative methods such as semi-structured interviews, focus groups, and qualitative surveys. We situate and explore our ethnographic projects within a campus and wider communities that are always already structured by power, privilege, and intersectional identities that shape health and well-being. We explore the field of narrative medicine and medical anthropology by developing and practicing skills in active listening, open dialogue, mindfulness, empathy, and curiosity that can profoundly shape ethnographic as well as the patient/provider encounters. For context, we read ethnographic case studies that explore a variety of topics including how structural racism and implicit bias shape clinical medicine & medical education in the US, how concepts of sexual citizenship can reshape our understanding of campus sexual assault, how the spread of US psychiatry has shaped a global landscape of mental health, and how queer activism responded to the HIV/AIDS crisis in the US. Our goals are to create participatory research projects that both explore and alter our habitual practices and individual ways of seeing the world around us.

**Requirements/Evaluation:** Weekly attendance, 3 written fieldnotes (3000 words), weekly writing & fieldwork exercises in class and out of class, a final presentation that includes data visualizations and analysis of research findings.

**Prerequisites:** A course in Anthropology, Sociology, STS or in DIV II is strongly recommended

**Enrollment Limit:** 20

**Enrollment Preferences:** Majors in Anthropology, Sociology, WGSS; Concentrators in PH, STS, ASIA, ENVI

**Expected Class Size:** 20

**Writing Skills Notes:** This class assignments includes over 9,000 words of essay assignments, and will help students develop critical writing skills, including use of rhetoric, evidence, argument, synthesizing data, logic, and anticipating counter-arguments.

**Difference, Power, and Equity Notes:** This class uses experiential learning to examine the intersectionality of race, class, gender, & sexuality in impacting healthcare and health outcomes. It explores the ways that intersectionality and implicit bias shapes health and well-being in patient/provider encounters as well as ethnographic research. It engages with and critiques efforts to 'improve' community and individual health outcomes in the US and elsewhere across the globe.

This seminar provides an overview of queer, women of color feminist, decolonial, and critical ethnic studies critiques of orthodox Marxism. Beginning with core texts from the tradition, we will examine a range of forms of labor and social positions that complicate Marx's emphasis on the white male industrial factory worker. In the first part of the seminar, we will study seminal texts that center reproduction, racial slavery, care and domestic work, indentured servitude, sex work, and migrant labor, and in the second half, we will turn to an array of practices that respond to and offer strategies to survive under racial capitalism. This seminar will equip students with critical understandings of the ways racial capitalism has centrally relied on the mass elimination, capture, and recruitment of different racialized and gendered bodies in and beyond the U.S. and how, through performance, the capitalist system of value and life under these conditions can be undone and reimagined.

**Requirements/Evaluation:** in-class discussion, short weekly posts, class presentation, final project

**Prerequisites:** previous coursework in AMST, WGSS, AFR, THEA, or LATS

**Enrollment Limit:** 12

**Enrollment Preferences:** senior AMST majors; juniors or seniors with previous experience in AMST, WGSS, AFR, and THEA

**Writing Skills Notes:** Students will present on and submit a 5-8 pg paper that rigorously analyzes and expands on a keyword. They will receive detailed feedback from me and one other student regarding grammar, structure, style, and argument. Using written and classroom feedback, students will then revise and resubmit their keyword papers to add to our final classroom keyword toolbox. For the final assignment, students will have the option to write a 8-10 page final research paper or manifesto.

**Difference, Power, and Equity Notes:** This course satisfies the DPE requirement as it explores difference, power, and equity by asking how racial, gendered, sexual, and class differences are produced, whose voices are centered and whose are excluded, and what forms of labor is valued over other forms.
