**Winter Study -----**

**ENVI 11 (W) Seven Summits: the nature of New England as observed from its hills and peaks.**

In this course we will take to the hills and mountains of our region in order to gain a better understanding of New England's amazing geographic and biological diversity. Much of this variety owes to geological processes - tectonic events, ice ages, erosion and soil formation -- that have been playing out for eons. In what ways have these forces transformed and influenced the landscapes and ecosystems that we see today? From piney ridges and spruce-clad summits to moist hardwood forests, shrubby swamps and broad valleys, the story is in the hills. In addition to covering some basic geology and meteorology, we will decipher the common trees and shrubs of the region and how they tend to form distinct ecological communities based on their different physiographic attributes. We will also take a look into the lives of the animals -- mammals, birds, and perhaps even insects! -- that inhabit these rigorous environments in winter. Lastly we will consider the role of humans, both in adapting to and influencing these landscapes. Through field trips, readings, discussions, personal observations, and assignments, you will increase your awareness and appreciation of the natural heritage of the region that you have made your recent home. More than half of the class will be spent outdoors, sometimes venturing far-afield. Therefore, students should expect to be away from campus well beyond normal class hours -- including for an overnight night trip. Most excursions will be moderate in pace and difficulty, so you need not be an avid outdoors-person to take part; if you are able to hike/showshoe 5-6 miles in winter conditions, and bring a healthy dose of enthusiasm, you should be fine. No special equipment will be necessary.

**Requirements/Evaluation:** Final project or presentation. Several written assignments in addition to a final project and presentation on a topic of the student's choosing. Final project may take a variety of forms.

**Prerequisites:** None

**Enrollment Limit:** 8

**Enrollment Preferences:** Preference will be given to students with a demonstrated interest in the subject and those without potential scheduling conflicts. A statement of interest may be required.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Drew Jones is Manager of Hopkins Memorial Forest where he coordinates research, education, and maintenance activities. Previously he has worked as a wildlife biologist and environmental educator from the southern appalachians to the north woods.

**Materials/Lab Fee:** \$270

### **ENVI 12 (W) Climate Intelligence 101: accelerating the fight against climate change by making it data-driven**

In recent years a novel approach to the fight against climate change has emerged, fueled by new dramatically more detailed, up-to-date data about the exact sources of greenhouse gas emissions. Sometimes known as "climate intelligence", this new field focuses on applying data-driven optimization to these newly detailed emissions data sets. Like business intelligence, the goal of climate intelligence is to use data to multiply the impact of new policies, business strategies, and technologies. To reduce more emissions, faster. This course will begin by introducing students to this rapidly emerging new world at the intersection of climate change, data science, economics, and business. But participants should not expect a relaxed, casual winter study. This high-octane course will move fast and remain laser-focused on not merely understanding climate change, but on actually helping fix it. The course will be team taught by an interdisciplinary group of Williams alums and will cover: \* A background on emerging new emissions datasets; \* How to use big data to rapidly prototype and iterate on testable scientific hypotheses on better ways to reduce emissions; \* A lab section in which students will use novel data to develop proposed new concrete, real-world laws, regulations, businesses, NGOs, or inventions; and \* How to develop business plans or regulatory proposals to actually make your ideas happen in the real world. It is anticipated, though certainly not required, that after completion of this course many students will literally found the company or help pass the policy in their proposal. Time: about 14 h/wk. (Estimated 3h lecture, 3h lab/practicum, 8h project work).

**Requirements/Evaluation:** Short paper and final project or presentation

**Prerequisites:** None. But this course will involve manipulating a lot of data! Any of: multivar calculus, stats, econ, ability to code, and/or an entrepreneurial spirit helpful but not required. Please don't take this course if not at least already familiar with Excel.

**Enrollment Limit:** 30

**Enrollment Preferences:** If overenrolled, priority should be to students who have passed at least one computer science or econometrics course.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Gavin McCormick is founder of environmental tech nonprofit WattTime and cofounder of Climate TRACE, a coalition using AI and satellites to measure all Earth's GHG emissions. He's an Eph and has an MS in environmental econometrics from UC Berkeley.

**Attributes:** EXPE Experiential Education Courses STUX Winter Study Student Exploration

LEC Section: 01 TR 10:00 am - 12:50 pm Gavin McCormick

### **ENVI 25 (W) Tropical Marine Conservation**

Tropical marine ecosystems such as coral reefs and mangrove forests are biodiversity 'hotspots'; they are home to an astounding variety of marine organisms, provide critical support for the livelihoods and food sources of millions of people, but are also highly vulnerable to human impacts such as climate change and overfishing. This winter study travel course will offer a unique combination of classroom, laboratory, and hands-on experiences in the scientific study, management, and restoration of tropical marine ecosystems using the Bahamian island of Eleuthera as a case study. Eleuthera is rich in marine diversity but still in the process of implementing management policies and practices for its many fisheries. As such, it presents a unique opportunity for students to experience conservation-in-action. Students will gain an understanding of the structure, function, and major threats facing tropical marine ecosystems. They will develop practical skills in conducting field surveys of tropical marine species and in implementing management and restoration strategies on the Island. They will also engage with the local community to understand the social and economic impacts of marine conservation policy and to explore alternative sustainable development strategies for subsistence fisheries that rely on these marine ecosystems. Students are expected to participate in 2 days travel and 13 days of research on the Island. The daily schedule will include field research and independent study. Students are expected to devote time each day to researching and writing a final paper that integrates their field studies, interviews, and policy research. Students will also use this time to prepare and deliver an oral slide presentation on their research the last two days of the trip.

**Requirements/Evaluation:** oral presentation and 5-page research paper

**Prerequisites:** BIOL 203 or ENVI 101 or ENVI 102 or MAST 311 or permission of instructors

**Enrollment Limit:** 8

**Enrollment Preferences:** preference will be given to BIOL and ENVI majors and concentrators

**Grading:** pass/fail only

**Materials/Lab Fee:** none

Antonia Foias, Professor of Anthropology and Sociology

Jennifer L. French, Professor of Spanish

Sarah S. Gardner, Lecturer in Environmental Studies

Matthew Gibson, Assistant Professor of Economics

Lisa Gilbert, Associate Professor of Geosciences and Marine Sciences

Casey Gregory, Assistant Professor of Economics

Catherine Hall, Lecturer, Williams-Mystic Maritime Studies Program

Jacqueline Hidalgo, Associate Professor of Latina/O Studies and Religion

Nicolas Howe, Associate Professor of Environmental Studies

Sarah Jacobson, Associate Professor of Economics

Amy Johns, Director of The Zilkha Center for Environmental initiatives

Andrew Jones, Manager, Hopkins Memorial Forest

Paul Karabinos, Professor of Geosciences

Pia Kohler, Assistant Professor of Environmental Studies

Elizabeth Kolbert, Class of 1946 Visiting Distinguished Professor of Environmental Studies

Joel Lee, Assistant Professor of Anthropology

Scott Lewis, Assistant Professor of Physical Education and Director of Outing Club

Dr. Alicia Maggard, Post-Doc, Williams-Mystic Maritime Studies Program

James Manigault-Bryant, Associate Professor of Africana Studies

Luana Maroja, Associate Professor of Biology

Laura Martin, Assistant Professor of Environmental Studies

Karen R. Merrill, Professor of History

Manuel Morales, Professor of Biology and Director of Research Hopkins Forest

James Nolan, Professor of Sociology

Julie Pedroni, Lecturer in Philosophy

Timothy Pusack, Assistant Professor of Marine Ecology, Williams-Mystic Maritime Studies Program

Jay Racela, , Lecturer, CES and Morley Sciences Laboratories

David P. Richardson, Professor of Chemistry

Merida Rúa, Associate Professor of Latina/O Studies and American Studies

Kenneth Savitsky, Professor of Psychology

David C. Smith, Senior Lecturer in Biology

David L. Smith, Professor of English

John W. Thoman, Jr., Professor of Chemistry

Chad M. Topaz, Professor of Mathematics

Claire Ting, Professor of Biology

Tom Van Winkle, Executive Director of The Williams-Mystic Maritime Studies Program

## **ENVIRONMENTAL STUDIES**

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise.

The concentration in Maritime Studies is designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
- Understand ecological principles and the nature of living systems;

- Apply scientific methods to collect environmental data and evaluate environmental quality;
- Understand the political and economic factors that inform, enable, and constrain environmental policy;
- Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
- Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
- Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES was one of the first environmental studies programs at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, and generous support for summer research and internships. The Class of 1966 Center, a Living Building and the Program's home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. The CES manages the Hopkins Memorial Forest, a 2600-acre natural area northwest of campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center. The Maritime Studies concentration builds on the course offerings of the Williams-Mystic Maritime Studies Program at Mystic Seaport.

## **ADVISING**

Concentrators (or first-years and sophomores interested in the concentration offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES or Maritime Studies for advice. All incoming concentrators will choose a faculty advisor in the spring of their sophomore year.

**Advisors for 2019-20:** Henry Art, Sarah Gardner, Pia Kohler, Laura Martin, Mea Cook, James Manigault-Bryant.

## **CONCENTRATION IN MARITIME STUDIES**

The Maritime Studies concentration provides students with an opportunity to explore how humans interact with the environment, including the maritime environment. Understanding the oceans and our interactions with them is of increasing importance in this era of climate change, sea-level rise, fisheries crises, and the internationalization of the high seas. We encourage students to investigate our WaterWorld from the perspectives of the humanities, social sciences, and physical sciences. Maritime Studies is an interdisciplinary, cross-divisional program that includes the literature, history, policy issues, and science of the ocean. Candidates for the concentration in Maritime Studies must complete a minimum of seven courses: the interdisciplinary introductory course (GEOS 104 Oceanography), four intermediate core courses (at Williams-Mystic), an elective, and the senior seminar.

Students who have completed other study-away programs that emphasize maritime studies should consult with the CES chair about the possibility of completing the Maritime Studies concentration.

## **Required Courses (7 courses)**

### **Introductory Course**

MAST/ENVI/GEOS 104 Oceanography

Students who take MAST 211/GEOS 210 Oceanographic Processes at Williams-Mystic can substitute an extra elective in lieu of GEOS 104.

### **Capstone Course**

ENVI/MAST 412 Senior Seminar: Perspectives on Environmental Studies

### **Core Courses (taken as part of Williams-Mystic program at Mystic Seaport):**

MAST/ENGL 231 Literature of the Sea

MAST 311/BIO 231 Marine Ecology OR MAST 211/GEOS 210 Oceanographic Processes

MAST/ENVI 351/ PSCI 319 Marine Policy

MAST/HIST 352 America and the Sea, 1600-Present

### **Elective Courses**

Elective courses are listed based on either a clear maritime statement in the course description or broad practical/theoretical applicability to maritime studies. Concentrators will take a minimum of one course from the list below. If concentrators find other courses in the catalog that they believe meet the requirements for a MAST elective, they may bring them to the attention of the Chair or Associate Director.

## **INDEPENDENT STUDY AND WINTER STUDY**

In addition to courses fulfilling the Maritime Studies concentration requirements, the following courses are offered:

MAST 397, 398 Independent Study: Maritime Studies

MAST 493-W31-494 Senior Thesis: Maritime Studies

Winter study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year's Winter Study offerings.

## **HONORS IN MARITIME STUDIES**

Candidates for honors in Maritime Studies will complete a thesis in their senior year. The project will involve original research (archive, museum, field, or laboratory) followed by on-campus analysis and write-up of results. The thesis may either be a one-semester plus winter study project, or a full year (two semesters plus winter study). In either case, data collection during the summer before the senior year may be necessary. In some cases, the thesis project may be a continuation and expansion of the student's Williams-Mystic research project. Honors will be awarded if the thesis shows a high degree of scholarship, originality, and intellectual insight.

## **MAST 104 (F) Oceanography**

**Cross-listings:** MAST 104 GEOS 104 ENVI 104

### **Secondary Cross-listing**

The oceans cover three quarters of Earth's surface, yet oceanography as a modern science is relatively young: the first systematic explorations of the geology, biology, physics and chemistry of the oceans began in the late 19th century. This introduction to ocean science includes the creation and destruction of ocean basins with plate tectonics; the source and transport of seafloor sediments and the archive of Earth history they contain; currents, tides, and waves; photosynthesis and the transfer of energy and matter in ocean food webs; the composition and origin of seawater, and how its chemistry traces biological, physical and geological processes; oceans and climate change; and human impacts.

**Class Format:** three 50-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast of New England.

**Requirements/Evaluation:** lab activities (25%), homework (25%), quizzes (5%), three exams (45%)

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first year and second year students, Geosciences majors, Maritime Studies concentrators

**Expected Class Size:** 48

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MAST 104 (D3) GEOS 104 (D3) ENVI 104 (D3)

**Attributes:** ENVI Natural World Electives EXPE Experiential Education Courses GEOS Group A Electives - Climate + Oceans

LAB Section: 03 R 1:00 pm - 3:00 pm Mea S. Cook

## **MAST 211 (F)(S) Oceanographic Processes**

**Cross-listings:** GEOS 210 MAST 211

### **Primary Cross-listing**

Part of the Williams-Mystic Coastal and Ocean Studies Program, this course provides an introduction to physical, geological, chemical, and biological oceanography. Using local field sites as well as places visited on field seminars, we will investigate why the Earth has oceans, why they are salty, how they move and flow, reasons for sea level change on both long and short timescales, and how our oceans interact with the atmosphere to control global climate. We will emphasise societal interactions with the ocean, and will consider coastal processes including land loss. We will apply an environmental justice and anti-racist lens to our discussions. Field work will take place on shores in southern New England, as well as during field seminars on the Atlantic ocean, the West Coast and the Mississippi River Delta. This course is in the Oceans and Climate group for the Geosciences major.

**Class Format:** Flipped classroom will focus on active learning using data-based exercises. Mini-symposia will involve student research and discussion.

**Requirements/Evaluation:** graded lab exercises, mini-symposium participation, and a research project

**Prerequisites:** none

**Enrollment Limit:** 24

**Enrollment Preferences:** none

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** This course is taught at our Mystic Seaport campus. Students must be enrolled in the Williams-Mystic Coastal and Ocean Studies

Program.

**Distributions:** (D3)

**MAST 226 (S) The Oceans and Climate (WS)**

**Cross-listings:** GEOS 226 ENVI 226 ENVI 252 MAST 226

**Secondary Cross-listing**

The oceans are a fundamental part of Earth's climate system. Ocean currents redistribute heat and water vapor around the globe, controlling temperature and precipitation patterns. Marine phytoplankton blooms and air-sea gas exchange modulate the atmospheric carbon dioxide concentration. The dynamic interaction of the atmosphere and the sea surface results in multi-year climate variations such as the El Niño-Southern Oscillation. This course will examine gradual and abrupt climate shifts from Earth's history and the ocean's role in driving, amplifying or dampening the changes, the ocean's response to anthropogenic greenhouse gas emissions, and the projected impacts of continued emissions and climate change on the ocean in the coming decades and millennia. We will analyze articles from the scientific literature that lay out the theory on the ocean's influence on climate, reconstruct past climate and ocean changes, test the mechanisms responsible for those changes, and with that knowledge, project the consequences of continued anthropogenic greenhouse gas emissions. Topics may include the climate effects of opening and closing seaways with plate tectonics, ocean feedbacks that amplify the intensity of ice ages, the instability of ocean circulation during ice-sheet retreat, the evolution of the El Niño-Southern Oscillation with changing carbon dioxide through the geologic past and the next century, ocean heat and carbon dioxide uptake during the last century and into the future, and the impact on sea level, seafloor methane reservoirs, ocean acidification, oxygenation and marine ecosystems. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** evaluation will be based on the critical analysis of reading from the scientific literature through discussion, writing and revision

**Prerequisites:** at least one GEOS course

**Enrollment Limit:** 10

**Enrollment Preferences:** students with a strong interest in Geosciences and Geosciences majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GEOS 226 (D3) ENVI 226 (D3) ENVI 252 (D3) MAST 226 (D3)

**Writing Skills Notes:** each student will write five 5-page position papers and five 1-page response papers; students will give and receive feedback through peer review and tutorial meeting discussions and will develop their writing and critical analysis skills through revision

**Attributes:** ENVI Natural World Electives GEOS Group A Electives - Climate + Oceans MAST Interdepartmental Electives

**Not offered current academic year**

**MAST 231 (F)(S) Literature of the Sea (DPE)**

**Cross-listings:** MAST 231 ENGL 231

**Primary Cross-listing**

The ocean, and human relationships with it, have been central features of literatures and cultures around the world for more than a thousand years. But since literary study is typically based around authors' homelands, careful examination of the oceanic experience is often pushed to the periphery--an "empty space" to be crossed between nations, a "vast darkness" antithetical to human life, or a mirror for land-borne concerns. Increasingly, however, scholars and readers are centering the sea and stories about it as a means stepping outside human frameworks of space and time, situating the complex emotions and narratives inspired by the ocean into a complex network of geologic history and teeming other-than-human life. This course examines a wide range of texts and perspectives on the ocean and human relationships with it. Doing so will help us consider how literature both plays into and subverts dominant viewpoints of the ocean. Through texts that consider 19th-century whaling, the Middle Passage, the postcolonial Caribbean, and islands throughout the Pacific Ocean, we will explore a range of questions, including: What can we learn from examining efforts to write about the ocean? How do ocean stories help individuals understand themselves, their communities, and their place in global environments? What can the range of cultural and literary perspectives on our "single, global ocean" reveal about the ways different people are both connected with and profoundly distant from each other? Most importantly, we will practice, as a classroom community, different strategies for carefully reading texts while connecting them to cultural traditions, surrounding environments, and personal experiences.

**Class Format:** weekly roundtable discussions, including coastal and near-shore field trips and multiple field seminars.

**Requirements/Evaluation:** regular papers, class participation, journal-writing, and a final assignment

**Prerequisites:** N/A

**Enrollment Limit:** 25

**Enrollment Preferences:** Williams-Mystic Students only

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** offered only at Mystic Seaport

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MAST 231 (D1) ENGL 231 (D1)

**Difference, Power, and Equity Notes:** This course focuses on the range of cultural perspectives about the sea, as well as the ways those perspectives can unsettle and challenge dominant narratives about the sea and its role in colonial expansion. Furthermore, this course centers voices that are typically overlooked in the genre of "Sea Literature," paying particular attention to Indigenous and African-American narratives about the ocean.

### **MAST 263 (S) The Global Ocean: An Interdisciplinary Introduction**

**Cross-listings:** MAST 263 ENVI 263

#### **Primary Cross-listing**

Though it covers most of the planet, the ocean's importance to everyday life is easy to overlook. Its roles as a cultural symbol, resource, highway, and climate regulator make it essential to life around the world. This interdisciplinary course, team-taught by the faculty of the Williams-Mystic Program, will examine key issues in each of the world's oceans while introducing students to the ways these issues connect multiple disciplines and transcend physical, political, and imaginary ocean boundaries. By drawing on the expertise of the five professors -- from humanities, social sciences, and sciences -- this course facilitates the critical study of the ocean from an interdisciplinary perspective and helps them consider their own role in the shifting relationship between humanity and the ocean. This seminar-style course will meet twice a week online, with students assessed by their participation, response papers, and final project, while helping them apply interdisciplinary skills to pressing sustainability issues connecting the environment and society.

**Requirements/Evaluation:** Five 2-page papers, participation, and a 6-8 page final paper

**Prerequisites:** none, open to all students

**Enrollment Limit:** 20

**Enrollment Preferences:** 1. first years, 2. sophomores, 3. MAST concentrators

**Expected Class Size:** 15

### **MAST 265 (F) Coral Reefs: Ecology, Threats, & Conservation**

**Cross-listings:** ENVI 265 BIOL 165 MAST 265

#### **Primary Cross-listing**

Coral reefs are a fascinating ecosystem found throughout the world's tropical oceans. Corals can thrive in nutrient-poor oceans because of the mutualistic relationship with algal symbionts. And as a foundational species, corals provide a habitat for numerous species, possibly the highest diversity found on the planet. However, these complex and beautiful ecosystems are declining worldwide from a variety of local and global threats. In this course, we will explore coral reef ecology through an in-depth examination of the biotic and abiotic factors contributing to the ecosystem's functioning. We will also investigate the causes and consequences of threats to coral reefs, such as ocean warming, ocean acidification, and resource extraction. Finally, we will identify the many efforts worldwide to conserve coral reefs and promote their resilience. In this seminar course, you will demonstrate your proficiency through knowledge assessments, short writing reflections, a virtual coral fragmentation experiment, and a creative advocacy project. This course aims to deepen your awareness of the complex species interactions on coral reefs and the physical factors affecting coral survival while fostering hope through current conservation efforts.

**Requirements/Evaluation:** Four 1-paragraph discussion board post, One 20-question knowledge assessment (quiz), Three 2-page writing reflections, One lab results and discussion write-up 2-3 pages figures included, and a creative (medium is student choice) advocacy project.

**Prerequisites:** none, open to all students

**Enrollment Limit:** 20

**Enrollment Preferences:** 1. First-Year, 2. Sophomores

**Expected Class Size:** 16

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** Does not count for Biology major credit.

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**Attributes:** ENVI Natural World Electives

Not offered current academic year

### **MAST 266 (S) Reading Water (WS)**

**Cross-listings:** ENVI 266 MAST 266

#### **Primary Cross-listing**

Water has such profound and far-reaching influence on individuals, societies, and the planet that it simultaneously risks going overlooked and appearing clichéd. Human beings are made of it and need it to live, yet will die if immersed in it. It is venerated by cultures around the world, yet most people either cannot access clean water, or don't know where their clean water is piped in from. It covers the earth's surface, and has shaped it over eons, yet scientists are still not sure how it came to be here in the first place. This wide-ranging influence also presents challenges for traditional academic structures; thinking about water demands crossing times, spaces, and disciplines. This course will explore the wide-ranging and diverse ways water impacts individuals, cultures, and the environments they call home by drawing on a range of content: hydrology, literature, political theory, storytelling, geography, and more. To do this, we will also develop and examine methods of critically reading as "non-experts"--reading scientific articles as rhetorical objects and reading for scientific principles in literature, for instance--to explore what interdisciplinary thinking opens up (and inhibits), and thus how to effectively engage with and create interdisciplinary work. The goal here is not to define water's cultural or scientific

importance, or to determine which disciplines "best" combine to explain water, or to come up with humanities-based solutions to "the water crisis." Rather, these texts, and the water that flows through them will help us explore the opportunities and limits of human perceptions of the other-than-human world. It will help us consider the extent to which those perceptions both shape, and are shaped by, a seemingly simple molecule. And it will help us imagine epistemologies and ontologies that account for the ways water simultaneously flows through us, around us, and through the deep geological history of the planet. Course Texts: Tristan Gooley -- *How to Read Water* (selections) Vandana Shiva -- *Water Wars* (selections) Luna Leopold -- *Water, Rivers, and Creeks* (selections) Richard White -- *The Organic Machine* Linda Hogan -- *Solar Storms* Marc Reisner -- *Cadillac Desert* Jesmyn Ward -- *Salvage the Bones* John McPhee -- "Atchafalaya" Emmi Itäranta -- *Memory of Water* Brenda Hillman -- "The Hydrology of California"

**Class Format:** The class will be primarily discussion-based, and will ask students to lead and structure discussions. Students will have questions, reflections, and insights prepared before class, and use those to drive our in-class activities.

**Requirements/Evaluation:** 100pg of reading a week, give or take. Approx 20-25 pages of written work throughout the semester.

**Prerequisites:** None

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference to majors, and then to sophomores and juniors, respectively.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 266 (D1) MAST 266 (D1)

**Writing Skills Notes:** Students will write four papers of increasing complexity that will require workshopping and drafts. Each of these papers will receive forward-looking writing feedback from me. The first paper centers on paragraph-level stylistic choices, the second on argument/evidence connections, the third on genre, and the final paper synthesizes these writing skills. In addition, students' final grades will allow for revision of earlier papers to encourage and assess growth of writing skills.

Not offered current academic year

### **MAST 268 (S) Debating Ocean Biodiversity at the Intersection of Science and Policy**

**Cross-listings:** ENVI 268 MAST 268

#### **Primary Cross-listing**

Biodiversity in the ocean is facing an onslaught of challenges, both directly and indirectly. It is likely that we are undergoing a sixth mass extinction event, where diversity of life on earth is stunningly at risk. Fortunately, however, we are also finding innovative ways to solve issues and attempt to stave off these dramatic changes to our ecosystems. These solutions potentially have both positive and negative effects. Difficult tradeoffs must be weighed and decisions must be made as people wrestle with known knowns, known unknowns, and unknown unknowns. In this class, we will explore five issues that relate to biodiversity in the ocean. You will have the opportunity to investigate one side of an issue, to collect supporting information, and to advocate for your position all while learning about current biodiversity issues in the ocean. You will be challenged to weigh conflicting evidence to find a positive outcome. Throughout the class you will practice critical thinking, evaluation, and synthesizing skills as you work with multiple viewpoints. Class time will include lecture, in-class group work, and student-led debates of timely, controversial issues. You will be assessed on summaries of information, reflections on topics, and a final project on an issue of your choice relating to ocean biodiversity.

**Requirements/Evaluation:** Five 2-page papers, participation, and a 6-8 page final paper

**Prerequisites:** none, open to all students

**Enrollment Limit:** 20

**Enrollment Preferences:** 1. first years, 2. sophomores, 3. MAST concentrators

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

### **MAST 311 (F)(S) Marine Ecology**

**Cross-listings:** BIOL 231 MAST 311

#### **Primary Cross-listing**

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.

**Class Format:** including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

**Requirements/Evaluation:** two tests, a research project, and a presentation

**Prerequisites:** BIOL 101 or GEOS/MAST 104, or permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** none

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** This course is only offered through the Williams-Mystic Maritime Studies Program located in Mystic, CT. satisfies the distribution requirement for the Biology major.

**Distributions:** (D3)

### **MAST 351 (F)(S) Marine Policy (DPE) (WS)**

**Cross-listings:** MAST 351 ENVI 351 PSCI 319

#### **Primary Cross-listing**

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

**Class Format:** This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

**Requirements/Evaluation:** Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research

Project: issues paper and draft research paper; Final Research Project: multiple formats available

**Prerequisites:** none

**Enrollment Limit:** 23

**Enrollment Preferences:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Expected Class Size:** 22

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

**Writing Skills Notes:** Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

**Difference, Power, and Equity Notes:** Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

**MAST 352 (F)(S) American Maritime History (DPE) (WS)**

**Cross-listings:** HIST 352 MAST 352

**Primary Cross-listing**

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

**Class Format:** Seminars, discussions, and field seminars

**Requirements/Evaluation:** Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

**Prerequisites:** None

**Enrollment Limit:** 27

**Enrollment Preferences:** If course over-enrolls, preference will be given to sophomores and juniors

**Expected Class Size:** 22

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Offered only at Mystic Seaport

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 352 (D2) MAST 352 (D2)

**Writing Skills Notes:** Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate

in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

### **MAST 402 (S) Senior Seminar: Perspectives on Environmental Studies (WS)**

**Cross-listings:** MAST 402 ENVI 412

**Secondary Cross-listing**

The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice, and they will have opportunities throughout the semester to meet with guest speakers to discuss environmental work outside the academy.

**Requirements/Evaluation:** active participation, discussion leading, several smaller assignments and multi-step capstone project

**Prerequisites:** declared major/concentration in Environmental Studies or Maritime Studies, ideally to be taken in final semester at Williams

**Enrollment Limit:** 14

**Enrollment Preferences:** Environmental Studies majors and concentrators, Maritime Studies concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** required course for students wishing to complete the Maritime Studies concentration

**Distributions:** No divisional credit (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MAST 402 No divisional credit ENVI 412 No divisional credit

**Writing Skills Notes:** This course is focused on building up cross-disciplinary writing and communication skills. There will be a multi-step capstone project that emphasizes writing, and there will be opportunities to revise and resubmit work.

Not offered current academic year

### **MAST 404 (F) Coastal Processes and Geomorphology (QFR)**

**Cross-listings:** MAST 404 ENVI 404 GEOS 404

#### **Secondary Cross-listing**

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

**Class Format:** lecture two times a week with a lab one time per week

**Requirements/Evaluation:** lab reports, quizzes, and an independent research project

**Prerequisites:** Either GEOS 104 or GEOS 210; or permission of instructor. No prior knowledge is necessary, but this course does build on principles used to explore complex scientific challenges.

**Enrollment Limit:** 12

**Enrollment Preferences:** senior Geosciences majors, then juniors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major. This course counts toward the GEOS Group B Electives - Sediments + Life.

## EXPERIENTIAL EDUCATION

Coordinator: Paula Consolini

Experiential education, involving “learning by doing” outside the classroom, is a robust part of the Williams curriculum. In addition to the use of traditional laboratory work in the natural sciences and studio work in art, faculty have been challenging students to become engaged more personally in the Williams curriculum through field work, whether in the form of research, sustained work on special projects, or through placement with community organizations. Courses which include experiential learning provide students with opportunities to encounter firsthand the issues that they read and study about, requiring them to apply academic learning to nonacademic settings and challenging them to use their experiences in those settings to think more critically and deeply about what they are studying. Experiential courses, as defined above, range from fully integrated off-campus programs such as the Williams-Mystic Maritime Studies Program to courses involving a small field research exercise or project. The amount and nature of the experiential component(s) varies according to the instructor's judgment. [More information can be found on the Center for Learning in Action website.](#)

### EXPE Experiential Education Courses

#### AFR 212 (S) Jazz Theory and Improvisation I

**Cross-listings:** MUS 104 AFR 212

**Secondary Cross-listing**

The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based composition etc. Appropriate for students with basic skill on their instrument and some theoretical knowledge including all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. This is a performance practice course and instrumental competence is essential. Vocalists and drummers will be encouraged to study the piano; pianists guitarists and bassists should be able to sight read chords on a jazz lead sheet.

**Class Format:** alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire

**Requirements/Evaluation:** weekly assignments, (e.g., harmonic analysis and exercises in transposition and transcription), a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance

**Prerequisites:** MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged

**Enrollment Limit:** 15

**Enrollment Preferences:** prospective Music majors, then Jazz Ensemble members, then Music majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** this course will share aural skills labs with MUS 104a; students considering taking this course should consult the lab times and plan their schedules accordingly

**Distributions:** (D1)

#### AFR 214 (F) Jazz Theory and Improvisation II

**Cross-listings:** MUS 204 AFR 214

**Secondary Cross-listing**

A continuation of MUS 104b, this course builds upon theoretical knowledge, performance and aural skills developed previously. Students will deal with

more complex theoretical and performance issues, including the use of symmetric scales, strategies for chord reharmonization, pentatonic and hexatonic scale shapes, and Coltrane's "Three Tonic" harmonic system.

**Class Format:** two weekly seminar meetings, alternating between theory and performance sessions

**Requirements/Evaluation:** weekly compositional, analysis, transcription or performance exercises and final transcription project

**Prerequisites:** MUS 104b or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Music majors and Jazz Ensemble members

**Expected Class Size:** 5-8

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MUS 204 (D1) AFR 214 (D1)

### **AFR 24 (W) Touring Black Environmental Futures in the New South**

This course will address three critical questions: (1) What is Black religion?; (2) What are the distinctive aspects of southern expressions of Black Protestant religion, particularly in Florida?; and (3) How do Black religious communities see themselves in relation to broader environmental inequities? To address these questions, we will travel to Florida's west coast and visit different Black church communities living in toxic environments. This includes The Life Center, a "mega-church" in Eatonville that sits near Tangelo Park, a neighborhood exposed to contaminants from weapons manufacturing; and Bryant Chapel Christian Methodist Episcopal Church (CME), a small mainstream denominational church in Tallevast, site of a high profile case of groundwater contamination from beryllium engineering. Students will attend worship services at each church, and when possible, interview local residents about the role their faith plays in their weathering the challenges of environmental pollution. In addition to learning about Black religion along the west coast of Florida, students will visit and tour local historical sites significant to Black religious experiences, and meet with local academics, archivists, and leaders. Sites include: touring the Zora Neale Hurston National Museum of the Fine Arts in Eatonville; visiting the Public Archaeology Lab at New College of Florida with Professor Uzi Baram; and touring the Family Heritage Museum at the State College of Florida with Kathie F. Marsh. During the final two weeks of the course, students will be paired to conduct research in Tallevast in one of four areas--documentary film production, targeted investigations into local archives, structured interviews with residents, and soil, water, and air testing. Students will have access to an electronic reading packet that will ground them briefly, though comprehensively, on Florida's history of Black religious expressions.

**Requirements/Evaluation:** Final project or presentation.

**Prerequisites:** No previous experience is necessary. We especially invite students who are interested in experiential learning.

**Enrollment Limit:** 10

**Enrollment Preferences:** We will review application essays and hold interviews with the top 10 applicants. Preference will be given to majors and concentrators in Africana Studies, Religious Studies, and Environmental Studies.

**Expected Class Size:** NA

**Grading:** pass/fail only

### **AMST 11 (W) Remnants: The Social Life of Sewing**

Weaver Ann Hamilton calls fabric our "second skin." As a baby, you may have been wrapped in a blanket that was stitched by a loved one. More likely, that piece was mass-produced in a distant place, by strangers who labor in conditions you may never know. What does it mean to surround ourselves with objects about which we have no knowledge and to which we have no organic connection? Recently, more and more people are taking up this question -- as makers, historians, entrepreneurs, and activists. In this course, we will become makers as well as students of the crafts we are

practicing: quilting, knitting, crocheting, embroidery, cross-stitch, and sewing (by hand and by machine). Just as members of a quilting bee gathered around a frame to assemble fragments collectively, we will talk together as we sew. We will discuss slow fashion and farm-to-closet sustainability, reuse and upcycling, #blackmakersmatter and the intersection of social justice and ecological integrity. We will trade images by our favorite artist-activists, such as quilter Bisa Butler and textile artist Victoria Villasana. We will video conference with makers such as quilter Zak Foster, knitters Denise Bayron and Brandi Cheyenne Harper, recycled-denim artist Eliu Hernandez, and embroiderer Han Cao. We will invite local makers to join us in person. Above all, we will sew, stitch by stitch. Through mindful making, we will reconnect to the magic of objects and the power of community. Note: This class will be a safe space for students of all gender identities and expressions. Reading may include: This Long Thread: Women of Color on Craft, Community and Connection; Fibershed: Growing a Movement of Farmers, Fashion Activists and Makers; Worn: A People's History of Clothing; Threads of Life: A History of the World Through the Eye of A Needle; All That She Carried: The Journey of Ashley's Sack, a Black Family Keepsake; Vanishing Fleece; and Knitting for Radical Self Care.

**Requirements/Evaluation:** Final project or presentation. All members will take part in an end-of-term exhibit and slow-fashion show open to the community.

**Prerequisites:** No experience or equipment needed

**Enrollment Limit:** 12

**Enrollment Preferences:** Students will be selected based upon a one-paragraph expression of interest and statement of intention. Preference will be given to students who have little to no experience with needlecraft or making-by-hand. Craft instruction will be provided.

**Expected Class Size:** NA

**Grading:** pass/fail only

LEC Section: 01 Cancelled

### **AMST 113 (F) The Feminist Poetry Movement (DPE) (WS)**

**Cross-listings:** WGSS 113 ENGL 113 AMST 113

#### **Secondary Cross-listing**

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

**Class Format:** discussion, some lecture, project work in archives and art gallery

**Requirements/Evaluation:** two-three short analysis papers, creative (1-2 pages), discussion posts, curated final project (archival exhibit and digital project), presentations

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first years

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 113 (D1) ENGL 113 (D1) AMST 113 (D1)

**Writing Skills Notes:** Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

**Difference, Power, and Equity Notes:** The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

### **AMST 16 (W) Juneteenth/Three Days Before the Shooting...**

Readers waited more than forty years for the follow-up to Ralph Ellison's acclaimed novel, *Invisible Man* (1952). But when he died in 1994, his untitled second novel remained unfinished. However, in years since, material from the manuscript has been published twice: first as *Juneteenth*, edited by Ellison's literary executor, John F. Callahan, which condenses the 2,000 drafted pages of the manuscript into a 368-page novel; then as *Three Days Before the Shooting...*, which is a 1,000-page compilation that includes alternate drafts and deleted scenes. Although very different, both books center on a white-passing, race-baiting US Senator named Adam Sunraider and the man who raised him, a Black Baptist minister named Alonzo Hickman. In this class, we will go back and forth between both texts as we try to answer two questions: (1) What story was Ellison trying to tell? (2) Why was this story so hard to tell as a novel? These questions will urge us to think critically about race, culture and politics, but also literary form and the creative process. This class will meet six hours a week and will require students to complete a creative final project addressing the guiding questions of this class.

**Requirements/Evaluation:** Final project or presentation.

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** seniority

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** William Stahl, PhD, is a Research Associate in the Department of Anthropology and Sociology at Williams College.

### **AMST 331 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City**

**Cross-listings:** AMST 331 COMP 330 THEA 330

#### **Secondary Cross-listing**

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as *Harper's Weekly* (Lafcadio Hearn), *The Awakening* (Kate Chopin), *A Streetcar Named Desire* (Tennessee Williams), *The Moviegoer* (Walker Percy), *Why New Orleans Matters* (Tom Piazza), *A Confederacy of Dunces* (John Kennedy O'Toole), *New Orleans Sketches* (William Faulkner), *One Dead in the Attic* (Chris Rose). Film examples such as *A Streetcar Named Desire*, *An Interview with a Vampire*, *The Curious Case of Benjamin Button*, *When the Levees Broke*, *Treme*, *Waiting for Godot* (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE

OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

**Requirements/Evaluation:** will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

**Prerequisites:** none

**Enrollment Limit:** 12

**Expected Class Size:** 10

### **AMST 358 (S) Performing Masculinity in Global Popular Culture (DPE)**

**Cross-listings:** AMST 358 THEA 341 LATS 341 WGSS 347 SOC 340

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

**Requirements/Evaluation:** masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** a short statement of interest will be solicited

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 358 (D2) THEA 341 (D2) LATS 341 (D2) WGSS 347 (D2) SOC 340 (D2)

**Difference, Power, and Equity Notes:** This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

### **AMST 406 (F) Environmental Planning Workshop: Community-Based Project Experience**

**Cross-listings:** ENVI 402 AMST 406

Secondary Cross-listing

In this class you apply your education and training to effect social and environmental change in the Berkshires. Students work in small collaborative groups to address pressing issues facing the region. Class teams partner with community organizations and local & regional governments to solve real

world problems. In this class you learn while doing and give back to the community. The field of environmental planning encompasses the *built environment*, such as housing, zoning, transportation, renewable energy, waste management, neighborhood design; the *natural environment*, such as open space, farmland, habitat and species protection, natural resource protection, air and water pollution and climate change, and the *social environment*, such as racial zoning, environmental racism, food security, and healthy vs toxic communities. Skills taught include basic GIS mapping, developing and conducting surveys, interview techniques, project management, and presentations. The class culminates in project presentations to the client organizations. The hour conference section is time for team project work, client meetings and team meetings with the professor. Recent project topics: <https://ces.williams.edu/environmental-planning-papers/>

**Class Format:** The weekly conference session (1 hour) is dedicated time for team project work including client meetings and meetings with professor.

**Requirements/Evaluation:** Response papers (three 1-page papers), in-class exercises, class discussion, small group work, public meeting attendance, project work, final report (due in segments during semester) and final presentation.

**Prerequisites:** ENVI 101 recommended; open to juniors and seniors.

**Enrollment Limit:** 16

**Enrollment Preferences:** Environmental Studies majors and concentrators, American Studies majors, Maritime Studies concentrators.

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Course fulfills senior seminar requirement for Environmental Studies Major and Environmental Studies Concentration and Maritime Studies Concentration. American Studies Space & Place elective. Course is an Environmental Studies Concentration elective (ENVI Policy and ENVI Humanities, Arts + Social Science) and Environmental Studies major elective.

### **ANSO 205 (S) Ways of Knowing**

An applied exploration of how one makes sense of the social world through fieldwork. Some of the key questions of the course are: What are the philosophical and epistemological underpinnings of social inquiry? How does one frame intellectual problems and go about collecting, sifting, and assessing field materials? How do qualitative and quantitative approaches to social inquiry differ? How are they similar? What is the importance of history to sociological and anthropological research? How do social researchers use archival and other documentary materials to interpret society? What is the relationship between empirical data and the generation of social theory? What are the ethical dilemmas of fieldwork and of other kinds of social research? How do researchers' personal biographies and values shape their work? We will approach these problems both abstractly and concretely, through readings in epistemology as well as a series of case studies, drawing upon the field experiences of departmental faculty and guest speakers. The course will also feature hands-on training in field methods, in which students design and undertake their own pilot field projects.

**Requirements/Evaluation:** full participation in the seminar, several short written assignments, and a final research essay/proposal

**Prerequisites:** ANTH 101 or SOC 101 or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

### **ANSO 402 (S) Senior Seminar**

This capstone seminar combines substantive discussion and individual research. Half of the course will be dedicated to discussion of topics of enduring significance to both anthropology and sociology, these topics being selected and readings curated by groups of students as well as the instructor. The other half of the course will be devoted to original individual student projects involving qualitative social science methods (such as participant-observation, archival study, discourse analysis, material culture analysis or ethnographic interviews, among other possibilities). At the end of the course, students will present their projects to the seminar.

**Requirements/Evaluation:** weekly short responses, participation, curation of a thematic unit, individual research project (resulting in 15 page paper or comparable scholarly product), class presentation

**Prerequisites:** only senior majors in Anthropology and Sociology, or permission of instructor

**Enrollment Limit:** none

**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

### **ANTH 13 (W) The Feather'd Hook: An Introduction to Fly Tying and Streamside Entomology**

For over a thousand years anglers have imitated the insects upon which fish-most notably trout and salmon- feed by tying bits of feather, fur, and other materials to their hooks. Over time the practice has developed into a minor art, with its own tools, techniques, aesthetics, and competing theories of animal behavior. In this course students will learn the gentle art of fly-tying, concentrating on imitations of the various distinctive stages in the life cycles of the three main insect orders on which trout feed: Ephemeroptera, Neuroptera, and Diptera (mayflies, caddis flies, and midges). We will in particular focus on the imitation of species most likely to be encountered in New England trout streams. Course Requirements: Attendance at all classes is mandatory. As your principal project for the course you will prepare the presentation of a fly pattern (or series of patterns if you like) to be given before the class in the last week of classes. A presentation should consist of: a description of the historical context of the fly; of the insect and stage of development imitated by the fly (as appropriate); of the materials and techniques used to make the fly; of the preferred presentation of the fly; of the theory of attraction according to which the fly was designed; and a demonstration of how the fly is tied A number of books will be placed on reserve in Sawyer Library. You will also have available the Chapin Library's collection of classic piscatoriana. Choose a pattern early! Some of the more elaborate patterns - especially classic salmon flies - not only require a great deal of skill to tie, but also call for exotic materials that may be difficult to obtain. I'll try to help you as needed, but I will not be able to do much if you wait until the last minute.

**Requirements/Evaluation:** Final project or presentation

## **ANTH 15 (W) Photographic and Personal Vision**

When you look at a photograph, what is it really saying? How can you make a photograph that says what you mean? This course will delve into the concepts of photographic seeing and visual literacy, while also exploring practical ways to apply these concepts to your own photography. In class we will review photobooks and discuss how a well-sequenced body of work can be greater than the sum of its parts. We will learn how to use professional image editing software like Adobe Lightroom during the course. Students will learn to defend their work during in-class critiques, and at the end of the course the class will produce an exhibition of their photography. The class will meet in Hopkins Hall 105 two times per week - Tuesdays from 10am-12pm and Thursdays from 1pm-5pm. Generally, we'll be talking about reading pictures on Tuesdays, and we'll be talking about making pictures on Thursdays. Outside of class, students will be expected to photograph in the local area. Students must either own or borrow a digital SLR. Williams Equipment Loan has plenty of suitable cameras available for your use, and Adobe Lightroom is available on Williams computers. We will not spend a lot of time building technical proficiency in this class but I will give you suggestions on how to improve your images, regardless of your equipment or level of training. If you are having an issue with your camera or digital workflow, don't hesitate to reach out for technical assistance during the course - I will be available for one-on-one Zoom meetings throughout the winter study.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** No experience or personally-owned camera equipment is required, but students are welcome to use their own cameras if they have them. Williams Equipment Loan has an excellent selection of cameras to borrow.

**Enrollment Limit:** 10

## **ANTH 371 (F) Campus and Community Health in Disruptive Times (DPE) (WS)**

**Cross-listings:** WGSS 371 ANTH 371 STS 370

### **Primary Cross-listing**

This class engages with the methods of medical anthropology & medical sociology to help students design and implement ethnographic projects that explore health on campus or our wider community. Along the way we consider how disruptive moments like COVID-19 can reveal underlying social inequalities of healthcare access, health outcomes, and well-being; for which we propose innovative and student-focussed solutions. Students will learn and use design thinking, data visualization, and participatory ethnography while engaging with a variety of qualitative methods such as semi-structured interviews, focus groups, and qualitative surveys. We situate and explore our ethnographic projects within a campus and wider communities that are always already structured by power, privilege, and intersectional identities that shape health and well-being. We explore the field of narrative medicine and medical anthropology by developing and practicing skills in active listening, open dialogue, mindfulness, empathy, and curiosity that can profoundly shape ethnographic as well as the patient/provider encounters. For context, we read ethnographic case studies that explore a variety of topics including how structural racism and implicit bias shape clinical medicine & medical education in the US, how concepts of sexual citizenship can reshape our understanding of campus sexual assault, how the spread of US psychiatry has shaped a global landscape of mental health, and how queer activism responded to the HIV/AIDS crisis in the US. Our goals are to create participatory research projects that both explore and alter our habitual practices and individual ways of seeing the world around us.

**Requirements/Evaluation:** Weekly attendance, 3 written fieldnotes (3000 words), weekly writing & fieldwork exercises in class and out of class, a final presentation that includes data visualizations and analysis of research findings.

**Prerequisites:** A course in Anthropology, Sociology, STS or in DIV II is strongly recommended

**Enrollment Limit:** 20

**Enrollment Preferences:** Majors in Anthropology, Sociology, WGSS; Concentrators in PH, STS, ASIA, ENVI

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 371 (D2) ANTH 371 (D2) STS 370 (D2)

**Writing Skills Notes:** This class assignments includes over 9,000 words of essay assignments, and will help students develop critical writing skills, including use of rhetoric, evidence, argument, synthesizing data, logic, and anticipating counter-arguments.

**Difference, Power, and Equity Notes:** This class uses experiential learning to examine the intersectionality of race, class, gender, & sexuality in impacting healthcare and health outcomes. It explores the ways that intersectionality and implicit bias shapes health and well-being in patient/provider encounters as well as ethnographic research. It engages with and critiques efforts to 'improve' community and individual health outcomes in the US and elsewhere across the globe.

### **ARTH 15 (W) Architecture of Williams College**

The goal of this course is to research a newly discovered cache of historical architectural drawings of the Williams College campus. These drawings, part of the collection of the Chapin Library, will be the basis for an exhibition. Each student will select a plan or group of plans for study, write a 10-page research paper on it, and then condense that paper into an object label for the exhibition. There will be two 3-hour meetings per week which will include lectures on the history of the Williams College campus, instruction on how to catalogue architectural drawings, and brief student presentations on the course of their research. Collaboration and teamwork will be stressed. The textbook for the class is E. J. Johnson & Michael J Lewis, Williams College: the Campus Guide (Princeton Architectural Press, 2018).

**Requirements/Evaluation:** Short paper and final project or presentation

**Prerequisites:** None

**Enrollment Limit:** 13

**Enrollment Preferences:** Preference given to students who taken courses in the art department or with previously demonstrated experience in architecture.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Attributes:** EXPE Experiential Education Courses STUX Winter Study Student Exploration

### **ARTH 17 (W) Inventing Joan of Arc: The History of a Hero(ine) in Pictures and Film**

Joan of Arc (known during her own lifetime most commonly as Jeanne "la Pucelle," or Joan "the Maid") was one of the most dynamic and yet enigmatic personalities of the European Middle Ages. Born into a peasant family in the French border province of Lorraine in 1412, she gained control of an army, won brilliant military victories, crowned a king, and was burnt at the stake as a heretic, all before her twentieth birthday. Triply marginalized by gender, age, and socio-economic status, she nonetheless managed to shake the Church and State establishments to their very core. But who was Joan of Arc? Nationalist martyr? Pioneer feminist? Champion of the people? Instrument of God's grace? Victim of post-traumatic stress disorder? Exemplary transgender warrior? Over the centuries since her death, artists -- and not just politicians and scholars -- have attempted to answer this question, creating myriad visions of la Pucelle under the influence of an ever-changing lens of contemporary tastes and concerns. Through readings and discussion, this course will survey the history of representations of Joan of Arc in painting, prints, sculpture, and film, from the time of her death to the present.

**Requirements/Evaluation:** 10-page project or comparable creative project

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** None

**Expected Class Size:** NA

**Grading:** pass/fail only

**Materials/Lab Fee:** \$10 and cost of books

### **ARTH 508 (S) Art and Conservation: An Inquiry into History, Methods, and Materials**

In this course students will learn to recognize the materials present in cultural heritage collections, understand the history of artist's methods and techniques, and hone their observation and examination skills when working with material culture. Students will form a basis in art conservation and condition assessment vocabulary and will exercise handling and examination skills for a variety of materials and artworks present during each session. Those who are planning careers involving work with cultural materials will explore cultural heritage through the lens of the art conservator and form a broader awareness of the ethics and procedures of conservation and preservation. An understanding of the vulnerabilities and condition issues of cultural materials and how to care for them will be developed as an impactful, practical resource for future careers in cultural heritage. A multi-disciplinary group of teachers from the staff at the Williamstown Art Conservation Center (WACC) will conduct lectures, practicums, discussions on conservation research literature and visits to nearby art institutions. Sessions are held at The WACC in the Lunder Center at Stone Hill on the Clark Art Institute campus. Students receive a syllabus with session outlines and required reading lists. Required readings are available via GLOW and on reserve at the Clark Library. Three exams will be given throughout the course and attendance is required at all sessions in lieu of a final exam (each weighted at 25% of the final grade).

**Class Format:** slide presentations, lectures, gallery talks, hands-on opportunities, technical examinations, and group discussions

**Requirements/Evaluation:** attendance is required at all sessions; the course grade is based on exams given throughout the semester; there is no final exam

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** Graduate Program students, then students in art history or studio art

### **ARTS 10 (W) Photography and the Senses: Intro to Digital Photography**

In the speed of a digital world, what can a slower, more tactile engagement with our materials and surroundings teach us about ourselves? This studio course is an introduction to the fundamentals of digital photography through a multi-sensorial, tactile, and experimental approach. Students learn the fundamentals of creating meaningful photographs, how to use dslr cameras, as well as editing and inkjet printing. Through a series of creative activities, we tap into all 5 senses (not just vision) in order to unlock embodied knowledge and new ways of seeing. Activities in and out of the classroom include, but are not limited to, engaging with audio recordings, creative writing games based on scent and touch, activities exploring texture and material in nature, collage, and where appropriate, somatic exercises. An emphasis will be placed on play and experimentation, hands-on learning, and class discussions of poetry, artwork, films, and other media. Students will work to create a series of photographs on a topic of their choice.

**Requirements/Evaluation:** Final project or presentation

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** Art majors who have not taken a photo course at Williams, then art majors interested in the intersections of photography and other artistic disciplines, then anyone else.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Materials/Lab Fee:** \$200-\$300. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

### **ARTS 12 (W) Textile Structures**

In this course we will investigate the transformative and sculptural potential of various fiber construction techniques including crochet, wrapping, netting, coiling, twining and interlacing. We will take a multi-disciplinary approach to the subject matter, addressing practical issues of making in addition to the history and cultural significance of the techniques and materials studied in class and their application to contemporary sculpture and installation. Through demonstrations, lectures, critiques, readings, and discussions, the course will focus on development of a personal language within the medium. Evaluation will be based on completion of material study assignments, written responses, and a final project. Attendance and participation will also be considered, with outside studio time expected.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** seniors and art majors

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Jenine Shereos is a recipient of the Massachusetts Cultural Council Fellowship in Crafts, and is currently a Visiting Lecturer in the Fibers Department at Massachusetts College of Art and Design in Boston.

### **ARTS 21 (W) The Tire [Un]Retired: A Repurposed Future for the Automobile Tire**

Invented in 1845, the automobile tire has evolved from a rubber product into one of nylon polymer, steel, and carbon black. These component parts make them difficult to recycle, resulting in fields of used tires emerging around the globe. As this problem continues to grow, how might we re-envision the recycling of this product into a repurposed future? In this course we will explore the global phenomenon of tire disposal, recycling, and reuse. Final projects will culminate in the design and assembly of a sculpture or structure composed of used automobile tires. By the end of week 1 student groups will be tasked with assembling lectures for the rest of the class. Topics will focus on areas of the class's investigation, ranging from 'Clarifying the components of the unit' to 'Spatializing the landscape of the industry'. Additional in-class workshops will call upon groups to assemble a pre-designed element; requiring tire dissection, stretching, folding, and attachment. At the beginning of week 2 new student groups will be tasked with designing and generating a composition of automobile tires for presentation and exhibition at the end of the course. Each group may choose between two tracks: 1. Reprovision of Function: Design and craft an architectural feature (i.e. playground equipment, furniture, or other element that supports or accommodates function). A detailed set of assembly instructions must be presented alongside the product. Expected to be primarily graphic in nature, the document will provide step-by-step installation processes and quantify the materials necessary for replication. 2. Installation as Statement: Design

and craft a freestanding structure that illuminates and informs upon the state of the automobile tire as a product, an industry, a problem, and/or an opportunity. A supporting textual narrative/statement that contextualizes the installation(s) as a commentary upon the past, present or future of the automobile tire will also be required.

**Requirements/Evaluation:** Final project or presentation

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** Seniors in art and environmental studies will be given priority.

**Expected Class Size:** NA

**Grading:** pass/fail only

### **ARTS 24 (W) Drawing as Meditation**

Drawing as Meditation is a course focused on drawing as a cross-disciplinary practice that activates our radical imaginations. Going beyond the technical, we will center drawing as a daily meditation - an embodied process that creates space and time for reflecting, connecting, and integrating ideas across disciplines, or disparate aspects of our lives and psyches. Using both traditional and nontraditional drawing tools, we will explore a series of activities that draw on Performance Studies, Art Education, Psychology, and Liberatory practices. Some examples include automatic drawing, diagramming, and mapping. Class time will be split between short drawing activities and discussion. Outside of class time, students will be expected to complete daily drawing journals, as well as short readings and writings, not exceeding 10 hours per week. No prior drawing experience required, only a willing desire to put pencil to paper, to experiment, and to be open to what unfolds. Class times: Wednesday 1:00 pm - 3:50, Thursday 10:00 am - 12:50 pm

**Requirements/Evaluation:** Final project

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** Students who have otherwise struggled to enroll in arts classes. Preference for Juniors and Seniors

**Expected Class Size:** 15

**Grading:** pass/fail only

**Materials/Lab Fee:** \$200. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

### **ARTS 28 (W) Improvisational Woodcut**

Woodblock printmaking-the practice of making inked impressions from the carved surfaces of wooden blocks-is an ancient medium that has proliferated through many different cultural contexts and formal iterations. In this intensive studio course students will be introduced to the fundamentals of woodcut, with an emphasis on direct hand carving, hand printing and experimental transformations of the printed multiple through collage. Students will learn how to carve their imagery into traditional shina woodblocks while also experimenting with reclaimed wood. By utilizing hand printing techniques students will have the opportunity to make prints that are of unconventional sizes and shapes. The resulting prints will be transformed and elaborated through experimentation with archival, non-toxic collage techniques, handmade papers and other found materials. This is an immersive course that meets three times per week for 2.5-hour sessions. Class meetings will include slide lectures, group discussions, technical demonstrations and studio work closely supervised by the instructor. Students will be expected to dedicate 4 to 6 additional hours per week to developing their projects. In addition to class sessions there will be open printshop hours during which students may work independently. Visits to the print collections of WCMA and the Chapin Library will introduce students to a broad sample of historical and contemporary woodblock prints. At the end of the session students will present their work in a group exhibition in the Spencer Studio Art Building. Lab fees are covered by the Book Grant for students receiving financial aid.

**Requirements/Evaluation:** Final project or presentation

**Prerequisites:** None

**Enrollment Limit:** 8

**Enrollment Preferences:** A brief written statement answering the question: Why is it important for you to take this course at this moment in your time at Williams?

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Alyssa Pheobus Mumtaz holds an MFA from Columbia University and a BA from Yale. She exhibits her work internationally and has taught printmaking, drawing, painting and design at institutions including UVA, Columbia and American University.

**Materials/Lab Fee:** \$250-\$350. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

### **ASIA 99 (W) Independent Study: Asian Studies**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Requirements/Evaluation:** A 10-page paper. Short paper and final project or presentation. Final project or presentation.

**Prerequisites:** NA

**Enrollment Limit:** 15

**Enrollment Preferences:** NA

**Expected Class Size:** NA

**Grading:** pass/fail only

### **ASTR 12 (W) Space Pioneering - Dreams, Math, and Steel on the Existential Boundary**

Over the Earth's five and a half billion year history, only within the last century have its evolved conscious inhabitants acquired the tentative means to travel across the Solar System. At the same moment, in the estimate of Oxford scientist - philosopher Toby Ord *The Precipice*, the total probability of existential catastrophe, including the risk of cometary impacts, climate change, pandemics, and nuclear war over the next one hundred years is as large as 1 in 6. Spacefaring commerce, already honed to astronomical observation, global communication, navigation, and weather-climate monitoring, could serve as a primary defense against life extinction. This course will consider the prospects for a spacefaring civilization, with an elementary, but physics-driven exposition of astronautics, celestial mechanics, lunar resources, space manufacturing, global warming mitigation, and the human settlement of Mars and other space environments - including the eventual possibility of interstellar flight. Students will be invited to apply quantitative reasoning to their critical exploration of global trends in resource consumption and human opportunities toward an open future, as potentially enabled by space technology, commerce, and culture. Elementary mathematical exposition and applications will emphasize conceptual/analog thinking, relying upon "back-of-the-envelope" scaling methods and graphical interpretation. Course grades will be primarily based on class attendance and individual projects. Although brief quantitative papers will be encouraged, students may choose to make an artistic, philosophical, or socially discursive response with their project. Class lectures of 6 to 8 hours per week will constitute the core instructional material, along with small group tutorials and student presentations of up to 3 hours per week. Weekly outside-of-class work including reading, research, or other creative activity can be expected to take approximately 10 hours

**Requirements/Evaluation:** Short paper and final project or presentation

**Prerequisites:** Although previous enrollment in physics, mathematics, or other science courses will be helpful, any Williams College student should be eligible to benefit from this Winter Study offering.

**Enrollment Limit:** 30

**Enrollment Preferences:** Should enrollment be over-subscribed, preference will be given to members of the junior/senior class, and with a view to balancing a mix of both science/math majors and non-majors.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Michael Allison worked for many years as a Space Scientist at the NASA/Goddard Institute for Space Studies in New York City, also serving on several planetary flight projects, including the Cassini/Huygens mission to Saturn and Juno at Jupiter.

### **BIOL 10 (W) The Queen's Gambit**

We live in an era of customization. Cars, shoes and even your shampoo can be customized to fit your specific needs. 3-D printing has now become a common tool for prototyping and production of complicated and precise forms that not only provide mechanical function but also joy. This course explores the language of design and creation by printing a chess set using 3-D printing and Fusion 360 software. Each student will use the Fusion 360 program to design a Pawn, Rook, Bishop, Knight, Queen and King forms in a style of their choosing. We will then work with the Machine shop in the Hopper Science Center to print and finish these pieces in the styling of your choice. Post-production work may include added weights, and painting. We will meet three times a week for 2-hour sessions in the Hopper Science Center. The course will include in-class printing demonstrations, and digital problem solving to produce successful prints. Most printing will take place outside of class and will be your responsibility to complete. Chess boards will be provided for research and development and playing chess and the end of class will be strongly encouraged! Evaluation will be placed on

the form and function of your finished chess board, as well as attendance and participation. A class-wide chess tournament will be hosted at the conclusion of the course. A 3-d printed trophy will be awarded. There is no prior experience in 3D design or playing chess required, but casually playing chess with peers is encouraged class time. Enrollment limited to 12 students. Cost to Student: \$45 to cover printing and post-production supplies.

**Requirements/Evaluation:** short paper and final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** N.A.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Kim Faler is a visual artist working in a variety of mediums including digital programming and 3d printing. She received her MFA from the Cranbrook Academy of Art and has recently taught art at Mount Holyoke College and the University of Albany.

**Materials/Lab Fee:** \$60

### **BIOL 11 (W) Teaching 3rd Grade about Zebrafish--BioEYES**

BioEYES brings tropical fish to 3rd-grade classrooms in Williamstown, Lanesborough, and North Adams Elementary schools, in a science teaching workshop. Elementary school students will breed fish at the school, then study their development and pigmentation during one week. Williams students will adapt BioEYES lesson plans to the science curriculum for the schools we visit, work with classroom teachers to introduce concepts in genetics and development, help the 3rd-grade students in the classroom, and assess elementary student learning. No zebrafish experience or science expertise is necessary. and all training is provided. During the first week, Williams students will learn to set up fish matings and review BioEYES lesson plans on embryonic development and the genetics of fish pigmentation. In small groups, students will practice teach the hands-on experiments using living animals. In the subsequent three weeks, students will present lessons at the schools and review assessment data. Time commitment: Week 1 - approx. 6 hours total for program training and lesson preparation with additional outside-of-class time needed to create teaching posters, dates, and times TBD Weeks 2 & 3 - approx. 4 hours per day, times TBD dependent on elementary school schedules during the regular school day between 8:30 am and 3:00 pm. Week 4 - TBD; 4 hours per day if running a school program; minimal hours if not running an elementary school program.

**Requirements/Evaluation:** final project or presentation; review of pre and post survey assessments

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** preference to seniors

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Jennifer Swoap, a former 3rd-grade teacher, currently coordinates Williams Elementary Outreach, where Williams students teach hands-on science in local elementary schools.

### **BIOL 13 (W) Introduction to Animal Tracking**

The course will meet twice a week for 5 hour sessions, primarily in the field. One field trip to a nearby state forest is scheduled for the fourth or fifth class meeting day. This day may extend to 4:00. Students are expected to have appropriate outdoor gear for winter. Students are required to create journals and site maps of their personal study areas, including all major features of the landscape, flora and fauna activity. Students will be expected to

visit their study spots every day for a minimum of 1 hour of tracking journaling and data collection. Evaluation will be based on attendance, participation, a final presentation of their study sites, maps and journals, a field test and a 3 page research paper

**Requirements/Evaluation:** short paper and final project or presentation; field test of animal tracking skills

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** 10-12

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Dan Yacobellis has been working with school children, teens and adults since 1997. Dan Created Tamakoce wilderness Programs in 2006 and runs programs on topics including tracking, friction fire making and other naturalist and primitive skills.

### **BIOL 211 (S) Paleobiology**

**Cross-listings:** GEOS 212 BIOL 211

**Secondary Cross-listing**

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. We will explore how, why, when, and where fossils form and learn about the major groups of fossilized organisms and how they have changed through time. In addition, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** One day field trip to the the Paleozoic of New York State

**Requirements/Evaluation:** Weekly lab assignments, frequent short quizzes and writing assignments, and a final project with a written and oral presentation component.

**Prerequisites:** any 100-level GEOS course or BIOL 102, 203 or 205

**Enrollment Limit:** 24

**Enrollment Preferences:** sophomore and junior GEOS majors

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** does not satisfy the distribution requirement for the Biology major

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GEOS 212 (D3) BIOL 211 (D3)

**Attributes:** EXPE Experiential Education Courses GEOS Group B Electives - Sediments + Life MAST Interdepartmental Electives

### **BIOL 22 (W) Introduction to Biological Research**

An experimental research project will be carried out under the supervision of the Biology Department. It is expected that the student will spend 20

hours per week in the lab at a minimum, and a 10-page written report is required. This experience is intended for, but not limited to, first-year students and sophomores, and requires the permission of the instructor.

**Class Format:** Independent study

**Requirements/Evaluation:** A 10-page paper

**Prerequisites:** None. Students may not register until they have a confirmed placement in a Williams Biology lab. The instructor will work with student to identify possible mentors, but it is the student's responsibility to talk to the mentor and get approval.

**Enrollment Limit:** 18

**Enrollment Preferences:** First years and sophomores

**Expected Class Size:** NA

**Grading:** pass/fail only

**Attributes:** EXPE Experiential Education Courses STUX Winter Study Student Exploration

Winter 2023

### **BIOL 220 (S) Field Botany and Plant Natural History**

**Cross-listings:** ENVI 220 BIOL 220

#### **Primary Cross-listing**

This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. Lectures focus on the evolution of the land plants, the most recent and revolutionary developments in plant systematics and phylogeny, the cultural and economic uses of plants and how plants shape our world. The course covers the role of plants in ameliorating global climate change, their importance in contributing to sustainable food production and providing solutions to pressing environmental problems. Throughout we emphasize the critical role of biodiversity and its conservation. The labs cover field identification, natural history and the ecology of local species.

**Class Format:** both field and indoor laboratories

**Requirements/Evaluation:** based on two hour exams, field quizzes, a final project, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** Biology majors, and Environmental Studies majors & concentrators

**Expected Class Size:** 24

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** satisfies the distribution requirement for the Biology major

**Materials/Lab Fee:** There is a charge for the lab manual (\$20); the sketchbook (\$5) and hand lens (\$20) can be self-provided or purchased from the department

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **BIOL 231 (F)(S) Marine Ecology**

**Cross-listings:** BIOL 231 MAST 311

### Secondary Cross-listing

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.

**Class Format:** including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

**Requirements/Evaluation:** two tests, a research project, and a presentation

**Prerequisites:** BIOL 101 or GEOS/MAST 104, or permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** none

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** This course is only offered through the Williams-Mystic Maritime Studies Program located in Mystic, CT. satisfies the distribution requirement for the Biology major.

**Distributions:** (D3)

### BIOL 302 (F) Communities and Ecosystems (QFR)

**Cross-listings:** ENVI 312 BIOL 302

### Primary Cross-listing

An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments as well as "big-data" analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

**Class Format:** six hours per week

**Requirements/Evaluation:** lab reports, a midterm exam, a term project presentation, and a final project paper

**Prerequisites:** BIOL/ENVI 203 or 220

**Enrollment Limit:** 28

**Enrollment Preferences:** Biology majors and Environmental Studies majors and concentrators

**Expected Class Size:** 24

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** satisfies the distribution requirement for the Biology major

### **CHEM 12 (W) The Practice and Processes of Making Pottery**

This course will introduce students to creative methods of working with clay and glazes to create functional pottery, and to the materials and processes of ceramics. Classes will take place in a working Williamstown pottery studio with potter's wheels and space for hand-building and discussions. Studio lessons are designed to stimulate creativity and discovery. Instruction and projects will be tailored to each student's interests, experiences, and abilities. Students will be encouraged to consider how value and beauty can be found in that which is incomplete, impermanent, and/or imperfect. Genuineness and authenticity will be encouraged and valued. We will learn about the origins and properties of clay and glaze materials and about how combinations of materials and the high temperature processes result in mature clay bodies and glazes. We will study the major components of glazes and how the manipulation of these materials changes how glazes appear and function. Evaluation for this course will include a final project, and the critical review of the same. Assessment will take place during individual discussion with the instructor during the construction and finishing processes and in a structured, group critique where finished work will be evaluated by all members of the class through a group discussion led by the instructor. No previous experience is necessary. The only prerequisite for this course is an honest interest in learning about the making and chemistry of pottery. Studio time will likely be afternoons and early evenings, with an optional weekend session to accommodate schedules. Class time is about 12 hours weekly, and may include some outside of class reading and other assignments.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** None; no pottery making experience or science background are necessary; students are encouraged to submit a brief description of their interest in participating

**Enrollment Limit:** 10

**Enrollment Preferences:** Level of enthusiasm for learning the craft, materials, and processes of pottery

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Tim Duncan has been making pottery for over 30 years. He teaches in a home studio that accommodates up to 10 students, and focuses on creating lessons that stimulate creativity and discovery.

**Materials/Lab Fee:** \$130

### **CHEM 14 (W) Forensic Science**

Forensic science is the application of scientific principles to criminal and civil laws within a criminal justice system with the goal toward the establishment of guilt or innocence. This Winter Study course is designed to introduce some of the specialized fields of forensic science, to learn the principles of science and technology upon which they are based, and to apply them to a number of suspicious situations and criminal cases. During two 2-hour class sessions per week, we will examine physical, chemical, and biological items of evidence. The forensic analysis of substances such as glass, ink, bullets, fabric/fibers and drugs will be understood in the context of basic chemistry, analytical chemistry, and organic chemistry. The methods used for the analysis for alcohol and drugs and for the characterization of blood and other body fluids will be discussed in the context of the principles of biochemistry, toxicology, pharmacology, and serology. A variety of well-known historic cases stimulate the exploration of these scientific areas. These include: the John and Robert Kennedy assassinations, the Jeffrey MacDonald case (Fatal Vision), the Wayne Williams case, the deaths of celebrities Marilyn Monroe, John Belushi, and Janis Joplin, the authenticity of the Shroud of Turin, the Casey Anthony case, the Tylenol poisonings, and the identity of Anastasia. Two 3-hour laboratory sessions per week will involve an analysis of evidence and provide an appreciation for the work of a crime lab. Experiments provide an opportunity to learn forensic techniques such as chromatography (for ink and drug analysis), spectroscopy (for alcohol and drug analysis), comparison microscopy (for bullet identification) and a variety of other experimental procedures such as fingerprinting. Outside of class, background reading for the content and preparation for the experimental work is expected.

**Requirements/Evaluation:** Short paper and final project or presentation

**Prerequisites:** Organic chemistry, CHEM 251/255 or permission of instructor

**Enrollment Limit:** 14

**Enrollment Preferences:** Sophomores first, then juniors and then seniors

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Professor Kaplan taught biochemistry and forensic science for 48 years at Williams. He taught a forensic science workshop for 20 years under the sponsorship of the NSF. He is a member of the American and British Academies of Forensic Science.

### **CHEM 16 (W) Glass and Glassblowing**

This course provides an introduction to both a theoretical consideration of the glassy state of matter and the practical manipulation of glass. We do flameworking with hand torches for at least 12 hours per week. While no previous experience is required, students with patience, good hand-eye coordination, and creative imagination will find the course most rewarding. The class is open to both artistically and scientifically oriented students. Note: if you are required to participate in a sustaining language program during Winter Study, this course meets at the same time. The first and last classes are required, so make your travel plans accordingly.

**Requirements/Evaluation:** class participation, exhibition of glass projects, a 10-page paper, and a presentation to the class

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** preference is given to juniors, sophomores, and those who express the most and earliest interest and enthusiasm by email to Professor Thoman

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Jay Thoman is the J. Hodge Markgraf Professor of Chemistry, Emeritus. He has taught this course many times.

**Materials/Lab Fee:** \$75

### **CHEM 17 (W) Precision and Clarity! An Exploration of Scientific Writing**

Most scientific journals demand specific writing styles that include brevity, avoidance of duplication, proper grammar and clear, effective communication. Participants in this course will learn the elements of the scientific report (Title, Introduction, Materials and Methods, Results and Discussion) and understand that unique information is required for each section recognizing that information required for each section should not appear in the others. Participants will explore the "Question Driven Style". This style of reporting emphasizes brevity, logical flow of questions and answers and discourages unnecessary repetition and lack of clear and specific presentation. The application of this style to basic research in all scientific disciplines will be illustrated. A major focus of this course will be group discussions of manuscripts submitted for publication as well as some notable classics. ( For example: Hill AB. The Environment and Disease: Association or Causation. Proc Royal Society Med 1965;58:295-300) The course instructor (Cornell) has collected a series of manuscripts submitted for publication with a wide range of writing quality. The discussions will be conducted in the style of a journal club. The class will meet for 2 hour sessions 3 times per week. Tuesday class will include a didactic presentation ( 60 minutes) followed by group discussion. Reading assignments will be made for the Wednesday and Thursday meetings. These sessions will be conducted in the manner of a journal club. The format for week 1 will be: Review of the journal club format. Question Driven Style: Special Emphasis on the Introduction, Rationale for a Study and Formulation of Study Aims/Questions. Week 2 will focus on the Methods Section. Week 3 will cover reporting of Results and the Discussion. Week 4 will explore internal and external validity and sources of bias in scientific reporting.

**Requirements/Evaluation:** Short paper and final project or presentation. Participants will mediate a journal club discussion of an assigned manuscript. Participants will submit a written peer review of the assigned paper.

**Prerequisites:** The course will be open to all science majors, and not restricted to Chemistry majors.

**Enrollment Limit:** 12

**Enrollment Preferences:** Junior level students majoring in the natural sciences and psychology will be the target audience.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Dr. Cornell('76) is Professor of Orthopedic Surgery at Weill Cornell College of Medicine. He is Editor-In-Chief of the HSS Journal and Senior Associate Editor of the Journal of Bone and Joint Surgery and Clinical Orthopedics and Related Research

Winter 2023

### **CHEM 19 (W) Steps to a Healthier You**

What is health and wellness? We all know how to be "healthy"...right? But why is it sometimes so hard to choose a salad over fries? We will explore these questions and more. This course is based on 2 assumptions: 1. We all have an inherent desire and innate ability to move towards healthier versions of ourselves. 2. This is a lifelong process that begins with understanding ourselves-our values, habits, likes/dislikes, upbringing, etc. In this class, we will work with practical tools for self-discovery and -reflection that will then inform how we set wellness goals to promote lasting healthy habits. We will use the 6 pillars of health from Lifestyle Medicine (nutrition, physical activity, sleep, stress management, relationships, decreasing substance use) as a guide with which to examine our current state of wellbeing to identify where we can begin to take specific and achievable steps towards health and wellness. Class time will be spent primarily on experiential learning through instructor-led exercises and discussions. Additionally, students will complete outside assignments aimed to develop self-awareness and integrate class material into their lives. We will use selected readings from a variety of books including Robert Lustig's *Metabolics*, Jon Kabat-Zinn's *Full Catastrophe Living*, Matthew Walker's *Why We Sleep*, Robert Sapolsky's *Why Zebras Don't Get Ulcers*, Bessel van der Kolk's *The Body Keeps the Score*, Stephen Covey's *The 7 Habits of Highly Effective People*, and James Clear's *Atomic Habits*. Evaluation will be based on class participation, completion of assignments, final 10-page paper or equivalent project/presentation that demonstrates a level of engagement with class material. We will meet 10AM-1PM on 1/4, 1/6, 1/9, 1/11, 1/18, 1/20, 1/23, 1/25. One (minimum) individual meeting with the instructor will be scheduled to address personal concerns and/or help focus the final paper/project. Contact instructor at tlhu210@gmail.com with any questions.

**Requirements/Evaluation:** 10-page paper or equivalent creative project/presentation

**Prerequisites:** Desire and interest in self-reflection, personal growth, and making healthier lifestyle changes.

**Enrollment Limit:** 12

**Enrollment Preferences:** Priority will be given to Seniors. If overenrolled, a statement of interest (a little bit about yourself and your interest in the course) will be used for student selection.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Tracy Hu, MD '13 will graduate in June 2023 from the John Muir Health Family Medicine Residency Program in Walnut Creek, CA. Afterwards, she plans to start a non-profit direct primary care clinic with a fellow residency colleague.

### **CHEM 24 (W) Introduction to Research in Physical Chemistry**

An independent experimental or theoretical project in physical chemistry is carried out in collaboration with a member of the Department with expertise in physical chemistry. Current research projects in the Department include computer modeling of non-linear, chaotic chemical and biochemical systems, atmospheric chemical dynamics, molecular modeling of water clusters, molecular dynamics simulations, and laser spectroscopy of chlorofluorocarbon substitutes.

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** completion of CHEM 151/3/5 and permission of the instructor and department; interested students must consult with the faculty instructor

**Enrollment Limit:** 6

**Enrollment Preferences:** expression of student interest

**Expected Class Size:** NA

**Grading:** pass/fail only

### **CHIN 25 (W) Taiwan Study Tour**

Interested in learning first-hand about Taiwanese culture and becoming acquainted with what has been called the "Taiwan (economic and political) miracle"? Want to improve your knowledge of Mandarin, the language with the largest number of native speakers in the world? Then join us on this 23-day study tour to Taiwan. We'll spend the first two weeks in Taipei, the capital city, where 3 hours of Mandarin language classes at levels from beginning to advanced will be scheduled each morning at the Language Center of National Chengchi University. After class we'll meet as a group for lunch and discussion. Visits to cultural and economic sites of interest and activities with students from several Taiwanese universities will be scheduled for some afternoons and Saturdays, with other afternoons as well as evenings and Sundays free for self-study and individual exploration. During the last week, we'll travel to central and southern Taiwan, staying at small hotels and youth hostels. Two orientation sessions will be conducted on campus in the fall to help participants prepare for their experience. Requirements: Satisfactory completion of the language course, a 10-page paper on a topic related to Taiwan, and active participation in all scheduled activities.

**Requirements/Evaluation:** A 10-page paper.

**Prerequisites:** None.

**Enrollment Limit:** 10

**Enrollment Preferences:** Open to all, first preference to CHIN and EALC majors, then those with Mandarin language proficiency at level of CHIN 101-102.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Materials/Lab Fee:** \$3,800

### **CLAS 11 (W) The Fundamentals of Baking: Precision and Play**

Baking is often regarded as a rather precise art, demanding close attention to measurement, temperature, and time. Yet it also rewards experimentation, as evident in baked goods that combine cultural traditions, accommodate dietary needs, and surprise us with unexpected but delightful combinations of flavors and textures. In this course, you will receive a hands-on introduction to baking and recipe development. We will learn to make a set of basic baked goods (bread, cake, pastry), paying attention to both established recipes and the principles that inform them. We will then explore and prepare variations, reading reflections by a diverse group of bakers and trying out their techniques (examples of readings include excerpts from Peter Reinhart, *The Bread Bakers Apprentice*, and Joanne Chang, *Pastry Love*). As a final project, each student will be asked to develop and present a baked product of their own, accompanied by a set of polished "recipe notes" modeled on the cookbooks and blogs we have read together.

**Requirements/Evaluation:** final project or presentation, class participation, brief readings and written reflections

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** brief application

**Expected Class Size:** NA

### **CLAS 25 (W) Presence in Place: The Greek Dramatic Imagination**

Classical Greek tragedy was a genre physically bounded by the space of the theater of Dionysus in Athens, yet famously capacious in its

representation of other cities, shrines, and peoples. To experience a play like *Ion* or the *Eumenides*, in the theatrical audience or as a reader, is to be imaginatively transported to another place. Whether the play takes its audience to the Areopagus in Athens, the sacred shrines at Delphi, or even further away to Thebes or Corinth or the plain outside the fallen walls of Troy, it enables them (and us) to inhabit in our imagination spaces already laden with literary, religious, political and also personal, experiential significance. Greek tragedy invites us to consider the benefits and costs of travel undertaken as pilgrimage, tourism, and adventure, but also as the consequence of war, profiteering, or natural disaster. In turn, this course asks students to consider how "taking in the sights" of ancient and modern Greece can expand our understanding of Greek literature, art, and culture. The transformative potential of travel for good and ill, whether undertaken willingly or by force, is a central consideration. The course will include foundational reading in Greek tragedy and the scholarly literature that surrounds it, focusing on how the fifth-century Athenian stage functioned as a site for negotiating the role of place in constituting collective and individual identity. The tragic corpus will give us a common set of primary sources to consider as we prepare to explore relevant sites. The core work of the course will occur in Greece, as we visit sites such as the Athenian Acropolis, the theater and sanctuary at Epidaurus, and the Temple of Aphaia on the island of Aegina, and reflect upon their history, representation, and significance. Each student will be responsible for offering a polished "site report," researched on-campus and delivered in Greece.

**Requirements/Evaluation:** Final project or presentation.

**Prerequisites:** Statement of interest outlining any relevant background or experience (coursework, fieldwork, language study), brief interviews with instructors.

**Enrollment Limit:** 12

**Enrollment Preferences:** Enrollment preference will be given to Classics majors and intending Classics majors, and to those with demonstrated interest in the ancient world who have not previously travelled abroad.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Materials/Lab Fee:** \$40 in required books/supplies

### **COMP 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City**

**Cross-listings:** AMST 331 COMP 330 THEA 330

#### **Secondary Cross-listing**

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as *Harper's Weekly* (Lafcadio Hearn), *The Awakening* (Kate Chopin), *A Streetcar Named Desire* (Tennessee Williams), *The Moviegoer* (Walker Percy), *Why New Orleans Matters* (Tom Piazza), *A Confederacy of Dunces* (John Kennedy O'Toole), *New Orleans Sketches* (William Faulkner), *One Dead in the Attic* (Chris Rose). Film examples such as *A Streetcar Named Desire*, *An Interview with a Vampire*, *The Curious Case of Benjamin Button*, *When the Levees Broke*, *Treme*, *Waiting for Godot* (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

**Requirements/Evaluation:** will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

### **CSCI 10 (W) Unix and Software Tools**

This course serves as a guided introduction to the Unix operating system and a variety of software tools. Students in this course will work on Unix workstations, available in the Department's laboratory. By the end of the course, students will be familiar with Unix and will be able to use Git as a collaborative tool. As a final project, students will work together in teams to explore an API of their choice. The exact topics to be covered may vary depending upon the needs and desires of the students. The course is designed for individuals who understand basic program development techniques as discussed in an introductory programming course (Computer Science 134 or equivalent), but who wish to become familiar with a broader variety of computer systems and programming languages. This course is not intended for students who have completed a course at the 200 level or above.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** CSCI 134 or equivalent programming experience

**Enrollment Limit:** 10

**Enrollment Preferences:** preference will be given to students who have not yet completed a CSCI course at the 200 level or above

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Lida graduated from Williams in 2002 as a double major in CS and Psych. She returned in 2014 and spent 4 years working in Alumni Relations before joining the staff of the CS Dept in 2019 where she provides instruction support for the intro classes.

### **CSCI 13 (W) Designing for People**

Many innovative products and entrepreneurial endeavors fail because they are not sensitive to the attitudes and behaviors of the people who interact with them. The fields of Human Factors and Design Thinking combine aspects of psychology with software development, behavioral economics, architecture, and other fields, to create products and processes that provide an easy, enjoyable, efficient and safe user experience. The course will provide students with a theoretical framework for analyzing usability, as well as practical experience with iterative design techniques, prototyping, and user testing and feedback. Students will demonstrate their understanding of Human Factors theory through short presentations and participation in class discussion. Students will work in small groups to identify a usability problem and design a solution which they will evaluate by heuristic analysis and a usability test with 8-10 human test subjects.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** instructor seeks a diverse group of students with interests in design, psychology, human-computer interaction, and other fields

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Rich Cohen '82 has designed communications, social networking and education applications used by over 100 million people and has conducted usability research on five continents.

### **CSCI 16 (W) Introduction to the Computer Science Research Process**

This course introduces students to the research process in Computer Science. Students will learn how to find and critically read research papers, formulate and describe a research problem, propose a solution to that problem, and design an evaluation plan for assessing the effectiveness of the proposed solution. Students will learn about the general research framework through readings, videos, in-class activities, and class discussions.

Throughout the course, students will apply those general research methods to a research question in an area of their choice (e.g., machine learning, algorithms, parallel architecture, etc.), working in groups of up to three students. Each group will create a written research project proposal that includes a description of the research context and the specific problem to be solved with appropriate related work citations, a description of the proposed solution or approach, and a plan for evaluating the proposed solution. Assessment will be based on a written project proposal and an in-class oral presentation of that proposal.

**Requirements/Evaluation:** Short paper and final project or presentation.

**Prerequisites:** Students should have successfully completed Computer Science 134 or some similar computing experience.

**Enrollment Limit:** 15

**Enrollment Preferences:** We will select a set of students who have different amounts of computer science experience.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Attributes:** EXPE Experiential Education Courses

Winter 2023

LEC Section: 01 TWR 10:00 am - 11:50 am Kelly A. Shaw

### **CSCI 23 (W) Research and Development in Computing**

An independent project is completed in collaboration with a member of the Computer Science Department. The projects undertaken will either involve the exploration of a research topic related to the faculty member's work or the implementation of a software system that will extend the students design and implementation skills. It is expected that the student will spend 20 hours per week working on the project. At the completion of the project, each student will submit a 10-page written report or the software developed together with appropriate documentation of its behavior and design. In addition, students will be expected to give a short presentation or demonstration of their work. Prior to the beginning of the Winter Study registration period, any student interested in enrolling must have arranged with a faculty member in the department to serve as their supervisor for the course.

**Requirements/Evaluation:** short paper and final project or presentation

**Prerequisites:** project must be pre-approved by the faculty supervisor

**Enrollment Limit:** 30

**Enrollment Preferences:** preference given to sophomores and juniors

**Expected Class Size:** NA

**Grading:** pass/fail only

**Attributes:** EXPE Experiential Education Courses STUX Winter Study Student Exploration

Winter 2023

RSC Section: 01 TBA Stephen N. Freund

### **CSCI 28 (W)(W) Product Management and Solution Design**

**Cross-listings:** ECON 28 CSCI 28

**Secondary Cross-listing**

In this course, students will work in small teams to design a software product that solves a problem of their choosing. To support this endeavor, we will examine, critique, and apply methodologies intended to solve these problems, including those developed by Marty Cagan, Steve Blank, Don Norman, Steve Krug and Eric Ries. Students will learn to act as effective product managers, achieving alignment between business, technology, and UI/UX design. Such alignment is crucial given that technology projects often fail not because of the quality of technical engineering but due to misalignment in these three areas. Google Glass failed to account for its price tag, fashion, and the privacy panic. The initial Obamacare website failed to address management issues and predict the volume of website visitors. Flexcube failed to update and incorporate users into the design of their product, resulting in a \$500 M UX mistake for Citi bank. These organizations did not identify the right problem, or did not build the right solution. The underlying conflict is IT teams like to be told what to build, but users often do not know what they want or how to express it. We will learn how product managers and their interdisciplinary teams can bridge that gap.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Students are asked to submit a brief letter describing why they are interested in the course and what they hope to get out of it. To be considered, please email your submission to [vincent.mcnelis@dataart.com](mailto:vincent.mcnelis@dataart.com) by 11.13.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Allan joined DataArt in 2014 through the acquisition of AW Systems, where he was a founding partner, and instrumental in developing the Solution Design Framework Methodology, a process designed to guide large-scale/complex technology projects to success. Allan now heads DataArt's Solution Design consulting group as well as their product management competency.

### **ECON 12 (W) Sports Economics**

This course explores topics in sports economics, a field that covers both how economics can help explain puzzling aspects of sports and how sports can inform our understanding of economics. In small groups, students will identify an empirical question, review the existing literature, gather appropriate data, and use econometric tools to answer the question of interest. I am flexible on the topic and encourage you to pursue an idea that you are interested in! Students need to have taken Econometrics (Econ 255 or a suitable replacement) and the statistical software package STATA will be used for the analysis. The resulting research project, including both a paper and a class presentation, is due at the end of Winter Study.

**Requirements/Evaluation:** A 10-page paper; Short paper and final project or presentation; Final project or presentation

**Prerequisites:** Econ 255

**Enrollment Limit:** 12

**Enrollment Preferences:** Those that have taken Econ 255

**Expected Class Size:** NA

**Grading:** pass/fail only

### **ECON 13 (W) Introduction to Impact Investing**

The Introduction to Impact Investing course provides students with an overview of the entire spectrum of investing approaches used by impact investors. This is done through a combination of cases and lectures by the professor, and guest presentations by leading impact investors and thought leaders. The course will touch on several key elements of each area of impact investing including: ESG, Private Equity, Venture Capital, Mission and Program Related and Impact First. In each area the class will discuss in detail: market participants, sectors, investment selection and structuring; financial and social impact return. The class will culminate in the students preparing an investment landscape/opportunity study for an impact investor. This course is designed for students interested or planning to pursue a career in traditional investment management who want to understand this new field, and for students looking to enter the field of impact investing or social enterprise.

**Requirements/Evaluation:** Final project or presentation.

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** seniors

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Daniel is currently a Managing Director at Habitat for Humanity International (HFHI). In this role he manages HFHI's domestic impact investing efforts which include \$250MM+ in private debt investments in Habitat affiliate projects across the country.

### **ECON 14 (W) Sports Team Ownership and Use of Data Analytics**

Students will learn about the ownership and operation of a sports team and, most importantly, the complex decisions and data analytics employed to make business decisions. Specifically, this course will explore the following areas: - The Fundamentals of the Business of Professional Minor League Sports Franchises - The Application of Data Analytics and Business Intelligence in Sports Management - Understanding the Customer (the Fan) - The Social and Economic Impact of a Minor League Sports Franchise The course will encompass elements of economics, math, data analytics, marketing and communications. It also is likely to address leadership, organizational design, ethics, strategic planning, diversity and culture. With regard to the pedagogical approach, the course will involve (i) reading of a sports management and/or sports analytics text book, case studies and sports business journals, (ii) listening to podcasts, (iii) engaging with guest speakers, (iv) participating in class discussions and debate with the instructor regarding his own real-world experience as a minor league sports team owner, (v) some engagement of the Socratic method as case studies are discussed and debated, and (vi) writing of a short paper and a two-person presentation of a "real world" project. Text Book: Sport Business Analytics, Keith Harrison & Scott Buckstein Case Studies: Oakland Athletics: Reinventing the Fan Experience and Business Model by Dave Rochlin (UC Berkeley) The Kitchener Rangers Hockey Club: Skating into the Future by Karin Schnarr, Mathew Krizmanich, Chelsea Lee (Ivey Publishing) The Springfield Nor'easters: Maximizing Revenues in the Minor Leagues by Frank V. Cespedes, Laura Winig, Christopher H. Lovelock (Harvard Business School) Podcasts: SBJ Unpacks Other Sources: Sports Business Journal Issues

**Requirements/Evaluation:** short paper and final project or presentation

### **ECON 15 (W) Introduction to Management Consulting**

This course provides a broad overview of the management consulting industry from the perspective of an experienced practitioner. The objectives of the class are to provide a real world view as to what consultants do and to help prepare students who are considering joining a management consulting firm post-Williams. The class will begin with a broad discussion of the differences in the types of business consulting and how management consulting firms are utilized by corporations and private equity firms. The next section will introduce the complexities in developing successful business strategies and review common frameworks for structuring strategic analysis. Students will then be provided instruction on (and practice with) the tools utilized by strategy consultants to analyze markets, evaluate competitive environments, synthesize customer information, and perform financial analysis in order to develop growth strategies. Additionally, one class session will be devoted to tips for getting a job in management consulting including how to ace case interviews. The final small group project will entail the development and delivery of a consulting presentation for a business with a strategic need.

**Requirements/Evaluation:** Short paper and final project or presentation; Homework and class participation

**Prerequisites:** none

**Enrollment Limit:** 24

**Enrollment Preferences:** If the class is over enrolled, I will have students respond to a few questions via e-mail and I'll select the matriculants based

on responses.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Peter McKelvey '86 was with L.E.K. Consulting for 29 years including leading the Boston office and Private Equity practice and serving 6 years as President of the Americas Region. He holds a BA from Williams and an MBA from Wharton.

### **ECON 17 (W) Who Decides Your Pay?**

Most of us must work to earn a living. As a result, we are keenly aware of our pay. But who decides that pay, and how? Many analyses of the labor market have assumed it is perfectly competitive, with firms compelled to pay a prevailing market wage or salary. Recent evidence has demonstrated this assumption is not just wrong, but badly so. Firms have considerable power to set the wages of their employees. This course studies the forces that give firms wage-setting power and the effects of such power on labor market outcomes. It will also address the question of what workers can do to limit employer power. Eric Posner's *How Antitrust Failed Workers* and Alan Manning's *Monopsony in Motion* will be the primary books. Additional readings will include policy documents from the US Department of Justice, the US Treasury, and think tanks, plus John Kenneth Galbraith on countervailing power. Class meetings (6hr/week) will focus primarily on discussion, but some will be dedicated to statistical exploration of real labor market data. Out-of-class activities will include reading, simple data analysis, and an interview. The course will conclude with groups presenting case studies of employer wage-setting power or employee efforts to reduce that power (e.g. unionization drives).

**Requirements/Evaluation:** Final project or presentation

**Prerequisites:** ECON 110

### **ECON 18 (W) Start-Up Operations: What they don't teach you in school!**

Many entrepreneurs begin their respective journeys with very little prior experience or industry knowledge -- they just go for it! In this course, we'll take a dive into what it takes to found and run a small food and beverage business. We'll start at ground zero and work our way through the components of operating a small business. From production runs to logistical challenges, we will cover it all. This course explores all aspects of running a business outside of that traditionally taught in textbooks. Balance sheets and income statements are very important, but so are supplier negotiations, process flows, and the inevitable need to solve daily logistical challenges. After this course, the only thing left to do is give entrepreneurship a try for yourself. Find something you're passionate about, roll your sleeves up and see what happens -- I'm sure you'll be glad you did. This course will feature frequent guest lectures by entrepreneurs who will share their experiences on topics covered each week. Students will be able to interact, learn and take away a wealth of knowledge from industry experts.

**Requirements/Evaluation:** Short paper and final project or presentation.

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** General interest in entrepreneurship

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Passionate food and beverage professional with a focus on small start-up operations. Operated multiple businesses from infancy to \$10mm in revenue.

**Attributes:** EXPE Experiential Education Courses

Winter 2023

LEC Section: 01 TR 4:00 pm - 7:00 pm Alex Englert

### **ECON 20 (W) Financial Accounting: Concepts, Methods, and Uses**

This course will provide an introduction to the concepts, principles and practices used in preparing financial statements for businesses--the balance sheet, income statement, statement of cash flows, and statement of owners' equity. Building on this foundation, the course will move on to how these financial statements are used by managers to make decisions about capital expenditures and other key aspects of running a business. Additionally, the course will examine how analysts evaluate financial statements to assess the health of a firm, and to decide on whether to invest in a company or divest existing holdings. Emphasis will be on the practical skills needed to understand the relationship among accounting, finance, and economics. Spreadsheets will be used to perform "what-if" and other analysis based on the underlying financial statements listed above. This course also will link the theories of the firm presented in economics courses, with the real-world aspects of managing a business as an insider; as well as evaluating a business from the outside as an analyst. There will be a textbook, as well as case studies, and current events related to accounting as presented in periodicals such as the Wall Street Journal and information sources like CNBC. Given the nature and depth of the material, you should plan on committing about 20-24 hours per week to the course, including 8 hours a week of classroom time--likely two hours mid-morning, Monday through Thursday. Evaluation will be based on: Accounting Problems from the textbook and using spreadsheets Case Studies (2 or 3) Final Exam to unify the concepts

**Requirements/Evaluation:** Problems, Case Studies, and a Final Exam

**Prerequisites:** Econ 110

**Enrollment Limit:** 30

**Enrollment Preferences:** If the course is over-enrolled, preference will be based on time at Williams with preference for those with more advanced standing

**Expected Class Size:** NA

**Grading:** pass/fail only

### **ECON 22 (W) Volunteer Income Tax Assistant**

This experiential course provides students with the opportunity to explore public policy through training and work as volunteer income tax preparers for low-income working people in North Adams, Massachusetts. By the end of the term, students will be IRS-certified volunteer income tax preparers. Students have the option of writing a 10-page analytic essay or serving as volunteer tax preparers for local clients of the Berkshire Community Action Council. Classes will center around lab sessions where students will progress through the self-paced IRS "Link and Learn" online tax preparer training program that leads to certification. We will also hold a number of lecture/discussion sessions. These will offer a brief overview of the U.S. income tax and its history, as well its relationship to U.S. social policy (especially policy towards lower-income households). This year's course is co-taught by a behavioral economist, and thus some class time will also be devoted to discussing the psychological aspects of filing taxes, both when filing for yourself and when serving as a volunteer assistant for low-income clients. In summary, class time will be a mix of (1) working through the self-paced online training program, and (2) discussing relevant policy and program context. Note: This course satisfies the Political Economy Major Experiential Learning requirement.

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 18

**Enrollment Preferences:** statement of interest

**Expected Class Size:** NA

**Grading:** pass/fail only

### **ECON 24 (W) The Economics, Geography and Appreciation of Wine**

This course provides an introduction to the economics, geography and appreciation of wine. We will be studying the economics and geography of wine production, and will also learn to identify, understand and appreciate the major wine types of the world. The course will involve lectures, outside readings, discussions, and in-class wine tastings. We will focus primarily on the Old World wine styles and regions of France, Italy, Germany, Austria, Spain and Portugal, but will also cover some New World wine regions including California, Oregon, Chile, Argentina, South Africa, New Zealand and Australia among others.

**Requirements/Evaluation:** final project or presentation and a blind tasting exam

**Prerequisites:** none, but students must be 21 years old on or before the first day of class

**Enrollment Limit:** 10

**Enrollment Preferences:** Mix of academic record and diversity of backgrounds and interests. Students are invited to email the instructor with a brief description of background and interests, but are not required to do so.

### **ECON 26 (W) Micro-Simulation Modeling for Ex Ante Policy Analysis**

**Cross-listings:** ECON 52 ECON 26

**Secondary Cross-listing**

Micro-simulation modeling provides one of the most powerful tools for ex ante evidence-based analysis of economic and social policy interventions. Rooted in representative household surveys of a country's population, the models provide a picture of poverty, employment, consumption and income levels throughout the country. A micro-simulation model enables researchers to investigate the impact of existing economic and social policy interventions (such as tax and public benefit interventions) on income levels, poverty, inequality and other outcomes. In addition, researchers are able to simulate the impact and estimate the cost of new policy interventions. During this course, students will learn to apply these methods to analyze public policies and interpret the findings. The course examines measurement issues, analytical tools and their application to household survey data for a range of developing countries. The course also links the outcomes of the analysis with the challenges of policy implementation, exploring how the political environment and/or institutional setting may result in the implementation of second-best options. This is a hands-on modeling course, and students will build a micro-simulation model for a country of their choice and use this model in completing the course requirements. The course will employ Excel, Stata and advanced micro-simulation packages. The final requirement for the course is a policy paper that provides students with an opportunity to write accessible prose that communicates the methodology adopted and the key lessons of the analysis

**Requirements/Evaluation:** two 10-page papers and final project and presentation

### **ECON 28 (W)(W) Product Management and Solution Design**

In this course, students will work in small teams to design a software product that solves a problem of their choosing. To support this endeavor, we will examine, critique, and apply methodologies intended to solve these problems, including those developed by Marty Cagan, Steve Blank, Don Norman, Steve Krug and Eric Ries. Students will learn to act as effective product managers, achieving alignment between business, technology, and UI/UX design. Such alignment is crucial given that technology projects often fail not because of the quality of technical engineering but due to misalignment in these three areas. Google Glass failed to account for its price tag, fashion, and the privacy panic. The initial Obamacare website failed to address management issues and predict the volume of website visitors. Flexcube failed to update and incorporate users into the design of their product, resulting in a \$500 M UX mistake for Citi bank. These organizations did not identify the right problem, or did not build the right solution. The underlying conflict is IT teams like to be told what to build, but users often do not know what they want or how to express it. We will learn how product managers and their interdisciplinary teams can bridge that gap.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Students are asked to submit a brief letter describing why they are interested in the course and what they hope to get out of it. To be considered, please email your submission to [vincent.mcnelis@dataart.com](mailto:vincent.mcnelis@dataart.com) by 11.13.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Allan joined DataArt in 2014 through the acquisition of AW Systems, where he was a founding partner, and instrumental in developing the Solution Design Framework Methodology, a process designed to guide large-scale/complex technology projects to success. Allan now heads DataArt's Solution Design consulting group as well as their product management competency.

### **ECON 54 (W) Macroeconomic Policy Analysis: A Practitioner's Perspective**

This is an introduction to the analysis of macroeconomic policy issues, especially monetary, fiscal and exchange rate policy. We will focus on the data, metrics and techniques that financial markets analysts/economists use in assessing the macro conditions of countries. The goals are threefold: (1) to become familiar with some of the analytical tools used in macroeconomics, (2) to be able to understand and critique empirical macro research, and (3) to practice the writing and presentation skills used in policy analysis. The emphasis will be on practical issues, such as working with macro data, rather than on formal econometric methods.

**Requirements/Evaluation:** Several short policy analysis briefs

**Prerequisites:** N/A

**Enrollment Limit:** 10

**Enrollment Preferences:** Enrollment is restricted to the CDE students

**Expected Class Size:** N/A

**Grading:** no pass/fail option, no fifth course option

### **ENGL 10 (W) "Be"ing whole; finding homeostasis through practicing yoga, mindfulness, meditation**

We all hear all of the time to "just relax," "just breath," "just let it go," but for many students at Williams the calm and stillness of slowing down, not running around and checking things off a long to-do list, not competing in athletics, performing in dance groups, acapella groups, or organizing multiple different extracurricular events and activities, is too anxiety provoking. At some point, we all hit a wall or our batteries just die out and there is no moving forward until we can recharge and learn how to balance the calm/stillness, relaxation, and letting go feeling with this fast-paced movement forward. You hike a mountain to see the view at the top, enjoy it, take in the scenery and the endorphins from hiking. You don't hike a mountain to not look at the view at the top, turn around, and climb another mountain (well we will explore why we shouldn't during our own hike(s)). In this class we will dive into powerful yoga practices, meditations, and other mindfulness practices such as mandala making, viewing art at a museum, taking mindful walks/hikes in nature as well as learn just why these practices allow us to relax, breath, let go AND balance our nervous system. We will join with other Winter Study Classes to practice meditation, observe art, and do other reflective practices. The class will emphasize teaching and learning the science behind our nervous system, the neurotransmitters and hormones that comprise the HPA axis, as well as learning REAL strategies to apply while at Williams and beyond. It's a great class for anyone interested in the science behind wellness practices, a holistic approach to medicine and wellbeing, as well as learning more about one self and how to maintain a healthy balance between the parasympathetic/sympathetic nervous systems, the yin/yang, the fast pace/sedentary in order to "be" whole and flourish now and beyond.

**Class Format:** Meet: Tue/Th - 10-12:45pm; Option to teach practices at local elementary school Tue. 3-4:30pm

**Requirements/Evaluation:** Final project or presentation

**Prerequisites:** Interest in trying new things, engage in different activities that might seem "weird." No yoga experience is necessary, but students

should have an interest in the practice as well as an interest in winter play/hikes, and field trip to local museum.

**Enrollment Limit:** 15

**Enrollment Preferences:** juniors and seniors

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Amy Sosne, class of '05, works at the CLiA as the North Adams Program Coordinator. She has an MD and M.Ed, multiple yoga certifications, and experience in working in wellness with individuals of all ages and from a variety of different backgrounds.

### **ENGL 11 (W) "Beats, Rhymes and Life": The Poetics of Rap**

On January 27th, 2000, the American poet Mark Strand, Pulitzer Prize winner, Chancellor of the Academy of American Poets, and former Poet Laureate of the United States, delivered a lecture at the University of California, Irvine in which he claimed that "there's no connection between rap and poetry." Twenty years later, poets, critics, and scholars are largely in agreement that the connection between rap and poetry is both a substantial and vital one. In the first week of the course ("Beats"), we'll do our best to situate rap within the long histories of rhythm and verse forms in English language poetry by considering what nursery rhymes like "Star Light, Star Bright" and "Itsy Bitsy Spider" have to do with Jay-Z and Lil Baby and what forms like the ballad and epistle have to do with Tupac and Kendrick Lamar. In week two ("Rhymes"), we'll explore the most glorified, vilified, and generally misunderstood feature of English poetry--where it came from, how it developed, and why it became the single most essential feature of rap poetics. We'll listen closely to the evolution of rap rhyming practice from the 1970s through the present, and we'll try to figure out whether "Wisconsin" rhymes with "mansion" and "air" rhymes with "yeah." For week three ("Life"), we'll think through one of the more complicated relationships at the heart of rap: the relationship between rap artists and the personae of their speakers. As the course draws to close, we'll ask ourselves what MF DOOM and Eminem's alter-egos might teach us about the nature of poetry and authorship, and we'll try to square this with the unusual legal cases of Tekashi 6ix9ine, Young Thug, and others, in which rap lyrics have been used as criminal evidence against their authors. Assignments will include: weekly reading/listening, contributions to a course playlist on Spotify, and either a final paper or creative project accompanied by a shorter paper.

**Requirements/Evaluation:** a 10-page paper; short paper and final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** a brief statement of interest

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Tyler Goldman received his doctorate from the University of Utah in 2022 and his MFA from the University of Maryland in 2016. His poems and translations have appeared in the American Poetry Review, Virginia Quarterly Review, and elsewhere.

### **ENGL 113 (F) The Feminist Poetry Movement (DPE) (WS)**

**Cross-listings:** WGSS 113 ENGL 113 AMST 113

**Primary Cross-listing**

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary

approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

**Class Format:** discussion, some lecture, project work in archives and art gallery

**Requirements/Evaluation:** two-three short analysis papers, creative (1-2 pages), discussion posts, curated final project (archival exhibit and digital project), presentations

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first years

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 113 (D1) ENGL 113 (D1) AMST 113 (D1)

**Writing Skills Notes:** Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

**Difference, Power, and Equity Notes:** The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

### **ENGL 12 (W) D.I.Y. Publications: Paper, Print, and Power**

Like most western institutions, the field of traditional publishing has been, and continues to be deeply shaped by power dynamics that more often than not leave out the voices of the most marginalized members of society. Zines, chapbooks, artist books, blogs, and other "do-it-yourself" (D.I.Y.) forms of publication have served as mechanisms of communication, expression, and community building that give voice to marginalized creators. Through engagement with readings, discussion, local field trips, and items in the libraries' collection, this course will explore the historical and social dynamics that have shaped the current landscape of D.I.Y. publishing. At the same time, this course will provide space and resources for students of all skill levels and backgrounds to develop their own practical publishing skills, from content generation to production and distribution. As a culminating project, students will complete one or more D.I.Y. publications of their own design, submitted with a short reflection paper. Class time (three 2-hour sessions per week) will be split between shared experiences, discussion of weekly themes presented in the reading, and hands on time exploring different methods that can be utilized in the creation of their own publication. Enrolled students will be expected to complete reading and additional studio/lab time outside of class, not expected to exceed 15 hours per week.

**Requirements/Evaluation:** short paper and final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** If overenrolled preference will be given to first-year students, followed by ENGL majors.

### **ENGL 16 (W) On Literary Nonprofits**

This course introduces students to the world of literary nonprofits: presses, journals, residencies, and advocacy organizations. Students will begin with a study of Outpost, a new residency in Southern Vermont dedicated to writers of color from the United States and Latin America. After an orientation to this organization's history and mission, students will have conversations with members of the board and read and rank applications for the upcoming residency cycle. Guest speakers from a variety of positions within other literary nonprofits will visit class as the students then prepare case studies on an emerging literary nonprofit of their choice. The goal of this course is to demystify this aspect of the literary landscape and demonstrate the rigorous commitment and various skillsets necessary to move from a well-intentioned vision to a sustained and impactful organization. The course will meet for two hours three times per week with outside-of-class work consisting of reading and research, interviewing employees at various nonprofits, and the preparation of the aforementioned final case study.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** priority will be given to seniors and juniors, preference for students with a demonstrated interest in pursuing a literary-related career (as expressed in a statement of interest, if needed)

**Expected Class Size:** NA

**Grading:** pass/fail only

Winter 2023

LEC Section: 01 Cancelled

### **ENGL 21 (W) Repeating the Past: [The Great Gatsby] and [Lolita]**

[The Great Gatsby] and [Lolita], not often compared, should be read alongside each other: the shared question is whether the past can be repeated. Pertinent shared sub-questions are: What happens to history (World War I or II) in our desire to repeat the personal past? How can we figure the accidental (in the form, for example, of car accidents) into our sense of a future responsive to our past? How does a work of art--symmetrical, closed, meaningful)--beautify the insane desire to restore what has been lost? Students will spend about 15 hours per week reading these two novels (and critical essays), and about 6 hours per week discussing them in detail. The final paper can take the form of fiction, essay, or memoir.

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** English majors in order of seniority

**Expected Class Size:** NA

**Grading:** pass/fail only

Winter 2023

LEC Section: 01 TWR 1:00 pm - 2:50 pm John K. Limon

### **ENGL 239 (S) Zen and the Art of American Literature**

Just one hundred years ago, few Americans knew the first thing about Buddhism. But these days, who hasn't heard of (or even tried) mindfulness or

meditation? Buddhist ideas and practices now seem ubiquitous, available even in the form of smartphone apps like Headspace and Ten Percent Happier. In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today. We'll read some Buddhist American literary texts, like Ruth Ozeki's wondrous novel, *A Tale for the Time Being*. And we'll range far beyond the world of literature into other cultural domains in which Buddhism has had a deep impact, like environmentalism, psychotherapy, Western attitudes towards death and dying, and the ongoing struggle for racial justice. And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week). No prior experience with meditation is necessary. Just an open mind.

**Class Format:** This will be a lecture class, with little to no time for in-class discussion. To create opportunities for conversation and discussion, I will offer a substantial number of office hours each week as well as occasional discussion group meetings (of 15 students each; the discussion group meetings will be optional).

**Requirements/Evaluation:** Since this is an experiential course, presence is essential and will be strictly required (so after two allowed absences, each subsequent absence will lower a student's final course grade by 1/3 of a letter grade: A- to B+, for example). Other requirements: short reading responses and free-writing exercises for each class meeting, a 3-4 page midterm essay and a final 8- to 10-page essay.

**Prerequisites:** none

**Enrollment Limit:** 75

**Enrollment Preferences:** Students who preregister should fill out the Google Form at <https://tinyurl.com/ZenAmLitSpring2023> by the end of preregistration. Preference will go to students dropped from the Fall21/Spring22 sections of ENGL 239 and then by class year (seniors first).

**Expected Class Size:** 75

**Grading:** yes pass/fail option, no fifth course option

Spring 2023

LEC Section: 01 MW 7:00 pm - 8:15 pm Bernard J. Rhie

### **ENGL 24 (W) The Craft of Fiction: A Short Story Writing Intensive**

In *Bird by Bird*, Anne Lamott advises aspiring authors to approach writing in gradual steps (or, in her words, "bird by bird,") rather than being "immobilized by the hugeness of the task ahead." In this course, we too will move "bird by bird," through writing exercises that tackle the essentials of fiction. We will read the likes of Isaac Babel, Sindya Bhanoo, Octavia Butler, Anton Chekhov, Stuart Dybek, Yiyun Li, Daniel Mason, Herman Melville, Lorrie Moore, Tim O'Brien, Jim Shepard, Zadie Smith, and Ricardo Wilson to parse and then practice the techniques these authors employ to create plot, structure conflict, establish characters, and make them talk. By studying an array of voices, students will find which cadences best fit their own work. Local authors will visit our class to share ideas about their creative process with us. We'll visit Arrowhead, Melville's Pittsfield house, to see where he wrote *Moby Dick*, and as well as spend time in local museums, engaging closely with works of art there to further inspire and deepen our fiction. Beginning in Week Two, students will present their own works-in-progress, which we will discuss in a supportive workshop environment. At course's end, students will have polished a piece of short fiction, explored the beginnings of several new projects, and learned numerous techniques to keep them writing in the future. Evaluation will be based on workshop participation and classroom discussion, brief writing exercises, and a ten-page short story. We will typically meet twice a week for three hours, though occasionally the class may extend slightly beyond this timeframe given travel to and from field trip destinations.

**Requirements/Evaluation:** a 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** By application

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Sara Houghteling is the author of *{Pictures at an Exhibition}*. She is currently a lecturer in the English Department at Stanford University, where she teaches classes on the intersection of art and literature.

### **ENGL 25 (W) Journalism Today**

Even as the field is constantly changing and reshaping itself, at the heart of journalism is the desire to thoughtfully report and write stories about the world around us. This course is a bottom-up examination of what that means, from the practical skills of how to hone a story idea and conduct an interview, to the process of crafting a finished work. Throughout the class, we'll do a series of small exercises to work on specific skills, building up to a feature-length work about a subject that matters to you by the end of the month. We'll read classic work from the past, as well as some exemplary pieces from today, and question and consider the ethical, legal, and professional questions that are inherent to nonfiction work. We'll also discuss the real-world applications of these ideas with a busy schedule of guest speakers (in-person and virtual), who will talk about their work and careers in the news business. Past guests, many of them Williams alumni, have included journalists from the New York Times, the Wall Street Journal, the Washington Post, NPR, ABC News, Bloomberg, and ProPublica. This course would be quite useful for students with experience in journalism and are considering it as a career, but also for anyone who wants to understand more about how the media works, or would simply like to experiment with and try out new ways of telling stories that make a difference.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** n/a

**Enrollment Limit:** 15

**Enrollment Preferences:** If overenrolled, a statement of interest in journalism would be appreciated.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** I am a freelance writer and editor who was a reporter and OpEd editor at the Berkshire Eagle, and earlier had covered national energy policy in Washington, wrote about sports in Moscow, and worked on the international desk at Newsweek in New York.

### **ENVI 100 (S) Introduction to Weather and Climate**

**Cross-listings:** GEOS 100 ENVI 100

**Secondary Cross-listing**

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** lab assignments, a midterm, and a final exam

### **ENVI 102 (S) Introduction to Environmental Science**

Environmental Science is an interdisciplinary field that develops scientific and technical means for assessing and mitigating human impacts on the environment. This course provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere, hydrosphere, and biosphere. Students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine real-world case studies at global and local scales. Topics may include: climate change, air and water pollution, resource extraction and management, land use change, and their effects on environmental quality, biodiversity, and human health. During weekly fieldwork and laboratory sessions, students gain hands-on experience in collecting, analyzing, and interpreting data that can be used to make recommendations for addressing local environmental issues.

**Class Format:** Two 75-minute lecture/discussion sessions and one 3-hour field/laboratory session each week.

**Requirements/Evaluation:** Weekly short quizzes, three exams, lab assignments, participation

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first- and second-year students, Environmental Studies majors and concentrators

### **ENVI 103 (F) Global Warming and Environmental Change**

**Cross-listings:** ENVI 103 GEOS 103

Secondary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and wildfires, the natural processes that shape Earth's surface are tied to temperature and precipitation. People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with geography. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate. We will also visit and engage with Black communities and community leaders across New England who are grappling with the unjust distribution of resources to mitigate climate impacts and who have been disproportionate bearers of environmental risk.

**Requirements/Evaluation:** written reports from laboratories and readings, class participation, a midterm and final exam

**Cross-listings:** MAST 104 GEOS 104 ENVI 104

#### **Secondary Cross-listing**

The oceans cover three quarters of Earth's surface, yet oceanography as a modern science is relatively young: the first systematic explorations of the geology, biology, physics and chemistry of the oceans began in the late 19th century. This introduction to ocean science includes the creation and destruction of ocean basins with plate tectonics; the source and transport of seafloor sediments and the archive of Earth history they contain; currents, tides, and waves; photosynthesis and the transfer of energy and matter in ocean food webs; the composition and origin of seawater, and how its chemistry traces biological, physical and geological processes; oceans and climate change; and human impacts.

**Class Format:** three 50-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast of New England.

**Requirements/Evaluation:** lab activities (25%), homework (25%), quizzes (5%), three exams (45%)

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first year and second year students, Geosciences majors, Maritime Studies concentrators

**Expected Class Size:** 48

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **ENVI 105 (F) The Co-Evolution of Earth and Life**

**Cross-listings:** GEOS 101 ENVI 105

#### **Secondary Cross-listing**

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the

radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** one laboratory per week plus one all-day field trip

**Requirements/Evaluation:** lab work, short quizzes, midterms, an independent project, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** first year and second year students, Geosciences majors

**Expected Class Size:** 30

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)

### **ENVI 11 (W) Seven Summits: the nature of New England as observed from its hills and peaks.**

In this course we will take to the hills and mountains of our region in order to gain a better understanding of New England's amazing geographic and biological diversity. Much of this variety owes to geological processes - tectonic events, ice ages, erosion and soil formation -- that have been playing out for eons. In what ways have these forces transformed and influenced the landscapes and ecosystems that we see today? From piney ridges and spruce-clad summits to moist hardwood forests, shrubby swamps and broad valleys, the story is in the hills. In addition to covering some basic geology and meteorology, we will decipher the common trees and shrubs of the region and how they tend to form distinct ecological communities based on their different physiographic attributes. We will also take a look into the lives of the animals -- mammals, birds, and perhaps even insects! -- that inhabit these rigorous environments in winter. Lastly we will consider the role of humans, both in adapting to and influencing these landscapes. Through field trips, readings, discussions, personal observations, and assignments, you will increase your awareness and appreciation of the natural heritage of the region that you have made your recent home. More than half of the class will be spent outdoors, sometimes venturing far-afield. Therefore, students should expect to be away from campus well beyond normal class hours -- including for an overnight night trip. Most excursions will be moderate in pace and difficulty, so you need not be an avid outdoors-person to take part; if you are able to hike/showshoe 5-6 miles in winter conditions, and bring a healthy dose of enthusiasm, you should be fine. No special equipment will be necessary.

**Requirements/Evaluation:** Final project or presentation. Several written assignments in addition to a final project and presentation on a topic of the student's choosing. Final project may take a variety of forms.

**Prerequisites:** None

**Enrollment Limit:** 8

**Enrollment Preferences:** Preference will be given to students with a demonstrated interest in the subject and those without potential scheduling conflicts. A statement of interest may be required.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Drew Jones is Manager of Hopkins Memorial Forest where he coordinates research, education, and maintenance activities. Previously he has worked as a wildlife biologist and environmental educator from the southern appalachians to the north woods.

## **ENVI 12 (W) Climate Intelligence 101: accelerating the fight against climate change by making it data-driven**

In recent years a novel approach to the fight against climate change has emerged, fueled by new dramatically more detailed, up-to-date data about the exact sources of greenhouse gas emissions. Sometimes known as "climate intelligence", this new field focuses on applying data-driven optimization to these newly detailed emissions data sets. Like business intelligence, the goal of climate intelligence is to use data to multiply the impact of new policies, business strategies, and technologies. To reduce more emissions, faster. This course will begin by introducing students to this rapidly emerging new world at the intersection of climate change, data science, economics, and business. But participants should not expect a relaxed, casual winter study. This high-octane course will move fast and remain laser-focused on not merely understanding climate change, but on actually helping fix it. The course will be team taught by an interdisciplinary group of Williams alums and will cover: \* A background on emerging new emissions datasets; \* How to use big data to rapidly prototype and iterate on testable scientific hypotheses on better ways to reduce emissions; \* A lab section in which students will use novel data to develop proposed new concrete, real-world laws, regulations, businesses, NGOs, or inventions; and \* How to develop business plans or regulatory proposals to actually make your ideas happen in the real world. It is anticipated, though certainly not required, that after completion of this course many students will literally found the company or help pass the policy in their proposal. Time: about 14 h/wk. (Estimated 3h lecture, 3h lab/practicum, 8h project work).

**Requirements/Evaluation:** Short paper and final project or presentation

**Prerequisites:** None. But this course will involve manipulating a lot of data! Any of: multivar calculus, stats, econ, ability to code, and/or an entrepreneurial spirit helpful but not required. Please don't take this course if not at least already familiar with Excel.

**Enrollment Limit:** 30

**Enrollment Preferences:** If overenrolled, priority should be to students who have passed at least one computer science or econometrics course.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Gavin McCormick is founder of environmental tech nonprofit WattTime and cofounder of Climate TRACE, a coalition using AI and satellites to measure all Earth's GHG emissions. He's an Eph and has an MS in environmental econometrics from UC Berkeley.

**Attributes:** EXPE Experiential Education Courses STUX Winter Study Student Exploration

## **ENVI 205 (F) Geomorphology**

**Cross-listings:** GEOS 301 ENVI 205 ENVI 331

### **Secondary Cross-listing**

Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth's surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** lecture, three hours per week and laboratory, three hours per week

**Requirements/Evaluation:** weekly lab exercises, a research project, and a midterm and final exam

**Prerequisites:** At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** GEOS and ENVI majors

**Expected Class Size:** 18

**Grading:** yes pass/fail option, yes fifth course option

### **ENVI 214 (S) Mastering GIS**

**Cross-listings:** GEOS 214 ENVI 214

Secondary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS has opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

**Class Format:** lecture, three hours per week and laboratory, three hours per week

**Requirements/Evaluation:** weekly lab exercises, weekly quizzes, and a research project

**Prerequisites:** at least one course in Geosciences or Environmental Studies

**Enrollment Limit:** 18

**Enrollment Preferences:** Geosciences majors and Environmental Studies majors and concentrators.

**Expected Class Size:** 18

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)

### **ENVI 215 (S) Climate Changes (QFR)**

**Cross-listings:** ENVI 215 GEOS 215

Secondary Cross-listing

Paleoclimatology is the reconstruction of past climate variability and the forces that drove the climate changes. The Earth's climate system is experiencing unprecedented and catastrophic change because of anthropogenic emission of greenhouse gases and land use change. Paleoclimatology allows humans to put modern climate changes into the context of the history of this planet, and shows how and why it is unprecedented and catastrophic. Each climate event we study from Earth's past teaches us lessons on why the climate system responds to anthropogenic perturbations, what climate changes we're committed to in the future, how long-lasting they will be, and what climate consequences we can avoid if we take action and reduce greenhouse gas emissions sooner. In this course, we will discuss the major mechanisms that cause natural climate variability, how climate of the past is reconstructed, and how climate models are used to test mechanisms that drive climate variation. With these tools, you will analyze and interpret data and model simulations from climate events from Earth's history, and apply these findings to anthropogenic climate changes happening now and that are projected to happen in the future. Laboratories and homework will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for

the Geosciences major.

**Class Format:** This class has three scheduled lectures per week, and one lab meeting per week which will consist of field excursions, lab exercises, problem solving and discussion

**Requirements/Evaluation:** lab exercises and homework (25%), three quizzes (50%), and a final project (25%)

**Prerequisites:** 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor

**Enrollment Limit:** 24

**Enrollment Preferences:** Geosciences majors and Environmental Studies majors and concentrators and Maritime Studies concentrators

**Expected Class Size:** 16

### **ENVI 220 (S) Field Botany and Plant Natural History**

**Cross-listings:** ENVI 220 BIOL 220

#### **Secondary Cross-listing**

This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. Lectures focus on the evolution of the land plants, the most recent and revolutionary developments in plant systematics and phylogeny, the cultural and economic uses of plants and how plants shape our world. The course covers the role of plants in ameliorating global climate change, their importance in contributing to sustainable food production and providing solutions to pressing environmental problems. Throughout we emphasize the critical role of biodiversity and its conservation. The labs cover field identification, natural history and the ecology of local species.

**Class Format:** both field and indoor laboratories

**Requirements/Evaluation:** based on two hour exams, field quizzes, a final project, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** Biology majors, and Environmental Studies majors & concentrators

**Expected Class Size:** 24

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** satisfies the distribution requirement for the Biology major

**Materials/Lab Fee:** There is a charge for the lab manual (\$20); the sketchbook (\$5) and hand lens (\$20) can be self-provided or purchased from the department

### **ENVI 222 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WS)**

**Cross-listings:** GEOS 221 ENVI 222 LEAD 221

#### **Secondary Cross-listing**

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** weekly papers (2 - 5 pages in length) and a final oral presentation

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** sophomores, Geosciences and Environmental Studies juniors and seniors

### **ENVI 229 (S) Environmental History**

**Cross-listings:** ENVI 229 HIST 264

#### **Primary Cross-listing**

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

**Class Format:** with field trips

**Requirements/Evaluation:** several short essays; final research project

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** Environmental Studies majors and concentrators; History majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

### **ENVI 250 (F) Environmental Justice (DPE)**

**Cross-listings:** STS 250 ENVI 250

#### **Primary Cross-listing**

How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

**Requirements/Evaluation:** several short essays, final essay

**Prerequisites:** ENVI 101 or permission of the instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** juniors, seniors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

STS 250 (D2) ENVI 250 (D2)

**Difference, Power, and Equity Notes:** This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. This is a service-based learning course, and students will hone skills to address environmental injustices.

**Not offered current academic year**

### **ENVI 255 (F) Environmental Observation**

**Cross-listings:** GEOS 255 ENVI 255

#### **Secondary Cross-listing**

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information.

We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** Weekly labs, four quizzes, and a final project

**Prerequisites:** at least one prior course in GEOS or ENVI

**Enrollment Limit:** 20

**Enrollment Preferences:** sophomores, then GEOS majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

### **ENVI 312 (F) Communities and Ecosystems (QFR)**

**Cross-listings:** ENVI 312 BIOL 302

Secondary Cross-listing

An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments as well as "big-data" analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

**Class Format:** six hours per week

**Requirements/Evaluation:** lab reports, a midterm exam, a term project presentation, and a final project paper

**Prerequisites:** BIOL/ENVI 203 or 220

**Enrollment Limit:** 28

**Enrollment Preferences:** Biology majors and Environmental Studies majors and concentrators

**Expected Class Size:** 24

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** satisfies the distribution requirement for the Biology major

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **ENVI 351 (F)(S) Marine Policy (DPE) (WS)**

**Cross-listings:** MAST 351 ENVI 351 PSCI 319

Secondary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense

population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

**Class Format:** This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

**Requirements/Evaluation:** Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

**Prerequisites:** none

**Enrollment Limit:** 23

**Enrollment Preferences:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Expected Class Size:** 22

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

**Writing Skills Notes:** Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

**Difference, Power, and Equity Notes:** Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

## **ENVI 402 (F) Environmental Planning Workshop: Community-Based Project Experience**

**Cross-listings:** ENVI 402 AMST 406

### **Primary Cross-listing**

In this class you apply your education and training to effect social and environmental change in the Berkshires. Students work in small collaborative groups to address pressing issues facing the region. Class teams partner with community organizations and local & regional governments to solve real world problems. In this class you learn while doing and give back to the community. The field of environmental planning encompasses the *built environment*, such as housing, zoning, transportation, renewable energy, waste management, neighborhood design; the *natural environment*, such as open space, farmland, habitat and species protection, natural resource protection, air and water pollution and climate change, and the *social environment*, such as racial zoning, environmental racism, food security, and healthy vs toxic communities. Skills taught include basic GIS mapping, developing and conducting surveys, interview techniques, project management, and presentations. The class culminates in project presentations to the client organizations. The hour conference section is time for team project work, client meetings and team meetings with the professor. Recent project topics: <https://ces.williams.edu/environmental-planning-papers/>

**Class Format:** The weekly conference session (1 hour) is dedicated time for team project work including client meetings and meetings with professor.

**Requirements/Evaluation:** Response papers (three 1-page papers), in-class exercises, class discussion, small group work, public meeting

attendance, project work, final report (due in segments during semester) and final presentation.

**Prerequisites:** ENVI 101 recommended; open to juniors and seniors.

**Enrollment Limit:** 16

**Enrollment Preferences:** Environmental Studies majors and concentrators, American Studies majors, Maritime Studies concentrators.

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Course fulfills senior seminar requirement for Environmental Studies Major and Environmental Studies Concentration and Maritime Studies Concentration. American Studies Space & Place elective. Course is an Environmental Studies Concentration elective (ENVI Policy and ENVI Humanities, Arts + Social Science) and Environmental Studies major elective.

### **GEOS 100 (S) Introduction to Weather and Climate**

**Cross-listings:** GEOS 100 ENVI 100

**Primary Cross-listing**

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** lab assignments, a midterm, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** first year and second year students, Geosciences majors

**Expected Class Size:** 40

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GEOS 100 (D3) ENVI 100 (D3)

**Attributes:** ENVI Natural World Electives EXPE Experiential Education Courses GEOS Group A Electives - Climate + Oceans

**Not offered current academic year**

### **GEOS 101 (F) The Co-Evolution of Earth and Life**

**Cross-listings:** GEOS 101 ENVI 105

**Primary Cross-listing**

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related

nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** one laboratory per week plus one all-day field trip

**Requirements/Evaluation:** lab work, short quizzes, midterms, an independent project, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** first year and second year students, Geosciences majors

**Expected Class Size:** 30

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GEOS 101 (D3) ENVI 105 (D3)

**Attributes:** ENVI Natural World Electives EXPE Experiential Education Courses GEOS Group B Electives - Sediments + Life

Not offered current academic year

### **GEOS 102 (S) An Unfinished Planet**

The Earth is a work-in-progress, an evolving planet whose vital signs--as expressed by earthquakes, volcanic eruptions, and shifting plates--are still strong. In a geological time frame, nothing on Earth is permanent: ocean basins open and close, mountains rise and fall, continental masses collide and pull apart. There is a message here for all of us who live, for an infinitesimally brief time, on the moving surface of the globe. This course uses the plate tectonics model--one of the fundamental scientific accomplishments of the past century--to interpret the processes and products of a changing Earth. The emphasis will be on mountain systems (on land and beneath the oceans) as expressions of plate interactions. Specific topics include the rocks and structures of modern and ancient mountain belts, the patterns of global seismicity and volcanism, the nature of the Earth's interior, the changing configurations of continents and ocean basins through time, and, in some detail, the formation of the Appalachian Mountain system and the geological assembly of New England. Readings will be from a physical geology textbook, a primary source supplement, selected writings of John McPhee, and references about the geology of the Northeast. This course is in the Solid Earth group for the Geosciences major.

**Class Format:** lecture three hours per week and lab (several involving field work) two hours per week; one required all-day field trip on the last Monday of the semester to the Connecticut Valley and the highlands of western Massachusetts

**Requirements/Evaluation:** three hour-tests and weekly lab work

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** first year and second year students, Geosciences majors

**Expected Class Size:** 40

**Grading:** yes pass/fail option, no fifth course option

### **GEOS 103 (F) Global Warming and Environmental Change**

**Cross-listings:** ENVI 103 GEOS 103

#### **Primary Cross-listing**

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and wildfires, the natural processes that shape Earth's surface are tied to temperature and precipitation. People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with geography. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate. We will also visit and engage with Black communities and community leaders across New England who are grappling with the unjust distribution of resources to mitigate climate impacts and who have been disproportionate bearers of environmental risk.

**Requirements/Evaluation:** written reports from laboratories and readings, class participation, a midterm and final exam

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first year and second year students, Geosciences majors and Environmental Studies majors and concentrators

**Expected Class Size:** 48

**Grading:** yes pass/fail option, no fifth course option

### **GEOS 104 (F) Oceanography**

**Cross-listings:** MAST 104 GEOS 104 ENVI 104

#### **Primary Cross-listing**

The oceans cover three quarters of Earth's surface, yet oceanography as a modern science is relatively young: the first systematic explorations of the geology, biology, physics and chemistry of the oceans began in the late 19th century. This introduction to ocean science includes the creation and destruction of ocean basins with plate tectonics; the source and transport of seafloor sediments and the archive of Earth history they contain; currents, tides, and waves; photosynthesis and the transfer of energy and matter in ocean food webs; the composition and origin of seawater, and how its chemistry traces biological, physical and geological processes; oceans and climate change; and human impacts.

**Class Format:** three 50-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast of New England.

**Requirements/Evaluation:** lab activities (25%), homework (25%), quizzes (5%), three exams (45%)

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first year and second year students, Geosciences majors, Maritime Studies concentrators

**Expected Class Size:** 48

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **GEOS 202 (F) Mineralogy**

This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in the major, it provides a systematic framework for the study of minerals--Earth's building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography through element distribution and crystal chemistry to the phase relations, compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical emission spectroscopy; wavelength- and energy-dispersive x-ray spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section. This course is in the Solid Earth group for the Geosciences major.

**Class Format:** Lecture three hours per week and laboratory three hours per week; independent study of minerals in hand specimen; one afternoon field trip

**Requirements/Evaluation:** one hour test, lab work, and a final exam

**Prerequisites:** one 100-level GEOS course or permission of instructor

**Enrollment Limit:** 14

**Enrollment Preferences:** sophomores and juniors planning to take GEOS 301, 302 and/or 303 in the subsequent year

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)

**Attributes:** EXPE Experiential Education Courses GEOS Group C Electives - Solid Earth MTSC Courses

**Not offered current academic year**

### **GEOS 210 (F)(S) Oceanographic Processes**

**Cross-listings:** GEOS 210 MAST 211

**Secondary Cross-listing**

Part of the Williams-Mystic Coastal and Ocean Studies Program, this course provides an introduction to physical, geological, chemical, and biological oceanography. Using local field sites as well as places visited on field seminars, we will investigate why the Earth has oceans, why they are salty, how they move and flow, reasons for sea level change on both long and short timescales, and how our oceans interact with the atmosphere to control global climate. We will emphasize societal interactions with the ocean, and will consider coastal processes including land loss. We will apply an environmental justice and anti-racist lens to our discussions. Field work will take place on shores in southern New England, as well as during field seminars on the Atlantic ocean, the West Coast and the Mississippi River Delta. This course is in the Oceans and Climate group for the Geosciences major.

**Class Format:** Flipped classroom will focus on active learning using data-based exercises. Mini-symposia will involve student research and discussion.

**Requirements/Evaluation:** graded lab exercises, mini-symposium participation, and a research project

**Prerequisites:** none

**Enrollment Limit:** 24

**Enrollment Preferences:** none

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** This course is taught at our Mystic Seaport campus. Students must be enrolled in the Williams-Mystic Coastal and Ocean Studies Program.

**Distributions:** (D3)

### **GEOS 212 (S) Paleobiology**

**Cross-listings:** GEOS 212 BIOL 211

#### **Primary Cross-listing**

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. We will explore how, why, when, and where fossils form and learn about the major groups of fossilized organisms and how they have changed through time. In addition, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** One day field trip to the the Paleozoic of New York State

**Requirements/Evaluation:** Weekly lab assignments, frequent short quizzes and writing assignments, and a final project with a written and oral presentation component.

**Prerequisites:** any 100-level GEOS course or BIOL 102, 203 or 205

**Enrollment Limit:** 24

**Enrollment Preferences:** sophomore and junior GEOS majors

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** does not satisfy the distribution requirement for the Biology major

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **GEOS 214 (S) Mastering GIS**

**Cross-listings:** GEOS 214 ENVI 214

**Primary Cross-listing**

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS has opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

**Class Format:** lecture, three hours per week and laboratory, three hours per week

**Requirements/Evaluation:** weekly lab exercises, weekly quizzes, and a research project

**Prerequisites:** at least one course in Geosciences or Environmental Studies

**Enrollment Limit:** 18

**Enrollment Preferences:** Geosciences majors and Environmental Studies majors and concentrators.

**Expected Class Size:** 18

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**GEOS 215 (S) Climate Changes (QFR)**

**Cross-listings:** ENVI 215 GEOS 215

**Primary Cross-listing**

Paleoclimatology is the reconstruction of past climate variability and the forces that drove the climate changes. The Earth's climate system is experiencing unprecedented and catastrophic change because of anthropogenic emission of greenhouse gases and land use change. Paleoclimatology allows humans to put modern climate changes into the context of the history of this planet, and shows how and why it is unprecedented and catastrophic. Each climate event we study from Earth's past teaches us lessons on why the climate system responds to anthropogenic perturbations, what climate changes we're committed to in the future, how long-lasting they will be, and what climate consequences we can avoid if we take action and reduce greenhouse gas emissions sooner. In this course, we will discuss the major mechanisms that cause natural climate variability, how climate of the past is reconstructed, and how climate models are used to test mechanisms that drive climate variation. With these tools, you will analyze and interpret data and model simulations from climate events from Earth's history, and apply these findings to anthropogenic climate changes happening now and that are projected to happen in the future. Laboratories and homework will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

**Class Format:** This class has three scheduled lectures per week, and one lab meeting per week which will consist of field excursions, lab exercises, problem solving and discussion

**Requirements/Evaluation:** lab exercises and homework (25%), three quizzes (50%), and a final project (25%)

**Prerequisites:** 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor

**Enrollment Limit:** 24

**Enrollment Preferences:** Geosciences majors and Environmental Studies majors and concentrators and Maritime Studies concentrators

**Expected Class Size:** 16

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**GEOS 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WS)**

**Cross-listings:** GEOS 221 ENVI 222 LEAD 221

**Primary Cross-listing**

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** weekly papers (2 - 5 pages in length) and a final oral presentation

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** sophomores, Geosciences and Environmental Studies juniors and seniors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (WS)

**Attributes:** ENVI Environmental Policy EXPE Experiential Education Courses GEOS Group A Electives - Climate + Oceans

**Not offered current academic year**

**GEOS 255 (F) Environmental Observation**

**Cross-listings:** GEOS 255 ENVI 255

### Primary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** Weekly labs, four quizzes, and a final project

**Prerequisites:** at least one prior course in GEOS or ENVI

**Enrollment Limit:** 20

**Enrollment Preferences:** sophomores, then GEOS majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

### GEOS 301 (F) Geomorphology

**Cross-listings:** GEOS 301 ENVI 205 ENVI 331

### Primary Cross-listing

Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth's surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** lecture, three hours per week and laboratory, three hours per week

**Requirements/Evaluation:** weekly lab exercises, a research project, and a midterm and final exam

**Prerequisites:** At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** GEOS and ENVI majors

**Expected Class Size:** 18

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GEOS 301 (D3) ENVI 205 (D3) ENVI 331 (D3)

**Attributes:** AMST Space and Place Electives ENVI Natural World Electives EVST Environmental Science EXPE Experiential Education Courses GEOS Group B Electives - Sediments + Life

Not offered current academic year

### **GEOS 302 (S) Sedimentology (WS)**

Sediments and sedimentary rocks are the book in which Earth's history is recorded, where we read the stories of ancient oceans and continents, and how life evolved. Sand and dirt preserve information about the rocks that were eroded to form them, the fluids and forces that transported them, the ways in which they were deposited, and the ecosystems that they supported. Understanding sediments is also fundamental to society, for many kinds of civil engineering as well as pollution and environmental remediation. We will investigate sediment composition, fluid mechanics, bedforms, and depositional environments, building to an integrated understanding of erosion, deposition, and changes over time. We will also acknowledge and examine the roles that racism and colonialism have played in sedimentologic research. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** lecture/discussion three hours per week and laboratory three hours per week; field trips: two half-day and one all-day

**Requirements/Evaluation:** lab and field exercises, writing assignments, participation in discussions

**Prerequisites:** At least one course in GEOS Group B (Solid Earth) AND one course in GEOS Group C (Sediments and Life); or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Geosciences majors

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (WS)

**Writing Skills Notes:** Weekly 2-3 page writing assignments will be thoroughly edited for style, grammar, and syntax; each student will compile their papers as a growing body of work, and each new assignment will be read and edited in the context of previous submissions.

**Attributes:** EXPE Experiential Education Courses GEOS Group B Electives - Sediments + Life MAST Interdepartmental Electives

### **HIST 12 (W) Introduction to Hand Bookbinding**

This class will offer a fast-paced, workshop-style introduction to bookbinding, starting with single sheet structures and working through several codex structures with a variety of cover-to-text-block attachments. Throughout, our benchwork-folding, cutting, sewing, adhering-will be grounded in the historical context of the craft and accompanied by readings and online resources, as well as discussion of material and structure, and the implications of both for the conservation and preservation of books. While the course will be focused on Western bookbinding techniques, we'll also touch on other cultural binding traditions with an eye toward understanding the comparative youth of Western book crafts. Class will meet three times a week for three hours, including a weekly visit to Special Collections to examine historical examples of bindings. Students should be prepared to spend significant time outside of class exploring the world of book arts and book history online, and developing and completing independent binding projects, including a set book for the final project. The course will conclude with an exhibition of student work.

**Requirements/Evaluation:** Completion of in-class and independent binding projects, 1-2 brief presentations, and capstone binding of set book

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Preference will be given to students who have little or no previous bookbinding experience, and to those who express early and enthusiastic interest.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Cara Schlesinger '91 is an independent bookbinder and conservator in New York City. She has worked at the Metropolitan Museum of Art and Columbia University as well as with private clients and rare book specialists around the country.

**Materials/Lab Fee:** \$155

### **HIST 17 (W) The 16th- to 17th-Century World of Printed Texts and Images**

Imagine yourself back in a time without the computer technology that enables you to create, print out or distribute instantaneously innumerable illustrated texts with the click of a few buttons. In this multifaceted course, we will explore the 16th-17th-century world of printed books and images. Your eyes will be trained to recognize and appreciate the primary techniques in which printed images were made at this time. While becoming acquainted with the ways in which texts were printed by hand, you will learn how to examine rare books and evaluate how they were put together. Finally, you will be taught to think like a savvy publisher, endeavoring to earn a living by profiting from the rapidly expanding, international market for a diverse range of illustrated texts. In order to achieve these goals and fully appreciate what entrepreneurial artists, printers, and publishers accomplished centuries ago, lectures and assigned readings will be complemented by visits to local print collections and the regular, hands-on consultation of illustrated rare books in the Chapin Library. Given the underlying premise that one learns by doing, we will usually meet four times a week, (2 hours per session) primarily in the Chapin library. For your final project, you will be expected to select an illustrated book from the Chapin collection and prepare a presentation on it for the class in which you highlight the topics addressed during the lectures. Evaluation will be based upon this presentation, in addition to class participation. I look forward to delving into the fascinating world of hand-crafted books and prints with you.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** randomly

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Karen Bowen is an art historian, specialized in the study of prints, printmaking, and book illustration in the early modern period. She is currently preparing a book on the European print trade in the 16th and 17th centuries.

### **HIST 19 (W) Fresh Purpose for Old Paper: Curating Special Collections in the 21st Century**

How do our library's collections represent the past and present of the many Williams communities? What makes a library's books and manuscripts worth saving? What should we collect, and how are those decisions made? Whose voices are missing? This course will examine the role of Special Collections in the 21st century, going behind the scenes of the Chapin Library and College Archives. We will first consider the library's existing collections, focusing on what makes these books and manuscripts valuable -- and not just in terms of their cost. We'll consider how historical events are documented in primary sources, and how those documents can support teaching and research. We'll also learn about the market for rare books and manuscripts and consult with booksellers and curators at a peer institution. For the final project, students will propose the acquisition of a new collection of books or manuscripts for the Chapin Library or the College Archives. We'll spend the final week of class presenting to a curatorial panel, who will assess the proposals to purchase material for our collections.

**Requirements/Evaluation:** final project or presentation. collection development proposal, class presentation to library staff (during normal course meeting times)

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** random, if course is oversubscribed

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Anne Peale, Special Collections Librarian at Williams, graduated from Dartmouth College and studied Material Cultures and Book History at the University of Edinburgh; she recently completed her PhD in Historical Geography.

### **HIST 23 (W) Maps: Past, Present, & Future**

This class will examine how antique maps, created in the 15th to 20th centuries, provide lessons for modern-day map-making. We will start by considering the purposes of antique maps, especially those made in the 15th and 16th centuries by both European and Islamic mapmakers: why were they made, by whom and by what process? We will discuss "what is a map?", as well as principles of information design, what makes a map good, and lessons that can be drawn from antique maps. Students will learn about the multitude of online resources available for collecting and studying antique maps, including collections at Williams College, and, in their first group project, will work in teams of two to four to make a presentation about an antique map or group of maps that represent the considered lessons. Throughout the course, we will pivot back and forth between antique maps and modern-day maps. We will consider the concept of strategy, which defines an organization, and the various purposes of modern-day geospatial data science, which derives from strategy, in both for-profit and nonprofit organizations. We will review and discuss the tools used in geospatial data science, including analytical platforms like ArcGIS and MapBox, languages like Python, and data sources like the US Census, the HERE road network and the USGS Earth Explorer. We will review and discuss several case studies about how businesses and nonprofits utilize geospatial data science to advance their strategy. In the second group project, students will evaluate a modern-day application of geospatial data science, articulating the lessons from antique maps present in these modern-day maps, as well as any new lessons. Groups will work together to make a presentation about a modern-day map they have studied or about a modern-day map they have made themselves. Topics for group projects could include nonprofit topics like gerrymandering, redlining and climate change or for-profit topics like site selection and advertising effectiveness.

**Requirements/Evaluation:** Discussion and two group projects

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** Mix of students with an interest in history, art, and science

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Tom Paper is a Williams grad '84 and Stanford MBA, Managing Partner of Webster Pacific, a strategic analytics consultancy; he is also VP of the California Map Society & Founder of The Digital Gallery, a website of exhibits of antique maps and art.

### **HIST 264 (S) Environmental History**

**Cross-listings:** ENVI 229 HIST 264

**Secondary Cross-listing**

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

**Class Format:** with field trips

**Requirements/Evaluation:** several short essays; final research project

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** Environmental Studies majors and concentrators; History majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **HIST 27 (W) MinCo in Context: Coalition Building and Student Social Movements Since the 1960s**

Are you curious about how MinCo (Minority Coalition) came into being at Williams College? Do you want to know how meeting minutes, handwritten signs, and oral histories can tell us about how students have built coalitions to pursue and achieve strategic goals in at-times hostile circumstances? Do you want to learn how the creation and flourishing of MinCo fits into a broader history of social movements within higher education? And what is a coalition, anyways? If your answer to any of these questions is yes, then this class is for you! Through a hands-on approach focused on working with primary sources held in the special collections and college archives at Williams, this course invites students not only to learn about MinCo history, but also to do the work of public historians. Along with individual assignments in which students engage with archival sources and current scholarship, the final assignment will be team-produced public history projects that mobilize primary sources to tell a compelling history of coalition-building in MinCo history. The course meets 2 times per week for 3 hours each session, and will include a substantial amount of time conducting research in the college archives.

**Requirements/Evaluation:** Short paper and final project or presentation. Assignments will include individually written object labels (primary source descriptions) and secondary source analysis, as well as a public history project situating a small number of primary sources in historical context and explaining their significance within MinCo history.

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Student Survey. First priority will be given to students who are current leaders in MinCo groups. Second priority will be given to students who are members of MinCo groups. Third priority will be any student interested in the topic.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Aly W Corey, PhD is the Associate Director for Inclusive Learning Environments at the Davis Center. Aly's research and teaching expertise is in critical ethnic studies, trans studies, and U.S. musical culture.

### **HIST 28 (W) Introduction to Public History**

This course will introduce you to the expansive world of public history: the ways in which history is put to work in the world beyond an academic setting. Our course will explore public history's primary ideas, questions, and the practical concerns confronting public historians in a variety of professional and institutional settings. The course will center around key ideas and themes that inform the world of public history, including memory, shared authority, decolonization, audiences and audience engagement, racial justice, historic preservation, and museum interpretation. To explore public history's manifestations beyond the classroom, this class will include field trips and site visits to museums, monuments, historic sites and preserved structures, and other public history institutions in the Berkshires and western Massachusetts and incorporate guest speakers into our class meetings to secure a wide-ranging introduction to this field and its key concepts. Our class is structured to be reflexive, meaning we will learn about how public history has evolved over time and grapple with the way the field's history frames contemporary social and political issues confronting public historians today. A minimum of 10 hours of time per week will be spent in the classroom, including time at field trips and site visits, and an average of 15-20 hours per week will be spent on outside-of-class work, including travel to and from field visit sites. In addition to travel, time spent outside of class will be used to work on course assignments and complete weekly readings of significant past and present literature in the field. For your final evaluation, you will identify a set of "best practices" with your peers for public historians and choose one of our field site visits to write an exhibit or site

review. Ultimately, by the end of this course you will have a strong grounding in the field of public history and formulated your own understanding of what constitutes public history.

**Requirements/Evaluation:** Short paper and final project or presentation. Students will individually write an exhibition or site review that addresses each site's particular history, how its relates to its contemporary administration, and how the site approaches key concepts in public history like audience engagement, social and racial equity, and connects the public to major historical questions/inquiry.

**Prerequisites:** N/A

**Enrollment Limit:** 30

**Enrollment Preferences:** Students will be selected based on seniority and need for a history course to fulfill academic requirements of the institution.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Brian Whetstone is an urban historian, public historian, and historic preservationist whose teaching promotes student engagement with the ways history informs our understanding of contemporary social and political struggles.

### **HIST 352 (F)(S) American Maritime History (DPE) (WS)**

**Cross-listings:** HIST 352 MAST 352

**Secondary Cross-listing**

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

**Class Format:** Seminars, discussions, and field seminars

**Requirements/Evaluation:** Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

**Prerequisites:** None

**Enrollment Limit:** 27

**Enrollment Preferences:** If course over-enrolls, preference will be given to sophomores and juniors

**Expected Class Size:** 22

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Offered only at Mystic Seaport

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 352 (D2) MAST 352 (D2)

**Writing Skills Notes:** Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

### **JAPN 12 (W) The Art of Writing: Introduction to Arabic and Japanese Calligraphy**

Calligraphy is an art of elegant penmanship that is closely connected to philosophy, spirituality, literature, and poetry. This course introduces students to two different traditions of calligraphy, namely those of Arabic and Japanese, exploring their distinct characters as well as similarities. How has master-apprentice learning shaped each? How have these artforms developed in modern times? How are different aesthetics valued in each? And what are the themes and ideas shared between these two different traditions? At the theoretical level, students will explore historical, cultural, philosophical, and spiritual backgrounds of Arabic and Japanese calligraphy as well as material dimensions of the two traditions-how inks, pens, brushes, and paper are produced. At the practical level, students will be introduced to the execution of lettering with traditional tools, exploring self-expression through the art of writing. Students will be encouraged to consider how balance can be found in that which comprises both order and chaos, form and obscurity, and word and image. In class (6 hours per week), students will engage in hands-on activities, learning the basic techniques of Arabic and Japanese calligraphy. Class time also includes short lectures on theoretical and practical aspects of the two traditions. Through this course, students will learn to use calligraphy as a meditation tool, one that cultivates inner focus and attention to breathing and bodily movements. Outside class, students will be required to practice daily ten-minute calligraphy meditation sessions. Evaluation for this course is based on attendance at each session, a final calligraphy work, and in-class presentation on the piece. No previous knowledge of Arabic/Japanese or experience with calligraphy is required for this course. The class is open to students interested in both/either of two calligraphy traditions.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** n/a

**Enrollment Limit:** 10

**Enrollment Preferences:** Majors in Arabic Studies and the Department of Asian Languages, Literatures, and Cultures if the course is overenrolled.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Eriko Okamoto is a research associate in Arabic Studies at Williams College. She has studied Arabic calligraphy in the US and the Middle East and has trained in Japanese calligraphy for over 20 years.

### **JAPN 25 (W) Exploring Kyoto Culture: How 1200 years of cultural history continues throughout today**

Kyoto, the former imperial capital of Japan has 1200 years of history. It is referred to as Japan's cultural treasure house and thrives on its ancient heritage in architecture, gardens, religion, performing and culinary arts and craftsmanship. Yet Kyoto's appearances can be deceiving. You will find a monumental temple designated as a UNESCO World Heritage site under the shadow of ultramodern high-rising buildings. There is an enigmatic quality to the city with this juxtaposition of old and new. This unresolved tension between modernization and tradition is Kyoto's fascination. The purpose of this travel course is to explore the cultural history of Kyoto and how it is perpetuated and transformed in a modern era. Students will visit various sites and artists/artisans in Kyoto. Through these experiences, they will arrive at their own conclusion about what it means to sustain tradition while pursuing modernization and innovation. The first week of the course will be conducted on campus. Students conduct research in pairs to acquire additional in-depth knowledge on one selected area of Kyoto's art/craftsmanship. For the second and third week, the class will travel to Kyoto. We will first explore the city of Kyoto to develop an idea of how its cultural history progressed from courtly culture in the Heian period, to samurai tradition in the Medieval periods, and aspects of religious ceremonies, Noh Theater and tea ceremonies. We will also visit four to five artisan/artist studios, including hands on experiences at some studios. Students are expected to participate in all the scheduled activities, keep a daily journal, and participate in daily reflections. At the end of the Kyoto visit, students will summarize their reflections and present their views on Japanese traditional and modern art/craft/performance to the local community and to the Kyoto artists/artisans at a public forum. The class will return to campus towards the end of the third week.

**Requirements/Evaluation:** post daily blog to the course website and a public PowerPoint presentation in Kyoto

**Prerequisites:** none

**Enrollment Limit:** 8

**Enrollment Preferences:** personal statements and completion of course(s) related to Japan

**Expected Class Size:** 8

### **LATS 341 (S) Performing Masculinity in Global Popular Culture (DPE)**

**Cross-listings:** AMST 358 THEA 341 LATS 341 WGSS 347 SOC 340

#### **Secondary Cross-listing**

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

**Requirements/Evaluation:** masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** a short statement of interest will be solicited

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 358 (D2) THEA 341 (D2) LATS 341 (D2) WGSS 347 (D2) SOC 340 (D2)

**Difference, Power, and Equity Notes:** This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

### **LEAD 16 (W) Effective Advocacy and Public Speaking**

Clear and persuasive public speaking, whether before a small group or a much larger audience, is essential to effective leadership and career development. This course is designed to enhance a student's ability to develop a position on a significant issue and to advance and defend that position orally. This course will give students, either singly or in pairs, numerous opportunities to make presentations and receive immediate feedback from the Instructors. The course will consist of three sessions per week lasting approximately 120-150 minutes, with an initial organizational session to select a topic to be presented or debated. Students may choose the method of their presentation, and each students may select their own presentation

topic or choose from a list of suggested issues.

**Class Format:** Class sessions will be devoted to developing oral skills (3-5 minutes each), such as telling a story, giving a political speech, making a sales pitch, and explaining an abstract idea or concept. Students will also have the opportunity to engage in mock job interviews with representatives from the fields of education, medicine, law and finance. As a capstone project, the students will present on a topic of their sole selection for 7-9 minutes and answer questions from students and instructors.

**Requirements/Evaluation:** oral presentations of 3-10 minutes throughout the course, but no less than once a week; listen to and critique each other's presentations throughout the course

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** preference to seniors

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** David Olson and Stephen Brown are experienced trial lawyers and Robert Schwed is an experienced business lawyer. They taught this course in January 2022 as LEAD-16.

**Attributes:** EXPE Experiential Education Courses

Winter 2023

LEC Section: 01 MWR 1:00 pm - 3:50 pm David C. Olson, Steve Brown

### **LEAD 17 (W) Mindful Leadership**

Why should anyone be led by you? What are you doing to strengthen your ability to speak truth to power, to embody compassion, and to perform at your best? Mindfulness can shift our baseline level of happiness, help us to navigate upheaval in our lives, and enable us to lead through uncertainty. In this experiential learning course-blending (still and moving) meditation with leadership development-you will heighten your ability to navigate intense emotions, develop strategies for working with your inner critic, explore impermanence (yes, we are all going to die), cultivate lovingkindness, and elevate your ability to perform (we can all do better...especially if we can harness flow). You will also explore storytelling, decision-making, debriefing, embodied dance, the enneagram, pivotal life moments, and polarities. Ready to drop in, breathe, and show up fully? While exploring and integrating, you will co-facilitate an experience for the group that you believe will contribute to our collective learning. You will co-facilitate the debrief of another student-led exercise-to draw out lessons learned. Near the end of the course, you will also contribute to lead a session for the Williams community. Through readings, podcasts, and videos we will be inspired by thinkers such as: Amy Edmondson, Jim Detert, Zander Grashow, Kelly Lewis, and Christopher Alexander as well as mindfulness practitioners such as: Jack Kornfield, Mark Coleman, Ruth King, and Sharon Salzberg. You'll also venture off-campus with your pod to explore the Clark and MASS MoCA.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** open to all students; no previous mindfulness, leadership development, nor movement experience required

**Enrollment Limit:** 16

**Enrollment Preferences:** statement of interest (share a bit about yourself and your interest in the course)

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Jamie coaches changemakers to do what brings them alive. He accompanies executive committees and startup teams to explore their way of being (what must you believe to lead differently) and effectiveness (we can all do better). He is an Integral master coach, a certified mindfulness teacher--and he's fortunate to have worked with organizations such as: The Gates Foundation, Google, Greenpeace, Purpose, MIT Solve and the Williams ski teams. Still curious? Learn more: [www.jamiehunt.org](http://www.jamiehunt.org)

### **LEAD 18 (W) Wilderness Emergency Care**

This Winter Study course is for students who would like to participate in a 9 day, 72 hour comprehensive hands on in-depth look at the standards and skills of dealing with wilderness based medical emergencies. Topics that will be covered include, Response and Assessment, Musculoskeletal Injuries, Soft Tissue Injuries, Environmental Injuries, and Survival Skills. Additional topics, such as CPR, are also included. Students will be required to successfully complete the written and practical exams, and not miss any of the 9 classes to receive credit and WFR/CPR certification. The course runs 9 consecutive days straight from 9AM--5PM. The instructor will be provided by SOLO (Stonehearth Open Learning Opportunities).

**Requirements/Evaluation:** written and practical exam

**Prerequisites:** none

**Enrollment Limit:** 22

**Enrollment Preferences:** submit a statement of purpose to the course sponsor, WOC Director, explaining why they want to take the course and hope to gain from the experience

**Grading:** pass/fail only

**Materials/Lab Fee:** \$450

### **LEAD 22 (W) Ski Patrol: Outdoor Emergency Response**

The course will teach and develop the technical proficiency and leadership skills required to effectively and efficiently administer emergency medical care in outdoor environments. Successful completion of written and practical exams, along with demonstrating ski/snowboard proficiency, can lead to certification as a member of the National Ski Patrol. The course is based upon implementing National Ski Patrol's Outdoor Emergency Care and Outdoor Emergency Transport curricula in a hands-on, "on-hill" environment. Students will spend approximately 12 hours per week learning and practicing Ski Patrol medical care and rescue techniques. Specifically, students will develop skills to recognize and provide emergency care for situations they learned about in prior first responder training (Outdoor Emergency Care, Wilderness First Responder, or Emergency Medical Technician): - Wounds and Burns - Environmental Emergencies (e.g., frostbite, hypothermia, heat exhaustion) - Musculoskeletal Trauma (e.g., breaks, strains, sprains, etc.) - Shock, Respiratory Emergencies, Poisoning, Substance abuse emergencies - Medical emergencies (e.g., heart attack, stroke, seizures, insulin shock, etc.) In the outdoor environment, students will practice the use of various types of splints, spinal motion restriction, bandaging, rescue/transport equipment, methods of extrication, use of oxygen, organization/prioritization of rescue tasks, and how to deal with unusual emergencies such as mass casualty incidents. Emphasis will be placed on the Leadership Skills required to handle complex and stressful emergency situations. Each week there will be ~12 hours of practical outdoor work at Jiminy Peak and on campus. Exact class timing (morning vs. afternoon; 4 vs. 6 hours per meeting; etc.) will be determined based on student and instructor availability. Additional homework/practice may be required. Class attendance is mandatory. The course includes certification in CPR.

**Requirements/Evaluation:** Written and practical exams

**Prerequisites:** Outdoor Emergency Care, Wilderness First Responder, or Emergency Medical Technician

**Enrollment Limit:** 16

**Enrollment Preferences:** The course will be limited to 15 students, chosen on the basis of ski/snowboard interest and ability. Preference given to students who completed the Outdoor Emergency Care PE class in the preceding fall term.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** An alumnus of Williams ('85) with a PhD in Materials Science, Tom Feist worked for General Electric, taught Chemistry at Williams, and has ski patrolled for over 40 years. He is a National Ski Patrol Instructor Trainer and patroller at Sugarbush, VT.

## **LEAD 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WS)**

**Cross-listings:** GEOS 221 ENVI 222 LEAD 221

### **Secondary Cross-listing**

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** weekly papers (2 - 5 pages in length) and a final oral presentation

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** sophomores, Geosciences and Environmental Studies juniors and seniors

## **MAST 104 (F) Oceanography**

**Cross-listings:** MAST 104 GEOS 104 ENVI 104

### **Secondary Cross-listing**

The oceans cover three quarters of Earth's surface, yet oceanography as a modern science is relatively young: the first systematic explorations of the geology, biology, physics and chemistry of the oceans began in the late 19th century. This introduction to ocean science includes the creation and destruction of ocean basins with plate tectonics; the source and transport of seafloor sediments and the archive of Earth history they contain; currents, tides, and waves; photosynthesis and the transfer of energy and matter in ocean food webs; the composition and origin of seawater, and how its chemistry traces biological, physical and geological processes; oceans and climate change; and human impacts.

**Class Format:** three 50-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast of New England.

**Requirements/Evaluation:** lab activities (25%), homework (25%), quizzes (5%), three exams (45%)

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first year and second year students, Geosciences majors, Maritime Studies concentrators

**Expected Class Size:** 48

#### **Primary Cross-listing**

Part of the Williams-Mystic Coastal and Ocean Studies Program, this course provides an introduction to physical, geological, chemical, and biological oceanography. Using local field sites as well as places visited on field seminars, we will investigate why the Earth has oceans, why they are salty, how they move and flow, reasons for sea level change on both long and short timescales, and how our oceans interact with the atmosphere to control global climate. We will emphasise societal interactions with the ocean, and will consider coastal processes including land loss. We will apply an environmental justice and anti-racist lens to our discussions. Field work will take place on shores in southern New England, as well as during field seminars on the Atlantic ocean, the West Coast and the Mississippi River Delta. This course is in the Oceans and Climate group for the Geosciences major.

**Class Format:** Flipped classroom will focus on active learning using data-based exercises. Mini-symposia will involve student research and discussion.

**Requirements/Evaluation:** graded lab exercises, mini-symposium participation, and a research project

**Prerequisites:** none

**Enrollment Limit:** 24

**Enrollment Preferences:** none

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** This course is taught at our Mystic Seaport campus. Students must be enrolled in the Williams-Mystic Coastal and Ocean Studies Program.

**Distributions:** (D3)

### **MAST 311 (F)(S) Marine Ecology**

**Cross-listings:** BIOL 231 MAST 311

#### **Primary Cross-listing**

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the

mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.

**Class Format:** including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

**Requirements/Evaluation:** two tests, a research project, and a presentation

**Prerequisites:** BIOL 101 or GEOS/MAST 104, or permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** none

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** This course is only offered through the Williams-Mystic Maritime Studies Program located in Mystic, CT. satisfies the distribution requirement for the Biology major.

**MAST 351 (F)(S) Marine Policy (DPE) (WS)**

**Cross-listings:** MAST 351 ENVI 351 PSCI 319

**Primary Cross-listing**

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

**Class Format:** This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

**Requirements/Evaluation:** Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

**Prerequisites:** none

**Enrollment Limit:** 23

**Enrollment Preferences:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Expected Class Size:** 22

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

**Writing Skills Notes:** Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

**Difference, Power, and Equity Notes:** Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

**MAST 352 (F)(S) American Maritime History** (DPE) (WS)

**Cross-listings:** HIST 352 MAST 352

**Primary Cross-listing**

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

**Class Format:** Seminars, discussions, and field seminars

**Requirements/Evaluation:** Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

**Prerequisites:** None

**Enrollment Limit:** 27

**Enrollment Preferences:** If course over-enrolls, preference will be given to sophomores and juniors

**Expected Class Size:** 22

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Offered only at Mystic Seaport

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 352 (D2) MAST 352 (D2)

**Writing Skills Notes:** Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

### **MATH 12 (W) The Mathematics of LEGO**

This course is a modification of eight previous winter studies I have done on the Mathematics of LEGO bricks. Similar to those, we will use LEGO bricks as a motivator to talk about some good mathematics (combinatorics, algorithms, efficiency). We will partner with Williamstown Elementary and teach an Adventures in Learning course (where once a week for four weeks we visit the elementary school after the day ends to work with the kids). We will either submit a Lego Ideas Challenge, to try and create a set that Lego will then market and sell, or do a speed build challenge (college teams vs elementary school teams perhaps).

**Requirements/Evaluation:** short paper and final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** none

### **MATH 18 (W) Introduction to Cryptography**

Throughout history, wars have been won and lost based on a military's ability to successfully send secret messages and to break the enemy's secret codes. In fact, until the last half of the last century, most uses for cryptography were related to the military. Since the invention of high-powered computers and the Internet, however, there has been an explosion in the need for and usage of encryption. In the 1970's, public-key encryption was invented, allowing two parties who want to communicate in a secure way to do so even without already sharing a secret "key". Today, there are numerous mathematical methods used for encryption. In this course, we will study some historical cryptosystems as well as more modern ones. Possible topics include the Caesar cipher, Enigma, The Hill Cipher, Diffie-Hellman, RSA, AES, and Elliptic Curve Cryptography. The class will meet six hours per week. Evaluation will be based on regular homework assignments, participation in class group activities, and a final project.

**Requirements/Evaluation:** Final project or presentation

**Prerequisites:** None. Students who have already taken a course in Cryptography should obtain permission of the instructor before enrolling in the course.

**Enrollment Limit:** 20

**Enrollment Preferences:** Students will be asked to write a paragraph explaining why they would like to take the course.

### **MATH 26 (W) A Taste of Austria 2023**

Instructor: Sophia Klingenberg, Dr. med. Planned Travel Date: 10 Days of travel between January 6th - January 26 Flight to Vienna, train or bus trip to Graz. City tours and Chocolate factory tour, visit Castle, and focus on their health and wellbeing at the thermal baths. Bad Blumau, or Bad Loipersdorf.TBA. Planned Activities: Lodging will be provided at an inexpensive hotel, Jugendherberge in Vienna. Albertina, Cafe Demel, Sacher Hotel, Hawelka, Central, Landtmann, Aida among others. Visit Museums: for example: Belvedere, Jewish Museum, Sigmund Freud Museum, Narrenturm (TBA) and Coffee Houses in Vienna. Tour Zotter Chocolate Factory, Steiermark. Health: TBA: Therme Loipersdorf or Bad Blumau, Steiermark. Be mindful and focus on your health, immerse yourself in the Austrian world of wellness! Tour Schloss Eggenberg, Graz. Guided tour of the Zeughaus with armour from the 15th to the 18th century, Graz. Music: Piano Concert performed by Philipp Sheucher at the Conservatorium in Graz. Literature: Reading together "Chess Story" by Stefan Zweig. How GREEN is Austria? Learning about sustainable energy in Austria. Daily meeting before excursions: Instructions to learn the German Language. Possibly enjoy an evening at the Opera House in Graz. TBA. Students will write a four-page reflection paper on what they have gained from their travel course. I am a native Austrian who was born and raised in Graz, Austria and I have had the experience of life and culture. Working at the Opera House in Graz, as an extra, performing with the ensemble in Graz, and the famous Kirov Ballet from St. Petersburg, Russia on their summer tour. Email: sklingen@williams.edu with questions

**Requirements/Evaluation:** Short paper and final project or presentation; Final project or presentation; Reflecting paper on the trip after the travel course, explaining what the personal grow contained, and constructive criticism.

**Prerequisites:** Students do not require to have any German language knowledge. Good communication skills and personal maturity would be ideal.

**Enrollment Limit:** 15

**Enrollment Preferences:** Students who show an interest in the language and culture of Austria. Students need to be reliable, on time and attentive to class and cultural events. No alcohol policy only under supervision since students are legally allowed to consume alcohol.

**Expected Class Size:** NA

**Grading:** pass/fail only

### **MUS 10 (W) Introduction to Music Technology and Electronic Music**

This Winter Study Class is an introduction to the basics of Music Technology and Electronic Music. Students will learn how to use Music Notation Software Finale, MIDI, Sound Editing, and Sound Design Software to create their own compositions and/or arrangements. Students will work in groups and individually. Each class will include the instructor's presentation of the techniques and software studied in class, and a hands on approach section where students will use the software studied in class to apply the electronic music techniques discussed in their individual or group projects under the guidance of the instructor. There will be weekly student presentations of their individual and group projects. Instructor and students will also bring their favorite electronic music compositions and songs to class to discuss the techniques used by their creators.

**Requirements/Evaluation:** Final project or presentation. Weekly presentation and discussion of students' projects.

**Prerequisites:** MUS 102 or MUS 103, or permission of the instructor. Ability to read music is a prerequisite.

**Enrollment Limit:** 9

**Enrollment Preferences:** Music major

**Expected Class Size:** NA

**Grading:** pass/fail only

### **MUS 104 (S) Jazz Theory and Improvisation I**

**Cross-listings:** MUS 104 AFR 212

**Primary Cross-listing**

The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based composition etc. Appropriate for students with basic skill on their instrument and some theoretical knowledge including all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. This is a performance practice course and instrumental competence is essential. Vocalists and drummers will be encouraged to study the piano; pianists guitarists and bassists should be able to sight read chords on a jazz lead sheet.

**Class Format:** alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire

**Requirements/Evaluation:** weekly assignments,(e.g., harmonic analysis and exercises in transposition and transcription), a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance

**Prerequisites:** MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged

**Enrollment Limit:** 15

**Enrollment Preferences:** prospective Music majors, then Jazz Ensemble members, then Music majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** this course will share aural skills labs with MUS 104a; students considering taking this course should consult the lab times and plan their schedules accordingly

### **MUS 11 (W) I/O Fest 2023: The Music of Now**

I/O Fest is the Williams College Music Department's annual student-centered festival of contemporary music and creative music making, comprising concerts, workshops, outreach, and study. Over the first two weeks of Winter Study student performers, composers, and sound artists will engage in the preparation, rehearsal, and creation of new works, leading to four days of concerts at the '62 Center for Theatre and Dance and the Clark Art Institute. Students enrolled in the class will choose areas of focus in performance, composition, or production and take part in all of the creative planning for the festival. Students will engage with and learn from visiting musicians and composers, and explore a world of adventurous music making, new ways of listening, and new modes of collaboration. The first phase of the class will culminate in the presentation of the festival from January 12-15, 2023. Students are required to participate in and attend all events on the festival. In the post-festival phase of the course students will participate in readings, workshops, and discussion groups related to the social, musical, and cultural ideas featured in the festival and explore issues in contemporary performance practice. Other activities will include informal group sessions on musical topics such as free improvisation, graphic scores, and sound art. There will also be a field trip to PS21 in Chatham, NY for a tour of the facility and a performance.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** All students must have a background in music and be able to read music. They should have proficiency as an instrumentalist, singer, or conductor, or have experience as a composer or sound artist.

**Enrollment Limit:** 20

**Enrollment Preferences:** Students will be selected based on musical experience and interest.

**Expected Class Size:** NA

### **MUS 13 (W) Play Javanese Gamelan!**

Javanese Gamelan is a vibrant, living tradition of gong-chime music from Central Java, Indonesia. Gamelan music features unique tuning systems, intricate melodies, lively rhythms, and a strong sense of communal music-making. Students have the opportunity to learn several instruments over the winter term. Audio recordings and short readings supplement the hands-on learning. The group will play on a beautiful gamelan set crafted by Tentrem Sarwanto, a renowned Javanese gong-smith. The course culminates in a final performance and a brief essay on Javanese music.

**Requirements/Evaluation:** final public performance and short essay

**Prerequisites:** none

**Enrollment Limit:** 13

**Enrollment Preferences:** preference will be given to graduating seniors and upperclass students

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Phil Acimovic studied Javanese Gamelan in Surakarta, Indonesia for two years with master musicians Bp. Wakidi Dwidjomartono and Bp. Darsono Hadiraharjo. He has directed gamelans at Tufts University, Smith College, UC Davis, and UC Santa Cruz.

### **MUS 14 (W) Piano Lessons for the Music Novice**

This course, geared towards students with no previous musical training, offers an introduction to playing the piano and reading music. Students will learn to play simple pieces, scales, and chords, and will become familiar with basic music terms, notation, and concepts. The class will meet as a group for three hours a week, and each student will also have a private half-hour lesson once a week. In addition, students are expected to practice on their own daily and to complete written homework assignments. All students will perform pieces they have learned in a class recital on the last day of the course.

**Requirements/Evaluation:** Final project or presentation

**Prerequisites:** intended for students who have never taken music lessons of any kind

**Enrollment Limit:** 8

**Enrollment Preferences:** Permission by instructor

**Expected Class Size:** NA

**Grading:** pass/fail only

**Attributes:** EXPE Experiential Education Courses SLFX Winter Study Self-Expression

### **MUS 174 (S) The Singing Voice: Structure, Styles and Meaning**

What makes an opera singer sound different than a pop singer? How does the sound of each contribute to musical meaning for listeners? And why is the former granted a higher status and the latter a wider audience? This course examines the world of singing styles and engages these styles from multiple angles: through listening, readings, film viewing and, importantly, through singing. We examine histories of styles, cultural contexts as well as basic physiology, acoustics and techniques. We will explore the basics of yodeling, overtone singing and belting, among other styles. Familiarity with musical notation recommended.

**Class Format:** studio/brief lectures

**Requirements/Evaluation:** Two quizzes, regular journaling, a final paper (6-8 page) and a presentation.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** juniors and seniors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

**Attributes:** EXPE Experiential Education Courses

SEM Section: 01 MR 1:10 pm - 2:25 pm Brad Wells

### **MUS 204 (F) Jazz Theory and Improvisation II**

**Cross-listings:** MUS 204 AFR 214

**Primary Cross-listing**

A continuation of MUS 104b, this course builds upon theoretical knowledge, performance and aural skills developed previously. Students will deal with more complex theoretical and performance issues, including the use of symmetric scales, strategies for chord reharmonization, pentatonic and hexatonic scale shapes, and Coltrane's "Three Tonic" harmonic system.

**Class Format:** two weekly seminar meetings, alternating between theory and performance sessions

**Requirements/Evaluation:** weekly compositional, analysis, transcription or performance exercises and final transcription project

**Prerequisites:** MUS 104b or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Music majors and Jazz Ensemble members

**Expected Class Size:** 5-8

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **MUS 26 (W) Songwriting in Nashville**

This course will allow students of songwriting to explore both the artistic and the practical part of today's music industry. We will travel to Nashville and dive deep into writing, co-writing, critiquing, and editing original songs. Professional songwriters from the region will be invited to offer master classes and share their experiences as well as perform for us in an intimate, relaxed setting. Possible field trips include The Country Music Hall of Fame, Gruhn Guitars, Ryman Auditorium, The Bluebird Cafe, The Grand Old Opry, Performing Rights Organizations (BMI, ASCAP, and SESAC), Music Row, NSAI, recording studios and publishing Houses, etc.

**Requirements/Evaluation:** Final project or presentation.

**Prerequisites:** Preference will also be given to those who play an accompanying instrument or are accomplished vocalists.

**Enrollment Limit:** 8-9

**Enrollment Preferences:** Students who have previously enrolled in WSP Mus 15 or have taken part in private Vocals: Songwriting lessons through the music department will be given preference. Others that are interested are should contact the instructor at [blewis@williams.edu](mailto:blewis@williams.edu).

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Bernice Lewis is the Artist Associate in Songwriting at Williams College and has been a touring artist for over three decades. She has recorded two of her seven original CD's in Nashville.

**Materials/Lab Fee:** \$3500

**Attributes:** EXPE Experiential Education Courses TRVL Winter Study Travel Course

Winter 2023

### **MUS 309 (F) Jazz Arranging and Composition**

This is a course designed to acquaint the student with the basic principles of composing and arranging for Jazz Ensemble, beginning with lead sheet format and progressing through the big band. Intensive score study and some transcription from selected recordings required. Evaluation will be based

on the successful completion and performance of original arrangements and/or compositions during the semester, to include several lead sheet compositions, one quintet and one sextet arrangement, and one arrangement for big band. Students must attend extra small ensemble and large ensemble rehearsals when work is being rehearsed and/or performed. A solid background in jazz chord/scale theory is required.

**Class Format:** weekly lecture and targeted ensemble rehearsals generally last 2 hours total; additional individual tutorial style meetings are generally an hour a week, more frequently and for longer amounts of time as needed

**Requirements/Evaluation:** project based 4-5 compositions/arrangements

**Prerequisites:** MUS 104B or permission of the instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Jazz Ensemble Members, Music Majors

**Expected Class Size:** 3-5

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**Attributes:** EXPE Experiential Education Courses

Fall 2022

SEM Section: 01 TR 11:20 am - 12:35 pm Kris Allen

### **PHIL 12 (W) Yoga: Cultivating a Practice for Life**

"Yoga: Cultivating a Practice" will examine what the practice of Yoga is, and how it can serve as a foundation, guide, and inspiration for living, particularly in the face of personal or societal challenges. Alongside the daily physical practice of "asana" (yoga poses), the class will investigate the philosophical and ethical teachings of Yoga's ancient text, the Yoga Sutras of Patañjali. Students will learn a number of basic yoga poses and breathing techniques in 1.5-hour classes that will meet 5 days a week. Class time will include about 15 minutes of discussion, followed by a taught asana practice. Students will read and discuss portions of the Yoga Sutras, the Bhagavad Gita, and contemporary texts analyzing Yoga in society. Assignments may also include pre-recorded talks from contemporary Yoga philosophers. This course explores the roots of Yoga as an embodied practice of moral philosophy, and introduces students to Yoga's potential for individual and collective transformation. This learning is primarily experiential, and students are requested not to miss class sessions. Students will be expected to practice on their own outside of class, to journal, and to participate in class discussions of the readings. Students will submit weekly written assignments in response to prompts relating to class material and a longer final paper.

**Requirements/Evaluation:** Class participation, plus weekly short papers and final 5-page paper.

**Prerequisites:** No previous yoga experience required. Special permission required for students with significant injuries or broken bones, as the format may not allow me to accommodate their needs.

**Enrollment Limit:** 14

**Enrollment Preferences:** I will invite students to an orientation session in order to assess their interest and motivation for the class. From this, I will select participants with a goal of creating a broadly diverse group that can support and enrich each other's experience.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Anne O'Connor '86 has practiced Yoga since the late 1990s and became a Certified Iyengar Yoga Teacher (CIYT) in 2016. A Williamstown native, she lived in France and Germany for almost 20 years, working as a freelance translator and editor.

### **PHLH 16 (W) Addiction Studies and Diagnostics**

The goal of this class is to help students develop an effective understanding of the definition, impact, and treatment of addiction. Students will be familiarized with the DSM-5, the text used to diagnose mental illness in the US. Speakers will tell their stories in their journey from addiction to recovery. Students will be expected to accurately diagnose the speakers according to the criteria in the DSM-5. Finally, an extensive annotated

bibliography and oral presentation will be presented in groups at the end of the course. The goal of the class is to have students carry this knowledge forward and be more informed about addiction and recovery in personal, family, social, professional, and community life. That goal is two-fold; to help make better and more informed choices personally and with other people.

**Requirements/Evaluation:** Class and other participation outside the classroom and group project at end of course.

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** instructor's choice

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** I have taught this class nearly a dozen times and greatly enjoy doing so. I work as an addiction therapist and have personally been in recovery for 35 years. I earned an MA at the Hazelden Graduate School in 2009.

### **PHLH 402 (S) Senior Seminar in Public Health**

The capstone seminar provides concentrators with the opportunity to reflect upon and synthesize their experiential learning in the context of understanding gained from a cohesive set of elective courses, and through the lens of a variety of intellectual and disciplinary frameworks. A second goal is to give concentrators experience working in a multi-disciplinary team to address a real-world, and in many cases very daunting, public health problem. Students will read, discuss, and compose written reflections on primary source empirical papers addressing a range of issues and disciplines in the field of public health. For example, topics may include the social determinants of health, environmental health risks, and access to health care. Students will also be divided into small research teams to interact with local organizations and investigate a contemporary real-life issue in public health. The capstone course is required of all concentrators, but may be opened to other students with relevant experience at the discretion of the instructor and the advisory committee, if space permits.

**Requirements/Evaluation:** active seminar participation, written reflections, contribution to the team research project, and a 12- to 15-page final paper

**Prerequisites:** completion of at least four courses counting towards the PHLH concentration

**Enrollment Limit:** 12

**Enrollment Preferences:** senior Public Health concentrators; students who are not senior Public Health concentrators should contact the instructor

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** No divisional credit

### **PHYS 12 (W) Drawing as a Learnable Skill**

Representational drawing is not merely a gift, but a learnable skill. If you wanted to draw, but have never had the time to learn; or you enjoy drawing and wish to deepen your understanding and abilities, then this course is for you. This intensive course utilizes traditional drawing exercises to teach representational drawing. By using simple techniques and extensive exercises you will learn to see more accurately and realistically represent the physical world. You will learn to draw a convincing portrait, interior, and still life. This course is designed to develop your powers of observation and enhance your innate creative problem solving abilities, which are applicable in any field. Students need no previous artistic experience, just the willingness and desire to learn a new skill. Requirements: students will be expected to attend and participate in all class sessions as well as 2

mandatory study sessions in museums. They will also be required to keep a sketchbook recording their progress and complete a final drawing project. Evaluations will be based on participation, effort, and development. All class sessions are mandatory.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 18

**Enrollment Preferences:** If overenrolled, selection will be based on seniority.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Stella Ehrich lived in Italy for sixteen years, where she spent seven years studying figurative realism in the Simi Studio in Florence. She holds an MFA in painting from Bennington College.

### **POEC 402 (S) Political Economy of Public Policy Issues**

In this course, students form groups that conduct a political and economic analysis of a public policy issue of their choosing. They do extensive reading, conduct interviews in Washington, D.C. (during spring recess), write a major report on their findings and recommendations, and present and defend their findings in a public talk. Students visit Washington, D.C. Sunday night through Wednesday of the first week of spring vacation to conduct interviews relating to their group projects. This is a course requirement.

**Class Format:** student presentations

**Requirements/Evaluation:** group policy projects including an 80- to 100-page paper and 2-hour presentation

**Prerequisites:** POEC 253 or ECON 255, POEC 250, POEC 401; open only to Political Economy majors

**Enrollment Limit:** 19

**Enrollment Preferences:** open only to Political Economy majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** required for the Political Economy major

### **PSCI 10 (W) International Economic Policymaking During Crises**

This course will provide a practical introduction to international economic policymaking, with a focus on the International Monetary Fund and World Bank. Through guest speakers and case studies, students will learn about the roles of these institutions in the response to recent economic crises. Students will also gain practical insight into the policymaking process and receive training in policy memo writing and briefings. After a brief overview of the International Monetary Fund and World Bank, the course will explore three economic crises in depth, with opportunities for students to practice policy writing and briefing skills.

**Requirements/Evaluation:** Short paper and final project or presentation (Written policy memo and oral briefing)

**Prerequisites:** One course in political science, economics, or history. The course will focus on practical policy skills and will not require advanced coursework in economics.

**Enrollment Limit:** 12

**Enrollment Preferences:** If overenrolled, preference will be determined based on short paragraph explaining interest in exploring internships and

careers in public service.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Arathi Rao '06 is Advisor to the US Executive-Director to the International Monetary Fund. A Fulbright and NSF grant recipient, she holds an MPA from Harvard's Kennedy School, and worked for the World Bank, think tanks, and US government agencies.

### **PSCI 118 (F) Power to the People?**

Popular unrest. The resurgence of authoritarian styles and practices in politics. Democratic collapse. Political tumult around the globe in recent decades has put elites, and others, on edge as young democracies have collapsed and longer standing ones appear to be stumbling. In the United States, basic stability and democratic expansion have been accompanied by increasing citizen distrust of institutions, growing social divisions, contestation over basic citizenship rights, and political violence. The pandemic, related economic distress, social protests and insurrection have only sharpened the precarious state of U.S. democracy. Acute observers have long seen the U.S. as a harbinger of the promise and peril of modern democracies. What is the fate of democracy in the U.S.? What does that portend, if anything, for other democracies, or for the general principle of popular sovereignty--the idea that the people govern themselves? We investigate these and related questions, primarily through active, project-based group research activities, guided by political theory and empirical research in the social sciences. Our investigation will include substantial class-time collaboration with a similarly structured undergraduate course taught by a sociologist at Johns Hopkins University and may include an optional weekend research trip.

**Requirements/Evaluation:** active class participation, three 4-page essays, multiple group assignments, and class presentations

**Prerequisites:** first-year students

**Enrollment Limit:** 14

**Enrollment Preferences:** first-year students

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

### **PSCI 14 (W) JA SelCom: A Case Study in Selection Processes**

As a member of SelCom (SElection COMmittee), you will become a cohort with current members of JAAB (the Junior Advisor Advisory Board) to select the next class of JAs. You will participate in every step of the JA application evaluation process -- reading written applications, conducting interviews, discussing applicants with SelCom, and deciding on the final makeup of next year's JA class. Every SelCom member will complete anti-bias training at the beginning of Winter Study; working through biases to make thoughtful evaluations is crucial to this process. This is a fantastic opportunity for students who want to take on a leadership role that requires critical thinking and collaboration. Your input will help to shape the entry system, the JA role, and the very essence of the Williams community in the coming school year. The SelCom schedule is roughly as follows (subject to change). SelCom will likely meet 4-5 days per week. Week 1: SelCom members will undergo anti-bias training and then spend the first week conducting interviews with applicants and cleaning transcripts to ensure readability. Week 2-3: The committee will discuss applications with identifying information blinded to help mitigate bias in the selection process. Week 3-4: SelCom will revisit applications with consideration given to the personal identity of each applicant. The committee will then extend offers to a select number of candidates. Members may reconvene at some point in the spring semester (after the initial round of JA offers have been accepted or rejected) to determine which applicants on the waitlist should receive offers. If you are interested in serving on SelCom during winter study, you must fill out this application form by Thursday, November 3 at 11:59pm: <https://docs.google.com/forms/d/e/1FAIpQLSe85g8FeXhwSVT1a4GmdvwwzuDyNU2OBYc6yYwgJh0C0Ypblw/viewform>. JAAB will decide which applicants will serve on SelCom and inform all applicants of their application status by the end of the day on Monday, November 7. SelCom applicants

who are not selected to serve on SelCom will have until November 9 (winter study registration deadline) to enroll in another winter study course.

**Requirements/Evaluation:** Attendance and active participation

**Prerequisites:** Anyone wanting to register for the SelCom Winter Study class needs to fill out this form:

<https://docs.google.com/forms/d/e/1FAIpQLSe85g8FeXhwSVT1a4GmdvwvzuDyNU2OBYc6yYwgJh0C0Ypblw/viewform>

**Enrollment Limit:** 25

**Enrollment Preferences:** Open to students who are in the classes of 2025, 2024.5, 2024, 2023.5, and 2023 AND who are not applying for the JA role for the 2023-2024 academic year.

### **PSCI 21 (W) Fieldwork in Public Affairs and Private Non-Profits**

This course is a participant-observation experience in which students work full-time for a governmental or nongovernmental (including voluntary, activist, and grassroots) organization or for a political campaign. Examples include: town government offices; state or federal administrative offices (e.g., environmental agencies, housing authorities); interest groups that lobby government (e.g., ACLU, NRA); nonprofit organizations such as service providers or think tanks (e.g., Habitat for Humanity, Cato Institute); and grassroots, activist or community development organizations (e.g., Greenpeace or neighborhood associations). The instructors and members of the Political Science Department are available to help students find placements, if necessary, but such arrangements must be made in advance of the Winter Term. Students should first make their own contracts with an institution or agency. Each student's fieldwork mentor shall send a confirmation letter to the instructor verifying the placement and describing the nature of the work to be performed. During the session, students are responsible for keeping a journal of their experiences and observations. Additionally, students write final papers summarizing and reflecting upon the experience in light of assigned readings. A group meeting of all students will occur before winter study to prepare and after to discuss the experience. Every year, course instructors arrange for some distinct sections of this course to provide specialized fieldwork opportunities in the area for small groups of students.

**Requirements/Evaluation:** A 10-page paper

**Prerequisites:** None. Interested students must contact Paula Consolini prior to registration.

**Enrollment Limit:** 25

**Enrollment Preferences:** Political science majors

### **PSCI 22 (W) LIFT: Learning Intervention for Teens**

This mentorship-based course pairs Williams students with teenagers involved in the Berkshire County juvenile justice system. LIFT is an official Commonwealth of Massachusetts probation diversion program. This is a student-led course, sponsored by Pittsfield Chief of Police Mike Wynn '93 and Professor Cheryl Shanks, but entirely run by Williams students who have served as mentors or directors in the past. Our goal is to empower the teenagers through positive peer mentorship and allow them to take ownership of an independent project of the teen's choosing. The project and other course activities aim to cultivate initiative, creativity, focus, and skills in areas such as goal-setting, research, and communication, which the teenagers can then carry forward to their school, work, and home lives. The course culminates with a project presentation in which each mentor/mentee pair formally presents their work to an audience that includes professionals in the juvenile court system, state elected officials, chiefs of police, district attorneys, the teens' peers and families, and faculty and community members. Williams students are expected to attend trainings, meet with their teens three times a week, co-facilitate a final presentation, and keep a weekly journal detailing their meetings. Because LIFT is an after-school program, this course meets Tuesday through Thursday from 3:30-5:30pm. If you are interested in applying, please fill out this google form

<https://forms.gle/vWDy51KRWhDMHpJp8> - and register on PeopleSoft.

**Requirements/Evaluation:** final project or presentation, and journal and weekly statements

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** students will be evaluated based on a statement of application, and the directors reserve the right to accept fewer than 10 applicants

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Mike Wynn is the Chief of the Pittsfield Police Department and graduated from Williams in 1993.

### **PSCI 319 (F)(S) Marine Policy (DPE) (WS)**

**Cross-listings:** MAST 351 ENVI 351 PSCI 319

#### **Secondary Cross-listing**

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

**Class Format:** This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

**Requirements/Evaluation:** Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

**Prerequisites:** none

**Enrollment Limit:** 23

**Enrollment Preferences:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Expected Class Size:** 22

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

**Writing Skills Notes:** Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

**Difference, Power, and Equity Notes:** Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

### **PSYC 17 (W) Introduction to Art Therapy**

This course will be a multi-modal introduction to the field of art therapy. Through art-making and the study of primary source materials, students will explore the historical contexts, theoretical models, and practical applications of art therapy. Questions students will tackle: Where is the line between pathology and typically functioning? What is the role of the therapist? How can the therapist be collaborators with their clients? Who is the expert, really? What is context? How does the therapist's context inform their practice? Students will learn about art therapy in practice with a variety of populations and techniques. In addition to understanding the theoretical framework of art therapy, students will engage in a heuristic study of the role art has played in their lives. This course will be a combination of lecture, discussion, guest speakers, audio-visual material, student presentations, and art experiential.

**Requirements/Evaluation:** short paper and final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Art and Psychology Majors

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Kaye is a registered, board-certified art therapist. She practices art therapy and teaches at Springfield College.

### **PSYC 372 (F) Advanced Seminar in Teaching and Learning**

This advanced seminar will give students an opportunity to connect theory to practice. Each student will have a teaching placement in a local school, and participate in both peer and individual supervision. In addition, we will read a range of texts that examine different approaches to teaching, as well as theory and research on the process of education. What is the best way to teach? How do various theories of child development and teaching

translate into everyday practices with students? Students will be encouraged to reflect on and modify their own teaching practices as a result of what we read as well as their supervision. Questions we will discuss include: What is the relationship between educational goals and curriculum development? What is the relation between substance (knowledge, skills, content) and the interpersonal dynamic inherent in a classroom setting? How do we assess teaching practices and the students' learning? What does it take to be an educated person?

**Requirements/Evaluation:** this course involves a field placement, weekly readings, as well as seminar discussion, supervision, and a graded journal

**Prerequisites:** PSYC 232 or PSYC 272 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Psychology majors and those who plan to become teachers

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

### **REL 110 (S) Religion in Everyday Life (WS)**

When studying religions, people generally turn to studying scriptures, the life and teachings of the religion's founder, and the fundamental doctrines of the religion. What this approach does not allow us to understand, however, is the way that such religious traditions actually manifest themselves in the world. This course introduces students to an alternative approach to studying religion, by exploring the way these religions are lived and experienced by individuals and communities in a variety of contexts. We will see how religion intersects with people's lived experiences of gender, race, class, sexuality, and broader socio-cultural and political contexts. We will explore this approach to religion through an engagement with ethnography (the qualitative research method in the social-sciences generally described as "participant-observation"). Students will not only learn about the theory and practice of this methodology, but will also conduct their own ethnographic research project over the course of the semester. This will involve: designing a feasible project and research question, selecting local research sites and subjects, taking field-notes and conducting interviews, and finally analyzing data and writing an ethnographic essay.

**Class Format:** Semester-long community-based field research. Regular in-class peer-review exercises.

**Requirements/Evaluation:** regular reading responses, semester-long research project with frequent small assignments building up to the final product (class presentation and approximately 10-page paper)

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** first-year students and sophomores; students interested in Religious Studies

**Expected Class Size:** 10-12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will learn a specific mode of qualitative/ethnographic writing through a semester-long field-based project. This involves many scaffolded assignments of field-based research and writing, for which they receive very regular feedback from the instructor, as well as extensive peer-review exercises. There will be a number of readings on writing style and technique, as well as class discussion and workshoping activities. The final essay will itself be developed in multiple steps.

### **REL 16 (W) Experiments in Mindfulness and Art Museums**

Vietnamese Buddhist Zen master Thích Nhat Hanh said, "Always there is the opportunity to live our life fully. When we drink water, we can be aware that we are drinking water. When we walk, we can be aware that we are walking." It could be added: When we view art, we can be aware that we are

viewing art. When we make art, we can be aware that we are being creative. How can we learn to become more alert and conscious to our surroundings and then apply these skills so we can enjoy a fuller, more vivid experience of life? Art holds a key to the answer, and that forms the basis of this experimental winter studies course. Using MASS MoCA's contemporary art exhibitions, explore how objects can act like gongs to bring us to the present, urging us to slow down and be aware of their embedded messages and their possible healing properties. In facilitated art explorations, we will apply contemplative tools modeled on centuries-old Buddhist and other cultures mindfulness techniques, including-but not limited to-guided visualizations, slow walking, mindful listening and chanting, and observations of breathing. Additional experiments will feature opportunities to tune into the creative spirit that we all possess in guided art-making activities to process the overarching course philosophy (based on John Dewey) that "art is experience." This course will take place at MASS MoCA twice weekly for 3 hours each session. Students will work with MASS MoCA's director of education and curator of Kidspace to experiment with "ArtInSight," MASS MoCA's three-pronged pedagogy that includes arts-based social justice conversations, mindfulness-based insight activities, and art-making exercises to deepen connections to the art on view and to one's own creativity. Guest artists will be brought in to further explore mindfulness and the arts. While this is a great opportunity for art/art history and religion majors, students are not required to already have mindfulness or art-making practices

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** preference will be given to art and religion majors, juniors and seniors

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Laura Thompson, EdD, is MASS MoCA's director of education and Kidspace gallery curator. Laura has worked in arts and museum education for more than three decades and is a certified Kripalu meditation teacher.

### **RUSS 25 (W) Williams in Georgia**

Williams has a unique program in the Republic of Georgia, which offers students the opportunity to engage in three-week internships in a wide variety of fields. Our students have helped in humanitarian relief organizations like Save the Children, interned in journalism at *The Georgian Times*, taught unemployed women computer skills at The Rustavi Project, documented wildlife, studied with a Georgian photographer, done rounds at the Institute of Cardiology, and learned about transitional economies at the Georgian National Bank. In addition to working in their chosen fields, students experience Georgian culture through museum visits, concerts, lectures, meetings with Georgian students, and excursions. We will visit the sacred eleventh-century Cathedral of Svetitskhoveli and the twentieth-century Stalin Museum, see the birthplace of the wine grape in Kakheti, and explore the region where Jason sought the Golden Fleece. Participants are housed in pairs with English-speaking families in Tbilisi, Georgia's capital city. Students will submit weekly reports on their work while in the country (6 pages in total or the equivalent in another medium), as well as an overall reflection (4 pages or the equivalent in another medium) upon their return from Georgia.

**Requirements/Evaluation:** weekly reports on their work while in Georgia (6 pages in total or equivalent in another medium); overall reflection (4 pages or equivalent in another medium) upon return

**Prerequisites:** none; knowledge of Georgian or Russian is not required

**Enrollment Limit:** 8

**Enrollment Preferences:** interested students must attend an informational meeting and submit a short essay about their interest in the course

## **SOC 16 (W) The Lives of Infamous Men**

Michel Foucault is famous for his analysis of how power and knowledge are interwoven in institutions such as the prison or the clinic. Less well known are the life stories that Foucault exhumed from the archives of these institutions. These stories, such as that of a parricidal peasant assumed to be insane and an intersex individual raised in a convent but later legally identified as a man, provoke questions about the self, identity, knowledge, power, and resistance. We will explore the violence done to lives when they are made to conform to the neatness of the archive and ask how we might do justice to these lives as historians. This class will include a research project in which students will collaborate to curate a biographical exhibit in the Williams Library.

**Requirements/Evaluation:** Final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** seniority

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** William Stahl is a political theorist researching the politics of biography. Previously, he has taught at New York University, Abu Dhabi and the University of California, Los Angeles.

## **SOC 340 (S) Performing Masculinity in Global Popular Culture (DPE)**

**Cross-listings:** AMST 358 THEA 341 LATS 341 WGSS 347 SOC 340

### **Secondary Cross-listing**

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

**Requirements/Evaluation:** masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** a short statement of interest will be solicited

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 358 (D2) THEA 341 (D2) LATS 341 (D2) WGSS 347 (D2) SOC 340 (D2)

**Difference, Power, and Equity Notes:** This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

SEM Section: 01 W 7:00 pm - 9:40 pm Gregory C. Mitchell

### **SPEC 11 (W) Investing: Real money in a Real Fund**

As we explore the world of investing, we'll focus on how to think about valuation, including both public and private firms/investments. Along the way, we'll touch on a host of topics: basic financial accounting, investment instruments, corporate capital structure, portfolio theory, equity and fixed income markets, derivatives, securities analysis, portfolio management, market efficiency, the role of benchmarks, non-financial drivers (ESG, etc.) and algorithmic trading versus fundamental investing. We'll conclude with some thoughts on behavioral finance and its impact on markets. Students will present/teach various topics in the first two weeks culminating in investment pitches to invest the Williams Investment Group's funds. Students will continue to work as a group to actively manage a live brokerage account for the balance of the year through Thanksgiving of 2023. During winter study, will meet three times each week (likely T/Th/F) for two hours each time. Students should expect to put in as least as much time out of class as in.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** There are no prerequisites. Students will apply for spots via two very short short answer questions. There's no mathematical prerequisite, but a comfort with basic algebra and Excel is helpful.

**Enrollment Limit:** 24

**Enrollment Preferences:** Preference will be given to Sophomores and First-years, with a slight nod to students exploring a possible interest in finance.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** David '90 P'20, a Founding Partner of Triangle Peak Partners, a venture capital firm, graduated from Williams with Honors in Mathematics. He worked for Bain & Co., MAC Group, and Faye Sarofim & Co. He also holds an MBA from Stanford University.

Winter 2023

LEC Section: 01 TRF 10:00 am - 11:50 am David Pesikoff

### **SPEC 12 (W) Connecting the Dots: Intro to Career Development**

In this course, students will identify and reflect on their skills, interests, values, and motivations and apply this self-knowledge to their search for meaningful work. Together, the class will embark on a path of career exploration, to uncover and expand knowledge of potential paths. Students will practice lifelong career development skills, from identifying and building their network of mentors, to uncovering the hidden job market, to crafting compelling stories in resumes, cover letters and interviews, and more. Sessions will consist of lectures, group and individual activities, panels, and group discussions. Utilizing activities inspired by Kate Brooks' "You Majored in What?" Burnett and Evans' "Designing Your Life," and the 2022 update of Dick Bolles' classic "What Color is your Parachute?," each meeting will be active and engaging. Because career and personal development happens in every aspect of a student's college experience, we'll feature several visitors from within the Williams College community (peers, alumni, faculty, and staff) to foster networking connections and help students pursue their interests on campus this spring and beyond. Homework will include reading career theory, watching videos, listening to podcasts, working on resumes, cover letters, and internship search action plans, conducting informational interview in fields of interest, planning group and individual presentations on emerging topics in career development, a 2-5 page final reflective paper, and developing their framework for an e-portfolio that they can continue to use throughout their time at Williams. Because of the iterative nature of reflection and exploration, this course has something for students at every stage. However, students who are just getting started articulating potential career aspirations and/or are open to uncover new career paths may benefit most.

**Requirements/Evaluation:** Short paper and final project or presentation.

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** First year students and those who are undecided about their career paths.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Janine Oliver, Director of Career Education, is a high energy idealist. Her background as a special education teacher, mental health counselor, experiential/outdoor educator, and confused college student informs her work as a career educator.

### **SPEC 15 (W) Past Patterns, Future Visions: Data in the Museum**

The course introduces students to analyzing and visualizing humanities data with a focus on questions that are critical to the future of art museums and other cultural heritage institutions: How can the format and content of museum metadata, especially collections catalogs, be used to promote works of art, and the people and cultures who created them, that have been marginalized? How can museums use data and data analysis in ways that are transparent, accessible, and allow for critique? How can we use data visualization and data storytelling to make museum collections more accessible and welcoming? Students will spend about six hours a week in class learning tools and approaches to humanities data and discussing case studies of museum and cultural heritage data projects at institutions like the Getty and National Gallery of Art. We will use the Williams College Museum of Art Data set, often alongside data sets from other museums, to explore different approaches to data using methods like mapping, text analysis, and network modeling. Outside of class, students will have short readings on different approaches to humanities data and the challenges of humanities data, as well as short assignments that work toward the final project. The final project will be a data analysis and visualization project, with accompanying project journal, on a topic of the student's choice incorporating WCMA's data set.

**Requirements/Evaluation:** Final project or presentation

**Prerequisites:** There are no prerequisites. However, students will find the class more approachable if they have already worked with data in spreadsheet formats like google sheets or excel (for example, sorting content and using basic formulas).

**Enrollment Limit:** 15

**Enrollment Preferences:** Sophomores and juniors

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Beth Fischer '05 is the Postdoctoral Fellow in Digital Humanities at the Williams College Museum of Art, where she develops digital resources and provides consultation and training in the use of digital tools and methods for museum objects.

### **SPEC 16 (W) Stress reduction and focus-finding with kanban: managing self and workflows in small steps**

This course will give students guided instruction and direct practice in using a series of tools intended to help them reduce their stress, improve their focus, and get more out of their learning time. This is the daily practice of personal Kanban and Kata. Using the flipped classroom model, students will spend their time outside of class encountering learning content so that their time in class can be spent practicing and doing the skills of Kanban-Kata, so as to apply the tools of stress reduction to their own lives. As they learn these valuable tools and processes, rooted in an Agile framework, students will also be learning a set of sought after career skills that many companies (most of the technology and finance sectors) hire consultants to deliver to industry leaders. Because of the premium employers put on this collaborative skill-set in the current hiring market, students will benefit from this course not only by learning a proven way to decrease stress and increase focus in their own lives but by establishing a foundation of readiness to enter team-based work environments upon graduation from Williams. Students will read selections from the following works: J. Smart, *Sooner, Safer, Happier*; M. Rother, *KATA*; L. Tilman, *Agility*; Benson & Barry, *Personal Kanban Mapping Work Navigating Life*; C. Walker, *From Contempt to Curiosity*; and S. Tendon, *Hyper-Productivity for Knowledge Work Performance*. Students will leave the course with the following abilities: 1. Better visualize your work to clear your mind: Create your workspace; Modify your workspace as circumstances change; Sort your work items. 2. Better flow your work to create progress: Leverage Work In Progress [WIP] limits; Break stressors down into smaller pieces. 3. Better attack your challenges: Understand current state of challenge; Define target state/resolution. Students leave the course able to continue running their personal organization system thereafter.

**Requirements/Evaluation:** Final project or presentation.

**Prerequisites:** Willingness to try new things and to welcome a sense of play in the pursuit of knowledge.

**Enrollment Limit:** 15

**Enrollment Preferences:** seniors, juniors, sophomores, then first-years

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** For more than two decades Simon has supported learners and leaders from a range of backgrounds and institutions in reducing stress, creating focus, and collaboratively accelerating their learning. He believes our obstacles are also our way forward.

LEC Section: 01 Cancelled

### **SPEC 17 (W) Personal Resilience in the Face of the Climate Crisis**

Climate anxiety has been demonstrated to negatively impact students worldwide. Hickman et al. (2021), for example, reported that 59% of young people are very or extremely worried about climate change, and 45% say it impacts their daily functioning (2021). In the face of very real environmental challenges, this response is understandable but can lead to feelings of helplessness and inaction. This course seeks to explore the concept of resilience while developing practices for students' own well-being so they can be part of climate solutions. This course will build personal climate resilience in two ways. First, by exploring stories of hope through readings and local field trips, students will learn from people who see reason for action and have found concrete ways to promote equity and resilience in their own communities. The primary text will be "All We Can Save," a book composed of essays, poetry, and art of women leading climate adaptation and mitigation strategies. Local field trips will visit organizations focusing on food sovereignty, material reuse, and environmental justice. Second, students will learn concrete skills in both self-care and personal climate action. Taking small steps in the right direction like these can help students regain a sense of agency that is often lost in the face of issues as large as climate change. The course will meet 3x a week for 2-3 hours at a time. The classes will rotate between reading discussions, field trips, and skill development classes. Out of class work will involve readings, preparing for the paper and presentation, and selected local events. The means of evaluation include a short essay exploring an author from the text in more depth, as well as sharing a personal resilience skill that they currently practice with the Williams community in the form of an interactive demonstration.

[https://www.thelancet.com/journals/lanplh/article/PIIS2542-5196\(21\)00278-3/fulltext](https://www.thelancet.com/journals/lanplh/article/PIIS2542-5196(21)00278-3/fulltext)

**Requirements/Evaluation:** Short paper and final project or presentation

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** Students with a demonstrated interest in climate, sustainability, environmental justice, and mental health will be given preference. This interest can be demonstrated in terms of work experience or coursework.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Christine Seibert is the Sustainability Coordinator for the Zilkha Center for Environmental Initiatives and is working toward a master's degree in sustainability from Harvard Extension School.

### **SPEC 19 (W) Exploring Healthcare**

Experience in a healthcare environment is essential to exploring the health professions. Through this experiential course, students have an opportunity to clarify their understanding of the rewards and challenges of the practice of allopathic and osteopathic medicine, veterinary medicine, dentistry, allied health professions, or public health. Students will participate in an intensive shadowing internship through a self-identified placement in a geographic location of their choosing. Generally, a shadowing experience focuses on provider-patient interactions within out-patient and in-patient settings. These experiences provide students with the opportunity to observe clinical interactions and to learn about the systems within which healthcare is delivered. Students will be introduced to fundamental concepts related to patient interviewing, diagnosis, and medical decision making. Students will also be introduced to core concepts of population health, providing a broad perspective on health outcomes within a geographic region, and expand their perspective on the individual clinical interactions which they observe. This course will encourage participants to reflect on their healthcare experiences

with a dual focus: from the perspective of the individual provider-patient relationship and within a systems-level context. Weekly didactic sessions will focus on the challenges and experiences of healthcare professionals in the Berkshires or nationally, and these sessions will now be offered remotely so that they can be attended by both on-site and off-site students and to facilitate a broader range of speakers. By the end of the course, students will demonstrate greater understanding of the fundamentals of patient-provider interactions, clinical diagnosis, patient interviewing, and/or factors affecting the health of individuals and communities. They will write a final reflective paper on their experiences. Students are welcome to participate in self-sourced shadowing or volunteering internships in a geographic area where they have housing and transportation. Learn more about sourcing your own shadowing opportunity here. Additionally, we are currently assessing the interest level and capacity for facilitating placements through the '68 Center. **Please fill out this interest form**

**(<https://docs.google.com/forms/d/e/1FAIpQLSf18HwsCTs5UrAW6CEqnquyE-Eraya4OkXjvifswJgcoifRHQ/viewform>) by October 28, 2022 and we will get back to you during the first week of November about what opportunities will be available within SPEC 19.**

**Requirements/Evaluation:** a 10-page paper; participation

**Prerequisites:** open to current sophomores, juniors, and seniors

**Enrollment Limit:** 40

**Enrollment Preferences:** Brief application required Priority will also be given to juniors and seniors who have not previously taken the course

### **SPEC 21 (W) Career Exploration: Winter Study Internships!**

Internships amplify academic learning, empower professional development, and increase students' career options. SPEC 21 offers students the opportunity to learn beyond the classroom by providing substantive applied learning experiences focusing on issues such as racial justice/social justice, non-profit/community service, government/policy/law, environment, education & many more! Students have the option of applying to the designated SPEC 21 WS internships posted on Handshake, or to submit self-sourced WS internships. For WS 2022, remote, hybrid, and on-site internship opportunities are eligible. Each student will intern for 5 days per week working on project(s) for 3 1/2-4 weeks. Previous WS Internship Sponsors include: Stockbridge Munsee Community Band of Mohican peoples, Berkshire County Chapter, NAACP, Vera Institute of Justice, Nuclear Age Peace Foundation, and many others! Throughout the month, students will reflect upon their experiences: Impressions about the organization and its workplace culture. Insights about the structure of their role, the organization and the industry. Professionally-What they have learned about themselves within a professional environment; may solidify an interest in a particular industry and build upon this experience when pursuing future opportunities or support the decision to change direction and explore a new industry. Academically-Future course selection, selection of major, and enhanced, grounded, contributions to class discussions. Williams College Alumni/Parents and other employers will be recruited as Winter Study (WS) Internship Sponsors and create meaningful projects/experiences during the month of January. It is expected that our WS Sponsors will mentor the Williams intern(s) during the course, meet with intern(s) on a regular basis to discuss projects/goals/challenges for the week, and support students' success.

**Requirements/Evaluation:** Short paper and final project or presentation. Students must write a short paper that will become a public record and used as a resource by future students or create a 3-5 minute video; weekly assignments will include completing a Career Action Plan and responding to three questions posted to the EphLink WS Discussion Group. In addition, SPEC 21 winter study interns will have the opportunity to participate in a Winter Study Internship/Summer Experience Fair, career panel discussions, or '68 Center workshops.

**Prerequisites:** Interested students must attend an information meeting in late September or early October and follow up with Dawn Dellea if they have questions about specific WS internships listed in the SPEC 21 syllabus or self-sourced WS internships.

**Enrollment Limit:** 150

**Enrollment Preferences:** 1st priority- Designated SPEC 21 internships posted on Handshake-WS Internship Sponsors select students based on their applications/possible interviews. 2nd priority-Separate application/evaluation process for students with self-sourced WS internships.

**Expected Class Size:** NA

**Grading:** pass/fail only

INT Section: 01 TBA Dawn M. Dellea

### **SPEC 23 (W) Climate Change Science and Solutions: A Practical Guide for protecting our Climate**

The course couples climate change science with a rigorous investigation into solutions that are fair and equitable, economically and technologically feasible, and supported by research in social psychology and behavioral change. It covers the physical basis of global climate change, measurements and climate models, and links them with the psychology of risk perception, social influence, and collective action. The course is motivated by the fact that despite broad scientific consensus on the origins and risks posed by climate change, public and governmental mobilization around the issue has remained remarkably limited. The course is conducted seminar style and includes individual and group projects. We start with the global carbon cycle and the role of greenhouse gasses in the atmosphere. Climate scientists use powerful models and large amounts of data to track past and predict future changes in the climate. We will look at the building blocks of these models and how they feed into reports such as the Intergovernmental Panel on Climate Change (IPCC) Assessment. Next, we will examine climate change solutions. In individual and group projects we will take a look at renewable energy, sustainable farming and forest management practices, dietary changes, and more to assess their potential for reducing carbon emissions, costs, socio-economic fairness, and political acceptance. This will help us become knowledgeable in designing climate solutions at different scales, for diverse communities and various cost constraints. I also plan for us to visit a few sites and hear from guest speakers. Your final project will be a presentation of a realistic and impactful action to combat climate change that uses the scientific, technical, cultural, and climate justice knowledge gained in the course. Your peers will have the opportunity to critically examine your proposal, ask questions and together practice being effective advocates for climate change action.

**Requirements/Evaluation:** Short paper and final project or presentation; Final project or presentation

**Prerequisites:** None

**Enrollment Limit:** 30

**Enrollment Preferences:** 24, if over-enrolled, student selection will be by timestamp of enrollment record or by random selection

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** As director of the Zilkha Center, I have deep knowledge of climate change science & policy, experience teaching in higher ed (faculty member), and an active research record. I hold a PhD in envi stats & policy and have worked at UN, NRDC, think tank.

### **SPEC 24 (W) Class of 1959 TeachNYC Urban Education Program**

SPEC 24 Class of 1959 TeachNYC Urban Education Program Students in this course learn about the front-line challenges of urban public education by working in one of New York City's public schools. Participants will be expected to pursue a full day's program of observing, teaching, tutoring and mentoring in their choice of more than 20 different school situations from elementary through high school. Each of the participating schools will have a resident supervisor who will meet with the January interns to arrange individual schedules and provide mentoring during the month. There will be weekly seminar meetings of all the interns who are expected to participate in group discussions, keep a journal and write a 5 page paper reflecting upon their experience. The course will conduct orientation meetings with students prior to January, matching each student's interest with appropriate teaching subject areas and a host school. Dormitory-style housing will be provided along with some assistance with transportation and food costs-estimated at \$400 for the term. Further assistance is available for financial aid students.

**Requirements/Evaluation:** Short paper and final project or presentation.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** seniority

**SPEC 26 (W) Entrepreneurship Essentials: the Mindset, the Method, the Reality**

Entrepreneurship is the art and science of generating and applying ideas that solve real-world problems. In this course, students will learn the entrepreneurial method and discover where ideas come from and how they are vetted through the customer discovery process. Students will visit numerous Start Ups and meet dozens of entrepreneurs and their co-founders, funders, and employees to learn what happens, what to watch out for, and how to think about entrepreneurial opportunities. The course will begin in WT (3hrs/day, 9 days) with a review of the idea development tools used in today's startup environment, particularly those pioneered by the Stanford d.School such as the Business Model Canvas and Design Thinking. Particular focus will be on customer discovery and how one determines if an idea is worth pursuing, the "pivots" along the way, and the adaptive mentality needed in a startup. We will also look at the creative process from a personal perspective - how can each student learn to think creatively and what actions can they take. We will compare the creative process in different disciplines to see what is different and what is the same. The second half of the course will take place in San Francisco where we will tap into the strong Bay Area alumni network allowing us to visit start-ups and fast-growing tech companies to compare how they approach their markets. We will look at the influence of company culture, different financing models, and the entrepreneurial ecosystem of the Bay Area. Students will also be given a consulting project from an alumni-run company addressing a current and as yet unsolved problem. Readings: *The Lean Start-up* by Eric Ries, *Thinking Course* by Edward deBono's, *Where Good Ideas Come From* by Steven Johnson, *The Mom Test* by Bob Fitzpatrick as well as articles and podcasts.

**Requirements/Evaluation:** Short paper and final project or presentation.

**Prerequisites:** No academic prerequisites

**Enrollment Limit:** 12

**Enrollment Preferences:** Students with a demonstrated interest in Entrepreneurship

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Tonio has many years of entrepreneurial and business experience both in the US and internationally. These include the launching of a German language TV channel and inventing a fabric gift wrap product. Bowdoin with an MBA/MA from Wharton/UPenn.

**SPEC 29 (W) Down the Road and Across the World: Transformative Education in Pittsfield Public Schools**

By the time you graduate high school, you will have spent somewhere around 12,600 hours sitting in classrooms. When you're a student, you only experience one class at a time-but have you ever thought about the work that goes into running an entire district? From choosing a curriculum to training new teachers, from spending a \$65 million budget to hiring over 2,000 employees, there are countless decisions that district administrators need to make each day. How do they design a school system that meets the needs of thousands of students, and what is their role in creating a more equitable society-starting in pre-school? Over the course of your Winter Study, you will work closely with Judy Rush, Curriculum Director, and Ryan Buggy '19, Equity of Learning District Data Coordinator at Pittsfield Public Schools. Each week, we will explore a new topic within K-12 education, such as the use of data to eliminate identity-based opportunity gaps, the alignment of instructional practices with scientific evidence, and the different services we provide to meet the needs of a diverse range of students. Throughout the entire month, you will also try your hand at creating curriculum resources for our teachers-and even get a chance to use them yourself with students of your own. We will meet once a week virtually and twice a week in person for a total of ~12 hours. During virtual sessions, we will check in on the curriculum design projects and discuss readings from texts such as *The Knowledge Gap* by Natalie Wexler, *Solving Disproportionality and Achieving Equity* by Edward Fergus, and *Culturally Responsive Teaching and the Brain* by Zaretta Hammond. Then, during our in-person sessions, you will have the opportunity to sit-in on meetings between educational administrators and ask questions about their roles. You will also spend some time in the classroom, seeing what it's like to teach in a high-needs public school district, and discuss it with your peers over dinner.

**Requirements/Evaluation:** Short paper and final project or presentation.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** If overenrolled, students will be asked to provide a brief summary (1-3 paragraphs) of relevant K-12 experience and explain why they're interested in the course, particularly if they're considering a career in public education.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Attributes:** EXPE Experiential Education Courses STUX Winter Study Student Exploration

### **SPEC 33 (W) Community Arts in Education**

In this course, students will explore the diverse opportunities that fall within community arts and education. As part of the exploration students will research the work of artist educators and arts education programs in a variety of community contexts, develop skills to plan, implement and evaluate arts education programming, and document creative processes and arts education program outcomes. Examine the opportunities for artist-educators in a variety of settings. Develop skills as community arts practitioners including program design, implementation, documentation and assessment. Explore education theories grounded in social justice education with a focus on diversity, equity, and inclusion. Explore the creative process as a means of activism, community development, and youth development. Explore flexible strategies in arts integration across art forms Students will explore community arts education examples across a variety of settings, matching individual interests and career paths. Each student will participate in the design and implementation of a community arts education program providing a practical, real-world experience that links theory and practice. We will meet as a class 3 days a week for 2-3 hours. Each class will have: -a hands on exploration of arts based strategies that can be used flexibly to foster learning, -discussion of the readings/viewings -students will draw from the Integrating the Arts Across the Curriculum text, and a series of video examples. -writing/reflection -students will design their own mini-workshop based on their area of interest Students will have about 7-8 hours of class time and will also have the opportunity to present their final workshop plans

**Requirements/Evaluation:** Final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** I would prefer a limit of about 15 students in order to be able to allow for presentations of student workshop ideas engaging the class in experiential exploration.

**Expected Class Size:** NA

**Grading:** pass/fail only

LEC Section: 01 MW 1:00 pm - 3:50 pm Lisa M. Donovan

### **SPEC 34 (W) Reading, Writing, and Eating**

You may have heard that the way to one's heart is through their stomach. How can something as fundamental as food help us understand more about our identity? How can food help us write creatively and convincingly about who we are, whom and what we love, and what we stand for? In this course, we will read about growing, eating, and cooking food, as well as about dining out. We will write in response to the texts we're reading and to the food we're eating. Our goal is to learn how to engage in critical analysis and self-inquiry to better understand writing skills like argument, analysis, grammar, and style, and how to write the personal for a public audience. This course is designed to support students who need extra instruction in the fundamentals of English composition, especially students for whom English is an additional language. Readings and texts will include excerpts from Zauner's *Crying in H Mart*, Lee's "Coming Home Again," Laymon's *Heavy*, Foster Wallace's "Consider the Lobster," Chang's *The Next Thing You Eat*, and more. We'll meet for six hours each week, and the class will occupy significantly more time outside of the classroom—roughly twenty hours a week—during which you'll be engaged in the writing process, the eating experience, and reading for class. There will be at least one group meal at a local restaurant. Students will write three major assignments: a narrative nonfiction essay and two longform reviews.

**Requirements/Evaluation:** A 10-page paper

**Prerequisites:** N/A

**Enrollment Limit:** 12

**Enrollment Preferences:** This is a course ideally for EAL students

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Elizabeth Mikesch is the author of *Niceties: Aural Ardor, Pardon Me (Calamari)*. She teaches at the Bard Microcollege in Holyoke, UMass Amherst, and sometimes Smith.

LEC Section: 02 MW 1:00 pm - 3:50 pm Elizabeth Mikesch

LEC Section: 01 Cancelled

### **SPEC 35 (W) Making & Managing Choice with Design Thinking**

The course will introduce Design Thinking (or Designerly Thinking) as a practice for making and managing choice across a broad range of meaning-making scenarios, from problem-solving to innovation. Design Thinking enables people to create multiple opportunities for positive change that may consist—in a worst-case scenario—in failing fast, and failing cheaply. While learning and practicing Design Thinking participants will develop empathic listening, problem framing, divergent and convergent thinking, creative and analytical problem-solving, risk and failure management, visualizing information, and cross-disciplinary teamwork, among other skills. The course consists of daily (Monday through Friday) 75-minute *sessions* of instruction, followed by approximately 3 hours of self-directed, practical *fieldwork* in teams of 5 to 6 people. Each session will consist of four components: 1. a presentation, recap, or variant of the framework of Design Thinking (including references for further reading, listening, or viewing as appropriate); 2. a description of a specific practice within the framework; 3. illustrations of that specific practice with real-world examples; 4. a description of the self-directed fieldwork assignment, with clarifications as required. Following the first fieldwork assignment, each session will begin with Q&A on challenges or other considerations that arise from the previous sessions' assignment(s). Each team may choose a practical topic to work

on in the field for the duration of the course. The topics may be original with each team or shared. We suggest topics familiar enough to the participants to avoid steep learning curves, but not to the point of risking too much bias during the problem framing. The instructor will provide a template for teams to present the outcome of their project during the last session. Failed projects will be integral to the learning experience, and accepted as deliverables.

**Requirements/Evaluation:** Final project or presentation.

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** Applied arts or applied sciences majors

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Trained in architecture, engineering, design, and city planning, Ralf Korbmacher has practiced Design Thinking since 1988 to create growth opportunities for businesses, GOs, NGOs, and cities in the Americas, Europe, the Middle East, and North Africa.

### **SPEC 37 (W) Drum2Talk: Rhythm, Relationship, and Race**

The students will create music cooperatively in drum circles using West African percussion instruments and participate in guided conversations about Race in America. Recognizing that racism has a profound impact on the lives of ALL Americans, the course will offer many opportunities to engage in and benefit from the emotionally healing aspects of rhythmic expression. The course will be expected to engage with selected readings and audio/visual from the deep breath of literature and media materials on Race, Identity, and Wellness. Additionally, drawing on our class conversations, the students will write and reflect daily in their journals. Although the journals are only for the eyes of the author, the students will submit a 2-page "Reflection of Position paper" due at the beginning and end of the course. The students will learn several important West African Ensemble pieces and the cultural context they fit into their country of origin. The participants will develop and practice the skills of Drum Circle Facilitation in their expected regular small group practice/"jam" sessions outside of the class. They will develop and use rhythmic improvisational skills. They will be able to publicly perform these West African Drum Ensemble rhythms. The students will be expected to have daily conversations with others outside of the course on issues around Race in America, reflect on those conversations in their journals daily, and summarize the essence of those conversations in the class.

**Requirements/Evaluation:** Regular appropriate full participation in discussion about the readings, media materials, and the drumming. Writing reflections in their journal from the frequent conversations they will be expected to have with persons outside of the course. There will be a public performance of the rhythms and music learned during the process of the course.

**Prerequisites:** This course is primarily for those with NO EXPERIENCE playing West African instruments however all levels and ranges of experience are welcomed and will gain in skill level. The primary focus is participation in conversations about Race and Racism.

**Enrollment Limit:** 16

**Enrollment Preferences:** 1.) Those with a stated STRONG desire to engage in conversation on race and identity. 2.) Those willing to explore their own family's relationship to the issues of racism.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Otha is a Drum Circle Facilitator working with a wide range of clients from corporate thru all levels of education, and Wellness. He has taught music at various schools in New England, including Williams College. He has toured as a Concert Pianist.

### **SPEC 95 (W) Gaudino Fellowship: Immersive Engagement and Reflection**

The Gaudino Fund is offering Gaudino Fellowships for a group of 2 to 4 students during Winter Study, based upon a proposed domestic or foreign collaborative project. Student teams should organize their proposed projects around two main components: direct encounter with otherness and self-reflection. Projects will be evaluated on whether they subject the students to "uncomfortable learning", i.e. having an experience that challenges and perhaps alters one's view of what it is to live a good life and the group's commitment to incorporate separate home stays for each fellow as part of their project, either joint or separate work/engagement internships, and a structure to facilitate collaborative action and learning. The team selected will be guided and overseen by the Gaudino Scholar who will conduct appropriate preparatory discussions and follow-up sessions to optimize and help students articulate lessons learned from the overall experience. The intent of the program is to open the student to an understanding (of both the familiar and unfamiliar), and to a development of empathy, that could not be achieved without the fellowship experience. N.B. Each prospective team needs to meet with the Gaudino Scholar as early as possible, but no later than September, and submit their group application by September 30. Application guidelines can be found at [winterstudy.williams.edu](http://winterstudy.williams.edu). Each student is expected to write a short (3-4 page) self-reflection before leaving for WSP, keep a journal of their experience, as well as write a 8-10 page paper by the end of the Winter Study period reflecting on their experiences and what has changed in the student's perceptions and beliefs from the opening essay. They will also meet the other members of the team on a weekly basis during Winter Study and regularly update the Gaudino Scholar by email and/or Skype calls. The team that receives the Gaudino Fellowship will give a brief presentation to the Board about their experience at the Board's spring meeting in April. The team whose project is approved will receive the Gaudino Fellow designation. In addition, students on Financial Aid will receive Gaudino funding from a minimum of 50% to a maximum of 90% of the budget for the project up to \$2,500, as determined by the Financial Aid office. No additional funding for students' projects will be provided by the College.

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** selection is made on basis of proposal

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Once proposals are approved, the Registrar's Office will register students.

### **STAT 19 (W) Chess and Speed Chess**

This course will present a fast and fun introduction to chess, speed chess, and multi-player variants of classical chess. We'll begin with the rules of chess, and a study of classical openings, theory, checkmates, and endgames. These concepts will be practiced through in-class games. We will always make use of chess clocks, limiting a player's total thinking time. Chess clocks are an important part of tournament chess and speed chess, and are critically important in several chess variants we'll explore. This will open up your eyes to the high-paced, social, and extremely fun nature of recreational chess. Students will immensely enjoy learning and playing these variants, and will be surprised at how much fun chess can be. The course will culminate in a series of informal tournaments among the class.

**Requirements/Evaluation:** Short paper and final project or presentation. In-class tournament participation

**Prerequisites:** Prior chess experience

**Enrollment Limit:** 20

**Enrollment Preferences:** Please submit a brief statement of your present chess knowledge and experience.

**Expected Class Size:** NA

**Grading:** pass/fail only

### **STS 250 (F) Environmental Justice (DPE)**

**Cross-listings:** STS 250 ENVI 250

#### **Secondary Cross-listing**

How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

**Requirements/Evaluation:** several short essays, final essay

**Prerequisites:** ENVI 101 or permission of the instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** juniors, seniors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

STS 250 (D2) ENVI 250 (D2)

**Difference, Power, and Equity Notes:** This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. This is a service-based learning course, and students will hone skills to address environmental injustices.

### **STS 370 (F) Campus and Community Health in Disruptive Times (DPE) (WS)**

**Cross-listings:** WGSS 371 ANTH 371 STS 370

#### **Secondary Cross-listing**

This class engages with the methods of medical anthropology & medical sociology to help students design and implement ethnographic projects that explore health on campus or our wider community. Along the way we consider how disruptive moments like COVID-19 can reveal underlying social inequalities of healthcare access, health outcomes, and well-being; for which we propose innovative and student-focussed solutions. Students will learn and use design thinking, data visualization, and participatory ethnography while engaging with a variety of qualitative methods such as semi-structured interviews, focus groups, and qualitative surveys. We situate and explore our ethnographic projects within a campus and wider communities that are always already structured by power, privilege, and intersectional identities that shape health and well-being. We explore the field of narrative medicine and medical anthropology by developing and practicing skills in active listening, open dialogue, mindfulness, empathy, and curiosity that can profoundly shape ethnographic as well as the patient/provider encounters. For context, we read ethnographic case studies that explore a variety of topics including how structural racism and implicit bias shape clinical medicine & medical education in the US, how concepts of sexual citizenship can reshape our understanding of campus sexual assault, how the spread of US psychiatry has shaped a global landscape of mental health, and how queer activism responded to the HIV/AIDS crisis in the US. Our goals are to create participatory research projects that both explore and alter our habitual practices and individual ways of seeing the world around us.

**Requirements/Evaluation:** Weekly attendance, 3 written fieldnotes (3000 words), weekly writing & fieldwork exercises in class and out of class, a final presentation that includes data visualizations and analysis of research findings.

**Prerequisites:** A course in Anthropology, Sociology, STS or in DIV II is strongly recommended

**Enrollment Limit:** 20

**Enrollment Preferences:** Majors in Anthropology, Sociology, WGSS; Concentrators in PH, STS, ASIA, ENVI

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 371 (D2) ANTH 371 (D2) STS 370 (D2)

**Writing Skills Notes:** This class assignments includes over 9,000 words of essay assignments, and will help students develop critical writing skills, including use of rhetoric, evidence, argument, synthesizing data, logic, and anticipating counter-arguments.

**Difference, Power, and Equity Notes:** This class uses experiential learning to examine the intersectionality of race, class, gender, & sexuality in impacting healthcare and health outcomes. It explores the ways that intersectionality and implicit bias shapes health and well-being in patient/provider encounters as well as ethnographic research. It engages with and critiques efforts to 'improve' community and individual health outcomes in the US and elsewhere across the globe.

### **THEA 13 (W) Stitch Circle: Knitting as Social Practice**

Do you knit? Have you ever wanted to learn how to knit? In this studio course, intended for both beginners and more advanced knitters, students will come together to experience the joy, fun, contemplative practice, and social activity of the stitch circle. Working with The Spin-Off yarn shop in North Adams, students will select an accomplishable project suited to their unique skill level (scarves, hats, blankets, mittens, socks, tea cozies, etc.). Establishing our class as a knitting circle, we will gain practice as knitters, working towards the completion of our individual projects. But we will also spend time in the circle discussing and learning about knitting as a social practice, one often involving women or historically marginalized social groups. During the term, students conduct independent research on a particular knitting practice, form, or cultural/regional type of knitting, sharing their discoveries with the group in the form of a brief oral presentation and accompanying poster. Each student will also be responsible for curating a "playlist" of music chosen for each circle. At the end of the term, we will share our knitting projects and research with the community by way of a class exhibition. Students should be prepared to spend time knitting outside of class. A field trip to The Spin-Off shop to select and obtain materials is mandatory. We may also take a field trip to a nearby fiber animals farm and fiber mill to learn about the process of raising animals for wool as well as spinning, carding, dyeing, and manufacturing wool.

**Requirements/Evaluation:** Final project or presentation

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** In overenrolled, preference will be given to students with some experience in the creative arts, whether visual or performance based.

### **THEA 15 (W) The Red Nose Clown**

The Red Nose clown. This intensive will push students to find their most vulnerable self. To be in front of an audience without their social mask but rather with the smallest mask in theater, the Red nose. The red nose reveals the naive, the idiot, the most evident state of an actor before it starts acting. To be stupid, really stupid, not act stupid is the hardest task for an actor. To be true, to go beyond the "trying to be" but really just be there in

front of an audience in the present moment is a gift for any artist. The red nose allows us to see humanity in its most disconstructed state. It makes us laugh, because we are all living off balance trying to keep up with all the bumps along the road and pretending that we've got it all figured out. The clown doesn't pretend, it tries hard to survive. And somehow that makes us laugh. This intensive will guide you to see and be seen by an audience. To try to be the best at something even if you're not, to live through the "flop", the failure of success. You will discover your "idiot" and interact with other clowns to create pieces that will be shared with an audience. To make us laugh. Or maybe smile? Or maybe cry... Humanity is so complex and the clown flirts with its intimacy to remind us that it's ok to fall, it's ok to want to be the best, to be pretentious because we care so much. The clown is not ironic. It is sincere... and it is that sincerity that touches us and makes us laugh and understand one another more.

### **THEA 22 (W) A Filmmaker's Workshop**

This 4 week filmmaking workshop will culminate in screening of 6- 8 short films which are written, acted, directed and edited by students. The class is taught by actress Jessica Hecht and her husband director/writer Adam Bernstein. The project was offered in 2019 and accommodated 30 WS students. We would love to offer it once again with a slightly deeper focus on writing and direction. The key to this project is collaboration in the creative process. Each week there will be approx 8 hours of in class time and 10 -12 hours of practical work outside of class. The week we shoot ( week 3) will be the most demanding. Supplemental reading and film viewing is recommended. We will offer a set of resource materials. The weekly structure is as follows: WEEK ONE : Fundamentals of filmmaking -The Writer's Approach Our first week allows students to look at several examples of shorts films and experiment with writing prompts and improv exercises to build familiarity with how to structure a story. The week culminates in the formation of groups (4-5 students each) whose interest in a specific area of production has been noted. Scripts will be generated from these groups. We will read and discuss changes with each group. All students participate as needed but will have more responsibility in one self chosen area. WEEK TWO: Fundamentals of TV and Film Direction The skills of screen acting vs acting on stage As scripts are being refined, participants will be schooled in basic shots, the director's role and the actor's preparation. Scripts are due by mid week, casting is completed by Friday WEEK THREE: Shooting a Film Groups are schooled in the organization of a shoot and the essential jobs of the crew. Films are shot over three days - a Final Pro vs AVID editing workshop completes the week. WEEK FOUR: Completing the Filmmaking Process. Films are edited and music added for the first 3 days of week. A public screening is organized to com

**Requirements/Evaluation:** final project or presentation

### **THEA 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City**

**Cross-listings:** AMST 331 COMP 330 THEA 330

**Primary Cross-listing**

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as *Harper's Weekly* (Lafcadio Hearn), *The Awakening* (Kate Chopin), *A Streetcar Named Desire* (Tennessee Williams), *The Moviegoer* (Walker Percy), *Why New Orleans Matters* (Tom Piazza), *A Confederacy of Dunces* (John Kennedy O'Toole), *New Orleans Sketches* (William Faulkner), *One Dead in the Attic* (Chris Rose). Film examples such as *A Streetcar Named Desire*, *An Interview with a Vampire*, *The Curious Case of Benjamin Button*, *When the Levees Broke*, *Treme*, *Waiting for Godot* (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

**Requirements/Evaluation:** will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

**Prerequisites:** none

**Cross-listings:** AMST 358 THEA 341 LATS 341 WGSS 347 SOC 340

**Secondary Cross-listing**

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

**Requirements/Evaluation:** masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** a short statement of interest will be solicited

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 358 (D2) THEA 341 (D2) LATS 341 (D2) WGSS 347 (D2) SOC 340 (D2)

**Difference, Power, and Equity Notes:** This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

**WGSS 113 (F) The Feminist Poetry Movement (DPE) (WS)**

**Cross-listings:** WGSS 113 ENGL 113 AMST 113

**Secondary Cross-listing**

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

**Class Format:** discussion, some lecture, project work in archives and art gallery

**Requirements/Evaluation:** two-three short analysis papers, creative (1-2 pages), discussion posts, curated final project (archival exhibit and digital project), presentations

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first years

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 113 (D1) ENGL 113 (D1) AMST 113 (D1)

**Writing Skills Notes:** Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

**Difference, Power, and Equity Notes:** The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

**WGSS 26 (W) Community Mobilization in Senegal for Public Health and Economic Empowerment**

This class will take a group of 6 students to Senegal to learn about successes and challenges in grassroots organizing, with a focus on the interrelated areas of public health -- especially Covid and HIV -- women's rights, and economic empowerment, including through cooperatives. We will build on established relationships in Senegal, where the instructor has taken several groups of students since 2006. That country has many lessons to teach, as a majority Muslim culture where women have created and continue to build cooperatively owned enterprises, a West African country that has had a good degree of success fighting Covid and consistently kept the rate of HIV prevalence under 1%, and a diverse culture with a democratic tradition of

tolerance, even celebration of ethnic difference. Our hosts, ACI's Baobab Center, have a strong record of working with visiting scholars and students to teach them local languages and orient them to Senegalese culture, as well as a deep and well-respected history of capacity-building work with local groups working on HIV, public health, women's rights, and LGBTQ issues. We will spend our first week in Dakar, the capital, with students doing homestays with Senegalese families. We will attend Wolof classes and lectures on local issues as well as visiting NGOs. In our second week we will move inland to the town of Kaolack, where we will be hosted by the Association pour la Promotion de la Femme Sénégalaise, a 30-year-old group with an extensive record of empowerment of village women through strategies ranging from small-scale credit to popular education and theater.

**Requirements/Evaluation:** A 10-page paper.

**Prerequisites:** Preference will be given to students with skills in French and a demonstrated interest in public health and/or women's economic empowerment.

**Enrollment Limit:** 6

**Enrollment Preferences:** Preference will be given to students with skills in French and a demonstrated interest in public health and/or women's economic empowerment. Students applying for the class will be asked to provide the instructor with a statement of purpose.

**Writing Skills Notes:** This class assignments includes over 9,000 words of essay assignments, and will help students develop critical writing skills, including use of rhetoric, evidence, argument, synthesizing data, logic, and anticipating counter-arguments.

**Difference, Power, and Equity Notes:** This class uses experiential learning to examine the intersectionality of race, class, gender, & sexuality in impacting healthcare and health outcomes. It explores the ways that intersectionality and implicit bias shapes health and well-being in patient/provider encounters as well as ethnographic research. It engages with and critiques efforts to 'improve' community and individual health outcomes in the US and elsewhere across the globe.

# FILM AND MEDIA STUDIES

Advisors: Professors: B. Mladenovic, S. Rosenheim.

Film and Media Studies is a vibrant interdisciplinary field. It studies traditional visual and audio-only forms, such as film, television and radio, as well as new media such as podcasts, video installations, interactive video projects, video games, augmented reality, animation, streaming video and other forms that will undoubtedly emerge in the future. Given the explosive growth in the variety of moving-image media, and their penetration into entertainment, art, science and public discourse, the study of film and related media must encompass a variety of theoretical approaches and must cultivate a number of specific skills in production and analysis. Production and analysis feed into each other, together providing the necessary tools for understanding why and how the moving image generates meaning in the world. The field of film and media studies thus unites numerous aspects of production, theoretical lenses of analysis and interpretation, and critical understanding of the complex relations between media and larger social and cultural forces.

Students interested in Film and Media Studies will naturally take different paths through the numerous relevant courses offered at Williams. It is however strongly recommended that they seek a balance between production courses (most of which are offered by Art Studio, Computer Science, and Theatre) and theoretical courses (offered by numerous departments in Divisions I and II). This will help students to think critically both **about** and **with** moving images, in the same way that they think with and about words.

Currently, students interested in film and media can major in the field only through the Contract Major. Guidance on course selection (with or without the aim of completing the contract major in film and media studies) can be sought from the faculty with whom students take the first couple of film and media courses. In addition, professors Bojana Mladenovic (Philosophy), and Shawn Rosenheim (English) have volunteered to serve as advisors to students interested in this field.

## FMST Core Courses

### AFR 110 (S) Television, Social Media, and Black Women 'Unscripted'

**Cross-listings:** AFR 110 WGSS 111

#### Primary Cross-listing

Nene Leaks, Issa Rae, Zendaya, Oprah Winfrey, Lavern Cox and Joy Reid have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed--these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

**Requirements/Evaluation:** class participation, podcast, vlogs, 10-page paper, and a formal class presentation

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** First year Students

**Expected Class Size:** 13

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

## **AFR 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film**

**Cross-listings:** WGSS 283 AMST 283 ENGL 286 AFR 283

### **Secondary Cross-listing**

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

**Requirements/Evaluation:** facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators

## **AFR 321 (F) Trending Black: Race & Social Media in the 21st Century**

The 21st Century ushered in new and exciting ways for people to communicate digitally. With the creation of social media outlets like Facebook, Twitter, Instagram, and more recently TikTok, connecting with the world is literally one click, or selfie away. Though much of the attention around social media is focused on people with race and educational privilege, people of color have created their own spaces to curate, articulate, and produce culture. Through the methods of rhetorical criticism, critical discourse analysis, cultural criticism and ethnography, we will investigate the ways Africana cultures, specifically in the United States, utilize social media to shape community and influence popular culture. This course will give students hands-on experience analyzing various texts, and a deeper understanding of rhetorical methodologies.

**Requirements/Evaluation:** class participation, response papers, and a final research project

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** sophomores, juniors, seniors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

## **AFR 337 (S) Queer in the City (DPE)**

**Cross-listings:** AFR 337 AMST 337 WGSS 346

### Secondary Cross-listing

In this course we will examine the various ways scholars and filmmakers have used ethnography as a critical tool for understanding the intersections of race, place, space, gender and sexuality. We will foreground studies that examine unfamiliar sites of Black struggle, resistance, and survival. We will examine Black gender variant and sexual minorities and how they produce, reproduce and struggle for spaces and places of desire, community, pleasure, love, and loss. We will explore these stories through primarily ethnographic modalities. We will discuss the political and ethical ramifications of these ethnographic narratives paying particular attention to the usefulness and limitations of both 'Thin' and 'Thick' descriptions. We will use ethnography to center debates regarding the politics of representation of racialized queer space, place, and people through both filmic and written accounts. All students will be asked to discover and develop their ethnographic voices through various critical, creative, experimental and performative assignments.

**Requirements/Evaluation:** facilitated class discussion; weekly critical response papers; creative projects

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** WGSS majors; students may be asked to write a short statement of interest in the event of over-enrollment

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### AFR 339 (S) The *Banlieue* in Literature, Music, and Film (DPE) (WS)

**Cross-listings:** RLFR 300 AFR 339 COMP 336

### Secondary Cross-listing

The *banlieue* looms large in the French collective imagination. From its origins in medieval law, the term *banlieue* at the end of the 20th century has taken on multiple, at times overlapping, but almost exclusively negative meanings. It designates a peripheral geographical space often in contrast to its city center, social exclusion, "urban culture"--as in Hip Hop-produced within that space, and last but not least the symbolic bias through which its inhabitants are viewed (Vieillard-Baron). In this course, we will examine various constructions of the *banlieue* in French music, a manifesto, film, blogs, and literature to focus on the analytical, contestatory and affirmative dimensions of these narratives. Two decades after the film *La haine*, and ten years after the riots, how are filmmakers, artists, authors, and scholars of the *banlieue* reimagining and reframing the *banlieue*? What do current depictions of *banlieues* in the French media tell us about the State, French politics, and the state of French politics? What do "*banlieue* films" and "*banlieue* lit" tell us about the *banlieue*? In this course, conducted in French, we will read, watch, and listen to various constructions of the *banlieue* in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

**Requirements/Evaluation:** 3 thesis five-page research papers, 2 start-of-the-class brief presentations, active participation to in-class discussions and mini-conference on the *banlieue* (class final project).

**Prerequisites:** RLFR 105 and above

**Enrollment Limit:** 14

**Enrollment Preferences:** French majors and certificate students, Africana and Comparative literature students

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

RLFR 300 (D1) AFR 339 (D2) COMP 336 (D1)

**Writing Skills Notes:** To hone their research and writing skills (and prepare for their conference on the *banlieue*), students will write three research papers (with thesis statement and subheadings) from which they will receive professor feedback.

**Difference, Power, and Equity Notes:** This course, Banlieue in Lit, Music, Film fosters difficult but carefully framed conversations about race, class, gender, citizenship, housing segregation, discursive practices, immigration and belonging in contemporary France and how identities and power relationships are expressed in banlieue film, literature and French hip hop music.

### **AMST 205 (F) Chicana/o/x Film and Video**

**Cross-listings:** AMST 205 WGSS 203 LATS 203 ARTH 203

#### **Secondary Cross-listing**

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicanxs in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o/x-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o/x representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

**Class Format:** Discussion-oriented lecture class. In addition to class meetings and readings, students will be expected to watch 3-5 hours of film per week on GLOW or in the library.

**Requirements/Evaluation:** one short paper, mid-term exam, final exam and take home essays

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** Art majors; LATS concentrators

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

### **AMST 333 (S) An American Family and "Reality" Television (WS)**

**Cross-listings:** WGSS 312 ARTH 310 AMST 333

#### **Secondary Cross-listing**

*An American Family* was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the *An American Family* series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 14- to 18-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

**Requirements/Evaluation:** class presentations, research assignments and annotated bibliographies, and final 14- to 18-page research paper.

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** junior Art majors, followed by senior majors

**Expected Class Size:** 12

### **AMST 346 (F) Latinas/os and the Media: From Production to Consumption**

**Cross-listings:** LATS 346 AMST 346

Secondary Cross-listing

This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

**Requirements/Evaluation:** student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted in stages

**Prerequisites:** LATS 105 or permission of the instructor; no first-year students are permitted to take this course

**Enrollment Limit:** 12

**Enrollment Preferences:** Latina/o Studies concentrators or American Studies majors by seniority

**Expected Class Size:** 12

### **ANTH 225 (F) Ways of Seeing**

This course examines the potential of images for revealing aspects of cultural normally obscured by the written word and for transmitting different, sometimes undervalued insights and knowledge of the social world. The central focus of this course is documentary film, and we will consider both the theory and practice of the documentary in the United States and abroad as it has evolved over time and as it is evident in contemporary filmmaking. In the course of the semester, we will examine some of the ways in which filmmakers, and ethnographic filmmakers in particular, have approached the task of documenting and understanding different aspects of social reality. Among the questions that we will consider are the following: What is the

relationship between written texts and images? What is it that documentary films "document?" What is the relationship between images and stories, and should the techniques used in fiction films to construct voice, point of view, identification, narrative sequence, etc. apply as well in the creation of nonfiction films? What is the role of film in anthropology, and how does ethnographic filmmaking relate to anthropology and to the broader documentary film tradition? In the last part of the course, we will consider the proliferation of cell phone videos and platforms such as Youtube and Instagram and their significance for the documentary film genre more generally.

**Requirements/Evaluation:** Weekly response/critiques of assigned films, a longer written paper (10-12 pages) or video essay of comparable scope

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Anthropology/Sociology majors, open to first-year students

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** FMST Core Courses

Not offered current academic year

### **ANTH 330 (F) The Documentary Project: Ethnography and the Visual Narrative**

The goals of ethnography and documentary work overlap. Both strive to communicate a compelling sense of people's lives, and to connect them to broader struggles and issues faced by others. Further, ethnography as a method emphasizes a close and sustained interaction, or "engagement" between the practitioner and her subjects. In this class, students will have the opportunity to practice both engagement and compelling presentation, by working throughout the semester on planning and executing a documentary project. The course will emphasize the use of visual narratives accompanied by text and audio drawn from interviews. Students will practice different types of documentation, and consider techniques for approaching, imaging and interviewing subjects. The practical aspects of developing a project, gaining access, working in unfamiliar environments and editing both visual and audio material will be reviewed. Conceptual topics will include myths about "truth" and "objectivity" in visual media, tensions between the goals of the documentarian and her responsibilities to her subjects, and differences between the documentary and ethnographic point of view. Acceptance into the class requires technical competence in photography or videography (as evidenced by prior coursework or portfolio), and a demonstrated ability to work independently and to commit to a long-term project. Participants should expect to spend significant time working off campus.

**Requirements/Evaluation:** develop and execute a semester length documentary project under instructor guidance; produce and edit weekly visual and audio content; participate in class critiques

**Prerequisites:** SOC 236 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** FMST Core Courses

Not offered current academic year

### **ARAB 401 (F) Topics in Advanced Arabic: Contemporary Arab Cinema (DPE) (WS)**

The Arab world is a fascinating region with rich traditions and vibrant societies. Through an exploration of contemporary Arab cinema, this course will introduce you to issues in modern Arab societies that represent the diversity of the region as well as the shared concerns and challenges. We will analyze select movies and texts, exploring how Arab filmmakers represent social, political, and economic change and realities in their societies. Some topics include nationalism and national identity, gender identities, civil wars, religion, social justice, and the recent revolts. The course will be conducted in Arabic, and we will employ linguistic and paralinguistic analyses of the movies as a means to explore modern Arab thought and cultures.

**Requirements/Evaluation:** class participation, daily writing and reflections, quizzes, blogs, leading a movie discussion, and a final project.

**Prerequisites:** ARAB 302 or equivalent.

**Enrollment Limit:** 19

**Enrollment Preferences:** if the course is overenrolled, preference will be given to Arabic majors.

**Expected Class Size:** 5-7

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** Students will engage in daily writing and reflections involving prose responses to discussion prompts, movies, YouTube videos, articles, and quiz prompts. The students will also write blogs, a minimum of one speech, and a 5-7 pp. final research paper. The instructor will give daily feedback on students' writing as well as training in writing skills to advance their writing abilities.

**Difference, Power, and Equity Notes:** The students will engage in an exploration of social, political, and economic realities in Arab societies. They will examine similarities and differences across a variety of contexts involving differential power dynamics, biases, and gender roles. They will reflect on issues of power based on internal and external factors in these societies as positioned in a region torn by political, social, and religious conflicts.

### **ARTH 367 (F) Documentary Fictions**

**Cross-listings:** ARTH 367 ENGL 367

#### **Secondary Cross-listing**

The first movies excited viewers not by telling stories, but by reproducing the world: a dancer's billowing skirts, the sight of Niagara Falls, the arrival of a train at the station--such vignettes felt viscerally real. Our fascination with documentaries derives, in large part, from the way seemingly transparent images are woven into narratives full of hidden assumptions. Every viewer of the Zapruder film sees the same thing: President Kennedy, struck by a bullet, lurches forward. But what that might mean--whether it points toward a lone gunman or a conspiracy, toward the Soviet Union or the CIA--still remains uncertain. We'll explore the tensions between image and story, evidence and context, in films ranging from Fred Ott's "Sneeze" (1894) to Josh Oppenheimer's *The Act of Killing* (2012), concluding with a look at the effects of contemporary image technologies on our sense of personal and national identity. Readings for the course will be drawn from narrative theory, epistemology, and cultural theory, as framed by writers including Trinh Minh-ha, Christian Metz, and Bill Nichols.

**Requirements/Evaluation:** four written and multimedia exercises (1-2 pages each), two essays (six and twelve pages), and a willingness to experiment with formats

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** English majors; Art and Comparative Literature majors; students with experience making video

**Expected Class Size:** 25

**Grading:** no pass/fail option, no fifth course option

### **ARTS 260 (S) Objects in Video, Video as Object**

In a world where the screen is often taken for granted, how might we begin to dissect the ways video has transformed visual perception? This course will focus on video installation and how video is transformed by its physical context. We will examine how videos shift our relationship to objects in space. Students will experiment with lighting and set building, paying particular attention to how surfaces are transformed by the lens. We will also explore projection mapping, built installation, and the peculiarities of the screen. We will look at works by artists who have emphasized the physicality or immateriality of video through installation and web-based art. We will read a variety of texts, charting the shifting role video has played in contemporary society. Through weekly assignments and regular critiques, we will begin to unpack how the videos we make contact with daily can shift our relationship with our own bodies and our surrounding environment.

**Requirements/Evaluation:** discussion, participation, and the technical and conceptual strength of the projects, with consideration given to individual development

**Prerequisites:** 100 level video course

**Enrollment Limit:** 12

**Enrollment Preferences:** current and prospective Art majors

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Materials/Lab Fee:** \$125

### **ASIA 153 (S) Japanese Film**

**Cross-listings:** ASIA 153 ASST 153 COMP 153

Secondary Cross-listing

From the swashbuckling samurai films of Kurosawa and delicate family dramas of Ozu to edgy cinematic experiments and a breathtaking range of animation, Japan has one of the most varied and exciting film traditions in the world. This course will introduce you to major periods, genres, and directors in that tradition. We will read film criticism that represents a range of approaches, but we'll focus particularly on learning and practicing the kind of close visual analysis that will allow you to build your own original descriptions of how a given scene "works." Throughout the course we will consider the relationship between classic cinema and popular genres like sword flicks, melodramas, psychological thrillers, and anime, focusing particularly on directors whose work seems to borrow equally from genre film and the artistic avant-garde. *All texts are translated or subtitled.* All levels welcome.

**Requirements/Evaluation:** attendance & participation, a few short response assignments, two 5-page papers, in-class test

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** students majoring or considering a major in comparative literature

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1)

**Cross-listings:** CHIN 226 COMP 296 ASIA 226

Secondary Cross-listing

From the first "wows" that the short films invoked at a Shanghai teahouse in 1896, Chinese films have made successive wonders that straddle reality and fantasy, technological modernity and shadow-making craft, aesthetic experiments and monetary yearnings, global investments and local interest. This seminar will explore the evolving relationships between Chinese films and five "significant others" that are central to film and film-making. Roughly following a chronological order, this course will examine 1) the effect of new technological developments (such as photography, sound, color, special FX) on film; 2) the tension between film and traditional modes of public entertainment (such as operas and shadow plays); 3) film's social role to affirm and contest gender, national, and class identities; 4) the need to garner differing sources of financial support (state funding, cultural entrepreneurs, and transnational capital); and 5) the circulation of Chinese films in the global market. Class materials include various genre films (melodrama, horror, martial arts, comedy, etc.), directors' notes, contemporary reviews, and scholarship in China and media studies. All materials and discussions are in English.

**Requirements/Evaluation:** Evaluation will be based on 1) ACTIVE in-class discussion; 2) Pre-class discussion posts based on reading and recorded lectures (Graded as Complete or Incomplete); 3) Three short papers (3-5 pages); and 4) the final project (including a presentation, and a paper or other form of project).

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** current or prospective majors in Department of Asian Languages, Literatures, and Cultures; Comp Lit majors; those with Asian Studies Concentration.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**ASIA 228 (S) Present Pasts: The Politics of Memory in Contemporary Chinese Literatures and Films** (DPE) (WS)

**Cross-listings:** ASIA 228 COMP 297 CHIN 428

**Secondary Cross-listing**

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "pasts" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, mesology and mythology, amnesia and nostalgia, and diaspora and settlement in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or COMP and language learners wishing to take the course in Chinese should register under CHIN.

**Requirements/Evaluation:** attendance and participation, five 5-page papers, five peer-review and critique papers, revisions on selected papers.

**Prerequisites:** None for students taking the course under ASST and COMP 297; CHIN 402 or permission of the instructor for students taking CHIN 428

**COMP 336 (S) The *Banlieue* in Literature, Music, and Film (DPE) (WS)**

**Cross-listings:** RLFR 300 AFR 339 COMP 336

**Secondary Cross-listing**

The *banlieue* looms large in the French collective imagination. From its origins in medieval law, the term *banlieue* at the end of the 20th century has taken on multiple, at times overlapping, but almost exclusively negative meanings. It designates a peripheral geographical space often in contrast to its city center, social exclusion, "urban culture"--as in Hip Hop-produced within that space, and last but not least the symbolic bias through which its inhabitants are viewed (Vieillard-Baron). In this course, we will examine various constructions of the *banlieue* in French music, a manifesto, film, blogs, and literature to focus on the analytical, contestatory and affirmative dimensions of these narratives. Two decades after the film *La haine*, and ten years after the riots, how are filmmakers, artists, authors, and scholars of the *banlieue* reimagining and reframing the *banlieue*? What do current depictions of *banlieues* in the French media tell us about the State, French politics, and the state of French politics? What do "*banlieue* films" and "*banlieue* lit" tell us about the *banlieue*? In this course, conducted in French, we will read, watch, and listen to various constructions of the *banlieue* in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

**Requirements/Evaluation:** 3 thesis five-page research papers, 2 start-of-the-class brief presentations, active participation to in-class discussions and mini-conference on the banlieue (class final project).

**Prerequisites:** RLFR 105 and above

**Enrollment Limit:** 14

### **ENGL 204 (S) Hollywood Film**

For almost a century, Hollywood films have been the world's most influential art form, shaping how we dress and talk, how we think about sex, race, and power, and what it means to be American. We'll examine both the characteristic pleasures provided by Hollywood's dominant genres--including action films, horror films, thrillers and romantic comedies--and the complex, sometimes unsavory fantasies they mobilize. We will do this by looking carefully at a dozen or so iconic films, probably including *Psycho*, *Casablanca*, *The Godfather*, *Schindler's List*, *Bridesmaids*, *Groundhog Day*, *12 Years a Slave* and *Get Out*.

**Requirements/Evaluation:** Two 2-page essays, two editing exercises, a midterm, and a final exam

**Prerequisites:** None

**Enrollment Limit:** 60

**Enrollment Preferences:** English majors

### **ENGL 213 (S) Making Radio**

This course has two aims. The first is to teach the necessary skills (including interview technique, field recording, editing, and scoring) to make broadcast-worthy audio nonfiction. The second is to use this process to investigate fundamental aspects of narrative. How does a story build a contract with listeners? What's the role of the narrator? How can one appropriately speak for (and sometimes against) another person? This is less a course in journalism than an experiment in documentary cinema for the ear. We'll do some reading in narrative theory and radio technique, and will listen to exemplary works (including episodes of *This American Life*, *RadioLab*, *Love and Radio*, and *Snap Judgment*), but most of our time--and this is a time-consuming course--will be spent making and critiquing each other's pieces. Students will produce five or six pieces total, at least two of which must develop out of interviews with strangers.

**Requirements/Evaluation:** Five short audio pieces; attendance and active participation.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** sophomores; English majors; students with radio or studio art training

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** The student version of Hindenburg audio software (\$95); students on financial aid will have this expense covered by the college.

### **ENGL 286 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film**

**Cross-listings:** WGSS 283 AMST 283 ENGL 286 AFR 283

#### **Secondary Cross-listing**

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as *Looking for Langston* (Isaac Julien, 1989), *The Watermelon Woman* (Cheryl Dunye, 1996), *U People* (Olive Demetrius and Hanifah Walidah, 2009), *Tongues Untied* (Marlon Riggs, 1989) and *Litany for Survival* (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

**Requirements/Evaluation:** facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

### **ENGL 367 (F) Documentary Fictions**

**Cross-listings:** ARTH 367 ENGL 367

#### **Primary Cross-listing**

The first movies excited viewers not by telling stories, but by reproducing the world: a dancer's billowing skirts, the sight of Niagara Falls, the arrival of a train at the station--such vignettes felt viscerally real. Our fascination with documentaries derives, in large part, from the way seemingly transparent images are woven into narratives full of hidden assumptions. Every viewer of the Zapruder film sees the same thing: President Kennedy, struck by a bullet, lurches forward. But what that might mean--whether it points toward a lone gunman or a conspiracy, toward the Soviet Union or the CIA--still remains uncertain. We'll explore the tensions between image and story, evidence and context, in films ranging from Fred Ott's "Sneeze" (1894) to Josh Oppenheimer's *The Act of Killing* (2012), concluding with a look at the effects of contemporary image technologies on our sense of personal and national identity. Readings for the course will be drawn from narrative theory, epistemology, and cultural theory, as framed by writers including Trinh Minh-ha, Christian Metz, and Bill Nichols.

**Requirements/Evaluation:** four written and multimedia exercises (1-2 pages each), two essays (six and twelve pages), and a willingness to

experiment with formats

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

### **LATS 203 (F) Chicana/o/x Film and Video**

**Cross-listings:** AMST 205 WGSS 203 LATS 203 ARTH 203

Primary Cross-listing

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicanxs in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o/x-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o/x representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

**Class Format:** Discussion-oriented lecture class. In addition to class meetings and readings, students will be expected to watch 3-5 hours of film per week on GLOW or in the library.

**Requirements/Evaluation:** one short paper, mid-term exam, final exam and take home essays

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** Art majors; LATS concentrators

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

### **LATS 346 (F) Latinas/os and the Media: From Production to Consumption**

**Cross-listings:** LATS 346 AMST 346

Primary Cross-listing

This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass

media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

**Requirements/Evaluation:** student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted in stages

**Prerequisites:** LATS 105 or permission of the instructor; no first-year students are permitted to take this course

**Enrollment Limit:** 12

**Enrollment Preferences:** Latina/o Studies concentrators or American Studies majors by seniority

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

### **MUS 149 (S) The Language of Film Music**

Filmmakers have relied on music from the earliest days of silent movies (often accompanied by live musical performance) to our present age of slickly-produced online video. Along the way, trends have arisen (and have been artfully thwarted) in countless film scores, whether constructed from preexisting works or specially crafted by composers like Max Steiner, Duke Ellington, Bernard Herrmann, John Williams, James Horner, Micachu, or Björk. In this class, we will look at and listen to films from different periods and cultures, observing which techniques evolved, which have changed very little, and considering when an idea is borrowed and when it might actually be new. We will also discuss the impact this language has on the experience of the viewer, and how film music functions in the wider culture. Assignments will consist of listening/viewing, responding in writing, and re-interpreting film clips with music you will compose or borrow.

**Requirements/Evaluation:** Evaluations include: several short writing and creative assignments, two quizzes, a midterm essay, and a final creative project.

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** given to juniors and seniors

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

### **RLFR 300 (S) The *Banlieue* in Literature, Music, and Film (DPE) (WS)**

**Cross-listings:** RLFR 300 AFR 339 COMP 336

**Primary Cross-listing**

The *banlieue* looms large in the French collective imagination. From its origins in medieval law, the term *banlieue* at the end of the 20th century has taken on multiple, at times overlapping, but almost exclusively negative meanings. It designates a peripheral geographical space often in contrast to its city center, social exclusion, "urban culture"--as in Hip Hop-produced within that space, and last but not least the symbolic bias through which its inhabitants are viewed (Vieillard-Baron). In this course, we will examine various constructions of the *banlieue* in French music, a manifesto, film, blogs, and literature to focus on the analytical, contestatory and affirmative dimensions of these narratives. Two decades after the film *La haine*, and ten years after the riots, how are filmmakers, artists, authors, and scholars of the *banlieue* reimagining and reframing the *banlieue*? What do current depictions of *banlieues* in the French media tell us about the State, French politics, and the state of French politics? What do "*banlieue* films" and

"banlieue lit" tell us about the *banlieue*? In this course, conducted in French, we will read, watch, and listen to various constructions of the *banlieue* in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

**Requirements/Evaluation:** 3 thesis five-page research papers, 2 start-of-the-class brief presentations, active participation to in-class discussions and mini-conference on the banlieue (class final project).

**Prerequisites:** RLFR 105 and above

**Enrollment Limit:** 14

**Enrollment Preferences:** French majors and certificate students , Africana and Comparative literature students

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

RLFR 300 (D1) AFR 339 (D2) COMP 336 (D1)

**Writing Skills Notes:** To hone their research and writing skills (and prepare for their conference on the banlieue), students will write three research papers (with thesis statement and subheadings) from which they will receive professor feedback.

**Difference, Power, and Equity Notes:** This course, Banlieue in Lit, Music, Film fosters difficult but carefully framed conversations about race, class, gender, citizenship, housing segregation, discursive practices, immigration and belonging in contemporary France and how identities and power relationships are expressed in banlieue film, literature and French hip hop music.

## **SOC 212 (S) Understanding Social Media**

**Cross-listings:** STS 214 SOC 212

Primary Cross-listing

Over just the last twenty years--beginning with Friendster and MySpace and continuing through Facebook and Twitter, Snapchat and Instagram--the rise of social media has had a profound influence on the way we live. It has given a new rhythm to our daily routines, shaped the way we inform ourselves and converse with others, and transformed media and entertainment, politics and public discourse, and many other aspects of culture. This seminar course will undertake a broad and critical examination of social media, looking at it from historical, economic, legal, social, and phenomenological perspectives. The topics addressed will include social media's effects on self-image and self-formation, its influence on protest movements and political campaigns, its use as a conduit for news and propaganda, and the way commercial interests and technical characteristics have shaped its design and use. Through pertinent readings and lively discussions, and drawing on students' own experiences with social media, the course will illuminate social media's benefits and drawbacks while providing a foundation for thinking about possible legal, regulatory, and personal responses to this far-reaching and still unfolding social phenomenon.

**Requirements/Evaluation:** attendance and participation, team assignments, two 5-page writing assignments, final exam

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

## **WGSS 111 (S) Television, Social Media, and Black Women 'Unscripted'**

**Cross-listings:** AFR 110 WGSS 111

### Secondary Cross-listing

Nene Leaks, Issa Rae, Zendaya, Oprah Winfrey, Lavern Cox and Joy Reid have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed--these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

**Requirements/Evaluation:** class participation, podcast, vlogs, 10-page paper, and a formal class presentation

**Prerequisites:** none

**Enrollment Limit:** 15

**WGSS 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film**

**Cross-listings:** WGSS 283 AMST 283 ENGL 286 AFR 283

**Primary Cross-listing**

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as *Looking for Langston* (Isaac Julien, 1989), *The Watermelon Woman* (Cheryl Dunye, 1996), *U People* (Olive Demetrius and Hanifah Walidah, 2009), *Tongues Untied* (Marlon Riggs, 1989) and *Litany for Survival* (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

**Requirements/Evaluation:** facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators

**WGSS 312 (S) An American Family and "Reality" Television (WS)**

**Cross-listings:** WGSS 312 ARTH 310 AMST 333

**Secondary Cross-listing**

*An American Family* was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the *An American Family* series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 14- to 18-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

**Requirements/Evaluation:** class presentations, research assignments and annotated bibliographies, and final 14- to 18-page research paper.

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** junior Art majors, followed by senior majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **WGSS 346 (S) Queer in the City (DPE)**

**Cross-listings:** AFR 337 AMST 337 WGSS 346

#### Primary Cross-listing

In this course we will examine the various ways scholars and filmmakers have used ethnography as a critical tool for understanding the intersections of race, place, space, gender and sexuality. We will foreground studies that examine unfamiliar sites of Black struggle, resistance, and survival. We will examine Black gender variant and sexual minorities and how they produce, reproduce and struggle for spaces and places of desire, community, pleasure, love, and loss. We will explore these stories through primarily ethnographic modalities. We will discuss the political and ethical ramifications of these ethnographic narratives paying particular attention to the usefulness and limitations of both 'Thin' and 'Thick' descriptions. We will use ethnography to center debates regarding the politics of representation of racialized queer space, place, and people through both filmic and written accounts. All students will be asked to discover and develop their ethnographic voices through various critical, creative, experimental and performative assignments.

**Requirements/Evaluation:** facilitated class discussion; weekly critical response papers; creative projects

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** WGSS majors; students may be asked to write a short statement of interest in the event of over-enrollment

### **AMST 358 (S) Performing Masculinity in Global Popular Culture (DPE)**

**Cross-listings:** AMST 358 THEA 341 LATS 341 WGSS 347 SOC 340

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

**Requirements/Evaluation:** masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** a short statement of interest will be solicited

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

### **ARTH 221 (F) History of Photography**

**Cross-listings:** STS 221 ARTH 221

**Primary Cross-listing**

This lecture course will examine the history of photography from its beginnings in the 1830s to the present, from the first grainy black and white images to the work of contemporary artists using cutting-edge photographic technologies. We will examine photographs used for documentary, scientific, and aesthetic purposes, and we will trace the medium's emergence and acceptance as a fine art. We will also explore photography's physical and conceptual characteristics as a medium, paying particular attention to its uniquely intimate and frequently contested relationship to "the real." By the end of the course, students will have a broad understanding of photography as a unique medium within the history of art and knowledge of the theoretical frameworks that developed alongside that history.

**Requirements/Evaluation:** three to four short papers, quizzes, online presentations.

**Prerequisites:** none

### **COMP 111 (F)(S) The Nature of Narrative (WS)**

**Cross-listings:** COMP 111 ENGL 120

**Primary Cross-listing**

Stories are one way that we make sense of the world; but how you tell a story is just as important as the events it relates. This course will examine literary narratives from a wide range of traditions, media, and genres, and work on reading them in more informed, more sophisticated, and more interesting ways. Texts will span classics (e.g. Homeric epic and/or The Tale of Genji), fiction ranging from nineteenth-century realism to postmodern

experimentation (possibly including Tolstoy, Zola, Garcia Marquez, Toni Morrison, and/or Colson Whitehead), and visual literature from film and drama to graphic memoir (possibly including Art Spiegelman, Tezuka Osamu, and Alison Bechdel). We will also read some short works of literary theory from around the world to help us broaden our idea of what literature can be and do. All readings in English.

**Class Format:** The second half of the course may have a modified tutorial format, where small groups meet with the instructor once a week, with students' papers and responses forming the basis of the discussion.

**Requirements/Evaluation:** Regular attendance and participation in class; short and mid-length writing assignments spaced throughout the semester; revision of selected assignments after receiving instructor feedback.

**Prerequisites:** none

**Enrollment Limit:** 18

**Enrollment Preferences:** Students considering a major in Comparative Literature

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**COMP 232 (S) Nordic Lights: Literary and Cultural Diversity in Modern Scandinavia (DPE)**

**Cross-listings:** WGSS 200 COMP 232

**Primary Cross-listing**

Mythologized as the land of the aurora borealis and the midnight sun, Scandinavia's five distinct nations--Iceland, Norway, Sweden, Denmark, and Finland--are often mistakenly associated with blond-haired and blue-eyed uniformity. Modern Scandinavia, however, is a place of great social and cultural diversity. From medieval Viking sagas to contemporary Nordic rap, the Scandinavian literary tradition is rich in tales of global exploration, childhood imagination, sexual revolution, and multicultural confrontation. Through readings of nineteenth-century drama, twentieth-century novels, and twenty-first century cinema, we will investigate a wide range of issues on class, ethnicity, and identity, including the indigenous reindeer-herding Sámi people, Danish colonialism and the Greenlandic Inuit, Norwegian collaboration and resistance during World War II, and Nordic emigration (to North America) and immigration (from Africa, Asia, Latin America, and the Middle East). Discussion will also focus on Scandinavia's leadership in gender equality and sexual liberation, Scandinavian political isolation and integration (into both the UN and the EU), and the global effects of Nordic pop (ABBA to Björk), glamour (Greta Garbo to Alicia Vikander), technology (Volvo to Nokia), design (IKEA to H&M), and activism (Alfred Nobel to Greta Thunberg). Readings to include works by Henrik Ibsen, August Strindberg, Hans Christian Andersen, Karen Blixen, Astrid Lindgren, Halldór Laxness, Reidar Jönsson, and Peter Høeg. Films to include works by Ingmar Bergman, Lasse Hallström, Bille August, Colin Nutley, Lukas Moodysson, Josef Fares, Tomas Alfredson, and Tomas Vinterberg. *All readings and discussions in English.*

**Requirements/Evaluation:** active participation, two shorter papers, a midterm, and a longer final paper

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Comparative Literature and Women's, Gender & Sexuality Studies majors, and those with compelling justification for admission

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**COMP 251 (F) Dolls, Puppets and Automaton (WS)**

**Cross-listings:** GERM 251 COMP 251

Primary Cross-listing

Since their origin, humans have always made anthropomorphic representations, first in the form of idols, fetishes, or statues for religious worship, later in the shape of puppets, dolls, or automatons for their entertainment qualities. And yet, these objects have always played multiple roles in human society; modernity in particular shows a great interest paired with great ambivalence towards dolls, puppets, and automatons, regarded both as uncanny Doppelgänger or threatening machines. In order to comprehend the scope of our modern fascination with these figures, we will explore their haunting presence in literary texts by ETA Hoffmann, Achim von Arnim, Theodor Storm, Felisberto Hernandez, discuss theoretical texts by Sigmund Freud and Heinrich von Kleist, look at paintings by Oskar Kokoschka and at photographs by Hans Bellmer & Cindy Sherman, watch a ballet by Andreas Heise and films by Fritz Lang and Alex Garland, and watch fashion shows by Alexander McQueen and Jean-Paul Gaultier. *Conducted in English.*

**Class Format:** This seminar will be taught online.

**Requirements/Evaluation:** active class participation, oral presentations on the reading materials, three 5- to 8-page papers

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Comparative Literature majors, or those considering a major in Comparative Literature

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GERM 251 (D1) COMP 251 (D1)

**Writing Skills Notes:** Each student will write three 5- to 8-page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write two 3-4 page papers on which I will provide written feedback regarding grammar, style, and textual analysis.

**COMP 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City**

**Cross-listings:** AMST 331 COMP 330 THEA 330

Secondary Cross-listing

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as *Harper's Weekly* (Lafcadio Hearn), *The Awakening* (Kate Chopin), *A Streetcar Named Desire* (Tennessee Williams), *The Moviegoer* (Walker Percy), *Why New Orleans Matters* (Tom Piazza), *A Confederacy of Dunces* (John Kennedy O'Toole), *New Orleans Sketches* (William Faulkner), *One Dead in the Attic* (Chris Rose). Film examples such as *A Streetcar Named Desire*, *An Interview with a Vampire*, *The Curious Case of Benjamin Button*, *When the Levees Broke*, *Treme*, *Waiting for Godot* (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

**Requirements/Evaluation:** will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and

a contemporary creative project/performance

**Prerequisites:** none

**Enrollment Limit:** 12

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

### **ENGL 120 (F)(S) The Nature of Narrative (WS)**

**Cross-listings:** COMP 111 ENGL 120

**Secondary Cross-listing**

Stories are one way that we make sense of the world; but how you tell a story is just as important as the events it relates. This course will examine literary narratives from a wide range of traditions, media, and genres, and work on reading them in more informed, more sophisticated, and more interesting ways. Texts will span classics (e.g. Homeric epic and/or *The Tale of Genji*), fiction ranging from nineteenth-century realism to postmodern experimentation (possibly including Tolstoy, Zola, Garcia Marquez, Toni Morrison, and/or Colson Whitehead), and visual literature from film and drama to graphic memoir (possibly including Art Spiegelman, Tezuka Osamu, and Alison Bechdel). We will also read some short works of literary theory from around the world to help us broaden our idea of what literature can be and do. All readings in English.

**Class Format:** The second half of the course may have a modified tutorial format, where small groups meet with the instructor once a week, with students' papers and responses forming the basis of the discussion.

**Requirements/Evaluation:** Regular attendance and participation in class; short and mid-length writing assignments spaced throughout the semester; revision of selected assignments after receiving instructor feedback.

**Prerequisites:** none

**Enrollment Limit:** 18

**Enrollment Preferences:** Students considering a major in Comparative Literature

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COMP 111 (D1) ENGL 120 (D1)

**Writing Skills Notes:** Multiple writing assignments that build upon each other, including drafts and revisions, with substantial individualized feedback on writing from the instructor.

### **ENGL 214 (S) Writing for Stage and Screen**

**Cross-listings:** THEA 214 ENGL 214

**Secondary Cross-listing**

This studio/workshop course is designed for students interested in a semester-long immersion in the practice of dramatic writing for theater, film, television and audio. Students should expect to write most days. Our focus will be on the fundamentals of story, and the cultivation of each writer's

individual voice. In addition to reading existing dramatic texts of various genres and forms, and completing weekly prompts and exercises exploring character, dialogue, structure, theme, conflict and world building, students will work toward a longer final project. Students will present their own work regularly, and respond to each other's work. The course will culminate in a staged reading of excerpts for the campus community.

**Requirements/Evaluation:** a daily journal; weekly writing exercises; peer responses; a ten-minute piece; a final 20-30 minute piece; attendance and class participation

**Prerequisites:** students are asked to submit a brief statement describing their interest and any past experience (if applicable) in writing for the stage and/or screen

**Enrollment Limit:** 18

**Enrollment Preferences:** Theatre and English majors; Comparative Literature majors

**Expected Class Size:** 14

**Grading:** yes pass/fail option, no fifth course option

### **ENGL 368 (S) Ireland in Film**

In 1909, James Joyce was briefly the manager of one of Dublin's first cinemas. The medium of film has long attracted Irish writers--as a means to explore and represent the country's political and cultural history, to interrogate the very notion of "Irishness", and to promote their work to a wider audience. In turn, Ireland has long provided a rich subject for Hollywood fantasy, often being portrayed by non-Irish directors as either a mythic space for emerald-green romanticism, or, more darkly, as a place of political terror and enduring ideological rivalries. In this course we will view and discuss major films from the canon of Irish cinema, to assess the country's newly ascendant film movement. We will consider the impact of commercial considerations, and the powerful influence of British and American films on Irish filmmakers. We will also read the literary texts on which some films were based, so as to weigh the strengths and limitations of the medium as a resource for writers who initially worked only in print. This course will introduce participants to the technical vocabulary of film art, as well as to major developments in modern Irish history and culture. Films to be viewed will likely include: *Man of Aran*, *The Informer*, *The Quiet Man*, *Eat the Peach*, *In the Name of the Father*, *Butcher Boy*, *Intermission*, *Into the West*, *The Field*, *The Crying Game*, *December Bride*, *The Commitments*, *Michael Collins*, *Ondine*, *Six Shooter*, *In Bruges* and *The Guard*; and we will also assess one or more short independent films such as *Budawanny* and *Adam and Paul*. Special attention will be given to the work of Neil Jordan, Jim Sheridan, Terry George, and Martin McDonagh.

**Requirements/Evaluation:** Two long papers, regular short responses and discussion board postings, class participation.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam; not open to first-year students

**Enrollment Limit:** 15

**Enrollment Preferences:** English majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

### **LATS 341 (S) Performing Masculinity in Global Popular Culture (DPE)**

**Cross-listings:** AMST 358 THEA 341 LATS 341 WGSS 347 SOC 340

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

**Requirements/Evaluation:** masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** a short statement of interest will be solicited

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 358 (D2) THEA 341 (D2) LATS 341 (D2) WGSS 347 (D2) SOC 340 (D2)

**Difference, Power, and Equity Notes:** This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

### **LATS 346 (F) Latinas/os and the Media: From Production to Consumption**

**Cross-listings:** LATS 346 AMST 346

**Primary Cross-listing**

This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

**Requirements/Evaluation:** student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted in stages

**Prerequisites:** LATS 105 or permission of the instructor; no first-year students are permitted to take this course

**Enrollment Limit:** 12

**Enrollment Preferences:** Latina/o Studies concentrators or American Studies majors by seniority

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

### **RLFR 108 (S) Voyages Francophones: Alienation and Self-Discovery in Contemporary Literature and Film**

This is an advanced course in French language designed to help you improve your speaking, listening comprehension, reading, and writing, through the dynamic study of literary texts and films focusing on the themes of alienation and self-discovery in the late twentieth- and early twenty-first-century Francophone world. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French-language fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French language and cinema. As a focus for improving your French, we will examine a broad range of texts and films on the themes of alienation and self-discovery-especially in the context of immigration and coming of age-as they are represented in texts from France, Québec, and the Caribbean.

**Requirements/Evaluation:** class participation, grammar exercises, group discussion leading, two short papers, and final project

**Prerequisites:** exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French Majors and certificate students

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**Attributes:** FMST Related Courses

### **RLSP 280 (S) From Roma to Yalhalhj: Race and Identity Politics Through Contemporary Mexican Cultural Production (WS)**

In 2017, the National Institute of Statistics in Mexico (INEGI) used for the first time a color palette to measure individuals' skin tone. The study showed that "Mexicans who were classified by the interviewers as having darker skin tones tend to have lower levels of education and are worse off economically than their lighter-skinned counterparts" (Zizumbo and Flores, 2017). Raising controversy among those who would like to think of Mexico as a post-racial nation and those who recognize social inequality and discrimination on the basis of skin tone, the debate resonates in the way

Mexican citizenship and cultural identity are both represented in mainstream media, even with the intention of showing diversity. The prevalent whitewashing dominating mass media in Mexico extends from advertisements to films, promoting an image of wealth and education intrinsically related to not only skin tone but also with race/ethnic positionality and gender. This course will explore the representation of these variables and their intersections through the analysis of photography, films, novels, paintings, reality shows, telenovelas, advertising campaigns, and music videos. In addition, we will take into account questions of representation, agency, and visibility addressed by cultural producers from pueblos originarios who do not consider themselves Mexican citizens. This class will be conducted in Spanish.

**Requirements/Evaluation:** essays, oral presentation, participation

**Prerequisites:** RLSP 105, placement exam results, permission from the instructor or the Department Chair

**Enrollment Limit:** 19

**Enrollment Preferences:** Spanish major

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Weekly short (less than 1000 words) papers, alternatively letter-graded and graded P/F; at least three letter-graded papers will be revisions of a P/F paper; and final 5 pages long paper, which is a revision and expansion of the last weekly paper.

**Attributes:** FMST Related Courses GBST Latin American Studies Electives

Not offered current academic year

### **SOC 219 (S) Images and Society**

"This is obvious!" is what we say when we believe our point is irrefutable. But images are far less obvious than we may like to think. This course will create a forum for discussing the role of images in our lives, as well as the place of the visual in social inquiry. It will explore the variety of ways in which images--and even vision itself--are shaped by the social and cultural context in which they are embedded, develop skills for critical analysis of existing representations, and address the analytical possibilities and limitations of the study of signs and images. The course will touch upon a range of visual material, from advertising to paintings, but the bulk of the course is dedicated to photography, both as an object of visual analysis and as, increasingly, a research method in social sciences. Topics for discussion include debates around truth in photography and the politics of representation, changing uses of photography in institutional settings, different photographic cultures and their anthropological and sociological significance, as well as the use of photography in social research. Primary sources for the discussions will be drawn from a variety of spheres, from Soviet propaganda posters to Indian studio portraiture, and will include the images we encounter in everyday life, media, politics, academia, "high" art and pop culture.

**Requirements/Evaluation:** active class participation, several short papers, and a final paper

**Prerequisites:** none; open to all

**Enrollment Limit:** 15

**Enrollment Preferences:** Anthropology and Sociology majors

### **STS 221 (F) History of Photography**

**Cross-listings:** STS 221 ARTH 221

**Secondary Cross-listing**

This lecture course will examine the history of photography from its beginnings in the 1830s to the present, from the first grainy black and white images to the work of contemporary artists using cutting-edge photographic technologies. We will examine photographs used for documentary, scientific, and aesthetic purposes, and we will trace the medium's emergence and acceptance as a fine art. We will also explore photography's physical and conceptual characteristics as a medium, paying particular attention to its uniquely intimate and frequently contested relationship to "the real." By the end of the course, students will have a broad understanding of photography as a unique medium within the history of art and knowledge of the theoretical frameworks that developed alongside that history.

**Requirements/Evaluation:** three to four short papers, quizzes, online presentations.

### WGSS 200 (S) Nordic Lights: Literary and Cultural Diversity in Modern Scandinavia (DPE)

**Cross-listings:** WGSS 200 COMP 232

### Secondary Cross-listing

Mythologized as the land of the aurora borealis and the midnight sun, Scandinavia's five distinct nations--Iceland, Norway, Sweden, Denmark, and Finland--are often mistakenly associated with blond-haired and blue-eyed uniformity. Modern Scandinavia, however, is a place of great social and cultural diversity. From medieval Viking sagas to contemporary Nordic rap, the Scandinavian literary tradition is rich in tales of global exploration, childhood imagination, sexual revolution, and multicultural confrontation. Through readings of nineteenth-century drama, twentieth-century novels, and twenty-first century cinema, we will investigate a wide range of issues on class, ethnicity, and identity, including the indigenous reindeer-herding Sámi people, Danish colonialism and the Greenlandic Inuit, Norwegian collaboration and resistance during World War II, and Nordic emigration (to North America) and immigration (from Africa, Asia, Latin America, and the Middle East). Discussion will also focus on Scandinavia's leadership in gender equality and sexual liberation, Scandinavian political isolation and integration (into both the UN and the EU), and the global effects of Nordic pop (ABBA to Björk), glamour (Greta Garbo to Alicia Vikander), technology (Volvo to Nokia), design (IKEA to H&M), and activism (Alfred Nobel to Greta Thunberg). Readings to include works by Henrik Ibsen, August Strindberg, Hans Christian Andersen, Karen Blixen, Astrid Lindgren, Halldór Laxness, Reidar Jönsson, and Peter Høeg. Films to include works by Ingmar Bergman, Lasse Hallström, Bille August, Colin Nutley, Lukas Moodysson, Josef Fares, Tomas Alfredson, and Tomas Vinterberg. *All readings and discussions in English.*

**Requirements/Evaluation:** active participation, two shorter papers, a midterm, and a longer final paper

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Comparative Literature and Women's, Gender & Sexuality Studies majors, and those with compelling justification for admission

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 200 (D2) COMP 232 (D1)

**Difference, Power, and Equity Notes:** As the course description explains, this course centers on a critical examination of difference, power, and equity in modern Scandinavia. The content examines the effects of class, race, ethnicity, gender, and sexuality on social (in)equalities among citizens, institutions, communities, and identities. The course also employs critical tools to teach students how to interrogate Scandinavian diversity and modernity, through reading, film analysis, discussion, and writing.

**WGSS 347 (S) Performing Masculinity in Global Popular Culture (DPE)**

**Cross-listings:** AMST 358 THEA 341 LATS 341 WGSS 347 SOC 340

Primary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

**Requirements/Evaluation:** masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** a short statement of interest will be solicited

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 358 (D2) THEA 341 (D2) LATS 341 (D2) WGSS 347 (D2) SOC 340 (D2)

**Difference, Power, and Equity Notes:** This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

## ROMANCE LANGUAGES (Div I)

### FRENCH

Chair: Professor Leyla Rouhi

Professors: K. Pieprzak; Assistant Professors: P. Leelah, S. Saint-Just; Visiting Assistant Professor: K. Levine; Teaching Associates: Danae Tsiamis and Paul Bouchet; on leave: B. Martin

#### MAJOR—French Language and Literature

The French major seeks to provide training in literary and cultural analysis and linguistic expression through the study of selected texts from the French-speaking world. Emphasis is placed on the changes in form and subject matter from the early modern period to the contemporary era.

The major consists of nine courses. One of these courses must be the 400-level senior seminar during the student's final year at the College.

Students entering the major program at the 200-level may, with the permission of the Department, choose as part of their major program, one course in Art History, History, Philosophy, Comparative Literature or other subjects that relate to and broaden their study of French. Students entering the major program at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program.

Working with the major advisor, the student will formulate a curricular plan that will ensure balance and coherence in courses taken. Such balance and coherence will be based on the above areas of literary and cultural investigation. Prospective majors should discuss their program with the major advisor by the end of their sophomore year. This is especially imperative for students who are planning to spend a part or all of their junior year in France.

Inasmuch as all courses in French assume the active participation of each student in discussions conducted in the foreign language, regular attendance at class meetings is expected.

#### MAJOR—French Studies

The major in French Studies is an interdisciplinary program that provides students with the opportunity to acquire skills and knowledge embracing the cultural, historical, social, and political heritage of France and the Francophone world. The program allows for an individualized course of study involving work in several departments and the opportunity to study abroad.

Students electing the French Studies major should register with the French Studies faculty advisor during their sophomore year. At that time, they should submit a feasibility plan that articulates their projected program.

#### The French Studies major consists of ten courses satisfying the following requirements:

at least five RLFR courses in French language, literature, film, or culture;

the RLFR senior seminar during the student's final year at the College;

*Electives:* The remaining courses needed to complete the major must be drawn from at least three different departments and relate primarily to an aspect of the cultures, histories, societies, and politics of France and the Francophone world. These courses will be selected in consultation with members of the Department of Romance Languages. Appropriate electives might include:

AFR 360 Political Thought Frantz Fanon

ARTH 254 Manet to Matisse

HIST 390 Haitian and French Revolutions

RLFR 101-450 All courses in French and Francophone language, literature, film, and culture

#### THE DEGREE WITH HONORS IN FRENCH

Students majoring in French may apply to be admitted to the Honors Program in French upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader). This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether they can proceed with the thesis, and if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent reading, researching (in

relevant archives or with field work), and compiling a more detailed bibliography.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493-W31-494). The thesis will be written in French and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in French. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

## **THE CERTIFICATE IN FRENCH**

The Certificate in French Language and Cultures consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher.

For students with no prior study of French, the course sequence will consist of RLFR 101-102, RLFR 103, RLFR 104, and three additional courses, with at least one of these at the 200-level or higher taken at Williams. For students starting the sequence at RLFR 103 or higher, six additional courses must be taken, including at least three French courses at the 200-level or higher. For these students starting at French 103 or higher, two electives may be taken in other departments: one elective should be in French or Francophone culture (art, literature, theatre, music) and the other in French or Francophone civilization (history, political science, philosophy).

## **PLACEMENT**

A placement test in French is administered at Williams at the opening of the fall semester. Incoming first-year students who register for any French course above the 101 level must take this test, regardless of their previous preparation.

## **STUDY ABROAD**

We encourage all students of French to complement their courses at Williams with the life-changing experience of studying abroad in a Francophone country. In particular, French majors and certificate students are strongly advised to complete part of the requirements for the major or certificate by studying abroad, for either a semester or a year. Most study abroad programs require applicants to have completed a fifth-semester French course in college (French 105) or higher before they go abroad. Credit for up to a total of 4 courses towards the major or certificate can be granted for either a semester or a full year abroad, at the discretion of the Romance Languages Department. Students who are planning to get credit for their study abroad courses should meet with a French faculty member in advance, to review the courses they intend to take abroad. Normally, only courses that focus on French language or Francophone literature, history, politics, art, and culture may be counted towards the major or certificate. The final assignment of course credit will be authorized in consultation with the student's French advisor, once the student has returned to Williams. Such credits can only be determined by review of course format, course materials, and evidence of satisfactory academic performance; students should thus provide not only their study abroad transcript, but retain course materials (including syllabi, papers, exams, and other projects) for potential review back at Williams. While students can gain credit for 100-, 200-, and 300-level courses during their time abroad, the 400-level senior seminar must be taken during the senior year at Williams. Early planning is essential: Students interested in studying abroad are strongly urged to attend the yearly Francophone Study Away Information Session (held each October) during their first year or sophomore year. Students will receive credit for only those study abroad programs recommended and approved by the Dean of Study Away and the Romance Languages Department. Williams has long-term affiliations with the following programs: Hamilton College (Paris), Sweet Briar College (Paris), CUPA (Paris), Middlebury College (Paris), Wellesley College (Aix-en-Provence), Boston University (Grenoble), and both SIT and CIEE (in Morocco, Senegal, and Madagascar). For more on all approved study-abroad programs, see the webpages for the French program ([french.williams.edu](http://french.williams.edu)) and Study Away ([study-away.williams.edu/programs](http://study-away.williams.edu/programs)). Finally, the Department does not administer proficiency exams (for study abroad, fellowships, or job applications) to students who have not completed a French course at Williams; and most study abroad programs will not accept students who have not taken any college courses in French (at Williams) prior to their application. Students should thus plan well ahead (as early as their first year and sophomore year) to take appropriate courses at Williams, before applying for and taking part in study abroad programs in the Francophone world.

## **RLFR 101 (F) Introduction to French Language and Francophone Cultures (DPE)**

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by

focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, and active engagement with music, video, and film, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. *Conducted in French.*

**Requirements/Evaluation:** active class participation, workbook exercises and compositions, chapter tests, midterms, and final exams

**Prerequisites:** none; for students who have never formally studied French; students who have previously studied French (in any formal course, at any level) must take the French Placement Test in late August or early September

**Enrollment Limit:** 18

**Enrollment Preferences:** all are welcome, but if over-enrolled, preference will be given to first-year and second-year students and those with compelling justification for admission

**Expected Class Size:** 18

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** RLFR 101-102 is a year-long course; credit granted only if both semesters (RLFR 101 and 102) are taken. RLFR 101-102 students must also take the French Winter Study Course.

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** Through its focus on French and Francophone cultures around the world, this course enables students to gain both linguistic and cultural proficiency, and to engage with the great diversity of colonial and post-colonial cultures, histories, and identities in France and Belgium, Québec and Martinique, Sénégal and Morocco.

Fall 2022

SEM Section: 01 M-F 10:00 am - 10:50 am Kathryn E Levine

### **RLFR 102 (S) Introduction to French Language and Francophone Cultures**

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, video-observations, and film-viewing, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. *Conducted in French.*

**Class Format:** This class meets 5 times a week from M-F. Students are required to attend class from Monday to Friday.

**Requirements/Evaluation:** participation, online homework, mid-semester and final projects, short writing assignments

**Prerequisites:** RLFR 101, or by Placement Test, or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference will go to first- and second-year students and those with compelling justification for admission. Statement of interest solicited if overenrolled.

**Expected Class Size:** 18

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Spring 2023

### **RLFR 103 (F) Intermediate Studies in French Language and Francophone Cultures**

As a continuation of French 101-102, this dynamic first-semester intermediate course is designed to help you improve your French, while at the same time learning more about French and Francophone cultures, politics, literature, and film. Through the active study and daily practice of listening, speaking, reading, and writing in French, you will: continue developing your communication skills and learn to express your opinions and ideas;

improve your command of spoken and written French through a revision of important grammatical structures; strengthen your reading and writing skills in order to prepare you for further study of literary texts; and develop an increased vocabulary and cultural appreciation of French-speaking cultures around the world.

**Requirements/Evaluation:** Class participation, Homework, Mid-Semester and Final Exams, Short Writing Assignments

**Prerequisites:** RLFR 101-102, or by Placement Test, or Permission of Instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** All are welcome, but if over-enrolled, preference will be given to first-year and second-year students and those with compelling justification for admission

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

Fall 2022

### **RLFR 104 (S) Intermediate French II: Advanced Intermediate Studies in French**

As a continuation of French 103, this course will help students gain greater fluency in French, through an exploration of French and Francophone literature, film, media, politics, and culture. With a focus on listening, speaking, reading, and writing, students will review advanced grammar expand their vocabulary, gain greater confidence, and both discuss and debate central questions in the social, political, and cultural landscape of French-speaking communities in Europe, Africa, and the Caribbean.

**Requirements/Evaluation:** Participation, Homework, Writing Assignments, Midterm, & Final Project.

**Prerequisites:** RLFR 103, or by Placement Test, or Permission of Instructor.

**Enrollment Limit:** 20

**Enrollment Preferences:** Enrollment preference for students who completed RLFR 103 in Fall 2022, or those who have placed into RLFR 104 on the French Placement Test.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

Spring 2023

SEM Section: 01 MW 7:00 pm - 8:15 pm Preea Leelah

### **RLFR 105 (F) Advanced French: Advanced Studies in French Language and Francophone Culture**

In this French course, we will read and examine literary texts from the twelfth to the 19th centuries, and films from the twentieth and twenty-first centuries. In order to analyze them, we will briefly situate them in their social and historical contexts. These works will help us better understand contemporary France and explore France's colonial past. We will also learn how to write a short research paper in French in the form of an explication de texte. While the themes, authors, time periods will vary, our approach will remain the same. The three themes love, fear, and France's colonial past will be the course's organizing principles. A small section of our course will be devoted to grammar revisions in order to continue to improve our reading and language skills. Conducted in French

**Requirements/Evaluation:** class participation, grammar exercises, 2 five-page papers, 1 presentation

**Prerequisites:** RLFR 104, placement exam, or by permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** All are welcome, but if overenrolled, preference will be given to first- and second-year students and French major and certificate students. If necessary, a statement of interest will be solicited.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Fall 2022

LEC Section: 01 MR 1:10 pm - 2:25 pm Sophie F. Saint-Just

LEC Section: 02 MR 2:35 pm - 3:50 pm Sophie F. Saint-Just

**RLFR 106 (S) Advanced French: Danger and Desire in French Film and Fiction (DPE)**

**Cross-listings:** RLFR 106 COMP 107

**Primary Cross-listing**

This is an advanced course in French language designed to help you improve your speaking, comprehension, reading, and writing, through the dynamic study of short literary texts and films focusing on danger and desire in nineteenth-, twentieth-, and twenty-first-century France. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French literature and cinema. As a focus for improving your French, we will examine a broad range of texts and films on danger and desire in France from 1820 to 2020, with an emphasis on passion and ambition, infatuation and seduction, betrayal and vengeance, courage and cruelty, warfare and resistance. Works to include nineteenth-century texts by Chateaubriand, Duras, Balzac, Mérimée, Flaubert, Maupassant, Zola; twentieth-century texts by Colette, Camus, Sartre, Beauvoir, Duras, Ernaux, Guibert, Quint, Lindon, Vilrouge; and twenty-first-century films by Caron, Ozon, Ducastel, Martineau, Dercourt, and Becker. Conducted in French.

**Requirements/Evaluation:** active class participation, grammar exercises, two short papers, midterm, and final paper

**Prerequisites:** Exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor.

**Enrollment Limit:** 16

**Enrollment Preferences:** All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

**Expected Class Size:** 16

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

RLFR 106 (D1) COMP 107 (D1)

**Difference, Power, and Equity Notes:** This course centers on a critical examination of difference, power, and equity in French film & fiction. The content examines the effects of class, ethnicity, gender, and sexuality on social inequalities among rich & poor, soldiers & civilians, nations & colonies, men & women. The course employs critical tools to teach students how to articulate and interrogate social injustice, through reading, viewing, discussion, writing, and revision.

**Not offered current academic year**

**RLFR 107 (S) Advanced French: Formation and Transformation (DPE)**

This advanced course is designed to help you refine your French speaking, comprehension, and writing skills in preparation for studying abroad or for more advanced French coursework. We will explore the themes of *formation* (the French term that means at once education and training) and personal transformation, through fictional and autobiographical texts and films. How do individuals find their place in societies and both define and redefine their own identities? Is it possible to reflect critically on one's own *formation*, or is it easier to do so through works of fiction? We will also reflect on our own educational experiences as we read works by authors such as Marguerite Duras, Maryse Condé, Annie Ernaux, and Pierre Bourdieu, and watch both recent and classic films from 1950s France to 2020s Québec.

**Requirements/Evaluation:** One close-reading presentation and essay, one discussion-leading presentation, two analytical essays, final project

**Prerequisites:** Successful performance in RLFR 105 or 106, or by placement test, or permission of the instructor.

**Enrollment Limit:** 20

**Enrollment Preferences:** Students from all majors welcome, but if over-enrolled, preference will be given to French majors and certificate students.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** This course explores questions of difference, power, and equity through a critical analysis of educational systems in France and the Francophone World. Although education is assumed to create equity (in both France and in North America), the content of this course will help students nuance this view and articulate how different social identities are often excluded from the power and opportunity that education seems to promise.

Spring 2023

SEM Section: 01 MWF 12:00 pm - 12:50 pm Kathryn E Levine

**RLFR 108 (S) Voyages Francophones: Alienation and Self-Discovery in Contemporary Literature and Film**

This is an advanced course in French language designed to help you improve your speaking, listening comprehension, reading, and writing, through the dynamic study of literary texts and films focusing on the themes of alienation and self-discovery in the late twentieth- and early twenty-first-century Francophone world. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French-language fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French language and cinema. As a focus for improving your French, we will examine a broad range of texts and films on the themes of alienation and self-discovery-especially in the context of immigration and coming of age-as they are represented in texts from France, Québec, and the Caribbean.

**Requirements/Evaluation:** class participation, grammar exercises, group discussion leading, two short papers, and final project

**Prerequisites:** exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French Majors and certificate students

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**Attributes:** FMST Related Courses

Not offered current academic year

**RLFR 202 (F) War and Resistance: Two Centuries of War Literature in France (1800-2015) (DPE)**

**Cross-listings:** RLFR 202 COMP 292 WGSS 201

Primary Cross-listing

In 1883, Maupassant called on his fellow war veterans and writers to join him in speaking out against warfare and violence, crying "Let us dishonor war!" From the Gallic Wars against Caesar (during the first century BC) to recent terrorist attacks in France (at the opening of the twenty-first century), the French literary tradition is rich in texts that bear witness to war and speak out against its monstrous inhumanity. While war literature in France can be traced back to ancient and medieval texts on Vercingétorix, Charlemagne, William the Conqueror, and Joan of Arc, this course will focus specifically on literary representations of war during the nineteenth- and twentieth-centuries, from the Napoleonic Wars, to the First and Second World Wars, to the Algerian and Cold Wars, and the "War on Terror." Discussions will examine the impact of war on soldiers and civilians, patriotism and pacifism, history and memory; the implications of war as invasion and conquest, occupation and resistance, victory and defeat; the relationship of war to gender, sexuality, and ethnicity; and the role of war in colonialism and genocide. Readings to include novels, short stories, and poems by Balzac, Stendhal, Hugo, Rimbaud, Daudet, Maupassant, Zola, Cocteau, Wiesel, Duras, Camus, and Fanon. Films to include works by Resnais, Renoir, Carion, Jeunet, Malle, Angelo, Pontecorvo, and Duras. *Conducted in French.*

**Requirements/Evaluation:** active class participation, midterm exam, and two to three papers (of 3-5 pages each)

**Prerequisites:** exceptional performance in RLFR 105; successful performance in RLFR 106; or by French placement exam; or by permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** French majors and certificate students; Comparative Literature majors; Women's, Gender and Sexuality Studies majors;

and those with compelling justification for admission

**Expected Class Size:** 16

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

RLFR 202 (D1) COMP 292 (D1) WGSS 201 (D1)

**Difference, Power, and Equity Notes:** This course focuses on a critical examination of difference, power, and equity in French war literature and film. Through the study of war (as invasion and conquest, occupation and resistance, colonialism and genocide), the course thus challenges students to examine the effects of class, race, religion, ethnicity, gender, and sexuality in narratives on war and violence, and on survival and resistance.

Not offered current academic year

### **RLFR 214 (S) Everything New is Old Again: Legacies of Medieval France**

In the twelfth century, the French language shifted from a mostly ephemeral spoken language to a language that deserved to be written down. Authors began recording stories that had only been told aloud, and readers of Latin begin translating classical literature for French-speaking audiences. This huge burst of creative expression remade popular culture in ways that we can still recognize today--if we know what to look for. In this course, we will explore how our twenty-first-century passion for memes on TikTok and other social media has similar roots in twelfth-century tastes, and how the literature and culture of medieval France have shaped what we now think of as literature and pop culture. We will explore four major themes: the reinvention and adaptation of classical literature, the invention of modern romantic love, the introduction of King Arthur, and hilarious short fiction (also known as twelfth-century memes). Readings to include love poetry, short narratives both funny and serious, and longer texts about adventure and love. *Conducted in French.*

**Requirements/Evaluation:** active class participation, midterm paper, class presentation, and final project

**Prerequisites:** strong performance in RLFR 105; successful performance in RLFR 106; or by French placement exam; or by permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** French majors and certificate students; and those with compelling justification for admission

**Expected Class Size:** 16

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

Not offered current academic year

### **RLFR 216 (F) Women Behaving Badly: Deviant Women in Early Modern French Literature (DPE)**

**Cross-listings:** RLFR 216 WGSS 216

Primary Cross-listing

Female deviance often implies resisting a dominant and oppressive patriarchal status quo embedded within cultural and historical backgrounds. This course explores female characters in early modern French literature who refuse to conform to established gender roles. Defying social constructs of femininity, through either judicious negotiations or more aggressive and violent behavior, is an important trope in the writings of both male and female authors of the seventeenth and eighteenth centuries. What constitutes deviant behavior, however, depends on social definitions of gender roles, which evolve over time. In this course, we will first examine women's place within the historical and socio-cultural context of the *Ancien Régime*, which will lead to an examination of female behavior censured during the seventeenth and eighteenth centuries. We will then reflect on how we, as modern readers, perceive such deviancy at it relates to the past. Finally, we will discuss the relevance of studying deviant women in light of current events, such as the #MeToo movement, which has led to a new level of consciousness and empathy for the plight of marginalized groups. Potential readings to include Corneille's *Médée*, Madame de la Fayette's *Princesse de Clèves*, Laclos's *Liaisons dangereuses*, and Isabelle de Charrière's *Lettre à Mistriss Henley*.

**Requirements/Evaluation:** active class participation, one presentation (8-10 minutes), three to four papers (3-5 pages), and a longer final paper

**Prerequisites:** strong performance in RLFR 105; successful performance in RLFR 106; or by French placement exam; or by permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French majors and certificate students; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

RLFR 216 (D1) WGSS 216 (D1)

**Difference, Power, and Equity Notes:** This course focuses on a critical examination of difference, power, and equity in early modern France. Through the study of deviant women, the course thus challenges students to examine the effects of class, race, ethnicity, gender, and sexuality in narratives on women, misogyny, and criminality.

Fall 2022

### **RLFR 218 (S) Translating French: An Introduction to Theory and Practice**

**Cross-listings:** COMP 209 RLFR 218

#### **Primary Cross-listing**

What decisions do translators make in order to render texts accurately (and even beautifully) into another language? What makes one translation "better" than another? Should we consider translation as a literary genre in its own right, and should we read translated texts differently from texts in their original language? This advanced course will invite you into the world of translation studies, bringing together aspects of translation theory and technical translation methodologies in order to develop your skills as translators, readers, and speakers of French. We will translate texts from a range of genres mostly from French into English and occasionally from English into French, paying particular attention to the formal and linguistic differences that can pose problems for translators. In addition to completing an independent translation project on your choice of text or media, you will also consider your own priorities as translators, formulating and revising two translation statements over the course of the semester. This course will be taught in French, and the class format will vary between lectures, seminar-style discussions, workshops, and student presentations.

**Requirements/Evaluation:** Active class participation, three written translations, and final translation project (including a written translation and class presentation).

**Prerequisites:** Strong performance in RLFR 106, successful performance in another 200-level French course, or by placement, or by permission of the instructor.

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference will be given to French majors and certificate students, and to Comparative Literature majors.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

SEM Section: 01 MWF 10:00 am - 10:50 am Kathryn E Levine

### **RLFR 226 (S) Black France/France Noire (DPE)**

**Cross-listings:** AFR 226 RLFR 226

#### **Primary Cross-listing**

On the eve of the new millennium, the year 1998 saw the emergence in France of "Black studies à la française" (Ndiaye). Inspired, in part, by the 150th anniversary of the 1848 abolition of slavery, the French black minority "made itself more visible" (Faes and Smith). This course examines a wide range of discursive practices through which athletes, artists, authors, politicians, activists, and scholars amplified their voices in the French hexagone. It retraces the rise of these discourses and how they assert, reframe, and establish blackness as a legitimate field of knowledge and a space of affirmation and contestation. Following a study of the interwar period (1918-1939), when the work of "negritude women" (Sharpley-Whiting) such as "afro-latinité" spurred the negritude movement, we will discuss publications, documentaries, and seminal moments of protest in the early twenty-first

century. Course material may include works by Suzanne Césaire, Jane and Paulette Nardal, Aimé Césaire, Frantz Fanon, Achille Mbembé, Françoise Vergès, Pascal Blanchard, Nicolas Bancel and Sandrine Lemaire, Pap Ndiaye, Gaston Kelman, Rokhaya Diallo, Alice Diop, Léonora Miano, and Fabienne and Véronique Kanor. *Conducted in French.*

**Requirements/Evaluation:** response papers, midterm paper, TV show, colloquium

**Prerequisites:** RLFR 201, 202, or 203, or by permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French and Africana Studies concentrators

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AFR 226 (D2) RLFR 226 (D1)

**Difference, Power, and Equity Notes:** This course satisfies the DPE requirement because it focuses on "the shaping of social differences, dynamics of unequal power, and processes of change" through the lenses of historical colonial legacies, race, gender, citizenship among other questions.

Not offered current academic year

### **RLFR 229 Black Outside the U.S.**

This course explores multiple ways Black identity evolves, adapts and is experienced differently depending on location. Students analyze Black experience in the U.S., France and Senegal through a range of texts from books and social media to music and film. One key aspect of the course is a study abroad trip to Senegal, which increases cultural awareness through experiential learning. This combination of textual learning with experiential knowledge exemplifies how language, religion, gender, geography, and performance shape one's racial identity. In the first section of the course, students investigate Black experience in the U.S., focusing on such topics as the one-drop rule, racial profiling and where mixed people fit within Black/White tensions. The second section highlights the politics of language in France. Students explore how words like "Black," "noir" and "race" have strong political connotations in France and spur both resistance to and alliance with Black American civil rights history. In the third part of the course, students visit Dakar, Senegal, and analyze Blackness through their own observations and encounters. Their trip insights jumpstart the final focus of the course on Senegal. Students investigate the influence of French colonialism on Black identity in Senegal, which makes the two geographical experiences of Blackness very different but still forever linked.

**Class Format:** seminar, the course includes a required spring break trip to Dakar, Senegal, which is no additional cost to students

**Requirements/Evaluation:** evaluation will be based on class participation, short weekly reading responses, two 4-5 page papers, a presentation based on the spring break trip, and a final presentation including a short 2-page report

**Prerequisites:** none

**Enrollment Limit:** 8

**Enrollment Preferences:** students who have taken other AFR courses, Francophone speakers and students

**Expected Class Size:** 8

**Grading:**

**Distributions:** (D2)

**Attributes:** AFR Core Electives GBST Borders, Exiles + Diaspora Studies Electives

Not offered current academic year

### **RLFR 232 (S) Liberté, Egalité, Fraternité ? Race, Gender, and Political Power in Eighteenth-Century France (DPE)**

**Cross-listings:** COMP 219 RLFR 232

Primary Cross-listing

The French Revolution of 1789 was, to a large extent, inspired by Enlightenment thinkers such as Voltaire, Rousseau, and Diderot who promoted ideas on individual liberty, scientific progress, religious freedom, and secularism. The Revolution brought with it promises of a society freed from the abuses of an absolute monarchy. Yet as feminist thinker Olympe de Gouges would note, when France redefined its notion of citizenship after 1789, it did not include women and people of color. This course examines Enlightenment ideas that led to the French Revolution, while analyzing how those ideas failed to bring true equality. Voltaire, Buffon, and Montesquieu all advocated for the abolition of slavery, but they also held racist and sexist

views, justified by pseudoscientific discourse. By further juxtaposing these thinkers with feminist and abolitionist authors such as Olympe de Gouges and Claire de Duras, we will examine how eighteenth-century female authors advocated for the rights of women. Finally, we will analyze artworks such as Marie-Guillemine Benoist's *Portrait d'une négresse* (1800) and discuss how France is using such works today to reckon with its history of discrimination.

**Requirements/Evaluation:** active class participation, one presentation (8-10 minutes), three to four papers (3-5 pages), and a longer final paper

**Prerequisites:** excellent performance in RLFR 105; successful performance in RLFR 106; other RLFR 200-level courses; or by French placement exam; or by permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French majors and certificate students; Comparative Literature majors; and those with compelling justification for admission

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COMP 219 (D1) RLFR 232 (D1)

**Difference, Power, and Equity Notes:** In its focus on Race, Gender, and Political Power, this course centers on a critical examination of difference, power, and equity in eighteenth-century France. Through the study of enlightenment and feminist thinkers and leaders, the course asks students to analyze the social, political, and discursive effects of class, race, ethnicity, gender, and sexuality in narratives on revolution, and to re-examine both past and present definitions of "liberty, equality, fraternity."

**RLFR 260 (F) Francophone Graphic Novels** (DPE)

**Cross-listings:** RLFR 260 COMP 260

**Primary Cross-listing**

In this class we will read contemporary graphic novels and *bandes dessinées* from Côte d'Ivoire, Morocco, Guadeloupe, Lebanon, France, and Québec to analyze how they approach subjects such as colonial history, migration and discrimination, gender and sexuality, and representations of disability and the racialized body. We will pay particular attention to the visual form and the critical theory of the graphic novel to further understand why this hybrid genre has become so popular and widespread, and how it is shaping conversations about difference and power in the Francophone world. *Conducted in French.*

**Requirements/Evaluation:** weekly 1-page response papers, two short 4-5-page papers, presentation and final 7-8-page research paper

**Prerequisites:** RLFR 105, 106, by placement or by permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French majors and certificate students, Comparative Literature majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

RLFR 260 (D1) COMP 260 (D1)

**Difference, Power, and Equity Notes:** The readings in this course focus on French colonial and Francophone postcolonial history, contemporary migration, and structures of discrimination built on race, religion, gender, and ableism in the French-speaking world. We will explore how graphic novels in their hybrid visual/verbal forms propose different ways of shaping the dynamics and the discourse of difference and power.

SEM Section: 01 TR 11:20 am - 12:35 pm Katarzyna M. Pieprzak

**RLFR 300 (S) The *Banlieue* in Literature, Music, and Film** (DPE) (WS)

**Cross-listings:** RLFR 300 AFR 339 COMP 336

**Primary Cross-listing**

The *banlieue* looms large in the French collective imagination. From its origins in medieval law, the term *banlieue* at the end of the 20th century has taken on multiple, at times overlapping, but almost exclusively negative meanings. It designates a peripheral geographical space often in contrast to its city center, social exclusion, "urban culture"--as in Hip Hop-produced within that space, and last but not least the symbolic bias through which its inhabitants are viewed (Vieillard-Baron). In this course, we will examine various constructions of the *banlieue* in French music, a manifesto, film, blogs, and literature to focus on the analytical, contestatory and affirmative dimensions of these narratives. Two decades after the film *La haine*, and ten years after the riots, how are filmmakers, artists, authors, and scholars of the *banlieue* reimagining and reframing the *banlieue*? What do current depictions of *banlieues* in the French media tell us about the State, French politics, and the state of French politics? What do "*banlieue* films" and "*banlieue* lit" tell us about the *banlieue*? In this course, conducted in French, we will read, watch, and listen to various constructions of the *banlieue* in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

**Requirements/Evaluation:** 3 thesis five-page research papers, 2 start-of-the-class brief presentations, active participation to in-class discussions and mini-conference on the *banlieue* (class final project).

**Prerequisites:** RLFR 105 and above

**Enrollment Limit:** 14

**Enrollment Preferences:** French majors and certificate students, Africana and Comparative literature students

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

RLFR 300 (D1) AFR 339 (D2) COMP 336 (D1)

**Writing Skills Notes:** To hone their research and writing skills (and prepare for their conference on the *banlieue*), students will write three research papers (with thesis statement and subheadings) from which they will receive professor feedback.

**Difference, Power, and Equity Notes:** This course, *Banlieue in Lit, Music, Film* fosters difficult but carefully framed conversations about race, class, gender, citizenship, housing segregation, discursive practices, immigration and belonging in contemporary France and how identities and power relationships are expressed in *banlieue* film, literature and French hip hop music.

**Attributes:** FMST Core Courses

**Not offered current academic year**

**RLFR 307 (F) Building Francophone Cities: Literature, Art and History** (DPE)

**Cross-listings:** RLFR 307 COMP 308

**Primary Cross-listing**

Through literature, visual art, and urban history, this class will engage with the remarkable histories, presents and imagined futures of five Francophone cities: Casablanca (Morocco), Algiers (Algeria), Kinshasa (Democratic Republic of the Congo), Fort-de-France (Martinique) and Port-au-Prince (Haiti). We will learn about their colonial foundations and postcolonial transformations while paying attention to how these urban spaces and their people and histories are represented and imagined by poetry, novels, and visual art. (Conducted in French)

**Requirements/Evaluation:** Active participation, weekly 1-page response papers, midterm 5-page paper, final project (oral presentation and 8-page paper).

**Prerequisites:** RLFR 105 or above, or by permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** French majors or certificate students, Comp. Lit. majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

RLFR 307 (D1) COMP 308 (D1)

**Difference, Power, and Equity Notes:** This course examines the French colonial history and postcolonial futures of five major Francophone cities and pays particular attention to questions of representation of class, race and gender in the historical, literary and visual record.

Fall 2022

SEM Section: 01 TF 1:10 pm - 2:25 pm Katarzyna M. Pieprzak

**RLFR 360 (S) Repairing a Broken World: Intro to North African Contemporary Art (DPE)**

**Cross-listings:** ARTH 460 COMP 361 ARAB 360 RLFR 360 ARTH 560

**Primary Cross-listing**

How do artists respond to a world in crisis? How does visual art engage violent histories, injured bodies, social injustice and ecological disaster? In this course we will explore the political and ethical concept of repair as it emerges in the work of contemporary North African visual artists. Repair is both a material and symbolic transformational practice of putting together something that is torn or broken. It is never complete, nor does it redeem a history of harm or violence. Rather repair is an invitation: a bringing of people, histories, objects, buildings, feelings and geographies into relation with one another in order to link worlds that have been splintered and separated. It is also a call to imagine other futures. North African contemporary artists have deeply engaged in this type of repair work, attending to colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity and broken transmission of memory. We will dive into the work of individual artists as well as collectives while reading theoretical texts about broken-world thinking, reparative epistemology, alternative archives, and material reparations.

**Class Format:** Section 1 is conducted entirely in French. Section 2 is conducted in English (with the option of selected reading in French). Students are welcome to sign up for either section but students taking the course for RLFR credit must register for section 1.

**Requirements/Evaluation:** For undergrads: Active participation, weekly glow posts, 5-page mid-term paper, 10-12 page final paper and presentation. For grad students: Active participation, weekly glow posts, 5-page mid-term paper, and 20-page final paper and presentation.

**Prerequisites:** For RLFR students, any RLFR 200-level course or above, or by permission of instructor.

**Enrollment Limit:** 18/sec

**Enrollment Preferences:** If over-enrolled, preference will be given to RLFR, ARAB, ARTH and COMP majors, and only 4 spots will be offered to Grad Art students.

**Expected Class Size:** 15/sec

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ARTH 460 (D1) COMP 361 (D1) ARAB 360 (D1) RLFR 360 (D1) ARTH 560 (D1)

**Difference, Power, and Equity Notes:** This course critically examines art work that engages colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity.

Spring 2023

SEM Section: 02 TF 1:10 pm - 2:25 pm Katarzyna M. Pieprzak

**RLFR 410 (F) Senior Seminar: Movement and Migration (DPE)**

How do movement and migration produce and disrupt constructions of identity, home, and the nation? In the context of movement and migration, how is place imagined, experienced and remembered? What are the relationships between movement and containment, flight and freedom? Over the course of the semester, we will examine literary texts, film and visual art from French-speaking communities that focus on: the immigration experience in France, the construction of a Francophone Atlantic identity, internal migration between rural and urban spaces, clandestine migration between Africa and Europe, population displacement due to war, and the possibility of creating portable or nomadic places of memory. Works by Chamoiseau, Glissant, Diome, Condé, Maffre, Pineau, and Binebine among others. *Conducted in French.*

**Requirements/Evaluation:** Weekly 1-page response papers, 5-page mid-term paper and a final 10-page research paper and presentation.

**Prerequisites:** Any 200-level RLFR course, or by permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Senior French majors and students completing the certificate in French, but open to advanced students of French.

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** Students will explore how literature, film and art narratives on migration and movement challenge (and also sometimes replicate) discourses of exclusion and structures of discrimination based on race and ethnic identity and gender. While the course focuses on French-speaking communities and people, we will think broadly about difference and power as they relate to movement, flight and freedom.

Not offered current academic year

### **RLFR 412 (F) Senior Seminar: Nineteenth-Century French Novel: Desperate Housewives and Extreme Makeovers**

**Cross-listings:** WGSS 408 RLFR 412

Primary Cross-listing

In 1834, Balzac wrote that "Paris is a veritable ocean. Sound it: you will never know its depth." The same can be said of the French nineteenth-century novel and its boundless ability to echo the past and illuminate the present. From the Romanticism of Stendhal and Hugo, and the Realism of Balzac and Flaubert, to the Naturalism of Zola and Maupassant, the novel became a forum for examining illicit sexuality, institutional misogyny, social injustice, criminal passions, revolutionary struggles, and Parisian pleasures in nineteenth-century France. Characters such as the imprisoned housewife Emma Bovary, the reluctant revolutionary Jean Valjean, the social-climbing lover Julien Sorel, the ambitious undergraduate Rastignac, and the domestically-abused Gervaise became synonymous with France's turbulent social and political landscape from the 1830s to the 1880s. And as recent film adaptations make clear, these desperate housewives and extreme makeovers continue to haunt our twenty-first century present. Reinterpreted by such actors as Gérard Depardieu, Isabelle Huppert, Uma Thurman, Claire Danes, and Jennifer Aniston, the nineteenth-century novel continues to sound out the scandalous and sensational depths of our own century. Readings to include novels by Balzac, Stendhal, Hugo, Flaubert, Maupassant, Zola. Films to include adaptations by Clément, Berri, August, Arteta, Lelouch, Chabrol. Conducted in French.

**Requirements/Evaluation:** active class participation, midterm exam, and two to three papers

**Prerequisites:** a 200-level or 300-level RLFR literature course at Williams; advanced coursework during study abroad; or by permission of the instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** French majors and certificate students; Women's, Gender, and Sexuality Studies majors; Comparative Literature majors; and those with compelling justification for admission

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 408 (D2) RLFR 412 (D1)

Not offered current academic year

### **RLFR 414 (S) Senior Seminar: Coming of Age: French and Francophone Childhood and Adolescent Film (DPE)**

**Cross-listings:** RLFR 414 COMP 414

Primary Cross-listing

Like the bildungsroman in literature, the coming of age story is a genre in itself in cinema. In this senior seminar, we will watch, discuss, and analyze French and Francophone childhood and adolescent narrative films whose protagonists bring into focus larger issues such as racial discrimination, class, gender, sexual identity, social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking. We will watch seminal films by Euzhan Palcy, the Dardennes brothers, Céline Sciamma, Férid Boughédir, François Truffaut, Faiza Ambah, and Raoul Peck.

**Requirements/Evaluation:** three three-page response papers; thesis statement, methodology, and works cited list on one page; 2 low-stakes presentations and one script of a video essay or academic journal "special issue" essay

**Prerequisites:** 200-level RLFR courses

**Enrollment Limit:** 19

**Enrollment Preferences:** French and Comparative Literature majors and certificate students

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

RLFR 414 (D1) COMP 414 (D1)

**Difference, Power, and Equity Notes:** This course qualifies for a Difference, Power, and Equity requirement because the films we focus on racial inequality, class, gender, sexual identity, post slavery society in the Caribbean, lack of social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking.

### **RLFR 511 (F) Intensive French Grammar and Translation**

This course is designed to offer students a thorough and systematic review of sentence structures and grammar to develop a reading knowledge of French. Through this intensive study, students will learn to decipher the subtleties of the written language, and as they become more confident they will start translating a variety of short excerpts. Students are also expected to learn and develop a wide lexical range centered on art history and criticism, but not limited to it.

**Class Format:** classes meet twice weekly and are conducted in English

**Requirements/Evaluation:** class participation, papers, a midterm, and a final examination

**Prerequisites:** a strong interest and need to learn French

**Enrollment Preferences:** although this course is to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll by permission of the instructor

**Grading:** pass/fail option only

**Distributions:** (D1)

Not offered current academic year

### **RLFR 512 (S) Readings in French Art History and Criticism**

This course is designed to provide Graduate Program students and interested others with knowledge of French acquired through translation and interpretation. The core of this course is based on the reading and translating of a variety of critical works covering different periods and genres in the field of art history. The material read will be analyzed in form and content, translated or summarized, in order to develop the skills and understand the techniques necessary for reading French accurately. Grammar will be reviewed in context.

**Requirements/Evaluation:** evaluation is based on class participation, papers, a midterm, and a final examination

**Prerequisites:** RLFR 511 or permission of instructor; undergraduates are welcome with permission of instructor

**Grading:** pass/fail option only

**Distributions:** (D1)

Not offered current academic year

### **Winter Study -----**

### **RLFR 13 (W) Creative Portraiture in the Darkroom**

In this course, we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use the view camera (the large format camera used during the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, sensitive media, and negative and use them as tools to make creative portraits in the darkroom. By the end of the course, students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Be aware that this class requires an average of 10 weekly lab or studio hours outside of regular classes.

**Requirements/Evaluation:** short paper and final project or presentation

**Prerequisites:** knowledge of black and white analog photography is preferred, but not required

**Enrollment Limit:** 10

**Enrollment Preferences:** Art majors then random

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enable

**Materials/Lab Fee:** \$150

IND Section: 01 TBA Leyla Rouhi

## GEOSCIENCES (Div III)

Chair: Associate Professor Phoebe A. Cohen

- Alex A. Apotsos, Lecturer in Geosciences
- Alice C. Bradley, Assistant Professor of Geosciences; on leave 2022-2023
- Phoebe A. Cohen, Chair and Associate Professor of Geosciences
- José A. Constantine, Associate Professor of Geosciences
- Mea S. Cook, Professor of Geosciences, Faculty Fellow of the Davis Center and the Office of Institutional Diversity, Equity and Inclusion; affiliated with: Geosciences, Davis Center, Institutional Diversity, Equity, and Inclusion
- Rónadh Cox, Edward Brust Professor of Geology and Mineralogy; affiliated with: Geosciences, Williams-Mystic Program
- Ana C. Gonzalez-Nayeck, Visiting Lecturer in Geosciences
- Mike R. Hudak, Assistant Professor of Geosciences
- Paul M. Karabinos, Edna McConnell Clark Professor of Geology

### MAJOR

The Geosciences major offers an understanding of the evolution of our planet and its interacting global systems. In this era of global change, geoscience provides the tools that can help us learn to live sustainably with our environment, and appreciate our place within the vastness of Earth history. Forces within the Earth create mountain ranges and ocean basins and drive the movements of continents. Wind, water and ice shape the surface of the Earth, making and changing the landscapes around us. Sedimentary rocks and the fossils within them teach us how life and climate have evolved over the vastness of time.

Geosciences graduates have a wide range of career options, both with and without graduate training. The many choices include environmental consulting, hazard assessment, hydrology, gemology, the energy and mining industries, outdoor education, and research and teaching in universities, colleges, and secondary schools. Many students choose to double-major in fields as diverse as Art, Economics, History, Physics, Mathematics, English, and Philosophy, and often find jobs where they can apply the synergies of their Geosciences double major. No matter what field they enter, all our Geosciences graduates pursue their lives and careers with a deeper appreciation for the natural world around them.

The major is designed to provide a solid grounding in the geosciences while being adaptable enough to accommodate diverse paths driven by student interests. There are no required courses, but students work through the menu below, which allows a lot of scheduling flexibility.

The requirements for the Geosciences major were revised in 2022. The new requirements are immediately below, and the old requirements follow. Students who entered Williams before fall 2020 are under the old requirements. Students who entered Williams in fall 2020 and after are under the new requirements. Both sets of requirements follow. If you have questions about the major, or how the different requirements apply to you, please contact the [Geosciences Chair](#).

#### **Geosciences major requirements for students who are entering Williams in or after fall 2020 or after:**

The Geosciences major requires a minimum of nine courses, distributed by course level and topic group; one course can fulfill both a course level and topic group requirement. To complete the minimum nine courses, students can add electives at any level, as long as they have a GEOS prefix, and the total number of 100 levels does not exceed two.

Course Level Requirements:

#### **At least one and at most two 100-level courses:**

GEOS 100 Introduction to Weather and Climate

GEOS 101 Co-Evolution of Earth and Life

GEOS 102 An Unfinished Planet

GEOS 103 Global Warming and Environmental Change

GEOS 104 Oceanography

GEOS 107 Astrobiology

#### **At least two 200-level courses selected from this group:**

GEOS 201 Field Methods and Structural Geology

GEOS 202 Mineralogy

GEOS 205 Economic Geology and Earth Resources  
GEOS 207 The Geoscience of Epidemiology in Public Health  
GEOS 208 Understanding the Modern Carbon Cycle Through Stable Isotopes  
MAST 211/GEOS 210 Oceanographic Processes (at Mystic)  
GEOS 212 Paleobiology  
GEOS 214 Mastering GIS  
GEOS 215 Climate Changes  
GEOS 217 Planets and Moons  
GEOS 255 Environmental Observation

**At least two 300-level courses selected from this group:**

GEOS 301 Geomorphology  
GEOS 302 Sedimentology  
GEOS 303 Igneous and Metamorphic Petrology  
GEOS 308 Life on Mars?  
GEOS 309 Modern Climate  
GEOS 324 Corals and Sea Level

**At least one of the following 400-level courses:**

GEOS 401 Global Tectonics and the Rise of Mountains  
GEOS 404 Coastal Processes and Geomorphology  
GEOS 405 Geochemistry: Understanding Earth's Environment  
GEOS 410 The Cryosphere  
GEOS 411 Geobiology  
GEOS 414 Reading Deep Time

Topic Group Requirements: Courses taken for the major must *also* include at least one and preferably two courses from each of the following three groups at the 200, 300, or 400 level. Note that 100-level courses do not fulfill topic group requirements.

**Climate and Oceans (Group A electives),** at least one and preferably two:

GEOS 208 Understanding the Modern Carbon Cycle Through Stable Isotopes  
MAST 211/GEOS 210 Oceanographic Processes (at Mystic)  
GEOS 215 Climate Changes  
GEOS 227T Climate Data Analysis  
GEOS 226T Ocean Circulation and Climate  
GEOS 255 Environmental Observation  
GEOS 309 Modern Climate  
GEOS 405 Geochemistry: Understanding Earth's Environment  
GEOS 410 The Cryosphere

**Sediments and Life (Group B electives),** at least one and preferably two:

GEOS 207 The Geoscience of Epidemiology in Public Health  
GEOS 212 Paleobiology  
GEOS 301 Geomorphology  
GEOS 302 Sedimentology  
GEOS 308 Life on Mars?  
GEOS 312T Mass Extinctions: Patterns and Processes  
GEOS 414 Reading Deep Time  
GEOS 404 Coastal Processes and Geomorphology

GEOS 411 Geobiology

**Solid Earth (Group C electives),** at least one and preferably two:

GEOS 201 Field Methods and Structural Geology

GEOS 202 Mineralogy

GEOS 205 Economic Geology and Earth Resources

GEOS 217 Planets and Moons

GEOS 220T Evolution of and on Volcanic Islands

GEOS 250T Climate, Tectonics and Erosion

GEOS 303 Igneous and Metamorphic Petrology

GEOS 401 Global Tectonics and the Rise of Mountains

**Geosciences major requirements for students who entered Williams prior to fall 2020:**

**At least one and at most two 100-level courses:**

GEOS 100 Introduction to Weather and Climate

GEOS 101 Co-Evolution of Earth and Life

GEOS 102 An Unfinished Planet

GEOS 103 Global Warming and Environmental Change

GEOS 104 Oceanography

GEOS 107 Astrobiology

**At least two 200-level courses selected from this group:**

GEOS 201 Field Methods and Structural Geology

GEOS 202 Mineralogy

GEOS 205 Economic Geology and Earth Resources

MAST 211/GEOS 210 Oceanographic Processes (only offered at Williams-Mystic)

GEOS 212 Paleobiology

GEOS 214 Mastering GIS

GEOS 215 Climate Changes

GEOS 217 Planets and Moons

GEOS 255 Environmental Observation

**At least two 300-level courses selected from this group:**

GEOS 301 Geomorphology

GEOS 302 Sedimentology

GEOS 303 Igneous and Metamorphic Petrology

GEOS 309 Modern Climate

GEOS 314 Analytical Historical Geology

GEOS 324 Corals and Sea Level

**At least one of the following 400-level courses:**

GEOS 401 Global Tectonics and the Rise of Mountains

GEOS 404 Coastal Processes and Geomorphology

GEOS 405 Geochemistry: Understanding Earth's Environment

GEOS 410 The Cryosphere

GEOS 411 Geobiology

**To complete the minimum nine courses, students can add electives at any level, as long as they have a GEOS prefix, and the total number of 100 levels does not exceed two. In addition, majors must take at least two courses from each of the three disciplinary groupings (i.e. Climate & Oceans, Sediments & Life, and Solid Earth).**

**Climate and Oceans:**

GEOS 100 Introduction to Weather and Climate

GEOS 104 Oceanography

MAST 211/GEOS 210 Oceanographic Processes (only offered at Williams-Mystic)

GEOS 215 Climate Changes

GEOS 221T Climate Science and Politics

GEOS 255 Environmental Observation

GEOS 309 Modern Climate

GEOS 324 Corals and Sea Level

**Sediments and Life:**

GEOS 101 Co-Evolution of Earth and Life

GEOS 103 Global Warming and Environmental Change

GEOS 107 Astrobiology

GEOS 212 Paleobiology

GEOS 301 Geomorphology

GEOS 302 Sedimentology

GEOS 312T Mass Extinctions

GEOS 314 Analytical Historical Geology

**Solid Earth:**

GEOS 102 An Unfinished Planet

GEOS 202 Mineralogy

GEOS 201 Field Methods and Structural Geology

GEOS 205 Economic Geology and Earth Resources

GEOS 217 Planets and Moons

GEOS 220T Evolution of and on Volcanic Islands

GEOS 250T Tectonic Geomorphology and Landscape Evolution

GEOS 303 Igneous and Metamorphic Petrology

**PREPARATION FOR GRADUATE SCHOOL**

Although many of our majors take geoscience jobs after graduation, many choose to go to graduate school, and most graduate programs will expect students to have a background in mathematics as well as a year or so of study in related sciences, in addition to the requirements of the Geosciences major. Students considering graduate work in geosciences should therefore consult with faculty to ensure that they plan wisely. The selection of outside courses will depend on the field in which a student wants to specialize. Graduate programs in solid-earth geosciences commonly expect entering students to have taken courses in chemistry. For those going into environmental geosciences, courses in chemistry, computer science and/or statistics are recommended. For those considering geobiology programs, biology courses are important. For students entering planetary geology, physics is recommended.

**THE DEGREE WITH HONORS IN GEOSCIENCES**

The degree with honors in Geosciences provides students with an opportunity to undertake an independent research project under the supervision of a faculty member, culminating in a thesis that demonstrates outstanding achievement of an original and innovative nature. In addition to the major requirements listed above, those who are candidates for the degree with honors take the following sequence in the Fall, Winter Study, and Spring of their senior year:

GEOS 493-031-494 Senior Research and Thesis

The principal considerations in admitting a student to a program of independent research are interest and motivation, mastery of fundamental material and skills, and ability to pursue independent study successfully. Interested students should talk to members of the department about project options at any time, but generally no later than January of the Junior year.

**STUDY AWAY**

Students planning to study off-campus should meet as early as possible with the Department Chair to plan and to discuss how potential courses

might be used in the major. Although most study-away programs do not offer geoscience courses, there are some that dovetail well with Geosciences. Examples include the Williams-Mystic program, the Frontiers Abroad program at Canterbury University in New Zealand, and the program at the University of Otago in New Zealand. Courses offered at Norwegian Technical Universities and at several universities in the United Kingdom have also been accepted. Up to two geoscience courses taken away from Williams can be counted toward the nine-course major. Be sure to meet with a Geosciences faculty advisor or Department Chair to discuss your plans and ideas for off-campus work.

## FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

### **Can your department or program typically pre-approve courses for major/concentration credit?**

Generally not until after a student returns and can provide course material for review (e.g. Syllabus and/or completed work such as exams, portfolios, lab reports and the like).

### **What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Complete syllabus and course description, including readings, assignments, evaluation criteria.

### **Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

Yes. A maximum of two courses can be credited toward major requirements.

### **Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

No.

### **Are there specific major requirements that cannot be fulfilled while on study away?**

No.

### **Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

Students should consult with the chair or other department faculty members to plan ahead and make sure that requirements can be met.

### **Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:**

None to date.

## **GEOS 100 (S) Introduction to Weather and Climate**

**Cross-listings:** GEOS 100 ENVI 100

### **Primary Cross-listing**

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** lab assignments, a midterm, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** first year and second year students, Geosciences majors

**Expected Class Size:** 40

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GEOS 100 (D3) ENVI 100 (D3)

**Attributes:** ENVI Natural World Electives EXPE Experiential Education Courses GEOS Group A Electives - Climate + Oceans

Not offered current academic year

### **GEOS 101 (F) The Co-Evolution of Earth and Life**

**Cross-listings:** GEOS 101 ENVI 105

Primary Cross-listing

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** one laboratory per week plus one all-day field trip

**Requirements/Evaluation:** lab work, short quizzes, midterms, an independent project, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** first year and second year students, Geosciences majors

**Expected Class Size:** 30

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GEOS 101 (D3) ENVI 105 (D3)

**Attributes:** ENVI Natural World Electives EXPE Experiential Education Courses GEOS Group B Electives - Sediments + Life

Not offered current academic year

### **GEOS 102 (S) An Unfinished Planet**

The Earth is a work-in-progress, an evolving planet whose vital signs--as expressed by earthquakes, volcanic eruptions, and shifting plates--are still strong. In a geological time frame, nothing on Earth is permanent: ocean basins open and close, mountains rise and fall, continental masses collide and pull apart. There is a message here for all of us who live, for an infinitesimally brief time, on the moving surface of the globe. This course uses the plate tectonics model--one of the fundamental scientific accomplishments of the past century--to interpret the processes and products of a changing Earth. The emphasis will be on mountain systems (on land and beneath the oceans) as expressions of plate interactions. Specific topics include the rocks and structures of modern and ancient mountain belts, the patterns of global seismicity and volcanism, the nature of the Earth's interior, the changing configurations of continents and ocean basins through time, and, in some detail, the formation of the Appalachian Mountain system and the

geological assembly of New England. Readings will be from a physical geology textbook, a primary source supplement, selected writings of John McPhee, and references about the geology of the Northeast. This course is in the Solid Earth group for the Geosciences major.

**Class Format:** lecture three hours per week and lab (several involving field work) two hours per week; one required all-day field trip on the last Monday of the semester to the Connecticut Valley and the highlands of western Massachusetts

**Requirements/Evaluation:** three hour-tests and weekly lab work

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** first year and second year students, Geosciences majors

**Expected Class Size:** 40

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)

### **GEOS 103 (F) Global Warming and Environmental Change**

**Cross-listings:** ENVI 103 GEOS 103

#### **Primary Cross-listing**

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and wildfires, the natural processes that shape Earth's surface are tied to temperature and precipitation. People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with geography. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate. We will also visit and engage with Black communities and community leaders across New England who are grappling with the unjust distribution of resources to mitigate climate impacts and who have been disproportionate bearers of environmental risk.

**Requirements/Evaluation:** written reports from laboratories and readings, class participation, a midterm and final exam

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first year and second year students, Geosciences majors and Environmental Studies majors and concentrators

**Expected Class Size:** 48

**Grading:** yes pass/fail option, no fifth course option

## GEOS 104 (F) Oceanography

**Cross-listings:** MAST 104 GEOS 104 ENVI 104

### Primary Cross-listing

The oceans cover three quarters of Earth's surface, yet oceanography as a modern science is relatively young: the first systematic explorations of the geology, biology, physics and chemistry of the oceans began in the late 19th century. This introduction to ocean science includes the creation and destruction of ocean basins with plate tectonics; the source and transport of seafloor sediments and the archive of Earth history they contain; currents, tides, and waves; photosynthesis and the transfer of energy and matter in ocean food webs; the composition and origin of seawater, and how its chemistry traces biological, physical and geological processes; oceans and climate change; and human impacts.

**Class Format:** three 50-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast of New England.

**Requirements/Evaluation:** lab activities (25%), homework (25%), quizzes (5%), three exams (45%)

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first year and second year students, Geosciences majors, Maritime Studies concentrators

**Expected Class Size:** 48

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

## GEOS 106 (F) Being Human in STEM (DPE)

**Cross-listings:** PHYS 106 GEOS 106 STS 106

### Secondary Cross-listing

This course combines academic inquiry and community engagement to investigate the themes of diversity and social climate within STEM (science, technology, engineering and mathematics) disciplines. Students will examine how diverse identities including but not limited to gender, race, disability, sexuality, national origin, socioeconomic status, religion, and ethnicity shape the STEM experience both at Williams and nationally. We will ground our understanding through critical reading of primary scholarly research on topics such as implicit bias, identity threat, and effects of team diversity on excellence. From there, we will execute small group projects. Students will design, execute, and evaluate interventions that relate to the course goals and that have direct relevance to Williams students, faculty, and staff. For example, a student group could implement a survey of minoritized STEM students, or create a qualitative interview-based assessment of how socioeconomic status impacts students' abilities to participate in STEM fields. Course work includes weekly readings, reflective/opinion writing, in class discussion, and the development and presentation of a group project.

**Class Format:** class discussions, group project work (out of class time required)

**Requirements/Evaluation:** short response papers, class discussion participation, leading class discussions, group work, and final project

**Enrollment Limit:** 15

**Enrollment Preferences:** DIV III majors; statement of interest may be requested

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** does not count towards GEOS or PHYS major credit

**Distributions:** (D3) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

PHYS 106 (D3) GEOS 106 (D3) STS 106 (D2)

**Difference, Power, and Equity Notes:** This course explicitly addresses the intersection of marginalized identities and the STEM experience. Students will learn how to critically address how issues such as gender, race, ethnicity, and disability impact participation in and the experience of STEM fields. For example, students will read and critique literature documenting bias in STEM fields, and will also learn about and create interventions that can address these biases.

Not offered current academic year

### **GEOS 107 (F) Astrobiology**

**Cross-listings:** GEOS 107 ASTR 107

#### **Primary Cross-listing**

Astrobiology is the study of the origin, evolution, and distribution of life in the universe. As such it is an inherently interdisciplinary field, incorporating all of the basic natural sciences: biology, chemistry, physics, astronomy, and the earth sciences, as well as aspects of philosophy, sociology, and engineering. Questions we will seek answers to in this class include: How, why, when, and where did life evolve on Earth, and what does that tell us about how it might evolve elsewhere? What are the chances that there is life on other planets and moons in our solar system, and why? Are there habitable planets elsewhere in the universe, and will we ever truly know if any of them contain life? We will approach these questions using a combination of lectures, activities, labs, homework assignments, and visits from some of the country's leading Astrobiology researchers. Examples of lab and homework activities include exploring our definition of life by making observations about living and non-living systems, examining evidence for ancient habitable environments in rocks, and modeling chemical fingerprinting tools used by Mars rovers. Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will present a mock NASA mission proposal. This course requires no previous experience in the sciences. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** Lectures will be partially flipped with student responsible for watching videos before class; class time will be split between short lectures, small group activities, and class discussions. Lab groups will meet in person every other week and have group project work on alternate weeks that may be done virtually or in person.

**Requirements/Evaluation:** Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will present a mock NASA mission proposal.

**Prerequisites:** none

**Enrollment Limit:** 46

**Enrollment Preferences:** first year and second year students, Geosciences majors

**Expected Class Size:** 46

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** This course counts towards the GEOS Group B Electives - Sediments and Life

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GEOS 107 (D3) ASTR 107 (D3)

**Attributes:** GEOS Group B Electives - Sediments + Life

### **GEOS 111 (F) Radical Science- How Geology Changed the Way We See the World (WS)**

Copernicus shocked Europe when he suggested that the Earth is not the center of the universe. Hutton and other geologists made an equally radical proposal more than two centuries later when they introduced the concept of deep time and argued that the Earth was much older than 6,000 years, as determined by biblical scholars. Several decades later, Darwin and Wallace shook the foundation of western philosophy once more when they proposed that organisms evolved. When geologists reinterpreted landscape features once attributed to the great flood as evidence for past continental glaciation, the concept of extreme climate change through time sprang to life. During the 20th century, the permanence of Earth's geography was challenged by the continental drift hypothesis, which was initially rejected for decades until it reemerged as plate tectonic theory. This tutorial explores how geologic breakthroughs challenged western views of humans as the center of creation living in a world with limited change. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics. This course is in the Solid Earth group for the Geosciences major.

**Requirements/Evaluation:** five 5-page papers and five oral critiques of partner's papers

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** First year students then second year students

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (WS)

**Writing Skills Notes:** Students will write five 5-page papers and will receive peer and instructor feedback on how to improve their writing skills and formulate sound arguments.

**Attributes:** GEOS Group C Electives - Solid Earth

Fall 2022

TUT Section: T1 TBA Paul M. Karabinos

### **GEOS 201 (F) Field Methods and Structural Geology (WS)**

Geologic history is preserved in rocks and it can be deciphered using fundamental principles such as superposition and cross-cutting relationships. Field observations are essential to understanding the rock record, and data and interpretations are encoded in geologic maps. This course introduces students to topographic and geologic maps, best practices for geologic field work, the field identification of common minerals and rocks, geologic contacts, and structures such as folds, and faults. Students will develop skills for presenting field data in papers, figures, and oral presentations. This course is in the Solid Earth group for the Geosciences major.

**Class Format:** lecture and discussion, three hours per week and laboratory, three hours per week

**Requirements/Evaluation:** short weekly writing assignments will form the basis for two 10-page papers based on field trips and a final independent project

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** Geosciences majors or students with a strong interest in geosciences

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** \$15 for field supplies

**Distributions:** (D3) (WS)

**Writing Skills Notes:** There will be two 10-page papers, each based on four field trips. Students will submit short field descriptions and figures with captions after each field trip. The shorter assignments will be incorporated in two papers. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes:** GEOS Group C Electives - Solid Earth

### **GEOS 202 (F) Mineralogy**

This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in the major, it provides a systematic framework for the study of minerals--Earth's building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography through element distribution and crystal chemistry to the phase relations, compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical emission spectroscopy; wavelength- and energy-dispersive x-ray spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section. This course is in the Solid Earth group for the Geosciences major.

**Class Format:** Lecture three hours per week and laboratory three hours per week; independent study of minerals in hand specimen; one afternoon field trip

**Requirements/Evaluation:** one hour test, lab work, and a final exam

**Prerequisites:** one 100-level GEOS course or permission of instructor

**Enrollment Limit:** 14

**Enrollment Preferences:** sophomores and juniors planning to take GEOS 301, 302 and/or 303 in the subsequent year

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)

**Attributes:** EXPE Experiential Education Courses GEOS Group C Electives - Solid Earth MTSC Courses

### **GEOS 205 (F) Economic Geology and Earth Resources**

**Cross-listings:** GEOS 205 ENVI 207

#### **Primary Cross-listing**

"If it can't be grown, it must be mined." We depend on the solid Earth for a huge array of resources. The metal in your soda can, the plastic in your Nalgene, the components of your computer, the glass in your window, the hydrocarbons being burned to keep you warm in the winter or to transport you in cars or aircraft, the cars and aircraft themselves: all are made of materials mined from the Earth. Right now there are more people building more houses, paving more roads, making more vehicles, more electronics, and more plastic packaging—all with geologic materials. As demand soars in both established and growing economies, and as we realize the environmental damage that can result from resource extraction and processing, the importance of understanding Earth's resources increases. Finding new deposits and managing those we have requires insight into the geology that underlies the location and origin of strategic Earth materials. This class introduces the geologic processes that control formation, distribution, and extent of materials reserves: dimension stone and gravel, base and precious metal ores, gemstones, petroleum, nuclear energy sources, and specialty materials for medical, technological, and military uses. This course is in the SOLID EARTH GROUP for the Geosciences major.

**Class Format:** 2.5 hours lecture per week and one 3 hour lab per week, including some field labs

**Requirements/Evaluation:** one hour exam, a final exam, lab exercises, and a group project

**Prerequisites:** one 100-level GEOS course or permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** sophomores and Geosciences majors

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GEOS 205 (D3) ENVI 207 (D3)

Not offered current academic year

### **GEOS 207 (S) The Geoscience of Epidemiology and Public Health (DPE)**

**Cross-listings:** ENVI 201 GEOS 207

#### **Primary Cross-listing**

The Coronavirus pandemic has highlighted the many ways that diseases can be transmitted in the environment. As a society we are becoming aware of the many ways that geological processes and materials influence human health, in ways both beneficial and dangerous. This course unites geoscience, biomedicine and public health approaches to address a wide range of environmental health problems. These include water-related illnesses (e.g. diarrhea, malaria); minerals and metals, both toxic (e.g. asbestos, arsenic) and essential (e.g. iodine); radioactive poisoning (e.g. radon gas); and the transport of pathogens by water and wind. In many cases, the environmental health problems disproportionately affect marginalised populations, contributing to greater disease and death among poor communities and populations of colour. We will examine the broad array of dynamic connections between human health and the natural world. We will discuss the social justice implications of a range of environmental health

problems. And we will examine current research into how coronaviruses, such as the one causing COVID-19, are transported in the environment. This course is in the Sediments and Life group for the Geosciences Major.

**Requirements/Evaluation:** Evaluation will be based on short weekly writing assignments as well as an individual project and poster presentation.

**Prerequisites:** No prerequisites

**Enrollment Limit:** 34

**Enrollment Preferences:** Preference to first-years, sophomores, and prospective Geosciences majors

**Expected Class Size:** 30

LAB Section: 02 Cancelled

### **GEOS 208 (F) The Modern Carbon Cycle: the Story from Stable Isotopes**

Burning fossil fuels, industrial agriculture, and microbial processes all emit greenhouse gases to the atmosphere, and therefore contribute to climate change. But in what proportions? Enter stable isotopes. Everything around you--including the lithosphere, biosphere and hydrosphere--contains a mixture of carbon of mass 12 or 13. By learning the processes that control the ratio of these two stable isotopes in different Earth materials, we can better understand the modern carbon cycle, including its inputs and outputs, transformative processes, and interaction with global climate. In this course, we will review the basics of stable carbon isotope theory and analysis and use these tools to better understand the carbon cycle on different spatial and temporal scales. We will consider how to model both global and local sources of carbon to the atmosphere, both conceptually and through simple box models using stable isotopes. In lab, students will write models in R (no prior experience required), prepare organic and inorganic materials for carbon isotope analysis by a commercial laboratory, and correct and analyze real isotope data. This course is in the Oceans and Climate Group for the Geoscience major.

**Class Format:** 2.5 hours lecture per week and one 3 hour lab per week

**Requirements/Evaluation:** Weekly lab assignments, bi-weekly (open book) quizzes, a final project including a written report and oral presentation.

**Prerequisites:** one 100-level GEOS course or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** sophomore and junior GEOS majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

### **GEOS 210 (F)(S) Oceanographic Processes**

**Cross-listings:** GEOS 210 MAST 211

**Secondary Cross-listing**

Part of the Williams-Mystic Coastal and Ocean Studies Program, this course provides an introduction to physical, geological, chemical, and biological oceanography. Using local field sites as well as places visited on field seminars, we will investigate why the Earth has oceans, why they are salty, how they move and flow, reasons for sea level change on both long and short timescales, and how our oceans interact with the atmosphere to control global climate. We will emphasise societal interactions with the ocean, and will consider coastal processes including land loss. We will apply an environmental justice and anti-racist lens to our discussions. Field work will take place on shores in southern New England, as well as during field seminars on the Atlantic ocean, the West Coast and the Mississippi River Delta. This course is in the Oceans and Climate group for the Geosciences major.

**Class Format:** Flipped classroom will focus on active learning using data-based exercises. Mini-symposia will involve student research and discussion.

**Requirements/Evaluation:** graded lab exercises, mini-symposium participation, and a research project

**Prerequisites:** none

**Enrollment Limit:** 24

**Enrollment Preferences:** none

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** This course is taught at our Mystic Seaport campus. Students must be enrolled in the Williams-Mystic Coastal and Ocean Studies Program.

**GEOS 212 (S) Paleobiology**

**Cross-listings:** GEOS 212 BIOL 211

**Primary Cross-listing**

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. We will explore how, why, when, and where fossils form and learn about the major groups of fossilized organisms and how they have changed through time. In addition, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** One day field trip to the the Paleozoic of New York State

**Requirements/Evaluation:** Weekly lab assignments, frequent short quizzes and writing assignments, and a final project with a written and oral presentation component.

**Prerequisites:** any 100-level GEOS course or BIOL 102, 203 or 205

**Enrollment Limit:** 24

**Enrollment Preferences:** sophomore and junior GEOS majors

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** does not satisfy the distribution requirement for the Biology major

### **GEOS 214 (S) Mastering GIS**

**Cross-listings:** GEOS 214 ENVI 214

Primary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS has opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

**Class Format:** lecture, three hours per week and laboratory, three hours per week

**Requirements/Evaluation:** weekly lab exercises, weekly quizzes, and a research project

**Prerequisites:** at least one course in Geosciences or Environmental Studies

**Enrollment Limit:** 18

**Enrollment Preferences:** Geosciences majors and Environmental Studies majors and concentrators.

**Expected Class Size:** 18

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)

### **GEOS 215 (S) Climate Changes (QFR)**

**Cross-listings:** ENVI 215 GEOS 215

Primary Cross-listing

Paleoclimatology is the reconstruction of past climate variability and the forces that drove the climate changes. The Earth's climate system is experiencing unprecedented and catastrophic change because of anthropogenic emission of greenhouse gases and land use change.

Paleoclimatology allows humans to put modern climate changes into the context of the history of this planet, and shows how and why it is

unprecedented and catastrophic. Each climate event we study from Earth's past teaches us lessons on why the climate system responds to anthropogenic perturbations, what climate changes we're committed to in the future, how long-lasting they will be, and what climate consequences we can avoid if we take action and reduce greenhouse gas emissions sooner. In this course, we will discuss the major mechanisms that cause natural climate variability, how climate of the past is reconstructed, and how climate models are used to test mechanisms that drive climate variation. With these tools, you will analyze and interpret data and model simulations from climate events from Earth's history, and apply these findings to anthropogenic climate changes happening now and that are projected to happen in the future. Laboratories and homework will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

**Class Format:** This class has three scheduled lectures per week, and one lab meeting per week which will consist of field excursions, lab exercises, problem solving and discussion

**Requirements/Evaluation:** lab exercises and homework (25%), three quizzes (50%), and a final project (25%)

**Prerequisites:** 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor

**Enrollment Limit:** 24

**Enrollment Preferences:** Geosciences majors and Environmental Studies majors and concentrators and Maritime Studies concentrators

**Expected Class Size:** 16

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 215 (D3) GEOS 215 (D3)

**Quantative/Formal Reasoning Notes:** Labs and homework include quantitative problem solving, visualization and analysis of quantitative data, and scientific computing with Matlab. No previous programming experience is assumed.

### **GEOS 217 (S) Planets and Moons**

**Cross-listings:** ASTR 217 GEOS 217

#### **Primary Cross-listing**

This course examines the history and geology of the solar system. No two planets are exactly alike, and as we acquire more data and higher-resolution images, our sense of wonder grows. However, we can't hike around and hammer rocks on Venus or Titan, so we have to infer composition, form, texture and process from remotely-captured images and sparse chemical and spectral data. We will consider the origin of the solar system, the formation and evolution of planetary bodies, and the role of impacts, volcanism, tectonics and geomorphology in shaping them. We will summarize basic geological concepts of stratigraphy, structure and chronology and show how they can be applied off-world. We will review solar system exploration, and will include planetary data in lab exercises. This course is in the Solid Earth group for the Geosciences major.

**Requirements/Evaluation:** Reading journal, lab exercises, class participation

**Prerequisites:** any 100-level GEOS or any 100-level ASTR course, or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** Geosciences majors, Astronomy/Astrophysics majors, and sophomores

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

### **GEOS 220 (F) Evolution of and on Volcanic Islands (WS)**

**Cross-listings:** GEOS 220 ENVI 219

#### **Primary Cross-listing**

Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics. This course is in the Solid Earth group for the Geosciences major.

**Class Format:** One-hour weekly meetings with tutorial partner and instructor

**Requirements/Evaluation:** five 5-page papers and critiques of partner's papers

**Prerequisites:** 100-level GEOS course or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Geosciences majors and students with a demonstrated interest in geosciences

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GEOS 220 (D3) ENVI 219 (D3)

**Writing Skills Notes:** Students will write five 5-page papers and will receive instructor feedback on how to improve their writing skills and formulate sound arguments.

### **GEOS 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WS)**

**Cross-listings:** GEOS 221 ENVI 222 LEAD 221

#### **Primary Cross-listing**

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** weekly papers (2 - 5 pages in length) and a final oral presentation

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** sophomores, Geosciences and Environmental Studies juniors and seniors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

Not offered current academic year

### **GEOS 226 (S) The Oceans and Climate (WS)**

**Cross-listings:** GEOS 226 ENVI 226 ENVI 252 MAST 226

Primary Cross-listing

The oceans are a fundamental part of Earth's climate system. Ocean currents redistribute heat and water vapor around the globe, controlling temperature and precipitation patterns. Marine phytoplankton blooms and air-sea gas exchange modulate the atmospheric carbon dioxide concentration. The dynamic interaction of the atmosphere and the sea surface results in multi-year climate variations such as the El Niño-Southern Oscillation. This course will examine gradual and abrupt climate shifts from Earth's history and the ocean's role in driving, amplifying or dampening the changes, the ocean's response to anthropogenic greenhouse gas emissions, and the projected impacts of continued emissions and climate change on the ocean in the coming decades and millennia. We will analyze articles from the scientific literature that lay out the theory on the ocean's influence on climate, reconstruct past climate and ocean changes, test the mechanisms responsible for those changes, and with that knowledge, project the consequences of continued anthropogenic greenhouse gas emissions. Topics may include the climate effects of opening and closing seaways with plate tectonics, ocean feedbacks that amplify the intensity of ice ages, the instability of ocean circulation during ice-sheet retreat, the evolution of the El Niño-Southern Oscillation with changing carbon dioxide through the geologic past and the next century, ocean heat and carbon dioxide uptake during the last century and into the future, and the impact on sea level, seafloor methane reservoirs, ocean acidification, oxygenation and marine ecosystems. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** evaluation will be based on the critical analysis of reading from the scientific literature through discussion, writing and revision

**Prerequisites:** at least one GEOS course

**Enrollment Limit:** 10

**Enrollment Preferences:** students with a strong interest in Geosciences and Geosciences majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (WS)

**Writing Skills Notes:** each student will write five 5-page position papers and five 1-page response papers; students will give and receive feedback through peer review and tutorial meeting discussions and will develop their writing and critical analysis skills through revision

**Attributes:** ENVI Natural World Electives GEOS Group A Electives - Climate + Oceans MAST Interdepartmental Electives

Not offered current academic year

### **GEOS 227 (S) Climate Data Analysis**

**Cross-listings:** GEOS 227 ENVI 226

Primary Cross-listing

In this tutorial, students will learn how to access and work with the datasets that show how our climate is changing. The course introduces a series of analytical methods used in climate science, and students then apply those 'recipes' to data of their choosing to research parts of the climate system. Over the course of the term, a student might investigate the seasonality of global atmospheric carbon dioxide levels, maps of sea level anomalies, and the impact El Niño patterns have on Western US rainfall. Students will present their findings, and their insights into the particular aspect of the climate system, at weekly tutorial meetings. Analytical approaches covered in the class include climatologies, time series analysis (trends, periodicity, and autocorrelation), anomaly maps, composites, and zonal/meridional averaging. As for regions and climate systems students can explore: the sky is the limit. This course is in the Oceans and Climates group for the Geosciences major.

**Class Format:** Asynchronous recorded lectures will provide instruction on new analytical techniques every two weeks. Students will meet in pairs for one hour every week with the instructor: each student will present the results of their data analysis and their interpretation for discussion every other week.

**Requirements/Evaluation:** Five 3-4 page papers including figures made from analyzing data.

**Prerequisites:** At least one GEOS or ENVI course

**Enrollment Limit:** 10

**Enrollment Preferences:** Students with a strong interest in Geosciences and Geoscience majors.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

Not offered current academic year

### **GEOS 234 (S) Introduction to Materials Science (QFR)**

**Cross-listings:** GEOS 234 PHYS 234

Secondary Cross-listing

Materials Science is the study of how the microscopic structure of materials--whether steel, carbon fiber, glass, wood, plastic, or mayonnaise--determines their macroscopic mechanical, thermal, electric, and other properties. Topics of this course include classifying materials; material structure; thermodynamics and phase transformations; material properties and testing; how solids bend, flow, and ultimately break; and how to choose the right material for design applications. Materials Science is a highly interdisciplinary field and as a result the course prerequisites are broad but also flexible. Interested students who are unsure about their preparation are strongly encouraged to contact the instructor.

**Class Format:** lecture (3 hours per week) plus three to four small-group laboratory sessions throughout the semester (to be scheduled with instructor)

**Requirements/Evaluation:** weekly problem sets, class participation, and midterm and final exams, all of which have a substantial quantitative component

**Prerequisites:** high school physics and chemistry, preferably at the AP level, and MATH 140 or AP Calculus (BC), and one 200-level PHYS, CHEM, or GEOS course; or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** based on students' scientific background and seniority

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** This course does not count toward the Geosciences major.

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**Attributes:** MTSC Courses

Not offered current academic year

## **GEOS 255 (F) Environmental Observation**

**Cross-listings:** GEOS 255 ENVI 255

### **Primary Cross-listing**

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** Weekly labs, four quizzes, and a final project

**Prerequisites:** at least one prior course in GEOS or ENVI

**Enrollment Limit:** 20

**Enrollment Preferences:** sophomores, then GEOS majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GEOS 255 (D3) ENVI 255 (D3)

**Attributes:** ENVI Natural World Electives EXPE Experiential Education Courses GEOS Group A Electives - Climate + Oceans

**Not offered current academic year**

## **GEOS 301 (F) Geomorphology**

**Cross-listings:** GEOS 301 ENVI 205 ENVI 331

### **Primary Cross-listing**

Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth's surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** lecture, three hours per week and laboratory, three hours per week

**Requirements/Evaluation:** weekly lab exercises, a research project, and a midterm and final exam

**Prerequisites:** At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** GEOS and ENVI majors

**Expected Class Size:** 18

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GEOS 301 (D3) ENVI 205 (D3) ENVI 331 (D3)

Not offered current academic year

### **GEOS 302 (S) Sedimentology (WS)**

Sediments and sedimentary rocks are the book in which Earth's history is recorded, where we read the stories of ancient oceans and continents, and how life evolved. Sand and dirt preserve information about the rocks that were eroded to form them, the fluids and forces that transported them, the ways in which they were deposited, and the ecosystems that they supported. Understanding sediments is also fundamental to society, for many kinds of civil engineering as well as pollution and environmental remediation. We will investigate sediment composition, fluid mechanics, bedforms, and depositional environments, building to an integrated understanding of erosion, deposition, and changes over time. We will also acknowledge and examine the roles that racism and colonialism have played in sedimentologic research. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** lecture/discussion three hours per week and laboratory three hours per week; field trips: two half-day and one all-day

**Requirements/Evaluation:** lab and field exercises, writing assignments, participation in discussions

**Prerequisites:** At least one course in GEOS Group B (Solid Earth) AND one course in GEOS Group C (Sediments and Life); or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Geosciences majors

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (WS)

**Writing Skills Notes:** Weekly 2-3 page writing assignments will be thoroughly edited for style, grammar, and syntax; each student will compile their papers as a growing body of work, and each new assignment will be read and edited in the context of previous submissions.

**Attributes:** EXPE Experiential Education Courses GEOS Group B Electives - Sediments + Life MAST Interdepartmental Electives

Not offered current academic year

### **GEOS 303 (S) Igneous and Metamorphic Petrology**

Using plate tectonics and the geologic assembly of New England as a template, this course explores the origin of crystalline rocks--volcanic, plutonic, and metamorphic--that comprise 94% of the Earth's crust. Field and lab studies are the crux of the course, supported by experimental work and thermodynamic principles. Chemical and mineralogical compositions and rock fabrics provide evidence for crystallization environments and tectonic settings, past and present. This course is in the Solid Earth group for the Geosciences major.

**Class Format:** Discussion, three hours per week and laboratory, two hours per week; several field trips during lab hours.

**Requirements/Evaluation:** lab work, one hour test, and a final exam

**Prerequisites:** GEOS 202 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** GEOS majors

**Expected Class Size:** 7

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)

**Attributes:** GEOS Group C Electives - Solid Earth

Not offered current academic year

### **GEOS 304 (S) Mineralogy and Petrology**

Minerals are Earth's basic building blocks. They form, deform, and transform in response to environment conditions, and in doing so, they record a wide range of processes in the Earth system. In this course, we will use minerals to understand the geologic record at multiple timescales, from the slow process of continental assembly and break-up to rapid processes such as volcanic eruptions and biogeochemical cycles. Central to this analysis is rock and mineral characterization. Therefore, laboratory and field studies will hone fundamental observational skills of minerals at multiple scales, from atomic scale crystalline structures to macroscopic physical properties in hand sample. Discussion of experimental and natural data (phase

relationships, thermodynamics, and major and trace element geochemistry) in conjunction with these petrographic approaches, will create a framework for interpreting the dynamic processes and geologic settings where igneous and metamorphic rocks form. The semester will culminate in a final project that applies both the observation and interpretive skills developed, giving students the chance to collect data and "read the geologic record" left behind in rocks from around the world.

**Class Format:** three lectures per week with two lab sections.

**Requirements/Evaluation:** This class may include field trips, problem sets, 2-3 exams and an final project

**Prerequisites:** 1 100-level GEOS course

**Enrollment Limit:** 24

**Enrollment Preferences:** GEOS majors who have taken at least one 100-level GEOS course.

**Expected Class Size:** 24

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)

**Attributes:** GEOS Group C Electives - Solid Earth

### **GEOS 308 (S) Life on Mars?**

On February 18th, 2021, the Perseverance Rover landed in the Jezero Crater on Mars, with the objective to "seek signs of ancient life and collect samples of rock and regolith (broken rock and soil) for possible return to Earth." In this course, we will investigate what "signs" would point to ancient or modern life, both on the Martian surface and in the chemistry of any samples (eventually) returned to Earth. Topics to be covered include the visual and chemical evidence for life on Earth and its application to Martian environments; if and how compounds indicative of life could be preserved in Martian rocks; insights from Earth analogues for Mars environments; the potential for modern subsurface life on Mars; and whether life on Earth could have originated on Mars. In lab, we will grow our own microbial mats, and characterize the visual and chemical characteristics that make them "alive." As a final project, students will prepare a mock manuscript for publication in the journal *Astrobiology*. This course is in the Sediments and Life Group for the Geoscience major.

**Class Format:** 3 hours per week of class, 3 hours per week of lab

**Requirements/Evaluation:** Weekly lab assignments, two reports on primary literature, final paper in the style of a manuscript for publication

**Prerequisites:** any 100-level GEOS course

**Enrollment Limit:** 15

**Enrollment Preferences:** junior and senior GEOS majors, or permission of instructor

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

**Attributes:** GEOS Group B Electives - Sediments + Life

Spring 2023

### **GEOS 309 (F) Modern Climate (QFR)**

**Cross-listings:** GEOS 309 ENVI 209

**Primary Cross-listing**

What will happen to the Earth's climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will

study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects--like the albedo feedback associated with sea ice and glacier loss--and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** 4 multi-week lab projects and several short quizzes

**Prerequisites:** Any of GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** GEOS and ENVI majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GEOS 309 (D3) ENVI 209 (D3)

**Quantative/Formal Reasoning Notes:** Labs consist of a series of numerical climate modeling projects, which require significant quantitative and logical reasoning.

Not offered current academic year

### **GEOS 312 (F) Mass Extinctions: Patterns and Processes (WS)**

Over the last 541 million years of Earth history, five major mass extinctions have occurred, each dramatically changing the makeup and course of life on our planet. During some of these events, over 75% of all marine animal species went extinct; during others, groups like the dinosaurs vanished from the planet after tens of millions of years of ecological dominance. This tutorial course will explore the idea of extinction from the evolution of the concept in human thought to current research on the mechanisms and patterns of extinctions through time. We will examine what makes an extinction "mass", delve into the causes and consequences of the major mass extinction events of the Phanerozoic, and discuss the potential human-induced "6th extinction" event occurring in the present day. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** Weekly 1-hour tutorial meetings with pairs of students; one required all-day field trip.

**Requirements/Evaluation:** four 4-5-page papers, one revision, tutorial presentations, the student's effectiveness as a critic, and 1 problem set

**Prerequisites:** GEOS 107 or GEOS 212; or permission of instructor + any 200 level GEOS course

**Enrollment Limit:** 10

**Enrollment Preferences:** Geosciences majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (WS)

**Writing Skills Notes:** This is a tutorial that involves students writing 4 original response papers and one substantial revision to their writing.

**Attributes:** GEOS Group B Electives - Sediments + Life

Fall 2022

TUT Section: T1 TBA Phoebe A. Cohen

### **GEOS 317 (S) Current topics in Planetary Geology (WS)**

**Cross-listings:** GEOS 317 ASTR 317

Primary Cross-listing

We will look in detail at geological processes on rocky and icy bodies of the Solar System. Each week will have a specific theme, and students will read a series of scientific articles on that topic. The readings will form the basis for writing and discussion. Areas to be investigated may include ice

ages on Mars, the origin of Earth's moon, tectonics on Venus, chaos terrain on Europa, geysers on Enceladus, cryovolcanism on Triton, methane lakes on Titan, the viability of mining in the Asteroid Belt, and the prospects for life on other worlds. This course is in the Solid Earth group for the Geosciences major.

**Class Format:** Students meet with the professor weekly, in pairs, with one student writing each week and the other critiquing; and both engaging in detailed discussion of the readings.

**Requirements/Evaluation:** Evaluation is based on written papers, critiques, and discussion.

**Prerequisites:** GEOS/ASTR 217 (Planets and Moons); OR any two courses at 200-level or higher in Geosciences and/or Astronomy; OR permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Geosciences and Astronomy majors and prospective majors

**Expected Class Size:** 6

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GEOS 317 (D3) ASTR 317 (D3)

**Writing Skills Notes:** This tutorial-style course focuses on writing, with 6 papers (5-7 pages) written bi-weekly throughout the semester, and partner critiques in alternate weeks.

**Attributes:** GEOS Group C Electives - Solid Earth

Not offered current academic year

### **GEOS 350 (S) Climate, Tectonics, and Erosion (WS)**

Traditionally tectonics investigated processes operating deep in the crust and mantle, whereas geomorphology focused on surficial processes that shape the landscape. This course explores the complex interactions between tectonic and surficial processes. It has long been recognized that crustal uplift during mountain building creates new landscapes, but we now suspect that variations in erosion rate can fundamentally influence the development of mountains. Climate plays a central role in this feedback loop; the rise of mountains can change climate, and such changes can alter regional erosion rates. This course will examine how geologists use characteristic markers to estimate the amount of surface uplift, methods for determining uplift rate, surface response to faulting and folding, measuring displacement of the crust with GPS and interferometry methods, how mountain building affects erosion and exhumation rates, the limits to relief in mountains, and the interaction between mountains and climate. This course is in the Solid Earth group for the Geosciences major.

**Class Format:** After an initial group meeting, students will meet in pairs for one hour each week with the instructor; each student will orally present a written paper every other week for criticism during the tutorial session

**Requirements/Evaluation:** five 4- to 5-page papers based on journal articles

**Prerequisites:** at least one of the following courses: GEOS 101, 102, 103, 202, 203, 215, 302, 303, 303 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Geosciences majors and students with a strong interest in Geosciences

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (WS)

**Writing Skills Notes:** Five 4- to 5-page papers distributed throughout the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes:** GEOS Group C Electives - Solid Earth

Not offered current academic year

### **GEOS 401 (F) Global Tectonics and the Rise of Mountains (WS)**

Fifty years after the sea-floor spreading hypothesis was first verified using magnetic anomalies, we have spectacular data sets from paleomagnetism, seismology, volcanism, the Global Positioning System, and digital elevation models that provide rich details into the kinematics and mechanisms of present and past plate motions. We will read journal articles to explore how plate tectonics can help explain the evolution of mountain belts with

special emphasis on the Appalachians.

**Class Format:** Remote, weekly one-hour meetings with tutorial partner and instructor

**Requirements/Evaluation:** five papers based on journal articles, and critiques of partner's papers

**Prerequisites:** GEOS 203, 302, or 303 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** senior Geosciences majors, then juniors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

**Distributions:** (D3) (WS)

**Writing Skills Notes:** Five 5-page papers throughout the semester based on journal articles. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes:** GEOS Group C Electives - Solid Earth

Not offered current academic year

### **GEOS 404 (F) Coastal Processes and Geomorphology (QFR)**

**Cross-listings:** MAST 404 ENVI 404 GEOS 404

#### **Primary Cross-listing**

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

**Class Format:** lecture two times a week with a lab one time per week

**Requirements/Evaluation:** lab reports, quizzes, and an independent research project

**Prerequisites:** Either GEOS 104 or GEOS 210; or permission of instructor. No prior knowledge is necessary, but this course does build on principles used to explore complex scientific challenges.

**Enrollment Limit:** 12

**Enrollment Preferences:** senior Geosciences majors, then juniors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major. This course counts toward the GEOS Group B Electives - Sediments + Life.

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MAST 404 (D3) ENVI 404 (D3) GEOS 404 (D3)

### **GEOS 410 (S) The Cryosphere**

**Cross-listings:** ENVI 410 GEOS 410

#### **Primary Cross-listing**

The Earth's climate system is often described in terms of its spheres, including the atmosphere, biosphere, lithosphere, oceans, and the cryosphere. The cryosphere is the naturally occurring ice on Earth in all its many forms: snow, glaciers, ice sheets, sea ice, frozen lakes and rivers, and permafrost (frozen soil). These parts of the climate system may seem remote, but have implications for climate and weather around the world. Melting glaciers and ice sheets have already contributed to sea level rise, and are projected to do so even more in the future. This course will explore the cryosphere, including snow, sea ice, permafrost, and glaciers through lectures, hands-on and data analysis labs, reading journal articles, and a final project. A spring break field trip to Alaska offers the opportunity to get boots-on-the-snow experience with glaciers, sea ice, and permafrost. As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major.

**Class Format:** Class periods and lab periods will be used interchangeably based on the weather. The spring break trip to Alaska is optional.

**Requirements/Evaluation:** Evaluation will be based on short papers, labs responses, and a research project

**Prerequisites:** GEOS 215 or GEOS 255 or GEOS 309 or MAST 311 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Senior GEOS majors, then other GEOS majors and senior ENVI majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

**Materials/Lab Fee:** Labs will be outside during the winter: students should be prepared to dress appropriately for the weather.

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**Attributes:** ENVI Natural World Electives GEOS Group A Electives - Climate + Oceans

**Not offered current academic year**

### **GEOS 414 (S) Reading Deep Time (QFR)**

Ancient sedimentary rocks and the fossils they contain are time machines - direct windows into the deep history of life on Earth and the environments that life inhabited. In this course you will learn to "read" these deep time records by collecting, interpreting, and analyzing paleontological, stratigraphic, and sedimentological data. The course will be organized around a week-long spring break trip to explore the rocks of the House Range of Utah. The Cambrian and Ordovician strata of the House Range offers an outstanding record of one of the most important periods in Earth history, tracking the rise of animal ecosystems and major increases in fossil diversity. The first 6 weeks of class will be spent learning the fundamentals of quantitative methods in paleontology and stratigraphy (often referred to as historical geology). Labs will focus on skill building including learning basic coding in R (*no experience needed or expected*), and learning how to interpret paleontological, sedimentological, and stratigraphic data. We will also read widely on the field locality and on the Cambrian and Ordovician Periods. During the field trip, we will explore the House Range. Students will learn skills including interpreting geological maps, measuring stratigraphic sections, finding and identifying fossils, and correlating rock units across basins. We will collect samples and data on the field trip and bring them back to Williams. The second 6 weeks of the course will be spent processing and analyzing the samples and data collected during the field trip, culminating in final projects to be done in small groups. Students will help determine what data we will collect in the field and what projects emerge. Examples might be interpreting carbon isotopic analyses to reconstruct ancient oceanographic conditions, biostratigraphic correlation using fossils to reconstruct basin dynamics, determining paleoenvironment based on analyses of

thin sections, or digging into trilobite fossil preservation and evolutionary trends. Students will draw on previous experiences and course content in the Geosciences and bring small group research projects to completion by the end of the semester, which will be presented in poster form. This course fulfills the Geosciences Group B Elective: Sediments and Life.

**Class Format:** weekly lectures, paper discussions, and hands-on labs. Required week-long spring break field course.

**Requirements/Evaluation:** Short papers and lab assignments, spring break field course participation (REQUIRED), and a final group project presented in poster form.

**Prerequisites:** GEOS majors who have taken at least one of the following courses: GEOS 212, GEOS 203, GEOS 201, GEOS 301, GEOS 302, GEOS 312T, or permission of instructor.

**Enrollment Limit:** 12

**Enrollment Preferences:** Senior, and then Junior, Geosciences majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This course will rely on the programming language R. Students will learn how to code in R, and will use R to analyze large data sets of geological data. The majority of labs, as well as the final project, will rely on R, statistical analyses, and wrangling data.

**Winter Study -----**

**GEOS 13 (W) Ecosystems Past and Present: Mexico's Gulf of California**

Wedge between mainland Mexico and the Baja California peninsula, the Gulf of California (also called the Sea of Cortez) is a marginal sea that extends from its opening with the Pacific Ocean for 1,100 km northwest to a blind-end at the Colorado River delta. Maximum water depth exceeds 2,500 m in tectonically active segments linked to spreading oceanic crust on the East Pacific Rise. Due to upwelling of nutrient-rich waters, the gulf is one of the most biologically fertile places on the planet. A dozen inter-related ecosystems are found in this special area, including rocky shores, coral reefs, coralline algae banks, clam flats, sandy beaches, coastal dunes, mangroves, closed microbial lagoons, estuaries with related deltas, open sea biome, hydrothermal springs, and at greatest depth mineral-laden black smokers. Each of these functional systems may be compared with direct counterparts preserved in the surrounding rock record dating back roughly 5 million years. The evolution of ecosystems within the Gulf of California up to the present day is outlined with an emphasis on ecosystem services that benefit human kind on multiple levels including geological heritage. During the final week of class, each student will make an oral presentation on a marine zone from another part of the world that entails a multiplicity of ecosystems similar to those in the Gulf of California. Potential topics may include tectonically active zones in the Caribbean, Mediterranean, and Red seas, as well as the Persian Gulf, Western Australia's Shark Bay, Indonesia's Malacca Strait, Japan's Inland Sea, and China's Yellow Sea.

**Requirements/Evaluation:** final project or presentation; class participation and delivery of an oral report (PowerPoint) on one of the suggested topics

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Priority to First-Year Students with a demonstrated interest in marine geology and biology.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Markes Johnson is Professor Emeritus in the Geosciences Department at Williams College and the author of several books on the geology and ecology of Mexico's Baja California.

## GERMAN (Div I)

**Chair: Professor Janneke van de Stadt**

Professors: G. Newman, Associate Professor, C. Koné, Visiting Assistant Professor, S. Fuchs; Teaching Associates: Hadia Nadjafi and Ana Andricic.

Professor Koné is on leave in the fall.

### STUDY OF GERMAN LANGUAGE AND GERMAN-LANGUAGE CULTURE

The department provides language instruction to enable the student to acquire all four linguistic skills: understanding, speaking, reading, and writing. German 101-W-102 stresses communicative competence and covers German grammar in full. German 103 combines a review of grammar with extensive practice in reading and conversation. German 104 aims to develop facility in speaking, writing, and reading. German 120 is an intensive communicative German course that strives to cover two semesters of the language in one. German 201 emphasizes accuracy and idiomatic expression in speaking and writing. German 202-209 combines advanced language study with the examination of topics in German-speaking cultures. The 202 and up course level may be taken twice with different content for major credit. Each year the department offers upper-level courses treating various topics from the German-language intellectual, cultural, and social world in which reading, discussion and writing are in German. Students who have studied German in secondary school should take the placement test given during First Days in September to determine which course to take.

### STUDY ABROAD

The department strongly encourages students who wish to attain fluency in German to spend a semester or year studying in Germany or Austria, either independently or in one of several approved foreign study programs. German 104 or the equivalent is the minimum requirement for junior-year abroad programs sponsored by American institutions. Students who wish to enroll directly in a German-speaking university should complete at least 201 or the equivalent. In any case, all students considering study-abroad should discuss their language preparation with a member of the department.

### FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

#### **Can your department or program typically pre-approve courses for major/concentration credit?**

The department can tentatively pre-approve courses for major or certificate credit, based on information from the study away program or the course catalog, if direct enrollment, but final credit is only granted after review of the courses and the grades once taken.

#### **What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description, plus conversations with the student if necessary.

#### **Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

Yes. The maximum number of credits is four.

#### **Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

Yes. Students may not count language courses in other languages (e.g., Italian) for major credit, nor natural science or math courses.

#### **Are there specific major requirements that cannot be fulfilled while on study away?**

No.

#### **Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

No.

#### **Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:**

One of our majors who is pre-med thought he could take Chemistry of Biology in Germany and have it count toward the German major, but that is not the case. It is not sufficient for the language of instruction in a given course to be German; the content must also have to do with the culture, history, politics, economics, etc. of Germany, Austria, or Switzerland.

### THE CERTIFICATE IN GERMAN

To enhance a student's educational and professional profiles, the department offers the Certificate in German. It requires seven courses—three fewer than the major—and is especially appropriate for students who begin study of the language at Williams.

Students who enter Williams with previous training in German may substitute more advanced courses for the 100-level courses; they can also be exempted from up to two of the required courses.

The student must achieve proficiency at the level of a B in German 104 or the equivalent.

Appropriate elective courses can usually be found among the offerings of German, Art History, History, Music, Philosophy, Political Science, and Theatre.

### **Required Courses**

German 101

German 102

German 103

German 104

German 201

### **Elective Courses**

at least one course (in German or English) on German cultural history (literature, art, drama, music)

at least one course (in German or English) on German intellectual, political, or social history

### **THE MAJOR**

The German major offers students an interdisciplinary approach to German intellectual and cultural history by combining courses in German language and literature with courses in History, Philosophy, Music, and other appropriate fields.

For students who start German at Williams, the major requires a minimum of ten courses: German 101-102, 103, 104, 201 and 202; two 300-level German courses; and two electives from either German courses numbered above 202 or appropriate offerings in other departments.

For students who have acquired intermediate or greater proficiency in the language before coming to Williams, the minimum requirement is nine courses: German 202; two 300-level German courses; and six other courses selected from German courses numbered above 102 and appropriate offerings in other departments.

### **Examples of appropriate courses in other departments are:**

Art History 267 Art in Germany: 1960 to the Present

History 239 Modern German History

History 338 The History of the Holocaust

Music 108 The Symphony

Music 117 Mozart

Music 118 Bach

Music 120 Beethoven

Philosophy 309 Kant

Students may receive major credit for as many as four courses taken during study abroad in Germany or Austria in the junior year.

### **THE DEGREE WITH HONORS IN GERMAN**

Students earn honors by completing a senior thesis (German 493-W31-494) of honors quality.

Students interested in honors should consult with the department chair no later than April 15 of their junior year. The usual qualifications for pursuing honors are: (1) an overall GPA of 3.33 or better, (2) a departmental GPA of 3.67 or better, (3) a strong interest in a specific topic for which an appropriate faculty advisor will be available in the senior year.

### **GERM 101 (F) Elementary German**

German 101-102 is for students with no previous study of German. The course employs a communicative approach involving all five language skills: listening comprehension, speaking, reading, writing, and culture. We focus initially on practice in understanding the spoken language and then move rapidly to basic forms of dialogue and self-expression. In the second semester, reading and especially writing come increasingly into play.

**Class Format:** Various types of instruction and learning; meets five days a week

**Requirements/Evaluation:** Active class participation, written homework, written and oral assessments

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** First- and second-year students

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** Credit granted only if both semesters (GERM 101 and 102) are taken.

**Distributions:** (D1)

Fall 2022

LEC Section: 01 M-F 10:00 am - 10:50 am Gail M. Newman

### **GERM 102 (S) Elementary German II**

German 102 is the continuation of German 101, and will provide you with a further introduction to the language and cultures of German-speaking countries. You will have the opportunity to practice listening, reading, writing, and speaking in German both through in-class activities and homework assignments. During the semester, you will learn about various cultural perspectives, products, and practices of German-speaking countries. Some of the topics that will be addressed this semester include the following: housing; housework; geography and landscape; transportation; travel plans and experiences; food and drink; cooking and ordering food at restaurants; childhood and youth; fairy tales; health and personal hygiene; family, marriage, and partnership; community issues in a multicultural society; literature, music, and film. *This language course is conducted in German.*

**Requirements/Evaluation:** active class participation, midterm & final exams, essays, quizzes, homework

**Prerequisites:** GERM 101 or equivalent

**Enrollment Limit:** 15

**Enrollment Preferences:** If course over-enrolls (beyond cap), preference will be given to students in GERM

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** students registered for GERM 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (GERM 101 and 102) are taken

**Distributions:** (D1)

### **GERM 103 (F) Intermediate German I**

In this course students will further develop their German language skills, by discussing a variety of cultural topics and themes in the German-speaking world. Through extensive work on expanding vocabulary, reviewing major grammar topics, conversation and composition exercises, students will strengthen their language skills and develop cultural competency. The course focuses on real communication in meaningful contexts and aims to develop and consolidate students' speaking, listening, reading and writing abilities at the intermediate level. Using a variety of media, such as texts, video and audio, students will explore various themes and cultural topics in the German-speaking world. Students will have the opportunity to practice and improve their spoken and written German skills through in-class activities and homework assignments. The use of easy readers in the target language will also help to enhance reading comprehension. *The course is taught in German. Active and dedicated participation including homework is expected.*

**Requirements/Evaluation:** active class participation, midterm and final exams, quizzes, essays, homework

**Prerequisites:** GERM 102 or equivalent

**Enrollment Limit:** 15

**Enrollment Preferences:** If course over-enrolls (beyond cap), preference will be given to students in GERM

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

SEM Section: 01 MWF 10:00 am - 10:50 am Susanne Fuchs

### **GERM 104 (S) Intermediate German II**

German 104 is the continuation of German 103 and a prerequisite to all advanced courses in German. You will practice your speaking and writing skills, watch film clips and other media (such as music videos, interviews, news reports), and read a variety of contemporary texts ranging from magazine articles to short stories. The assigned materials are centered around one culturally relevant theme (in spring 2023: "resistance"), which enables you to continuously add to your knowledge and combine and compare contents throughout the term. This course includes reviews of advanced grammar topics. *Conducted in German.*

**Requirements/Evaluation:** active class participation, quizzes, essays, homework

**Prerequisites:** GERM 103 or equivalent

**Enrollment Limit:** 15

**Enrollment Preferences:** If course over-enrolls (beyond cap), preference will be given to students in GERM

**Expected Class Size:** 8

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

### **GERM 110 (F) Spies Like Us: Espionage, Surveillance, and Protest in German Cinema and Literature (WS)**

**Cross-listings:** GERM 110 COMP 109

#### **Primary Cross-listing**

This First Year tutorial, available in English, investigates the mutual mistrust between the two Germanies in the Cold War period up until the peaceful popular protests that brought down the Berlin Wall. The political tensions between communist East Germany, the German Democratic Republic (GDR) and its capitalist Western counterpart, the Federal Republic (FRG), created a fascinating culture of governmental spying, but also led to aggravated periods of state surveillance of its own citizens. How were families affected across generations by these divisive politics, including the two states' differing treatment of the Nazi legacy? What was the involvement of the KGB and the CIA? How did East German intelligence try to destabilize the West from inside? Which locations in Berlin served as centers for spying, given that the city's terrain is quite flat and exposed? High-profile cases of conflicting loyalties include the Guillaume spy affair that brought down Willy Brandt as Chancellor of the FRG in 1974, and the Brasch family in the GDR, where the father, a communist true believer, turned his three sons over to the Stasi for their dissident activism and engaged art. We will debate filmic treatments of the recruitment of spies as double agents (*Coded Message for the Boss*, 1979), the chilling effects of police surveillance during the Baader-Meinhof radical left terrorist attacks (*The Lost Honor of Katharina Blum*, 1975; *Knife in the Head*, 1978) the afterlives of former terrorists who were offered new identities as 'ordinary' East Germans (*The Legend of Rita*, 2000), to the effects of the Stasi files becoming accessible to their victims after the fall of the wall (*Es ist nicht vorbei*, Anderson). We will also discuss popular film representations of spying in *Lives of Others* (2007) and *Bridge of Spies* (2015), and selected episodes from the popular TV-series *Germany 83 and 86* (2018). Literature will likely include: Thomas Brasch, *The Sons Die Before the Fathers* (1977), Christa Wolf, *What Remains* (1993), Monika Maron, *Flight of Ashes* (1981), Heinrich Böll, *The Lost Honour of Katharina Blum* (1974). All texts in English, films have English subtitles.

**Class Format:** Students in this course will be separated into small tutorial groups of 3 students, in order to promote intensive exchange of ideas. In a typical week, the students in each group will: (1) study a substantial "text" or film; (2) watch mini-lectures or power points by the instructor to

supplement the assigned primary texts.

**Requirements/Evaluation:** 5 5-page tutorial papers and 2-page responses (in English)

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** First Years, in groups of 3 students.

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GERM 110 (D1) COMP 109 (D1)

**Writing Skills Notes:** This tutorial will teach students to analyze visual media and fiction in German Studies in combination with secondary sources from a variety of related disciplines (History, Political Science, journalism). The toggling between these different types of sources promotes critical thinking skills.

Not offered current academic year

### **GERM 120 (S) Turbodeutsch: Intensive Elementary German**

An accelerated version of Elementary German, covering nearly all the material of GERM 101-102 in one semester. The course employs a communicative approach involving all four language skills: listening comprehension, speaking, reading, and writing. Best suited to very committed students who have had no previous German, or to students who have had some previous German but who did not place into GERM 103. The course will meet every day, including three 50-minute periods on MWF and 2 75-minute periods on TR, plus a required TA session at a time to be arranged.

**Requirements/Evaluation:** active participation, tests, quizzes, final exam

**Prerequisites:** students with demonstrated need to take the language in only one semester; students also need to show a great deal of commitment to learning German

**Enrollment Limit:** 12

**Enrollment Preferences:** students who need German for their academic goals

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

Spring 2023

### **GERM 201 (F) "Oida!" Living Language in Vienna**

Language is a living being, varied, like identity itself, across cultures and across time. This course has as its thematic focus *Wienerisch*, the very special variety of German that has developed in the multi-linguistic metropolis of Vienna; listening and reading work will center on Viennese German. But the thrust of the course is honing the students' own German. It will provide extensive study of German grammar and style, and intensive practice in speaking and writing idiomatically. *Readings and discussion in German.*

**Requirements/Evaluation:** Intensive class participation, regular written and oral exercises, midterm and final projects

**Prerequisites:** GERM 104 or contact instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Prospective German majors and German certificate students

**Expected Class Size:** 8

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

**Attributes:** GBST Borders, Exiles + Diaspora Studies Electives

Fall 2022

SEM Section: 01 MWF 11:00 am - 11:50 am Gail M. Newman

### **GERM 202 (S) German Comics**

The goal of this advanced course is to study language and culture through the exploration of German-language comics. Despite the boom in the production of comics since the reunification and the appearance of numerous talented artists in the German speaking world, German comics remain largely unknown and unrecognized abroad. This course seeks to introduce students to this rich, active genre and to deepen their understanding of it by allowing them to engage with its broad spectrum of subjects and styles. The course will address a variety of recent comics ranging from graphic novels by Nora Krug, Olivia Vieweg to literary comics by Flix, Isabel Kreitz, as well as historical comics by Simon Schwartz and Reinhardt Kleist. What are the recurrent themes in German comics? What kind of current political issues do these comics raise and what type of contemporary anxieties do they express? These are some of the questions the course seeks to answer. *This course is conducted entirely in German.*

**Requirements/Evaluation:** short oral presentations, three 1-2-page papers, two 3- to 5-page papers, and one final project

**Prerequisites:** GERM 104 and GERM 201

**Enrollment Limit:** 19

**Enrollment Preferences:** German Majors and German Certificate

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

Spring 2023

SEM Section: 01 MW 11:00 am - 12:15 pm Christophe A. Koné

### **GERM 205 (S) Berlin--Multicultural Metropolis Between East and West**

We will examine texts and films about Berlin as a center of cultural and social transformations in the late nineteenth and twentieth centuries, with special emphasis on the post-wall period. We will move from the turn of the century (when the city's population had recently tripled in size) to the establishing of Berlin as a world capital in the 1920s, then through Nazi-era transformations, wartime destruction and the cold war division of the city. We will conclude with the reshaping of the city after the fall of the Berlin wall. Texts and films may include: Walter Benjamin, *Berliner Kindheit um 1900*, excerpts from Ulrich van der Heyden und Joachim Zeller's *Kolonialmetropole Berlin*, Walter Ruttmann, *Sinfonie einer Großstadt*, Irmgard Keun's *Das kunstseidene Mädchen*, Nazi architect Albert Speer's plans for Berlin as the fascist capital "Germania," the 1956 East German youth protest film *Ecke Schönhauser*, short fiction by Reiner Kunze, Aras Ören, Peter Schneider, Bodo Morshäuser, Irina Liebmann. Recent films to be included are: *Sonnenallee*, *Goodbye, Lenin!*, *Berlin is in Germany*, *Berlin Calling*.

**Class Format:** seminar/discussion

**Requirements/Evaluation:** frequent short writing assignments; oral presentations with partner, one 5-6pp. essay

**Prerequisites:** GERM 201 or equivalent

**Enrollment Limit:** 15

**Enrollment Preferences:** Sophomores and Juniors

**Expected Class Size:** 6

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**Attributes:** GBST Urbanizing World Electives

### **GERM 209 (S) Green Germany: Literature, Film, and the Environment**

Today, Germany is known as a world-wide leader in environmental policies, sustainable energy, and conservation efforts. This "green" culture, however, is not a new phenomenon, but has long constituted an essential part of German identity. In this course, we will trace Germany's relationship with the environment over the course of 200 years of cultural production. Among other things, we will consider the Romantic fascination with the sublime powers of an uncontrollable wild nature, discuss the ecological underpinnings of Nazi ideology, analyze the effects of the nuclear disaster in

Chernobyl on German society, and read about the role recycling currently plays as a practice of integration for refugees. Including texts and films by Alina Bronsky, Ilija Trojanow, Ludwig Tieck, Christa Wolf, Rainer Maria Rilke, Baran bo Odar and Jantje Friese, and Doris Dörrie. *Taught in German.*

**Requirements/Evaluation:** oral presentation, bi-weekly 1-page response papers, final project

**Prerequisites:** GERM 201 or equivalent

**Enrollment Limit:** none

**Enrollment Preferences:** German majors

**Expected Class Size:** 6

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

Not offered current academic year

### **GERM 251 (F) Dolls, Puppets and Automats (WS)**

**Cross-listings:** GERM 251 COMP 251

Secondary Cross-listing

Since their origin, humans have always made anthropomorphic representations, first in the form of idols, fetishes, or statues for religious worship, later in the shape of puppets, dolls, or automats for their entertainment qualities. And yet, these objects have always played multiple roles in human society; modernity in particular shows a great interest paired with great ambivalence towards dolls, puppets, and automats, regarded both as uncanny Doppelgänger or threatening machines. In order to comprehend the scope of our modern fascination with these figures, we will explore their haunting presence in literary texts by ETA Hoffmann, Achim von Arnim, Theodor Storm, Felisberto Hernandez, discuss theoretical texts by Sigmund Freud and Heinrich von Kleist, look at paintings by Oskar Kokoschka and at photographs by Hans Bellmer & Cindy Sherman, watch a ballet by Andreas Heise and films by Fritz Lang and Alex Garland, and watch fashion shows by Alexander McQueen and Jean-Paul Gaultier. *Conducted in English.*

**Class Format:** This seminar will be taught online.

**Requirements/Evaluation:** active class participation, oral presentations on the reading materials, three 5- to 8-page papers

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Comparative Literature majors, or those considering a major in Comparative Literature

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GERM 251 (D1) COMP 251 (D1)

**Writing Skills Notes:** Each student will write three 5- to 8-page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write two 3-4 page papers on which I will provide written feedback regarding grammar, style, and textual analysis.

**Attributes:** FMST Related Courses

Not offered current academic year

### **GERM 276 (S) Black Europeans**

**Cross-listings:** COMP 276 AFR 276 GERM 276

Secondary Cross-listing

This course explores the in/visibility of Black Europeans from the Enlightenment to the present with a particular focus on French, German, Austrian, Dutch, British, and Russian history. With the European Enlightenment as point of departure, the tutorial investigates the large presence of Blacks as objectified subjects in paintings and decorative artifacts of the 18th and 19th centuries while interrogating their century-long absence from European historiography until fairly recently. In this tutorial, we will start discussing the significance of the Code Noir (1685) as well as the major economic impact of the Atlantic Slave Trade on European countries such as Great Britain, France, and the Netherlands. We will read historical biographies about a handful of outstanding Black Europeans in France (composer Monsieur de Saint George), Germany (Prussian officer Gustav Sabac el Cher, philosopher Wilhelm Anton Amo), Austria (royal tutor Angelo Soliman), Holland (Prince Kwasi Boachi), and Russia (military leader Abram Petrovitch

Gannibal) during the 18th and 19th centuries, study paintings and decorative artifacts of the 18th and 19th centuries depicting black servants--such as Hyacinthe Rigaud's Portrait of Marquise de Louville (1708), Nicolas Lancret's The Escaped Bird (1730), and Manet's Olympia (1863) to name a few--and watch the biopic Belle by Amma Asante (2013), narrating the life of black heiress Dido Elizabeth Belle in 18th-century England. We will also do a quick survey of 20th-century European cinema, that has until now cast very few black actors in supporting and leading roles, and we will ponder the representation of black people in recent films that were commercially successful at the box office (such as Les Intouchables by Nakache/Toledano, France 2011). Finally, we will reflect on the deep roots of European colonialism that takes the form of national debates surrounding the naming of chocolate-coated treats and licorice sweets (Têtes de nègre, Mohrenkopf, and Negerkuss) or of a controversy around cultural identity resulting from the grotesque depiction of black men in folkloric tradition (like Zwarte Piet in the Netherlands).

**Requirements/Evaluation:** six 5- to 7-page argumentative papers; six 2- to 3-page response papers; final paper optional

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** first-years, sophomores, and juniors

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COMP 276 (D1) AFR 276 (D1) GERM 276 (D1)

**Attributes:** GBST Borders, Exiles + Diaspora Studies Electives

Not offered current academic year

**GERM 280 (F) Art at its Limits: Representing the Holocaust** (DPE) (WS)

**Cross-listings:** COMP 280 JWST 280 GERM 280

Primary Cross-listing

The Holocaust poses unique challenges to art: it is an event that unsettles the very notion of representation while, at the same time, also demanding it. Art, after all, is a mode of witnessing as well as a form of commemoration; it allows survivors to record their testimony and later generations to remember. Yet the representation of suffering can all too easily become exploitative or aestheticizing, it can turn pain into entertainment and history into fiction. How, then, do writers, artists, and filmmakers navigate the representation of the Shoah if it resists comprehension and undermines traditional forms of narrative? In this course, we will ask if and how art can do justice to a catastrophe of such magnitude as the Holocaust by analyzing different forms of media from a variety of cultural backgrounds. What can poetry offer that remains foreclosed to prose? Was Art Spiegelman's graphic novel *Maus* really in bad taste? How should documentaries approach the Shoah, and is there a place for Hollywood films in the archives of commemoration? Texts among others by Tadeusz Borowski, Tadeusz Ró'ewicz, Art Spiegelman, Paul Celan, Primo Levi, Sylvia Plath, Hannah Arendt, Theodor W. Adorno, Jacques Derrida, and Maurice Blanchot; films by Quentin Tarantino, Claude Lanzmann, Pawe' Pawlikowski, and Steven Spielberg.

**Requirements/Evaluation:** three 2-page critical responses, oral presentation, final project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** German and Comparative Literature majors

**Expected Class Size:** 14

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COMP 280 (D1) JWST 280 (D2) GERM 280 (D1)

**Writing Skills Notes:** Three 2-page papers spaced over the course of the semester on which students will receive detailed feedback and which they will be able to revise; the final project will either be a 10-page paper or a creative project accompanied by a 4-page reflection that will consider the creative component in relation to the themes of the course. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course will examine how art can help us think about the catastrophic abuses of power in the Third Reich.

While many of the texts we will examine focus on the stories of Jewish people, the class will also consider how the narratives of other persecuted groups, including the Sinti and Roma, people with disabilities, and LGBTQ victims and survivors, relate to and differ from these experiences.

Not offered current academic year

### **GERM 301 (F) From Red Riding Hood to Autobahn: German Forests in Literature, Culture, and Economy**

Over the centuries, German and other Western literary traditions projected widely diverse notions onto the forest. It served as a placeholder for romantic concepts of origination as well as threatening notions of wilderness. It is "the shadow of civilization" (R.P. Harrison), a liminal space, an imagined refuge for the marginalized -- and home to countless fairy-tale characters. Consistently, both positive and negative idealizations stand in stark contrast to the woods' predominantly economic and embattled role in German society: Wood fueled the early industrial revolution and today environmentalists occupy trees to protect them from lignite mining and highway construction. In this course, we will trace these histories and notions as well as their tensions and contradictions in German literary texts from the 19th to the 21st century. We will pay special attention to the central symbolic role the forest has played in German culture and nation-building, and reflect on its multiple poetic, political, and economic functions. The earliest texts we will read include Grimms' fairy tales and Droste-Hülshoff's *Judenbuche*. We will read well-known authors of the 20th century, such as Brecht and Grass, and discuss more recent poetry and novels, such as excerpts from Strubel's *In den Wäldern des menschlichen Herzens*. The literary texts will be complemented by a limited number of key essays in Ecocriticism and the Environmental Humanities. We will also take advantage of our location in the Berkshires to explore de- and reforestation in the region during a field trip. *Discussion and primary readings in German.*

**Class Format:** One field trip planned to learn about the history of de- and reforestation in the region from an ecologist based in the area

**Requirements/Evaluation:** Careful reading and preparation of texts, written assignments, short oral presentations

**Prerequisites:** GERM 202 or equivalent

**Enrollment Limit:** 15

**Enrollment Preferences:** If course over-enrolls (beyond the cap), preference will be given to students in GERM

**Expected Class Size:** 10 - 12

**Grading:** yes pass/fail option, yes fifth course option

Fall 2022

SEM Section: 01 MWF 8:30 am - 9:45 am Susanne Fuchs

### **GERM 304 (S) Rebels and Conformists: Postwar Germany from The 'Economic Miracle' to the Fall of the Wall**

**Cross-listings:** WGSS 304 GERM 304

**Primary Cross-listing**

In postwar West Germany, a thorough examination of the Nazi past took a backseat to economic recovery and repairing the country's international standing, whereas to some extent the reverse was true for the East. An authoritarian democracy, an emphasis on consumerism and the qualitatively different experiences of younger generations led them to question whether the Federal Republic was a restoration or a new beginning? In the East, the cold war led to an increasingly Stalinist interpretation of communist principles, while communist ideals were upheld as an antidote to Nazism and the new materialism. This tutorial will cover a wide range of social protest as reflected in literature and film of the two Germanies: critical responses to the Holocaust in the two countries, the 1968 student revolution, anti-capitalist terrorism by the Baader-Meinhof gang, the feminist and gay rights movements, reformers and repression under Ulbricht and Honecker in the GDR, minority rights and environmental activists. Authors will include: Peter Weiss, *Die Ermittlung*, Heinrich Böll, *Und sagte kein einziges Wort*, Gisela Elsner, *Riesenzwerge*, Emine Sevgi Özdamar, *Das Leben ist eine Karawanserei*, Volker Braun, *Unvollendete Geschichte*, Alice Schwarzer, *Der kleine Unterschied und seine großen Folgen*, Christian Kracht, *Faserland*, Thomas Brussig, *Wasserfarben*. Films may include: Gerhard Klein, "Berlin-Ecke Schönhauser," Ulrich Plenzdorf, "Die Legende von Paul und Paula," Rainer Werner Fassbinder, "Angst essen Seele auf," Reinhard Hauff, "Messer im Kopf," Uli Edel, "Der Baader-Meinhof Komplex," Margarethe v. Trotta, "Das zweite Erwachen der Christa Klages," Heiner Carow, "Coming Out," Hans Weingartner, "Die fetten Jahre sind vorbei."

**Requirements/Evaluation:** alternating 4-page tutorial papers in German, and 2-page critiques

**Prerequisites:** GERM 202 or permission of the instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** German majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**GERM 314 (S) Underground Berlin: Art, Performance, and Film, 1980s to Present (DPE)**

**Cross-listings:** GERM 314 WGSS 344 ARTH 315

**Secondary Cross-listing**

Subsequent to the National Socialist suppression of sexual expression, the intersections of politics and art in the post-World War II era reflected an organic embeddedness within the context of the city of Berlin. This course reflects upon this history to understand Berlin's present, its contradictory mix of new and old, "deep history" and nostalgia. Often described as an island moored within the communist territory of East Germany during the years of the Berlin Wall, West-Berlin became the city towards which many queer artists, musicians, and activists gravitated in order to avoid the involuntary conscription in the Bundeswehr, as an unexpected outcome of the government's plan to boost population in the former capital. We will focus on the excavation and recognition of inter/cultural positions that challenge German nationalism, at the same time that the country reestablished itself as a world power. Over the semester, we will rethink Berlin with respect to the once nascent geopolitics of the European Union, and the city's social fluctuations and periods of migration as registered through audiovisual and performative forms in advance of and in the decades following the fall of the wall in 1989. Focusing on art, performance, and film, we will examine the architectural, discursive, and cultural spaces in which these forms of creative and political expression take shape--from art museums and theater houses to occupied buildings, from independent publishing imprints and collaborative nonprofit organizations to night clubs. This course will examine the changing city with respect to activism, collectivity, alienation, solidarity, and belonging.

**Requirements/Evaluation:** Weekly response papers (1-2 pages); participation in class; one research paper (12-15 pages)

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Art History majors, German majors, then any interested student

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GERM 314 (D1) WGSS 344 (D2) ARTH 315 (D1)

**Difference, Power, and Equity Notes:** Artistic works and subcultural formations addressed in this class reflect the intersection of difference, power, and equity in contemporary culture and society. Situating the work of artists and activists within a specific and evolving social and geopolitical context, it promotes greater understanding and skills for engaging in cultural debates on racism, homophobia, and sexism.

Not offered current academic year

**GERM 315 (F) Kafka and His/Our World (WS)**

**Cross-listings:** COMP 316 GERM 315

**Primary Cross-listing**

"It's so Kafkaesque!" We love to use the most famous Austro-Hungarian-Czech-Jewish writer of all time to characterize puzzling and dispiriting situations. But close examination of Franz Kafka's work and life reveals a multi-dimensional world that goes far beyond the cliché. Jewish in an increasingly anti-Semitic environment, German-speaking surrounded by Czech-speakers, deeply alone in a family that didn't understand him, Kafka produced texts that simultaneously demand and refuse to be interpreted. In this tutorial we will begin with intensive readings of selected short stories and parables, then move on to an exploration of the Kafka's own words from diaries and letters, as well as secondary sources. The course will conclude with discussions of how Kafka's texts and their contexts might relate to contemporary conditions and/or to students' own lives and thoughts. This will be a modified tutorial, with five groups of three students apiece. Students may take the tutorial in either German or English; groups will be formed accordingly.

**Class Format:** The class will be divided into groups of 3. At each weekly meeting, one of the 3 will present a 5-page paper, another will present a formal response, and the third will participate actively in discussion. Students will incorporate at least one of their papers into a final project that links their discussions of Kafka to their own interests and/or to contemporary issues. Students can take the course in German or English (or a combination of the two), and groups will be formed accordingly

**Requirements/Evaluation:** Three 5-page papers, three 1-2 page responses, one final project, discussion leading. Evaluation: Tutorial papers will receive extensive comments, but no grade; the instructor will meet with individual students at least twice during the semester to discuss how things are going for them. Responses will not be evaluated by the instructor, but instead will function well or less well in the context of the discussion. The final project will receive a grade, and the final grade will be determined by the overall trajectory of the student's learning.

**Prerequisites:** For German speakers: GERM 202 or the equivalent preferred, though students with less experience should contact the instructor. For students taking the course in English: one college literature course.

**Enrollment Limit:** 15

**Enrollment Preferences:** German students, majors or potential majors in Comp Lit or German

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COMP 316 (D1) GERM 315 (D1)

**Writing Skills Notes:** The course has a modified tutorial format, with groups of three meeting weekly instead of pairs. Each student will write three 5-page papers plus three 1-2-page responses during the semester, and will prepare a final project. Each paper will receive extensive feedback from the instructor.

Not offered current academic year

**GERM 317 (F) The New Woman in Weimar Culture (WS)**

**Cross-listings:** GERM 317 WGSS 317

Primary Cross-listing

This course explores the figure of the New Woman, a professional, political, independent, and modern woman, that rises in Germany right at the end of World War I and thrives during the Weimar Republic. Acclaimed as the epitome of Weimar Modernity, the New Woman is nevertheless greeted with great ambivalence: whether a liberated and emancipated woman for some, or a dangerous and promiscuous woman loathed by others, she is perceived as threatening to the patriarchal order. A closer look at artworks by Otto Dix, Christian Schad, and Hannah Höch, films by Fritz Lang and Georg Wilhelm Pabst, poems by Gottfried Benn, Else Lasker-Schüler, and Kurt Tucholsky, novels by Erich Kästner, Vicky Baum, and Irmgard Keun, as well as plays by Frank Wedekind and Bertolt Brecht, will provide a more precise picture of the New Woman's various incarnations, ranging from actresses (Marlene Dietrich), singers (Margo Lion and Claire Waldorf), and dancers (Anita Berber) to prostitutes, and suggest that the New Woman serves as the vessel of male anxieties and represents the contradictions of modernity. *Taught in German.*

**Class Format:** taught seminar style in German for the German students and as a tutorial in English for non German speaking students

**Requirements/Evaluation:** papers and oral presentations

**Prerequisites:** for students taking the course in German: GERM 202 or the equivalent; for students taking the course in English: one college-level literature course

**Enrollment Limit:** 19

**Enrollment Preferences:** juniors and seniors, students with strong analytical skills and a vivid interest in literature, art, music, and films

**Expected Class Size:** 8

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GERM 317 (D1) WGSS 317 (D2)

**Writing Skills Notes:** Students will submit multiple drafts of their papers. Focus is on argument and thesis statement, introduction and conclusion as well as literary analysis and interpretation of primary and secondary literature. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Not offered current academic year

### **GERM 320 (S) German Romanticism (WS)**

German Romanticism is a multifaceted, even contradictory phenomenon. Its earliest practitioners Novalis (Friedrich von Hardenberg) and Friedrich Schlegel could be seen as enacting a culmination of Enlightenment optimism about the emancipatory potential of the human mind, with their advocacy of an "aesthetic revolution," equality for women and Jews, and a holistic relationship to nature. Later, some of the first feminists (Caroline Schlegel-Schelling, Bettina Brentano von Arnim) worked side-by-side with authors who essentialized women into primal lures and primal threats (Ludwig Tieck, Joseph von Eichendorff). One of the most famous Romantics of all, E. T. A. Hoffmann, combined high irony and a penchant for the irrational in his fascinating works. This course will explore the paradoxes of German Romanticism through close readings of aphorisms, stories, fairy tales, poetry, essays, and music.

**Requirements/Evaluation:** intensive participation, frequent written responses, two shorter papers to be written in stages, and a longer final project

**Prerequisites:** GERM 202 or the equivalent

**Enrollment Limit:** none

**Enrollment Preferences:** German students

**Expected Class Size:** 8

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** The course will involve intensive work with writing analytical papers, including short responses to most texts, two papers that will be written in stages, and a longer final project that will include work shopping drafts in tutorial format

Not offered current academic year

### **GERM 321 (S) Lust, Liebe und Gewalt (WS)**

In this course, we will reflect on the intimate relationship between love, lust, and violence, examining how love and lust do not exclude violence, but rather include---if not provoke---it. In order to gain a better understanding of the dynamics formed by this fascinating triangle, we will read novels by Goethe and Schnitzler, short stories by Kleist, Hoffmann, Mann, plays by Büchner, Hauptmann and Wedekind, and watch films by Faßbinder, Haneke and Muskala. *Conducted in German.*

**Requirements/Evaluation:** papers and oral presentations

**Prerequisites:** GERM 202 or the equivalent

**Enrollment Limit:** 10

**Enrollment Preferences:** German majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Students will submit multiple drafts of their papers. Focus is on argument and thesis statement, introduction and conclusion as well as literary analysis and interpretation of primary and secondary literature. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Not offered current academic year

### **GERM 335 (S) Afro-Germans: History, Culture, and Literature**

Even though Afro-Germans have been a part of Germany for centuries and have undergone efforts at establishing themselves as an organized cultural group, their culture and literature have been often dismissed, relegated at the margins of dominant white German culture. In the aftermath of the Black Lives Matter movement in Germany, the country's belated debate about German colonialism, and its recent reckoning with race and racism, Afro-Germans have lately gained an unprecedented visibility in the German public sphere. Through their work, Afro-German journalists, writers, activists, and artists are all contributing to questioning and redefining German identity, culture, and history. Focusing primarily on Afro-German history, culture, and literature of the twentieth and twenty-first centuries, this upper-level seminar starts by examining acts of racist violence in German history (the Herero and Namaqua genocide in Namibia in 1904, the "schwarze Schmach" campaign in 1920's, the killing of Black French soldiers by the Wehrmacht in 1940). We will address issues of race, bi-racialism, and racism in a post-war context in West as well as East Germany through the

poems by May Ayim, the essays by Aibre Lorde and Alice Hasters, the memoirs by Hans-Jürgen Massaquoi, Theodor Michael, Lucia Engombe, Stefanie Lahya-Aukongo, and Ika-Hügel Marshall, the novels by Harald Gerunde, Noah Sow, Sharon Dodua, Olivia Wenzel, Ijoma Mangold, the documentary films by Nadja Ofuatey-Alazard, and the artworks by Marc Brandenburg.

**Requirements/Evaluation:** Short oral presentations, active participation in the discussion, two 2-3-page papers and three 3-5-page papers

**Prerequisites:** GERM 202 and GERM 300

**Enrollment Limit:** 12

**Enrollment Preferences:** German Majors and German Certificate

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

**GERM 401 (F) Senior Seminar: Rethinking the Public: the Arts Take on Neoliberalism (DPE)**

**Cross-listings:** WGSS 401 COMP 401 GERM 401

**Secondary Cross-listing**

Western neoliberalism is a predatory excrescence of late capitalism that overvalues competition, transferring the laws of the market to human relationships. It deliberately creates instability not only in the economic sphere but, more generally, in the social collective by encouraging dangerous risk-taking, fomenting crises and cementing systemic inequity, while suggesting to those under its sway that they are corporate 'entrepreneurs of self.' This model of self-management also extends into the sphere of intimate relationships. Of course, because predatory neoliberalism heavily favors a white investor model and is premised on white norms, the racialized body is considered a priori subaltern and subservient. Humanistic and artistic approaches (while not per se immune or outside of neoliberal constraints) effectively polemicize against neoliberalism, and suggest practices that resist its technocratic mindset. Looking at literature, cinema, and critical theory from a range of regions and disciplines, we will focus on Europe and the United States. Moreover, we will ask how forms of neoliberalism affect different regions of the world: Southeast Asia, Russia? Where and how can solidarity be reimagined beyond identity politics? Where is the boundary between animal and human in the neoliberal collective?

**Class Format:** three hours per week

**Requirements/Evaluation:** three 3-page papers, a short oral presentation, a 15-page final paper

**Prerequisites:** 300-level course

**Enrollment Limit:** 25

**Enrollment Preferences:** Comparative Literature majors and advanced students in other fields with permission of instructor

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Materials/Lab Fee:** course books and reader packet

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 401 (D2) COMP 401 (D1) GERM 401 (D1)

**Difference, Power, and Equity Notes:** This course addresses the costs to exploited groups within the neoliberal marketplace. We will discuss theoretical sources from a variety of fields (sociology, economics, philosophy, gender studies) every week that render these forms of expulsion or dispossession explicit. Far from benefiting all, the privileging of self-interest and market relations leads to increased inequality and in turn provokes violent reactions: the birth of new forms of fascism, racism and religious fundamentalism.

**GERM 515 (F) Reading German for Beginners**

German 515 is a beginning course for students whose principal reason for acquiring German is to work with written materials. It is particularly appropriate for students for whom the ability to read primary and secondary texts in German can be crucial. The focus of the course is on German for art history and criticism. Students will learn the key elements of grammar and acquire a core vocabulary. They will also practice reading and translating a variety of short texts.

**Requirements/Evaluation:** regular participation, homework

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** although this course is designed to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll with permission of the instructor

**Expected Class Size:** 12

**Grading:** pass/fail option only

**Distributions:** (D1)

Not offered current academic year

**GERM 516 (S) Readings in German Art History and Criticism**

In this continuation of German 515 students develop the skills and vocabulary necessary for reading German accurately. The course introduces advanced grammatical topics and students practice reading in a variety of textual genres. Texts are selected from classical works of art history and criticism as well as from contemporary publications. By the end of the course the students will have a solid foundation for building proficiency in German, whether through self-study or further course work.

**Requirements/Evaluation:** regular participation, homework

**Prerequisites:** GERM 515 or equivalent preparation (placement test)

**Enrollment Limit:** 20

**Enrollment Preferences:** although this course is designed to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll with permission of the instructor

**Expected Class Size:** 9

**Grading:** pass/fail option only

**Distributions:** (D1)

## Winter Study -----

### **GERM 30 (W) Honors Project: German**

To be taken by honors candidates following other than the normal thesis route.

**Class Format:** honors

**Grading:** pass/fail only

**Distributions:** (D1)

Winter 2023

HON Section: 01 TBA Janneke van de Stadt

### **GERM 31 (W) Senior Thesis: German**

To be taken by students registered for German 493-494.

**Class Format:** thesis

**Grading:** pass/fail only

**Distributions:** (D1)

Winter 2023

HON Section: 01 TBA Janneke van de Stadt

### **GERM 88 (W) German Sustaining Program**

Students registered for GERM 101-102 are required to attend and pass the German Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program; check your class schedule to confirm enrollment.

**Requirements/Evaluation:** requirements active participation, regular attendance, and earn a "Pass" grade

**Grading:** pass/fail option only

**Materials/Lab Fee:** cost to student approximately \$5 for photocopied materials

Winter 2023

LAB Section: 01 MWR 9:00 am - 9:50 am Hadia Nadjafi, Ana Andricic, Janneke van de Stadt

**GERM 99 (W) Independent Study: German**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

**Distributions:** (D1)

Winter 2023

## GLOBAL STUDIES (Div II)

Chair: Professor Ngonidzashe Munemo

### Advisory Committee

- Magnús T. Bernhardtsson, Brown Professor of History and Faculty Affiliate in Arabic Studies, Leadership Studies and Religion, Chair of Global Studies; affiliated with: History, Global Studies, Religion, Leadership Studies
- Farid Hafez, Class of 1955 Visiting Professor of International Studies

An informed engagement with the world is an indispensable part of the liberal education that is the goal of the Williams experience. The Global Studies Program enables students to achieve this goal through a cross-disciplinary and comparative curriculum. The program offers multiple tracks, on a region of the world or theme, around which students construct their global studies concentration.

### Requirements

To complete the concentration, students must: take one introduction course from the Global Studies 101-110 series; take a comparative course; fulfill the requirements of a track; and complete a senior exercise in their track.

### Global Studies 101-110 Series

All students wishing to pursue the concentration should take one introduction course from the Global Studies 101-110 series early in their careers. The topics and regions covered will vary and be selective, but all will be designed to place cultural, political, economic and technological issues in conversation with one another to illustrate the necessity of cross-disciplinary and comparative perspectives. On occasion, students may petition to substitute a course equivalent in scope to Global Studies 101 to meet this requirement.

### TRACKS

After taking an introductory course from the Global Studies 101-110 series, students are asked to select a track that will structure their global studies curriculum. There are two types of track. The first focuses on a particular region of the world or a contact zone where multiple communities encounter one another. The second type is organized thematically and permits students to explore a cultural, political, economic or technological issue globally and comparatively. Each track is administered by faculty teaching in that track in consultation with the advisory committee. At present the program consists of the following tracks:

#### Area Tracks

African Studies

East Asian Studies

Latin American Studies

Middle Eastern Studies

Russian and Eurasian Studies

South and Southeast Asian Studies

#### Thematic Tracks

Borders, Exile and Diaspora Studies

Economic Development Studies

Urbanizing World

To fulfill the requirements of a track, students must complete three approved courses from at least two disciplines and address their track in their senior exercise. Faculty in each track may set an additional requirement of a level of language competency for its concentrators. Students may petition to use courses completed on approved study away programs to fulfill elective requirements. Students may not count a course toward more than one requirement in the track.

### Senior Exercise

All concentrators must complete a senior exercise. The senior exercise will be a substantial piece of writing (20-25 pages) that draws together concentrators' disciplinary skills and their expertise in their track. It might be work done in the context of a senior capstone course in a relevant department or in the context of a shared seminar sponsored by the Global Studies program. Concentrators present their final senior exercise in class

or in a Global Studies colloquium, or in both.

Concentrators must also take a comparative course—that is, a course that might not cover material directly dealing with the track, but would enrich a student's engagement through comparative inquiry.

## Honors

A candidate for honors in Global Studies must maintain at least a B+ average in the concentration and be admitted to candidacy by the program faculty. An honors candidate must complete their project in a semester (and Winter Study). An honors candidate will prepare a forty-page thesis or its equivalent while enrolled in the senior thesis course, 491 or 492 (and Winter Study). This course will be in addition to the courses required to fulfill the concentration.

A student wishing to become a candidate for honors in Global Studies should secure a faculty sponsor and inform the program chair in writing before spring registration of her/his junior year.

## Study Away, Research, and Internships

Although not a requirement, study away, research, and/or relevant internships are an essential component of Global Studies. Where relevant to the curriculum plan of concentrators, the program Chair, in coordination with the Study Away Advisor and the Career Center, will advise students on opportunities in these areas.

## FAQ

Students MUST contact department/program BEFORE assuming study away credit will be granted toward the major or concentration.

### Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

### What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus, including readings/assignments.

### Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No, but students should not expect to get more than 3 study abroad courses counted towards the concentration.

### Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

### Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Typically the Introduction to Global Studies and the senior exercise cannot be fulfilled abroad.

### Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

### Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date.

**Note:** as course offerings change every year, students should feel free to check with the Program Chair to see if courses not listed below might count as electives.

### **GBST 101 (F) Religion, Politics, and Society: A Global Perspective (DPE)**

**Cross-listings:** REL 126 GBST 101 PSCI 126

#### **Primary Cross-listing**

In spite of predictions that religion would wither away in the face of modernization, even casual observation indicates that it remains a powerful force in contemporary political life. Our goal is to obtain an enhanced understanding and appreciation of the salience of religion in public life. The course will be divided into three parts. The first part focuses on different theoretical approaches to making sense of the relation between religion, politics, and society, discussing especially the concept of the 'secular' in Western thought and decolonial critique thereof. The second part will take a global perspective on the relation between religion and politics. We will discuss cases of Buddhism, Christianity (Catholicism and Protestantism), Confucianism, Hinduism, Islam (Sunni and Shi'a), and Judaism. The third part focuses on religion in the USA. Here, we will discuss the role of religion in American political culture, the relation of religion to the state, the relevance of religious interests and their political mobilization, religious minorities in the United States, and many other aspects of religion in the US society. Although the study of religion and politics raises a host of deep philosophical questions, the principal aim of the course is to understand how religion affects politics (and vice versa), rather than to explore the normative dimensions of questions raised by the interaction of these two forces.

**Requirements/Evaluation:** Class participation and three papers, in these proportions: 10% attendance; 20% participation; 20% first paper (7 pages); 30% second paper (8-10 pages); and 20% third paper (7 pages). No final exam.

**Prerequisites:** none

**Enrollment Limit:** 35

**Enrollment Preferences:** Global Studies concentrators and intended concentrators; Religion majors and intended majors

**Expected Class Size:** 25

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** Core course for GBST

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **GBST 102 (F) The Modern Middle East (DPE)**

**Cross-listings:** HIST 207 JWST 217 REL 239 GBST 101 LEAD 207 ARAB 207 GBST 102

#### **Secondary Cross-listing**

This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be

evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination.

**Requirements/Evaluation:** participation, two short papers, quizzes, midterm, and final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** History & Arabic majors, and Jewish studies concentrators; completion of course admission survey if overenrolled

**Expected Class Size:** 30-40

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**Difference, Power, and Equity Notes:** This course introduces students to the incredible diversity of the Middle East. It will explore how people of different backgrounds and in different situations have responded in diverse ways to the problems of the day. Students will acquire the critical tools to assess a number of interpretations of the past and how to understand and appreciate the many narratives in the Middle East today that have profound political and cultural implications.

### **GBST 103 (S) America and the World**

**Cross-listings:** LEAD 120 GBST 101 PSCI 120 GBST 103

Secondary Cross-listing

This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made on a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation to Iran; terrorist threats; humanitarian disasters in Syria and Libya; and long-term challenges like climate change. We will not only describe American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning only sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a "grand strategy." By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

**Class Format:** discussion

**Requirements/Evaluation:** short papers, class participation, and final exercise

**Prerequisites:** none

### **GBST 104 (S) Race and a Global War: Africa during World War II (DPE) (WS)**

**Cross-listings:** AFR 104 HIST 104 GBST 104

Secondary Cross-listing

This course highlights African experiences of World War II. Although most histories have excluded Africa's role in the war, the continent and its people were at the center of major developments during in this global conflict. In fact, many Africans remember the Italian invasion of Ethiopia in 1935 as the start of the war. African servicemen fought alongside the Allied and Axis forces on major warfronts in Europe, Africa and Asia. African communities and individuals also established war charity campaigns to collect funds, which they sent to war ravaged societies in Europe. Indeed, African economies, despite their colonial statuses, kept European imperial nations afloat in their most hour of need. At the same time, African colonial subjects faced severe food shortages, the loss of working-age men to labor and military recruiters, and dramatically increased taxes. We will examine the impact of these and other wartime pressures on different African communities. How did African societies meet such challenges and how did they view the war? In this course we will examine the roles that women played during the war, and the various other ways that African communities met wartime demands. Other topics we will explore include the role of African women; colonial propaganda; political protest against the war; race and racial thought in the wartime era; war crimes; African American support for the liberation of Ethiopia; and the war's impact on decolonization across the continent. We will further study how Africans and outsiders have differently conceptualized the continent's role in the war by analyzing a variety of sources, including scholarly writings, archival materials, films, former soldiers' biographies, and propaganda posters.

**Requirements/Evaluation:** active participation in discussion, map quiz, 2 reading responses, and 3 essays (of about 5 pages)

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students and then sophomores who have not previously taken a 100-level seminar

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AFR 104 (D2) HIST 104 (D2) GBST 104 (D2)

**Writing Skills Notes:** Students will write two 3-5-page essays each written in two drafts with instructor comments. They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course explores the colonial relationship during a major global crisis. Students will examine existing narratives of African contributions to the war and to come up with their own interpretations, and will be called to critically engage the question of why and how colonies made significant contributions to the Allied cause by producing needed materials and resources or by joining the fight. Africans made these contributions spite of various and complex inequities.

### **GBST 116 (F) The Art of Playing: An Introduction to Theatre and Performance**

**Cross-listings:** THEA 101 COMP 151 GBST 116

#### **Secondary Cross-listing**

This is an introduction to the global art and practice of making theatre. Students will learn about the history, aesthetics, and approaches to the performer's labor associated with select performance forms from around the world. Emphasis will be on the analysis of embodied practices and the relationship between the stage and everyday life. Through readings, audiovisual materials, performance exercises, and discussions we will engage with theatre as a constantly evolving art form, sharpening our analytical skills through theoretical approaches from performance studies. Central to our exploration will be excavating the Eurocentric assumptions that conventionally shape the practice and study of theater in the United States. We will seek ways to decolonize our perspectives and ask critical questions about performance's potential to enact strategies of anti-racism and anti-imperialism. This course, open to all students, is a gateway to the major in Theatre, and is a prerequisite for THEA 201, THEA 204, THEA 301, and THEA 401.

**Requirements/Evaluation:** two 5-page critical essays, journal reflections, studio exercises, and active participation in all activities

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** prospective Theatre majors or Theatre majors or Comparative Literature majors

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**GBST 117 (F) Bombay/Mumbai: Making of a Modern Metropolis (WS)**

**Cross-listings:** GBST 117 HIST 117 ASIA 117

**Secondary Cross-listing**

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of colonial and modern India through the history of its most important city.

**Requirements/Evaluation:** assessment will be based on class participation and weekly written responses to readings (2 pages), 2-3 short papers (4-5 pages), leading to an oral presentation and final paper (8-10 pages). All writing assignments are structured to build up the final paper.

**Prerequisites:** First years and sophomores only

**Enrollment Limit:** 19

**Enrollment Preferences:** first-years, and then sophomores who have not previously taken a 100-level seminar.

**Expected Class Size:** 12-15

**Grading:** no pass/fail option, no fifth course option

**GBST 133 (S) Plantation and the Plot: the Poetics of Caribbean Economic Thought and Struggle**

**Cross-listings:** ECON 133 GBST 133 COMP 133 AFR 133

**Secondary Cross-listing**

This introductory course to Caribbean Economic Thought contextualizes the poetics of economic ideas, struggle and knowledge alongside popular literary works connected to contemporary challenges of Caribbean Economic Development. Using the 'plantation' and the 'plot' as sites of continuing exploitation and struggle, this course delves into Caribbean postcolonial development thinking. We will explore the present-day relevance of these

sites to racial justice and environmental crises and their historical roots in colonial surplus extraction. By examining literary and economic writings of Caribbeanists and Caribbean connected contributors side by side, we seek to uncover these links to how the Caribbean economy, its seascape and society are framed, conceptualized and traversed as transplanted spaces, economic zones, and extractive geographies today. Unorthodox perspectives on economic and social thought that emerged to explain the region's integral role in merchant and industrial capitalism, New World social formations and contemporary globalization will also be discussed. We will closely analyze critical texts of contributors to the New World Group that centers the Caribbean within global economic transformations. Some events this course covers are indigenous genocide, labor regimes, agrarian change, structural adjustment, economic and ecological crises, postcolonial debt, technology, current fragmentation of global neoliberalism. These events will help shape an appreciation for the material and socio-cultural understandings of economic phenomena starting from the plantation to the plot within cultural and literary works in pluralistic, productive, and powerful ways.

**Requirements/Evaluation:** Oral or poster presentation analyzing a literary and Caribbean economist's work side-by-side (15 minutes or full-length/multi-page poster); critical analysis of a Caribbean economic sector or major regional report--choice made after discussion with instructor (10 pages); final project: review of a specific Caribbean community defined by group, geography or economic status drawing upon class, race, gendered axes of analysis (15 pages); participation (creative presentation of a reading drawing upon Caribbean cultural traditions that raise questions for class discussion)

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** Preference also for 1st and 2nd year students. If over-enrolled preference to AFR and Political Economy students.

### **GBST 162 (S) Languages of East Asia**

**Cross-listings:** CHIN 162 GBST 162 ANTH 162 ASIA 162

#### **Secondary Cross-listing**

A survey of the Chinese, Japanese, and Korean languages in their linguistic and cultural context. Working with various types of multimedia including audio, video, animation, and texts, we'll take up the phonetics, phonology, morphology, syntax, and lexicon of these three major East Asian languages, including also their history and writing systems as well as how they function in the societies where they are spoken. Though the emphasis of the course is on linguistic description and analysis, there will also be an applied component, as part of which we'll learn several dozen common expressions in each language. Some of the questions to be discussed are: What are the similarities and differences among these three languages? How are and how aren't they related? How did the modern standard form of each develop and what is its relationship to any non-standard languages or dialects? How do these three languages reflect sociolinguistic phenomena such as gender, class, and politeness? How do the writing systems of these languages function and what is the role of Chinese characters in them? What has been the influence of Classical Chinese on Modern Chinese, Japanese, and Korean? How have these languages changed due to influence from English and other languages? How are they used in Asian American speech communities? And what are the prospects for their future development, including the influence of computers and digital communications? While this course is not intended as a comprehensive introduction to linguistics, it does introduce many basic terms and concepts from that discipline.

**Class Format:** combination of lecture, discussion, and language practice

**Requirements/Evaluation:** three quizzes, two 2- to 3-page papers, an oral presentation, and an 8- to 10-page term paper

**Prerequisites:** none (lectures, class discussions, and readings in English; no prior background in linguistics or any Asian language required)

**Enrollment Limit:** 20

**Enrollment Preferences:** open to all with preference to first-year students and sophomores as well as majors/concentrators in CHIN, JAPN, EALC, ANTH, ASIA and GBST

**GBST 203 (F) Colonial Rule and Its Aftermaths in Africa (DPE)**

**Cross-listings:** GBST 203 HIST 204 AFR 227

**Secondary Cross-listing**

This course focuses on the history of Africa during the colonial and post-colonial periods, especially focusing on the period between 1885 and 2000. The first part of the course will explore the imposition of colonial rule and its attendant impacts on African societies. During this section, we will especially examine how Africans responded to colonialism, including the various resistance movements that arose at different moments to contest colonial rule. We will also explore the various transformations wrought by colonialism. The second part of the course will explore the African struggle to decolonize their societies and to fashion viable political systems. In addition to historical texts, the course will make use of cultural materials such as novels and films.

**Class Format:** Mixed format of lecture and discussion seminar

**Requirements/Evaluation:** active participation in discussion, map quiz, response papers, midterm and final exams, and case study paper (7-10 pages)

**Prerequisites:** None

**Enrollment Limit:** 30

**Enrollment Preferences:** if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

**Expected Class Size:** 30

**Grading:** no pass/fail option, no fifth course option

**GBST 204 (S) To See the Past: Russian and Soviet Cinema on History**

**Cross-listings:** RUSS 204 GBST 204 COMP 204

**Secondary Cross-listing**

This course surveys Soviet and Russian cultural history of the 20th- and 21st-centuries through the history of the cinematic medium. We will watch and analyze key films of this period--films by Eisenstein, Vertov, Tarkovsky, Muratova, Balabanov, Zviagintsev, and Fedorchenko among others--from a double perspective. On the one hand, we will study the cultural and historical contexts of the Soviet Union and Russia; on the other hand, we will learn the formal and stylistic aspects of the cinematic medium as it developed historically (from silent, to sound, to color, to digital etc.). From this double perspective, we will try to answer a larger question that underlies this course: What kind of historical thinking can we learn through cinema as a

medium? In other words, we will take cinema neither simply as a direct reflection of state ideology nor as pure aesthetic form or entertainment for the masses. Rather, we will approach the films of this period as audio-visual texts that are rich in historical content and require our informed and attentive interpretation.

**Requirements/Evaluation:** For each class you'll watch 1 or 2 film(s) and read typically 1 article under 20 pages. You will submit short viewing response before each class. Additionally, there will be short viewing or creative assignments to familiarize students with formal aspects of film. Evaluation will be based on participation, one presentation, short sequence analysis, and final paper or video essay

**Prerequisites:** none, open to all students

**Enrollment Limit:** 15

**Enrollment Preferences:** declared or prospective Russian or Comparative Literature majors, Russian Certificate seekers, Global Studies concentrators

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**GBST 208 (F) The U.S. and Afghanistan: A Post-Mortem (DPE)**

**Cross-listings:** ASIA 208 GBST 208 PSCI 220 ANTH 208

**Secondary Cross-listing**

The United States attacked and defeated the Afghan Taliban regime over in the course of a few short weeks in 2001. Within a few years, the finality of that victory was brought into question as the Taliban regrouped and eventually reasserted itself as a formidable guerilla army that the U.S. military could not easily defeat. At the same time that it was facing a more difficult military challenge than anticipated, the United States got bogged down in the process of nation-building, as well as efforts at social reform. This course examines the history of American involvement in Afghanistan, beginning with the Cold War when the U.S. used Afghanistan as a test case for new models of political modernization and economic development. We will go on to discuss the U.S. support for Islamist political parties during the Soviet occupation of Afghanistan in the 1980s and the consequent rise of the Taliban, and the role of Afghanistan in the September 11th attacks and the "War on Terror" that followed. The course will conclude with a consideration of the impact and legacy of the two decades of nation-building and social reform carried out by the United States since 9/11.

**Requirements/Evaluation:** grading will be determined by class participation, two short (500 word) essays, and a 15-page research paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Anthropology and Sociology majors, Global Studies concentrators, Political Science and Asian Studies majors will get preference

**Expected Class Size:** 15-20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ASIA 208 (D2) GBST 208 (D2) PSCI 220 (D2) ANTH 208 (D2)

**Difference, Power, and Equity Notes:** Among the topics relevant to power and difference to be considered in this course are the American support and later disavowal of Islamist political parties to advance US geopolitical goals, public relations efforts "to save Afghan women" after 9/11, and the uses and misuses of American military, economic, and political power to build a western-style democratic government and bring western-oriented social reforms to a society radically different from U.S. society.

Fall 2022

**GBST 212 (F) Foundations of China**

**Cross-listings:** REL 218 ANTH 212 GBST 212 HIST 214 ASIA 211 CHIN 214

**Secondary Cross-listing**

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

**Requirements/Evaluation:** short writing assignments (approximately 750-1000 words each), quizzes, a mid-term, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** Chinese majors, History majors, Religion majors, and Anthropology majors

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**GBST 213 (F) Why do Pussies Riot and What is "Homosexual" Propaganda? Gender and Sexuality in Putin's Russia (DPE)**

**Cross-listings:** COMP 257 GBST 213 WGSS 214 RUSS 213

**Secondary Cross-listing**

Since Vladimir Putin's rise to power, the media has highlighted events in Russia that at first glance resemble oddly sexualized jokes. At the same time that the Kremlin has reinstated authoritarian policy reminiscent of the Soviet Union, the Western press has chronicled Putin's topless vacations in Siberia, protests by the feminist collectives Pussy Riot and Femen, a 2011 ban on women's lacy underwear, federal legislation from 2013 prohibiting "homosexual" propaganda, and a 2017 court decision that outlawed a meme of Putin as a "gay clown." This course examines the Putin regime's ongoing attempts to police gender expression and private sexual behavior, as well as how Russian citizens' performance of gender and sexuality has changed in the past twenty years. We will consider gender and sexuality as distinctive features of Putinism, which have contributed to a biopolitical turn in official policy and inspired resistance and protest among Russian feminists and queers. *All readings will be in English, and all films will have English subtitles.*

**Requirements/Evaluation:** active participation in class discussions, several response papers, two short papers (3-5 pages each), and a final project

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** Those majoring in Russian and/or WGSS, as well as Global Studies concentrators.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**GBST 214 (S) Asian/American Identities in Motion (DPE)**

**Cross-listings:** ASIA 216 GBST 214 ASST 214 THEA 216 AMST 213 ASIA 214 DANC 216

**Secondary Cross-listing**

The course aims to explore dance and movement-based performances as mediums through which identities in Asian and Asian-American (including South-Asian) communities are cultivated, expressed, and contested. It will orient students towards "reading" and analyzing live and mediated performances within historical, social, and political frameworks. Students will explore how socio-historical contexts influence the processes through which dance performances are invested with particular sets of meanings, and how artists use performance to reinforce or resist stereotypical representations. Core readings will be drawn from Dance, Performance, Asian, and Asian American Studies, and will engage with issues such as nation formation, race and ethnicity, appropriation, tradition and innovation among other topics. This is primarily a discussion-based seminar course, and might also include film screenings, discussion with guest artists and scholars, and opportunities for creative projects. No previous dance experience is required.

**Requirements/Evaluation:** reading responses, essays, in-class writing assignments, class participation, and group presentations.

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** first years and sophomores

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ASIA 216 (D1) GBST 214 (D2) ASST 214 (D1) THEA 216 (D1) AMST 213 (D1) ASIA 214 (D1) DANC 216 (D1)

**Difference, Power, and Equity Notes:** This course introduces students to the role of performance in nation formation in Asia and the history of Asian-Americans in the US through analysis of dance performances and practices. Student will explore how race was central to the formation of Asian and the American nation, and how social and legal discriminatory practices against minorities influenced popular culture. The assigned material provide examples of how artists address these inequalities and differences in social power.

Not offered current academic year

**GBST 215 (F) Performance Ethnography (DPE)**

**Cross-listings:** GBST 215 DANC 214 ANTH 215 AMST 214 THEA 215

**Secondary Cross-listing**

The course aims to explore the theory, practice, and ethics of ethnographic research with a focus on dance, movement, and performance. Traditionally considered to be a method of research in anthropology, ethnography is the descriptive and analytical study of a particular community through fieldwork, where the researcher immerses herself in the culture of the people that she researches. In this course students will be introduced to (i) critical theory that grounds ethnography as a research methodology, (ii) readings in ethnographic studies of dance and performance practices from different parts of the world, and (iii) field research in the local community for their own ethnographic projects. This is primarily a discussion-based seminar course and may include fieldwork, attendance at live performances, film screenings, workshop with guest artists etc. No previous dance or performance experience is assumed or required.

**Class Format:** community-based field work

**Requirements/Evaluation:** class participation, reading responses, fieldwork and field notes, short papers, and final essay

**Prerequisites:** none

**Enrollment Limit:** 15

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 215 (D2) DANC 214 (D1) ANTH 215 (D2) AMST 214 (D1) THEA 215 (D1)

**Difference, Power, and Equity Notes:** This course focuses on ethnographic research with an emphasis on the ethics of doing ethnography in field sites and making performances based on that research. In fieldwork and performance work, there is a difference in social, cultural, and political (broadly conceived) power between researcher and interlocutors. In the course, students' critical analytical skills are developed for them to be self-reflective about these power differentials and to address issues of social inequality.

Not offered current academic year

**GBST 217 (F) Viral Inequality: Power and Difference in Pandemics (DPE)**

**Cross-listings:** GBST 217 STS 215

Secondary Cross-listing

From contested data to controversial containment strategies, the shape and course of pandemics are influenced at every level by the question: *Who matters? Whose lives* are prioritized and protected? *Whose expertise* is made actionable, and why? Focusing on the uneven distribution of risk and care during pandemics, this course explores how global health emergencies are not states of exception, but rather events that lay bare the priorities and interests of their host societies. Our investigation into pandemics--including Black Death, cholera, "Spanish" flu, HIV/AIDS, Ebola and novel coronaviruses--will provide a critical entry point into understanding the social, political, and economic processes that shape health interventions and outcomes, and their divergences along lines of social difference. We will ground our discussion and analysis using key concepts in Science & Technology Studies, while drawing from critical medical anthropology, disability studies, theories of capitalism and disaster studies to enrich our conversation.

**Class Format:** Online seminar

**Requirements/Evaluation:** Several short essays and reflection papers

**Prerequisites:** None, open to all students

**Enrollment Limit:** 12

**Enrollment Preferences:** If overenrolled, preference will be given to first-years and sophomores

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 217 (D2) STS 215 (D2)

**Difference, Power, and Equity Notes:** This course takes an intersectional approach to understanding how global pandemics unfold. It will emphasize how power dynamics and social differences shape responses to, and outcomes of, health emergencies. Readings in social and critical race theory are designed to give students a deeper appreciation of these issues.

**Attributes:** PHLH Social Determinants of Health

Not offered current academic year

**GBST 218 (S) Capital and Coercion (DPE) (WS)**

**Cross-listings:** GBST 218 ECON 218

Secondary Cross-listing

Capital, tradable ownership shares in long-lived corporations, invented in the 17th century, has connected people of different races, religions, and geographies. There are huge profits from such economic interactions, but also risks: of being cheated, deceived, or coerced. This course uses insights from the economics of incentives (principal-agent models, contracts, mechanism design) to investigate the interplay between capital, coercion, and resistance. The role of prejudice will be central, as will the rise of middlemen as enforcers of coercion. Case studies span the 17th century to the 20th and include: the spice trade and conflict in the Indian Ocean, capital markets and fraud in Amsterdam and London, the Atlantic trade in enslaved people, the Dutch "cultivation system" in Java, the slow end of slavery in Brazil, and colonial control and independence in Kenya. Required readings for this class will be fifty or more pages per week, and will include historical case studies and excerpts from novels and diaries.

**Requirements/Evaluation:** Students will be evaluated based on class participation and on four essays.

**Prerequisites:** Econ 110

**Enrollment Limit:** 19

**Enrollment Preferences:** If overenrolled, students will be asked to submit a short statement of interest.

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 218 (D2) ECON 218 (D2)

**Writing Skills Notes:** Students will receive guidelines on writing drafts and self-editing for clarity and structure. There will be four 5-7 page writing assignments for the class, spaced throughout the semester, with instructor feedback and an opportunity to revise one for final submission. We will also carefully analyze several beautifully written non-fiction articles that explore topics related to this class written for a general audience.

**Difference, Power, and Equity Notes:** This course analyzes the evolution of economic inequity. It analyzes how global market opportunities have been shaped by race, religion, wealth, and power.

**GBST 219 (S) Indigeneity Today: Comparative Indigenous Identities in the US and Russia (DPE) (WS)**

**Cross-listings:** RUSS 217 ANTH 217 GBST 219

**Secondary Cross-listing**

Indigenous movements for land, rights, and cultural preservation have spread to and originated in all corners of the world. However, the global nature of these movements at times obscures ways of being Indigenous in differing contexts. This course analyzes Indigeneity in both the United States and Russia today. Through reading and analyzing ethnography, theory, and literature, it focuses on Indigenous peoples in a comparative context. Rather than prioritizing concern with Indigenous peoples emerging from the US, it attempts to demonstrate what Indigeneity has been in both the United States and Russia and what it is and means today. It asks the following questions: what is Indigeneity and who is Indigenous; how is Indigenous identity constructed and by whom; and what convergences and divergences exist in Indigeneity between the US and Russia or for that matter in other contexts? To help answer these questions, in this course we will grapple with Indigeneity as a social category and other social formations, especially ethnicity, nationality, and race. Topics include: Indigeneity and the State, Revitalization and Resurgence, Indigenous People and Nature Protection, and Hemispheric and Global Indigeneities.

**Requirements/Evaluation:** Weekly post to course Glow discussion page, 1 or 2 times leading class discussion on the assigned readings, 1 short presentation, 1 extended project with regular short writing submissions, 1 final paper and final presentation

**Prerequisites:** None

**Enrollment Limit:** 16

**Enrollment Preferences:** Majors and certificate-seekers in Russian, then majors in Anthropology and Sociology, and then Global Studies concentrators

**Expected Class Size:** 10-12

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

RUSS 217 (D1) ANTH 217 (D1) GBST 219 (D1)

**Writing Skills Notes:** This course has the following assignments: Weekly post to the Glow discussion page, 1 short presentation, 1 extended project with regular writing submissions, 1 final paper and final presentation. For the extended project, we will have both peer-review and instructor feedback for all project assignments. In peer-review and instructor feedback, comprehension of the material and the content of the writing, improvement in writing style and clarity, and development of voice will be discussed.

**Difference, Power, and Equity Notes:** In the course, students will learn about Indigeneity as a context-specific social formation. It understands Indigeneity as a category of difference with past and present importance. We will read about, discuss, and write about Indigeneity as a social category,

along with other social categories it arose alongside (such as race, ethnicity, and nationality), and how it has been mobilized by both those who identify as Indigenous and by those who designate others as Indigenous.

**GBST 221 (S) South Asia: Colonialism to Independence, 1750-1947 CE**

**Cross-listings:** HIST 221 ASIA 221 GBST 221

**Secondary Cross-listing**

This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from c. 1750 to 1947. This period spans the decline of the Mughal Empire through British colonial rule, South Asians' struggle for independence, and the Partition of India and Pakistan. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and podcasts. One objective of this course is to introduce students to the different political and social processes that led to the creation of India, Pakistan and Bangladesh; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

**Class Format:** This class will also have a small discussion component.

**Requirements/Evaluation:** class participation, response papers (2-3 pages), two short essays (4-5 pages), midterm and final exams

**Prerequisites:** none; open to all

**Enrollment Limit:** 40

**Enrollment Preferences:** history majors if the the class is overenrolled.

**GBST 226 (S) Aid, Arms, and Armies: The Politics of Intervention in Africa (DPE)**

**Cross-listings:** PSCI 226 LEAD 226 GBST 226

**Secondary Cross-listing**

Comprised of nearly 50 countries and home to over 1 billion people, sub-Saharan Africa is remarkable in its diversity, particularly in regards to a number of outcomes central to the study of political science. It has also been a central site of numerous and profoundly impactful interventions for centuries, from the slave trade and colonialism to proxy wars and structural adjustment programs. This class investigates the many types of intervention--including military, humanitarian, and resource extraction--as well as identifying the diverse actors conducting these interventions, from missionaries to mercenaries, the World Bank to the world's leading states (e.g. United States, China, France). We interrogate how these interventions have shaped a number of key political, economic, and social outcomes for African countries, highlighting both case studies as well as common themes. We will also keep an eye out for lessons learned and the future of international interventions--the politics of foreign investment, humanitarian assistance, and multilateral partnerships.

**Requirements/Evaluation:** Participation, Midterm, Final, 3 Short Response Papers

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** Political Science majors and Leadership Studies Concentrators

### **GBST 228 (S) Performance Practices of Global Youth Cultures**

**Cross-listings:** GBST 228 THEA 228

#### **Secondary Cross-listing**

This course investigates how young people engage in a variety of performance practices to define social identities and reflect on critical issues. We begin by examining how scholars and media have defined "youth" by way of questioning assumptions about the inherent universality of this social category. We will then explore how young people have thought about and represented themselves. Taking seriously music, dance, fashion, and ritualized uses of public space (including in the virtual realm), we will explore examples of how youth have used performance practices to engage in political activism, subvert hegemonic norms, reconfigure urban geographies, and engage in critical identity politics. Our inquiry will include attention to how youth practices travel globally and adopt new localized political meanings, as well as the ways in which the subversive potential of performances can be subsumed by the normalizing mandates of global capital. Our work in class will be based upon readings, discussions, and audiovisual materials from various parts of the world. Throughout the semester students will turn an analytical eye towards their own practices and modes of consumption. For final projects students will engage in ethnographic research about specific youth cultures in the region and on the Williams campus.

**Class Format:** reading and discussion

**Requirements/Evaluation:** includes class discussions, self-reflexive presentations and papers, journal reflections, one 10-page paper based on original research with in-class presentation

**Prerequisites:** none

### **GBST 229 Performance Practices of India (DPE)**

This course explores ancient and contemporary performance practices in India. Our objects of study will include the text and performance of Sanskrit plays, contemporary and experimental theater productions, as well as forms of dance and ritual. We will discuss dramaturgical structure, staging, acting conventions, gender representation, performer training, the experience and role of the audience, as well as mythological and political themes. Thinking historically and ethnographically, we will seek to understand the aesthetics and social purposes of these practices, in addition to the relationship that performance has with everyday life, contested concepts of the nation, and caste. Throughout the semester we will interrogate the ways in which Western categories such as "classical," "folk," "religious," "traditional," and even the distinction between "dance/theater/music/visual arts" are not indigenous or accurate concepts for organizing thinking about performance in this part of the world.

**Requirements/Evaluation:** Evaluation will be based on participation in discussion, reading responses, an oral presentation, and one 10-page paper.

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** preference for seniors and juniors

**Expected Class Size:** 12

**Grading:**

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** We will examine British colonial edicts that prohibited performance practices as a form of social control as well as in the name of Christian morality. From here we will explore how upper-caste Independence era artists and leaders sought to reinvent the arts as vessels of "Indian" identity, at the cost of further marginalizing hereditary performance communities. We will also interrogate how the Indian state has promoted narrow visions of "femininity" and how artists contest religious nationalism

### **GBST 232 (S) Islam in Africa (DPE)**

**Cross-listings:** HIST 202 GBST 232 AFR 232 REL 232 ARAB 232

Secondary Cross-listing

Islam in Africa is often relegated to the peripheries in the study of Islam, a religion most associated with Arabs and the Middle East. On the flip side, Islam is also portrayed as foreign to African belief systems and institutions. The relationship between Islam and Africa, however, begins with the very advent of Islam when early Arab Muslim communities took refuge in the Abyssinian empire in East Africa. This course explores the history of Islam and Muslim societies on the African continent by focusing on the localized practices of Islam while also connecting it to Islam as a global phenomenon. The course will begin with a historical focus on the spread of Islam in Africa from East Africa and North Africa in the seventh century all the way to the spread of Islam through Sufi brotherhoods in the eighteenth and nineteenth centuries. The course will also take an anthropological approach, exploring the diverse practices of Islam in African Muslim communities and the social and cultural impact of Islam on African societies. Among the topics the course will cover include African Muslim intellectual traditions, local healing practices, religious festivals, early modern African Muslim abolitionist movements, and the historical interactions between African and Asian Muslim communities in the Indian ocean world.

**Requirements/Evaluation:** Two essays during the semester and final project.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** REL, HIST, ARAB, AFR, GBST majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **GBST 233 (F) Colonialism, Capitalism and Climate Crisis (DPE)**

**Cross-listings:** ENVI 204 GBST 233 AFR 233

Secondary Cross-listing

Evolutions are part of human existence. These changes are not necessarily natural, uniform or linear across space and time. As colonial conquests

sought to capture, dominate and exploit vast swathes of land, nature and people, supported by economic theories, violent, wide-ranging and long-term changes profoundly altered the environment and human-nature relationships. This course examines these transformations, specifically attending to the relationship between colonized/colonial (hu)man, nature and non-human species, drawing in perceptions of nature and the economy. Our starting point for this intellectual journey is the colonial imprint on human-ecological relations i.e. economic man, or Sylvia Wynter's conception of "ethno-class man" and "homo-economicus". We will consider social difference especially race as a central conjuncture of the changing relationship of capitalism and social organization relative to natural resource extraction, techno-scientific knowledge, industrial development and resulting accumulation of greenhouse gases that induce climate and ecological crises. We will also examine economic perspectives of climate change as a market failure, loss of economic value or a financial risk to stock portfolios that may be at odds with humane ways of organizing our collective planet. This course exposes the hierarchies of social difference and resulting inequalities (class, race, gender, species) under climate crisis to advance reparative and decolonial understandings. Drawing upon experiences from social, labor and environmental movements for climate justice, students will be able evaluate situated political economic responses to the climate crisis.

**Requirements/Evaluation:** Blog post entries; Either a research report on an emerging 'green' technology (8-10 pages); Or a recorded video podcast / interview with an environmental justice movement/activist in the global South (20-30 minutes); Community case study on an environmental project tracing its colonial histories and axes of power - gender, race, class, species (6-8 pages); Participation (leading a discussion/presentation on a reading based on from contemporary/historical events)

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** If over enrolled preference goes to Africana Studies and then Environmental Studies students.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 204 (D2) GBST 233 (D2) AFR 233 (D2)

**Difference, Power, and Equity Notes:** The course addresses from a global perspective and from different contexts how social groups, societies and organizations are being transformed under climate crisis.

### **GBST 235 (S) Race, Land, Dis/Re-possession: Critical Topics in Environmental Injustice and Subaltern Geographies**

**Cross-listings:** AFR 235 AMST 235 GBST 235 HIST 275 ENVI 253

#### **Secondary Cross-listing**

This course is an introduction to ongoing and contemporary topics in colonialism, racial thinking, African Diaspora and, Global and Caribbean studies, studies of 'the environment,' and dispossession. We will examine how race, gender and class operate under racial capitalism and settler colonialism as ongoing, sometimes continuous and discontinuous processes. The readings will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, and other critical, anti-capitalist or decolonial scholars. Readings, as in AFR 234, will take up the question(s) of land and land-making; race, racialization, and racial thinking; of space and place as they all relate to the various processes, projects and methods of (dis)/(re)possession, both "past" and "contemporary." We will interrogate temporal binaries, settler time, notions of [the] "progress(ives)" and other bifurcated understandings of the world. This course is the second part of a complementary course, titled, "Race, Land and Settler (Racial) Capitalism," which focuses on the historical geography of processes of (dis)/(re)possession from a Black and Indigenous Atlantic perspective. In this iteration, weekly in-class discussion will be combined with guest lectures to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to explain how a range of these territorializing processes operate. Sound, music and other audio will complement discussions. Therefore, the capacity of deep listening, in-and-out of class, is a grounding. Sample topics covered in the course include: indigeneity and Blackness; (dis)possession and accumulation; plantation geographies and economies; housing and houselessness; the problem of parks and conservation; prisons and carceral geographies; Black geographies; environmental racism and colonial resistance. You are strongly encouraged to participate in both courses in this sequence, but are not required to do so.

**Requirements/Evaluation:** The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms,

including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%

### **GBST 236 (S) Reading the Qur'an**

**Cross-listings:** ARAB 236 REL 236 COMP 213 GBST 236

#### **Secondary Cross-listing**

In the nearly 1500 years of Islamic history, the Qur'an has been a central source of spiritual insight, ethical and legal guidance, sacred stories, and theological principles. Considered the divine word of God, the Qur'an is central to devotional life. This course will explore the Qur'an as a text that is always in a state of production. We will focus significantly on close readings of the text of the Qur'an, in addition to pre-modern and modern Qur'anic exegesis. The course will begin with a historical account of the revelation and collection of the Qur'an, placing the form and content of the text in the context of 7th century Arab society and the life of the Prophet. We will then study Qur'anic commentaries to discuss how Muslims have drawn theological, legal, philosophical, and mystical meaning from the Qur'an. We will pose some of the following questions: What do the different exegetical methods tell us about the intertextual nature of the Qur'an? How have these shifting notions affected the meaning made from Qur'anic verses and passages? What role do interpretive communities play in determining what the Qur'an says? Lastly, through an exploration of the art of Qur'an recitation, calligraphy, and Qur'an manuscripts, we will explore the ways in which the Qur'an is also an object of devotion in Muslim life.

**Requirements/Evaluation:** class participation, weekly reading responses, 3- to 4-page midterm paper, and a final project with a media component and a 4- to 6-page analytical essay

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Religion and Arabic Studies majors

### **GBST 241 (F) History of Sexuality**

**Cross-listings:** REL 241 HIST 292 GBST 241 WGSS 239

#### **Secondary Cross-listing**

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in

particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

**Requirements/Evaluation:** reading responses, two essays, and final research paper

**GBST 242 (S) Americans Abroad (DPE)**

**Cross-listings:** COMP 242 AMST 242 ENGL 250 GBST 242

**Secondary Cross-listing**

This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war, peace, and pandemic. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler's expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? How did recent lockdowns and border closings impact and/or interrupt these complex experiences? Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their (and our) concept of "home" into something that reflects individual identity, and not one imposed by any national culture--American or foreign.

**Requirements/Evaluation:** each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student's own experiences

**Prerequisites:** any literature course at Williams or permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** Comparative Literature, English or American Studies majors, and/or students who have studied away or plan on doing so.

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COMP 242 (D1) AMST 242 (D1) ENGL 250 (D1) GBST 242 (D2)

**Difference, Power, and Equity Notes:** We will read and analyze primary materials and literature that reflect on Americans who chose, or were forced to, reinvent themselves abroad to escape oppressive situations in the United States related to gender, class, race, or political views. The socio-historical context of each writer will be crucial to understanding their situations. Students will write critical papers, and their own narrative in which they reflect on a situation of personal dislocation, either while traveling, or at home.

**GBST 243 (S) Anti-Muslim Racism: A Global Perspective (DPE)**

**Cross-listings:** PSCI 244 GBST 243 REL 247

**Primary Cross-listing**

The racialization of Islam and Muslims has been constitutive to how they have been imagined in Europe and elsewhere. This course looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. It goes back to the founding moments of an imagined white (at the beginning Christian) Europe and how the racialization of Muslim and Jewish bodies was central to this project, and how anti-Muslim racism continues to be relevant in our world today. The course will not only show how Muslims were constructed as subjects in history, politics and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. Rather, it also looks at how Muslims live through Islamophobia. It looks at processes of racialization of Muslims within the Muslim community and between Muslim communities, while also considering which agencies Muslims take to determine their own future. The course draws from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology.

**Requirements/Evaluation:** Active class participation, two response papers, and a comprehensive, open-book and open-note final exam.

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** Global Studies concentrators and Religion majors

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** Also qualifies for the GBST Urbanizing World track

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

PSCI 244 (D2) GBST 243 (D2) REL 247 (D2)

**Difference, Power, and Equity Notes:** The course critically examines difference, power, and equity. Thematically, it looks at the racialization of Islam and the intersection of race, religion, class and gender in the construction of the 'Muslim problem' from a historical as well as a global contemporary perspective. It aims to promote a self-conscious and critical engagement with the practice and experience of difference, especially as it relates to the dynamics of power in structuring that experience.

**GBST 244 (S) Black Mediterranean (DPE) (WS)**

**Cross-listings:** GBST 244 COMP 244

**Secondary Cross-listing**

Though European border management today seeks to limit and control movement, the Mediterranean region is a historical site of mediation between cultural differences and religious views. This course centers primarily on the works of migrant intellectuals and artists from North Africa and the Middle East, who have emerged from the Mediterranean region to become a significant part of the new voice of Europe. Borrowing from Deleuze and Guattari's definition of "minor literature" as literature that a "minority constructs within a major language" and in which "language is affected with a high

coefficient of deterritorialization," we explore the political, cultural and anthropological effects of such literature in today's European public discourse. Today the Mediterranean has become a graveyard where black and brown bodies transit a hostile and deadly passage. Therefore, a centerpiece of this course will be an examination of the racist discourse in Europe in the light of the *Black Lives Matter's* quest for decolonizing knowledge. In this interdisciplinary course, we read both literary works (Ali Farah, Khatibi, Lakhous, Scego), and critical theory (Cassano, Chambers, Fanon, Hall, Theo Goldberg); we also analyze films, documentaries, podcasts, exhibits and museums of colonialism in Europe.

**Class Format:** Students will meet twice a week with me.

**Requirements/Evaluation:** weekly writing assignments, midterm and final exams, final paper, oral presentation

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Comparative Literature majors

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 244 (D1) COMP 244 (D1)

**Writing Skills Notes:** This course is designed to be writing-intensive, as it requires weekly response papers, midterm, and final papers, and blog discussions.

**Difference, Power, and Equity Notes:** Within the theoretical framework of postcolonial studies, this course examines themes such as: race; Europe and its postcolonial legacy; power imbalances in the current European policies of migration; the urban space of Rome as site of conflictual representations of center/periphery.

**GBST 246 (F) Asian American Performance: Activism and Aesthetics (DPE)**

**Cross-listings:** GBST 246 THEA 246 AMST 249

**Secondary Cross-listing**

This seminar will explore contemporary Asian American plays, stand-up comedy, performance art, and spoken word with an eye to how artists *do* politics through their cultural labor. We will begin with a brief survey of images from popular media to identify legacies of Orientalism. From here we will move towards examining the ways in which Asian American artists from various eras subvert stereotypes and pursue projects of social justice. In watching performances and reading scripts, essays, and interviews, we will attend to narratives, acting methods, theatrical design, spectatorship, and the political economy of cultural production that shapes how Asian American artists make and show work. In addition, we will explore how artists stake political claims in the public sphere through teaching and community organizing.

**Requirements/Evaluation:** two 5-page critical essays, reading responses, class presentations, and active discussion participation

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** sophomores, juniors, and seniors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 246 (D1) THEA 246 (D1) AMST 249 (D2)

**Difference, Power, and Equity Notes:** Course fosters critical engagement with artistic practices that seek to address the concerns of populations in the US who have historically had unequal access to resources and audiences for representing themselves and their political concerns. Students will ask questions about how Asian American artists address legacies of Orientalism, as well as how they facilitate community engagement and approach projects of social justice.

**Not offered current academic year**

**GBST 262 (S) Paper Trails (DPE)****Cross-listings:** GBST 262 SOC 262 STS 262**Secondary Cross-listing**

Long before the invention of the passport, states or state-like entities sought to document and manage populations and discipline bodies. This course invites students to critically reflect on documentation practices and systemic violence, particularly against racial, ethnic, sexual, and political minorities. Students will explore identity-making through documentary practices such as the three-generation life history, a biographical form that Soviet-allied countries used to reward loyalty and punish disloyalty. Labels, such as a criminal record or pre-existing health conditions, also trail or precede individuals their whole lives. Students will grapple with what happens when the paper trail goes cold--when identification documents are invalidated, birth certificates withheld, household registries purged, and archives destroyed. Students will explore the rise of surveillance and biometric data alongside the actors, technologies, and industries that try to circumvent them in places such as the Xinjiang Uyghur Autonomous Region and along the US-Mexico border. In this project-based course, students will exhume paper trails and imagine alternative ways to create, alter, and subvert them.

**Requirements/Evaluation:** thoughtful and consistent class participation, facilitation of guest speakers, Special Collections visit, project memos, and final project and presentations

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** Anthropology and sociology majors, Global Studies concentrators; Science and Technology Studies concentrators

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 262 (D2) SOC 262 (D2) STS 262 (D2)

**Difference, Power, and Equity Notes:** In this course, students will interrogate some of the key documents that structure our lives and serve as tools for waging systemic violence against ethnic, racial, sexual, and political minorities. Students will synthesize and apply these lessons about bureaucratic documentation toward the benefit of a community partner.

**GBST 273 (S) Detectives Without Borders (DPE) (WS)****Cross-listings:** COMP 273 ENGL 273 GBST 273**Secondary Cross-listing**

Why is detective fiction so popular? What explains the continuing multiplication of mystery novels despite the seemingly finite number of available plots? This course will explore the worldwide fascination with this genre beginning with European writers before turning to more distant detective stories worldwide. The international scope of our readings will highlight how authors in different countries have developed their own national detective typologies while simultaneously responding to the international influence of the Anglo-American model. Simultaneously, the readings will trace the evolution of the genre from the classical Sherlock Holmes model through later iterations, including golden age, hard-boiled, police procedural, female detective types, and more. Alongside fictional narratives, essays on the genre will provide the theoretical ground for our investigation. Our international journey will begin in England and the United States (G.K. Chesterton, Robert Knox, and Edgar Allan Poe) and continue through Japan (Edogawa Rampo), France (Georges Simenon), Italy (Andrea Camilleri), Argentina (Jorge Luis Borges), and beyond. As we journey around the world, we will look at the possibility of reading detective fiction through the categories of gender, postcolonial, and race studies. Film adaptations of the novels we read, TV shows, and film noirs will also be included in the course material. All readings will be in English.

**Requirements/Evaluation:** short papers, one research paper, oral presentations, midterm, class participation

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Comparative Literature and English majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** COMP core course

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COMP 273 (D1) ENGL 273 (D1) GBST 273 (D2)

**Writing Skills Notes:** This writing skills course requires weekly short papers, blog entries, and three 5- to 7-page papers, which will test students' ability in close-reading, comparative readings, and research analysis. I will provide written feedback regarding grammar, style, and argument.

**Difference, Power, and Equity Notes:** A significant part of the course addresses post-colonial critical theory issues by including crime fiction from non-Western countries (South Africa, Japan, Brazil, Argentina). The post-colonial reading of those novels is supported by the reading of post-colonial theory such as (Frantz Fanon and Edward Said). The issue of gender inequalities is central to the course. Women and LGBTQ detectives are included in the syllabus.

Not offered current academic year

### **GBST 281 (S) Contemporary African Politics (DPE)**

**Cross-listings:** GBST 281 PSCI 281

Secondary Cross-listing

This course is an introduction to the contemporary politics of Africa, with the aim of sparking a life-long interest in the affairs of the region. Comprised of nearly 50 countries and home to over 1 billion people, sub-Saharan Africa is remarkable in its diversity, particularly in regards to a number of outcomes central to the study of political science: how do institutions of the past shape current dynamics of political competition and economic growth? Why are some countries stable democracies while others struggle with military coups or authoritarian rule? What sparks political violence and how can countries emerge from conflict? Our focus is both contemporary and comparative, organized thematically around common political experiences and attributes across the region. We begin with the legacies of colonialism, the slave trade, and the politics of liberation. We then interrogate dynamics central to political life in Africa over the 60 years since independence: the role of ethnic diversity in shaping competition, the prominence of patronage politics, and the evolution of elections. We next assess major dimensions that have historically shaped the study of African politics, including conflict and violence, economic development, and foreign aid. The final section takes a comparative approach to some of the most pressing issues in Africa today: health crises, migration and mobility, technological revolution, climate change, and the emerging power of women and youth.

**Class Format:** A typical class session will be about 60% lecture and 40% discussion

**Requirements/Evaluation:** Class Participation, Map Quiz, 3 short papers (5 pages)

**Prerequisites:** None.

**Enrollment Limit:** 25

**Enrollment Preferences:** all first-years and sophomores; those juniors and seniors majoring in political science or concentrating in Global Studies.

**Expected Class Size:** 25

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 281 (D2) PSCI 281 (D2)

**Difference, Power, and Equity Notes:** This course takes the racial, ethnic, linguistic, and religious diversity of sub-Saharan Africa as a starting point for understanding the contemporary politics of the region. The course addresses the legacies of systemic inequality as well as strategies of resistance to oppression. We also examine how ethnic and religious diversity shape political institutions, competition, and conflict, comparing different countries and over time.

### **GBST 287 (F) Global Sustainable Development (DPE)**

**Cross-listings:** ENVI 297 GBST 287

Secondary Cross-listing

In 2015, the United Nations launched the Sustainable Development Goals, an ambitious multi-pronged effort to eliminate poverty, improve health outcomes, advance clean energy, address the effects of climate change, and support more equitable forms of life on earth. This course explores the historical antecedents and contemporary manifestations of global sustainable development, a constellation of ideas and a set of policy imperatives. This course will ask: what is sustainability and how did it emerge as a key paradigm in the present? Relatedly, how have different organizations and actors worked to address entrenched global challenges? Students will engage a range of materials, including policy documents from the United Nations, World Bank, and international non-governmental organizations. Students will also explore critical scholarship on the possibilities and limitations of global development. Together we will grapple with ways to build more sustainable futures.

**Requirements/Evaluation:** Class discussions; 2 Policy Analysis Papers (4-6 pages each); Class presentations; Final Take-Home exam (8-10 pages)

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Envi majors and concentrators

**Expected Class Size:** 19

**GBST 304 (S) Sacred Custodians: Environmental Conservation in Africa (DPE)****Cross-listings:** AFR 335 ENVI 304 GBST 304 HIST 304**Secondary Cross-listing**

In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of de-forestation. Ken Saro-Wiwa was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental crisis that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction, game parks, desertification, wildlife and hunting, traditional practices, and climate change.

**Requirements/Evaluation:** Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and one exam.**Prerequisites:** None**Enrollment Limit:** 25**Enrollment Preferences:** If course is over-enrolled, preference to History Majors and students with a demonstrated interest in African studies.**Expected Class Size:** 20**Grading:** no pass/fail option, no fifth course option**Distributions:** (D2) (DPE)**This course is cross-listed and the prefixes carry the following divisional credit:**

**GBST 305 (S) A History of Health and Healing in Africa (DPE)****Cross-listings:** HIST 305 AFR 304 GBST 305**Secondary Cross-listing**

This class will explore the history of health and healing in Africa, with emphasis on the colonial and post-colonial eras. During the semester we will explore diverse medical and social interventions in African health over the past 150 years. How have African societies understood healthy communities and public health? We will examine this question through the study of spirit possession and other African healing practices but also how they have intersected with different biomedical practices and public health programs. We will also study the patterns and social impacts of new diseases in the twentieth century, as well as transformations in the understanding and treatment of diseases long present on the continent. In particular we will explore shifting understandings of the causes, treatment, and social implications of sleeping sickness, malaria, and HIV/AIDS. The development of colonial rule, shifting environmental conditions, changing diets, and urbanization all impacted the disease landscape, as well as the way African societies have understood public health. Indeed, the themes of health, medicine and disease provide a useful lens for understanding important social transformations across the continent.

**Requirements/Evaluation:** active participation in discussion, map quiz, reading reflections, a primary source analysis paper (3-5 pages), presentation, and one research paper (8-12 pages).**Prerequisites:** none**Enrollment Limit:** 25**Enrollment Preferences:** if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

**Expected Class Size:** 25

**Grading:** yes pass/fail option, no fifth course option

### **GBST 312 (S) The Mughal Empire: Power, Art, and Religion in India**

**Cross-listings:** GBST 312 ASIA 312 REL 312 HIST 312

Secondary Cross-listing

Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith--much larger than any European empire in the early modern world--the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor's memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

**Requirements/Evaluation:** participation, several short essays, one final paper

### **GBST 321 (F) Migration Governance: A Global Perspective (DPE)**

**Cross-listings:** GBST 321 PSCI 322 LEAD 324

#### **Secondary Cross-listing**

This class is interested in thinking critically and empirically about one of the most polarizing and relevant issues of our time: how countries regulate cross-border mobility. Currently over 281 million international migrants live in a country different from where they were born, about 1 out of every 30 humans in the world and a population that has roughly doubled since 1990. How are international organizations and domestic governments regulating this level of unprecedented global mobility in destination countries as well as countries of origin? Throughout the semester we interrogate three themes central to migration politics (and political science): rights, access, and agency. The course is organized with a focus on legal status: which "categories" of people (i.e. illegal migrants, refugees) have differential access to rights, services, and representation depending on how they are classified where they live (and where they are from). We will critically analyze how those categories are constructed at the international and domestic levels, as well as how those categorizations are also racialized, politicized, and gendered. While we address current debates over migration governance in the United States, we situate US migration policy within the contemporary global context. The course places the US in conversation not only with European countries, but also (and especially) considerations of migration governance in destination countries in Latin America, the Middle East, Asia and Africa. We also attend to the *emigration* governance of diaspora citizens particularly from the Global South. Students will have the opportunity to apply course readings to real-world contexts through guest speakers from global organizations at the frontlines of migration policy (UNHCR, Doctors without Borders), and filmmakers documenting border crossing around the world.

**Requirements/Evaluation:** Participation, 3 Short Response Papers, Research Paper (15 pages)

**Prerequisites:** PSCI 202 or PSCI 204 or permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Political Science majors and Leadership Studies Concentrators

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 321 (D2) PSCI 322 (D2) LEAD 324 (D2)

**Difference, Power, and Equity Notes:** This class attends to the racial and gendered dimensions of global migration governance. We also focus on the diverse, uneven, and often arbitrary ways global migration governance is executed on the ground depending on destination country, where migrants are from, and why they are crossing borders. Finally, this class foregrounds global migration governance from the vantage of the Global South, highlighting migration policies within sub-Saharan Africa, Latin America, Asia, and the Middle East.

**GBST 322 (F) Waste and Value**

**Cross-listings:** ENVI 322 GBST 322 ANTH 322

**Secondary Cross-listing**

What is trash and what is treasure? In what ways does value depend upon and necessitate waste, and how is the dialectic between the two inflected by culture? When we 'throw away' things at Williams College, where exactly do they go, and who handles them 'down the line'? What are the local and global economies of waste in which we are all embedded and how are they structured by class, race, caste, gender and nation? In this seminar we critically examine the production of waste - both as material and as category - and its role in the production of value, meaning, hierarchy and the environment. Readings include ethnographic accounts of sanitation labor and social hierarchy; studies of the political and environmental consequences of systems of waste management in the colonial period and the present; and theoretical inquiries into the relation between filth and culture, including work by Mary Douglas, Dipesh Chakrabarty and Karl Marx. Geographically the foci are South Asia, Japan, and the United States. There is also a fieldwork component to the course. In fieldtrips we follow the waste streams flowing out of Williams - to an incinerator, a sewage treatment plant, recycling and composting facilities and other sites - and students explore in individual, participant-observation-based research projects the everyday social life of waste in our communities.

**Requirements/Evaluation:** regular posting of critical response papers, field notes on waste streams, research-based final paper

**Prerequisites:** none

**GBST 330 (S) American Political Thought in Hemispheric Context**

**Cross-listings:** PSCI 330 GBST 330

**Secondary Cross-listing**

Actors living during the Age of Revolutions witnessed an astounding number of social, political, and cultural changes. In the short period between 1775 and 1830 more than thirty popular insurgency movements took control of the American hemisphere, most of them by organizing around the principles of republican politics. In this course, we study the peoples, demands, and visions that comprised the popular movements of the Age of Revolutions to reconstruct the canon *American Political Thought* in hemispheric context. This course emphasizes the comparative features of post-colonial movements in the Americas and centers the contributions of indigenous, raced, gendered, and ethnicized communities. The course schedule is divided into two sections. The first half of the class situates the political and theoretical problems of American Political Thought by engaging with scholarship on post-colonial movements, decolonial thought, democratic theory, and theories of popular rule. The second half of the course contextualizes these frameworks by putting them in conversation with studies of revolutionary change, popular imagination, and case studies on revolutionary movements throughout the Americas. Students are expected to engage in archival research, as well as work with both primary and secondary sources on the Age of Revolutions.

**Requirements/Evaluation:** Regular attendance, consistent class participation, three Glow posts, three two-page reflection papers, and a final research paper of 10-12 pages

**Prerequisites:** At least one prior course in political theory, social theory, history of the Americas (either the United States or Latin America), or permission of instructor.

**Enrollment Limit:** 12

**Enrollment Preferences:** Concentrators in political theory in Political Science, then majors or concentrators in Political Science, American Studies, Global Studies, and Latino/a Studies

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**GBST 335 (F) Nowheres** (DPE)

**Cross-listings:** GBST 335 SOC 335

Secondary Cross-listing

We live in a world of nation-states. The world map, according to journalist Joshua Keating, is "itself as an institution, an exclusive club of countries" that rarely accepts new members. Throughout the course, we question how countries conquered the world and became the taken-for-granted political unit. We do so, paradoxically, by looking at contemporary nations that do not appear on the world map. These include nations without statehood, such as Somaliland; those that span countries, including indigenous nations across the US and Canada; and nations that have lost their countries, such as Palestine and South Vietnam. By interrogating "nowheres," we tease out what it means to be a country, and pinpoint when and why the definitions do not apply uniformly. Students will reflect on why the world map has been so remarkably static since the end of the Cold War. We will further probe the social, political, and human costs of the exceptions to this general rule. Students will raise questions and attempt answers to what our interconnected world means for "nowheres" looming on the horizon--nation-states that, as a result of climate change, will soon vanish.

**Requirements/Evaluation:** Thoughtful and consistent class participation, visits to Sawyer Library and WCMA, three short response papers, and a final assessment on a "nowhere" of students' choosing

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** Anthropology and Sociology majors, Global Studies concentrators

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 335 (D2) SOC 335 (D2)

**Difference, Power, and Equity Notes:** This course asks students to grapple with the asymmetries of modern statehood--why some places meet the criteria for statehood but are denied it, while others fall short of formal definitions but are still considered states. Students will assess the stakes of statehood for places that cannot achieve it or do not aspire to. They will creatively marshal these lessons to become the class expert on a "nowhere" that provides us with a lens for interrogating the world map as it currently exists.

Fall 2022

**GBST 342 (F) Democratic Erosion**

**Cross-listings:** GBST 342 PSCI 343

Secondary Cross-listing

A central tenet of political science is that once a country reaches a certain level of political and economic development, democracy will endure indefinitely. The contemporary moment calls on us to revisit this assumption. This course explores the causes and consequences of democratic erosion through the lens of comparative politics. We ask three central questions to inform our investigation: 1) What is democracy and its alternatives? 2) How do we identify democratic breakdown? and 3) What are strategies to counteract backsliding when it occurs? Importantly, this course is *not*

intended as a partisan critique of any particular American politician or political party. Rather, it is designed to provide an opportunity to engage, critically and carefully, with claims about the state of democracy in the US and elsewhere; to evaluate whether those claims are valid; and, if they are, to consider strategies for mitigating the risk of democratic erosion here and abroad. Readings draw from academic scholarship, media commentary, and current events as they unfold. We will address both empirical and normative dimensions of the issues, as well as learn about examples of democratic erosion around the world from early 20th century until today. As a collaborative class taught at dozens of other colleges, the course enables you to engage in debates about democratic erosion with students throughout the US and around the world.

**Requirements/Evaluation:** Active Class Participation, 3 Short Response Papers, Country Case Study (15-20 pages, written incrementally throughout semester) and Presentation.

**Prerequisites:** Prior coursework in political science or permission of instructor.

**Enrollment Limit:** 12

**Enrollment Preferences:** Political Science Majors, Global Studies Concentrators

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

### **GBST 344 (F)(S) Capitalism and Racism in the American Context and Beyond: A Global Approach (DPE)**

**Cross-listings:** AMST 345 GBST 344 AFR 353

#### **Secondary Cross-listing**

American Studies emerged with the idea that transdisciplinarity is crucial for comprehending the concept of America. Building on this framework, this course foregrounds transepistemology as an equally important method for understanding the dynamics of America, both locally and globally, at the level of the world-system. In addition to tracing the consubstantial genealogy of racism and capitalism, we will examine their local manifestations, mainly in Asia, Europe, Africa and America, as well as their current geopolitical, social and economic outcomes, especially the reproduction of systemic inequalities and domination. Through an interdisciplinary approach and engagement with a variety of resources from economics, anthropology, sociology, critical race theory, comparative ethnic studies and decolonial thinking, this course will address the following: i) review the different forms of economic organization of human societies throughout history (with special focus on the work of Karl Polanyi); ii) trace the epistemological origins of capitalism and investigate what makes capitalism and its crises unique; iii) trace the genealogy of the concepts of race, racism and discrimination; iv) interrogate the intersection of racism and capitalism in different traditions of thought and epistemologies in Asia, Europe, Africa, and the Americas. For example, we will read key texts from "French theory", (Deleuze, Foucault, etc.), US Black tradition, (W. E. B. Du Bois and Cedric Robison, etc.), Chinese social sciences (Li Shenming, Cheng Enfu, etc.) and African economy and anthropology (Mahdi Elmandjra, Cheikh Anta Diop, etc.) and Latin American decolonial philosophy (Quijano, Dussel, Mignolo, etc.) By doing this, we will situate the rupture that capitalism and racism introduced at the level of global history, which is the first step to conceptualizing racism and capitalism. After showing that the development of capitalism and racism are historically linked, we will proceed to examine the manifestations of their interaction at local and global levels. Locally, we will focus on the effects of racism on the labor market: discrimination in hiring, wage discrimination, segregation, duality and stratification of the labor market, etc. We will also analyze how sexism and racism play out in the labor market in racialized communities. We will also reflect on the links between racism and politics and their effects on economic policies. From a more global perspective, we will analyze the roots of the global economic crisis and the resulting geopolitical issues at the international level and the racist dynamics they generate. Overall, as we will move through readings, we will situate the United States in a cross-regional perspective that would enable us to develop critical insights concerning links and convergences between capitalism and racism.

**Requirements/Evaluation:** Requirements: An active participation is required of students in terms of engaging in the in-class debates and weekly response paper as a feedback on the lectures as well as a final paper. Evaluation: Participation 25%; Weekly Response (350-500 words) 30%; Final Research Paper (12-15 pages) 45%

**Prerequisites:** None

**Enrollment Limit:** 20

**Enrollment Preferences:** American Studies majors and seniors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 345 (D2) GBST 344 (D2) AFR 353 (D2)

**Difference, Power, and Equity Notes:** This course addresses questions of difference, power, and equity through its examination of domination, racialization, the economics of discrimination, geopolitical and epistemological inequalities at the world-system level. Students will learn how racism and capitalism produce social categories, such as race, ethnicity, and class; how they interact with issues of gender; and how they perpetuate difference, power dynamics, and inequalities across these categories.

### **GBST 345 (F) Wonderland(s): *Alice* in Translation**

**Cross-listings:** ENGL 365 COMP 345 GBST 345

#### **Secondary Cross-listing**

"What do you mean by that?" said the Caterpillar, sternly. "Explain yourself!" "I can't explain myself, I'm afraid, Sir," said Alice, "because I'm not myself, you see?" The confusion around personal identity, which Alice is seen to experience as she makes her way through Wonderland, can be examined productively as an allegory of translation. Beyond living through the developmental and socio-cultural transitions of a child, what happens to *Alice*, a seminal text in children's literature, when it travels down the rabbit hole to a new linguistic wonderland? For starters, the seven-year-old girl becomes Marie in Danish, Arihi in Maori, Ai-chan in Japanese, and Paapachchi in Kannada. Then there are the highly idiosyncratic humor, word play, embedded English nursery rhymes, and iconic illustrations by Tenniel. How do they fare in new linguistic, cultural, and even genre contexts? Lewis Carroll told his publisher in 1866: "Friends here seem to think the book is untranslatable." And yet. Over 200 translations later, including Kazakh, Shona, Papiamentu, Braille, and Emoji, *Alice* continues to delight and confound readers all over the world and to pose myriad challenges as well as opportunities for translators. This course will serve as an introduction to the theory and practice of translation using Carroll's *Alice* as an anchoring primary text. We will examine key disciplinary issues and concepts, such as equivalence, domestication, foreignization, and autonomy and challenge the old canard that translation leads ineluctably, and exclusively, to loss.

**Requirements/Evaluation:** active and substantive class participation; discussion leading; weekly translation exercises; 2-3 short writing assignments; final project

**Prerequisites:** students must have at least three years of college-level second-language instruction or the equivalent (advanced proficiency), or permission of the instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** COMP majors; language majors; language students

### **GBST 348 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference (DPE) (WS)**

**Cross-listings:** RUSS 348 GBST 348 SOC 348

#### **Secondary Cross-listing**

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in

rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the war Russia is currently waging on Ukraine, or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Bulgaria, Poland, and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

**Requirements/Evaluation:** 5-page paper every other week, written comments on the partner's paper in alternate weeks

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Anthropology, Sociology, and Russian majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

RUSS 348 (D2) GBST 348 (D2) SOC 348 (D2)

**Writing Skills Notes:** This is a tutorial course, with plenty of opportunities to work on writing and argumentation. Tutorial papers receive written feedback from both the instructor and the tutorial partner, and are workshopped during the tutorial meetings.

**Difference, Power, and Equity Notes:** Students will learn to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. We will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

### **GBST 351 (S) The New Left and Neoliberalism in Latin America (DPE)**

**Cross-listings:** PSCI 351 GBST 351

#### **Secondary Cross-listing**

Recent years have seen a resurgence of the political left in Latin America. This course seeks to understand the origins of this new left, the ideas and character of its protagonists, the neoliberal philosophy it opposes, and the arena of democratic politics it inhabits today. We first read polemics from both sides, before stepping back to consider Latin American political economy, including the twentieth-century left, from a more historical and analytical perspective. With this preparation, we then look more closely at major contemporary figures and movements in Venezuela, Bolivia, Mexico, Brazil, and other countries. After considering explanations of the rise of the left and assessments of its performance in power, we end our common readings by asking what it might mean today to be on the left in Latin America--or anywhere--both in policy and political terms.

**Class Format:** discussion then seminar

**Requirements/Evaluation:** three 3-page essays, a 1-page reflection paper, and a 12-page research proposal

**Prerequisites:** a course on Latin America and a course in Economics or permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Political Science majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

PSCI 351 (D2) GBST 351 (D2)

**Difference, Power, and Equity Notes:** The New Left in Latin America originated in efforts to remedy inequalities born of the Conquest, uneven capitalist development, and racial prejudice. Its neoliberal foes generally do not doubt the existence of these inequalities, but they question the

proposition that the state could adequately address them. This course engages, contextualizes, and deepens the debate.

### **GBST 352 (F) Politics in Mexico (DPE)**

**Cross-listings:** GBST 352 PSCI 352

#### **Secondary Cross-listing**

Geography has decreed that the futures of Mexico and the United States will be tightly bound. Yet Mexico enters this future with a very different past, a distinctive political system, important cultural differences, and mixed feelings about its neighbor to the north. This course has four parts differing in content and format. The first is historical and mostly lecture. It considers several themes, including the slow emergence of a stable national state and the interplay between politics and economic change. In the second section, following a modified tutorial format, we consider politics and cultural policies around Mexican national identity in the twentieth century, looking at films, journalism, popular music, and cultural criticism. Topics include the politics of race; rapid urbanization, especially in the valley of Mexico; and the cultural impact of the turn toward the north, after 1990, in economic policy. Then, after a few discussion classes on migration, organized crime, political corruption, the COVID-19 pandemic, and other issues facing the current government of Andrés Manuel López Obrador, we turn to a seminar-style discussion of student research projects.

**Class Format:** lectures will be recorded for viewing before class sessions; four weeks of modified tutorials in pairs or small groups online; discussion classes to include in-person and online, in distinct sections if appropriate; online seminar

**Requirements/Evaluation:** map quiz; one three-page and three two-page essays; two one-page commentaries; and a seven- to eight-page research proposal, an early version to be presented to the class in online seminar

**Prerequisites:** some knowledge of Mexican history

**Enrollment Limit:** 15

**Enrollment Preferences:** Political Science majors and seniors

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 352 (D2) PSCI 352 (D2)

**Difference, Power, and Equity Notes:** One unit of the course directly engages the tension between racial and cultural diversity, on one side, and national identity in 20th century Mexico. Another critically analyzes the reception in Mexican national discourse of the experiences of discrimination suffered by migrants in the USA.

### **GBST 358 (F) Religion and Law (DPE)**

**Cross-listings:** GBST 358 REL 358

#### **Secondary Cross-listing**

This course explores the concept of "law" through an investigation of the complex relationship between law, ethics, and religion. In doing so, we will look at legal theoretical texts as well as legal anthropological studies to pose critical questions about the nature of law, the functioning logic of law, the relationship between law and lived experience, and the legal construction of categories and facts. In the course, we will consider two intersections of religion and law: the particularities of religious legal traditions and the relationship between religion and secular law. Topics will include the secular legal construction of religion, the relationship between law and ethics, the nature of legal hermeneutics, and the racial, gender, and sexual politics of legal interpretation.

**Requirements/Evaluation:** reading response, two essays, final research paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Religion majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 358 (D2) REL 358 (D2)

**Difference, Power, and Equity Notes:** Law is seen as both a repressive and liberatory force. In taking a critical approach to the nature of law and legal interpretation, this course prepares students to think about the language of "rule of law," "order," and "justice" as a complex relationship between law and power.

**GBST 365 (F) Race and Psychoanalysis: Slavery and the Psyche (DPE)**

**Cross-listings:** ENGL 320 AFR 365 GBST 365 AMST 365

**Secondary Cross-listing**

This course explores slavery and the psyche through a constellation of Black diasporic literary, visual, and theoretical texts from the US, Caribbean, and Africa. Unwieldy and generative, the opacity of race within the field (and practice) of psychoanalysis shares a fraught intimacy with the co-constitutive terrains of violence and race that form the unconscious. Querying what escapes the hermeneutics of psychoanalysis and aesthetics in the fantasies race engenders, we will examine modernity's articulation of racialization through conceptualizations--both fantasmatic and real--of self, world, knowledge, and possibility. Course texts may include: Edwidge Danticat's *The Farming of Bones*, Adrienne Kennedy's *Funnyhouse of a Negro*, Bessie Head's *A Question of Power*, Arthur Jafa's *APEX and Love is the Message and the Message is Death*, Conceição Evaristo's *Ponciá Vicêncio*, Lars von Trier's *Manderlay*, Charles Burnett's *Killer of Sheep*, Derek Walcott's "Laventille"; and, selections from Sigmund Freud, Jacques Lacan, David Marriott, Kathleen Pogue White, Franz Fanon, Hortense Spillers, Nathan Gorelick, Jaqueline Rose, Jared Sexton, Melanie Klein, Jacques-Alain Miller, Melanie Suchet, and Jean Laplanche. Note: This course will reflect the Continental tradition in philosophy. Student should be familiar with the basic interventions of psychoanalysis.

**Requirements/Evaluation:** Weekly discussion posts and questions, 2 Papers, 10-12 pages, Research presentation

**Prerequisites:** One Writing Skills or writing intensive course; one intro course in one of following: American Studies, Africana Studies, Comparative Literature, English, Global Studies, Philosophy, Psychology, Women, Gender, and Sexuality Studies

**Enrollment Limit:** 15

**Enrollment Preferences:** Juniors or Seniors with majors or concentrations in any of the areas: American Studies, Africana Studies, Comparative Literature, English, Global Studies, Philosophy, Psychology, and Women's, Gender, and Sexuality Studies

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENGL 320 (D2) AFR 365 (D2) GBST 365 (D2) AMST 365 (D2)

**Difference, Power, and Equity Notes:** This course examines racialization as it relates to the racial violence of slavery on the psyche. Racialization as a process will be connected to concepts of self, world, and knowledge. Black diasporic literary, visual, and theoretical texts from the US, Caribbean, and Africa will be at the forefront of the course.

**GBST 366 (S) #OutofHaiti: Haiti, Black Sovereignty and the Global Political Economy**

**Cross-listings:** GBST 366 AFR 366

### Secondary Cross-listing

In the Western hemisphere, Haiti (Ayiti kreyòl) is a symbol of many extremes related to revolution, impoverishment, governance and institutional sabotage, Black liberation, artistic and cultural achievement, and underdevelopment. This course places Haiti at the center of broad global political economic transformations. Starting from the Haitian Revolution and its reverberations throughout colonial empires to the present, this course will critically interrogate these superlatives and depictions of Haiti. Recent media portrayals of a 'Haitian migrant crisis' at the United States border defy empirical facts, and whitewash imperial misadventures and harm, further exposing a narrative of Haitian anti-blackness that has been pervasive throughout US history. We will unpick these imageries and material realities to consider broader perspectives within historical and contemporary significance of struggles for Black sovereignty and liberation. Taking economic and political history as data sources, documentary films and recent academic, artistic and popular works as starting points for discussion, the course will stir debate and a broader appreciation of the political contributions of civic movements and figures within Haiti and the Haitian diaspora. From the perspective of 'connected Blackness', the course explores how Black peoples' links through global struggles for liberation and freedom and against imperialism emerge today.

**Requirements/Evaluation:** Journal entries (250 words each); individual essay on documentary film or media (10 pages); research report on a major contemporary social/economic/environmental issue in Haiti (10 pages); "Haiti Black Liberation Space" group public education project on the contemporary importance of Haiti to global Black liberation/ racial justice and a summative reflection on a meaningful aspect of this project (5 pages); class participation (discussion and readings)

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** If over-enrolled, preference to AFR and Global Studies concentrators

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

### GBST 367 (S) Decolonizing International Relations (DPE)

**Cross-listings:** GBST 367 PSCI 367

### Secondary Cross-listing

The Oxford English Dictionary defines Decolonization as "the withdrawal from its colonies of a colonial power; the acquisition of political or economic independence by such colonies." The emergence of an international system of sovereign states--the core foundation of international relations--presumes the process of dismantling systems of domination, extraction, and exclusion ended long ago. However, there is increasing recognition that International Relations in all forms, including theory, research, and policy, continue to be structured by traditional paradigms of power (e.g. white, male, elite). This course begins with the premise that knowledge is embedded within, and often reproduces, power hierarchies. Thus, this class is organized as a collaborative investigation with the aims of: 1) examining how whiteness and other historically dominant perspectives shape International Relations theory and research areas; 2) expanding and improving our understanding of International Relations through different lenses (e.g. race, class, gender, disability, indigenous, queer, subaltern); and 3) exploring the implications of a more inclusive approach to International Relations, both within the classroom as well as contemporary decolonization movements in the US and around the world.

**Requirements/Evaluation:** Participation, 3 response/reflection papers, annotated bibliography

**Prerequisites:** One prior course in International Relations or permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Juniors and Seniors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 367 (D2) PSCI 367 (D2)

**Difference, Power, and Equity Notes:** This class encourages students to recognize the power dynamics inherent within, and reproduced by, the study of International Relations as structured by traditionally dominant paradigms. This class provides students with the tools to critically identify, decenter, and deconstruct dominant lenses as well as the opportunity to engage with, and apply, an inclusive approach centering a more expansive range of theoretical perspectives and knowledge production.

Not offered current academic year

**GBST 369 (S) Indigenous Narratives: From the Fourth World to the Global South (DPE) (WS)**

**Cross-listings:** HIST 306 GBST 369 COMP 369 ARAB 369

**Secondary Cross-listing**

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Amazigh poetics in the Maghreb, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? What is the connection between the recent "boom" of English translations of Indigenous texts and neoliberalism, multiculturalism and neo-colonialism? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

**Requirements/Evaluation:** active class participation, several short response assignments (3-4 pages), two film reviews ( 1 page ), a performance project, and a final paper (7- to 10-pages)

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Comparative Literature majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 306 (D2) GBST 369 (D2) COMP 369 (D1) ARAB 369 (D1)

**Writing Skills Notes:** This course will enable students to write weekly while engaging with various forms of writing skills: articulating arguments in short response papers (3-4 pages each), developing visual criticism through writing two film reviews, (1 page each), journaling through writing a personal reflections on a performance project, and honing research language in producing a final paper of 7-10 pages. Instructor's feedback and peer review sessions will include review of drafts and argumentative structures.

**Difference, Power, and Equity Notes:** At the heart of this course is the history of global Indigenous struggle for liberation and decolonization. The various novels, short stories, poems, films and other texts that students will engage with narrate histories of colonial dispossession, racial oppression, economic subjugation and dehumanization of minoritized Indigenous communities in the Americas, North Africa and the Middle East.

**GBST 370 (S) Archives of Global Solidarity: Records of Collective Memory of Emancipation (DPE) (WS)**

**Cross-listings:** ARAB 370 GBST 370 COMP 370

**Secondary Cross-listing**

Departing from the Arabic notions of *takaful* and *taddamun* as interlinked expressions of social and political solidarity, this course seeks to investigate the textual and visual cultural production of solidarity in the Arabic-speaking world. While both terms have informed the shaping of modern Arab politics in the mid 20th century--from the birth of the socialist state to the rise of pan-Arabism--their instrumentalization as key principles of internationalism, Third Worldism, trans-nationalism, and global camaraderie since the 1990s is parallel to the emergence of social movements and popular resistance across the Middle East, North Africa and beyond. What is the meaning of solidarity and how it mobilized collective emancipation is the guiding question of this course. To interrogate this question we will read novels, poems, memoirs, labor unions and feminist manifestos, and essays that feature multidirectional solidarity and alliance building across borders of East-East and South-South. We will also examine visual and digital archives that documents particular historical moments that marked a turning point of global solidarity, such as the Spanish Civil War, the Cuban Revolution, the Algerian War, the Prague Spring, the Palestinian Intifada, the Zapatista Uprising, and most recently, the Arab Uprisings. As we approach these historical moments through a variety of texts and genres, we will identify encounters between activists and writers who established cross-regional movements and the cultural exchange between artistic collaborations.

**Requirements/Evaluation:** Students will write five responses to partner's papers (2 pages long); two 5-7 pages paper discussing aspects of the readings; one 10-minute oral presentation of a reflection on digital solidarity, and a final poster project on archiving global solidarity.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** This tutorial will be aimed at first year and second year students interested in majoring in Arabic Studies, and/or concentrating in Comparative Literature and Global Studies.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ARAB 370 (D1) GBST 370 (D2) COMP 370 (D1)

**Writing Skills Notes:** Students will engage a variety of writing forms, including weekly response papers to their tutorial partner, a research final paper, an outline for an oral presentation, a reflection on digital media and a design of a poster. Throughout this process, they will receive oral and written feedback and work with revisions. The interdisciplinary material that will be covered in the tutorial will also require the production of distinct formats of writings and research skills.

**Difference, Power, and Equity Notes:** South-South and East-East encounters during the 1960s in the writings of contemporary Arab writers and activists resisting dictatorship and police states is the core of this tutorial. Students will gain a deeper understanding of DPE through a close examination of the triangulation of colonial boundaries, postcolonial states, and imperialist domination that shape the context of global solidarity in the Arab world and beyond.

**GBST 391 (S) When India was the World: Trade, Travel and History in the Indian Ocean** (DPE) (WS)

**Cross-listings:** GBST 391 ASST 391 ASIA 391 HIST 391

Secondary Cross-listing

What do Ibrahim Ben Yiju, a Jewish merchant from 11th century Yemen, Ibn Batutah, a Muslim scholar from 15th century Morocco and Captain Kidd, a 17th century English pirate have in common? All three men travelled and lived in the Indian Ocean region! This course explores the history of one of the world's oldest maritime highways that has connected the diverse cultures of Asia, Africa and Europe for millennia, thus making it a vital element in the birth of globalization. Moving away from conventional land-centric histories, we will focus instead on understanding the human past through oceanic interactions. South Asian ports and port cities remained the fulcrum of the Indian Ocean world throughout its history; traders, travellers, nobles, scholars, pilgrims and pirates from all over the world travelled to the Indian coast in search of adventure, spices, knowledge and wealth. Thus we will primarily focus on India's role in the Indian Ocean roughly from the rise of Islam in the seventh century CE through the expansion of various European communities in the region and the subsequent rise of the global economy and colonialism in the nineteenth century. Rather than following a strict temporal chronology we will concentrate on themes such as travel and adventure; trade and exchange; trust and friendship; religion and society; pilgrimage; piracy; the culture of port cities; and food across time.

**Requirements/Evaluation:** class participation and weekly responses to readings, 4 short papers (4-5 pages), an oral presentation and final research (10 pages) paper based on any one of the 4 papers written during the course.

**Prerequisites:** none; open to all

**Enrollment Limit:** 15

**Enrollment Preferences:** history majors and students with demonstrable interest in maritime/Indian Ocean history

**Expected Class Size:** 10-12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 391 (D2) ASST 391 (D2) ASIA 391 (D2) HIST 391 (D2)

**Writing Skills Notes:** Students will write 4 short papers (4-5 pages) each and receive detailed feedback from the instructor. One of the four papers will become the basis of a final research paper (10-12 pages) on which each student will work closely with the instructor and receive feedback on improving research and writing skills.

**Difference, Power, and Equity Notes:** This course questions the conventional view that global interconnectedness was the result of Europe's discovery of 'new worlds'. Instead, it centers non-European actors in facilitating global networks before colonialism. Throughout, students will critically engage questions of how Asian and African players forged and shaped global connections across the Indian Ocean arena and examine the ways in which these contributions have been overshadowed in traditional historiography.

### **GBST 395 (F) Black Reparations Within/Beyond Borders (DPE)**

**Cross-listings:** AFR 395 WGSS 395 ENVI 395 GBST 395

#### **Secondary Cross-listing**

Generations of Black people around the world have demanded restitution for the harms and legacies of enslavement, indigenous genocide and colonialism in order to advance social justice, new ways of living and freedom. In this way, freedom fighters, Black Power leaders, abolitionist movements, Pan-Africanists, maroons, Rastafarians, Black politicians, climate justice leaders, and revolutionary anti-capitalists have all put forward ideas on and approaches to reparations and reparatory justice. This course will analyze *'geographies of Black struggle'*, the differences and commonalities among these approaches, the political strategies and movements, including responses to global climate change and socio-environmental disasters that advance reparations as a just remedy *within* and *beyond* borders. We give particular attention to Pan-Africanist and Black feminist perspectives, as well as liberal and popular struggles for reparations within the African diaspora across space and time. Do Pan-Africanism and Black feminism offer new visions for reparations movements in the 21st century? Employing speeches, writings, audio-visual content and documentary film from and about these earlier and emerging movements and their leaders, we will draw long lines between historical circumstances and drivers, and examine Black (un)freedoms within the context of calls for reparation today.

**Requirements/Evaluation:** Attendance and Participation including serving as a class discussion leader (20%); Written double-spaced essay about and the legacies and role that Pan-Africanism or Black Feminist perspectives play in contemporary global reparations movement (8 pages plus bibliography) (25%); Research and creatively present using written text, flyer, video, audio-visuals or poster a profile of Pan-African feminist leader focusing on her ideas, movement activities, and role in the reparations movement including innovative ideas (max. 5 pages or 10 minutes) (25%); Final project: simulation activity of a Pan-African Congress on Reparations (30%)

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** If over-enrollment, preference to AFR, GBST and HIST students

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Cross-listings:** REL 412 LEAD 412 ASIA 412 ASST 412 GBST 412 HIST 496 LEAD 322

**Secondary Cross-listing**

This course studies the life, work, and ideas of M.K. Gandhi (1869-1948), one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. This tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the context and nature of Gandhian nationalism? Did it help to integrate the Indian nation? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

**Requirements/Evaluation:** 5-7-page essays or 2-page critique due each week and a final report (3-4 pages) at the end of the semester.

**Prerequisites:** None, except students who have taken HIST488T will not be permitted to take this class.

**Enrollment Limit:** 10

**Enrollment Preferences:** Senior history majors and students who have previously taken HIST221. Students who have previously taken HIST488T will not be permitted to take this class.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Cross-listings:** ARAB 413 GBST 413 HIST 413 ENVI 413

**Secondary Cross-listing**

What have been the most consequential ideas of the last 100 years? This course will explore some of the more audacious and ambitious plans to alter natural and urban environments in the late 19th century to the early part of the 21st, specifically those that sought to improve the human condition through science, engineering, and technology. By building big bold things, politicians around the globe sought to bring prosperity to their nation and embark on a path of modernity and independence. Through an intellectual, political and environmental history of major construction projects such as the building of the Suez Canal and the Aswan Dam, extensive river valley developments in Iran, Turkey and Iraq, and utopian and futuristic city planning in western Asia, students will consider how, with the benefit of hindsight, to best evaluate the feasibility of such bold schemes. Who has benefitted and who has not, what have been some of the unanticipated consequences, what was sacrificed or neglected, and what do these projects tell us about the larger processes of global capitalism, decolonization, and climate change?

**Requirements/Evaluation:** A presentation, shorter writing assignments and a longer research paper (20-25 pages) in the end. Students will submit shorter drafts of final paper in order to receive constructive feedback prior to final submission.

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** Seniors, especially History, Arabic and Environmental Studies majors.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ARAB 413 (D2) GBST 413 (D2) HIST 413 (D2) ENVI 413 (D2)

**Writing Skills Notes:** A 20-25 page research paper will be required at the end of the semester. Prior to getting to that point, students will submit an annotated bibliography, a two page proposal, a five and eventually a 10 page draft. Each draft will receive extensive comments and suggestions from peers and instructor. In this way, the student will think about the process of writing and the best way to set themselves up for success.

**Difference, Power, and Equity Notes:** This course examines how a number of different nations in Africa and Asia sought to improve the living conditions of the masses through major construction project. Though ostensibly these schemes were supposed to improve the livelihood of all, often they primarily benefitted the few - the urban elite - and not the general population. This course will therefore explore how certain class, gender and racial lines were solidified and maintained through economic development plans.

**GBST 420 (F) Architecture and Sustainability in a Global World (WS)**

**Cross-listings:** ARTH 420 GBST 420 ENVI 420

**Secondary Cross-listing**

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations

of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

**Requirements/Evaluation:** weekly reading discussion question posts on GLOW, leading class discussions, and a final project/paper (15-20 pages) with presentation

**Prerequisites:** none, although a course in art/architectural history or environmental studies would be advantageous

**Enrollment Limit:** 12

**Enrollment Preferences:** Art History majors, Environmental Studies majors, History and Studio majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

Not offered current academic year

**GBST 480 (F) Media and Society in Africa** (DPE) (WS)

**Cross-listings:** HIST 480 GBST 480 AFR 381

Secondary Cross-listing

The Media have long played important roles in African societies. As early as the second half of the 19th century, African intellectuals were using print technology to address the people. As radio technology was in its infancy during the first half of the twentieth century, Africans were gathering around re-diffusion stations and later around single receivers to listen to news and entertainment programming. In this tutorial, we will examine these histories of media and media technologies on the continent. Ultimately, we will explore the roles that media played in serving particular community needs and how communities also adapted new media technologies to fit local conditions. Media content has historically been determined based on standards beyond viewers', readers' and listeners' control. We will examine the influences that editors and political leaders on the continent have exerted on content as well as what forces they responded to. We will also further explore the media's role in major events on the continent, from governmental changes to the ending of apartheid in South Africa and the role that media have played in areas of conflict.

**Requirements/Evaluation:** Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

**Prerequisites:** This course open to all students

**Enrollment Limit:** 10

**Enrollment Preferences:** Preference will be given to history majors and students with prior experience with African history. If the course is over-enrolled, students may be asked to complete a questionnaire to determine enrollment

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 480 (D2) GBST 480 (D2) AFR 381 (D2)

**Writing Skills Notes:** Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular feedback and critiques- both oral and written - from the professor, as well as oral critiques from tutorial partners.

**Difference, Power, and Equity Notes:** Modern media developed in Africa as means of control and cultivating dutiful colonial subjects. However, media then emerged as sites of contestation and even tools with which colonial subjects challenged colonial rule. They have continued to be revealing sites for issues of gender, race, class, and ethnicity. As such, this course immensely explores diversity, power and equity and how these all-important societal concerns are expressed through the media in Africa.

- Sarah E. Olsen, Assistant Professor of Classics
- Amanda R. Wilcox, Chair and Professor of Classics

The course offerings in Classics enable students to explore the ancient Greek, Roman, and Mediterranean worlds from various perspectives, including literature, history, art, archaeology, philosophy, and religion. Courses are of two types: language (Greek and Latin) and courses in which all the readings are in English translation (Classical Studies). The 100-level language courses are intensive introductions to Greek and Latin grammar and reading skills; the 200-level language courses combine grammar review with primary readings from Greek or Latin texts of key historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Classical Studies courses offer introductions to and more specialized study of the literature, visual and material culture, history, and other aspects of the Greek and Roman worlds.

### MAJOR

Majors and prospective majors are encouraged to consult with the department's faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course in ancient history is strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for advanced study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Route A emphasizes more coursework in Greek and Latin, while Route B emphasizes more Classical Studies courses.

**Route A:** (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language. (2) Three additional courses from the offerings in Greek, Latin, or Classical Studies or from approved courses in other departments and programs.

**Route B:** (1) One course each from any two of the following categories: literature (CLAS 101 or CLAS 102); visual and material culture (CLAS 209 or CLAS 210); history (CLAS 222 or CLAS 223). (2) Four courses in Greek or Latin with at least one at the 400-level, or the four-course sequence CLLA 101, 102, 201, and 302. (3) Three additional courses from the offerings in Classical Studies or from approved courses in other departments and programs.

**Classics Colloquium:** All Classics majors in residence are expected to participate fully in the life of the department through attendance at lectures and other departmental events.

### THE DEGREE WITH HONORS IN CLASSICS

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

### COURSE NUMBERING SYSTEM

**Language Courses:** The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of Greek and Latin literature. Students may enter the rotation at 100-level, 200-level, or 300-level, depending on previous experience.

**Classical Studies Courses:** The numbering of these courses does not reflect a strict sequence, and most of them do not assume prior experience in Classics or a cross-listed field. The following pairs of courses offer excellent introductions to key areas of study within Classics: CLAS 101 and 102 (literature), CLAS 209, 210 (visual and material culture), CLAS 222, 223 (history).

## STUDY AWAY

We strongly encourage Classics majors to study away in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Mediterranean world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department's faculty are always available to advise students, the chair has materials to share, and students can visit the department's website for information and links to helpful sites. Majors who are considering studying away should especially consult with faculty members about the implications for language study.

## FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

### **Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in some cases, if appropriate course information is available in advance (e.g., syllabi and/or course descriptions), though students should be sure to contact the department.

### **What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Complete syllabus and course description, including readings/assignments.

### **Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

No.

### **Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

No.

### **Are there specific major requirements that cannot be fulfilled while on study away?**

No.

### **Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

No, but students should consult with the department about language sequences.

### **Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:**

None to date.

## CLGR 101 (F) Introduction to Greek

This full-year, intensive course presents the fundamentals of ancient Greek grammar, syntax, and vocabulary. While finishing the formal study of the language in the second semester, students begin reading prose and poetry of the classical period, usually works by Xenophon and Euripides.

**Requirements/Evaluation:** frequent quizzes, tests, and a final exam

**Prerequisites:** none; designed for students who are beginning Greek or have studied less than two years of Greek in secondary school; students with some previous experience in Greek may want to enroll in CLGR 102 only (consult the department)

**Enrollment Limit:** 15

**Enrollment Preferences:** Classics majors or intended Classics majors, first years and sophomores

**Expected Class Size:** 8-10

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** credit granted only if both semesters (CLGR 101 and 102) are taken

**Distributions:** (D1)

Fall 2022

LEC Section: 01 MWF 11:00 am - 12:15 pm Kerry A. Christensen

**CLGR 102 (S) Introduction to Greek**

This full-year, intensive course presents the fundamentals of Greek grammar, syntax, and vocabulary and introduces students, in the second semester, to works of the classical period (usually Xenophon and Euripides).

**Requirements/Evaluation:** frequent quizzes, tests, and a final exam

**Prerequisites:** CLGR 101 or permission of department

**Enrollment Limit:** 15

**Enrollment Preferences:** Classics majors or intended Classics majors, first years and sophomores

**Expected Class Size:** 8-10

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** credit granted only if both semesters (CLGR 101 and 102) are taken

**Distributions:** (D1)

Spring 2023

LEC Section: 01 TR 11:20 am - 12:35 pm Kerry A. Christensen

**CLGR 201 (F) Intermediate Greek**

This course will be based on readings from Plato's *Ion* and Hesiod's *Theogony* in their original Greek. These texts will give you a taste of both Classical prose and Archaic poetry and enable you to improve your ability to read, comprehend, and translate ancient Greek literature. Plato and Hesiod also offer important and influential perspectives on the origins, effects, and value of poetry, and we will use their work as a starting point for asking ourselves questions like: what is poetry? Where does it come from? What is it good for? Students who successfully complete this course will be well-prepared for advanced study of Greek language and literature.

**Requirements/Evaluation:** Evaluation will be based on classroom participation, quizzes and exams, and take-home assignments (including, e.g., essays and brief prose composition tasks).

**Prerequisites:** CLGR 101-102 or two years of Greek in secondary school

**Enrollment Limit:** 12

**Enrollment Preferences:** Classics majors and intended Classics majors

**Expected Class Size:** 5-10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Fall 2022

SEM Section: 01 MR 1:10 pm - 2:25 pm Sarah E. Olsen

**CLGR 401 (S) Homer: The Iliad**

From the early archaic era through the classical and beyond, Homer's *Iliad* and *Odyssey* remained foundational in Greek discourse about community, leadership, war, heroism, family, friendship, loyalty, the gods, justice, and much more. Nearly all of subsequent Greek literature, both poetry and prose, developed out of a dialogue with these epics. In this course, we will read extensive selections from the *Iliad* in Greek and the entire epic in translation.

**Requirements/Evaluation:** class participation, short written exercises and/or oral reports, midterm and final exams, and a final paper

**Prerequisites:** CLGR 201 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** majors in Classics, Comparative Literature, English and other literatures

**Expected Class Size:** 5-6

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

### **CLGR 402 (S) Homer: The Odyssey**

From the early archaic era through the classical and beyond, Homer's *Iliad* and *Odyssey* remained foundational in Greek discourse about community, leadership, war, heroism, family, friendship, loyalty, the gods, justice, and much more. Nearly all of subsequent Greek literature, both poetry and prose, developed out of a dialogue with these epics. In this course, we will read extensive selections from the *Odyssey* in Greek and the entire epic in translation.

**Requirements/Evaluation:** class participation, short written assignments and/or oral reports, a midterm and final exams, and a final paper

**Prerequisites:** CLGR 201 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** majors in Classics, Comparative Literature, English and other literatures

**Expected Class Size:** 5-6

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

### **CLGR 404 (S) Tragedy**

This course will focus on reading, in Greek, a complete tragedy by Sophocles or Euripides. It will thus improve your ability to read and analyze Greek poetry in a variety of styles and meters. While focusing on questions of particular importance for the play we are reading in Greek, we will also situate that play in a larger context by exploring, for instance: aspects of the social and political situations in and for which fifth-century tragedies were first produced; the several performance genres out of which tragedy was created; developments in the physical characteristics of the theater and in elements of staging and performance; problems of representation particularly relevant to theatrical production and performance.

**Requirements/Evaluation:** contributions to class, exams, and a final paper

**Prerequisites:** CLGR 201 or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Classics majors, students continuing the Greek sequence

**Expected Class Size:** 13

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Spring 2023

SEM Section: 01 TF 2:35 pm - 3:50 pm Sarah E. Olsen

### **CLGR 405 (F) Greek Lyric Poetry**

This course will explore the development of Greek lyric poetry from the eighth to the fifth centuries BCE. Beginning with Archilochus, Sappho, and Alcaeus, and proceeding through such poets as Solon, Anacreon, Ibycus, and Theognis, we will examine the formal, social, and performative contexts of lyric, the influence of epic and choral poetry on the evolution of the genre, and the difficulties of evaluating a fragmentary corpus. Finally, we will explore the influence of political and economic changes in the early fifth century on the work of Simonides. The goal throughout is to investigate the structures, innovations, and problems of poetic self-expression in early Greek poetry.

**Requirements/Evaluation:** class participation, a midterm exam, a final paper, and a final exam

**Prerequisites:** CLGR 201 or permission of instructor

**Enrollment Limit:** 12

**Expected Class Size:** 5

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

### **CLGR 409 (F) Plato**

Plato's writing has exercised an incalculable influence on the development of subsequent philosophy and literature, but his dialogues are equally compelling when they are read independently of the works they have inspired. In this course we will read substantial selections from one or more of the so-called middle dialogues (*Symposium*, *Phaedo*, *Republic*, *Phaedrus*), in which a variety of speakers, including Socrates, ask and provisionally answer questions such as what are love, beauty, and justice, and how does the human soul in possession of these goods participate in the divine?

**Class Format:** For the fall of 2020, this course will be taught online. The seminar will meet at the regularly scheduled time twice a week or at a mutually agreed-on time that does not conflict with other course work.

**Requirements/Evaluation:** evaluation will be based on class participation, several short written assignments, a midterm and final exam, and a longer final paper

**Prerequisites:** CLGR 201 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** if oversubscribed, preference given to majors in Classics, Philosophy, Comparative Literature, English or another literature

**Expected Class Size:** 5-6

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

### **CLGR 412 (F) Herodotus**

This course will focus on the reading in Greek of Herodotus' Histories, his multivalent and deeply human account of how and why several hundred years of contact and conflict between the Greek city-states and non-Greek peoples to the east culminated in the Persian invasion of Greece. We will explore the ways in which his rich narrative style and intellectual landscape reflect the influence of Greek and near-eastern oral traditions, Ionian philosophical thought, Greek tragedy, and contemporary Athenian rhetoric and philosophy. We will also study his use of anthropological methods, ethnography, and geography in explaining human events. Among the many themes that permeate his work, we will pay special attention to the working of divine versus human justice, the mutability of human affairs, the nature of authority, the role of family, and the quest for wisdom.

**Requirements/Evaluation:** class participation, two short written assignments, a midterm exam, a final paper, and a final exam

**Prerequisites:** CLGR 201 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Classics majors

**Expected Class Size:** 8

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Fall 2022

SEM Section: 01 MR 1:10 pm - 2:25 pm Kerry A. Christensen

### **CLGR 414 (F) Thucydides**

This course will focus on Thucydides' powerful history of the Peloponnesian War. It is a rich text with much to say about human nature, human motivation, power, morality, the fragility of civilized life, the nature of democracy, leadership, causality in human affairs, and the impact on the Greek city-states of thirty years of nearly continuous war.

**Requirements/Evaluation:** class preparation and participation, a midterm exam, a final paper, and a final translation exam

**Prerequisites:** CLGR 201 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Classics majors

**Expected Class Size:** 6

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

**Winter Study** -----

**CLGR 99 (W) Independent Study: Greek**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

Winter 2023

## HISTORY (Div II)

Chair: Professor Roger Kittleson

- Magnús T. Bernhardtsson, Brown Professor of History and Faculty Affiliate in Arabic Studies, Leadership Studies and Religion, Chair of Global Studies; affiliated with: History, Global Studies, Religion, Leadership Studies
- Alexander Bevilacqua, Assistant Professor of History
- Jessica Chapman, Professor of History
- Christine DeLucia, Associate Professor of History
- Sara Dubow, Associate Dean of the Faculty, Professor of History; affiliated with: Dean of the Faculty's Office, History
- Alexandra Garbarini, Charles R. Keller Professor of History; on leave 2022-2023
- Aparna Kapadia, Associate Professor of History
- Charlotte A. Kiechel, Visiting Assistant Professor of History
- Roger A. Kittleson, Chair and Professor of History; affiliated with: History, Latina/o Studies
- Thomas A. Kohut, Sue and Edgar Wachenheim III Professor of History; on leave 2022-2023
- Gretchen Long, Dean of the College, Frederick Rudolph '42 - Class of 1965 Professor of American Culture; affiliated with: Dean's Office, History
- Maud Mandel, President, Professor of History; affiliated with: President's Office, History
- Laura J. Martin, Assistant Professor of Environmental Studies and Faculty Affiliate in History; affiliated with: Center for Environmental Studies, History
- Karen R. Merrill, Professor of History
- Joel S. Pattison, Assistant Professor of History
- Anne Reinhardt, Professor of History and Chair of Asian Studies Program; affiliated with: History, Asian Studies Program
- Viktor Shmagin, Visiting Assistant Professor of History
- Eiko Maruko Siniawer, Provost, Class of 1955 Memorial Professor of History; affiliated with: Provost's Office, History, Asian Studies Program
- Tyran K. Steward, Assistant Professor of History
- Benjamin Twagira, Assistant Professor of History
- Chris Waters, Hans W. Gatzke '38 Professor of Modern European History
- Carmen T. Whalen, Chair of Latina/o Studies Program, Carl W. Vogt '58 Professor of History; affiliated with: Latina/o Studies, History
- Sofia E. Zepeda, Assistant Professor at Williams-Mystic; affiliated with: Williams-Mystic Program, History

### GENERAL STATEMENT OF GOALS

The History department seeks to cultivate a critical understanding and awareness of the past and the development of our students' intellectual, analytical, and rhetorical abilities. In pursuit of the first objective, through its curricular offerings the department seeks both to expose students to the richness, diversity, and complexities of human history over long periods of time and in different geographic regions and to provide students with the opportunity to explore aspects of the past in depth. At the same time, the department endeavors to develop students' ability to think historically and to foster in them an appreciation of the contested nature and the value of historical knowledge by confronting them with the variety of ways in which historians have approached and interpreted the past, engaging them in issues that provoke historical debate, and familiarizing them with the nature and uses of historical evidence. By engaging students in the critical study of the past, finally, the department seeks to develop their ability to formulate historically informed analyses and their analytical and rhetorical skills.

### COURSE NUMBERS

The course numbering system used by the History Department reflects the different types and objectives of courses offered at each level. The different course levels are distinguished less by degree of difficulty than by the purposes that the courses at each level are intended to serve and the background knowledge they presume.

**First-Year Seminars and Tutorials (102-199):** These writing-intensive courses give students an opportunity to explore an exciting historical topic in-depth, learn about the discipline of history, and improve their research and writing skills. Because these courses emphasize the acquisition of skills required for the advanced study of History, they are ideal for students contemplating a major in History.

Each 100-level seminar is normally limited to nineteen students and focuses both on training in research skills (such as using the library, navigating on-line resources, formulating a research question and developing a research agenda, and learning how to use different types of evidence) and on the acquisition of reading skills (such as how to interpret different kinds of historical writing and the arguments historians make). These seminars especially emphasize the importance of writing and include varied assignments that stress the mechanics of writing and revision and focus on issues of argumentation, documentation, and style. Enrollment preference in 100-level seminars is normally given to first-year students and then to sophomores.

Each 100-level tutorial stresses the importance of interpreting historical evidence and evaluating the arguments made by historians and likewise fulfills the writing-intensive requirement. Enrollment in these courses is limited to ten students, each of whom is expected to write five or six interpretive essays and present five or six oral critiques of another student's work. First-year students and sophomores will normally be given equal enrollment preference in 100-level tutorials.

First-year seminars and tutorials can be counted toward the History major and used to meet the department's group and concentration requirements.

**Introductory Survey Courses (202-299):** These courses are open to all students and are intended to provide a basic understanding of the history of peoples, countries, and geographic regions over relatively long time-spans. Most of all, they will provide students with the background necessary for more advanced study in history at the 300 and 400 level. They are offered in either small or large formats, depending on the individual course.

**Major Seminars (301):** Major seminars explore the nature and practice of history, are required for the degree in History, and are normally restricted to junior History majors. Although these seminars vary in topic and approach, each focuses on the discipline of history itself—on the debates over how to approach the past, on questions of the status of different kinds of evidence and how to use it, on the purpose of the study of history. Focusing on questions of methodology, epistemology, and historiography, these courses ask: What kind of knowledge do historians claim to produce? What does it mean to study the past? How do historians approach the project of studying the past? Each year several major seminars will be offered. Students who plan to study abroad during their junior year may take their major seminar in the spring semester of their sophomore year (space permitting), and those planning to be away for the whole of their junior year are encouraged to do so.

**Advanced Electives (302-396):** These advanced, topical courses are more specialized in focus than are the introductory survey courses (202-299) and are intended to follow such courses. Enrollment is often limited. Because these courses may presume some background knowledge, the instructor may recommend that students enroll in an appropriate introductory course before registering for an advanced elective.

**Advanced Seminars (402-479):** These are advanced courses normally limited in enrollment to fifteen students. Each seminar will investigate a topic in depth and will require students to engage in research that leads to a substantial piece of historical writing. All History majors are required to complete either an advanced seminar (402-479) or a tutorial (480-492). Instructors may recommend prior coursework in the area of the seminar. Preference is given to senior History majors, followed by junior History majors.

**Advanced Tutorials (480-492, 495):** These are advanced reading and writing courses that offer an in-depth analysis of a topic in tutorial format. Tutorials are limited in enrollment to ten students and preference is given to senior History majors. All History majors are required to complete either an advanced seminar (402-479) or a tutorial (480-492). Instructors may recommend prior coursework in the area of the tutorial. The writing of five or six essays and the oral presentation of five or six critiques of another student's essays are central to tutorials.

Within each of these levels, courses are further divided by geographical area:

Africa and the Middle East: 102-111, 202-211, 302-311, 402-411

Asia: 112-121, 212-221, 312-321, 412-421

Europe and Russia: 122-141, 222-241, 322-341, 422-441

Latin America and the Caribbean: 142-151, 242-251, 342-351, 442-451

United States: 152-191, 252-291, 352-387, 452-471

Transnational/Comparative: 192-199, 292-299, 388-396, 472-479

## ADVISING

Both majors and non-majors are encouraged to talk at any time with the department chair, the department administrative assistant, or any other member of the department about the History major.

All incoming majors will choose a faculty advisor in the spring of their sophomore year. All majors must meet with their advisor in the beginning of

the fall semester, to develop their Concentration (see below), and at the time of the spring semester registration period in order to have their courses and plans for the History major approved. Students who are interested in the senior thesis program or graduate school should contact the faculty director of the Thesis Program. Prospective study abroad students should contact the department's administrative assistant.

## **THE MAJOR**

### **The major consists of at least nine semester courses as follows:**

Required Courses in the Major

One Major Seminar (History 301)

At least one Advanced Seminar (History 402-479) or Tutorial (History 480-492)

### **Elective Courses**

Seven (or more) additional semester courses in History, at least one to be chosen from among three of the following groups:

Group A: The History of Africa

Group B: The History of Asia

Group C: The History of Europe and Russia

Group D: The History of Latin America and the Caribbean

Group E: The History of the Middle East

Group F: The History of the United States and Canada

Group G: Global History

In addition, students must take at least one course dealing with the premodern period (designated Group P in the catalog); this may be one of the courses used to fulfill the group requirement (Groups A-G).

A single course can meet the requirement for no more than one of Groups A through G.

### **Concentration In The Major**

Students are encouraged, in consultation with their advisors, to design a concentration within the History major. A concentration should consist of at least three courses that are linked by common themes, geography, or time period. Only one of those courses can be a 100-level seminar while at least one must be a 300- or 400-level course. Courses in the concentration may be used to fulfill the group requirements. Courses taken abroad may be included in the concentration with the approval of the department chair.

## **THE DEGREE WITH HONORS IN HISTORY**

The History Department offers a thesis route to the degree with honors in History. This involves a ten-course major as well as an independent WSP. Students wishing to undertake independent research or considering graduate study are encouraged to participate in the thesis program and seminar.

Application to enter the thesis program is made by spring registration in the junior year and is based on a solid record of work of honors caliber, normally defined as maintaining at least a B+ average in courses taken for the major. Students who intend to write a thesis submit a proposal to the History Department at this time. Students who will be away during the spring semester of their junior year make arrangements to apply before leaving. Normally, it is the responsibility of the student to secure the agreement of a member of the department to act as their thesis advisor, normally a faculty member with whom the student has worked in the past. The student therefore consults with a member of the department about a thesis topic and secures the faculty member's agreement to serve as their thesis advisor prior to submitting a proposal to the department. The thesis proposal must be signed by a member of the History Department. Normally, the thesis topic is related to course work that the student has completed. Students should be aware that, while the department tries to accommodate all students who qualify to write a thesis, particular topics may be deemed unfeasible. Final admission to the thesis program depends on the department's assessment of the qualifications of the student and the feasibility of the project.

Once the student has been notified of admission to the thesis program, they register for History 493, Senior Thesis Seminar, in the fall semester, for History 031 during winter study, and for History 494, Senior Thesis Seminar, in the spring. In addition to researching and writing a thesis of approximately 75-100 pages, students attend special presentations under the History Department's Class of 1960 Scholars Program.

During the fall, students work regularly on their research and consult frequently with their advisors. Throughout the semester, thesis writers also present progress reports for group discussion to the seminar (History 493). Performance in the seminar is taken into consideration in determining students' continued participation in the thesis program and is taken into account in determining their final thesis grades calculated at the end of the year. Students are required to submit one draft thesis chapter to their advisor and the director of the thesis seminar by the end of the fall semester.

During the first week of winter study students present their draft chapter to the thesis seminar and members of the history department thesis committee. Students deemed to be making satisfactory progress on their research and writing at this point are allowed to continue with the thesis. They devote the entire winter study period to thesis work. They normally conclude their research during winter study and must complete a second draft chapter of their thesis for submission to their advisor and the director of the thesis seminar before the end of winter study. By the beginning of spring semester, the thesis committee formally consults with advisors and makes a recommendation to the department on which students are allowed to proceed with the thesis. Those students continuing with the thesis present a draft chapter of their thesis to the thesis seminar and members of the department's thesis committee during the early weeks of the second semester.

Completed theses are due in mid-April, after which each student prepares and makes a short oral presentation of their thesis at the departmental Thesis Colloquium. Another student who has read the thesis then offers a critique of the thesis, after which the two faculty readers of the thesis offer their own comments and questions, followed by a general discussion of the thesis by students and other members of the department.

## **LANGUAGE**

Study of a foreign language is basic to the understanding of other cultures. Particularly those students who might wish to do graduate work in History are encouraged to enroll in language courses at Williams.

## **STUDY ABROAD**

The History Department considers immersion in and familiarity with a foreign culture not only to be valuable in themselves, but also to provide an important way of understanding the past. Students who major in History therefore are encouraged to study a foreign language and to consider studying abroad during their junior year. History courses taken as part of a study abroad program that is recognized by the college normally can be used to satisfy departmental distribution and general requirements, up to a maximum of three courses (this limit does not apply to tutorials taken as part of the Williams-Exeter Program). Courses taken abroad, even at Oxford, cannot be used to satisfy the major seminar and advanced seminar/tutorial requirements, with only one exception: the tutorial on "Historiography: Tacitus to Weber" that is offered through the Williams-Exeter Program can count for major seminar credit. Students who plan to study abroad during their junior year may take their major seminar in the spring semester of their sophomore year, and those planning to be away the whole of their junior year are strongly encouraged to do so.

Students interested in studying abroad during their junior year should discuss their plans with a member of the department as well as with the department's administrative assistant. Approval of departmental credit for courses taken abroad normally must be obtained from the chair or from the administrative assistant prior to the commencement of the study abroad program.

## **FAQ**

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

### **Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department. The student needs to provide as much information as possible to the department chair, and approval is provisional upon the student actually taking the course as detailed in the syllabus and/or course description.

### **What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description, and complete syllabus including readings/assignments.

### **Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

Yes. The maximum number of credits is three.

### **Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

Yes. The courses need to be historical in approach and content for credit. This means that courses not listed under History in the study abroad program might be considered for history major credit.

### **Are there specific major requirements that cannot be fulfilled while on study away?**

Yes. HIST 301 (with the exception of one particular tutorial offered through the Williams-Oxford Programme) and a 400-level seminar or tutorial.

### **Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

No. Students who will be studying abroad for the entire year are encouraged to take HIST 301 before their junior year.

### **Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:**

None recently.

## **HIST 104 (S) Race and a Global War: Africa during World War II (DPE) (WS)**

**Cross-listings:** AFR 104 HIST 104 GBST 104

### **Primary Cross-listing**

This course highlights African experiences of World War II. Although most histories have excluded Africa's role in the war, the continent and its people were at the center of major developments during in this global conflict. In fact, many Africans remember the Italian invasion of Ethiopia in 1935 as the start of the war. African servicemen fought alongside the Allied and Axis forces on major warfronts in Europe, Africa and Asia. African communities and individuals also established war charity campaigns to collect funds, which they sent to war ravaged societies in Europe. Indeed, African economies, despite their colonial statuses, kept European imperial nations afloat in their most hour of need. At the same time, African colonial subjects faced severe food shortages, the loss of working-age men to labor and military recruiters, and dramatically increased taxes. We will examine the impact of these and other wartime pressures on different African communities. How did African societies meet such challenges and how did they view the war? In this course we will examine the roles that women played during the war, and the various other ways that African communities met wartime demands. Other topics we will explore include the role of African women; colonial propaganda; political protest against the war; race and racial thought in the wartime era; war crimes; African American support for the liberation of Ethiopia; and the war's impact on decolonization across the continent. We will further study how Africans and outsiders have differently conceptualized the continent's role in the war by analyzing a variety of sources, including scholarly writings, archival materials, films, former soldiers' biographies, and propaganda posters.

**Requirements/Evaluation:** active participation in discussion, map quiz, 2 reading responses, and 3 essays (of about 5 pages)

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students and then sophomores who have not previously taken a 100-level seminar

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AFR 104 (D2) HIST 104 (D2) GBST 104 (D2)

**Writing Skills Notes:** Students will write two 3-5-page essays each written in two drafts with instructor comments. They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course explores the colonial relationship during a major global crisis. Students will examine existing narratives of African contributions to the war and to come up with their own interpretations, and will be called to critically engage the question of why and how colonies made significant contributions to the Allied cause by producing needed materials and resources or by joining the fight. Africans made these contributions spite of various and complex inequities.

## **HIST 109 (S) The Iranian Revolution (DPE) (WS)**

**Cross-listings:** HIST 109 ARAB 109

### **Primary Cross-listing**

The Iranian Revolution was a major turning point in world history that resulted in the establishment of the Islamic Republic of Iran. This tutorial will evaluate the causes and impact of the revolution and how this seminal event continues to have widespread repercussions around the globe. The first weeks will explore the history of pre-revolutionary Iran with special attention to religious and intellectual trends such as the ideas of Ayatollah Ruhollah Khomeini, Jalal al-e Ahmad, and Ali Shariati. We will then evaluate the revolution itself including the US hostage crisis, the downfall of the Shah Muhammad Reza Pahlavi Shah, and how Khomeini's vision of society became paramount. Finally, we will explore the aftermath of the revolution including Iran's geopolitics, the nature of the theocratic system in Iran as well as how the revolution impacted every day lives of Iranians in Iran and abroad particularly how they reflect on the revolution in memoirs, films, and literature.

**Requirements/Evaluation:** Weekly meetings. Weekly papers - either a 5 page primary paper or a 2-3 page response paper.

**Prerequisites:** No prerequisites.

**Enrollment Limit:** 10

**Enrollment Preferences:** First Years and Sophomores.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 109 (D2) ARAB 109 (D2)

**Writing Skills Notes:** As a tutorial, students are expected to regularly write analytical and critical papers on the readings. They will receive regular and consistent feedback from the instructor and their partner and will be given the opportunity to re-write some of their assignments.

**Difference, Power, and Equity Notes:** The Iranian Revolution, like other major social movements, offered a compelling critique of the status quo and promised a more just society that would be more equitable for all Iranians. The tutorial will consider the relationship between the rhetoric of the Revolution and the lived reality, especially how this seminal event impacted the lives ordinary Iranians. Was the Revolution simply a change in the composition of the political elite or did it yield new realities and more access for Iranians

**HIST 110 (S) The Veil: History and Interpretations** (DPE) (WS)

**Cross-listings:** HIST 110 WGSS 110 ARAB 215

**Primary Cross-listing**

This tutorial will consider the history and the changing meanings of the veil (hijab) and its many manifestations (e.g. burqa, chador, niqab), starting with the earliest religious traditions and the status of women in Islamic law. We will then proceed to examine imperialist and orientalist representations of gender in the Middle East, the rise of Islamic feminism and finally consider the emergence and return of the veil in recent years in the Middle East, North America, Asia and Europe.

**Requirements/Evaluation:** each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper; by semester's end each student will have written a minimum of 40 pages

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** first-years, and then sophomores who have not previously taken a 100-level seminar and those with demonstrated interest in the Middle East

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 110 (D2) WGSS 110 (D2) ARAB 215 (D2)

**Writing Skills Notes:** Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This tutorial considers the veil in many different cultural contexts and time periods and how it has multiple and complex meanings. What does the veil mean and how do people interpret it? Is it empowering or is it subjugation?

**HIST 115 (F) The World of the Mongol Empire** (WS)

**Cross-listings:** HIST 115 ASIA 115 ASST 115

**Primary Cross-listing**

By the middle of the thirteenth century, Mongol armies led by Genghis Khan had conquered an enormous swath of territory, extending from China westward to Eastern Europe and the Middle East. Further expanded by Genghis's descendants, the Mongol Empire incorporated a vast range of different peoples and cultures, enhancing communications, trade, and exchange among them. In this course we will examine the "world order" of the Mongol Empire from its origins on the Asian steppe through its expansion, consolidation, and disintegration, as well as its legacies. From a wide range of primary and secondary sources, including literature, chronicles, and traveler's accounts, we will investigate the diverse experiences of the Mongol world in places such as China, Russia, Persia, and Central Asia.

**Requirements/Evaluation:** active participation in discussion, several short papers, and a final research paper

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

### **HIST 117 (F) Bombay/Mumbai: Making of a Modern Metropolis** (WS)

**Cross-listings:** GBST 117 HIST 117 ASIA 117

#### **Primary Cross-listing**

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of colonial and modern India through the history of its most important city.

**Requirements/Evaluation:** assessment will be based on class participation and weekly written responses to readings (2 pages), 2-3 short papers (4-5 pages), leading to an oral presentation and final paper (8-10 pages). All writing assignments are structured to build up the final paper.

**Prerequisites:** First years and sophomores only

**Enrollment Limit:** 19

**Enrollment Preferences:** first-years, and then sophomores who have not previously taken a 100-level seminar.

**Expected Class Size:** 12-15

**Grading:** no pass/fail option, no fifth course option

**HIST 122 (S) The Black Death (WS)**

In what ways does a pandemic change society? Historians and scientists still debate the development and impact of the second plague pandemic, also known as the Black Death, which decimated the people of Asia, Africa, and Europe in the mid-fourteenth century. For many medieval people, the plague was experienced as a terrifying judgment of God upon the world. In this class, we will see how the plague exposed and exacerbated divisions within society, encouraging new political movements, economic changes, and new forms of expression in art and literature. We will read multiple first-hand accounts of the plague, with an eye to seeing how medieval people tried to understand the calamity through science and religion, and how modern scholars have interpreted the evidence of both written records and archaeology and related sciences. The Black Death is the first global pandemic that produced an extensive written record, and the sources offer us a detailed look at how multiple complex societies handled the crisis.

**Requirements/Evaluation:** Attendance and participation, three short (3- to 5-page) papers, a final 8-10-page research paper

**Prerequisites:** None

**Enrollment Limit:** 19

**Enrollment Preferences:** First- and second-year students. Others will need the permission of the instructor.

**Expected Class Size:** 10-15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will write three short (3-5 page) papers and a longer (8-10 page) research paper. They will receive feedback on all of these. The research paper will be produced in several stages, with the instructor commenting on each step.

**HIST 128 (F) Protest after Fascism: Youth, Revolution, and Protest in 1960s West Germany (DPE) (WS)**

The 1960s was a decade of youth and protest. University students in Paris, Belgrade, and Dar es Salaam took to the streets to call for political, economic, and social transformation. This first-year seminar dives into this decade of heady revolutionary fervor, by focusing on the stakes of political protest in postwar West Germany. It evaluates how West Germans formulated their political protests while living in a post-totalitarian and post-genocidal society and considers the extent to which West Germans youths -- despite operating in the international milieu of the "Global Sixties" -- displayed a specifically national set of anxieties. Students can expect to gain an introduction to postwar German history, as well as experience working with primary sources.

**Requirements/Evaluation:** Active participation in discussion, weekly 500-word discussion posts, two 5-6-page reading responses, and a final 10-12-page research paper

**Prerequisites:** None

**Enrollment Limit:** 19

**Enrollment Preferences:** First-year students and then sophomores who have not previously taken a 100-level seminar

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** This is an intensive writing seminar for first- and second-year students. We focus on the structure of historical argument, the process of revision, and research skills. Students receive detailed feedback on their writing on each of the shorter writing assignments and on all steps of the crafting of the final paper.

**Difference, Power, and Equity Notes:** This course investigates how West German youths wrestled with questions of national belonging and racial difference in the years after the Holocaust. In addition to evaluating how racial difference operated within after the Federal Republic of Germany after

the Nazis' racial genocide of European Jewry, this course explores West German activists' conceptions of two populations that were seen to be racially different: the peoples of the 'Third World' and West Germany's Turkish migrants.

### **HIST 130 (S) Rioting in British History (WS)**

Since scholars in the twentieth century turned from the bird's to the worm's-eye view of the past, scholarship on rioting and crowd actions has grown. Exploring rioting in the history of modern Britain allowed researchers a chance to learn about the values, priorities, and tactics of people not previously centered in the historical record. It also created space to raise questions about what makes something a riot and how visions of public order shape military or police responses to those riots. In this course, we will examine the causes, strategies, and consequences of riots from the 1780s to the 1980s, from bread riots to the Brixton riots. We will also develop our own definitions of what qualifies as a riot, interrogating why our present definitions may differ from those in the past. While this course is rooted in the "classic" studies of British riots, to give students a strong sense of disciplinary practices and traditions, it also allows space to see how cutting-edge scholarship has expanded the discipline. "Rioting in British History" is a history seminar designed for first- and second-year students, particularly those interested in the discipline of history. In addition to exploring the theme of rioting in great depth, this course will also provide students the chance to grow as researchers and writers. By the end of this course, students will have developed the ability to analyze and evaluate works of history, identify the kinds of primary sources necessary to answer their historical questions, and write history papers that show their ability to identify and analyze relevant scholarly works and primary source materials. Since this is a writing-intensive course, students should expect to conduct peer evaluations of their writing assignments and will get consistent feedback on their writing assignments from the instructor.

**Requirements/Evaluation:** Students will have regular reading assignments, averaging around 50 pages per week. Students will complete four unit response papers and one 10-12 page research paper.

**Prerequisites:** First-year or sophomore standing--juniors and seniors with permission of instructor.

**Enrollment Limit:** 12

**Enrollment Preferences:** First-year students will be given preference, followed by sophomores who have not yet taken a 100-level seminar.

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will complete four unit response papers, two of which will receive peer evaluation and feedback in class before being revised and submitted. All papers will receive feedback from the professor. Students will also complete a 10-12 page final research paper which they will develop over the course of the semester, including a rough draft workshop.

### **HIST 134 (F) The Great War (WS)**

In November 2018, world leaders gathered in France to commemorate the centennial of the end of the First World War. Yet the armistice that brought hostilities on the Western front to a close on the eleventh hour of the eleventh day of the eleventh month of 1918, did not have the same significance for Eastern Europe and the Middle East, where revolutions and civil wars continued to be fought well into 1923. Ultimately, the Great War toppled four empires (German, Habsburg, Russian, and Ottoman) and forcibly displaced and killed millions of civilians (including Armenians and Jews), creating new countries and colonies throughout Europe, the Middle East, and Africa. This tutorial will explore the global history of the First World War, a history that is indispensable for understanding the world of today. We will consider a broad range of topics and sources in our examination of the political, social, cultural, economic, and military histories of the Great War and its aftermath.

**Requirements/Evaluation:** bi-weekly 5- to 7-page papers; bi-weekly written critiques; one revised paper.

**Prerequisites:** permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** first- and second-year students

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Bi-weekly 5- to 7-page papers; one formal paper revision. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

### **HIST 135 (F) The Coffeehouse from Arabia to the Enlightenment (WS)**

Invented in sixteenth-century Arabia, the coffeehouse soon made its way to Egypt and Istanbul and then to Western Europe. This institution offered a social space where men (and women) could congregate to discuss politics and ideas. Everywhere, it was an object of suspicion, yet its onward march proved unstoppable, and it even became one of the central spaces of the European Enlightenment, the eighteenth-century movement that laid the foundations of modern Western secular thought. In this course, we will reconstruct the progress of the coffeehouse in order to understand what made it so special. Through its prism we will explore a crucial period in the history of Europe and the Middle East, and investigate how intercultural interactions and intellectual exchange shaped the modern world at a time of religious and political polarization.

**Requirements/Evaluation:** Attendance and participation; two 5-7-pp. papers (and a revision of each); final research project proposal and bibliography; a final, 10-12 pp. research paper; a final research presentation.

**Prerequisites:** First-year standing.

**Enrollment Limit:** 19

**Enrollment Preferences:** First-year students,

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** This class is designed as an intensive expository writing seminar for first-year students. We focus on the structure of expository argument, the importance of revision, on library and research skills, etc. Students receive detailed feedback on their writing throughout the semester and are expected to use the opportunity to hone their craft.

### **HIST 137 (F) Victorian Britain and the Anglo-Afghan Wars (WS)**

Long before the US and its allies fought the recent war in Afghanistan (2001-2021), Britain fought three Afghan Wars. Now almost forgotten, dusty reminders of Britain's imperial past, they were crucial moments in the "Great Game", the rivalry between the British and Russian empires for supremacy in Central Asia and control of land routes to British India. Largely disastrous for the British, the First Afghan War (1839-1842) resulted in the tragic deaths of some 16,000 individuals, the Second (1878-1881) generated considerable domestic discord, and the Third (1919) basically ended British influence in Afghan affairs. Nevertheless, they exercised the Victorian imagination and led to numerous cultural productions that will be dissected in our class: illustrated tales of British military exploits proliferated in the press; the children's writer G.A. Henty turned the conflicts into the stuff of imperial adventure; Rudyard Kipling made the Great Game the backdrop for several works of fiction; military officers, government officials, "lady travelers", and amateur scholars all mapped the landscape and people of Afghanistan, an endless source of fascination for the Victorians. By interpreting these various forms of documentary evidence, we will not only reconstruct the history of the wars Britain fought in Afghanistan, and the reasons for them, but dissect the stories Britons told themselves about their Empire and about Afghanistan and its people.

**Requirements/Evaluation:** Evaluation will be based on regular and continuous participation in class discussion, two document analyses (750 words each), two guided research essays (5 pages each), and various shorter exercises leading up to a final research paper (10-12 pages) due at the end of class

**Prerequisites:** None. First-year or sophomore standing required.

**Enrollment Limit:** 19

**Enrollment Preferences:** First-year students, and then sophomores who have not taken a 100-level seminar or tutorial in History.

**Expected Class Size:** 12-16

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will write two document analyses (750 words each) and two guided research essays (5 pages each), all letter-graded and returned with comments. Also, students will write a final research paper (10-12 pages) in consultation with the instructor; a working bibliography and prospectus, and a rough draft, will be required in advance of submission of the final paper. Students will learn about research and writing skills and will receive timely suggestions for improving their work.

### **HIST 143 (S) Soccer and History in Latin America: Making the Beautiful Game (WS)**

This course examines the rise of soccer (*fútbol/futebol*) in modern Latin America, from a fringe game to the most popular sport in the region. Focusing especially on Brazil, Argentina, Peru, and Mexico, we will analyze the central role that soccer played as these countries faced profound questions about racial, gender, regional, and national identities. Using autobiographies, videos, and scholarly works from several disciplines, we will consider topics including: the role of race and gender constructions in the initial adoption of soccer; the transformation of this foreign game into a key marker of national identity; the relationship between soccer and political and economic "modernization"; the production of strong, at times violent identities at club, national, and regional levels; and the changes that mass consumerism and globalization have effected on the game and its meanings for Latin Americans.

**Requirements/Evaluation:** Class participation, a series of short papers, response papers, and a research paper

**Prerequisites:** First-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** First year students and then sophomores who have not previously taken a 100-level seminar. If oversubscribed an application process may be developed to determine admission to the course

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will write three 3-papers on set topics and an 8-10 page research paper. Revision of the first short paper is mandatory, in response to instructor's comments. Students will receive timely feedback on all pieces of writing and will participate in in-class workshops on the identifying sources, formulating an argument, and presenting a compelling case.

### **HIST 152 (S) The Fourteenth Amendment and the Meanings of Equality (DPE) (WS)**

**Cross-listings:** HIST 152 WGSS 152

Primary Cross-listing

For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment's meaning in the century that followed. Central themes in this course include the contested interpretations of "birthright citizenship," "due process," "privileges and immunities," "equal protection," and "life, liberty or property"; the rise, fall, and rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality.

**Requirements/Evaluation:** a series of short (2-page) response papers; a midterm exam; and a final 12-15 page research paper

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** given first to those who have been dropped from this class previously, then to first-years, then to sophomores

**Expected Class Size:** 15-19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 152 (D2) WGSS 152 (D2)

**Writing Skills Notes:** Students will write three short (3-page) response papers to the readings in the first part of the semester, and will also write a substantial (10- to 12-page) research paper. In preparation for the research paper, students will write proposals, develop bibliographies, write outlines and drafts, and do peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course satisfies the DPE requirement because it examines the legal, social, and political constructions and theorizations of difference, power, and equity. It examines the ways that individuals and groups have organized across various axes of difference to fight for legal equality, and explores how those individuals and groups have experienced legal equality and legal inequality in varied ways.

### **HIST 155 (F) School Wars (WS)**

Throughout the 20th century, parents, students, teachers, and policymakers have fought bitterly about the purpose of and practices in public schools. Public schools have been the site of a series of intense conflicts over the meanings of democracy and equality; the relationship between the individual, the family, and the state; and about completing claims to recognize the rights of teachers, children, and parents. Organized both chronologically and thematically, this course examines a series of "school wars" in the 20th century, focusing especially on battles over religion, race, and sex. Topics will include evolution/creationism, segregation and desegregation, bilingual education, sex education, free speech, and school prayer. This course asks how, why, and with what consequences schools have been an arena of cultural conflict in the United States? How do these debates help us understand the contested relationship between the rights of children and students, the rights of parents and families, the rights of communities and states, and the obligations of the federal government? How can historical analysis shed light on our present-day "school wars"? Many of these conflicts wind up in court, and we will be looking at some key Supreme Court decisions, but we will also draw upon memoirs, social histories, oral histories, popular culture, and other archival and documentary sources that focus on the experience of teachers and students. Tutorials meet in pairs. Every week, each student will either write an essay (1000-1250 words) that responds to and analyzes the readings OR a short essay (no more than 500 words) that responds to their partner's paper and raises further questions for discussion.

**Requirements/Evaluation:** four to five tutorial papers (approximately 5 pages) and four to five short response papers (approximately 2 pages)

**Prerequisites:** first-years or sophomores

**Enrollment Limit:** 10

**Enrollment Preferences:** first-year students, and then sophomores who have not previously taken a 100-level seminar

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will write bi-weekly 5-page papers about the readings, and bi-weekly 2-page responses to their tutorial partner's paper. For the final paper, each student will revise and expand one of the papers they wrote in the semester. Students will receive regular written and oral feedback on their work from the professor and their tutorial partner. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

### **HIST 156 (F) The Manifesto in U.S. Politics (WS)**

Is there a style or tradition of writing political manifestos in the United States? Given the nation's origins in revolution, the answer would seem on the surface to be a definitive "yes." But some observers are skeptical; one writer has gone so far as to say the term "manifesto" connotes "a radicalism that American writers generally lack." This course will investigate that claim. How would we choose to define the very term, "manifesto?" Why have so many radical American writings been embraced as having the characteristics of a manifesto? We'll look at these questions through close readings and analyses of manifestos across three different historical junctures in the U.S. -- the Revolutionary era, the 1830s and 1840s, and the 1960s and early 1970s -- focusing in particular on struggles over racial equality and women's rights.

**Requirements/Evaluation:** participation; three graded essays (3-5 pages each), handed in as drafts, given comments, and with time for revision; 3-5

very short, ungraded assignments on course content and about library research; one manifesto (any length) and a final reflection paper (3-5 pages).

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students and then sophomores

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will alternate between doing short graded and ungraded assignments in the first 8-10 weeks of the class: the 3 graded assignments (varying length, but no more than 7 pages maximum) each will involve a draft, and then a revision based on instructor comments; the ungraded assignments will be either informal, analytical responses to the reading; short, creative responses; or discussion questions. Students will also each write a manifesto and a short, final reflection paper.

**Attributes:** HIST Group F Electives - U.S. + Canada

Not offered current academic year

### **HIST 157 (S) 1960s and U.S. History (WS)**

**Cross-listings:** HIST 157 AMST 157

Primary Cross-listing

This 100--level seminar will introduce students to the craft of history through the study of the 1960s, an important decade in American history (indeed, the world). In the U.S., this decade was marked by the on-going war in Vietnam, the struggle against racial inequality and racist oppression, changes in attitudes toward sex and sexuality, music, the role of youth culture, advances in technology, the rise of new expressions of American conservatism, and other tumultuous transformations in politics, culture, and the economy.

**Requirements/Evaluation:** two 3-- to 5--page papers based on readings; a 5-- to 7-page oral history project; research precis, annotated bibliography; final 10--page research paper; class participation

**Prerequisites:** first-years

**Enrollment Limit:** 19

**Enrollment Preferences:** first-years

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 157 (D2) AMST 157 (D2)

**Writing Skills Notes:** Precis and annotated bibliography will receive critical feedback from professor and peers, and dedicated time in class to discuss assignments and traits of effective history writing. On all papers students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes:** HIST Group F Electives - U.S. + Canada

Not offered current academic year

### **HIST 158 (S) North of Jim Crow, South of Freedom (DPE) (WS)**

**Cross-listings:** HIST 158 AFR 158

Primary Cross-listing

This course analyzes the freedom struggle in the North during the twentieth century. Whereas black northerners drew from broader campaigns and traditions of black resistance, we will explore territorial distinctions in the region that otherwise have been flattened within the long history of civil rights discourse. To accomplish this aim, we will engage the following themes: black culture and radicalism; community formation and residential segregation; demographic and migratory transitions; deindustrialization and the war; gender and respectability politics; labor tensions and civil rights unionism; northern racial liberalism; and the influence of world affairs--all with an eye toward scrutinizing the freedom struggle in its northern variety.

**Requirements/Evaluation:** Students are expected to participate actively and will write three short essays (3-4 pages), all of which will be

letter-graded and returned with comments. In addition, students will write a final research paper (8-10 pages) in consultation with the instructor and will be required to submit a topic proposal.

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students and then sophomores who have not previously taken a 100-level seminar. If the course is overenrolled, students with junior and/or senior status will be removed automatically. Other students will complete a questionnaire.

**Expected Class Size:** 19

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 158 (D2) AFR 158 (D2)

**Writing Skills Notes:** Students will write three short essays (3-4 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages) in consultation with the instructor and will be required to submit a topic proposal and outline, an annotated bibliography, and a peer-reviewed draft of the final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course analyzes the long black freedom struggle in the North during the twentieth century. It examines black northerners' efforts to achieve citizenship and equality as well as their challenges and involvements with northern racial liberalism. It offers students the opportunity to think critically about how black resistance campaigns emerged and evolved as discriminatory racial practices persisted in spite of legal and legislative remedies.

### **HIST 159 (F) Crossing the Color Line: A History of Passing** (DPE) (WS)

**Cross-listings:** AFR 159 HIST 159

#### **Primary Cross-listing**

In June 2015, Rachel Dolezal emerged as a media spectacle and the subject of national scrutiny after her *white* parents stated publicly that Dolezal is a white woman *passing as black*. Their insistence that Dolezal is white came in the wake of her reports to local news media and police that she had been the victim of several hate crimes. To critics, Dolezal is a fraud who has committed cultural appropriation. Yet, for her supporters, Dolezal's racial identification as a black woman is authentic and indisputable, since race is not based on biology but rather is a social construction. For both groups as well as impartial observers, many wondered curiously why a white woman had chosen to pass as black, especially given that historically it has been African Americans who opted to *become* white. Inspired by the controversy surrounding Dolezal, this tutorial will explore the history of passing in the United States. Whereas our attention will primarily be focused on black-to-white passing, we will expand our understandings of passing by emphasizing the variety of ways that identities have been shaped through the crossing of boundaries--class, ethnic, gender, intellectual, political, religious, and sexual. To accomplish our goals, we will read and cross-examine fictional and nonfictional as well as primary and secondary historical accounts of boundary-crossers. We will also screen several films that engage the theme of passing.

**Requirements/Evaluation:** Weekly formal response papers and written critiques.

**Prerequisites:** None.

**Enrollment Limit:** 10

**Enrollment Preferences:** First and second-year students will be prioritized, followed by history majors. Should the course be overenrolled, students will be asked to complete an enrollment questionnaire.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AFR 159 (D2) HIST 159 (D2)

**Writing Skills Notes:** Students will be required to complete formal writing assignments each week, alternating between response papers (4 pages) and written critiques (2-pages) of their peers' work. Students will receive substantial feedback on their writing skills, with verbal and written suggestions for improvement. Students also will receive feedback from their tutorial partners.

**Difference, Power, and Equity Notes:** Narratives of racial passing provocatively raise questions about the construction, logics, reinforcement, and subversion of racial categories and identities. Tutorial students will have the opportunity to deconstruct the meanings of race and identity in addition to thinking culturally, historically, and ontologically about the implications and value of these constructs. In essence, we will theorize racial identity, reconsidering, if not challenging, its stable notions of identic intelligibility.

### **HIST 163 (S) From Wampum to Phillis Wheatley: Communications in Early America (DPE) (WS)**

How did the diverse peoples who inhabited early North America communicate with each other, across profound linguistic, cultural, social, and religious differences? This course examines histories of communication in early America and the technologies that communities developed across landscapes of coexistence and also contestation. We will study Indigenous oral traditions, traditional ecological knowledge, and wampum belts as signifiers of identity, meaning, and diplomacy for Native American nations and peoples; artistic and scientific paintings, engravings, and visual culture that moved around the Atlantic World; political orations, newspapers, and pamphlets that galvanized public opinion in the "Age of Revolutions"; stone memorials and monuments that connected communities to ancestral pasts; and the powerful poetry of African American writer Phillis Wheatley along with the orations of Pequot intellectual William Apess. Together we will raise new questions about the meanings and ongoing legacies of early American histories, and grapple with diverse approaches to understanding the past. Additionally, this course provides an opportunity to engage with original materials pertaining to early American histories in the Williams College Archives/Special Collections and Art Museum.

**Requirements/Evaluation:** active participation in class discussions, several short essays based on readings and discussion topics, museum/archives exercise, final essay

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** limited to first- and second-year students who have not yet taken a 100-level course in History; juniors and seniors only with the permission of the instructor

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** Short essays (3-5 pages) spaced throughout the semester with instructor feedback on writing skills as well as historical content; written reflection and analysis related to museum/archives visit with original materials; final essay (8-10 pages) due at end of semester that synthesizes findings from across the whole semester and allows students to closely examine primary/secondary sources; regular opportunities to conference with instructor about writing ideas and drafts.

**Difference, Power, and Equity Notes:** This course delves into histories and experiences of diverse early Americans, including substantial focus on Native American/Indigenous and African/African American peoples. It introduces students to foundational methods for historical study, including decolonizing methodologies from Native American and Indigenous Studies (NAIS) and African American histories, along with critical vantages on Euro-American settler colonialism and the complex entanglements that arose in multiracial communities.

### **HIST 165 (F) The Age of McCarthy: American Life in the Shadow of the Cold War (WS)**

The Cold War cast a long shadow over American life in the years following World War II. The relationship between domestic and foreign affairs was particularly acute during the Age of McCarthy, an era marked by a intensifying Soviet-American rivalry abroad coupled with dramatic Red baiting and witch hunts at home. This course explores related aspects of American life from the late-1940s to the late-1950s, ranging from the phenomenon of McCarthyism itself to fallout shelters, spy cases, the lavender scare, nuclear families, the Hollywood blacklist, the religious revival and its implications for foreign policy, Sputnik and the space race, and links between the Cold War and Civil Rights. Using scholarly books and articles, primary sources,

novels, music, and films, we will explore interactions between politics, diplomacy, society, and culture in the Age of McCarthy. In this writing-intensive course, we will focus on analyzing sources, writing clearly and effectively, and making persuasive arguments. Students will not only learn about history, but they will learn to think and write as historians.

**Requirements/Evaluation:** class participation, several short essays, in-class presentations, and a final 10- to 12-page research paper

**Prerequisites:** first-years and sophomores

**Enrollment Limit:** 19

**Enrollment Preferences:** first-years, and then sophomores who have not previously taken a 100-level seminar

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will write several short essays (2-4 pages each) as well as a final research paper (10-12 pages). Over the course of the semester, students will submit a research proposal as well as several working drafts of the final research paper. These drafts will be discussed in small group workshops, including the professor. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes:** HIST Group F Electives - U.S. + Canada

### **HIST 166 (F) Cold War Films (WS)**

This history tutorial utilizes popular film as a vehicle to explore American Cold War culture. The Cold War was an intense period of political, ideological, cultural, and military struggle between the United States and the Soviet Union that took place after the Second World War. For every nuclear test, arms sale, or military operation, there was a propaganda ploy, rhetorical barb, or diplomatic ultimatum to match. Amidst this hostile competition between two incompatible ways of life--communism and capitalism; totalitarianism and democracy--an atmosphere marked by panic, secrecy, insecurity, paranoia, surveillance, and conformity pervaded American life. Given the vast cultural influence of movies, film during this era served as a vital ideological battleground. Moreover, cinema offers us a window into the cultural landscape of Cold War America, for film reflects, interprets, and shapes national identity in complex ways. The films examined in this course (for the most part, Hollywood productions from the mid-1940s to the mid-1960s) serve as unique historical documents and as cultural texts illuminating the ways filmmakers and audiences negotiated the challenges presented by the Cold War struggle. The films assigned for this course focus on a range of topics, including anticommunism, competing visions of Americanism, religion, the Hollywood Ten, J. Edgar Hoover and the FBI, the nuclear arms race, brainwashing, gender, race relations, and the eventual unravelling of the Cold War consensus. The historical analysis of film requires not only a close reading of the movies themselves, but also a clear understanding of the historical context in which they appeared. The readings paired with each film will help to clarify this context and offer interpretations of the films with which we will engage.

**Requirements/Evaluation:** Students will be required to complete formal writing assignments each week, alternating between 4-page reading response papers and 2-page critiques of their peers' work. These writing assignments will be evaluated alongside preparedness for and performance in tutorial discussions.

**Prerequisites:** None, open to all students.

**Enrollment Limit:** 10

**Enrollment Preferences:** First and second year students will be given priority. If the course is overenrolled, students will be asked to complete an enrollment questionnaire.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will be required to complete formal writing assignments each week, alternating between 4-page reading response papers and 2-page critiques of their peers' work. They will receive feedback on each of these papers--in writing and in person--from both the professor and their tutorial partners. Throughout the semester these writing assignments will total 25-30 pages.

## **HIST 167 (S) Let Freedom Ring? African Americans and Emancipation (WS)**

**Cross-listings:** AFR 167 HIST 167 AMST 167

### **Primary Cross-listing**

This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

**Requirements/Evaluation:** research paper, short writing assignments, class participation

**Prerequisites:** first-years and sophomores

**Enrollment Limit:** 19

**Enrollment Preferences:** first-years, and then sophomores who have not previously taken a 100-level seminar

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AFR 167 (D2) HIST 167 (D2) AMST 167 (D2)

**Writing Skills Notes:** Students will work throughout the semester on research paper that concerns Emancipation in the US. Students will turn in segments of this paper in separate assignments. During the final weeks of the course students will stitch these components together. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement."

## **HIST 202 (S) Islam in Africa (DPE)**

**Cross-listings:** HIST 202 GBST 232 AFR 232 REL 232 ARAB 232

### **Secondary Cross-listing**

Islam in Africa is often relegated to the peripheries in the study of Islam, a religion most associated with Arabs and the Middle East. On the flip side, Islam is also portrayed as foreign to African belief systems and institutions. The relationship between Islam and Africa, however, begins with the very advent of Islam when early Arab Muslim communities took refuge in the Abyssinian empire in East Africa. This course explores the history of Islam and Muslim societies on the African continent by focusing on the localized practices of Islam while also connecting it to Islam as a global phenomenon. The course will begin with a historical focus on the spread of Islam in Africa from East Africa and North Africa in the seventh century all the way to the spread of Islam through Sufi brotherhoods in the eighteenth and nineteenth centuries. The course will also take an anthropological approach, exploring the diverse practices of Islam in African Muslim communities and the social and cultural impact of Islam on African societies. Among the topics the course will cover include African Muslim intellectual traditions, local healing practices, religious festivals, early modern African Muslim abolitionist movements, and the historical interactions between African and Asian Muslim communities in the Indian ocean world.

**Requirements/Evaluation:** Two essays during the semester and final project.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** REL, HIST, ARAB, AFR, GBST majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

### **HIST 203 (F) Modern Japan**

**Cross-listings:** HIST 203 ASIA 203

#### **Primary Cross-listing**

This course is intended to familiarize you with the history of modern Japan, the world's third-largest economy and a dynamic influence on global culture. We will begin during the Edo Period (1600-1868), during which feudal (e.g., the status system) and more modern (e.g., a consumer society) features of Japanese life developed alongside each other. We will then examine the Meiji Restoration and explore how the Imperial Japanese state led Japan through modernization into total defeat by 1945. The course then looks at economic recovery and societal change during the postwar period, taking us up to the present day. Students will become familiar with several significant shifts in interpretation of key aspects of Japanese history. We will cover the rise and demise of the erroneous "national seclusion" narrative, the legislation of Japanese Emperor's divinity, and the debate over Japan's supposed ethnic and cultural distinctiveness. We will focus especially closely on the roles of class, gender, imperialism and foreign contacts in modern Japanese history. You are expected to critically analyze assigned primary and secondary sources and to communicate your ideas to your classmates effectively both orally and in writing. You are also expected to collaborate with your classmates to complete group activities. You will also conduct limited original archival research.

**Class Format:** This class features an immersive simulation, in which students will simulate the Meiji Restoration. The final project is a collaborative research project and presentation working with Japan-related sources from Williams's Special Collections.

**Requirements/Evaluation:** Class participation, two 5-6 page essays, immersive simulation midterm, collaborative final research presentation

**Prerequisites:** None

**Enrollment Limit:** 40

**Enrollment Preferences:** History majors, Asian Studies concentrators, then all others

**Expected Class Size:** 20-25

### **HIST 204 (F) Colonial Rule and Its Aftermaths in Africa (DPE)**

**Cross-listings:** GBST 203 HIST 204 AFR 227

#### **Primary Cross-listing**

This course focuses on the history of Africa during the colonial and post-colonial periods, especially focusing on the period between 1885 and 2000. The first part of the course will explore the imposition of colonial rule and its attendant impacts on African societies. During this section, we will especially examine how Africans responded to colonialism, including the various resistance movements that arose at different moments to contest colonial rule. We will also explore the various transformations wrought by colonialism. The second part of the course will explore the African struggle to decolonize their societies and to fashion viable political systems. In addition to historical texts, the course will make use of cultural materials such as

novels and films.

**Class Format:** Mixed format of lecture and discussion seminar

**Requirements/Evaluation:** active participation in discussion, map quiz, response papers, midterm and final exams, and case study paper (7-10 pages)

**Prerequisites:** None

**Enrollment Limit:** 30

**Enrollment Preferences:** if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

**Expected Class Size:** 30

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 203 (D2) HIST 204 (D2) AFR 227 (D2)

**Difference, Power, and Equity Notes:** This course will introduce students to how Africans contended with the forces of colonialism and its aftermaths. It will examine how different African societies as well as social groups on the continent were affected by and responded to colonial rule. All of the readings, discussions, and assignments will ask students to contend with the issues of how to write African lives into the history of colonialism.

### **HIST 205 (F) The Making of Modern Africa (DPE)**

**Cross-listings:** AFR 203 HIST 205

#### **Primary Cross-listing**

This course traces the incorporation of Africa into an expanding global world from the middle of the 19th century to the present and examines the impact of this integration on the history of African cultures and modern nation states. It is designed to provide you with an introductory understanding of the economic, social, and political forces that have shaped Africa in recent times and continue to affect the lives of individual people across the continent. Over the course of the semester you will be introduced to major historical themes in African History from the past 150 years, including the abolition of the slave trade and its effects, African states in the 19th century, the growing integration of different regions into shifting global and economic systems, European colonization, and African resistance to imperial conquest. We will also explore the emergence of the nationalist and anti-colonial movements, and Africa's post-colonial experiences of self-governance. Within these broad historical processes, the class will cover additional key themes such as religious change and the role of Western missionaries; changing gender roles; environmental exploitation and change; the emergence of the developmental state; urbanization; military dictatorships, and war and violence in the late 20th century. We will also cover some of the issues surrounding the study of African History as a discipline. This is a challenging task as no single course can cover more than a silver of the complexity and variety of the continent. This is why we approach the study of Modern African History through a comparative prism.

**Requirements/Evaluation:** active participation in discussion, map quiz, response papers, midterm and final exams, and a case study paper (7-10 pages)

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

### **HIST 211 (S) Understanding 9/11 and the War in Iraq (DPE)**

**Cross-listings:** HIST 116 ARAB 211 HIST 211

#### **Primary Cross-listing**

What were some of the causes of 9/11/2001 and what were some of the consequences? Why and how did the United States invade Iraq in 2003 and what impact did the subsequent occupation of that country have on the rest of the Middle East? In this course on recent political and cultural international history, that will also consider this history in film and popular culture, the monumental ramifications of the "War on Terror" will be considered and how this framework has shaped the 21st century. In the first part of the course, US-Middle Eastern relations will be explored and the eventual emergence of al-Qaeda in the late 1990s. Then the terrorist attacks on American soil on 9/11 will be studied and the ensuing wars on Afghanistan and Iraq. Particular attention will be on the prelude to the Iraq War, especially how that war was justified and rationalized, and the eventual occupation of Iraq. The myriad Iraqi responses will be studied along with American military experience. Finally, the course will evaluate the significance of the first decade of the 21st century and how these events continue to reverberate today.

**Requirements/Evaluation:** short online writings and papers and a final project

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** History and Arabic Studies majors

**Expected Class Size:** 25

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

HIST 116 (D2) ARAB 211 (D2) HIST 211 (D2)

**Difference, Power, and Equity Notes:** This course will consider power and difference in a number of ways. First, it will evaluate how the US government used its political power to convince the public to support a military operation under questionable premises. Second, it will critically assess the "War on Terror" and who has benefited from it. Third, it will examine how the American military occupied Iraq and the ways in which Iraqis tried to resist the American designs on their country.

### **HIST 213 (S) Modern China, 1600-Present**

**Cross-listings:** HIST 213 ASIA 213

#### **Primary Cross-listing**

China's presence continues to grow in our world today, but contemporary China also evinces complex contradictions: a market economy promoted by a nominally Communist government, extremes of urban wealth and rural poverty, increasing participation in the international community and intensifying nationalist rhetoric. This course examines China's historical engagement with the modern world to offer perspective on its current conditions. We will begin with the Qing (1644-1911) conquest of China and consolidation of a multi-ethnic empire, and investigate China's encounters with Western and Japanese imperialism, the rise of Chinese nationalism, Republican and Communist revolutions, and the often turbulent history of the People's Republic. Throughout, we will examine themes of social, economic, intellectual, and cultural change through predominantly primary source reading and analysis.

**Requirements/Evaluation:** class participation, two short papers, two essays, a midterm and a self-scheduled final exam

**Prerequisites:** none; open to all

**Enrollment Limit:** 40

**Enrollment Preferences:** open to all; preference to History or Asian Studies majors only if overenrolled

**Expected Class Size:** 25-30

**Grading:** yes pass/fail option, yes fifth course option

### **HIST 214 (F) Foundations of China**

**Cross-listings:** REL 218 ANTH 212 GBST 212 HIST 214 ASIA 211 CHIN 214

#### **Secondary Cross-listing**

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

**Requirements/Evaluation:** short writing assignments (approximately 750-1000 words each), quizzes, a mid-term, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Cross-listings:** ASIA 217 HIST 217 ASST 217

#### **Primary Cross-listing**

Over a century of constant warfare came to an end in the late 1500s, ushering in more than two hundred years of relative peace in a Japan that was ruled by a military government. This course will take up the extraordinary changes and enduring continuities of the period between the establishment of the Tokugawa government in the early 1600s and its eventual collapse in 1868, an era characterized by societal order and tensions, economic growth and stagnation, the development of cities and towns, the flourishing of urban culture, the spread of new and different ideas, and the decline of the samurai. We will focus on the political, social, and cultural history of early modern Japan, including topics such as the establishment of the Tokugawa order, the nature of the political system, foreign relations, urbanization, popular culture, material culture, the quality of life, the legal order, gender and sexuality, and the fall of the Tokugawa government. Assigned materials will include government documents, intellectual treatises, autobiographies, literature, and films.

**Class Format:** discussion

**Requirements/Evaluation:** class participation, response papers, two short papers (5 pages), and a final paper (10 pages) or self-scheduled final exam

**Cross-listings:** ASIA 218 HIST 218

Primary Cross-listing

Stunning revolutions, the construction and collapse of an empire, the waging of wars, devastating defeat and occupation by a foreign power, and postwar economic ups and downs have marked Japan's modern experience. This course will explore how various Japanese people from factory workers and farmers to politicians and intellectuals have understood, shaped, and lived the upheavals from the 1850s through the present day. And it will examine how the country of Japan as well as individual Japanese people have defined the identities and meanings of "modern Japan." We will ask why a modernizing revolution emerged out of the ashes of the early modern order; what democracy and its failures wrought; how world war was experienced and what legacies it left in its wake; and how postwar Japan has struggled with the successes and costs of affluence. Materials will include anthropological studies, government documents, intellectual treatises, fiction, films, and oral histories.

**Class Format:** lecture and discussion

### **HIST 220 (S) History and Society in India and South Asia: c. 2000 to 1700s CE**

**Cross-listings:** HIST 220 ASIA 222

Primary Cross-listing

This course is an introduction to the history of India and South Asia from prehistoric times to the emergence of early modernity. During these centuries, the subcontinent emerged as one of the most diverse and complex regions of the world, as it continues to be even today. The course will cover the period between the rise of the urban Indus Valley civilization to the end of the Mughal Empire and will address topics such as the origins and development of the caste system and 'Hinduism', society and culture in the great epics like the *Ramayana*, the beginnings of Jain and Buddhist thought, politics and patronage under Islamic polities, the formation of Mughal imperial authority through art, architecture and literature, among others. Through the study of social processes, the course will focus on the diversity and connectedness that have defined the subcontinent throughout its history. It will also consider the role of history in the region and how a number of events from the past continue to inform its present.

**Class Format:** Lecture-discussion

**Requirements/Evaluation:** class participation, reading responses, 2 essays, mid-term and a final exam

**Prerequisites:** none; open to all

**Enrollment Limit:** 40

**Enrollment Preferences:** History Majors, and anyone interested in South Asian history before colonialism

### **HIST 221 (S) South Asia: Colonialism to Independence, 1750-1947 CE**

**Cross-listings:** HIST 221 ASIA 221 GBST 221

#### **Primary Cross-listing**

This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from c. 1750 to 1947. This period spans the decline of the Mughal Empire through British colonial rule, South Asians' struggle for independence, and the Partition of India and Pakistan. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and podcasts. One objective of this course is to introduce students to the different political and social processes that led to the creation of India, Pakistan and Bangladesh; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

**Class Format:** This class will also have a small discussion component.

**Requirements/Evaluation:** class participation, response papers (2-3 pages), two short essays (4-5 pages), midterm and final exams

**Prerequisites:** none; open to all

**Enrollment Limit:** 40

**Enrollment Preferences:** history majors if the the class is overenrolled.

### **HIST 222 (S) Greek History**

**Cross-listings:** HIST 222 CLAS 222

#### **Secondary Cross-listing**

Ancient Greece has been thought to embody the origins of Western civilization in its institutions, values, and thought; it has been seen as the infancy of modern society, with the attributes of innocence, purity, and the infant's staggering capacity for exploration and learning; it has been interpreted as an essentially primitive, violent culture with a thin veneer of rationality; and it has been celebrated as the rational culture par excellence. The study of ancient Greece indeed requires an interpretive framework, yet Greek culture and history have defied most attempts to articulate one. We will make our attempt in this course by investigating ancient Greece as a set of cultures surprisingly foreign to us, as it so often was to its own intellectual elite. But we will also come to appreciate the rich and very real connections between ancient Greek and modern Western civilization. The course will begin with Bronze Age-Greece and the earliest contacts with eastern cultures, and will conclude with the spread of Greek influence into Asia and the transformation of Greek culture through the conquests of Alexander the Great. We will explore topics such as the aristocratic heritage of the city-state, the continuous influence of contacts as well as conflicts with non-Greeks, the effects of pervasive war on Greek society, the competitive spirit in political and religious life, the relationship of intellectual culture to Greek culture as a whole, Greek dependence on slavery, and the diversity of political and social forms in the Greek world.

**Class Format:** discussion

**Requirements/Evaluation:** contributions to class discussions, occasional short-writing exercises, a midterm, a final exam, and a medium-length essay.

**Prerequisites:** none; open to all

**Enrollment Limit:** 25

**Enrollment Preferences:** Students majoring in Classics, History, and Art History, first-year students and sophomores.

**Expected Class Size:** 20

### **HIST 223 (S) Roman History**

**Cross-listings:** CLAS 223 HIST 223 LEAD 223

Secondary Cross-listing

The history of ancient Rome can be seen as an account of formative events, practices, and thought in the history of western culture; it also is the history of the most far-reaching experience of diverse cultures, beliefs, and practices known in the Western tradition until modern times. By studying Roman history from Rome's emergence in central Italy in the 7th century BCE through the reign of the emperor Constantine in the early fourth century CE, we will see the complex and fascinating results of an ambitious, self-confident nation's evolution, transformation, and expansion throughout the Mediterranean world. We will consider questions such as, How did a republic with an aversion to autocratic rule and devotion to *libertas* understand its existence as an imperial power as well as its own elite's dominant rule over Romans and non-Romans alike? How and why did the Roman republic and its deeply entrenched republican ideology give way to the effective rule by one man, Augustus, and the increasingly monarchical rule of the emperors who followed? Did Roman political life in the later republic cause the violence that left it in crisis, or did the persistence of violence in Roman life account for the nature of Roman politics? Who were the non-elites of Rome, Italy, and the Roman empire that often get left in the shadows in our ancient sources? Who were the important writers, politicians, poets, philosophers, and innovators whose works constitute a rich cultural heritage worthy of both appreciation and critique? Throughout the course there will be an emphasis on the problems of historical and cultural interpretation, on how the Roman experience is relevant to our own, and, importantly, on the pleasures of historical investigation. Readings for this course will include a variety of original sources, a range of scholarly essays on specific topics, and a textbook that will provide our chronological framework.

**Requirements/Evaluation:** Class preparation and participation, several short response papers, one longer 6- to 8-page paper, a midterm exam, and a final exam. Students who have a B+ average or better at the end of the semester may substitute a 10 to 15-page research paper for the final exam.

**Prerequisites:** None; open to all

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference given to students who are or are considering majoring in Classics or History, or who are concentrating in Leadership Studies. Preference is then given to first-year students and sophomores.

### **HIST 224 (F) Introduction to Medieval Europe**

This course traces the development of European societies from the collapse of the Western Roman imperial order in the fifth century CE to the rise and consolidation of powerful monarchies by the fifteenth century: a foundational period in European history. Along the way, we will confront many of the paradoxes that make medieval history so compelling. How did political fragmentation coexist with the spread of an increasingly uniform, Latin

Christian culture? How was that same Christian culture mobilized to support both hierarchy and popular resistance to hierarchy, both early capitalism and voluntary poverty? As we encounter the medieval world through the men and women who lived in it, we will read the writings of saints and heretics, poets and lawyers, merchants and mystics. Though Western Europe will be our focus, we will also examine how Western European Christians defined themselves, in part, through their relationships with their neighbors in the Islamic and Byzantine worlds, and with internal religious minorities, such as the Jews. By the end of the course, students will appreciate how the socio-economic and intellectual legacy of the Middle Ages profoundly shaped the subsequent history not only of Europe, but the world.

**Requirements/Evaluation:** Attendance and participation, weekly reading responses or short in-class quiz, two short papers, and a final exam.

**Prerequisites:** None

**Enrollment Limit:** 40

**Enrollment Preferences:** Junior and senior History majors

**Expected Class Size:** 25-30

### **HIST 226 (S) Early Modern Europe**

The three hundred years from the late Middle Ages to the French Revolution were Europe's formative centuries: they saw the emergence of the Renaissance and the Reformation, the outbreak of the Wars of Religion, the colonization of the Americas and intensification of trade in Asia, the Scientific Revolution and the Enlightenment. Through these historical experiences, European culture developed an identity distinct from its Christian one, as well as peculiar political and economic forms that ended up shaping the modern world. This course will examine such topics as the revival of classical letters, the formation of the modern state, urban and courtly culture, and religion and unbelief. Although the "early modern" era is profoundly different from our own, it remains crucial to any interpretation of the world in which we live today. Readings will emphasize primary sources and include such authors as Machiavelli, Montaigne, Hobbes, Aphra Behn, Voltaire, and Mary Wollstonecraft.

**Requirements/Evaluation:** Attendance and active participation; map quiz; two 5-page papers; midterm and final exam.

**Prerequisites:** No prerequisites.

**Enrollment Limit:** 40

**Enrollment Preferences:** History majors or prospective majors.

### **HIST 230 (F) Modern European Jewish History, 1789-1948**

**Cross-listings:** HIST 230 JWST 230

#### **Primary Cross-listing**

What does it mean to be a Jew? The vexed question of Jewish identity emerged anew at the end of the eighteenth century in Europe and has dominated Jewish history throughout the modern period. Although Jewish emancipation and citizenship followed different paths in different parts of Europe, in general Jews were confronted by unprecedented opportunities for integration into non-Jewish society and unprecedented challenges to Jewish communal life. Focusing primarily on France and Germany, and to a lesser extent on the Polish lands, this course will introduce students to the major social, cultural, religious, and political transformations that shaped the lives of European Jews from the outbreak of the French Revolution to the aftermath of World War II. We will explore such topics as emancipation, Jewish diversity, the reform of Judaism, competing political ideologies,

Jewish-gentile relations, the rise of modern antisemitism, the role of Jewish women, interwar Jewish life and culture, Jewish responses to Nazism and the Holocaust, and the situation of Jews in the immediate postwar period. In addition to broad historical treatments, course materials will include memoirs, diaries, and fiction.

**Class Format:** discussion

### **HIST 232 (S) Twentieth-Century Europe: Nationalism, War, and Empire**

This course is a survey of twentieth-century Europe. While providing students with a historical basis for understanding the continent's social, political, and cultural changes, this course pays attention to two interrelated phenomena: first, the process by which Europe went from being a constellation of empires to one of nation-states; second, the heterogeneous ways in which Europe's residents participated in the making -- and then the remaking -- of modern Europe. 2023 marks the thirtieth anniversary of the European Union. This course provides students with a historical framework for understanding how and why Europe's residents rallied around this project of European integration and did so after having lived under imperial and national formations.

**Requirements/Evaluation:** Class participation, a midterm and final, and one 5-7-page paper

**Prerequisites:** None; open to all

**Enrollment Limit:** 40

**Enrollment Preferences:** Preference will be given to seniors and juniors if the class is overenrolled

### **HIST 242 (F) Latin America From Conquest to Independence**

This course will examine the processes commonly referred to as the creation of "Latin America" and will do so from numerous perspectives. Starting with the construction of indigenous societies, from small and decentralized groupings to huge imperial polities-, before 1492, to the invasion of Europeans from that date forward, we will take up the question of the Iberian "conquest," looking at the often violent encounters that made up that event and analyzing its success, limits, and results. We will then study the imposition of Iberian rule from the point of view of would-be colonizers and the peoples they treated as objects of colonization, stressing the multiple and conflicting character of European, indigenous, and African perspectives. Thus looking at the Americas from both the outside-in and inside-out, we will focus on the unequal relations of power that came to define cultural, political, and economic life in the colonies, always with an eye on the gendered and racialized nature of those relations. We will also not only compare very different regions of the Iberian Americas but also see how the grand shifts of history intervened in--and perhaps consisted of--the most normal elements of daily life in northern Mexico, the central Andes, coastal Brazil, and other parts of colonial Latin America. Visual as well as more traditional written primary materials, along with secondary texts and films, will serve as the basis for our discussions throughout the semester.

**Class Format:** discussion

**Requirements/Evaluation:** class participation, two short papers (4-5 pages), and a take-home final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

### **HIST 254 (F) Sovereignty, Resistance, and Resilience: Native American Histories to 1865 (DPE)**

**Cross-listings:** AMST 254 HIST 254 LEAD 254

Primary Cross-listing

This course surveys Native American/Indigenous North American histories from creation through the mid-nineteenth century, tracing the complex ways that tribal nations and communities have shaped North America. Equally important, it reckons with the ongoing effects of these pasts in the twenty-first century, and communities' own forms of interpretation and critique. It also introduces foundational methodologies in Native American and Indigenous Studies (NAIS) and strategies for pursuing decolonizing scholarship and action. Beginning with the diverse Indigenous societies that have inhabited the Americas for millennia before Columbus's arrival, it foregrounds the complexity of Native peoples, nations, and worldviews situated in particular homelands, as well as accounts of beginnings and migrations. It addresses how Native peoples confronted grievous epidemics resulting from the "Columbian Exchange," and contended with Euro-colonial projects of "discovery" and colonization. Indigenous nations' multifaceted efforts to maintain sovereignty and homelands through eras of pervasive violence and removal are addressed, as well as forms of relations and kinship with African-American and Afro-Indigenous people. It concludes with how different Native communities negotiated the tumultuous era of the Civil War and created pathways for endurance and security in its aftermath. The course centers on Indigenous actors--intellectuals, diplomats, legal strategists, knowledge keepers, spiritual leaders, artists, and many others--and consistently connects historical events with present-day matters of land, historical memory, education, caretaking, and activism. Additionally, it provides an opportunity to engage with original materials in the Williams College Archives/Special Collections and Art Museum. While the scope of the course is continental and transoceanic, it devotes significant attention to the Native Northeast and the Stockbridge-Munsee Mohican homelands in which Williams College is located.

**Requirements/Evaluation:** Attendance at lectures, active participation in class discussion, several short essays based on readings and discussion topics, museum/archives exercise, final essay/project.

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** History majors, followed by first- and second-year students

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 254 (D2) HIST 254 (D2) LEAD 254 (D2)

**Difference, Power, and Equity Notes:** This course intensively explores Native American/Indigenous North American histories, experiences, and forms of critical and creative expression, as well as responses to and engagements with Euro-American settler colonialism. It guides students into methodologies central to Native American and Indigenous Studies (NAIS), and gives opportunities for oral and written reflections on NAIS approaches to historical themes and sources, as well as decolonizing methodologies more broadly.

Fall 2022

LEC Section: 01 TR 9:55 am - 11:10 am Christine DeLucia

### **HIST 255 (F) From Sand Creek to Standing Rock: Recent Native American Histories (DPE)**

This course surveys Native American/Indigenous histories from the era of the U.S. Civil War to the present as well as future, centering community voices, scholarship, and interpretations. Beginning with Sand Creek and the violences experienced by Native communities in 1864, it traces how diverse Native nations navigated the tumultuous times that followed, up to recent protective actions at Standing Rock and Mauna Kea in the 21st century. Topics include treaty-making and diplomacy; creation and contestation of reservation systems; connections with African-American families and communities; residential school experiences of Native youth and families; Indigenous visual and performative artistic traditions and transformations, both in North America and abroad; urban relocation policy and experiences; Red Power activism and Indigenous internationalism; treaty rights activism and federal recognition debates; environmental interventions and food sovereignty movements; and critiques of settler colonialism. The course stresses the resilience of sovereign Indigenous nations into the present, and introduces students to a wide range of methodological approaches from Native American and Indigenous Studies and history. It blends big-picture vantages on these topics with microhistorical accounts of particular individuals, communities, and events, and offers a continental view of historical changes coupled with attention to the specific area of the Native Northeast--Stockbridge-Munsee Mohican homelands--in which Williams College is situated.

**Requirements/Evaluation:** class discussion, reading responses, short analytic essays, archival/object analysis, final essay/project

**Prerequisites:** Hist/AmSt 254: Native American Histories to 1865 is good preparation for this course, but is not required.

**Enrollment Limit:** 15

**Enrollment Preferences:** History and American Studies majors; then first- and second-year students from any major

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course focuses on Native American/Indigenous experiences in North American and transnationally, and offers immersion in critical perspectives on settler colonialism and U.S. law and practice, and well as introduction to methodologies in Native American and Indigenous Studies.

### **HIST 257 (F) Religion and American Politics**

**Cross-listings:** REL 217 HIST 257

**Secondary Cross-listing**

In this course, students will explore the history of religion and American politics, from the colonial era to the present. In the process, they will tackle such questions as: Were Anglo-American colonies 'cities on a hill' or bastions of intolerance? Was the First Amendment designed to protect the state from religion, or religion from the state? Has American religion primarily served to justify the *status quo* or inspire revolutionary change? How have religious ethics shaped responses to racial, gender, and class inequality? How has religious conflict impacted civic unity and political polarization? What role *should* religion play in American political life? The course will cover such topics as: Anglo-colonial treatment of heretics and blasphemers; the meaning of the First Amendment; religious conflict over slavery; state regulation of sexuality and polygamy; state treatment of religious minorities; the Scopes Trial and scientific modernity; Christian responses to industrial capitalism; theologies of civil disobedience and nonviolence; and 20th-century religious battles over school prayer, civil rights, the military draft, abortion, and democracy itself.

**Requirements/Evaluation:** Class participation; five informal response papers (350-450 words); two unit papers (4-6 pages); final paper (8-10 pages).

**Prerequisites:** None; open to all students.

**Enrollment Limit:** 20

**Enrollment Preferences:** Religion and History majors, in order of descending seniority.

**Expected Class Size:** 20

### **HIST 258 (S) The Petroleum Age: A Global History**

We live in a world transformed by petroleum. All around us today--in global carbon emissions, transportation, the clothes we wear, everyday objects we touch, microplastics in our water--oil is there, even if we can't always see it. At the same time, the industry fuels massive flows of global capital, and provokes critical political shifts, conflicts, and resistance movements around the world. How did oil's ubiquity happen in just over 150 years? This course will chart a global, modern history by keeping this energy source always in our sight, paying particular attention to its role in the political economy, its ecological impacts, the cultural changes it has set in motion, and its place in people's material lives. Throughout the semester, we will also foreground some of the foundational skills needed to create an historical account, which will culminate in students' completing a 5-minute video or podcast on a relevant topic of their choice.

**Class Format:** While this class will include brief lectures, it will largely revolve around discussion. Students do not need any experience in making videos or podcasts to enroll in the class.

**Requirements/Evaluation:** participation; two short graded essays (3-5 pages); two short ungraded essays (2-3 pages); short research assignments (1 page each, ungraded); final video or podcast project (graded); 24-hour take-home exam.

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** sophomores and first-years

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

### **HIST 261 (S) America and the Cold War**

**Cross-listings:** HIST 261 PSCI 262 LEAD 262

Secondary Cross-listing

This course examines the rise and fall of the Cold War, focusing on four central issues. First, why did America and the Soviet Union become bitter rivals shortly after the defeat of Nazi Germany? Second, was one side primarily responsible for the length and intensity of the Cold War in Europe? Third, how did the Cold War in Europe lead to events in other areas of the world, such as Cuba and Vietnam? Finally, could the Cold War have been ended long before the collapse of the Soviet Union in 1989? Political scientists and historians continue to argue vigorously about the answers to all these questions. We examine both traditional and revisionist explanations of the Cold War, as well as the new findings that have emerged from the partial opening of Soviet and Eastern European archives. The final section of the course examines how scholarly interpretations of the Cold War continue to influence how policymakers approach contemporary issues in American foreign policy.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** one medium length paper, an in-class midterm and final exam, and a series of short assignments

**Prerequisites:** none; PSCI 202 is recommended but not required

**Enrollment Limit:** 19

**Enrollment Preferences:** Political Science majors and Leadership Studies concentrators

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

### **HIST 263 (F) The United States and the World, 1898-2001**

This survey course examines the United States and the World from 1898-2001. Students will be introduced to key diplomatic developments from the Spanish-American War to the War on Terror with attention to ideological, political, cultural, military, and economic forces. Topics will include American imperialism and anti-imperialism, the emergence of U.S. cultural and economic hegemony in the interwar years, WWII and the origins of the Cold War, the Soviet-American rivalry in Europe and on the periphery, nuclear policy, the Vietnam War, late-Cold War diplomatic reconfigurations, the rise of political Islam, the collapse of the Soviet Union and its aftermath, and the events surrounding 9/11. By engaging with a range of primary and secondary source readings, students will examine how Americans historically have made sense of their nation's role in the world, and how historians explain important aspects of U.S. foreign policy.

**Class Format:** discussion

**Requirements/Evaluation:** class participation, pop quizzes, short papers, a midterm exam, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** first- and second-year students, then History majors

### **HIST 264 (S) Environmental History**

**Cross-listings:** ENVI 229 HIST 264

Secondary Cross-listing

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the

sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

**Class Format:** with field trips

**Requirements/Evaluation:** several short essays; final research project

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** Environmental Studies majors and concentrators; History majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

### **HIST 265 (F) Race, Power, & Food History (DPE)**

**Cross-listings:** HIST 265 ENVI 246 AMST 245

#### **Secondary Cross-listing**

Have you ever wondered why Spam is so popular in Hawaii and why Thai food is available all across the United States? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging in to the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of obesity discourse. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, health, and gender.

**Requirements/Evaluation:** two to three papers on assigned topics (4-6 pages); one longer final paper (8-10 pages); participation in discussion and online activities

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Environmental Studies majors and concentrators; American Studies majors; Public Health concentrators; history majors

**Expected Class Size:** 19

### **HIST 266 (F) The Roaring Twenties and the Rough Thirties**

**Cross-listings:** AMST 267 HIST 266

#### **Primary Cross-listing**

This course will probe the domestic history of the U.S. from 1919 to 1939 and the cultural, economic, political, and social changes accompanying America's evolution into a modern society. Themes include: developments in work, leisure, and consumption; impact of depression on the organization of the public and private sectors; persistence of traditional values such as individualism and the success ethos in shaping responses to change; and the evolving diversity of America and the American experience.

**Requirements/Evaluation:** Students will be graded on class participation and will have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two short response papers and will complete an interpretative essay (5-7 pages) focused on art from the WPA Federal Art Project.

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** HIST and AMST majors as well as students with demonstrated interest in the material

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

### **HIST 270 (F) Sport and the Global Color Line (DPE)**

**Cross-listings:** LEAD 270 HIST 270 AFR 270

#### **Primary Cross-listing**

Throughout the twentieth century, African Americans have broken racial barriers, confronted racial stereotypes, and garnered unprecedented success within popular culture, most notably sport. In this course, students will explore the relationship of the black athlete to the color line. We will complicate the historical view of sport as a site of professional advancement and race reform by demonstrating how societal racial practices were reconstructed within athletics. In essence, this course will emphasize the role sport performed in structuring racial exclusion as athletic arenas--like movie theaters, railroads, schools, and other public sites--shaped what Historian Grace Elizabeth Hale has termed the "culture of segregation." Though our primary focus will be on the experiences African Americans encountered, we will also probe the color line beyond its typical black-white binary. Thus, we will examine the achievements and altercations that other ethnic and racial groups realized in their transnational push for equality and inclusion.

**Class Format:** Lecture and discussion.

**Requirements/Evaluation:** Students will be graded on class participation and will have two take-home midterm essay examination (4-6 pages). In addition, students will write two or three response papers (2-3 pages) and a final research paper.

**Prerequisites:** None.

**Enrollment Limit:** 40

**Enrollment Preferences:** Open to all students with completion of course admission survey if overenrolled.

**Expected Class Size:** 25

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **HIST 273 (F) Going Nuclear: American Culture in the Atomic Age**

**Cross-listings:** SOC 224 HIST 273

#### **Secondary Cross-listing**

This course will examine the historical development and use of the nuclear bomb. Among other features of the early atomic age, the course will look at the Manhattan Project, the delivery of the bombs for combat, and the destructive effects of the bomb's initial use in Hiroshima and Nagasaki and ongoing testing in the Marshall Islands. The class will investigate the role of the nuclear arms race in the Cold War, the consequences of nuclear production on specific communities, and the implications of the atomic age on our critical understanding of technological innovation more generally. We will also consider the saliency of competing narratives interpreting America's decision (and continuing policies) to build, use, and stockpile nuclear weapons. Employing both sociological and historical perspectives, we will explore the interactions between science, politics, and culture in the nuclear age.

**Requirements/Evaluation:** a midterm, a final exam, and a 10- to 12-page research paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference given to sociology and history majors.

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

### **HIST 274 (F) Race, Land and Settler (Racial) Capitalism: Ongoing Topics in (Dis)/(Re)possession**

**Cross-listings:** ENVI 247 AMST 234 AFR 234 HIST 274

#### **Secondary Cross-listing**

This sequential studio course serves as an introduction to ongoing topics in colonialism, racial thinking, African Diaspora studies, Global, Caribbean, and local studies. We will examine how race, gender and class operate under racial capitalism and settler colonialism. The readings in this class will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, Indigenous theorists, among other critical, anti-capitalist or decolonial scholars. Reading in this course will take up the question(s) of land and land-making; race, racialization, and racial thinking; alongside questions of space and place as they all relate to the various processes, projects and methods of (dis)/(re)possession. This course is the first part of a complementary course, which will be offered in the Spring, titled, "Race, Land, Space and (Dis)/(Re)possession: Critical Topics in Environmental Injustice and Subaltern Geographies," which tracks both the "historical breaks" and ongoing processes of (dis)/(re)possession to more contemporary materializations. Weekly in-class discussion will be combined with guest lectures in order to provide the opportunity for exploring how race, space and (dis)/(re)possession can be understood geographically, and to also explain how a range of these territorializing processes operate in the transnational and local contexts. Those who take this studio course can expect to be actively engaged in directing their learning experience through research/final creative projects of their own selection. Sound, music and other audio engagements will also complement discussions in this course. Therefore, the capacity of deep listening, in-and-out of class, is mandatory. Sample topics covered in the course include the following: indigeneity and Blackness; dispossession and accumulation; environmental imperialism, war and colonial resistance. You are strongly encouraged to participate in both courses in this complementary sequence, but are not required to do so.

**Requirements/Evaluation:** The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** If the course is overenrolled, preference will be given to Africana studies concentrators.

### **HIST 275 (S) Race, Land, Dis/Re-possession: Critical Topics in Environmental Injustice and Subaltern Geographies**

**Cross-listings:** AFR 235 AMST 235 GBST 235 HIST 275 ENVI 253

#### **Secondary Cross-listing**

This course is an introduction to ongoing and contemporary topics in colonialism, racial thinking, African Diaspora and, Global and Caribbean studies, studies of 'the environment,' and dispossession. We will examine how race, gender and class operate under racial capitalism and settler colonialism as ongoing, sometimes continuous and discontinuous processes. The readings will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, and other critical, anti-capitalist or decolonial scholars. Readings, as in AFR 234, will take up the question(s) of land and land-making; race, racialization, and racial thinking; of space and place as they all relate to the various processes, projects and methods of (dis)/(re)possession, both "past" and "contemporary." We will interrogate temporal binaries, settler time, notions of [the] "progress(ives)" and other bifurcated understandings of the world. This course is the second part of a complementary course, titled, "Race, Land and Settler (Racial) Capitalism," which focuses on the historical geography of processes of (dis)/(re)possession from a Black and Indigenous Atlantic perspective. In this iteration, weekly in-class discussion will be combined with guest lectures to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to explain how a range of these territorializing processes operate. Sound, music and other audio will complement discussions. Therefore, the capacity of deep listening, in-and-out of class, is a grounding. Sample topics covered in the course include: indigeneity and Blackness; (dis)possession and accumulation; plantation geographies and economies; housing and houselessness; the problem of parks and conservation; prisons and carceral geographies; Black geographies; environmental racism and colonial resistance. You are strongly encouraged to participate in both courses in this sequence, but are not required to do so.

**Requirements/Evaluation:** The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). ### **HIST 276 (S) Stockbridge-Munsee Mohican Community Histories, Presents, and Futures (DPE)**

The ancestral and continuing homelands of the Stockbridge-Munsee Mohican Community (SMC) are where Williams College is located, a fact that the institution formally recognized in Fall 2021 through a land acknowledgment. This was one step toward building more meaningful relations between the College and the sovereign tribal nation, which has been displaced through violent, painful processes directly shaped by the Williams family, while also maintaining enduring relations with these homelands. This course addresses needs to continue work of learning and repair by "educating beyond the land acknowledgment." It centers SMC experiences, knowledge, and goals, and provides space for students to work on projects directly meaningful for the community, including the Tribal Historic Preservation Office (THPO) that is based locally through an official partnership with the college. It will have strong collaborative and experiential components, plus ethical commitments to highlighting the tribal nation's active forms of stewardship, knowledge-keeping, and intellectual as well as political sovereignty. The exact shape of the syllabus and projects will be determined in close conversation and collaboration with the Stockbridge-Munsee Community. Depending on goals/interests, potential areas of focus might include SMC homelands; archaeological research and its importance for place-stewardship; political sovereignty, governance, and leadership; histories and impacts of European colonialism among SMC people; SMC traditions of diplomacy and peacemaking; strategic uses of archives and documents in protecting community wellbeing and resisting dispossession; the "Many Trails" of forced removal westward; establishment of the SMC in Menominee homelands; 20th and 21st-century experiences, knowledge-keeping, and continuing connections with eastern homelands; repatriation of ancestors and belongings; language revitalization, Land Back, education, and economic sovereignty; and other topics.

**Requirements/Evaluation:** The focus of this seminar is experiential, collaborative, and community-based learning and project work. Seminar meetings will include discussion of readings/multimedia (especially works produced by SMC members), and meetings and dialogues with community members (in person or virtually as schedules and COVID permits). Class members' active, engaged participation in trips to area places of significance will be essential components as well. In small groups class members will work on projects of significance for the SMC, and may share out their work at the end of the term in multiple forms.

**Prerequisites:** Open to all students. If the course over-enrolls, students may be asked to share a brief statement of interest.

**Enrollment Limit:** 15

**Enrollment Preferences:** If the course over-enrolls, first- and second-year students will have preference.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course is a collaboration with the Stockbridge-Munsee Mohican Community that foregrounds community knowledge, projects, and goals. It offers students grounding in topics and methods specific to the SMC as well as in Native American and Indigenous Studies. It also presents critical perspectives on settler colonialism and its historical as well as ongoing impacts.

### **HIST 280 (S) Emancipation to BlackLivesMatter**

**Cross-listings:** AFR 280 HIST 280 LEAD 280

**Primary Cross-listing**

This introductory course surveys the cultural, political, and social history of African Americans from Reconstruction to the present. It offers a balance between a "top-down" and "bottom-up" approach and focuses primarily on African Americans' quest for citizenship, equality, justice, and opportunity. In addition to examining major historical developments and popular figures within the modern black past, we will explore the lesser-known histories of everyday people who helped shaped the black freedom struggle. In so doing, we will interrogate conventional narratives of progressive movements since emancipation. Some of the main topics include: the transition from slavery to freedom; the rise of Jim Crow and the politics of racial uplift; the Great Migration and the emergence of the New Negro; the Great Depression and the New Deal; World War II and the struggle for economic and racial inclusion; the postwar period and the intersecting movements of Civil Rights and Black Power; and the impacts of deindustrialization and mass incarceration on the black community. We will end with a discussion of the Obama years and Black Lives Matter.

**Class Format:** Class will be a mix of lecture/seminar

**Requirements/Evaluation:** Students will be graded on class participation and will have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two response papers (2-3 pages) and will complete a mapping project based on The Negro Motorist Green Handbook.

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** Students with demonstrated interest in material. If the course is overenrolled, students will be asked to complete a questionnaire.

### **HIST 281 (S) African American History, 1619-1865**

**Cross-listings:** AFR 246 HIST 281

#### **Primary Cross-listing**

This course provides an introduction to the history of African Americans in United States during the colonial, early republic, and antebellum eras. The experience of enslavement necessarily dominates this history, and it is the contours and nuances of slavery-and the development of racial classifications-that give this course its focus. We will also explore African cultural influences, the significance of gender, the lives of free blacks, and the cultural and intellectual significance of the abolitionist movement. The course closes on the themes that emerge from the Civil War, and on the meaning of freedom and emancipation. Our readings will include primary sources and secondary literature. Class meetings will combine lecture and discussion. Informed participation in class discussion is essential. This Power etc course explores the experiences and expressions of the culturally diverse peoples of African descent in the New World (and the Old), as well as the myriad ways in which they confront, negotiate, and at times challenge dominant U.S. and/or European hierarchies of race, culture, gender and class.

**Requirements/Evaluation:** class discussion, short informal writing assignments, three formal papers from 3-7 pages, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 30

### **HIST 286 (F) Conquests and (Im)migrations: Latina/o History, 1848 to the Present (DPE)**

**Cross-listings:** LATS 286 HIST 286

#### **Secondary Cross-listing**

The first Latinx communities were formed in 1848 when the United States conquered half of Mexico's territory. In 1898 the United States annexed Puerto Rico and has retained sovereignty to this day. These early conquests and continuing im/migrations created Mexican and Puerto Rican communities in the United States. U.S. imperialism continued to shape the im/migrations that created Cuban, Dominican, Salvadoran, Guatemalan

and other Latinx communities in the United States. This course explores U.S. military, political, and economic interventions and their impact on immigration and the making of Latinx communities. We also explore the impact of U.S. employers' and the U.S. government's recruitment of low wage workers in shaping immigration, destinations, and the formation of Latinx working-class communities. Immigration and refugee policies have long defined who is eligible to enter and how, as well as who is deemed eligible for citizenship and belonging. Within this context, Latinas and Latinos have developed survival and family reunification strategies for themselves, their families, and their communities.

**Class Format:** This course is a discussion format.

**Requirements/Evaluation:** Class participation with short 1-2 page writing assignments; two 4-5 page essays, and a final 5-7 page essay. All writing assignments are based on course materials.

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** LATS concentrators, History majors, or those intending to become concentrators or majors, seniors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

## **HIST 292 (F) History of Sexuality**

**Cross-listings:** REL 241 HIST 292 GBST 241 WGSS 239

Secondary Cross-listing

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

**Requirements/Evaluation:** reading responses, two essays, and final research paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Religion, History, and Women's, Gender and Sexuality Studies majors

**HIST 296 (S) Human Rights and National Security: Seeking Balance in the United States**

**Cross-listings:** LEAD 296 HIST 296

**Primary Cross-listing**

This course will ask if ensuring collective security and preserving individual rights are inherently contradictory or if they may, in fact, be mutually reinforcing. Focusing on developments and issues within the United States since its founding, the class will explore how Americans have sought to reconcile concerns about national security and a broad array of rights in the past, and the implications of this history for contemporary debates. The course will challenge students to consider how debates over national security and rights have reflected broader partisan divides and served diverse political objectives. Moreover, students will explore how these debates reflected competing visions of national identity and purpose, and question how and why the costs of security measures disproportionately burdened people based on race and religious identification. The course will initially survey these issues through a historical lens, demonstrating how questions of security and rights have been present since the nation's founding. It will draw on key moments in U.S. history to explore issues of foreign subversion, dissent, surveillance, habeas corpus, presidential power in times of war, and border security and immigration. Familiarity with historic precedents will ensure that students are prepared to grapple with a closer examination of contemporary studies of refugees and immigration; cybersecurity and surveillance; domestic terrorism and hate crimes; and counter-terrorist detention and interrogation. Students will be assessed on participation, short writing assignments, and a group podcast project.

**Requirements/Evaluation:** Students will be assessed on participation, short writing assignments, and a group podcast project.

**Prerequisites:** None

**Enrollment Limit:** 25

**HIST 301 (S) Approaching the Past: Practices of Modern History**

What is history? What is it that historians do? In this course, students will explore how and why we historians practice our craft. The first section of the course will examine how historians think about and come to know the past. Issues of historical truth, fact, and objectivity will be considered. And we will discuss what questions to ask of different types of evidence, from material objects to oral histories. Next, we will explore how historians attempt to make sense of the past. We will consider the perspectives, scale, and categories of analysis that historians can bring to bear on the past, and how history can be written. Finally, the third section of the course will pose questions about the purposes, uses, and misuses of history. We will ask how historians might engage with those outside of academe; what moral and political responsibilities historians should assume; how history is related to memory making; and why history education has been so contentious. Each week, we will focus on some theoretical material as well as readings on a broad range of topics, across time and geography, that concretely illustrate the methodological issues at stake.

**Requirements/Evaluation:** class participation, response papers (500 words), two practicums/short essays (5 pages), and a final project (10 pages)

**Prerequisites:** restricted to HIST majors and sophomores planning to major in HIST

**Enrollment Limit:** 15

**Enrollment Preferences:** senior, then junior, History majors

**Expected Class Size:** 10-15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

Not offered current academic year

### **HIST 301 (S) Approaching the Past: Varieties of Historical Thinking**

This course is designed to acquaint students with some of the ways historians have thought about the past. Beginning with Thucydides' *The Peloponnesian War*, the work of twelve historians will be studied closely and critically over the course of the semester. In the process, students not only will become familiar with various important historical approaches but will also be encouraged to examine their own assumptions about the past and about how and why--or even if--we know it. We will meet weekly to define, understand, and assess the different ways historians considered in the course have thought about the past.

**Requirements/Evaluation:** in preparation for class discussion, students are required to produce a one-page reader response to the assigned reading each week, which will form the basis for class discussion. The student's grade is based on these reader responses and participation in class discussion.

**Prerequisites:** restricted to History majors and sophomores committed to majoring in History

**Enrollment Limit:** 15

**Enrollment Preferences:** senior, then junior, History majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

Not offered current academic year

### **HIST 301 (F) Approaching the Past: National, Transnational, and Postcolonial Histories**

This course examines the practice of history from the nineteenth century to the present. We will examine the sources, methods, and theoretical assumptions that have shaped the historical craft in this period, as well as the deeper questions that all historians must confront, implicitly or explicitly: What is "history"? Who makes it and how? How do these questions figure into histories of nations, colonialism, and anti-colonialism? To address these issues, we will discuss the work of canonical and non-canonical historians from across the world, and from outside as well as inside the academy. The particular focus will be on the production of history from the rise of the nation-state through the spread of new imperialisms in the late nineteenth century and on to the emergence of the "Third World," decolonization, and the "new globalization" over the course of the twentieth century. In weekly meetings we will analyze texts and how their authors define historical subjects/actors and processes, as well as the meanings of history for different audiences and eras.

**Requirements/Evaluation:** class participation, 10 short (2-page) papers, final presentation

**Prerequisites:** restricted to History majors and sophomores planning to major in History

**Enrollment Limit:** 19

**Enrollment Preferences:** senior, then junior, History majors

**Expected Class Size:** 15-19

**Grading:** no pass/fail option, no fifth course option

### **HIST 301 (F) Approaching the Past: The Historian's Task**

What is the historian's task? In this seminar we will consider a variety of answers to this question by looking at how historians have practiced their craft from antiquity to the present. In the first half of the course, we will read historians from across the globe to see how the study of the past has differed across human societies from antiquity until the nineteenth century. What do their approaches have in common, and what distinguishes them? In the second half of the course we will investigate the modern historical tradition from the early twentieth century to the present, including the Annales school, economic and environmental history, microhistory, and subaltern studies. Throughout, we will discuss what lessons we can draw for our own practice as historians. Authors to be read include Herodotus, al-Mas'udi, Ranke, Bloch, Guha among others.

**Requirements/Evaluation:** Attendance and active participation, two short (5-7 pp.) papers, in-class presentations, final research proposal and

bibliography, and a longer (10-12 pp.) final research paper.

**Prerequisites:** Restricted to History majors and sophomores planning to major in History

**Enrollment Limit:** 19

**Enrollment Preferences:** The course is designed for junior and senior History majors; sophomores may enroll with instructor consent.

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

### **HIST 301 (S) Approaching the Past: The Use and Abuse of History**

Is history, like beauty, in the eye of the beholder? What is history and who gets to decide? How and where is history consumed and by whom? This course examines the use and abuse of history from the early twentieth century to the present especially how history has been impacted by the digital sphere (tv, films, social media), the rise of nationalism and the processes of globalization. First, students will grapple with what constitute notions of truth, objectivity and facts and how terminology has changed over the last 100 years. Next, we will evaluate various influential methodological trends that have impacted how history has been written and consider what was said and left unsaid, which perspectives were privileged and whose voices were marginalized. Finally, we will analyze the state of history today and how it appears in people's daily lives and especially how history is used and abused in public discourse on various media platforms. How is historical memory formed today?

**Requirements/Evaluation:** Class participation, oral presentations, several short (3-4 page) papers, and a final project.

**Prerequisites:** Restricted to History majors and sophomores planning to major in History

**Enrollment Limit:** 15

**Enrollment Preferences:** Senior then junior History majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

### **HIST 301 (S) Approaching the Past: Contemplating American Power**

Historians have long debated how best to approach the study of U.S. "diplomatic history," which is now often subsumed under the more capacious descriptor "The United States and the World." In the 1960s, prevailing orthodox interpretations of American power--often patriotic and elitist--gave way to challenges from New Left revisionist historians who focused largely on economic motives for American imperialism. By the 1970s, however, the once dominant historical field of diplomatic history was beset by a sense of crisis; its practitioners consumed with anxiety over their marginalization in a discipline that embraced social and cultural theories that that seemed to render the narrow study of Western white men in power increasingly obsolete. For the past half-century, historians of American foreign relations have engaged in a sustained and ever-shifting debate, not only about the nature of American power, but over what can and should be included within the field's parameters. Today, annual meetings of the Society for American Foreign Relation--and its marquee journal, *Diplomatic History*--feature scholarship ranging from "traditional" approaches to those centered on gender, sexuality, race, cultural exchange, emotion, environmental studies, sports, music, and more. Yet, debates still rage about whether this broadening has enriched the study of American power, or diluted it to the point of meaninglessness while discouraging young scholars from pursuing critical research on high-level diplomacy. In this course, we will grapple with key historiographical schools and critical debates, and assess the current state-of-the-field of diplomatic history.

**Requirements/Evaluation:** Participation, short papers, presentations, and a longer final paper

**Prerequisites:** Restricted to History majors and sophomores planning to major in History

### **HIST 302 (F) Islamic Law: Past and Present**

**Cross-listings:** ARAB 243 WGSS 243 REL 243 HIST 302

#### **Secondary Cross-listing**

From fear of the Shari'a to its implementation in so called "Islamic countries," Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari'a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

**Requirements/Evaluation:** weekly responses, four 2- to 3-page essays

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** majors

### **HIST 303 (S) Food in the Middle East: A History (DPE)**

**Cross-listings:** ARAB 303 HIST 303

#### **Primary Cross-listing**

In this course we examine the rich culinary history of the Middle East first among the three major religions in the region (Judaism, Christianity, and Islam), then during the time of major Islamic Empires such as the Abbasids and Ottomans, and finally in the modern period. Using an array of primary and secondary sources, we explore the social, religious, literary, and economic place of food. We will study the consumption of an attitudes toward specific foodstuffs, gauging the medicinal and culinary value of spices, the historical taboos against drinking coffee and alcohol, and the dispute over various dishes within modern nationalist constructions. We will also investigate how Middle Eastern peoples from different ethnic, geographic, and religious backgrounds have historically used food to express their distinct cultural, national, and gendered identities.

**Requirements/Evaluation:** attendance, participation, map exercise, leading discussion, 3 short essays, final paper/research project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** History and Arabic Studies majors, seniors

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**HIST 304 (S) Sacred Custodians: Environmental Conservation in Africa (DPE)**

**Cross-listings:** AFR 335 ENVI 304 GBST 304 HIST 304

Primary Cross-listing

In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of de-forestation. Ken Saro-Wiwa was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental crisis that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction, game parks, desertification, wildlife and hunting, traditional practices, and climate change.

**Requirements/Evaluation:** Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and one exam.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** If course is over-enrolled, preference to History Majors and students with a demonstrated interest in African studies.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AFR 335 (D2) ENVI 304 (D2) GBST 304 (D2) HIST 304 (D2)

**Difference, Power, and Equity Notes:** This course will intensively explore the question of how various global and local actors have defined environmental degradation and promoted approaches to conservation in Africa. It guides students through an examination of the different power dynamics that have shaped environmental conservation thought and practices on the continent. This course, therefore, provides a critical lens through which to examine the inequalities rooted in race, gender, and other forms of difference

**HIST 305 (S) A History of Health and Healing in Africa (DPE)**

**Cross-listings:** HIST 305 AFR 304 GBST 305

Primary Cross-listing

This class will explore the history of health and healing in Africa, with emphasis on the colonial and post-colonial eras. During the semester we will explore diverse medical and social interventions in African health over the past 150 years. How have African societies understood healthy communities and public health? We will examine this question through the study of spirit possession and other African healing practices but also how

they have intersected with different biomedical practices and public health programs. We will also study the patterns and social impacts of new diseases in the twentieth century, as well as transformations in the understanding and treatment of diseases long present on the continent. In particular we will explore shifting understandings of the causes, treatment, and social implications of sleeping sickness, malaria, and HIV/AIDS. The development of colonial rule, shifting environmental conditions, changing diets, and urbanization all impacted the disease landscape, as well as the way African societies have understood public health. Indeed, the themes of health, medicine and disease provide a useful lens for understanding important social transformations across the continent.

**Requirements/Evaluation:** active participation in discussion, map quiz, reading reflections, a primary source analysis paper (3-5 pages), presentation, and one research paper (8-12 pages).

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

**Expected Class Size:** 25

**Grading:** yes pass/fail option, no fifth course option

**HIST 306 (S) Indigenous Narratives: From the Fourth World to the Global South** (DPE) (WS)

**Cross-listings:** HIST 306 GBST 369 COMP 369 ARAB 369

Secondary Cross-listing

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Amazigh poetics in the Maghreb, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? What is the connection between the recent "boom" of English translations of Indigenous texts and neoliberalism, multiculturalism and neo-colonialism? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

**Requirements/Evaluation:** active class participation, several short response assignments (3-4 pages), two film reviews ( 1 page ), a performance project, and a final paper (7- to 10-pages)

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Comparative Literature majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 306 (D2) GBST 369 (D2) COMP 369 (D1) ARAB 369 (D1)

**Writing Skills Notes:** This course will enable students to write weekly while engaging with various forms of writing skills: articulating arguments in short response papers (3-4 pages each), developing visual criticism through writing two film reviews, (1 page each), journaling through writing a personal reflections on a performance project, and honing research language in producing a final paper of 7-10 pages. Instructor's feedback and peer review sessions will include review of drafts and argumentative structures.

**Difference, Power, and Equity Notes:** At the heart of this course is the history of global Indigenous struggle for liberation and decolonization. The various novels, short stories, poems, films and other texts that students will engage with narrate histories of colonial dispossession, racial oppression, economic subjugation and dehumanization of minoritized Indigenous communities in the Americas, North Africa and the Middle East.

### **HIST 307 (F) To Die For? Nationalism in the Middle East (DPE)**

**Cross-listings:** HIST 307 ARAB 307

#### **Primary Cross-listing**

In 1932, or twelve years into his rule and twelve years after the establishment of Iraq, King Faysal I lamented that there were "no Iraqi people but only unimaginable masses of human beings, devoid of any patriotic idea, imbued with religious traditions and absurdities, connected by no common tie." This course will consider how true the King's statement still holds by evaluating the various attempts at state and nation building in the modern Middle East. Some of the more prominent questions that this course will examine include: What is a nation? What are the essential characteristics of a nation? Who are a people? Why are people ready to die for the nation? And who is included and excluded in the nationalist narrative? After assessing some of the more influential theories of nationalism, we will explore the historical experience of nationalism and national identity in Egypt, Israel, Turkey, Iran, and Iraq. What has been at the basis of nationhood? How did European concepts of nation translate into the Middle Eastern context? What was the role of religion in these modern societies? How do traditional notions of gender effect concepts of citizenship? We will also explore some of the unresolved issues facing the various nations of the Middle East, such as unfulfilled nationalist aspirations, disputes over land and borders, and challenges to sovereignty.

**Requirements/Evaluation:** There will be several options to fulfill the requirements of this course including a weekly journal, oral exam or a final research paper (12-15 pages).

**Prerequisites:** None.

**Enrollment Limit:** 20

**Enrollment Preferences:** History and Arabic Studies majors, seniors, and students with a demonstrated interest in the Middle East.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 307 (D2) ARAB 307 (D2)

**Difference, Power, and Equity Notes:** This course examines the power of the state to decide who is included and not included in the nationalist narrative. How does it seek to promote unity and how does it explain differences within and outside of society? Though nationalism can be a very powerful unifying factor, this course will also consider examples where nationalism has the opposite effect.

### **HIST 311 Women Warriors, Colonial Soldiers, and Slave Armies: Soldiering and Warfare in African History (DPE)**

Soldiering is one of the oldest professions in African history. Throughout the continent's long history, ordinary soldiers have risen to become kings, queens, presidents, and held other positions of significance. Soldiers in African history have hailed from diverse backgrounds, ranging from the enslaved to those from the nobility. Notable soldiers in African history have been both men and women. Certainly, in Africa as in other world regions there is a tendency to associate the military profession with men. Yet, there have been famous female military warriors in African history, some of the

most famous ones being Queen Nzinga in the seventeenth century; the all-female military units in the kingdom of Dahomey, known for their rigor and being effective fighters; and, more recently, Alice Lakwena who commanded a rebellion that nearly brought down the Ugandan government in the late twentieth century. Some of the other themes which we will explore include how warfare was organized from the precolonial era to more recent times; the impact of changing technologies on warfare and the everyday life of armed soldiers; colonial conquest and the soldiers who fought for Europeans and those who resisted; recruitment criteria during the colonial period, and colonial military identities; service in the military as labor and rebellions and mutinies over pay and work conditions; the army and nationalism. Throughout the course we will challenge the enduring Western image and stereotype of Africa as a violent place by focusing on a) the changing conditions that have pushed individuals and communities to go to war, and b) by examining how Africans have initiated and resolved conflict. Students will analyze a variety of resources including soldiers' biographies, films, oral traditions, and archival sources that will help them to come up with their own arguments about the role of the soldiers and the military in Africa.

**Requirements/Evaluation:** active participation in discussion, map quiz, response papers, a short analytic paper (3-5 pages), presentation, and one research paper (8-12 pages).

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

**Expected Class Size:** 20

**Grading:**

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course examines the critical questions of how and why Africans have waged military campaigns, and how they have inspired others to join them. From the pre-colonial era to the present, all forms of military action in Africa were in many respects expressions of societal imbalances based on ethnicity, race, gender, generation, and class.

### **HIST 312 (S) The Mughal Empire: Power, Art, and Religion in India**

**Cross-listings:** GBST 312 ASIA 312 REL 312 HIST 312

**Primary Cross-listing**

Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith--much larger than any European empire in the early modern world--the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor's memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

**HIST 314 (F) Emperors of Heaven and Earth: Mughal Power and Art in India, 1525-1707**

**Cross-listings:** HIST 314 ARTH 314 ASST 314 ASIA 314

**Primary Cross-listing**

The Mughal dynasty ruled over most of northern India from the 16th to the 19th centuries. The Mughal Empire was the grandest and longest to rule the Indian subcontinent--much larger than any European empire in the early modern world--and it continued to have a lasting impact on South Asia. Mughals established a centralized administration with a vast complex of personnel, money and information networks. Styling themselves as 'Emperors of Heaven and Earth', the Mughal kings were also globally viewed as political innovators and unprecedented patrons of art. Their visual practices were as much a part of their imperial ideologies as their administrative and military measures. This co-taught course combines the disciplines of Art History and History to explore the intricate workings of Mughal politics and ideologies. The first of its kind to bring an interdisciplinary approach to teaching South Asia at Williams, the course asks: How did the Mughals sustain their empire for three centuries? How did they use art and politics to rule over diverse and largely non-Muslim populations? How did these Muslim imperial patrons merge Persian and Central Asian cultural values with preexisting Indian forms of administrative and artistic expression? How does Mughal culture continue to shape the South Asian imagination today? Readings will include a variety of visual and literary texts. We will delve deep into the world of biographies, travel accounts, poetry, architecture and a plethora of artworks. Students will take a hands-on approach to Mughal painting through several visits to the WCMA and a dedicated Object Lab. The primary aim of this co-taught course is to introduce students to a multifaceted picture of one of the greatest empires in pre-colonial world history. Another goal is to familiarize them with a wide range of visual and written primary sources and develop a vocabulary for 'reading' these.

**Requirements/Evaluation:** class participation and weekly responses to readings, 4-5 short papers and a final paper

**Prerequisites:** students who have previously taken HIST312 will not be permitted to take this course; no other prerequisites

### **HIST 315 (F) Minorities and the State in Modern East Asia (DPE)**

**Cross-listings:** ASIA 315 HIST 315

#### **Primary Cross-listing**

This course examines the relationships between minority peoples and the institution of the state in East Asia, focusing mostly but not exclusively on the early modern and modern periods (17th-20th centuries). We will explore the histories of the Ainu people of Japan, the "Small Peoples" of Russian Siberia, the Tibetan, Uighur and riverine communities of Mainland China, as well as the Hill Peoples of Southeast Asia. It also examines non-indigenous minority groups, such as conquest elites, mixed-race communities, and others. We will analyze how the transition to modernity, evolving understandings of race, gender, class, nation, the impact of imperialism and globalization all influenced the history of East Asian minority peoples. What, if anything, do all of these groups have in common? What do their histories reveal about the history of East Asia and of the countries in which they live? How are the lives of minority groups in East Asia changing today? What can their experiences reveal to us about the larger world? The class is structured as a reading-intensive seminar. Students will engage in and lead discussions, compose reading reaction papers and a final analytical essay. Students will be expected to use scholarly works in order to construct cogent, relevant arguments, which they will communicate both orally and in writing. Students will evaluate primary sources in order to engage with the people they study as directly as possible. Students will lead discussions on complex topics and develop as leaders and team members in professional settings. This course will present students with an opportunity to hone critical thinking and information literacy skills to a high level. All of you will have to analyze and process complex and often contradictory information, certainly in your personal lives and very likely in your professional lives.

**Class Format:** This discussion-intensive class requires students to lead several discussion sections during the semester.

**Requirements/Evaluation:** Map assignment, discussion participation, leading discussion (four times), three-page response essays (five times), final six-page research essay or presentation

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** History majors, Asian Studies concentrators, then all others

**Expected Class Size:** 15-20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ASIA 315 (D2) HIST 315 (D2)

**Difference, Power, and Equity Notes:** The study of East Asia's history is all too often conflated with the study of states, so that many less privileged histories are obscured. Chief among these are the histories of minority groups, who are often excluded from power. For this reason, this course puts the history of East Asia's many minority groups front and center in examining their multifaceted interactions with regional states, as well as the of ethnic, linguistic, religious, and regional identities

### **HIST 316 (S) A History of the Samurai**

**Cross-listings:** HIST 316 ASIA 318

#### **Primary Cross-listing**

It is difficult to find a person unaware of the samurai. However, most people, both in Japan and abroad, engage with their idealized images rather than as an actual historical phenomenon. The aim of this course is to bring the samurai to life as a distinct status group that left an indelible mark on the history of Japan, and thereby to separate fact from fiction. We will also explore the creation of iconic images of the samurai, which continue to influence worldwide popular culture. We will use academic readings, primary sources, and other media to examine the samurai from their origins during the Heian period (8th to 12th centuries) to their official dissolution in the late 19th century. We will focus on their development as a special status group and explore how they managed to maintain their corporate identity for so long. We will trace the evolution of the samurai from rural enforcers to territorial magnates to bureaucrats. This evolution affected and was affected by the development of samurai warfare, ethics, aesthetics, religious practices, ideas relating to gender roles and other aspects of samurai life, which we will explore. We will see how these ideas and practices mediated their relations with household, society, and government. Finally, we will examine why samurai status was abolished at the start of the Meiji period, and how former samurai transformed into modern citizens. Students will engage in discussion, write essays, and complete immersive historical simulation assignments.

**Class Format:** This class features a semester-long immersive historical simulation where students work in teams to create samurai clans and navigate historical, as well as historically plausible, scenarios.

**Requirements/Evaluation:** Class participation, map creation assignment, four 2-page essays, semester-long immersive simulation (Samurai clan creation), final 6-page essay

**Prerequisites:** None

**Enrollment Limit:** 25

### **HIST 317 (S) Everyday Modernity in Japan**

**Cross-listings:** ASIA 310 HIST 317

#### **Primary Cross-listing**

This course asks one overarching question: What is everyday life like in modern Japan? There, one often hears the words "modern" contrasted with "traditional." When talking about Japan itself, the former is usually coded as "western," and the latter as "Japanese." Many Japanese politicians and cultural authorities, with the help of Orientalist westerners, are happy to highlight this distinction to promote notions of Japanese uniqueness. However, though modernization in Japan did usher in tremendous, often traumatic changes, not every aspect of "modern" Japanese life came from the west, and not all western imports were/are unwelcome. Moreover, many cultural imports, such as concrete buildings and the consumption of red meat, are now interwoven into the fabric of daily life in Japan. This course examines the complex history of modernity in Japan within living memory, highlighting on its presence in the daily lives of ordinary residents of Japan. What do people eat? Where do they live? How do they think about themselves and their neighbors? We will start with the Pacific War (1937-45), but focus especially closely on postwar and contemporary Japan. We will first get a sense of the chronology and major themes in Japanese history from this time period, then explore five units, "sites of modernity" that zoom in on different but interrelated aspects of ordinary Japanese life: 1) Total War, 2) The City, 3) Work, 4) Food, 5) Race and Ethnicity. Sources and data will be drawn from scholarly works, videos, movies, websites, maps, brochures and ephemera, as well as other sources. Students will analyze these sources, discuss them and complete various assignments.

**Requirements/Evaluation:** Discussion participation, in-class exam, two 6-page analytic essays, job application assignment, syllabus unit design assignment

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** History majors, Asian Studies concentrators, then all others

### **HIST 318 (F) Nationalism in East Asia**

**Cross-listings:** ASIA 354 PSCI 354 HIST 318

#### **Secondary Cross-listing**

Nationalism is a major political issue in contemporary East Asia. From anti-Japanese demonstrations in China, to tensions on the Korea peninsula, to competitive elections in Taiwan, to controversies in Japan about how history is portrayed in high school textbooks, national identity is hotly debated and politically mobilized all across the region. This course begins with an examination of the general phenomena of nationalism and national identity and their historical development in East Asia. It then considers how nationalism is manifest in the contemporary politics and foreign relations of China, Japan, South Korea, North Korea and Taiwan.

**Requirements/Evaluation:** 2-3 short papers; final exam

### **HIST 319 (F) Gender and the Family in Chinese History (DPE)**

**Cross-listings:** WGSS 319 ASST 319 HIST 319 ASIA 319

#### **Primary Cross-listing**

Although sometimes claimed as part of a set of immutable "Asian values," the Chinese family has not remained fixed or stable over time. In this course, we will use the framework of "family" to gain insight into gender, generation, and sexuality in different historical periods. Beginning in the late imperial period (16th-18th Centuries), we will examine the religious, marital, sexual, and child-rearing practices associated with traditional ideals of family. We will also examine the wide variety of "heterodox" practices that existed alongside these ideals, debates over and critiques of gender, family, and sexuality in the twentieth century and in China today.

**Requirements/Evaluation:** active participation in discussions and group work, short skills-based writing assignments (2-4 pgs) and short essays (5-7 pgs) leading toward a final paper.

**Prerequisites:** none; open to first year-students with instructors permission

**Enrollment Limit:** 15

**Enrollment Preferences:** History, Asian Studies, and WGSS majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

### **HIST 320 (S) Emotions in Modern Japanese History**

**Cross-listings:** ASIA 320 ASST 320 HIST 320

Primary Cross-listing

Emotions have been integral to the human experience--to relationships between people, political decision making, economic behavior, individual and communal identities, international affairs, and national projects. This course will consider a full range of emotions including fear, insecurity, pride, anxiety, desire, anger, and happiness. And it will examine these emotions as both actors in history and subjects of historical inquiry. We will ask how emotions have reflected and shaped the making of modern Japan. What role have emotions played in steering the course of Japanese history, from the modernizing revolutions of the late 1800s, imperialism, colonialism, and war, to the navigation of both affluence and economic insecurity in the postwar era? How have emotions been talked about and represented in modern Japan? We will also discuss different ways of researching and writing a history of emotions.

**Requirements/Evaluation:** class discussion; response papers; research paper (12-15 pages)

**Prerequisites:** none; open to first-year students with instructor's permission

**Enrollment Limit:** 15

**Enrollment Preferences:** History or Asian Studies majors; prospective majors

### **HIST 321 (S) History of U.S.-Japan Relations, 1853-Present (DPE)**

**Cross-listings:** LEAD 321 ASST 321 HIST 321 ASIA 321

Primary Cross-listing

An unabating tension between conflict and compromise has been an undercurrent of U.S.-Japan relations since the 1850s, at times erupting into clashes reaching the scale of world war and at times allowing for measured collaboration. We will explore the U.S.-Japan relationship from the perspectives of both countries with a focus on how culture, domestic concerns, economic and political aims, international contexts, and race have helped shape its course and nature. This course will fulfill the Difference, Power, and Equity requirement by examining not just the diplomatic relationship between the U.S. and Japan, but also how various types of interactions have influenced the dynamics of power between these two countries and have shaped the ways in which each country has understood and portrayed the other.

**Requirements/Evaluation:** class participation, response papers (500 words), one short paper (5 pages), and a research paper (12-15 pages)

**Prerequisites:** none; open to first-year students with instructors permission

**Enrollment Limit:** 15

**Enrollment Preferences:** History or Asian Studies majors/prospective majors

**Expected Class Size:** 10-15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

LEAD 321 (D2) ASST 321 (D2) HIST 321 (D2) ASIA 321 (D2)

**Difference, Power, and Equity Notes:** The course focuses on differences in power (economic, cultural, political, and military) between Japan and the U.S., from the 1850s through the present. It considers the ways in which Japan has been subordinate to the U.S. for much of this history, and the conflicts that have resulted when Japan has attempted to overturn this dynamic of power. Students will acquire the skills of history and international relations to examine how race, culture, and politics have shaped this relationship.

### **HIST 325 (F) Faith and Profit in the Medieval Mediterranean**

**Cross-listings:** HIST 325 REL 325

Primary Cross-listing

In many historical societies, there have been tensions between the demands of economic and religious life. What can I sell, what should I do with money, and how shall I interact with strangers? What is the relationship between religious ideals and the habits of everyday life? These questions can become especially acute when representatives of two or more competing belief systems interact with each other. The medieval Mediterranean provides numerous rich examples of societies and individuals facing these questions. In this class, we will look at how medieval Jews, Christians, and Muslims resolved these and other dilemmas in the market societies surrounding the Mediterranean basin, as they created their own forms of religious law and economic philosophy. In the process, we will gain a more profound understanding of the roots of modern debates about capitalism, property, and economic justice.

**Requirements/Evaluation:** Attendance and participation, two short papers, one final 12-15-page research paper

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** Junior and senior History majors

### **HIST 327 (S) A History of the German Democratic Republic**

This seminar is a cultural history of the German Democratic Republic that focuses on the lives and experiences of East Germans from 1949 to 1990 and beyond. The course relies heavily on primary sources, including films, works of literature and art, ego documents such as memoirs, diaries, and letters, as well as the documentary, *The Children of Golzow*, that covers the lives of a handful of East Germans from 1960 to 2007. Proceeding chronologically, the course will consider the emergence of the GDR out of the Second World War and the Third Reich between 1945 and 1950; the GDR during the 1950s, including the workers' uprising and the brief liberalization that occurred in its aftermath; the GDR in the shadow of the Wall during the 1960s; the GDR during the 1970s under Erich Honecker with its emphasis on consumerism; the GDR during the last decade of its existence during the 1980s with increasing economic stagnation, environmental degradation, popular disillusionment, and the ascendance of the Stasi state; and, finally, the collapse of the GDR and the subsequent experience of its former citizen in the Federal Republic of Germany after 1989.

**Requirements/Evaluation:** The course will be taught in a discussion format. Evaluation will be based upon participation in class discussion, two

interpretative essays, each of approximately five pages, and a final eight-page paper due at the end of the semester.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** History majors, seniors, and then juniors

### **HIST 328 (S) The Making and Unmaking of the United Kingdom**

England may be a very old country, but the United Kingdom (technically the United Kingdom of Great Britain and Northern Ireland) is a relatively new concoction, newer in fact than the United States of America. Although James VI of Scotland ascended both the English and Irish thrones as James I in 1603, it was only in 1707 that the Acts of Union united the two separate kingdoms of Scotland and England into one nation, Great Britain. And it was only in 1800 that further Acts of Union brought Ireland into the fold, creating the United Kingdom of Great Britain and Ireland. This would itself only last until 1922 when, after bloody civil war, Ireland was partitioned, leaving only the northern six counties remaining in the United Kingdom. Largely through discussion, this course will explore the troubled making and unmaking of the United Kingdom since 1689. After considering the meaning of the nation, nationalism, and national identity, it will focus on specific moments in the history of that making and unmaking. Topics will include: the revolution of 1688-89 and subsequent Scottish Highland support for the discredited Jacobites (followers of ousted monarch, James II); Anglo-Scottish commercial interests that fueled the Acts of Union in 1707; the defeat of the Jacobites in the last battle on British soil in 1746; Anglo-Irish relations in the eighteenth century that fueled the creation of the United Kingdom in 1800 against the backdrop of the French Revolution; the nineteenth-century movement for Irish Home Rule, culminating in the Easter Rising in 1916 and the partition of the island; the more recent resurgence of Scottish and Welsh nationalism, leading to the establishment of the Welsh and Scottish parliaments and a referendum on Scottish independence; and, finally, the current dilemma of Northern Ireland. Although primarily a political history of the four nations that comprise the United Kingdom, the course will also focus on the cultural meanings of Britishness in the eighteenth century, the imperial dimensions of national belonging in the nineteenth century, multi-racial attempts to recast Britishness against the backdrop of postwar imperial decline, and recent, right-wing formations of Englishness in the context of the fragmentation of the United Kingdom and Britain's exit from the European Union.

**Class Format:** this is primarily a discussion course with the occasional lecture that will frame the material for discussion

**Requirements/Evaluation:** course evaluation will be based on regular attendance and participation in discussion, the preparation of four response papers/discussion agendas, the writing of two 6-8 page interpretive essays, and a final, take-home examination

**Prerequisites:** no prerequisites, although some familiarity with the contours of modern European history would be useful

**Enrollment Limit:** 25

**Enrollment Preferences:** preference given to History majors

**Expected Class Size:** 12-20

**Grading:** no pass/fail option, yes fifth course option

### **HIST 329 (S) The History of Witch-Hunting and Witchcraft in Medieval and Early Modern Europe**

Between the fifteenth and eighteenth centuries, some 50,000 people--overwhelmingly women, but also some men and children--were hunted, prosecuted and executed for witchcraft all over Europe and its colonies. In this seminar, we investigate through the reading of primary and secondary sources why and how this phenomenon developed in the early middle ages, and then erupted and subsided in the early modern period. We also examine the various methodologies and arguments that historians have employed and debated over the past decades to try and explain why and how witch hunting, witchcraft beliefs and prosecutions influenced and impacted European cultures and societies. Lastly, the study of witch-hunting and witchcraft will also inform our understanding of its place in the religious, political, legal, social, and cultural development of medieval and early modern Europe, as well as of its connections to the histories of European persecution, heresy, antisemitism, gender and state formations, demonology, magic, and race.

**Requirements/Evaluation:** Participation. Three essays (750 words) on a primary source, a secondary source, and witchcraft trial. A 15 minute presentation to the class on a historical work of witchcraft scholarship. A research-paper prospectus and preliminary bibliography. A final 10-12 page research paper on a witchcraft topic of choice in consultation with the instructor.

**Prerequisites:** No prerequisites. Open to first-year students with permission of instructor.

**Enrollment Limit:** 16

**Enrollment Preferences:** History majors and students with demonstrated interest in European history.

**Expected Class Size:** 16

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**Attributes:** HIST Group C Electives - Europe and Russia HIST Group P Electives - Premodern

Not offered current academic year

### **HIST 330 (S) Reformations: Faith, Politics, and the World**

**Cross-listings:** HIST 330

Primary Cross-listing

The Protestant Reformation of the sixteenth century was one of the major transformations in the history of Christianity, a faith whose 2.2 billion adherents make it the largest religion in the world today. Martin Luther and his followers sparked a schism that changed what it meant to be a Christian, and, by various reckonings, helped to create the state as we know it, the modern self, capitalism and even, as an unintended consequence, secularism. As inhabitants of a post-Protestant society, we have much to learn about the world in which we live from studying the Reformation and its legacies. While considering classic interpretations, this seminar will also probe recent research on the plural Reformations: not just Protestant but also Catholic, and not solely the elite movement of Luther and John Calvin but also the Reformation of women and peasants. What was at stake in these sweeping transformations of what it meant to be a Christian? We will consider theological debates about human agency, the changing relationship of religion and the state, female mysticism, religious warfare, iconoclasm, the arrival of Protestantism in New England, and toleration. We will work intensively in Chapin Library, examining books of hours, Bibles, missals, psalters, and primers. The seminar will also visit WCMA and the Hancock Shaker Village. Authors to be read include Luther, Calvin, Teresa of Ávila, Jean Bodin, Ignatius of Loyola, and John Winthrop. Note: due to the constraints of rare-book research, enrollment is capped at 12.

**Requirements/Evaluation:** two short papers (5-7 pages) and a longer final paper (10-12 pages)

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** History majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

### **HIST 331 (F) European Intellectual History from Aquinas to Kant**

The scholars and philosophers of early modern Europe set the agenda for much of modern thought concerning epistemology, morality, religion, and politics. Many of their debates still inform our intellectual world: How do we know what we know? Is human nature intrinsically selfish? What is the nature of God, and of His revelation? Should we prefer individual freedom or political stability? Our seminar will retrace the long and winding path from the intellectual culture of late medieval Europe to that of the Enlightenment. We will try to understand how a Christian culture of manuscript books, whose inquiries were conducted in Latin, transformed into a secular culture of public debate in new printed publications such as journals and newspapers in vernacular languages (English, French, German, etc.). In the process, we will encounter the foundational movements that structured European thought and the making of knowledge in these centuries: scholasticism, humanism, the new philosophy and the Enlightenment. Ultimately, we will recover the arguments of major thinkers and consider what they can teach us today. Authors to be read include Petrarch, Christine de Pizan,

Thomas More, Descartes, Leibniz, Montesquieu and Rousseau.

**Requirements/Evaluation:** attendance and participation; two short papers; a longer final paper

### **HIST 332 (F) Queer Europe: Sexualities and Politics since 1850 (DPE)**

**Cross-listings:** HIST 332 WGSS 331

#### **Primary Cross-listing**

This course explores the construction, articulation, and politics of queer sexual desire in Europe from the mid-nineteenth century to the present. By placing queer sexualities in their broader social and political context, the course examines the ways in which sexuality has become central to questions of identity, both personal and national, in modern European society. Topics include: ways of thinking about the queer past; women's "friendships" in Victorian Britain; the role of the new science of sexology in specifying various "sexual perversions"; the rise of sexual undergrounds in the context of European urbanization; the birth of campaigns for "homosexual emancipation"; attempts to regulate and suppress "deviant" sexualities, especially under the fascist and Nazi regimes in the 1930s; the effects of the postwar consumer revolution on the practices of sexual selfhood; the postwar "sex change" debates; the politics of 1950s homophile organizing and the 1970s Gay Liberation Movement; and recent debates about migrant queer identities in an increasingly multicultural Europe. The course will focus primarily on experiences in Britain, France, and Germany, but with some detours to Italy and Russia. Readings will be drawn from sexological texts, political tracts, memoirs, and the writings of recent historians and theorists. Several films will be screened and will also be central to our discussions of the changing meanings of sexual selfhood in modern European societies.

**Class Format:** This course will be taught as a discussion course, with discussions focused on the assigned readings.

**Requirements/Evaluation:** The class will be taught entirely in discussion mode and students will be expected regularly to contribute to the discussion of the readings and films for the course. Evaluation will be based on the quality of those contributions, the posting of three 3-page graded response papers on the readings (chosen by the students) and two interpretive essays of approximately 8 pages each.

**Prerequisites:** None; open to all students.

**Enrollment Limit:** 25

**Enrollment Preferences:** Junior and Senior History majors, along with Women's, Gender and Sexuality Studies majors, will be given enrollment preference if the class is over-enrolled. But other students are welcome if space is available.

**Expected Class Size:** 15-20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 332 (D2) WGSS 331 (D2)

**Difference, Power, and Equity Notes:** "Queer Europe" is a DPE course insofar as it explores the mechanisms by which sexual difference has been constituted, contested, and experienced and addresses how what we assume to be the "sexual norm" has a profoundly political history. It focuses on the means by which norms are created and enforced through the operations of power and on how those norms have been challenged and resisted by individuals who have come to understand themselves outside the normative categories of sexual selfhood.

Fall 2022

SEM Section: 01 MR 1:10 pm - 2:25 pm Chris Waters

### **HIST 335 (F) Weimar Germany**

The Weimar Republic has been examined and re-examined, not only in an effort to account for the failure of democracy and the rise of Hitler in Germany but also for its remarkable artistic achievements. Using a variety of primary documents, including movies, works of art and literature, as well as more traditional historical sources and the writings of historians, this course will consider the social, political, and cultural history of the Weimar Republic. At issue in the course will be the relationship between the political and social instability and the cultural blossoming that characterized Germany during the 1920s. We will also consider whether the Weimar Republic in general, and Weimar culture, in particular are better understood as the product of Germany's past or as harbingers of its future.

**Requirements/Evaluation:** participation in class discussion, two essays, each of approximately 5 pages, and one 8-page paper due at the end of the semester

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** students with background in European history, or History majors

**Expected Class Size:** 10-12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** HIST Group C Electives - Europe and Russia

Not offered current academic year

### **HIST 336 (S) National-Socialist Germany**

This course is a history of National-Socialist Germany based to a considerable extent on primary documents. Students will use the documents to reconstruct the history of the Third Reich and to articulate and assess some of the principal historiographical debates relating to National-Socialist Germany. The course will consider the following topics: the failure of the Weimar Republic and the rise of National Socialism; the consolidation of Nazi rule; the experiential reality of the *Volksgemeinschaft*; the popularity of National Socialism; youth and women in the Third Reich; Nazi culture; Nazi racism and image of the Jew; Gestapo terror; the pre-war persecution of Jews; popular German anti-Semitism; the regime's euthanasia program; the Nazi Empire; the experience of war in Russia; the implementation of the "Final Solution to the Jewish Problem"; German knowledge of and complicity in the "Final Solution"; the experience of "total war" on the home front; resistance to National Socialism; and the collapse of the Third Reich. The course will focus especially on how ordinary Germans experienced and participated in the history through which they lived. We will take an empathic approach to National-Socialist Germany and to the Germans who lived through this period, attempting to understand why they felt, thought, and acted as they did. We will also consider the epistemological and ethical problems involved in attempting to empathize with Nazis.

**Class Format:** discussion

**Requirements/Evaluation:** active and effective participation in class discussion, two 5-page analytic essays on two of the topics considered in the course, and a final 7-page interpretative essay: the two analytic essays on an assigned course topic (50%); the final interpretative essay (30%); class participation (20%)

**Prerequisites:** none; open to all

**Enrollment Limit:** 25

**Expected Class Size:** 20-25

**Grading:** no pass/fail option, yes fifth course option

**Cross-listings:** HIST 338 JWST 338 REL 296

Primary Cross-listing

In twenty-first century United States, the murder of approximately six million European Jews by Nazi Germany remains a central event in our political, moral, and cultural universe. Nevertheless, the Holocaust still confounds historians' efforts to understand both the motivations of the perpetrators and the suffering of the victims. In this course, we will study the origins and unfolding of Nazi Germany's genocidal policies, taking into consideration the perspectives of those who carried out mass murder as well as the experiences and responses of Jews and other victim groups to persecution. We will

also examine the Holocaust within the larger context of the history of World War II in Europe and historians' debates about Germany's exterminatory war aims. Course materials will include diaries, speeches, bureaucratic documents, memoirs, films, and historical scholarship.

**Class Format:** mostly discussion

**Requirements/Evaluation:** class participation, weekly reading responses, a map quiz, two papers (5-7 pages) on class readings, a final research paper (10-12 pages)

**Prerequisites:** none; open to first-year students with instructors permission

**Enrollment Limit:** 25

**Enrollment Preferences:** History majors and Jewish Studies concentrators

**Expected Class Size:** 20-25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 338 (D2) JWST 338 (D2) REL 296 (D2)

### **HIST 339 The German Democratic Republic: A Cultural History**

This course is a history of the German Democratic Republic largely as experienced by its citizens. Using primarily cultural documents, novels, films, works of art, and documentaries, along with more traditional historical documents, the course will seek to reconstruct and analyze the experience of East Germans from 1945 until 1989 and beyond. Topics to be considered include the legacy of the Third Reich and the lost war, the founding of the socialist state, the impact of Marxist ideology on the lives of East Germans, the Ulbricht era, the impact of the building of the Wall in 1961, the Honecker era and the emergence of the Stasi state, the end of the GDR in 1989, and the experiences of East Germans in unified Germany.

**Requirements/Evaluation:** Two interpretative essays and a longer final paper.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** History majors, seniors, juniors, sophomores, in that order

**Expected Class Size:** 25

**Grading:**

**Distributions:** (D2)

**Attributes:** HIST Group C Electives - Europe and Russia

Not offered current academic year

### **HIST 340 (F) Anticolonial Europe: A History of Transnational Solidarity (DPE)**

This seminar examines the history and paradoxes of European anticolonialism from the turn of the twentieth century to the 1970s. By following the anticolonial networks that developed in four European cities -- Paris, London, Berlin, and Moscow, it interrogates how political activists -- from both the Global South and North -- collaborated to establish a more racially egalitarian world order. It evaluates how events such as the First World War and the formation of the UN transformed their collective political projects. Finally, it investigates the multiple intellectual and political traditions which activists drew upon to contest Europe's racialized hegemony. Students can expect to gain an introduction to the 20th century's European-based anticolonial movements, as well as methods of transnational and global history.

**Requirements/Evaluation:** Class participation, one 5-7-page historiographical essay, and one 10-12-page research paper

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** History majors, seniors, and then juniors

**Expected Class Size:** 25

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course investigates the legacies of Europe's racialized hegemony. Students learn about how anticolonial activists in the twentieth century navigated questions of class, race, and national identity. Additionally, they learn how historians have used different historical methodologies to write the history of anticolonialism more inclusively.

### **HIST 346 (F) Modern Brazil (DPE)**

**Cross-listings:** AFR 346 HIST 346

#### **Primary Cross-listing**

Brazil has been the "country of the future" longer than it has been an independent nation. Soon after Europeans descended on its shores, Brazil was hailed as a land of resources so rich and diverse that they would inevitably produce great wealth and global power for its inhabitants. Although this has often contributed to an exaggerated patriotism, it has also fostered ambiguity--for if the label suggests Brazil's potential, it also underlines the country's failure to live up to that promise. This course will examine Brazil's modern history by taking up major themes from Independence to the present. Beginning with a "bloodless" independence that sparked massive civil wars, we will analyze the hierarchies that have characterized Brazilian society. The course will give particular attention to themes of race, gender, sexuality, and citizenship; national culture and modernity; and democracy and authoritarianism in social and political relations.

**Class Format:** discussion

**Requirements/Evaluation:** class participation will count for 20% of final grade; each of two 5-page papers will count for 25%; and a final 8- to 10-page paper will count for 30%

**Prerequisites:** none; open to first-year students with instructors permission

**Enrollment Limit:** 25

**Enrollment Preferences:** History majors, Latino/a Studies concentrators

**Expected Class Size:** 20-25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AFR 346 (D2) HIST 346 (D2)

**Difference, Power, and Equity Notes:** The course--in all of its readings, discussion, papers--centers on the formation of different and dynamic identities in 19th- through 21st-century Brazil. Throughout the semester we examine how Brazilians created, recreated, and/or rejected categories of difference and how these resulting actions connected to broad political and cultural changes. Links to current questions--like the struggles of communities of quilombolas (descendants of runaway or freed slaves)--receive particular attention

**Not offered current academic year**

### **HIST 347 (S) Democracy and Dictatorship in Latin America (DPE)**

The scarcity of stable and democratic governments in Latin America has frustrated observers across the region and beyond for almost 200 years. This course will examine the historical creation of both democratic and anti-democratic regimes in different national cases, seeking to identify the conditions that have fostered the apparent persistence of dictatorial tendencies as well as diverse forms of pro-democratic and social justice activism. Our main cases will be Brazil, Argentina, Mexico, Peru, and the countries of Central America, but we will address the region as a whole. In this regard we will look at the social and economic forces as well as the political actors and ideologies that have contributed to distinct, if often parallel, outcomes. At the same time, we will also question the criteria we use to label regimes "democratic" or "dictatorial"--and the implications of our choice of criteria.

**Requirements/Evaluation:** class participation, response papers, two short papers, and a longer (10-page) final essay

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** History majors

**Expected Class Size:** 22-25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course examines the production of unequal power relations along racial/ethnic, gender, national, and regional lines. Furthermore, it analyzes the creation of diverse--and biased--categories by which Latin Americans and their political movements and systems have been evaluated since the nineteenth century.

### **HIST 352 (F)(S) American Maritime History (DPE) (WS)**

**Cross-listings:** HIST 352 MAST 352

#### **Secondary Cross-listing**

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

**Class Format:** Seminars, discussions, and field seminars

**Requirements/Evaluation:** Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

**Prerequisites:** None

**Enrollment Limit:** 27

**Enrollment Preferences:** If course over-enrolls, preference will be given to sophomores and juniors

**Expected Class Size:** 22

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Offered only at Mystic Seaport

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 352 (D2) MAST 352 (D2)

**Writing Skills Notes:** Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

## **HIST 354 (F) The Revolutionary Generation: Galaxy of Leaders**

**Cross-listings:** PSCI 257 LEAD 285 HIST 354

### **Secondary Cross-listing**

The American Revolution produced a galaxy of brilliant and creative statesmen and intellectuals: Washington, Hamilton, Jefferson, Madison, Adams. In this seminar, we will study their astounding accomplishments--a successful war of independence, a Constitution and Bill of Rights, enduring democratic political institutions, and a nascent party system. But mostly we will focus on their ideas, for they were thinking revolutionaries. We will examine in depth and in detail their superb writings, their letters and speeches as well as Madison and Hamilton's Federalist essays. We will also read recent interpretations of the founding generation by Gordon Wood, Joseph Ellis, Bernard Bailyn, and others.

**Requirements/Evaluation:** three papers, weekly class presentations, and active participation in all discussions

**Prerequisites:** none; courses in Leadership Studies or Political Theory or early American History are very helpful for admission to this seminar

**Enrollment Limit:** 10

**Enrollment Preferences:** students with a background in Leadership Studies, American History or American Political Science

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

## **HIST 355 (F) The CIA and American Foreign Policy**

**Cross-listings:** PSCI 361 LEAD 361 HIST 355

### **Secondary Cross-listing**

Despite an American aversion to espionage captured by Secretary of State Henry Stimson's oft-cited (yet unsubstantiated) remark, "Gentlemen don't read each other's mail," intelligence history in the United States dates back to the Revolutionary War. Still, it took the shock of Pearl Harbor for the United States to establish a permanent peacetime civilian intelligence service independent of another federal department--the Central Intelligence Agency. Since then, the agency and others which comprise the loose entity called the Intelligence Community (IC) have played a pivotal albeit intensely controversial role in US foreign and national security policies. Yet their roles and missions remain largely misunderstood and divisive, as attested to by recent debates surrounding the multiple investigations of the 9/11 tragedy, the flawed pre-war estimates of Iraq's Weapons of Mass Destruction (WMD) capabilities, the reporting on Benghazi, the Snowden revelations, and much more. This course seeks to provide greater understanding of the relationship between intelligence and US foreign and national security policy by examining the CIA's and IC's roles and responsibilities, illuminating their history alongside the history of America and the World, assessing their successes and failures, evaluating their reforms, and correlating their behavior and capabilities with US values and institutions.

**Requirements/Evaluation:** Midterm, several short papers, and a research paper.

**Prerequisites:** None

**Enrollment Limit:** 14

**Enrollment Preferences:** Political Science and History Majors, prior coursework in American foreign policy.

**Expected Class Size:** 14

### **HIST 358 (S) The Roosevelt Style of Leadership**

**Cross-listings:** LEAD 325 HIST 358

Secondary Cross-listing

In this seminar, we will study the political and moral leadership of Theodore, Franklin and Eleanor Roosevelt. The three Roosevelts transformed and expanded the role of government in American society, bringing about fundamental and lasting change. What were their leadership strategies and styles? How did TR and FDR differ in their approaches to leadership? Were the ideas behind TR's "Square Deal" and FDR's "New Deal" similar? How did Dr. New Deal become Dr. Win-the-War? How did they balance political deal-making with bold, principled leadership? What kind of leadership role did Eleanor Roosevelt play? In addition to studying biographies and especially the writings and speeches of TR, FDR, and ER, we will do research using the Proquest data base of historical newspapers, to see history as it was being made.

**Requirements/Evaluation:** Participation in class discussions, oral reports, several short papers and one research paper.

**Prerequisites:** Courses in Leadership Studies and American Political Science and American History are very helpful for admission to this seminar

**Enrollment Limit:** 12

**Enrollment Preferences:** Leadership Studies concentrators and students with a background in American history and Political Science

**Expected Class Size:** 12

### **HIST 360 (F) Mapping North America: Critical Cartographies (DPE)**

This course examines histories of mapping: what maps show, and what places the practices of cartography have tended to erase, distort, or conceal. Focusing on North America, it examines how Native Americans, African-Americans, and Euro-colonial peoples strongly contested the meanings and representations of "place." Course topics include Indigenous mapping traditions and concepts of homelands spaces; European navigational strategies and colonialism; urban planning; and scientific as well as military depictions of particular lands and waters, especially west of the Mississippi River. The course teaches strategies for employing maps as primary sources, and ways of understanding the historical and ideological circumstances of their production and circulation. It will offer opportunities to critically engage cartographic materials in Williams College's archival and museum collections, and to develop independent research projects.

**Requirements/Evaluation:** class discussion, response papers, short analytic essays, final project

**Prerequisites:** one History or American Studies course

**Enrollment Limit:** 15

**Enrollment Preferences:** sophomore, junior, and senior History and American Studies majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course offers critical perspectives on mapping and the close connections between representations of space/place and the exercise as well as contestation of power. Particular attention is devoted to Native American/Indigenous mapping and "counter-mapping" projects and methodologies, as well as scholarship from the African diaspora that stresses the active role of mapping in creating and also resisting racialized social regimes.

### **HIST 361 (F) The Atlantic World: Connections, Crossings, and Confluences (DPE)**

**Cross-listings:** HIST 361 AMST 360

#### **Primary Cross-listing**

Early Americans inhabited an interconnected world through which people, beliefs, and objects circulated. This course explores the "Atlantic World" as both a place and a concept: an ocean surrounded by diverse communities and empires, and an imagined space of shared or competing affiliations. Moving from the tenth century to the nineteenth, it examines ecological, cultural, political, economic, intellectual, and religious exchanges among Native Americans, Europeans and colonizers, and Africans and African Americans. It introduces both conceptual dimensions of this Atlantic paradigm and case studies that investigate its human subtleties, with the goal of examining early American history through a transnational lens. The course will take up the stories of Wabanaki mariners and Norse/Viking expansionists; Pocahontas, a trio of Inuit people, and myriad other Indigenous travelers to Europe; West African survivors of the Middle Passage and their enslaved descendants who pushed for survival and recognition of their humanity overseas; New England religious dissidents, intellectuals, and profiteers from Caribbean slavery; Touissant L'Ouverture and the reverberations of the Haitian Revolution; and whaling ship crews who pursued cetaceans ever farther out at sea, among other topics. The course also delves into new methodologies for telling histories that have been unevenly presented or seemingly silenced in traditional documentary archives, probing ways that oral traditions, songs, archaeology, material culture, and other forms of expression and representation can help recast the nature and meanings of these connected spaces and histories. Additionally, it provides an opportunity to engage with original materials pertaining to Atlantic World histories in the Williams College Archives/Special Collections and Art Museum.

**Class Format:** will alternate with seminar-type discussion of readings

**Requirements/Evaluation:** active participation in class discussion, several short essays based on readings and discussion topics, museum/archives exercise, final essay

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** sophomore, junior, and senior History majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 361 (D2) AMST 360 (D2)

**Difference, Power, and Equity Notes:** This course examines the formation, expression, and articulation of racial, ethnic, cultural, and other forms of difference in the historical Atlantic World, and the ways that peoples of Indigenous and African descent engaged with and challenged European colonization. It devotes substantial time to critical methodologies that re-center voices oftentimes treated as "silenced" or "absent" in older literatures, and helps students build fluencies in recovering and analyzing these lives.

### **HIST 366 (S) What They Saw in America**

**Cross-listings:** SOC 244 AMST 244 HIST 366

#### **Secondary Cross-listing**

This course traces the travels and writings of four important observers of the United States: Alexis de Tocqueville, Max Weber, G.K. Chesterton, and Sayyid Qutb. The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider's view of America--one that sheds light on persisting qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors' respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race.

**Requirements/Evaluation:** A midterm examination, two short essays, and a final paper.

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Priority given to Sociology, History, Anthropology, and American Studies majors.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**HIST 367 (F) Black History is Labor History (DPE) (WS)**

**Cross-listings:** AFR 367 HIST 367

Primary Cross-listing

This seminar explores labor history in relation to black people, spanning the colonial period to the early twenty-first century. It racializes the history of work by tracing the long story of black labor in the U.S. from the plantation to the plant. Whereas the bulk of the course will analyze black labor and labor movements in the twentieth century, specifically focusing on the push for economic inclusion and mobility amid employment, societal and union-related racial discrimination, we will examine what involuntary black labor meant in the context of slavery and the construction of a capitalist economy. Likewise, we will devote attention to black workers with regard to such topics as antiunionism, deindustrialization, economic inequality, Fordism, informal economies, Jim and Jane Crow, labor radicalism and violence, New Deal and welfare, the rise of civil rights unionism, and slavery and capitalism, among other themes.

**Requirements/Evaluation:** Students are expected to participate actively and will write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages) in consultation with the instructor and will be required to submit a topic proposal and outline, an annotated bibliography, and a peer-reviewed draft of the final paper.

**Prerequisites:** Recommended for students with sophomore standing or above and first-year students who both have taken a 200-level history course and have received instructor permission to enroll into the course.

**Enrollment Limit:** 25

**Enrollment Preferences:** HIST and AFR majors followed by students with sophomore, junior, or senior standing. If the course is overenrolled, students will be given a questionnaire and only first-year students who have completed a 200-level history course will be enrolled.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AFR 367 (D2) HIST 367 (D2)

**Writing Skills Notes:** Students will be required to write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages). Throughout the semester, these writing assignments will total roughly 22-30 pages. Students can expect to have line-edited feedback on their papers with substantial and timely, writing-related suggestions for improvement.

**Difference, Power, and Equity Notes:** This course racializes the study of labor history, focusing on black people and their experiences in the United States from the plantation to the plant. It challenges students to confront and to redefine what it means to labor, grasping how slavery, segregation, and systemic inequalities amid black people's pursuit of citizenship, equality, and freedom have shaped their economic, political, and social conditions and identities.

## **HIST 368 (F) Framing American Slavery (DPE)**

**Cross-listings:** AFR 363 AMST 368 HIST 368

### **Primary Cross-listing**

**Readings in American Slavery** This course will delve into how and what historians have written about US slavery for the last century or so. Rather than marching through time, like we might in a survey course, we'll explore the nooks and crannies of slavery's history. We'll consider gender and sexuality, labor and capitalism, regional difference, maritime culture, and every day life. We'll compare histories produced well before the Civil Rights Movement to books written afterward. We'll consider the obstacles and challenges Black scholars faced in the academy and consider the significance of their work. Finally, we'll examine slavery's role in today's world, beginning with the institution's relationship with American universities and continuing on to the recent protests against monuments and statues.

**Requirements/Evaluation:** Four written essays/reviews, final paper. Students must also complete reading and contribute to class discussions.

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** Priority given to History, American Studies, and Africana Studies concentrators/ majors.

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AFR 363 (D2) AMST 368 (D2) HIST 368 (D2)

**Difference, Power, and Equity Notes:** This course will explicitly examine how power worked and changed during the centuries of legal slavery in the United States. Since lawmakers joined power and violence to definitions of whiteness and blackness, we will study how these definitions emerged and changed over time. Students will address issues of violence, legal and extra legal means of continuing slavery through changing political and economic conditions. Additionally, the course will consider the racial barriers in the academy.

**Attributes:** HIST Group F Electives - U.S. + Canada

**Not offered current academic year**

## **HIST 370 (F) The Caribbean and the World: 1945-1968**

**Cross-listings:** AFR 370 HIST 370

### **Secondary Cross-listing**

The ending of the Second World War in 1945 coincided with the dawn of a new nationalism in the modern Caribbean. The British territories were beginning their shift away from colonialism and charting a path toward independence that would arrive in the early 1960s. Their independent neighbors contended with US imperialism which greatly shaped questions of race, nationalism, and sovereignty. By the 1960s much of the region faced crises that grew out of the tensions of the postwar period. This course examines closely these transformations in the Caribbean. It is divided into three parts. The course begins with an examination of the ideas about race, state development and empire that dominated Caribbean intellectual discourse of the 1940s. Key texts for this period include the works of Caribbean intellectuals such as Roger Mais, Una Marson, CLR James, and Jacques Roumain who considered the possibilities of racial equality and democracy in the postcolonial Caribbean. The course then looks more closely at 1950s attempts to forge greater Caribbean unity during the early Cold War years. West Indian Federation and the circuits of travel within the Caribbean are given special focus. Finally, the course will discuss challenges of the postcolonial Caribbean by looking at the circumstances and wider responses to regional radicalism in the 1960s. The key events that will be examined in this section include the Duvalier dictatorship, the Cuban Missile Crisis, and black power in Jamaica in 1968.

**Requirements/Evaluation:** class participation, 3-4 short papers (5-7 pages)

### **HIST 372 (F) The North American West: Histories and Meanings**

This course will explore the various and contested histories of the geographical region in North America that Americans often call "the West." With porous boundaries; changing empires and national borders; an extraordinarily diverse mix of peoples; and most importantly, continuous Indigenous presence to the present day, this region poses foundational questions about the construction of American history. What if, from the vantage point of the 1780s, we look not at the founding of the United States in the East but at the elaboration of the Spanish mission system in California and other parts of the Southwest? What if, instead of understanding "the West" as a place that people migrated "to" from "the East," we think about "the West" as a place diversely inhabited for thousands of years that experienced very sudden and violent forms of military conquest and settler colonialism, as well as waves of migration from many different compass points around the globe? And where do Americans narratives of western "individualism" fit into the histories of massive federal interventions in "the West"? We will take up these and many other questions as we examine topics from the era before Europeans arrived in North America to the present day.

**Requirements/Evaluation:** class participation; 3 brief writing assignments (2-4 pages); one 6-8 page research paper, based on a primary source; 24-hour take-home exam.

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** History majors and students who have taken previous History courses.

### **HIST 376 (S) Sex, Gender, and the Law in U.S. History (DPE)**

This course explores how the law in America has defined and regulated gender and sexuality. We will evaluate how the law has dictated different roles for men and women, how sexual acts have been designated as legal or illegal, and the ways that race, class, and nationality have complicated the definition and regulation of gender and sexuality. We will examine how assumptions about gender and sexuality have informed the creation and development of American law, contested interpretations of the Constitution, and the changing meanings of citizenship; We will consider how seemingly gender neutral laws have yielded varied effects for men and women across race and class divides, challenging some differences while naturalizing others. Finally, we will examine the power and shortcomings of appeals to formal legal equality waged by diverse groups and individuals. Throughout the course, we will consider the various methodologies and approaches of the interdisciplinary field of legal history. Topics to be covered will include the Constitution, slavery, marriage, divorce, custody, inheritance, immigration, sexual violence, reproduction, abortion, privacy, suffrage, jury duty, work, and military service.

**Requirements/Evaluation:** four papers, including three 4- to 6-page papers, and one final paper of 8-10 pages

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** History majors, Women's, Gender and Sexuality Studies majors

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course fulfills the DPE requirement because it examines the legal, social, and political constructions and theorizations of difference, power, and equity. It examines the ways that individuals and groups have organized across various axes of difference to fight for legal equality, and explores how those individuals and groups have experienced legal equality and legal inequality in varied ways.

**Cross-listings:** HIST 379 WGSS 379 AFR 379

#### **Primary Cross-listing**

As slaves and free women, activists, domestics, artists and writers, African Americans have played exciting and often unexpected roles in U.S. political, social, and cultural history. In this course we will examine black women's lives from the earliest importation of slaves from Africa and the Caribbean through to the expansion of slavery, the Civil War, freedom, Jim Crow, the Civil Rights movements, and up to the present day. Consistent themes we will explore are the significance of gender in African American history and the changing roles and public perceptions of black women both inside and outside the black community. We will read and discuss a combination of primary and secondary sources; we will also consider music, art, and literature, as well as more standard "historical" texts.

**Class Format:** discussion

**Requirements/Evaluation:** student participation, three papers, and a brief oral presentation

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** History, WGSS, and American Studies Majors, and Africana Concentrators.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 379 (D2) WGSS 379 (D2) AFR 379 (D2)

**Difference, Power, and Equity Notes:** This course meets the Difference, Power, and Equity requirement. The course focuses on empathetic understanding, power, and privilege, especially in relation to class, gender, and race within a U.S. context. We will study the ways in which the conflicts arose within the Black community and how Black women, usually without official positions as leaders, emerged as organizers and leaders in political and social movements.

### **HIST 383 (F) Religion and American Capitalism**

**Cross-listings:** REL 283 HIST 383

#### **Secondary Cross-listing**

Was Jesus a revolutionary socialist or a savvy salesman? Does capitalism bring prosperity to the virtuous or lead us to worship Mammon? Shall the meek inherit the earth or should the hand of the diligent rule? Is it holy to be poor or is prosperity our moral duty? These questions have long preoccupied religious believers, and their changing answers have transformed the history of American capitalism. This course invites students to study that history, from the early 19th century to the present. It will cover such topics as: utopian communes; the political economy of slavery; working-class religion and labor organizing; Christian and Jewish socialism; big business and the Prosperity Gospel; 'New Age' spirituality and the counterculture; liberation theology and racial capitalism; and conservative Christianity in the age of Wal-Mart and Chick-Fil-A.

**Requirements/Evaluation:** Participation in group discussion; five response papers (300-400 words); two essays (4-6 pp); final research paper (8-10 pp).

**Prerequisites:** None; open to all students.

**Enrollment Limit:** 15

**Enrollment Preferences:** Religion and History majors.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2)

Fall 2022

SEM Section: 01 Cancelled

**HIST 385 (F) Latinx Activism: From the Local to the Transnational (DPE) (WS)**

**Cross-listings:** LATS 385 HIST 385

**Primary Cross-listing**

Latinas/os/x's have long sought inclusion in the U.S. polity and society, while the meanings of inclusion and the means to achieve it have shifted historically. For Latinxs, activism is often shaped by the specific dynamics of each group's migration to the United States and by their arrival into a particular context. Home country politics and transnational connections can remain important. Yet local activism to meet immediate needs and to address critical issues becomes important as well. Working within existing structures, Latinx communities have at times questioned and challenged those existing structures, as activists have addressed a wide variety of often intersecting issues. This course roots itself in the historical progression of Puerto Rican and Mexican-American activism, before turning to the social and political movements of the late 1960s and 1970s, as shaped by Puerto Ricans, Chicanos/as, Cubans, and Dominicans. The 1980s witnessed increased immigration from several Central and South American countries, arriving in the context of reactions to those political and social movements, as well as increased U.S. intervention in their countries of origin--a context that again shaped both local and transnational activism. Students' final projects will be anchored within this historical framing and within the lens of local and transnational activism, while moving forward in time to consider more contemporary dimensions of Latinx activism.

**Class Format:** This is a discussion-based and writing intensive course, so reading and full participation is important. Students will be expected to read each other's work and to provide thoughtful and constructive feedback.

**Requirements/Evaluation:** Class participation and presentations; several 3-4 page essays; final paper of 12-15 pages, as well as proposal, bibliography, and drafts

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** History majors and Latina/o Studies concentrators, seniors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

LATS 385 (D2) HIST 385 (D2)

**Writing Skills Notes:** Several writing assignments of 3-4 pages provide the foundation for 12-15 page final papers. In consultation with the professor, students select a topic and submit a 3-4 page proposal with a bibliography. Students submit a draft for a workshop session with other students. A final presentation is another opportunity to hone arguments and use of evidence, as well as to receive feedback on revised drafts from the professor.

**Difference, Power, and Equity Notes:** This course examines how Latinx communities have sought inclusion in U.S. society and polity, in the face of marginalization based on race, ethnicity, class, gender, sexuality, and/or political perspective, as well as other intersecting markers of difference. Questions of difference, power, and equity are analyzed at the structural, community, and individual levels.

**HIST 388 (F) Decolonization and the Cold War**

The second half of the twentieth century came to be defined by two distinct, yet overlapping and intertwined phenomena: the Cold War and decolonization. In the two decades that followed the end of WWII, forty new nation-states were born amidst the bipolar struggle for global supremacy between the Soviet Union and the United States. Those new nations were swept up in the Cold War competition in ways that profoundly influenced their paths to independence and their postcolonial orders, but they often had transformative effects on the Soviet-American rivalry as well. In this

course, students will focus on two related questions: How did decolonization influence the Cold War and the international behavior and priorities of the two superpowers? And what impact did the Cold War exert on the developing states and societies of Asia, Africa, the Middle East, and Latin America? Course materials will consist of scholarly texts, primary sources, memoirs, films, and fiction.

**Requirements/Evaluation:** class participation, several short papers, and a 10- to 12-page final paper

### **HIST 389 (S) The Vietnam Wars (DPE)**

**Cross-listings:** LEAD 389 HIST 389 ASIA 389 ASST 389

#### **Primary Cross-listing**

This course explores Vietnam's twentieth century wars, including an anti-colonial war against France (1946-1954), a massive Cold War conflict involving the United States (1965-1973), and postcolonial confrontations with China and Cambodia in the late-1970s. Course materials will focus primarily on Vietnam's domestic politics and its relations with other countries. Lectures, readings, films, and discussions will explore the process by which Vietnam's anti-colonial struggle became one of the central conflicts of the Cold War, and examine the ramifications of that fact for all parties involved. The impact of these wars can hardly be overstated, as they affected the trajectory of French decolonization, altered America's domestic politics and foreign policy, invigorated anti-colonial movements across the Third World, and left Vietnam isolated in the international community. Students will read a number of scholarly texts, primary sources, memoirs, and novels to explore everything from high-level international diplomacy to personal experiences of conflict and dramatic social change wrought by decolonization and decades of warfare.

**Requirements/Evaluation:** class participation, several short papers, and a 10- to 12-page final paper

**Prerequisites:** none; open to all

**Enrollment Limit:** 15

**Enrollment Preferences:** History and Asian Studies majors

### **HIST 390 (S) Race, gender and science: A Black, Brown, and Queer inquiry into Science and Technology Studies (DPE)**

**Cross-listings:** HIST 390 STS 302

#### **Secondary Cross-listing**

The protests that followed the murder of George Floyd have brought to the fore the realities of racism and violence that Black, Indigenous and People of Color experience daily. They also motivated a long overdue reckoning in various fields and institutions with the legacy of structural racism, and of colonial history. The history of modern science, technology and medicine is intractably connected to questions of race, gender, sexuality and colonialism. Scientific knowledge has been influenced by debates related to human difference and to colonialism, and has also contributed to the

production of ideas around difference and distinction as well as around equality and equity. In this course, we will take a deeper look into different episodes in the history of modern science, technology and medicine, and will engage in a Black, Brown and Queer reading and investigation of science and technology. The course will offer a deep historical and methodological introduction to STS, as well as to a number of critical disciplines, such as Critical Race Theory, Postcolonial and decolonial theory, queer theory, in relation to science, technology and medicine. This course can serve as an alternative to STS 101.

**Requirements/Evaluation:** 2 response papers (3-5pages each) + final project (could be a 10-15p paper or creative project of any kind)

**Prerequisites:** Previous courses in STS, history, CRT, WGS, or similar disciplines is preferred but not necessary.

**Enrollment Limit:** 10

**Enrollment Preferences:** Juniors and Seniors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**HIST 391 (S) When India was the World: Trade, Travel and History in the Indian Ocean** (DPE) (WS)

**Cross-listings:** GBST 391 ASST 391 ASIA 391 HIST 391

Primary Cross-listing

What do Ibrahim Ben Yiju, a Jewish merchant from 11th century Yemen, Ibn Batutah, a Muslim scholar from 15th century Morocco and Captain Kidd, a 17th century English pirate have in common? All three men travelled and lived in the Indian Ocean region! This course explores the history of one of the world's oldest maritime highways that has connected the diverse cultures of Asia, Africa and Europe for millennia, thus making it a vital element in the birth of globalization. Moving away from conventional land-centric histories, we will focus instead on understanding the human past through oceanic interactions. South Asian ports and port cities remained the fulcrum of the Indian Ocean world throughout its history; traders, travellers, nobles, scholars, pilgrims and pirates from all over the world travelled to the Indian coast in search of adventure, spices, knowledge and wealth. Thus we will primarily focus on India's role in the Indian Ocean roughly from the rise of Islam in the seventh century CE through the expansion of various European communities in the region and the subsequent rise of the global economy and colonialism in the nineteenth century. Rather than following a strict temporal chronology we will concentrate on themes such as travel and adventure; trade and exchange; trust and friendship; religion and society; pilgrimage; piracy; the culture of port cities; and food across time.

**Requirements/Evaluation:** class participation and weekly responses to readings, 4 short papers (4-5 pages), an oral presentation and final research (10 pages) paper based on any one of the 4 papers written during the course.

**Prerequisites:** none; open to all

**Enrollment Limit:** 15

**Enrollment Preferences:** history majors and students with demonstrable interest in maritime/Indian Ocean history

**Expected Class Size:** 10-12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 391 (D2) ASST 391 (D2) ASIA 391 (D2) HIST 391 (D2)

**Writing Skills Notes:** Students will write 4 short papers (4-5 pages) each and receive detailed feedback from the instructor. One of the four papers will become the basis of a final research paper (10-12 pages) on which each student will work closely with the instructor and receive feedback on improving research and writing skills.

**Difference, Power, and Equity Notes:** This course questions the conventional view that global interconnectedness was the result of Europe's discovery of 'new worlds'. Instead, it centers non-European actors in facilitating global networks before colonialism. Throughout, students will critically

engage questions of how Asian and African players forged and shaped global connections across the Indian Ocean arena and examine the ways in which these contributions have been overshadowed in traditional historiography.

### **HIST 393 (S) Sister Revolutions in France and America**

**Cross-listings:** LEAD 212 HIST 393

#### **Secondary Cross-listing**

In the late-eighteenth century, two revolutions burst forth--they were the most striking and consequential events in modern history, decisive turning-points that transformed society and politics. The American Revolution led to an enduring and stable democratic republic whereas the French Revolution was followed by a turbulent succession of Empires and restorations of the monarchy. France did not have a sustainable republic until 1870. We will analyze in detail and in depth the ideas and theories of the leaders of both revolutions in order to understand why the American Revolution took a moderate course and why the French Revolution took a more radical course and plunged into violence and terror. We will read the writings of Washington, Jefferson, Madison, Hamilton, Rousseau, Robespierre, Saint-Just, Tocqueville, Edmund Burke and others.

**Requirements/Evaluation:** three papers, several class presentations, and active participation in class discussions

**Prerequisites:** none

### **HIST 396 (F) The Pivotal Decade--The 1970s Origins of Contemporary America**

**Cross-listings:** HIST 396 LEAD 396

#### **Primary Cross-listing**

Often overshadowed by the long 1960s and the conservative ascendancy of the 1980s, the 1970s provides an important transitional moment for the United States. It was also a decade fraught with contradictions. On the one hand, Americans experienced widespread disillusionment with the power of the federal government to promote and protect the minority from the majority. Historians seeking to understand the collapse of the welfare state or the origins of white resistance to civil rights' initiatives often point to the 1970s as the time when the federal government shifted the burden of the social welfare system onto the market, state and local governments, and onto poor people themselves. And yet, the 1970s also saw an explosion of progressive social activism, as the women's movement, the gay rights movement, and the environmental movement, among others, all came into their own. Likewise, this was a time when U.S. realignment internationally and military overextension intersected with new hegemonies of human rights regimes, multinational corporations, and "globalization." This course will emphasize a wide array of social movements and activism--both left and right--and the interplay among formal politics, grassroots organizing, and popular culture. It will ask students to consider how and why the 1970s catalyzed many of the domestic and international dynamics and debates that define American politics and society today. Students will be assessed on participation, short response papers, and an individual research project culminating in a poster presentation. In Fall 2022, this course will be offered at both Amherst and Williams College campuses. There will be an end of the semester symposium at Williams College that all enrolled students are required to attend as part of the final project.

**Requirements/Evaluation:** Students will be assessed on participation, short response papers, and an individual research project culminating in a poster presentation

### **HIST 413 (F) The Big Ideas: Intended and Unintended Consequence of Human Ambition (DPE) (WS)**

**Cross-listings:** ARAB 413 GBST 413 HIST 413 ENVI 413

#### **Primary Cross-listing**

What have been the most consequential ideas of the last 100 years? This course will explore some of the more audacious and ambitious plans to alter natural and urban environments in the late 19th century to the early part of the 21st, specifically those that sought to improve the human condition through science, engineering, and technology. By building big bold things, politicians around the globe sought to bring prosperity to their nation and embark on a path of modernity and independence. Through an intellectual, political and environmental history of major construction projects such as the building of the Suez Canal and the Aswan Dam, extensive river valley developments in Iran, Turkey and Iraq, and utopian and futuristic city planning in western Asia, students will consider how, with the benefit of hindsight, to best evaluate the feasibility of such bold schemes. Who has benefitted and who has not, what have been some of the unanticipated consequences, what was sacrificed or neglected, and what do these projects tell us about the larger processes of global capitalism, decolonization, and climate change?

**Requirements/Evaluation:** A presentation, shorter writing assignments and a longer research paper (20-25 pages) in the end. Students will submit shorter drafts of final paper in order to receive constructive feedback prior to final submission.

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** Seniors, especially History, Arabic and Environmental Studies majors.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ARAB 413 (D2) GBST 413 (D2) HIST 413 (D2) ENVI 413 (D2)

**Writing Skills Notes:** A 20-25 page research paper will be required at the end of the semester. Prior to getting to that point, students will submit an annotated bibliography, a two page proposal, a five and eventually a 10 page draft. Each draft will receive extensive comments and suggestions from peers and instructor. In this way, the student will think about the process of writing and the best way to set themselves up for success.

**Difference, Power, and Equity Notes:** This course examines how a number of different nations in Africa and Asia sought to improve the living conditions of the masses through major construction project. Though ostensibly these schemes were supposed to improve the livelihood of all, often they primarily benefitted the few - the urban elite - and not the general population. This course will therefore explore how certain class, gender and racial lines were solidified and maintained through economic development plans.

**HIST 416 (F) The Many Lives of Tokyo (WS)**

**Cross-listings:** ASIA 317 HIST 416 ASIA 416

**Primary Cross-listing**

The city of Tokyo has had many lives from its early modern founding as the shogun's capital of Edo to its contemporary incarnation as a global megacity. This seminar explores how and why the city has changed--how an unassuming fishing village was transformed over four centuries into a vibrant early modern city of over a million people, the heart of a modern nation and metropole of an expansive empire, an emblem of urban cosmopolitanism, and a sprawling metropolis. Our focus will be on how people have lived, conceived, and shaped Edo/Tokyo. We will consider how different and various people have moved through the city; where and how they have lived, worked, and enjoyed themselves; how they have interacted with the natural and built environments; and how they have expressed their discontents with, and aspirations for, the city. Topics to be examined include: physical expansion, urbanization, and suburbanization; destruction and reconstruction from fires, earthquakes, and war; cultivation of opportunities to consume; and creation of urban popular cultures. The centerpiece of the seminar is the research and writing of a substantial and original paper that delves into a question of interest to you about the history of Tokyo.

**Requirements/Evaluation:** class participation, discussion posts, response papers, and a research paper (20-25 pages)

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** History majors and Asian Studies concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ASIA 317 (D2) HIST 416 (D2) ASIA 416 (D2)

**Writing Skills Notes:** In addition to gaining fluency with shorter pieces of writing such as response papers, students will work on the research paper in stages. This will include the writing of drafts which will be workshopped with classmates. Students will also receive timely and substantial feedback on all of their writing from the professor.

**HIST 430 (S) Postcolonial Reparations: Trauma, History, and Memory after European Imperialism (DPE) (WS)**

**Cross-listings:** JWST 430 HIST 430

### Primary Cross-listing

How have European states responded to calls to acknowledge and atone for the crimes of Empire? This course places recent calls for reparations in a historical context. Weaving together a wide-range of historical and contemporary case studies -- including the Conference on Jewish Material Claims Against Germany (1951), Germany's official recognition of the Herero Genocide (2021), and ongoing debates in France about the restitution of colonial-era looted art, this course investigates how the language and mechanisms of restorative justice have historically developed, evaluates which past efforts of restorative justice were successful and why, and examines what role historical memory and historians-as-activists should play in campaigns that seek reparations for colonial injustices. In doing so, it evaluates how activists have deployed scholarly vocabularies on memory, justice, and violence in a number of national and international contexts.

**Requirements/Evaluation:** Class participation, weekly 500-word discussion posts and a 20-page research paper

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** History majors, seniors, and then juniors

**Expected Class Size:** 10-15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

JWST 430 (D2) HIST 430 (D2)

**Writing Skills Notes:** This is an intensive writing seminar for advanced history majors. We focus on how to write a journal-length piece of original historical research, while evaluating the strengths and weaknesses of other scholarly pieces. Students receive feedback on multiple drafts of their final research papers and participate in two workshop seminars in which they provide feedback on the papers of their peers.

**Difference, Power, and Equity Notes:** This course asks how contemporary political and social justice movements can -- or ought to -- address political and economic inequities between the Global South and North, introduces students to how questions of race and national belonging have informed contemporary debates on restorative justice, and exposes the persistence of some global and historically-situated inequities.

Spring 2023

SEM Section: 01 W 1:10 pm - 3:50 pm Charlotte A. Kiechel

### **HIST 433 (F) Colonialism and the Jews** (DPE) (WS)

**Cross-listings:** JWST 433 HIST 433

### Primary Cross-listing

Where are Jews in colonial history? Where is colonialism in Jewish history? In many ways, these questions haunt contemporary Jewish and often world politics. Indeed, in the twenty-first century, the relationship between Jews and colonialism has been present in debates about Zionism, the history of capitalism, Jewish-Muslim relations, the wider Middle East, the future of European identity, the aims and roots of American empire, and the intersections of race and religion in colonial domination. And yet, typically, the subject of Jews and colonialism is more polemicized or avoided than probed. This course will seek to address this lacunae by introducing students to new historical scholarship that has begun tracing these questions. Students will consider the ways in which imperial legal forms, economic structures, and cultural and intellectual underpinnings shaped Jewish lives from the British antipodes to French North Africa, and throughout the Russian and Ottoman Empires, as well as in metropolitan Europe. Among other issues, we will ask: How did Jews become defined and define themselves in the colonial venture? In their various roles in colonial empires, are Jews best understood as subjects or agents of empire or are there more fruitful ways to conceptualize their engagement? What was the impact of anti-colonial struggles on modern Jewish politics and historical development? The course will approach this topic thematically rather than as a comprehensive survey. By introducing students to some of the key debates in this emerging field, we will consider what it takes to construct a successful historical argument and how to engage critically with works in an emerging field. A semester-long writing project will expand students capacities to pose thoughtful historical questions; conduct research and gather compelling evidence; read deeply and critically; carefully assess evidence; and write inquiry-based essays.

**Requirements/Evaluation:** Class participation; brief weekly writing on the readings; a final research paper written in stages, including two "research updates"; an analysis of a source; a research proposal; a rough draft of one paper section; a rough draft of the paper; and a final 25-page paper.

**Prerequisites:** None; open to all students (however, a background in European history and/or Jewish Studies will be helpful).

**Enrollment Limit:** 15

**Enrollment Preferences:** Junior and Senior History Majors and Jewish Studies Concentrators

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

JWST 433 (D2) HIST 433 (D2)

**Writing Skills Notes:** Before each course, students will submit a 2-3 paragraph critique and a list of 3 questions for discussion. The final assignment will be a research paper (approximately 25 pages) or historiographical essay. Assignments en route to the final deadline, include: 1) two early "research updates" to document process and progress; 2) analysis of a source; 3) research proposal; 4) rough draft of a section; 5) draft of paper; 6) final paper. Only some work will be graded, but all will receive feedback.

**Difference, Power, and Equity Notes:** This course considers the complex ways that religion, ethnicity and national identities shaped the colonial and post-colonial world. Never controlling or collectively representing a European power, Jews were also rarely situated at the bottom of any colonial hierarchy, sometimes occupying more than one social or political role in a single colonial territory. This course provides insight into the many ways hierarchies of power could operate in colonial and post-colonial settings.

### **HIST 434 (S) The Meaning of Diaspora and the Jews of Europe (WS)**

**Cross-listings:** REL 335 HIST 434 JWST 434

#### **Primary Cross-listing**

Dispersion, exile, migration, statelessness are all aspects of diaspora. In the study of diasporic peoples and cultures, the Jews have long figured as the archetype. As a result, Jewish political figures, intellectuals, social activists and scholars have played a central role in discussions of the meaning of diaspora, including debates about its political and social implications, economic value, and cultural significance. In the first half of the semester, in discussions of common readings, we will examine various historical interpretations of Jews' diasporic existence from the nineteenth century to the present and its implications for humanitarianism. Beginning in the first half of the semester and with greater intensity in the second half of the semester, you will conduct independent archival research on some aspect of the history of the Jewish diaspora using the digitized archives of the American Jewish Joint Distribution Committee that will culminate in a twenty-plus-page paper. In the second half, the seminar will continue to meet weekly as a research colloquium, to provide a forum for you to present your research and drafts in progress and to give feedback on fellow students' work. In this seminar, we are not merely studying history; you are actually doing history. That is to say, you will be more than students of history in this course: you will become historians in your own right. Over the semester, you will learn how to pose historical questions; to engage critically with readings beyond summarizing them; to synthesize an enormous amount of source material; and to learn how to write more clearly. By the end of the semester, the goal is for each student to produce a polished research paper based on substantial engagement with archival sources and relevant secondary literature that will serve as a capstone to your coursework at Williams or as a potential jumping-off point for future research projects, including a senior thesis in History or Jewish Studies.

**Requirements/Evaluation:** class participation, several short papers, oral presentations, and a 20-page research paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** History majors and Jewish Studies concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

REL 335 (D2) HIST 434 (D2) JWST 434 (D2)

**Writing Skills Notes:** Students will write two drafts of their research paper before submitting the final paper for a grade. They will receive timely comments on drafts from professor and peers, to be incorporated into their final paper.

### **HIST 454 (S) Land, Memory, Materiality: Histories and Futures of Indigenous North American Arts (DPE)**

**Cross-listings:** ARTH 561 HIST 454

#### Secondary Cross-listing

This course engages Indigenous North American traditions of creative expression, remembrance, and representation in historical, contemporary, and future-facing ways. Drawing upon diverse Native American and First Nations theories and practices, it ranges widely across the continent to consider Indigenous arts and material culture within specific cultural, socioeconomic, and political contexts. Part of the course is grounded in the Native Northeast, including the Indigenous homelands of the Stockbridge-Munsee Mohican Community in which the Graduate Art Program and Williams College are situated. Other units will focus on continuities and transformations in artistic and maker-traditions within and across specific Indigenous nations and communities. The course is especially interested in connections between past and present, and the innovative ways Indigenous artists, makers, and knowledge-keepers have reckoned with what has come before, while also mapping meaningful future pathways. Topics will include repatriation and community-led restorative efforts to bring home ancestors and important heritage items "collected" over the centuries following 1492; concepts and practices of cultural, intellectual, visual, and political sovereignty; decolonizing museums; the complex dynamics of collaboration; Indigenous, African-American, and Afro-Indigenous artistic connections and solidarities; and Indigenous challenges to Eurocentric and settler colonial approaches to preservation, interpretation, and classification. Seminar members will develop familiarity with methods and ethics grounded in Native American and Indigenous Studies, and with new scholarship by leading and emerging critics and creators.

**Class Format:** The course will feature seminar discussions as well as local trips to museums, libraries, and archives with pertinent collections and exhibitions.

**Requirements/Evaluation:** Engaged participation in discussions; in-class presentations; short writing assignments in preparation for final project; final original research and interpretive project, with presentation to seminar.

**Prerequisites:** For undergraduates, at least two prior courses in or related to History, Art History, Native American and Indigenous Studies, and/or Museum Studies.

**Enrollment Limit:** 16

**Enrollment Preferences:** Priority for Graduate Art students. Four seats are reserved for undergraduates, with preference to junior and senior majors in Art History and History. Undergraduates should email a brief statement of interest to [cd10@williams.edu](mailto:cd10@williams.edu).

**Expected Class Size:** 16

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ARTH 561 (D1) HIST 454 (D1)

**Difference, Power, and Equity Notes:** The course centers theories, experiences, and expressions from Native American/Indigenous communities, scholars, and artists/makers, while engaging foundational and new work in Native American and Indigenous Studies (NAIS). The course also provides students with critical tools for reckoning with settler colonialism and its historical as well as enduring impacts in Indigenous contexts; and with race, ethnicity, sovereignty, and tribal nationhood as key interpretive frames.

### **HIST 455 (S) The Afterlives of Objects: Telling American Histories through Material Culture and Museums (DPE)**

**Cross-listings:** HIST 455 AMST 455

Primary Cross-listing

Material culture studies examine relationships between people and objects. Tangible artifacts like furniture, clothing, ceramics, tools, and buildings give insight into communities' identities, aspirations, and struggles. This course approaches American histories through objects, and considers how interdisciplinary methodologies can reveal alternative understandings of the past. The course traces changing theories and practices of preservation, curation, and display; shifting conceptions of "heritage" among diverse peoples; and ethical challenges posed by Native American and African American items held in museums, particularly in relation to repatriation considerations. The course involves a staged set of class visits to work with collections at the Williams College Archives/Special Collections and Art Museum as well as local/regional repositories and historic sites. While the scope of the course is continental and at times transoceanic, it includes substantial focus on the Northeast/New England and the material assemblages and landscapes that shape western Massachusetts. Students will build familiarity with appropriate techniques for handling objects, cultivate skills for developing and carrying out an original research project, and explore diverse modes of analysis and expression for telling the stories of objects and their associated communities.

**Requirements/Evaluation:** active participation in class discussion and museum visits, in-class presentation about one week's readings, research project prospectus, research project

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** junior and senior History and American Studies majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 455 (D2) AMST 455 (D2)

**Difference, Power, and Equity Notes:** This course examines diverse historical experiences of North American peoples, including Native Americans and African Americans, in conjunction with responses to Euro-American settler colonialism. It introduces students to foundational methodologies in object studies including decolonizing approaches, and explores key debates about possession, interpretation, and repatriation of objects to descendant communities, such as the Native American Graves Protection and Repatriation Act (NAGPRA).

### **HIST 457 (S) Floridas** (DPE) (WS)

Florida, the sunshine state with 1350 miles of coastline was once an outpost of Spain's 17th century empire. Its history comprises Disney World, the largest Cuban community outside of Cuba, a haven for enslaved Catholics in the 17th century and for an aging, largely white middle class in the 20th. It is the site of the nation's oldest city, and the home to range of Native peoples. A land of swamps, plantations, cities, islands, strip malls and theme parks is now ground zero in climate change discussions. This "purple state" has decided more than one presidential election. This course will explore the history of the many Floridas. We will move roughly through time as we seek to understand Florida and its place in United States culture. Why do people often think of Florida as "not quite southern" although it borders Georgia and Alabama? When and why did Spain colonize the area? How did they lose it? What is the history of the original inhabitants of Florida and how does that story help us understand it now?

**Requirements/Evaluation:** class discussion, three short writing assignments and a final research paper of 15-20 pages on a topic that grows out of our reading

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** seniors and History majors

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** Students will be writing three shorter papers throughout the semester. Two of these will be building up towards the final research paper. The third will be more "experimental"... perhaps a piece of historical fiction or eye witness account. The final paper should exceed 15 pages. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** We will consider how Florida has defined itself, and been defined throughout American history largely based on various groups that occupied space with combinations of military, technological and economic power. This class will investigate the histories and

dynamics of these various occupations and settlements, paying close attention the conflicts over space in rural and urban areas. Histories of African Americans and Native people will be central to our investigation.

**Attributes:** HIST Group F Electives - U.S. + Canada

### **HIST 462 (S) For the Soul of Mankind: The Cold War and American Foreign Relations (WS)**

The United States emerged from the Second World War with unprecedented power and influence; for the first time it was poised to take on a level of global leadership that it had long shirked. Yet the U.S. faced an uncertain world, marked by the ascendance of the communist-led Soviet Union as a rival superpower, the impending decolonization of European empires, the emergence of a nuclear arms race, and a host of changes to domestic American life. What ensued was a 45-year Cold War--a battle for the soul of mankind--marked by American officials' relentless determination to combat the threat of communism at home and abroad. This course explores a range of scholarly approaches to that conflict, focusing on high-level diplomacy, hot wars, propaganda, the cultural cold war, and more. In addition to reading and discussing works that exemplify key approaches to studying America's Cold War, students will develop an original research topic and research and write a 20- to 25- page paper, based in primary sources, on a Cold War-related topic of their choosing.

**Requirements/Evaluation:** evaluation will be based on class participation, several short papers, and a 20- to 25-page research paper

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** Advanced history majors

**Expected Class Size:** 10-20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will produce a 20-25 page final paper through a series of scaffolded assignments, each of which will receive feedback from the professor as well as a group of peers. Assignments leading up to the final research paper include a 4-6 page historiography paper, a 2-3 page draft introduction, and a completed initial draft.

### **HIST 470 (S) Latinx Migrations: Stories and Histories (WS)**

**Cross-listings:** LATS 470 HIST 470

Primary Cross-listing

Latinx migration histories are often told with sweeping data and within broad historical contexts. While these are important, the voices of the people leaving their home countries and coming to the United States can be lost or buried. During the 1970s, the emerging subfield of social history asserted the need to craft histories that took into consideration the everyday lives of everyday people. Oral history emerged a key tool in capturing the personal stories too often missed in historical archives. At the same time, Puerto Rican Studies, Chicano Studies, and later, Latinx Studies emerged to tell the histories of groups too often omitted from or misrepresented in the scholarship. These fields relied on traditions of testimonios or storytelling. This course focuses on Latinx oral histories, autobiographies, and other first person narratives to explore how people are impacted by and experience those broad historical contexts, as well as how the decisions they make and the actions they take shape those broad historical contexts. This course examines first person narratives in the context of specific Latinx groups in particular historical, geographical, and social contexts, while interrogating the methodological and interpretive challenges of working with oral histories and other first-person primary sources.

**Requirements/Evaluation:** class participation and presentations; short writing assignments; proposal, bibliography, and drafts of final paper; final paper of 15 to 20 pages

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** History majors and Latina/o Studies concentrators, seniors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

LATS 470 (D2) HIST 470 (D2)

**Writing Skills Notes:** This research seminar supports students as they define an appropriate topic, identify and use primary and secondary sources, and complete a 15-20 page final paper. Several short writing assignments focus on interpretations of primary sources and on honing in on scholars' key arguments in secondary sources. The final paper is written in stages, including a proposal with a bibliography, a draft for workshopping with other students, and a final presentation along a revised draft.

### **HIST 478 (S) Cold War Landscapes**

**Cross-listings:** AMST 478 ENVI 478 HIST 478

#### **Primary Cross-listing**

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in nations across the globe. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States and North America. We will then move on to examining others in Europe and the Soviet Union. Our approach to our topics will be interdisciplinary throughout the semester, with the additional goal of helping students frame their final projects. Students are encouraged to write their research papers on any geographical area of the world that interests them.

**Requirements/Evaluation:** class participation and semi-weekly critical writing on the reading; students will also be expected to keep up through the stages of the research paper process, which will involve submitting a short research plan, annotated bibliography, outline, and a rough draft, as well as the final 20- to 25-page paper.

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** History, ENVI, and AMST majors if over-enrolled

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

### **HIST 480 (F) Media and Society in Africa (DPE) (WS)**

**Cross-listings:** HIST 480 GBST 480 AFR 381

#### **Primary Cross-listing**

The Media have long played important roles in African societies. As early as the second half of the 19th century, African intellectuals were using print technology to address the people. As radio technology was in its infancy during the first half of the twentieth century, Africans were gathering around re-diffusion stations and later around single receivers to listen to news and entertainment programming. In this tutorial, we will examine these histories of media and media technologies on the continent. Ultimately, we will explore the roles that media played in serving particular community needs and how

communities also adapted new media technologies to fit local conditions. Media content has historically been determined based on standards beyond viewers', readers' and listeners' control. We will examine the influences that editors and political leaders on the continent have exerted on content as well as what forces they responded to. We will also further explore the media's role in major events on the continent, from governmental changes to the ending of apartheid in South Africa and the role that media have played in areas of conflict.

**Requirements/Evaluation:** Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

**Prerequisites:** This course open to all students

**Enrollment Limit:** 10

**Enrollment Preferences:** Preference will be given to history majors and students with prior experience with African history. If the course is over-enrolled, students may be asked to complete a questionnaire to determine enrollment

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 480 (D2) GBST 480 (D2) AFR 381 (D2)

**Writing Skills Notes:** Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular feedback and critiques- both oral and written - from the professor, as well as oral critiques from tutorial partners.

**Difference, Power, and Equity Notes:** Modern media developed in Africa as means of control and cultivating dutiful colonial subjects. However, media then emerged as sites of contestation and even tools with which colonial subjects challenged colonial rule. They have continued to be revealing sites for issues of gender, race, class, and ethnicity. As such, this course immensely explores diversity, power and equity and how these all-important societal concerns are expressed through the media in Africa.

Fall 2022

TUT Section: T1 TBA Benjamin Twagira

**HIST 481 (F) History of Taiwan (WS)**

**Cross-listings:** ASIA 481 HIST 481

**Primary Cross-listing**

Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. We will also examine contemporary arguments for Taiwan as part of China. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

**Requirements/Evaluation:** weekly papers and critiques

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** History and Asian Studies majors/concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ASIA 481 (D2) HIST 481 (D2)

**Writing Skills Notes:** In this tutorial course, students will write bi-weekly 5- to 7-page papers with feedback from both the instructor and tutorial partner. Students will revise one of their tutorial papers as a final assignment. Students will receive from the instructor timely comments on their writing

skills, with suggestions for improvement.

TUT Section: T1 TBA Anne Reinhardt

### **HIST 482 (F) Race and American Foreign Relations (WS)**

From its origins, American society has been suffused with notions of white superiority and racial hierarchies that have underpinned the nation's foreign policy. Ideologies of race factored heavily into the nineteenth century process by which the United States expanded its territorial control across the North American continent and established an empire of its own. Racialized thinking persisted at the heart of U.S. foreign relations in the twentieth century, influencing everything from the administration of empire in the Caribbean and the Pacific and commercial expansion into central America to the decision to use nuclear weapons against Japan, the diplomatic path to war in Vietnam, and more. The defeat of fascism and Nazism in World War II posed serious challenges to the premises of white supremacy, while ushering in a Cold War that would become inextricably bound with the process of decolonization. American diplomats were forced to reckon with the challenges domestic racism posed to their foreign policy goals, while black internationalists became increasingly involved with global struggles for liberation and equality. While the global color line grew more hotly contested, white supremacist thinking proved as enduring as it was mutable. This upper division tutorial surveys leading scholarship on a range of topics that centers race as a category for understanding American foreign relations.

**Requirements/Evaluation:** Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

**Prerequisites:** None, open to all students

**Enrollment Limit:** 10

**Enrollment Preferences:** Preference will be given to history majors and students with prior coursework related to U.S. foreign relations. If the course is overenrolled, students may be asked to complete a questionnaire to determine enrollment.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular written feedback on their writing from the professor, as well as oral critiques from the professor and tutorial partners.

**Not offered current academic year**

### **HIST 483 (S) Sport and Diplomacy (DPE) (WS)**

Sport has emerged in recent years as a hot topic of study among diplomatic historians. Once considered a marginal topic, sport is now seen as a critical window into the world of international relations. Recent works address not only official state policies pertaining to international sport, but also issues of nationalism, imperialism, racial ideologies, transnational migration, public diplomacy, culture in foreign relations, and the role of sport governing bodies in the international system. In this tutorial, students will read key essays and monographs that contribute to this emerging literature, alongside state-of-the-field essays that explore the methodological and thematic approaches that historians have used to grapple with the complex interactions between countries, peoples, and cultures that occur within the realm of sport.

**Requirements/Evaluation:** Students will write and present orally six essays (5-7 pages each) on assigned readings each week; students not presenting an essay in a given week will produce a 2-3 page written critique

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors and students with some prior course work in foreign relations and/or international history

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** Students will each write six (6) tutorial papers of 5-7 pages and six (6) critiques of 2-3 pages. The professor will provide weekly

written feedback on each of these papers, and they will be discussed at length in tutorial sessions.

**Difference, Power, and Equity Notes:** Modern sport emerged in a colonial context as a means of asserting and maintaining control and has become a key site of contestation over the color line in both domestic and international contexts. International sport competitions like the Olympics and the World Cup have served as proxies for military power and showcases for national cultures in ways that have both revealed and concealed ongoing racial tensions. This course explores diversity, power, and equity in international sport.

Not offered current academic year

#### **HIST 484 (F) Victorian Psychology from the Phrenologists to Freud (WS)**

Although the Victorian era has traditionally been considered a psycho-social model of emotional inhibition and sexual prudery, recent studies, by scholars in various disciplines, have demonstrated that this characterization grossly oversimplifies the attitudes toward emotional and sexual life held by Europeans and Americans in the second half of the nineteenth century. This course will investigate professional and popular ideas about human psychology during the Victorian era. We will attempt to define and understand what people thought and felt about insanity, the unconscious, dreams, sexuality, the relationship between natural impulses and civilized society, child psychology and development, the psychological differences between men and women, the relationship between the physical and the psychical. The course will concentrate on the close reading and analysis of primary documents from the era.

**Class Format:** Once they have been selected, student pairs will meet with the professor for an hour at a regularly scheduled time each week.

**Requirements/Evaluation:** Students will meet with the instructor in pairs once a week. Every other week each student will present a paper of approximately 5-7 pages on a topic determined by the instructor, due by 5pm the day before the tutorial meeting. The student not writing the paper will critique the paper written by their tutorial partner. Each student will write six papers and serve as a critic on the six papers of their tutorial partner.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** Junior and senior History majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Fulfills the department's seminar requirement for graduation with a degree in History

**Distributions:** (D2) (WS)

**Writing Skills Notes:** As a tutorial, with each student writing a paper every other week, this course meets the writing skills requirement.

**Attributes:** HIST Group C Electives - Europe and Russia

Not offered current academic year

#### **HIST 485 (S) Freud: A Tutorial (WS)**

**Cross-listings:** PSYC 158 HIST 485

Primary Cross-listing

This tutorial is devoted to the systematic reading of the principal works of Sigmund Freud, one of the deepest, subtlest, and most influential thinkers of the last one-hundred years. Students will read Freud's work more or less chronologically, beginning with his writings on hysteria and concluding with his deeply pessimistic essay, *Civilization and Its Discontents*. In tutorial, we will consider the development of Freud's thought over the course of his professional life: his general psychological writings on the nature and functioning of the human psyche, his clinical writings on psychoanalysis as a form of treatment, and his cultural writings on art and artists, on the origin of human society, on religion, and on the relation of the individual to society and civilization. We will not be considering the relevance of Freud's ideas for purposes that transcend his own psychological agenda in the tutorial. Nor will we be much concerned with assessing whether Freud was "right" or "wrong" or whether his thought has clinical relevance today. Instead, we will seek to understand Freud as much as possible on his terms and not on ours, as a historical figure of originality, complexity and contradiction, whose thought deserves close reading and deep understanding within the context of Freud's thought itself.

**Class Format:** students will write and present orally six essays of 6-7 pages on assigned reading every other week; students not presenting an essay in a given week will be responsible for critiquing the presented essay

**Requirements/Evaluation:** student grades will be assigned only at the end of the semester based on their papers, their critiques, and their performance in tutorial discussion

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** juniors and seniors and History majors needing a 400-level seminar or tutorial to fulfill the requirements for a degree in History

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** fulfills History's 400-level graduation requirement

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

PSYC 158 (D2) HIST 485 (D2)

**Writing Skills Notes:** As a tutorial, this course is by definition writing skills, both in terms of the number of papers that students will produce (six) and in terms of the focus on writing during every tutorial session. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes:** HIST Group C Electives - Europe and Russia

### **HIST 486 (F) Islam in European Culture from Muhammad to Modernity**

From the Crusades to modern colonialism, the relationship between Muslims and Western Christians has often been recounted as the clash of two opposing civilizations, a history of warfare and of incompatible values. This tutorial takes a different point of departure, namely the recent scholarly recognition that relationships between Muslims and Western Christians were often rooted in the intimacy of frequent interaction. We will delve into the many ways in which Muslim peoples shaped European culture from the Middle Ages to the present. We will explore different domains, from one of the first translations of the Qur'an into any language, the Latin version done in Toledo in 1143, to the many goods made by Muslim craftsmen that filled the homes of Renaissance Europe, and the roles of early modern Muslims as captives, slaves, diplomats, travelers, and converts. In the modern period, Muslims continued to inflect European culture both as colonial subjects and as domestic minorities, producing and inspiring art, imaginative literature, and critiques of European power. Our investigation will encompass music, visual art and film in addition to written works. How do we make sense of this intricately interwoven history? And what are its legacies for the present? Sources both primary and secondary will include Leo Africanus, Lady Montagu, Montesquieu, Mozart, al-Tahtawi, Flaubert, Sayyid Qutb and Fatima Mernissi.

**Requirements/Evaluation:** Five tutorial papers (5-7 pages.) and five shorter responses; occasional presentations.

**Prerequisites:** History majors; juniors and seniors.

**Enrollment Limit:** 10

**Enrollment Preferences:** If the course is overenrolled, a statement of interest will be requested.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** HIST Group C Electives - Europe and Russia HIST Group G Electives - Global History

Not offered current academic year

### **HIST 487 (F) Archive Stories (WS)**

What is an archive? What stories are to be found in the archives and what stories do we tell ourselves about the meaning and function of the archive? For many years now, and certainly since the publication of the French theorist Jacques Derrida's essay, *Archive Fever*, historians, archivists, and cultural theorists have been asking questions *about* the archive as much as they have been engaged in the actual practice of archiving, or making use of material found in archives. This tutorial considers some of those questions. It is *not* a hands-on course about how to use an archive, nor a celebration of material found in archives. Rather it consists of a series of broad enquiries into the history of the archive, the politics of collecting, and the political and social function of the archive in various societies. Each week a specific topic will be addressed, collectively illustrative of the breadth of recent enquiries into the logic of the archive. Topics will include, amongst others: the urge to archive in the Renaissance; the nature of the historian's encounter with "the past" in the archive; the function of the archive in the creation of the modern nation state; the power relations embodied in the colonial archive; the construction of contemporary group identities through the practices of archiving; the recent desire to archive everything, not merely the written document; and the new archives of cyberspace.

**Requirements/Evaluation:** each student will write five 6- to 7-page essays, prepare five critiques of their tutorial partner's work, and write a final

paper about their work on the Williams archives

**Prerequisites:** open to all junior and senior History majors and others with permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Each student will write five 6- to 7-page essays (one every other week) that will be critiqued, both in writing and orally, by the instructor and the student's tutorial partner. The student will also write a final 6- to 7-page essay reflecting on the nature of Williams archival practices in the context of the readings undertaken during the course of the tutorial. Students will receive from the instructor timely comments on their writing practices, with suggestions for improvement.

### **HIST 488 (F) Sites of Memory and American Wars (WS)**

This tutorial will examine the ways that U.S. military ventures have been memorialized through a variety of physical sites, including landscapes, monuments and statues, museums, and other depictions. Given the enormous national conversation and reconsideration of many of these sites over the last decade, we will ask such questions as: How and why has the memorialization of U.S. wars changed since the country's founding? Who determines what is preserved and what stories are told? What is the relationship between individual experiences, collective memories, and national narratives? What do "sites of memory" tell us about society's views of wars and soldiers and about the United States? Throughout, we will pay attention to how these sites reflect historical understandings of the time and have also served as focal points of social and political protests.

**Class Format:** Students will be assigned a tutorial partner, and tutorial pairs will meet with the professor for one hour each week at a regularly scheduled meeting time.

**Requirements/Evaluation:** This course follows a typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors and students with previous coursework in History.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** At the start of the semester, students will outline what their writing goals are for the semester, and they will receive weekly feedback on their writing from the professor and from their tutorial partner. The final writing assignment will afford students the chance to reflect on their previous papers and the semester's course content.

### **HIST 489 (F) Appropriating History. Who Owns the Past? (DPE) (WS)**

**Cross-listings:** HIST 489 ARAB 408

**Primary Cross-listing**

Who owns the past? How have modern states appropriated history? The political use of history is a critical ingredient in any nationalist discourse. In

such narratives, the selective utilization of archaeology and ancient history often serves important functions in articulating a conscious and deliberate national history. Thus, in nationalist renderings, archaeological sites and artifacts are not merely relics of the past; they can also be potent and conspicuous symbols of national identity for the modern nation-state. In the Middle East, with its rich archaeological heritage, the relationship among politics, nationalism, and archeology has been particularly strong and interesting. This tutorial addresses the powerful nexus between history and nationalism with a special emphasis on the Middle East. It will explore the battle over who controls history and the "stuff" of history such as antiquities, land, heritage sites, and museum exhibitions and how that control has expressed itself in several Middle Eastern countries, including Iraq, Israel, Turkey, Egypt, Lebanon, and Iran. Furthermore, it will discuss how archaeology entered the political discourse, the ethics of repatriation and appropriation, and archaeology's role in contested terrains and political disputes.

**Requirements/Evaluation:** Format: tutorial. Requirements: 5-7 page essays or 2-3 response papers due each week

**Prerequisites:** None, though a demonstrated interest in the Middle East is important.

**Enrollment Limit:** 10

**Enrollment Preferences:** Seniors and to History and Arabic Studies majors.

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 489 (D2) ARAB 408 (D2)

**Writing Skills Notes:** As a tutorial, students will receive extensive feedback on their writing each week both from the professor and their partner. Further, students will be given the opportunity to rewrite two of their papers in light of the criticism that they receive during the semester.

**Difference, Power, and Equity Notes:** This is a tutorial on a particular form of power, namely how the powerful seek to control the past. The ultimate question that this tutorial seeks to answer is: who owns the past? Which history is emphasized and which histories are overlooked? How do modern nation states in different Middle Eastern states cherry-pick the past in order to maintain and develop a national narrative that is suitable to the political and economic powers often at the expense of religious or linguistic minorities.

**HIST 490 (S) Memory, History, and the Extermination of the Jews of Europe (WS)**

**Cross-listings:** HIST 490 JWST 490

Primary Cross-listing

This course is about the postwar legacy of the Holocaust. Nazi Germany's extermination of European Jews has become a moral and cultural touchstone for people in Europe and in many other parts of the world. This tutorial explores a series of topics from the immediate aftermath of the Second World War to the present. Engaging with a wide-range of sources, we will wrestle with historical, legal, moral, political, and cultural issues and debates that have emerged out of the confrontation with the extermination of the Jews of Europe. They include: Why was the Holocaust "unprecedented" and "unimaginable"? Is it a Jewish story or universal story? Does the Holocaust raise different issues than other historical events for the historian? How should the Holocaust be represented in words and images, and what are the implications of different means of representing it? Has Germany faced up to its past? Were Germans also victims of World War II? Who were the "bystanders" as compared to the "perpetrators"? Were the postwar trials of perpetrators a travesty of justice? What "lessons" have we learned and should we learn from the Holocaust? By the end of the course, students will have grappled with the ongoing controversies that have arisen among scholars, artists, governments, and lay people about the meaning of the Holocaust for the postwar world. In a world in which extraordinary acts of violence continue to be perpetrated and many nations' pasts are marked by episodes of extreme criminality and/or trauma, exploring the manner by which one such episode has been remembered, avenged, and adjudicated has relevance for considering other societies' efforts to confront their own traumatic pasts.

**Class Format:** tutorial; class time consists of weekly one-hour sessions with the instructor and a fellow student

**Requirements/Evaluation:** Every other week the student will write and present orally a 5- to 7-page paper on the assigned readings of that week; on alternate weeks, the student will write a 2-page critique of the fellow student's paper; a final written paper on the issues raised in the tutorial to cap off the semester's work.

**Prerequisites:** permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors and Jewish Studies concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**HIST 491 (S) The Suburbs (WS)**

**Cross-listings:** AMST 490 ENVI 491 HIST 491

**Primary Cross-listing**

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

**Class Format:** Students will be assigned a tutorial partner, and tutorial pairs will meet with the professor for one hour each week at a regularly scheduled meeting time.

**Requirements/Evaluation:** typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

**Prerequisites:** none

TUT Section: T1 TBA Karen R. Merrill

**HIST 492 (S) Making Race in Early Modern Europe (DPE)**

In modern scholarship, racism has most often been portrayed as a child of the European Enlightenment, a set of ideas about embodied human difference and its heritability that arose after the abandonment of the Biblical account of human creation and the rise of a new natural science. This

tutorial asks: what racial ideas and practices preceded the Enlightenment? Beginning in the late Middle Ages, Europeans participated in enormous economic and cultural transformations, including increased global mobility and the establishment of new, transoceanic empires. Intensified interactions with people in the Americas, Africa, and Asia shaped European understandings of human difference, as did the burgeoning Atlantic economy and its cruelties. In this tutorial, we will place the emergence of modern racism in a long-term perspective, reconstructing the deep history out of which Enlightenment racial theory emerged. Proceeding both chronologically and thematically, we will consider how the major global transformations of the sixteenth through eighteenth centuries shaped European racial understandings with enduring consequence. In the process, we will develop a conceptual vocabulary to describe in a historically sensitive manner how embodied human difference has been interpreted differently across space and time. Throughout, we will read a variety of historical primary sources in conjunction with recent scholarship. Ultimately, our historical study will afford a comparative perspective on contemporary views of races and racism.

**Requirements/Evaluation:** Attendance and active participation; weekly tutorial papers (5 "long" papers and 5 responses).

**Prerequisites:** 200- or 300-level History classes

**Enrollment Limit:** 10

**Enrollment Preferences:** Junior and seniors; History majors.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** The aim of the tutorial is threefold: (i) to introduce students to the comparative study of race across time and place, in order to help them contextualize and historicize the racial dispensation of the contemporary US; (ii) to treat the history of race not just as a history of ideas and theories, but of practices of race- and knowledge-making; (iii) to advance our understanding of the past through a dialectical process of empirical research and theoretical interpretation.

### **HIST 493 (F) Senior Thesis: Research Seminar**

This seminar is intended solely for writers of senior theses during their first semester. Although each student's major work for the year will be the writing of a thesis in consultation with an individual advisor, students are also required to meet in the context of the thesis seminar in order to present and critique each other's proposals and drafts and to discuss common problems in the research and design of a long analytical essay. For students proceeding to HIST 494, performance in the fall semester will be factored into the thesis grade calculated at the end of the year. The quality of a student's performance in the seminar segment of History 493, as well as their performance in all aspects of the May colloquium at which theses are presented and critiqued, figure in the overall grade the student earns for History 493-494 and the departmental decision to award Honors or Highest Honors at Commencement.

**Requirements/Evaluation:** class participation and completed written work, and will determine if a student will continue in the thesis program

**Prerequisites:** limited to seniors accepted into the History Department's Thesis Program

**Enrollment Limit:** none

**Enrollment Preferences:** limited to seniors accepted into the History Department's Thesis Program

**Expected Class Size:** 10-15

**Grading:** no pass/fail option, no fifth course option

### **HIST 495 (S) The Medieval World System: Globalization before 1500 (WS)**

In recent years, scholars have turned increasing attention to global history in the pre-modern period. This tutorial takes as its focus the global Middle Ages: roughly speaking, the period between 500 and 1500 CE. This was a period that saw mass-produced consumer goods cross from China to India, East Africa, and the Middle East, inspiring admiration and imitation in multiple different markets. It saw games, music, and forms of literature become popular across continents, and saw religious communities forge networks spanning thousands of kilometers. To study the global Middle Ages is to place exchange and networks, both commercial and cultural, at the heart of our analysis. We will read and analyze many accounts by medieval travelers, merchants, and pilgrims who crossed Afro-Eurasia, alongside works by modern historians and archaeologists who have pieced together the patterns of movement and exchange that tied together the diverse societies of pre-modern Afro-Eurasia.

**Requirements/Evaluation:** Students will meet in pairs with the instructor once a week. Every other week each student will present a paper of approximately 5-7 pages on a topic determined by the instructor, due by 5pm the day before the tutorial meeting. The student not writing the paper will critique the paper written by their tutorial partner. Each student will write six papers and serve as a critic on the six papers of their tutorial partner.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** Junior and senior History majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

### **HIST 496 (F) Gandhi: History, Ideas and Legacy (WS)**

**Cross-listings:** REL 412 LEAD 412 ASIA 412 ASST 412 GBST 412 HIST 496 LEAD 322

#### **Primary Cross-listing**

This course studies the life, work, and ideas of M.K. Gandhi (1869-1948), one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. This tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as

well as journal articles, monographs and films. The course will probe questions such as: What was the context and nature of Gandhian nationalism? Did it help to integrate the Indian nation? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

**Requirements/Evaluation:** 5-7-page essays or 2-page critique due each week and a final report (3-4 pages) at the end of the semester.

**Prerequisites:** None, except students who have taken HIST488T will not be permitted to take this class.

**Enrollment Limit:** 10

**Enrollment Preferences:** Senior history majors and students who have previously taken HIST221. Students who have previously taken HIST488T will not be permitted to take this class.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **HIST 12 (W) Introduction to Hand Bookbinding**

This class will offer a fast-paced, workshop-style introduction to bookbinding, starting with single sheet structures and working through several codex structures with a variety of cover-to-text-block attachments. Throughout, our benchwork-folding, cutting, sewing, adhering-will be grounded in the historical context of the craft and accompanied by readings and online resources, as well as discussion of material and structure, and the implications of both for the conservation and preservation of books. While the course will be focused on Western bookbinding techniques, we'll also touch on other cultural binding traditions with an eye toward understanding the comparative youth of Western book crafts. Class will meet three times a week for three hours, including a weekly visit to Special Collections to examine historical examples of bindings. Students should be prepared to spend significant time

outside of class exploring the world of book arts and book history online, and developing and completing independent binding projects, including a set book for the final project. The course will conclude with an exhibition of student work.

**Requirements/Evaluation:** Completion of in-class and independent binding projects, 1-2 brief presentations, and capstone binding of set book

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Preference will be given to students who have little or no previous bookbinding experience, and to those who express early and enthusiastic interest.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Cara Schlesinger '91 is an independent bookbinder and conservator in New York City. She has worked at the Metropolitan Museum of Art and Columbia University as well as with private clients and rare book specialists around the country.

### **HIST 17 (W) The 16th- to 17th-Century World of Printed Texts and Images**

Imagine yourself back in a time without the computer technology that enables you to create, print out or distribute instantaneously innumerable illustrated texts with the click of a few buttons. In this multifaceted course, we will explore the 16th-17th-century world of printed books and images. Your eyes will be trained to recognize and appreciate the primary techniques in which printed images were made at this time. While becoming acquainted with the ways in which texts were printed by hand, you will learn how to examine rare books and evaluate how they were put together. Finally, you will be taught to think like a savvy publisher, endeavoring to earn a living by profiting from the rapidly expanding, international market for a diverse range of illustrated texts. In order to achieve these goals and fully appreciate what entrepreneurial artists, printers, and publishers accomplished centuries ago, lectures and assigned readings will be complemented by visits to local print collections and the regular, hands-on consultation of illustrated rare books in the Chapin Library. Given the underlying premise that one learns by doing, we will usually meet four times a week, (2 hours per session) primarily in the Chapin library. For your final project, you will be expected to select an illustrated book from the Chapin collection and prepare a presentation on it for the class in which you highlight the topics addressed during the lectures. Evaluation will be based upon this presentation, in addition to class participation. I look forward to delving into the fascinating world of hand-crafted books and prints with you.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** randomly

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Karen Bowen is an art historian, specialized in the study of prints, printmaking, and book illustration in the early modern period. She is currently preparing a book on the European print trade in the 16th and 17th centuries.

### **HIST 19 (W) Fresh Purpose for Old Paper: Curating Special Collections in the 21st Century**

How do our library's collections represent the past and present of the many Williams communities? What makes a library's books and manuscripts worth saving? What should we collect, and how are those decisions made? Whose voices are missing? This course will examine the role of Special Collections in the 21st century, going behind the scenes of the Chapin Library and College Archives. We will first consider the library's existing collections, focusing on what makes these books and manuscripts valuable -- and not just in terms of their cost. We'll consider how historical events

are documented in primary sources, and how those documents can support teaching and research. We'll also learn about the market for rare books and manuscripts and consult with booksellers and curators at a peer institution. For the final project, students will propose the acquisition of a new collection of books or manuscripts for the Chapin Library or the College Archives. We'll spend the final week of class presenting to a curatorial panel, who will assess the proposals to purchase material for our collections.

**Requirements/Evaluation:** final project or presentation. collection development proposal, class presentation to library staff (during normal course meeting times)

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** random, if course is oversubscribed

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Anne Peale, Special Collections Librarian at Williams, graduated from Dartmouth College and studied Material Cultures and Book History at the University of Edinburgh; she recently completed her PhD in Historical Geography.

### **HIST 23 (W) Maps: Past, Present, & Future**

This class will examine how antique maps, created in the 15th to 20th centuries, provide lessons for modern-day map-making. We will start by considering the purposes of antique maps, especially those made in the 15th and 16th centuries by both European and Islamic mapmakers: why were they made, by whom and by what process? We will discuss "what is a map?", as well as principles of information design, what makes a map good, and lessons that can be drawn from antique maps. Students will learn about the multitude of online resources available for collecting and studying antique maps, including collections at Williams College, and, in their first group project, will work in teams of two to four to make a presentation about an antique map or group of maps that represent the considered lessons. Throughout the course, we will pivot back and forth between antique maps and modern-day maps. We will consider the concept of strategy, which defines an organization, and the various purposes of modern-day geospatial data science, which derives from strategy, in both for-profit and nonprofit organizations. We will review and discuss the tools used in geospatial data science, including analytical platforms like ArcGIS and MapBox, languages like Python, and data sources like the US Census, the HERE road network and the USGS Earth Explorer. We will review and discuss several case studies about how businesses and nonprofits utilize geospatial data science to advance their strategy. In the second group project, students will evaluate a modern-day application of geospatial data science, articulating the lessons from antique maps present in these modern-day maps, as well as any new lessons. Groups will work together to make a presentation about a modern-day map they have studied or about a modern-day map they have made themselves. Topics for group projects could include nonprofit topics like gerrymandering, redlining and climate change or for-profit topics like site selection and advertising effectiveness.

**Requirements/Evaluation:** Discussion and two group projects

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** Mix of students with an interest in history, art, and science

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Tom Paper is a Williams grad '84 and Stanford MBA, Managing Partner of Webster Pacific, a strategic analytics consultancy; he is also VP of the California Map Society & Founder of The Digital Gallery, a website of exhibits of antique maps and art.

### **HIST 27 (W) MinCo in Context: Coalition Building and Student Social Movements Since the 1960s**

Are you curious about how MinCo (Minority Coalition) came into being at Williams College? Do you want to know how meeting minutes, handwritten signs, and oral histories can tell us about how students have built coalitions to pursue and achieve strategic goals in at-times hostile circumstances? Do you want to learn how the creation and flourishing of MinCo fits into a broader history of social movements within higher education? And what is a coalition, anyways? If your answer to any of these questions is yes, then this class is for you! Through a hands-on approach focused on working with primary sources held in the special collections and college archives at Williams, this course invites students not only to learn about MinCo history, but also to do the work of public historians. Along with individual assignments in which students engage with archival sources and current scholarship, the final assignment will be team-produced public history projects that mobilize primary sources to tell a compelling history of coalition-building in MinCo history. The course meets 2 times per week for 3 hours each session, and will include a substantial amount of time conducting research in the college archives.

**Requirements/Evaluation:** Short paper and final project or presentation. Assignments will include individually written object labels (primary source descriptions) and secondary source analysis, as well as a public history project situating a small number of primary sources in historical context and explaining their significance within MinCo history.

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Student Survey. First priority will be given to students who are current leaders in MinCo groups. Second priority will be given to students who are members of MinCo groups. Third priority will be any student interested in the topic.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Aly W Corey, PhD is the Associate Director for Inclusive Learning Environments at the Davis Center. Aly's research and teaching expertise is in critical ethnic studies, trans studies, and U.S. musical culture.

### **HIST 28 (W) Introduction to Public History**

This course will introduce you to the expansive world of public history: the ways in which history is put to work in the world beyond an academic setting. Our course will explore public history's primary ideas, questions, and the practical concerns confronting public historians in a variety of professional and institutional settings. The course will center around key ideas and themes that inform the world of public history, including memory, shared authority, decolonization, audiences and audience engagement, racial justice, historic preservation, and museum interpretation. To explore public history's manifestations beyond the classroom, this class will include field trips and site visits to museums, monuments, historic sites and preserved structures, and other public history institutions in the Berkshires and western Massachusetts and incorporate guest speakers into our class meetings to secure a wide-ranging introduction to this field and its key concepts. Our class is structured to be reflexive, meaning we will learn about how public history has evolved over time and grapple with the way the field's history frames contemporary social and political issues confronting public historians today. A minimum of 10 hours of time per week will be spent in the classroom, including time at field trips and site visits, and an average of 15-20 hours per week will be spent on outside-of-class work, including travel to and from field visit sites. In addition to travel, time spent outside of class will be used to work on course assignments and complete weekly readings of significant past and present literature in the field. For your final evaluation, you will identify a set of "best practices" with your peers for public historians and choose one of our field site visits to write an exhibit or site review. Ultimately, by the end of this course you will have a strong grounding in the field of public history and formulated your own understanding of what constitutes public history.

**Requirements/Evaluation:** Short paper and final project or presentation. Students will individually write an exhibition or site review that addresses each site's particular history, how its relates to its contemporary administration, and how the site approaches key concepts in public history like audience engagement, social and racial equity, and connects the public to major historical questions/inquiry.

**Prerequisites:** N/A

**Enrollment Limit:** 30

**Enrollment Preferences:** Students will be selected based on seniority and need for a history course to fulfill academic requirements of the institution.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Brian Whetstone is an urban historian, public historian, and historic preservationist whose teaching promotes student engagement with

the ways history informs our understanding of contemporary social and political struggles.

LEC Section: 01 Cancelled

### **HIST 30 (W) Workshop in Independent Research**

This course is designed for junior majors and sophomores who are considering pursuing a senior thesis in History. It can either provide students greater experience in independent research or allow for an in-depth exploration of a specific topic under consideration for the thesis. The course will focus on key methods of historical research, such as defining a topic, familiarizing oneself with historiography, and finding and using primary sources. Students may pursue any topic, and assignments may be modified to fit students' particular needs and interests. The majority of class time will consist of individual meetings with the professor as well as consultations with librarians and other experts in your field. Students are expected to devote considerable time outside of class to independent research. The final assignment will be a 10-page paper, which can either be a detailed prospectus for a senior thesis or a research paper.

**Class Format:** independent research

**Requirements/Evaluation:** 10-page paper; weekly short assignments

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** instructor will send students questions over email about their research plans; students with evidence of more formulated plans will receive preference

**Expected Class Size:** 5

**Grading:** pass/fail only

### **HIST 31 (W) Senior Thesis: History**

To be taken by all senior honors students who are registered for HIST 493 (Fall) and HIST 494 (Spring), HIST 31 allows thesis writers to complete their research and prepare a draft chapter, due at the end of Winter Study.

**Class Format:** thesis

**Requirements/Evaluation:** thesis chapter

**Prerequisites:** HIST 493

**Enrollment Limit:** 20

**Enrollment Preferences:** only students writing a thesis in History can enroll for this course

**Grading:** pass/fail only

Winter 2023

HON Section: 01 TBA Aparna Kapadia

### **HIST 99 (W) Independent Study: History**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

## INTERDISCIPLINARY STUDIES (No Div)

This program is designed to facilitate and promote innovations in curricular offerings in relation both to interdisciplinary conceptual focus and experimental pedagogical form. It provides support for faculty efforts to develop a curriculum that creatively responds to intellectual needs and modes of teaching/learning that currently fall outside the conventional pattern. Faculty members interested in offering courses that fall outside the aegis of departmental or existing interdisciplinary programs submit such courses directly to the Committee on Educational Affairs by the Registrar's deadline for course submission in early spring. Courses that fit within the curricula of departments and interdisciplinary programs, even if interdisciplinary or experimental in nature, are found listed within those departments and programs.

### **INTR 219 (F) Women and Girls in (Inter)National Politics (DPE)**

**Cross-listings:** INTR 219 AFR 217 WGSS 219 AMST 217 LEAD 219

#### **Primary Cross-listing**

This tutorial focuses on the writings and autobiographies of women who have shaped national politics through social justice movements in the 20th-21st centuries. Women and girls studied include: Fannie Lou Hamer, Shirley Chisholm, Safiya Bukhari, Erica Garner, Greta Thunberg, Malala Yousafzai, Marielle Franco, Winnie Mandela.

**Requirements/Evaluation:** Weekly 5-page primary analytical papers and 2-page response papers.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Juniors and seniors, sophomores.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

INTR 219 (D2) AFR 217 (D2) WGSS 219 (D2) AMST 217 (D2) LEAD 219 (D2)

**Difference, Power, and Equity Notes:** This tutorial examines how girls and women confront capitalism, imperialism, climate devastation, patriarchy and poverty. The national and international movements that they participated in or led were based on shifting the balance of powers towards the impoverished, colonized, and imprisoned.

**Not offered current academic year**

### **INTR 220 (F) Cold War Intellectuals: Civil Rights, Writers and the CIA (DPE)**

**Cross-listings:** PSCI 221 AFR 224 AMST 201 LEAD 220 INTR 220

#### **Primary Cross-listing**

This weekly tutorial has alternating primary and secondary writers (5pages/2pages). In weekly one-hour sessions, students read their work aloud followed by dialogue and critique. Primary papers are due to respondent/professor 48hrs before the tutorial meets; response papers are emailed to the professor 2hours before the weekly tutorial meets. Readings include: *We Charge Genocide*; Williams J. Maxwell, *F. B. Eyes: How J. Edgar Hoover's Ghostreaders Framed African American Literature*; Chalmers Johnson, *Blowback: The Costs and Consequences of American Empire*; Hugh Wilford, *The Mighty Wurlitzer: How the CIA Played America*; "Part III Supervision and Control of the CIA," *Rockefeller Commission Report*; *Malcolm X Speaks*; Sam Greenlee, *The Spook Who Sat By the Door*; and, *The Murder of Fred Hampton*. The tutorial is open to all students.

**Requirements/Evaluation:** Attend all classes; submit completed papers 24hours before seminar meets.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Juniors and Seniors.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

PSCI 221 (D2) AFR 224 (D2) AMST 201 (D2) LEAD 220 (D2) INTR 220 (D2)

**Difference, Power, and Equity Notes:** This tutorial examines the Cold War between the US and the USSR and attempts to use intellectuals to shape and promote the objectives of powerful state entities. The power struggle between the two "superpowers" impacted cultural production and authors. Some of those authors influenced or enlisted into the Cold War sought equity and equality for their communities and eventually fought against the very political powers that employed them.

Fall 2022

### **INTR 240 (F) Philosophy of Education**

**Cross-listings:** PHIL 240 INTR 240

**Secondary Cross-listing**

Why are you here? What do you expect to learn? How do you expect to learn? The College Mission Statement says that "Williams seeks to provide the finest possible liberal arts education by nurturing in students the academic and civic virtues, and their related traits of character." How have you already been taught the academic and civic virtues? Where have you been taught them? In school? On the sports field? At home? How did you develop your character? This first-year seminar will examine the philosophy of education through educational autobiographies: works that tell the story of a moral and intellectual education. Each book was chosen by and will be introduced by a professor from a different department, and then Professor of Philosophy Steve Gerrard will continue the discussion.

**Requirements/Evaluation:** several short papers

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** only first-year students

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **INTR 320 (S) The Impact of Black Panther Party Intellectuals on Political Theory (DPE) (WS)**

**Cross-listings:** LEAD 319 PSCI 376 INTR 320 AMST 308

**Primary Cross-listing**

This seminar examines the historical and contemporary impact of the Black Panther Party--and key allies such as Angela Davis--on political theory. Texts include: narratives from 1966-2016; memoirs; political critiques; theoretical analyses; interviews; speeches; government documents. The seminar will examine: original source materials; academic/popular interpretations and representations of the BPP; hagiography; iconography; political rebellion, political theory. Readings: *Liberation, Imagination and the Black Panther Party*; *Soledad Brother: The Prison Writings of George Jackson*; *Mao's Little Red Book*; *The Communist Manifesto*; *Still Black, Still Strong*; *Imprisoned Intellectuals*; *Comrade Sisters: Women in the Black Panther Party*.

**Requirements/Evaluation:** Requirements: students attend each seminar class and come prepared to discuss the readings; participate in discussions; present a collective analysis with Q/A for the seminar; submit a mid-term paper and a final paper or a group project.

**Prerequisites:** None.

**Enrollment Limit:** 19

**Enrollment Preferences:** Juniors and Seniors with previous courses taken in Africana Studies, American Studies, Political Science, Philosophy.

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Writing Skills Notes:** Three thesis papers at five pages each (each receiving critical feedback from professor); one thesis paper revision with critical feedback from professor and peers, including one letter of revision explaining the student's revision process; one keyword glossary where students develop rigorous definitions of course key terms; one roundtable discussion based on the final paper.

**Difference, Power, and Equity Notes:** This course focuses on anti-colonial struggles against European powers. Research will include the concept of "internal colonies" in the US.

Not offered current academic year

### **INTR 343 (S) Representations of Racial-Sexual Violence from Enslavement to Emancipation**

**Cross-listings:** INTR 343 AFR 343 AMST 343 WGSS 343

#### **Primary Cross-listing**

This tutorial examines representations of and resistance to racial-sexual violence in American society, from colonial America to contemporary US culture. Interdisciplinary texts cover history, politics, literature, film, feminist studies, American studies, lgbtq and ethnic/black studies. Books include *Southern Horrors*; *Intimate Matters*; *Scenes of Subjection*; *Trauma and Recovery*; *The Delectable Negro*; *At the Dark End of the Street*; films include *Birth of a Nation*; *Bush Mama*; *To Kill a Mockingbird*. The primary focus is on racial and sexual vulnerability to violence and mobilization for freedom from the 18th-21st centuries.

**Class Format:** students provide primary and response papers and discuss their analyses and theories of social and interpersonal violence

**Requirements/Evaluation:** weekly primary and response papers

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** preference given to juniors and seniors

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Cross-listings:** AFR 372 AMST 400 GBST 400 INTR 400 PSCI 379

#### **Primary Cross-listing**

This seminar focuses on the entwined histories of liberation movements against racism, enslavement, and imperialism in the US, Cuba and Africa. Readings include: Hugh Thomas, *Cuba: A History*; Che Guevara: *The Motorcycle Diaries*; Walter Rodney, *How Europe Underdeveloped Africa*; Laird Bergad, *The Comparative Histories of Slavery in Brazil, Cuba, and the United States*; Thomas Sankara, *Women's Liberation and the African Freedom Struggle*; Nelson Mandela and Fidel Castro, *How Far We Slaves Have Come!* Students will read and analyze texts, screen documentaries, collectively compile a comprehensive bibliography, and present group analyses. The seminar is open to all students; however, priority is given to seniors majoring in American Studies.

**Requirements/Evaluation:** Reading and analysis of texts, collective compilation of a comprehensive bibliography, presentation of group analyses; two brief papers due at midterm and the end of the semester

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** Seniors majoring in American Studies

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

## ROMANCE LANGUAGES (Div I)

### ITALIAN

Chair: Professor Leyla Rouhi

Visiting Assistant Professor: M. Monserrati

The study of Italian in the target language encourages students to gain a deep appreciation of the language, culture and literature through active participation and meaningful experience with the culture on its own terms. Italian courses at Williams are therefore conducted exclusively in Italian in order to enhance and reinforce the emotive and cognitive involvement of the students as they are introduced to the Italian world-view in a lively and natural manner. Students desirous of more contact with Italian are encouraged to attend the weekly Italian Table in the designated college dining hall. More information can be found at [cflc.williams.edu/italian](http://cflc.williams.edu/italian).

#### RLIT 101 (F) Elementary Italian

This course is designed for beginners. Its goal is to give students the opportunity to develop a basic oral/aural and reading/writing proficiency in Italian. During the semester, you will be given training in grammar, pronunciation, aural-oral skills, reading, and writing in Italian by studying a wide range of communication patterns and real-life situations. At the end of the semester, you will be able to use Italian to talk about yourself, describe your family, town, friends, and discuss your interests. You will also be able to talk in Italian about the present and past events and converse with your peers about your daily activities. Your listening skills will allow you to understand short dialogues and conversations, watch clips from mainstream Italian films, and write short compositions. *Conducted entirely in Italian.* The course is taught in person.

**Class Format:** five hours a week with the professor

**Requirements/Evaluation:** participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams

**Prerequisites:** none; not open to those who have had one year or more of high school Italian

**Enrollment Limit:** 20

**Enrollment Preferences:** instructor will prioritize on the basis of study abroad plans and year at Williams

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** students registered for RLIT 101-102 are required to attend and pass the sustaining program during Winter Study; credit granted only if both semesters (RLIT 101 and 102) are taken

**Distributions:** (D1)

Fall 2022

SEM Section: 01 M-F 9:00 am - 9:50 am Michele Monserrati

#### RLIT 102 (S) Elementary Italian

This course is designed for beginners who already have some basic knowledge of Italian. Its goal is to give students the opportunity to review and expand their oral/aural and reading/writing proficiency in Italian. During the semester, you will continue to learn grammar, vocabulary, pronunciation while improving your aural-oral skills, reading, and writing in Italian. The instructor will present you with a wide range of communication patterns and real-life situations to achieve these goals. At the end of the semester, you will be able to use Italian to talk about yourself, your life, describe your town and history, dreams and interests, and express your opinion on complex topics. You will also be able to talk in Italian about the present, past, and future events and express doubts and hopes. You will understand more complex conversations and clips from mainstream Italian films and write more extended compositions. *Conducted entirely in Italian.*

**Class Format:** Students will meet four times a week with me and once a week with the TA in small groups of 2-3 students.

**Requirements/Evaluation:** participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams

**Prerequisites:** RLIT 101; not open to those who have had one year or more of high school Italian

**Enrollment Limit:** 20

**Enrollment Preferences:** instructor will prioritize on the basis of study abroad plans and year at Williams

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** students registered for RLIT 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLIT 101 and 102) are taken

**Distributions:** (D1)

Spring 2023

SEM Section: 01 M-F 10:00 am - 10:50 am Michele Monserrati

### **RLIT 105 (F) Pathway to Proficiency**

The course taught in Italian aims primarily to fine-tune the student's speaking, reading, and writing ability while introducing the formal study of Italian culture and society by analyzing short literary texts, articles, films, and plays. This course will also explore Italy's lesser-known cultural and natural sites in an attempt to highlight what Italy has to offer in terms of eco-friendly and sustainable tourism and cultural diversity. In the wake of *Black Lives Matter's* quest for social justice, a part of this course will be dedicated to Italian black writers and artists to explore how the Italian colonial past affects Italy's racial discourse and the construction of its national identity. Students will review and expand the previous semesters' grammar structures to achieve a higher level of fluency and sophistication in language production. Italian 105 is intended for study-abroad returnees and other advanced speakers; students who have been particularly successful in Italian 101-102 are also encouraged to enroll. The course is taught in person.

**Requirements/Evaluation:** oral presentations, midterm and final exams, tests, compositions, participation

**Prerequisites:** RLIT 101/102 or by permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Students from 101/102 classes, as well as study-abroad returnees.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

IND Section: 01 TBA Leyla Rouhi

**DEPARTMENT of ASIAN LANGUAGES, LITERATURES, & CULTURES**  
**CHINESE, JAPANESE, EAST ASIAN LANGUAGES & CULTURES**

**(Div I & II, see explanation below)**

**Chair: Professor Li Yu**

Cecilia Chang, Frederick Latimer Wells Professor of Chinese; Man He, Assistant Professor of Chinese; Shinko Kagaya, Professor of Japanese; Cornelius C. Kubler, Stanfield Professor of Asian Studies; Christopher M. B. Nugent, Professor of Chinese; Kasumi Yamamoto, Frank M. Gagliardi Professor of Japanese; Li Yu, Professor of Chinese

**Visitors:** Eun Young Seong, Visiting Assistant Professor of Japanese; **Language Fellows:** Ai-Chen Wang, Mo Wu; **Teaching Associate:** Qiqi Chen

**Department Mission Statement and Curricular Goal**

The mission of the Department of Asian Languages, Literatures, and Cultures is to produce “global citizens” who will be able to make contributions in different sectors of society in a globalized and diverse world with multilingual abilities, intercultural communicative competence, and multicultural leadership skills. Graduates of our department will not only achieve proficiency in at least one Asian language but also become competent in intercultural communication. They will develop interpretive and analytical skills using both primary texts and secondary sources and become familiar with the textual and cultural traditions in Asia.

The department offers three distinct major tracks: Chinese, Japanese, and East Asian Languages & Cultures. Each major requires a minimum of ten courses. Up to four study-away credits can be counted toward a major.

**Learning Objectives for the Chinese Major**

Students who complete the requirements for a major in Chinese will be able to:

- Attain the Advanced level in speaking, listening and reading, and Intermediate High level in writing based on the ACTFL proficiency guidelines.
- Read and analyze basic texts written in Classical Chinese.
- Gain intercultural communicative skills to competently navigate a wide range of social and cultural contexts in Chinese-speaking environments.
- Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.
- Engage critically with important aspects of the historical and cultural developments and trends in China’s diverse and complex past and present.
- Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.

**THE MAJOR**

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Mandarin Chinese language courses (CHIN 101, 102, 201, 202, 301, 302, 401, 402) and at least one course in Classical Chinese (CHIN 312). To gain a deeper understanding of Chinese cultural traditions, students should take at least one Chinese core elective in Chinese literary, linguistic, or cultural studies (taught either in English or in Chinese) with prefixes and primary cross-listings in CHIN.

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in [the program of Asian Studies](#).

**Learning Objectives for the Japanese Major**

Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL Intermediate High to Advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.

- Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.

## THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Japanese language courses (JAPN 101, 102, 201, 202, 301, 302, 401, 402), at least one Japanese core elective in Japanese literary, linguistic, or cultural studies (taught either in English or in Japanese) with prefixes and primary cross-listings in JAPN, and one approved elective related to Japanese language and culture (including additional JAPN core electives, additional Asian language courses, or Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in [the program of Asian Studies](#).

### Learning Objectives for the East Asian Languages and Cultures Major

Students who complete the requirements for a major in East Asian Languages and Cultures will be able to:

- Attain a minimum of Intermediate High level in speaking, listening and reading of either Chinese or Japanese, and Intermediate Low level in writing in the language based on the ACTFL proficiency guidelines.
- Acquire research, problem-solving, and critical thinking skills by engaging in linguistic or literary analysis in the field of Chinese studies or Japanese studies.
- Obtain basic intercultural communicative skills to navigate some social and cultural contexts in Chinese- or Japanese-speaking environments.
- Continue their engagement with an Asian language and culture as lifelong learners and users of the target language.
- Students who choose the dual-language option will attain the Advanced level in speaking, listening, and reading in either Chinese or Japanese, and the intermediate level in a second Asian language based on the ACTFL proficiency guidelines.

## THE MAJOR

East Asian Languages and Cultures (EALC) major: In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least six language courses (or attain a minimum proficiency equivalent to the completion of 302) in one East Asian language offered by the department (currently Chinese Mandarin and Japanese). To gain a deeper understanding of the Chinese or Japanese cultural traditions and to develop research skills in the Chinese or Japanese fields, they should take at least two Chinese/Japanese core electives in literary, linguistic, or cultural studies in their primary focus of study with prefixes and primary cross-listings in CHIN/JAPN, and two approved electives related to Chinese/Japanese language and culture (including additional CHIN/JAPN core electives, additional Asian language courses, or Chinese/Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in [the program of Asian Studies](#).

This major offers students who are able to complete the 402 level in either Chinese or Japanese by the end of their sophomore year a dual-language option which will allow them to learn a second Asian language and reach the Intermediate level in speaking that language by the time of graduation. Please consult with the chair or language coordinator for more information about this option.

## LANGUAGE PLACEMENT

Students who have studied or otherwise developed some familiarity with Chinese or Japanese language before coming to Williams and who wish to continue their language study at the college should complete a placement evaluation before pre-registering for a language course. More information about the Chinese placement evaluation can be found at <https://chinese.williams.edu/faq/>. Students who wish to take the Japanese placement test should contact the Japanese faculty.

## THE DEGREE WITH HONORS

The department offers students the option of pursuing a degree with Honors in Chinese, Japanese, or East Asian Languages and Cultures through writing an honors thesis. Honors theses allow students a unique opportunity to undertake an examination of topics and texts with a greater depth than regular courses allow. The great majority of students who undertake the challenge of writing an honors thesis find it to be one of their most rewarding academic experiences at Williams.

Students interested in pursuing a degree with Honors should begin thinking about their thesis topic and materials as early as possible. This is particularly true for students who need to gather materials or conduct research abroad, as this will typically take place during their junior year or the summer between their junior and senior years. It is the responsibility of the student to approach faculty members to inquire about their willingness to serve as a thesis advisor. Ideally, students should have previously taken a course with that faculty member in an area related to the subject matter of the thesis. Faculty members will usually only advise a single thesis per year, and never more than two, with students who first approach the faculty member about serving as advisor being given priority. It is recommended that students approach the faculty members with whom they are interested in

working for their thesis by the end of the fall semester of their junior year.

Students must submit a proposal to the department chair and their intended advisor before they pre-register for senior year courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. If the department approves the thesis proposal, the student should enroll in CHIN 493-W31-494, or JAPN 493-W31-494, depending on their major track. Please note that admission to the honors thesis program will normally be limited to students with a consistent record of honors-level work, as indicated by at least a B+ average in their courses for the major.

Students will typically meet with their advisor once a week at a set time other than office hours. The advisor will present the student with a set of deadlines for different stages in the thesis, ranging from a bibliography to the final draft. While these deadlines will vary for different advisors and theses, two deadlines will apply to all theses, whether analytic or translation. 1) Students must submit a finished first chapter or substantial section of polished translation by the last day of the first semester reading period. If the student misses this deadline, he or she will not be allowed to continue the thesis. 2) The finished thesis is due to the advisor by 4:00 pm on the Monday two weeks after the last day of Spring Recess. The student should submit three copies of the thesis at this time. There will be no extensions.

The department will assign two readers, separate from the advisor, to each thesis. The readers will give a written assessment of the thesis that will be an important factor in the final determination of the student's grades for the thesis and what honors designation, if any, will be given. These written comments will be shared with the student. Within two weeks after submission, the department will schedule an oral defense. This will be a one to one-and-a-half hour session in which the student will give a public presentation of his or her thesis to members of the department and invited guests followed by a question and answer period. A final, corrected copy of the thesis must be submitted to the Technical Services Department of Sawyer Library by 4:00 P.M. on the last day of the final examination period.

In order to qualify for Honors, the department must agree that the student has earned two semester grades of B+ or higher, based on his or her thesis and oral defense. Students whose thesis and defense are deemed by the department to be of exceptional merit will be awarded Highest Honors. A letter from the department chair will inform students of these decisions.

## **COVID-19 CHANGES**

Due to the pandemic, the department has reduced the number of courses required for its majors for the graduating classes of '22, and '23. For these years, the minimum requirements are nine courses as follows:

Chinese major: CHIN 101, 102, 201, 202, 301, 302, 401, 402, 312.

Japanese major: JAPN 101, 102, 202, 202, 301, 302, 401, 402, one approved elective.

East Asian Languages and Cultures major: at least six CHIN/JAPN language courses (or a minimum proficiency equivalent to the completion of 302), two CHIN/JAPN core electives, and one approved elective.

Students with higher language proficiency who are placed out of any of the core language courses (101 through 402) can take an equal number of faculty-approved electives taught either in Chinese/Japanese or in English on literature, linguistics, culture studies or related Chinese or Japanese studies disciplines (e.g., art history, history, political science) to fulfill the core language requirement.

Students who plan to study abroad either during the summer or during their junior year MUST consult with department faculty for advice.

## **STUDY ABROAD**

Students intending to major in the department are strongly encouraged to study in Asia at some point during their time at Williams—for a summer or for a semester or full year. Study-abroad in an immersive environment in the target culture is an indispensable step toward advanced proficiency in a second language. Prospective majors or language students who are planning to study abroad must attend the fall semester study-abroad information sessions organized by the department or discuss their plans with department faculty as far in advance as possible. The department administers the Linen Grants for Summer Study in Asia which fund selected students' summer intensive language study or research projects. Up to four study-abroad courses may be transferred and counted toward graduation and toward the majors offered in the department. Students MUST contact the department faculty BEFORE assuming study-away credit will be granted toward the major in the department. Upon return, students should ask their study-away program to send their transcript to the Registrar's office so that the appropriate number of credits can be transferred and granted by the department chair.

## **DEPARTMENT EMAIL LISTS**

To be informed about the events, activities and funding opportunities in the department, please use your Williams login to sign up for one or more of the following GLOW special interest email lists.

"DALLC Majors and Faculty" (open to all current and prospective Chinese, Japanese, or East Asian Languages and Cultures majors):

<https://glow.williams.edu/enroll/AWTMXP>

"Asia-Related Funding Opportunities" (open to all students who would like to seek internal or external funding related to Asia):

<https://glow.williams.edu/enroll/PGJHAC>

"Special Interest Chinese" (open to all students interested in Chinese language and culture): <https://glow.williams.edu/enroll/XEYMPG>

"Special Interest Japanese" (open to all students interested in Japanese language and culture): <https://glow.williams.edu/enroll/DAYTN3>

### **JAPN 101 (F) Elementary Japanese**

An introduction to modern spoken and written Japanese, the course aims to instill proficiency in Japanese by developing four necessary skills of speaking, listening, reading, and writing to successfully interact with native speakers. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Audio, video and computer--assisted learning materials will be used extensively. Classes consist of a combination of "act" classes, conducted exclusively in Japanese, where students use the language in various types of drills and communicative activities, and "fact" classes, conducted in Japanese and English, where students learn about the language and culture.

**Class Format:** fact classes, three hours per week; act classes three hours per week

**Requirements/Evaluation:** daily classroom performance, homework, quizzes, a midterm, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** current or prospective majors in the Department of Asian Languages, Literatures, and Cultures

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** students registered for JAPN 101-102 are required to attend and pass the sustaining program during the Winter Study period; credit granted only if both semesters (JAPN 101 and 102) are taken

**Distributions:** (D1)

### **JAPN 131 (F) Introduction to Japanese Linguistics: Past, Present and Future of Japanese Language**

**Cross-listings:** JAPN 131 ASIA 131

#### **Primary Cross-listing**

This course is to understand of how and why the Japanese language has developed to its present form and usage. We will first learn basic concepts and methodologies of linguistics, such as how to formally analyze the patterns of speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meaning (semantics and pragmatics). Then, based on sociolinguistics, linguistic typology, anthropological and cognitive linguistics frameworks, we will investigate variations and usages of the Japanese language. Topics will include polite language and honorifics, gender and women's language, onomatopoeia, linguistic landscape, Japanese dialects, language conflicts, language rights (Okinawans, Ainu, and Koreans in Japan), and multilingualism. The course format combines lectures, seminars, and student-facilitated discussions. There will be small quizzes, homework assignments, a final research paper, and a poster presentation of the final project. Although there is no prerequisite, intermediate Japanese proficiency or equivalent is beneficial when analyzing primary data.

**Class Format:** combination of lecture and discussion

**Requirements/Evaluation:** quizzes, one or two discussion facilitation, mid-term exam, poster presentation, and an 8- to 10-page final paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** current or prospective majors in the Department of Asian Languages, Literatures, and Cultures

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **JAPN 220 (S) Being Korean in Japan (DPE)**

**Cross-listings:** JAPN 220 ASST 220 ASIA 220

#### **Primary Cross-listing**

Who are Zainichi Koreans (Koreans in Japan)? How are they different from Koreans in Korea or in the United States? Contemporary Korean TV dramas and films have depicted Koreans as attractive and successful people appealing to Hallyu (Korean Wave) fans around the world. However, Zainichi Koreans, who are the largest ethnic minority in Japan, have been frequently portrayed as abusive husbands/fathers, pitiful wives/mothers, or juvenile delinquents in both Japanese and Korean cinema and literature. Through close readings of films, novels, and short essays, we will explore little-known yet significant representations of Zainichi Koreans by focusing on Japanese and Korean historical contexts. By doing so, we will discover new aspects of transnational exchange not only between Japanese and Koreans, but also between South and North Koreans in Japan. All class materials will be available in English translation or with English subtitles.

**Requirements/Evaluation:** attendance/participation; short written responses; midterm essay; group presentation; final essay

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** Open to all students, but if over-enrolled, priority will be given to Asian Studies and Japanese majors

**Expected Class Size:** 16

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

JAPN 220 (D1) ASST 220 (D1) ASIA 220 (D1)

**Difference, Power, and Equity Notes:** This course looks at the dynamics of unequal power in the social marginality of Korean immigrants in Japan. Exploring historical contexts, students will analyze how the ethnic particularity of the Korean minority has engaged with and against Japanese society. Students will also examine how we might associate the minority culture and history with extensive global issues, including the relationships between environmental problems and minorities, wars and women, and imperialism and migration.

**Not offered current academic year**

**JAPN 223 (S) Japanese Food Culture in a Global Context (DPE)****Cross-listings:** JAPN 223 COMP 223**Primary Cross-listing**

The burgeoning popularity of Japanese food on a global scale has resulted in a surge of new research, literature, and films. Conversely, the effects of globalization have transformed the dining experience within Japan to be ever more multiethnic. This interdisciplinary course explores the complex relationship between food and culture in Japan, and the emergence of Japanese cuisine as a global phenomenon, referring to a variety of materials and practices. Topics to be addressed include modernization, nation-building, militarization, globalization, the environment, and popular culture.

**Requirements/Evaluation:** active class participation, three response papers, two small written report (including class presentations), and one research paper and presentation

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** current or prospective majors in the Department of Asian Languages, Literatures, and Cultures

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

JAPN 223 (D1) COMP 223 (D1)

**Difference, Power, and Equity Notes:** This course explores the complex relationship between food and culture in and out of Japan, in relation to a variety of topics such as modernization, nation-building, militarization, globalization, environmentally sustainable development, and popular culture. Students will have the opportunity to critically analyze how various social/cultural, historical, and political contexts shaped and unveiled (in)difference, (dis)power, and (in)equity in food production and consumption.

Spring 2023

SEM Section: 01 Cancelled

**JAPN 240 (S) Toward Healing Trauma in Japanese and Korean Cinema (DPE)****Cross-listings:** ASIA 240 JAPN 240**Primary Cross-listing**

This course examines Japanese and Korean cinema from the 1930s to the present, with a focus on narratives of trauma. We will analyze cinematic representations of social conflicts caused by continuous negotiations of tradition and progress, gender and identity, and everyday life and war wounds in the transition from imperial/colonial to post-imperial/post-colonial periods. Along with exploring historical contexts, we will compare the ways in which Japanese and Korean filmmakers have confronted social injustice by addressing the pain of trauma. In doing so, we will discover the meanings of cultural confrontation in the process of healing and reconciliation in our society. All readings and screenings will be available in English translation or with English subtitles.

**Requirements/Evaluation:** class attendance and participation, weekly GLOW posts, two short essays (4-5 pages each), and a final project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Open to all students, but if over-enrolled, priority will be given to majors in the Department of Asian Languages, Literatures, and Cultures

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ASIA 240 (D1) JAPN 240 (D1)

**Difference, Power, and Equity Notes:** This course traces the trajectories of Japanese and Korean films that deal with contentious issues which have

left deep scars in society, including the legacies of Japanese colonialism and Cold War politics in East Asia. Students will have the opportunity to think critically about the implications of such cultural representations of social wounds and injustice on the way toward reconciliation.

Not offered current academic year

### **JAPN 301 (F) Upper-Intermediate Japanese**

This course is a continuation of Japanese 201 and 202. Students will further develop the four skills of speaking, listening, reading, and writing, while consolidating the foundations built in Elementary and Intermediate Japanese. The same general methodology will be used. In this course, students begin to emphasize vocabulary building through the study of situationally oriented materials stressing communicative competence. The reading of expository prose in both semi-authentic and authentic materials of intermediate difficulty will also receive some extensive attention.

**Class Format:** three 75-minute classes

**Requirements/Evaluation:** daily performance, homework, quizzes, a midterm, and a final exam

**Prerequisites:** JAPN 202 or permission of instructor

**JAPN 12 (W) The Art of Writing: Introduction to Arabic and Japanese Calligraphy**

Calligraphy is an art of elegant penmanship that is closely connected to philosophy, spirituality, literature, and poetry. This course introduces students to two different traditions of calligraphy, namely those of Arabic and Japanese, exploring their distinct characters as well as similarities. How has master-apprentice learning shaped each? How have these artforms developed in modern times? How are different aesthetics valued in each? And what are the themes and ideas shared between these two different traditions? At the theoretical level, students will explore historical, cultural, philosophical, and spiritual backgrounds of Arabic and Japanese calligraphy as well as material dimensions of the two traditions-how inks, pens, brushes, and paper are produced. At the practical level, students will be introduced to the execution of lettering with traditional tools, exploring self-expression through the art of writing. Students will be encouraged to consider how balance can be found in that which comprises both order and chaos, form and obscurity, and word and image. In class (6 hours per week), students will engage in hands-on activities, learning the basic techniques of Arabic and Japanese calligraphy. Class time also includes short lectures on theoretical and practical aspects of the two traditions. Through this course, students will learn to use calligraphy as a meditation tool, one that cultivates inner focus and attention to breathing and bodily movements. Outside class, students will be required to practice daily ten-minute calligraphy meditation sessions. Evaluation for this course is based on attendance at each session, a final calligraphy work, and in-class presentation on the piece. No previous knowledge of Arabic/Japanese or experience with calligraphy is required for this course. The class is open to students interested in both/either of two calligraphy traditions.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** n/a

**Enrollment Limit:** 10

**Enrollment Preferences:** Majors in Arabic Studies and the Department of Asian Languages, Literatures, and Cultures if the course is overenrolled.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Eriko Okamoto is a research associate in Arabic Studies at Williams College. She has studied Arabic calligraphy in the US and the Middle East and has trained in Japanese calligraphy for over 20 years.

**JAPN 25 (W) Exploring Kyoto Culture: How 1200 years of cultural history continues throughout today**

Kyoto, the former imperial capital of Japan has 1200 years of history. It is referred to as Japan's cultural treasure house and thrives on its ancient heritage in architecture, gardens, religion, performing and culinary arts and craftsmanship. Yet Kyoto's appearances can be deceiving. You will find a monumental temple designated as a UNESCO World Heritage site under the shadow of ultramodern high-rising buildings. There is an enigmatic quality to the city with this juxtaposition of old and new. This unresolved tension between modernization and tradition is Kyoto's fascination. The

purpose of this travel course is to explore the cultural history of Kyoto and how it is perpetuated and transformed in a modern era. Students will visit various sites and artists/artisans in Kyoto. Through these experiences, they will arrive at their own conclusion about what it means to sustain tradition while pursuing modernization and innovation. The first week of the course will be conducted on campus. Students conduct research in pairs to acquire additional in-depth knowledge on one selected area of Kyoto's art/craftsmanship. For the second and third week, the class will travel to Kyoto. We will first explore the city of Kyoto to develop an idea of how its cultural history progressed from courtly culture in the Heian period, to samurai tradition in the Medieval periods, and aspects of religious ceremonies, Noh Theater and tea ceremonies. We will also visit four to five artisan/artist studios, including hands on experiences at some studios. Students are expected to participate in all the scheduled activities, keep a daily journal, and participate in daily reflections. At the end of the Kyoto visit, students will summarize their reflections and present their views on Japanese traditional and modern art/craft/performance to the local community and to the Kyoto artists/artisans at a public forum. The class will return to campus towards the end of the third week.

**Requirements/Evaluation:** post daily blog to the course website and a public PowerPoint presentation in Kyoto

**Prerequisites:** none

**Enrollment Limit:** 8

**Enrollment Preferences:** personal statements and completion of course(s) related to Japan

## JEWISH STUDIES (Div II)

Chair: Professor Edan Dekel

### Advisory Committee

- Edan Dekel, Professor of Classics, Chair of Jewish Studies Program; affiliated with: Classics, Religion; on leave 2022-2023
- Alexandra Garbarini, Charles R. Keller Professor of History; on leave 2022-2023
- Jeffrey I. Israel, Chair and Associate Professor of Religion

### THE PROGRAM IN JEWISH STUDIES

Jewish Studies is an interdisciplinary field that encompasses the texts, history, languages, philosophy, and culture of Jews and Judaism as they have changed over three millennia and throughout the world. The program offers courses in multiple disciplines including but not limited to Religion, Classics, History, Philosophy, Anthropology, Sociology, and Comparative Literature. Across these disciplines, the program examines topics such as religious belief and practice, textual interpretation, the development of Zionism, life in the Diaspora, the historicization and memorialization of the Holocaust, and historical, political and philosophical questions surrounding Jewish identity. Investigating the foundations and development of these various Jewish topics, as well as their interaction with and influence on other traditions, provides an opportunity to explore the continuities and diversity of Jewish life and thought. Students will gain exposure to a common body of knowledge and scholarly approaches through which to engage in their own rich and varied intellectual explorations of Jewish and related topics.

### CONCENTRATION IN JEWISH STUDIES

The concentration in Jewish Studies requires five courses with at least two different prefixes: one gateway course, two core courses, one elective, and one capstone course. Senior concentrators should consult with the chair about arrangements for a capstone course.

#### Gateway Courses (can also count as core courses):

## Elective Courses

Students may meet the elective requirement with a course partially related to Jewish Studies or another core course. In an elective course partially related to Jewish Studies, a student will normally focus at least one of the major writing assignments on a topic relevant to Jewish Studies or approximately one-third of the course will be devoted to Jewish subjects. The list of relevant electives changes regularly, so the course catalog should be checked for details. Listed below are examples of courses partially related to Jewish Studies. Students may meet the elective requirement with a course not listed here, subject to the approval of the Chair of Jewish Studies.

## THE DEGREE WITH HONORS IN JEWISH STUDIES

The degree with honors offers students the opportunity to undertake advanced research under the supervision of one or more of the faculty members in Jewish Studies. Students normally must have at least a 3.5 GPA in the concentration and secure a faculty sponsor to be eligible. In addition to completing the five courses required for the concentration, candidates must enroll in either JWST 493 and a Winter Study course or a

Winter Study course and JWST 494 in their senior year, and prepare a substantial written thesis. Honors in Jewish Studies may be granted to concentrators after an approved candidate completes an honors thesis and is awarded an honors grade by her/his advisor and one other faculty reader. Students interested in becoming candidates for honors should consult with the program in the spring of the junior year.

### **Croghan Professorship**

Each year, in addition to the regular course offerings listed above, Williams sponsors the Croghan Bicentennial Visiting Professor in Religion who offers one course in Judaism and/or Christianity

### **OVERSEAS STUDIES**

Studying in Israel is highly recommended for students interested in Jewish Studies. Many students have spent a semester or year at Hebrew University, Tel Aviv University, or the University of Haifa. With the approval of the Jewish Studies program chair, students may count a study-abroad program towards up to two core requirements.

### **FAQ**

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

#### **Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

#### **What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description.

#### **Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

No.

#### **Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

No.

#### **Are there specific major requirements that cannot be fulfilled while on study away?**

Yes. Gateway course and Capstone course.

#### **Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

No.

#### **Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:**

None to date.

### **FUNDING**

The Bronfman Fund for Judaic Studies was established in 1980 by Edgar M. Bronfman '50, Samuel Bronfman II '75, and Matthew Bronfman '80. The Bronfman Fund provides opportunities for the Williams community to learn about Jewish history and culture, both within the College's formal curriculum and through the planning of major events on Jewish themes.

The Morris Wiener and Stephen R. Wiener '56 Fund for Jewish Studies was established in 1997 through the estate of Stephen R. Wiener '56. The Wiener gifts have provided an endowment to support a faculty position in modern Jewish thought, and are used to underwrite an annual lecture, forum or event relevant to contemporary Jewish life.

### **JWST 101 (F) Judaism: Before The Law**

**Cross-listings:** REL 203 JWST 101

#### **Secondary Cross-listing**

This course introduces the academic study of Judaism through a humanistic exploration of "the Law" as a concept in Jewish thought and practice. Coverage will include the Law of Moses in the Hebrew Bible, the rabbinic distinction between "Oral Law" and "Written Law," medieval philosophical justifications for the Law, modern interpretations of the Law as Moral Law, Hasidic challenges to the centrality of the Law, and twentieth-century

Jewish fiction that is haunted by a felt absence of the Law. Topics may also include the nature of rabbinic authority, methods of Jewish legal interpretation and innovation, and Jewish law as it pertains specifically to women, gentiles, idolaters, food consumption, and the Land of Israel. Course materials will include classical sources such as the Talmud and Midrash, modern philosophical texts, Franz Kafka's *The Trial* with his parable "Before The Law," ethnographic accounts of contemporary Jewish observance, and much else. *All readings will be in translation.*

**Requirements/Evaluation:** class participation, three short papers, and a final longer paper

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** Jewish Studies concentrators, Religion majors and students who are considering these options

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

### **JWST 205 (S) Ancient Wisdom Literature**

**Cross-listings:** JWST 205 CLAS 205 REL 205 COMP 217

#### **Secondary Cross-listing**

The Biblical books of Proverbs, Ecclesiastes, and Job are often grouped together under the Hebrew category of *hokhmah*, 'wisdom.' Although these books are very different in content, they can all be interpreted as meditations on ethical and practical philosophy. In this way, they represent the Hebrew Bible's canonical embrace of a widespread Near Eastern literary phenomenon. From the instructional literature of Egypt and Mesopotamia to Greek didactic poetry and fables, ancient Mediterranean cultures offer a wide range of texts that engage the issues of personal behavior, leadership, and justice. Starting with the central wisdom books of the Hebrew Bible and moving through relevant material from the Apocrypha, New Testament, and the Egyptian and Babylonian traditions, this course will examine the literature of wisdom throughout the ancient world with an eye toward understanding its various social, political, and philosophical contexts. We will then consider the Greek wisdom tradition in such texts as Hesiod's *Works and Days*, Aesop's fables, and fragments from the pre-Socratic philosophers. Finally, we will explore the influence of these ancient sources on later expressions of wisdom in medieval European literature, as well as more recent examples such as Benjamin Franklin's *Poor Richard's Almanack*. *All readings are in translation.*

**Requirements/Evaluation:** class participation, short written assignments, and two longer papers

**Prerequisites:** none

**Enrollment Limit:** 19

**Expected Class Size:** 19

**Not offered current academic year**

### **JWST 206 (S) The Book of Job and Joban Literature**

**Cross-listings:** JWST 206 REL 206 COMP 206

#### **Secondary Cross-listing**

The Book of Job has often been described as the most philosophical book of the Hebrew Bible. The story of one man's struggle to understand the

cause of his suffering and his relationship to God represents the finest flowering of the Near Eastern wisdom literature tradition. Through its exploration of fundamental issues concerning human suffering, fate and divinity, and the nature of philosophical self-examination, Job has served as a touchstone for the entire history of existential literature. At the same time, the sheer poetic force of the story has inspired some of the greatest artistic and literary meditations in the Western tradition. This course will engage in a close reading of the Book of Job in its full cultural, religious, and historical context with special attention to its literary, philosophical, and psychological dimensions. We will then proceed to investigate key modern works in several genres that involve Joban motifs, themes, and text both explicitly and implicitly. These texts will include Franz Kafka's *The Trial*, Archibald MacLeish's *J.B.*, Robert Frost's "Masque of Reason," Carl Jung's *Answer to Job*, and William Blake's *Illustrations to the Book of Job*. *All readings are in translation.*

**Class Format:** For the spring of 2021, this course will be taught online. The seminar will meet at the regularly scheduled time twice a week.

**Requirements/Evaluation:** Evaluation will be based on class participation, weekly short written assignments, and two longer papers.

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** If the course is overenrolled, preference will be given to students who have already taken a course in biblical literature.

**Expected Class Size:** 12

### **JWST 207 (F) From Adam to Noah: Literary Imagination and the Primeval History in Genesis**

**Cross-listings:** COMP 250 REL 207 JWST 207 CLAS 207

Secondary Cross-listing

How long did Adam and Eve live in the Garden of Eden? What was the mark of Cain? Why did Enoch not die? Who was Noah's wife? How did Giants survive the Flood? These are only a few of the fascinating questions that ancient readers and interpreters of the Book of Genesis asked and attempted to answer. The first ten chapters of Genesis present a tantalizingly brief narrative account of the earliest history of humankind. The text moves swiftly from the Creation to the Flood and its immediate aftermath, but this masterful economy of style leaves many details unexplained. This course will explore the rich and varied literary traditions associated with the primeval history in the Genesis. Through a close reading of ancient noncanonical sources such as the Book of Enoch, Jubilees, and the Life of Adam and Eve, as well as Jewish traditions represented in Josephus, Philo, and Rabbinic literature and other accounts presented in early Christian and Gnostic texts, we will investigate the ways in which the elliptical style of Genesis generated a massive body of ancient folklore, creative exegesis, and explicit literary re-imagining of the early history of humankind. We will then turn to some continuations of these variant traditions in medieval literature, with particular attention to the material on the figures of Cain and Noah. *All readings are in translation.*

**Class Format:** For the fall of 2020, this course will be taught online. The seminar will meet at the regularly scheduled time twice a week.

**Requirements/Evaluation:** Class participation and several writing assignments.

**Prerequisites:** None.

## **JWST 208 (S) Genesis: The Family Saga**

**Cross-listings:** COMP 207 REL 208 JWST 208

### **Secondary Cross-listing**

The Book of Genesis has rightly been described as the masterpiece of Hebrew biblical narrative. In particular, the continuous tale that begins with Abraham and Sarah and extends four generations to the children of Jacob, Leah, and Rachel is one of the most extraordinary examples of literary artistry in any time or tradition. As one family wrestles with the promise of becoming a chosen people, the narrative explores themes of marriage, parenthood, sibling rivalry, land, violence, wandering, and, above all, the complex relationship between humanity and God. This course will examine those themes through a close reading of Genesis in translation, from Abraham and Sarah's first appearance on the scene to the death of Jacob. We will consider the text from multiple perspectives with an eye toward understanding the literary, philosophical, and psychological dimensions that continue to amaze and perplex readers to this day.

**Requirements/Evaluation:** class participation, a series of short writing assignments, and two longer papers

## **JWST 209 (S) Jewish America**

**Cross-listings:** REL 209 JWST 209

### **Secondary Cross-listing**

Who and what counts as "Jewish" in America? Does stand-up comedy have a distinctly Jewish pedigree? What about neoconservatism? How is it possible to answer such questions without falling into what David Hollinger has called the "booster-bigot trap"? How is it possible, that is, to avoid answers that uncritically celebrate "Jewish contributions" or perniciously suggest "Jewish influence"? This course will explore the various meanings of Jewishness in American culture as expressed by artists, rabbis, activists, intellectuals, boosters, bigots and others. We will seek to avoid the booster-bigot trap by focusing vigilantly on what is at stake wherever Jewishness is invoked, defined or ascribed. We will draw methodological support from scholars like Hollinger, Jonathan Freedman, Laura Levitt, Yuri Slezkine, Shaul Magid, Andrea Most and others. Particular attention will be given to the appearance of Jewish themes and involvement in popular culture and political action, as well as to Jewish American communal institutions, the everyday lives of Jewish Americans, and Jewish variations on American religion. Coursework will involve some historical, sociological and ethnographic readings, but will focus primarily on close analysis of films, literary fiction, stand-up comedy, political magazines, theological texts, and television shows. We may, for instance, watch films like *The Jazz Singer* (1927 and 1980), *Exodus* and *Annie Hall*; read John Updike's *Bech: A Book*, Philip Roth's *Operation Shylock* or Cynthia Ozick's *The Puttermesser Papers*; listen to the comedy of Mort Sahl, Lenny Bruce and Sarah Silverman; read from Henry Ford's *Dearborn Independent*, the *Menorah Journal* or *Commentary*; study works by Rabbis Stephen Wise, Abraham Joshua Heschel and Meir Kahane; and watch episodes of *Bridget Loves Bernie*, *Northern Exposure* and *Curb Your Enthusiasm*. We will also study arguments about the role and meaning of Jewishness in American secularization, "therapeutic culture," the civil rights movement, the sexual revolution, and feminism.

**Requirements/Evaluation:** class participation, two short papers, a midterm take-home exam, and a final paper interpreting an example of Jewishness in America chosen by the student

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** Religion majors, Jewish Studies concentrators, and students who are interested in either of these options

### **JWST 222 (F) The Jewish Art of Interpretation**

**Cross-listings:** JWST 222 REL 222 COMP 211

#### **Secondary Cross-listing**

*Turn it and turn it, for everything is in it.* This famous rabbinic dictum offers an enigmatic yet comprehensive account of the principles that have defined the Jewish practice of interpretation for over two millennia. The imperative to keep a text, word, image, or concept in constant motion, in order to generate as many meanings and cross-meanings as possible, challenges us to transform the act of interpretation itself into a virtuosic craft or art that can engage the human imagination as diversely and powerfully as the creation of the works being interpreted. At the same time, emphasis on the dynamism between text and interpreter should dispel the notion that only expansive works have expansive meanings. If interpretation itself is an art, then even the shortest text can contain "everything" within it when it participates in that art. This course will engage students in a radical experiment in the art of interpretation. Through a deep encounter with a selection of miniature texts, ranging from ancient rabbinic proverbs and medieval fables to the modern parables and fragments of Franz Kafka, as well as folklore and jokelore from every period in Jewish history up to the present, we will develop an interpretive practice that combines analytic, critical, and creative principles in both written and oral contexts. The goal throughout is to explore interactively how the making of meaning is an integral part of the human experience.

**Requirements/Evaluation:** class participation, regular short written and oral assignments, and a final project

**Prerequisites:** none

**Enrollment Limit:** 18

**Expected Class Size:** 18

**Grading:** yes pass/fail option, no fifth course option

### **JWST 230 (F) Modern European Jewish History, 1789-1948**

**Cross-listings:** HIST 230 JWST 230

#### **Secondary Cross-listing**

What does it mean to be a Jew? The vexed question of Jewish identity emerged anew at the end of the eighteenth century in Europe and has dominated Jewish history throughout the modern period. Although Jewish emancipation and citizenship followed different paths in different parts of Europe, in general Jews were confronted by unprecedented opportunities for integration into non-Jewish society and unprecedented challenges to Jewish communal life. Focusing primarily on France and Germany, and to a lesser extent on the Polish lands, this course will introduce students to the major social, cultural, religious, and political transformations that shaped the lives of European Jews from the outbreak of the French Revolution to the aftermath of World War II. We will explore such topics as emancipation, Jewish diversity, the reform of Judaism, competing political ideologies, Jewish-gentile relations, the rise of modern antisemitism, the role of Jewish women, interwar Jewish life and culture, Jewish responses to Nazism and the Holocaust, and the situation of Jews in the immediate postwar period. In addition to broad historical treatments, course materials will include memoirs, diaries, and fiction.

**Class Format:** discussion

**Requirements/Evaluation:** class participation, two papers, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 40

### **JWST 249 (S) Anti-Semitism (DPE)**

**Cross-listings:** JWST 249 REL 249

#### **Secondary Cross-listing**

This course will investigate intellectual traditions, political movements, and cultural objects that portray Jews, Jewishness, or Judaism as essentially pernicious. We will analyze materials from a variety of times and places, including the ancient world, the medieval period, and the present day. We will assess the impact of anti-Semitism on the lives of Jews and non-Jews. But we will also read theoretical approaches to the study of anti-Semitism that raise key questions for our investigation. Where does the term "anti-Semitism" come from and how exactly should it be defined? Is anti-Semitism a continuous phenomenon that connects every claim of Jewish perniciousness, wherever it is alleged, for over two thousand years of human history? Or should every context be treated as fundamentally distinct, so that the claim of Jewish perniciousness is presumed to have a distinct meaning, origin, and purpose in each case? What motivates charges of Jewish perniciousness? What are the particular threats typically alleged to be posed by Jews, Jewishness, and Judaism? How do constructions of Jewish perniciousness fit with constructions of race, gender, ethnicity, religion, class, sexuality, and nationality in different times and places?

**Requirements/Evaluation:** Three 5-7 page papers, class participation

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Jewish Studies concentrators, Religion majors, and students who have taken JWST 203

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

### **JWST 259 (S) Ethics of Jewish American Fiction**

**Cross-listings:** ENGL 259 JWST 259 REL 259

Secondary Cross-listing

After the Second World War, Jewish American writers who wrote about Jewish characters and Jewish themes were increasingly celebrated as central figures in American fiction. Isaac Bashevis Singer, Bernard Malamud, Saul Bellow, Cynthia Ozick and Philip Roth are among those who gained prominence in this period. These writers were literary innovators and often addressed broad humanistic themes. But they also struggled with profound questions that arose in the postwar period about Jewishness, the legacy of the Holocaust, and what it means to be an American. In this course we will read the above authors and others. We will focus, in particular, on the distinctive ethical and political ideas, emotions, and aspirations that animate their work. The course will begin with a study of theoretical approaches that will provide the basis for our ethical criticism: we will read, for instance, Lionel Trilling, Wayne Booth, Martha Nussbaum, and Noël Carroll. Then we will delve into the fiction, following a trail that begins in the postwar period and continues in fictions by Erica Jong, Rebecca Goldstein, Michael Chabon, Gary Shteyngart, and others. Can we find a distinctive Jewish American ethics in Jewish American fiction?

**Requirements/Evaluation:** class participation, one take-home exam on theoretical approaches to ethical criticism; four short essays

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Religion majors, Jewish Studies concentrators, and English majors

**Expected Class Size:** 18

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2)

### **JWST 268 (F) Where are all the Jews? (DPE) (WS)**

**Cross-listings:** REL 268 ARAB 363 COMP 363 JWST 268

Secondary Cross-listing

Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance Israelite Universelle's schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews' departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, ethnographies, historiographical works, and

anthropological texts alongside documentaries films, the students will understand how literature and film have become a locus in which amnesia about Arab/Berber Jews is actively contested by recreating a bygone world. Resisting both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

**Requirements/Evaluation:** 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation.

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** students interested in critical and comparative literary, religious or historical studies.

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

REL 268 (D2) ARAB 363 (D1) COMP 363 (D1) JWST 268 (D2)

**Writing Skills Notes:** Students are required to present an outline of their papers before submitting a draft paper. The professor will give feedback on each written work to improve students' writing skills. Students are required to incorporate the feedback to improve their drafts before they become final. Students will receive detailed and consistent feedback about their writing in Arabic language. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Students in this course will understand the historical process that lead to the disappearance of Arab/Berber Jews. Students also will work out alternative ways to grasp Jewish-Muslim relations beyond nostalgia and conflict. Finally, students enrolled in the course will grapple with and try to disentangle the complexity of Jewish-Muslim citizenship in both pre-colonial and postcolonial contexts.

**JWST 280 (F) Art at its Limits: Representing the Holocaust (DPE) (WS)**

**Cross-listings:** COMP 280 JWST 280 GERM 280

Secondary Cross-listing

The Holocaust poses unique challenges to art: it is an event that unsettles the very notion of representation while, at the same time, also demanding it. Art, after all, is a mode of witnessing as well as a form of commemoration; it allows survivors to record their testimony and later generations to remember. Yet the representation of suffering can all too easily become exploitative or aestheticizing, it can turn pain into entertainment and history into fiction. How, then, do writers, artists, and filmmakers navigate the representation of the Shoah if it resists comprehension and undermines traditional forms of narrative? In this course, we will ask if and how art can do justice to a catastrophe of such magnitude as the Holocaust by analyzing different forms of media from a variety of cultural backgrounds. What can poetry offer that remains foreclosed to prose? Was Art Spiegelman's graphic novel *Maus* really in bad taste? How should documentaries approach the Shoah, and is there a place for Hollywood films in the archives of commemoration? Texts among others by Tadeusz Borowski, Tadeusz Ró'ewicz, Art Spiegelman, Paul Celan, Primo Levi, Sylvia Plath, Hannah Arendt, Theodor W. Adorno, Jacques Derrida, and Maurice Blanchot; films by Quentin Tarantino, Claude Lanzmann, Pawe' Pawlikowski, and Steven Spielberg.

**Requirements/Evaluation:** three 2-page critical responses, oral presentation, final project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** German and Comparative Literature majors

**Expected Class Size:** 14

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COMP 280 (D1) JWST 280 (D2) GERM 280 (D1)

**Writing Skills Notes:** Three 2-page papers spaced over the course of the semester on which students will receive detailed feedback and which they

will be able to revise; the final project will either be a 10-page paper or a creative project accompanied by a 4-page reflection that will consider the creative component in relation to the themes of the course. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course will examine how art can help us think about the catastrophic abuses of power in the Third Reich. While many of the texts we will examine focus on the stories of Jewish people, the class will also consider how the narratives of other persecuted groups, including the Sinti and Roma, people with disabilities, and LGBTQ victims and survivors, relate to and differ from these experiences.

Not offered current academic year

### **JWST 334 (S) Imagining Joseph**

**Cross-listings:** REL 334 JWST 334 COMP 334 ANTH 334

Secondary Cross-listing

Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur'an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar's wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur'an, as well as the more expansive pleasures of linking post-scriptural expressions together.

**Requirements/Evaluation:** occasional response papers; substantial final project and paper; class participation

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** based on responses to a questionnaire

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

### **JWST 338 (F) The History of the Holocaust**

**Cross-listings:** HIST 338 JWST 338 REL 296

Secondary Cross-listing

In twenty-first century United States, the murder of approximately six million European Jews by Nazi Germany remains a central event in our political, moral, and cultural universe. Nevertheless, the Holocaust still confounds historians' efforts to understand both the motivations of the perpetrators and the suffering of the victims. In this course, we will study the origins and unfolding of Nazi Germany's genocidal policies, taking into consideration the perspectives of those who carried out mass murder as well as the experiences and responses of Jews and other victim groups to persecution. We will also examine the Holocaust within the larger context of the history of World War II in Europe and historians' debates about Germany's exterminatory war aims. Course materials will include diaries, speeches, bureaucratic documents, memoirs, films, and historical scholarship.

**Class Format:** mostly discussion

**Requirements/Evaluation:** class participation, weekly reading responses, a map quiz, two papers (5-7 pages) on class readings, a final research paper (10-12 pages)

**Prerequisites:** none; open to first-year students with instructors permission

**Enrollment Limit:** 25

**Enrollment Preferences:** History majors and Jewish Studies concentrators

**Expected Class Size:** 20-25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

### **JWST 339 (S) Politics in Dark Times: Hannah Arendt (WS)**

**Cross-listings:** PSCI 339 JWST 339

Secondary Cross-listing

Hannah Arendt (1906-75) bore witness to some of the darkest moments in the history of politics. Born a Jew in Germany, Arendt lived through--and reflected deeply on--two world wars, the rise of totalitarianism, and the detonation of the first atomic bomb. She narrowly escaped imprisonment by the Gestapo and internment in a refugee camp in Vichy France before fleeing to New York. Yet, in the face of these horrors, Arendt never lost her faith in political action as a way to express and renew what she called "love of the world." She wrote luminously about the darkness that comes when terror extinguishes politics and the shining, almost miraculous events of freedom through which politics is sometimes renewed. In this tutorial, we will investigate what Arendt's vision of politics stands to offer to those struggling to comprehend and transform the darkest aspects of the contemporary political world. Our time and Arendt's are similarly darkened by the shadows of racism, xenophobia, inequality, terror, the mass displacement of refugees, and the mass dissemination of lies. It may be tempting to conclude from these similarities--as some recent commentators have--that we are witnessing the return of "totalitarianism" as Arendt understood it. She would be the first to refuse to use inherited concepts as if they were keys to unlock the present. Her words and her example should impel us to reject shortcuts to authentic understanding, the "unending activity by which...we come to terms with and reconcile ourselves to reality." We will turn to Arendt as an interlocutor, not a guide, as we seek to reconcile ourselves to the contingency and specificity of past and present political realities. And we will search her works and our world for embers of hope that even seemingly inexorable political tragedies may yet be interrupted by assertions of freedom in political action.

**Requirements/Evaluation:** five 5-page papers; five 2-page responses; participation

**Prerequisites:** a prior course in political theory, philosophy, or critical theory, or permission of the instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Political Theory concentrators, Political Science majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

### **JWST 430 (S) Postcolonial Reparations: Trauma, History, and Memory after European Imperialism (DPE) (WS)**

**Cross-listings:** JWST 430 HIST 430

Secondary Cross-listing

How have European states responded to calls to acknowledge and atone for the crimes of Empire? This course places recent calls for reparations in a historical context. Weaving together a wide-range of historical and contemporary case studies -- including the Conference on Jewish Material Claims Against Germany (1951), Germany's official recognition of the Herero Genocide (2021), and ongoing debates in France about the restitution of

colonial-era looted art, this course investigates how the language and mechanisms of restorative justice have historically developed, evaluates which past efforts of restorative justice were successful and why, and examines what role historical memory and historians-as-activists should play in campaigns that seek reparations for colonial injustices. In doing so, it evaluates how activists have deployed scholarly vocabularies on memory, justice, and violence in a number of national and international contexts.

**Requirements/Evaluation:** Class participation, weekly 500-word discussion posts and a 20-page research paper

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** History majors, seniors, and then juniors

**Expected Class Size:** 10-15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

JWST 430 (D2) HIST 430 (D2)

**Writing Skills Notes:** This is an intensive writing seminar for advanced history majors. We focus on how to write a journal-length piece of original historical research, while evaluating the strengths and weaknesses of other scholarly pieces. Students receive feedback on multiple drafts of their final research papers and participate in two workshop seminars in which they provide feedback on the papers of their peers.

**Difference, Power, and Equity Notes:** This course asks how contemporary political and social justice movements can -- or ought to -- address political and economic inequities between the Global South and North, introduces students to how questions of race and national belonging have informed contemporary debates on restorative justice, and exposes the persistence of some global and historically-situated inequities.

**JWST 433 (F) Colonialism and the Jews** (DPE) (WS)

**Cross-listings:** JWST 433 HIST 433

**Secondary Cross-listing**

Where are Jews in colonial history? Where is colonialism in Jewish history? In many ways, these questions haunt contemporary Jewish and often world politics. Indeed, in the twenty-first century, the relationship between Jews and colonialism has been present in debates about Zionism, the history of capitalism, Jewish-Muslim relations, the wider Middle East, the future of European identity, the aims and roots of American empire, and the intersections of race and religion in colonial domination. And yet, typically, the subject of Jews and colonialism is more polemicized or avoided than probed. This course will seek to address this lacunae by introducing students to new historical scholarship that has begun tracing these questions. Students will consider the ways in which imperial legal forms, economic structures, and cultural and intellectual underpinnings shaped Jewish lives from the British antipodes to French North Africa, and throughout the Russian and Ottoman Empires, as well as in metropolitan Europe. Among other issues, we will ask: How did Jews become defined and define themselves in the colonial venture? In their various roles in colonial empires, are Jews best understood as subjects or agents of empire or are there more fruitful ways to conceptualize their engagement? What was the impact of anti-colonial struggles on modern Jewish politics and historical development? The course will approach this topic thematically rather than as a comprehensive survey. By introducing students to some of the key debates in this emerging field, we will consider what it takes to construct a successful historical argument and how to engage critically with works in an emerging field. A semester-long writing project will expand students capacities to pose thoughtful historical questions; conduct research and gather compelling evidence; read deeply and critically; carefully assess evidence; and write inquiry-based essays.

**Requirements/Evaluation:** Class participation; brief weekly writing on the readings; a final research paper written in stages, including two "research updates"; an analysis of a source; a research proposal; a rough draft of one paper section; a rough draft of the paper; and a final 25-page paper.

**Prerequisites:** None; open to all students (however, a background in European history and/or Jewish Studies will be helpful).

**Enrollment Limit:** 15

**Enrollment Preferences:** Junior and Senior History Majors and Jewish Studies Concentrators

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

JWST 433 (D2) HIST 433 (D2)

**Writing Skills Notes:** Before each course, students will submit a 2-3 paragraph critique and a list of 3 questions for discussion. The final assignment will be a research paper (approximately 25 pages) or historiographical essay. Assignments en route to the final deadline, include: 1) two early "research updates" to document process and progress; 2) analysis of a source; 3) research proposal; 4) rough draft of a section; 5) draft of paper; 6) final paper. Only some work will be graded, but all will receive feedback.

**Difference, Power, and Equity Notes:** This course considers the complex ways that religion, ethnicity and national identities shaped the colonial and post-colonial world. Never controlling or collectively representing a European power, Jews were also rarely situated at the bottom of any colonial hierarchy, sometimes occupying more than one social or political role in a single colonial territory. This course provides insight into the many ways hierarchies of power could operate in colonial and post-colonial settings.

### **JWST 434 (S) The Meaning of Diaspora and the Jews of Europe (WS)**

**Cross-listings:** REL 335 HIST 434 JWST 434

#### **Secondary Cross-listing**

Dispersion, exile, migration, statelessness are all aspects of diaspora. In the study of diasporic peoples and cultures, the Jews have long figured as the archetype. As a result, Jewish political figures, intellectuals, social activists and scholars have played a central role in discussions of the meaning of diaspora, including debates about its political and social implications, economic value, and cultural significance. In the first half of the semester, in discussions of common readings, we will examine various historical interpretations of Jews' diasporic existence from the nineteenth century to the present and its implications for humanitarianism. Beginning in the first half of the semester and with greater intensity in the second half of the semester, you will conduct independent archival research on some aspect of the history of the Jewish diaspora using the digitized archives of the American Jewish Joint Distribution Committee that will culminate in a twenty-plus-page paper. In the second half, the seminar will continue to meet weekly as a research colloquium, to provide a forum for you to present your research and drafts in progress and to give feedback on fellow students' work. In this seminar, we are not merely studying history; you are actually doing history. That is to say, you will be more than students of history in this course: you will become historians in your own right. Over the semester, you will learn how to pose historical questions; to engage critically with readings beyond summarizing them; to synthesize an enormous amount of source material; and to learn how to write more clearly. By the end of the semester, the goal is for each student to produce a polished research paper based on substantial engagement with archival sources and relevant secondary literature that will serve as a capstone to your coursework at Williams or as a potential jumping-off point for future research projects, including a senior thesis in History or Jewish Studies.

**Requirements/Evaluation:** class participation, several short papers, oral presentations, and a 20-page research paper

**Prerequisites:** none

**Enrollment Limit:** 15

## **JWST 490 (S) Memory, History, and the Extermination of the Jews of Europe (WS)**

**Cross-listings:** HIST 490 JWST 490

### **Secondary Cross-listing**

This course is about the postwar legacy of the Holocaust. Nazi Germany's extermination of European Jews has become a moral and cultural touchstone for people in Europe and in many other parts of the world. This tutorial explores a series of topics from the immediate aftermath of the Second World War to the present. Engaging with a wide-range of sources, we will wrestle with historical, legal, moral, political, and cultural issues and debates that have emerged out of the confrontation with the extermination of the Jews of Europe. They include: Why was the Holocaust "unprecedented" and "unimaginable"? Is it a Jewish story or universal story? Does the Holocaust raise different issues than other historical events for the historian? How should the Holocaust be represented in words and images, and what are the implications of different means of representing it? Has Germany faced up to its past? Were Germans also victims of World War II? Who were the "bystanders" as compared to the "perpetrators"? Were the postwar trials of perpetrators a travesty of justice? What "lessons" have we learned and should we learn from the Holocaust? By the end of the course, students will have grappled with the ongoing controversies that have arisen among scholars, artists, governments, and lay people about the meaning of the Holocaust for the postwar world. In a world in which extraordinary acts of violence continue to be perpetrated and many nations' pasts are marked by episodes of extreme criminality and/or trauma, exploring the manner by which one such episode has been remembered, avenged, and adjudicated has relevance for considering other societies' efforts to confront their own traumatic pasts.

**Class Format:** tutorial; class time consists of weekly one-hour sessions with the instructor and a fellow student

**Requirements/Evaluation:** Every other week the student will write and present orally a 5- to 7-page paper on the assigned readings of that week; on alternate weeks, the student will write a 2-page critique of the fellow student's paper; a final written paper on the issues raised in the tutorial to cap off the semester's work.

**Prerequisites:** permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors and Jewish Studies concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

## **JWST 492 (S) Modern Jewish Political Theory**

**Cross-listings:** PSCI 375 JWST 492 REL 330

### **Secondary Cross-listing**

By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst burgeoning national self-consciousness throughout the continent, despite the liberatory promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re-constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of "Jews" and "Judaism" in these arguments. And we will ask persistently: what constitutes a "Jewish justification" for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.

**Requirements/Evaluation:** six short (1-2 pages) response papers; two 6- to 8-page papers, each analyzing a different view in depth; a final 18- to

20-page paper that incorporates the two previously submitted 6-8 page papers, but also compares the two views and adjudicates between them

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Religion majors, Jewish Studies concentrators, and Political Science students on the "Theory" track

**Expected Class Size:** 18

## JUSTICE AND LAW STUDIES (Div II)

Chair: Lecturer in Humanities Alan Hirsch

### Advisory Committee

- Melissa J. Barry, Professor of Philosophy; on leave Fall 2022
- Justin Crowe, Chair of Leadership Studies and Professor of Political Science; affiliated with: Political Science, Leadership Studies
- Sara Dubow, Associate Dean of the Faculty, Professor of History; affiliated with: Dean of the Faculty's Office, History
- William M. Gentry, Carl Van Dyne Professor of Economics
- Nimu Njoya, Lecturer in Political Science
- James L. Nolan, Washington Gladden 1859 Professor of Sociology; on leave 2022-2023
- Cheryl Shanks, Professor of Political Science

Justice and Law Studies is an interdepartmental program designed to give students a background in and framework for understanding the ways that philosophers, government officials, and others think about justice, and the related ways in which societies marshal power and implement law. This liberal arts program provides tools for thinking critically and arguing about what justice might entail, how it works in practice, and how rules, aspirations, laws, and norms evolve over time and in different parts of the world.

### THE CONCENTRATION

The concentration in Justice and Law Studies consists of six courses: an interdisciplinary introductory course, four electives taken from at least two departments, and a senior seminar. Electives are listed below. Other courses, not listed below, may be approved by the Chair.

Students may declare a program concentration at any point during their academic career.

### Senior Seminar

In 2018-19, the senior seminar will be *The Unwritten Constitution* taught by Professor Hirsch.

## **STUDY ABROAD**

Students who study abroad should consult with the program chair to ensure that they can complete the requirements. Courses abroad may qualify as JLST electives if appropriate.

### **JLST 101 (S) Introduction to Justice and Law**

This course will examine various aspects of America's legal system, including its historical and constitutional underpinnings; the processes of resolving disputes, e.g., trials, plea-bargaining, and civil settlement; and the roles of diverse participants in the system, e.g., judges, jurors, litigants, lawyers, and legislators. The course will emphasize the deeply interdisciplinary nature of law, exploring the law's intersections with politics, history, economics, anthropology, statistics, psychology, philosophy, art, sports, science, religion, and cyberspace.

**Class Format:** lecture-discussion

**Requirements/Evaluation:** three papers, a final exam, and class participation; attendance is mandatory; Williams' honor code applies to all assignments

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** first-years and sophomores

**Expected Class Size:** 40

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

### **JLST 272 (S) Free Will and Responsibility (WS)**

**Cross-listings:** PHIL 272 JLST 272

**Secondary Cross-listing**

Our practice of holding people responsible seems justified as long as their choices are free. But when does a choice qualify as free? Must it be unaffected by any outside influences? If so, freedom may seem impossible since we're all deeply influenced by factors ranging from the general laws of nature to specific features of our genetic endowment and social environment (including religion, political ideology, and advertising). These affect not only our particular choices but also, more fundamentally, who we are and what we value. The real question, then, seems to be whether, and how, free choice is possible amidst all of these influences. We'll attempt to answer this question by examining recent philosophical work on the nature of free will and responsibility.

**Requirements/Evaluation:** Five tutorial papers (5-6 pages in length) and five critiques (2-3 pages in length)

**Prerequisites:** one PHIL course

**Enrollment Limit:** 10

**Enrollment Preferences:** current and prospective Philosophy majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

PHIL 272 (D2) JLST 272 (D2)

**Writing Skills Notes:** Students will write a tutorial paper (5-6 pages in length) every other week, and a peer critique (2-3 pages in length) in alternating weeks, evenly spaced throughout the semester. The instructor will provide timely comments on writing skills, with suggestions for improvement.

**Attributes:** PHIL Contemporary Value Theory Courses

**Not offered current academic year**

**JLST 397 (F) Independent Study: Legal Studies**

Legal Studies independent study. Open only under the supervision of a member of the Legal Studies Advisory Committee.

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

Not offered current academic year

**JLST 398 (S) Independent Study: Legal Studies**

Legal Studies independent study. Open under the supervision of a member of the Legal Studies Advisory Committee.

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

Spring 2023

IND Section: 01 TBA Alan Hirsch

**JLST 401 (S) The Unwritten Constitution**

"The eight thousand words of America's written constitution only begin to map out the basic ground rules that actually govern our land." So begins Akhil Amar's book *America's Unwritten Constitution*. Amar recasts the debate over whether America has a "living Constitution," a debate usually revolving around whether change in constitutional meaning requires resort to the formal amendment process or can be achieved through judicial interpretation. Amar supports the latter view, but proposes something far-reaching: history itself effectively amends the Constitution. Thus, for example, he argues that speeches by Martin Luther King and precedents set by George Washington, as well as the daily activities and assumptions of ordinary Americans, have become constitutional subtext requiring consideration when we interpret the Constitution. Is that notion convincing? Preposterous? A healthy way of understanding the inevitable intersection of law, history, and politics? A transparent excuse to read one's own views into the Constitution? Through a careful reading of Amar, and other important constitutional theorists, we will probe different ways of thinking about the supreme law of the land.

**Requirements/Evaluation:** three papers and class participation

**Prerequisites:** PSCI 216 or PSCI 217 (or consent of the instructor)

**Enrollment Limit:** 19

**Enrollment Preferences:** Justice and Law Studies concentrators

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

Spring 2023

SEM Section: 01 MWF 8:30 am - 9:45 am Alan Hirsch

**Winter Study -----****JLST 10 (W) Policing the Police**

Recent high-profile killings of civilians by the police, including George Floyd and Breonna Taylor, have led to increased public scrutiny of law enforcement. Police departments are also facing unprecedented challenges in hiring and keeping officers. In this course, we will study the potential avenues for changing how police operate and the systemic issues that impede reform by using films, articles, case law, and guest lectures. We will begin by looking at the historical responses to police misconduct, including internal affairs investigations and criminal prosecution of individual officers. We will also analyze the affirmative privileges provided to the police and the impact of these procedural protections on accountability. We will then explore current appeals for structural reform by examining recent federal investigations of police departments, including Newark, NJ and Ferguson, MO. Class will meet twice per week, and students will choose an aspect of the issues engaged with as a subject for their final research paper.

**Requirements/Evaluation:** 10-page paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** sophomores and juniors

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Samantha Soto is a civil rights and employment attorney whose practice includes advising police departments on discipline of officers and conducting investigations into discrimination claims. She is a graduate of Williams College and Columbia Law School.

**Attributes:** STUX Winter Study Student Exploration

Winter 2023

LEC Section: 01 TR 1:00 pm - 3:50 pm Samantha A. Soto

**JLST 99 (W) Independent Study: Legal Studies**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

Winter 2023

IND Section: 01 TBA Alan Hirsch

## CLASSICS (Div I)

### LATIN

**Chair: Professor Amanda Wilcox**

- Nicole G. Brown, Assistant Professor of Classics
- Kerry A. Christensen, Garfield Professor of Ancient Languages
- Edan Dekel, Professor of Classics, Chair of Jewish Studies Program; affiliated with: Classics, Religion; on leave 2022-2023
- Sarah E. Olsen, Assistant Professor of Classics
- Amanda R. Wilcox, Chair and Professor of Classics

The course offerings in Classics enable students to explore the ancient Greek, Roman, and Mediterranean worlds from various perspectives, including literature, history, art, archaeology, philosophy, and religion. Courses are of two types: language (Greek and Latin) and courses in which all the readings are in English translation (Classical Studies). The 100-level language courses are intensive introductions to Greek and Latin grammar and reading skills; the 200-level language courses combine grammar review with primary readings from Greek or Latin texts of key historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Classical Studies courses offer introductions to and more specialized study of the literature, visual and material culture, history, and other aspects of the Greek and Roman worlds.

### MAJOR

Majors and prospective majors are encouraged to consult with the department's faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course in ancient history is strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for advanced study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Route A emphasizes more coursework in Greek and Latin, while Route B emphasizes more Classical Studies courses.

**Route A:** (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language. (2) Three additional courses from the offerings in Greek, Latin, or Classical Studies or from approved courses in other departments and programs.

**Route B:** (1) One course each from any two of the following categories: literature (CLAS 101 or CLAS 102); visual and material culture (CLAS 209 or CLAS 210); history (CLAS 222 or CLAS 223). (2) Four courses in Greek or Latin with at least one at the 400-level, or the four-course sequence CLLA 101, 102, 201, and 302. (3) Three additional courses from the offerings in Classical Studies or from approved courses in other departments and programs.

**Classics Colloquium:** All Classics majors in residence are expected to participate fully in the life of the department through attendance at lectures and other departmental events.

### THE DEGREE WITH HONORS IN CLASSICS

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

### COURSE NUMBERING SYSTEM

**Language Courses:** The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of Greek and Latin literature. Students may enter the rotation at 100-level, 200-level, or 300-level, depending on previous experience.

**Classical Studies Courses:** The numbering of these courses does not reflect a strict sequence, and most of them do not assume prior experience in Classics or a cross-listed field. The following pairs of courses offer excellent introductions to key areas of study within Classics: CLAS

101 and 102 (literature), CLAS 209, 210 (visual and material culture), CLAS 222, 223 (history).

## STUDY AWAY

We strongly encourage Classics majors to study away in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Mediterranean world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department's faculty are always available to advise students, the chair has materials to share, and students can visit the department's website for information and links to helpful sites. Majors who are considering studying away should especially consult with faculty members about the implications for language study.

## FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

### **Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in some cases, if appropriate course information is available in advance (e.g., syllabi and/or course descriptions), though students should be sure to contact the department.

### **What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Complete syllabus and course description, including readings/assignments.

### **Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

No.

### **Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

No.

### **Are there specific major requirements that cannot be fulfilled while on study away?**

No.

### **Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

No, but students should consult with the department about language sequences.

### **Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:**

None to date.

## CLLA 101 (F) Introduction to Latin

This is a full-year course on the fundamentals of the Latin language. We focus throughout on learning grammar and vocabulary, and we regularly incorporate selections from literature, inscriptions, and other sources. Over time, we gradually increase the emphasis on reading selections from Latin poetry (e.g., Ovid's *Metamorphoses*) and prose (e.g., Piny's *Letters*).

**Requirements/Evaluation:** frequent quizzes, classroom exercises, two midterms, a final project

**Prerequisites:** none; this course is designed for the student with no previous preparation in Latin or with only a little Latin who wishes a refresher; students with some previous experience in Latin may want to enroll in CLLA 102 only (consult the department)

**Enrollment Limit:** 15

**Enrollment Preferences:** Classics majors or intended Classics majors, first years and sophomores

**Expected Class Size:** 8-10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** credit granted only if both semesters (CLLA 101 and 102) are taken

**Distributions:** (D1)

Fall 2022

LEC Section: 01 MWF 11:00 am - 12:15 pm Nicole G. Brown

**CLLA 102 (S) Introduction to Latin**

This is a full-year course on the fundamentals of the Latin language. We focus throughout on learning grammar and vocabulary, and we regularly incorporate selections from literature, inscriptions, and other sources. Over time, we gradually increase the emphasis on reading selections from Latin poetry (e.g., Ovid's *Metamorphoses*) and prose (e.g., Piny's *Letters*).

**Class Format:** recitation/discussion

**Requirements/Evaluation:** frequent quizzes, tests, classroom exercises, and a final exam

**Prerequisites:** CLLA 101 or permission of department

**Enrollment Limit:** 18

**Enrollment Preferences:** Students who have completed CLLA 101

**Expected Class Size:** 10-12

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** credit granted only if both semesters (CLLA 101 and 102) are taken

**Distributions:** (D1)

Spring 2023

LEC Section: 01 MWF 11:00 am - 12:15 pm Nicole G. Brown

**CLLA 201 (F) Intermediate Latin: The Late Republic**

This course aims to strengthen skills gained in previous study. In order to develop greater fluency and familiarity with classical Latin, we will read, translate, and analyze Cicero's *Pro Caelio* and selected short poems of Catullus. Both authors are brilliant stylists, though each writes in a very different mode. Taken together, these texts offer an excellent introduction to the expressive capacity of Latin in prose and verse. They also open up intriguing overlapping perspectives on the social, sexual, and political mores of late Republican Rome. We will consider the cultural context and implications of these texts as time permits.

**Requirements/Evaluation:** Engaged participation in class, occasional quizzes and short written assignments, a midterm and final exam

**Prerequisites:** CLLA 101-102 or 3-4 years of Latin in secondary school; consult the department

**Enrollment Limit:** 12

**Enrollment Preferences:** Classics majors and prospective majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Fall 2022

SEM Section: 01 MWF 10:00 am - 10:50 am Amanda R. Wilcox

**CLLA 302 (S) Vergil's Aeneid**

This course is a comprehensive introduction to Vergil's *Aeneid*. Students will develop their ability to read and translate the Latin text of the poem, while at the same time exploring the major interpretive issues surrounding the definitive Roman epic. Through a combination of close reading and large-scale analysis, we will investigate the poem's literary, social, and political dimensions with special attention to Vergil's consummate poetic craftsmanship.

**Requirements/Evaluation:** Class participation, a midterm exam, a final paper, and a final exam.

**Prerequisites:** CLLA 201 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** If the course is overenrolled, preference will be given to Classics majors and prospective majors.

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Spring 2023

SEM Section: 01 MR 2:35 pm - 3:50 pm Amanda R. Wilcox

### **CLLA 403 (S) The Invention of Love: Catullus and the Roman Elegists**

This course will explore the development of Latin love poetry in the first century BCE. Beginning with Catullus, we will examine the influence of Greek lyric poetry on the evolution of the genre as well as Roman attitudes toward love exhibited in other literature of the Late Republic. We will then turn to the full development of the elegiac form in the love poems of Propertius, Tibullus, and Sulpicia. Finally, we will explore the transformation of the genre in Ovid's *Amores*. The goal throughout is to investigate the conventions, innovations, and problems of expressing personal desire and longing amid the social and political upheaval of the transition from Republic to Principate.

**Requirements/Evaluation:** evaluation will be based on class participation, a midterm exam, a final paper, and a final exam

**Prerequisites:** CLLA 302 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Classics majors

**Expected Class Size:** 10-12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

### **CLLA 405 (S) Livy and Tacitus: Myth, History and Morality in Ancient Rome**

We will begin the semester in mythical Rome by reading selections from Book 1 of Livy's history in which Roman values, practices and institutions are given their origin stories, and the mythical figures of Rome's past are established as moral exempla for Rome's present. We will examine how Livy deploys the storyteller's art to excite his readers' pathos, indignation and sympathy; we will examine as well how he constructs Rome's past through the filter of his own Augustan present. Writing more than a century after Livy, Tacitus offers a different and jaded view of Augustus and his legacy, one conditioned by his own experiences living through the terrors of the reign of Domitian. His compressed and fastidious prose is the vehicle for complex and gripping accounts of imperial scandals and tragedies as well as of individual acts of heroism and nobility. We will read primarily selections from Tacitus' *Annals* as well as selections from either his *Germania* or *Agricola*.

**Class Format:** discussion

**Requirements/Evaluation:** Evaluation will be based on class preparation and participation, an 8- to 10-page paper, a midterm, and a final exam

**Prerequisites:** CLLA 302 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Classics majors

**Expected Class Size:** 6-8

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Spring 2023

SEM Section: 01 MR 2:35 pm - 3:50 pm Kerry A. Christensen

### **CLLA 406 (F) Horace's Odes**

This course will explore the poetic delights of Horace's extraordinary experiment in crafting Latin personal verse using Greek lyric forms. We will

immerse ourselves in the poems' intricate construction and examine how they engage such themes as love and friendship, landscape and memory, youth and old age, politics, and morality. At the same time, we will consider the variety of voices and perspectives within the poems and their complex relationship both to Greek and Latin poetic traditions and to Horace's own contemporary world. The goal throughout is to investigate the literary, social, political, and philosophical dimensions of the odes, as well as their consummate poetic artistry.

**Requirements/Evaluation:** class participation, a midterm exam, a final paper, and a final exam

**Prerequisites:** CLLA 302 or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Classics majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

### **CLLA 407 (S) Caesar and Cicero**

The one a brilliant strategist, the other preeminent in the courts, Caesar and Cicero were both master politicians whose ambitions for their country and themselves brought them into bitter conflict. Their combined oeuvres provide compelling, detailed accounts of the events and personalities that ended the Roman republic and ushered in an era of prolonged civil war. Moreover, despite striking stylistic differences, their works jointly are regarded as the acme of classical Latin prose. In this course we will read extensive selections from Caesar's commentaries and Cicero's speeches and correspondence, aiming throughout at better understanding their rhetorical brilliance and pragmatic persuasive goals.

**Class Format:** discussion

**Requirements/Evaluation:** class participation, several short written assignments (such as article reviews), a midterm exam and essay of moderate length, plus a final exam and longer paper

**Prerequisites:** CLLA 302 or permission of instructor

**Enrollment Limit:** 12

**Expected Class Size:** 6-9

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

### **CLLA 408 (F) Roman Comedy**

The comic plays that still survive all had their first productions within roughly forty years between 200 and 160 BCE, as Rome rapidly expanded its military, economic, and political reach beyond the Apennine peninsula. They present critically important evidence for how Roman literature and cultural identity developed in the second century, and they document formulas for slapstick action and low-brow jokes that remain in use even today. Staged in Greek costume and featuring ostensibly Greek characters, the comedies revel in mocking stereotypical Roman values but ultimately reassert them. Sometimes what the Romans found funny is all too familiar; sometimes it's shocking. Our main focus will be on the *Mostellaria* of Plautus, often translated as "The Haunted House." Characteristic of its genre, the *Mostellaria* focuses on generational conflict within a household, especially between father and son. To enrich our conversation, we will read several other comedies in translation as well as selected scholarly investigations of this play, its genre, and the historical context.

**Class Format:** Discussion/recitation. For the fall of 2020, this course will be taught online. The seminar will meet at the regularly scheduled time twice per week.

**Requirements/Evaluation:** Evaluation will be based on class participation, several written assignments of varying length, and possibly short quizzes as well as a midterm exam and a final exam and/or essay.

**Prerequisites:** CLLA 302 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** If the course is oversubscribed, preference will be given to majors and potential majors in Classics and Comparative Literature

**Expected Class Size:** 8-10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

#### **CLLA 409 (F) Seneca and the Self**

This course considers ethical and literary dimensions of self-fashioning, self-examination, and the conception of selfhood in the Stoic philosophy of the younger Seneca through close reading of extensive selections from his philosophical works and tragedies. The focus of this course lies squarely in the first century CE and on the analysis of Seneca's own texts. We begin, however, with an introduction to the ethics of Roman Stoicism through the personae theory of Panaetius as transmitted by Cicero's *De Officiis*. Moreover, we will read and discuss reflections on selfhood from some of Seneca's most famous philosophical and literary heirs, including Montaigne, Emerson, and Foucault, both to enrich our understanding of his work and to gain an appreciation of his considerable influence on later writing about the self.

**Requirements/Evaluation:** class participation, several short written and oral assignments, midterm and final exams, and a final paper

**Prerequisites:** CLLA 302 or permission of instructor

**Enrollment Limit:** 12

**Expected Class Size:** 5-10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Fall 2022

SEM Section: 01 TF 2:35 pm - 3:50 pm Amanda R. Wilcox

#### **CLLA 414 (F) Vergil's Eclogues and Georgics**

This course will explore the two major works of Vergil that precede the *Aeneid*: the *Eclogues*, a series of ten pastoral poems that range widely across personal, political, and mythological themes; and the *Georgics*, a longer didactic poem in four books that uses an agricultural framework to examine issues of life, death, power, suffering, and love. The goal throughout is to investigate the literary, political, and social dimensions of the poems with special attention to their relationship to earlier models, as well as their exquisite poetic craftsmanship.

**Requirements/Evaluation:** class participation, a midterm exam, a final paper, and a final exam

**Prerequisites:** CLLA 302 or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Classics majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

#### **CLLA 415 (S) Ovid's *Metamorphoses***

This course will explore Ovid's greatest work, an epic poem in fifteen books entitled *Metamorphoses*. Ovid's poem narrates the story of the world from its beginning down to his own day, the reign of Augustus, via a series of tales closely woven together through the theme of change. We will translate and discuss large portions of the Latin text along with selections from contemporary scholarship in order to consider the poem in its original political and cultural context as well as its relationship to earlier models and its post-classical reception.

**Requirements/Evaluation:** class participation, a midterm exam, a final paper, and a final exam

**Prerequisites:** CLLA 302 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Classics majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

**Winter Study** -----

**CLLA 99 (W) Independent Study: Latin**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

## LATINA/O STUDIES (Div II)

Chair: Professor C. Ondine Chavoya

- Efrain Agosto, Visiting Professor of Latinx Studies and Religion; affiliated with: Religion, Latina/o Studies
- Maria Elena Cepeda, Professor of Latina/o Studies; affiliated with: Latina/o Studies, Women, Gender & Sexuality Studies, American Studies
- Jacqueline Hidalgo, Professor of Latina/o/x Studies and Religion, Director of Oakley Center for Humanities & Social Sciences; affiliated with: Oakley Center, Latina/o Studies, Religion; on leave Fall 2022
- Roger A. Kittleson, Chair and Professor of History; affiliated with: History, Latina/o Studies
- Carlos Macías Prieto, Assistant Professor of Spanish and Faculty Affiliate in Latina/o Studies; affiliated with: Romance Languages, Latina/o Studies
- Nelly A. Rosario, Associate Professor of Latina/o Studies
- Edgar Sandoval, Assistant Professor of Latina/o Studies
- Carmen T. Whalen, Chair of Latina/o Studies Program, Carl W. Vogt '58 Professor of History; affiliated with: Latina/o Studies, History

Latina and Latino Studies is an interdisciplinary, comparative, and relational field of study that examines the histories, representations, and experiences of Latinas, Latinos, and Latinxs in the United States. Latinas, Latinos, and Latinxs include peoples who come from or whose ancestors come from Latin America and the Spanish-speaking Caribbean. The program seeks to cover the widest range of experiences, encompassing Mexican-Americans, Puerto Ricans, Cubans, and Dominicans, as well as migrations from a wide variety of Central and South American countries. Courses, most of which use a comparative and relational approach, seek to provide students with the tools to continue their work in areas of their particular interest. Focusing on a diverse group with a long history in the United States, which is also one of the fastest-growing populations in the contemporary era, provides an opportunity to study complex dynamics globally and within the context of the United States. The program examines topics such as the political and economic causes of migration, the impact of globalization, economic incorporation, racialization, the formation and reformulations of identities and communities, religious and spiritual practices, the uses of urban spaces, inter-ethnic relations, artistic expression, aesthetics, and visual and popular culture.

### THE CONCENTRATION

The concentration in Latina/o Studies requires five courses. Students are required to take the introductory course (LATS 105), one 400-level Latina/o Studies seminar, and three electives. Two electives must be core electives, and one elective can be a related course in Comparative Race and Ethnic Studies or in Countries of Origin and Transnationalism. The three electives must include two different areas of study, and at least one elective must be at the 300 or 400 level. Additional courses may be approved by the Chair. Students, especially those considering graduate work or professional careers in the field, are encouraged to enroll in Spanish language courses at Williams.

#### Required course:

#### One of the following 400-level seminars:

[HIST 470 / LATS 470\(S\) SEM Latinx Migrations: Stories and Histories](#)

Taught by: [Carmen Whalen](#)

## THE DEGREE WITH HONORS

Honors in Latina/o Studies may be granted to concentrators after an approved candidate completes an honors project, delivers a public presentation of the work, and is awarded an honors grade by their advisor and two other faculty readers. In consultation with the advisor and the chair, faculty readers may be from outside the Latina/o Studies Program.

The honors project will be completed over one semester plus winter study. It may consist of a conventional research thesis of 40-70 pages or of other forms of presentation (e.g., video, art, theater). It may also combine a shorter research thesis with another medium.

### **To be accepted as a candidate for honors in Latina/o Studies, a student must meet these criteria:**

Submit and earn approval of a project proposal in May of the junior year. The proposal should be no longer than 5 pages and should lay out the project's aim and methodology, identify the student's advisor for the work, and include evidence of competence in the necessary media for projects that include non-thesis forms.

Achieve a grade point average generally of at least 3.33 in LATS courses at the time of application.

Students admitted to the honors program must submit a 5-to 8-page revised proposal, with an annotated bibliography, by the second week of classes in the fall semester of their senior year. They should register either for LATS 493 in the fall semester and LATS 031 in Winter Study, or for LATS 031 in Winter Study and LATS 494 in the spring semester. These courses will be in addition to the 5 courses that make up the regular concentration.

## STUDY ABROAD

Study abroad and other off-campus programs offer excellent opportunities for students to build on, and expand, the intellectual interests they develop as part of the Latina/o Studies concentration. Through their connections to various institutions in the U.S. and other nations, Latina/o Studies faculty can help place students in U.S. borderlands programs as well as programs in Mexico, Cuba, and other "countries of origin." Any student seeking to include courses as part of a concentration in Latina/o Studies should feel free to contact the Program chair or other faculty. A maximum of 1 course taken away from Williams can count (as an elective) toward the completion of the concentration.

## FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

### **Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

### **What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description. Although syllabus and description, including readings and assignments, would be preferable.

### **Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

Yes. 1 of 5 for the concentration and can only count as an elective.

### **Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

No.

### **Are there specific major requirements that cannot be fulfilled while on study away?**

Yes. Requirements that cannot be fulfilled: Intro Course, Senior Seminar, 2 Core Electives.

**Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

No.

**Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:**

None to date.

### **LATS 105 (F) Latina/o Identities: Constructions, Contestations, and Expressions**

What, or who, is a Hispanic or Latina/o/x? How have these shifting terms tried to encompass the identities and experiences of such large and diverse groups of peoples? In this course, we focus on the complex nature of "identity," as we delve into the interdisciplinary field that has emerged to give voice to groups that were too often excluded from or misrepresented in academic disciplines and discourses. Viewing identities as historically and socially constructed, we assess how racial, ethnic, class, and gendered identities take shape within specific contexts in the Hispanic Caribbean and Latin America, as well as in the United States. We examine the impact of (im)migration and the rearticulation of identities in the United States, as we consider that each group has a unique history, settlement pattern, community formation, and transnational activities. Identity is also a contested terrain. As immigrants and migrants arrive, the United States' policymakers, the media, and others seek to define the "newcomers" along with long-term Latina/o citizens. At the same time, Latinas/os rearticulate, live, assert, and express their own sense of identity. We examine these diverse expressions as they relate to questions of class, race, ethnicity, gender, sexual orientation, and national origins.

**Class Format:** This is a discussion based course.

**Requirements/Evaluation:** participation and several short papers (1-5 pages) throughout the semester

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Latina/o Studies concentrators

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** This is a required course for concentration in Latina/o Studies

### **LATS 114 (S) Of Caravans and Narcos: U.S. Media Narratives about Central and South America (DPE)**

**Cross-listings:** AMST 114 LATS 114

#### **Primary Cross-listing**

What do contemporary U.S. media discourses about Central and South America reveal about relationships of power in the Americas? How does the systematic analysis of visual, textual, and sonic media discourse enhance our comprehension of broader social dynamics? How do South and Central Americans in the diaspora actively counter dominant media narratives about their communities? And what does it mean to center the unique histories, cultures, and political contexts of diasporic Central and South Americans within Latina/o/x Studies? Drawing from a wide range of scholarly materials and media platforms, this interdisciplinary course assumes a transnational approach to these issues, with an emphasis on how to conduct effective discourse analysis of everyday media texts. Above all, we will highlight the ways in which ethno-racial identity, gender, sexuality, class, and nation intersect to inform mainstream U.S. media narratives and our understandings of past and present modes of representation.

**Class Format:** discussion

**Requirements/Evaluation:** two short (5- to 7-page) essays; one class presentation; final take-home examination (5-7 pages)

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** LATS concentrators by seniority; AMST majors by seniority

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 114 (D2) LATS 114 (D2)

**Difference, Power, and Equity Notes:** This course encourages students to develop critical thinking skills regarding the intersection of categories of difference (including ethno-racial identity, gender, sexuality, class, and nation) employing a variety of scholarly materials and every day media texts. Students will be encouraged to consider past and current relationships of power across the Americas with an eye towards how attitudes towards Central and South Americans shape representations of these communities in the Global North.

Not offered current academic year

### **LATS 203 (F) Chicana/o/x Film and Video**

**Cross-listings:** AMST 205 WGSS 203 LATS 203 ARTH 203

Primary Cross-listing

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicanxs in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o/x-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o/x representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

**Class Format:** Discussion-oriented lecture class. In addition to class meetings and readings, students will be expected to watch 3-5 hours of film per week on GLOW or in the library.

**Requirements/Evaluation:** one short paper, mid-term exam, final exam and take home essays

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** Art majors; LATS concentrators

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

### **LATS 219 (F) Religion & Bible in Latinx Literature, Memoir, Art & Film**

**Cross-listings:** LATS 219 REL 215

#### **Primary Cross-listing**

This course will examine how a broad, but selective, range of Latinx writers and artists -- particularly in fiction, film, visual arts, and biography -- depict, describe, and discuss religious themes, including from the Bible and other relevant "scriptures." Latinx-authored novels memoirs, and autobiographies, artwork by Latina/x visual artists, and films on Latinx themes and communities will be read and viewed to facilitate discussion about what it means to be religious and Latinx; how Latinx peoples read and depict their scriptures; and how such depictions promote or deter understanding of *Latinidad* in the U.S.A.

**Requirements/Evaluation:** In this course, students will read and write short essays about novels and memoirs (4-5 pages), critically analyze film and artwork in short papers (3-4 pages), and write a research paper (8-10 pages) that analyzes the nexus of Latinx religion and art, whether fiction, film, memoir, or the visual arts. Attendance, participation, Glow discussion forums, and written assignments will all constitute assessment tools for this course.

**Prerequisites:** No prerequisites.

**Enrollment Limit:** 20

**Enrollment Preferences:** Students with at least one prior Religion course will be given preference if an enrollment overload. Also sophomores, juniors, and seniors will be given preference over first year students.

**Expected Class Size:** 15-20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

LATS 219 (D2) REL 215 (D2)

**Attributes:** LATS Core Electives

Fall 2022

SEM Section: 01 TR 11:20 am - 12:35 pm Efrain Agosto

### **LATS 222 (F) Ficciones: A Course on Fiction (DPE)**

**Cross-listings:** ENGL 252 LATS 222

#### **Primary Cross-listing**

This course is focused on the art and practice of writing fiction. We will study published fiction by Latina/o, Latin American, Afro-Diasporic, and other writers of the Global South, paying close attention to how each author employs narrative elements--characterization, plotting, structure, dialogue

mechanics, setting, tone, theme--as well as the values and visions expressed. Regular assignments and in-class exercises will help students strengthen their own narrative skills.

**Requirements/Evaluation:** attendance and class participation, writing exercises, 4- to 5-page midterm paper (close-reading a text), 10- to 15-page final paper

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Latina/o Studies concentrators

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENGL 252 (D1) LATS 222 (D2)

**Difference, Power, and Equity Notes:** Student work will encourage personal and cultural expression, with the opportunity to analyze the shaping of social differences, dynamics of unequal power, and processes of change.

**Attributes:** LATS Core Electives

Fall 2022

LEC Section: 01 M 7:00 pm - 9:40 pm Nelly A. Rosario

### **LATS 224 (S) U.S. Latinx Religions**

**Cross-listings:** AMST 224 REL 224 LATS 224

#### **Primary Cross-listing**

In this course, we will engage aspects of Latinx religious experiences, practices, and expressions in the United States of America. Given the plurality of Latinx communities and religious lives in the U.S.A., we can only consider select contexts that help us understand the challenges of studying and defining the "religious" and "hybridity" in Latinx contexts. We will survey certain selected religious traditions and practices --such as popular Catholic devotions to Guadalupe, crypto-Judaism, curanderismo, Latinx Muslims, and Santería--by focusing on particular moments of religious expression as elucidated in specific historiographies, ethnographies, art, literature, and film.

**Class Format:** discussion

**Requirements/Evaluation:** class participation, short writing exercises, a 3-page essay, a 5-page essay, and an 8-12-page final review essay/project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** LATS concentrators and AMST and REL majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

### **LATS 230 (S) Cities, Suburbs, and Rural Places**

Long associated with cities in the scholarly and popular imagination, immigrants have increasingly settled in U.S. suburbs. Through the lens of new destinations for (im)migrants, this course introduces spatial methods, perspectives, and concepts to understand cities, suburbs, and rural places and the relationships between these various spaces. We ask how geographically specific forces and actors shape these trends, as well as the spatially

uneven outcomes of complex processes like globalization. This interdisciplinary course considers economic, social and cultural, environmental, and political approaches through a range of textual materials (academic, literary, popular). Rooted in urban, suburban, and rural geographies, as well as critical race geographies, we explore what these approaches are and what they add to our understanding of "new" im/migrant destinations and to Latinx lived experiences in these various spaces.

**Class Format:** This is a discussion course. While I will spend some time at the beginning of the class lecturing, most of the time will be spent in class discussions.

**Requirements/Evaluation:** Class participation with short discussion post responses, weekly in-class writing, three 4-8 page essays, a midterm, and a final examination. All writing materials and exams are based on coursework.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** LATS concentrators or those intending to become LATS concentrators

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**Attributes:** LATS Core Electives

Spring 2023

LEC Section: 01 TR 8:30 am - 9:45 am Edgar Sandoval

### **LATS 232 (S) We the People in the Stacks: Democracy and Literatures of Archives (DPE)**

**Cross-listings:** LATS 232 ENGL 232

#### **Primary Cross-listing**

"Archives have never been neutral they are the creation of human beings, who have politics in their nature. Centering the goals of liberation is at the heart of the issue" (Jarrett Drake, former digital archivist at Mudd Manuscript Library, Princeton University). In this generative writing and critical-practice course, students examine the concept of archives through the lens of democratic ideals. A primary focus is on how Latinidades and works of Global South literatures engage archives--their creation and deletions, their contents and omissions, their revelations and concealments. Drawing from the values explored in class, students have opportunities to contribute to existing archival collections and/or to curate their own.

**Requirements/Evaluation:** attendance and class participation, short writing exercises, midterm project, final creative project

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** LATS concentrators

**Expected Class Size:** 12-15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

LATS 232 (D2) ENGL 232 (D2)

**Difference, Power, and Equity Notes:** This course examines the relationship between archives and power--creation and deletion, contents and omissions, revelations and concealments--taking into account the diverse affective roles and responsibilities of the archivist, records creator, records subject, and to community engagement.

**Attributes:** LATS Core Electives

Spring 2023

### **LATS 240 (S) Latina/o/x Language Politics: Hybrid Voices**

**Cross-listings:** AMST 240 COMP 210 LATS 240

### Primary Cross-listing

In this course we will focus on issues of language and identity in the contemporary cultural production and lived experience of various Latina/o/x communities. How are cultural values and material conditions expressed through Latina/o/x language and literature? How does Latina/o/x identity challenge traditional notions of the relationship between language, culture, and nation? In what ways might Latina/o/x linguistic practices serve as tools for social change? Departing from an overview of common linguistic ideologies, we will examine code-switching, bilingual education, recent linguistic legislation, and the English Only movement. Throughout the course we will survey texts culled from a variety of literary genres as well, including autobiography, novels, and poetry. Both directly and/or indirectly, these texts address Latina/o/x language politics, as well as the broader themes of power, community, ethno-racial identity, gender, sexuality, class, and hybridity.

**Requirements/Evaluation:** participation, two essays, final written reflection

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Latina/o Studies concentrators, American Studies majors, Comparative Literature majors by seniority

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

### LATS 253 (S) Religion and Politics in the Caribbean and the Diaspora: Puerto Rico and Cuba

**Cross-listings:** REL 292 LATS 253

### Primary Cross-listing

This course explores the role of religion in Caribbean history and politics, with a focus on Puerto Rico and Cuba. These Caribbean islands have lived out contested colonized histories and experiences, as well as diasporic realities on the US mainland. The US government and military have played a significant role in both since the turn of the last century, forcibly shaping their economies and politics. Religion, particularly the Protestant missionary enterprise since the US invasions in 1898, has also shaped histories and politics on the islands and throughout their diasporas. We will explore the role and impact of Protestant religion in these historically indigenous, African descendent, and Roman Catholic religious spaces, as well as how these religious engagements and theologies impacted migration and the creation of diasporic communities in the US. We will analyze the role of religion in imperialist endeavors, as well as in solidarity movements. Puerto Rican and Cuban historical luminaries, such as Pedro Albizu Campos and Jose Marti, who struggled against Spanish colonialism in Puerto Rico and Cuba respectively, had not only political but religious visions for better prospects for their homelands. By understanding the intertwining of religion and politics in Puerto Rico, Cuba and their diasporic communities, we will have the tools to consider the implications for other Caribbean nations, such as the Dominican Republic, as well as other Latin American countries that have experienced US interventions and the creation of diasporic communities.

**Class Format:** This course will follow a discussion format, in which students are expected to come to class prepared to address the assigned readings, to have completed short assignments in preparation for discussions, to make presentations to the class, and/or to lead discussions.

**Requirements/Evaluation:** Evaluation in this course will be based on class participation, short 1 to 2-page writing assignments every other week based on readings and assigned videos/films; a five-page midterm essay on an aspect of Puerto Rican or Cuban political/religious reality discussed in class, and final 7-page research essay on a theme in the course agreed upon by student and professor.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** LATS concentrators and Religion majors, and those with expressed interest in these fields

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**LATS 285 (F) The Bible and Migration: Latinx Perspectives**

**Cross-listings:** REL 286 LATS 285

**Secondary Cross-listing**

This course seeks to understand migration in the current historical moment, around the globe but especially on the US border. The lenses through which we will explore migration include Religion, with special focus on the Christian Bible. We will explore instances of and reflections on migration in the Bible, as well as various interpretations of the Bible emerging today in debates over migration. The course will approach US migration from the perspective of Latinx communities in the US - historically, culturally, politically, and religiously. Readings will include: The Bible, monographs and essays on the Bible and Migration, especially from the perspectives of Latinx authors and thinkers.

**Requirements/Evaluation:** Participation in class discussions; two to three short essays (3-5 pages each) analyzing selected readings; a longer final research paper (7-10 pages) on an aspect of Bible and Migration of interest to the student defined in consultation with the professor.

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** Religion majors and Latinx Studies concentrators, and those interested in these areas of study

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Cross-listings:** LATS 286 HIST 286

**Primary Cross-listing**

The first Latinx communities were formed in 1848 when the United States conquered half of Mexico's territory. In 1898 the United States annexed Puerto Rico and has retained sovereignty to this day. These early conquests and continuing im/migrations created Mexican and Puerto Rican communities in the United States. U.S. imperialism continued to shape the im/migrations that created Cuban, Dominican, Salvadoran, Guatemalan and other Latinx communities in the United States. This course explores U.S. military, political, and economic interventions and their impact on im/migrations and the making of Latinx communities. We also explore the impact of U.S. employers' and the U.S. government's recruitment of low wage workers in shaping im/migrations, destinations, and the formation of Latinx working-class communities. Im/migration and refugee policies have long defined who is eligible to enter and how, as well as who is deemed eligible for citizenship and belonging. Within this context, Latinas and Latinos have developed survival and family reunification strategies for themselves, their families, and their communities.

**Class Format:** This course is a discussion format.

**Requirements/Evaluation:** Class participation with short 1-2 page writing assignments; two 4-5 page essays, and a final 5-7 page essay. All writing assignments are based on course materials.

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** LATS concentrators, History majors, or those intending to become concentrators or majors, seniors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

LATS 286 (D2) HIST 286 (D2)

**Difference, Power, and Equity Notes:** This Difference, Power, and Equity course explores racialized dimensions of U.S. imperialism and U.S. labor recruitment, encouraging critical analysis. The course considers the impact on the formation of Latinx communities in the U.S. and on Latinas' and Latinos' lived experiences in the United States.

### **LATS 313 (S) Gender, Race, and the Power of Personal Aesthetics**

**Cross-listings:** WGSS 313 AFR 326 AMST 313 LATS 313

Primary Cross-listing

This course focuses on the politics of personal style among women of color in the digital era. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno-racial identity, neoliberal capitalism and class inform standards of beauty and ideas about the body, we will examine a variety of materials including commercial websites, podcasts, histories, personal narratives, ethnographies, and sociological case studies. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions among others: What are some of the everyday functions of personal style among women of color in the US and globally? How do Latina/x, Black, Arab American and Asian American female aesthetics reflect the specific circumstances of their creation? What role do transnational media and popular culture play in the development and circulation of gendered and raced aesthetic forms? How might the belief in personal style as activist strategy complicate traditional understandings of feminist political activity?

**Requirements/Evaluation:** participation, one student-led discussion period, two written essays of 5-7 pages, final written reflection.

**Prerequisites:** LATS 105, AMST 201, AFR 200, WGSS 101 or permission of instructor; first year students are not permitted to take this course.

**Enrollment Limit:** 12

**Enrollment Preferences:** Latina/o Studies concentrators, American Studies majors, Africana Studies majors, and Women's, Gender and Sexuality Studies majors by seniority. If the class is overenrolled students may be asked to submit a brief writing sample.

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

### **LATS 315 (S) Research Design in Geography: Social Science Perspectives (WS)**

How do you design a research project? Which methods of data collection and analysis are appropriate for research questions in Latinx Studies? This course provides an introduction to the process of designing and carrying out a research project, including related to Latinidades, or a plurality of Latinx identities. It introduces students to how social science knowledge is produced to understand the research process, how research emerges, and how we affect research. Course objectives for students are: 1) to design social science research effectively; 2) to critically evaluate the research design of others; 3) to strengthen their academic research and writing skills; and 4) to develop an appreciation for how knowledge is acquired, organized, and communicated. Students will iteratively develop an original research proposal involving several pieces of synthesis. Through applying different research methods to case studies in Latinx Studies, students will understand that the complexity of the issues affecting Latinx communities requires thoughtful research. Students will receive practical training in research protocols, organization methods, project management, and analytical approaches.

**Class Format:** This class will have short lectures with most of the time dedicated to group discussions. Students should expect to carry out research methods outside of class.

**Requirements/Evaluation:** Class participation. Assignments where students carry out research methods. Five writing assignments of various page lengths (1-10 pgs) compose students' research proposal project. Each component of the project will be revised by students after professor feedback. These revisions will culminate into a final paper (~20 pages). There will be a final exam.

**Prerequisites:** N/A

**Enrollment Limit:** 20

**Enrollment Preferences:** LATS concentrators or those intending to become LATS concentrators; juniors interested in a senior honors thesis;

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will have five writing assignments that build upon each other, from the statement of research topic, initial research questions, annotated bib, draft lit review, and proposed methodology. Students receive critical feedback on grammar, style, and argument and submit revised versions of their assignments. Students submit a completed research project proposal as their final paper.

### **LATS 316 (F) The Graphic Narrative: A "Global South" Perspective (DPE)**

"[I]n a media-saturated world in which a huge preponderance of the world's news images are controlled and diffused by a handful of men' a stream of comic book images and words, assertively etched' can provide a remarkable antidote." --Edward Said, *Introduction to Palestine* by Joe Sacco. This course examines graphic narratives (and related texts and film) rooted in the "Global South," with particular emphasis on Latina/o and Latin American experiences. We will focus on how each author/artist deploys visual and narrative elements to express social, political, economic, and cultural realities. Regular assignments will offer students opportunities to create their own graphic narratives.

**Requirements/Evaluation:** attendance and class participation, short writing exercises, 4- to 5-page midterm paper (close-reading a text), 10- to 15-page final creative paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Latina/o Studies concentrators

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** Readings in the course offer students the opportunity to analyze the shaping of social differences, dynamics of unequal power, and processes of change.

**Attributes:** LATS Core Electives

Not offered current academic year

### **LATS 327 (S) Racial and Religious Mixture (DPE)**

**Cross-listings:** REL 314 LATS 327 AFR 357 AMST 327

Primary Cross-listing

The very term "mixture" implies that two or more distinct substances have been brought together. Distinctions of race and religion are social fictions; yet, the lived ramifications of these social fictions involve tense struggles over the boundaries of racial and religious communities. These boundaries are not just ideas but also practices. In the history of the Americas, mixed racial and religious identities and experiences have more often been the result of violent clashes than romantic encounters. Still, the romanticization of the New World as a geography that makes such mixtures possible reaches back to the earliest days of Spanish conquest in the Americas. This course critically reconsiders varying ways that racial and religious mixtures have been imagined, defined, challenged, negotiated, and survived under imaginative and legal rubrics of *mestizaje*, *creolization*,

transculturation, passing, syncretism, religious hybridity, and mixed race studies.

**Class Format:** mostly discussion

**Requirements/Evaluation:** participation, short writing exercises, a 3-page first essay, a 5- to 8-page second essay, and a 10- to 14-page final paper

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** seniors, concentrators, majors, those with prior relevant coursework

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

REL 314 (D2) LATS 327 (D2) AFR 357 (D2) AMST 327 (D2)

**Difference, Power, and Equity Notes:** Focusing on how different peoples have critically theorized and made meaning about and out of racial and religious differences and interconnections, this Difference, Power, and Equity course investigates the ways that knowledge about mixture and difference--and their roles in hierarchical distributions of social and political power--have been critically constructed and transformed.

### **LATS 330 (S) DNA + Latinx: Decoding the "Cosmic Race"** (DPE)

Scientists working to assemble maps of the human genome have found a goldmine in the DNA of Latinx, Latin American, and other populations that derive ancestry from multiple continents. This interdisciplinary course explores Latinidades through a genealogical lens: What culture-specific issues emerge around history, identity, ethics, forensics, immigration, commerce, surveillance, art, science, and medicine? Through discussion, materials, and activities that engage personal, historical, and scientific perspectives, this course offers students the opportunity to explore the many codes embedded in the double-helix. Readings include scholarship out of Stanford University's Bustamante Lab, *The Cosmic Race* by José Vasconcelos, *The Cosmic Serpent* by Jeremy Narby, *Bird of Paradise: How I Became Latina* by Raquel Cepeda, and *The Social Life of DNA: Race, Reparations, and Reconciliation After the Genome* by Alondra Nelson.

**Requirements/Evaluation:** attendance and class participation, writing exercises, 4- to 5-page midterm paper (close-reading a text), 10- to 15-page final writing portfolio

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Latina/o Studies concentrators

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

### **LATS 335 (F) Contemporary Immigration Landscapes**

What is the relationship between racial formations, transnational migrations, and power? How do geometries of power shape our relationship to place? This course examines geographies of transnational migration, bringing together insights from critical race theory, queer theory, Indigenous studies, and postcolonial theories to enrich our understanding of human geography. We will look at the use of ethnic and racial formations as a bridge between cultural and political geography in the contemporary US immigration landscape. Through an interdisciplinary exploration of 'migration,' we will examine the depth and range of experiences of migrants and how these communities' lives are structured through various axes of difference, such as race, gender, sexuality, class, and documentation status. We will give attention to the variegated landscape of immigration enforcement and its relationship

to issues of labor, political economy, and environmental justice, among others. Through materials that embrace both historical and contemporary perspectives, this course will help students develop a critical understanding of how space matters when considering transnational processes of migration as well as migrant communities' cultural place-making practices throughout the US. This course asks students to compare and contrast the intellectual genealogies covered and apply these theories of transnational racial formations to case studies that focus on political interventions for social justice (such as UndocuQueers in the immigrant justice movement).

**Requirements/Evaluation:** Class Participation (20%): Preparation for, and active participation in, class discussions. Short writing assignments weekly around class readings. Pair share (10%): Two engage class with thoughts for one 30 minute class segment. Essays (20% each): Two 4-5 page essays. Final Paper (30%): An examination of the articulation of Latinx migrations and belonging in a case study that interrogates and builds on a major course theme, approximately 12 pages double-spaced, plus references / endnotes / images.

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** LATS concentrators

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

### **LATS 341 (S) Performing Masculinity in Global Popular Culture (DPE)**

**Cross-listings:** AMST 358 THEA 341 LATS 341 WGSS 347 SOC 340

#### **Secondary Cross-listing**

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., K-Pop), hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

**Requirements/Evaluation:** masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** a short statement of interest will be solicited

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 358 (D2) THEA 341 (D2) LATS 341 (D2) WGSS 347 (D2) SOC 340 (D2)

**Difference, Power, and Equity Notes:** This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

## LATS 344 (F) Marking Presence: Reading Disability in/to Latina/o/x Media (DPE)

**Cross-listings:** LATS 344 WGSS 361 AMST 361

### Primary Cross-listing

This course spans Divisions I, II, and III in its exploration of the representation of disability and Latina/o/x identity in the contemporary US context. Employing Angharad Valdivia's (2020) notion of "marking presence" to describe the intentional ways in which Latina/o/x subjects gain and hold on to mainstream media space, the class places the fields of Disability Studies, Latina/o/x Studies, Gender Studies and Media Studies into conversation. We address the following questions and others: What does media reveal to us about the place of disability and Latinidad in contemporary US life, particularly as these categories intersect with questions of gender, sexuality, national identity and citizenship? How might we read Latinidad and disability *into* media texts in which they are not otherwise centered? What are the advantages of deploying mainstream media presence as a claim to power for disabled Latina/o/x individuals, particularly those who are multiply marginalized? What are the limitations of such an approach? We will focus on these questions, as well as deploy various media examples (podcasts, social media, film, television and music) alongside scholarly texts to explore topics impacting the Latina/o/x communities such as the relationship between migration and trauma, the gendered archetype of the Latina "Loca," disability in academia, temporality and disability ("Crip Time"), the politics of self-care amongst Latinas/xs in the neoliberal context, and the very legal, cultural, and social category of "disabled" itself within dominant society as well as Latina/o/x communities.

**Requirements/Evaluation:** Two short (5-6 page) essays; One media analysis exercise; One final reflection letter.

**Prerequisites:** None.

**Enrollment Limit:** 12

**Enrollment Preferences:** Preference given to LATS concentrators, AMST majors and WGSS majors by seniority.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

LATS 344 (D2) WGSS 361 (D2) AMST 361 (D2)

**Difference, Power, and Equity Notes:** At its core, this course is about understanding difference and relationships of power through an intersectional lens and via the prism of everyday media. In each class we will be discussing issues directly revolving around questions of race, ethnicity, ability/disability, gender, sexuality, and nation. Students will be expected to incorporate an analysis of these issues in their written and oral work for the course.

## LATS 346 (F) Latinas/os and the Media: From Production to Consumption

**Cross-listings:** LATS 346 AMST 346

### Primary Cross-listing

This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

**Requirements/Evaluation:** student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted in stages

**Prerequisites:** LATS 105 or permission of the instructor; no first-year students are permitted to take this course

**Enrollment Limit:** 12

**Enrollment Preferences:** Latina/o Studies concentrators or American Studies majors by seniority

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

### **LATS 347 (S) Feeling Latinx Cinema: No Popcorn Included**

When we consider going *to the movies* to be pure entertainment and escapism, we may be wrong. This course will introduce students to Latinx films through a critical practice showcasing the experience of feeling, especially when matters of *Latinidades*, identity formation, and transculturation are at stake. If watching a film constitutes an affective and ideological transaction for spectators in the domain of the national cultural imaginary, how does the actual viewing materialize a lived and felt experience through interpellation and reception? Students will embark on a film festival to examine the history of Latinx representation and structures of feeling on the silver screen from the silent era to *In the Heights* and Spielberg's *West Side Story*. Each film will be approached and tackled from specific points of entry and theoretical frames, such as border crossing and migration, education and assimilation, hegemonic stereotyping and cultural citizenship, fiction and history, race and ethnicity, the geo-politics of emplacement in the *barrio* and gentrification, feminist and queer subjectivity, and fame and the American Dream. Among the films to be analyzed in class are: *El Norte*, *Coco*, *Sleep Dealer*, *La Ofrenda*, *La Mission*, *Popi*, *Chicago Boricua*, *Selena*, *Nothing Like the Holidays*, and *Vivo*.

**Class Format:** discussion

**Requirements/Evaluation:** Evaluation will be based on attendance, class participation; short writing assignments; individual presentations and group discussions; a 12 page final paper.

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** LATS concentrators

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** LATS Core Electives

Not offered current academic year

### **LATS 348 (S) Drawing Democracy: Graphic Narratives as Democratic Ideals**

**Cross-listings:** COMP 348 AMST 348 LATS 348

Primary Cross-listing

This course examines the graphic narrative in terms of how each author/illustrator employs narrative elements (plotting, structure, characterization, text, and visuals) to express social realities within the context of democratic ideals. Regular assignments and in-class exercises throughout the course offer students the opportunity to create their own graphic narratives.

**Requirements/Evaluation:** attendance and class participation, short writing exercises, 4-5 page midterm paper (close-reading a text), 10-15 page final creative paper

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** LATS concentrators

**LATS 358 (S) Latinx Installation and Site-Specific Art (WS)**

**Cross-listings:** ARTH 358 LATS 358

**Primary Cross-listing**

This course will explore the various forms of installation and site-specific artworks created by Latinx artists for both museums and public space. We will examine the ways in which Latinx artists have used space as a material in the production of artworks and how this impacts the works' meanings and the viewer's experience. Within the context of U.S. Latinx culture and history, we will connect notions of space with ideas about cultural citizenship, civil rights, and social justice. A variety of art forms will be studied, from traditional to experimental, including murals, sculpture, performance, video, and several multimedia, interactive, or participatory projects. While establishing a historical lineage and theoretical frameworks for analyzing this growing genre, we will pay particular attention to how these works engage urban space and often challenge the institutional assumptions of museums and curatorial practice. Likewise, we will examine the important debates associated with various public art and museum installation controversies.

**Class Format:** discussion

**Requirements/Evaluation:** two short papers, periodic research reports, final research paper, and presentation

**Prerequisites:** LATS 105 or ARTH 102 or permission of instructor; GRADART exempt from ARTH 102 prerequisite

**Enrollment Limit:** 12

**Enrollment Preferences:** Latina/o Studies concentrators and Art majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**LATS 385 (F) Latinx Activism: From the Local to the Transnational (DPE) (WS)**

**Cross-listings:** LATS 385 HIST 385

**Secondary Cross-listing**

Latinas/os/x's have long sought inclusion in the U.S. polity and society, while the meanings of inclusion and the means to achieve it have shifted historically. For Latinxs, activism is often shaped by the specific dynamics of each group's migration to the United States and by their arrival into a particular context. Home country politics and transnational connections can remain important. Yet local activism to meet immediate needs and to address critical issues becomes important as well. Working within existing structures, Latinx communities have at times questioned and challenged those existing structures, as activists have addressed a wide variety of often intersecting issues. This course roots itself in the historical progression of Puerto Rican and Mexican-American activism, before turning to the social and political movements of the late 1960s and 1970s, as shaped by Puerto Ricans, Chicanos/as, Cubans, and Dominicans. The 1980s witnessed increased immigration from several Central and South American countries, arriving in the context of reactions to those political and social movements, as well as increased U.S. intervention in their countries of origin--a context that again shaped both local and transnational activism. Students' final projects will be anchored within this historical framing and within the lens of local and transnational activism, while moving forward in time to consider more contemporary dimensions of Latinx activism.

**Class Format:** This is a discussion-based and writing intensive course, so reading and full participation is important. Students will be expected to read each other's work and to provide thoughtful and constructive feedback.

**Requirements/Evaluation:** Class participation and presentations; several 3-4 page essays; final paper of 12-15 pages, as well as proposal,

bibliography, and drafts

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** History majors and Latina/o Studies concentrators, seniors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

LATS 385 (D2) HIST 385 (D2)

**Writing Skills Notes:** Several writing assignments of 3-4 pages provide the foundation for 12-15 page final papers. In consultation with the professor, students select a topic and submit a 3-4 page proposal with a bibliography. Students submit a draft for a workshop session with other students. A final presentation is another opportunity to hone arguments and use of evidence, as well as to receive feedback on revised drafts from the professor.

**Difference, Power, and Equity Notes:** This course examines how Latinx communities have sought inclusion in U.S. society and polity, in the face of marginalization based on race, ethnicity, class, gender, sexuality, and/or political perspective, as well as other intersecting markers of difference. Questions of difference, power, and equity are analyzed at the structural, community, and individual levels.

**Cross-listings:** AMST 403 LATS 403 AFR 333

Secondary Cross-listing

The most exciting and forward-thinking writing in the English language today is being done by formally experimental writers of color. Their texts push the boundaries of aesthetic form while simultaneously engaging questions of culture, politics, and history. This course argues not only for the centrality of minority experimental work to English literature but a fundamental rethinking of English literary studies so as to confront the field's imbedded assumptions about race, a legacy of British colonialism, and to make the idea of the aesthetic more open to ideas generated in critical race studies, diaspora studies, American studies, and those fields that grapple more directly with history and politics. In the critical realms of English, work by minority writers is often relegated to its own segregated spaces, categorized by ethnic identity, or tokenized as "add-ons" to more "central" or "fundamental" categories of literature (such as Modernism, poetics, the avant-garde). Recent work by Asian American, African American, Native

American and Latino/a writers challenges our assumptions and preconceptions about ethnic literature, American literature, English literature, formal experimentation, genre categorization, and so on. This writing forces us to examine our received notions about literature, literary methodologies, and race. Close reading need not be opposed to critical analyses of ideologies. Formal experimentation need not be opposed to racial identity nor should it be divorced from history and politics, even, or especially, a radical politics.

**Requirements/Evaluation:** one shorter paper (7-8 pp.), one final paper or creative project (10-12 pp.), two short response papers, a presentation, and participation

**Cross-listings:** WGSS 409 LATS 409 AMST 411

Primary Cross-listing

In the age of digital communications and mobile applications such as WhatsApp and Skype, transnational living has rapidly emerged as the norm as opposed to the exception. However, what does it really mean to "be transnational"? How are the lived experiences of transnational individuals and communities shaped by categories of difference such as gender, ethno-racial identity, sexuality, and class? What impacts do the growing number of transnational citizens and residents in the U.S. have on our understanding of "American" identity in the local, national, and global contexts? In this interdisciplinary seminar we will analyze recent theories regarding the origins and impacts of transnationalism. Particular attention will be paid throughout the semester to the intersections of gender, ethno-racial identity, sexuality, and class in connection with everyday transnational dynamics. The broad range of case studies examined includes Central American, Colombia, the Dominican Republic, Haiti, Indonesia, Jamaica, Mexico, the Middle East, and Peru.

**Class Format:** This course will follow a discussion format.

**Requirements/Evaluation:** student participation, an original 12-15 page semester-long research paper conducted in stages, and student presentation

**Prerequisites:** LATS 105, WGSS 101 or AMST 201; junior or senior standing

**Enrollment Limit:** 12

**Enrollment Preferences:** Latina/o Studies concentrators, Women's, Gender, and Sexuality Studies majors, and American Studies majors by seniority. If the course is overenrolled students may be asked to submit a brief writing sample.

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **LATS 410 (F) Arquivistas: An Archival Storytelling Course (DPE) (WS)**

Archival storytelling: the "creative practice of resurfacing hidden, untapped, and untold historical treasures and reimagining that content in various

storytelling presentations that speak to modern-day audiences" (Arbo Radiko). In this generative writing and critical-practice course, students explore/inhabit the role of writers and storytellers as preservers of history and culture. With a focus on documenting and/or reimagining Latinidades, the course invites students to address: the unique narrative forms archives may take beyond collections of artifacts; how archives can inform the creation--and definition--of literary work; the relationship between archives and power; information the archivist/storyteller may choose to include or omit, reveal or conceal; how the archivist/storyteller might practice what scholars Michelle Caswell and Marika Cifor call "radical empathy," one that takes into account the diverse affective roles and responsibilities of the: archivist, records creator, records subject, records user, and community member. The course is designed to help students address the above through assignments that build towards final projects. Through the creative process, students learn to: research, compile, and analyze materials from various open-access repositories; identify and write emergent stories from collected material; and present these stories to the public using narrative elements and tools in the digital humanities. Projects may include virtual exhibits, data stories, annotated maps, historical fiction, ekphrastic poetry, finding aids, and interactive timelines. Projects may also examine the Latinx experience on campus, building on archival efforts initiated by students for the LATS Program 15th Anniversary Exhibit at Williams College Library.

**Requirements/Evaluation:** Assignments and in-class exercises; attendance; participation; peer review

**Prerequisites:** n/a

**Enrollment Limit:** 19

**Enrollment Preferences:** LATS concentrators; students who haven't taken creative-writing courses but are interested in the topic; students interested in the digital humanities; students who have met their other curricular requirements

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** Two five-page papers (each receiving critical feedback from professor on grammar, style, and argument); a midterm project proposal with critical feedback from professor and peers; one taxonomy glossary based on course readings and proposed project; one annotated bibliography; artist statement and notes on craft; one final paper submitted with corresponding creative project.

**Difference, Power, and Equity Notes:** This course examines various forms of difference, power, and equity related to creating and engaging archives. In exploring and creating archives themselves, students pay close attention to any omissions and concealments in the documentation of historical memory, particularly in relation to diverse Latinx experiences.

## **LATS 420 (S) Latinx Ecologies**

**Cross-listings:** LATS 420 ENVI 421

### **Primary Cross-listing**

An August 2015 Latino Decisions poll found that Latinxs, more than other ethnic groups in the U.S.A., are deeply concerned about climate change and the "environment". How and why might some Latinxs be disproportionately impacted by climate change? How have a few distinct Latinx theorists and activists imagined and constructed ecology? How are struggles for environmental justice related to broader Latinx concerns with and constructions of place? This seminar will examine a few moments in distinct Latinx histories and geographies such as California migrant farmworkers and the struggle over pesticides, urban movements over waste management such as the Young Lords' garbage offensive, food justice movements and urban gardening, as well as literary and theological representations of affective and sacred ecologies such as Helena María Viamontes' *Their Dogs Came With Them* and Ecuadoran-U.S. ecofeminist Jeanette Rodríguez's theological texts. Evaluation will be based on class participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a final 20-page research paper.

**Requirements/Evaluation:** class participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a final 20-page research paper

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Latinx Studies concentrators; Environmental Studies majors and concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

Not offered current academic year

**LATS 440 (F) Contemporary Exhibitions: Los Angeles and Latin America** (DPE) (WS)

**Cross-listings:** ARTH 440 LATS 440

**Secondary Cross-listing**

This seminar examines connections between Latinx and Latin American art through a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time: LA/LA that opened in 2017. While the chronological span for the overall project reaches from Pre-Colombian art to present, we will focus on modern and contemporary art after the 1960s and consider key themes of art and activism, borders and diaspora, globalism and modernism, and popular culture and science fiction in the visual arts. Diverse in scope, these shows explored important developments in the arts of the Americas from the late-20th and 21st centuries, including, abstraction, Chicano muralism, Conceptual art, craft, feminist art, Kinetic art, Modernist design and architecture, social practice, and queer activism. Students will pursue individual research projects directly related to the art exhibitions we study, and examine photography, performance, painting, sculpture (including installation and participatory art), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history.

**Requirements/Evaluation:** several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages

**Prerequisites:** ARTH 102 (graduate students are exempt from the prerequisite)

**Enrollment Limit:** 15

**Enrollment Preferences:** senior Art majors and senior Latina/o Studies concentrators

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ARTH 440 (D1) LATS 440 (D1)

**Writing Skills Notes:** There will be considerable focus on writing and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Course themes of art and activism, borders and diaspora, globalism and modernism in the visual arts and how they intersect with the exploration of difference, power, and equity and the various ways that artists have produced works and developed practices that critically probe this intersection. Through discussion, presentations, and writing assignments students will develop skills in analyzing artworks and exhibitions that respond to and/or document social inequality and social injustice.

**LATS 470 (S) Latinx Migrations: Stories and Histories (WS)**

**Cross-listings:** LATS 470 HIST 470

Secondary Cross-listing

Latinx migration histories are often told with sweeping data and within broad historical contexts. While these are important, the voices of the people leaving their home countries and coming to the United States can be lost or buried. During the 1970s, the emerging subfield of social history asserted the need to craft histories that took into consideration the everyday lives of everyday people. Oral history emerged a key tool in capturing the personal stories too often missed in historical archives. At the same time, Puerto Rican Studies, Chicano Studies, and later, Latinx Studies emerged to tell the histories of groups too often omitted from or misrepresented in the scholarship. These fields relied on traditions of testimonios or storytelling. This course focuses on Latinx oral histories, autobiographies, and other first person narratives to explore how people are impacted by and experience those broad historical contexts, as well as how the decisions they make and the actions they take shape those broad historical contexts. This course examines first person narratives in the context of specific Latinx groups in particular historical, geographical, and social contexts, while interrogating the methodological and interpretive challenges of working with oral histories and other first-person primary sources.

**Requirements/Evaluation:** class participation and presentations; short writing assignments; proposal, bibliography, and drafts of final paper; final paper of 15 to 20 pages

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** History majors and Latina/o Studies concentrators, seniors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

## LEADERSHIP STUDIES (Div II)

Chair: Professor Justin Crowe

### Advisory Committee

- Magnús T. Bernhardtsson, Brown Professor of History and Faculty Affiliate in Arabic Studies, Leadership Studies and Religion, Chair of Global Studies; affiliated with: History, Global Studies, Religion, Leadership Studies
- Justin Crowe, Chair of Leadership Studies and Professor of Political Science; affiliated with: Political Science, Leadership Studies
- James McAllister, Fred Greene Third Century Professor of Political Science; affiliated with: Political Science, Leadership Studies; on leave 2022-2023
- Nicole E. Mellow, Chair and Ephraim Williams Professor of Political Science; affiliated with: Political Science, Leadership Studies
- Vanessa Walker, Stanley Kaplan Distinguished Visiting Professor of American Foreign Policy
- Elizabeth Iams Wellman, Stanley Kaplan Visiting Postdoctoral Fellow in the Department of Political Science and Leadership Studies Program
- Mason B. Williams, Assistant Professor of Leadership Studies and Political Science; affiliated with: Leadership Studies, Political Science

Leadership Studies focuses on the universal phenomenon of leadership in human groups. Leadership Studies asks what leadership means within a wide variety of social contexts—whether in a family, a team, a theatre company, a philanthropy, a university, a multinational corporation, or a nation-state waging war. It seeks to understand the dynamics of the relationships between leaders and followers. It studies authority, power, and influence. It seeks to grasp the bases of legitimacy that leaders claim, and followers grant, in all of these relationships.

Through a wide range of courses in the social sciences and the humanities, the curriculum addresses a number of questions. How do we define leadership? What are the bases of leaders' legitimacy in different historical contexts? How should we understand the variation between leaders emerging through tradition, charisma, and legal sanction? How do different types of leaders exercise and maintain their authority? What are the distinctive habits of mind of leaders in different cultural settings? What are the moral dilemmas that leaders across all settings face? What are the typical challenges to established leadership? How does one analyze the experiences of leaders in widely disparate contexts to generate systematic comparative understandings of why history judges some leaders great and others failures? How and why do these evaluations about the efficacy of leaders shift over time?

To meet the requirements of the concentration, students must complete one of the two sequences outlined below (6 courses total). Additional and/or substitute electives are offered each year; students should consult the course offerings in the catalog for the full list of elective offerings in a given year and contact the chair if they wish to suggest additional courses that might count toward the concentration.

### LEADERSHIP STUDIES—TRADITIONAL TRACK

#### The introductory course:

LEAD/PSCI 125 Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies

#### One required course on ethical issues related to leadership, typically:

[PHIL 119\(S\) SEM Why Obey the Law?: On Justice and Freedom in Western Political Philosophy](#)

Taught by: [Jana Sawicki](#)

[Catalog details](#)

[PSCI 203\(F, S\) SEM Introduction to Political Theory](#)

Taught by: [Nimu Njoya](#), [Mark Reinhardt](#)

[Catalog details](#)

#### Two core courses dealing with specific facets or domains of leadership, such as:

[ARTH 501 / LEAD 301 / ARTH 401\(S\) SEM Museums: History and Practice](#)

Taught by: [Michael Conforti](#)

[Catalog details](#)

[ASTR 240 / LEAD 240 / STS 240\(F\) CON Great Astronomers and Their Original Publications](#)

Taught by: [George Crane](#)  
[Catalog details](#)

## **One Leadership Studies Winter Study course (listed separately in the catalog)**

### **Capstone course:**

LEAD 425 Leadership and the Anxieties of Democracy

## **LEADERSHIP STUDIES—KAPLAN PROGRAM IN U.S. FOREIGN POLICY TRACK**

### **An introductory course:**

HIST 262 The United States and the World, 1776 to 1914

HIST 263 The United States and the World, 1914 to the Present

PSCI/LEAD 120 America and the World

LEAD/PSCI 125 Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies

### **One required course on issues related to American domestic leadership, such as:**

[LEAD 125 / PSCI 125\(F\) SEM Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies](#)

Taught by: [Mason Williams](#)  
[Catalog details](#)

[LEAD 205 / PSCI 212 LEC From Tocqueville to Trump: Leadership and the Making of American Democracy](#)

Taught by: [Mason Williams](#)  
[Catalog details](#)

[LEAD 258 / PSCI 258 SEM The Media and American Democracy](#)

Taught by: Ted Gup  
[Catalog details](#)

[LEAD 285 / PSCI 257 / HIST 354\(F\) SEM The Revolutionary Generation: Galaxy of Leaders](#)

Taught by: TBA

[Catalog details](#)

[LEAD 320 / PSCI 320\(F\) SEM Heroes and Villains: Iconic Leadership and the Politics of Memory](#)

Taught by: [Mason Williams](#)

[Catalog details](#)

[PSCI 218 / LEAD 218 SEM The American Presidency](#)

Taught by: [Nicole Mellow](#)

[Catalog details](#)

[PSCI 310 / LEAD 332 SEM New York City Politics from the Blackout to Bloomberg](#)

Taught by: [Mason Williams](#)

[Catalog details](#)

### **Three required courses dealing with specific facets of American foreign policy leadership, such as:**

[HIST 388 SEM Decolonization and the Cold War](#)

Taught by: [Jessica Chapman](#)

[Catalog details](#)

[HIST 389 / ASIA 389 / LEAD 389 SEM The Vietnam Wars](#)

Taught by: [Jessica Chapman](#)

[Catalog details](#)

[PSCI 225 / LEAD 225\(S\) LEC International Security](#)

Taught by: [Galen E Jackson](#)

[Catalog details](#)

[PSCI 262 / HIST 261 / LEAD 262 LEC America and the Cold War](#)

Taught by: TBA

[Catalog details](#)

[PSCI 266 LEC The United States and Latin America](#)

Taught by: [James Mahon](#)

[Catalog details](#)

[PSCI 364 TUT Noam Chomsky and the Radical Critique of American Foreign Policy](#)

Taught by: [James McAllister](#)

[Catalog details](#)

### **One capstone course:**

LEAD/PSCI 327 Leadership and Strategy

LEAD 330/PSCI 420 The Nuclear Revolution

LEAD/PSCI 365 U.S. Grand Strategy

PSCI 361 The CIA and American Foreign Policy

LEAD 425 Leadership and the Anxieties of Democracy

(There is no official Winter Study component to the American Foreign Policy Leadership track; students who wish to count a Winter Study course toward that track should contact the chair.)

For either track, students should check with the program chair to see if other courses not listed here might count as electives.

### **HONORS IN LEADERSHIP STUDIES**

Although there currently is no Honors route in the Leadership Studies program, it often is possible for students pursuing the concentration to undertake an Honors project within their major disciplines on topics that enables them to develop and explore their interests in Leadership Studies. Faculty in the program are happy to discuss this possibility with concentrators and to help them develop suitable Honors thesis topics. In some cases, depending on the topic and the department involved, a faculty member in the program might also be able to serve as an official or unofficial co-supervisor for an Honors project in another discipline.

### **FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

#### **Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the program chair.

#### **What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken**

**while on study away?**

Course title and description.

**Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

Not formally, but, typically, one course per semester abroad is counted toward the concentration.

**Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

No.

**Are there specific major requirements that cannot be fulfilled while on study away?**

Yes: the introductory course and the senior capstone.

**Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

Yes: the introductory course has historically been taught only in one semester (usually the fall).

**Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:**

None to date.

**LEAD 120 (S) America and the World**

**Cross-listings:** LEAD 120 GBST 101 PSCI 120 GBST 103

**Secondary Cross-listing**

This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made on a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation to Iran; terrorist threats; humanitarian disasters in Syria and Libya; and long-term challenges like climate change. We will not only describe American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning only sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a "grand strategy." By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

**Class Format:** discussion

**Requirements/Evaluation:** short papers, class participation, and final exercise

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** first-years and sophomores

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Cross-listings:** PSCI 155 LEAD 125 LEAD 155 PSCI 125

**Primary Cross-listing**

This course introduces students to the major issues in the study of leadership, a central concept in the study of politics. The first part of the course will

examine key theoretical problems that have occupied political thinkers from Plato and Confucius to Machiavelli and the American framers: What makes a leader successful? What kinds of regimes best serve to encourage good leaders and to constrain bad ones? What is the relationship between leadership and morality-can the ends justify the means? What functions does leadership fill, and what challenges do leaders face, in modern democratic states? The second half of the course will look at leaders in action, charting the efforts of politicians, intellectuals, and grassroots activists to shape the worlds in which they live. Case studies will include antislavery politics and the American Civil War; the global crises of the 1930s and 1940s; and the social movements of the 1960s and 1970s. In addition to active class participation, students will be expected to write a 5-page proposal for a research paper on a leader of their choice, a 10-page research paper, an in-class midterm exam, and a cumulative, in-class final exam.

**Requirements/Evaluation:** active class participation, 5-page research proposal, 10-page research paper, in-class midterm exam, and a cumulative in-class final exam

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** first-year students and sophomores

### **LEAD 127 (S) America First? The Trump Era and the Future of World Politics**

**Cross-listings:** LEAD 127 PSCI 127

#### **Secondary Cross-listing**

"America First" was a slogan and a perspective on foreign policy adopted by isolationists like Charles Lindbergh in the 1930's. In the aftermath of Pearl Harbor and the Second World War, a strong bipartisan consensus emerged around the principles of liberal internationalism and "America First" perspectives were marginalized in American politics. However, with the election of Donald Trump, the American presidency is now in the hands of someone who proudly claims the America first mantle. This course provides a historical and theoretical context for understanding what is unique about President Trump's approach to American foreign policy in the 21st century. Particular attention will be devoted to the contrast between the views of Trump and those of the American foreign policy establishment over issues such as NATO, nuclear proliferation, Russia, immigration, terrorism, free trade, and conflicts in the Middle East.

**Requirements/Evaluation:** two analytical essays, short response papers, and final group project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** potential political science majors and leadership studies concentrators (foreign policy track)

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

LEAD 127 (D2) PSCI 127 (D2)

### **LEAD 205 (S) From Tocqueville to Trump: Leadership and the Making of American Democracy (DPE)**

**Cross-listings:** LEAD 205 PSCI 212

**Primary Cross-listing**

America's founders didn't mean to create a democracy. But since the Revolution, leaders have been fighting to make real for all Americans the promise of government of, by, and for the people. In this course, we will look at how leaders have marshaled ideas, social movements, and technological changes to expand the scope of American democracy--and the reasons they have sometimes failed. We will examine how founders such as Benjamin Franklin and James Madison envisioned the relation between the people and the government; how workers, African Americans, and women fought to participate in American politics; and how globalization, polarization, and inequality are straining American democracy and political leadership in the 21st century. We will examine leadership to better understand American democracy--and vice versa. We will ask: What explains why some leaders have succeeded where others have failed? Have some periods of American democratic politics been more amenable to particular kinds of leadership than others? What makes American political leadership distinctive in international comparison? Who, exactly, has been permitted to participate in American politics, and on what terms? How has the relation between the governors and the governed changed over time, and what factors and events have shaped those relations? How has America's democratic experiment compared with (and interacted with) democracy elsewhere in the world? Is America really a democracy at all?

**Requirements/Evaluation:** bi-weekly short writing assignments, term paper, midterm and final in-class exams

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** Leadership Studies concentrators and Political Science majors

**Expected Class Size:** 25

**Grading:** no pass/fail option, no fifth course option

**Cross-listings:** HIST 207 JWST 217 REL 239 GBST 101 LEAD 207 ARAB 207 GBST 102

**Secondary Cross-listing**

This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination.

**Requirements/Evaluation:** participation, two short papers, quizzes, midterm, and final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** History & Arabic majors, and Jewish studies concentrators; completion of course admission survey if overenrolled

**Expected Class Size:** 30-40

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **LEAD 212 (S) Sister Revolutions in France and America**

**Cross-listings:** LEAD 212 HIST 393

#### **Primary Cross-listing**

In the late-eighteenth century, two revolutions burst forth--they were the most striking and consequential events in modern history, decisive turning-points that transformed society and politics. The American Revolution led to an enduring and stable democratic republic whereas the French Revolution was followed by a turbulent succession of Empires and restorations of the monarchy. France did not have a sustainable republic until 1870. We will analyze in detail and in depth the ideas and theories of the leaders of both revolutions in order to understand why the American Revolution took a moderate course and why the French Revolution took a more radical course and plunged into violence and terror. We will read the writings of Washington, Jefferson, Madison, Hamilton, Rousseau, Robespierre, Saint-Just, Tocqueville, Edmund Burke and others.

**Requirements/Evaluation:** three papers, several class presentations, and active participation in class discussions

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** students with backgrounds in American history, French history or Political Science

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

### **LEAD 214 (F) The Economics of National Defense**

**Cross-listings:** ECON 217 LEAD 214

#### **Secondary Cross-listing**

National defense is one of the largest components of the US Federal Budget (~15%) and remains a significant part of the nation's GDP (~3%). The study of defense economics in this course will apply principles of microeconomics and macroeconomics to analyze, within the context of national security strategy and policy, issues concerning resource allocation in wartime and peacetime, labor supply and demand, industrial organization and defense acquisition, and the formation and maintenance of alliances. While the focus of the course will be on economics, to provide context on what makes defense economics a special topic, we will also consider questions unique to the military such as how to deter conflict, how to fight wars, how to provide humanitarian assistance and protection to civilians in conflict or disaster areas, and how the national defense may adapt to issues like climate change. We will also consider historical examples from America's wars--e.g., the Civil War, World War 2, Vietnam, and the more recent conflicts in Iraq and Afghanistan. The plan is to use a variety of sources--academic materials, popular media such as news footage and films, and guest speakers--to provide a full-range of perspective on the course topics.

**Class Format:** Mix of lecture and discussion

**Requirements/Evaluation:** Individual Papers, Group Paper and Presentation, Midterm and Final Exam

### **LEAD 215 (S) Race and Inequality in the American City**

**Cross-listings:** LEAD 215 PSCI 215

#### **Secondary Cross-listing**

In the past half-century, American cities have gotten both much richer and much poorer. The making of "luxury cities" has gone hand-in-hand with persistent, concentrated poverty, extreme racial segregation, mass incarceration, and failing public services-social problems borne primarily by people of color. This course will examine the political underpinnings of inequality in American cities, with particular attention to the racialization of inequality. Among the topics we will cover are: the structures of urban political power; housing and employment discrimination; the War on Crime and the War on Drugs (and their consequence, mass incarceration); education; and gentrification. We will ask: How have city leaders and social movements engaged with urban problems? How have they tried to make cities more decent, just, and sustainable? Under what circumstances has positive leadership produced beneficial outcomes, and in what circumstances has it produced perverse outcomes? We will engage primarily with political science, but also with scholarship in other disciplines, including sociology, history, geography, and legal studies, all of which share an interest in the questions we will be exploring. Students will leave this course with a deeper understanding of contemporary urban problems, a knowledge of the political structures within which those problems are embedded, and a better sense of the challenges and opportunities leaders face in contemporary urban America.

### **LEAD 216 (F) American Constitutionalism I: Structures of Power**

**Cross-listings:** PSCI 216 LEAD 216

#### **Secondary Cross-listing**

How has the American Constitution been debated and understood over time? What is the relationship between constitutional and political change? This course examines the historical development of American constitutional law and politics from the Founding to the present. Our focus is on structures of power -- the limits on congressional lawmaking, growth of presidential authority, establishment of judicial review, conflicts among the three branches of the federal government, and boundaries between the federal and state and local governments. The specific disputes under these rubrics range from secession to impeachment, gun control to child labor, waging war to spurring commerce; the historical periods to be covered include the Marshall and Taney Court years, the Civil War and Reconstruction, the Progressive Era, the New Deal, the Warren Court, and the contemporary conservative ascendancy. Readings are drawn from Supreme Court opinions, presidential addresses, congressional debates and statutes, political party platforms, key tracts of American political thought, and secondary scholarship on constitutional development. Throughout the semester, our goal will be less to remember elaborate doctrinal rules and multi-part constitutional "tests" than to understand the changing nature of, and changing relationship between, constitutional power and constitutional meaning in American history.

**Class Format:** discussion

**Cross-listings:** LEAD 217 PSCI 217

#### **Secondary Cross-listing**

How has the American Constitution been debated and understood over time? What is the relationship between constitutional and political change? This course examines the historical development of American constitutional law and politics from the Founding to the present. Our focus is on rights and liberties -- freedom of speech and religion, property, criminal process, autonomy and privacy, and equality. The specific disputes under these rubrics range from abortion to affirmative action, hate speech to capital punishment, school prayer to same-sex marriage; the historical periods to be covered include the early republic, the ante-bellum era, the Civil War and Reconstruction, World Wars I and II, the Warren Court, and contemporary America. Readings are drawn from Supreme Court opinions, presidential addresses, congressional debates and statutes, political party platforms, key tracts of American political thought, and secondary scholarship on constitutional development. Throughout the semester, our goal will be less to remember elaborate doctrinal rules and multi-part constitutional "tests" than to understand the changing nature of, and changing relationship between, constitutional rights and constitutional meaning in American history.

### **LEAD 218 (S) The American Presidency**

**Cross-listings:** PSCI 218 LEAD 218

#### **Secondary Cross-listing**

Many argue that the presidency has been fundamentally changed by the tenure of Donald Trump. Is this right? To study the presidency is to study

human nature and individual personality, constitution and institution, rules and norms, strategy and contingency. This course will examine the problems and paradoxes that attend the exercise of the most powerful political office in the world's oldest democracy: Can an executive office be constructed with sufficient energy to govern and also be democratically accountable? What are the limits on presidential power? How much do we attribute the shaping of politics to the agency of the individual in the office and to what extent are politics the result of structural, cultural, and institutional factors? Are the politics of the presidency different in foreign and domestic policy? How are national security concerns balanced with the protection of civil rights and liberties? How is the office and purpose of the presidency affected by an economic order predicated on private capital? By the character of the occupant? Exploration of these and other questions will lead us to examine topics such as presidential selection, the bases of presidential power, character and leadership issues, congressional-executive interactions, social movement and interest group relations, and the media. Attention will focus largely on the modern presidency, though older historical examples will also be used to help us gain perspective on these problems.

**Class Format:** The course will feature both seminar discussion and several small group research projects.

**Requirements/Evaluation:** three 5 to 7 page papers, small group projects, and class participation involving weekly writing

**Prerequisites:** none

**LEAD 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WS)**

**Cross-listings:** GEOS 221 ENVI 222 LEAD 221

**Secondary Cross-listing**

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** weekly papers (2 - 5 pages in length) and a final oral presentation

### **LEAD 223 (S) Roman History**

**Cross-listings:** CLAS 223 HIST 223 LEAD 223

#### **Secondary Cross-listing**

The history of ancient Rome can be seen as an account of formative events, practices, and thought in the history of western culture; it also is the history of the most far-reaching experience of diverse cultures, beliefs, and practices known in the Western tradition until modern times. By studying Roman history from Rome's emergence in central Italy in the 7th century BCE through the reign of the emperor Constantine in the early fourth century CE, we will see the complex and fascinating results of an ambitious, self-confident nation's evolution, transformation, and expansion throughout the Mediterranean world. We will consider questions such as, How did a republic with an aversion to autocratic rule and devotion to *libertas* understand its existence as an imperial power as well as its own elite's dominant rule over Romans and non-Romans alike? How and why did the Roman republic and its deeply entrenched republican ideology give way to the effective rule by one man, Augustus, and the increasingly monarchical rule of the emperors who followed? Did Roman political life in the later republic cause the violence that left it in crisis, or did the persistence of violence in Roman life account for the nature of Roman politics? Who were the non-elites of Rome, Italy, and the Roman empire that often get left in the shadows in our ancient sources? Who were the important writers, politicians, poets, philosophers, and innovators whose works constitute a rich cultural heritage worthy of both appreciation and critique? Throughout the course there will be an emphasis on the problems of historical and cultural interpretation, on how the Roman experience is relevant to our own, and, importantly, on the pleasures of historical investigation. Readings for this course will include a variety of original sources, a range of scholarly essays on specific topics, and a textbook that will provide our chronological framework.

**Requirements/Evaluation:** Class preparation and participation, several short response papers, one longer 6- to 8-page paper, a midterm exam, and a final exam. Students who have a B+ average or better at the end of the semester may substitute a 10 to 15-page research paper for the final exam.

**Prerequisites:** None; open to all

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference given to students who are or are considering majoring in Classics or History, or who are concentrating in Leadership Studies. Preference is then given to first-year students and sophomores.

### **LEAD 225 (S) International Security**

**Cross-listings:** PSCI 225 LEAD 225

#### **Secondary Cross-listing**

This is a course about war and peace. It deals with some of the most foundational questions that concern scholars of security studies: What accounts for great power conflict and cooperation? Is intense security competition between major states inevitable, or can they get along, provided their main interests are protected? Does the structure of the international system necessarily cause conflict? Do particularly aggressive states? Can wars occur "by accident"? When and why do states choose to use military force? What role does statecraft play in matters of war and peace? How do nuclear weapons affect great power politics? The course will consider these questions from an interdisciplinary perspective that combines political science concepts with an historical approach to the evidence. The bulk of the course deals with the major events in the history of great power politics, such as the causes and conduct of World War I and World War II; the origins and course of the Cold War; the nuclear revolution; and the post-Cold War period. The course concludes with an examination of a number of major contemporary policy debates in security studies.

**Cross-listings:** PSCI 226 LEAD 226 GBST 226

#### **Secondary Cross-listing**

Comprised of nearly 50 countries and home to over 1 billion people, sub-Saharan Africa is remarkable in its diversity, particularly in regards to a number of outcomes central to the study of political science. It has also been a central site of numerous and profoundly impactful interventions for centuries, from the slave trade and colonialism to proxy wars and structural adjustment programs. This class investigates the many types of intervention--including military, humanitarian, and resource extraction--as well as identifying the diverse actors conducting these interventions, from missionaries to mercenaries, the World Bank to the world's leading states (e.g. United States, China, France). We interrogate how these interventions have shaped a number of key political, economic, and social outcomes for African countries, highlighting both case studies as well as common themes. We will also keep an eye out for lessons learned and the future of international interventions--the politics of foreign investment, humanitarian assistance, and multilateral partnerships.

**Requirements/Evaluation:** Participation, Midterm, Final, 3 Short Response Papers

### **LEAD 227 (S) International Relations of the Middle East**

**Cross-listings:** PSCI 227 LEAD 227

#### **Secondary Cross-listing**

This is a course about the Middle East in international politics. The structure of the course combines political science concepts with a detailed survey of the region's diplomatic history. The basic format of the course will be to combine brief lectures--either posted on the class website beforehand or given at the start of each class--with an in-depth discussion of each class session's topic. The goal of these discussions is to generate debates over

the conceptual, historical, and policy significance of the subjects that we cover. Specifically, the first section of the course will cover the emergence of the Persian Gulf as an area of strategic importance in international politics; U.S. policy toward Saudi Arabia and Iran after World War II; the origins of the Arab-Israeli dispute; the June 1967 and October 1973 Middle East conflicts; Egyptian-Israeli peace; the Iranian Revolution and the Iran-Iraq War; the 1991 Persian Gulf War and its consequences; and the rise of Al Qaeda, Hezbollah, and Hamas. The second part of the course focuses on the Iraq War and its consequences; the rise of ISIS; the Arab Spring; Turkey's changing foreign relations; and the war in Syria. The last section of the course covers contemporary policy challenges confronting the Middle East.

**Requirements/Evaluation:** class participation, two 6- to 8-page papers, final

**Prerequisites:** none

**Enrollment Limit:** 12

### **LEAD 239 (S) Music in the Global Cold War (WS)**

**Cross-listings:** MUS 239 LEAD 239

Secondary Cross-listing

Throughout the Cold War (1947-1991), music was deployed as a weapon, as a source of nationalist and ideological inspiration, as a form of political protest and resistance, and as propaganda. Music both echoed and helped shape political views and, therefore, prompted various forms of regulation and censorship (McCarthyism in the U.S.; the Union of Soviet Composers). To counter Soviet claims of American cultural inferiority and racism, the U.S. sponsored numerous musical diplomacy efforts showcasing both jazz (Armstrong; Ellington; Brubeck) and classical musicians and composers (Bernstein; American orchestras). Cold War politics and the threat of nuclear war influenced musical styles (Copland; Soviet Socialist Realism; the popular American folk music revival; serialism; rock behind the Iron Curtain), specific musical events (Tokyo East West Music Encounter; concerts celebrating the fall of the Berlin Wall), and individual careers (Shostakovich; Robeson; Van Cliburn). To investigate music's political roles and capacity for expressing communist and democratic capitalist ideologies, we will adopt a case study approach. The Cold War was a global political and, frequently, militaristic struggle. Though our focus will be on music in the U.S.S.R. and U.S.A., we will also consider musical developments impacted by the Cold War throughout Western and Eastern Europe, in Latin America, and in East Asia.

**Class Format:** Class discussion will be central to this course.

**Requirements/Evaluation:** 20% = Participation; 20% = Paper #1, 5-6 pages; 25% = Paper #2, 8 pages; 35% = Paper #3, 12 pages, due during exam period

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Students with relevant experience in Political Science, History, or Music studies.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Cross-listings:** ASTR 240 STS 240 LEAD 240

### Secondary Cross-listing

In this course we will study some of the greatest figures in astronomy and consider their leadership in advancing progress in the field. We will consider their lives and works, especially as represented by original copies of their books and other publications. These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; *Dialogo*, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619, Rudolphine Tables 1627); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (*Principia Mathematica*: laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (*Miscellanea curiosa*, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (*Atlas Coelestis*, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); George Ellery Hale (Mt. Wilson Observatory 100" telescope, 1917; Palomar Observatory 200" telescope, 1948), Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe's expansion rate, 2000s). First editions will be available in Williams' Chapin Library of rare books, where we will meet in an adjacent classroom. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the Gutenberg Bible (c. 1453) and a Shakespeare First Folio (1623, with a discussion of astronomical references in Shakespeare's plays). The course will be taught in collaboration between an astronomer and a rare-books librarian, with remote lectures by experts from around the world.

**Class Format:** Meeting on campus in the Chapin Library classroom (Sawyer 452)

**Requirements/Evaluation:** class participation, two 5-page intermediate papers, and a final 15-page paper; student choice of additional readings from a provided reading list

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** if overenrolled, preference by written paragraph of explanation of why student wants to take the course

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

## LEAD 254 (F) Sovereignty, Resistance, and Resilience: Native American Histories to 1865 (DPE)

**Cross-listings:** AMST 254 HIST 254 LEAD 254

### Secondary Cross-listing

This course surveys Native American/Indigenous North American histories from creation through the mid-nineteenth century, tracing the complex ways that tribal nations and communities have shaped North America. Equally important, it reckons with the ongoing effects of these pasts in the twenty-first century, and communities' own forms of interpretation and critique. It also introduces foundational methodologies in Native American and Indigenous Studies (NAIS) and strategies for pursuing decolonizing scholarship and action. Beginning with the diverse Indigenous societies that have inhabited the Americas for millennia before Columbus's arrival, it foregrounds the complexity of Native peoples, nations, and worldviews situated in particular homelands, as well as accounts of beginnings and migrations. It addresses how Native peoples confronted grievous epidemics resulting from the "Columbian Exchange," and contended with Euro-colonial projects of "discovery" and colonization. Indigenous nations' multifaceted efforts to maintain sovereignty and homelands through eras of pervasive violence and removal are addressed, as well as forms of relations and kinship with African-American and Afro-Indigenous people. It concludes with how different Native communities negotiated the tumultuous era of the Civil War and

created pathways for endurance and security in its aftermath. The course centers on Indigenous actors--intellectuals, diplomats, legal strategists, knowledge keepers, spiritual leaders, artists, and many others--and consistently connects historical events with present-day matters of land, historical memory, education, caretaking, and activism. Additionally, it provides an opportunity to engage with original materials in the Williams College Archives/Special Collections and Art Museum. While the scope of the course is continental and transoceanic, it devotes significant attention to the Native Northeast and the Stockbridge-Munsee Mohican homelands in which Williams College is located.

**Requirements/Evaluation:** Attendance at lectures, active participation in class discussion, several short essays based on readings and discussion topics, museum/archives exercise, final essay/project.

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** History majors, followed by first- and second-year students

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **LEAD 258 (F) The Media and American Democracy**

**Cross-listings:** PSCI 258 LEAD 258

#### **Primary Cross-listing**

The course examines the relationship between the press and government, its watchdog function, how social media and the Internet are changing its role, the emergence of independent investigative bodies such as Pro Publica, and the myriad ways in which the press has helped shape American history, for better or worse. The course goes behind the headlines to examine the delicate interplay between government and press, peels back the familiar classics of American journalism, but also incorporates the current conflicts and tensions between the press and government. In the new age, how does the press define or redefine balance, neutrality, the quest for objectivity, and restraint. Who is a journalist, a once relatively easy question, but one now fraught with complexity? There has been a tectonic shift in the fundamental standards and practices of the press in recent years. What are those changes and how does it augur for the future of the press and democratic institutions?

**Requirements/Evaluation:** Several short papers, 10-15 page research paper.

**Prerequisites:** None

**Enrollment Limit:** 14

**Enrollment Preferences:** Preference to Leadership Studies concentrators and Political Science majors.

**Expected Class Size:** 14

## LEAD 262 (S) America and the Cold War

**Cross-listings:** HIST 261 PSCI 262 LEAD 262

### Secondary Cross-listing

This course examines the rise and fall of the Cold War, focusing on four central issues. First, why did America and the Soviet Union become bitter rivals shortly after the defeat of Nazi Germany? Second, was one side primarily responsible for the length and intensity of the Cold War in Europe? Third, how did the Cold War in Europe lead to events in other areas of the world, such as Cuba and Vietnam? Finally, could the Cold War have been ended long before the collapse of the Soviet Union in 1989? Political scientists and historians continue to argue vigorously about the answers to all these questions. We examine both traditional and revisionist explanations of the Cold War, as well as the new findings that have emerged from the partial opening of Soviet and Eastern European archives. The final section of the course examines how scholarly interpretations of the Cold War continue to influence how policymakers approach contemporary issues in American foreign policy.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** one medium length paper, an in-class midterm and final exam, and a series of short assignments

**Prerequisites:** none; PSCI 202 is recommended but not required

**Enrollment Limit:** 19

## LEAD 270 (F) Sport and the Global Color Line (DPE)

**Cross-listings:** LEAD 270 HIST 270 AFR 270

### Secondary Cross-listing

Throughout the twentieth century, African Americans have broken racial barriers, confronted racial stereotypes, and garnered unprecedented success within popular culture, most notably sport. In this course, students will explore the relationship of the black athlete to the color line. We will complicate the historical view of sport as a site of professional advancement and race reform by demonstrating how societal racial practices were reconstructed within athletics. In essence, this course will emphasize the role sport performed in structuring racial exclusion as athletic arenas--like movie theaters, railroads, schools, and other public sites--shaped what Historian Grace Elizabeth Hale has termed the "culture of segregation." Though our primary focus will be on the experiences African Americans encountered, we will also probe the color line beyond its typical black-white binary. Thus, we will examine the achievements and altercations that other ethnic and racial groups realized in their transnational push for equality and inclusion.

**Class Format:** Lecture and discussion.

**Requirements/Evaluation:** Students will be graded on class participation and will have two take-home midterm essay examination (4-6 pages). In addition, students will write two or three response papers (2-3 pages) and a final research paper.

**Prerequisites:** None.

**Enrollment Limit:** 40

**Enrollment Preferences:** Open to all students with completion of course admission survey if overenrolled.

**Expected Class Size:** 25

**Grading:** yes pass/fail option, no fifth course option

### **LEAD 280 (S) Emancipation to BlackLivesMatter**

**Cross-listings:** AFR 280 HIST 280 LEAD 280

#### **Secondary Cross-listing**

This introductory course surveys the cultural, political, and social history of African Americans from Reconstruction to the present. It offers a balance between a "top-down" and "bottom-up" approach and focuses primarily on African Americans' quest for citizenship, equality, justice, and opportunity. In addition to examining major historical developments and popular figures within the modern black past, we will explore the lesser-known histories of everyday people who helped shaped the black freedom struggle. In so doing, we will interrogate conventional narratives of progressive movements since emancipation. Some of the main topics include: the transition from slavery to freedom; the rise of Jim Crow and the politics of racial uplift; the Great Migration and the emergence of the New Negro; the Great Depression and the New Deal; World War II and the struggle for economic and racial inclusion; the postwar period and the intersecting movements of Civil Rights and Black Power; and the impacts of deindustrialization and mass incarceration on the black community. We will end with a discussion of the Obama years and Black Lives Matter.

**Class Format:** Class will be a mix of lecture/seminar

**Requirements/Evaluation:** Students will be graded on class participation and will have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two response papers (2-3 pages) and will complete a mapping project based on The Negro Motorist Green Handbook.

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** Students with demonstrated interest in material. If the course is overenrolled, students will be asked to complete a questionnaire.

**Expected Class Size:** 25

### **LEAD 285 (F) The Revolutionary Generation: Galaxy of Leaders**

**Cross-listings:** PSCI 257 LEAD 285 HIST 354

#### **Primary Cross-listing**

The American Revolution produced a galaxy of brilliant and creative statesmen and intellectuals: Washington, Hamilton, Jefferson, Madison, Adams. In this seminar, we will study their astounding accomplishments--a successful war of independence, a Constitution and Bill of Rights, enduring democratic political institutions, and a nascent party system. But mostly we will focus on their ideas, for they were thinking revolutionaries. We will examine in depth and in detail their superb writings, their letters and speeches as well as Madison and Hamilton's Federalist essays. We will also read recent interpretations of the founding generation by Gordon Wood, Joseph Ellis, Bernard Bailyn, and others.

**Requirements/Evaluation:** three papers, weekly class presentations, and active participation in all discussions

**Prerequisites:** none; courses in Leadership Studies or Political Theory or early American History are very helpful for admission to this seminar

**Enrollment Limit:** 10

**Enrollment Preferences:** students with a background in Leadership Studies, American History or American Political Science

**LEAD 296 (S) Human Rights and National Security: Seeking Balance in the United States**

**Cross-listings:** LEAD 296 HIST 296

**Secondary Cross-listing**

This course will ask if ensuring collective security and preserving individual rights are inherently contradictory or if they may, in fact, be mutually reinforcing. Focusing on developments and issues within the United States since its founding, the class will explore how Americans have sought to reconcile concerns about national security and a broad array of rights in the past, and the implications of this history for contemporary debates. The course will challenge students to consider how debates over national security and rights have reflected broader partisan divides and served diverse political objectives. Moreover, students will explore how these debates reflected competing visions of national identity and purpose, and question how and why the costs of security measures disproportionately burdened people based on race and religious identification. The course will initially survey these issues through a historical lens, demonstrating how questions of security and rights have been present since the nation's founding. It will draw on key moments in U.S. history to explore issues of foreign subversion, dissent, surveillance, habeas corpus, presidential power in times of war, and border security and immigration. Familiarity with historic precedents will ensure that students are prepared to grapple with a closer examination of contemporary studies of refugees and immigration; cybersecurity and surveillance; domestic terrorism and hate crimes; and counter-terrorist detention and interrogation. Students will be assessed on participation, short writing assignments, and a group podcast project.

**Requirements/Evaluation:** Students will be assessed on participation, short writing assignments, and a group podcast project.

**Prerequisites:** None

**LEAD 301 (S) Museums: History and Practice**

**Cross-listings:** LEAD 301 ARTH 501 ARTH 401

**Secondary Cross-listing**

Art museums express the cultural, aesthetic and social ideals of their period of formation and many of those ideals are embedded in the values and practices of institutions today. Comparing institutions past and present internationally, seminar participants will envision the art museum's future while addressing programmatic and organizational challenges at this moment of participatory civic engagement and social, political unrest. With growing skepticism of institutional collecting practices and authoritative narratives, art museums, especially those in the United States, face internal and external pressure to "decolonize" as they attempt to alter their canon. There is pressure, as well, to embrace a more active role in climate and social justice movements. It is a time marked by calls for compensation transparency, participatory decision making, staff and trustee diversity, and greater

scrutiny of funders. The seminar will consider this environment against past and current norms of governance, management and curatorial policies and practices. We will examine the traditional role of architecture and installation in interpretation and experience, prevailing and proposed guidelines in the accessioning and deaccessioning of works of art and both internal and external attitudes towards the repatriation and restitution of cultural property. Studying museums ranging in size and type from the "encyclopedic" to newly established contemporary arts institutions and alternative spaces, seminar participants will hear how museum leaders are dealing with challenges to current practice through weekly zoom sessions. Participants will also ponder how future museums might strive to balance the institution's traditional scholarly and artistic role with new civic and social responsibilities, mindful of financial stability in a market-driven, metric-conscious, not-for-profit environment; doing so while addressing, in proposed program and practice, the demands on museums emanating from a more ethically insistent internal and external world.

**Requirements/Evaluation:** oral presentations and discussion in class and one seminar paper (with class presentation) at the end of the semester

**Prerequisites:** undergraduates should email michael.conforti@williams.edu to schedule a discussion before registering for the course

### **LEAD 311 (F) Congress**

**Cross-listings:** PSCI 311 LEAD 311

#### **Secondary Cross-listing**

Even before the pandemic, scholars, pundits, and the public thought Congress was in a state of crisis. Riven by polarized partisanship and gridlock, the most powerful assembly in the world seemed incapable of representing citizens and addressing problems. This seminar focuses on how Congress organizes itself to act as a collective body. In an organization comprised of equals, how and why do some senators and representatives acquire more power and authority than others? How does Congress act as an institution and not just a platform for 535 individuals? Why does Congress not act, especially when the U.S. confronts so many pressing problems, and how do legislators justify inaction? In what ways does this institution promote or hinder the legitimacy, responsiveness, and responsibility expected of a democratic governing institution?

## LEAD 312 (S) American Political Thought (WS)

**Cross-listings:** PSCI 312 LEAD 312

### Secondary Cross-listing

From democracy to liberty, equality to community, foundational *ideas* -- about what makes for good government, about what constitutes the good society, about what is necessary to lead a good life -- define the American political tradition and consume the American political imagination. Designed not only to uncover these (sometimes melodious, sometimes cacophonous) values but also to place current ideological debates about them in a broader developmental context, this tutorial will offer a topical tour of American political thinking from the birth of nationalism in the colonial period to the remaking of conservatism and liberalism in the early twenty-first century. Utilizing primary source material ranging from presidential speeches to party platforms, newspaper editorials to novels, we will seek to interrogate -- reconciling where possible, distinguishing where necessary, interpreting in all instances -- the disparate visions and assessments of the American political experience offered by politicians, artists, intellectuals, activists, and ordinary citizens over the course of more than two centuries. Our focus, then, is nothing less than the story of America -- as told by those who lived it.

**Requirements/Evaluation:** five 5- to 7-page essays, five 2- to 3-page critiques, and a revised and extended 10- to 12-page final essay

## LEAD 314 (F) How Change Happens in American Politics

**Cross-listings:** PSCI 314 LEAD 314

### Secondary Cross-listing

An unprecedented assault on the U.S. Capitol, the rise of white nationalism, a pandemic, a volatile economy, racial reckoning, and rapidly evolving environmental crises have all rocked American politics in the last year. What might we expect to come next? From the Founding to the present, the American political order has undergone cataclysmic and thoroughgoing transformations, yet it has also proven to be remarkably enduring. How can this be? Where do we find continuities and where upheavals? What accounts for the continuities, and what for the changes? What sorts of transformations have been possible, and who or what has made them possible? Finally, what are the costs of change (and of continuity)--and who pays them? The goal of this course is to assess American political change, or lack of, and to gain a sense of the role that political leaders have played in driving change. We will examine when and how individuals and leadership have mattered vis-à-vis broader historical and contextual factors, including economic developments, demographic change, war, and constitutional and institutional parameters. After examining general models of change and of leadership, we will consider specific case studies, such as civil rights for African-Americans, gender equality, labor advances, social conservatism, and populism. We will consider some of the complicated legacies of change. Finally, we will look at arguments that America has been "exceptional"--or, unlike other countries--as well as critiques of these arguments, to help us gain an understanding of future prospects for political transformation.

**Requirements/Evaluation:** participation in weekly meetings as well as weekly essays or critiques

### **LEAD 315 (S) Parties in American Politics**

**Cross-listings:** PSCI 315 LEAD 315

#### **Secondary Cross-listing**

Is the American party system what's wrong with American politics? It has been said that parties are essential to democracy, and in the U.S., political parties have played a central role in extending democracy, protecting rights, and organizing power. But their worth is a continuing subject of debate. Although parties have been celebrated for linking citizens to their government and providing the unity needed to govern in a political system of separated powers, they have also been disparaged for inflaming divisions among people and grid-locking the government. Other critics take aim at the two-party system with the claim that the major parties fail to offer meaningful choices to citizens. This course will investigate this debate over parties by examining their nature and role in American political life, both past and present. Throughout the course, we will explore such questions as: What constitutes a party? For whom do they function? How and why have they changed over time? Why a two-party system, and what role do third parties play? Is partisanship good or bad for democracy? For governance? What is the relationship between parties and presidents? How does partisanship become tribalism or hyper-partisanship, and can this be prevented? We will explore answers to these questions through seminar discussion, analytic essays, and independent research culminating in the writing of a longer (15 to 20 page) research paper.

**Requirements/Evaluation:** In addition to active seminar participation, students will be responsible for writing two shorter (5-7 page) papers and a longer, research paper (15-20 pages).

**Prerequisites:** PSCI course at the 200 or 300 level or permission of instructor

**Enrollment Limit:** 14

### **LEAD 320 (F) Heroes and Villains: Iconic Leadership and the Politics of Memory (WS)**

**Cross-listings:** PSCI 320 LEAD 320

#### **Primary Cross-listing**

Americans have been arguing intensely in recent years about how we should remember the leaders from our nation's past. Does Thomas Jefferson's statue belong on a university campus? Should college dorms be named for John C. Calhoun and Woodrow Wilson? Should Harriet Tubman's portrait replace Andrew Jackson's on the \$20 bill? In this course we will look at how people in the United States and elsewhere have used their leaders' images to hash out larger political issues of national identity, purpose, and membership. Why has historical commemoration gotten so contentious--or has it always been contentious? What's really at stake when we depict our leaders? How (if at all) should we reconcile contemporary morality with historical context in assessing the leaders from our past? To address these questions, we will study portrayals of some of the most famous leaders in American history--including Alexander Hamilton, Abraham Lincoln, and Martin Luther King, Jr. Our sources will include political speeches, literature, film, and journalism as well as monuments and museum exhibits; though our examples will be drawn mostly from the United States, our conceptual framework will be transnational. As a final assignment, students will write an 18-20 page research paper on a topic of their choice related to the core themes of the course.

**Requirements/Evaluation:** Seminar participation, research proposal, peer workshop, research paper, in-class research presentation

**Prerequisites:** previous course in Leadership Studies, or Political Science, or permission of instructor

**Enrollment Limit:** 14

**Enrollment Preferences:** Leadership Studies concentrators, Political Science majors

**Cross-listings:** LEAD 321 ASST 321 HIST 321 ASIA 321

### Secondary Cross-listing

An unabating tension between conflict and compromise has been an undercurrent of U.S.-Japan relations since the 1850s, at times erupting into clashes reaching the scale of world war and at times allowing for measured collaboration. We will explore the U.S.-Japan relationship from the perspectives of both countries with a focus on how culture, domestic concerns, economic and political aims, international contexts, and race have helped shape its course and nature. This course will fulfill the Difference, Power, and Equity requirement by examining not just the diplomatic relationship between the U.S. and Japan, but also how various types of interactions have influenced the dynamics of power between these two countries and have shaped the ways in which each country has understood and portrayed the other.

**Requirements/Evaluation:** class participation, response papers (500 words), one short paper (5 pages), and a research paper (12-15 pages)

**Prerequisites:** none; open to first-year students with instructors permission

**Enrollment Limit:** 15

**Enrollment Preferences:** History or Asian Studies majors/prospective majors

**Expected Class Size:** 10-15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

LEAD 321 (D2) ASST 321 (D2) HIST 321 (D2) ASIA 321 (D2)

**Difference, Power, and Equity Notes:** The course focuses on differences in power (economic, cultural, political, and military) between Japan and the U.S., from the 1850s through the present. It considers the ways in which Japan has been subordinate to the U.S. for much of this history, and the conflicts that have resulted when Japan has attempted to overturn this dynamic of power. Students will acquire the skills of history and international relations to examine how race, culture, and politics have shaped this relationship.

### LEAD 322 (F) Gandhi: History, Ideas and Legacy (WS)

**Cross-listings:** REL 412 LEAD 412 ASIA 412 ASST 412 GBST 412 HIST 496 LEAD 322

### Secondary Cross-listing

This course studies the life, work, and ideas of M.K. Gandhi (1869-1948), one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. This tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the context and nature of Gandhian nationalism? Did it help to integrate the Indian nation? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

**Requirements/Evaluation:** 5-7-page essays or 2-page critique due each week and a final report (3-4 pages) at the end of the semester.

**Prerequisites:** None, except students who have taken HIST488T will not be permitted to take this class.

**Enrollment Limit:** 10

**Enrollment Preferences:** Senior history majors and students who have previously taken HIST221. Students who have previously taken HIST488T will not be permitted to take this class.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **LEAD 324 (F) Migration Governance: A Global Perspective (DPE)**

**Cross-listings:** GBST 321 PSCI 322 LEAD 324

Secondary Cross-listing

This class is interested in thinking critically and empirically about one of the most polarizing and relevant issues of our time: how countries regulate cross-border mobility. Currently over 281 million international migrants live in a country different from where they were born, about 1 out of every 30 humans in the world and a population that has roughly doubled since 1990. How are international organizations and domestic governments regulating this level of unprecedented global mobility in destination countries as well as countries of origin? Throughout the semester we interrogate three themes central to migration politics (and political science): rights, access, and agency. The course is organized with a focus on legal status: which "categories" of people (i.e. illegal migrants, refugees) have differential access to rights, services, and representation depending on how they are classified where they live (and where they are from). We will critically analyze how those categories are constructed at the international and domestic levels, as well as how those categorizations are also racialized, politicized, and gendered. While we address current debates over migration governance in the United States, we situate US migration policy within the contemporary global context. The course places the US in conversation not only with European countries, but also (and especially) considerations of migration governance in destination countries in Latin America, the Middle East, Asia and Africa. We also attend to the *emigration* governance of diaspora citizens particularly from the Global South. Students will have the opportunity to apply course readings to real-world contexts through guest speakers from global organizations at the frontlines of migration policy (UNHCR, Doctors without Borders), and filmmakers documenting border crossing around the world.

**Requirements/Evaluation:** Participation, 3 Short Response Papers, Research Paper (15 pages)

**Prerequisites:** PSCI 202 or PSCI 204 or permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Political Science majors and Leadership Studies Concentrators

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 321 (D2) PSCI 322 (D2) LEAD 324 (D2)

**Difference, Power, and Equity Notes:** This class attends to the racial and gendered dimensions of global migration governance. We also focus on the diverse, uneven, and often arbitrary ways global migration governance is executed on the ground depending on destination country, where migrants are from, and why they are crossing borders. Finally, this class foregrounds global migration governance from the vantage of the Global South, highlighting migration policies within sub-Saharan Africa, Latin America, Asia, and the Middle East.

### **LEAD 325 (S) The Roosevelt Style of Leadership**

**Cross-listings:** LEAD 325 HIST 358

Primary Cross-listing

In this seminar, we will study the political and moral leadership of Theodore, Franklin and Eleanor Roosevelt. The three Roosevelts transformed and expanded the role of government in American society, bringing about fundamental and lasting change. What were their leadership strategies and

styles? How did TR and FDR differ in their approaches to leadership? Were the ideas behind TR's "Square Deal" and FDR's "New Deal" similar? How did Dr. New Deal become Dr. Win-the-War? How did they balance political deal-making with bold, principled leadership? What kind of leadership role did Eleanor Roosevelt play? In addition to studying biographies and especially the writings and speeches of TR, FDR, and ER, we will do research using the Proquest data base of historical newspapers, to see history as it was being made.

**Requirements/Evaluation:** Participation in class discussions, oral reports, several short papers and one research paper.

**Prerequisites:** Courses in Leadership Studies and American Political Science and American History are very helpful for admission to this seminar

**Enrollment Limit:** 12

**Enrollment Preferences:** Leadership Studies concentrators and students with a background in American history and Political Science

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

### **LEAD 330 (F) Senior Seminar: The Nuclear Revolution**

**Cross-listings:** LEAD 420 PSCI 420 LEAD 330

#### **Secondary Cross-listing**

This is a course about international politics in the nuclear age. In broad terms, it focuses on a very basic question: Does international politics still work essentially the same way as it did in the prenuclear era, or has it undergone a "revolution," in the most fundamental sense of the word? The structure of the course combines political science concepts and historical case studies, with the goal of generating in-depth classroom debates over key conceptual, historical, and policy questions. The basic format of the course will be to combine very brief lectures with detailed class discussions of each session's topic. The course will begin--by focusing on the Manhattan Project--with a brief technical overview of nuclear physics, nuclear technologies, and the design and effects of nuclear weapons. The course will then examine the following subjects: the dropping of the atomic bombs on Japan; theories of the nuclear revolution; the early Cold War period; the development and implications of thermonuclear weapons; the Berlin and Cuban missile crises; nuclear accidents; nuclear terrorism and illicit nuclear networks; the future of nuclear energy; regional nuclear programs; preventive strikes on nuclear facilities; nuclear proliferation; and contemporary policy debates.

**Requirements/Evaluation:** class participation, three 8- to 10-page papers

**Prerequisites:** PSCI 202

### **LEAD 332 (F) New York City Politics from the Blackout to Bloomberg (WS)**

**Cross-listings:** PSCI 310 LEAD 332 PSCI 332

#### **Secondary Cross-listing**

This course examines New York City's political history from the 1970s to the present--a period during which the city underwent staggering economic

and social changes. In the mid-1970s, New York was a poster child of urban crisis, plagued by arson and housing abandonment, crime, the loss of residents and jobs, and failing public services. By the early 21st century, the city had largely met these challenges and was once again one of the most diverse and economically vital places on earth-but also one marked by profound inequality. This course will examine how New Yorkers have contested core issues of capitalism and democracy-how those contests have played out as the city itself has changed and how they have shaped contemporary New York. Broad themes will include the city's role as a showcase for neoliberalism, neoconservatism, technocratic centrism, and progressivism; the politics of race, immigration, and belonging; the relation of city, state, and national governments; and the sources of contemporary forms of inequality. Specific topics will include policing, school reform, and gentrification. As the primary assignment in the course, students will design, research, and write a 20-page paper on a topic of their choice.

**Requirements/Evaluation:** active class participation, 2-page preliminary proposal, 10-page research proposal, 2-page peer feedback, 18- to 20-page research paper

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** Political Science majors and Leadership Studies concentrators

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**LEAD 360 (F) The Political Thought of Frantz Fanon (WS)**

**Cross-listings:** PSCI 370 PHIL 360 AFR 360 LEAD 360

Secondary Cross-listing

Martinican psychiatrist, philosopher, and revolutionary Frantz Fanon was among the leading critical theorists and Africana thinkers of the twentieth century. Fanon ushered in the decolonial turn in critical theory, a move calling on those both within and outside of Europe to challenge the coloniality of the age and to forge a new vision of politics in the postcolonial period. This course is an advanced seminar devoted to a comprehensive examination of Fanon's political thought. We will begin with an analysis of primary texts by Fanon and end by considering how Fanon has been interpreted by his contemporaries as well as activists and critical theorists writing today.

**Requirements/Evaluation:** attendance and participation, weekly online reading response papers, a class presentation, two 7-page essays, and one 20-page final research paper

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Africana Studies concentrators, Leadership Studies concentrators, and Political Science majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

### **LEAD 361 (F) The CIA and American Foreign Policy**

**Cross-listings:** PSCI 361 LEAD 361 HIST 355

#### **Secondary Cross-listing**

Despite an American aversion to espionage captured by Secretary of State Henry Stimson's oft-cited (yet unsubstantiated) remark, "Gentlemen don't read each other's mail," intelligence history in the United States dates back to the Revolutionary War. Still, it took the shock of Pearl Harbor for the United States to establish a permanent peacetime civilian intelligence service independent of another federal department--the Central Intelligence Agency. Since then, the agency and others which comprise the loose entity called the Intelligence Community (IC) have played a pivotal albeit intensely controversial role in US foreign and national security policies. Yet their roles and missions remain largely misunderstood and divisive, as attested to by recent debates surrounding the multiple investigations of the 9/11 tragedy, the flawed pre-war estimates of Iraq's Weapons of Mass Destruction (WMD) capabilities, the reporting on Benghazi, the Snowden revelations, and much more. This course seeks to provide greater understanding of the relationship between intelligence and US foreign and national security policy by examining the CIA's and IC's roles and responsibilities, illuminating their history alongside the history of America and the World, assessing their successes and failures, evaluating their reforms, and correlating their behavior and capabilities with US values and institutions.

**Requirements/Evaluation:** Midterm, several short papers, and a research paper.

### **LEAD 389 (S) The Vietnam Wars (DPE)**

**Cross-listings:** LEAD 389 HIST 389 ASIA 389 ASST 389

#### **Secondary Cross-listing**

This course explores Vietnam's twentieth century wars, including an anti-colonial war against France (1946-1954), a massive Cold War conflict involving the United States (1965-1973), and postcolonial confrontations with China and Cambodia in the late-1970s. Course materials will focus primarily on Vietnam's domestic politics and its relations with other countries. Lectures, readings, films, and discussions will explore the process by which Vietnam's anti-colonial struggle became one of the central conflicts of the Cold War, and examine the ramifications of that fact for all parties involved. The impact of these wars can hardly be overstated, as they affected the trajectory of French decolonization, altered America's domestic politics and foreign policy, invigorated anti-colonial movements across the Third World, and left Vietnam isolated in the international community. Students will read a number of scholarly texts, primary sources, memoirs, and novels to explore everything from high-level international diplomacy to personal experiences of conflict and dramatic social change wrought by decolonization and decades of warfare.

**Requirements/Evaluation:** class participation, several short papers, and a 10- to 12-page final paper

**Prerequisites:** none; open to all

### **LEAD 396 (F) The Pivotal Decade--The 1970s Origins of Contemporary America**

**Cross-listings:** HIST 396 LEAD 396

Secondary Cross-listing

Often overshadowed by the long 1960s and the conservative ascendancy of the 1980s, the 1970s provides an important transitional moment for the United States. It was also a decade fraught with contradictions. On the one hand, Americans experienced widespread disillusionment with the power of the federal government to promote and protect the minority from the majority. Historians seeking to understand the collapse of the welfare state or the origins of white resistance to civil rights' initiatives often point to the 1970s as the time when the federal government shifted the burden of the social welfare system onto the market, state and local governments, and onto poor people themselves. And yet, the 1970s also saw an explosion of progressive social activism, as the women's movement, the gay rights movement, and the environmental movement, among others, all came into their own. Likewise, this was a time when U.S. realignment internationally and military overextension intersected with new hegemonies of human rights regimes, multinational corporations, and "globalization." This course will emphasize a wide array of social movements and activism--both left and right--and the interplay among formal politics, grassroots organizing, and popular culture. It will ask students to consider how and why the 1970s catalyzed many of the domestic and international dynamics and debates that define American politics and society today. Students will be assessed on participation, short response papers, and an individual research project culminating in a poster presentation. In Fall 2022, this course will be offered at both Amherst and Williams College campuses. There will be an end of the semester symposium at Williams College that all enrolled students are required to attend as part of the final project.

**Requirements/Evaluation:** Students will be assessed on participation, short response papers, and an individual research project culminating in a poster presentation

**LEAD 425 (S) Leadership and the Anxieties of Democracy**

**Cross-listings:** PSCI 357 LEAD 425

**Primary Cross-listing**

This capstone course examines the challenges and opportunities facing political leaders in contemporary liberal democracies. We will begin by surveying institutional constraints confronting contemporary political leaders: globalization, sclerotic institutions, polarization, endemic racism, and a changing media environment, among others. Then, we will look at some important factors that shape how followers approach would-be leaders: inequality and economic precarity; identity and group consciousness; notions of membership, community, and hierarchy; and declining local institutions. While the course will focus primarily on the United States, our conceptual framework will be global; though our main interest will be contemporary, we will also examine previous eras in which democratic leadership has come under great pressure. Our primary questions will be these: Why does transformative leadership seem so difficult today? How does political leadership in the 21st century differ from leadership in earlier eras? What conditions are necessary to sustain effective leadership in the contemporary world? As a final assignment, students will craft an 18-20-page research paper on a topic of their choice related to the themes of the course.

**Requirements/Evaluation:** Seminar participation, research proposal, peer workshop, research paper, in-class research presentation

**Prerequisites:** LEAD 125 or permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Open to Leadership Studies concentrators or with the permission of the instructor; preference given to Political Science majors

**Winter Study -----**

**LEAD 12 (W) Principles of Effective Leadership**

This course will examine issues related to effective leadership in a variety of contexts, primarily through the experience of guest lecturers. We will begin by identifying key principles of leadership with reference to several guest leaders in history, moving on to consider contemporary yet timeless topics such as personal responsibility, corruption and fraud in the private sector as well as the essential role good communications skills play in exercising leadership. The majority of class sessions will feature distinguished guest speakers, many of whom are Williams alumni, who have held leadership roles in government, business, philanthropy and healthcare. Probing our guests' approaches to organizational leadership is the primary goal of this Winter Study. After each lecture, we will spend time in the next class sharing impressions, surprises and lessons learned. There will be a 5-page final paper and 5-minute presentation which may take a variety of forms and formats, but which should address the basic themes in our readings as well as what you have learned from our guests, both collectively and more specifically in the case of at least three individuals.

**Requirements/Evaluation:** Short paper and final project or presentation; In-Class Discussions

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** Leadership Studies Department

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** William E. Simon, Jr., '73. Businessman, lawyer and philanthropist. Earlier in his career he was Asst. U.S. Attorney in the Southern District of N.Y. and the 2002 California Republican gubernatorial nominee. He is Trustee Emeritus of the College.

### **LEAD 16 (W) Effective Advocacy and Public Speaking**

Clear and persuasive public speaking, whether before a small group or a much larger audience, is essential to effective leadership and career development. This course is designed to enhance a student's ability to develop a position on a significant issue and to advance and defend that position orally. This course will give students, either singly or in pairs, numerous opportunities to make presentations and receive immediate feedback from the Instructors. The course will consist of three sessions per week lasting approximately 120-150 minutes, with an initial organizational session to select a topic to be presented or debated. Students may choose the method of their presentation, and each student may select their own presentation topic or choose from a list of suggested issues.

**Class Format:** Class sessions will be devoted to developing oral skills (3-5 minutes each), such as telling a story, giving a political speech, making a sales pitch, and explaining an abstract idea or concept. Students will also have the opportunity to engage in mock job interviews with representatives from the fields of education, medicine, law and finance. As a capstone project, the students will present on a topic of their sole selection for 7-9 minutes and answer questions from students and instructors.

**Requirements/Evaluation:** oral presentations of 3-10 minutes throughout the course, but no less than once a week; listen to and critique each other's presentations throughout the course

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** preference to seniors

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** David Olson and Stephen Brown are experienced trial lawyers and Robert Schwed is an experienced business lawyer. They taught this course in January 2022 as LEAD-16.

### **LEAD 17 (W) Mindful Leadership**

Why should anyone be led by you? What are you doing to strengthen your ability to speak truth to power, to embody compassion, and to perform at your best? Mindfulness can shift our baseline level of happiness, help us to navigate upheaval in our lives, and enable us to lead through uncertainty. In this experiential learning course-blending (still and moving) meditation with leadership development-you will heighten your ability to navigate intense emotions, develop strategies for working with your inner critic, explore impermanence (yes, we are all going to die), cultivate lovingkindness, and elevate your ability to perform (we can all do better...especially if we can harness flow). You will also explore storytelling, decision-making, debriefing, embodied dance, the enneagram, pivotal life moments, and polarities. Ready to drop in, breathe, and show up fully? While exploring and integrating, you will co-facilitate an experience for the group that you believe will contribute to our collective learning. You will co-facilitate the debrief of another

student-led exercise-to draw out lessons learned. Near the end of the course, you will also contribute to lead a session for the Williams community. Through readings, podcasts, and videos we will be inspired by thinkers such as: Amy Edmondson, Jim Detert, Zander Grashow, Kelly Lewis, and Christopher Alexander as well as mindfulness practitioners such as: Jack Kornfield, Mark Coleman, Ruth King, and Sharon Salzberg. You'll also venture off-campus with your pod to explore the Clark and MASS MoCA.

**Requirements/Evaluation:** final project or presentation

**Prerequisites:** open to all students; no previous mindfulness, leadership development, nor movement experience required

**Enrollment Limit:** 16

**Enrollment Preferences:** statement of interest (share a bit about yourself and your interest in the course)

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Jamie coaches changemakers to do what brings them alive. He accompanies executive committees and startup teams to explore their way of being (what must you believe to lead differently) and effectiveness (we can all do better). He is an Integral master coach, a certified mindfulness teacher--and he's fortunate to have worked with organizations such as: The Gates Foundation, Google, Greenpeace, Purpose, MIT Solve and the Williams ski teams. ### **LEAD 22 (W) Ski Patrol: Outdoor Emergency Response**

The course will teach and develop the technical proficiency and leadership skills required to effectively and efficiently administer emergency medical care in outdoor environments. Successful completion of written and practical exams, along with demonstrating ski/snowboard proficiency, can lead to certification as a member of the National Ski Patrol. The course is based upon implementing National Ski Patrol's Outdoor Emergency Care and Outdoor Emergency Transport curricula in a hands-on, "on-hill" environment. Students will spend approximately 12 hours per week learning and practicing Ski Patrol medical care and rescue techniques. Specifically, students will develop skills to recognize and provide emergency care for situations they learned about in prior first responder training (Outdoor Emergency Care, Wilderness First Responder, or Emergency Medical Technician): - Wounds and Burns - Environmental Emergencies (e.g., frostbite, hypothermia, heat exhaustion) - Musculoskeletal Trauma (e.g., breaks, strains, sprains, etc.) - Shock, Respiratory Emergencies, Poisoning, Substance abuse emergencies - Medical emergencies (e.g., heart attack, stroke,

seizures, insulin shock, etc.) In the outdoor environment, students will practice the use of various types of splints, spinal motion restriction, bandaging, rescue/transport equipment, methods of extrication, use of oxygen, organization/prioritization of rescue tasks, and how to deal with unusual emergencies such as mass casualty incidents. Emphasis will be placed on the Leadership Skills required to handle complex and stressful emergency situations. Each week there will be ~12 hours of practical outdoor work at Jiminy Peak and on campus. Exact class timing (morning vs. afternoon; 4 vs. 6 hours per meeting; etc.) will be determined based on student and instructor availability. Additional homework/practice may be required. Class attendance is mandatory. The course includes certification in CPR.

**Requirements/Evaluation:** Written and practical exams

**Prerequisites:** Outdoor Emergency Care, Wilderness First Responder, or Emergency Medical Technician

**Enrollment Limit:** 16

**Enrollment Preferences:** The course will be limited to 15 students, chosen on the basis of ski/snowboard interest and ability. Preference given to students who completed the Outdoor Emergency Care PE class in the preceding fall term.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** An alumnus of Williams ('85) with a PhD in Materials Science, Tom Feist worked for General Electric, taught Chemistry at Williams, and has ski patrolled for over 40 years. He is a National Ski Patrol Instructor Trainer and patroller at Sugarbush, VT.

**Materials/Lab Fee:** \$20

### **LEAD 99 (W) Independent Study: Leadership Studies**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

# LINGUISTICS

**Advisor: Associate Professor Lama Nassif**

How is language structured? What are the social forces associated with the development of language? How does the mind process and produce language? What are the best methods for teaching and learning a new language? Linguistics is a vibrant and multifaceted field that bridges the academic and the everyday. From Sociolinguistics to Linguistic Anthropology to Applied Linguistics, each of the various disciplines associated with the general area of Linguistics provides an illuminating perspective on the ways in which language works.

At Williams, students can gain insight into the intricacies of linguistic functions in courses located in several different academic units.

## Linguistics

### **ANTH 162 (S) Languages of East Asia**

**Cross-listings:** CHIN 162 GBST 162 ANTH 162 ASIA 162

#### Secondary Cross-listing

A survey of the Chinese, Japanese, and Korean languages in their linguistic and cultural context. Working with various types of multimedia including audio, video, animation, and texts, we'll take up the phonetics, phonology, morphology, syntax, and lexicon of these three major East Asian languages, including also their history and writing systems as well as how they function in the societies where they are spoken. Though the emphasis of the course is on linguistic description and analysis, there will also be an applied component, as part of which we'll learn several dozen common expressions in each language. Some of the questions to be discussed are: What are the similarities and differences among these three languages? How are and how aren't they related? How did the modern standard form of each develop and what is its relationship to any non-standard languages or dialects? How do these three languages reflect sociolinguistic phenomena such as gender, class, and politeness? How do the writing systems of these languages function and what is the role of Chinese characters in them? What has been the influence of Classical Chinese on Modern Chinese, Japanese, and Korean? How have these languages changed due to influence from English and other languages? How are they used in Asian American speech communities? And what are the prospects for their future development, including the influence of computers and digital communications? While this course is not intended as a comprehensive introduction to linguistics, it does introduce many basic terms and concepts from that discipline.

**Class Format:** combination of lecture, discussion, and language practice

**Requirements/Evaluation:** three quizzes, two 2- to 3-page papers, an oral presentation, and an 8- to 10-page term paper

**Prerequisites:** none (lectures, class discussions, and readings in English; no prior background in linguistics or any Asian language required)

**Enrollment Limit:** 20

**Enrollment Preferences:** open to all with preference to first-year students and sophomores as well as majors/concentrators in CHIN, JAPN, EALC, ANTH, ASIA and GBST

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

SEM Section: 01 MW 8:25 pm - 9:40 pm Cornelius C. Kubler

### **ANTH 262 (S) Language and Power**

"A language is a dialect with an army." This (originally Yiddish) aphorism points to ways in which language, often imagined to be a neutral or apolitical medium of communication, proves in practice to be a social domain fully implicated in the operations of power. How do we create community - and

social exclusion - by the way that we talk? What role does speech play in the accumulation of cultural capital? How are racism and colonialism sustained or subverted by language practices, and how can speech transform the world? This introduction to linguistic anthropology draws together classic works of linguistic and semiotic theory with studies of the politics of actual speech grounded in rich and particular cultural and historical contexts, from witchcraft accusations in rural France to the partition of Hindi and Urdu in colonial South Asia. Students will gain familiarity with key concepts (speech acts, performatives, code-switching, language ideology), themes and debates in the social scientific study of language. Assignments include regular postings of 1-page critical response papers and an ethnographic project analyzing a series of speech events in our local community.

**Requirements/Evaluation:** Regular postings of critical response papers and an ethnographic final project.

**Prerequisites:** None.

**Enrollment Limit:** 20

**Enrollment Preferences:** Students in all fields of study are most welcome. If overenrolled, priority will be given to Anthropology or Sociology majors or final-year students.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** Linguistics

### **ARAB 224 (S) Second Language Learning: The Learner, the Classroom, and the Social World**

Learning a second language is one of the most exhilarating, rewarding, and eye-opening experiences of a life-time. Millions of people around the globe embark on a journey of exploration of target languages and cultures while reflecting on the self and home culture(s) in the process. This course introduces you to core issues related to the learning of a second language. What are the processes involved in learning a second language? What does it mean to know another language? Is second language learning similar to first language learning? Why are some language learners more successful than others? What individual variables do learners bring to the learning process? How can classrooms facilitate second language learning? How do learners perceive teachers' feedback? How does the specific socio-cultural context impact language learning? How does learning about the target culture feed into language learning? How does the learner's identity evolve in the process of second language learning? These are some key second language learning questions that we will examine in this class. Readings are drawn from studies on the learning of different languages.

**Requirements/Evaluation:** Active class participation, assignments, article presentation and leading a class discussion, language learner interview, exam, a final project.

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** If the course is overenrolled preference will be first given to Arabic majors, then seniors, then juniors.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

### **ASIA 131 (F) Introduction to Japanese Linguistics: Past, Present and Future of Japanese Language**

**Cross-listings:** JAPN 131 ASIA 131

Secondary Cross-listing

This course is to understand of how and why the Japanese language has developed to its present form and usage. We will first learn basic concepts and methodologies of linguistics, such as how to formally analyze the patterns of speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meaning (semantics and pragmatics). Then, based on sociolinguistics, linguistic typology, anthropological and cognitive linguistics frameworks, we will investigate variations and usages of the Japanese language. Topics will include polite language and honorifics, gender and women's language, onomatopoeia, linguistic landscape, Japanese dialects, language conflicts, language rights

(Okinawans, Ainu, and Koreans in Japan), and multilingualism. The course format combines lectures, seminars, and student-facilitated discussions. There will be small quizzes, homework assignments, a final research paper, and a poster presentation of the final project. Although there is no prerequisite, intermediate Japanese proficiency or equivalent is beneficial when analyzing primary data.

**Class Format:** combination of lecture and discussion

**Requirements/Evaluation:** quizzes, one or two discussion facilitation, mid-term exam, poster presentation, and an 8- to 10-page final paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** current or prospective majors in the Department of Asian Languages, Literatures, and Cultures

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

### **CHIN 272 (S) The History and Mythology of Chinese Scripts**

**Cross-listings:** STS 272 CHIN 272 COMP 272

**Primary Cross-listing**

Written scripts using what are most often called "Chinese characters" have an attested history of over 3000 years and have been used all over the world to represent a range of different languages. In this course we will examine the history and development of Chinese characters from their earliest extant examples on sacrificial animal bones to their often amusingly misguided use for contemporary tattoos. We will look at historical evidence and mythology, carefully constructed grammatological studies and wild orientalist imaginings. Some topics will include: comparisons between the development of Chinese characters and other written scripts, the relationship between Chinese characters and the languages of China, the use of Chinese characters to write non-Chinese languages, Chinese characters in art and calligraphy, theories of connections between Chinese characters and Chinese philosophy and literature, issues of education and literacy, and the future of Chinese characters in the digital age.

**Class Format:** discussion

**Requirements/Evaluation:** quizzes, short writing assignments, a midterm, and a final exam

**Prerequisites:** none

**Enrollment Limit:** none

**Enrollment Preferences:** none

**COGS 224 (F) Introduction to Formal Linguistics (QFR)**

**Cross-listings:** COGS 224 PHIL 221

**Primary Cross-listing**

The sentence "Every cookie is chocolate chip and three of them are oatmeal raisin" is a perfectly grammatical sentence of English, but it's self-contradictory. What does it take to realize this fact? One must grasp the meanings of the various parts of the sentence. In particular, one must grasp that "three of them" picks out a subset of the group picked out by "every cookie", and that there's no such thing as a cookie that is both chocolate chip *and* oatmeal raisin. There two ways to understand "Many students took every class". According to one, there is a single group of students that had their hands extremely full this semester. According to the other, every class was well-populated, potentially by different groups. The reason for this is that there are two underlying structures that the original sentence can realize. This course serves as an introduction to formal methods in the scientific study of language. Our goal will be to characterize phenomena like those above with logical and mathematical precision. The focus will be on model-theoretic semantics, the sub-field of linguistics that studies meanings. Along the way we will discuss principles of syntax, the sub-field that studies sentence structures, and pragmatics, the sub-field that studies inferences of non-literal content. This is a formal course, but no prior logical or mathematical background will be expected. Starting from scratch, students will learn the building blocks of current-day linguistic research. This introduction will be of use to students interested in language from a variety of perspectives, including philosophy, cognitive science, and computer science.

**Requirements/Evaluation:** Weekly problem sets, plus a final project (paper/presentation/other type, to be discussed with instructor)

**Prerequisites:** No prerequisites

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference given to seniors and philosophy/cognitive science majors.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COGS 224 (D2) PHIL 221 (D2)

**Quantative/Formal Reasoning Notes:** This course teaches the fundamentals of the formal analysis of language. Students will learn to provide translation schemes from English to a logical language (typed lambda calculus).

**COGS 390 (S) Discourse Dynamics (WS)**

**Cross-listings:** COGS 390 PHIL 390

**Primary Cross-listing**

It'd be perfectly natural to say "I might've left the stove on", then check the stove, then say "I didn't leave the stove on". But perform those exact same steps in a different order--check the stove, say "I didn't leave the stove on", then say "I might've left the stove on"--and something's gone quite wrong. Conversation is dynamic--the back and forth exchange of information is a process that grows and adapts to the surrounding context. The order in which you say things matters, and it matters for what you communicate what actions you take and what events happen around you. In this course, we will investigate dynamic communicative phenomena and discuss competing theoretical explanations about how they're interpreted. Of particular interest will be the extent to which discourse dynamics are built into the meanings of linguistic expressions vs. the extent to which they're

consequences of our rational cognition. Is a sentence's relation to previously uttered sentences similar to its relation to extra-linguistic events? How much inference goes into interpreting what's said? In pursuing the answers to these questions, we will discuss both classic and contemporary theories from philosophy and linguistics.

**Requirements/Evaluation:** Four short papers (3-4 pages), take-home midterm paper (5-7) pages, take-home final paper (6-8 pages)

**Prerequisites:** At least one philosophy or cognitive science course (any level), or permission of instructor.

**Enrollment Limit:** 19

**Enrollment Preferences:** Preference given to seniors and philosophy/cognitive science majors, then to students who have taken 200-Level Intro to Formal Linguistics

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COGS 390 (D2) PHIL 390 (D2)

**Writing Skills Notes:** There will be four short papers (3-4 pages each) that will receive written comments on substance, argument structure, and writing style. These will be designed to include sections that, upon revision in light of comments, can be incorporated into the longer midterm and final papers (5-7 pages and 6-8 pages respectively). Students will be required to meet with the instructor before the midterm and final papers to discuss outlines and revisions of short papers.

**PHIL 118 (F)(S) Meaning, Communication and Society (DPE) (WS)**

The primary way we interact with others is through the use of language. We use language to communicate meanings in order to accomplish a variety of goals: to convey information, make requests, establish rules, utilize power, issue protests, and much more. We coordinate our lives through sounds from mouths, signs from hands, and squiggles on paper because somehow sounds, signs, and squiggles have *meanings*. This course is an investigation into how language is used to express meaning, and how such expression can have real interpersonal and societal impact. Using resources from philosophy and linguistics, we will study various ways in which literal and non-literal uses of language influence our social lives. Of particular interest will be how language can be used to establish, reinforce, and resist power relationships involving race and gender.

**Requirements/Evaluation:** Weekly short papers (500-1000 words), take-home midterm paper (5-6 pages), take-home final paper (7-8) pages, with comments on writing given on short papers and midterm

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Preference given to first year students and philosophy majors.

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** There will be short writing assignments that will receive comments on content, writing style, and argument structure every week except when midterm/final papers are due. The midterm/final papers will incorporate revisions from previous short papers.

**Difference, Power, and Equity Notes:** This course has a focus on the role of language in relationships involving power, oppression, and group inclusion between individuals belonging to various socio-political identities.

**Attributes:** Linguistics

**PHIL 203 (F) Logic and Language (QFR)**

Logic is the study of reasoning and argument. More particularly, it concerns itself with the difference between good and bad reasoning, between strong and weak arguments. We all examine the virtues and vices of good arguments in both informal and formal systems. The goals of this course are to improve the critical thinking of the students, to introduce them to sentential and predicate logic, to familiarize them with enough formal logic to enable them to read some of the great works of philosophy, which use formal logic (such as Wittgenstein's *Tractatus*), and to examine some of the connections between logic and philosophy.

**Class Format:** discussion

**Requirements/Evaluation:** a midterm, a final, frequent homework and problem sets

**Prerequisites:** none

**Enrollment Limit:** 40/sect

**Enrollment Preferences:** Philosophy majors, seniors, juniors, sophomores, first-years in that order.

**Expected Class Size:** 40/sect

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

**Quantative/Formal Reasoning Notes:** The main part of the course is learning two formal languages of logic: sentential logic predicate logic

### **PHIL 222 (F)(S) Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science**

**Cross-listings:** PSYC 222 PHIL 222 COGS 222

#### Secondary Cross-listing

This course will emphasize interdisciplinary approaches to the study of intelligent systems, both natural and artificial. Cognitive science synthesizes research from cognitive psychology, computer science, linguistics, neuroscience, and contemporary philosophy. Special attention will be given to the philosophical foundations of cognitive science, representation and computation in symbolic and connectionist architectures, concept acquisition, problem solving, perception, language, semantics, reasoning, and artificial intelligence.

**Requirements/Evaluation:** midterm and final exams, and weekly exercises

**Prerequisites:** PSYC 101 or any PHIL course or CSCI 134 or permission of instructor; background in more than one of these is recommended.

**Enrollment Limit:** 20

**Enrollment Preferences:** sophomore and first-year students, with additional preference given to students who satisfy more of the prerequisites. There is no need to contact the instructor to indicate special interest in the course.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **PHIL 310 (F) Wittgenstein's Later Philosophy (WS)**

Ludwig Wittgenstein (1889-1951) is probably the greatest philosopher of the 20th century. His later work, best known through posthumously published *Philosophical Investigations*, continues to influence contemporary thinking about language, mind, action, knowledge, ethics, religion, aesthetics, culture, and of course, philosophy itself. Understanding later Wittgenstein is thus vital for engaging in contemporary philosophy, but neither the interpretation nor the evaluation of his thought is straightforward or easy. Later Wittgenstein is a controversial, polarizing figure; but serious reading of his work is invariably intellectually enriching and fertile. This tutorial aims to provide students with the skills necessary for careful, serious and thorough reading of Wittgenstein's later philosophy. In the first part of the course, we will read Wittgenstein's *Philosophical Investigations*, one of the greatest books ever written. In the second part of the course, we will read *On Certainty*, and selections from other of Wittgenstein's posthumously published works: *Zettel*, *Philosophical Grammar*, *Remarks on the Philosophy of Psychology, Culture and Value*, *Lectures and Conversations on Aesthetics, Psychology and Religious Belief*, and *The Big Typescript*. Throughout the course, we will consult and discuss the important secondary literature on Wittgenstein, and analyze different philosophical presuppositions and goals that motivate particular readings. The central topics of the course will be: meaning, rule following, human languages; private experiences and other minds; intention and action; knowledge and skepticism; and especially, the methods and nature of philosophy.

**Requirements/Evaluation:** tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner

**Prerequisites:** two Philosophy courses

**Enrollment Limit:** 10

**Enrollment Preferences:** preference will be given to students who already took a course on Wittgenstein, for example, PHIL 309

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will write two short (about 800 words) seminar papers; five 5-7 pages long papers; five 2-3 pages long comments on their tutorial partner's papers; and a final paper (also 5-7 pages long) which will be a revision of one of the previously written papers. Students will get regular feedback from their tutorial partner and from the instructor on the substance of their work as well as on their oral and writing skills, with suggestions for improvement.

**Attributes:** Linguistics PHIL History Courses

Not offered current academic year

### **PHIL 390 (S) Discourse Dynamics (WS)**

**Cross-listings:** COGS 390 PHIL 390

Secondary Cross-listing

It'd be perfectly natural to say "I might've left the stove on", then check the stove, then say "I didn't leave the stove on". But perform those exact same steps in a different order--check the stove, say "I didn't leave the stove on", then say "I might've left the stove on"--and something's gone quite wrong. Conversation is dynamic--the back and forth exchange of information is a process that grows and adapts to the surrounding context. The order in which you say things matters, and it matters for what you communicate what actions you take and what events happen around you. In this course, we will investigate dynamic communicative phenomena and discuss competing theoretical explanations about how they're interpreted. Of particular interest will be the extent to which discourse dynamics are built into the meanings of linguistic expressions vs. the extent to which they're consequences of our rational cognition. Is a sentence's relation to previously uttered sentences similar to its relation to extra-linguistic events? How much inference goes into interpreting what's said? In pursuing the answers to these questions, we will discuss both classic and contemporary theories from philosophy and linguistics.

**Requirements/Evaluation:** Four short papers (3-4 pages), take-home midterm paper (5-7) pages, take-home final paper (6-8 pages)

**Prerequisites:** At least one philosophy or cognitive science course (any level), or permission of instructor.

**Enrollment Limit:** 19

**Enrollment Preferences:** Preference given to seniors and philosophy/cognitive science majors, then to students who have taken 200-Level Intro to Formal Linguistics

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COGS 390 (D2) PHIL 390 (D2)

**Writing Skills Notes:** There will be four short papers (3-4 pages each) that will receive written comments on substance, argument structure, and writing style. These will be designed to include sections that, upon revision in light of comments, can be incorporated into the longer midterm and final papers (5-7 pages and 6-8 pages respectively). Students will be required to meet with the instructor before the midterm and final papers to discuss outlines and revisions of short papers.

**STS 272 (S) The History and Mythology of Chinese Scripts**

**Cross-listings:** STS 272 CHIN 272 COMP 272

**Secondary Cross-listing**

Written scripts using what are most often called "Chinese characters" have an attested history of over 3000 years and have been used all over the world to represent a range of different languages. In this course we will examine the history and development of Chinese characters from their earliest extant examples on sacrificial animal bones to their often amusingly misguided use for contemporary tattoos. We will look at historical evidence and mythology, carefully constructed grammatological studies and wild orientalist imaginings. Some topics will include: comparisons between the development of Chinese characters and other written scripts, the relationship between Chinese characters and the languages of China, the use of Chinese characters to write non-Chinese languages, Chinese characters in art and calligraphy, theories of connections between Chinese characters and Chinese philosophy and literature, issues of education and literacy, and the future of Chinese characters in the digital age.

**Class Format:** discussion

**Requirements/Evaluation:** quizzes, short writing assignments, a midterm, and a final exam

**Prerequisites:** none

**Enrollment Limit:** none

**Enrollment Preferences:** none

Antonia Foias, Professor of Anthropology and Sociology

Jennifer L. French, Professor of Spanish

Sarah S. Gardner, Lecturer in Environmental Studies

Matthew Gibson, Assistant Professor of Economics

Lisa Gilbert, Associate Professor of Geosciences and Marine Sciences

Casey Gregory, Assistant Professor of Economics

Catherine Hall, Lecturer, Williams-Mystic Maritime Studies Program

Jacqueline Hidalgo, Associate Professor of Latina/O Studies and Religion

Nicolas Howe, Associate Professor of Environmental Studies

Sarah Jacobson, Associate Professor of Economics

Amy Johns, Director of The Zilkha Center for Environmental initiatives

Andrew Jones, Manager, Hopkins Memorial Forest

Paul Karabinos, Professor of Geosciences

Pia Kohler, Assistant Professor of Environmental Studies

Elizabeth Kolbert, Class of 1946 Visiting Distinguished Professor of Environmental Studies

Joel Lee, Assistant Professor of Anthropology

Scott Lewis, Assistant Professor of Physical Education and Director of Outing Club

Dr. Alicia Maggard, Post-Doc, Williams-Mystic Maritime Studies Program

James Manigault-Bryant, Associate Professor of Africana Studies

Luana Maroja, Associate Professor of Biology

Laura Martin, Assistant Professor of Environmental Studies

Karen R. Merrill, Professor of History

Manuel Morales, Professor of Biology and Director of Research Hopkins Forest

James Nolan, Professor of Sociology

Julie Pedroni, Lecturer in Philosophy

Timothy Pusack, Assistant Professor of Marine Ecology, Williams-Mystic Maritime Studies Program

Jay Racela, , Lecturer, CES and Morley Sciences Laboratories

David P. Richardson, Professor of Chemistry

Merida Rúa, Associate Professor of Latina/O Studies and American Studies

Kenneth Savitsky, Professor of Psychology

David C. Smith, Senior Lecturer in Biology

David L. Smith, Professor of English

John W. Thoman, Jr., Professor of Chemistry

Chad M. Topaz, Professor of Mathematics

Claire Ting, Professor of Biology

Tom Van Winkle, Executive Director of The Williams-Mystic Maritime Studies Program

## **ENVIRONMENTAL STUDIES**

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise.

The concentration in Maritime Studies is designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
- Understand ecological principles and the nature of living systems;

- Apply scientific methods to collect environmental data and evaluate environmental quality;
- Understand the political and economic factors that inform, enable, and constrain environmental policy;
- Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
- Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
- Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES was one of the first environmental studies programs at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, and generous support for summer research and internships. The Class of 1966 Center, a Living Building and the Program's home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. The CES manages the Hopkins Memorial Forest, a 2600-acre natural area northwest of campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center. The Maritime Studies concentration builds on the course offerings of the Williams-Mystic Maritime Studies Program at Mystic Seaport.

### **ADVISING**

Concentrators (or first-years and sophomores interested in the concentration offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES or Maritime Studies for advice. All incoming concentrators will choose a faculty advisor in the spring of their sophomore year.

**Advisors for 2019-20:** Henry Art, Sarah Gardner, Pia Kohler, Laura Martin, Mea Cook, James Manigault-Bryant.

### **CONCENTRATION IN MARITIME STUDIES**

The Maritime Studies concentration provides students with an opportunity to explore how humans interact with the environment, including the maritime environment. Understanding the oceans and our interactions with them is of increasing importance in this era of climate change, sea-level rise, fisheries crises, and the internationalization of the high seas. We encourage students to investigate our WaterWorld from the perspectives of the humanities, social sciences, and physical sciences. Maritime Studies is an interdisciplinary, cross-divisional program that includes the literature, history, policy issues, and science of the ocean. Candidates for the concentration in Maritime Studies must complete a minimum of seven courses: the interdisciplinary introductory course (GEOS 104 Oceanography), four intermediate core courses (at Williams-Mystic), an elective, and the senior seminar.

Students who have completed other study-away programs that emphasize maritime studies should consult with the CES chair about the possibility of completing the Maritime Studies concentration.

### **Required Courses (7 courses)**

#### **Introductory Course**

MAST/ENVI/GEOS 104 Oceanography

Students who take MAST 211/GEOS 210 Oceanographic Processes at Williams-Mystic can substitute an extra elective in lieu of GEOS 104.

#### **Capstone Course**

ENVI/MAST 412 Senior Seminar: Perspectives on Environmental Studies

#### **Core Courses (taken as part of Williams-Mystic program at Mystic Seaport):**

MAST/ENGL 231 Literature of the Sea

MAST 311/BIOL 231 Marine Ecology OR MAST 211/GEOS 210 Oceanographic Processes

MAST/ENVI 351/ PSCI 319 Marine Policy

MAST/HIST 352 America and the Sea, 1600-Present

#### **Elective Courses**

Elective courses are listed based on either a clear maritime statement in the course description or broad practical/theoretical applicability to maritime studies. Concentrators will take a minimum of one course from the list below. If concentrators find other courses in the catalog that they believe meet the requirements for a MAST elective, they may bring them to the attention of the Chair or Associate Director.

## **INDEPENDENT STUDY AND WINTER STUDY**

In addition to courses fulfilling the Maritime Studies concentration requirements, the following courses are offered:

MAST 397, 398 Independent Study: Maritime Studies

MAST 493-W31-494 Senior Thesis: Maritime Studies

Winter study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year's Winter Study offerings.

## **HONORS IN MARITIME STUDIES**

Candidates for honors in Maritime Studies will complete a thesis in their senior year. The project will involve original research (archive, museum, field, or laboratory) followed by on-campus analysis and write-up of results. The thesis may either be a one-semester plus winter study project, or a full year (two semesters plus winter study). In either case, data collection during the summer before the senior year may be necessary. In some cases, the thesis project may be a continuation and expansion of the student's Williams-Mystic research project. Honors will be awarded if the thesis shows a high degree of scholarship, originality, and intellectual insight.

## **MAST 104 (F) Oceanography**

**Cross-listings:** MAST 104 GEOS 104 ENVI 104

### **Secondary Cross-listing**

The oceans cover three quarters of Earth's surface, yet oceanography as a modern science is relatively young: the first systematic explorations of the geology, biology, physics and chemistry of the oceans began in the late 19th century. This introduction to ocean science includes the creation and destruction of ocean basins with plate tectonics; the source and transport of seafloor sediments and the archive of Earth history they contain; currents, tides, and waves; photosynthesis and the transfer of energy and matter in ocean food webs; the composition and origin of seawater, and how its chemistry traces biological, physical and geological processes; oceans and climate change; and human impacts.

**Class Format:** three 50-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast of New England.

**Requirements/Evaluation:** lab activities (25%), homework (25%), quizzes (5%), three exams (45%)

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first year and second year students, Geosciences majors, Maritime Studies concentrators

**Expected Class Size:** 48

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

## **MAST 211 (F)(S) Oceanographic Processes**

**Cross-listings:** GEOS 210 MAST 211

### **Primary Cross-listing**

Part of the Williams-Mystic Coastal and Ocean Studies Program, this course provides an introduction to physical, geological, chemical, and biological oceanography. Using local field sites as well as places visited on field seminars, we will investigate why the Earth has oceans, why they are salty, how they move and flow, reasons for sea level change on both long and short timescales, and how our oceans interact with the atmosphere to control global climate. We will emphasise societal interactions with the ocean, and will consider coastal processes including land loss. We will apply an environmental justice and anti-racist lens to our discussions. Field work will take place on shores in southern New England, as well as during field seminars on the Atlantic ocean, the West Coast and the Mississippi River Delta. This course is in the Oceans and Climate group for the Geosciences major.

**Class Format:** Flipped classroom will focus on active learning using data-based exercises. Mini-symposia will involve student research and discussion.

**Requirements/Evaluation:** graded lab exercises, mini-symposium participation, and a research project

**Prerequisites:** none

**Enrollment Limit:** 24

**Enrollment Preferences:** none

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** This course is taught at our Mystic Seaport campus. Students must be enrolled in the Williams-Mystic Coastal and Ocean Studies

Program.

**Distributions:** (D3)

**MAST 226 (S) The Oceans and Climate (WS)**

**Cross-listings:** GEOS 226 ENVI 226 ENVI 252 MAST 226

**Secondary Cross-listing**

The oceans are a fundamental part of Earth's climate system. Ocean currents redistribute heat and water vapor around the globe, controlling temperature and precipitation patterns. Marine phytoplankton blooms and air-sea gas exchange modulate the atmospheric carbon dioxide concentration. The dynamic interaction of the atmosphere and the sea surface results in multi-year climate variations such as the El Niño-Southern Oscillation. This course will examine gradual and abrupt climate shifts from Earth's history and the ocean's role in driving, amplifying or dampening the changes, the ocean's response to anthropogenic greenhouse gas emissions, and the projected impacts of continued emissions and climate change on the ocean in the coming decades and millennia. We will analyze articles from the scientific literature that lay out the theory on the ocean's influence on climate, reconstruct past climate and ocean changes, test the mechanisms responsible for those changes, and with that knowledge, project the consequences of continued anthropogenic greenhouse gas emissions. Topics may include the climate effects of opening and closing seaways with plate tectonics, ocean feedbacks that amplify the intensity of ice ages, the instability of ocean circulation during ice-sheet retreat, the evolution of the El Niño-Southern Oscillation with changing carbon dioxide through the geologic past and the next century, ocean heat and carbon dioxide uptake during the last century and into the future, and the impact on sea level, seafloor methane reservoirs, ocean acidification, oxygenation and marine ecosystems. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** evaluation will be based on the critical analysis of reading from the scientific literature through discussion, writing and revision

**Prerequisites:** at least one GEOS course

**Enrollment Limit:** 10

**Enrollment Preferences:** students with a strong interest in Geosciences and Geosciences majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**Writing Skills Notes:** each student will write five 5-page position papers and five 1-page response papers; students will give and receive feedback through peer review and tutorial meeting discussions and will develop their writing and critical analysis skills through revision

**Attributes:** ENVI Natural World Electives GEOS Group A Electives - Climate + Oceans MAST Interdepartmental Electives

**Not offered current academic year**

**MAST 231 (F)(S) Literature of the Sea (DPE)**

**Cross-listings:** MAST 231 ENGL 231

**Primary Cross-listing**

The ocean, and human relationships with it, have been central features of literatures and cultures around the world for more than a thousand years. But since literary study is typically based around authors' homelands, careful examination of the oceanic experience is often pushed to the periphery--an "empty space" to be crossed between nations, a "vast darkness" antithetical to human life, or a mirror for land-borne concerns. Increasingly, however, scholars and readers are centering the sea and stories about it as a means stepping outside human frameworks of space and time, situating the complex emotions and narratives inspired by the ocean into a complex network of geologic history and teeming other-than-human life. This course examines a wide range of texts and perspectives on the ocean and human relationships with it. Doing so will help us consider how literature both plays into and subverts dominant viewpoints of the ocean. Through texts that consider 19th-century whaling, the Middle Passage, the postcolonial Caribbean, and islands throughout the Pacific Ocean, we will explore a range of questions, including: What can we learn from examining efforts to write about the ocean? How do ocean stories help individuals understand themselves, their communities, and their place in global environments? What can the range of cultural and literary perspectives on our "single, global ocean" reveal about the ways different people are both connected with and profoundly distant from each other? Most importantly, we will practice, as a classroom community, different strategies for carefully reading texts while connecting them to cultural traditions, surrounding environments, and personal experiences.

**Class Format:** weekly roundtable discussions, including coastal and near-shore field trips and multiple field seminars.

**Requirements/Evaluation:** regular papers, class participation, journal-writing, and a final assignment

**Prerequisites:** N/A

**Enrollment Limit:** 25

**Enrollment Preferences:** Williams-Mystic Students only

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** offered only at Mystic Seaport

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MAST 231 (D1) ENGL 231 (D1)

**Difference, Power, and Equity Notes:** This course focuses on the range of cultural perspectives about the sea, as well as the ways those perspectives can unsettle and challenge dominant narratives about the sea and its role in colonial expansion. Furthermore, this course centers voices that are typically overlooked in the genre of "Sea Literature," paying particular attention to Indigenous and African-American narratives about the ocean.

### **MAST 263 (S) The Global Ocean: An Interdisciplinary Introduction**

**Cross-listings:** MAST 263 ENVI 263

#### **Primary Cross-listing**

Though it covers most of the planet, the ocean's importance to everyday life is easy to overlook. Its roles as a cultural symbol, resource, highway, and climate regulator make it essential to life around the world. This interdisciplinary course, team-taught by the faculty of the Williams-Mystic Program, will examine key issues in each of the world's oceans while introducing students to the ways these issues connect multiple disciplines and transcend physical, political, and imaginary ocean boundaries. By drawing on the expertise of the five professors -- from humanities, social sciences, and sciences -- this course facilitates the critical study of the ocean from an interdisciplinary perspective and helps them consider their own role in the shifting relationship between humanity and the ocean. This seminar-style course will meet twice a week online, with students assessed by their participation, response papers, and final project, while helping them apply interdisciplinary skills to pressing sustainability issues connecting the environment and society.

**Requirements/Evaluation:** Five 2-page papers, participation, and a 6-8 page final paper

**Prerequisites:** none, open to all students

**Enrollment Limit:** 20

**Enrollment Preferences:** 1. first years, 2. sophomores, 3. MAST concentrators

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

### **MAST 265 (F) Coral Reefs: Ecology, Threats, & Conservation**

**Cross-listings:** ENVI 265 BIOL 165 MAST 265

#### **Primary Cross-listing**

Coral reefs are a fascinating ecosystem found throughout the world's tropical oceans. Corals can thrive in nutrient-poor oceans because of the mutualistic relationship with algal symbionts. And as a foundational species, corals provide a habitat for numerous species, possibly the highest diversity found on the planet. However, these complex and beautiful ecosystems are declining worldwide from a variety of local and global threats. In this course, we will explore coral reef ecology through an in-depth examination of the biotic and abiotic factors contributing to the ecosystem's functioning. We will also investigate the causes and consequences of threats to coral reefs, such as ocean warming, ocean acidification, and resource extraction. Finally, we will identify the many efforts worldwide to conserve coral reefs and promote their resilience. In this seminar course, you will demonstrate your proficiency through knowledge assessments, short writing reflections, a virtual coral fragmentation experiment, and a creative advocacy project. This course aims to deepen your awareness of the complex species interactions on coral reefs and the physical factors affecting coral survival while fostering hope through current conservation efforts.

**Requirements/Evaluation:** Four 1-paragraph discussion board post, One 20-question knowledge assessment (quiz), Three 2-page writing reflections, One lab results and discussion write-up 2-3 pages figures included, and a creative (medium is student choice) advocacy project.

**Prerequisites:** none, open to all students

**Enrollment Limit:** 20

**Enrollment Preferences:** 1. First-Year, 2. Sophomores

**Expected Class Size:** 16

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** Does not count for Biology major credit.

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 265 (D3) BIOL 165 (D3) MAST 265 (D2)

**Attributes:** ENVI Natural World Electives

Not offered current academic year

### **MAST 266 (S) Reading Water (WS)**

**Cross-listings:** ENVI 266 MAST 266

#### **Primary Cross-listing**

Water has such profound and far-reaching influence on individuals, societies, and the planet that it simultaneously risks going overlooked and appearing clichéd. Human beings are made of it and need it to live, yet will die if immersed in it. It is venerated by cultures around the world, yet most people either cannot access clean water, or don't know where their clean water is piped in from. It covers the earth's surface, and has shaped it over eons, yet scientists are still not sure how it came to be here in the first place. This wide-ranging influence also presents challenges for traditional academic structures; thinking about water demands crossing times, spaces, and disciplines. This course will explore the wide-ranging and diverse ways water impacts individuals, cultures, and the environments they call home by drawing on a range of content: hydrology, literature, political theory, storytelling, geography, and more. To do this, we will also develop and examine methods of critically reading as "non-experts"--reading scientific articles as rhetorical objects and reading for scientific principles in literature, for instance--to explore what interdisciplinary thinking opens up (and inhibits), and thus how to effectively engage with and create interdisciplinary work. The goal here is not to define water's cultural or scientific

importance, or to determine which disciplines "best" combine to explain water, or to come up with humanities-based solutions to "the water crisis." Rather, these texts, and the water that flows through them will help us explore the opportunities and limits of human perceptions of the other-than-human world. It will help us consider the extent to which those perceptions both shape, and are shaped by, a seemingly simple molecule. And it will help us imagine epistemologies and ontologies that account for the ways water simultaneously flows through us, around us, and through the deep geological history of the planet. Course Texts: Tristan Gooley -- *How to Read Water* (selections) Vandana Shiva -- *Water Wars* (selections) Luna Leopold -- *Water, Rivers, and Creeks* (selections) Richard White -- *The Organic Machine* Linda Hogan -- *Solar Storms* Marc Reisner -- *Cadillac Desert* Jesmyn Ward -- *Salvage the Bones* John McPhee -- "Atchafalaya" Emmi Itäranta -- *Memory of Water* Brenda Hillman -- "The Hydrology of California"

**Class Format:** The class will be primarily discussion-based, and will ask students to lead and structure discussions. Students will have questions, reflections, and insights prepared before class, and use those to drive our in-class activities.

**Requirements/Evaluation:** 100pg of reading a week, give or take. Approx 20-25 pages of written work throughout the semester.

**Prerequisites:** None

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference to majors, and then to sophomores and juniors, respectively.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 266 (D1) MAST 266 (D1)

**Writing Skills Notes:** Students will write four papers of increasing complexity that will require workshopping and drafts. Each of these papers will receive forward-looking writing feedback from me. The first paper centers on paragraph-level stylistic choices, the second on argument/evidence connections, the third on genre, and the final paper synthesizes these writing skills. In addition, students' final grades will allow for revision of earlier papers to encourage and assess growth of writing skills.

Not offered current academic year

### **MAST 268 (S) Debating Ocean Biodiversity at the Intersection of Science and Policy**

**Cross-listings:** ENVI 268 MAST 268

#### **Primary Cross-listing**

Biodiversity in the ocean is facing an onslaught of challenges, both directly and indirectly. It is likely that we are undergoing a sixth mass extinction event, where diversity of life on earth is stunningly at risk. Fortunately, however, we are also finding innovative ways to solve issues and attempt to stave off these dramatic changes to our ecosystems. These solutions potentially have both positive and negative effects. Difficult tradeoffs must be weighed and decisions must be made as people wrestle with known knowns, known unknowns, and unknown unknowns. In this class, we will explore five issues that relate to biodiversity in the ocean. You will have the opportunity to investigate one side of an issue, to collect supporting information, and to advocate for your position all while learning about current biodiversity issues in the ocean. You will be challenged to weigh conflicting evidence to find a positive outcome. Throughout the class you will practice critical thinking, evaluation, and synthesizing skills as you work with multiple viewpoints. Class time will include lecture, in-class group work, and student-led debates of timely, controversial issues. You will be assessed on summaries of information, reflections on topics, and a final project on an issue of your choice relating to ocean biodiversity.

**Requirements/Evaluation:** Five 2-page papers, participation, and a 6-8 page final paper

**Prerequisites:** none, open to all students

**Enrollment Limit:** 20

**Enrollment Preferences:** 1. first years, 2. sophomores, 3. MAST concentrators

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

### **MAST 311 (F)(S) Marine Ecology**

**Cross-listings:** BIOL 231 MAST 311

#### **Primary Cross-listing**

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.

**Class Format:** including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

**Requirements/Evaluation:** two tests, a research project, and a presentation

**Prerequisites:** BIOL 101 or GEOS/MAST 104, or permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** none

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** This course is only offered through the Williams-Mystic Maritime Studies Program located in Mystic, CT. satisfies the distribution requirement for the Biology major.

**Distributions:** (D3)

### **MAST 351 (F)(S) Marine Policy (DPE) (WS)**

**Cross-listings:** MAST 351 ENVI 351 PSCI 319

#### **Primary Cross-listing**

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

**Class Format:** This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

**Requirements/Evaluation:** Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research

Project: issues paper and draft research paper; Final Research Project: multiple formats available

**Prerequisites:** none

**Enrollment Limit:** 23

**Enrollment Preferences:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Expected Class Size:** 22

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MAST 351 (D2) ENVI 351 (D2) PSCI 319 (D2)

**Writing Skills Notes:** Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

**Difference, Power, and Equity Notes:** Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

**MAST 352 (F)(S) American Maritime History** (DPE) (WS)

**Cross-listings:** HIST 352 MAST 352

**Primary Cross-listing**

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

**Class Format:** Seminars, discussions, and field seminars

**Requirements/Evaluation:** Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

**Prerequisites:** None

**Enrollment Limit:** 27

**Enrollment Preferences:** If course over-enrolls, preference will be given to sophomores and juniors

**Expected Class Size:** 22

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Offered only at Mystic Seaport

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 352 (D2) MAST 352 (D2)

**Writing Skills Notes:** Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate

in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

### **MAST 402 (S) Senior Seminar: Perspectives on Environmental Studies (WS)**

**Cross-listings:** MAST 402 ENVI 412

**Secondary Cross-listing**

The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice, and they will have opportunities throughout the semester to meet with guest speakers to discuss environmental work outside the academy.

**Requirements/Evaluation:** active participation, discussion leading, several smaller assignments and multi-step capstone project

**Prerequisites:** declared major/concentration in Environmental Studies or Maritime Studies, ideally to be taken in final semester at Williams

**Enrollment Limit:** 14

**Enrollment Preferences:** Environmental Studies majors and concentrators, Maritime Studies concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** required course for students wishing to complete the Maritime Studies concentration

**Distributions:** No divisional credit (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MAST 402 No divisional credit ENVI 412 No divisional credit

**Writing Skills Notes:** This course is focused on building up cross-disciplinary writing and communication skills. There will be a multi-step capstone project that emphasizes writing, and there will be opportunities to revise and resubmit work.

### **MAST 404 (F) Coastal Processes and Geomorphology (QFR)**

**Cross-listings:** MAST 404 ENVI 404 GEOS 404

#### **Secondary Cross-listing**

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

**Class Format:** lecture two times a week with a lab one time per week

**Requirements/Evaluation:** lab reports, quizzes, and an independent research project

**Prerequisites:** Either GEOS 104 or GEOS 210; or permission of instructor. No prior knowledge is necessary, but this course does build on principles used to explore complex scientific challenges.

**Enrollment Limit:** 12

**Enrollment Preferences:** senior Geosciences majors, then juniors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major. This course counts toward the GEOS Group B Electives - Sediments + Life.

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MAST 404 (D3) ENVI 404 (D3) GEOS 404 (D3)

## MATERIALS SCIENCE STUDIES (Div III)

Advisory Committee: Professors: D. Aalberts, S. Goh, L. Park. Assistant Professor: K. Jensen.

Materials Science is an interdisciplinary field which combines microscopic physics and chemistry in order to understand and control the properties of materials such as plastics, semiconductors, metals, liquid crystals, and biomaterials. Williams students with an interest in the properties of materials or in pursuing careers in materials science or a variety of engineering disciplines would benefit from following the courses in this program.

### MTSC Courses

#### CHEM 336 (F) Materials Chemistry

Materials have defined much of what is possible in our daily lives. Materials scientists are at the center of imagining and delivering progress, as they improve existing materials and develop new ones to meet today's needs. Materials science focuses on the relationships between the structure, processing, properties, and performance of materials. In this course, we will explore how the properties and potential applications of a solid are related to its atomic and molecular structure, as well as to its organization on larger length scales than are traditionally considered in chemistry. We will cover a variety of different types of materials including metals, ceramics, polymers, and composites. We will examine some of the latest developments in materials science, including new strategies for the synthesis of materials on different length scales, as well as a variety of potential applications of emerging technologies.

**Class Format:** three hours per week

**Requirements/Evaluation:** problem sets, reviews of research articles, two exams, and oral presentations

**Prerequisites:** CHEM 155 or 256 and 251/255

**Enrollment Limit:** 20

**Enrollment Preferences:** Chemistry majors

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D3)

**Attributes:** MTSC Courses

Not offered current academic year

#### CHEM 348 (S) Polymer Chemistry

From synthetic to natural macromolecules, we encounter polymers everywhere and every day. This course explores the multitude of synthetic techniques available and discusses how structure defines function. Topics include polymer types, concept of molecular weight, structure-property relationships and polymer synthesis methods including condensation and chain (anionic, cationic, radical) polymerizations. Fundamentals of composition and physical properties of polymers, and methods of characterization are also covered. Examples of polymer functionalization, self-assembly, and surface modification are also discussed.

**Class Format:** lecture, three hours per week and laboratory, four hours per week

**Requirements/Evaluation:** evaluation is based on problem sets, participation, two exams, laboratory work, and a final project

**Prerequisites:** CHEM 251/255

**Enrollment Limit:** 12

**Enrollment Preferences:** Chemistry majors

### **CHEM 364 (S)(S) Instrumental Methods of Analysis**

Instrumental methods of analysis provide scientists with different lenses to observe and elucidate fundamental chemical phenomena and to measure parameters and properties at the atomic, molecular, and bulk scales. This course introduces a framework for learning about a variety of instrumental techniques that typically include chromatography, mass spectrometry, thermal methods, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies. Students complete two 5-6 week long laboratory projects and gain hands-on experience and project planning skills to study molecules and materials of interest. This practical experience is complemented by lectures that cover the theory and broader applications of these techniques. Students also explore the primary literature and highlight recent advances in instrumental methods that address today's analytical questions. The skills learned are useful in a wide variety of scientific areas and will prepare you well for research endeavors.

**Class Format:** lecture, two times per week and laboratory, four hours per week; periodic small group meetings to plan laboratory research projects

**Requirements/Evaluation:** Weekly data analysis and project planning assignments for laboratory and analysis of readings for class, problem sets, two project reports and presentations, one oral presentation of an application of instrumental methods, a final independent literature project and presentation; demonstrated progress in research skills, and project engagement.

**Prerequisites:** CHEM 155 or 256 and 251/255; may be taken concurrently with CHEM 256 with permission of instructor

**Enrollment Limit:** 8/lab

**Enrollment Preferences:** Chemistry and Environmental Studies majors

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

### **GEOS 202 (F) Mineralogy**

This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in the major, it provides a systematic framework for the study of minerals--Earth's building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography through element distribution and crystal chemistry to the phase relations, compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical emission spectroscopy; wavelength- and energy-dispersive x-ray spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section. This course is in the Solid Earth group for the Geosciences major.

**Class Format:** Lecture three hours per week and laboratory three hours per week; independent study of minerals in hand specimen; one afternoon field trip

**Requirements/Evaluation:** one hour test, lab work, and a final exam

**Prerequisites:** one 100-level GEOS course or permission of instructor

**Enrollment Limit:** 14

**Enrollment Preferences:** sophomores and juniors planning to take GEOS 301, 302 and/or 303 in the subsequent year

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)

Not offered current academic year

**GEOS 234 (S) Introduction to Materials Science (QFR)**

**Cross-listings:** GEOS 234 PHYS 234

**Secondary Cross-listing**

Materials Science is the study of how the microscopic structure of materials--whether steel, carbon fiber, glass, wood, plastic, or mayonnaise--determines their macroscopic mechanical, thermal, electric, and other properties. Topics of this course include classifying materials; material structure; thermodynamics and phase transformations; material properties and testing; how solids bend, flow, and ultimately break; and how to choose the right material for design applications. Materials Science is a highly interdisciplinary field and as a result the course prerequisites are broad but also flexible. Interested students who are unsure about their preparation are strongly encouraged to contact the instructor.

**Class Format:** lecture (3 hours per week) plus three to four small-group laboratory sessions throughout the semester (to be scheduled with instructor)

**Requirements/Evaluation:** weekly problem sets, class participation, and midterm and final exams, all of which have a substantial quantitative component

**Prerequisites:** high school physics and chemistry, preferably at the AP level, and MATH 140 or AP Calculus (BC), and one 200-level PHYS, CHEM, or GEOS course; or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** based on students' scientific background and seniority

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** This course does not count toward the Geosciences major.

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GEOS 234 (D3) PHYS 234 (D3)

**Attributes:** MTSC Courses

Not offered current academic year

**PHYS 451 (F) Condensed Matter Physics (QFR)**

Condensed matter physics is an important area of current research and serves as the basis for modern electronic technology. We plan to explore the physics of metals, insulators, semiconductors, superconductors, and photonic crystals, with particular attention to structure, thermal properties, energy bands, and electronic properties.

**Requirements/Evaluation:** weekly readings and problem sets, and exams

**Prerequisites:** PHYS 301 (may be taken simultaneously); or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Physics majors

**Expected Class Size:** 6

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** serious problem sets

**Attributes:** MTSC Courses

Not offered current academic year

## MATHEMATICS AND STATISTICS (Div III)

### MATHEMATICS

**Chair: C. Carlisle and Margaret Tippit Professor of Statistics, Richard De Veaux**

- Colin C. Adams, Thomas T. Read Professor of Mathematics
- Bhagya Athukorallage, Visiting Assistant Professor of Mathematics
- Julie C. Blackwood, Associate Professor of Mathematics
- Xizhen Cai, Assistant Professor of Statistics
- Daniel Condon, Visiting Assistant Professor of Mathematics
- Richard D. De Veaux, Chair & C. Carlisle and Margaret Tippit Professor of Statistics
- Thomas A. Garrity, Webster Atwell Class of 1921 Professor of Mathematics
- Leo Goldmakher, Associate Professor of Mathematics; on leave Spring 2023
- Pamela E. Harris, Associate Professor of Mathematics; on leave 2022-2023
- Stewart D. Johnson, Professor of Mathematics; on leave Spring 2023
- Bernhard Klingenberg, Professor of Statistics; on leave 2022-2023
- Susan R. Loepp, William R. Kenan, Jr. Professor of Mathematics
- Steven J. Miller, Professor of Mathematics
- Ralph E. Morrison, Associate Professor of Mathematics
- Shaoyang Ning, Assistant Professor of Statistics; on leave 2022-2023
- Allison Pacelli, Professor of Mathematics; on leave 2022-2023
- Lori A. Pedersen, Lecturer in Mathematics
- Anna M. Plantinga, Assistant Professor of Statistics
- Cesar E. Silva, Hagey Family Professor of Mathematics; on leave 2022-2023
- Mihai Stoiciu, Professor of Mathematics
- Daniel B. Turek, Associate Professor of Statistics; on leave Spring 2023
- Elizabeth M. Upton, Assistant Professor of Statistics
- Jenna Zomback, Visiting Assistant Professor of Mathematics

### MAJOR IN MATHEMATICS

The major in Mathematics is designed to meet two goals: to introduce some of the central ideas in a variety of areas of mathematics and statistics, and to develop problem-solving ability by teaching students to combine creative thinking with rigorous reasoning. Mathematics is a gateway to many career paths including statistics, teaching, consulting, business, engineering, finance, actuarial studies and applied mathematics. Students are strongly encouraged to consult with the department faculty on choosing courses appropriate to an individualized program of study.

### REQUIREMENTS (9 courses plus colloquium)

The major in Mathematics consists of nine courses taken at Williams plus the colloquium requirement. Mathematics is highly cumulative, and students should plan a route to completing the major that ensures the proper sequencing and prerequisites for all needed courses. Note that not all upper level courses are offered every year.

### Calculus (2 courses)

Mathematics 140 Calculus II

Mathematics 150 or 151 Multivariable Calculus

### **Applied/Discrete Mathematics/Statistics (1 course)**

or Mathematics 210 Mathematical Methods for Scientists (Same as Physics 210)

or Mathematics 200 Discrete Mathematics

or Statistics 201 Statistics and Data Analysis

Mathematics 309 Differential Equations

or a more advanced applied/discrete/statistics course with prior department approval

### **Core Courses (3 courses)**

Mathematics 250 Linear Algebra

Mathematics 350 Real Analysis or Mathematics 351 Applied Real Analysis

Mathematics 355 Abstract Algebra

### **Completion (3 courses plus colloquium)**

Two mathematics or statistics electives from courses numbered 300 and above

One Senior Seminar: Any mathematics or statistics course numbered between 400 and 479, taken in the junior or senior year.

Participation in the Department Colloquium, in which all senior majors present a talk on a mathematical or statistical topic of their choice. Each major must attend at least 20 colloquia (reduced to 15 during the Academic Year 2020-2021), and up to 5 attendances may be counted in their junior year. Students engaged in study away may petition the department in advance to count up to 5 suitable colloquia attendances from their study away program.

### **Pass/Fail policies during the Academic Year 2020-2021**

Information about the Department of Mathematics and Statistics Pass/Fail policies during the Academic Year 2020-2021 can be found [here](#).

### **ADVANCED PLACEMENT**

Students who come to Williams with advanced placement will be moved up in the Mathematics major, and should consult with faculty to be placed in the best class reflecting their experience and background. A student who places out of a course substitutes another course of equal or higher level in Mathematics or Statistics to complete the nine course major. Students should select courses best suited to their preparation and goals, and consult with the department faculty concerning appropriate courses and placement. The department reserves the right to refuse registration in any course for which the student is overqualified.

For Example, a student starting in MATH 130 might take MATH 130 and 140 the first year, MATH 150 and MATH 200 the second year, MATH 250 and MATH 350 the third year, MATH 355 and a senior seminar the fourth year, plus the two required electives some time. Students are encouraged to consult freely with any math faculty about course selection and anything else.

### **CALCULUS PLACEMENT**

**Recommended placement for students who have taken an Advanced Placement Examination in Calculus (AB or BC) is:**

BC 1, 2 or AB 2, 3 Math 140

AB 4 or 5 Math 150

BC 3, 4 or 5 Math 151

Consult with department faculty for any Calculus or Statistics placement questions. Students who have had calculus in high school, whether or not they took the Advanced Placement Examination, are barred from 130 unless they obtain permission from the instructor.

### **NOTES**

**Substitutions, Study Abroad, and Transfer Credit:** In some cases, and with prior permission of the Mathematics and Statistics Department, appropriate courses from other institutions or a course from another Williams department may be substituted for electives. Programs like the "Budapest Semester in Mathematics" are recommended for majors who wish to focus on mathematics away. The department, though, normally accommodates students who select other study away programs. The department offers its core courses in both the fall and the spring to allow students to spend more easily a semester away.

**Double Counting:** No course may count towards two different majors.

**Planning Courses:** Core courses Mathematics 350/351 and 355, are normally offered every year. Most other 300-level topics are offered in alternate years. Topology, Complex Analysis, and second courses in real analysis and abstract algebra are normally offered at least every other year.

Each 400-level topic is normally offered every two to four years. Students should check with the department before planning far into the future.

**Course Admission:** Courses are normally open to all students meeting the prerequisites, subject to any course caps. Students with questions about the level at which courses are conducted are invited to consult department faculty.

## FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in many cases, though students should be sure to contact the department.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description, and complete syllabus including readings/assignments.

**Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

No.

**Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

Yes. They have to be approved MATH/STAT courses.

**Are there specific major requirements that cannot be fulfilled while on study away?**

Yes. Colloquium requirement, Senior Seminar requirement.

**Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

Yes. The highly cumulative structure of the major.

**Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:**

None to date.

## THE DEGREE WITH HONORS IN MATHEMATICS

The degree with honors in Mathematics is awarded to the student who has demonstrated outstanding intellectual achievement in a program of study which extends beyond the requirements of the major. The principal considerations for recommending a student for the degree with honors will be: Mastery of core material and skills, breadth and, particularly, depth of knowledge beyond the core material, ability to pursue independent study of mathematics or statistics, originality in methods of investigation, and, where appropriate, creativity in research.

An honors program normally consists of two semesters (MATH/STAT 493 and 494) and a winter study (WSP 031) of independent research, culminating in a thesis and a presentation. Under certain circumstances, the honors work can consist of coordinated study involving a one semester (MATH/STAT 493 or 494) and a winter study (WSP 030) of independent research, culminating in a "minithesis" and a presentation. Note that during the Academic Year 2020-2021 the winter study requirement for thesis and "minithesis" is waved. At least one semester should be in addition to the major requirements, and thesis courses do not count as 400-level senior seminars.

An honors program in actuarial studies requires significant achievement on four appropriate examinations of the Society of Actuaries.

Highest honors will be reserved for the rare student who has displayed exceptional ability, achievement or originality. Such a student usually will have written a thesis, or pursued actuarial honors and written a mini-thesis. An outstanding student who writes a mini-thesis, or pursues actuarial honors and writes a paper, might also be considered. In all cases, the award of honors and highest honors is the decision of the Department.

## APPLIED MATHEMATICS TRACK

Students interested in applied mathematics, engineering, or other sciences should consider:

Mathematics 140 Calculus II

Mathematics 150 or 151 Multivariable Calculus

Statistics 201 Statistics and Data Analysis

Mathematics 250 Linear Algebra

Mathematics 351 Applied Real Analysis

Mathematics 355 Abstract Algebra

Some programming or numerical analysis (e.g. MATH 361, 318T, or anything if you've had CSCI 134)

MATH 309 or Post-core Differential Equations/Numerical Methods

Senior seminar (e.g. Math Ecology MATH 410T or Mathematical Modeling MATH 433)

Other recommended courses: complex analysis, discrete mathematics (e.g. combinatorics or graph theory), operations research, optimization, probability, statistics, appropriate courses in Biology, Chemistry, Computer Science, Economics, Neuroscience, Physics, etc.

Williams has exchange and joint programs with good engineering schools. Interested students should consult the section on engineering near the beginning of the Bulletin and the Williams pre-engineering advisor for further information.

## GRADUATE SCHOOL TRACK

Students interested in continuing their study of mathematics in graduate school should consider:

Mathematics 140 Calculus II

Mathematics 150 or 151 Multivariable Calculus

Mathematics 250 Linear Algebra

Mathematics 350 Real Analysis

Mathematics 355 Abstract Algebra

Complex Analysis

Topology

Some second semester analysis

Some second semester algebra

Some post-core geometry

Thesis

[With prior permission, in unusual circumstances, senior seminar can be waived in favor of harder post-core electives.]

Students headed for graduate school generally take more than this relatively small number of courses required for a liberal arts major. Reading knowledge of a foreign language (French, German, or Russian) can be helpful.

Students interested in studying statistics in graduate school should take STAT 201, 346, 360, a 400 level statistics course and MATH 350/351 and 341 in addition to their other math requirements.

## OTHER CAREER PATHS

**Other Graduate and Professional Schools:** An increasing number of graduate and professional schools require mathematics and statistics as a prerequisite to admission or to attaining their degree. Students interested in graduate or professional training in business, medicine, economics, or psychology are advised to find out the requirements in those fields early in their college careers.

**Statistics and Actuarial Science:** Students interested in statistics or actuarial science should consider Mathematics 341, Statistics courses, and Economics 255. Additionally, students should consider taking some number of the actuarial exams given by the Society of Actuaries, which can constitute part of an honors program in actuarial studies (see section on honors above).

**Teaching:** Students interested in teaching mathematics at the elementary or secondary school level should consider courses on teaching, number theory, geometry, statistics, and practice as a tutor or teaching assistant. Winter study courses that provide a teaching practicum are also highly recommended. Consult the Program in Teaching (Professor Susan Engel) and the Office of Career Counseling.

**Business and Finance:** Students interested in careers in business or finance should consider Mathematics 333 and Statistics courses. Since these courses address different needs, students should consult with the instructors to determine which seem to be most appropriate for individuals.

There are three types of 300-level courses. There are the core courses: Real Analysis, MATH 350/351, and Abstract Algebra Math 355. There are the "precore" courses, which do not have the core courses as prerequisites and have numbers 300-349. Finally, there are those courses that have an Abstract Algebra or Real Analysis prerequisite, which are numbered 360-399.

### **MATH 100 (W) Mathematics Immersion: The Beauty of Numbers (QFR)**

This course will be an introduction to logic and number theory, with emphasis throughout on mathematics as a way of thinking. Have you ever wondered what keeps your credit card information safe every time you buy something online? Number theory! Number Theory is one of the oldest branches of mathematics. In this course, we will discover the beauty and usefulness of numbers, from ancient Greece to modern cryptography. We will look for patterns, make conjectures, and learn how to prove these conjectures. Starting with nothing more than basic high school algebra, we will develop the logic and critical thinking skills required to realize and prove mathematical results. Topics to be covered include the meaning and content of proof, prime numbers, divisibility, rationality, modular arithmetic, Fermat's Last Theorem, the Golden ratio, Fibonacci numbers, coding theory, and unique factorization. This course is meant to give you an appreciation for numbers and mathematics and to enhance your logical reasoning skills. Although most people will not use calculus or geometry in their jobs or everyday lives, mathematics enhances our abilities to think logically and reason effectively. This skill is useful in all aspects of life. Number theory, in particular, is a great area of mathematics that allows one to jump in right away without a lot of pre-requisite knowledge. We will look at examples, look for patterns, make conjectures, and we will spend a lot of time learning how to rigorously prove those conjectures.

**Class Format:** Students will attend lecture Monday - Thursday mornings from 10am - noon. In the afternoons, students will attend interactive math labs from approximately 1 - 3 pm Monday - Thursday.

**Requirements/Evaluation:** Evaluation will be based on daily homework and activities, exams, projects, and participation in class and math labs.

**Prerequisites:** Permission of a dean.

**Enrollment Limit:** 20

**Enrollment Preferences:** Students who need to make up a deficiency.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** This course is designed to count for both full semester, Winter Study, and QFR credit. Once a dean approves enrollment, the Registrar's Office will register students in both MATH 100 and MATH 40.

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** We will be proving theorems and learning mathematical logic.

Not offered current academic year

### **MATH 102 (F) Foundations in Quantitative Skills**

This course will strengthen a student's foundation in quantitative reasoning in preparation for the science curriculum and QFR requirements. The material will be at the college algebra/precalculus level, and covered in a tutorial format with students working in small groups with the professor. Access to this course is limited to placement by a quantitative skills counselor.

**Requirements/Evaluation:** homework, presentations during the tutorial meetings, and projects

**Prerequisites:** access to the course is limited to placement by a quantitative skills counselor

**Enrollment Limit:** 10

**Enrollment Preferences:** students who need most help with the quantitative reasoning

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

Fall 2022

TUT Section: T1 TBA Mihai Stoiciu

### **MATH 113 (S) The Beauty of Numbers (QFR)**

Have you ever wondered what keeps your credit card information safe everytime you buy something online? Number theory! Number Theory is one of the oldest branches of mathematics. In this course, we will discover the beauty and usefulness of numbers, from ancient Greece to modern cryptography. We will look for patterns, make conjectures, and learn how to prove these conjectures. Starting with nothing more than basic high school algebra, we will develop the logic and critical thinking skills required to realize and prove mathematical results. Topics to be covered include the meaning and content of proof, prime numbers, divisibility, rationality, modular arithmetic, Fermat's Last Theorem, the Golden ratio, Fibonacci numbers,

coding theory, and unique factorization.

**Requirements/Evaluation:** projects, homework assignments, and exams

**Prerequisites:** MATH 102 (or demonstrated proficiency on a diagnostic test) or permission of instructor

**Enrollment Limit:** 25

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

Not offered current academic year

**MATH 119 (F) The Mathematics of Pandemics: From the Spread of Infections to Cost-Benefit Analyses of Responses (QFR)**

The goal of the class is to help students learn to ask the right questions, and to gather and analyze the data needed to answer them, to understand the covid pandemic and the worldwide responses. Through local experts and numerous guest speakers playing key roles in these problems, we will discuss numerous aspects, from mathematical models for virus propagation to analyzing the economic, educational, social and emotional consequences of lockdowns and social distancing; from moral and legal dilemmas created by the pandemic and responses to the international political scene and relations between countries. Offered as Math 119 or Math 312 (those taking as Math 312 will have some of the readings replaced with more technical modeling papers and subsequent homework). Pre-requisites: None for Math 119; for Math 312 linear algebra is recommended.

**Requirements/Evaluation:** Homework, writing, class participation.

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** all students will have an equal chance; if possible none will be turned away.

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** We will discuss mathematical models and use statistics to analyze data.

Not offered current academic year

**MATH 130 (F)(S) Calculus I (QFR)**

Calculus permits the computation of velocities and other instantaneous rates of change by a limiting process called differentiation. The same process also solves "max-min" problems: how to maximize profit or minimize pollution. A second limiting process, called integration, permits the computation of areas and accumulations of income or medicines. The Fundamental Theorem of Calculus provides a useful and surprising link between the two processes. Subtopics include trigonometry, exponential growth, and logarithms.

**Requirements/Evaluation:** Weekly homework and quizzes, 2 exams during the semester, and one final

**Prerequisites:** MATH 102 (or demonstrated proficiency on a diagnostic test); this is an introductory course for students who have not seen calculus before

**Enrollment Limit:** 50

**Enrollment Preferences:** first-year students

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** students who have previously taken a calculus course may not enroll in MATH 130 without the permission of instructor

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This a calculus course.

LEC Section: 02 MWF 12:00 pm - 12:50 pm Lori A. Pedersen

Spring 2023

LEC Section: 01 MWF 10:00 am - 10:50 am Lori A. Pedersen

**MATH 140 (F)(S) Calculus II (QFR)**

Calculus answers two basic questions: how fast is something changing (the derivative) and how much is there (the integral). This course is about integration, and the miracle that unites the derivative and the integral (the Fundamental Theorem of Calculus.) Understanding calculus requires in part the understanding of methods of integration. This course will also solve equations involving derivatives ("differential equations") for population growth or pollution levels. Exponential and logarithmic functions and trigonometric and inverse functions will also play an important role. This course is the right starting point for students who have seen derivatives, but not necessarily integrals, before.

**Requirements/Evaluation:** homework, quizzes, and/or exams

**Prerequisites:** MATH 130 or equivalent; students who have received the equivalent of advanced placement of AB 4, BC 3 or higher may not enroll in MATH 140 without the permission of instructor

**Enrollment Limit:** 50

**Enrollment Preferences:** based on who needs calculus the soonest

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** students who have higher advanced placement must enroll in MATH 150 or above

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This is a math class

Fall 2022

Spring 2023

LEC Section: 01 MWF 11:00 am - 11:50 am Lori A. Pedersen

**MATH 150 (F)(S) Multivariable Calculus (QFR)**

Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives, multiple integrals. There is also a unit on infinite series, sometimes with applications to differential equations.

**Requirements/Evaluation:** Problem sets and exams

**Prerequisites:** MATH 140 or equivalent, such as satisfactory performance on an Advanced Placement Examination

**Enrollment Limit:** 50

**Enrollment Preferences:** Preference will be given to prospective math and stats majors, or students who need this as a course to serve as a prerequisite for other courses.

**Expected Class Size:** 40

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** Students with the equivalent of advanced placement of AB 4 or above should enroll in MATH 150, students with a BC 3 or higher should enroll in Math 151 when it is being offered, and Math 150 otherwise.

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** mathematics

LEC Section: 01 MWF 9:00 am - 9:50 am Steven J. Miller

**MATH 151 (F) Multivariable Calculus (QFR)**

Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives and multiple integrals. The goal of the course is Stokes Theorem, a deep and profound generalization of the Fundamental Theorem of Calculus. The difference between this course and MATH 150 is that MATH 150 covers infinite series instead of Stokes Theorem. Students with the equivalent of BC 3 or higher should enroll in MATH 151, as well as students who have taken the equivalent of an integral calculus and who have already been exposed to infinite series. For further clarification as to whether MATH 150 or MATH 151 is appropriate, please consult a member of the math/stat department.

**Requirements/Evaluation:** problem sets and exams

**Prerequisites:** AP BC 3 or higher or integral calculus with infinite series

**Enrollment Limit:** 50

**Enrollment Preferences:** First-years, sophomores, and juniors

**Expected Class Size:** 40

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** MATH 151 satisfies any MATH 150 prerequisite; credit will not be given for both MATH 150 and MATH 151

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This course builds quantitative skills

**Expected Class Size:** 1

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

Spring 2023

IND Section: 01 TBA Mihai Stoiciu

**MATH 200 (F)(S) Discrete Mathematics (QFR)**

In contrast to calculus, which is the study of continuous processes, this course examines the structure and properties of finite sets. Topics to be covered include mathematical logic, elementary number theory, mathematical induction, set theory, functions, relations, elementary combinatorics and probability, and graphs. Emphasis will be given on the methods and styles of mathematical proofs, in order to prepare the students for more advanced math courses.

**Requirements/Evaluation:** Fall: Homework, proof portfolio, group work, presentations, quizzes/exams, reflections. Spring: The grade will be based on homework and 4 exams.

**Prerequisites:** Calculus at the level of an AP course or Williams College Math 130 or 140. Students who have taken a 300-level or 400-level math course should obtain permission of the instructor before enrolling.

**Enrollment Limit:** 40

**Enrollment Preferences:** Preference given to first and second year students intending to major in mathematics or computer science.

**Expected Class Size:** 40

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This course involves developing the formal mathematical language of logic and set theory. It also involves using quantitative tools to solve problems relating to combinatorics, probability, and other fields of discrete mathematics.

**MATH 210 (S) Mathematical Methods for Scientists (QFR)**

**Cross-listings:** PHYS 210 MATH 210

**Secondary Cross-listing**

This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. An optional session in Mathematica will be offered for students who are not already familiar with this computational tool.

**Class Format:** three hours per week

**Requirements/Evaluation:** several exams and weekly problem sets, all of which have a substantial quantitative component

**Prerequisites:** MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

**Enrollment Limit:** 50

**Enrollment Preferences:** sophomores and juniors

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

PHYS 210 (D3) MATH 210 (D3)

**Quantative/Formal Reasoning Notes:** This course will have weekly problem sets using advanced calculus methods

Spring 2023

LEC Section: 01 TR 9:55 am - 11:10 am Daniel P. Aalberts

**MATH 250 (F)(S) Linear Algebra (QFR)**

Many social, political, economic, biological, and physical phenomena can be described, at least approximately, by linear relations. In the study of systems of linear equations one may ask: When does a solution exist? When is it unique? How does one find it? How can one interpret it geometrically? This course develops the theoretical structure underlying answers to these and other questions and includes the study of matrices, vector spaces, linear independence and bases, linear transformations, determinants and inner products. Course work is balanced between theoretical and computational, with attention to improving mathematical style and sophistication.

**Requirements/Evaluation:** homework and exams

**Prerequisites:** MATH 150/151 or MATH 200

**Enrollment Limit:** 60

**Enrollment Preferences:** Students who have officially declared a major that requires Math 250.

**Expected Class Size:** 40

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** In this course, students will engage in both quantitative and formal reasoning.

**Attributes:** COGS Related Courses

### **MATH 303 (F) Introduction to Dynamics, p-Adics, and Measure (QFR)**

At its most basic level a dynamical system consists of a set of points and a transformation or map acting on the set (i.e., sending points in the set to other points in the set). In this setting we can already ask about the existence, and prevalence, of periodic points (points that come back to themselves). One can also ask about the orbit of a point: the set of points that is obtained as one iteratively applies the transformation the point. An important dynamical notion that comes up here is that of chaos. The course will start by studying basic dynamical systems using notions from calculus. Then we will introduce the p-adic numbers and use them to study dynamical systems. The course will end with an exploration of the notion of measure and its connection with dynamical systems.

**Requirements/Evaluation:** Homework, class participation, exams.

**Prerequisites:** Math 250.

**Enrollment Limit:** 30

**Enrollment Preferences:** Juniors

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** Mathematics

Not offered current academic year

### **MATH 307 (F)(S) Computational Linear Algebra (QFR)**

Linear algebra is of central importance in the quantitative sciences, including application areas such as image and signal processing, data mining, computational finance, structural biology, and much more. When the problems must be solved computationally, approximation, round-off errors, convergence, and efficiency matter, and traditional linear algebra techniques may fail to succeed. We will adopt linear algebra techniques on a large scale, implement them computationally, and apply them to core problems in scientific computing. Topics may include: systems of linear and nonlinear equations; approximation and statistical function estimation; optimization; interpolation; data scraping; singular value decomposition; and more. This course could also be considered a course in numerical analysis or computational science.

**Class Format:** This course is taught in a flipped classroom format. Students read and watch lecture videos prior to each class session. The instructor uses class time for discussion and collaborative learning activities. This course will be a good fit for students with a strong interest in applied mathematics and a willingness to devote significant effort to learning/doing computer programming.

**Requirements/Evaluation:** Students will complete checkpoint quizzes, regularly assigned homework problems and projects, and reflective writing assignments. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor follows the policy of "ungrading." Over the course of the semester, students will develop a rubric to assess their own learning and will evaluate themselves according to this rubric.

**Prerequisites:** MATH 250; COMP 134 or equivalent prior experience with computer programming (in any language)

**Enrollment Limit:** 24

**Enrollment Preferences:** Preference given to majors and prospective majors.

**Expected Class Size:** 24

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This course involves developing the formal mathematical language of linear algebra. It also involves using quantitative tools to solve problems relating to a wide range of applications in the physical and social sciences.

Fall 2022

LEC Section: 01 TR 8:30 am - 9:45 am Chad M. Topaz

**MATH 308 (F)(S) Mathematical and Computational Approaches to Social Justice (DPE) (QFR)**

**Cross-listings:** STS 363 WGSS 363 AMST 363 MATH 308

**Primary Cross-listing**

Civil rights activist, educator, and investigative journalist Ida B. Wells said that "the way to right wrongs is to shine the light of truth upon them." In this research-based tutorial, students will bring the vanguard of quantitative approaches to bear on issues of social justice. Each tutorial group will carry out a substantial project in an area such as criminal justice, education equity, environmental justice, health care equity, economic justice, or inclusion in arts/media. All students should expect to invest substantial effort in reading social justice literature and in acquiring new skills in data science.

**Class Format:** This is a research-based tutorial.

**Requirements/Evaluation:** To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor follows an "ungrading" methodology.

**Prerequisites:** Across each 3 - 5 person tutorial group: multivariable calculus (e.g., Math 150/151), linear algebra (e.g., Math 250), statistics (e.g., Stat 161/201), computer programming (e.g., Comp 134), some working knowledge of or interest in social justice issues.

**Enrollment Limit:** 20

**Enrollment Preferences:** Students will be admitted in groups of 3 - 5 based on a proposal submitted prior to registration. The instructor is happy to facilitate formation of groups and to give feedback on draft proposals. Contact the instructor early, prior to preregistration.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (DPE) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

STS 363 (D2) WGSS 363 (D2) AMST 363 (D2) MATH 308 (D3)

**Difference, Power, and Equity Notes:** Students study issues of equity, diversity, and inclusion in areas such as criminal justice, arts/media, environmental justice, education, and health care, and along identity axes such as gender, race/ethnicity, disability status, and sexual orientation.

**Quantative/Formal Reasoning Notes:** Students use multiple mathematical, statistical, and computational frameworks to acquire, model, and analyze real-world data.

Spring 2023

TUT Section: T1 TBA Chad M. Topaz

**MATH 309 (F)(S) Differential Equations (QFR)**

Ordinary differential equations (ODEs) frequently arise as models of phenomena in the natural and social sciences. This course presents core ideas of ODEs from an applied standpoint. Topics covered early in the course may include numerical solutions, separation of variables, integrating factors, and constant coefficient linear equations. Later, we will focus on nonlinear ODEs, for which it is usually impossible to find analytical solutions. Tools from dynamical systems will be introduced to allow us to obtain information about the behavior of the ODEs without explicitly knowing the solution.

**Requirements/Evaluation:** quizzes/exams, problem sets, participation

**Prerequisites:** MATH 150/151 and MATH 250

**Enrollment Limit:** 40

**Enrollment Preferences:** discretion of the instructor

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** 300-level mathematics course

Fall 2022

LEC Section: 01 TR 11:20 am - 12:35 pm Julie C. Blackwood

Spring 2023

LEC Section: 01 TR 9:55 am - 11:10 am Julie C. Blackwood

**MATH 311 (F) Advanced topics in applied mathematics (QFR)**

Applied mathematics is an expansive field that uses mathematical methods to explore problems that arise in biology, physics, engineering, and many other disciplines. In this course, we will explore a diversity of methods that may include stochastic processes, optimization, signal processing, and numerical analysis. We will also explore how these methods can be utilized to understand questions in other disciplines.

**Requirements/Evaluation:** This course will have some combination of problem sets, presentations, exams, and a final project

**Prerequisites:** Differential equations (Math 309) or permission of the instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** If over-enrolled, the instructor will request a statement of interest

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** Mathematics course

Fall 2022

TUT Section: T1 TBA Julie C. Blackwood

**MATH 312 (F) The Mathematics of Pandemics: From the Spread of Infections to Cost-Benefit Analyses of Responses (QFR)**

The goal of the class is to help students learn to ask the right questions, and to gather and analyze the data needed to answer them, to understand the covid pandemic and the worldwide responses. Through local experts and numerous guest speakers playing key roles in these problems, we will discuss numerous aspects, from mathematical models for virus propagation to analyzing the economic, educational, social and emotional consequences of lockdowns and social distancing; from moral and legal dilemmas created by the pandemic and responses to the international political scene and relations between countries. Offered as Math 119 or Math 312 (those taking as Math 312 will have some of the readings replaced with more technical modeling papers and subsequent homework). Pre-requisites: None for Math 119; for Math 312 linear algebra is recommended.

**Requirements/Evaluation:** Class participation, writing, homework problems.

**Prerequisites:** Linear algebra recommended.

**Enrollment Limit:** none

**Enrollment Preferences:** all students will have an equal chance; if possible none will be turned away.

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** We will discuss mathematical models and use statistics to analyze data.

Not offered current academic year

### **MATH 313 (S) Introduction to Number Theory (QFR)**

The study of numbers dates back thousands of years, and is fundamental in mathematics. In this course, we will investigate both classical and modern questions about numbers. In particular, we will explore the integers, and examine issues involving primes, divisibility, and congruences. We will also look at the ideas of numbers and primes in more general settings, and consider fascinating questions that are simple to understand, but can be quite difficult to answer.

**Requirements/Evaluation:** Problem sets and exams

**Prerequisites:** MATH 250 or permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** Students who have not taken Math 355 and seniors who need the course to complete the major and have no other options.

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This course requires working with various number systems, performing explicit computations, and proving mathematical results using logical reasoning practices.

Spring 2023

LEC Section: 01 MWF 10:00 am - 10:50 am Susan R. Loepp

### **MATH 314 (S) Cryptography (QFR)**

An introduction to the techniques and practices used to keep secrets over non-secure lines of communication, including classical cryptosystems, the data encryption standard, the RSA algorithm, discrete logarithms, hash functions, and digital signatures. In addition to the specific material, there will also be an emphasis on strengthening mathematical problem solving skills, technical reading, and mathematical communication.

**Requirements/Evaluation:** exams, homework, and quizzes

**Prerequisites:** MATH 250

**Enrollment Limit:** 30

**Enrollment Preferences:** graduating seniors and Math majors

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** The course will contain mathematical proofs.

Not offered current academic year

### **MATH 315 (S) Methods for Solving Diophantine Equations (QFR)**

A Diophantine equation is an equation with integer (or rational) coefficients that is to be solved in integers (or rational numbers). A focus of study for hundreds of years, Diophantine analysis remains a vibrant area of research. It has yielded a multitude of beautiful results and has wide ranging applications in other areas of mathematics, in cryptography, and in the natural sciences. In this project-based tutorial, we will focus on studying and implementing various methods for solving previously unsolved infinite families of Diophantine equations. Depending on their interests, students may choose one or several methods to apply to open problems in the field. Please note that this tutorial will be held virtually.

**Requirements/Evaluation:** The grade for this course will be a combination of weekly problem sets, weekly oral presentations (approx. 15 min. each), quarterly self-reflections, and a final written project manuscript that will be continually edited throughout the semester (minimum of 5 pages).

**Prerequisites:** MATH 250 or permission of the instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Sophomores, Juniors, and Seniors based on a short questionnaire of interests. In the event of over-enrollment, preference will be given to those that need the course to graduate.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This course requires working with various number systems, performing explicit computations, and proving mathematical results using logical reasoning practices.

Not offered current academic year

**MATH 317 (F) Introduction to Operations Research (QFR)**

In the first N math classes of your career, you can be misled as to what the world is truly like. How? You're given exact problems and told to find exact solutions. The real world is sadly far more complicated. Frequently we cannot exactly solve problems; moreover, the problems we try to solve are themselves merely approximations to the world! We are forced to develop techniques to approximate not just solutions, but even the statement of the problem. Additionally, we often need the solutions quickly. Operations Research, which was born as a discipline during the tumultuous events of World War II, deals with efficiently finding optimal solutions. In this course we build analytic and programming techniques to efficiently tackle many problems. We will review many algorithms from earlier in your mathematical or CS career, with special attention now given to analyzing their run-time and seeing how they can be improved. The culmination of the course is a development of linear programming and an exploration of what it can do and what are its limitations. For those wishing to take this as a Stats course, the final project must have a substantial stats component approved by the instructor.

Prerequisites: Linear Algebra (MATH 250) and one other 200-level or higher CSCI, MATH or STATS course, or permission of the instructor.

**Requirements/Evaluation:** homework, exams, projects

**Prerequisites:** MATH 150, MATH 250 and one other 200-level or higher CSCI, MATH or STATS course, or permission from the instructor.

**Enrollment Limit:** 40

**Enrollment Preferences:** Computer Science, Mathematics and Statistics majors

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** [http://web.williams.edu/Mathematics/sjmillier/public\\_html/317/](http://web.williams.edu/Mathematics/sjmillier/public_html/317/)

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** 300 level mathematics course.

Fall 2022

LEC Section: 01 MWF 9:00 am - 9:50 am Steven J. Miller

**MATH 319 (S) Integrative Bioinformatics, Genomics, and Proteomics Lab (QFR)**

**Cross-listings:** MATH 319 CHEM 319 BIOL 319 PHYS 319 CSCI 319

Secondary Cross-listing

What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

**Class Format:** The lab for this course will meet for two afternoons per week. Some lab sessions will be shorter than 3 hours.

**Requirements/Evaluation:** lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

**Prerequisites:** BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

**Enrollment Limit:** 12

**Enrollment Preferences:** seniors, then juniors, then sophomores

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MATH 319 (D3) CHEM 319 (D3) BIOL 319 (D3) PHYS 319 (D3) CSCI 319 (D3)

**Quantative/Formal Reasoning Notes:** Through lab work, homework sets and a major project, students will learn or further develop their skills in programming in Python, and about the basis of Bayesian approaches to phylogenetic tree estimation.

**Attributes:** BIGP Courses BIMO Interdepartmental Electives

LAB Section: 02 TR 1:00 pm - 4:00 pm Lois M. Banta

### **MATH 321 (S) Knot Theory (QFR)**

Take a piece of string, tie a knot in it, and glue the ends together. The result is a knotted circle, known as a knot. For the last 100 years, mathematicians have studied knots, asking such questions as, "Given a nasty tangled knot, how do you tell if it can be untangled without cutting it open?" Some of the most interesting advances in knot theory have occurred in the last ten years. This course is an introduction to the theory of knots. Among other topics, we will cover methods of knot tabulation, surfaces applied to knots, polynomials associated to knots, and relationships between knot theory and chemistry and physics. In addition to learning the theory, we will look at open problems in the field.

**Requirements/Evaluation:** problem sets, midterms, a paper and a final exam

**Prerequisites:** MATH 250 or permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** seniors, junior, sophomores, first year

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This is a quantitative course.

Not offered current academic year

### **MATH 325 (F) Set Theory (QFR)**

Set theory is the traditional foundational language for all of mathematics. We will be discussing the Zermelo-Fraenkel axioms, including the Axiom of Choice and the Continuum Hypothesis, basic independence results and, if time permits, incompleteness theorems. At one time, these issues tore at the foundations of mathematics. They are still vital for understanding the nature of mathematical truth.

**Requirements/Evaluation:** exams and homework

**Prerequisites:** MATH 250

**Enrollment Limit:** 30

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Materials/Lab Fee:** textbook cost

**Distributions:** (D3) (QFR)

Not offered current academic year

### **MATH 328 (S) Combinatorics (QFR)**

Combinatorics is a branch of mathematics that focuses on enumerating, examining, and investigating the existence of discrete mathematical

structures with certain properties. This course provides an introduction to the fundamental structures and techniques in combinatorics including enumerative methods, generating functions, partition theory, the principle of inclusion and exclusion, and partially ordered sets.

**Class Format:** interactive activities and discussion

**Requirements/Evaluation:** quizzes/exams, homework, activities

**Prerequisites:** MATH 200 and MATH 250

**Enrollment Limit:** 30

**Enrollment Preferences:** discretion of the instructor

**Expected Class Size:** 25

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

Not offered current academic year

### **MATH 329 (S) Discrete Geometry** (QFR)

Discrete geometry is one of the oldest and most consistently vibrant areas of mathematics, stretching from the Platonic Solids of the ancient Greeks to the modern day applications of convex optimization and linear programming. In this tutorial we will learn about polygons and their higher-dimensional cousins, polyhedra and polytopes, and the various ways to describe, compute, and classify such objects. We will learn how these objects and ideas can be applied to other areas, from computation and optimization to studying areas of math like algebraic geometry. Throughout this course we will be engaging with mathematical work and literature from as old as 500 BCE and as recent as "posted to the internet yesterday."

**Requirements/Evaluation:** Evaluation will be based primarily on participation, problem sets, oral presentations, a written midterm exam, an oral final exam, and a final project

**Prerequisites:** MATH 200 or Math 250, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** First-years and sophomores

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** All of the content in this course is quantitative or formal reasoning.

Spring 2023

TUT Section: T1 TBA Ralph E. Morrison

### **MATH 334 (F) Graph Theory** (QFR)

A graph is a collection of vertices, joined together by edges. In this course, we will study the sorts of structures that can be encoded in graphs, along with the properties of those graphs. We'll learn about such classes of graphs as multi-partite, planar, and perfect graphs, and will see applications to such optimization problems as minimum colorings of graphs, maximum matchings in graphs, and network flows.

**Requirements/Evaluation:** problem sets, exams, and a short final project

**Prerequisites:** MATH 200 or MATH 250

**Enrollment Limit:** 30

**Enrollment Preferences:** Math majors

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This course involves the writing of mathematical proofs.

Fall 2022

**MATH 335 (F) Decisions, Games, and Evolutionary Dynamics (QFR)**

Given goals, options, and uncertainty, how does one make a rational choice? What happens when we interact with others who are also choosing? How might this play out over time? We will first cover the principles of decision theory including preference, uncertainty, utility, imperfect information, and rational choice. The majority of the course will be spent on the main topics of game theory: sequential games, bimatrix games, parlor games, Nash equilibria, bargaining, repeated games, Bayesian belief, and signaling. Applying these principles to populations that evolve over time through variation, selection, and copying, we will develop basic models of the dynamics of evolution.

**Class Format:** lecture

**Requirements/Evaluation:** Weekly homework, midterm exams, and a final.

**Prerequisites:** Math 150/151 and Math 250. Some background in probability and differential equations is highly recommended.

**Enrollment Limit:** 35

**Enrollment Preferences:** Math majors.

**Expected Class Size:** 35

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** Lots of math.

Not offered current academic year

**MATH 338 (S) Intermediate Logic (QFR)**

**Cross-listings:** MATH 338 PHIL 338

Secondary Cross-listing

In this course, we will begin with an in-depth study of the theory of first-order logic. We will first get clear on the formal semantics of first-order logic and various ways of thinking about formal proof: natural deduction systems, semantic tableaux, axiomatic systems and sequent calculi. Our main goal will be to prove things about this logical system rather than to use this system to think about ordinary language arguments. In this way the goal of the course is significantly different from that of Logic and Language (PHIL 203). Students who have taken PHIL 203 will have a good background for this class, but students who are generally comfortable with formal systems need not have taken PHIL 203. We will prove soundness and completeness, compactness, the Lowenheim-Skolem theorems, undecidability and other important results about first-order logic. As we go through these results, we will think about the philosophical implications of first-order logic. From there, we will look at extensions of and/or alternatives to first-order logic. Possible additional topics would include: modal logic, the theory of counterfactuals, alternative representations of conditionals, the use of logic in the foundations of arithmetic and Godel's Incompleteness theorems. Student interest will be taken into consideration in deciding what additional topics to cover.

**Requirements/Evaluation:** problem sets and exams

**Prerequisites:** some class in which student has studied formal reasoning

**Enrollment Limit:** 20

**Enrollment Preferences:** Philosophy majors; juniors and seniors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MATH 338 (D2) PHIL 338 (D2)

**Quantative/Formal Reasoning Notes:** This is a class in Formal Logic. PHIL 203 satisfies the QFR requirement. If anything, this class will be significantly more formal.

**Attributes:** PHIL Contemp Metaphysics + Epistemology Courses

### **MATH 340 Applications of Mathematics to the Real World (QFR)**

Often for real world applications one does not need to find the optimal solution, which can be extremely difficult, but instead just find something close, or at least better than what is currently being done. We will develop material and techniques from mathematics, statistics and allied fields with an eye to applications. In addition to standard homework assignments and exams there will be a group project where students will work with a local business, write a report and present the results. Pre-requisites are multivariable calculus and linear algebra, or permission of the instructor. Knowledge of some statistics or programming is beneficial but not required.

**Class Format:** In addition to standard lectures and assignments, we will be partnering with local businesses to apply mathematics to solve real world problems.

**Requirements/Evaluation:** Lectures and class participation, homework, exams and encouragement to do a project. We already have several local businesses with projects for students. Working on a project will entail meeting with officials from the company, clearly defining what the problem is, and writing a solution. This will include a presentation, a write-up, and potentially implementable code. Based on previous similar courses, these papers typically run from 10 to 40 pages.

**Prerequisites:** Mathematics 150 or 151, and Linear Algebra, or permission of the instructor.

**Enrollment Limit:** 40

**Enrollment Preferences:** Students who have taken at least one statistics or computer science class

**Expected Class Size:** 25

**Grading:**

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This is a 300 level mathematics class

Not offered current academic year

### **MATH 341 (F)(S) Probability (QFR)**

**Cross-listings:** STAT 341 MATH 341

Primary Cross-listing

The historical roots of probability lie in the study of games of chance. Modern probability, however, is a mathematical discipline that has wide applications in a myriad of other mathematical and physical sciences. Drawing on classical gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables (both discrete and continuous), distribution and expectation, independence, laws of large numbers, and the well-known Central Limit Theorem. Many interesting and important applications will also be presented, including some from classical Poisson processes, random walks and Markov Chains.

**Requirements/Evaluation:** homework, classwork, and exams

**Prerequisites:** MATH 150 and MATH 250 or permission of the instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** Priority will be given to Mathematics majors and to Statistics Majors.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

STAT 341 (D3) MATH 341 (D3)

**Quantative/Formal Reasoning Notes:** This is a 300-level Math/Stat course.

Fall 2022

Spring 2023

LEC Section: 01 TF 2:35 pm - 3:50 pm Mihai Stoiciu

**MATH 342 (F) Logic (QFR)**

This course will introduce the main ideas and basic results of mathematical logic, and explain their applications to other areas of mathematics and computer science. We will begin with a study of first-order logic, covering structures and definability, theories, models and categoricity, as well as formal proofs. We will prove Gödel's completeness and compactness theorems and the Lowenheim-Skolem theorems. The course will briefly dive into computability theory, enough to prove Gödel's Incompleteness theorems and basic undecidability results.

**Requirements/Evaluation:** Evaluation based on homework, exams, and class participation.

**Prerequisites:** Math 250 - Linear Algebra

**Enrollment Limit:** 20

**Enrollment Preferences:** Junior and Senior Math Majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** Mathematics course in logic and applications.

Fall 2022

LEC Section: 01 MWF 9:00 am - 9:50 am Jenna Zomback

**MATH 344 (S) The Mathematics of Sports (QFR)**

The purpose of this class is to use sports as a springboard to study applications of mathematics, especially in gathering data to build and test models and develop predictive statistics. Examples will be drawn from baseball, basketball, cross country, football, hockey, soccer, track, as well as class choices. Pre-requisites are linear algebra (Math 250) and either a 200 level statistics class or a 100 level programming class, or permission of the instructor.

**Requirements/Evaluation:** Homework, exams, projects

**Prerequisites:** Math 250: Linear Algebra

**Enrollment Limit:** 40

**Enrollment Preferences:** None. If the course is over-enrolled preference will be given to math and stats majors, and then if needed by performance on a small assignment.

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This is a 300 level mathematics course.

Spring 2023

LEC Section: 01 MWF 10:00 am - 10:50 am Steven J. Miller

**MATH 345 (S) Introduction to Numerical Analysis (QFR)**

Numerical analysis is the study of algorithms that use numerical approximation to solve problems which arise in scientific applications. This course provides an introduction to the theory, development, and analysis of algorithms for obtaining numerical solutions. Topics discussed in the course include: Error Analysis and Convergence Rates of Algorithms; Root Finding for Nonlinear Equations; Approximating Functions using Lagrange Interpolation and Cubic Spline Approximation; Numerical Differentiation and Integration; Numerical Solution of Ordinary Differential Equations; Iterative Methods for Solving Linear Systems

**Requirements/Evaluation:** Evaluation will be based on homework, projects, and exams.

**Prerequisites:** Math 250

**Enrollment Limit:** 30

**Enrollment Preferences:** Mathematics and Statistics majors.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This is an advanced mathematics class that will cover the fundamental ideas of Numerical Analysis. The students will study in depths various algorithms that provide numerical solutions to various questions in science.

Spring 2023

LEC Section: 01 TR 8:30 am - 9:45 am Bhagya Athukorallage

**MATH 350 (F)(S) Real Analysis (QFR)**

Why is the product of two negative numbers positive? Why do we depict the real numbers as a line? Why is this line continuous, and what do we mean when we say that? Perhaps most fundamentally, what is a real number? Real analysis addresses such questions, delving into the structure of real numbers and functions of them. Along the way we'll discuss sequences and limits, series, completeness, compactness, derivatives and integrals, and metric spaces. Results covered will include the Cantor-Schroeder-Bernstein theorem, the monotone convergence theorem, the Bolzano-Weierstrass theorem, the Cauchy criterion, Dirichlet's and Riemann's rearrangement theorem, the Heine-Borel theorem, the intermediate value theorem, and many others. This course is excellent preparation for graduate studies in mathematics, statistics, and economics.

**Requirements/Evaluation:** Problem sets, exams, and an expository essay.

**Prerequisites:** MATH 250 or permission of instructor.

**Enrollment Limit:** 40

**Enrollment Preferences:** Juniors and Seniors.

**Expected Class Size:** 25

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** It's math.

Fall 2022

**MATH 351 (S) Applied Real Analysis (QFR)**

Real analysis or the theory of calculus (derivatives, integrals, continuity, convergence) starts with a deeper understanding of real numbers and limits. Applications in the calculus of variations or "infinite-dimensional calculus" include geodesics, harmonic functions, minimal surfaces, Hamilton's action and Lagrange's equations, optimal economic strategies, nonEuclidean geometry, and general relativity.

**Requirements/Evaluation:** homework, classwork, and exams

**Prerequisites:** MATH 150 and MATH 250 or permission of the instructor.

**Enrollment Limit:** 30

**Enrollment Preferences:** Seniors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** Math

Spring 2023

LEC Section: 01 MR 2:35 pm - 3:50 pm Mihai Stoiciu

**MATH 355 (F)(S) Abstract Algebra (QFR)**

Algebra gives us tools to solve equations. The integers, the rationals, and the real numbers have special properties which make algebra work according to the circumstances. In this course, we generalize algebraic processes and the sets upon which they operate in order to better understand, theoretically, when equations can and cannot be solved. We define and study abstract algebraic structures such as groups, rings, and fields, as well as the concepts of factor group, quotient ring, homomorphism, isomorphism, and various types of field extensions. This course introduces students to abstract rigorous mathematics.

**Requirements/Evaluation:** Problem sets and exams

**Prerequisites:** MATH 250 or permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** Students who have officially declared a major that requires Math 355.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** 300-level math course

Fall 2022

LEC Section: 02 MWF 12:00 pm - 12:50 pm Thomas A. Garrity

**MATH 361 (F) Theory of Computation (QFR)**

**Cross-listings:** MATH 361 CSCI 361

**Secondary Cross-listing**

This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory--the examination of what problems can be solved and what problems cannot be solved--and the study of complexity theory--the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

**Class Format:** Lecture content will be delivered through asynchronously viewed video modules. Conference sections meeting twice per week will be used for synchronous discussions. Students should sign up for lecture and one conference section.

**Requirements/Evaluation:** online multiple choice and short answer questions, weekly problem sets in groups, a research project, and a final examination

**Prerequisites:** CSCI 256 or both a 300-level MATH course and permission of instructor

**Enrollment Limit:** 48(12/con)

**Enrollment Preferences:** current or expected Computer Science majors

**Expected Class Size:** 48

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MATH 361 (D3) CSCI 361 (D3)

**Quantative/Formal Reasoning Notes:** This course include regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

**Attributes:** COGS Interdepartmental Electives

CON Section: 05 TF 1:10 pm - 2:25 pm Aaron M. Williams

### **MATH 374 (F) Topology (QFR)**

In Real Analysis you learned about metric spaces---any set of objects endowed with a way of measuring distance---and the topology of sets in such spaces (open, closed, bounded, etc). In this course we flip this on its head: we explore how to develop analysis (limits, continuity, etc) in spaces where the topology is known but the metric is not. This will lead us to a bizarre and fascinating version of geometry in which we cannot distinguish between shapes that can be continuously deformed into one another. Not only does this theory turn out to be beautiful in the abstract, it plays an important role in math, physics, and data analysis. This course is excellent preparation for graduate programs in mathematics.

**Requirements/Evaluation:** Problem sets, exams, an expository essay.

**Prerequisites:** MATH 350 or 351; not open to students who have taken MATH 323. If you didn't cover metric spaces in real analysis, that's OK!

**Enrollment Limit:** 30

**Enrollment Preferences:** Juniors and seniors

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** It's math.

Fall 2022

LEC Section: 01 TR 9:55 am - 11:10 am Leo Goldmakher

### **MATH 383 (F) Complex Analysis (QFR)**

The calculus of complex-valued functions turns out to have unexpected simplicity and power. As an example of simplicity, every complex-differentiable function is automatically infinitely differentiable. As examples of power, the so-called "residue calculus" permits the computation of "impossible" integrals, and "conformal mapping" reduces physical problems on very general domains to problems on the round disc. The easiest proof of the Fundamental Theorem of Algebra, not to mention the first proof of the Prime Number Theorem, used complex analysis.

**Requirements/Evaluation:** homework, classwork, and exams

**Prerequisites:** MATH 350 or MATH 351 or permission of instructor

**Enrollment Limit:** 40

**Enrollment Preferences:** 40

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** this course is not a senior seminar, so it does not fulfill the senior seminar requirement for the Math major

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** Advanced mathematics course with weekly or daily problem sets.

Not offered current academic year

### **MATH 390 Undergraduate Research Topics in Algebra (QFR)**

The well-known trace map on matrices can be generalized to a map on other algebraic objects. Undergraduates, graduates students and experts in Representation Theory, Commutative Algebra and Algebraic Geometry have been driving recent developments in the theory of trace modules and finding exciting new applications in all of these these fields. This course will serve as an introduction to mathematical research with the aim of producing original research in modern trace theory. Students in this tutorial will read and synthesize research papers, discuss the formation of

research questions in pure mathematics, and engage in original mathematical research.

**Requirements/Evaluation:** oral presentations; writing assignments (summarizing papers, reflections on mathematical research, original research); participation in the course project

**Prerequisites:** Math 355

**Enrollment Limit:** 10

**Enrollment Preferences:** Juniors and Seniors

**Expected Class Size:** 7

**Grading:**

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This is post-core math class; students will be required to produce mathematical proofs.

Not offered current academic year

### **MATH 391 (F) Introduction to computer algebra (QFR)**

Students will learn new mathematics in the context of computer-based exposition, experimentation, and interaction. They will gain proficiency with Sage, GAP, Macaulay2, or Mathematica, and possibly one of the more-specialized systems SnapPea, kenzo, magma, MATLAB, Perseus, coq, etc. Individuals and teams will build interactive demonstrations of mathematical theorems, which will then be appreciated by the instructor and the rest of the class. No prior programming experience is expected.

**Requirements/Evaluation:** exams, homework, projects

**Prerequisites:** Math 355 or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** math majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** Mathematical programming requires complete synthesis of abstract concepts to produce computer code, which is necessarily formal.

Not offered current academic year

### **MATH 392 (S) Undergraduate Research Topics in Graph Theory (WS) (QFR)**

Graph theory is a vibrant area of research with many applications to the social sciences, psychology, and economics. In this project-based tutorial, students will select among the presented topics and will develop research questions and undertake original research in the field. Student assessment is based on drafts of research project manuscript and presentations.

**Requirements/Evaluation:** presentations and written project manuscript

**Prerequisites:** MATH 355 or permission of the instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** programming experience, students with interests in the intersection of combinatorics and graph theory

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (WS) (QFR)

**Writing Skills Notes:** This course will require multiple revisions of a manuscript related to the research project at hand. The final result will be a 10-20 page research article and the course will be designed as a writing intensive course.

**Quantative/Formal Reasoning Notes:** The course deals with mathematical research in graph theory and is a quantitative and formal reasoning course.

Not offered current academic year

### **MATH 393 (S) Research Topics in Combinatorics (WS) (QFR)**

Combinatorics provides techniques and tools to enumerate, examine, and investigate the existence of discrete mathematical structures with certain properties. There are numerous areas of applications including algebra, discrete geometry, and number theory. In this project-based research course students will work in small groups to learn combinatorial techniques and tools in order to develop research questions and begin tackling unsolved problems in combinatorics.

**Requirements/Evaluation:** Students will be evaluated through written drafts of a manuscript and its revisions and multiple in-class presentation.

**Prerequisites:** Math 355

**Enrollment Limit:** 19

**Enrollment Preferences:** Post-core mathematics majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (WS) (QFR)

**Writing Skills Notes:** The main goal of this course is to undertake original research in combinatorics, as such student assessment is based on developing positive collaboration skills, and improving technical written and oral skills in mathematics through manuscript draft submissions and in-class presentations. Students will provide multiple drafts of their manuscript and in right of this the course will be writing intensive.

**Quantative/Formal Reasoning Notes:** The main goal of this course is to undertake original research in the math field of mathematics. See above for more details.

Spring 2023

SEM Section: 01 Cancelled

#### **MATH 394 (S) Galois Theory (QFR)**

Some equations--such as  $x^5 - 1 = 0$ --are easy to solve. Others--such as  $x^5 - x - 1 = 0$ --are very hard, if not impossible (using standard mathematical operations). Galois discovered a deep connection between field theory and group theory that led to a criterion for checking whether or not a given polynomial can be easily solved. His discovery also led to many other breakthroughs, for example proving the impossibility of squaring the circle or trisecting a typical angle using compass and straightedge. From these not-so-humble beginnings, Galois theory has become a fundamental concept in modern mathematics, from topology to number theory. In this course we will develop the theory and explore its applications to other areas of math.

**Requirements/Evaluation:** written homeworks and exams

**Prerequisites:** MATH 355

**Enrollment Limit:** 50

**Enrollment Preferences:** discretion of the instructor

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** this course is not a senior seminar, so it does not fulfill the senior seminar requirement for the Math major

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This is a math class

Not offered current academic year

#### **MATH 397 (F) Independent Study: Mathematics**

Directed 300-level independent study in Mathematics.

**Prerequisites:** permission of department

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

Fall 2022

IND Section: 01 TBA Mihai Stoiciu

**MATH 398 (S) Independent Study: Mathematics**

Directed 300-level independent study in Mathematics.

**Prerequisites:** permission of department

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

Spring 2023

IND Section: 01 TBA Mihai Stoiciu

**MATH 401 (S) Functional Analysis (QFR)**

Functional analysis can be viewed as linear algebra on infinite-dimensional spaces. It is a central topic in Mathematics, which brings together and extends ideas from analysis, algebra, and geometry. Functional analysis also provides the rigorous mathematical background for several areas of theoretical physics (especially quantum mechanics). We will introduce infinite-dimensional spaces (Banach and Hilbert spaces) and study their properties. These spaces are often spaces of functions (for example, the space of square-integrable functions). We will consider linear operators on Hilbert spaces and investigate their spectral properties. A special attention will be dedicated to various operators arising from mathematical physics, especially the Schrodinger operator.

**Class Format:** lecture

**Requirements/Evaluation:** weekly problem sets, two midterm exams, final exam

**Prerequisites:** MATH 350 or 351 or permission of instructor

**Enrollment Limit:** 40

**Enrollment Preferences:** Mathematics and Physics majors; seniors

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This is an advance course in Mathematical Analysis.

Not offered current academic year

**MATH 402 (F) Measure Theory and Hilbert Spaces (QFR)**

How large is the unit square? One might measure the number of individual points in the square (uncountably infinite), the area of the square (1), or the dimension of the square (2). But what about for more complicated sets, e.g., the set of all rational points in the unit square? What's the area of this set? What's the dimension? In this course we'll come up with precise ways to measure size -- length, area, volume, dimension -- that apply to a broad array of sets. Along the way we'll encounter Lebesgue measure and Lebesgue integration, Hausdorff measure and fractals, space-filling curves and the Banach-Tarski paradox. We will also investigate Hilbert spaces, mathematical objects that combine the tidiness of linear algebra with the power of analysis and are fundamental to the study of differential equations, functional analysis, harmonic analysis, and ergodic theory, and also apply to fields like quantum mechanics and machine learning. This material provides good preparation for graduate studies in mathematics, statistics and economics.

**Class Format:** Discussion-based course.

**Requirements/Evaluation:** performance on homework assignments and exams

**Prerequisites:** MATH 350 or MATH 351 or permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** Seniors

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** Math

Not offered current academic year

#### **MATH 404 (F) Random Matrix Theory (QFR)**

Initiated by research in multivariate statistics and nuclear physics, the study of random matrices is nowadays an active and exciting area of mathematics, with numerous applications to theoretical physics, number theory, functional analysis, optimal control, and finance. Random Matrix Theory provides understanding of various properties (most notably, statistics of eigenvalues) of matrices with random coefficients. This course will provide an introduction to the basic theory of random matrices, starting with a quick review of Linear Algebra and Probability Theory. We will continue with the study of Wigner matrices and prove the celebrated Wigner's Semicircle Law, which brings together important ideas from analysis and combinatorics. After this, we will turn our attention to Gaussian ensembles and investigate the Gaussian Orthogonal Ensemble (GOE) and the Gaussian Unitary Ensemble (GUE). The last lectures of the course will be dedicated to random Schrodinger operators and their spectral properties (in particular, the phenomenon called Anderson localization). Applications of Random Matrix Theory to theoretical physics, number theory, statistics, and finance will be discussed throughout the semester.

**Requirements/Evaluation:** homework assignments and exams

**Prerequisites:** experience with Real Analysis (MATH 350 or MATH 351) and with Probability (MATH 341 or STAT 201)

**Enrollment Limit:** 40

**Enrollment Preferences:** Mathematics and Statistics majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This course expands ideas in probability and statistics from random variables ( $1 \times 1$  random matrices) to  $n \times n$  random matrices. The students will learn to model complex physical phenomena using random matrices and study them using rigorous mathematical tools and concepts.

Not offered current academic year

#### **MATH 405 (S) Representation Theory and Special Functions (QFR)**

Representation theory is at the heart of much of modern mathematics. It provides a link between ideas of symmetries, groups and matrices. It has applications from number theory to Fourier Analysis to elementary particle theory. In part, representation theory is a method for producing interesting functions. While not having a single definition, special functions are "functions that have names." Over the last few hundred years, scientists have needed to define and develop certain families of functions, in order to describe different physical phenomena. These families started to be named, and include Bessel functions, Hermite functions, Laguerre functions and more generally hypergeometric functions. In recent years it has been seen that these different types of functions are best understood through the lens of symmetry and in particular via representation theory. This course will be an introduction to representation theory, starting with finite groups, while at the same time being an introduction to special functions. Thus the course will be a mix of abstract algebra, matrices, calculus and analysis.

**Requirements/Evaluation:** By exams and homework

**Prerequisites:** Math 350 or Math 351, and Math 355

**Enrollment Limit:** 50

**Enrollment Preferences:** By instructor preference

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This is a math course

Not offered current academic year

#### **MATH 408 (F) L-Functions and Sphere Packing (QFR)**

Optimal packing problems arise in many important problems, and have been a source of excellent mathematics for centuries. The Kepler Problem (what is the most efficient way to pack balls in three-space) is a good example. The original formulation has been used in such diverse areas as stacking cannonballs on battleships to grocers preparing fruit displays, and its generalizations allow the creation of powerful error detection and

correction codes. While the solution of the Kepler Problem is now known, the higher dimensional version is very much open. There has been remarkable progress in the last few years, with number theory playing a key role in these results. We will develop sufficient background material to understand many of these problems and the current state of the field. Pre-requisites are real analysis.

**Requirements/Evaluation:** Class participation, homework, exams and participation in writing a textbook on the material. Each student will be responsible for working on a chapter of a book based on this material. In addition to obtaining critical writing feedback from myself and my co-author (who is a world expert in the subject), depending on timing we will also be able to share comments from an editor of a major publishing house or a referee. Chapters can range from short snapshots of a subject, on the order of 5 pages, to longer technical derivations of perhaps 10-30 pages.

**Prerequisites:** Math 350 or 351

**Enrollment Limit:** 40

**Enrollment Preferences:** Senior math majors, students planning on graduate study in a STEM field

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This is a 400 level math class

Not offered current academic year

### **MATH 409 (F) The Little Questions (QFR)**

Using math competitions such as the Putnam Exam as a springboard, in this class we follow the dictum of the Ross Program and "think deeply of simple things". The two main goals of this course are to prepare students for competitive math competitions, and to get a sense of the mathematical landscape encompassing elementary number theory, combinatorics, graph theory, and group theory (among others). While elementary frequently is not synonymous with easy, we will see many beautiful proofs and "a-ha" moments in the course of our investigations. Students will be encouraged to explore these topics at levels compatible with their backgrounds.

**Requirements/Evaluation:** Homework, exams, presentations.

**Prerequisites:** Real Analysis (either Math 350 or 351) and Abstract Algebra (Math 355), or permission of the instructor.

**Enrollment Limit:** 30

**Enrollment Preferences:** Math/stat senior majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This is a 400 level math class.

Fall 2022

LEC Section: 01 MWF 10:00 am - 10:50 am Steven J. Miller

### **MATH 411 (F) Commutative Algebra (QFR)**

Commutative Algebra is an essential area of mathematics that provides indispensable tools to many areas, including Number Theory and Algebraic Geometry. This course will introduce you to the fundamental concepts for the study of commutative rings, with a special focus on the notion of "prime ideals," and how they generalize the well-known notion of primality in the set of integers. Commutative algebra has applications ranging from algebraic geometry to coding theory. For example, one can use commutative algebra to create error correcting codes. It is perhaps most often used, however, to study curves and surfaces in different spaces. To understand these structures, one must study polynomial rings over fields. This course will be an introduction to commutative algebra. Possible topics include polynomial rings, localizations, primary decomposition, completions, and modules.

**Requirements/Evaluation:** homework and exams

**Prerequisites:** MATH 355 or permission of instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** Math majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** It is a 400-level math course

Not offered current academic year

**MATH 412 (S) Mathematical Biology (QFR)**

This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications may include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

**Requirements/Evaluation:** problem sets, quizzes/exams, participation, final project and paper

**Prerequisites:** MATH 250 and MATH 309, or permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** preference for senior math/stats major and also based on an interest statement

**Expected Class Size:** 30

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** The course will introduce methods for developing and analyzing mathematical models.

**Attributes:** PHLH Methods in Public Health

Spring 2023

LEC Section: 01 TR 11:20 am - 12:35 pm Julie C. Blackwood

**MATH 413 (S) Computational Algebraic Geometry (QFR)**

Algebraic geometry is the study of shapes described by polynomial equations. It has been a major part of mathematics for at least the past two hundred years, and has influenced a tremendous amount of modern mathematics, ranging from number theory to robotics. In this course, we will develop the Ideal-Variety Correspondence that ties geometric shapes to abstract algebra, and will use computational tools to explore this theory in a very explicit way.

**Requirements/Evaluation:** Evaluation will be based on weekly problem sets, three exams, and final project. Any students who have taken Math 411 should consult with the instructor before enrolling in this course.

**Prerequisites:** Math 355

**Enrollment Limit:** 30

**Enrollment Preferences:** Preference given to senior math majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This course is all quantitative and formal reasoning.

Spring 2023

LEC Section: 01 TR 9:55 am - 11:10 am Ralph E. Morrison

**MATH 419 (S) Algebraic Number Theory (QFR)**

We all know that integers can be factored into prime numbers and that this factorization is essentially unique. In more general settings, it often still makes sense to factor numbers into "primes," but the factorization is not necessarily unique! This surprising fact was the downfall of Lamé's attempted

proof of Fermat's Last Theorem in 1847. Although a valid proof was not discovered until over 150 years later, this error gave rise to a new branch of mathematics: algebraic number theory. In this course, we will study factorization and other number-theoretic notions in more abstract algebraic settings, and we will see a beautiful interplay between groups, rings, and fields.

**Requirements/Evaluation:** homework assignments and exams

**Prerequisites:** MATH 355, or permission of instructor

**Enrollment Limit:** 25

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

Not offered current academic year

### **MATH 420 (S) Analytic Number Theory (QFR)**

How many primes are smaller than  $x$ ? How many divisors does an integer  $n$  have? How many different numbers appear in the  $N \times N$  multiplication table? Precise formulas for these quantities probably don't exist, but over the past 150 years tremendous progress has been made towards understanding these and similar questions using tools and methods from analysis. The goal of this tutorial is to explain and motivate the ubiquitous appearance of analysis in modern number theory--a surprising fact, given that analysis is concerned with continuous functions, while number theory is concerned with discrete objects (integers, primes, divisors, etc). Topics to be covered will include some subset of the following: asymptotic analysis, partial and Euler-Maclaurin summation, counting divisors and Dirichlet's hyperbola method, the randomness of prime factorization and the Erdos-Kac theorem, the partition function and the saddle point method, the prime number theorem and the Riemann zeta function, primes in arithmetic progressions and Dirichlet L-functions, the Goldbach conjecture and the circle method, and sieve methods and gaps between primes.

**Requirements/Evaluation:** Regularly preparing lectures and writing expository essays in LaTeX. No exams.

**Prerequisites:** MATH 350 or MATH 351 and familiarity with basic modular arithmetic are hard prerequisites. Familiarity with complex analysis and abstract algebra recommended, but not required.

**Enrollment Limit:** 10

**Enrollment Preferences:** Students with complex analysis background will be given priority.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** It's math.

Not offered current academic year

### **MATH 422 (F) Algebraic Topology (QFR)**

Is a sphere really different from a torus? Can a sphere be continuously deformed to a point? Algebraic Topology concerns itself with the classification and study of topological spaces via algebraic methods. The key question is this: How do we really know when two spaces are different and in what senses can we claim they are the same? Our answer will use several algebraic tools such as groups and their normal subgroups. In this course we will develop several notions of "equality" starting with the existence of homeomorphisms between spaces. We will then explore several weakenings of this notion, such as homotopy equivalence, having isomorphic homology or fundamental groups, and having homeomorphic universal covers.

**Requirements/Evaluation:** homework and exams

**Prerequisites:** MATH 355 or permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** Math majors primarily, the juniors and seniors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

Not offered current academic year

**MATH 426 (F) Differential Topology (QFR)**

Differential topology marries the rubber-like deformations of topology with the computational exactness of calculus. This subfield of mathematics asks and answers questions like "Can you take an integral on the surface of a doughnut?" and includes far-reaching applications in relativity and robotics. This tutorial will provide an elementary and intuitive introduction to differential topology. We will begin with the definition of a manifold and end with a generalized understanding of Stokes Theorem.

**Requirements/Evaluation:** weekly homework, weekly presentations, and final paper

**Prerequisites:** MATH 350 (students who have not taken MATH 250 may enroll only with permission of the instructor)

**Enrollment Limit:** 10

**Enrollment Preferences:** seniors, majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** There will be weekly math problem sets.

Not offered current academic year

**MATH 427 (S) Tiling Theory (QFR)**

Since people first used stones and bricks to tile the floors of their domiciles, tiling has been an area of interest. Practitioners include artists, engineers, designers, architects, crystallographers, scientists and mathematicians. This course will be an investigation into the mathematical theory of tiling. The course will focus on tilings of the plane, including topics such as the symmetry groups of tilings, types of tilings, random tilings, the classification of tilings and aperiodic tilings. We will also look at tilings of the sphere, tilings of the hyperbolic plane, and tilings in higher dimensions, including "knotted tilings".

**Requirements/Evaluation:** problem assignments, exams and a presentation/paper

**Prerequisites:** MATH 250 Linear Algebra and MATH 355 Abstract Algebra

**Enrollment Limit:** 30

**Enrollment Preferences:** senior majors, seniors, juniors, sophomores, first-year students (this is a senior seminar, one of which is required for all senior majors, so they have first preference)

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** Mathematics course

Spring 2023

LEC Section: 01 MWF 9:00 am - 9:50 am Colin C. Adams

**MATH 428 (S) Catching Robbers and Spreading Information (QFR)**

Cops and robbers is a widely studied game played on graphs that has connections to searching algorithms on networks. The cop number of a graph is the smallest number of cops needed to guarantee that the cops can catch a robber in the graph. Similar combinatorial games such as "zero forcing" can be used to model the spread of information. The idea of "throttling" is to spread the information (or catch the robber) as efficiently as possible. This course will survey some of the main results about cops and robbers and the cop number. We will also explore recent research on throttling for cops and robbers, zero forcing, and other variants.

**Class Format:** interactive activities and discussion

**Requirements/Evaluation:** problem sets, investigation journal, final presentation

**Prerequisites:** MATH 200 and MATH 355

**Enrollment Limit:** 25

**Enrollment Preferences:** seniors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** The course will involve mathematical proofs.

Not offered current academic year

### **MATH 433 (S) Mathematical Modeling (QFR)**

Mathematical modeling means (1) translating a real-life problem into a mathematical object, (2) studying that object using mathematical techniques, and (3) interpreting the results in order to learn something about the real-life problem. Mathematical modeling is used in biology, economics, chemistry, geology, sociology, political science, art, and countless other fields. This is an advanced, seminar-style, course appropriate for students who have strong enthusiasm for applied mathematics, data science, and collaborative teamwork.

**Requirements/Evaluation:** Students will complete reading assignments, writing assignments, modeling activities, research projects, and will record several presentations to be shared with the rest of the class. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor follows the policy of "ungrading." Over the course of the semester, students will develop a rubric to assess their own learning and will evaluate themselves according to this rubric.

**Prerequisites:** MATH 250; MATH 309 or similar; and some experience with computer programming (equivalent to CSCI 134 or MATH 307).

**Enrollment Limit:** 20

**Enrollment Preferences:** Professor's discretion

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This course focuses substantially on using mathematical and statistical tools and frameworks to describe, predict, and understand real-world systems.

Not offered current academic year

### **MATH 434 (F) Applied Dynamics and Optimal Control (QFR)**

We seek to understand how dynamical systems evolve, how that evolution depends on the various parameters of the system, and how we might manipulate those parameters to optimize an outcome. We will explore the language of dynamics by deepening our understanding of differential and difference equations, study parameter dependence and bifurcations, and explore optimal control through Pontryagin's maximum principle and Hamilton-Jacobi-Bellman equations. These tools have broad application in ecology, economics, finance, and engineering, and we will draw on basic models from these fields to motivate our study.

**Requirements/Evaluation:** exams and homework assignments

**Prerequisites:** MATH 209 or PHYS 210, and MATH 350 or 351, or permission of the instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference will be given to senior math majors.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This is a 400 level math course.

Not offered current academic year

### **MATH 435 (F) Chip-firing Games on Graphs (QFR)**

Starting with a graph (a collection of nodes connected by edges), place an integer number of poker chips on each vertex. Move these chips around according to "chip-firing moves", where a vertex donates a chip along each edge. These simple and intuitive games quickly lead to challenging mathematics with applications ranging from dynamical systems to algebraic geometry. In this course we'll build up a mathematical framework for studying chip-firing games, drawing on linear algebra and group theory. We'll discover algorithms for winning these games, and study their complexity; and we'll prove graph-theoretic versions of famous results like the Riemann-Roch theorem. A key component of this course will be research projects that draw on open questions about chip-firing.

**Requirements/Evaluation:** Weekly homework for the first eight weeks, four quizzes spaced evenly throughout the semester, and a cumulative project worked on throughout the semester (10-20 pages)

**Prerequisites:** Math 250 and Math 355

**Enrollment Limit:** 25

**Enrollment Preferences:** Math majors who need the course to graduate

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** All topics are quantitative

Not offered current academic year

### **MATH 441 (F) Information Theory and Applications**

**Cross-listings:** MATH 441 CSCI 441 STAT 441

Secondary Cross-listing

What is information? And how do we communicate information effectively? This course will introduce students to the fundamental ideas of Information Theory including entropy, communication channels, mutual information, and Kolmogorov complexity. These ideas have surprising connections to a fields as diverse as physics (statistical mechanics, thermodynamics), mathematics (ergodic theory and number theory), statistics and machine learning (Fisher information, Occam's razor), and electrical engineering (communication theory).

**Requirements/Evaluation:** Weekly homeworks, midterm(s), final exam.

**Prerequisites:** Math/Stat 341; Math 150 or 151; or permission of instructor.

**Enrollment Limit:** 30

**Enrollment Preferences:** Seniors; mathematics and statistics majors.

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MATH 441 (D3) CSCI 441 (D3) STAT 441 (D3)

Not offered current academic year

### **MATH 442 (F) Introduction to Descriptive Set Theory (QFR)**

Descriptive set theory (DST) combines techniques from analysis, topology, set theory, combinatorics, and other areas of mathematics to study definable (typically Borel) subsets of Polish spaces. The first part of this course will cover the topics necessary to understand the main objects of study in DST: we will develop comfort with point-set topology (enough to juggle with Polish spaces and Borel sets), and set theory (just well-orderings and cardinality). The second part of the course will feature selected topics in descriptive set theory: for example, trees, the perfect set property, Baire category, and infinite games.

**Requirements/Evaluation:** Evaluation based on homework, exams, and classroom participation.

**Prerequisites:** Math 250 - Linear Algebra, Math 350/351 Real Analysis/Applied Real Analysis

**Enrollment Limit:** 14

**Enrollment Preferences:** Senior Math Majors, then non-Senior Math Majors

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** Mathematics course in descriptive set theory.

**MATH 453 (S) Partial Differential Equations (QFR)**

In this course, we further explore the world of differential equations. Mainly, we cover topics in partial differential equations. Partial Differential Equations (PDEs) are fundamental to the modeling of many natural phenomena, arising in many fields, including fluid mechanics, heat and mass transfer, electromagnetic theory, finance, elasticity, and more. The goals of this course are to discuss the following topics: classification of PDEs in terms of order, linearity and homogeneity; physical interpretation of canonical PDEs; solution techniques, including separation of variables, series solutions, integral transforms, and the method of characteristics.

**Requirements/Evaluation:** Evaluation will be based on homework, projects, and exams.

**Prerequisites:** MATH 150-151; MATH/PHYS 210 or MATH 309

**Enrollment Limit:** 20

**Enrollment Preferences:** Mathematics and Physics majors.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This is an advanced mathematics class dedicated to the study of partial differential equations (PDEs). These equations are the most important mathematical tools for the study of complex physical phenomena such as waves and fluids (including both air and water), heat transfer, electromagnetism, and finance.

**MATH 456 (F) Representation Theory (QFR)**

Representation theory has applications in fields such as physics (via models for elementary particles), engineering (considering symmetries of structures), and even in voting theory (voting for committees in agreeable societies). This course will introduce the concepts and techniques of the representation theory of finite groups, and will focus on the representation theory of the symmetric group. We will undertake this study through a variety of perspectives, including general representation theory, combinatorial algorithms, and symmetric functions.

**Requirements/Evaluation:** evaluation will be based primarily on homework, in class presentations, and exams

**Prerequisites:** MATH 355

**Enrollment Limit:** 40

**Enrollment Preferences:** junior and senior Math majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This is a 400-level Math course.

Not offered current academic year

**MATH 458 (S) Algebraic Combinatorics (WS) (QFR)**
