Difference, Power, and Equity Notes: This course offers students the opportunity to think critically about the experiences of socially marginalized groups throughout the globe with a particular emphasis on the Latin American diaspora in the U.S. It emphasizes forms and experiences of displacement produced by the histories of European colonialism and U.S. imperialism.

Attributes: LATS Countries of Origin + Transnationalism Elect

Fall 2023
SEM Section: 01 Cancelled

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

Requirements/Evaluation: at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 105(D2) ENGL 105(D1)

Writing Skills Notes: Students do at least 20 pages of writing (4-5 papers) and are required to revise several papers. We also devote significant class time to talking about successful academic writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.
Difference, Power, and Equity Notes: This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equity and power and what kinds of literary and cultural forms writers utilize to illuminate these differences.

Fall 2023
SEM Section: 01   TR 11:20 am - 12:35 pm   Kathryn R. Kent

ENGL 109 (S) Narrating Change   (DPE) (WS)
How do we narrate change? Change is radical (from radix, "root," thus pertaining to what is essential) when it alters how we experience, think, and act. If we change radically, and the structure of our experience is altered, how are we then to connect what comes before to what comes after? On the other hand, if change does not cause such a transformation in the self, then how is it experienced? The works we will consider in this class will help us examine the ways human beings work through, think about, and represent change.

Requirements/Evaluation: Four writing assignments, participation in classroom discussions and roundtables, and at least two individual conferences.
Prerequisites: no prerequisites
Enrollment Limit: 19
Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will write more than 20 pages. They will receive extensive feedback on their writing from me and will revise and expand one essay. Texts read in class will also be examined as models for how to organize thought through writing.

Difference, Power, and Equity Notes: Almost all readings for this class require sustained engagement with questions of power, identity, and socioeconomic inequality.

Spring 2024
SEM Section: 01   MR 2:35 pm - 3:50 pm   Paresh Chandra

ENGL 113 (F) The Feminist Poetry Movement   (DPE) (WS)
Cross-listings: AMST 113 WGSS 113 ENGL 113

Primary Cross-listing
Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: two-three short analysis papers, creative (1-2 pages), Perusall, curated final project (archival exhibit and digital project), presentations
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first years
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 113(D2) WGSS 113(D2) ENGL 113(D1)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: Perusall annotation, three four-to-five-page graded papers, one creative assignment, and a final digital research project (8-10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

Fall 2023
SEM Section: 01    TF 1:10 pm - 2:25 pm     Bethany Hicok

ENGL 221  (F)  Hip Hop Culture  (DPE) (WS)

Cross-listings: ENGL 221 AFR 222 MUS 217 AMST 222

Secondary Cross-listing
The course examines how young people of color created hip hop culture in the postindustrial ruins of New York City, a movement that would eventually grow into a global cultural industry. Hip hop music producers have long practiced "diggin' in the crates"—a phrase that denotes searching through record collections to find material to sample. In this course, we will examine the material and technological history of hip hop culture, with particular attention to hip hop's tendency to sample, remix, mash-up, and repurpose existing media artifacts to create new works or art. We will use a media archaeological approach to examine the precise material conditions that first gave rise to graffiti art, deejaying, rapping, and breakdancing, and to analyze hip hop songs, videos, and films. Media archaeology is a critical and artistic practice that seeks to interpret the layers of significance embedded in cultural artifacts. How does hip hop archaeology remix the past, the present, and the future? How do the historical, political, and cultural coding of hip hop artifacts change as they increasingly become part of institutional collections, from newly established hip hop archives at Cornell and Harvard to the Smithsonian National Museum of African American History and Culture?

Requirements/Evaluation: Four papers, project with presentation, and a final exam.

Prerequisites: None

Enrollment Limit: 19
Enrollment Preferences: AMST majors or prospective majors
Expected Class Size: 19
Grading: no pass/fail option, yes fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 221(D1) AFR 222(D2) MUS 217(D1) AMST 222(D2)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to use an effective descriptive and critical vocabulary to discuss and analyze artifacts of hip hop culture, with attention to race, gender, class, sexuality, and other categories of social difference. They must understand the
material, technological, historical, and cultural contexts that gave rise to hip hop culture, and proficiently synthesize scholarly perspectives related to the formation and transformations of hip hop from the early 70s to the early 21st cent.

ENGL 231  (F)(S) Literature of the Sea  (DPE)

Cross-listings:  ENGL 231 MAST 231

Secondary Cross-listing

The ocean, and human relationships with it, have been central features of literatures and cultures around the world for more than a thousand years. But since literary study is typically based around authors' homelands, careful examination of the oceanic experience is often pushed to the periphery—an "empty space" to be crossed between nations, a "vast darkness" antithetical to human life, or a mirror for land-born concerns. Increasingly, however, scholars and readers are centering the sea and stories about it as a means stepping outside human frameworks of space and time, situating the complex emotions and narratives inspired by the ocean into a complex network of geologic history and teeming other-than-human life. This course examines a wide range of texts and perspectives on the ocean and human relationships with it. Doing so will help us consider how literature both plays into and subverts dominant viewpoints of the ocean. Through texts that consider 19th-century whaling, the Middle Passage, the postcolonial Caribbean, and islands throughout the Pacific Ocean, we will explore a range of questions, including: What can we learn from examining efforts to write about the ocean? How do ocean stories help individuals understand themselves, their communities, and their place in global environments? What can the range of cultural and literary perspectives on our "single, global ocean" reveal about the ways different people are both connected with and profoundly distant from each other? Most importantly, we will practice, as a classroom community, different strategies for carefully reading texts while connecting them to cultural traditions, surrounding environments, and personal experiences.

Class Format: weekly roundtable discussions, including coastal and near-shore field trips and multiple field seminars.

Requirements/Evaluation:  regular papers, class participation, journal-writing, and a final assignment

Prerequisites:  N/A

Enrollment Limit:  25

Enrollment Preferences:  Williams-Mystic Students only

Expected Class Size:  20

Grading:  no pass/fail option,   no fifth course option

Unit Notes:  offered only at Mystic Seaport

Distributions:  (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 231(D1) MAST 231(D1)

Difference, Power, and Equity Notes:  This course focuses on the range of cultural perspectives about the sea, as well as the ways those perspectives can unsettle and challenge dominant narratives about the sea and its role in colonial expansion. Furthermore, this course centers voices that are typically overlooked in the genre of "Sea Literature," paying particular attention to Indigenous and African-American narratives about the ocean.

ENGL 253  (F) Feminist Theatres: A Global Perspective  (DPE) (WS)

Cross-listings:  THEA 250 COMP 247 ENGL 253 WGSS 250
What makes a work of theatre "feminist"? How do plays and performances across global networks engage with different models of feminism: liberal, radical, materialist, and intersectional? Why has feminism mattered to theatre-makers of the past? Should it still matter now? If so, what forms might future feminist theatres take? In this tutorial course, students will work in pairs to examine the social and political relation of feminism to the art and practice of theatre. Taking a global and comparative perspective on the subject, we will focus on the intersectionalities of gender, race, class, ethnicity, nationality, and sexual identity in the production of feminist-driven theatrical practices. Artists, companies, and movements to be considered may include: Spiderwoman Theatre, Adrienne Kennedy, Caryl Churchill, Sphinx Theatre Company, Ntozake Shange, Griselda Gambaro, Manjula Padmanabhan, Cherrie Moraga, Lisa Kron, Arethusa Speaks, Maya Krishna Rao, Tracie Chima Utolh-Ezeajugh, Alexis Scheer, Tori Sampson, Clare Barron, and others. Close analysis of source material will be informed by critical and autobiographical writings by: Audre Lorde, Judith Butler, bell hooks, Gloria Anzaldúa, Kimberlé Crenshaw, Eve K. Sedgwick, Gayatri Spivak, Jill Dolan, José E. Muñoz, and Donna Haraway. This course will follow a standard tutorial format, with students taking turns presenting or responding to their peer every other week; for their presentations, students will write a 5-page paper or, in up to two cases if they choose, offer their argumentation through more performance-driven methods (such as an oral argument, spoken-word monologue, or activist prompt).

Requirements/Evaluation: students will meet with instructor in pairs for an hour each week; every other week they will be responsible for sharing either a 5-page paper or, if they choose, in up to two cases, a more performance-driven presentation, such as: an oral argument, spoken-word monologue, or activist prompt (five presentations/papers in all). They will comment on / respond to their partner's papers/presentations in alternate weeks; emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and written and oral communication.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: THEA majors; WGSS majors; ENGL majors; COMP majors. Students from all majors are welcome and invited to contact Prof. Holzapfel about their interest in the class: ash2@williams.edu

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 250(D1) COMP 247(D1) ENGL 253(D1) WGSS 250(D2)

Writing Skills Notes: This course fulfills the writing skills requirement by engaging students in the active and creative process of critical writing, based on the notion that "writing is thinking, not thinking written down." Emphasis will be given to crafting and developing an argument, clarifying prose, selecting evidence, gaining authority, and incorporating theoretical ideas into an essay. We will also focus on the performance and presentation of written arguments.

Difference, Power, and Equity Notes: This tutorial examines intersections between gender, race, sexuality, class, nationality, and ethnicity in relation to theatre's ongoing engagement with feminism. We will consider how articulations of difference, power, and equity arise and are, in fact, prioritized in quite different ways within the politics of feminism itself, leading to their variable expressions through art.

Fall 2023

TUT Section: T1 TBA Amy S. Holzapfel

ENGL 279 (S) Introduction to Latinx Literature: From 'I Am Joaquin' to Borderless-Future Dreams (DPE) (WS)

This course is designed to introduce you to Latinx literary and cultural production from the 1930s through the present. We will read and encounter some of the most urgent and exciting literary-artistic texts produced by Latinxs in the U.S., focusing our attention on the post-war period and the flourishing of the Chicano Movement-related cultural renaissance of the late 1960s and early 70s, along with the Movement's significant aftermaths. This focus highlights the significant contributions Chicanx voices have made to Latinx literary studies and creates space for the incorporation of other Latin American-descended peoples (including Nuyoricanxs, Cubanxs, Central Americans, Afro-Latinx, and more). In addition to traditional narrative forms, we will also study poetry, films, photography, plays, murals, and performance art. In this way, you will gain a critical awareness of how Latinxs have historically engaged in various modes of artistic experiment to better question some of the twentieth and twenty-first centuries' most pressing global and local political issues (from migration to racism to coloniality to heterosexism to gentrification to U.S. imperialism and more). The course, at its core, will explore issues of identity-formation, particularly as they relate to Latinx struggles for equality on the fault lines of race, class, and gender/sexuality. Who and/or what is the Latinx subject, and how does the question of identity relate to struggles for cultural recognition and political
equality? To what extent does the Latinx subject's political freedom rest upon practices and processes of identity-formation or, alternatively, dis-identification? As we explore these questions, we will also examine how Latinxs come to inhabit and articulate a sense of space and place in the shifting landscapes of culture—from the city to the campo to the cultural in-between of the border.

**Requirements/Evaluation:** Active participation in in-class and online discussion, four 4-5 page essays, writing-related homework assignments, and an in-class presentation.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

**Enrollment Limit:** 19

**Enrollment Preferences:** Sophomores considering the English major, but juniors and seniors are also welcome.

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** The instructor will provide written feedback on student work. Students will receive timely feedback on essay assignments with suggestions for improvement and will revise their essays.

**Difference, Power, and Equity Notes:** This course offers students the opportunity to learn and think critically about Latinx community struggles throughout U.S. social history while examining the forms of cultural expression that arise out of and in relation to those struggles. It also delves into the intersectional nature of Latinx community struggles as they emerge along the fault lines of race, class, and gender/sexuality.

---

**ENGL 294 (F) On Occupations: Work, Colonization and Contemporary Life (DPE) (WS)**

**Cross-listings:** ENGL 294 COMP 299

**Primary Cross-listing**

Reading political essays, critical theory, historiography, and literary works, in this course we will ask what thinking through the different senses of "occupation" can teach us about contemporary life. The course wagers that there is a connection between why some nations are or were "under" occupation and why, as individuals, all of us must "have" occupations. On the one hand, we will think about work: What does it mean to have an occupation today? There was a time when most people could distinguish between the time of work and that of leisure. But we live under a different regime. What now is the difference between work and leisure for those working "gigs"? In the case of "creatives," Bifo Berardi says, it is the soul itself that has been put to work. And then there are those who are unemployed, i.e., those occupied by the most widespread form of work there is--looking for work. On the other hand, we will ask questions about colonialism: Did not Europe's occupation of the globe birth this world in which the only way to live is to be occupied in a narrow sense, i.e., to always be working or looking for work? And isn't one economic function of the occupation of peoples in our own times to create a cheap workforce? Finally, we will ask what art and political organizing can teach us about a "de-occupied" life--a life after work, a life without colonization. Writers will include Marx, Jyotiba Phule, Du Bois, Raymond Williams, Premchand, M. E. O'Brien and Eman Abdelhadi, Bifo Berardi, David Graeber, Mahatma Gandhi, Rabindra Nath Tagore, Mahasweta Devi, Edward Said etc.

**Requirements/Evaluation:** Students will read fifty to eighty pages each week. Each student will participate in at least one roundtable discussion. Writing assignments: three essays of 5-6 pages, one of which will be revised and expanded as a final essay of 8-10 pages.

**Prerequisites:** 100-level English course or a 5 on the AP literature exam, or permission of the instructor.

**Enrollment Limit:** 19

**Enrollment Preferences:** first-years and sophomores considering majoring in English or Comparative Literature, and English majors who have not yet taken a gateway course.

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENGL 294(D1) COMP 299(D1)
**Writing Skills Notes:** Students will write over 20 pages in the semester and they will receive extensive feedback.

**Difference, Power, and Equity Notes:** Students will read and discuss texts about the organization of power in contemporary society. They will reflect upon the economic structures that underpin a range of oppressive social forms.

**ENGL 299 (F) Let the Record Show: U.S. Literature of Research and Witness**  (DPE) (WS)

**Cross-listings:**  AMST 299 ENGL 299

**Secondary Cross-listing**

This is a course on the literature of research and witness in the U.S., from 1853 to the present. We will train our attention on works of long form journalism that stand at the intersection of reportage, archival history, documentary nonfiction, narrative and activism. The writers we study present quantitative and qualitative data that document the existence and effects of systemic racism, xenophobia, sexism, homophobia and uneven economic development. How have American writers defied disciplinary boundaries to speak truth to power? What critical reading skills are mobilized by books of sweeping scope and unflinching detail? The course will be taught in reverse chronological order. Readings include: Sarah Schulman, *Let the Record Show*; Layli Long Soldier, *Whereas*; Nicholas Lemann, *The Promised Land*; Theresa Hak Kyung Cha, *Dictee*; James Agee, *Let Us Now Praise Famous Men*, Tillie Olsen, *Yonnondio*; Ida B. Wells, *A Red Record*; and Harriet Beecher Stowe, *Key to Uncle Tom’s Cabin*.

**Requirements/Evaluation:** Evaluation will be based on class participation, writing and discussion. According to the tutorial format, you will be assigned a semester-long partner. You will be expected to write a critical paper every other week, alternating with the critical response to your partner’s work.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** This is a tutorial for sophomores. Priority will be given to potential American Studies majors, especially those who have taken AMST101; potential English majors will be considered as space is available.

**Expected Class Size:** 10

**Grading:** no pass/fail option,  no fifth course option

**Distributions:**  (D1)  (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 299(D2) ENGL 299(D1)

**Writing Skills Notes:** As per traditional tutorial format, this course will be writing intensive. Every week, one student will write a 5-page paper responding to the readings of the week; the other student will craft a response (a combination of written notes and critical conversation). The total amount of writing for each student will thus be upwards of 30 pages. there will be considerable attention given to argument, use of evidence, etc. The option to revise a paper will always be available.

**Difference, Power, and Equity Notes:** This course shares the core mission of the DPE initiative: to teach students how to "analyze the shaping of social differences, dynamics of unequal power, and processes of change." The course is built around U.S. texts that speak truth to power. Researching and exposing the quantitative and qualitative data that prove the existence and effects of systemic racism, xenophobia, sexism, homophobia and uneven economic development, the writers we will study merge research, writing and activism.

**ENGL 311 (S) Black Critical Theory, Black Avant-Garde**  (DPE)

**Cross-listings:**  AMST 374 ENGL 311 AFR 376

**Secondary Cross-listing**

What is the relationship between violence and what constitutes the Black avant-garde and Black critical theory? Is it possible to conceptualize the
latter two without an investigation of Black rebellion and its relationship between Black artistic and intellectual production? Can one argue that Black critique is none other than Black experimentation in form, or that Black abstraction is the requisite effector for all modes of Black praxis and thought? This course will explore these questions through a study of Black continental and diasporic avant-garde texts in multiple mediums. Alongside, we will also consider the emergence of contemporary Black critical theory, chronicling its development as both experimental and critical. Through the works of historical subjects of experimentation also considered to be objects critiquing in experimental form, the course will approach Black avant-gardism and Black critical theory as a productive opportunity to think about Blackness as critique, as experimentation, and as theoria. This pairing of Black avant-gardes and Black critical theory takes "avant" at its root--indicating what precedes or takes precedent--and "garde" as what is preeminent, or what protects. As such, we will start with the question of whether blackness, as an ideological fiction produced through violent historical ideologies and practices, could ever, or ever not, be anything but avant-garde?

Requirements/Evaluation: Weekly discussion posts and questions, a research presentation, and two 10-12 page papers

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Preference will be given to AMST majors and prospective majors, as well as ENGL and AFR majors or prospective majors.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

ENGL 316 (F) Unfinishing America (DPE) (WS)

Cross-listings: ENGL 316 AMST 326

Secondary Cross-listing

The Great American Novel is a moribund cliché. Few would argue that any one work of fiction could capture the essence of American life. In this class, we will flip the Great American Novel on its head by reading Ralph Ellison's unfinished second novel. After publishing the acclaimed Invisible Man in 1952, Ellison seemed poised to deliver the next Great American Novel. But he never did. When he died in 1994, 42 years later, he left behind thousands of pages of material, but no finished second novel. Why wasn't he able to finish it? Some of it was bad luck. Some of it was a struggle with genre and form. However, perhaps the real reason Ellison's novel proved impossible is what it was trying to say. This is a book about the historical trauma of racism. Therefore, the thesis of this class is that the Great American Novel cannot be written as long as American history remains whitewashed. Ellison's manuscript shows this in surprising ways, from its depiction of racial passing and the taboo of interracial sex to its extended exploration of Black and Indigenous cultures in the former Oklahoma Territory. In addition to Ellison, we will read the work of the Chicano author Tomás Rivera, whose fragmentary fictions provoke similar questions. This class culminates in a final project that asks students to "unfinish" an American cultural object.

Requirements/Evaluation: Class participation, Discussion facilitation, "Show and Tell" presentation of a cultural object, Reader's Guide, Final Project

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Sophomores, Juniors, and Seniors

Expected Class Size: 10-15

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
**Writing Skills Notes:** Each student will be responsible for producing a reader's guide to Ellison's unfinished second novel. Students will write, rewrite, and revise their reader's guide throughout the semester. Three drafts will be due throughout the semester. A quality reader's guide will highlight the book's main themes, profile the main characters, and retrace the book's development. Students will also complete one draft of a guide to Rivera's novella, due at the end of the semester.

**Difference, Power, and Equity Notes:** "Unfinishing America" satisfies the Difference, Power and Equity requirement because it calls into question mainstream American culture from Black, Chicano, and Indigenous perspectives. It interrogates the relations of power that have driven American history, from the Civil War and Westward expansion in the 19th century to the struggle for Civil Rights against Jim Crow in the 20th. Finally, it asks what it would mean to have true equity amidst great diversity in American culture.

**Attributes:** AMST Arts in Context Electives  AMST Comp Studies in Race, Ethnicity, Diaspora

**ENGL 324 (F) Romanticism, Belatedly**  (DPE)

**Cross-listings:**  ENGL 324 COMP 327

**Primary Cross-listing**

What is Romanticism? Instead of searching for an answer at the movement's supposed point of origin (1790-1830, in Germany, England, and France), we will begin in early twentieth-century South Asia. In the nineteenth century, English Romantic poetry and, to a lesser extent, ethico-political and aesthetic ideas associated with German Idealism circulated in South Asia as part of a colonial education aimed at producing "a class of persons Indian in blood and color, but English in tastes, in opinions, in morals and in intellect" (Macaulay). The intentions of this plan of education aside, it unwittingly opened channels for literary, philosophical, and political exchange that were harmful to colonial rule, and essential to how we understand worlds of literature today. Behind the backs of its homegrown, self-anointed inheritors, Romanticism in the "colonies" led multiple other lives and was transformed in encounters that must—belatedly—be read back into its originary texts. Hence, in counter-chronological fashion, in this class we will begin with important postcolonial works by Faiz Ahmad Faiz (Urdu), Suryakant Tripathi Nirala (Hindi), Mahadevi Verma (Hindi), Sarojini Naidu (English), Mohammad Iqbal (Urdu and Persian), and Rabindranath Tagore (Bengali), to move on to Karl Marx and Heinrichs Heine (German), Charles Baudelaire (French), and George Elliot (English), to end with John Keats (English), William Wordsworth (English), and G.W.F. Hegel (German). In considering these texts with an eye to poetics and interpretation, we will pay close attention to concepts that they bring to the fore, key among them "belatedness" (Nachträglichkeit), "allegory," "critique," "non-identity." We will read non-English language texts in translation, though we will have occasion to discuss originals.

**Requirements/Evaluation:** One mid-term essay (6-8 pages), one presentation or participation in roundtable, one final paper (12 pages)

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 25

**Enrollment Preferences:** English majors, then sophomores considering the major

**Expected Class Size:** 25

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENGL 324(D1) COMP 327(D1)

**Difference, Power, and Equity Notes:** This course examines how the political impact of colonization upon both Europe and South Asia gets expressed in literary productions of the nineteenth and the twentieth centuries. It explores the way these literary works understand the axes of social identity that shape oppression and inequity—coloniality, race, caste, gender—as constitutive of the unevenly developing world of capitalism. The concepts upon which the course focuses are essential to contemporary social critique.

Fall 2023

**ENGL 316(D1) AMST 326(D2)

Writing Skills Notes:** Each student will be responsible for producing a reader's guide to Ellison's unfinished second novel. Students will write, rewrite, and revise their reader's guide throughout the semester. Three drafts will be due throughout the semester. A quality reader's guide will highlight the book's main themes, profile the main characters, and retrace the book's development. Students will also complete one draft of a guide to Rivera's novella, due at the end of the semester.

**Difference, Power, and Equity Notes:** "Unfinishing America" satisfies the Difference, Power and Equity requirement because it calls into question mainstream American culture from Black, Chicano, and Indigenous perspectives. It interrogates the relations of power that have driven American history, from the Civil War and Westward expansion in the 19th century to the struggle for Civil Rights against Jim Crow in the 20th. Finally, it asks what it would mean to have true equity amidst great diversity in American culture.

**SEM Section: 01    TF 2:35 pm - 3:50 pm    William Samuel Stahl**

**ENGL 324 (F) Romanticism, Belatedly**  (DPE)

**Cross-listings:**  ENGL 324 COMP 327

**Primary Cross-listing**

What is Romanticism? Instead of searching for an answer at the movement's supposed point of origin (1790-1830, in Germany, England, and France), we will begin in early twentieth-century South Asia. In the nineteenth century, English Romantic poetry and, to a lesser extent, ethico-political and aesthetic ideas associated with German Idealism circulated in South Asia as part of a colonial education aimed at producing "a class of persons Indian in blood and color, but English in tastes, in opinions, in morals and in intellect" (Macaulay). The intentions of this plan of education aside, it unwittingly opened channels for literary, philosophical, and political exchange that were harmful to colonial rule, and essential to how we understand worlds of literature today. Behind the backs of its homegrown, self-anointed inheritors, Romanticism in the "colonies" led multiple other lives and was transformed in encounters that must—belatedly—be read back into its originary texts. Hence, in counter-chronological fashion, in this class we will begin with important postcolonial works by Faiz Ahmad Faiz (Urdu), Suryakant Tripathi Nirala (Hindi), Mahadevi Verma (Hindi), Sarojini Naidu (English), Mohammad Iqbal (Urdu and Persian), and Rabindranath Tagore (Bengali), to move on to Karl Marx and Heinrichs Heine (German), Charles Baudelaire (French), and George Elliot (English), to end with John Keats (English), William Wordsworth (English), and G.W.F. Hegel (German). In considering these texts with an eye to poetics and interpretation, we will pay close attention to concepts that they bring to the fore, key among them "belatedness" (Nachträglichkeit), "allegory," "critique," "non-identity." We will read non-English language texts in translation, though we will have occasion to discuss originals.

**Requirements/Evaluation:** One mid-term essay (6-8 pages), one presentation or participation in roundtable, one final paper (12 pages)

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 25

**Enrollment Preferences:** English majors, then sophomores considering the major

Fall 2023

**SEM Section: 01    MR 2:35 pm - 3:50 pm    Paresh Chandra**
How can we capture the "liveness" of dance and performance through writing? How can the spoken and written word promote a deeper understanding of felt emotions expressed through embodied practice? In this tutorial, we will explore different modes of writing about performance such as fiction, ethnography, and performative writing. While there will be skill-based goals and a set outline for the tutorial, core texts that will anchor the conversations and paired writing assignments will be selected according to the interests of enrolled students. Texts will be complemented with visual materials and/or virtual conversation with artist-scholars to encourage a multilayered experience with writing about performance. The course is reading and writing intensive, and oriented towards juniors, seniors, and those with deep interest in analytical and creative writing. Students will (i) read several monographs during the semester, (ii) produce creative and critical writing (at least 5-6 pages every two weeks and a longer final essay) (iii) be committed to the peer review and revision process of their own work and that of their writing partners, and (iv) participate in discussions about course materials and reflections about their writing process.

Class Format: enrollment in the course will require each student to have in-person or zoom meeting with the instructor before the first class meeting.

Requirements/Evaluation: This tutorial is reading and writing intensive, and oriented towards juniors, seniors, and those with deep interest in analytical and creative writing. Students will (i) read several monographs during the semester, (ii) produce creative and critical writing (at least 5-6 pages every two weeks and a longer final essay) (iii) be committed to the peer review and revision process of their own work and that of their writing partners, and (iv) participate in discussions about course materials and reflections about their writing process.

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: Juniors and seniors, and those with specific interest in performance, creative, and analytical writing. Prior dance or performance experience not required.

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
DANC 302(D1) ENGL 335(D1)

Writing Skills Notes: Each student will write three 5- to 6- page papers on which the professor and peers will provide critical feedback on content, style, and form. After each cycle of feedback, students will submit a revision, and will discuss the revision process and the revised paper. As the final assignment, students will select one of the three papers to develop into a longer essay, which will be 10-15 pages.

Difference, Power, and Equity Notes: The monographs that will anchor the tutorial engage with politics of identity as it manifests in both staged and in everyday performances. The introductory points of exploration and the objects of analysis in the course are bodies in motion. So our inquiry throughout the semester will necessarily include how bodies "make meaning" in a network of power relationships within the context of historical associations to markers of race, class, gender, sexuality, and socially constructed differences.

Spring 2024
TUT Section: T1 TBA Munjulika R. Tarah

ENGL 341 (S) Sexuality in US Modernisms (DPE)

Cross-listings: ENGL 341 WGSS 342

Primary Cross-listing

This course investigates how sexual identities, desires, and acts are represented and reproduced in U.S. literary and popular culture. Focusing on 1880-1940 (when, in the U.S. the terms "homosexual" and "heterosexual" came to connote discrete sexual identities), we will explore what it means to read and theorize "queerly." Among the questions we will ask are: What counts as "sex" or "sexual identity" in a text? Are there definably queer and/or transgender writing styles or cultural practices? What does sexuality have to do with gender? How are sexual subjectivities intertwined with race, ethnicity, class, and other identities and identifications? Why has "queerness" proven to be such a powerful and sometimes powerfully contested concept? We will also explore what impact particular literary developments—the move from realism to modernism— and historical events such as the rise of sexology, first-wave feminism and the Harlem Renaissance—have had on queer cultural production. The class will also introduce students to some of the most influential examples of queer literary and cultural theory. Readings may include works by authors such as James, Cather, Far,
Hughes, Nugent, Stein, Fitzgerald, and Larsen, as well as queer literary theory and critique by scholars such as Butler, Coviello, Ferguson, Foucault, Freeman, Freud, Hartman, Lorde, Love, Muñoz, Rich, Rodriguez, Ross, and Sedgwick.

Class Format: discussion/seminar

Requirements/Evaluation: active class participation, several short writing assignments, two 5-page papers, and one 7-9 -page paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 25

Enrollment Preferences: English majors and/or students interested in WGSS

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 341(D1) WGSS 342(D2)

Difference, Power, and Equity Notes: This course considers the history and literature of sexuality in the US alongside questions of race, gender, class, region and more. It examines how literary form theorizes sexuality, and how sexuality affects literary form, in ways that consider (in)equity and power in a variety of contexts.

ENGL 352 (S) Separation: An Introduction to Postcolonial Literature (DPE)

Cross-listings: COMP 350 ENGL 352 ASIA 353

Primary Cross-listing

Few themes in the history of human societies have produced as much writing as that of separation--from a lover, from one's homeland, from God(s). In the past two centuries, this theme has been essential to representing experiences of exile and migration in the wake of the colonially mediated transition to world capitalism. In this course, we will take up the theme of separation as a privileged point of entry into postcolonial literature and towards understanding the multiple meanings of "postcoloniality." We will encounter examples in which this theme shapes critical thought and helps imagine new modes of existence, as well as those in which the grief of separation shades into such overpowering melancholy that writing becomes impossible. We will also look at what the preoccupation with separation can tell us about the ways human beings relate to human and non-human objects, and how they make and experience history. To think through these issues, we will read nineteenth and twentieth century works dealing with experiences of love, ecstasy, migrancy, exile, and slavery, composed in diverse geographical, socio-political, and linguistic contexts. We will read works (novels, poems, memoirs, essays) and watch films from South Asia, Egypt, the Caribbeans, the US, and Europe, composed in multiple languages (English, Hindi, Urdu, Persian, French, Arabic, Bengali and Malayalam).

Requirements/Evaluation: mid-term paper (6-page), participation in class discussions and one roundtable, final paper (15-page)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors, then sophomores considering the major

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 350(D1) ENGL 352(D1) ASIA 353(D1)

Difference, Power, and Equity Notes: This course examines how the political impact of colonization upon both "colonizer" and "colonized" gets expressed in literary productions of the nineteenth and the twentieth centuries. It explores the way these literary works understand the axes of social identity that shape oppression and inequity--coloniality, race, caste, gender--as constitutive of the unevenly developing world of capitalism. The concepts upon which the course focuses are essential to contemporary social critique.
ENGL 364  (F)  Boucicault to McDonagh: Irish Theatre, 1870 to the present  (DPE)

Cross-listings:  COMP 360 ENGL 364 THEA 336

Secondary Cross-listing

During the Irish Literary Revival of c.1885-1920, Irish writers sought to assert "Irishness" as culturally distinctive, and resisted the marginalizing impacts of British colonial rule. The achievement of Independence in 1923 brought years of insularity and censorship, but over the past three decades Ireland's embrace of globalization and the hybridizing impacts of postmodernism has led to a remarkable flowering of creative vitality. This course will trace the evolution of Irish theatre over the past century-and-a-half. We will read plays by Dion Boucicault, Oscar Wilde, W.B.Yeats, J.M.Synge, Augusta Gregory, George Bernard Shaw, Douglas Hyde, Sean O'Casey, Samuel Beckett, Brendan Behan, Brian Friel, Marina Carr, Frank McGuinness, Christina Reid, Conor McPherson, and Martin McDonagh, and also chart the course of the founding and history of the Abbey Theatre, one of first National Theatres in Europe.

Requirements/Evaluation:  Two essays of 6+ pages; regular Glow posts; class participation

Prerequisites:  none

Enrollment Limit:  19

Enrollment Preferences:  Theatre majors, English and Comparative Literature majors

Expected Class Size:  19

Grading:  no pass/fail option, no fifth course option

Distributions:  (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 360(D1) ENGL 364(D1) THEA 336(D1)

Difference, Power, and Equity Notes:  This course is centrally concerned with identity politics within a colonial context. Irish writers prior to independence from Britain sought to assert "Irishness" as culturally distinctive. After 1923, they continued to wrestle with the legacies of colonial subjection and the inferiorizing identifications that had been ingrained during colonial rule. The texts we will read centre on questions of cultural self-definition and explore (and resist) the process of othering.

ENGL 391  (F)  Contemporary North American Queer Literatures and Theories  (DPE)  (WS)

Cross-listings:  ENGL 391 WGSS 391

Primary Cross-listing

Moving through the mid-twentieth century and into the twenty-first, this course will consider how North American writers have represented queer life in all its complexities. From the problem of the happy ending to the intersectional politics of representation, the narrative complexities of coming out to the rejection of identity, the course will consider the relationship between literary form and queer content. In so doing, it will also touch upon some of the key debates in queer literary theory and consider the impact of events such as civil rights movements, gay and lesbian and trans uprisings, the AIDS crisis, debates over respectability politics, and current efforts to police what students read in schools on literary and cultural production. Readings may include work by such authors as Baldwin, Highsmith, Rich, Lorde, Delany, Kushner, Feinberg, Bechdel, Thom, and Machado and theorists such as Ferguson, Sedgwick, Fawaz, Love, Butler, and Hartman.

Requirements/Evaluation:  active class participation, several short writing assignments, two 5-page papers, and one longer research paper.

Prerequisites:  a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor;
Enrollment Limit: 19
Enrollment Preferences: English majors; WGSS majors
Expected Class Size: 19
Grading: no pass/fail option, yes fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 391(D1) WGSS 391(D2)

Writing Skills Notes: This course will require at least 20 pages of writing of various sorts, from shorter critical responses to a longer research paper. Students will receive regular and timely feedback on their writing and gain experience with revision as it relates to the process of refining an argument.

Difference, Power, and Equity Notes: This course considers the history and literature of gender and sexuality in the US alongside questions of race, class, and more. It examines how literary form theorizes sexuality, and how sexuality affects literary form, in ways that consider (in)equity and power in a variety of contexts.

ENVI 134 (F) The Tropics: Biology and Social Issues (DPE)

Cross-listings: BIOL 134 ENVI 134

Secondary Cross-listing
Biology and Social Issues of the Tropics explores the biological dimensions of social and environmental issues in tropical societies, focusing specifically on the tropics of Africa, Asia, Latin America, Oceania, and the Caribbean. Social issues are inextricably bound to human ecologies and their environmental settings. Each section of the course provides the science behind the issues and ends with options for possible solutions, which are debated by the class. The course highlights differences between the tropics and areas at higher latitudes while also emphasizing global interconnectedness. It begins with a survey of the tropical environment, including a global climate model, variation in tropical climates and the amazing biodiversity of tropical biomes. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria, AIDS and Covid-19 (SARS-CoV-2). The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the interaction of humans with their supporting ecological environment, and global climate change. This course fulfills the DPE requirement. Through lectures, debates and readings, students confront social and environmental issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

Class Format: Debate
Requirements/Evaluation: two hour exams, a short paper, debate presentation, and a final exam
Prerequisites: none
Enrollment Limit: 62
Enrollment Preferences: Preference will be given to Environmental Studies majors/concentrators, students in need of a Division III or DPE requirement, and then Seniors, Juniors, Sophomores, and First Year students.
Expected Class Size: 62
Grading: no pass/fail option, no fifth course option
Unit Notes: Does not count for credit in the Biology major.
Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
BIOL 134(D3) ENVI 134(D3)

Difference, Power, and Equity Notes: This course highlights differences between the tropics and higher latitudes. For each section we focus on difference–different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and different contributions to and impacts of climate change. For each section we highlight differences in power and the inequities of resource distribution. We then debate potential solutions to ameliorate these inequities.
ENVI 202  (S) Critical Practice of Architecture: Theories, Methods, and Techniques  (DPE)

Cross-listings:  ARTS 222 ENVI 202

Secondary Cross-listing

In this course, students will transform an architectural or urban space through design interventions that contribute to reorienting public perception, imagination, and politics. Skills taught include methods and techniques for critical architecture practice, including architecture drawing, 2D graphic design, and 3D modeling (digital and physical). Students will also build on design strategies (e.g., spatial hijacking and détourment), community architecture, and visual techniques to rethink normative understandings of space and time. Through selected readings and discussions, we will examine key ideas that have inspired design thinking and activism. The class culminates in a presentation to external reviewers and a final exhibition.

Requirements/Evaluation:  This is an intensive studio tutorial requiring working in the architecture studio and/or PC lab outside of scheduled class hours. The class will meet in large and small groups throughout the semester for critique and discussion. Assignments include weekly discussions and design projects requiring drawings and model design. Final project: design project to reorient public perception, imagination, and politics. Evaluation will be based on the design quality at theoretical/conceptual levels.

Prerequisites:  Drawing I or permission of instructor.

Enrollment Limit:  12

Enrollment Preferences:  Studio Art majors, Art History and Studio Art majors, Envi majors and concentrators

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Materials/Lab Fee:  $350-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions:  (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 222(D1) ENVI 202(D1)

Difference, Power, and Equity Notes:  This design studio invites students to think critically about how power, equity, and difference are manifested through the built environment. It will equip them with the tools to become active agents of change through design activism. We will use design as a cultural practice and creative technique to envision more just and equitable futures through interventions in architectural or urban spaces.

Attributes:  ENVI Humanities, Arts + Social Science Electives
of economic value or a financial risk to stock portfolios that may be at odds with humane ways of organizing our collective planet. This course exposes
the hierarchies of social difference and resulting inequalities (class, race, gender, species) under climate crisis to advance reparative and decolonial
understandings. Drawing upon experiences from social, labor and environmental movements for climate justice, students will be able evaluate situated
political economic responses to the climate crisis.

Requirements/Evaluation: 'Colonialism and my community' writing/poster assignment (5 pages) 20%; Either a video essay on a 'green' technology
(10 minutes), recorded interview with an environmental justice movement/activist/practitioner (20 minutes) or critical in-class presentation on an
emerging 'green' technology (10 minutes) 25%; Creative activist project that reflects on histories and axes of power - gender, race, class, species (6-8
pages); Participation and attendance (leading a discussion/presentation) 20%
Prerequisites: None

LEC Section: 01 Cancelled

ENVI 208 (F) Saharan Imaginations (DPE) (WS)
Cross-listings: COMP 234 ENVI 208 ARAB 209
Secondary Cross-listing
Deconstructing reductive Saharanism, which the course conceptualizes as a universalizing discourse about deserts, this course seeks to critically
examine the myriad assumptions that are projected upon deserts across times and cultures. In addition to their depiction as dead and empty, deserts
have become a canvas for the demonstration of religiosity, resilience, heroism and athleticism. Cultural production, particularly literature and film, do,
however, furnish a critical space in which important questions can be raised about deserts' fundamental importance to different cultures and societies.
Drawing on novels, films, and secondary scholarship, the course will help students understand how myth, memory, history, coloniality/postcoloniality,
and a strong sense of ethics are deeply intertwined in the desert sub-genre of African, Euro-American, and Middle Eastern literatures. Whether
grappling with transcontinental issues of climate change, cannibalization of biodiversity or overexploitation of natural resources, desert-focused cultural
production invites us to interrogate the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature.

Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: Students are admitted into the course on a first-come-first-serve basis. If the course is over-enrolled, preference will be
given to Arabic Studies and Comparative Literature majors and certificates.
Expected Class Size: 14
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
COMP 234(D1) ENVI 208(D1) ARAB 209(D1)
Writing Skills Notes: Students will receive constant and extensive feedback on their written work. Students will write regular weekly responses on
Glow, a reflection statement, two 5pp. papers for midterms, and one 10pp. final paper.
Difference, Power, and Equity Notes: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

ENVI 254 (S)  Food, Forests, & Fungi: Environmental Health in the Anthropocene  (DPE) (WS)
Cross-listings: ENVI 254 ANTH 254 STS 254

Secondary Cross-listing
This tutorial will examine the impacts of the climate crisis on human, environmental, and planetary health via the lens of food systems & plant medicines in the Anthropocene. We use anthropological, environmental, evolutionary, & ecological approaches to explore the ecosystems connecting humans, plants, animals, and fungi that have been massively disrupted by systems of industrial agriculture, industrial forestry, corporate food systems, and corporate biomedicine. We will dwell on the growing signs of our climate catastrophe including the sharp rise of global temperatures, floods, hurricanes, alongside declining freshwater reserves, melting cryosphere, and falling crop yields, that are helping produce a growing wave of hunger and climate refugees in every world region. Along the way, we will hear from and read about youthful climate activists from Extinction Rebellion, Ende Gelände, Fridays for the Future, 350.org, and the Sunrise Movement who are designing and implementing innovative, local, and sustainable solutions
to inaction, apathy, and inertia even as situations of internal migration or displacement, food scarcity, food sovereignty, water shortages, and other climate-related disruptions are increasing in both developing and developed parts of our globe. We learn how activist narratives intersect with wider movements to promote more local and circular economies of regenerative agriculture and forestry, ethically produced and sourced organic food, wild & cultivated botanicals, and complementary medicines that are healing both humans and the planet.

Requirements/Evaluation: Weekly attendance, reading 200-300 pages/week, weekly lead essays or oral responses to texts, showing up in mind & body each week.

Prerequisites: none, but a class in ENVI or ANTH preferred

Enrollment Limit: 10

Enrollment Preferences: ANTH, ENVI, STS majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 254(D2) ANTH 254(D2) STS 254(D2)

Writing Skills Notes: Students will write essays: either a lead essay of 1400 words, or written & oral feedback on the lead essay plus an oral response to text. Students receive intensive weekly feedback on their essays and a mid semester writing chat with instructor to negotiate and understand strengths and weaknesses of their writing.

Difference, Power, and Equity Notes: We will examine the ways that food systems reproduce social and structural inequalities within public health, environmental health, climate health. We also examined the interconnected nature of the health of our planet, food systems, forests, and fungal networks and how climate activism and action can fight unequal access to food, forests, nature, and health.

TUT Section: T1 TBA Kim Gutschow

ENVI 257 (S) Cities, Suburbs, and Rural Places (DPE)

Cross-listings: ENVI 257 AMST 247 LATS 230

Secondary Cross-listing

Long associated with cities in the scholarly and popular imagination, immigrants have increasingly settled in U.S. suburbs. Through the lens of new destinations for im/migrants, this course introduces spatial methods, perspectives, and concepts to understand cities, suburbs, and rural places and the relationships between these various spaces. We ask how geographically specific forces and actors shape these trends, as well as the spatially uneven outcomes of complex processes like globalization. This interdisciplinary course highlights racial, legal, economic, political, environmental, social, and cultural dimensions of how transnational migrants become part of and create homes in new places. Through a range of textual materials (academic, technical, popular, visual), we explore why people migrate, the origin of the "illegal alien" figure, economic restructuring and local immigration policies, environmental justice, place-making and community development. Rooted in critical race geographies, case studies are often comparative across different racial and ethnic groups in the U.S. West, South, Midwest, and Northeast. We analyze how documentation status and perceptions of illegality affect the lived experiences of Latines. This course will be mostly discussion-based, with grading based on participation, short writing exercises, three assignments, a midterm examination, and a final exam.

Class Format: This is also a discussion course. While I will spend some time at the beginning of the class lecturing, most of the time will be spent in class discussions.

Requirements/Evaluation: Class participation, weekly in-class writing, three 3-6 page essays, a midterm, and a final examination. All writing materials and exams are based on coursework.

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: LATS concentrators or those intending to become LATS concentrators

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 257(D2) AMST 247(D2) LATS 230(D2)

Difference, Power, and Equity Notes: Students examine how race, gender, sexuality, class, and documentation status also impact how immigrants 'transition' to new migration destinations. We consider how the exercise of unequal power affects migration, settlement, and place-making. Students analyze representations and demographic data to determine how people are portrayed and what their material conditions are.

ENVI 260  (S)  Design and Environmental Justice  (DPE)

Cross-listings: ARTS 261 ENVI 260

Primary Cross-listing
This seminar/digital art studio offers key literature to examine the relationship between design and environmental justice. It will help build a vocabulary to study the environment as disputed terrain between technological fixes and issues of race, ethnicity, gender, sexuality, class, and colonial status. Students will develop textual/graphic projects about a chosen case study aiming to reorient public perception and imagination around environmental justice. Case studies include contemporary issues like "natural" disasters, eco-cities, and urbanization in the Global South and North. Skills taught include design-thinking and collaborative design, digital art (Photoshop), and participation in collective reviews and public presentations. The class culminates in a presentation to external reviewers and a final exhibition.

Class Format: Because this seminar is cross-listed with ARTS, there is a studio component (short assignments and final project).

Requirements/Evaluation: Active presence in class discussions and presentations, quality of work, depth and quality of the investigative process, willingness to experiment, and contributions to a collaborative learning environment. This intensive seminar/digital art studio requires working in the architecture studio and/or PC lab outside of scheduled class hours.

Prerequisites: Drawing I, ENVI 101, or permission from the instructor.

Enrollment Limit: 15

Enrollment Preferences: Envi majors and concentrators, Studio Art majors, Art History and Studio Art majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $300-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTS 261(D1) ENVI 260(D2)

Difference, Power, and Equity Notes: This seminar/digital art studio examines the interrelationship between design and environmental justice from an intersectional perspective. It encourages students to develop a critical understanding of the role that technical rationality, devoid of ethics and respect for difference, plays in producing racist, heteropatriarchal, and ecocidal forms of oppression. In parallel, we will explore place-based practices that counter neoliberal and extractivist approaches to the (built) environment.

ENVI 275  (S)  Environmental Science, Policy, and Justice  (DPE)

Cross-listings: ENVI 275 STS 275
Environmental science is much more than collecting data. Scientific experts are often called upon--and often position themselves--to guide environmental governance, which means that science has (some) power over public life. What is, and what should be, the relationship between science, on the one hand, and the creation and implementation of environmental policy, on the other? In this seminar we will study how science shapes governance and how science itself is governed. We will explore how legislatures, agencies, and courts respond to scientific information and uncertainty. And we will learn about how communities facing environmental racism and injustice collect data and use it in their advocacy. Along the way, we will challenge the idea of a unified "scientific method," and we will think about how Western scientific knowledge relates to other ways of knowing, including non-Western sciences, embodied knowledge, and traditional knowledge. Topics include: international climate negotiation, chemical exposure, the regulation of biotechnology, agricultural policy, pandemic responses, and plastics and electronics waste.

Requirements/Evaluation: several short essays, final essay
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: juniors, seniors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 275(D2) STS 275(D2)

Difference, Power, and Equity Notes: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. Using case studies we will analyze how communities facing environmental racism interact with scientists and sciences.

ENVI 310  (F) Design for the Pluriverse: Architecture, Urban Design, and Difference  (DPE)

Cross-listings: ENVI 310 ARTS 314

Secondary Cross-listing
The built environment has a critical role in shaping how people enact, reproduce, and refashion social relations over time. Spatial forms, such as architecture and urbanism, are enmeshed in relationships, contestations, and change processes. This studio tutorial investigates the role of different environments in supporting or preventing specific spatial practices and ensuring spatial justice. Using approaches from activist design, students will work in pairs to re-imagine spaces where different ways of being in the world can thrive and coexist--the pluriverse. Students will use a media they master to investigate a theme connecting design, the built environment (architecture and urbanism), and spatial justice.

Requirements/Evaluation: This is an intensive studio tutorial requiring working outside of scheduled class hours. In this course, students can work with the following media assuming that they can master them for a 300-level course: architecture models (physical and digital), photo reportages, 2D collages (e.g., Photoshop), creative writing (image-text booklets), digital humanities (cartographies, countermapping, oral histories, digital archives), and curatorial platforms. Students will participate in tutorials plus a final project of significant scope. Evaluation will be based primarily on the quality of the final project but also on participation.

Prerequisites: 200-level course on students' medium of choice (for the final project) or permission of instructor.
Enrollment Limit: 10
Enrollment Preferences: Studio Art majors, Art History and Studio Art majors, Envi majors and concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $350-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.
Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 310(D1) ARTS 314(D1)

**Difference, Power, and Equity Notes:** “Pluriverse” refers to various ways of being in the world. This tutorial will employ theories and approaches from design activism and critical environmental studies to analyze the relationship between space and difference, including, but not limited to, race, class, ethnicity, gender, sexuality, religion, and species. Students will apply these theories and approaches to creating place-based projects.

**ENVI 311** (S) Environmental Literature and Film in Latin America (DPE) (WS)

**Cross-listings:** RLSP 304 ENVI 311 COMP 311

**Secondary Cross-listing**

What use are aesthetics when the world is (literally) on fire? We will take up this question and others in a critical engagement with Latin American cultural production of the twentieth and twenty-first centuries, especially works of literature and film that directly or indirectly engage with environmental crisis. Students can expect to explore a variety of media, forms and genres, including works that range from (more or less) mainstream to cutting edge. Our examinations of literature and film will be supported by theoretical writings produced in the Americas and other places. Writers and directors whose work may be considered include, but are not limited to: Lucrecia Martel, Ciro Guerra, Rafael Barrett, Samanta Schweblin, Ernesto Cardenal, Juan Rulfo, Maria Luisa Bombal, Eduardo Gudynas, Silvia Rivera Cusicanqui, Eduardo Viveiros de Castro, Isabelle Stengers.

**Requirements/Evaluation:** This course will be conducted seminar-style. Students will be expected to prepare thoroughly and be active, engaged participants in class discussions. In addition to day to day preparation and participation, other graded assignments will include discussion-leading, one short (5-7 page) essay and a longer (15-20 page) paper combining research and original analysis.

**Prerequisites:** One college literature of film course at the 200-level or above.

**Enrollment Limit:** 19

**Enrollment Preferences:** Envi majors and concentrators, Comp Lit majors, Spanish majors and those working towards the Spanish certificate.

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
RLSP 304(D1) ENVI 311(D1) COMP 311(D1)

**Writing Skills Notes:** All students in the course will write (and rewrite) no less than 20 pages. Major writing assignments will be scaffolded, with explicit discussion of the writing process (pre-writing, drafting, revision) and consultation.

**Difference, Power, and Equity Notes:** The works of literature and film that we will be examining challenge North American conceptions of climate change (and environmental crisis more broadly) by making visible (often uncomfortably so) the colonial and neocolonial history of extractivism.

SEM Section: 01    Cancelled

**ENVI 316** (F) Governing Cities by Design: the Built Environment as a Technology of Space (DPE)

**Cross-listings:** ARTS 316 ENVI 316

**Primary Cross-listing**

Like in the classic era, cities of the 19th century were metaphors for government: good government could not exist without good governance of the city. This creative seminar charts the transformation of the built environment (architecture and urbanism) as a technology of space to govern cities and citizens from the mid-19th century until the present. Through debates and case studies across geographies and historical timeframes, we will analyze how regimes of government shape and are shaped by the built environment. The seminar has a studio component that consists of an urban project where students will apply theories and approaches to a real case study using digital art (2D and 3D modeling).
Class Format: Because this seminar is cross-listed with ARTS, there is a studio component (short assignments and final project)

Requirements/Evaluation: Active presence in class discussions and presentations, willingness to experiment, contributions to a collaborative seminar/studio environment, quality of work, depth and quality of the investigative process.

Prerequisites: ENVI 101 or instructor permission

Enrollment Limit: 15

Enrollment Preferences: Envi majors and concentrators, Studio Art majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $300-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTS 316(D1) ENVI 316(D2)

Difference, Power, and Equity Notes: Using theoretical perspectives from urban studies, this seminar/workshop explores how the built environment, as a technology of space, contributes to the production of difference, the establishment of certain regimes of power, and the erasure of specific urban histories—mainly those of underrepresented groups. Students will engage in multimedia place-based projects to imagine and create more equitable built environments.

ENVI 335 (F) The Nile (DPE)

Cross-listings: GBST 320 ENVI 335 ARAB 308 AFR 350 HIST 308

Secondary Cross-listing

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It was on the banks of this river that the great Egyptian empires were founded that led to the building of some of humanity’s most astounding structures and artworks. While the Nile seems eternal and almost beyond time and place, now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This alarming nexus of demography, climate change, and economic development has led to increasingly urgent questions of the Nile’s future. Is the Nile dying? How has the river, and people’s relationship with it, changed over the last century? This course will consider the history of the Nile and its built and natural environment. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. By following an imaginary droplet flowing from tributaries until it makes its way into the Mediterranean Sea, we will learn about the diverse peoples and cultures along the way. We will evaluate the numerous attempts to manage and control the Nile, including the building of big dams, and the continuous efforts to utilize the river for economic development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the major urban centers with the Nile and whether the tensions among Nile riparian states will lead to “water wars” in East Africa and the Middle East.

Requirements/Evaluation: short papers and final project/paper

Prerequisites: none, though background in Middle East history is preferable

Enrollment Limit: 19

Enrollment Preferences: History and Arabic Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

ENVI 351 (F)(S) Marine Policy (DPE) (WS)
Cross-listings: ENVI 351 MAST 351 PSCI 319
Secondary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 351(D2) MAST 351(P2) PSCI 319(D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

ENVI 470 (S) Science for Environmental Justice (DPE)
Cross-listings: ENVI 470 GEOS 470
Economically challenged communities and communities of color are disproportionately affected by environmental contamination and disturbance. Although environmental racism caused by industrial pollution has been made clear in scholarship for some time, the integrated stresses of climate change and industrial contamination are now triggering new challenges to life in underprivileged communities. Resolving environmental injustice will require meaningful engagement from scientists across a range of disciplines, from chemistry and the geosciences to ecology and public health. In this senior seminar, you will learn about the history of the environmental justice movement while examining how science has been used to address cases of environmental contamination and mismanagement. You can expect experiences in field data collection, laboratory analyses, and numerical modeling, skills that are required to assist communities suffering from environmental injustice. And we will work in partnership with residents of Tallevast, Florida, who have long suffered from the impacts of groundwater contamination and governmental neglect. This partnership will involve a residential field trip to Tallevast during spring break, where you will undertake an environmental study in support of the community.

**Class Format:** Weekly lectures, paper discussions, and hands-on labs. Required week-long spring break field trip.

**Requirements/Evaluation:** weekly lab exercises and seminar presentations; a research project; a final presentation; and a spring break field trip

**Prerequisites:** At least one 200-level Division III course and at least one 300-level Geosciences or Environmental Studies course or permission of instructor.

**Enrollment Limit:** 12

**Enrollment Preferences:** Fourth year, and then third year, Geosciences majors and Environmental Studies majors or concentrators

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** As a 400-level seminar, this capstone course is intended to build and extend knowledge and skills that students have developed during previous courses in either the Geosciences or Environmental Studies majors.

**Materials/Lab Fee:** The spring break field trip is being funded by the Freeman Foote Field Trip Fund for the Sciences.

**Distributions:** (D3) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**
ENVI 470(D3) GEOS 470(D3)

**Difference, Power, and Equity Notes:** The course will examine the history of the environmental justice movement, unraveling the roles of governmental neglect and complicity in fostering the harm of vulnerable communities. We will review strategies of collective action in fighting climate and environmental injustice and the complicated role that scientists have played in this pursuit. We will then leverage scientific skills and perspectives to imagine ways that scientists can become responsible agents of change.

GBST 105 (F) Islamophobia: A Global Perspective (DPE)

Cross-listings: PSCI 173 GBST 105 REL 107

Primary Cross-listing

This course's goal is to show how the racialization of Islam and Muslims has been constitutive to the latter's imagination. It looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. The course goes back to the founding moments of an imagined white-Christian Europe and how the racialization of Muslim bodies was central to this project and how anti-Muslim racism continues to be relevant in our world today. The course will give a global perspective on Islamophobia and how it is structuring and used by political actors in various territories. The course will show how Muslims were constructed as subjects in history, politics, and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. The course is based on the literature of multidisciplinary studies by leading scholars in the field, drawing from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology. This course's goal is to show how the racialization of Islam and Muslims has been constitutive to the latter's imagination. It looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. The course goes back to the founding moments of an imagined white-Christian Europe and how the racialization of Muslim bodies was central to this project and how anti-Muslim racism continues to be relevant in our world today. The course will give a global perspective on Islamophobia and how it is structuring and used by political actors in various territories. This course is cross-listed and the prefixes carry the following divisional credit:
PSCI 173(D2) GBST 105(D2) REL 107(D2)

Difference, Power, and Equity Notes: The course critically examines difference, power, and equity. Thematically, it looks at the racialization of Islam and the intersection of race, religion, class, and gender in the construction of the 'Muslim problem' from a historical as well as a global contemporary perspective. On one side, the course content explores forms of difference and power. On the other side, the course attempts to help students to engage in alternative forms of action to address these inequalities.
**GBST 151** (F) **Global Questions, Global Frameworks** (DPE)

In this foundational course in the Global Scholars Program, students will be introduced to an interdisciplinary approach to exploring critical global issues. Students will engage with new frameworks and concepts to consider global processes and examine the complexities of the changing and increasingly interconnected world. The first part of the course will explore critical topics in Global Studies and grapple with influential theories on global trends and experiences. The second part will be focused on a particular country and city and how some of the major global trends impact the reality of life in that area. One purpose of this module is to prepare students for their Winter Study trip to that region and engage in research related to their academic interests. Only students admitted to the Global Scholars Program will be able to register for this course.

**Class Format:** Discussion-based class

**Requirements/Evaluation:** Participation in class discussions, reading course materials, engaging with our speakers, two 5pp. papers and a final project.

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** Global Scholars Program Fellows

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** Taking an interdisciplinary approach to exploring critical global issues, students will grapple with difference, power and equity in a global context particularly by being introduced to some of the leading theories of global experiences as well as how these issue impact particular communities around the world. One purpose of this course is to enable students to become better equipped to conduct research on pressing issues around the world and to be more responsible global citizens.

**GBST 208** (F) **The U.S. and Afghanistan: A Post-Mortem** (DPE)

**Cross-listings:** GBST 208 ASIA 208 ANTH 208 PSCI 220

**Secondary Cross-listing**

The United States attacked and defeated the Afghan Taliban regime over in the course of a few short weeks in 2001. Within a few years, the finality of that victory was brought into question as the Taliban regrouped and eventually reasserted itself as a formidable guerilla army that the U.S. military could not easily defeat. At the same time that it was facing a more difficult military challenge than anticipated, the United States got bogged down in the process of nation-building, as well as efforts at social reform. This course examines the history of American involvement in Afghanistan, beginning with the Cold War when the U.S. used Afghanistan as a test case for new models of political modernization and economic development. We will go on to discuss the U.S. support for Islamist political parties during the Soviet occupation of Afghanistan in the 1980s and the consequent rise of the Taliban, and the role of Afghanistan in the September 11th attacks and the "War on Terror" that followed. The course will conclude with a consideration of the impact and legacy of the two decades of nation-building and social reform carried out by the United States since 9/11.

**Requirements/Evaluation:** grading will be determined by class participation, two short (500 word) essays, and a 15-page research paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Anthropology and Sociology majors, Global Studies concentrators, Political Science and Asian Studies majors will get preference

**Expected Class Size:** 15-20

**Grading:** no pass/fail option, no fifth course option
This course is cross-listed and the prefixes carry the following divisional credit:
GBST 208(D2) ASIA 208(D2) ANTH 208(D2) PSCI 220(D2)

**Difference, Power, and Equity Notes:** Among the topics relevant to power and difference to be considered in this course are the American support and later disavowal of Islamist political parties to advance US geopolitical goals, public relations efforts "to save Afghan women" after 9/11, and the uses and misuses of American military, economic, and political power to build a western-style democratic government and bring western-oriented social reforms to a society radically different from U.S. society.

**GBST 218 (F) Capital and Coercion (DPE)**

**Cross-listings:** ECON 218 GBST 218

**Secondary Cross-listing**

Capital, tradable ownership shares in long-lived corporations, invented in the 17th century, has connected people of different races, religions, and geographies. There are huge profits from such economic interactions, but also risks: of being cheated, deceived, or coerced. This course uses insights from the economics of incentives (principal-agent models, contracts, mechanism design) to investigate the interplay between capital, coercion, and resistance. The role of prejudice will be central, as will the rise of middlemen as enforcers of coercion. Case studies span the 17th century to the 20th
and include: the spice trade and conflict in the Indian Ocean, capital markets and fraud in Amsterdam and London, the Atlantic trade in enslaved people, the Dutch "cultivation system" in Java, the slow end of slavery in Brazil, and colonial control and independence in Kenya. Required readings for this class will include primary historical sources, and even excerpts from autobiographical novels!

**Requirements/Evaluation:** Students will be evaluated based on weekly reading responses, class participation, a midterm and a final.

**Prerequisites:** Econ 110

**Enrollment Limit:** 15

**Enrollment Preferences:** If overenrolled, students will be asked to submit a short statement of interest.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ECON 218(D2) GBST 218(D2)

**Difference, Power, and Equity Notes:** This course analyzes the evolution of economic inequity. It analyzes how global market opportunities have been shaped by race, religion, wealth, and power.

**Attributes:** GBST Economic Development Studies Electives POEC Depth

---

**GBST 219 (S) Indigeneity Today: Comparative Indigenous Identities in the US and Russia** (DPE) (WS)

**Cross-listings:** GBST 219 ANTH 217 RUSS 217

**Secondary Cross-listing**

Indigenous movements for land, rights, and cultural preservation have spread to and originated in all corners of the world. However, the global nature of these movements at times obscures ways of being Indigenous in differing contexts. This course analyzes Indigeneity in both the United States and Russia today. Through reading and analyzing ethnography, theory, and literature, it focuses on Indigenous peoples in a comparative context. Rather than prioritizing concern with Indigenous peoples emerging from the US, it attempts to demonstrate what Indigeneity has been in both the United States and Russia and what it is and means today. It asks the following questions: what is Indigeneity and who is Indigenous; how is Indigenous identity constructed and by whom; and what convergences and divergences exist in Indigeneity between the US and Russia or for that matter in other contexts? To help answer these questions, in this course we will grapple with Indigeneity as a social category and other social formations, especially ethnicity, nationality, and race. Topics include: Indigeneity and the State, Revitalization and Resurgence, Indigenous People and Nature Protection, and Hemispheric and Global Indigeneities.

**Requirements/Evaluation:** 10 posts to the course Glow discussion page, 3 times leading class discussion on the assigned readings, 1 short presentation, 1 extended portfolio project with regular shorter and longer writing submissions, and 1 final paper and final presentation (as the final part of the portfolio).

**Prerequisites:** None

**Enrollment Limit:** 16

**Enrollment Preferences:** Majors and certificate-seekers in Russian, then majors in Anthropology and Sociology, and then Global Studies concentrators

**Expected Class Size:** 12-15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 219(D2) ANTH 217(D2) RUSS 217(D1)

**Writing Skills Notes:** This course has the following assignments: Weekly post to the Glow discussion page, 1 short presentation, 1 extended project with regular writing submissions, 1 final paper and final presentation. For the extended project, we will have instructor feedback for all project assignments. In instructor feedback, comprehension of the material and the content of the writing, improvement in writing style and clarity, and development of voice will be discussed. There will also be peer feedback/review.
Difference, Power, and Equity Notes: In the course, students will learn about Indigeneity as a context-specific social formation. It understands Indigeneity as a category of difference with past and present importance. We will read about, discuss, and write about Indigeneity as a social category, along with other social categories it arose alongside (such as race, ethnicity, and nationality), and how it has been mobilized by both those who identify as Indigenous and by those who designate others as Indigenous.

Spring 2024
SEM Section: 01    TF 2:35 pm - 3:50 pm    Kamal A. Kariem

GBST 226 (F) The Working Globe: North and South Workers in Globalized Production (DPE)
Cross-listings:  SOC 226 GBST 226
Secondary Cross-listing
The course introduces students to the concept of globalization of production by focusing on how workers from distant cities and villages across the Global North and South are joined together in the same transnational labor processes. We will reflect on case studies that trace the real-world production of everyday goods and services like automobiles, garments, retail, and electronics. We will map global supply chains and investigate how they exploit and reproduce global inequalities. Focusing specifically on the labor process and on the condition of workers, students will acquire a grounded perspective on the global economy, as well as on the dynamics underlying precarity, deindustrialization, and uneven development. The key guiding concern for the course will be to understand the relationship between workers of the North and South: Does global production place these workers in a relation of fundamental conflict, or can a community of interest emerge between them?

Class Format: Assignments will require group work and presentations
Requirements/Evaluation: Class participation; 1-2 group presentations; 1 final paper
Prerequisites: None, open to all students
Enrollment Limit: 20
Enrollment Preferences: Preference given to ANTH/SOC majors and GBST concentrators
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
SOC 226(D2) GBST 226(D2)

Difference, Power, and Equity Notes: Primarily the course investigates how historical inequalities between countries are reproduced by centering production relations and the site of work. Students will delve deeply into the inequality between workers of the global North and South, and they will also encounter situations where these differences intersect with racial and gendered dynamics.

Fall 2023
SEM Section: 01    MWF 10:00 am - 10:50 am    Bhumika Chauhan

GBST 233 (F) Colonialism, Capitalism and Climate Crisis (DPE)
Cross-listings: GBST 233 ENVI 204 AFR 233
Secondary Cross-listing
Evolutions are part of human existence. These changes are not necessarily natural, uniform or linear across space and time. As colonial conquests sought to capture, dominate and exploit vast swathes of land, nature and people, supported by economic theories, violent, wide-ranging and long-term changes profoundly altered the environment and human-nature relationships. This course examines these transformations, specifically attending to the relationship between colonized/colonial (hu)man, nature and non-human species, drawing in perceptions of nature and the economy. Our starting point for this intellectual journey is the colonial imprint on human-ecological relations i.e. economic man, or Sylvia Wynter's conception of "ethno-class man" and "homo-economicus". We will consider social difference especially race as a central conjuncture of the changing relationship of capitalism and social organization relative to natural resource extraction, techno-scientific knowledge, industrial development and resulting accumulation of greenhouse gases that induce climate and ecological crises. We will also examine economic perspectives of climate change as a market failure, loss of economic value or a financial risk to stock portfolios that may be at odds with humane ways of organizing our collective planet. This course exposes
the hierarchies of social difference and resulting inequalities (class, race, gender, species) under climate crisis to advance reparative and decolonial understandings. Drawing upon experiences from social, labor and environmental movements for climate justice, students will be able evaluate situated political economic responses to the climate crisis.

Requirements/Evaluation: ‘Colonialism and my community’ writing/poster assignment (5 pages) 20%; Either a video essay on a ‘green’ technology (10 minutes), recorded interview with an environmental justice movement/activist/practitioner (20 minutes) or critical in-class presentation on an emerging ‘green’ technology (10 minutes) 25%; Creative activist project that reflects on histories and axes of power - gender, race, class, species (6-8 pages); Participation and attendance (leading a discussion/presentation) 20%

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If over enrolled preference goes to Africana Studies and then Environmental Studies students.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 233(D2) ENVI 204(D2) AFR 233(D2)

Difference, Power, and Equity Notes: The course addresses from a global perspective and from different contexts how social groups, societies and organizations are being transformed under climate crisis.

---

GBST 306  (F) Transcending Boundaries: The Creation and Evolution of Creole Cultures  (DPE)

Cross-listings: RLFR 320 GBST 306 AFR 306 COMP 310

Secondary Cross-listing

Born out of a history of resistance, Creole cultures transcend racial boundaries. This course provides a comprehensive framework for understanding the creation of Creole nations in various parts of the world. Beginning with an examination of the dark history of slavery and French colonialism, we will reflect upon the cultural transformation that took place when people speaking mutually unintelligible languages were brought together. We will then delve into the study of how deterritorialized peoples created their languages and cultures, distinct from the ones imposed by colonizing forces. As we journey from the past to the present, we will also explore how international events such as a worldwide pandemic, social justice, racism, and police brutality are currently affecting these islands. Potential readings will include prominent authors from different Creole-speaking islands, including Frantz Fanon and Aimé Césaire from Martinique, Maryse Condé from Guadeloupe, Ananda Devi from Mauritius and Jacques Roumain from Haiti. Conducted in French with introductions to different creoles.

Requirements/Evaluation: Active class participation, three papers (of 3-4 pages each), presentation, final research paper (7-8 pages)

Prerequisites: Any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: All are welcome. If overenrolled, preference will be given to French majors and certificate students; Comparative Literature majors; Africana Studies students; Global Studies students; and those with compelling justification for admission

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 320(D1) GBST 306(D2) AFR 306(D2) COMP 310(D1)

Difference, Power, and Equity Notes: This course qualifies for a Difference, Power, and Equity requirement because it examines the history of slavery as related to French colonialism in different parts of the world. It also considers International issues of social justice, racism and police brutality.
GBST 320 (F) The Nile (DPE)

**Cross-listings:** GBST 320 ENVI 335 ARAB 308 AFR 350 HIST 308

**Secondary Cross-listing**

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It was on the banks of this river that the great Egyptian empires were founded that led to the building of some of humanity’s most astounding structures and artworks. While the Nile seems eternal and almost beyond time and place, now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This alarming nexus of demography, climate change, and economic development has led to increasingly urgent questions of the Nile’s future. Is the Nile dying? How has the river, and people’s relationship with it, changed over the last century? This course will consider the history of the Nile and its built and natural environment. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. By following an imaginary droplet flowing from tributaries until it makes its way into the Mediterranean Sea, we will learn about the diverse peoples and cultures along the way. We will evaluate the numerous attempts to manage and control the Nile, including the building of big dams, and the continuous efforts to utilize the river for economic development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the major urban centers with the Nile and whether the tensions among Nile riparian states will lead to "water wars" in East Africa and the Middle East.

**Requirements/Evaluation:** short papers and final project/paper

**Prerequisites:** none, though background in Middle East history is preferable

**Enrollment Limit:** 19

**Enrollment Preferences:** History and Arabic Studies majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 320(D2) ENVI 335(D2) ARAB 308(D2) AFR 350(D2) HIST 308(D2)

**Difference, Power, and Equity Notes:** The course fulfills the DPE requirement because it evaluates the differing experiences of the Nile among different cultural groups. It will evaluate how the central government is constantly trying to change how people use their water and therefore over-determine how people interact with their natural environment.

**Attributes:** HIST Group E Electives - Middle East HIST Group P Electives - Premodern

---

GBST 335 (F) Nowheres (DPE)

**Cross-listings:** GBST 335 SOC 335

**Secondary Cross-listing**

We live in a world of nation-states. The world map, according to journalist Joshua Keating, is "itself as an institution, an exclusive club of countries" that rarely accepts new members. Throughout the course, we question how countries conquered the world and became the taken-for-granted political unit. We do so, paradoxically, by looking at contemporary nations that do not appear on the world map. These include nations without statehood, such as Somaliland; those that span countries, including indigenous nations across the US and Canada; and nations that have lost their countries, such as Palestine and South Vietnam. By interrogating "nowheres," we tease out what it means to be a country, and pinpoint when and why the definitions do not apply uniformly. Students will reflect on why the world map has been so remarkably static since the end of the Cold War. We will further probe the social, political, and human costs of the exceptions to this general rule. Students will raise questions and attempt answers to what our interconnected world means for "nowheres" looming on the horizon--nation-states that, as a result of climate change, will soon vanish.

**Requirements/Evaluation:** Thoughtful and consistent class participation, visits to Sawyer Library and WCMA, three short response papers, and a final assessment on a "nowhere" of students' choosing

**Prerequisites:** None
Enrollment Limit: 15
Enrollment Preferences: Anthropology and Sociology majors, Global Studies concentrators

Expected Class Size: 15
Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 335(D2) SOC 335(D2)

Difference, Power, and Equity Notes: This course asks students to grapple with the asymmetries of modern statehood--why some places meet the criteria for statehood but are denied it, while others fall short of formal definitions but are still considered states. Students will assess the stakes of statehood for places that cannot achieve it or do not aspire to. They will creatively marshal these lessons to become the class expert on a "nowhere" that provides us with a lens for interrogating the world map as it currently exists.

Fall 2023
SEM Section: 01 MR 1:10 pm - 2:25 pm Phi H. Su

GBST 344 (F) Capitalism and Racism in the American Context and Beyond: A Global Approach (DPE)

Cross-listings: GBST 344 AMST 345 AFR 353

Secondary Cross-listing

American Studies emerged with the idea that transdisciplinarity is crucial for comprehending the concept of America. Building on this framework, this course foregrounds transepistemology as an equally important method for understanding the dynamics of America, both locally and globally, at the level of the world-system. In addition to tracing the consubstantial genealogy of racism and capitalism, we will examine their local manifestations, mainly in Asia, Europe, Africa and America, as well as their current geopolitical, social and economic outcomes, especially the reproduction of systemic inequalities and domination. Through an interdisciplinary approach and engagement with a variety of resources from economics, anthropology, sociology, critical race theory, comparative ethnic studies and decolonial thinking, this course will address the following: i) review the different forms of economic organization of human societies throughout history (with special focus on the work of Karl Polanyi); ii) trace the epistemological origins of capitalism and investigate what makes capitalism and its crises unique; iii) trace the genealogy of the concepts of race, racism and discrimination; iv) interrogate the intersection of racism and capitalism in different traditions of thought and epistemologies in Asia, Europe, Africa, and the Americas. For example, we will read key texts from "French theory", (Deleuze, Foucault, etc.), US Black tradition, (W. E. B. Du Bois and Cedric Robison, etc.), Chinese social sciences (Li Shenming, Cheng Enfu, etc.) and African economy and anthropology (Mahdi Elmandjra, Cheikh Anta Diop, etc.) and Latin American decolonial philosophy (Quijano, Dussel, Mignolo, etc.) By doing this, we will situate the rupture that capitalism and racism introduced at the level of global history, which is the first step to conceptualizing racism and capitalism. After showing that the development of capitalism and racism are historically linked, we will proceed to examine the manifestations of their interaction at local and global levels. Locally, we will focus on the effects of racism on the labor market: discrimination in hiring, wage discrimination, segregation, duality and stratification of the labor market, etc. We will also analyze how sexism and racism play out in the labor market in racialized communities. We will also reflect on the links between racism and politics and their effects on economic policies. From a more global perspective, we will analyze the roots of the global economic crisis and the resulting geopolitical issues at the international level and the racist dynamics they generate. Overall, as we will move through readings, we will situate the United States in a cross-regional perspective that would enable us to develop critical insights concerning links and convergences between capitalism and racism.

Requirements/Evaluation: Requirements: An active participation is required of students in terms of engaging in the in-class debates and weekly response paper as a feedback on the lectures as well as a final paper. Evaluation: Participation 25%; Weekly Response (350-500 words) 30%; Final Research Paper (12-15 pages) 45%

Prerequisites: None

Enrollment Limit: 20
Enrollment Preferences: American Studies majors and seniors

Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
**GBST 344 (D2) AMST 345 (D2) AFR 353 (D2)**

**Difference, Power, and Equity Notes:** This course addresses questions of difference, power, and equity through its examination of domination, racialization, the economics of discrimination, geopolitical and epistemological inequalities at the world-system level. Students will learn how racism and capitalism produce social categories, such as race, ethnicity, and class; how they interact with issues of gender; and how they perpetuate difference, power dynamics, and inequalities across these categories.

**GBST 348 (S) Altering States: Post-Soviet Paradoxes of Identity and Difference** (DPE) (WS)

**Cross-listings:** RUSS 348 SOC 348 GBST 348

**Secondary Cross-listing**

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the war Russia is currently waging on Ukraine, or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Bulgaria, Poland, and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

**Requirements/Evaluation:** 5-page paper every other week, written comments on the partner's paper in alternate weeks

**Prerequisites:** none

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RUSS 348(D1) SOC 348(D2) GBST 348(D2)

**Writing Skills Notes:** This is a tutorial course, with plenty of opportunities to work on writing and argumentation. Tutorial papers receive written feedback from both the instructor and the tutorial partner, and are workshopped during the tutorial meetings.

**Difference, Power, and Equity Notes:** Students will learn to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. We will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

**GEOS 470 (S) Science for Environmental Justice** (DPE)

**Cross-listings:** ENVI 470 GEOS 470

**Primary Cross-listing**

Economically challenged communities and communities of color are disproportionately affected by environmental contamination and disturbance. Although environmental racism caused by industrial pollution has been made clear in scholarship for some time, the integrated stresses of climate change and industrial contamination are now triggering new challenges to life in underprivileged communities. Resolving environmental injustice will
require meaningful engagement from scientists across a range of disciplines, from chemistry and the geosciences to ecology and public health. In this senior seminar, you will learn about the history of the environmental justice movement while examining how science has been used to address cases of environmental contamination and mismanagement. You can expect experiences in field data collection, laboratory analyses, and numerical modeling, skills that are required to assist communities suffering from environmental injustice. And we will work in partnership with residents of Tallevast, Florida, who have long suffered from the impacts of groundwater contamination and governmental neglect. This partnership will involve a residential field trip to Tallevast during spring break, where you will undertake an environmental study in support of the community.

Class Format: Weekly lectures, paper discussions, and hands-on labs. Required week-long spring break field trip.

Requirements/Evaluation: weekly lab exercises and seminar presentations; a research project; a final presentation; and a spring break field trip

Prerequisites: At least one 200-level Division III course and at least one 300-level Geosciences or Environmental Studies course or permission of instructor.

Enrollment Limit: 12

Enrollment Preferences: Fourth year, and then third year, Geosciences majors and Environmental Studies majors or concentrators

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build and extend knowledge and skills that students have developed during previous courses in either the Geosciences or Environmental Studies majors.

Materials/Lab Fee: The spring break field trip is being funded by the Freeman Foote Field Trip Fund for the Sciences.

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 470(D3) GEOS 470(D3)

Difference, Power, and Equity Notes: The course will examine the history of the environmental justice movement, unraveling the roles of governmental neglect and complicity in fostering the harm of vulnerable communities. We will review strategies of collective action in fighting climate and environmental injustice and the complicated role that scientists have played in this pursuit. We will then leverage scientific skills and perspectives to imagine ways that scientists can become responsible agents of change.

GERM 234 (F) Europe and the Black Diaspora (DPE) (WS)

Cross-listings: GERM 234 COMP 238 AFR 236

Primary Cross-listing

This course provides an overview of the relationships and interactions between the Black diaspora and the European continent in the nineteenth and twentieth centuries. Drawing from biographies, autobiographies, reports, literature, creative arts and academic articles, we will consider the different relationships that have evolved between Black people and Europe over the course of time. Focusing on Central Europe, we will discuss the relationships established between Europe and the Black diaspora, such as Africans, African-Americans, Afro-Latinx and Afro-Caribbeans. Some of the themes we will address include the influence of cultural contact on intellectuals, writers, artists, soldiers, politicians and asylum seekers and their works, factors that established and influenced their relationship with Europe, as well the ways in which these selected people did or did not exert influence on European cultures. We will conclude by looking at some of the current discussions that still revolve around the relationship between the Black diaspora and Europe. Reading and Discussion in English.

Requirements/Evaluation: Active class participation, written homework, short papers and final research paper.

Prerequisites: None.

Enrollment Limit: 19

Enrollment Preferences: If course overenrolls (beyond cap), preference given to first-years, sophomores, and juniors.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option
Distributions:  (D1)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
GERM 234(D1)  COMP 238(D1)  AFR 236(D2)

Writing Skills Notes: Students will write two 3-5-page essays each written in two drafts with instructor comments. They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: We will discuss how minorities and minoritized individuals and the identities they hold can be affected by the dominant cultures around them. While we will focus on Europe, we will approach discussions with a comparative view, so as to encourage the students to reflect on how difference, power and equity interact and impact minorities in the context of the United States or wherever they come from.

HIST 116  (S) Understanding 9/11 and the War in Iraq  (DPE) (WS)

Cross-listings:  HiST 116 ARAB 211

Primary Cross-listing

What were some of the causes of 9/11/2001 and what were some of the consequences? Why and how did the United States invade Iraq in 2003 and what impact did the subsequent occupation of that country have on the rest of the Middle East and the world in general? In this course on recent political and cultural international history, that will also consider this history in film and popular culture, the monumental ramifications of the "War on Terror" will be considered and how this framework has shaped the 21st century. In the first part of the course, US-Middle Eastern relations will be explored and the eventual emergence of al-Qaeda in the late 1990s. Then the terrorist attacks on American soil on 9/11 will be studied. In this segment, students will engage with oral histories and memoirs related to the fateful events of that day. In the following module the political and cultural responses will be considered. Particular attention will be on the prelude to the Iraq War, especially how that war was justified and rationalized. Here students will analyze political rhetoric, public discourse, and activism through a range of sources including in the media, the academy, and in popular culture. Then the attention will be turned to the invasion of Iraq in March 2003, and the eventual occupation of Iraq. The myriad Iraqi responses will be studied along with American military experience. Finally, the course will evaluate the significance of the first decade of the 21st century and how these events, and the memory of this decade, continue to reverberate today.

Requirements/Evaluation:  Several short papers and a final oral history.

Prerequisites: none

Enrollment Limit:  19

Enrollment Preferences:  First-years and sophomores.

Expected Class Size:  19

Grading:  no pass/fail option, no fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 116(D2)  ARAB 211(D2)

Writing Skills Notes: In this writing-intensive first-year seminar, students will engage with primary sources such as oral histories, autobiographies and political tracts and write short interpretive essays that will go through several editing stages. The final writing project will be an oral history of an individual who has a direct personal connection with either 9/11 and/or the wars in Iraq. The students will learn how to synthesize a range of experiences into a 10-12 page paper.

Difference, Power, and Equity Notes: This course will consider power and difference in a number of ways. First, it will evaluate how the US government used its political power to convince the public to support a military operation under questionable premises. Second, it will critically assess the "War on Terror" and who has benefited from it. Third, it will examine how the American military occupied Iraq and the ways in which Iraqis tried to resist the American designs on their country.

LEC Section: 01    MWF 11:00 am - 12:15 pm     Magnús T. Bernhardsson

HIST 128  (F)  Protest after Fascism: Youth, Revolution, and Protest in 1960s West Germany  (DPE) (WS)

The 1960s was a decade of youth and protest. University students in Paris, Belgrade, and Dar es Salaam took to the streets to call for political, economic, and social transformation. This first-year seminar dives into this decade of heady revolutionary fervor, by focusing on the stakes of political protest in postwar West Germany. It evaluates how West Germans formulated their political protests while living in a post-totalitarian and post-genocidal society and considers the extent to which West Germans youths -- despite operating in the international milieu of the "Global Sixties" -- displayed a specifically national set of anxieties. Students can expect to gain an introduction to postwar German history, as well as experience working with primary sources.

Requirements/Evaluation:  Active participation in discussion, weekly 500-word discussion posts, two 5-6-page reading responses, and a final 10-12-page research paper

Prerequisites:  None

Enrollment Limit:  19

Enrollment Preferences:  First-year students and then sophomores who have not previously taken a 100-level seminar

Expected Class Size:  19

Grading:  no pass/fail option,  yes fifth course option

Distributions:  (D2)  (DPE) (WS)

Writing Skills Notes:  This is an intensive writing seminar for first- and second-year students. We focus on the structure of historical argument, the process of revision, and research skills. Students receive detailed feedback on their writing on each of the shorter writing assignments and on all steps of the crafting of the final paper.

Difference, Power, and Equity Notes:  This course investigates how West German youths wrestled with questions of national belonging and racial difference in the years after the Holocaust. In addition to evaluating how racial difference operated within after the Federal Republic of Germany after the Nazis’ racial genocide of European Jewry, this course explores West German activists’ conceptions of two populations that were seen to be racially different: the peoples of the 'Third World' and West Germany's Turkish migrants.

HIST 163  (S)  Communications in Early America  (DPE) (WS)

Cross-listings:  HIST 163 AMST 164

Primary Cross-listing

How did the multiplicity of people who shaped "early" North America communicate with each other, across profound linguistic, cultural, social, political, and spiritual differences? What strategies did they use to forge meaning and connections in times of tremendous transformation, while maintaining vital continuities with what came before? This course examines histories of communication in North America and the technologies that communities developed to record, remember, advocate, persuade, resist, and express their expectations for the future. Using a continental and transoceanic lens of "Vast Early America,” we will take up Indigenous oral traditions, Traditional Ecological Knowledge, wampum belts, and winter counts as expressions of ethics, identity, relationality, and diplomacy among sovereign Native/Indigenous nations; artistic and natural science paintings, engravings, and visual culture that circulated through the Atlantic World; diaries and journals as forms of personal as well as collective memory. In the latter part, we will work with political orations, newspapers, pamphlets, and other forms of print culture that galvanized public opinion in the Age of Atlantic Revolutions; memorials and monuments that communities created to honor ancestors and significant events; material culture such as baskets and weavings that signified through their imagery and physical forms; and social critique and visions of justice in the verse and prose of Phillis Wheatley Peters and William Apess. These materials take us into the complexities of individuals’ and communities’ interactions and relations of power, and spaces of potential or realized solidarity, alliance, and co-building of new worlds. Throughout we will work together to understand different methodologies, theories, practices, and ethics involved in approaching the past. We will at every turn be attuned to the ongoing significances of these experiences among communities in the twenty-first century. This course provides an opportunity to engage with original materials pertaining to early American histories in the Williams College Archives/Special Collections and Art Museum as well as digital spaces.

Requirements/Evaluation:  active participation in class discussions, several short essays based on readings and discussion topics, museum/archives
**Exercise, Final Essay**

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** limited to first- and second-year students who have not yet taken a 100-level course in History or American Studies; juniors and seniors only with the permission of the instructor

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 163(D2) AMST 164(D2)

**Writing Skills Notes:** Short essays (3-5 pages) spaced throughout the semester with instructor feedback on writing skills as well as historical content; written reflection and analysis related to museum/archives visit with original materials; final essay (8-10 pages) due at end of semester that synthesizes findings from across the whole semester and allows students to closely examine primary/secondary sources; regular opportunities to conference with instructor about writing ideas and drafts.

**Difference, Power, and Equity Notes:** This course centers experiences of diverse people in early America including substantial focus on Native American/Indigenous and African American communities. It introduces foundational methods for historical study, including decolonizing methodologies from Native American and Indigenous Studies (NAIS) and African American histories; critical vantages on Euro-American settler colonialism; and scholarship on complex entanglements in multiracial and multiethnic communities

HIST 254  (F)  Sovereignty, Resistance, and Resilience: Native American Histories to 1865  (DPE)

Cross-listings:  LEAD 254 AMST 254 HIST 254

Primary Cross-listing

This course surveys Native American/Indigenous North American histories from beginnings through the mid-nineteenth century, tracing the complex ways that sovereign tribal nations and communities have shaped Turtle Island/North America. Equally important, it reckons with the ongoing effects of these pasts in the twenty-first century, and communities' own forms of interpretation, critique, action, and pursuits of justice. It also introduces foundational methodologies in Native American and Indigenous Studies (NAIS) and strategies for pursuing decolonizing scholarship and action.

Emphasis is on primary and secondary works produced by Indigenous authors/creators. Starting with the diversity of Indigenous societies that have inhabited and cared for lands and waters since "time out of mind," it foregrounds the complexity of Native peoples, nations, and worldviews situated in particular homelands, as well as accounts of origins and migrations. It addresses how societies confronted devastating epidemics resulting from the "Columbian Exchange," and contended with Euro-colonial processes of colonization, extraction, and enslavement. Indigenous nations’ multifaceted efforts to maintain sovereignty and homelands through pervasive violence, attempted genocide, and dispossession are addressed, as well as forms of relations and kinship with African-American and Afro-Indigenous people. It concludes with how different communities negotiated the tumultuous eras of the American Revolution, forced removal in the 1830s, and Civil War, and created pathways for endurance, self-determination, and security in its aftermath. The course centers on Indigenous actors--intellectuals, diplomats, legal strategists, knowledge keepers, spiritual leaders, artists, and many others--and consistently connects historical events with present-day matters of land, historical memory, education, caretaking, and activism. Additionally, it provides an opportunity to engage with original materials in the Williams College Archives/Special Collections and Art Museum. While the scope of the course is continental and transoceanic, it devotes significant attention to the Native Northeast and the Stockbridge-Munsee Mohican homelands in which Williams College is located.

Class Format:  Lecture with small- and whole-group discussions

Requirements/Evaluation:  Attendance at lectures, active participation in class discussion, midterm exam, short essays based on readings and discussion topics, museum/archives exercise, final essay/project.

Prerequisites:  none

Enrollment Limit:  40

Enrollment Preferences:  History and American Studies majors, followed by first- and second-year students

Expected Class Size:  30-40

Grading:  no pass/fail option, yes fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

LEAD 254(D2) AMST 254(D2) HIST 254(D2)

Difference, Power, and Equity Notes:  This course intensively explores Native American/Indigenous North American histories, experiences, and forms of critical and creative expression, as well as responses to and engagements with Euro-American settler colonialism. It guides students into methodologies central to Native American and Indigenous Studies (NAIS), and gives opportunities for oral and written reflections on NAIS approaches to historical themes and sources, as well as decolonizing methodologies more broadly.

Attributes:  HIST Group F Electives - U.S. + Canada  HIST Group P Electives - Premodern

HIST 286  (F)  Conquests and (Im)migrations: Latina/o History, 1848 to the Present  (DPE)

Cross-listings:  HIST 286 LATS 286

Secondary Cross-listing

The first Latinx communities were formed in 1848 when the United States conquered half of Mexico's territory. In 1898 the United States annexed Puerto Rico and has retained sovereignty to this day. These early conquests and continuing im/migrations created Mexican and Puerto Rican communities in the United States. U.S. imperialism continued to shape the im/migrations that created Cuban, Dominican, Salvadoran, Guatemalan
and other Latinx communities in the United States. This course explores U.S. military, political, and economic interventions and their impact on im/migrations and the making of Latinx communities. We also explore the impact of U.S. employers' and the U.S. government's recruitment of low wage workers in shaping im/migrations, destinations, and the formation of Latinx working-class communities. Im/migration and refugee policies have long defined who is eligible to enter and how, as well as who is deemed eligible for citizenship and belonging. Within this context, Latinas and Latinos have developed survival and family reunification strategies for themselves, their families, and their communities.

Class Format: This course is a discussion format.

Requirements/Evaluation: Class participation, short 1-2 page writing assignments, two 4-5 page essays, and a final 5-7 page essay. All writing assignments are based on course materials.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: LATS concentrators, History majors, or those intending to become concentrators or majors, seniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 286(D2) LATS 286(D2)

Difference, Power, and Equity Notes: This Difference, Power, and Equity course explores racialized dimensions of U.S. imperialism and U.S. labor recruitment, encouraging critical analysis. The course considers the impact on the formation of Latinx communities in the U.S. and on Latinas' and Latinos' lived experiences in the United States, as well as on Latina/o/x strategies of community building and political activism.

HIST 308 (F) The Nile (DPE)

Cross-listings: GBST 320 ENVI 335 ARAB 308 AFR 350 HIST 308

Primary Cross-listing

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It was on the banks of this river that the great Egyptian empires were founded that led to the building of some of humanity's most astounding structures and artworks. While the Nile seems eternal and almost beyond time and place, now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This alarming nexus of demography, climate change, and economic development has led to increasingly urgent questions of the Nile’s future. Is the Nile dying? How has the river, and people’s relationship with it, changed over the last century? This course will consider the history of the Nile and and its built and natural environment. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. By following an imaginary droplet flowing from tributaries until it makes its way into the Mediterranean Sea, we will learn about the diverse peoples and cultures along the way. We will evaluate the numerous attempts to manage and control the Nile, including the building of big dams, and the continuous efforts to utilize the river for economic development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the major urban centers with the Nile and whether the tensions among Nile riparian states will lead to "water wars" in East Africa and the Middle East.

Requirements/Evaluation: short papers and final project/paper

Prerequisites: none, though background in Middle East history is preferable

Enrollment Limit: 19

Enrollment Preferences: History and Arabic Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 320(D2) ENVI 335(D2) ARAB 308(D2) AFR 350(D2) HIST 308(D2)
Difference, Power, and Equity Notes: The course fulfills the DPE requirement because it evaluates the differing experiences of the Nile among different cultural groups. It will evaluate how the central government is constantly trying to change how people use their water and therefore over-determine how people interact with their natural environment.

HIST 319 (F) Gender and the Family in Chinese History  (DPE)
Cross-listings:  HIST 319 WGSS 319 ASIA 319
Primary Cross-listing

Although sometimes claimed as part of a set of immutable "Asian values," the Chinese family has not remained fixed or stable over time. In this course, we will use the framework of "family" to gain insight into gender, generation, and sexuality in different historical periods. Beginning in the late imperial period (16th-18th Centuries), we will examine the religious, marital, sexual, and child-rearing practices associated with traditional ideals of family. We will also examine the wide variety of "heterodox" practices that existed alongside these ideals, debates over and critiques of gender, family, and sexuality in the twentieth century and in China today.

Requirements/Evaluation: active participation in discussions and group work, short skills-based writing assignments (2-4 pgs) and short essays (5-7 pgs) leading toward a final paper (10-15 pages).

Prerequisites: none; open to first year-students with instructors permission

Enrollment Limit:  25
Enrollment Preferences:  History and WGSS majors; Asian Studies concentrators.
Expected Class Size:  12
Grading:  yes pass/fail option,   yes fifth course option
Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 319(D2) WGSS 319(D2) ASIA 319(D2)

Difference, Power, and Equity Notes: This course focuses on historical regimes of gender and sexuality in China and their transformations over time. Students will be asked to consider these regimes both on their own terms and in comparative perspective.

HIST 340 (F) Anticolonial Europe: A History of Transnational Solidarity  (DPE)

This seminar examines the history and paradoxes of European anticolonialism from the turn of the twentieth century to the 1970s. By following the anticolonial networks that developed in four European cities -- Paris, London, Berlin, and Moscow, it interrogates how political activists -- from both the Global South and North -- collaborated to establish a more racially egalitarian world order. It evaluates how events such as the First World War and the formation of the UN transformed their collective political projects. Finally, it investigates the multiple intellectual and political traditions which activists drew upon to contest Europe’s racialized hegemony. Students can expect to gain an introduction to the 20th century’s European-based anticolonial movements, as well as methods of transnational and global history.

Requirements/Evaluation: Class participation, one 5-7-page historiographical essay, and one 10-12-page research paper

Prerequisites: None

Enrollment Limit:  25
Enrollment Preferences:  History majors, seniors, and then juniors
Expected Class Size:  25
Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course investigates the legacies of Europe's racialized hegemony. Students learn about how anticolonial activists in the twentieth century navigated questions of class, race, and national identity. Additionally, they learn how historians have used different historical methodologies to write the history of anticolonialism more inclusively.

HIST 342 (S) At the Crossroads of Race and Nation: Borders and Frontiers in Latin America and the Caribbean (DPE)

When we think about the politics of borders and migration, we usually imagine the contentious U.S.-Mexico border. Seldom do we care to think about the numerous borders across Latin America and the Caribbean that are currently at the heart of our present refugee and migrant crises. This course will examine the history of borders and frontiers in Latin America and the Caribbean and how they were pivotal to Latin American racial and state formations and nation-building processes. This course will consider how borders and frontiers, as both a geographical demarcation and an imaginative conceptualization of difference, created overlapping and competing visions of race, racism, identity, belonging, and social marginalization. Beginning with the tumultuous Latin American independence movements of the nineteenth century and ending with Latin America in the twenty-first century, we will analyze the different creation of borders and frontiers to make sense of today's migration and border control crises. This course will give particular attention to the themes of racial stratification, authoritarianism, nationalism, imperialism, and citizenship.

Requirements/Evaluation: Class participation, two short (3-4 page) papers, and a final (10-12 page) paper
Prerequisites: None
Enrollment Limit: 25
Enrollment Preferences: Preference to History majors and LATS concentrators
Expected Class Size: 15-20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course centers on how categories of racial, cultural, linguistic, and phenotypical differences commanded modern projects of state formation and nation-building. Through readings, class discussions, and writing assignments, we reflect on how Latin American subjects living through the constructions of borders and frontiers negotiated categories of difference. Special attention will be paid to how anti-slavery, working-class rights and anti-racism approached the question of difference.

HIST 352 (F)(S) American Maritime History (DPE) (WS)

Cross-listings: MAST 352 HIST 352

Secondary Cross-listing

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

Class Format: Seminars, discussions, and field seminars
Requirements/Evaluation: Participation in class discussions, activities, and presentations, regular papers, and a final independent research project
Prerequisites: None
Enrollment Limit: 27

Enrollment Preferences: If course over-enrolls, preference will be given to sophomores and juniors

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: Offered only at Mystic Seaport

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 352(D2) HIST 352(D2)

Writing Skills Notes: Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

HIST 361 (S) The Atlantic World: Connections, Crossings, and Confluences (DPE)

Cross-listings: HIST 361 AMST 360

Primary Cross-listing

This course considers the Atlantic World as both a real place and a concept: an ocean surrounded and shaped by diverse people and communities, and an imagined space of shared or competing affiliations. Moving from "time out of mind" to the early nineteenth century, it examines ecological, cultural, political, economic, intellectual, and spiritual transits as well as exchanges among Indigenous/Native American, African and African American, Asian and Asian American, and Euro-colonial people. It introduces conceptual dimensions of this Atlantic paradigm and case studies that illuminate its human subtleties, with the goal of examining "early American" history through a transnational and transoceanic lens. The course takes an interdisciplinary approach to these intertwined histories, and reckons with how the very construction of "history" has, at different turns, affected what is shared, known, valued, and commemorated–or overwritten, denied, or seemingly silenced. Attentive to the structures of power that inflect every part of Atlantic histories, it offers specific ethical frameworks for approaching these topics. Blending methods grounded in oral traditions and histories, place-based knowledge systems, documentary/written archives, songs, archaeology, material culture, and other forms of expression and representation, it traces pathways for recasting the nature and meanings of these connected spaces and histories. In addition, the course consistently connects historical experiences with the twenty-first century, and how communities today are grappling with the afterlives and ongoing effects of these Atlantic pasts through calls to action for reparations, repatriation and rematriation, Land Back, climate justice, and other forms of accountability. The course also provides an opportunity to engage with original materials pertaining to Atlantic World histories in the Williams College Archives/Special Collections and Art Museum.

Requirements/Evaluation: active participation in class discussion, several short essays based on readings and discussion topics, museum/archives exercise, final essay/project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: sophomore, junior, and senior History majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
HIST 361(D2) AMST 360(D2)

**Difference, Power, and Equity Notes:** This course examines the formation and articulation of racial, ethnic, cultural, and other forms of difference across the Atlantic World, and ways that people from Indigenous, African/American, and Asian/American communities have engaged with and challenged European colonization. It devotes substantial time to critical methodologies that re-center voices oftentimes treated as "silenced" or "absent" in colonial literatures, and helps students build fluencies in recovering and interpreting them.

**HIST 430 (S) Postcolonial Reparations: Trauma, History, and Memory after European Imperialism** (DPE) (WS)

**Cross-listings:**  HIST 430 JWST 430

**Primary Cross-listing**

How have European states responded to calls to acknowledge and atone for the crimes of Empire? This course places recent calls for reparations in a historical context. Weaving together a wide-range of historical and contemporary case studies -- including the Conference on Jewish Material Claims Against Germany (1951), Germany's official recognition of the Herero Genocide (2021), and ongoing debates in France about the restitution of colonial-era looted art, this course investigates how the language and mechanisms of restorative justice have historically developed, evaluates which past efforts of restorative justice were successful and why, and examines what role historical memory and historians-as-activists should play in campaigns that seek reparations for colonial injustices. In doing so, it evaluates how activists have deployed scholarly vocabularies on memory, justice, and violence in a number of national and international contexts.

**Requirements/Evaluation:**  Class participation, weekly 500-word discussion posts and a 20-page research paper

**Prerequisites:**  None

**Enrollment Limit:**  15

**Enrollment Preferences:**  History majors, seniors, and then juniors

**Expected Class Size:**  10-15

**Grading:**  no pass/fail option, no fifth course option

**Distributions:**  (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 430(D2) JWST 430(D2)

**Writing Skills Notes:** This is an intensive writing seminar for advanced history majors. We focus on how to write a journal-length piece of original historical research, while evaluating the strengths and weaknesses of other scholarly pieces. Students receive feedback on multiple drafts of their final research papers and participate in two workshop seminars in which they provide feedback on the papers of their peers.

**Difference, Power, and Equity Notes:** This course asks how contemporary political and social justice movements can -- or ought to -- address political and economic inequities between the Global South and North, introduces students to how questions of race and national belonging have informed contemporary debates on restorative justice, and exposes the persistence of some global and historically-situated inequities.

**Attributes:**  HIST Group C Electives - Europe and Russia

---

**HIST 455 (F) Material Cultures in North American History** (DPE)

**Cross-listings:**  HIST 455 AMST 455

**Primary Cross-listing**

Material culture studies consider the dynamic relationships that people develop with the physical world. Tangible items like clothing, furniture, tools, and the built environment are all shaped by communities' identities, aspirations, resources, struggles, and forms of power. This course approaches
North American histories through the lens of materiality, and examines how interdisciplinary methodologies can illuminate multiple or alternate understandings of the past—and its continuing impacts in the twenty-first century. While many historians emphasize written archives and documents as primary sources, scholars and practitioners of material culture studies center everyday as well as exceptional material items that communities have produced and interacted with over many generations. Equally important are the afterlives of these items. At different turns, and across time, social groups have cherished certain belongings; contested, rejected, or remade them; ascribed and activated meanings that may be very different from what the original makers conceived. These continuing transits compel reckoning with major issues of justice, rights, restitution, and sovereignty. The course traces key theories, ethics, and practices of caretaking, preservation, repatriation, curation, creative re-making, and digitization. Members will participate in a series of visits to area museums, collections, and meaningful places to deepen skills of critical analysis. The scope of the course is North American and at times transoceanic. It also includes substantial focus on our location in the Northeast and local formations of materiality and memory, as well as topics in Native American and Indigenous Studies, settler colonialism, and decolonizing approaches. Class members will build familiarity with appropriate techniques for approaching and handling different forms of material culture. They will also cultivate skills for developing and carrying out an original research project; and explore diverse modes of analysis and expression for representing the stories of materials and the communities who engage with them.

Requirements/Evaluation: Active participation in class discussion and visits, reading reflections, in-class presentation, research project prospectus, research project

Prerequisites: Two prior courses in American History, American Studies, Native American and Indigenous Studies, or a related area

Enrollment Limit: 15

Enrollment Preferences: If overenrolled, junior and senior History and American Studies majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 455(D2) AMST 455(D2)

Difference, Power, and Equity Notes: This course examines diverse communities' historical experiences across North America in conjunction with resistances to Euro-American settler colonialism. It introduces students to foundational methodologies in material culture studies including decolonizing approaches, and explores key topics about caretaking, interpretation, and repatriation to descendant communities, such as the Native American Graves Protection and Repatriation Act.

Fall 2023

SEM Section: 01 W 1:10 pm - 3:50 pm Christine DeLucia

HIST 492 (S) Making Race in Early Modern Europe (DPE)

In modern scholarship, racism has most often been portrayed as a child of the European Enlightenment, a set of ideas about embodied human difference and its heritability that arose after the abandonment of the Biblical account of human creation and the rise of a new natural science. This tutorial asks: what racial ideas and practices preceded the Enlightenment? Beginning in the late Middle Ages, Europeans participated in enormous economic and cultural transformations, including increased global mobility and the establishment of new, transoceanic empires. Intensified interactions with people in the Americas, Africa, and Asia shaped European understandings of human difference, as did the burgeoning Atlantic economy and its cruelties. In this tutorial, we will place the emergence of modern racism in a long-term perspective, reconstructing the deep history out of which Enlightenment racial theory emerged. Proceeding both chronologically and thematically, we will consider how the major global transformations of the sixteenth through eighteenth centuries shaped European racial understandings with enduring consequence. In the process, we will develop a conceptual vocabulary to describe in a historically sensitive manner how embodied human difference has been interpreted differently across space and time. Throughout, we will read a variety of historical primary sources in conjunction with recent scholarship. Ultimately, our historical study will afford a comparative perspective on contemporary views of races and racism.

Requirements/Evaluation: Attendance and active participation; weekly tutorial papers (5 "long" papers and 5 responses).

Prerequisites: 200- or 300-level History classes

Enrollment Limit: 10

Enrollment Preferences: Junior and seniors; History majors.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: The aim of the tutorial is threefold: (i) to introduce students to the comparative study of race across time and place, in order to help them contextualize and historicize the racial dispensation of the contemporary US; (ii) to treat the history of race not just as a history of ideas and theories, but of practices of race- and knowledge-making; (iii) to advance our understanding of the past through a dialectical process of empirical research and theoretical interpretation.

Secondary Cross-listing
This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination.

Requirements/Evaluation: participation, online responses, quizzes, midterm, and final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: History & Arabic majors, and Jewish studies concentrators; completion of course admission survey if overenrolled

Expected Class Size: 30-40
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

JWST 249 (S) Anti-Semitism (DPE)

Cross-listings: REL 249 JWST 249

Secondary Cross-listing
This course will investigate intellectual traditions, political movements, and cultural objects that portray Jews, Jewishness, or Judaism as essentially pernicious. We will analyze materials from a variety of times and places, including the ancient world, the medieval period, and the present day. We will assess the impact of anti-Semitism on the lives of Jews and non-Jews. But we will also read theoretical approaches to the study of anti-Semitism that raise key questions for our investigation. Where does the term “anti-Semitism” come from and how exactly should it be defined? Is anti-Semitism a continuous phenomenon that connects every claim of Jewish perniciousness, wherever it is alleged, for over two thousand years of human history? Or
should every context be treated as fundamentally distinct, so that the claim of Jewish perniciousness is presumed to have a distinct meaning, origin, and purpose in each case? What motivates charges of Jewish perniciousness? What are the particular threats typically alleged to be posed by Jews, Jewishness, and Judaism? How do constructions of Jewish perniciousness fit with constructions of race, gender, ethnicity, religion, class, sexuality, and nationality in different times and places?

Requirements/Evaluation: Three 5-7 page papers, class participation
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Jewish Studies concentrators, Religion majors, and students who have taken JWST 203
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
REL 249(D2) JWST 249(D2)

Difference, Power, and Equity Notes: This course will introduce students to discursive, institutional, and social structures that have organized the stigmatization, domination, and persecution of Jews in various geographic locations for over two thousand years. An understanding of these structures is crucial to understanding contemporary dynamics of difference and power. Students will also learn how anti-Semitism intersects with constructions of race, gender, class, religion, ethnicity, and nation.

JWST 268 (S) Where are all the Jews? (DPE) (WS)
Cross-listings: ARAB 363 REL 268 COMP 363 JWST 268
Secondary Cross-listing

Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance Israelite Universelle's schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews’ departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, ethnographies, historiographical works, and anthropological texts alongside documentaries films, the students will understand how literature and film have become a locus in which amnesia about Arab/Berber Jews is actively contested by recreating a bygone world. Resisting both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

Requirements/Evaluation: 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation.
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: students interested in critical and comparative literary, religious or historical studies.
Expected Class Size: 14
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 363(D1) REL 268(D2) COMP 363(D1) JWST 268(D2)

Writing Skills Notes: Students are required to present an outline of their papers before submitting a draft paper. The professor will give feedback on
each written work to improve students' writing skills. Students are required to incorporate the feedback to improve their drafts before they become final. Students will receive detailed and consistent feedback about their writing in Arabic language. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Students in this course will understand the historical process that lead to the disappearance of Arab/Berber Jews. Students also will work out alternative ways to grasp Jewish-Muslim relations beyond nostalgia and conflict. Finally, students enrolled in the course will grapple with and try to disentangle the complexity of Jewish-Muslim citizenship in both pre-colonial and postcolonial contexts.

**JWST 430 (S) Postcolonial Reparations: Trauma, History, and Memory after European Imperialism** (DPE) (WS)

**Cross-listings:** HiST 430 JWST 430

How have European states responded to calls to acknowledge and atone for the crimes of Empire? This course places recent calls for reparations in a historical context. Weaving together a wide-range of historical and contemporary case studies -- including the Conference on Jewish Material Claims Against Germany (1951), Germany's official recognition of the Herero Genocide (2021), and ongoing debates in France about the restitution of colonial-era looted art, this course investigates how the language and mechanisms of restorative justice have historically developed, evaluates which past efforts of restorative justice were successful and why, and examines what role historical memory and historians-as-activists should play in campaigns that seek reparations for colonial injustices. In doing so, it evaluates how activists have deployed scholarly vocabularies on memory, justice, and violence in a number of national and international contexts.

**Requirements/Evaluation:** Class participation, weekly 500-word discussion posts and a 20-page research paper

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** History majors, seniors, and then juniors

**Expected Class Size:** 10-15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 430(D2) JWST 430(D2)

**Writing Skills Notes:** This is an intensive writing seminar for advanced history majors. We focus on how to write a journal-length piece of original historical research, while evaluating the strengths and weaknesses of other scholarly pieces. Students receive feedback on multiple drafts of their final research papers and participate in two workshop seminars in which they provide feedback on the papers of their peers.

**Difference, Power, and Equity Notes:** This course asks how contemporary political and social justice movements can -- or ought to -- address political and economic inequities between the Global South and North, introduces students to how questions of race and national belonging have informed contemporary debates on restorative justice, and exposes the persistence of some global and historically-situated inequities.

**LATS 115 (F) Latina Feminist Spiritualities** (DPE) (WS)

**Cross-listings:** WGSS 115 REL 115 LATS 115

Self-proclaimed feminist activists, who hail from a variety of ethnic Latina/o/x/e (Latine) backgrounds, have often appealed to "ancestral" and "spiritual traditions" as integral to their activism and commitments. Some Latine feminists turned to "spiritual" traditions including brujería/witchcraft; curanderismo and Indigenous healing traditions; Santería/Lukumí and other AfroDiasporic traditions; astrology; home altars; various "mystical"
traditions such as Kabbalah and Sufism, as well as Christian mystics like Teresa of Avila or Sor Juana Inés de la Cruz. Others have turned to the appropriation of "Eastern" traditions such as yoga, Tibetan Buddhism, and Zen Buddhism. This course engages students in an intensive introduction to some of the varieties of Latine feminist thought and contexts, including how activists, writers, and artists think about women, gender, sexuality, race, class, colonialism, the earth, healing, and a better world. How do these feminists of different Latine backgrounds and contexts imagine a better world? How and why do they appeal to spiritual traditions as a source of wisdom, healing, and lived practice for a better world? In this course, we seek to understand both particular Latine feminist spiritual practices on their own terms, as well as why such writers and activists appeal to "the spiritual" in Latine contexts. We will also consider how they frame notions of "the spiritual" in relationship to notions of "the religious" and "the secular."

Requirements/Evaluation: Grading is based on 5-6 page papers written on alternating weeks and brief 1-2 page response papers shared on alternating weeks as well as participation and two paper revisions.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Latina/o Studies concentrators, religion majors, first-year students interested in Latina/o Studies and/or religion

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 115(D2) REL 115(D2) LATS 115(D2)

Writing Skills Notes: Grading is based on alternating weeks writing a lead paper and other weeks writing a brief response paper. This course will require students to write regularly and revise two of their lead papers for grades.

Difference, Power, and Equity Notes: This course examines how Latine feminists have responded to a variety of differential power inequities, especially in terms of gender, sexuality, race, ethnicity, language, and class. It also considers the ways they have imagined better and more equitable worlds, and with what consequences they have done so.

LATS 230 (S) Cities, Suburbs, and Rural Places (DPE)

Cross-listings: ENVI 257 AMST 247 LATS 230

Primary Cross-listing

Long associated with cities in the scholarly and popular imagination, immigrants have increasingly settled in U.S. suburbs. Through the lens of new destinations for im/migrants, this course introduces spatial methods, perspectives, and concepts to understand cities, suburbs, and rural places and the relationships between these various spaces. We ask how geographically specific forces and actors shape these trends, as well as the spatially uneven outcomes of complex processes like globalization. This interdisciplinary course highlights racial, legal, economic, political, environmental, social, and cultural dimensions of how transnational migrants become part of and create homes in new places. Through a range of textual materials (academic, technical, popular, visual), we explore why people migrate, the origin of the "illegal alien" figure, economic restructuring and local immigration policies, environmental justice, place-making and community development. Rooted in critical race geographies, case studies are often comparative across different racial and ethnic groups in the U.S. West, South, Midwest, and Northeast. We analyze how documentation status and perceptions of illegality affect the lived experiences of Latines. This course will be mostly discussion-based, with grading based on participation, short writing exercises, three assignments, a midterm examination, and a final exam.

Class Format: This is also a discussion course. While I will spend some time at the beginning of the class lecturing, most of the time will be spent in class discussions.

Requirements/Evaluation: Class participation, weekly in-class writing, three 3-6 page essays, a midterm, and a final examination. All writing materials and exams are based on coursework.

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: LATS concentrators or those intending to become LATS concentrators

Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 257(D2) AMST 247(D2) LATS 230(D2)

Difference, Power, and Equity Notes: Students examine how race, gender, sexuality, class, and documentation status also impact how immigrants 'transition' to new migration destinations. We consider how the exercise of unequal power affects migration, settlement, and place-making. Students analyze representations and demographic data to determine how people are portrayed and what their material conditions are.

LATS 254 (F) Embodied Knowledges: Latinx, Asian American, and Black American Writing on Invisible Disability (DPE)

Cross-listings: AAS 253 LATS 254 AMST 253

Primary Cross-listing

This interdisciplinary course assumes an expansive approach towards disability, defining it not exclusively as a legible identity that one can lay claim to, but rather as an identity grounded in one's relationship to power (Kim and Schalk, 2020). This course centers on the critical role of lived experience as a key site of everyday theorization for the multiply marginalized, and specifically on the ways in which invisibly disabled Latinx, Asian American, and Black American individuals write the self. As scholars in disability studies argue, self-representations of disabled individuals carry the potential for us as a society to move beyond the binary narratives of "tragedy or inspiration" so often associated with disability. Rather, the self-produced narratives of US disabled writers of color offer a much more nuanced portrayal of everyday life with disability/ies for the multiply marginalized. Much like invisible disability itself, these self-representations ultimately refute traditional depictions of disability, and underscore the ways in which the bodymind serves as a rich, albeit often overlooked, site of knowledge. Embodied Knowledges draws on the insights of disability studies, crip studies, anthropology, literary studies, medicine, psychology, education, cultural studies, ethnic studies, American studies, gender and sexuality studies, sociology, and trauma studies. We will examine the works of Latinx, Asian American, and Black American writers and scholars others in relationship to one another, and as points of departure for examining issues such as the relationship between immigration and disability; intergenerational trauma; the impacts of paradigms such as the Model Minority Myth and notions of cultural deficit; passing; the politics of disability disclosure, the paradoxes of invisible disability; invisible disability in academic spaces; the role of culture and categories of difference such as race, gender, class and immigration status in societal approaches to and understandings of invisible disability; and future visions in the realm of disability justice and care work.

Requirements/Evaluation: Two 5-6 page essays; One group question assignment; Final reflection document

Prerequisites: None.

Enrollment Limit: 12

Enrollment Preferences: Preference given to majors or concentrators in LATS, AMST, and AAST, in order of seniority.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AAS 253(D2) LATS 254(D2) AMST 253(D2)

Difference, Power, and Equity Notes: This course takes up issues of difference and power in every one of its readings and materials. In particular, we examine the intersection of race, ethnicity, dis/ability, gender, sexuality and nation in our discussions of how disability helps to define our understanding of US identity and citizenship, particularly for US communities of color.

LATS 286 (F) Conquests and (Im)migrations: Latina/o History, 1848 to the Present (DPE)

Cross-listings: HIST 286 LATS 286

Primary Cross-listing

The first Latinx communities were formed in 1848 when the United States conquered half of Mexico’s territory. In 1898 the United States annexed Puerto Rico and has retained sovereignty to this day. These early conquests and continuing im/migrations created Mexican and Puerto Rican communities in the United States. U.S. imperialism continued to shape the im/migrations that created Cuban, Dominican, Salvadoran, Guatemalan and other Latinx communities in the United States. This course explores U.S. military, political, and economic interventions and their impact on im/migrations and the making of Latinx communities. We also explore the impact of U.S. employers’ and the U.S. government’s recruitment of low wage workers in shaping im/migrations, destinations, and the formation of Latinx working-class communities. Im/migration and refugee policies have long defined who is eligible to enter and how, as well as who is deemed eligible for citizenship and belonging. Within this context, Latinas and Latinos have developed survival and family reunification strategies for themselves, their families, and their communities.

Class Format: This course is a discussion format.

Requirements/Evaluation: Class participation, short 1-2 page writing assignments, two 4-5 page essays, and a final 5-7 page essay. All writing assignments are based on course materials.

Prerequisites: none

Enrollment Limit: 25

LATS 341 (F) Performing Masculinity in Global Popular Culture (DPE)

Cross-listings: SOC 340 LATS 341 THEA 341 WGSS 347 AMST 358

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of “males” at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia, hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

Prerequisites: none; WGSS 202 would be helpful

Enrollment Limit: 15

Enrollment Preferences: a short statement of interest will be solicited; a subsection of applicants may be interviewed

Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 340(D2) LATS 341(D2) THEA 341(D1) WGSS 347(D2) AMST 358(D2)

Difference, Power, and Equity Notes: This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

LATS 344 (S) Marking Presence: Reading Disability into Latina/o/x Media (DPE)

Cross-listings: LATS 344 WGSS 361 AMST 361

Primary Cross-listing

This course spans Divisions I, II, and III in its exploration of the representation of disability and Latina/o/x identity in the contemporary US context. Employing Angharad Valdivia’s (2020) notion of "marking presence" to describe the intentional ways in which Latina/o/x subjects gain and hold on to mainstream media space, the class places the fields of Disability Studies, Latina/o/x Studies, Gender Studies and Media Studies into conversation. We address the following questions and others: What does media reveal to us about the place of disability and Latinidad in contemporary US life, particularly as these categories intersect with questions of gender, sexuality, national identity and citizenship? How might we read Latinidad and disability into media texts in which they are not otherwise centered? What are the advantages of deploying mainstream media presence as a claim to power for disabled Latina/o/x individuals, particularly those who are multiply marginalized? What are the limitations of such an approach? We will focus on these questions, as well as deploy various media examples (podcasts, social media, film, television and music) alongside scholarly texts to explore topics impacting the Latina/o/x communities such as the relationship between the relationship between immigration and disability, intergenerational trauma and migration, the gendered archetype of the Latina "Loca," disability in academia, the politics of self-care amongst Latinas/xs in the neoliberal context, and the very legal, cultural, and social category of "disabled" itself within dominant society as well as in Latina/o/x communities.

Requirements/Evaluation: Two short (5-6 page) essays; One media analysis exercise; One final reflection letter.

Prerequisites: None.

Enrollment Limit: 12

Enrollment Preferences: Preference given to LATS concentrators, AMST majors and WGSS majors by seniority.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
LATS 344(D2) WGSS 361(D2) AMST 361(D2)

Difference, Power, and Equity Notes: At its core, this course is about understanding difference and relationships of power through an intersectional lens and via the prism of everyday media. In each class we will be discussing issues directly revolving around questions of race, ethnicity, ability/disability, gender, sexuality, and nation. Students will be expected to incorporate an analysis of these issues in their written and oral work for the course.

LEAD 205 (S) From Tocqueville to Trump: Leadership and the Making of American Democracy (DPE)

Cross-listings: PSCI 212 LEAD 205

Primary Cross-listing
America's founders didn't mean to create a democracy. But since the Revolution, leaders have been fighting to make real for all Americans the promise of government of, by, and for the people. In this course, we will look at how leaders have marshaled ideas, social movements, and technological changes to expand the scope of American democracy—and the reasons they have sometimes failed. We will examine how founders such as Benjamin Franklin and James Madison envisioned the relation between the people and the government; how workers, African Americans, and women fought to participate in American politics; and how globalization, polarization, and inequality are straining American democracy and political leadership in the 21st century. We will examine leadership to better understand American democracy—and vice versa. We will ask: What explains why some leaders have succeeded where others have failed? Have some periods of American democratic politics been more amenable to particular kinds of leadership than others? What makes American political leadership distinctive in international comparison? Who, exactly, has been permitted to participate in American politics, and on what terms? How has the relation between the governors and the governed changed over time, and what factors and events have shaped those relations? How has America's democratic experiment compared with (and interacted with) democracy elsewhere in the world? Is America really a democracy at all?

Requirements/Evaluation: bi-weekly short writing assignments, term paper, midterm and final in-class exams

LEAD 254  (F)  Sovereignty, Resistance, and Resilience: Native American Histories to 1865  (DPE)

Cross-listings:  LEAD 254 AMST 254 HIST 254

Secondary Cross-listing

This course surveys Native American/Indigenous North American histories from beginnings through the mid-nineteenth century, tracing the complex ways that sovereign tribal nations and communities have shaped Turtle Island/North America. Equally important, it reckons with the ongoing effects of these pasts in the twenty-first century, and communities’ own forms of interpretation, critique, action, and pursuits of justice. It also introduces foundational methodologies in Native American and Indigenous Studies (NAIS) and strategies for pursuing decolonizing scholarship and action. Emphasis is on primary and secondary works produced by Indigenous authors/creators. Starting with the diversity of Indigenous societies that have inhabited and cared for lands and waters since “time out of mind,” it foregrounds the complexity of Native peoples, nations, and worldviews situated in particular homelands, as well as accounts of origins and migrations. It addresses how societies confronted devastating epidemics resulting from the “Columbian Exchange,” and contended with Euro-colonial processes of colonization, extraction, and enslavement. Indigenous nations’ multifaceted efforts to maintain sovereignty and homelands through pervasive violence, attempted genocide, and dispossession are addressed, as well as forms of relations and kinship with African-American and Afro-Indigenous people. It concludes with how different communities negotiated the tumultuous eras of the American Revolution, forced removal in the 1830s, and Civil War, and created pathways for endurance, self-determination, and security in its aftermath. The course centers on Indigenous actors--intellectuals, diplomats, legal strategists, knowledge keepers, spiritual leaders, artists, and many others--and consistently connects historical events with present-day matters of land, historical memory, education, caretaking, and activism. Additionally, it provides an opportunity to engage with original materials in the Williams College Archives/Special Collections and Art Museum. While the scope of the course is continental and transoceanic, it devotes significant attention to the Native Northeast and the Stockbridge-Munsee Mohican homelands in which Williams College is located.

Class Format: Lecture with small- and whole-group discussions

Requirements/Evaluation:  Attendance at lectures, active participation in class discussion, midterm exam, short essays based on readings and discussion topics, museum/archives exercise, final essay/project.

Prerequisites: none

Enrollment Limit:  40

Enrollment Preferences:  History and American Studies majors, followed by first- and second-year students

Expected Class Size:  30-40

Grading:  no pass/fail option,  yes fifth course option

Fall 2023
LEC Section: 01  TR 9:55 am - 11:10 am  Christine DeLucia
The ocean, and human relationships with it, have been central features of literatures and cultures around the world for more than a thousand years. But since literary study is typically based around authors' homelands, careful examination of the oceanic experience is often pushed to the periphery—"an empty space" to be crossed between nations, a "vast darkness" antithetical to human life, or a mirror for land-borne concerns. Increasingly, however, scholars and readers are centering the sea and stories about it as a means stepping outside human frameworks of space and time, situating the complex emotions and narratives inspired by the ocean into a complex network of geologic history and teeming other-than-human life. This course examines a wide range of texts and perspectives on the ocean and human relationships with it. Doing so will help us consider how literature both plays into and subverts dominant viewpoints of the ocean. Through texts that consider 19th-century whaling, the Middle Passage, the postcolonial Caribbean, and islands throughout the Pacific Ocean, we will explore a range of questions, including: What can we learn from examining efforts to write about the ocean? How do ocean stories help individuals understand themselves, their communities, and their place in global environments? What can the range of cultural and literary perspectives on our "single, global ocean" reveal about the ways different people are both connected with and profoundly distant from each other? Most importantly, we will practice, as a classroom community, different strategies for carefully reading texts while connecting them to cultural traditions, surrounding environments, and personal experiences.

Class Format: weekly roundtable discussions, including coastal and near-shore field trips and multiple field seminars.

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final assignment

Prerequisites: N/A

Enrollment Limit: 25

Enrollment Preferences: Williams-Mystic Students only

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: offered only at Mystic Seaport

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 231(D1) MAST 231(D1)

Difference, Power, and Equity Notes: This course focuses on the range of cultural perspectives about the sea, as well as the ways those perspectives can unsettle and challenge dominant narratives about the sea and its role in colonial expansion. Furthermore, this course centers voices that are typically overlooked in the genre of "Sea Literature," paying particular attention to Indigenous and African-American narratives about the ocean.

MAST 351  (F)(S) Marine Policy  (DPE) (WS)

Cross-listings:  ENVI 351 MAST 351 PSCI 319

Primary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.
**Class Format:** This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

**Requirements/Evaluation:** Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

**Prerequisites:** none

**Enrollment Limit:** 23

**Enrollment Preferences:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Expected Class Size:** 22

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 351 (D2) MAST 351 (D2) PSCI 319 (D2)

**Writing Skills Notes:** Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

**Difference, Power, and Equity Notes:** Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

**MAST 352 (F)(S) American Maritime History (DPE) (WS)**

**Cross-listings:** MAST 352 HIST 352

**Primary Cross-listing**

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

**Class Format:** Seminars, discussions, and field seminars

**Requirements/Evaluation:** Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

**Prerequisites:** None

**Enrollment Limit:** 27

**Enrollment Preferences:** If course over-enrolls, preference will be given to sophomores and juniors

**Expected Class Size:** 22

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Offered only at Mystic Seaport

**Distributions:** (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:

MAST 352(D2) HIST 352(D2)

Writing Skills Notes: Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

MUS 111  (F)  Music in Global Circulation  (DPE)

This course introduces a variety of musical genres and practices from around the world, alongside a discussion of the processes and politics of their global circulation. Through learning about a combination of contemporary styles and longstanding musical traditions spanning a broad geographical range, students will develop a working knowledge of musical terms, concepts, and influential musicians. Beyond engaging with music's sound and structure, we will address its capacity to express personal and group identity, and its ability to both reflect and shape broader social ideas and circumstances. In particular, we will consider music's global circulation, and how its contents and meanings reflect those processes. Genres covered in the course vary intermittently but often include: “throat singing” genres in Tuva and Sardinia, Zimbabwean mbira and Chimurenga music, Argentine Tango, Ghanaian azonto and highlife, Balinese gamelan, and North Indian classical music. No prior musical training is required.

Requirements/Evaluation: class attendance and participation, regular short assignments/study questions, three 5-7 page written assignments, and an 8-10 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: current or prospective majors in Music, upperclassmen.

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)  (DPE)

Difference, Power, and Equity Notes: Not only are students exposed to a wide range of musical material from across the globe, they also consider how music becomes meaningful and powerful in light of local contexts and the politics of circulation. Discussions and written assignments address issues including gender identity, economic disparity, the politics of cultural preservation, and music's potential in situations of political unrest.

MUS 133  (S)  Musics of the Spanish Colonial Empire, ca. 1500-1800  (DPE)

With territories around the globe from the Americas to the Philippines to portions of Western Europe, the Spanish colonial empire was, at its height, one of the largest and most expansive in history. This course explores the myriad ways in which Spanish colonial powers influenced, interacted with, and reacted to the musical cultures of the colonized and how indigenous and/or colonized peoples persisted in asserting their musical voices over the course of several centuries—from the time of the Spanish arrival in the Americas (as well as southern Italy and the East Indies) during the fifteenth and sixteenth centuries to the empire's eventual decline in the nineteenth century. We will begin by defining the concepts of “colonialism” and “imperialism” in order to understand how such political and socio-economic power structures developed and attempted to exert control and influence over
subjugated populations—and consequently over their music. From there, we will investigate some of the musical developments and repertories that resulted from these efforts through a series of modules on various territories colonized by Spain, including the Spanish territories of Naples/southern Italy, New Spain, and the Philippines. Coursework will include discussion-based and written responses to weekly readings and listening assignments and small group presentations on a Spanish colonized space not covered in one of the central course modules. The ability to read musical notation is not required.

**Class Format:** Lecture-discussion

**Requirements/Evaluation:** Attendance/participation; weekly discussion-leading and informal written forum responses to assigned materials; two close reading/listening papers; and a final collaborative presentation project to be conducted in small groups

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference given to first years and sophomores

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** The course explores how political and socio-economic power structures exerted control and influence over subjugated populations in the Spanish colonial empire—and consequently over their music, and examines the myriad ways in which Spanish colonial powers influenced, interacted with, and reacted to the musical cultures of the colonized and how indigenous and/or colonized peoples persisted in asserting their musical voices over the course of several centuries

**MUS 150 (S) The Broadway Musical (DPE)**

**Cross-listings:** THEA 150 MUS 150

**Primary Cross-listing**

Named for a specific road but enjoying a global impact, the Broadway musical has intersected with multiple styles and societal concerns over the past century. In this course, we explore the American musical theater's roots and relationship to opera, operetta, vaudeville, minstrelsy, and Tin Pan Alley. Traveling through the genre's history, we will encounter a wide range of musical styles, including ragtime, jazz, rock, and hip hop, and will explore several genre transformations, such as movies made into musicals and musicals into movies. We will develop a range of analytical skills as we investigate connections between choreography, lyrics, music, staging, and production. Throughout the semester, we will consider the genre's representations and reflections of ethnicity, race, sexuality, and class. The syllabus includes representative works by Gilbert and Sullivan, Cohan, Gershwin, Kern, Weill, Rodgers and Hammerstein, Lerner and Loewe, Bernstein, Sondheim, Lloyd Webber, Tesori, and Miranda, with particular focus on such works as Showboat, Oklahoma!, Guys and Dolls, West Side Story, Hair, Rent, and Hamilton.

**Class Format:** discussion

**Requirements/Evaluation:** a midterm, a brief paper, an 8-page paper, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** Seniors and Juniors and music majors.

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 150(D1) MUS 150(D1)

**Difference, Power, and Equity Notes:** We will develop skills aimed at analyzing and interpreting how perceptions of race, gender, and class shaped, and were shaped by, Broadway. We will consider the extent to which, for example, blackface minstrelsy and ethnic-based humor persisted and how specific musicals aimed to engage with critical social and political issues throughout the genre's history. Musicals have played a major role in the contested and ongoing endeavor to define "America."
MUS 177 (S) Gender and Sexuality in Music (DPE)

Cross-listings: WGSS 177 MUS 177

Primary Cross-listing

This course explores key themes in the expression of gender and sexuality through music. It draws from primarily 21st century examples, across cultures and genres, ranging from pop boy bands to Indian bhangra dance to the musical avant-garde. Themes will include: communicating gendered ideals, dance and embodiment, transgressive performances, biography and subjectivity, intersectionality, music and sexual violence, and marketing. We will explore the ways that ideas and identities related to sex and gender are formulated and mobilized in music's performance and consumption. Inevitably, issues of sound and stagecraft intersect with factors such as race, age, and class, further informing these experiences. Students will consider their own processes of identifying and interpreting expressions of gender and sexuality in sound and movement, and contemplate the role of culture and society in informing those interpretations.

Requirements/Evaluation: attendance/participation, intermittent GLOW posts and short assignments (2 pgs or less), midterm project, and either a 12-page final paper or a project with supplementary paper (length to be determined in consultation with the instructor).

Prerequisites: open to all students; familiarity with musical terminology is helpful but not required

Enrollment Limit: 20

Enrollment Preferences: WGSS and MUSC majors/prospective majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 177(D2) MUS 177(D1)

Difference, Power, and Equity Notes: This course critically examines the ways in which music constructs and reflects gendered and sexual identities in intersectional space. We discuss how normative viewpoints come to be accepted and interpreted as 'natural,' and how musicians and audiences have maneuvered within and against those socio-political expectations. Music and readings span a wide range of sources—elite, popular, counter-cultural; from Euro-American sources to genres hailing from Brazil, Korea, and India.

Attributes: MUS World Music/Ethnomusicology

MUS 214 (S) Divas and Dervishes: Introduction to Modern Arab Music and Performance (DPE) (WS)

Cross-listings: MUS 214 ARAB 214 COMP 270

Secondary Cross-listing

From Sufi rituals to revolutionary uprisings, music has long played a central role in the social, political, and religious life of the Arab world. This is especially audible in the modern era, when new technologies and institutions began to record, amplify, and broadcast the region’s sounds, preserving centuries-old traditions while also producing new forms of popular music. This course introduces students to Arab musical genres and practices as they developed from the late nineteenth century. We will cover a broad geographical range, exploring the classical Andalusian repertoires of Algeria, ecstatic dervish chants in Egypt, patriotic pop tunes from Lebanon, and other topics. To highlight connections between musical traditions as well as their unique local features, we will ask questions such as: What can music tell us about interactions between sacred and secular life? How is music used to define social groups and negotiate identity, gender, and class? Which musical characteristics are associated with Arab “heritage” and “modernity,” and how are these performed? In what ways does music shape everyday life in the Arab world? Class sessions and discussion will be based on academic readings and at-home listening assignments. No previous knowledge of Arabic or Arab music are required.

Requirements/Evaluation: In-class participation, short essays (1 page) every two weeks, midterm presentation, and a final paper (12-14 pages).

Prerequisites: None

Enrollment Limit: 19
Enrollment Preferences: Arabic Studies and Music majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
MUS 214(D1) ARAB 214(D1) COMP 270(D1)

Writing Skills Notes: Students will develop their writing skills by submitting one-page unit responses every two weeks and a final paper of 12-14 pages on a topic of their choice. Students will receive feedback on each writing assignment and have opportunities for multiple drafts and peer review during the semester.

Difference, Power, and Equity Notes: Through the lens of music, this course critically examines modern Arab society and power dynamics related to politics, gender, race, and class.

Spring 2024

SEM Section: 01 TR 9:55 am - 11:10 am Nicholas R Mangialardi

MUS 217 (F) Hip Hop Culture (DPE) (WS)

Cross-listings: ENGL 221 AFR 222 MUS 217 AMST 222

Secondary Cross-listing

The course examines how young people of color created hip hop culture in the postindustrial ruins of New York City, a movement that would eventually grow into a global cultural industry. Hip hop music producers have long practiced “diggin’ in the crates”—a phrase that denotes searching through record collections to find material to sample. In this course, we will examine the material and technological history of hip hop culture, with particular attention to hip hop’s tendency to sample, remix, mash-up, and repurpose existing media artifacts to create new works or art. We will use a media archaeological approach to examine the precise material conditions that first gave rise to graffiti art, deejaying, rapping, and breakdancing, and to analyze hip hop songs, videos, and films. Media archaeology is a critical and artistic practice that seeks to interpret the layers of significance embedded in cultural artifacts. How does hip hop archaeology remix the past, the present, and the future? How do the historical, political, and cultural coding of hip hop artifacts change as they increasingly become part of institutional collections, from newly established hip hop archives at Cornell and Harvard to the Smithsonian National Museum of African American History and Culture?

Requirements/Evaluation: Four papers, project with presentation, and a final exam.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: AMST majors or prospective majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 221(D1) AFR 222(D2) MUS 217(D1) AMST 222(D2)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one’s thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to use an effective descriptive and critical vocabulary to discuss and analyze artifacts of hip hop culture, with attention to race, gender, class, sexuality, and other categories of social difference. They must understand the material, technological, historical, and cultural contexts that gave rise to hip hop culture, and proficiently synthesize scholarly perspectives related to the formation and transformations of hip hop from the early 70s to the early 21st cent.

Attributes: AFR Culture, Performance, and Popular Technologies AMST Arts in Context Electives AMST Comp Studies in Race, Ethnicity, Diaspora
MUS 323  (S)  Arts Organizing in Africa and the Diaspora  (DPE)

Cross-listings:  DANC 323  THEA 321  MUS 323

Primary Cross-listing

At the heart of this class is the question, how do artists and organizations use the performing arts to effect social change in their communities? Drawing from a number of case studies from throughout Africa and the African Diaspora, we will first endeavor to understand and contextualize issues related to education, social uplift, the environment, and the economy as they relate to specific communities. We will then examine how a series of organizations (from grassroots campaigns to multinational initiatives) utilize the performing arts in response to those issues. Among the issues we will discuss at length are: -How do performers and organizations navigate the interplay between showcasing the performance talents of individuals and groups and foregrounding an issue or cause? More broadly, what dilemmas emerge as social and aesthetic imperatives intermingle? -What are the dynamics between people acting on a local level within their communities and their various international partnerships and audiences? -How can government or NGO sponsorship help and/or hinder systemic change? By the end of the semester, students will be equipped with conceptual frameworks and critical vocabularies that can help them ascertain the functions of performance within larger organizations and in service to complex societal issues. Throughout the course, we will watch and listen to a variety of performances from traditional genres to hip-hop, however this class is less about learning to perform or analyze any particular genre than it is about thinking through how performance is used as a vehicle for social change. Case studies will include youth outreach and uplift in Tanzania through the United African Alliance, campaigns to promote girls’ education in Benin and Zimbabwe, community-wide decolonizing initiatives through the Yole!Africa Center in the Democratic Republic of Congo, and the cultural reclamation of a mining town in Suriname through the arts organization, Stichting Kibii.

Requirements/Evaluation:  Four case study profiles, midterm essay (5-7pages), and a final project. Regular participation in class discussion.

Prerequisites:  None

Enrollment Limit:  15

Enrollment Preferences:  If the course exceeds the maximum enrollment, selection will be made based on students explanations for why they want to take the class.

Expected Class Size:  15

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

DANC 323(D1)  THEA 321(D1)  MUS 323(D1)

Difference, Power, and Equity Notes:  This course interrogates on a fundamental level issues of power and equity. Using the performing arts as a critical lens, we discuss a series of social and environmental challenges that communities of African descent face. These are in direct dialogue with global systems of power and economic factors. Issues include: environment, education, local communities’ interactions with multinational corporations, and representational politics in performance.

Attributes:  MUS World Music/Ethnomusicology

SEM Section: 01    MW 7:00 pm - 8:15 pm    Corinna S. Campbell

PHLH 201  (S)  Dimensions of Public Health  (DPE)

Public health is concerned with protecting and improving health at the level of a community or population. Although individual behavior is an essential element of public health, collective, rather than individual, outcomes are the focus of public health study. In this course we will survey the field of public health, introducing students to core concepts and methods that highlight the interrelationship of individual choice and social institutions with environmental and biological factors in producing health outcomes at the population level. We will develop these concepts and methods within the context of signal cases and public health crises.

Requirements/Evaluation:  two papers on a selected population or country and health issue, peer reviews and active contribution to class discussion

Prerequisites:  none

Enrollment Limit:  14

Enrollment Preferences:  sophomores, potential Public Health concentrators
**Expected Class Size:** 14  
**Grading:** no pass/fail option, yes fifth course option  
**Distributions:** No divisional credit (DPE)

**Difference, Power, and Equity Notes:** This course fulfills the DPE requirement because of its central focus on the ways that difference and power shape health outcomes in the U.S. and internationally. It uses an interdisciplinary approach to explore issues including the historical relations between communities of color, healthcare providers, and public health practitioners; contestation over the role of markets and government in public health; and differing explanations for the patterns of race, class, etc., in health outcomes.

**Attributes:** PHLH Core Courses

**PHLH 351 (F) Racism in Public Health (DPE)**

**Cross-listings:** PHLH 351 AAS 351

**Primary Cross-listing**

Across the nation, states, counties and communities have declared racism a public health crisis. This push to identify systemic racism as a high priority in public health action and policy is an important symbolic and political move. It names the faults of histories, systems and institutions but also brings to the spotlight the individual and community responsibility to dismantle racism in the US. In this tutorial, we will examine racism in public health policy, practice and research through an investigation of several mediums of evidence and information, ranging from peer reviewed literature to news editorials, podcasts and documentaries. We will explore specific pathways by which legacies of colonialism and racism function in various public health disciplines such as epidemiology, social & behavioral sciences, health policy and environmental health while also examining the dynamics of power and history in research and community practice. We will take deep dives into issues on how health can be impacted by redlining, racist medical algorithms, racial trauma and stress and police violence, to name a few. Students will also have two opportunities to select their own case studies, as a way for you to research and learn about particular racial health issues that are of personal interest. This course is also about self-reflection and exploration of the ways in which our identities and lived experiences impact our understanding and perspective. We will gain skills in speaking across differences and articulation of how our own perceptions and lived experiences of race and racism impact our study of public health. This tutorial requires an openness to self-reflection and the practice of listening and articulation.

**Requirements/Evaluation:** bi-weekly tutorial papers, weekly journaling, oral commentaries and tutorial discussion

**Prerequisites:** PHLH 201 or instructor approval.

**Enrollment Limit:** 10

**Enrollment Preferences:** 1-Public Health concentrators. 2- Asian American Studies concentrators.

**Expected Class Size:** 10  
**Grading:** no pass/fail option, no fifth course option

**PSCI 173 (F) Islamophobia: A Global Perspective (DPE)**

**Cross-listings:** PSCI 173 GBST 105 REL 107
This course's goal is to show how the racialization of Islam and Muslims has been constitutive to the latter's imagination. It looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. The course goes back to the founding moments of an imagined white-Christian Europe and how the racialization of Muslim bodies was central to this project and how anti-Muslim racism continues to be relevant in our world today. The course will give a global perspective on Islamophobia and how it is structuring and used by political actors in various territories. The course will show how Muslims were constructed as subjects in history, politics, and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. The course is based on the literature of multidisciplinary studies by leading scholars in the field, drawing from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology. This course's goal is to show how the racialization of Islam and Muslims has been constitutive to the latter's imagination. PSCI 212 (S) From Tocqueville to Trump: Leadership and the Making of American Democracy (DPE)

Cross-listings: PSCI 212 LEAD 205

Secondary Cross-listing

America's founders didn't mean to create a democracy. But since the Revolution, leaders have been fighting to make real for all Americans the promise of government of, by, and for the people. In this course, we will look at how leaders have marshaled ideas, social movements, and technological changes to expand the scope of American democracy--and the reasons they have sometimes failed. We will examine how founders such as Benjamin Franklin and James Madison envisioned the relation between the people and the government; how workers, African Americans, and women fought to participate in American politics; and how globalization, polarization, and inequality are straining American democracy and political leadership in the 21st century. We will examine leadership to better understand American democracy--and vice versa. We will ask: What explains why some leaders have succeeded where others have failed? Have some periods of American democratic politics been more amenable to particular kinds of leadership than others? What makes American political leadership distinctive in international comparison? Who, exactly, has been permitted to participate in American politics, and on what terms? How has the relation between the governors and the governed changed over time, and what
factors and events have shaped those relations? How has America's democratic experiment compared with (and interacted with) democracy elsewhere in the world? Is America really a democracy at all?

Requirements/Evaluation: bi-weekly short writing assignments, term paper, midterm and final in-class exams

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Leadership Studies concentrators and Political Science majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 212(D2) LEAD 205(D2)

Difference, Power, and Equity Notes: Using conceptual tools drawn from political science and history, it offers students a deep understanding of the roots of contemporary issues of difference, power, and equity in American public life as well as a better sense of how and why power relations and modes of inclusion/exclusion are subject to change.

PSCI 220  (F)  The U.S. and Afghanistan: A Post-Mortem  (DPE)

Cross-listings: GBST 208 ASIA 208 ANTH 208 PSCI 220

Secondary Cross-listing

The United States attacked and defeated the Afghan Taliban regime over in the course of a few short weeks in 2001. Within a few years, the finality of that victory was brought into question as the Taliban regrouped and eventually reasserted itself as a formidable guerilla army that the U.S. military could not easily defeat. At the same time that it was facing a more difficult military challenge than anticipated, the United States got bogged down in the process of nation-building, as well as efforts at social reform. This course examines the history of American involvement in Afghanistan, beginning with the Cold War when the U.S. used Afghanistan as a test case for new models of political modernization and economic development. We will go on to discuss the U.S. support for Islamist political parties during the Soviet occupation of Afghanistan in the 1980s and the consequent rise of the Taliban, and the role of Afghanistan in the September 11th attacks and the "War on Terror" that followed. The course will conclude with a consideration of the impact and legacy of the two decades of nation-building and social reform carried out by the United States since 9/11.

Requirements/Evaluation: grading will be determined by class participation, two short (500 word) essays, and a 15-page research paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors, Global Studies concentrators, Political Science and Asian Studies majors will get preference

Expected Class Size: 15-20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 208(D2) ASIA 208(D2) ANTH 208(D2) PSCI 220(D2)

Difference, Power, and Equity Notes: Among the topics relevant to power and difference to be considered in this course are the American support and later disavowal of Islamist political parties to advance US geopolitical goals, public relations efforts "to save Afghan women" after 9/11, and the uses and misuses of American military, economic, and political power to build a western-style democratic government and bring western-oriented social reforms to a society radically different from U.S. society.

Fall 2023
**PSCI 236 (S) Feminist Legal Theory (DPE)**

**Cross-listings:** WGSS 236 PSCI 236

**Primary Cross-listing**

What can a critical analysis of gender and sexuality bring to the study of law, constitutions, legal interpretation, and the task of judging? Well-known contributions by feminist theorists include the conceptualization and critique of anti-discrimination frameworks, the legal analysis of intersecting systems of social subordination (particularly gender, race, class, sexuality, disability), and the theorization of "new" categories of rights (e.g. sexuate rights). Accompanying these interventions in the legal field is a deep and sustained inquiry into the subject of law: Who can appear before the law as the proper bearer of civil and human rights? What kinds of violations and deprivations can be recognized as harms in need of redress? Who gets to make these judgments, and according to what rules? While our examples will be drawn mainly from family law, the regulation of sex/reproduction, and workplace discrimination, the main task of this course will be to deepen our understanding of how the subject of law is constituted. Illustrative cases to aid our inquiry will be drawn primarily from the USA and Canada, with additional examples from India, South Africa, and possibly European law. Theorists we read will represent many kinds of feminist work that intersect with the legal field, including academic studies in political theory, philosophy, and cultural theory, along with contributions from community organizers engaged in anti-violence work and social justice advocacy.

**Requirements/Evaluation:** One oral presentation; three 6-8 page papers; regular class participation.

**Prerequisites:** None.

**Enrollment Limit:** 25

**Enrollment Preferences:** Preference will be given to PSCI and WGSS majors and JLST concentrators.

**Expected Class Size:** 25

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 236(D2) PSCI 236(D2)

**Difference, Power, and Equity Notes:** The course analyzes the relationship between the legal system and social distributions of power, focusing on the way that inequalities based on gender, race, class and other forms of social stratification either enhance or limit individuals' access to legal protection and legal remedies.

Spring 2024

**PSCI 249 (S) Black and Brown Jacobins (DPE) (WS)**

**Cross-listings:** AMST 218 PSCI 249

**Secondary Cross-listing**

What does it take to be free in the free world? In this class we explore the dark side of democracy. The title is inspired by C.L.R. James' famous book, Black Jacobins, about the Haitian Revolution (1791-1804). This revolution was the most successful revolt of the enslaved in recorded history. But the irony is that their oppressors were the leaders of the French Revolution across the Atlantic. Those who proclaimed "liberty, equality, fraternity" for themselves violently denied them to others. There is a similar dismal irony to the American Revolution, as captured by the title of Frederick Douglass' famous 1852 speech, "What to the Slave Is the Fourth of July?" Not even the Civil War could resolve this issue, as demonstrated by the failure of Reconstruction and the rise of Jim Crow. To revisit this history, we will read W.E.B. Du Bois' great book, Black Reconstruction in America. Alongside a selection of readings by canonical postcolonial writers and current political theorists, James and Du Bois provoke us to ask what it would take for the democratic world to be truly free.

**Requirements/Evaluation:** Participation, weekly journal, two 5-page essays

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** AMST majors or prospective majors
**Expected Class Size:** 12  
**Grading:** yes pass/fail option, yes fifth course option  
**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:  
AMST 218(D2) PSCI 249(D2)

**Writing Skills Notes:** "Black and Brown Jacobins" is a writing-intensive course that requires weekly journaling. Journal entries are a means for students to track the progress of their learning, reflect on the reading assignments, practice their writing skills, and receive written feedback. In addition, students will write two persuasive essays in response to a prompt.

**Difference, Power, and Equity Notes:** "Black and Brown Jacobins" calls into question the success of modern democracy from the perspective of minoritized groups, in particular Black Americans and Afro-Caribbeans. Students will grapple with the legacy of enslavement in the Americas, the Haitian Revolution (1791-1804), the American Civil War and Reconstruction (1861-1877), Jim Crow, and our current era of mass incarceration. The question driving this course is, what does it take to be free in the free world?

**Coastal Policy and Governance**  
**PSCI 319 (F)(S) Marine Policy** (DPE) (WS)  
**Cross-listings:** ENVI 351 MAST 351 PSCI 319

**Secondary Cross-listing**

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

**Class Format:** This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

**Requirements/Evaluation:** Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

**Prerequisites:** none

**Enrollment Limit:** 23  
**Enrollment Preferences:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Expected Class Size:** 22

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:  
ENVI 351(D2) MAST 351(D2) PSCI 319(D2)

**Writing Skills Notes:** Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

**Difference, Power, and Equity Notes:** Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students
analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

PSCI 349  (S)  Cuba and the United States  (DPE)  (WS)
We examine the long and deeply felt history of dependence and conflict between Cuba and its colossal neighbor to the north. The course begins with the political economy of the colony, then covers the Cuba- US relationship from José Martí and 1898 through the Cold War to the present, emphasizing the revolutionary period. Tutorial topics include: sovereignty and the Platt Amendment; culture and politics; race and national identity; policies on gender and sexual identity; the institutions of "popular power"; the post-Soviet "Special Period"; the evolution of the Cuban exile community in the US; and the fraught agenda of reform and generational transition. Materials include journalism, official publications, biographies, travel accounts, polemics, policy statements of the US government, and a wide range of academic works.

Class Format: a lecture in the first week; then ten weeks of tutorial; then a discussion class in the final week
Requirements/Evaluation: five 5- to 6-page papers, five 1- to 2-page responses, and one 1-page essay for the final class
Prerequisites: any course on Latin America or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Political Science majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions:  (D2)  (DPE)  (WS)

Writing Skills Notes: Assignments are graded and returned weekly. After each student has written one long paper and one response, the professor meets with them individually to discuss the composition and presentation of each genre. For the final class, students write a one-page paper in E’ (E-prime), English without the verb "to be."

Difference, Power, and Equity Notes: Among other topics, the course describes an independence war fought by insurgents dedicated to color-blind citizenship (even as the "civilized world" embraced scientific racism); neo-colonialism under the Platt Amendment and after; race and the Revolution; gender and the changing treatment of sexual identity under the Revolution; and the categorical power differences that arise when only one political party is permitted to organize.

Spring 2024
TUT Section: T1    TBA    James E. Mahon

PSCI 423  (S)  Senior Seminar: Humanitarianism  (DPE)
Since the mid-1980s, humanitarianism has been one dominant attitude that powerful and privileged countries, organizations and people have adopted with regard to poverty or disaster elsewhere. Humanitarianism aims at rescue, striving to keep marginal people alive until some solution can be found. It aims not to address crises' causes nor to assist with solutions—which it considers political—just to keep human bodies alive. Critics contend that humanitarianism produces harm, provides structural incentives for people to do more or less than they need to, and deepens inequality between actors and targets. They contend that it legitimates a view of the status quo, in which such terrible things are bound to happen without real cause. This course confronts humanitarianism as an ideology through reading its defenders and critics, and as a political strategy assessing its usefulness, to whom.

Class Format: three students start class discussion every day; one reads a short (4-page) essay and two read shorter (two-page) essays
Requirements/Evaluation: three longer essays, six shorter essays, constructive participation
Prerequisites: PSCI 202 and at least one elective in international relations
Enrollment Limit: 16

Enrollment Preferences: Political science seniors then juniors; other seniors, then juniors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course asks students to investigate the way that assumptions about superiority, and "helping practices" adopting those assumptions, can either reinforce or undermine unequal social and political outcomes and categories. We evaluate liberal and postcolonial (structural violence) models of international aid.

PSYC 406 (F) Are there any universal psychological phenomena? (DPE)

In this course, we will critically examine the ways culture, identities, power, systems, and privilege have shaped our understanding of human behavior as well as the consequences for policy, education, intervention, and prevention. Students will: a) evaluate the ways in which unmeasured cultural variables may have influenced the findings of seminal research articles and psychological theories; b) identify new methodological approaches, concepts, and processes that are revealed when we centralize people and topics that have been excluded from the research literature; c) examine ways the field has contributed to structural oppression and inequities; and d) design studies that provide robust tests of universality, elucidate the limits of universality, and have implications for addressing inequities. This student-led course will allow students to identify topics of interest in multiple sub-disciplines of psychology, select empirical readings, and lead class discussion.

Requirements/Evaluation: Course requirements include reading empirical articles, participating in class discussions, selecting relevant topics and readings for class discussions, leading 2 class discussions, and writing three empirically-based papers (approximately 5 pages double-spaced).

Prerequisites: None

Enrollment Limit: 14

Enrollment Preferences: Senior psychology majors

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (DPE)

Difference, Power, and Equity Notes: Students will address the question of whether there any universal psychological phenomena. To do so, students will use scientific reasoning and quantitative skills to critically examine the ways culture, identities, power, systems, and privilege have shaped our understanding of human behavior as well as the consequences for policy, education, intervention, and prevention. Students will use an intersectional approach to understand the ways identity and systems shape psychological phenomena.

REL 115 (F) Latina Feminist Spiritualities (DPE) (WS)

Cross-listings: WGSS 115 REL 115 LATS 115

Secondary Cross-listing

Self-proclaimed feminist activists, who hail from a variety of ethnic Latina/o/x/e (Latine) backgrounds, have often appealed to "ancestral" and "spiritual traditions" as integral to their activism and commitments. Some Latine feminists turned to "spiritual" traditions including brujería/witchcraft; curanderismo and Indigenous healing traditions; Santería/Lukumi and other AfroDiasporic traditions; astrology; home altars; various "mystical" traditions such as Kabbalah and Sufism, as well as Christian mystics like Teresa of Avila or Sor Juana Inés de la Cruz. Others have turned to the appropriation of "Eastern" traditions such as yoga, Tibetan Buddhism, and Zen Buddhism. This course engages students in an intensive introduction to some of the varieties of Latine feminist thought and contexts, including how activists, writers, and artists think about women, gender, sexuality, race, class, colonialism, the earth, healing, and a better world. How do these feminists of different Latine backgrounds and contexts imagine a better world? How and why do they appeal to spiritual traditions as a source of wisdom, healing, and lived practice for a better world? In this course, we seek to understand both particular Latine feminist spiritual practices on their own terms, as well as why such writers and activists appeal to "the spiritual" in Latine contexts. We will also consider how they frame notions of "the spiritual" in relationship to notions of "the religious" and "the secular."

Requirements/Evaluation: Grading is based on 5-6 page papers written on alternating weeks and brief 1-2 page response papers shared on alternating weeks as well as participation and two paper revisions.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Latina/o Studies concentrators, religion majors, first-year students interested in Latina/o Studies and/or religion

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 237 (F) Islam in the United States: Race, Religion, Politics (DPE)

Cross-listings: AMST 237 REL 237 AFR 237 AAS 237

Primary Cross-listing

Malcolm X is one of the most iconic yet controversial figures in the black freedom struggle in the United States. He is also arguably the most prominent and influential Muslim in the history of the United States. His story and legacy powerfully illustrate the complex intersections of Muslim identity, political resistance, and national belonging. From the early period of "Black Muslim" movements represented by Malcolm X, to the current "War on Terror" era, American Muslims have faced a complex intersection of exclusions and marginalization, in relation to national belonging, race, and religion. Taking Malcolm X as our point of departure, this course examines how American Muslims have navigated these multiple layers of marginalization. We will therefore consider how the broader socio-political contexts that Muslims are a part of shape their visions of Islam, and how they contest these competing visions among themselves. In so doing, we will examine the complex relation between religion, race, and politics in the United States.

Throughout the course, we will be engaging with historical and anthropological material, autobiographies, documentaries, films, historical primary-source documents, music, and social media materials. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to ideology, race, nationality, ethnicity, culture, gender, and language.

Requirements/Evaluation: regular reading responses, 2 midterm essays, final exam

Prerequisites: none

REL 249 (S) Anti-Semitism (DPE)
Cross-listings: REL 249 JWST 249

Primary Cross-listing
This course will investigate intellectual traditions, political movements, and cultural objects that portray Jews, Jewishness, or Judaism as essentially pernicious. We will analyze materials from a variety of times and places, including the ancient world, the medieval period, and the present day. We will assess the impact of anti-Semitism on the lives of Jews and non-Jews. But we will also read theoretical approaches to the study of anti-Semitism that raise key questions for our investigation. Where does the term "anti-Semitism" come from and how exactly should it be defined? Is anti-Semitism a continuous phenomenon that connects every claim of Jewish perniciousness, wherever it is alleged, for over two thousand years of human history? Or should every context be treated as fundamentally distinct, so that the claim of Jewish perniciousness is presumed to have a distinct meaning, origin, and purpose in each case? What motivates charges of Jewish perniciousness? What are the particular threats typically alleged to be posed by Jews, Jewishness, and Judaism? How do constructions of Jewish perniciousness fit with constructions of race, gender, ethnicity, religion, class, sexuality, and nationality in different times and places?

Requirements/Evaluation: Three 5-7 page papers, class participation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Jewish Studies concentrators, Religion majors, and students who have taken JWST 203

Expected Class Size: 15

REL 258 (F) Buddhism, Social Change, & Reproductive Justice in the Anthropocene  (DPE) (WS)

Cross-listings:  WGSS 225 ASIA 258 ANTH 258 REL 258

Secondary Cross-listing

This course considers how three women profoundly shaped the Buddha's life and legacy in terms of social change & reproductive justice. Our central characters are Maya--the Buddha's mother, who died shortly after delivering him; Pajapati--the Buddha's stepmother & aunt who raised him; and Yasodhara--his wife, whom he abandoned when he left home to seek enlightenment. We explore the classical Buddhist discourses and modern biographies to explore how these three women impacted what the Buddha taught and practiced in terms of social and gender justice. These women helped shape the Buddha's radical decision to found the first renunciate order for women in Asian history and helped shape Buddhist attitudes towards female empowerment, bodily autonomy, and reproductive justice for that past 2500 years. Our historical genealogy will explore how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice. Along the way we consider: How did these three women reject existing social hierarchies in the Buddha's day and with what impacts for modern Buddhist practices and institutions? How do the social transformations of the Buddha's day still impact modern struggles for gender justice & reproductive justice in the Anthropocene?

Requirements/Evaluation:  Attendance, writing weekly essays or written feedback. There are no grades first half of the semester but weekly feedback on writing.

Prerequisites: none, but a course in ANTH or REL is preferred

WGSS 225(D2) ASIA 258(D2) ANTH 258(D2) REL 258(D2)

Writing Skills Notes: We write every week--either 1500 word lead essays, or written feedback (and oral responses) to the lead essay and weekly text. We have a mid semester 'writing chat' with the instructor where we discuss strengths and weakness of individual student writing.

Difference, Power, and Equity Notes: We explore the three women who left a lasting legacy on the Buddha's teachings and practices in terms of gender egalitarianism, social justice, and reproductive justice. Our historical genealogy explores how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice.

REL 268 (S) Where are all the Jews?  (DPE) (WS)

Cross-listings:  ARAB 363 REL 268 COMP 363 JWST 268

Secondary Cross-listing

Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance Israélite Universelle's schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews’ departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help
students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, ethnographies, historiographical works, and anthropological texts alongside documentaries films, the students will understand how literature and film have become a locus in which amnesia about Arab/Berber Jews is actively contested by recreating a bygone world. Resisting both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

Requirements/Evaluation: 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: students interested in critical and comparative literary, religious or historical studies.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 363(D1) REL 268(D2) COMP 363(D1) JWST 268(D2)

Writing Skills Notes: Students are required to present an outline of their papers before submitting a draft paper. The professor will give feedback on each written work to improve students' writing skills. Students are required to incorporate the feedback to improve their drafts before they become final. Students will receive detailed and consistent feedback about their writing in Arabic language. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Students in this course will understand the historical process that lead to the disappearance of Arab/Berber Jews. Students also will work out alternative ways to grasp Jewish-Muslim relations beyond nostalgia and conflict. Finally, students enrolled in the course will grapple with and try to disentangle the complexity of Jewish-Muslim citizenship in both pre-colonial and postcolonial contexts.

REL 269 (F) Mindfulness Examined: Meditation, Emotion, and Affective Neuroscience (DPE) (WS)

Cross-listings: REL 269 ANTH 269 ASIA 269 STS 269

Primary Cross-listing

This course asks students to practice and study mindfulness while observing their own minds, emotions, and behavior for an entire semester. We examine the historic roots and current applications of mindfulness, both as a Buddhist meditation practice as well as a secular tool to improve our awareness of awareness. Throughout, we are interested in the nexus of mind, brain, and emotions and the ways that mindfulness has been studied within contemplative and affective neuroscience, integrative neurobiology, and evolutionary psychology. How and why has the research on mindfulness and other meditative practices exploded since 2000? How has this research helped us understand and explain how our minds as well as brains shape everyday emotions and behaviors? We examine the ways evolutionary psychologists, clinical psychiatrists, neuroscientists, clinicians, and medical anthropologists have studied and applied mindfulness to better understand human emotions. We consider the applications of mindfulness for clinicians, therapists, and educators—all of whom attend to how emotions impact interpersonal relationships. We will train in a variety of meditation practices all semester, while learning to better appreciate our own minds, emotions, and relationships.

Requirements/Evaluation: weekly tutorial papers and discussion

Prerequisites: A prior class or some experience with meditation is recommended

Enrollment Limit: 10

Enrollment Preferences: ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
REL 269(D2) ANTH 269(D2) ASIA 269(D2) STS 269(D2)

Writing Skills Notes: This class will involve weekly tutorial essays or oral responses, intensive written feedback on every essay, and a mid-semester 'writing chat' with the instructor.

Difference, Power, and Equity Notes: This class fulfills the Difference, Power, and Equity requirement because it will explore the ways that mindfulness can address the growing epidemic of anxiety, depression, and other mental health issues we find in the US today. We study mindfulness from an intersectional perspective and relate its benefits to intersecting inequities and intergenerational trauma in the US today.

REL 295 (S) Foundations of Confucian Thought (DPE) (WS)

Cross-listings: REL 295 ASIA 215 CHIN 215

Secondary Cross-listing
How should people treat each other? What constitutes human nature and does it tend towards good or evil? How should we organize society, by focusing on laws and regulations, or on ritual and moral guidance? What is the nature of moral rulership? What is the proper relationship between the individual and larger units of society, from the family to the state? These are some of the key questions that the school of thought that has come to be known as "Confucianism" addresses. As the dominant moral and political philosophy for thousands of years in much of East Asia, Confucianism has shaped our world, past and present, in innumerable ways. In this class we will focus on the foundational texts of the Confucian tradition: the Analects (purported to record the words of Confucius himself), Mengzi (often romanized as "Mencius"), and Xunzi. Beyond those questions noted above, we will further examine how these texts construct their arguments; how they were first composed, compiled, and circulated; how they employ such key concepts as "humaneness" (ren), "moral power" (de), and "ritual propriety" (li); and how they functioned as part of the larger philosophical, linguistic, political, and historical context that we now think of as "early China."

Requirements/Evaluation: Evaluation is based on writing assignments (3-4 pages, 5-6 pages, and 10-12 pages) and participation in class discussions.

Prerequisites: None.

Enrollment Limit: 19

Enrollment Preferences: Enrollment priority goes to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; current or prospective Asian Studies concentrators; and Religion majors.

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
REL 295(D2) ASIA 215(D1) CHIN 215(D1)

Writing Skills Notes: Writing will include short writing assignments ( 1 paragraph, 3-4 pages, and 5-6 pages) that will involve drafts, feedback and revision, and one longer final paper of 10-12 pages that will involve close consultation with the instructor during the writing process.

Difference, Power, and Equity Notes: Throughout the course we will examine how these texts deal with issues of differentials of power, both political and social, in a range of contexts. In particular, we will discuss how these texts conceptualize political and social power and how they see hierarchy and difference functioning in both beneficial and deleterious ways in society.

REL 420 (F) Islam and the Image (DPE) (WS)

Cross-listings: ARTH 521 REL 420

Secondary Cross-listing
This seminar responds to a recent incident at a US liberal arts university where a professor was sacked for showing images of Prophet Muhammad as part of her section on Islamic art. Why is image-making so hotly contested in Islam? What is the history of figural depictions in this tradition? The seminar explores artworks made for Muslim patrons from the medieval period to the modern era, considering how paintings produced for Muslim audiences can be situated within the frameworks of "Islamic art," a loaded historiographical term that has been questioned in recent times. The seminar also addresses some of the major problems that continue to haunt art scholarship in the field. For most of its history, the academic study of Islamic art has seldom considered contemporaneous literary voices that shed light on the motivations behind artworks. Furthermore, the historiography, deeply entrenched in its colonial and orientalist roots, has largely isolated images from their supporting texts—a curious oversight in light of the fact that painting in Muslim lands has historically been primarily an art of the book. These biases have affected the way museums have collected, displayed and interpreted paintings. For example, Western museums continue to place figural depictions made for books and albums in "South Asian" collections while textual manuscripts and calligraphic specimens made for the same Muslim audiences—even at times bound in the same albums—are categorized as "Islamic art." What does this isolation of text from image imply about prevailing views of Islamic art? To better understand the cultural, historical and religious context surrounding artworks students will read primary literature ranging from autobiography to devotional poetry, often written by the very patrons and subjects of the paintings to be discussed.

Requirements/Evaluation: class participation, short weekly writing assignments, final essay project

Prerequisites: Undergraduates wishing to enroll must have taken at least one art history course or one religious studies course. Undergraduates must email indicating their interest in the course prior to enrolling.

Enrollment Limit: 19

Enrollment Preferences: MA students, then advanced undergraduates

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 521(D1) REL 420(D2)

Writing Skills Notes: Weekly writing assignments consisting of 300-500 words. Final papers 15-20 pages for graduate students. 12-15 pages for undergraduate students. 1-page abstract for the final paper due by mid-November. A 4-5 page project outline due right after Thanksgiving break. After receiving feedback and comments from the instructor, the final paper will be due in the last week of classes.

Difference, Power, and Equity Notes: Highlights a global art history that is underrepresented. The class focuses on pluralistic engagements with non-Western cultures and epistemologies.

RLFR 101  (F)  Introduction to French Language and Francophone Cultures  (DPE)

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, and active engagement with music, video, and film, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. Conducted in French.

Requirements/Evaluation: Active class participation, workbook exercises and compositions, chapter tests, midterm, and final exam.

Prerequisites: None. For students who've never formally studied French. Students who've previously studied French (in any formal course, at any level) must take the French Placement Test in the summer or during First Days. For more info: https://french.williams.edu

Enrollment Limit: 18

Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to first-year and second-year students and those with compelling justification for admission.

Expected Class Size: 18
Grading: yes pass/fail option, no fifth course option

Unit Notes: RLFR 101-102 is a year-long course. Credit is granted only if both semesters (RLFR 101 and 102) are taken. RLFR 101-102 students must also take the French Winter Study Course.

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: Through its focus on French and Francophone cultures around the world, this course enables students to gain both linguistic and cultural proficiency, and to engage with the great diversity of colonial and post-colonial cultures, histories, and identities in France and Belgium, Québec and Martinique, Sénégal and Morocco.

RLFR 105 (F) Advanced French: Advanced Studies in French Language and Francophone Culture (DPE) (WS)

In this French course, we will read and examine literary texts from the twelfth to the 19th centuries, and films from the twentieth and twenty-first centuries. In order to analyze them, we will briefly situate them in their social and historical contexts. These works will help us better understand contemporary France and explore France's colonial past. We will also learn how to write two short research paper in French in the form of an explication de texte. While the themes, authors, time periods will vary, our approach will remain the same. Three themes, love, fear, and France's colonial past, will serve as the course's organizing principles. A small section of the course will be devoted to grammar revisions in order to continue to improve our reading and language skills. Throughout the semester we will develop our writing skills in French. Conducted in French

Requirements/Evaluation: class participation, online grammar exercises, 2 four-page papers, 1 class introduction, 2 low-stakes one-page response papers

Prerequisites: RLFR 104, placement exam, or by permission of instructor

Enrollment Limit: 15

Enrollment Preferences: All are welcome, but if overenrolled, preference will be given to first- and second-year students and French major and certificate students. If necessary, a statement of interest will be solicited.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: In this course students will practice writing two short structured papers in French where there will present their interpretation of literary or visual text. Students will write two response papers.

Difference, Power, and Equity Notes: In this course student will examine visual and literary texts that reframe difference, power and equity in relation to race, class, gender, ethnicity, sexuality, and religion.

RLFR 106 (S) Advanced French: Danger and Desire in French Film and Fiction (DPE)

Cross-listings: COMP 107 RLFR 106

Primary Cross-listing

This is an advanced course in French language designed to help you improve your speaking, comprehension, reading, and writing, through the dynamic study of short literary texts and films focusing on danger and desire in nineteenth-, twentieth-, and twenty-first-century France. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French literature and cinema. As a focus for improving your French, we will examine a broad range of texts and films on danger and desire in France from 1820 to 2024, with an emphasis on passion and ambition, infatuation and seduction, betrayal and vengeance, courage and cruelty, warfare and resistance. Works to include nineteenth-century texts by Chateaubriand, Duras, Balzac, Mérimée, Flaubert, Maupassant, Zola; twentieth-century texts by Colette, Camus, Sartre,
Beauvoir, Duras, Ernaux, Guibert, Quint, Lindon, Vilrouge; and twenty-first-century films by Caron, Ozon, Ducastel, Martineau, Dercourt, and Becker. Conducted in French.

**Requirements/Evaluation:** Active class participation, grammar exercises, two short papers, midterm, and final paper.

**Prerequisites:** Exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor.

**Enrollment Limit:** 16

**Enrollment Preferences:** All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

**Expected Class Size:** 16

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 107(D1) RLFR 106(D1)

**Difference, Power, and Equity Notes:** This course centers on a critical examination of difference, power, and equity in French film and fiction. The content examines the effects of class, ethnicity, gender, and sexuality on social inequalities among rich and poor, soldiers and civilians, nations and colonies, men and women. The course employs critical tools to teach students how to articulate and interrogate social injustice, through reading, viewing, discussion, writing, and revision.

RLFR 225 (F) Remembering the Great War: The First World War in Literature and Film (DPE)

**Cross-listings:** RLFR 225 COMP 224

**Secondary Cross-listing**

From 1914 to 1918, the First World War ravaged Europe and slaughtered millions of soldiers and civilians from across the globe. Known as the "war to end (all) war(s)," World War I set the stage for an entire century of military conflict and carnage. New technologies led to unprecedented violence in the trenches, killing and wounding as many as 41 million soldiers and civilians. Beyond the slaughter at the front, the Great War also led to the global influenza pandemic that claimed up to 50 million lives, and the Armenian genocide that presaged the later atrocities of the Holocaust. The war also led to massive political transformation, from the Irish Rebellion and Russian Revolution, to the collapse of the German, Russian, Austro-Hungarian, and Ottoman Empires, and the redrawing of national borders across Europe and the Middle East. Even the end of the war with the Treaty of Versailles lay the groundwork for new animosities that would lead to the Second World War just two decades later. However, the First World War also inspired great social change, from the emergence of the United States as a global leader and the founding of the League of Nations, to growing discontent with colonial rule in Asia and Africa, and greater power for women whose wartime labor influenced the post-war passage of their right to vote in countries across Europe and North America. In our study of the Great War, we will examine texts and films that bear witness to the suffering and courage of soldiers and civilians, and consider the legacy of the war in the twentieth- and twenty-first centuries. Readings to include memoirs and novels by Barbusse, Barker, Brittain, Cocteau, Graves, Hemingway, Jünger, Remarque, Wharton, Woolf; poetry by Apollinaire, Brooke, Mackintosh, McCrae, Owen, Sassoon; films by Attenborough, Boyd, Carlon, Chaplin, Jeunet, Oron, Renoir, Trumbo, Walsh, Weir; and archival materials on the roles of Williams students and faculty during the First World War. **Readings and Discussions in English.**

**Requirements/Evaluation:** Active class participation, two shorter papers (4-5 pages), a midterm, and a longer final paper (5-7 pages).

**Prerequisites:** None.

**Enrollment Limit:** 16

**Enrollment Preferences:** All are welcome, but if the course is overenrolled, preference will be given to Comparative Literature majors and French majors and certificate students; if the course is over-enrolled, students will submit a form online.

**Expected Class Size:** 16

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 225(D1) COMP 224(D1)
Difference, Power, and Equity Notes: As the course description explains, this course centers on a critical examination of difference, power, and equity during WWI. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequalities among soldiers & civilians, nations & colonies, men & women. The course also employs critical tools to teach students how to articulate and interrogate the social injustices of the Great War, from reading & discussion, to analytical essays & archival investigation.

SEM Section: 01    TR 8:30 am - 9:45 am    Brian Martin

RLFR 318 (F) Twentieth-Century French Novel: From Adversity to Modernity  (DPE)
Cross-listings: RLFR 318 COMP 318

Primary Cross-listing
In his futurist novel Paris in the Twentieth Century (1863), Jules Verne envisions an era of technological superiority, complete with hydrogen cars and high-speed trains, televisions and skyscrapers, computers and the internet. But in Verne's vision of modernity, technological sophistication gives way to intellectual stagnation and social indifference, in a world where poetry and literature have been abandoned in favor of bureaucratic efficiency, mechanized surveillance, and the merciless pursuit of profit. To contest or confirm this dystopic vision, we will examine a broad range of twentieth-century novels and their focus on adversity and modernity. In a century dominated by the devastation of two World Wars, the atrocities of colonial empire, and massive social and political transformation, the novel both documented and interrogated France's engagement with race and ethnicity, gender and sexuality, colonialism and immigration. Within this historical context, we will discuss the role of the novel in confronting war and disease, challenging poverty and greed, and exposing urban isolation and cultural alienation in twentieth-century France. Readings to include novels by Colette, Genet, Camus, Duras, Ernaux, Guibert, Begag. Lectures to include discussions of Gide, Proust, Sartre, Beauvoir, Cixous, Foucault, Jelloun, Djébar. Films to include works by Fassbinder, Annaud, Loret, Ducastel, Martineau, Téchiné, Charef. Conducted in French.

Requirements/Evaluation: Active class participation, two shorter papers, a midterm, and a longer final paper.
Prerequisites: A 200-level course (at Williams or abroad), or by placement test, or permission of the instructor.
Enrollment Limit: 16
Enrollment Preferences: French majors and certificate students, Comparative Literature majors, and those with compelling justification for admission. Seniors returning from Study Abroad (in France or other Francophone countries) are particularly welcome.
Expected Class Size: 16
Grading: yes pass/fail option, no fifth course option
Distributions: (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 318(D1) COMP 318(D1)

Difference, Power, and Equity Notes: As the course description explains, this course focuses on a critical examination of difference, power, and equity in twentieth-century France. The course also employs critical tools to teach students how to examine the roles of race and ethnicity, gender and sexuality, colonialism and immigration, in the French novel's critical representation of war and disease, poverty and greed, urban isolation and cultural alienation during the twentieth-century.

Fall 2023
SEM Section: 01    TR 9:55 am - 11:10 am    Brian Martin

RLFR 320 (F) Transcending Boundaries: The Creation and Evolution of Creole Cultures  (DPE)
Cross-listings: RLFR 320 GBST 306 AFR 306 COMP 310

Primary Cross-listing
Born out of a history of resistance, Creole cultures transcend racial boundaries. This course provides a comprehensive framework for understanding the creation of Creole nations in various parts of the world. Beginning with an examination of the dark history of slavery and French colonialism, we will reflect upon the cultural transformation that took place when people speaking mutually unintelligible languages were brought together. We will then delve into the study of how deterritorialized peoples created their languages and cultures, distinct from the ones imposed by colonizing forces. As we journey from the past to the present, we will also explore how international events such as a worldwide pandemic, social justice, racism, and police brutality are currently affecting these islands. Potential readings will include prominent authors from different Creole-speaking islands, including Frantz...
Fanon and Aimé Césaire from Martinique, Maryse Condé from Guadeloupe, Ananda Devi from Mauritius and Jacques Roumain from Haiti. Conducted in French with introductions to different creoles.

**Requirements/Evaluation:** Active class participation, three papers (of 3-4 pages each), presentation, final research paper (7-8 pages)

**Prerequisites:** Any RLFR 200-level course or above, or by permission of instructor.

**Enrollment Limit:** 18

**Enrollment Preferences:** All are welcome. If overenrolled, preference will be given to French majors and certificate students; Comparative Literature majors; Africana Studies students; Global Studies students; and those with compelling justification for admission

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 320(D1) GBST 306(D2) AFR 306(D2) COMP 310(D1)

**Difference, Power, and Equity Notes:** This course qualifies for a Difference, Power, and Equity requirement because it examines the history of slavery as related to French colonialism in different parts of the world. It also considers International issues of social justice, racism and police brutality.

**RLFR 415 (S) Breaking the Silence: Women Voices, Empowerment and Equality in the Francophone World** (DPE)

**Cross-listings:** COMP 415 WGSS 415 RLFR 415

**Primary Cross-listing**

How have Francophone women challenged the historical and current effects of colonialism and gendered racism in France and the Francophone world? How have Francophone women writers challenged the status quo of patriarchy and advocated for change? Beginning with political activist Olympe de Gouges, who published *Le droit de la femme et de la citoyenne* (1791) challenging gender inequality in France, we will then examine Claire de Duras' portrayal of the intersection between race and gender, Simone de Beauvoir's challenge to traditional femininity and gender roles, and Ananda Devi's intimate portrayal of violence against women in post-colonial societies. Throughout the course, we will use a feminist and intersectional lens to analyze how Francophone women writers have broken the silence then and now.

**Requirements/Evaluation:** Three 3-4-page response papers, a final 10-page research paper, presentation and active participation.

**Prerequisites:** Any 200-level RLFR course, or by permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** Senior French majors and students completing the certificate in French, but open to advanced students of French; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 415(D1) WGSS 415(D2) RLFR 415(D1)

**Difference, Power, and Equity Notes:** In its focus on Race, Gender, and Political Power, this course centers on a critical examination of difference, power, and equity. This course uses a feminist and intersectional lens to analyze how French and Francophone women writers have challenged the historical and current effects of colonialism and gendered racism.

Spring 2024

**RLSP 304 (S) Environmental Literature and Film in Latin America** (DPE) (WS)

**Cross-listings:** RLSP 304 ENVI 311 COMP 311
What use are aesthetics when the world is (literally) on fire? We will take up this question and others in a critical engagement with Latin American cultural production of the twentieth and twenty-first centuries, especially works of literature and film that directly or indirectly engage with environmental crisis. Students can expect to explore a variety of media, forms and genres, including works that range from (more or less) mainstream to cutting edge. Our examinations of literature and film will be supported by theoretical writings produced in the Americas and other places. Writers and directors whose work may be considered include, but are not limited to: Lucrecia Martel, Ciro Guerra, Rafael Barrett, Samanta Schweblin, Ernesto Cardenal, Juan Rufio, María Luisa Bombal, Eduardo Gudynas, Silvia Rivera Cusicanqui, Eduardo Viveiros de Castro, Isabelle Stengers.

**Requirements/Evaluation:** This course will be conducted seminar-style. Students will be expected to prepare thoroughly and be active, engaged participants in class discussions. In addition to day to day preparation and participation, other graded assignments will include discussion-leading, one short (5-7 page) essay and a longer (15-20 page) paper combining research and original analysis.

**Prerequisites:** One college literature of film course at the 200-level or above.

**Enrollment Limit:** 19

**Enrollment Preferences:** Envi majors and concentrators, Comp Lit majors, Spanish majors and those working towards the Spanish certificate.

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RLSP 304(D1) ENVI 311(D1) COMP 311(D1)

**Writing Skills Notes:** All students in the course will write (and rewrite) no less than 20 pages. Major writing assignments will be scaffolded, with explicit discussion of the writing process (pre-writing, drafting, revision) and consultation.

**Difference, Power, and Equity Notes:** The works of literature and film that we will be examining challenge North American conceptions of climate change (and environmental crisis more broadly) by making visible (often uncomfortably so) the colonial and neocolonial history of extractivism.

**RLSP 311 (F) The Politics of Love in Latin American Literature (DPE) (WS)**

Cynical, sincere, confused and confusing, love and politics have a lot of complicated history together in Latin America. This course considers works of literature and other cultural texts in which love and politics are explicitly intertwined: the authors, artists and activists we consider profess love for their followers and would-be converts, represent love as a (revolutionary) political force, contest the legitimacy of patriarchal heteronormativity, and sometimes all three. We will consider writings by 20th and 21st century political leaders whose speeches and other writings convey the melodrama of radiomenovelas (Eva Perón) as well as the sacrificial love of the guerrillero (José Martí, Che Guevara) and the anarchist (Rafael Barrett). We may also consider the love professed by historical figures including Catholic missionaries (Antonio Ruiz de Rivera) and 19th century abolitionists (Juan Francisco Manzano, Gertrudis Gómez de Avellaneda) and/or nation-builders (Marmol, Sarmiento). We may examine tensions around the domestication of love in writings in translation by Brazil’s Clarice Lispector and the torment of eros in Elena Garro’s political novel Memories of the Future. We will likely read poems of grief and love for those murdered in the secret detention centers of the Southern Cone dictatorships (Raúl Zurita, Juan Gelman). We will delve into the politics of queer love, solidarity and mourning with authors such as Mario Puig, Reinaldo Arenas, and Cristina Peri Rossi, and in Sebastián Lelio’s 2017 film, A Fantastic Woman. We will conclude by considering the politics of love as articulated by Black Lives Matter, particularly as the movement has taken shape in Latin American countries, and its impact in Colombia and elsewhere. Conducted in Spanish.

**Requirements/Evaluation:** Regular preparation for class is required, as is thoughtful participation in class discussions. Students will be evaluated for both. Students will also be evaluated for discussion-leading and making presentations on their original research in progress. There will be two graded essays, one of 5-7 pages and the other 15-20.

**Prerequisites:** One RLSP course at the 200 level.

**Enrollment Limit:** 19

**Enrollment Preferences:** Students majoring or completing a certificate in Spanish.

**Expected Class Size:** 10
Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will be writing and rewriting roughly twenty pages. Longer assignments will be broken down into stages (proposal, bibliography, research, analysis, draft, revision) with feedback from the instructor at every stage.

Difference, Power, and Equity Notes: Using literary texts, we will delve into the ways a wide variety of political actors -- from the mainstream to the radical fringe -- talk about love in Latin American contexts. Some of them will seem comparatively cynical, but in other cases we will be looking at how people contest the hegemony of patriarchal, capitalistic and heteronormative definitions of what "counts" as true love.

Fall 2023
SEM Section: 01    TF 1:10 pm - 2:25 pm     Jennifer L. French

RLSP 319  (F) Dictatorship and the Latin-American Novel  (DPE)
Military dictatorship is among the most crucial factors in Latin-American society and history, and some of the continent's leading novelists have taken it upon themselves to depict the experience in their work. In this course we will examine both the fact of dictatorship itself and the diverse representation thereof in Spanish-American fiction. Novels by García Márquez, Vargas Llosa, Poniatowska, and Tomas Eloy Martinez will be closely studied. Students will also read Absalom! Absalom! by Faulkner, whose influence on Latin-American authors' techniques of representation has been decisive and profound.

Class Format: In-person.

Requirements/Evaluation: three 8-page papers, response journals, an oral report, a final 3-page paper, and class participation

Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Spanish majors, Latina/o Studies concentrators

Expected Class Size: 5-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course focuses on the ultimate sort of power-namely, military dictatorship. And it focuses on the historical fact of such a phenomenon within the U.S. political sphere of influence--Latin America. To study dictatorship and its depiction in literature is a means of understanding the nature of that power imbalance and of taking a first step toward some sense of equity.

RUSS 217  (S) Indigeneity Today: Comparative Indigenous Identities in the US and Russia  (DPE) (WS)

Cross-listings: GBST 219 ANTH 217 RUSS 217

Primary Cross-listing

Indigenous movements for land, rights, and cultural preservation have spread to and originated in all corners of the world. However, the global nature of these movements at times obscures ways of being Indigenous in differing contexts. This course analyzes Indigeneity in both the United States and Russia today. Through reading and analyzing ethnography, theory, and literature, it focuses on Indigenous peoples in a comparative context. Rather than prioritizing concern with Indigenous peoples emerging from the US, it attempts to demonstrate what Indigeneity has been in both the United States and Russia and what it is and means today. It asks the following questions: what is Indigeneity and who is Indigenous; how is Indigenous identity constructed and by whom; and what convergences and divergences exist in Indigeneity between the US and Russia or for that matter in other contexts? To help answer these questions, in this course we will grapples with Indigeneity as a social category and other social formations, especially ethnicity, nationality, and race. Topics include: Indigeneity and the State, Revitalization and Resurgence, Indigenous People and Nature Protection, and Hemispheric and Global Indigeneities.

Requirements/Evaluation: 10 posts to the course Glow discussion page, 3 times leading class discussion on the assigned readings, 1 short presentation, 1 extended portfolio project with regular shorter and longer writing submissions, and 1 final paper and final presentation (as the final part
of the portfolio).

**Prerequisites:** None

**Enrollment Limit:** 16

**Enrollment Preferences:** Majors and certificate-seekers in Russian, then majors in Anthropology and Sociology, and then Global Studies concentrators

**Expected Class Size:** 12-15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 219(D2) ANTH 217(D2) RUSS 217(D1)

**Writing Skills Notes:** This course has the following assignments: Weekly post to the Glow discussion page, 1 short presentation, 1 extended project with regular writing submissions, 1 final paper and final presentation. For the extended project, we will have instructor feedback for all project assignments. In instructor feedback, comprehension of the material and the content of the writing, improvement in writing style and clarity, and development of voice will be discussed. There will also be peer feedback/review.

**Difference, Power, and Equity Notes:** In the course, students will learn about Indigeneity as a context-specific social formation. It understands Indigeneity as a category of difference with past and present importance. We will read about, discuss, and write about Indigeneity as a social category, along with other social categories it arose alongside (such as race, ethnicity, and nationality), and how it has been mobilized by both those who identify as Indigenous and by those who designate others as Indigenous.

**RUSS 348 (S) Altering States: Post-Soviet Paradoxes of Identity and Difference**  (DPE) (WS)

**Cross-listings:** RUSS 348 SOC 348 GBST 348

**Secondary Cross-listing**

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the war Russia is currently waging on Ukraine, or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Bulgaria, Poland, and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

**Requirements/Evaluation:** 5-page paper every other week, written comments on the partner's paper in alternate weeks

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Anthropology, Sociology, and Russian majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RUSS 348(D1) SOC 348(D2) GBST 348(D2)

**Writing Skills Notes:** This is a tutorial course, with plenty of opportunities to work on writing and argumentation. Tutorial papers receive written feedback from both the instructor and the tutorial partner, and are workshopped during the tutorial meetings.

**Difference, Power, and Equity Notes:** Students will learn to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. We will also train ourselves to identify parallels, as well as differences, between responses to the social and
RUSS 401 (F) What is the Intelligentsia?  (DPE)
The word “intelligentsia” in its modern meaning first appeared in Russia in the middle of the 19th century, though the concept has a rather long pre-history. The Russian intelligentsia as a social class took shape among the educated raznochintsy and aristocratic proponents of western ideas who had been freed from obligatory state service. These conditions provided them with limited freedom and independence, and also gave them the opportunity to devote their time to culture, creation, and science. This state of affairs was favorable for the development of the distinguishing characteristic of the intelligentsia: critical thought, both in relation to authority and to oneself. In this course we will study the history, ethic and tradition of the intelligentsia from the times of the tsars until the present day. In particular, we will explore the following questions: what is the difference between being educated and belonging to the intelligentsia? How does the intelligentsia relate to the history and tradition of socialism? How is the intelligentsia connected with humanism? What is the fate of the intelligentsia in an industrial or totalitarian society? And what role does this tradition play today? In order to answer these questions, we will read authentic historical texts and scholarly literature, watch films and listen to lectures by the foremost specialists on the subject. Of course, we will also work on perfecting your knowledge of the Russian language.

Requirements/Evaluation:  Daily work (reading, preparing questions for discussion) 25%; weekly 1-2 page short written assignments (responses to open-ended questions about the daily readings) 25%; 2 short 10 minute presentations (on two illustrious works or figures) 25%; 1 final project, longer researched presentation 10-15 minutes 25%.

Prerequisites:  Three years of Russian or instructor's consent.

Enrollment Limit:  15

Enrollment Preferences:  RUSS or COMP

Expected Class Size:  5-10

Grading:  yes pass/fail option,   yes fifth course option

Distributions:  (D1)  (DPE)

Difference, Power, and Equity Notes:  This course will be devoted to historical examples of people who were often persecuted for their political affiliation, their class, or their critical stance in an environment that rewarded servility and conformity. It will also explore the stories of the non-Russian intelligentsia in the Soviet Union, the discrimination and terror that they faced, as well as the principled, humanistic ethic that they espoused during periods of national conflict.
Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course interrogates the social construction of identities, and how these differences manifest unequally in institutions.

SOC 226 (F) The Working Globe: North and South Workers in Globalized Production (DPE)

Cross-listings: SOC 226 GBST 226

Primary Cross-listing
The course introduces students to the concept of globalization of production by focusing on how workers from distant cities and villages across the Global North and South are joined together in the same transnational labor processes. We will reflect on case studies that trace the real-world production of everyday goods and services like automobiles, garments, retail, and electronics. We will map global supply chains and investigate how they exploit and reproduce global inequalities. Focusing specifically on the labor process and on the condition of workers, students will acquire a grounded perspective on the global economy, as well as on the dynamics underlying precarity, deindustrialization, and uneven development. The key guiding concern for the course will be to understand the relationship between workers of the North and South: Does global production place these workers in a relation of fundamental conflict, or can a community of interest emerge between them?

Class Format: Assignments will require group work and presentations

Requirements/Evaluation: Class participation; 1-2 group presentations; 1 final paper

Prerequisites: None, open to all students

Enrollment Limit: 20

Enrollment Preferences: Preference given to ANTH/SOC majors and GBST concentrators

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 226(D2) GBST 226(D2)

Difference, Power, and Equity Notes: Primarily the course investigates how historical inequalities between countries are reproduced by centering production relations and the site of work. Students will delve deeply into the inequality between workers of the global North and South, and they will also encounter situations where these differences intersect with racial and gendered dynamics.

Fall 2023
SEM Section: 01 MWF 10:00 am - 10:50 am Bhumika Chauhan

SOC 228 (S) The Panopticon: Surveillance, Power, and Inequality (DPE)

Cross-listings: SOC 228 STS 229

Primary Cross-listing
Surveillance is built into the very fabric of modern life. From CCTV cameras, to supermarket loyalty cards, to the massive gathering of personal data on social media sites, people participate in today's "surveillance societies" just by doing everyday activities. This course uses the metaphor of the "Panopticon" as a doorway to engagement with traditional and new forms of surveillance. First described by philosopher and social theorist Jeremy Bentham, the Panopticon is a physical structure that enables one observer to see all inhabitants without those inhabitants knowing when they are being observed. In *Discipline and Punish*, Michel Foucault famously expanded thinking on the Panopticon as a metaphor for the "disciplinary" power
that lies at the heart of inequality in modern society. Since Bentham and Foucault's time, however, surveillance technologies have changed significantly. To what extent does the concept of the Panopticon give us purchase on today's surveillance societies? How does watching people with new digital and algorithmic surveillance technologies shape the exercise of power and, in turn, (re)produce forms of inequality? Can privacy, convenience, and safety ever be truly balanced? Topics include: the historical origins and expansion of surveillance in modern societies, policing and state surveillance, and social media surveillance.

**Requirements/Evaluation:** participation, reading responses, midterm essay, final paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Anthropology and Sociology majors

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 228(D2) STS 229(D2)

**Difference, Power, and Equity Notes:** This course explores how power is distributed unequally through the mechanism of surveillance technologies, particularly in regard to racial and class differences. Among other topics, it will consider the concrete case of surveillance by police in Baltimore City and the question of if and when surveillance is appropriate there, given the city's ongoing crisis of citizen and police violence. Students will discuss police surveillance in a context shaped by racial segregation and class inequality.

SEM Section: 01 MR 1:10 pm - 2:25 pm Ben Snyder

**SOC 313 (S) The 626 (DPE)**

**Cross-listings:** SOC 313 AAS 312

**Primary Cross-listing**

Ryka Aoki's *Light from Uncommon Stars* is "a defiantly joyful adventure in California's San Gabriel Valley, with cursed violins, Faustian bargains, and queer alien courtship over fresh-made doughnuts." What sociological insight could a sci-fi novel about intense extracurricular pressure, food, and foreignness have to offer about the San Gabriel Valley, area code 626? In this course, we take the fantastical characters and plots of Aoki's novel as an invitation to delve into the histories of Asian American settlement to Gabrieleno/Tongva lands on the eastern fringes of present-day Los Angeles County. The multilingual boba shops, restaurants, and store fronts throughout the valley mask a history of violent backlash and English-only initiatives. Media reports of academic and musical prodigies skew a broader socioeconomic picture that includes crimmigration, deportation, and xenophobia. And the figure of an intergalactic refugee mother exposes the toll that crossing borders takes on individuals, families, and communities. In this project-based course, we survey the formation of a particular place and its surroundings. In doing so, students grapple with general questions such as: How does migration shape intergenerational dynamics? When and with what tools do people confront racism and intersecting forms of discrimination? How do ethnic enclaves form and fracture? And how do communities mobilize for political rights?

**Requirements/Evaluation:** thoughtful and consistent participation; mock film festival screening and vote; possible community partnership; regular writing assignments

**Prerequisites:** N/A

**Enrollment Limit:** 15

**Enrollment Preferences:** ANSO majors and AAS concentrators

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 313(D2) AAS 312(D2)

**Difference, Power, and Equity Notes:** This course explores the making of the San Gabriel Valley as the "Asian American Holy Land." It delves into actors' diverse responses to the model minority stereotype, class, and belonging. Students will evaluate (pan)ethnicity as something to be explained,
rather than explanatory, and consider the gaps between diversity and inclusion versus equity in the so-called majority-minority context of the 626.

**SOC 331 (S) Automation in an Unequal Society** (DPE)

**Cross-listings:** SOC 331 STS 331

**Primary Cross-listing**

Could you be competing for a job—even after getting a college degree—with a robot or an AI-powered chatbot? As technologies advance, every few years debates emerge: will this new kind of automation increase unemployment, or will it generate new kinds of jobs? Will these new jobs be more interesting and high paying, or will they be boring and poorly paid? To think these questions through, in this course we will study some key attempts to understand the socio-economic and political determinants as well as the repercussions of automation. We will delve into the micro-level dynamics operating between machines and workers involved in concrete production processes. We will also explore the macro-level trends in national and global inequality that social scientists associate with automation. In our investigation of both macro- and micro-levels, we will focus on how the risks and benefits of automation get distributed unevenly along already existing axes of class, race, gender, etc.

**Requirements/Evaluation:** Class participation; 1 mid-term paper proposal; 1 final paper

**Prerequisites:** none, open to all students

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference given to ANTH/SOC majors and STS concentrators

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

SOC 331(D2) STS 331(D2)

**Difference, Power, and Equity Notes:** The course is centrally concerned with the iniquitous distribution of risks and benefits of automation. Students will gain familiarity with how social scientists study the impacts of automation on class, racial, and gendered dynamics. We will consider how automation may disempower certain workers, and deepen already existing social segmentations.

Spring 2024

SEM Section: 01  TF 2:35 pm - 3:50 pm  Bhumika Chauhan

**SOC 335 (F) Nowheres** (DPE)

**Cross-listings:** GBST 335 SOC 335

**Primary Cross-listing**

We live in a world of nation-states. The world map, according to journalist Joshua Keating, is "Itself as an institution, an exclusive club of countries" that rarely accepts new members. Throughout the course, we question how countries conquered the world and became the taken-for-granted political unit. We do so, paradoxically, by looking at contemporary nations that do not appear on the world map. These include nations without statehood, such as Somaliland; those that span countries, including indigenous nations across the US and Canada; and nations that have lost their countries, such as Palestine and South Vietnam. By interrogating "nowheres," we tease out what it means to be a country, and pinpoint when and why the definitions do not apply uniformly. Students will reflect on why the world map has been so remarkably static since the end of the Cold War. We will further probe the social, political, and human costs of the exceptions to this general rule. Students will raise questions and attempt answers to what our interconnected world means for "nowheres" looming on the horizon—nation-states that, as a result of climate change, will soon vanish.

**Requirements/Evaluation:** Thoughtful and consistent class participation, visits to Sawyer Library and WCMA, three short response papers, and a final assessment on a "nowhere" of students' choosing

**Prerequisites:** None

**Enrollment Limit:** 15
Enrollment Preferences: Anthropology and Sociology majors, Global Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
GBST 335(D2) SOC 335(D2)

Difference, Power, and Equity Notes: This course asks students to grapple with the asymmetries of modern statehood--why some places meet the criteria for statehood but are denied it, while others fall short of formal definitions but are still considered states. Students will assess the stakes of statehood for places that cannot achieve it or do not aspire to. They will creatively marshal these lessons to become the class expert on a "nowhere" that provides us with a lens for interrogating the world map as it currently exists.

Fall 2023
SEM Section: 01    MR 1:10 pm - 2:25 pm     Phi H. Su

SOC 340  (F) Performing Masculinity in Global Popular Culture (DPE)

Cross-listings: SOC 340 LATS 341 THEA 341 WGSS 347 AMST 358

Secondary Cross-listing
This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia, hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

Prerequisites: none; WGSS 202 would be helpful

Enrollment Limit: 15

Enrollment Preferences: a short statement of interest will be solicited; a subsection of applicants may be interviewed

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 340(D2) LATS 341(D2) THEA 341(D1) WGSS 347(D2) AMST 358(D2)

Difference, Power, and Equity Notes: This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

SOC 380 (S) Who Cares? (DPE)

What does it mean to care—about a person, a situation, or a cause? We often assume that care arises spontaneously and organically. Yet both feelings of care and acts of care always take shape in social contexts. In this course, we will uncover and critically interrogate the norms surrounding caring, caregiving, and care-receiving in our own communities. What social factors influence our willingness to offer care, and to accept it from others? Why is caregiving so heavily gendered and racialized? Is care inevitably corrupted by capitalism? Specific topics will include domestic work and reproductive labor; child welfare and foster care; therapy and mental health care; the discourse of self-care; and social movements that center around enacting care. The course will culminate in a significant experiential learning component: as a class, we will work collaboratively to design and implement a project that pushes or challenges the “care norms” in the northern Berkshires.

Requirements/Evaluation: thoughtful and consistent class participation; weekly journal entries (1-2 pages each); collaboratively designed experiential learning project; and a final paper (6-8 pages)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: if overenrolled, students will be asked to submit a short statement of interest

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course centers the relationship between structural inequality and the cultural norms surrounding caregiving and care-receiving. Throughout the semester, we will reflect on how care norms both reflect and perpetuate larger systems of inequality, especially race and gender. Through a student-designed experiential learning project, we will strive to create social change in the local community.
STS 142 (S) AlterNatives: Indigenous Futurism and Science Fiction (DPE)

Cross-listings: STS 142 AMST 142

Secondary Cross-listing

Indigenous people occupy a paradoxical position in time. As survivors of genocide, they are already post-apocalyptic, occupying what could be called "their ancestors' dystopia." But Indigenous people are also imagined to exist frozen in history, merely one step in the ceaseless march of civilization that brought us to the present. This tutorial explores how contemporary Native science and speculative fiction imagines and enacts futurity from this dynamic temporal position. Looking across numerous national and transnational Indigenous contexts, we will survey a diverse range of media, including short stories, novels, visual art, video games, films, and online platforms like Second Life. Pairing these with works in Science and Technology Studies (STS) and Native American and Indigenous Studies (NAIS), we will explore concepts like the Native "slipstream," eco-erotics, post-post-apocalyptic stress, Native pessimism, biomedical speculative horror, and what it would be like to fly a canoe through outer space.

Requirements/Evaluation: participation, weekly 2- to 4-page written responses to class readings, short fiction prompts, and/or your partner's writing

Prerequisites: permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first and second year students, American Studies majors, Science and Technology Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 142(D2) AMST 142(D2)

Difference, Power, and Equity Notes: Students in this course will explore the relationship between political violence, resistance, and speculation. We will develop close reading practices, analytical methods, and careful discussion dynamics to enable students to make sense and use of concepts like futurity, race, settler colonialism, gender, and technological determinism.

STS 145 (S) Black Mathematics: The Power of Revolutionary Numbers (DPE)

Cross-listings: STS 145 AFR 145

Secondary Cross-listing

The power of numbers is undeniable. Numbers can be used to illuminate, obscure or oppress. Numbers are not only symbols in the strictest sense, but are powerful representations that have considerable impact on institutions, policy, the real world and our lives. Data are said to be the "Black gold" of the 21st century. By use of human, economic, political and social indicators and metrics Western scientists, statisticians, governments and powerful actors have promoted liberalism, militarism and capitalism, which often dehumanized the racialized 'Other'. Various techniques in social sciences like forecasting, statistics, quantification, predicting, modeling all rely heavily on numbers or their manipulation/interpretation. But what social and economic goals and who do statistics serve? What ideologies underpin these numbers about Black people/communities? What is the significance of numbers to Black life? To what purpose have numbers been put in the furtherance of Black liberation? This course addresses these questions and the different uses to which numbers have been put by Black revolutionaries and communities. Black activists, scholars and communities have questioned how statistics are formulated, used and their Eurocentric basis as well as their limited ability to accurately reflect the Black world. We delve an alternative Black philosophy, specifically how Black people have historically used/defied/circumvented the numbers game. We will study and historically trace the invention of statistics, and how Black people, organizations and communities have utilized numbers to resist oppression, shape movements and direct emancipatory efforts. From Ida B Wells, to W. E. B. du Bois, Claudia Jones and Eric Williams, using numbers differently, has pushed back against oppression, reinterpreted history and spurred social and political change.

Requirements/Evaluation: Attendance and Participation (20%); Themed visual infographic/design (25%); Critical numbers/data analysis paper (30%); Case study/peer review exercise (25%)
Prerequisites: None
Enrollment Limit: 10
Enrollment Preferences: If over-enrolled, preference to AFR majors/concentrators.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
STS 145(D2) AFR 145(D2)

Difference, Power, and Equity Notes: Students will be guided through the history and alternative use of numbers to understand how they came to constitute powerful tools that have brought about systemic inequality and liberation. They will gain an appreciation of how these tools have been used and manipulated both by powerful historical actors, and oppressed groups and emerging figures acting towards emancipatory purposes.

STS 229 (S) The Panopticon: Surveillance, Power, and Inequality (DPE)
Cross-listings: SOC 228 STS 229
Secondary Cross-listing
Surveillance is built into the very fabric of modern life. From CCTV cameras, to supermarket loyalty cards, to the massive gathering of personal data on social media sites, people participate in today's "surveillance societies" just by doing everyday activities. This course uses the metaphor of the "Panopticon" as a doorway to engagement with traditional and new forms of surveillance. First described by philosopher and social theorist Jeremy Bentham, the Panopticon is a physical structure that enables one observer to see all inhabitants without those inhabitants knowing when they are being observed. In Discipline and Punish, Michel Foucault famously expanded thinking on the Panopticon as a metaphor for the "disciplinary" power that lies at the heart of inequality in modern society. Since Bentham and Foucault's time, however, surveillance technologies have changed significantly. To what extent does the concept of the Panopticon give us purchase on today's surveillance societies? How does watching people with new digital and algorithmic surveillance technologies shape the exercise of power and, in turn, (re)produce forms of inequality? Can privacy, convenience, and safety ever be truly balanced? Topics include: the historical origins and expansion of surveillance in modern societies, policing and state surveillance, and social media surveillance.

Requirements/Evaluation: participation, reading responses, midterm essay, final paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
SOC 228(D2) STS 229(D2)
Difference, Power, and Equity Notes: This course explores how power is distributed unequally through the mechanism of surveillance technologies, particularly in regard to racial and class differences. Among other topics, it will consider the concrete case of surveillance by police in Baltimore City and the question of if and when surveillance is appropriate there, given the city's ongoing crisis of citizen and police violence. Students will discuss police surveillance in a context shaped by racial segregation and class inequality.

Spring 2024
SEM Section: 01 MR 1:10 pm - 2:25 pm Ben Snyder
STS 231 (S) Africa and the Anthropocene (DPE)
Cross-listings: AFR 231 STS 231 ENVI 231

Secondary Cross-listing
Despite its low contributions to global carbon emissions, the continent of Africa is predicted to experience some of the worst effects of climate change. This interdisciplinary course investigates the causes and consequences of this troubling contradiction. It positions the African continent as an important site for understanding how legacies of empire, racial and gendered inequality, resource extraction, and capital accumulation impact contemporary global environmental politics. Students will engage theoretical texts, reports from international organizations, films, novels, and web-based content. Topics include: humanism/post-humanism; migration and displacement; representations of conflict; and sustainable development.

Requirements/Evaluation: Assignments include: 2 short written commentaries (2-3 pages each), mid-term current event analysis (5-7 pages), final analytical essay (10-12 pages) and class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 231(D2) STS 231(D2) ENVI 231(D2)

Difference, Power, and Equity Notes: Africa and the Anthropocene considers inequity in environmental politics from the vantage of the African continent. Through selected readings and classroom discussions students will tackle questions of power, racial and gendered difference, empire, and economic stratification. The course contributes to the DPE requirement by helping students to develop skills to better analyze abiding challenges in global society.

STS 254 (S) Food, Forests, & Fungi: Environmental Health in the Anthropocene (DPE) (WS)
Cross-listings: ENVI 254 ANTH 254 STS 254

Secondary Cross-listing
This tutorial will examine the impacts of the climate crisis on human, environmental, and planetary health via the lens of food systems & plant medicines in the Anthropocene. We use anthropological, environmental, evolutionary, & ecological approaches to explore the ecosystems connecting humans, plants, animals, and fungi that have been massively disrupted by systems of industrial agriculture, industrial forestry, corporate food systems, and corporate biomedicine. We will dwell on the growing signs of our climate catastrophe including the sharp rise of global temperatures, floods, hurricanes, alongside declining freshwater reserves, melting cryosphere, and falling crop yields, that are helping produce a growing wave of hunger and climate refugees in every world region. Along the way, we will hear from and read about youthful climate activists from Extinction Rebellion, Ende Gelände, Fridays for the Future, 350.org, and the Sunrise Movement who are designing and implementing innovative, local, and sustainable solutions to inaction, apathy, and inertia even as situations of internal migration or displacement, food scarcity, food sovereignty, water shortages, and other climate-related disruptions are increasing in both developing and developed parts of our globe. We learn how activist narratives intersect with wider movements to promote more local and circular economies of regenerative agriculture and forestry, ethically produced and sourced organic food, wild & cultivated botanicals, and complementary medicines that are healing both humans and the planet.

Requirements/Evaluation: Weekly attendance, reading 200-300 pages/week, weekly lead essays or oral responses to texts, showing up in mind & body each week.

Prerequisites: none, but a class in ENVI or ANTH preferred

Enrollment Limit: 10

Enrollment Preferences: ANTH, ENVI, STS majors and concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 254(D2) ANTH 254(D2) STS 254(D2)
Writing Skills Notes: Students will write essays: either a lead essay of 1400 words, or written & oral feedback on the lead essay plus an oral response to text. Students receive intensive weekly feedback on their essays and a mid semester writing chat with instructor to negotiate and understand strengths and weaknesses of their writing.
Difference, Power, and Equity Notes: We will examine the ways that food systems reproduce social and structural inequalities within public health, environmental health, climate health. We also examined the interconnected nature of the health of our planet, food systems, forests, and fungal networks and how climate activism and action can fight unequal access to food, forests, nature, and health.

STS 269 (F) Mindfulness Examined: Meditation, Emotion, and Affective Neuroscience (DPE) (WS)
Cross-listings: REL 269 ANTH 269 ASIA 269 STS 269
Secondary Cross-listing
This course asks students to practice and study mindfulness while observing their own minds, emotions, and behavior for an entire semester. We examine the historic roots and current applications of mindfulness, both as a Buddhist meditation practice as well as a secular tool to improve our awareness of awareness. Throughout, we are interested in the nexus of mind, brain, and emotions and the ways that mindfulness has been studied within contemplative and affective neuroscience, integrative neurobiology, and evolutionary psychology. How and why has the research on mindfulness and other meditative practices exploded since 2000? How has this research helped us understand and explain how our minds as well as brains shape everyday emotions and behaviors? We examine the ways evolutionary psychologists, clinical psychiatrists, neuroscientists, clinicians, and medical anthropologists have studied and applied mindfulness to better understand human emotions. We consider the applications of mindfulness for clinicians, therapists, and educators—all of whom attend to how emotions impact interpersonal relationships. We will train in a variety of meditation practices all semester, while learning to better appreciate our own minds, emotions, and relationships.
Requirements/Evaluation: weekly tutorial papers and discussion
Prerequisites: A prior class or some experience with meditation is recommended
Enrollment Limit: 10
Enrollment Preferences: ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
REL 269(D2) ANTH 269(D2) ASIA 269(D2) STS 269(D2)
Writing Skills Notes: This class will involve weekly tutorial essays or oral responses, intensive written feedback on every essay, and a mid-semester 'writing chat' with the instructor.
Difference, Power, and Equity Notes: This class fulfills the Difference, Power, and Equity requirement because it will explore the ways that mindfulness can address the growing epidemic of anxiety, depression, and other mental health issues we find in the US today. We study mindfulness from an intersectional perspective and relate its benefits to intersecting inequities and intergenerational trauma in the US today.

TUT Section: T1 TBA Kim Gutschow
STS 275 (S) Environmental Science, Policy, and Justice (DPE)

Cross-listings: ENVI 275 STS 275

Secondary Cross-listing

Environmental science is much more than collecting data. Scientific experts are often called upon--and often position themselves--to guide environmental governance, which means that science has (some) power over public life. What is, and what should be, the relationship between science, on the one hand, and the creation and implementation of environmental policy, on the other? In this seminar we will study how science shapes governance and how science itself is governed. We will explore how legislatures, agencies, and courts respond to scientific information and uncertainty. And we will learn about how communities facing environmental racism and injustice collect data and use it in their advocacy. Along the way, we will challenge the idea of a unified “scientific method,” and we will think about how Western scientific knowledge relates to other ways of knowing, including non-Western sciences, embodied knowledge, and traditional knowledge. Topics include: international climate negotiation, chemical exposure, the regulation of biotechnology, agricultural policy, pandemic responses, and plastics and electronics waste.

Requirements/Evaluation: several short essays, final essay

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: juniors, seniors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 275(D2) STS 275(D2)

Difference, Power, and Equity Notes: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. Using case studies we will analyze how communities facing environmental racism interact with scientists and sciences.

STS 331 (S) Automation in an Unequal Society (DPE)

Cross-listings: SOC 331 STS 331

Secondary Cross-listing

Could you be competing for a job--even after getting a college degree--with a robot or an AI-powered chatbot? As technologies advance, every few years debates emerge: will this new kind of automation increase unemployment, or will it generate new kinds of jobs? Will these new jobs be more interesting and high paying, or will they be boring and poorly paid? To think these questions through, in this course we will study some key attempts to understand the socio-economic and political determinants as well as the repercussions of automation. We will delve into the micro-level dynamics operating between machines and workers involved in concrete production processes. We will also explore the macro-level trends in national and global inequality that social scientists associate with automation. In our investigation of both macro- and micro-levels, we will focus on how the risks and benefits of automation get distributed unevenly along already existing axes of class, race, gender, etc.

Requirements/Evaluation: Class participation; 1 mid-term paper proposal; 1 final paper

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: Preference given to ANTH/SOC majors and STS concentrators

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 331(D2) STS 331(D2)
**Difference, Power, and Equity Notes:** The course is centrally concerned with the iniquitous distribution of risks and benefits of automation. Students will gain familiarity with how social scientists study the impacts of automation on class, racial, and gendered dynamics. We will consider how automation may disempower certain workers, and deepen already existing social segmentations.

**Spring 2024**

**SEM Section: 01**  TF 2:35 pm - 3:50 pm  Bhumika Chauhan

**STS 370 (S) Campus and Community Health in Disruptive Times**  (DPE) (WS)

**Cross-listings:** ANTH 371 WGSS 371 STS 370

**Secondary Cross-listing**

We study and seek "campuses where students feel enabled to develop their life projects, building a sense of self-efficacy and respecting others, in community spaces that work to diminish rather than augment power asymmetries." -- *Sexual Citizens* (Hirsch and Khan, 2020). Students will design and pursue innovative ethnographic projects that explore campus or community health. We will learn ethnographic techniques such as observant participation, interviewing, focus groups, qualitative surveys, as well as design thinking and data visualization skills. We use and critique the methods of medical anthropology and medical sociology in order to hone our skills in participatory research. Every week, we collaborate with and share our research with our participants and peers both inside and outside class through a variety of innovative exercises. We attend to the parallel roles of narrative and listening in both medicine and ethnography, as we contrast the discourse of providers & patients along with researchers & participants. We aim to understand the strengths and limits of ethnographic inquiry while privileging marginalized voices and attending to power and identity within our participatory research framework. We recognize that our campus health projects are always already shaped by power and privilege, as we examine the ways that daily life, individual practices, and collective institutions shape health on and off campus. Our ethnographic case studies explore how systemic inequalities of wealth, race, gender, sex, ethnicity, and citizenship shape landscapes of pediatric care, mental health, maternity care, and campus sexual assault in the US and elsewhere. We consider how lived practices shape health access & outcomes as well as well-being in our communities and on our campus.

**Requirements/Evaluation:** Weekly attendance, 3 written fieldnotes (3000 words), weekly writing & fieldwork exercises in class and out of class, a final presentation that includes data visualizations and analysis of research findings.

**Prerequisites:** A course in Anthropology, Sociology, STS or in DIV II is strongly recommended

**Enrollment Limit:** 19

**Enrollment Preferences:** Majors in Anthropology, Sociology, WGSS; Concentrators in PH, STS, ASIA, ENVI

**Expected Class Size:** 19

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 371(D2) WGSS 371(D2) STS 370(D2)

**Writing Skills Notes:** This class assignments includes over 9,000 words of essay assignments, and will help students develop critical writing skills, including use of rhetoric, evidence, argument, synthesizing data, logic, and anticipating counter-arguments.

**Difference, Power, and Equity Notes:** This class uses experiential learning to examine the intersectionality of race, class, gender, & sexuality in impacting healthcare and health outcomes. It explores the ways that intersectionality and implicit bias shapes health and well-being in patient/provider encounters as well as ethnographic research. It engages with and critiques efforts to 'improve' community and individual health outcomes in the US and elsewhere across the globe.

**Cross-listings:** AFR 374 STS 373 AMST 372
Secondary Cross-listing

This course is an introduction to theories, methods, sources, and approaches for interdisciplinary research and creativity in and through the interdisciplinary field of American Studies. We will focus on the intersection of race, gender, sexuality, and disability with modern media technologies, from early photography in the mid-19th century to contemporary trends in machine learning and artificial intelligence. Through a process of shared inquiry, course participants will investigate the ways that historical legacies of oppression and futuristic speculation combine to shape human lives in the present under racial capitalism. Whether analyses of the automation of militarized border control in Texas, or of the ways that obsolete, racist concepts are embedded in machine vision and surveillance systems, the readings in the course will chart out the key moments in the co-evolution of race and technology in the Americas. Students will gain a working competence in all four tracks of the American Studies major (Space and Place; Comparative Studies in Race, Ethnicity, and Diaspora; Arts in Context; and Critical and Cultural Theory). Finally, we will also explore alternative paths toward a future where technology might help to effect the abolition of oppressive structures and systems, rather than continue to perpetuate them.

Requirements/Evaluation: Four papers, in-class writing/reflective work, and a final exam.
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: AMST majors or prospective majors.
Expected Class Size: 16
Grading: no pass/fail option, yes fifth course option

STS 412 (S) Cold War Archaeology (DPE) (WS)
Cross-listings: STS 412 AMST 412 AFR 394

Secondary Cross-listing

In this advanced American Studies course, we will examine Cold War history and culture with attention to the intersection of racialization and nuclear paranoia. The concurrent unfolding of the struggle for Civil Rights and the national strategy of Civil Defense played out against the backdrop of a global ideological battle, as the United States and the Soviet Union fought each other for planetary domination. From the scientific fantasy of bombproofing and “safety in space,” to the fears of both racial and radioactive contamination that drove the creation of the American suburbs, the affective and material dimensions of nuclear weaponry have, from the beginning, been entangled with race. Drawing on the critical and analytical toolkits of American Studies and media archaeology, students will dig beneath the surface of received narratives about the arms race, the space race, and race itself. Students will uncover generative connections between mineral extraction, the oppression of Indigenous populations, the destructive legacies of “urban renewal,” and the figure of the “typical American family” huddled in their backyard bunker. Finally, this course will examine the ways in which the Cold War exceeds its historical boundaries, entangles with the ideology and military violence of the Global War on Terror, and persistently shapes the present through its architectural, affective, and cultural afterlives.

Requirements/Evaluation: Three short papers, in-class writing/reflective work, and a final paper.
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: AMST majors or prospective majors.

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
STS 412(D2) AMST 412(D2) AFR 394(D2)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to contextualize historical events during the Cold War in relation to racialization, inequitable distributions of resources, and the stratification of national space in relation to risk and radioactivity. Students gain critical skills that equip them to see the ways in which the Cold War continues to shape processes of racialization, oppression, and imperial extraction, and spatial arrangements.

SEM Section: 01 TR 8:30 am - 9:45 am Brian Murphy

STS 413 (F) Feminist Technoscience (DPE)

Cross-listings: WGSS 413 STS 413

Primary Cross-listing

Are Feminism and Science compatible commitments? What do these nouns mean when paired with one another, when capitalized (or not), when pluralized (or not), and when deployed by a range of authors in different disciplines? Scholars of feminist science and technology studies (FSTS) have addressed these questions in their studies of scientific objectivity, technological vulnerability, environmentalism, and the makings (or doings) of race as well as gender. We will explore these questions and topics with a view to identifying the range of ethical, political, and epistemological practices within feminist and critical technoscience. We will read theoretical texts in FSTS, such as Donna Haraway's "Situated Knowledges" and Safiya Umoja Noble's "A future for intersectional black feminist technology studies." We will also read case studies, such as Pat Treusch's "The Art of Failure in Robotics" and Emily Martin's "The Egg and the Sperm: How Science Has Constructed a Romance Based on Stereotypical Male-Female Roles." While our preliminary readings will be set in advance, students will help shape the syllabus as we advance toward a better understanding of feminist technoscience's potentials and limitations at a time when technical change often outpaces careful consideration of its consequences.

Requirements/Evaluation: discussion participation; five response papers (~2 pages); mid-semester essay (8 pages); annotated bibliography; final research project (12-15 page essay + in-class presentation)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Science and Technology Studies concentrators

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 413(D2) STS 413(D2)

Difference, Power, and Equity Notes: Central to "Feminist Technoscience" is a recognition of and engagement with the historical under-privileging of women, women's work, and women's bodies in capital-S "Science" and in a wide range of other technoscientific practices. We will examine and elucidate several branches of feminist theory. We will also examine feminist accounts of contemporary technoscientific work as well as critical STS with a focus on race.

Attributes: STS Senior Seminars
THEA 150  (S)  The Broadway Musical  (DPE)

Cross-listings:  THEA 150  MUS 150

Secondary Cross-listing

Named for a specific road but enjoying a global impact, the Broadway musical has intersected with multiple styles and societal concerns over the past century. In this course, we explore the American musical theater's roots and relationship to opera, operetta, vaudeville, minstrelsy, and Tin Pan Alley. Traveling through the genre's history, we will encounter a wide range of musical styles, including ragtime, jazz, rock, and hip hop, and will explore several genre transformations, such as movies made into musicals and musicals into movies. We will develop a range of analytical skills as we investigate connections between choreography, lyrics, music, staging, and production. Throughout the semester, we will consider the genre's representations and reflections of ethnicity, race, sexuality, and class. The syllabus includes representative works by Gilbert and Sullivan, Cohan, Gershwin, Kern, Weill, Rodgers and Hammerstein, Lerner and Loewe, Bernstein, Sondheim, Lloyd Webber, Tesori, and Miranda, with particular focus on such works as Showboat, Oklahoma!, Guys and Dolls, West Side Story, Hair, Rent, and Hamilton.

Class Format: discussion

Requirements/Evaluation:  a midterm, a brief paper, an 8-page paper, and a final exam

Prerequisites:  none

Enrollment Limit:  30

Enrollment Preferences:  Seniors and Juniors and music majors.

Expected Class Size:  30

Grading:  yes pass/fail option, yes fifth course option

Distributions:  (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 150(D1)  MUS 150(D1)

Difference, Power, and Equity Notes:  We will develop skills aimed at analyzing and interpreting how perceptions of race, gender, and class shaped, and were shaped by, Broadway. We will consider the extent to which, for example, blackface minstrelsy and ethnic-based humor persisted and how specific musicals aimed to engage with critical social and political issues throughout the genre's history. Musicals have played a major role in the contested and ongoing endeavor to define "America."

THEA 216  (F)  Asian/American Identities in Motion  (DPE)

Cross-listings:  ASIA 216  DANC 216  THEA 216  AMST 213  GBST 214  AAS 216

Secondary Cross-listing

The course aims to explore dance and movement-based performances as mediums through which identities in Asian and Asian-American (including South-Asian) communities are cultivated, expressed, and contested. Students will engage with how social and historical contexts influence the processes through which dance practices are invested with particular sets of meanings, and how artists use performance to reinforce or resist stereotypical representations. Core readings will be drawn from Dance, Performance, Asian, and Asian American Studies to engage with issues such as nation formation, racial and ethnic identity politics, appropriation, tradition and innovation among other topics. This is primarily a discussion-based seminar course, and might also include screenings, discussion with guest artists and scholars, and opportunities for creative projects. No previous dance experience is required.

Requirements/Evaluation:  reading responses, in-class writing assignments, participation in discussions and presentations, essays, and a final cumulative essay assignment.

Prerequisites:  none

Enrollment Limit:  15

Enrollment Preferences:  first years and sophomores
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ASIA 216(D1) DANC 216(D1) THEA 216(D1) AMST 213(D2) GBST 214(D2) AAS 216(D2)

Difference, Power, and Equity Notes: This course introduces students to the role of performance in nation formation in Asia and the history of Asian-Americans in the US through analysis of dance practices. Student will explore how race was central to the formation of Asian and the American nation, and how social and legal discriminatory practices against minorities influenced popular culture. The assigned material provide examples of how artists address these inequalities and differences in social power.

THEA 220  (S) Greek Tragedy (DPE)
Cross-listings: CLAS 202 COMP 220 THEA 220
Secondary Cross-listing
Ancient Greek tragedy was a cultural phenomenon deeply embedded in its 5th-century Athenian context, yet it is also a dramatic form that resonates powerfully with 21st-century artists and audiences. This course examines tragedy on both levels. We will read such plays as Aeschylus' Agamemnon, Sophocles' Electra, and Euripides' Medea in English translation, considering their literary and dramatic features as well as their relationship to civic, social, and ritual contexts. We will discuss such topics as the construction of gender and identity on the dramatic stage, the engagement between tragedy and other literary genres, and the distinctive styles of the three major Athenian playwrights. We will also survey a set of recent productions and adaptations of these plays, with a particular focus on how modern playwrights and producers use Greek tragedy to explore justice, power, race, gender, status, and sexuality. We will consider how a dramatic form largely produced by and for Athenian citizen men became a creative resource for a remarkably diverse range of 21st-century artists, and explore how modern productions offer fresh perspectives on ancient material. All readings will be in English.
Requirements/Evaluation: class participation, several essays, brief oral presentations
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Classics, Comp Lit, and Theater majors; first-years; sophomores
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
THEA 226(D1) DANC 226(D1) WGSS 226(D2) AMST 226(D2)

Difference, Power, and Equity Notes: In the course, students will explore the concept of gender as a social construction and how the body’s historical associations to markers of gender and sexuality lead to differences in socio-political power. The assigned texts and viewings provide examples of how bodies and their movements make meaning in a network of power relationships, and how artists use dance to address social inequalities such as sexism, racism, and transmisogyny, to imagine a more just world.

SEM Section: 01   WF 11:00 am - 12:15 pm   Munjulika R. Tarah

THEA 250  (F) Feminist Theatres: A Global Perspective  (DPE) (WS)

Cross-listings: THEA 250 COMP 247 ENGL 253 WGSS 250

Primary Cross-listing

What makes a work of theatre “feminist”? How do plays and performances across global networks engage with different models of feminism: liberal, radical, materialist, and intersectional? Why has feminism mattered to theatre-makers of the past? Should it still matter now? If so, what forms might future feminist theatres take? In this tutorial course, students will work in pairs to examine the social and political relation of feminism to the art and practice of theatre. Taking a global and comparative perspective on the subject, we will focus on the intersectionalities of gender, race, class, ethnicity, nationality, and sexual identity in the production of feminist-driven theatrical practices. Artists, companies, and movements to be considered may include: Spiderwoman Theatre, Adrienne Kennedy, Caryl Churchill, Sphinx Theatre Company, Nozake Shange, Griselda Gambaro, Manjula Padmanabhan, Cherrie Moraga, Lisa Kron, Arethusa Speaks, Maya Krishna Rao, Tracie Chima Uloh-Ezejuijh, Alexis Scheer, Tori Sampson, Clare Barron, and others. Close analysis of source material will be informed by critical and autobiographical writings by: Audre Lorde, Judith Butler, bell hooks, Gloria Anzaldúa, Kimberlé Crenshaw, Eve K. Sedgwick, Gayatri Spivak, Jill Dolan, José E. Muñoz, and Donna Haraway. This course will follow a standard tutorial format, with students taking turns presenting or responding to their peer every other week; for their presentations, students will write a 5-page paper or, in up to two cases if they choose, offer their argumentation through more performance-driven methods (such as an oral argument, spoken-word monologue, or activist prompt).

Requirements/Evaluation: students will meet with instructor in pairs for an hour each week; every other week they will be responsible for sharing either a 5-page paper or, if they choose, in up to two cases, a more performance-driven presentation, such as: an oral argument, spoken-word monologue, or activist prompt (five presentations/papers in all). They will comment on / respond to their partner’s papers/presentations in alternate weeks; emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and written and oral communication.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: THEA majors; WGSS majors; ENGL majors; COMP majors. Students from all majors are welcome and invited to contact Prof. Holzapfel about their interest in the class: ash2@williams.edu

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option
This course is cross-listed and the prefixes carry the following divisional credit:
THEA 250(D1) COMP 247(D1) ENGL 253(D1) WGSS 250(D2)

Writing Skills Notes: This course fulfills the writing skills requirement by engaging students in the active and creative process of critical writing, based on the notion that "writing is thinking, not thinking written down." Emphasis will be given to crafting and developing an argument, clarifying prose, selecting evidence, gaining authority, and incorporating theoretical ideas into an essay. We will also focus on the performance and presentation of written arguments.

Difference, Power, and Equity Notes: This tutorial examines intersections between gender, race, sexuality, class, nationality, and ethnicity in relation to theatre's ongoing engagement with feminism. We will consider how articulations of difference, power, and equity arise and are, in fact, prioritized in quite different ways within the politics of feminism itself, leading to their variable expressions through art.

Fall 2023

THEA 271 (S) Acting Out: Performativity, Production, and Politics in East Asian Theatres (DPE)

Cross-listings: CHIN 275 COMP 271 THEA 271 ASIA 275 AAS 275

Secondary Cross-listing

"Asian Theatres," for those in the West, can conjure up a variety of exotic impressions: spectacle and cacophony, mysterious masks and acrobatic bodies, exquisite styles and strangely confusing conventions. Although Asian theatres have been studied systematically in the West for at least a century, the West has never truly left its "othering" look at them. Yet, what is "different" for the West is bedrock for Asian cultures. Theatre, one of the most important and dynamic forms of cultural production and communication, has actively involved all strata of Asian societies for a millennium. How to explain theatre's continued presence and relevance for Asian nations? What do the traditions of Kun, Noh, and Talchum reveal about the cultures and communities in which they were created? This course seeks to understand from the Asian perspective, rather than "exotize" and "other," musical and dance theatres from China, Japan, and Korea. Examining the evolving presentations of signature dramas dating from the sixteenth to the eighteenth centuries, we will act out Asian theatres in the following ways: (1) by reading the original plays in translation in tandem with their contemporary and intercultural reproductions, we will explore how Asian theatres fare in the era of globalization within and beyond national borders; (2) by revealing the "technologies" of writing, reading, acting, and staging these plays in different cultural milieus, we will consider what kinds of language and rhetoric, forms of music and movement, as well as visual components are deployed to convey evolving messages; (3) by considering key performances held outside of the proscenium stage, we will gain exposure to alternative theatrical spaces in Asian and diasporic communities that reform performing conventions, reconfigure staging environments, and renegotiate cultural values. In this manner, we will together gain an appreciation for the aesthetic devices, thematic concerns, and production politics of East Asian theatres and their global reproductions. Class materials include drama, production videos, and invited zoom sessions with Asian theatre practitioners and directors who live in the U.S. and other diasporic communities. All materials are in English. No language prerequisite.

Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) three short papers (3 pages each); 3) a take-home midterm; and 4) participation in a final in-class theatre production.

Prerequisites: None; open to all. No knowledge of Asian languages required, though students with advanced Asian language proficiency are encouraged to work with primary sources if they wish.

Enrollment Limit: 20

Enrollment Preferences: Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; Theatre majors; Comp Lit majors; Concentrators in Asian Studies or Asian American Studies.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
CHIN 275(D1) COMP 271(D1) THEA 271(D1) ASIA 275(D2) AAS 275(D2)

Difference, Power, and Equity Notes: This course examines the power dynamics of spectacle and cacophony and how theatre provided a cultural space that engaged all strata of East Asian societies, thereby masking class and ethnic divisions within these nation-states, while also presenting a distinct image of "China," "Japan," and "Korea" to be consumed in the West. Students will learn ways in which "traditional" theatre productions affirm
or subvert Western biases against Asians.

**THEA 281 (F) Perversity & Play: Embodying Black Feminist Methods in Contemporary Visual Art & Performance**  (DPE)

**Cross-listings:** AFR 290  WGSS 290  THEA 281

**Secondary Cross-listing**

What critical interpretations can we conceive in examination of emerging Black femme artists who reclaim their bodily autonomies as "mother f** monsters," reassert their "WAP(s)" as new materialist methods, reembody Harriet Tubman as she leads an army of "Bad b**," and subvert derogatory archetypes i.e., "mammy," "sapphire" or "venus." In this class we will survey an introduction to the field of Black Feminist studies through this lens of perversity and play. The subject of perversity points to a violent history of misrepresentation where stereotypes anchored and mobilized perceptions of Black womanhood while the notion of play offers an analysis that shows how contemporary Black women employ/perform diversions to these limiting categories of race, gender and sexuality. Students will examine the foundational scholarship from the works of Audre Lorde, Saidiya Hartman, Hortense Spillers, and Katherine McKittrick (just to name a few). Moreover, an engagement of Black feminist studies will enable students to examine the social and geographic organizations of Black femme bodies on a global scale. By centering Black feminist methods with decolonial praxis, we will disassemble a limiting American grammar that imposes Black women to positions of hyper-visibility and absence.

**Requirements/Evaluation:** 20% Free Writes/ Weekly Reflections; 25% Short Presentation: Discussion Leader; 20% Paper 1; 25% Paper 2; 10% Participation

**Prerequisites:** None

**Enrollment Limit:** 20

**Enrollment Preferences:** Enrollment preference to WGSS majors as well as those cross listed in Africana Studies and Theatre Departments. These enrollment preferences are made to consider students who have specialized interests in these disciplines given the course being advanced

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

**Fall 2023**

**THEA 301 (S) Performing Archives: Global Theatre Histories From Antiquity to 1900**  (DPE)

This course introduces students to methods of historical research and creative adaptation in the global archives of performance and theatre, stemming from antiquity to roughly 1900. What is an archive? What is a repertoire? How does embodied knowledge get acquired, stored, and transferred over time? Who owns, or curates, the artistic remnants and shared traditions of the past? Practicing the skills of a theatre historian, students will engage with the archives and repertoires of global theatre and performance, learning how to access, research, interpret, and gain deeper understandings of the artistic past. Examining how contemporary artists have engaged with (adapted, appropriated, recycled, or re-appropriated) historical sources and materials, students will themselves work towards the creation, development, and, if they like, performance of their own artistic approach to the historical archive and repertoire. While attending to theatre's formal aspects, we will at the same time focus on the relationship of performance to politics and society, as well as to the enduring legacies of empire, state power, colonialism, and private capital in which it is historically embedded and by which it has been shaped. If and when possible, we will encounter archival sources housed in College Archives and WCMA. This course is required for Theatre majors and is a prerequisite for THEA 401.
Class Format: This class is a combined studio/seminar. Students will be required to present and share their creative responses to the material studied in the course.

Requirements/Evaluation: active participation in class; a midterm essay or creative adaptation project; a final essay, creative adaptation or performance project

Prerequisites: Theatre 101 or 201, or by written permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Theatre majors

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course works to dismantle the ongoing bias in theatre studies that positions textual and literary forms of theatre in the globalized north as the primary sites of knowledge transfer, status, and value in our field. Instead, theatre and performance are approached as diverse forms of repertoire and embodied knowledge that must be analyzed in relation to the structures of social inequity and power in which they historically arise.

THEA 321 (S) Arts Organizing in Africa and the Diaspora (DPE)

Cross-listings: DANC 323 THEA 321 MUS 323

Secondary Cross-listing

At the heart of this class is the question, how do artists and organizations use the performing arts to effect social change in their communities? Drawing from a number of case studies from throughout Africa and the African Diaspora, we will first endeavor to understand and contextualize issues related to education, social uplift, the environment, and the economy as they relate to specific communities. We will then examine how a series of organizations (from grassroots campaigns to multinational initiatives) utilize the performing arts in response to those issues. Among the issues we will discuss at length are: -How do performers and organizations navigate the interplay between showcasing the performance talents of individuals and groups and foregrounding an issue or cause? More broadly, what dilemmas emerge as social and aesthetic imperatives intermingle? -What are the dynamics between people acting on a local level within their communities and their various international partnerships and audiences? -How can government or NGO sponsorship help and/or hinder systemic change? By the end of the semester, students will be equipped with conceptual frameworks and critical vocabularies that can help them ascertain the functions of performance within larger organizations and in service to complex societal issues. Throughout the course, we will watch and listen to a variety of performances from traditional genres to hip-hop, however this class is less about learning to perform or analyze any particular genre than it is about thinking through how performance is used as a vehicle for social change. Case studies will include youth outreach and uplift in Tanzania through the United African Alliance, campaigns to promote girls' education in Benin and Zimbabwe, community-wide decolonizing initiatives through the Yole!Africa Center in the Democratic Republic of Congo, and the cultural reclamation of a mining town in Suriname through the arts organization, Stichting Kibii.

Requirements/Evaluation: Four case study profiles, midterm essay (5-7 pages), and a final project. Regular participation in class discussion.

Prerequisites: None

Enrollment Limit: 15

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

DANC 323(D1) THEA 321(D1) MUS 323(D1)

Difference, Power, and Equity Notes: This course interrogates on a fundamental level issues of power and equity. Using the performing arts as a critical lens, we discuss a series of social and environmental challenges that communities of African descent face. These are in direct dialogue with global systems of power and economic factors. Issues include: environment, education, local communities' interactions with multinational corporations,
and representational politics in performance.

THEA 336  (F) Boucicault to McDonagh: Irish Theatre, 1870 to the present  (DPE)

Cross-listings: COMP 360 ENGL 364 THEA 336

Primary Cross-listing

During the Irish Literary Revival of c.1885-1920, Irish writers sought to assert "Irishness" as culturally distinctive, and resisted the marginalizing impacts of British colonial rule. The achievement of Independence in 1923 brought years of insularity and censorship, but over the past three decades Ireland's embrace of globalization and the hybridizing impacts of postmodernism has led to a remarkable flowering of creative vitality. This course will trace the evolution of Irish theatre over the past century-and-a-half. We will read plays by Dion Boucicault, Oscar Wilde, W.B.Yeats, J.M.Synge, Augusta Gregory, George Bernard Shaw, Douglas Hyde, Sean O'Casey, Samuel Beckett, Brendan Behan, Brian Friel, Marina Carr, Frank McGuinness, Christina Reid, Conor McPherson, and Martin McDonagh, and also chart the course of the founding and history of the Abbey Theatre, one of first National Theatres in Europe.

Requirements/Evaluation: Two essays of 6+ pages; regular Glow posts; class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Theatre majors, English and Comparative Literature majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 360(D1) ENGL 364(D1) THEA 336(D1)

Difference, Power, and Equity Notes: This course is centrally concerned with identity politics within a colonial context. Irish writers prior to independence from Britain sought to assert "Irishness" as culturally distinctive. After 1923, they continued to wrestle with the legacies of colonial subjection and the inferiorizing identifications that had been ingrained during colonial rule. The texts we will read centre on questions of cultural self-definition and explore (and resist) the process of othering.

THEA 341  (F) Performing Masculinity in Global Popular Culture  (DPE)

Cross-listings: SOC 340 LATS 341 THEA 341 WGSS 347 AMST 358

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia, hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

Prerequisites: none; WGSS 202 would be helpful
Enrollment Limit: 15

Enrollment Preferences: a short statement of interest will be solicited; a subsection of applicants may be interviewed

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 340(D2) LATS 341(D2) THEA 341(D1) WGSS 347(D2) AMST 358(D2)

Difference, Power, and Equity Notes: This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

WGSS 101 (F)(S) Introduction to Women's, Gender & Sexuality Studies (DPE) (WS)
This course is designed to initiate you into the pleasures, pains and perplexities of critical thinking about gender and the situations of women across the globe. We will survey a wide variety of writers and issues--historical and contemporary, theoretical and practical. Above all, the course is intended as an exploration of the tremendous diversity of thought contained under the general rubrics of feminist and gender studies and a vehicle for developing skills in writing and research as well as analytical tools for further work in the field. The goal is not to bring about a specific point of view, but rather to learn to analyze issues critically using the methods and frameworks that feminist theory and queer theory have developed as academic disciplines.

Class Format: Mix of lectures and seminars

Requirements/Evaluation: Participation during class and in online forums, weekly reading responses, two short essays with revisions, and a final research paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: WGSS majors and potential WGSS majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Unit Notes: required course for the Women's, Gender and Sexuality Studies major

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: This course requires significant attention to the craft of writing. Essential to this craft is the process of editing and rewriting materials with feedback from peers and professors. Students are expected to focus on improving analytical skills, critical thinking, and argumentation through attention to the writing process. They are also expected to give meaningful critical feedback on the writing of their peers.

Difference, Power, and Equity Notes: This course meets the DPE requirement because it asks students to reflect critically on issues of gender and sexuality around the world in a comparative contextual framework. Students will be asked in seminar space to discuss the operation of difference and power within as well as across different gender, class, racial, and sexual identities while learning in lecture meetings about feminist and queer studies’ history, activism, and theory.

WGSS 105  (F)  American Girlhoods  (DPE) (WS)

Cross-listings:  WGSS 105 ENGL 105

Secondary Cross-listing
The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

Requirements/Evaluation:  at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation

Prerequisites:  none

Enrollment Limit:  19

Enrollment Preferences:  first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size:  19

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 105(D2) ENGL 105(D1)

Writing Skills Notes: Students do at least 20 pages of writing (4-5 papers) and are required to revise several papers. We also devote significant class time to talking about successful academic writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equity and power and what kinds of literary and cultural forms writers utilize to illuminate these differences.

WGSS 113  (F)  The Feminist Poetry Movement  (DPE) (WS)

Cross-listings:  AMST 113 WGSS 113 ENGL 113

Secondary Cross-listing
Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation:  two-three short analysis papers, creative (1-2 pages), Perusall, curated final project (archival exhibit and digital project), presentations
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first years
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 113(D2) WGSS 113(D2) ENGL 113(D1)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: Perusall annotation, three four-to-five-page graded papers, one creative assignment, and a final digital research project (8-10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

WGSS 115 (F) Latina Feminist Spiritualities (DPE) (WS)
Cross-listings: WGSS 115 REL 115 LATS 115

Secondary Cross-listing
Self-proclaimed feminist activists, who hail from a variety of ethnic Latina/o/x/e (Latine) backgrounds, have often appealed to "ancestral" and "spiritual traditions" as integral to their activism and commitments. Some Latine feminists turned to "spiritual" traditions including brujería/witchcraft; curanderismo and Indigenous healing traditions; Santería/Lukumi and other AfroDiasporic traditions; astrology; home altars; various "mystical" traditions such as Kabbalah and Sufism, as well as Christian mystics like Teresa of Avila or Sor Juana Inés de la Cruz. Others have turned to the appropriation of "Eastern" traditions such as yoga, Tibetan Buddhism, and Zen Buddhism. This course engages students in an intensive introduction to some of the varieties of Latine feminist thought and contexts, including how activists, writers, and artists think about women, gender, sexuality, race, class, colonialism, the earth, healing, and a better world. How do these feminists of different Latine backgrounds and contexts imagine a better world? How and why do they appeal to spiritual traditions as a source of wisdom, healing, and lived practice for a better world? In this course, we seek to understand both particular Latine feminist spiritual practices on their own terms, as well as why such writers and activists appeal to "the spiritual" in Latine contexts. We will also consider how they frame notions of "the spiritual" in relationship to notions of "the religious" and "the secular."

Requirements/Evaluation: Grading is based on 5-6 page papers written on alternating weeks and brief 1-2 page response papers shared on alternating weeks as well as participation and two paper revisions.

Prerequisites: None
Enrollment Limit: 10
Enrollment Preferences: Latina/o Studies concentrators, religion majors, first-year students interested in Latina/o Studies and/or religion
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 115(D2) REL 115(D2) LATS 115(D2)

Writing Skills Notes: Grading is based on alternating weeks writing a lead paper and other weeks writing a brief response paper. This course will require students to write regularly and revise two of their lead papers for grades.
This course examines how Latine feminists have responded to a variety of differential power inequities, especially in terms of gender, sexuality, race, ethnicity, language, and class. It also considers the ways they have imagined better and more equitable worlds, and with what consequences they have done so.

WGSS 127 (F) Spring Grass: A Peek into Inequality in China  (DPE) (WS)

Cross-listings:  WGSS 127 ASIA 127 CHIN 427

Spring Grass (Chuncao) is a Chinese novel written by award-winning author Qiu Shanshan (1958-). Using the literary techniques of social realism, the novel chronicles the life of a young rural woman from 1961 to 2001. Spring Grass, the protagonist of the novel, was born in a rural village to a mother who preferred sons over daughters. At a young age, Spring Grass was deprived of the opportunity to attend school. Against all odds, she managed to marry for love, venture into the city, and become an enterprising migrant worker. This novel not only reflects the struggles of women in contemporary China but also captures the economic transformation of modern China since 1978 when the Reform and Open-Door Policy (gaige kaifang) was initiated. The novel was adapted into a television drama series and became an instant hit in 2008. This course takes an interdisciplinary, cultural studies and humanistic approach to studying a literary text, using literature as a means to help students better understand social and cultural issues. Through close readings of the novel, the eponymous TV drama series, documentaries, and films depicting rural life and women's roles in China, as well as in-depth discussions of both primary and secondary sources that deal with the cultural, historical, and socioeconomic background of the unfolding story of Spring Grass, this course aims to provide a window for students to examine the issues of inequality in the Chinese village and society at large. Why would mothers be harsh to their own daughters and bar girls’ right to education? Why would young people leave their village and migrate to the city? Why would migrant workers leave their children behind in the village? Why would economic developments in China exacerbate the problem of gender inequality in society? Why would the ideology and cultural logic behind Mao Zedong's proclamation "women can hold up half of the sky" add more burden to women rather than truly liberate them? Why would city people discriminate against country folks? After taking this course, students will gain a deeper understanding of the issues related to gender inequality (nannü bu pingdeng) and the urban/rural-gap (chengxiang chabie) in China. Throughout the course, they are also encouraged to critically think about how to achieve equity in different societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or WGSS and language learners wishing to take the course in Chinese should register under CHIN.

Requirements/Evaluation: For all students, active participation in tutorial meetings and an online writing portfolio as the final project. For CHIN students, four 4- or 5-page tutorial papers and revisions in Chinese, four 2-page critiques. For ASIA/WGSS students, five 5-page tutorial papers in English, five 2-page critiques, one revised paper.

Prerequisites: For students registering under CHIN, the prerequisite is CHIN 402 or a language proficiency interview conducted by the instructor. For students registering under ASST or WGSS, there is no prerequisite.

Enrollment Limit: 10

Enrollment Preferences: Enrollment priorities will be given to Chinese language learners who register under CHIN, and to freshmen and sophomores who register under ASST or WGSS.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions:  (D2)  (DPE)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 127(D2) ASIA 127(D1) CHIN 427(D1)

Writing Skills Notes: Writing is taught using the writing-as-process pedagogical approach. The writing process consists of invention, composition, and revision. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. The instructor gives detailed feedback to students’ drafts and students are required to turn in revisions. At the end of the semester, students will compile an online writing portfolio to showcase their best works.

Difference, Power, and Equity Notes: The issue of "inequality," including both gender inequality and regional inequality is the driving force behind the readings and discussions of this tutorial. Students are guided to develop an empathetic way of interpreting a literary work that features a rural woman/migrant worker. They will critically analyze the sources of inequality in the Chinese cultural context and explore ways to address such
This course explores key themes in the expression of gender and sexuality through music. It draws from primarily 21st century examples, across cultures and genres, ranging from pop boy bands to Indian bhangra dance to the musical avant-garde. Themes will include: communicating gendered ideals, dance and embodiment, transgressive performances, biography and subjectivity, intersectionality, music and sexual violence, and marketing. We will explore the ways that ideas and identities related to sex and gender are formulated and mobilized in music's performance and consumption. Inevitably, issues of sound and stagecraft intersect with factors such as race, age, and class, further informing these experiences. Students will consider their own processes of identifying and interpreting expressions of gender and sexuality in sound and movement, and contemplate the role of culture and society in informing those interpretations.

Requirements/Evaluation: attendance/participation, intermittent GLOW posts and short assignments (2 pgs or less), midterm project, and either a 12-page final paper or a project with supplementary paper (length to be determined in consultation with the instructor).

Prerequisites: open to all students; familiarity with musical terminology is helpful but not required

Enrollment Limit: 20

Enrollment Preferences: WGSS and MUSC majors/prospective majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 177(D2) MUS 177(D1)

Difference, Power, and Equity Notes: This course critically examines the ways in which music constructs and reflects gendered and sexual identities in intersectional space. We discuss how normative viewpoints come to be accepted and interpreted as 'natural,' and how musicians and audiences have maneuvered within and against those socio-political expectations. Music and readings span a wide range of sources--elite, popular, counter-cultural; from Euro-American sources to genres hailing from Brazil, Korea, and India.

Attributes: MUS World Music/Ethnomusicology

Spring 2024

This course will offer an introduction to the burgeoning interdisciplinary field of sexuality studies in part through examining historical, legal, literary, filmic, cultural studies, sociological, and popular texts, as well as work done under the umbrella of queer theory. It explores the role of race, class, religion, science, region, and nation in the construction of modern gender and sexual identities and in the lived experiences of dissident genders and sexualities. We will examine a range of issues, including histories and strategies of resistance; transgender and intersex theory and activism; critiques of the white racial hegemony of lesbian and gay studies; the consequences of gay marriage; the politics of AIDS and its theoretical implications; globalization and sexuality; the rise of queer visibility and its relation to commodity culture; and recent conceptualizations of homonormativity. The goal of the course is not to achieve any kind of political or intellectual consensus, but to have rigorous debate over some of the key issues in queer studies.

Class Format: discussion

Requirements/Evaluation: Class participation, on-line discussion forum, two papers of around 5-7 pages.

Prerequisites: None. WGSS 101 may be helpful as background knowledge, but is not required.

Enrollment Limit: 19
Enrollment Preferences: Women's Gender & Sexuality Studies majors, short statement of interest in case of over-enrollment

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course examines sexual diversity in various forms and asks students to interrogate questions of privilege and positionality, including the intersectional contemplation of sexuality's relationship to race, ethnicity, ability, class, religion, and other axes of identity. It investigates not only sexual difference, but the history of sexual identity and progressive narratives of "gay rights" that have developed over time.

WGSS 225 (F) Buddhism, Social Change, & Reproductive Justice in the Anthropocene (DPE) (WS)

Cross-listings: WGSS 225 ASIA 258 ANTH 258 REL 258

Secondary Cross-listing
This course considers how three women profoundly shaped the Buddha's life and legacy in terms of social change & reproductive justice. Our central characters are Maya--the Buddha's mother, who died shortly after delivering him; Pajapati--the Buddha's stepmother & aunt who raised him; and Yasodhara--his wife, whom he abandoned when he left home to seek enlightenment. We explore the classical Buddhist discourses and modern biographies to explore how these three women impacted what the Buddha taught and practiced in terms of social and gender justice. These women helped shape the Buddha's radical decision to found the first renunciate order for women in Asian history and helped shape Buddhist attitudes towards female empowerment, bodily autonomy, and reproductive justice for that past 2500 years. Our historical genealogy will explore how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice. Along the way we consider: How did these three women reject existing social hierarchies in the Buddha's day and with what impacts for modern Buddhist practices and institutions? How do the social transformations of the Buddha's day still impact modern struggles for gender justice & reproductive justice in the Anthropocene?

Requirements/Evaluation: Attendance, writing weekly essays or written feedback. There are no grades first half of the semester but weekly feedback on writing.

Prerequisites: none, but a course in ANTH or REL is preferred

Enrollment Limit: 10

Enrollment Preferences: ANTH, REL, WGSS majors and ASIA concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 225(D2) ASIA 258(D2) ANTH 258(D2) REL 258(D2)

Writing Skills Notes: We write every week--either 1500 word lead essays, or written feedback (and oral responses) to the lead essay and weekly text. We have a mid semester 'writing chat' with the instructor where we discuss strengths and weakness of individual student writing.

Difference, Power, and Equity Notes: We explore the three women who left a lasting legacy on the Buddha's teachings and practices in terms of gender egalitarianism, social justice, and reproductive justice. Our historical genealogy explores how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice.

TUT Section: T1 TBA Kim Gutschow

WGSS 226 (S) Gender and the Dancing Body (DPE)
Cross-listings: THEA 226 DANC 226 WGSS 226 AMST 226

Secondary Cross-listing

This course posits that the dancing body is a particularly rich site for examining the history of gender and sexuality in America and beyond. The aim of the course is to explore ideas related to gender and sexuality as prescribed by dominant cultural, social, and religious institutions, and how dance has been used to challenge those normative ideologies. We will examine a wide range of dance genres, from stage performances to popular forms to dance on television, with particular attention to the intersections of race and class with gender. This is primarily a discussion-based seminar course and may also include film screenings, discussions with guest artists, and opportunities for creative projects. No previous dance experience required.

Requirements/Evaluation: participation in discussions and presentations, reading responses, in-class writing assignments, essays, and a final cumulative essay.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: first years and sophomores

Expected Class Size: 10-15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
THEA 226(D1) DANC 226(D1) WGSS 226(D2) AMST 226(D2)

Difference, Power, and Equity Notes: In the course, students will explore the concept of gender as a social construction and how the body’s historical associations to markers of gender and sexuality lead to differences in socio-political power. The assigned texts and viewings provide examples of how bodies and their movements make meaning in a network of power relationships, and how artists use dance to address social inequalities such as sexism, racism, and transmisogyny, to imagine a more just world.

Spring 2024

SEM Section: 01    WF 11:00 am - 12:15 pm     Munjulika R. Tarah

WGSS 236 (S) Feminist Legal Theory (DPE)

Cross-listings: WGSS 236 PSCI 236

Secondary Cross-listing

What can a critical analysis of gender and sexuality bring to the study of law, constitutions, legal interpretation, and the task of judging? Well-known contributions by feminist theorists include the conceptualization and critique of anti-discrimination frameworks, the legal analysis of intersecting systems of social subordination (particularly gender, race, class, sexuality, disability), and the theorization of “new” categories of rights (e.g. sexuate rights). Accompanying these interventions in the legal field is a deep and sustained inquiry into the subject of law: Who can appear before the law as the proper bearer of civil and human rights? What kinds of violations and deprivations can be recognized as harms in need of redress? Who gets to make these judgments, and according to what rules? While our examples will be drawn mainly from family law, the regulation of sex/reproduction, and workplace discrimination, the main task of this course will be to deepen our understanding of how the subject of law is constituted. Illustrative cases to aid our inquiry will be drawn primarily from the USA and Canada, with additional examples from India, South Africa, and possibly European law.

Theorists we read will represent many kinds of feminist work that intersect with the legal field, including academic studies in political theory, philosophy, and cultural theory, along with contributions from community organizers engaged in anti-violence work and social justice advocacy.

Requirements/Evaluation: One oral presentation; three 6-8 page papers; regular class participation.

Prerequisites: None.

Enrollment Limit: 25

Enrollment Preferences: Preference will be given to PSCI and WGSS majors and JLST concentrators.

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
Difference, Power, and Equity Notes: The course analyzes the relationship between the legal system and social distributions of power, focusing on the way that inequalities based on gender, race, class and other forms of social stratification either enhance or limit individuals' access to legal protection and legal remedies.

Attributes: JLST Interdepartmental Electives  PSCI Political Theory Courses

Spring 2024

WGSS 244  (F)  Actually Existing Alternative Economies  (DPE)

Capitalism has a way of constricting our imaginations so that we come to believe the only possible form of economic institution is one based on profit seeking, individualism. However movements in countries including Brazil, France, Canada and Spain—and now parts of the U.S.—are demonstrating otherwise. Theorists, practitioners and social activists are adopting labels including 'Solidarity Economy' and 'New Economy' to group together economic activities based on ideals of human provisioning, social justice and environmental sustainability. They point out that many of these activities are already taking place and are often crucial to our lives, but are rendered invisible by economic theory. In the words of Brazilian popular educator and economist Marcos Arruda, ‘a solidarity economy does not arise from thinkers or ideas; it is the outcome of the concrete historical struggle of the human being to live and to develop him/herself as an individual and a collective.’ Feminist geographers Julie Graham and Katherine Gibson developed practices of ‘mapping’ local economies with communities in Australia and Western Massachusetts in ways that bring to light the invisible resources and practices of provisioning and solidarity, and challenge what they describe, drawing on the work of feminist theorist Sharon Marcus, as a 'script' of local helplessness to resist the 'rape' of their economies by the forces of global capitalism. Do these proposed discursive practices actually present realistic possibilities for producing sustained economic change? In this tutorial we will learn and debate about some of the activities being named and built under the label of solidarity economy, such as the networks of worker-owned cooperatives in Mondragon, Spain, the growth of local currencies and time exchanges, fair trade organizations and different ways of organizing care work. We will look at some of the history and debates around worker-owned cooperatives, ranging from Victorian England through African-American experiences throughout the 20th century and examples in post-Independence Africa, to the recent establishment of Cooperation Jackson in Jackson, Mississippi. The ILO has argued that co-ops are a particularly appropriate form to African development. Is this plausible, and what role might they play in AIDS-affected communities? Why has the recent U.S. growth of the solidarity economy been so concentrated in communities of color, and how is it gendered? We will visit some examples in New York or Boston.

Requirements/Evaluation: six papers of 5-7 pages, six written responses to partner's papers, participation in tutorial discussion

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: open to sophomores and above

Expected Class Size: 10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE)

Difference, Power, and Equity Notes: The course fulfills the DPE requirement because of its central focus on the diversity of economic institutions within and across countries and the power imbalances that call them into being and challenge some of their survival. The course considers ways the hegemonic discourse of economics tends to render that diversity invisible, and tools, both analytical and activist, for bringing it out into view. It teaches tools to evaluate economic institutions in terms of equity and solidarity.

Fall 2023

TUT Section: T1  TBA  Kiaran Honderich

WGSS 250  (F)  Feminist Theatres: A Global Perspective  (DPE)  (WS)

Cross-listings: THEA 250 COMP 247 ENGL 253 WGSS 250

Secondary Cross-listing

What makes a work of theatre "feminist"? How do plays and performances across global networks engage with different models of feminism: liberal, radical, materialist, and intersectional? Why has feminism mattered to theatre-makers of the past? Should it still matter now? If so, what forms might
future feminist theatres take? In this tutorial course, students will work in pairs to examine the social and political relation of feminism to the art and practice of theatre. Taking a global and comparative perspective on the subject, we will focus on the intersectionalities of gender, race, class, ethnicity, nationality, and sexual identity in the production of feminist-driven theatrical practices. Artists, companies, and movements to be considered may include: Spiderwoman Theatre, Adrienne Kennedy, Caryl Churchill, Sphinx Theatre Company, Ntozake Shange, Griselda Gambaro, Manjula Padmanabhan, Cherrie Moraga, Lisa Kron, Arethusa Speaks, Maya Krishna Rao, Tracie Chima Utloh-Ezeajugh, Alexis Scheer, Tori Sampson, Clare Barron, and others. Close analysis of source material will be informed by critical and autobiographical writings by: Audre Lorde, Judith Butler, bell hooks, Gloria Anzaldúa, Kimberlé Crenshaw, Eve K. Sedgwick, Gayatri Spivak, Jill Dolan, José E. Muñoz, and Donna Haraway. This course will follow a standard tutorial format, with students taking turns presenting or responding to their peer every other week; for their presentations, students will write a 5-page paper or, in up to two cases if they choose, offer their argumentation through more performance-driven methods (such as an oral argument, spoken-word monologue, or activist prompt).

Requirements/Evaluation: students will meet with instructor in pairs for an hour each week; every other week they will be responsible for sharing either a 5-page paper or, if they choose, in up to two cases, a more performance-driven presentation, such as: an oral argument, spoken-word monologue, or activist prompt (five presentations/papers in all). They will comment on / respond to their partner's papers/presentations in alternate weeks; emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and written and oral communication.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: THEA majors; WGSS majors; ENGL majors; COMP majors. Students from all majors are welcome and invited to contact Prof. Holzapfel about their interest in the class: ash2@williams.edu

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 250(D1) COMP 247(D1) ENGL 253(D1) WGSS 250(D2)

Writing Skills Notes: This course fulfills the writing skills requirement by engaging students in the active and creative process of critical writing, based on the notion that "writing is thinking, not thinking written down." Emphasis will be given to crafting and developing an argument, clarifying prose, selecting evidence, gaining authority, and incorporating theoretical ideas into an essay. We will also focus on the performance and presentation of written arguments.

Difference, Power, and Equity Notes: This tutorial examines intersections between gender, race, sexuality, class, nationality, and ethnicity in relation to theatre’s ongoing engagement with feminism. We will consider how articulations of difference, power, and equity arise and are, in fact, prioritized in quite different ways within the politics of feminism itself, leading to their variable expressions through art.

Fall 2023

TUT Section: T1   TBA   Amy S. Holzapfel

WGSS 290 (F) Perversity & Play: Embodying Black Feminist Methods in Contemporary Visual Art & Performance (DPE)

Cross-listings: AFR 290 WGSS 290 THEA 281

Primary Cross-listing

What critical interpretations can we conceive in examination of emerging Black femme artists who reclaim their bodily autonomies as “mother f** monsters,” reassert their “WAP(s)” as new materialist methods, reembody Harriet Tubman as she leads an army of “Bad b**,” and subvert derogatory archetypes i.e., “mammy,” “sapphire” or “venus.” In this class we will survey an introduction to the field of Black Feminist studies through this lens of perversity and play. The subject of perversity points to a violent history of misrepresentation where stereotypes anchored and mobilized perceptions of Black womanhood while the notion of play offers an analysis that shows how contemporary Black women employ/perform diversions to these limiting categories of race, gender and sexuality. Students will examine the foundational scholarship from the works of Audre Lorde, Saidiya Hartman, Hortense Spillers, and Katherine McKittrick (just to name a few). Moreover, an engagement of Black feminist studies will enable students to examine the social and geographic organizations of Black femme bodies on a global scale. By centering Black feminist methods with decolonial praxis, we will disassemble a limiting American grammar that imposes Black women to positions of hyper-visibility and absence.

Requirements/Evaluation: 20% Free Writes/Weekly Reflections; 25% Short Presentation: Discussion Leader; 20% Paper 1; 25% Paper 2; 10% Participation

Prerequisites: None
Enrollment Limit: 20

Enrollment Preferences: Enrollment preference to WGSS majors as well as those cross listed in Africana Studies and Theatre Departments. These enrollment preferences are made to consider students who have specialized interests in these disciplines given the course being advanced

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 290(D2) WGSS 290(D2) THEA 281(D1)

Difference, Power, and Equity Notes: Deals with power imbalances around race, gender and sexuality and how these both manifest in the real world and also can be addressed through various strands of academic theory.

WGSS 308  (S)  Parenting for a Feminist-Queer-Trans World  (DPE)
Perhaps you want to understand your own experience being parented; perhaps you are a parent, or hope to become one, and you want to reflect on your intentions; perhaps you want to understand what various scholars, activists, and activist-scholars have said about how parenting matters. This class will provide you with the time, information, and other resources necessary to explore the following question: what difference does it make when we put "feminist," "queer" and/or "trans" in front of parenting? More specifically, how do these modifiers change the forms and practice of parenting, ideally and in fact? What are the associated philosophies and structures that justify and enable these forms and practices? In this course, we will conceptualize parenting in a capacious way, as a kind of ongoing relationship that can obtain not only between an adult and a child they are "raising," but also between adults who are not conventionally considered "related." The purpose of this class is threefold: 1) to enable you to develop your own parenting philosophy, 2) to use "parenting" as a window to explore differences in feminist, queer, and trans thought, and 3) to use "parenting" as a springboard for imagining better institutional arrangements and articulating societal ideals. To realize these goals, we will mine our experiences, talk to lots of parents, and engage both scholarly and popular resources on parenting.

Requirements/Evaluation: One 6 page book review; Three contributions to resource compendium; One episode for the group podcast; One 10 page final essay

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: WGSS majors

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: We will be looking at the difference that understanding parenting differently, and/or practicing it with feminist, trans, and queer goals in mind does/might make in relation to the ends of equity and inclusion. We will also be attentive, however, to differences in ideas about what feminist, trans and queer parenting entails -- and how relations of power internal to groups make certain ideas about what feminist, queer, and/or trans parenting entails more accessible than others.

WGSS 311  (F)  Trans Film and Media  (DPE)

Cross-listings: WGSS 311 AMST 364

Primary Cross-listing

This course provides an introduction to contemporary trans culture and politics via the lens of film and other (mostly visual) media. We'll focus mainly
on media production in the U.S. since the early 1990s, as this moment is usually understood as inaugurating contemporary "transgender" politics; additionally, the 90s saw a profusion of diversity in popular representation generally. This class has two main priorities: first, to use visual media as a lens for surveying major developments in trans studies, politics, and representation over the last few decades; second, to develop a critical repertoire for thinking about our current conjuncture of "trans visibility" in particular. By tracking a longer history of both popular and alternative trans media production, this course will question the vanguardism and celebratory progress narratives associated with "trans tipping point" visibility conditions. Drawing from perspectives in WGSS, American studies, and ethnic studies, we will especially situate trans representation in relation to the institutionalization of minority difference under neoliberal capitalism. In line with scholarship, we'll approach trans representation as interlocking with structures like race, heteropatriarchy, dis/ability, immigration, and nationality and empire.

Class Format: There will also be some lecturing.

Requirements/Evaluation: Students will have ongoing short discussion post assignments, one midterm essay of 5-6 pages, and a final group media-making project with min. 6 pages of analytic writing to accompany their creative work.

Prerequisites: WGSS 101 or 202 would be helpful but are not required. Other background in WGSS or the humanities is also helpful.

Enrollment Limit: 20

Enrollment Preferences: Enrollment preference can go to WGSS majors and 3rd & 4th years. Statements of interest are welcome.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: For some proprietary media content, students will need subscriptions to popular streaming services (e.g., Netflix, Amazon, HBO Max). See WGSS chair about financial aid waivers and alternatives if this feels cost prohibitive.

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 311 (D2) AMST 364 (D2)

Difference, Power, and Equity Notes: This course provides a survey of issues facing marginalized trans communities via the lens of visual media, with an emphasis on how structures of power shaping trans experience intersect with the politics of race, capital, disability, migration, and other axes of social difference.

Fall 2023

SEM Section: 01 M 7:00 pm - 9:40 pm Abram J. Lewis

WGSS 319 (F) Gender and the Family in Chinese History (DPE)

Cross-listings: HIST 319 WGSS 319 ASIA 319

Secondary Cross-listing

Although sometimes claimed as part of a set of immutable "Asian values," the Chinese family has not remained fixed or stable over time. In this course, we will use the framework of "family" to gain insight into gender, generation, and sexuality in different historical periods. Beginning in the late imperial period (16th-18th Centuries), we will examine the religious, marital, sexual, and child-rearing practices associated with traditional ideals of family. We will also examine the wide variety of "heterodox" practices that existed alongside these ideals, debates over and critiques of gender, family, and sexuality in the twentieth century and in China today.

Requirements/Evaluation: active participation in discussions and group work, short skills-based writing assignments (2-4 pgs) and short essays (5-7 pgs) leading toward a final paper (10-15 pages).

Prerequisites: none; open to first year-students with instructors permission

Enrollment Limit: 25

Enrollment Preferences: History and WGSS majors; Asian Studies concentrators.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 319 (D2) WGSS 319 (D2) ASIA 319 (D2)

Difference, Power, and Equity Notes: This course focuses on historical regimes of gender and sexuality in China and their transformations over
time. Students will be asked to consider these regimes both on their own terms and in comparative perspective.

**WGSS 332 (S) Gender, Sexuality & Disability** (DPE)

**Cross-listings:** WGSS 332 AMST 369

**Primary Cross-listing**

From classical mythology to reality TV, bodies and minds that depart from the ordinary have long been sources of popular fascination. In recent history, people marked as "disabled" have been subject to medical scrutiny, labeled deficient or defective, and often barred from full participation in society. And yet, what counts as "disability" -- and who counts as disabled -- varies greatly depending on cultural and historical context. Arguably, disability has more to do with social conditions than with any innate characteristics of disabled people themselves. This class introduces disability studies, situating disability within its historical, political, and cultural contexts. As a GWSS course, we'll center queer and feminist perspectives; this class also emphasizes recent work. Echoing arguments in gender and sexuality studies, scholars have insisted that disability is not a natural or biological fact, but a socially constructed category. As such, scholars and activists have challenged medical models that conceptualize disability as an individual defect in need of elimination. They have also questioned the idea that disability is simply a minority identity -- to the contrary, disability is a condition that most humans will experience at some point in our lives. This class frames "disability" broadly -- encompassing not just conditions of physical impairment, but a wide range of bodily, sensory, cognitive, emotional, and behavioral differences and capacities. This class also centers how disability is produced intersectionally through regimes like race, capitalism, and empire. Topics include: theories of embodiment, eugenics, institutionalization and incarceration, neurodivergence, mad studies, the politics of health, storytelling and narrative, disability justice activism, neoliberalism, biopolitics, and crip theory. Along with scholarly writings, we'll consider activist texts, popular press, fiction, memoir, and a variety of other media.

**Requirements/Evaluation:** Students will submit three short reading response papers (2-3 pgs), ongoing brief/informal forum posts, and a longer final research paper (10-12 pgs); students will also work in small groups to facilitate a section of class twice per term.

**Prerequisites:** WGSS 101-level familiarity would be very helpful, but is not required.

**Enrollment Limit:** 15

**Enrollment Preferences:** Preference to majors, 3rd and 4th year students.

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**WGSS 342 (S) Sexuality in US Modernisms** (DPE)

**Cross-listings:** ENGL 341 WGSS 342

**Secondary Cross-listing**

This course investigates how sexual identities, desires, and acts are represented and reproduced in U.S. literary and popular culture. Focusing on 1880-1940 (when, in the U.S. the terms "homosexual" and "heterosexual" came to connote discrete sexual identities), we will explore what it means to read and theorize "queerly." Among the questions we will ask are: What counts as "sex" or "sexual identity" in a text? Are there definably queer and/or transgender writing styles or cultural practices? What does sexuality have to do with gender? How are sexual subjectivities intertwined with race,
ethnicity, class, and other identities and identifications? Why has "queerness" proven to be such a powerful and sometimes powerfully contested concept? We will also explore what impact particular literary developments—the move from realism to modernism—and historical events such as the rise of sexology, first-wave feminism and the Harlem Renaissance—have had on queer cultural production. The class will also introduce students to some of the most influential examples of queer literary and cultural theory. Readings may include works by authors such as James, Cather, Far, Hughes, Nugent, Stein, Fitzgerald, and Larsen, as well as queer literary theory and critique by scholars such as Butler, Coviello, Ferguson, Foucault, Freeman, Freud, Hartman, Lorde, Love, Muñoz, Rich, Rodriguez, Ross, and Sedgwick.

Class Format: discussion/seminar

Requirements/Evaluation: active class participation, several short writing assignments, two 5-page papers, and one 7-9-page paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 25

Enrollment Preferences: English majors and/or students interested in WGSS

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 341(D1) WGSS 342(D2)

Difference, Power, and Equity Notes: This course considers the history and literature of sexuality in the US alongside questions of race, gender, class, region and more. It examines how literary form theorizes sexuality, and how sexuality affects literary form, in ways that consider (in)equity and power in a variety of contexts.

WGSS 345 (F) The Pedagogy of Liberation (DPE)

Education is inherently political, and politics necessarily involves pedagogy. Who should teach, what is taught, how it is taught, and why it is taught are questions hotly debated at all levels and in all sites of education because the answers have implications for societal reproduction or transformation. Politicians, activists, even family members at the dinner table all seek to educate in ways that incline us toward particular political positions. At the heart of this class stands the question: if different pedagogies point us in different political directions, then what kind of pedagogy or pedagogies serve the end of liberation from oppression and why? Are there certain pedagogical "goods" that reliably serve the goal of liberation across sites? Or do different sites require different approaches? To begin to answer these questions, we will engage a variety of thinker-teachers and groups known for their commitment to a "pedagogy of liberation." While feminist thinkers will be foregrounded, we may also look to thinker-teachers who and groups that do not claim this label. In addition to engaging texts which reflect on different aspects of radical pedagogy (content, form, method, etc.) and radical pedagogy in different settings (the college classroom, the social movement headquarters, the home), we will witness radical pedagogy in practice. Moreover, we will enact various radical pedagogical strategies in our own classroom and beyond.

Requirements/Evaluation: Perusall, aspirational learning statement, syllabus co-construction and reflection, class facilitation, interview project and reflection, one-on-one discussions

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Preference will be given to WGSS majors.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This class is concerned with the relationship between pedagogy and equity - how can pedagogy be leveraged to combat oppression and encourage equity? In it, students will gain not just insight on, but practice in enacting radical democratic pedagogies that flatten power differentials and encourage effective engagement across difference.
WGSS 347 (F) Performing Masculinity in Global Popular Culture (DPE)

Cross-listings: SOC 340 LATS 341 THEA 341 WGSS 347 AMST 358

Primary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of “males” at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia, hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

Prerequisites: none; WGSS 202 would be helpful

Enrollment Limit: 15

Enrollment Preferences: a short statement of interest will be solicited; a subsection of applicants may be interviewed

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 340(D2) LATS 341(D2) THEA 341(D1) WGSS 347(D2) AMST 358(D2)

Difference, Power, and Equity Notes: This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

WGSS 361 (S) Marking Presence: Reading Disability in/to Latina/o/x Media (DPE)

Cross-listings: LATS 344 WGSS 361 AMST 361

Secondary Cross-listing

This course spans Divisions I, II, and III in its exploration of the representation of disability and Latina/o/x identity in the contemporary US context. Employing Angharad Valdivia's (2020) notion of "marking presence" to describe the intentional ways in which Latina/o/x subjects gain and hold on to mainstream media space, the class places the fields of Disability Studies, Latina/o/x Studies, Gender Studies and Media Studies into conversation. We address the following questions and others: What does media reveal to us about the place of disability and Latinidad in contemporary US life, particularly as these categories intersect with questions of gender, sexuality, national identity and citizenship? How might we read Latinidad and disability into media texts in which they are not otherwise centered? What are the advantages of deploying mainstream media presence as a claim to power for disabled Latina/o/x individuals, particularly those who are multiply marginalized? What are the limitations of such an approach? We will focus on these questions, as well as deploy various media examples (podcasts, social media, film, television and music) alongside scholarly texts to explore topics impacting the Latina/o/x communities such as the relationship between the relationship between immigration and disability, intergenerational trauma and migration, the gendered archetype of the Latina "Loca," disability in academia, the politics of self-care amongst Latinas/xs in the neoliberal context, and the very legal, cultural, and social category of "disabled" itself within dominant society as well as in Latina/o/x communities.
**Requirements/Evaluation:** Two short (5-6 page) essays; One media analysis exercise; One final reflection letter.

**Prerequisites:** None.

**Enrollment Limit:** 12

**Enrollment Preferences:** Preference given to LATS concentrators, AMST majors and WGSS majors by seniority.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

LATS 344(D2) WGSS 361(D2) AMST 361(D2)

**Difference, Power, and Equity Notes:** At its core, this course is about understanding difference and relationships of power through an intersectional lens and via the prism of everyday media. In each class we will be discussing issues directly revolving around questions of race, ethnicity, ability/disability, gender, sexuality, and nation. Students will be expected to incorporate an analysis of these issues in their written and oral work for the course.

**WGSS 371 (S) Campus and Community Health in Disruptive Times (DPE) (WS)**

**Cross-listings:** ANTH 371 WGSS 371 STS 370

**Secondary Cross-listing**

We study and seek “campuses where students feel enabled to develop their life projects, building a sense of self-efficacy and respecting others, in community spaces that work to diminish rather than augment power asymmetries.” --Sexual Citizens (Hirsch and Khan, 2020). Students will design and pursue innovative ethnographic projects that explore campus or community health. We will learn ethnographic techniques such as observant participation, interviewing, focus groups, qualitative surveys, as well as design thinking and data visualization skills. We use and critique the methods of medical anthropology and medical sociology in order to hone our skills in participatory research. Every week, we collaborate with and share our research with our participants and peers both inside and outside class through a variety of innovative exercises. We attend to the parallel roles of narrative and listening in both medicine and ethnography, as we contrast the discourse of providers & patients along with researchers & participants. We aim to understand the strengths and limits of ethnographic inquiry while privileging marginalized voices and attending to power and identity within our participatory research framework. We recognize that our campus health projects are always already shaped by power and privilege, as we examine the ways that daily life, individual practices, and collective institutions shape health on and off campus. Our ethnographic case studies explore how systemic inequalities of wealth, race, gender, sex, ethnicity, and citizenship shape landscapes of pediatric care, mental health, maternity care, and campus sexual assault in the US and elsewhere. We consider how lived practices shape health access & outcomes as well as well-being in our communities and on our campus.

**Requirements/Evaluation:** Weekly attendance, 3 written fieldnotes (3000 words), weekly writing & fieldwork exercises in class and out of class, a final presentation that includes data visualizations and analysis of research findings.

**Prerequisites:** A course in Anthropology, Sociology, STS or in DIV II is strongly recommended

**Enrollment Limit:** 19

**Enrollment Preferences:** Majors in Anthropology, Sociology, WGSS; Concentrators in PH, STS, ASIA, ENVI

**Expected Class Size:** 19

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 371(D2) WGSS 371(D2) STS 370(D2)

**Writing Skills Notes:** This class assignments includes over 9,000 words of essay assignments, and will help students develop critical writing skills, including use of rhetoric, evidence, argument, synthesizing data, logic, and anticipating counter-arguments.

**Difference, Power, and Equity Notes:** This class uses experiential learning to examine the intersectionality of race, class, gender, & sexuality in
impacting healthcare and health outcomes. It explores the ways that intersectionality and implicit bias shapes health and well-being in patient/provider encounters as well as ethnographic research. It engages with and critiques efforts to 'improve' community and individual health outcomes in the US and elsewhere across the globe.

**WGSS 391 (F) Contemporary North American Queer Literatures and Theories (DPE) (WS)**

**Cross-listings:** ENGL 391 WGSS 391

**Secondary Cross-listing**

Moving through the mid-twentieth century and into the twenty-first, this course will consider how North American writers have represented queer life in all its complexities. From the problem of the happy ending to the intersectional politics of representation, the narrative complexities of coming out to the rejection of identity, the course will consider the relationship between literary form and queer content. In so doing, it will also touch upon some of the key debates in queer literary theory and consider the impact of events such as civil rights movements, gay and lesbian and trans uprisings, the AIDS crisis, debates over respectability politics, and current efforts to police what students read in schools on literary and cultural production. Readings may include work by such authors as Baldwin, Highsmith, Rich, Lorde, Delany, Kushner, Feinberg, Bechdel, Thom, and Machado and theorists such as Ferguson, Sedgwick, Love, Butler, and Hartman.

**Requirements/Evaluation:** active class participation, several short writing assignments, two 5-page papers, and one longer research paper.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor;

**Enrollment Limit:** 19

**Enrollment Preferences:** English majors; WGSS majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 391(D1) WGSS 391(D2)

**Writing Skills Notes:** This course will require at least 20 pages of writing of various sorts, from shorter critical responses to a longer research paper. Students will receive regular and timely feedback on their writing and gain experience with revision as it relates to the process of refining an argument.

**Difference, Power, and Equity Notes:** This course considers the history and literature of gender and sexuality in the US alongside questions of race, class, and more. It examines how literary form theorizes sexuality, and how sexuality affects literary form, in ways that consider (in)equity and power in a variety of contexts.

**WGSS 392 (F) Matter & Meaning in Black Queer Art & Performing Non-Human Potentials (DPE)**

**Cross-listings:** AFR 355 WGSS 392

**Primary Cross-listing**

In "Black Birds, Black Lives & The Unfinished Work of Queer Ecologies," Nicole Seymour recounts the incident of avid bird watcher, Christian Cooper, who became a target of racial profiling in Central Park. Seymour asks "are only certain people allowed to nature and its benefits?" Furthermore Seymour centers Black Queerness with non-human arrangements, thus begetting the question--what subversive potentials lie within alignments of "animality" "un-becoming" or within these natural landscapes that are often exclusionary of Black Queer mobility? In this class we will discuss the resilience of Black queer survival under the duress of racial capitalism and explore critical frameworks within the emerging field of new materialism. In
so doing we will produce a comparative analysis implementing a study of non-human systems while simultaneously creating and viewing performances that integrate interspecies and inorganic meditative mediums. We will assess the question, how might non-human engagements radically shift ideological formations of "Man" and convey ecologies of thinking that complicate issues of "thingification?" To answer this question, we will study emerging scholarship in the field of Black Queer Studies such as neologisms like Yanique Norman's Black "fungi-ability" which puts into consideration posthumanist approaches alongside race and gender studies where the analytic of the mushroom points to a relational engagement of a Black & Queer diasporic poetics. Riley Snorton's concept on fungibility as "Trans capability" enables students to also discuss re-empowered embodiments of "flesh" as both a queer and decolonial praxis. Zakiyah Iman Jackson's articulations "on becoming human" also prove foundational as we will mutually explore Black Queer possibility amid the perceived burden of abjection.

**Requirements/Evaluation:** 25% Mini-Presentation Linking Black Queer Performances; 35% Individual Presentations: "Meditations that Matter"; 25% Daily Journal Entries: Remainder = (Participation)

**Prerequisites:** N/A

**Enrollment Limit:** 15

**Enrollment Preferences:** Preference will be given to WGSS majors who specialize in these interdisciplinary engagements and at the appropriate level to take a 300 (advanced level course).

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**WGSS 413 (F) Feminist Technoscience (DPE)**

**Cross-listings:** WGSS 413 STS 413

**Secondary Cross-listing**

Are Feminism and Science compatible commitments? What do these nouns mean when paired with one another, when capitalized (or not), when pluralized (or not), and when deployed by a range of authors in different disciplines? Scholars of feminist science and technology studies (FSTS) have addressed these questions in their studies of scientific objectivity, technological vulnerability, environmentalism, and the makings (or doings) of race as well as gender. We will explore these questions and topics with a view to identifying the range of ethical, political, and epistemological practices within feminist and critical technoscience. We will read theoretical texts in FSTS, such as Donna Haraway's "Situated Knowledges" and Safiya Umoja Noble's "A future for intersectional black feminist technology studies." We will also read case studies, such as Pat Treusch's "The Art of Failure in Robotics" and Emily Martin's "The Egg and the Sperm: How Science Has Constructed a Romance Based on Stereotypical Male-Female Roles." While our preliminary readings will be set in advance, students will help shape the syllabus as we advance toward a better understanding of feminist technoscience's potentials and limitations at a time when technical change often outpaces careful consideration of its consequences.

**Requirements/Evaluation:** discussion participation; five response papers (~2 pages); mid-semester essay (8 pages); annotated bibliography; final research project (12-15 page essay + in-class presentation)

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Science and Technology Studies concentrators

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 413(D2) STS 413(D2)
Difference, Power, and Equity Notes: Central to "Feminist Technoscience" is a recognition of and engagement with the historical under-privileging of women, women's work, and women's bodies in capital-S "Science" and in a wide range of other technoscientific practices. We will examine and elucidate several branches of feminist theory. We will also examine feminist accounts of contemporary technoscientific work as well as critical STS with a focus on race.

WGSS 414 (S) Race and Performance (DPE) (WS)

Cross-listings: AAS 414 WGSS 414 AMST 414

Secondary Cross-listing

How does one "do" or perform race and gender? This seminar offers a survey of foundational and emergent scholarship at the nexus of performance studies, critical ethnic studies, and gender and sexuality studies tandem with contemporary visual and performance art works. In doing so, it will explore how the framework of performance destabilizes notions of race and gender as identities that we are and approaches them as ones we enact, do, and undo. We will begin the course by tracing key concepts in performance studies before examining the relational ways racialized and gendered subjects strategically mobilize performance to respond to, negotiate, and navigate life under the conditions of anti-blackness, settler colonialism, racial capitalism, and empire. To this end, we will explore how seemingly racialized and gendered qualities, such as passivity, silence, depression, withholding, sexual submissiveness, contagion, and ignorance, are retooled as feminist and queer of color actions.

Requirements/Evaluation: in-class discussion, weekly posts, class presentation, two short written assignments, and final project (with creative option)

Prerequisites: AMST 101 or WGSS 101/202 and upper level courses in AMST, WGSS, AFR, or related fields

Enrollment Limit: 12

Enrollment Preferences: AMST seniors and juniors; WGSS seniors and juniors; AAS concentrators

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AAS 414(D2) WGSS 414(D2) AMST 414(D2)

Writing Skills Notes: Students will submit two written assignments - an object analysis paper and annotated bibliography - and give and receive peer feedback. They will use these building blocks and feedback on them to complete their final project.

Difference, Power, and Equity Notes: This course centrally examines the intersections of race, gender, sexuality, class, and ability. It explores specific strategies used to critique and navigate conditions under overlapping systems of power, including racial capitalism, settler colonialism, anti-blackness, and empire.

WGSS 415 (S) Breaking the Silence: Women Voices, Empowerment and Equality in the Francophone World (DPE)

Cross-listings: COMP 415 WGSS 415 RLFR 415

Secondary Cross-listing

How have Francophone women challenged the historical and current effects of colonialism and gendered racism in France and the Francophone world? How have Francophone women writers challenged the status quo of patriarchy and advocated for change? Beginning with political activist Olympe de Gouges, who published Le droit de la femme et de la citoyenne (1791) challenging gender inequality in France, we will then examine Claire de Duras' portrayal of the intersection between race and gender, Simone de Beauvoir's challenge to traditional femininity and gender roles, and
Ananda Devi's intimate portrayal of violence against women in post-colonial societies. Throughout the course, we will use a feminist and intersectional lens to analyze how Francophone women writers have broken the silence then and now.

**Requirements/Evaluation:** Three 3-4-page response papers, a final 10-page research paper, presentation and active participation.

**Prerequisites:** Any 200-level RLFR course, or by permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** Senior French majors and students completing the certificate in French, but open to advanced students of French; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COMP 415(D1) WGSS 415(D2) RLFR 415(D1)

**Difference, Power, and Equity Notes:** In its focus on Race, Gender, and Political Power, this course centers on a critical examination of difference, power, and equity. This course uses a feminist and intersectional lens to analyze how French and Francophone women writers have challenged the historical and current effects of colonialism and gendered racism.

DEPARTMENT of ASIAN LANGUAGES, LITERATURES, & CULTURES
CHINESE, JAPANESE, EAST ASIAN LANGUAGES & CULTURES

(Div I & II, see explanation below)

Chair: Professor Li Yu

Cecilia Chang, Frederick Latimer Wells Professor of Chinese; Masashi Harada, Assistant Professor of Japanese; Man He, Associate Professor of Chinese; Shinko Kagaya, Professor of Japanese; Cornelius C. Kubler, Stanfield Professor of Asian Studies; Christopher M. B. Nugent, Professor of Chinese; Kasumi Yamamoto, Frank M. Gagliardi Professor of Japanese; Li Yu, Professor of Chinese

Visitors: Xiaoming Hou, Visiting Assistant Professor of Chinese; Ju-Yin Wang, Visiting Lecturer in Chinese; Language Fellows: Jiayuan Li, Ai-Chen Wang; Teaching Associate: Yuk Man Ng

Department Mission Statement and Curricular Goal

The mission of the Department of Asian Languages, Literatures, and Cultures is to produce “global citizens” who will be able to make contributions in different sectors of society in a globalized and diverse world with multilingual abilities, intercultural communicative competence, and multicultural leadership skills. Graduates of our department will not only achieve proficiency in at least one Asian language but also become competent in intercultural communication. They will develop interpretive and analytical skills using both primary texts and secondary sources and become familiar with the textual and cultural traditions in Asia.

The department offers three distinct major tracks: Chinese, Japanese, and East Asian Languages & Cultures. Each major requires a minimum of ten courses. Up to four study-away credits can be counted toward a major.

Learning Objectives for the Chinese Major

Students who complete the requirements for a major in Chinese will be able to:

- Attain the Advanced level in speaking, listening and reading, and Intermediate High level in writing based on the ACTFL proficiency guidelines.
- Read and analyze basic texts written in Classical Chinese.
- Gain intercultural communicative skills to competently navigate a wide range of social and cultural contexts in Chinese-speaking environments.
- Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.
- Engage critically with important aspects of the historical and cultural developments and trends in China’s diverse and complex past and present.
- Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.

THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Mandarin Chinese language courses (CHIN 101, 102, 201, 202, 301, 302, 401, 402) and at least one course in Classical Chinese (CHIN 312). To gain a deeper understanding of Chinese cultural traditions, students should take at least one Chinese core elective in Chinese literary, linguistic, or cultural studies (taught either in English or in Chinese) with prefixes and primary cross-listings in CHIN.

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the Japanese Major

Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL Intermediate High to Advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
• Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.

THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Japanese language courses (JAPN 101, 102, 201, 202, 301, 302, 401, 402), at least one Japanese core elective in Japanese literary, linguistic, or cultural studies (taught either in English or in Japanese) with prefixes and primary cross-listings in JAPN, and one approved elective related to Japanese language and culture (including additional JAPN core electives, additional Asian language courses, or Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the East Asian Languages and Cultures Major

Students who complete the requirements for a major in East Asian Languages and Cultures will be able to:

• Attain a minimum of Intermediate High level in speaking, listening and reading of either Chinese or Japanese, and Intermediate Low level in writing in the language based on the ACTFL proficiency guidelines.

• Acquire research, problem-solving, and critical thinking skills by engaging in linguistic or literary analysis in the field of Chinese studies or Japanese studies.

• Obtain basic intercultural communicative skills to navigate some social and cultural contexts in Chinese- or Japanese-speaking environments.

• Continue their engagement with an Asian language and culture as lifelong learners and users of the target language.

• Students who choose the dual-language option will attain the Advanced level in speaking, listening, and reading in either Chinese or Japanese, and the intermediate level in a second Asian language based on the ACTFL proficiency guidelines.

THE MAJOR

East Asian Languages and Cultures (EALC) major: In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least six language courses (or attain a minimum proficiency equivalent to the completion of 302) in one East Asian language offered by the department (currently Chinese Mandarin and Japanese). To gain a deeper understanding of the Chinese or Japanese cultural traditions and to develop research skills in the Chinese or Japanese fields, they should take at least two Chinese/Japanese core electives in literary, linguistic, or cultural studies in their primary focus of study with prefixes and primary cross-listings in CHIN/JAPN, and two approved electives related to Chinese/Japanese language and culture (including additional CHIN/JAPN core electives, additional Asian language courses, or Chinese/Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

This major offers students who are able to complete the 402 level in either Chinese or Japanese by the end of their sophomore year a dual-language option which will allow them to learn a second Asian language and reach the Intermediate level in speaking that language by the time of graduation. Please consult with the chair or language coordinator for more information about this option.

LANGUAGE PLACEMENT

Students who have studied or otherwise developed some familiarity with Chinese or Japanese language before coming to Williams and who wish to continue their language study at the college should complete a placement evaluation before pre-registering for a language course. More information about the Chinese placement evaluation can be found at https://chinese.williams.edu/faq/. Students who wish to take the Japanese placement test should contact the Japanese faculty.

THE DEGREE WITH HONORS

The department offers students the option of pursuing a degree with Honors in Chinese, Japanese, or East Asian Languages and Cultures through writing an honors thesis. Honors theses allow students a unique opportunity to undertake an examination of topics and texts with a greater depth than regular courses allow. The great majority of students who undertake the challenge of writing an honors thesis find it to be one of their most rewarding academic experiences at Williams.

Students interested in pursuing a degree with Honors should begin thinking about their thesis topic and materials as early as possible. This is particularly true for students who need to gather materials or conduct research abroad, as this will typically take place during their junior year or the summer between their junior and senior years. It is the responsibility of the student to approach faculty members to inquire about their willingness to serve as a thesis advisor. Ideally, students should have previously taken a course with that faculty member in an area related to the subject matter of the thesis. Faculty members will usually only advise a single thesis per year, and never more than two, with students who first approach the faculty.
member about serving as advisor being given priority. It is recommended that students approach the faculty members with whom they are interested in working for their thesis by the end of the fall semester of their junior year.

Students must submit a proposal to the department chair and their intended advisor before they pre-register for senior year courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. If the department approves the thesis proposal, the student should enroll in CHIN 493-W31-494, or JAPN 493-W31-494, depending on their major track. Please note that admission to the honors thesis program will normally be limited to students with a consistent record of honors-level work, as indicated by at least a B+ average in their courses for the major.

Students will typically meet with their advisor once a week at a set time other than office hours. The advisor will present the student with a set of deadlines for different stages in the thesis, ranging from a bibliography to the final draft. While these deadlines will vary for different advisors and theses, two deadlines will apply to all theses, whether analytic or translation. 1) Students must submit a finished first chapter or substantial section of polished translation by the last day of the first semester reading period. If the student misses this deadline, he or she will not be allowed to continue the thesis. 2) The finished thesis is due to the advisor by 4:00 pm on the Monday two weeks after the last day of Spring Recess. The student should submit three copies of the thesis at this time. There will be no extensions.

The department will assign two readers, separate from the advisor, to each thesis. The readers will give a written assessment of the thesis that will be an important factor in the final determination of the student’s grades for the thesis and what honors designation, if any, will be given. These written comments will be shared with the student. Within two weeks after submission, the department will schedule an oral defense. This will be a one to one-and-a-half hour session in which the student will give a public presentation of his or her thesis to members of the department and invited guests followed by a question and answer period. A final, corrected copy of the thesis must be submitted to the Technical Services Department of Sawyer Library by 4:00 P.M. on the last day of the final examination period.

In order to qualify for Honors, the department must agree that the student has earned two semester grades of B+ or higher, based on his or her thesis and oral defense. Students whose thesis and defense are deemed by the department to be of exceptional merit will be awarded Highest Honors. A letter from the department chair will inform students of these decisions.

STUDY ABROAD

Students intending to major in the department are strongly encouraged to study in Asia at some point during their time at Williams—for a summer or for a semester or full year. Study-abroad in an immersive environment in the target culture is an indispensable step toward advanced proficiency in a second language. Prospective majors or language students who are planning to study abroad must attend the fall semester study-abroad information sessions organized by the department or discuss their plans with department faculty as far in advance as possible. The department administers the Linen Fellowships for Summer Study in Asia which fund selected students’ summer intensive language study or research projects. Up to four study-abroad courses may be transferred and counted toward graduation and toward the majors offered in the department. Students MUST contact the department faculty BEFORE assuming study-away credit will be granted toward the major in the department. Upon return, students should ask their study-away program to send their transcript to the Registrar’s office so that the appropriate number of credits can be transferred and granted by the department chair.

DEPARTMENT EMAIL LISTS

To be informed about the events, activities and funding opportunities in the department, please use your Williams login to sign up for one or more of the following GLOW special interest email lists.

“DALLC Majors and Faculty” (open to all current and prospective Chinese, Japanese, or East Asian Languages and Cultures majors):
https://glow.williams.edu/enroll/AWTMXP

“Asia-Related Funding Opportunities” (open to all students who would like to seek internal or external funding related to Asia):
https://glow.williams.edu/enroll/PGJHAC

“Special Interest Chinese” (open to all students interested in Chinese language and culture): https://glow.williams.edu/enroll/XEYMPG

“Special Interest Japanese” (open to all students interested in Japanese language and culture): https://glow.williams.edu/enroll/DAYTN3
ECONOMICS (Div II)
Chair: Professor Jon M. Bakija

- Burak Uras, Associate Professor of Economics
- Tara E. Watson, Professor of Economics; on leave 2023-2024
- David J. Zimmerman, Professor of Economics and Orrin Sage Professor of Political Economy
GENERAL INFORMATION

The primary objective of the economics major is to develop an understanding of how individuals, organizations and societies meet their material needs. The introductory courses present the fundamental principles of economics at a level that is useful for understanding a wide range of social and policy issues. The core theory courses provide a more rigorous grounding in the tools used in analyzing individual choice, the functioning of markets, and the behavior of output, employment, and inflation. The econometrics course familiarizes students with the methods used to analyze economic data, and equips them with the tools necessary to critique and conduct empirical research. The electives draw on the skills developed in the introductory and core courses to gain a richer understanding of specific aspects of economic behavior and public policy.

Planning for a possible economics major. Given the hierarchical structure of the economics major, students considering an economics major should try to start with ECON 110 during their first year. Since ECON 255 requires a prior statistics course (STAT 161, 201 or 202), prospective economics majors should complete the statistics requirement relatively early in their college careers. Since the 400-level electives typically require at least two of the intermediate core courses (ECON 251, 252, or 255), students are strongly encouraged to complete the core courses by the end of junior year. We prefer that the three intermediate core classes be taken at Williams, so students planning on studying abroad as juniors should aim to complete these courses before departure if possible.

Preparation for graduate school. Graduate study in economics requires considerably more mathematical training than that necessary for the economics major. We advise students who are considering pursuing a Ph.D. to take at a minimum MATH 150 or 151, MATH 250, MATH 350, MATH/STAT 341, and MATH 309. We also advise students to consider electives such as ECON 451, 471, 472, 474, or 475 that present advanced perspectives on contemporary economic theory or econometrics. As graduate schools look for evidence of research aptitude, we also encourage those interested in graduate school to pursue the Honors program.

The economics major and business careers. The analytical and critical thinking skills taught in economics classes are useful for many careers, including business. The major is not designed to provide pre-professional training in business or management, however. Students from a wide variety of majors, including the sciences and humanities, have gone on to successful business careers. We therefore advise those interested in business to acquire a broad exposure to the arts, social science, and natural sciences, and to major in a subject that engages their interest even if that subject is something other than economics.

MAJOR REQUIREMENTS

Nine courses are required for the economics major. These are:

Introductory Courses

Economics 110 Principles of Microeconomics
Economics 120 Principles of Macroeconomics. Prerequisite: ECON 110

Passing the quantitative studies exam or the equivalent is a prerequisite for both classes. Both are suitable for non-majors. Courses numbered 200-299 will require one or both as prerequisites.

Core Courses

Economics 251 Price and Allocation Theory. Prerequisites: differential calculus (MATH 130 or equivalent) and ECON 110
Economics 252 Macroeconomics. Prerequisites: differential calculus (MATH 130 or equivalent), ECON 110 and ECON 120
Economics 255 Econometrics. Prerequisites: differential calculus (MATH 130 or equivalent) plus STAT 161, 201 or 202 or a score of 5 on the AP Statistics exam. STAT 101 will also serve as a prerequisite, but only if taken prior to the fall of 2018. STAT 346 can be used to satisfy the ECON 255 major requirement, although not all upper-level electives and seminars accept STAT 346 as a prerequisite in lieu of ECON 255. Students with a double major in Statistics and Economics who choose to use STAT 346 to satisfy the ECON 255 requirement must take an additional ECON elective at any level. POEC 253 may not substitute for ECON 255 in fulfilling the major requirements, although some electives may accept POEC 253 as a prerequisite in lieu of ECON 255.

The three core classes may be taken in any order. All of the 300- and 400-level electives will require at least one of the core classes, and many of the 400-level seminars require ECON 255.

Elective Courses

Students must complete at least four economics electives at the 200-level or higher in addition to the introductory and core classes listed above. At least two must be advanced electives numbered 300 to 398. At least one must be a seminar numbered 400-490. A second seminar may be taken in lieu of a 300-level elective. Enrollment preference for 400-level classes is given to seniors who have not already taken a seminar. Note that some of the advanced electives may have specific requirements beyond the core economics courses and MATH 130. With the permission of the instructor, undergraduates may enroll in 500-level graduate courses given by the Center for Development Economics. These courses can substitute for
advanced electives numbered 300-398, unless otherwise noted in the course description.

**AP, IB and A-level Exams**

The ECON 110 requirement may be waived for students who earned a 5 on the microeconomics AP exam, and the ECON 120 requirement may be waived for those who received a 5 on the macroeconomics AP exam. Both the ECON 110 and 120 requirements may be waived for students who received an A on the A-level exam in economics or earned a 6 or 7 in the higher economics IB exam. A requirement may be waived for students who earned below a 5 on the microeconomics or macroeconomics AP exams or below a 6 on the higher economics IB exam after consultation with the department. In all cases, results from the department placement exam are taken into account in making the determination of whether a requirement will be waived.

Students who started at Williams prior to Fall 2020 will receive major credit for each course requirement that is waived and may complete the major with either eight or seven additional courses, depending on whether they place out of one or both introductory courses. These would include the introductory course for which no advanced placement was granted (if applicable), the three core classes, and four electives.

Students who started at Williams in Fall 2020 and following receive advanced placement, but no reduction in the number of courses required for the major. Completion of a major in Economics requires nine semester courses. These would include the introductory course for which no advanced placement was granted (if applicable) and one additional elective at the 200-level or higher, or two additional electives at the 200-level or higher if both ECON 110 and 120 requirements are waived, the three core theory classes, and the four electives.

A score of 5 on the statistics AP exam, a 6 or a 7 on the statistics IB exam, or an A on the A-level statistics exam will satisfy the statistics prerequisites for ECON 255.

**STUDY ABROAD AND TRANSFER CREDIT**

Students may receive credit towards the major for college courses taken at other institutions, including those taken as part of a study abroad program. Most economics courses taken elsewhere that have an introductory economics prerequisite will qualify for 200-level elective credit. Some may be able to count towards a specific departmental requirement, including the introductory or core courses, or qualify as a 300-level elective. In order to receive major credit, courses must count towards the student's Williams degree. Students wanting major credit for courses taken outside of Williams should contact the Department’s Coordinator for Transfer/Study Abroad Credit prior to taking the course for approval. (The Department’s web site will indicate which faculty member is serving as the Coordinator.) General study away guidelines for Economics are posted at econ.williams.edu/major/study-abroad.

**THE DEGREE WITH HONORS IN ECONOMICS**

Graduating with honors requires the completion of a substantial piece of independent research. Those with an economics GPA of at least 3.5 are encouraged to apply. In addition, because theses typically make use of empirical methods, those considering writing a thesis are strongly advised to complete Econ 255 before the end of junior year.

The honors program involves working closely with a faculty adviser on a subject related to the faculty member’s area of expertise. The first step in pursuing honors is therefore to develop a thesis proposal in consultation with a faculty adviser. The proposal is then submitted to the Department for approval.

The Department offers both a half-year and a full-year honors program:

- **The half-year program entails enrolling in a one-semester seminar plus a WSP class. Students may either enroll in ECON 491 in the fall semester and ECON 30 during winter study, or they may take ECON 30 during winter study and ECON 492 in the spring. Proposals for a fall semester thesis are due in May of the junior year, while those doing a spring thesis will submit their proposals in December of the senior year. Those choosing the half-year option often base their projects on research that had been initiated in an advanced elective or a seminar, although this is not a requirement.**

- **The full-year program involves taking ECON 493 in the fall, ECON 31 during winter study, and ECON 494 in the spring. Proposals are due in May of the junior year.**

Both programs require students to remain on campus during winter study.

Prospective honors students considering studying abroad during their junior year should plan to complete the core courses and at least one 300-level elective by the end of their sophomore year. They are also urged to begin their collaboration with their intended adviser prior to departure, and to consult with the Director of Research on the options for pursuing honors. (The Department’s web site will indicate which faculty member is serving as the Director of Research.)

Further details on the two routes, the application procedure and deadlines are contained in memos sent to economics majors in the spring and fall semesters. The information is also available on the Department’s web site.

In addition to completing the research project, the College requires that in order to graduate with honors, students must take at least one course in addition to the minimum number required for the major. Students in the full-year program may substitute ECON 493 for an upper-level elective (excluding those numbered 400-490). Students enrolled in the half-year program may not substitute ECON 491 or 492 for one of their electives.
Graduate courses given by the Center for Development Economics are open to undergraduates who have taken the prerequisites, although in most cases, permission of instructor is also required. Unless otherwise specified in the course description, these courses can substitute for electives numbered 300-398 in the major.

ECON 105  (F)  Gender in the Global Economy  (DPE)

Cross-listings:  WGSS 211 ECON 105

Secondary Cross-listing

This course will present a feminist economic analysis of the global economy, and some of the urgent issues facing women in the Global South. The course will start by developing theoretical resources: these will include feminist critiques of economic theory, work on care labor and the shifting boundaries between markets, governments, households and the environment, and discussions of intersectionality and difference. Then we will discuss a series of interlinked issues which may include the contradictory effects of structural adjustment and its successors; the informal sector and global value chains; the economics of sex work and global sex trafficking; climate change; and migration. We will finish by looking at community-based activism, non-governmental organizations, and the possibilities for North/South alliances.

Class Format: lecture/discussion

Requirements/Evaluation:  reaction papers, research paper; participation in class discussion will count for part of the grade

Prerequisites: none

Enrollment Limit: 20

Expected Class Size: 12

Grading:  no pass/fail option, yes fifth course option

Unit Notes: This course cannot count toward the ECON major.

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 211(D2) ECON 105(D2)

Difference, Power, and Equity Notes: This course meets the DPE requirement because it asks students to reflect critically on issues of gender and economic power around the world in a comparative contextual framework.

Attributes:  GBST Economic Development Studies Electives  WGSS Racial Sexual + Cultural Diversity Courses

Not offered current academic year

ECON 107  (F)  Inequality in a Classless Society: The Soviet Experiment and its Aftermath  (DPE)

Cross-listings:  ECON 107 SOC 217

Primary Cross-listing

All societies have to come up with some way of distributing wealth and income. In turn, individuals and groups comprising these societies grapple with, justify, and at times contest their place in social and economic hierarchy. Complex as they are, such processes are all the more pressing in societies built on the explicit promise of economic equality, as was the case in the USSR and socialist Eastern Europe. Using the combined perspectives offered by economics, history, and sociology, this course will trace the practices and lived realities of social differentiation and income/wealth distribution brought about by the socialist experiment and intensifying after its demise. We will explore the life of class in these supposedly classless societies, and its reconfiguration after 1991, approaching class as, simultaneously, a matter of social classification, consumption differences, cultural identity, economic policy, and political power. We will study how the economic and political developments of late-socialism and the transition period generated class-based differences in all walks of life, and ask what these experiments have to teach us about inequalities and persistent social and economic divisions closer to home.

Requirements/Evaluation:  Class participation; small writing assignments and research exercises; and a final research project

Prerequisites: None
**Enrollment Limit:** 19

**Enrollment Preferences:** 1st and 2nd-year students thinking about majoring in Anthropology, Sociology, or Economics

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** This course cannot count toward the ECON major. It may be taken for the SOC major.

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 107(D2) SOC 217(D2)

**Difference, Power, and Equity Notes:** The subject matter of this course is all about the origins, evolution, current structures, and implications of economic and social differentiation in a region quite apart from the United States. Moreover, by crossing disciplinary lines, we hope it will offer a particularly valuable perspective on such issues. Thus, we felt that it should naturally serve as a DPE course.

Not offered current academic year

---

**ECON 110 (F)(S) Principles of Microeconomics (QFR)**

This course is an introduction to the study of the forces of supply and demand that determine prices and the allocation of resources in markets for goods and services, markets for labor, and markets for natural resources. The focus is on how and why markets work, why they may fail to work, and the policy implications of both their successes and failures. The course focuses on developing the basic tools of microeconomic analysis and then applying those tools to topics of popular or policy interest such as minimum wage legislation, pollution control, competition policy, international trade policy, discrimination, tax policy, and the role of government in a market economy.

**Requirements/Evaluation:** problem sets, quizzes, short essays, two midterms, final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** This course is required of Economics and Political Economy majors and highly recommended for those non-majors interested in Environmental Studies and Women's, Gender and Sexuality Studies.

**Expected Class Size:** 40

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** The department recommends students follow this course with ECON 120 or with a lower-level elective that has ECON 110 as its prerequisite; students may alternatively proceed directly to ECON 251 after taking this introductory course.

**Distributions:** (D2) (QFR)

**Quantative/Formal Reasoning Notes:** Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

**Attributes:** POEC Required Courses

**ECON 120 (F)(S) Principles of Macroeconomics (QFR)**

This course provides an introduction to the study of the aggregate national economy. It develops the basic theories of macroeconomics and applies
them to topics of current interest. Issues to be explored include: the causes of inflation, unemployment, recessions, and depressions; the role of
government fiscal and monetary policy in stabilizing the economy; the determinants of long-run economic growth; the long- and short-run effects of
taxes, budget deficits, and other government policies on the national economy; the role of financial frictions in amplifying recessions; and the workings
of exchange rates and international finance.

Requirements/Evaluation: Depending on instructor, may include: problem sets, short essays, quizzes, reading assignments, either one or two
midterms, and a final exam.

Prerequisites:  ECON 110

Enrollment Limit:  40

Enrollment Preferences:  First-year students and sophomores.

Expected Class Size:  40

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)  (QFR)

Quantative/Formal Reasoning Notes: Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and
describing those results in words.

ECON 133  (S)  Plantation and the Plot: the Poetics of Caribbean Economic Thought and Struggle

Cross-listings:  AFR 133 COMP 133 ECON 133 GBST 133

Secondary Cross-listing
This introductory course to Caribbean Economic Thought contextualizes the poetics of economic ideas, struggle and knowledge alongside popular
literary works connected to contemporary challenges of Caribbean Economic Development. Using the 'plantation' and the 'plot' as sites of continuing
exploitation and struggle, this course delves into Caribbean postcolonial development thinking. We will explore the present-day relevance of these
sites to racial justice and environmental crises and their historical roots in colonial surplus extraction. By examining literary and economic writings of
Caribbeanists and Caribbean connected contributors side by side, we seek to uncover these links to how the Caribbean economy, its seascape and
society are framed, conceptualized and traversed as transplanted spaces, economic zones, and extractive geographies today. Unorthodox
perspectives on economic and social thought that emerged to explain the region's integral role in merchant and industrial capitalism, New World social
formations and contemporary globalization will also be discussed. We will closely analyze critical texts of contributors to the New World Group that
centers the Caribbean within global economic transformations. Some events this course covers are indigenous genocide, labor regimes, agrarian change, structural adjustment, economic and ecological crises, postcolonial debt, technology, current fragmentation of global neoliberalism. These
events will help shape an appreciation for the material and socio-cultural understandings of economic phenomena starting from the plantation to the
plot within cultural and literary works in pluralistic, productive, and powerful ways.

Requirements/Evaluation:  Oral or poster presentation analyzing a literary and Caribbean economist's work side-by-side (15 minutes or full-length/
multi-page poster); critical analysis of a Caribbean economic sector or major regional report--choice made after discussion with instructor (10 pages);
final project: review of a specific Caribbean community defined by group, geography or economic status drawing upon class, race, gendered axes of
analysis (15 pages); participation (creative presentation of a reading drawing upon Caribbean cultural traditions that raise questions for class
discussion)

Prerequisites:  None
Enrollment Limit: 10
Enrollment Preferences: Preference also for 1st and 2nd year students. If over-enrolled preference to AFR and Political Economy students.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

ECON 203 (S) Gender and Economics
Cross-listings: ECON 203 WGSS 205

Primary Cross-listing
This course uses economic analysis to explore how gender differences can lead to differences in economic outcomes, in both households and the labor market. Questions to be covered include: How does the family function as an economic unit? How do individuals allocate time between the labor market and the household? How have changes in family structure affected women's employment, and vice-versa? What are possible explanations for gender differences in labor force participation, occupational choice, and earnings? What is the role of government in addressing gender issues in the home and the workplace? How successful are government policies that primarily affect women (e.g., AFDC/TANF, parental leave, subsidization of child care)? The course will focus on the current experience of women in the United States, but will place these gender differences in a historical and cross-cultural context.
Requirements/Evaluation: weekly discussion papers, two midterms, and a final paper and presentation
Prerequisites: ECON 110
Enrollment Limit: 25
Enrollment Preferences: If overenrolled, students will be asked to submit short statement of interest.
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: POEC Depth
Not offered current academic year

ECON 204 (S) Global Poverty and Economic Development (DPE)
Cross-listings: ENVI 234 ECON 507 ECON 204

Primary Cross-listing
Why are some nations rich while other nations are poor, and what can be done to end global poverty and promote shared prosperity? This course explores the historical determinants of global poverty and inequality, and analyzes the range of policy options available to promote economic development and equalize opportunities. Drawing on research in development economics, development studies, political science, and anthropology, we seek to understand the factors that shaped the global economy and contributed to the cross-country income disparities observed today. In addition, we'll use the tools of modern empirical microeconomics to assess the possibilities for eliminating global poverty and underdevelopment in the future. Undergraduate students will receive 200-level credit and should not register at the 500-level.
Class Format: discussion
Requirements/Evaluation: short written assignments and empirical exercises; two individual take-home exams; final group project
Prerequisites: one economics course or permission of instructor
Enrollment Limit: 25
Enrollment Preferences: first-year and sophomore students
Expected Class Size: 25
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 234(D2) ECON 507(D2) ECON 204(D2)

Difference, Power, and Equity Notes: This course provides a setting for students to learn about the causes and consequences of poverty in developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. Through exercises and a group project, the course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

Attributes: ENVI Environmental Policy GBST African Studies Electives GBST Economic Development Studies Electives POEC Depth

Not offered current academic year

ECON 205 (F) Public Economics

This course examines the role of the government in the economy. We consider three broad issues: When should governments intervene in the economy? What is the most effective form of intervention? What effects do government policies have on incentives and behavior? In addition to a theoretical perspective, we will discuss particular government spending programs in the United States, including Social Security, various types of publicly-provided insurance, spending on education, and public assistance for the poor. Finally, we will study how the government raises revenue through taxation. We will discuss the principles that guide tax design and consider the effects of the tax code on behavior.

Class Format: Lecture / discussion format.
Requirements/Evaluation: problem sets, short writing assignments, participation in discussion and activities, midterm exam, and final exam
Prerequisites: ECON 110
Enrollment Limit: 25

ECON 213 (S) Introduction to Environmental and Natural Resource Economics (QFR)

Cross-listings: ENVI 213 ECON 213

Primary Cross-listing

We'll use economics to examine why we harm the environment and overuse natural resources, and what we can do about it. We'll study cost benefit analysis, pollution in general, climate change, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We'll talk about how economists put a dollar value on nature and ecosystem services (as well as human health and life!), and the concerns involved in doing so. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth. Consideration of justice and equity will be woven throughout the whole semester.

Requirements/Evaluation: problem sets, short essays, final paper; intermediate assignments may include a poster, one or more short presentation(s), other brief writing assignment(s)
Prerequisites: ECON 110 or equivalent
Enrollment Limit: 30
Enrollment Preferences: first-year and sophomore students
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Table of Contents
Unit Notes: this course will count toward both the Environmental Studies major and concentration
Distributions:  (D2)  (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 213(D2) ECON 213(D2)

ECON 214 (F) The Economics and Ethics of CO2 Offsets  (WS)
Cross-listings: ENVI 212 ECON 214

Primary Cross-listing
Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Class Format: Each student will be the tutorial partner of one other student, and each pair of tutorial partners will meet with the instructor for 75 minutes each week.
Requirements/Evaluation: a 5- to 7-page paper every other week; a 3-page written critique every other week; one re-write paper
Prerequisites: ECON 110 or the equivalent, permission of instructor
Enrollment Limit: 10
Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions:  (D2)  (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 212(D2) ECON 214(D2)
Writing Skills Notes: Each student will write five 5-7 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write five 3-page critiques of their partner's papers. As the final assignment, each student will revise one of their five papers.

ECON 216 (S) Global Crises and Socio-Economic Policies
Socio-economic policies (health, education, welfare, jobs) that respond to global crises have evolved over the past four decades. For most of the last century, macroeconomic priorities in developing countries constrained the potential of these policies during crisis periods when governments faced pressure to cut public spending, with adverse consequences for the most vulnerable. However, over the past two decades, developing country governments have increasingly integrated health, education, welfare and employment policies to counter shocks and build economic resilience. These more comprehensive responses proved vital during the COVID-19 crisis's cascading series of epidemiological, economic, social, and political shocks, as public health measures created severe livelihoods disasters for the most vulnerable. In this respect, COVID-19 serves as a harbinger of the future shocks that climate change threatens. This tutorial will focus on how developing country governments can build bridges across vital policy sectors--particularly health, education, welfare and employment--and link these to other economic interventions in order to better tackle future global crises. Building on a historical analysis, the course will examine the path-breaking examples of many developing countries' bold responses to the COVID-19 pandemic, the resulting fiscal challenges, and the lessons these offer for future crises including those resulting from climate change. The course will conclude with a forward-looking exercise, examining the role of integrated health, education, welfare and employment policies in better enabling developmental responses to both climate change adaptation and mitigation strategies. This will include an exploration of the emerging work across the global South on a Just Transition to green and sustainable development, which aims to optimally integrate climate, development and equity strategies.
Requirements/Evaluation: Students will write five papers during the term and will prepare and deliver formal comments on five papers written by your tutorial partner.
Prerequisites: Econ 110 or equivalent
Enrollment Limit: 10
Enrollment Preferences: First-year students and sophomores intending to major in economics.

ECON 217 (F) The Economics of National Defense
Cross-listings: ECON 217 LEAD 214
Primary Cross-listing
National defense is one of the largest components of the US Federal Budget (~15%) and remains a significant part of the nation's GDP (~3%). The study of defense economics in this course will apply principles of microeconomics and macroeconomics to analyze, within the context of national security strategy and policy, issues concerning resource allocation in wartime and peacetime, labor supply and demand, industrial organization and defense acquisition, and the formation and maintenance of alliances. While the focus of the course will be on economics, to provide context on what
makes defense economics a special topic, we will also consider questions unique to the military such as how to deter conflict, how to fight wars, how to provide humanitarian assistance and protection to civilians in conflict or disaster areas, and how the national defense may adapt to issues like climate change. We will also consider historical examples from America's wars—e.g., the Civil War, World War 2, Vietnam, and the more recent conflicts in Iraq and Afghanistan. The plan is to use a variety of sources—academic materials, popular media such as news footage and films, and guest speakers—to provide a full-range of perspective on the course topics.

Class Format: Mix of lecture and discussion

Requirements/Evaluation: Individual Papers, Group Paper and Presentation, Midterm and Final Exam

Prerequisites: ECON 110 and ECON 120

Enrollment Limit: 25

Enrollment Preferences: Juniors and seniors

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

ECON 218  (F)  Capital and Coercion  (DPE)

Cross-listings: ECON 218 GBST 218

Primary Cross-listing

Capital, tradable ownership shares in long-lived corporations, invented in the 17th century, has connected people of different races, religions, and geographies. There are huge profits from such economic interactions, but also risks: of being cheated, deceived, or coerced. This course uses insights from the economics of incentives (principal-agent models, contracts, mechanism design) to investigate the interplay between capital, coercion, and resistance. The role of prejudice will be central, as will the rise of middlemen as enforcers of coercion. Case studies span the 17th century to the 20th and include: the spice trade and conflict in the Indian Ocean, capital markets and fraud in Amsterdam and London, the Atlantic trade in enslaved people, the Dutch "cultivation system" in Java, the slow end of slavery in Brazil, and colonial control and independence in Kenya. Required readings for this class will include primary historical sources, and even excerpts from autobiographical novels!

Requirements/Evaluation: Students will be evaluated based on weekly reading responses, class participation, a midterm and a final.

Prerequisites: Econ 110

Enrollment Limit: 15

Enrollment Preferences: If overenrolled, students will be asked to submit a short statement of interest.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 220  (F)  We Hold These Truths: Growth, Change, and Struggle in American Economic History

This course examines the growth and development of the American economy from the colonial era to today. The emphasis will be on the use of economic theory and quantitative evidence to explore key questions and themes in U.S. history. While we will study the key drivers of longer-term
American economic success, we will also concentrate on the experiences of those marginalized, coerced, or otherwise oppressed over this history. Topics may include some or all of the following: the development of colonial markets, the economics of the U.S. Constitution, Native Americans in the American economy, slavery and racial inequality, immigration, innovation, industrialization, government regulation and policymaking, the Great Depression, the changing roles of women in the U.S. economy, post-World War II growth, the construction of the social safety net, and the place of the United States in the modern global economy. Comparisons will be made to European and non-European experiences when appropriate.

**Class Format:** lecture/seminar

**Requirements/Evaluation:** small exams, short assignments, and a research paper

**Prerequisites:** ECON 110 and 120

**Enrollment Limit:** 30

**Enrollment Preferences:** Sophomores and juniors

ECON 227 (F) Acquiring Art: Selecting and Purchasing Objects For WCMA

**Cross-listings:** ECON 227 ARTH 327 ARTH 527

**Secondary Cross-listing**
How do museums acquire art? Factors considered in selecting objects include: the museum's existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object's history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.

**Requirements/Evaluation:** Three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy for acquisition.

**Prerequisites:** ECON 110 or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** Senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

ECON 230 (S) The Economics of Health and Health Care

What is health? How do we improve it? Health is an essential component of individual well-being and a fundamental input to a productive economy,
making its production a societal priority, as well as an individual one. This course examines the economics of the supply and demand for health through applied microeconomic analysis. The course focuses on three broad areas: the inputs to health and the demand for health care; the structure and functioning of health care markets and the roles of key institutions; and the role of public policy in furthering individual and population health. Special attention will be devoted to topics of current policy interest, including health disparities, problems of health care costs and cost containment, health insurance reform and the Affordable Care Act, the role of public health interventions, and drug development and regulation.

**Class Format:** The class is a mixture of lecture and discussion.

**Requirements/Evaluation:** Several short papers, participation in class discussion, and a final research project and presentation.

**Prerequisites:** ECON 110 and a class in statistics

**Enrollment Limit:** 30

**Enrollment Preferences:** Economics majors who need a 200-level elective, Political Economy majors, and Public Health concentrators

**Expected Class Size:** 30

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

ECON 231  (S) The Economics of Inequality

There are many outcomes in the United States that show profound levels of inequality: education, earnings, wealth, housing, environmental health, and life expectancy, just to name a few. This course examines the economic forces that drive and/or explain these inequalities in the U.S. The beginning of the course covers definitions and economic techniques used to measure income and wealth inequality, as well as differences between perceived and actual inequalities. We then move on to the theoretical underpinnings of the rise of domestic economic inequality, as well as models and theories of discrimination. Finally, we will explore how economic inequalities carry over into health, housing, and environmental quality through policies or social mechanisms. We will discuss and investigate the following questions and more: How are skill and education related to income? How do income and health interact, and which causes the other? How is the level of economic inequality in the country perceived? Which historic policies have led to specific inequalities, and was the inequality an intentional or inadvertent outcome? What have other countries done differently, and how does what the U.S. has done compare in terms of disparities? What exactly is discrimination, and what are the cumulative effects of it in the labor market and health outcomes?

**Class Format:** Lecture and small discussion groups

**Requirements/Evaluation:** Several short papers (peer- and instructor-reviewed), article review, and final project and presentation

**Prerequisites:** ECON 110

**Enrollment Limit:** 25

**Enrollment Preferences:** Economics majors

ECON 232  (F) Financial Markets, Institutions and Policies  (QFR)

The focus of the course will be on how firms, financial markets, and central banks interact in the economy. Key questions addressed in the course include: How do firms allocate their resources to enhance their value? How are firms evaluated by the financial markets? How are asset prices determined, and how are these prices related to interest rates? Are financial markets efficient, and what are the implications of their efficiency or lack thereof? How does the financial system help with the management of risks faced by society? We will also study the role of the central bank (the
Federal Reserve in the US, monetary policy, and government regulation and their impacts on financial decision making. Key questions include: How do central banks set monetary policy and how do those policies affect the economy and the financial decision-making process? How does monetary policy change when interest rates are (virtually) zero?

**Class Format:** There will be a mix of lecture and discussion.

**Requirements/Evaluation:** 5-7 Problem Sets, Quantitative Exercises, Group Paper, and Final Exam

**Prerequisites:** ECON 110 and ECON 120

**Enrollment Limit:** 25

**Enrollment Preferences:** Sophomore and Junior Economics majors

**Expected Class Size:** 25

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (QFR)

**Quantitative/Formal Reasoning Notes:** We will use mathematical models, graphs, and data analysis to understand financial decisions at the firm and economy-wide levels.

**Attributes:** POEC Depth

**ECON 233 (F) Behavioral Economics and Public Policy**

In many ways, the fields of psychology and economics both study the same phenomena: the motives that guide our decision-making across different contexts. This course provides a survey of the ways in which these two fields intersect, i.e., behavioral economics. Topics include how individual responses to economic incentives can be influenced by heuristics, framing, social norms, and other psychological motives; we will also study how these concepts are incorporated into microeconomics models. Concurrently, the course will review applications of these ideas to public policy and firm strategy. For instance, we will examine how behavioral economics has informed efforts to reduce poverty, increase environmental conservation, encourage long-term financial planning, and improve health and diet outcomes, among many other topics. The course will also discuss whether and how we ought to judge which behaviors are socially desirable and worth encouraging through policy.

**Requirements/Evaluation:** One midterm, one final exam, 4-6 problem sets, and 1-2 writing assignments

**Prerequisites:** ECON 110

**Enrollment Limit:** 30

**Enrollment Preferences:** If over-enrolled, I will aim to accept a mix of years and majors

**Expected Class Size:** 30

**Grading:** yes pass/fail option, no fifth course option

**ECON 238 (F) Sustainable Economic Growth**

Cross-listings: ECON 238 ENVI 238

**Primary Cross-listing**

Is it possible to have infinite economic growth on a finite planet? This question has sparked a great deal of inquiry across the social sciences. Some argue that we need to slow or even end economic growth to prevent environmental catastrophe. Others argue that market forces, especially changing prices and improved technology, will ensure that growth can continue unabated without significant negative consequences. Still others argue that government intervention is necessary to limit negative consequences of economic progress, but that effective interventions are still compatible with sustained economic growth. In this class, we will explore the insights that economics has to offer on this important question. We will start by
considering the importance of finite inputs used in production, including fossil fuels, minerals, and land, among others. Then, we will consider whether undesirable byproducts of economic growth will prevent sustained growth. This second part of class will place a lot of emphasis on climate change. Throughout the class, we will pay special attention to the role that government intervention can or cannot play in promoting sustainable economic growth. This class will reinforce important concepts taught in introductory microeconomics and introductory macroeconomics.

Class Format: The first half of the class is lecture-based. The second half of the class is discussion-based.

Requirements/Evaluation: midterms exams, final exam, problem sets, short writing assignments, video-taped presentations, class participation

Prerequisites: ECON 110 and ECON 120

Enrollment Limit: 25

Enrollment Preferences: potential or declared social science majors

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

ECON 240  (S) Colonialism and Underdevelopment in South Asia  (DPE) (QFR)

Cross-listings: ASIA 241 ECON 240

Primary Cross-listing

British colonial rule in South Asia shaped economy and society in fundamental ways. As resistance to colonial rule emerged in the late nineteenth century, "nationalist" writers developed a critique of its economic impact via taxation, fiscal policy, trade, and many other policies. In their turn, supporters of British rule, "apologists," argued that British rule had laid the foundations of economic growth by securing property rights, enforcing contracts, and developing infrastructure. The debate between "nationalists" and "apologists" has never quite ended, but after the recent growth of the Indian economy it has lost some of its emotional charge. We will use this opportunity to revisit the controversy.

Requirements/Evaluation: essays (one every other week) and responses to partner's essays will be evaluated

Prerequisites: one course in ECON

Enrollment Limit: 10

Enrollment Preferences: Economics major, prior course on South Asia

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

Difference, Power, and Equity Notes: Issues of difference, power, and equity are at the heart of any analysis of colonialism, hence the DPE designation.

Quantitative/Formal Reasoning Notes: Students will write six essays, in which they will employ economic models and engage with quantitative evidence, so the course satisfies the QFR requirement.

Attributes: GBST South + Southeast Asia Studies Electives  POEC Depth

Not offered current academic year

ECON 251  (F)(S) Price and Allocation Theory  (QFR)

A study of the determination of relative prices and their importance in shaping the allocation of resources and the distribution of income. Subjects include: behavior of households in a variety of settings, such as buying goods and services, saving, and labor supply; behavior of firms in various kinds of markets; results of competitive and noncompetitive markets in goods, labor, land, and capital; market failure; government policies as sources of and responses to market failure; welfare criteria; limitations of mainstream analysis.
Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets and multiple exams, including a final exam. They may also include one or more quizzes, short essays, collaborative projects, or presentations.

Prerequisites: ECON 110 and MATH 130 or its equivalent

Enrollment Limit: 30

Enrollment Preferences: Current or prospective Economics majors.

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course involves developing and analyzing mathematical models of real-world phenomena, grounded in tools like calculus and game theory. Students are assumed to be comfortable with topics from introductory calculus, including differentiation and integration.

ECON 255 (F)(S) Econometrics (QFR)

An introduction to the theory and practice of applied quantitative economic analysis. This course familiarizes students with the strengths and
weaknesses of the basic empirical methods used by economists to evaluate economic theory against economic data. Emphasizes both the statistical foundations of regression techniques and the practical application of those techniques in empirical research, with a focus on understanding when a causal interpretation is warranted. Computer exercises will provide experience in using the empirical methods, but no previous computer experience is expected. Highly recommended for students considering graduate training in economics or public policy.

Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets, multiple exams, a group project, and possible additional assignments or quizzes.

Prerequisites: MATH 130, plus STAT 161, 201 or 202 (or equivalent, including a score of 5 on the AP Statistics Exam), plus one course in ECON; STAT 101 will also serve as a prerequisite, but only if taken prior to the fall of 2018

Enrollment Limit: 30

Enrollment Preferences: Current or prospective Economics and Political Economy majors.

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Unit Notes: Students may substitute the combination of STAT 201 and 346 for ECON 255

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course teaches research tools necessary to analyze data.

ECON 257 (S) Economic Perspectives on Racial Inequality (DPE)
This course will examine the causes and consequences of racial disparities in economic outcomes. Specific topics will include the determinants and consequences of racial differences in earnings and human capital; formal models of taste-based and statistical discrimination; racial segregation in neighborhoods and schools; the economic history of slavery, Reconstruction and the Civil Rights Movement; and the structure and efficacy of government anti-discrimination policies. Much of the course will focus on racial discrimination faced by African Americans specifically, but there will also be coverage of other racial and ethnic minority groups. The course will additionally focus almost exclusively on the US, although many of the theories and techniques we will develop are applicable to other contexts as well. The course will utilize basic microeconomic tools, such as straightforward extensions of the supply and demand model, and ECON 110 is a prerequisite. We will also make extensive use of descriptive statistics, and an introductory statistics course such as STAT 161 will be useful, but is not required.

Requirements/Evaluation: exams, short written responses, problem sets, participation

Prerequisites: ECON 110

Enrollment Limit: 25

Enrollment Preferences: First- and second-year students.

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: The course is well suited for the DPE distribution requirement as it will develop in detail not only the existence of race-based differences in a wide variety of key socioeconomic outcomes, but also explore the historical and contemporary processes that lead to those differences.

ECON 299 (F) Economic Liberalism and Its Critics

Cross-listings: PSCI 238 POEC 250 ECON 299

Secondary Cross-listing

Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx's revolutionary socialism, and the reformist ideas of John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Joseph Schumpeter, Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant topics relevant to the themes of the course, with applications to current public policy issues, such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; social media and addiction; economic nationalism; behavioral economics; climate change and intergenerational equity; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with
discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

Class Format: This course uses a flipped classroom approach. Before each class meeting, students watch a lecture video, and (at least six times) write an essay relating to the assigned reading and video. In-person class time is devoted primarily to Socratic discussion.

Requirements/Evaluation: six short essays and a final exam

Prerequisites: ECON 110 and 120 or equivalent; PSCI 110 (formerly PSCI 201; may be taken concurrently with POEC 250); open to non-majors

Enrollment Limit: 30

ECON 308  (S)  Skills for a Modern Economy and How to Pay for Them

Cross-listings: ECON 508 ECON 308

Secondary Cross-listing

Skills are a major driver of economic growth. The skills gap between rich and poor countries explains many of their income differences. The skills gap is a determinant of structural change, the process by which economies grow certain sectors (like manufacturing and services) and shrink others (like agriculture) in the process of achieving high-income country status and reducing poverty. The skills gap both affects and is affected by every other aspect of the economy: agricultural productivity, health, poverty rates, and fiscal capacity. This course will examine the economic policies that are essential for nations to upgrade the skills of their workforce, including the fiscal policies to finance those investments. The course will also explore complementary economic policies—in areas from labor markets to agriculture to healthcare—that allow maximum returns to skills investments.

Class Format: Students will meet the professor in pairs, approximately one hour each week.

Requirements/Evaluation: During a typical week one student in the pair will write a short paper, and the other will respond. The following week the roles will be reversed. Evaluation will be based on the papers written as well as the responses.

Prerequisites: For CDE Fellows: fall semester courses. For undergraduates: Econ 251, Econ 252, and Econ 255, or permission of instructor.

Enrollment Limit: 10

Enrollment Preferences: CDE Fellows, Economics majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 345  (S)  Growth Diagnostics  (QFR)

Cross-listings: ECON 345 ECON 545

Primary Cross-listing

Evidence from across the developing world suggests that the "binding constraints" to economic growth can be remarkably heterogeneous—i.e., the growth potential of stagnating or underperforming economies may be unlocked in a large variety of ways. For instance, pre-reform China had been
constrained by poor supply incentives in agriculture, whereas Brazil has been held back by an inadequate supply of credit, South Africa by poor employment incentives in manufacturing, El Salvador by insufficient production incentives in tradables, Zimbabwe by bad governance, and so forth. How can developing-country policymakers determine country-specific constraints like these, thus enabling them to pragmatically pursue a selected set of growth-promoting policies rather than attempting to implement a "laundry list" of reforms that are naively based on "best practice" rules-of-thumb? This course will serve as a primer on "growth diagnostics," an empirically-driven analytical framework for identifying the most binding constraints to economic growth in a given country at a point in time, whereby allowing policymakers to develop well-targeted reforms for relaxing these constraints while being cognizant of the nation's prevailing economic, political, and social context. The course will first build on the basic theories and empirics of economic growth to elucidate the diagnostic framework and will then employ a wide range of country-specific case studies to demonstrate how the framework can be operationalized for policy making. Throughout the semester, students will be required to work in groups, each representing a given developing or emerging-market economy, in order to build a growth diagnostic for their group's assigned country by the end of the course.

Requirements/Evaluation: extensive class participation, two short (5-page) papers, two 15-page team papers comprising a country growth diagnostic, and a team presentation on the diagnostic

Prerequisites: for undergraduates ECON 251, ECON 252, and either ECON 255 or STAT 346

Enrollment Limit: 19

Enrollment Preferences: CDE fellows and senior Economics majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

Cross-listings:  ECON 548 ECON 348

Primary Cross-listing

Children around the world face unequal opportunities to attend school, and to learn. This course will introduce students to economic studies of education, focusing on pre-school through high school. The course will mainly cover research in low-income and middle-income countries, but will also discuss connections to policy debates in the United States and elsewhere. Topics will include the importance of early-life conditions and investments; the connections between health and education; the roles of information, incentives, inputs, and technology; research methods; and decisions between policy options. Students in this course will analyze data themselves, and will critically read published research.

Requirements/Evaluation: Grades are principally based on readings questions, problem sets, two in-class exams, and short presentations by students.

Prerequisites:  ECON 255, POEC 253, STAT 346, or permission of the instructor. CDE Fellows should have taken ECON 502 or 503.

Enrollment Limit: 20

Enrollment Preferences: Economics majors and CDE Fellows

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 548(D2) ECON 348(D2)

Attributes: GBST Economic Development Studies Electives POEC Depth POEC Skills

ECON 352  (S)  Financial Development and Regulation
This course focuses on the financial system in developing countries and its role in economic development and stability. From both theoretical and applied perspectives, we will investigate the implications of financial development on economic development & growth, income inequality, and short-term fluctuations. We will also explore the dynamics that shape the institutions of a society's financial structure and study the complexities of financial policy design. Throughout the course, a variety of tools of modern economics will be considered, such as theory-based quantitative structural methods, reduced form empirics, and field experiments, and we will study the consequences of finance on economic well-being. The first part of the course focuses on the functions of finance, how it contributes to growth and poverty alleviation, and what can be done to increase financial inclusion. What are the key parts of the infrastructure that are needed to improve access to financial services, including via 'fintech,' which is taking off in many developing countries? The second part of the course will build upon the first part and investigate how imperfections in financial development could make developing countries susceptible to short-term stability issues. A key focus of the second part will be how to prevent or minimize crises, and we will analyze the government's role as regulator, supervisor, standard setter, contract enforcer, and owner.

**Class Format:** discussion

**Requirements/Evaluation:** Midterm, team assignment and formal in-class debates, and a final research paper.

**Prerequisites:** For undergraduates, Econ 110, 120, and POEC 253 or ECON 255; undergraduate enrollment limited and requires instructor's permission

**Enrollment Limit:** 20

**Enrollment Preferences:** CDE students, as well as undergraduates interested in the role of the financial system in low and middle-income countries.

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ECON 352(D2) ECON 510(D2)

**Attributes:** GBST Economic Development Studies Electives POEC Depth POEC Skills

Spring 2024

LEC Section: 01 MW 11:00 am - 12:15 pm Burak Uras

**ECON 355 (F) Financial Crises, Credit Cycles, and Macroeconomic Policies**

This course examines macroprudential policies which aim to mitigate systemic risk to the financial system. We will discuss several instances of financial crises and the conditions leading up to these episodes. Particular focus will be placed on recent research into current macroprudential policies and their implications for financial stability. Topics to be covered include: the concept of cycles in macroeconomics, business and credit cycle measurement, co-movement between economic aggregates, domestic and international policies targeting financial stability, and the effect of these policies on financial markets and the real economy.

**Requirements/Evaluation:** Problem sets, presentations, and a final paper

**Prerequisites:** Economics 252 and 255

**Enrollment Limit:** 25

**Enrollment Preferences:** junior and senior Economics majors

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**Attributes:** POEC Depth POEC Skills

**ECON 357 (F) The Economics of Higher Education**

This tutorial will utilize economic theory and econometric methods to understand a variety of issues pertaining to the economics of colleges and universities. In particular, we'll discuss the logic of non-profit enterprises, the financial structure of a college or university, competition in the market for
higher education, policies impacting tuition and financial aid, the individual and societal returns from investments in higher education, and the distinctive features of academic labor markets. Particular attention will be paid to selective liberal arts colleges.

**Class Format:** will meet weekly in groups of two

**Requirements/Evaluation:** six 5- to 7-page papers and on the quality of the student's oral presentations and commentary on the work of their colleagues

**Prerequisites:** ECON 251 and 255 or STAT 346 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Economics majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** POEC Depth POEC Skills

---

**ECON 360 (F) Monetary Economics  (QFR)**

This course covers a range of theoretical and applied issues bearing on monetary policy as conducted in the U.S. and abroad. Topics to be covered include: the causes of inflation, how central banks manage interest rates, the channels through which monetary policy affects the economy, and the costs and benefits of imposing rules on the conduct of policy. The class will also touch on a number of current issues facing central banks, such as unconventional monetary policy and cryptocurrencies.

**Requirements/Evaluation:** Two exams, a research paper and/or class presentation

**Prerequisites:** ECON 252 and 255. Multivariate calculus (MATH 150 or 151) is recommended but not required

**Enrollment Limit:** 20

**Enrollment Preferences:** junior and senior Economics majors

**Expected Class Size:** 20
Quantitative/Formal Reasoning Notes: The course entails the use of mathematical economic models, the presentation of quantitative information, and the interpretation of statistical analysis.

ECON 362 (S) Global Competitive Strategies
Econ 362 acknowledges both the importance of large, diversified multinational firms in global economic activity, and the forms of strategic thinking that often displace, in practice, the optimization models of traditional economic analysis. In this course, we seek to describe competition in global markets by developing competence in decoding and critiquing (and even formulating) varieties of business and corporate strategies employed during the past forty years. While we treat a variety of theoretical models that seek or have sought to explain patterns of international economic activity, our priority is to ascertain their descriptive integrity and usefulness today. Our historical interest begins with mercantilism and covers Smith, comparative advantage, varieties of factor endowment theories, and much more, proceeding to strategic management perspectives and contributions of the 20th and early 21st century. We complete these efforts with a few original attempts to reconcile modern growth theory (e.g., Romer) with modern strategic practice (e.g., Porter). Further, substantial recent shifts in the nature of globalized economic activity, including the changing relative mobility and power of capital and labor, are examined. While the course is largely descriptive, it cannot fail to treat a few normative issues. We treat the efficacy of various government policies in promoting the competitiveness of home-based industries in regional and global markets. Finally, welfare propositions and policy ideas for addressing welfare impacts in a descriptively accurate context are advanced.

Class Format: mix of lecture, discussion, and case analyses

Requirements/Evaluation: written cases (in teams), class participation, a mid-term exam, and a final paper (can be co-authored) or exam are expected

Prerequisites: ECON 251

Enrollment Limit: 25

Enrollment Preferences: senior Economics majors

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

Attributes: GBST Economic Development Studies Electives

ECON 364 (F) Theory of Asset Pricing
What is the price of time? What is the price of risk? How do markets allocate resources across time and uncertain states of the world? This course theoretically studies how markets allocate scarce resource across time and when outcomes are risky. The "goods" in such markets are called "assets" and the prices of "assets" determine the cost of trading resources across time and across uncertain states of the world. We theoretically investigate how equilibrium determines the price of time, then asset price implications; then asset allocations and prices in the presence of risk; finally, implications for new assets.

Requirements/Evaluation: problem sets and exams

Prerequisites: ECON 251 or ECON 252; and ECON 255 or STAT 201

Enrollment Limit: 25

Enrollment Preferences: Economics majors

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)
ECON 366 (S) International Trade and Development

Cross-listings: ECON 516 ECON 366

Secondary Cross-listing

This course will examine the causes and consequences of globalization and its implications for less-developed countries. We will study the classic models of international trade and discuss the empirical relevance of these theories. In addition, we will focus on other dimensions of globalization that are of particular importance to developing countries such as trade and education, emigration, brain drain, remittances, foreign direct investment, trade policies, infant industry protection, trade and growth, the resource course, and trade agreements.

Class Format: discussion

Requirements/Evaluation: problem sets, midterm, presentation, and final

Prerequisites: ECON 251 and ECON 255; undergraduate enrollment limited and requires instructor's permission

Enrollment Limit: 19

Expected Class Size: 19

Spring 2024

SEM Section: 01 TR 11:20 am - 12:35 pm Will Olney

ECON 367 (S) The Political Economy of Social Insurance (QFR)

The Great Society policies of the 1960s dramatically changed the ways people living in poverty interacted with the federal government, but the benefits associated with these policies seem to have stagnated. Since 1965, the annual poverty rate in the United States has hovered between 10% and 15%, though far more than 15% of Americans experience poverty at some point in their lives. In this course, we will study public policies that, explicitly or implicitly, have as a goal improving the well-being of the poor in the United States. These policies include social insurance programs such as Unemployment Insurance; safety net programs such as Temporary Assistance to Needy Families, Supplemental Nutrition Assistance Program, Medicaid, and housing assistance; education programs such as Head Start and public education; and parts of the tax code, including the Earned Income Tax Credit and Child Tax Credit. We will explore the design and function of these programs, with a particular focus on the context in which they were developed. What political incentives and constraints have strung up our social safety net? How do these factors affect the goals of policy, the trade-offs inherent to the policy's design, and why poverty has not sustained a downward trend in the United States? Through careful consideration, students will learn how to communicate a path forward for public policy which accounts for theoretical economic expectations and the reality of political constraints in policy design.

Class Format: Lecture with substantial class discussion.

Requirements/Evaluation: Several short policy memos, participation in class discussion, and a final analytical essay.

Prerequisites: ECON 253 or 255

Enrollment Limit: 25

Enrollment Preferences: Students majoring in economics or political economy.

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: This course will use quantitative tools of economics. Focus on building data visualization & science communication skills after ECON 255.
ECON 368 (F) Public Economics and Fiscal Policies
The public sector is an important part of the economy. Its objectives are to increase efficiency by correcting market failures, redistribute to achieve a more equal distribution, conduct fiscal policies to stabilize the economy, and, in a broader sense, set the rules of the game. This course discusses the role of the government in the economy, the different ways it acts to solve market failures and redistribute, and the consequences of government actions and government failures. We will draw on a political economy perspective to discuss how the nature of government decision-making impacts these outcomes. The course takes a comparative perspective in discussing differences in addressing market failures and redistribution in more market-oriented economies - like the US - and in economies where the government plays a more active role - like the Nordic countries. The course will also give considerable attention to the structure of fiscal policies and how they are employed to stabilize the economy.

Requirements/Evaluation: Problem sets, writing assignments, and a final exam
Prerequisites: Economics 251 and 255
Enrollment Limit: 25
Enrollment Preferences: Junior and Senior Economics and Political Economy majors
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Attributes: POEC Depth  POEC Skills
Not offered current academic year

ECON 370 Data Science for Economic Analysis
The goal of data science is to use empirical information from a broad range of sources to improve our understanding of the world around us. Economists increasingly rely on the tools of data science to access novel sources of data and information, characterize the economic environment, and conduct empirical analysis. This course provides hands-on introduction to data science tools most relevant for economic analysis including data visualization, exploratory data analysis, and statistical learning. The objective of the course is to help students: (i) formulate economic research questions that can be explored using data science tools, (ii) identify sources of data and prepare data for analysis, (iii) produce persuasive visualizations, and (iv) analyze data using both classical statistics and machine learning.

Class Format: The course includes traditional lectures, interactive activities in both Stata and R, and in-class presentations by students. Some prior knowledge of either Stata or R is helpful, but not required.
Requirements/Evaluation: Grades are based on in-class participation and performance on two take-home exams as well as problem sets and data visualization/analysis projects.
Prerequisites: ECON 255 or STAT 201, STAT 202, or STAT 346 or permission of instructor
Enrollment Limit: 25
Enrollment Preferences: Economics majors
Expected Class Size: 25
Grading: (D2)
Not offered current academic year

ECON 371 (F) Time Series Econometrics and Empirical Methods for Macro (QFR)
Econometric methods in many fields including macro and monetary economics, finance and international growth and development, as well as numerous fields beyond economics, have evolved a distinct set of techniques which are designed to meet the practical challenges posed by the typical empirical questions and available time series data of these fields. The course will begin with an introductory review of concepts of estimation and inference for large data samples in the context of the challenges of multivariate endogeneous systems, and will then focus on associated methods for
Students will be introduced to concepts and techniques analytically, but also by intuition, learning by doing, and by computer simulation and illustration. The course is particularly well suited for economics majors wishing to explore advanced empirical methods, or for statistics, mathematics or computer science majors wishing to learn more about the ways in which the subject of their majors interacts with the fields of economics. The method of evaluation will include a term paper. ECON 252 and either STATS 346 or ECON 255 are formal prerequisites, although for students with exceptionally strong math/stats backgrounds these can be waived subject to instructor permission. Credit may not be earned for both ECON 371 and ECON 356.

Requirements/Evaluation: term paper and regular homework assignments
Prerequisites: ECON 252 and either ECON 255 or STATS 346
Enrollment Limit: 19
Enrollment Preferences: students wishing to write an honors thesis, and students with strong MATH/STAT/CSCI backgrounds
Expected Class Size: 19
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (QFR)
Quantative/Formal Reasoning Notes: Uses quantitative/formal reasoning intensively in the form of mathematical and statistical arguments, as well as computer programming.

Fall 2023
SEM Section: 01 W 7:00 pm - 9:40 pm Peter L. Pedroni

ECON 373 (F) The Economics of Immigration (QFR)
This course will explore migration across national borders from an economic perspective, with a focus on migration to the United States. Who migrates, and why? What are the impacts on the economies of the origin country and the destination country, and on migrants themselves? What policies shape immigration and enforcement of immigration law, and what are their impacts? What is the role of immigrants in the broader society? We will emphasize empirical analysis as a data-driven way of understanding the economics of immigration.

Class Format: Class will periodically meet in a small-group seminar format.
Requirements/Evaluation: Requirements: active participation, 3 empirical assignments, 2 short papers, 2 presentations, and a final 12-15 page paper.
Prerequisites: Econ 251 and Econ 255, or permission of instructor
Enrollment Limit: 25
Enrollment Preferences: Economics majors
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (QFR)
Quantative/Formal Reasoning Notes: This course will use quantitative tools of economics.
Attributes: POEC Depth POEC Skills
Not offered current academic year

ECON 374 (F) Poverty and Public Policy (WS)
Since 1965, the annual poverty rate in the United States has hovered between 10% and 15%, though far more than 15% of Americans experience poverty at some point in their lives. In this course, we will study public policies that, explicitly or implicitly, have as a goal improving the well-being of the poor in this country. These policies include social insurance programs such as Unemployment Insurance; safety net programs such as Temporary Assistance to Needy Families, Supplemental Nutrition Assistance Program, Medicaid, and housing assistance; education programs such as Head Start and public education; and parts of the tax code including the Earned Income Tax Credit and Child Tax Credit. We will explore the design and functioning of these programs, focusing on questions economists typically ask when evaluating public policy such as: What are the goals of the policy and does the policy achieve them? Does the design of the policy lead to unintended effects (either good or bad)? What are the trade-offs inherent in the policy’s design? Could the policy be redesigned to achieve its goals more effectively? Through in-depth study of these programs, students will
learn how economists bring theoretical models and empirical evidence to bear on important questions of public policy.

Requirements/Evaluation: evaluation will be based on six 5- to 7-page papers and on the quality of the student's oral presentations and commentary on the work of their colleagues

Prerequisites: POEC 253 or ECON 255 or STAT 346 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Economics majors, Political Economy majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Each student will write five 5- to 7-page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write five 2- to 3-page critiques of their partners' papers. Midway through the semester, each student will revise one of their first three papers.

ECON 375 (S) Inclusive Growth and Crisis Response: The Role of Social Protection Systems

Cross-listings: ECON 375 ECON 532

Secondary Cross-listing

Over the past three decades, developing countries have increasingly expanded social protection systems to tackle poverty and vulnerability while promoting inclusive social development and equitable economic growth. These systems provide pro-poor policy instruments that can balance trade and labor market reforms, fiscal adjustments (such as reduced general subsidies) and other economic policies aimed at enabling better market performance. In addition, social protection systems help vulnerable people to cope with shocks to their livelihoods, promoting resilience, human capital development and sometimes high-return risk-taking. In times of crisis, these systems are more important than ever. From March to June 2020, the World Bank identified 195 countries that have adapted and expanded their social protection systems to respond to the COVID-19 pandemic. This tutorial offers the opportunity to explore how shock-responsive social protection systems can better enable developing countries to respond to global and local shocks in a manner that minimizes the medium- to long-term costs of the resulting crises. The tutorial examines how developing countries build social protection systems to tackle poverty, vulnerability and social exclusion that result from global and local shocks. Topics include how the design and implementation of effective interventions both respond to crises and strengthen long-term developmental outcomes. The tutorial focuses on country responses to the COVID-19 pandemic as both a relevant case study and an example of the kinds of global crises to which national social protection systems must be able to respond in the future.

Requirements/Evaluation: Students will write five papers during the term, and will prepare and deliver formal comments on five papers written by other students

Prerequisites: ECON 251 or ECON 252

Enrollment Limit: 10

Enrollment Preferences: CDE Fellows; Junior and senior Economics majors at instructor’s discretion.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 375(D2) ECON 532(D2)

Not offered current academic year

ECON 376 (F) The Economics of Global Inequality  (QFR)

This course focuses on the proximate and ultimate causes of global economic inequality across nations. Motivated by several stylized facts from cross-country data, we will pose a series of questions: Why are some countries so rich while others remain so poor? What explains heterogeneity in the experience of economic growth across nations, with some growing at a moderate pace over long periods of time, others experiencing rapid growth over shorter intervals, and yet others stagnating persistently? Do all economies face comparable challenges to achieving sustained economic growth?
Will poorer countries ever catch up to richer ones? To answer these and other related questions, we will explore the underlying mechanisms of economic growth. What role is played by savings and investment (i.e., the accumulation of physical capital)? What is the influence of population growth? How important are investments in human capital (i.e., education and population health)? What about technological differences across nations? How much significance should we ascribe to cross-country differences in geographical characteristics? How much should we ascribe to differences in the quality of institutions? For each question, we will explore both theoretical and empirical approaches, ranging from formal models to qualitative historical evidence to cross-country growth regressions. We will debate the usefulness of these different approaches for development policy and will discuss the reasons why so many questions about global economic inequality remain difficult to answer.

Requirements/Evaluation: Problem sets, one midterm exam, final exam.
Prerequisites: ECON 252 and either ECON 255 or STAT 346. ECON 251 recommended but not required.
Enrollment Limit: 20
Enrollment Preferences: Junior and senior economics majors.
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (QFR)
Quantitative/Formal Reasoning Notes: The course material will draw heavily on mathematical and statistical models of economic growth and cross-country comparative development. Students will routinely work on sophisticated mathematical models of economic growth, involving the application of solution concepts from dynamic optimization and differential equations. Students will also be required to perform some econometric analyses in their assignments.
Attributes: GBST Economic Development Studies Electives

ECON 377 (S) Inspiration/Perspiration: The Economics of Innovation
From the iron plow, to the steam engine, to modern biotechnology, innovation drives economic growth and raises living standards. Whether we are talking about great inventions or small tweaks, the tools of economics can help us understand how new ideas, technologies, and products emerge, spread, and become obsolete. In this course, we will examine the creation of new knowledge, the translation of ideas and scientific advances into practical applications, and the adoption of new technologies by producers and consumers. We will study the incentives that potential innovators face, how these are affected by patents and other forms of intellectual property rights, how entrepreneurs finance and market their innovations and how different market structures can influence the resulting trajectory of innovation and adoption. We will also discuss how government policies can foster the financing and development of innovation. Throughout the course, we will explore historical and contemporary case studies of the creation, exploitation, and consequences of innovation.
Class Format: discussion
Requirements/Evaluation: reading responses and short writing assignments; empirical exercises; constructive contributions to class discussions; an exam; and a final group project.
Prerequisites: ECON 251 and (ECON 255 or POEC 253 or STAT 346)
Enrollment Limit: 25
Enrollment Preferences: junior and senior Economics majors

Grading: no pass/fail option, yes fifth course option
Distributions: (D2)
Attributes: POEC Depth  POEC Skills

Spring 2024
LEC Section: 01  MW 11:00 am - 12:15 pm  Steven E. Nafziger

ECON 378 (F) Long-Run Comparative Development (QFR)
The world today is marred by vast disparities in the standard of living, with about a 30-fold difference in real GDP per capita between the poorest and most affluent of nations. What are the causes of such differences in prosperity across countries? Are the origins of global inequality to be found in
underlying differences among societies over the past few decades, the past few centuries, or the past few millennia? If contemporary differences in living standards have such "deep" historical roots, what scope exists for policies to reduce global inequality today? Can we expect inequality to be reduced through some natural process of macroeconomic development, or is it likely to persist unless acted upon by policy? This course will present a unified theory of economic growth for thinking about these and related questions. Examples of issues to be covered include: the Neoclassical growth model and its inefficacy for answering questions about development over long time horizons; Malthusian stagnation across societies during the pre-industrial stage of economic development; the importance of the so-called demographic transition and of human capital formation in the course of industrialization; the persistent influence of colonialism, slavery, and ethnic fragmentation in shaping the quality of contemporary politico-economic institutions; and the enduring effects of geography on comparative development, through its impact on the emergence of agriculture in early human societies and its influence in shaping the composition of traits in populations across the globe.

Class Format: discussion

Requirements/Evaluation: problem sets, at least one exam, a research paper, and a class presentation

Prerequisites: ECON 251, ECON 252, and either ECON 255 or STAT 346

Enrollment Limit: 25

Enrollment Preferences: junior and senior Economics majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: The course material will draw heavily on mathematical and statistical models of economic growth and macroeconomic development. Students will be required to routinely develop and solve sophisticated mathematical models of economic growth, involving the rigorous application of solution concepts from constrained optimization and from optimal control theory. Students will also be required to perform some econometric analyses in their assignments.

ECON 379 (S) Program Evaluation for International Development

Cross-listings: ECON 523 ECON 379

Secondary Cross-listing

Development organizations face strict competition for scarce resources. Both public and private organizations are under increasing pressure to use rigorous program evaluation in order to justify funding for their programs and to design more effective programs. This course is an introduction to evaluation methodology and the tools available to development practitioners, drawing on examples from developing countries. It will cover a wide range of evaluation techniques and discuss the advantages and disadvantages of each. The course is a mix of applied econometrics and practical applications covering implementation, analysis, and interpretation. You will learn to be a critical reader of evaluations, and to develop your own plan to evaluate an existing program of your choice.

Requirements/Evaluation: Empirical exercises, exams, writing assignments, and collaborative projects

Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503)

Enrollment Limit: 20

Enrollment Preferences: CDE Students, but undergraduates with the prerequisites are welcome

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 380 (S) Population Economics

Cross-listings: ECON 519 ECON 380

Primary Cross-listing

This course is an introduction to the economic analysis of demographic behavior and the economic consequences of demographic change. An important aim is to familiarize students with historical and contemporary trends in fertility, mortality, migration, and family composition, and the implications of these trends for the economy. The course demonstrates the application of microeconomic theory to demographic behavior, including fertility, marriage, and migration. Students are introduced to basic techniques of demographic measurement and mathematical demography. Selected topics include the economic consequences of population growth in developing countries, the economics of fertility and female labor force participation, the effects of an older age structure on the social security system, and the relationship between population growth and natural resources.

Requirements/Evaluation: at least one exam, a research paper and a class presentation
Prerequisites: ECON 251; POEC 253 or ECON 255 or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: If overenrolled, students will be asked to submit a brief statement of interest.
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: PHLH Social Determinants of Health

Not offered current academic year

ECON 381 (S) Global Health Policy Challenges

Cross-listings: ECON 381 ECON 571

Primary Cross-listing

Poor health is both a cause and a consequence of poverty. It can trap individuals in poverty and reduce aggregate economic growth. This course will be structured around major global health challenges, including maternal health, infectious diseases (e.g. HIV/AIDS, tuberculosis, COVID), neglected tropical diseases (e.g malaria, dengue, Ebola), nutritional deficiencies, and mental health. We will focus primarily, but not exclusively, on health in low-income countries in this course. Students will read papers and conducted empirical assignments related to the various topics, as well as develop their own research idea during the semester related to one of the topics covered.

Requirements/Evaluation: empirical problem sets, midterm exam and a substantive research paper that includes some analysis of existing data
Prerequisites: ECON 251 and (POEC 253 or ECON 255 or STAT 346) or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: juniors and sophomores
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)

ECON 382 (F) Gentrification and Neighborhood Change (DPE)
While the phenomenon we call "gentrification" was first noted in the 1960s, these changes in urban neighborhoods have recently drawn increasing scrutiny and concern. Coming at a time of growing income inequality, the movement of higher income households into neighborhoods previously occupied by lower-income households has raised concerns about displacement, housing affordability, access to employment and other problems that may be associated with a gentrifying city. These problems may be further exacerbated by residential segregation and reduced support for public housing and transportation. This course will provide an opportunity to study these issues in depth. What, exactly, is gentrification? What do we know about the economic causes and consequences of gentrification and neighborhood change? How are these causes and consequences affected by growing income inequality and continued segregation in housing? What policy options might be pursued that could improve the well-being of existing and potential residents of the neighborhoods in US cities?

Requirements/Evaluation: Students will meet in pairs once per week. On alternate weeks students will write a 10-12 page primary paper on an assigned topic, and on the next week write a 4-5 page comment and discussion on the primary paper. At least one of the primary papers written by each student during the course must incorporate some analysis of data on gentrification using data introduced in discussion.

Prerequisites: Economics 251 (Price and Allocation Theory), Statistics 161 or Economics 255 (Econometrics) or POEC 253 (Empirical Methods in Political Economy) or instructor permission.

Enrollment Limit: 10

Enrollment Preferences: Economics and Political Economy majors, Juniors and Seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Gentrification has been identified in the survey of DPE suggestions as a worthwhile and important topic for a course satisfying the DPE requirement. Gentrification, with its consequent displacement of low-income and frequently minority households in cities is widely viewed as a problem and there have been increasing demands for local policies to limit the rate or extent of gentrification. We will address the causes, measurement of gentrification and extent to which it burdens poor households.

ECON 383 (S) Cities, Regions and the Economy

Cities and urbanization can have significant impacts on the economy. In many developed economies, a process of regional decline is associated with older, industrial cities. In developing countries, the process of economic growth is generally associated with increasing urbanization. Urbanization, with its increasing concentration of population and production, puts particular pressure on markets to allocate resources for provision of land, housing, transportation, labor and public goods. Urbanization can alter the productivity of land, labor, and capital in ways that can improve the welfare of residents and the performance of the broader economy. In this course we will examine these conflicting economic forces and examine some recent research that contributes to our understanding of the difference between regional growth and decline, and the role that the urban structure plays in these processes. We will examine the function of land, housing, transportation, and labor markets in the urban context, and the scope for public policies to improve the performance of the regional economy.

Requirements/Evaluation: Two midterms and a research paper on an approved topic that is at least 5000 words in length.

Prerequisites: ECON 251 or instructor's permission

Enrollment Limit: 20

Enrollment Preferences: Seniors and Juniors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

ECON 384 (S) Corporate Finance (QFR)
This course analyzes the major financial decisions facing firms. While the course takes the perspective of a manager making decisions about both what investments to undertake and how to finance these projects, it will emphasize the underlying economic models that are relevant for these decisions. Topics include capital budgeting, links between real and financial investments, capital structure choices, dividend policy, and firm valuation. Additional topics may include issues in corporate risk management, corporate governance and corporate restructuring, such as mergers and acquisitions.

Class Format: Lecture / discussion

Requirements/Evaluation: Class participation, short assignments, and exams

Prerequisites: ECON 251, 252, and some familiarity with statistics (e.g., ECON 255)

Enrollment Limit: 28

Enrollment Preferences: Economics majors; seniority

Expected Class Size: 28

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: The course uses quantitative models to evaluate decisions.

Spring 2024
LEC Section: 01 MWF 8:30 am - 9:45 am Caitlin E. Hegarty

ECON 385 (F) Games and Information (QFR)

This course is a mathematical introduction to strategic thinking and its applications. Ideas from game theory, including Nash equilibrium and its refinements, commitment and credibility, repeated games, and information asymmetries, incentive contracts, and signaling, will be introduced. Applications will be drawn from economics, history, and politics around the globe, and include topics such as: trust between strangers, corruption and fraud, racial bias, violence and deterrence. And we will explore how to write and recognize game-theory models to help make sense of strategic interactions in the world around us.

Requirements/Evaluation: Two exams, regular problem sets and assignments in which students create game-theoretic models.

Prerequisites: ECON 251 or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: juniors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Unit Notes: students who have taken MATH 335 or CSCI 357 cannot receive credit for this class

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: Mathematical analysis of strategic interaction is emphasized throughout,

LEC Section: 01 Cancelled

ECON 387 (S) Economics of Climate Change (QFR)

Cross-listings: ECON 387 ENVI 387 ECON 522

Primary Cross-listing

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.
**Requirements/Evaluation:** problem sets, midterm, group presentation, final exam

**Prerequisites:** ECON 251, familiarity with statistics

**Enrollment Limit:** 25

**Enrollment Preferences:** Junior/Senior Economics majors and CDE fellows

**Expected Class Size:** 25

**ECON 389 (S) Tax Policy in Global Perspective** (QFR)

**Cross-listings:** ECON 514 ECON 389

**Secondary Cross-listing**

Government policy is important for economic development. To finance their policies, governments must build the fiscal capacity to implement a tax system. In turn, fiscal capacity—the ability of the government to raise revenue—depends on economic development. This endogeneity between fiscal capacity and economic development creates challenges for tax policy in developing countries. Given these challenges, what types of taxes should countries use to raise revenues? How can governments build the fiscal capacity to generate revenue to finance critical services? This class explores tax policy from a global and comparative perspective. Because most students will be CDE fellows, we will emphasize tax policy issues, examples, and evidence that are pertinent to developing countries. However, many tax policy lessons are universal so we will also learn about tax policies in developed countries, especially issues relevant for transnational transactions. Topics addressed include: how economic principles can be applied to the efficiency and equity consequences of tax policies; how personal income taxes, corporate income taxes, and value-added taxes are designed and administered and how they influence the economy; ideas for fundamental tax reforms; the debate over progressive taxes versus "flat" taxes; how taxes affect incentives to save and invest; how market failures and administrative problems may influence the optimality of tax policy; the implications of global capital flows and corporate tax avoidance for tax policy; tax holidays and other special tax incentives for investment; empirical evidence on the influence of taxes on foreign direct investment, labor supply, and tax evasion; tax policy towards natural resources such as minerals and oil; case studies of efforts to reform tax administration and reduce tax evasion and corruption; taxes on land and property; taxes on imports and exports; presumptive taxation; and the informal economy and its implications for tax policy.

**Requirements/Evaluation:** midterm exam, several problem sets, two 10-page essays

**Prerequisites:** one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503); students who have previously taken ECON 351 will not be enrolled

**Enrollment Limit:** 19

**Enrollment Preferences:** CDE students, but undergraduates with the prerequisites are welcome

ECON 394  (F)(S)  European Economic History

Economic history directly informs our understanding of the processes of economic development. With this in mind, this course will explore a series of questions related to the economic development of Europe from the pre-modern period until today. What was economic life like in the Roman Empire and Medieval Europe? Why did modern economic growth first occur in Europe, and not in China or the Middle East? Why did the Industrial Revolution occur in Britain and not France? What was the role of colonialism in the acceleration of European growth? What explains the rise and fall of the Soviet economy? What are the causes and consequences of European economic integration since World War II? To answer these and other questions, we will investigate how institutional changes, the evolution of technology, aspects of globalization, and various forms of government intervention have impacted economic growth and living standards in European history, and how those developments have affected the rest of the world. Drawing on a wide variety of empirical and theoretical readings, the course will focus on how economic historians marshal evidence and construct arguments in ways that borrow from and contribute to other fields of economics.

Class Format: discussion

Requirements/Evaluation: class participation, reading responses, short assignments, quizzes, and a final research paper

Prerequisites: ECON 251 or ECON 252 AND (ECON 255 or POEC 253 or STAT 346)

Enrollment Limit: 25

Enrollment Preferences: Students majoring in economics, political economy, or history.

Students are invited to apply to undertake independent study on subjects of their own choosing. Interested students should consult with a faculty member about designing an appropriate project well in advance of spring registration.

Requirements/Evaluation: Determined in consultation with the faculty member advising the independent study

Prerequisites: At least one of (Econ 251, Econ 252, or Econ 255), consent of an instructor and of the department chair

Enrollment Limit: none

Enrollment Preferences: none
ECON 439  Debt Sustainability

The stock of government debt has skyrocketed in many countries. At the same time, interest rates have risen as global central banks have sought to tame inflation, generating concerns about the sustainability of public debt, especially in many lower-income and emerging market economies. What does fiscal/debt sustainability mean, and what are the implications of high public debt for growth and stability? How do the IMF and other institutions assess a country’s public debt sustainability? How does uncertainty factor into these assessments, and what special considerations are relevant for natural resource exporters? How have governments sought to bring down high levels of debt, or to prevent excessive debt levels from arising in the first place? Do these approaches need to be modified to account for the impact of COVID on debt stocks? How will demographic developments and climate change affect debt sustainability? By addressing these questions, the course will seek a nuanced understanding of the role of public debt in the economy and its benefits and risks.

Class Format: Students will meet the professor in pairs, approximately one hour each week.

Requirements/Evaluation: During a typical week one student in the pair will write a short paper, and the other will respond. The following week the roles will be reversed. Evaluation will be based on the papers written as well as the responses.

Prerequisites: For CDE Fellows: fall semester courses. For undergraduates: Econ 251, Econ 252, and Econ 255, or permission of instructor.

Enrollment Limit: 10

Enrollment Preferences: CDE Fellows, Economics majors.

Expected Class Size: 10

Grading:

Distributions: (D2)

ECON 451  (F)  Topics in Economic Growth

In this seminar, we will discuss some of the 'big questions' in macroeconomics, with a particular focus on economic growth. For example: Why are some countries richer than others? How does government intervention affect economic growth? Is it possible to have continued economic growth while avoiding dangerous levels of climatic change? Does inequality help or harm growth? How will automation and artificial intelligence affect growth, inequality, and unemployment? In addition to class discussions, students will complete an independent research project on a topic related to economic growth.

Class Format: About half of the class sessions will be lecture-based. The other half will be devoted to class discussion.

Requirements/Evaluation: class presentations, problem sets, short-writing assignments, research paper

Prerequisites: ECON 251, ECON 252, and (ECON 255 or STAT 346)

Enrollment Limit: 15

Enrollment Preferences: senior Economics majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Not offered current academic year

ECON 452  (S)  Foundations of Money, Credit, Banking, and FinTech

This course aims to address fundamental questions at the core of monetary and financial macroeconomics: what is money, and why is it an essential
What is monetary policy, when does it become effective, and what should optimal monetary policy arrangements look like? How do financial markets and institutions interact with monetary policy? Throughout the course we will develop and solve rigorous general equilibrium macro models that feature money, financial markets, and institutions to address these questions. We will also connect the implications of the models with real world evidence. In the first part of the course, we will study the monetary policy transmission mechanisms and familiarize ourselves with the implications of rational expectations for monetary policy. We will build familiarity with discrete-time dynamic optimization techniques, develop and solve workhorse monetary DSGE (dynamic-stochastic general equilibrium) models, and explore the interactions between nominal variables (such as inflation and nominal interest rates) and real economic variables (such as output and unemployment) - over the business cycle and in the long-run. The second part of the course will extend the monetary macro models developed in the first part by incorporating foundations for credit, banking, and fintech to understand why the needs for these financial arrangements arise and how they interact with money and monetary policy.

Class Format: discussion
Requirements/Evaluation: Homework assignments, exams, and a final group project.
Prerequisites: Econ 252 and Math 130 or equivalent.
Enrollment Limit: 19
Enrollment Preferences: Junior or senior economics majors who are interested in monetary economics and macro-finance.
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

Spring 2024
LEC Section: 01 MR 1:10 pm - 2:25 pm Burak Uras

ECON 453 (S) Research and Methods in Applied Microeconomics
The main goal of this course is to expose students to modern empirical economic research. The basic format for each class session will be to read and discuss in detail a single academic journal article. Students will additionally submit short written responses on each of the assigned articles, and replicate the findings of several of the articles in Stata. Finally, students will write an original empirical paper as a final project on a topic of their choosing. The papers we read will come from several fields of applied microeconomics, including labor economics, health economics, public economics, and the economics of education. Some of the specific topics we will cover include human capital development and the effectiveness of early childhood interventions, the returns to college, the effects of neighborhoods on long term outcomes, gaps in labor market outcomes by race and gender, and evaluations of a range of public policies including the minimum wage, abortion access, and Medicaid. In addition to being interested in the actual findings of research on these topics, the course will introduce students to the key research methodologies used in modern applied microeconomics. In particular, the assigned readings are sequenced to systematically introduce students to the use of fixed effects, differences-in-differences, instrumental variables, regression discontinuity designs, and randomized controlled trials. The course will be as much about these methodologies as about the specific findings of the assigned readings, and the hope is that seeing these methods used in actual research will reinforce and build on the topics covered in Econ 255 (Econometrics).
Requirements/Evaluation: a series of short papers and empirical exercises, constructive contributions to class discussion, class presentations, and a 15- to 20-page original empirical research paper
Prerequisites: ECON 251 and ECON 255 or POEC 253
Enrollment Limit: 15
Enrollment Preferences: senior Economics majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Attributes: POEC Depth POEC Skills

ECON 455  (F)  Research in Economic History: Sources, Methods, and Applications
Historical approaches towards understanding current economic issues are increasingly in vogue. This course will explore new developments in the field of economic history, focusing on how economic historians use qualitative and quantitative evidence and the conceptual tools of economics to address questions of historical and current relevance. Along the way, we will consider works from both sides of the history - economics boundary, focusing on the ways that the two disciplines can and should borrow from one another. We will range widely across space and time, but some possible topics to be investigated include technological innovation, labor coercion, migration, trade and capital flows, colonialism, corporate governance, and political economy. Students are expected to not only read and analyze recent scholarship in economic history, but to also produce and present their own original research over the semester.

Requirements/Evaluation: short writing assignments and empirical exercises, constructive contributions to class discussion, class presentations, and a 15- to 20-page original research paper (written in stages)
Prerequisites: ECON 251 and ECON 255 or consent of instructor; a previous history course is recommended but not required
Enrollment Limit: 19
Enrollment Preferences: senior Economics majors
Expected Class Size: 19
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)
Not offered current academic year

ECON 456  (F)  Income Distribution
This course examines the distribution of income in the United States. Questions to be addressed may include the following: How have wage inequality and the skill premium evolved over time? What factors explain a rising skill premium? How does income differ with race and gender? How is poverty measured, and what are the factors associated with living in poverty? How do government programs change the distribution of income? How much income mobility is there across generations? Students will become more critical readers of current economic literature, and will apply their skills in conducting empirical research.

Requirements/Evaluation: short writing assignments, computer lab exercises, oral presentations, and a 15- to 20-page research paper including original empirical analysis (written in stages)
Prerequisites: ECON 251 and 255 or equivalent
Enrollment Limit: 20
Enrollment Preferences: senior Economics majors
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
ECON 458  (S)  Economics of Risk
Risk and uncertainty are pervasive features of economic decisions and outcomes. Individuals face risk about health status and future job prospects. For a firm, developing new products is risky; furthermore, once a product has been developed, the firm faces product liability risk if it turns out to be unsafe. Investment decisions--from managing a portfolio to starting a business--are also fraught with uncertainty. Some risks are environmental--both manmade problems and natural disasters; other risks include the possibility of terrorist attack and, more locally, issues of campus safety. This tutorial explores both the private market responses to risk (e.g., financial markets, insurance markets, private contracting, and precautionary investments and saving) and government policies towards risk (e.g., regulation, taxation, and the legal system). From a theoretical standpoint, the course will build on expected utility theory, diversification, options valuation, principal-agent models, contract theory, and cost-benefit analysis. We will apply these tools to a wide variety of economic issues such as the ones listed above. One goal of the course is to discover common themes across the disparate topics. Students will be expected to read and synthesize a variety of approaches to risk and uncertainty and apply them to various issues.

Class Format: tutorial; students will meet with the instructor in pairs in each week

Requirements/Evaluation: For the first ten weeks, each student will write a 5 - 7 page paper every other week, and comment (of 2 - 3 pages) on their partner's work in the other weeks; the final two weeks will be reserved for papers on a topic of each student's interest (again, 5 - 7 pages but without needing to write a comment on their partner's work); one of the papers during the term will be revised to reflect feedback from the instructor and the student's partner

Prerequisites: ECON 251, 252, and 255

Enrollment Limit: 10

Enrollment Preferences: senior Economics majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Spring 2024
TUT Section: T1    TBA     William M. Gentry

ECON 459  (F)  Institutions and Development
Why are some societies rich and others poor? While typical answers emphasize proximate causes like factor accumulation (i.e., growth in physical and human capital), technological progress, and demographic change, the institutional approach highlights the role of social, political, and cultural factors, broadly defined, as fundamental determinants of economic prosperity. The central idea is that the value-added of economic activities to society is primarily conditioned by the social arrangements within which these activities occur -- namely, arrangements that generate a structure of private incentives, which can either promote behavior that is conducive to economic development or lead to the pursuit of private gain at the expense of the common good. Thus, the key to economic development in this approach is the emergence of complementary institutions and structures of governance in society. This course will survey the recent literature on the topic of institutions and economic development, with an emphasis on empirical evidence in the context of both historical and contemporary societies. The purpose of the course will be to expose students to the core ideas and empirical tools employed at the frontier of research in this area. The readings will primarily comprise published journal articles and unpublished working papers, and students should expect to apply concepts from across all the core courses in economics.

Requirements/Evaluation: extensive class participation, two 5-page review papers, two class presentations, and one 15- to 20-page empirical research paper (written in stages)

Prerequisites: ECON 251, ECON 252, and either ECON 255 or STAT 346

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option
ECON 460 (F) Women, Work, and the World Economy from 5,000 BC to the Present

Now and throughout history, views of the appropriate role for women in society have varied tremendously across cultures and communities: are women autonomous productive agents, are they men's property, or do they fall somewhere in between? In this course, we explore the causes and consequences of women's position in society for growth and economic development, analyzing women's economic roles in historical and cultural perspective. Students will become more critical readers of current economic literature, and will apply their skills in conducting empirical research.

Requirements/Evaluation: short writing assignments, computer lab exercises, oral presentations, and a 15- to 20-page research paper including original empirical analysis (written in stages)

Prerequisites: ECON 251 and 255 or equivalent

Enrollment Limit: 19

Enrollment Preferences: junior and senior economics majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Not offered current academic year

ECON 462 (S) Topics in African Development

This course will examine a selection of current issues in development economics with a specific emphasis on how they relate to Sub-Saharan Africa. Core topics to be addressed include agriculture, labor markets with a specific emphasis on south-south migration, credit, and land markets. Some specific questions that may be addressed include: How has agricultural productivity changed over time? What are constraints to improving agricultural productivity? What drives south-south migration? What are the impacts of migration on destination and origin communities? Students will critically read published journal articles (or working papers) and actively participate in class discussions. Students will also complete original empirical analysis on a related topic.

Requirements/Evaluation: short writing assignments, class discussion, oral presentations, 15-20 page empirical research paper

Prerequisites: ECON 251 and 255 or equivalent

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Not offered current academic year

ECON 463 (F) Financial History (WS)

What can we learn from financial history to understand the successes and failures of finance today and in coming years? This course opens with a brief survey of some of the major characteristics, issues, and challenges of financial systems today, and then examines earlier experience with these phenomena. Topics to be examined include: the role of credit and more generally finance in economic development historically, including in the financial revolutions from Northern Italy, the Netherlands, Britain and the US; the evolution of money, from stones or cigarettes to digital currencies; the relationship between finance and government, and the extent to which it has changed over time; lessons from early asset bubbles and more recent crises (including that of 2008-09) for modern financial systems; the effect of institutions (laws, norms, and culture) and political systems in shaping the impact of finance, as illustrated by comparisons between Mexico and the U.S., among other cases; and lessons from U.S. financial history for policies today. The course also examines the tools that were developed in earlier eras to deal with different risks, evaluates their efficacy, and considers lessons for modern financial regulation, including how financial systems can be prepared, if possible, for the risks that are already unfolding -- such as those posed by technology change, electronic currencies, and climate risk.
ECON 465  (S)  Pollution and Labor Markets

If your home town has polluted air, does that reduce your wage? Do you work less? Are you less likely to finish high school? These are specific instances of an important general question: how does pollution affect labor market outcomes? The answer matters for individual decisions (where to live) and government policies (air pollution regulations). This seminar begins from theories of optimizing worker behavior in the presence of pollution. Building on this foundation, we will critically evaluate new empirical research into the impacts of pollution on human capital, labor supply, and productivity. We will also study the impact of pollution regulations on wages and employment. Included papers will cover both developed and developing countries.

Requirements/Evaluation: class discussion, presentation of reading, paper replication, 15- to 20-page empirical paper (written in stages) and accompanying short presentation

Prerequisites: ECON 251 and ECON 255; STAT 201/346 acceptable in place of ECON 255 prerequisite with instructor permission

Enrollment Limit: 19

Enrollment Preferences: Economics majors, seniority

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

ECON 470 (S) The Indian Economy: Development and Social Justice

The Indian economy has (usually) grown rapidly in the last three decades, but poverty has declined relatively slowly, malnutrition remains high, and the sex ratio remains heavily biased against women. Is this the persistence of long-standing historical disadvantages such as those faced by Scheduled Castes and Tribes? Does this reflect failures in policy, in areas such as trade, credit, or labor law? Or is the quality of governance primarily to blame? We will use the theoretical and quantitative methods of an economist to consider these questions.

Requirements/Evaluation: Short response papers to assigned readings; classroom presentations/commentary on assigned readings; empirical research project; classroom presentation of empirical research project; participation in classroom discussion.

Prerequisites: ECON 251 and 255, or equivalent, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: junior and senior economics majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: GBST Economic Development Studies Electives GBST South + Southeast Asia Studies Electives JLST Interdepartmental Electives

Not offered current academic year

ECON 471 (S) Topics in Advanced Econometrics (QFR)

The course uses both a practical and conceptual/theory based approach, with emphasis on methods of structural identification of dynamics in VARs and long run cointegration and nonlinear function estimation and analysis, both in conventional time series and especially panel time series which contain spatial dimensions. The course will also investigate methods of computer simulation related to these techniques. The course is well suited for students considering empirically oriented honors theses in fields that employ these techniques, such as macro, finance, growth, trade and development, as well as fields outside of economics that use time series data. It is also well suited for students majoring in economics, statistics, computer sciences or mathematics who wish to expand their econometrics training and understanding to a more advanced level.

Requirements/Evaluation: periodic homework assignments, term paper

Prerequisites: ECON 371

Enrollment Limit: 19

Enrollment Preferences: students with strong quantitative backgrounds, and to students intending to write an honors thesis

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course will make use of mathematics, statistics and computer analysis for the conceptualization and implementation of the econometric topics that are taught.

Not offered current academic year

ECON 472 (F) Macroeconomic Instability and Financial Markets

This advanced course in macroeconomics and financial theory attempts to explain the role and the importance of the financial system in the global economy. The course will provide an understanding of why there is financial intermediation, how financial markets differ from other markets, and the equilibrium consequences of financial activities. Rather than separating off the financial world from the rest of the economy, we will study financial equilibrium as a critical element of economic equilibrium. An important topic in the course will be studying how financial market imperfections amplify and propagate shocks to the aggregate economy. The course may cover the following topics: the determination of asset prices in general equilibrium; consequences of limited asset markets for economic efficiency; theoretical foundations of financial contracts and justifications for the existence of financial intermediaries; the roles of financial frictions in magnifying aggregate fluctuations and creating persistence and instability; the role of leverage...
and financial innovation in fueling financial crises.

Requirements/Evaluation: problem sets, exams, and potentially student presentations

Prerequisites: ECON 251 and ECON 252

Enrollment Limit: 19

Enrollment Preferences: Economics majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

SEM Section: 01 TF 2:35 pm - 3:50 pm Greg Phelan

ECON 474 (S) Advanced Methods for Causal Inference

Cross-listings: ECON 474 ECON 524

Primary Cross-listing

How do we estimate the causal effect of a policy on an outcome? Building on a basic understanding of econometrics and statistics, this methodology course will take students through several applied microeconometric techniques for answering this question. Students will be expected to use statistical software throughout, as we explore the inner workings of these methods and the assumptions required for them to deliver credible estimates. We will discuss the randomized trial and its variants, then cover difference-in-difference, regression discontinuity, and instrumental variables. We will discuss historical roots of modern methods, and will explore newer alternatives to the most commonly used kinds of statistical tests.

Class Format: Students will work on laptops in class. Students without laptops should borrow them from the library. Some prior knowledge of either Stata, R, Matlab, or other mathematical/statistical software is essential.

Requirements/Evaluation: Grades are principally based on problem sets, participation in the in-class activities, one in-class exam, and a final replication project.

Prerequisites: Econ 251 and either Econ 255 or Stat 346. CDE Fellows should have taken ECON 502 or 503.

Enrollment Limit: 19

Enrollment Preferences: Junior and senior Economics majors. CDE Fellows require the instructor's permission.

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 474(D2) ECON 524(D2)

Not offered current academic year

ECON 475 (S) Advanced Economic Theory (QFR)

This course studies advanced topics in micro and macro economic theory. A major focus is on the mathematical underpinnings of advanced modern economics, with a particular emphasis on proofs. Topics may include existence of Nash equilibria, games of incomplete information, equilibrium refinement and selection, global games, Bayesian persuasion, Mirrless taxation, dynamic programming, existence of general equilibrium, recursive equilibria, stochastic models in continuous time, and others. The focus of this class is primarily on mathematical formalism, rigor, and proofs. These tools are essential components of any graduate program in economics. Students who wish to see pure math theorems applied to other fields may also be interested.

Requirements/Evaluation: May include problem sets, exams, participation, term paper

Prerequisites: MATH 150 or equivalent, ECON 251, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Senior Economics Majors

Expected Class Size: 12
ECON 476 (F) Behavioral Economics: Theory and Methods

Behavioral economics emphasizes that models in economics should account for the psychological plausibility of their assumptions and consequences. This course will cover how the field has incorporated insights from psychology into standard microeconomics models of decision-making. In the process, we will review the different methods that are used to empirically test the psychological foundations of these models, including laboratory experiments, field experiments, and quasi-experimental analysis. Assignments, lectures, and class discussions will focus on academic papers that use behavioral economics models to study a variety of topics, such as household finance, public policy, consumer marketing, and others. Throughout the semester, students will also work towards formulating and completing their own original research project.

Class Format: Classes will be a mix of lectures and discussion sessions. The lectures will provide a broad overview of a specific topic or theory. Discussion sessions will center on a single academic paper (related to a topic covered in a previous lecture) that students will have read before class.

Requirements/Evaluation: one 15-25 page research paper, approximately eight 1-2 page responses to assigned readings, and class participation during discussion sessions

Prerequisites: ECON 251; ECON 255 or STAT 346

Enrollment Limit: 19

Enrollment Preferences: Economics majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ECON 477 (F) Economics of Environmental Behavior (QFR)

Cross-listings: ENVI 376 ECON 477

Primary Cross-listing

A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to assess how policies can help or hurt the environment. Topics may study include: common pool resources, voluntary conservation, social norms and nudges, discrimination and justice, rationality, firm responses to mandatory and voluntary rules, voting and public opinion, and boycotts and divestment. We'll also build familiarity with the main methodologies of modern economic research: theoretical modeling, empirical analysis of observational data, and experiments.

Class Format: Class sessions will largely consist of presentations and discussions of academic research papers, as well as lab sessions to work on empirical exercises; we may break the class into groups for some discussions

Requirements/Evaluation: regular reading markup, empirical exercises, class participation, 2 oral presentations, and a final original research paper using an experiment, existing data, or theory

Prerequisites: ECON 251 and (ECON 255 or STAT 346)

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 376(D2) ECON 477(D2)

Quantitative/Formal Reasoning Notes: The research students will consume and produce in the class will be based on math-based theory and/or econometric-based empirical analysis.

ECON 501 (F) Economic Growth and Development
This course focuses on the analysis of modern economic growth and comparative development across nations. Motivated by several stylized facts from cross-country data, we will pose a series of questions: Why are some countries so rich while others remain so poor? What explains heterogeneity in the experience of economic growth across nations, with some growing at a moderate pace over long periods of time, others experiencing rapid growth over shorter intervals, and yet others stagnating persistently? Do all economies face comparable challenges to achieving sustained economic growth? Will poorer countries ever catch up to richer ones? To answer these and other related questions, we will explore the underlying mechanisms of economic growth. What role is played by savings and investment (i.e., the accumulation of physical capital)? What is the influence of population growth? How important are investments in human capital (i.e., education and population health)? What about technological differences across nations? How much significance should we ascribe to cross-country differences in geographical characteristics? How much should we ascribe to differences in the quality of institutions? For each question, we will explore both theoretical and empirical approaches, ranging from formal models to qualitative historical evidence to cross-country growth regressions. We will debate the usefulness of these different approaches for development policy and will discuss the reasons why so many questions about economic growth remain difficult to answer.

Class Format: discussion
Requirements/Evaluation: problem sets, one midterm exam, and a final exam
Prerequisites: for undergraduates ECON 251, ECON 252, and either ECON 255 or STAT 346
Enrollment Limit: 32
Enrollment Preferences: junior and senior economics majors only; this is a core course in the master's program at the CDE, so undergraduate enrollment is very limited and requires instructor's permission

ECON 504 (F) Public Economics in Developing Countries
This class is about microeconomic and empirical analysis of government expenditure programs in developing and transitional countries. It provides tools for understanding the effects of government policies, as well as a useful conceptual framework for analyzing normative questions such as "what role should government play in the economy" and "what is a good policy?" The course begins by considering the efficiency of market economies, and rationales for government intervention in the market, such as public goods, externalities, information-based market failures, imperfect competition, and equity. We also consider ways that human behavior might deviate from perfect rationality, and what that might imply for policy. Along the way, we apply these concepts to various examples of policy issues, including, among other things, the environment, education, health, infrastructure, security, social insurance, and aid to the poor. We then turn to the general question of how to make the government work better, addressing questions such as
the following. When is it better to have the government own and produce things, and when is it better to privatize? What are the incentives of politicians and government employees, and how does the design of political and budgetary institutions affect the degree to which they serve the public interest? How should responsibilities be divided up between the central government and local governments, and what are the advantages and disadvantages of “decentralization?” What can be done to improve the delivery of basic services? For example, how might one address problems of corruption and absenteeism? Throughout the course, we consider examples of empirical research, and to facilitate this, we will occasionally introduce econometric tools that are particularly useful for microeconomic policy evaluation.

Class Format: discussion

Requirements/Evaluation: problem sets, one 10-page paper, a midterm, and a final exam

Prerequisites: ECON 110; in addition, an empirical methods course (POEC 253, ECON 255, 502 or 503, or STAT 346) must be taken before or concurrently with this class; undergraduate enrollment limited and requires instructor's permission

Fall 2023

LEC Section: 01  MWF 8:30 am - 9:45 am  Peter J. Montiel

ECON 506 (F) Fundamentals of Developing Country Macroeconomics

This is a practically oriented course in macroeconomic theory and policy. Macroeconomics is the study of the economy’s aggregate behavior, covering such topics as the determinants of output, employment, inflation, and the current account balance. The state of the economy affects everyone. As a result, macroeconomic issues play a central role in national and international debates. In this course, we will build a simple closed economy macro model suitable for analyzing macroeconomic policy. It will be extended to the open economy and the course will include discussions of key issues related to monetary, fiscal and exchange rate policies with a particular focus on developing and emerging economies.

Requirements/Evaluation: two hour tests and a comprehensive final exam

Prerequisites: none; enrollment limited to CDE students

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

ECON 507  (S)  Global Poverty and Economic Development  (DPE)
Cross-listings: ENVI 234 ECON 507 ECON 204
Secondary Cross-listing
Why are some nations rich while other nations are poor, and what can be done to end global poverty and promote shared prosperity? This course explores the historical determinants of global poverty and inequality, and analyzes the range of policy options available to promote economic development and equalize opportunities. Drawing on research in development economics, development studies, political science, and anthropology, we seek to understand the factors that shaped the global economy and contributed to the cross-country income disparities observed today. In addition, we’ll use the tools of modern empirical microeconomics to assess the possibilities for eliminating global poverty and underdevelopment in the future. Undergraduate students will receive 200-level credit and should not register at the 500-level.

Class Format: discussion
Requirements/Evaluation: short written assignments and empirical exercises; two individual take-home exams; final group project
Prerequisites: one economics course or permission of instructor
Enrollment Limit: 25
Enrollment Preferences: first-year and sophomore students
Expected Class Size: 25
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ECON 508  (S)  Skills for a Modern Economy and How to Pay for Them
Cross-listings: ECON 508 ECON 308
Primary Cross-listing
Skills are a major driver of economic growth. The skills gap between rich and poor countries explains many of their income differences. The skills gap is a determinant of structural change, the process by which economies grow certain sectors (like manufacturing and services) and shrink others (like agriculture) in the process of achieving high-income country status and reducing poverty. The skills gap both affects and is affected by every other aspect of the economy: agricultural productivity, health, poverty rates, and fiscal capacity. This course will examine the economic policies that are essential for nations to upgrade the skills of their workforce, including the fiscal policies to finance those investments. The course will also explore complementary economic policies--in areas from labor markets to agriculture to healthcare--that allow maximum returns to skills investments.

Class Format: Students will meet the professor in pairs, approximately one hour each week.
Requirements/Evaluation: During a typical week one student in the pair will write a short paper, and the other will respond. The following week the roles will be reversed. Evaluation will be based on the papers written as well as the responses.
Prerequisites: For CDE Fellows: fall semester courses. For undergraduates: Econ 251, Econ 252, and Econ 255, or permission of instructor.
Enrollment Limit: 10
Enrollment Preferences:  CDE Fellows, Economics majors.

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)

ECON 510  (S)  Financial Development and Regulation

Cross-listings:  ECON 352  ECON 510

Primary Cross-listing

This course focuses on the financial system in developing countries and its role in economic development and stability. From both theoretical and applied perspectives, we will investigate the implications of financial development on economic development & growth, income inequality, and short-term fluctuations. We will also explore the dynamics that shape the institutions of a society's financial structure and study the complexities of financial policy design. Throughout the course, a variety of tools of modern economics will be considered, such as theory-based quantitative structural methods, reduced form empirics, and field experiments, and we will study the consequences of finance on economic well-being. The first part of the course focuses on the functions of finance, how it contributes to growth and poverty alleviation, and what can be done to increase financial inclusion. What are the key parts of the infrastructure that are needed to improve access to financial services, including via 'fintech,' which is taking off in many developing countries? The second part of the course will build upon the first part and investigate how imperfections in financial development could make developing countries susceptible to short-term stability issues. A key focus of the second part will be how to prevent or minimize crises, and we will analyze the government's role as regulator, supervisor, standard setter, contract enforcer, and owner.

Class Format: discussion

Requirements/Evaluation:  Midterm, team assignment and formal in-class debates, and a final research paper.

Prerequisites:  For undergraduates, Econ 110, 120, and POEC 253 or ECON 255; undergraduate enrollment limited and requires instructor's permission

Enrollment Limit:  20

Enrollment Preferences:  CDE students, as well as undergraduates interested in the role of the financial system in low and middle-income countries.

Expected Class Size:  20

ECON 514  (S)  Tax Policy in Global Perspective  (QFR)

Cross-listings:  ECON 514  ECON 389

Primary Cross-listing

Government policy is important for economic development. To finance their policies, governments must build the fiscal capacity to implement a tax system. In turn, fiscal capacity—the ability for the government to raise revenue—depends on economic development. This endogeneity between fiscal capacity and economic development creates challenges for tax policy in developing countries. Given these challenges, what types of taxes should countries use to raise revenues? How can governments build the fiscal capacity to generate revenue to finance critical services? This class explores tax policy from a global and comparative perspective. Because most students will be CDE fellows, we will emphasize tax policy issues, examples, and evidence that are pertinent to developing countries. However, many tax policy lessons are universal so we will also learn about tax policies in
developed countries, especially issues relevant for transnational transactions. Topics addressed include: how economic principles can be applied to the efficiency and equity consequences of tax policies; how personal income taxes, corporate income taxes, and value-added taxes are designed and administered and how they influence the economy; ideas for fundamental tax reforms; the debate over progressive taxes versus "flat" taxes; how taxes affect incentives to save and invest; how market failures and administrative problems may influence the optimality of tax policy; the implications of global capital flows and corporate tax avoidance for tax policy; tax holidays and other special tax incentives for investment; empirical evidence on the influence of taxes on foreign direct investment, labor supply, and tax evasion; tax policy towards natural resources such as minerals and oil; case studies of efforts to reform tax administration and reduce tax evasion and corruption; taxes on land and property; taxes on imports and exports; presumptive taxation; and the informal economy and its implications for tax policy.

Requirements/Evaluation: midterm exam, several problem sets, two 10-page essays
Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503); students who have previously taken ECON 351 will not be enrolled
Enrollment Limit: 19
Enrollment Preferences: CDE students, but undergraduates with the prerequisites are welcome
Expected Class Size: 15-19
Grading: yes pass/fail option, yes fifth course option

SEM Section: 01 TR 11:20 am - 12:35 pm Will Olney

ECON 519 (S) Population Economics

Cross-listings: ECON 519 ECON 380

Secondary Cross-listing

This course is an introduction to the economic analysis of demographic behavior and the economic consequences of demographic change. An important aim is to familiarize students with historical and contemporary trends in fertility, mortality, migration, and family composition, and the implications of these trends for the economy. The course demonstrates the application of microeconomic theory to demographic behavior, including fertility, marriage, and migration. Students are introduced to basic techniques of demographic measurement and mathematical demography. Selected topics include the economic consequences of population growth in developing countries, the economics of fertility and female labor force participation, the effects of an older age structure on the social security system, and the relationship between population growth and natural resources.

Requirements/Evaluation: at least one exam, a research paper and a class presentation

Prerequisites: ECON 251; POEC 253 or ECON 255 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: If overenrolled, students will be asked to submit a brief statement of interest.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 519(D2) ECON 380(D2)

Attributes: PHLH Social Determinants of Health

Not offered current academic year

ECON 522 (S) Economics of Climate Change (QFR)

Cross-listings: ECON 387 ENVI 387 ECON 522

Secondary Cross-listing

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation,
including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

**Requirements/Evaluation:** problem sets, midterm, group presentation, final exam

**Prerequisites:** ECON 251, familiarity with statistics

**Enrollment Limit:** 25

**Enrollment Preferences:** Junior/Senior Economics majors and CDE fellows

**Expected Class Size:** 25

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ECON 387(D2) ENVI 387(D2) ECON 522(D2)

**Quantitative/Formal Reasoning Notes:** The course involves simple calculus-based theory and applied statistics.

**Attributes:** ENVI Environmental Policy MAST Interdepartmental Electives POEC Depth

Not offered current academic year

**ECON 523 (S) Program Evaluation for International Development**

**Cross-listings:** ECON 523 ECON 379

**Primary Cross-listing**

Development organizations face strict competition for scarce resources. Both public and private organizations are under increasing pressure to use rigorous program evaluation in order to justify funding for their programs and to design more effective programs. This course is an introduction to evaluation methodology and the tools available to development practitioners, drawing on examples from developing countries. It will cover a wide range of evaluation techniques and discuss the advantages and disadvantages of each. The course is a mix of applied econometrics and practical applications covering implementation, analysis, and interpretation. You will learn to be a critical reader of evaluations, and to develop your own plan to evaluate an existing program of your choice.

**Requirements/Evaluation:** Empirical exercises, exams, writing assignments, and collaborative projects

**Prerequisites:** one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503)

**Enrollment Limit:** 20

**Enrollment Preferences:** CDE Students, but undergraduates with the prerequisites are welcome

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**Attributes:** PHLH Methods in Public Health

Spring 2024

SEM Section: 01 MR 1:10 pm - 2:25 pm Susan Godlonton

**ECON 524 (S) Advanced Methods for Causal Inference**

**Cross-listings:** ECON 474 ECON 524

**Secondary Cross-listing**

How do we estimate the causal effect of a policy on an outcome? Building on a basic understanding of econometrics and statistics, this methodology course will take students through several applied microeconometric techniques for answering this question. Students will be expected to use statistical software throughout, as we explore the inner workings of these methods and the assumptions required for them to deliver credible estimates. We will
discuss the randomized trial and its variants, then cover difference-in-difference, regression discontinuity, and instrumental variables. We will discuss historical roots of modern methods, and will explore newer alternatives to the most commonly used kinds of statistical tests.

**Class Format:** Students will work on laptops in class. Students without laptops should borrow them from the library. Some prior knowledge of either Stata, R, Matlab, or other mathematical/statistical software is essential.

**Requirements/Evaluation:** Grades are principally based on problem sets, participation in the in-class activities, one in-class exam, and a final replication project.

**Prerequisites:** Econ 251 and either Econ 255 or Stat 346. CDE Fellows should have taken ECON 502 or 503.

**Enrollment Limit:** 19

**Enrollment Preferences:** Junior and senior Economics majors. CDE Fellows require the instructor's permission.

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 474(D2) ECON 524(D2)

*Not offered current academic year*

**ECON 532 (S) Inclusive Growth and Crisis Response: The Role of Social Protection Systems**

**Cross-listings:** ECON 375 ECON 532

**Primary Cross-listing**

Over the past three decades, developing countries have increasingly expanded social protection systems to tackle poverty and vulnerability while promoting inclusive social development and equitable economic growth. These systems provide pro-poor policy instruments that can balance trade and labor market reforms, fiscal adjustments (such as reduced general subsidies) and other economic policies aimed at enabling better market performance. In addition, social protection systems help vulnerable people to cope with shocks to their livelihoods, promoting resilience, human capital development and sometimes high-return risk-taking. In times of crisis, these systems are more important than ever. From March to June 2020, the World Bank identified 195 countries that have adapted and expanded their social protection systems to respond to the COVID-19 pandemic. This tutorial offers the opportunity to explore how shock-responsive social protection systems can better enable developing countries to respond to global and local shocks in a manner that minimizes the medium- to long-term costs of the resulting crises. The tutorial examines how developing countries build social protection systems to tackle poverty, vulnerability and social exclusion that result from global and local shocks. Topics include how the design and implementation of effective interventions both respond to crises and strengthen long-term developmental outcomes. The tutorial focuses on country responses to the COVID-19 pandemic as both a relevant case study and an example of the kinds of global crises to which national social protection systems must be able to respond in the future.

**Requirements/Evaluation:** Students will write five papers during the term, and will prepare and deliver formal comments on five papers written by other students

**Prerequisites:** ECON 251 or ECON 252

**Enrollment Limit:** 10

**Enrollment Preferences:** CDE Fellows; Junior and senior Economics majors at instructor's discretion.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 375(D2) ECON 532(D2)

*Not offered current academic year*

**ECON 534 (S) Long Term Fiscal Challenges**

This tutorial will address the conceptual and theoretical issues that confront policy makers when they face policy challenges that are likely to emerge only over the medium- to long-term and that have important budgetary implications. It will explore the strategies and approaches that a number of countries have attempted to develop to bring the long-term into their current policy and budgetary planning processes. Students will be exposed to
different long-term challenges that have important budgetary implications, including aging populations, health care, climate change, energy and infrastructure, artificial intelligence, and water. The course will consider the specific policy challenges that arise for each and the ways in which different countries are addressing them.

Requirements/Evaluation: students will write five papers during the term, and will prepare and deliver formal comments on five papers written by other students

Prerequisites: permission of instructor for undergraduates

Enrollment Limit: 10

Enrollment Preferences: CDE students and undergraduates with permission of the instructor

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ECON 538  (S)  Resilience and Macroeconomic Policy

Despite tremendous improvements in combating global hunger and child mortality, an increasing number of the world’s population continue to live in fragile conditions, buffeted by climate change, conflict, forced migration, weak governance, and state inability to deliver basic services to its citizens. Setting macroeconomic policy is difficult in such countries. Not only are decisions affected by policymakers’ distorted incentives and governments’ internal conflicts, fragility also weakens policy transmission mechanisms and constrains policy spaces. This course aims at identifying the causes and consequences of fragility and at discussing how policies should be changed to enhance resilience in such countries. The course will, first, look into the definition and characteristics of fragility, its numerical representation, and its causes and main consequences. The course will also highlight how policy is made in states of fragility, in particular, fiscal policy, monetary policy, exchange rate policy, export promotion policy, etc.), as well as consider policy interactions. Finally, the course will focus on efforts to mitigate fragility and enhance resilience in such countries, including the role of structural policies and that of international financial institutions.

Requirements/Evaluation: Students will write 5-6 papers during the term, and will prepare and deliver formal comments on 5-6 papers written by other students. The required text is "Macroeconomic Policy in Fragile States," edited by Ralph Chami, Raphael Espinoza, and Peter Montiel, 2021, OUP.

Prerequisites: ECON 252 and ECON 255

Enrollment Limit: 10

Enrollment Preferences: Economics majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: POEC Depth

ECON 539  Debt Sustainability

The stock of government debt has skyrocketed in many countries. At the same time, interest rates have risen as global central banks have sought to tame inflation, generating concerns about the sustainability of public debt, especially in many lower-income and emerging market economies. What does fiscal/debt sustainability mean, and what are the implications of high public debt for growth and stability? How do the IMF and other institutions assess a country’s public debt sustainability? How does uncertainty factor into these assessments, and what special considerations are relevant for natural resource exporters? How have governments sought to bring down high levels of debt, or to prevent excessive debt levels from arising in the first place? Do these approaches need to be modified to account for the impact of COVID on debt stocks? How will demographic developments and climate change affect debt sustainability? By addressing these questions, the course will seek a nuanced understanding of the role of public debt in the economy and its benefits and risks.

Class Format: Students will meet the professor in pairs, approximately one hour each week.

Requirements/Evaluation: During a typical week one student in the pair will write a short paper, and the other will respond. The following week the roles will be reversed. Evaluation will be based on the papers written as well as the responses.
Prerequisites: For CDE Fellows: fall semester courses. For undergraduates: Econ 251, Econ 252, and Econ 255, or permission of instructor.

Enrollment Limit: 10

Enrollment Preferences: CDE Fellows, Economics majors.

Expected Class Size: 10

Grading:

Distributions: (D2)

ECON 540  (F)(S)  Research Studies

In this course, each Fellow carries out an individual research study on a topic in which they have particular interest, usually related to one of the three seminars. The approach and results of the study are reported in a major paper. Research studies are analytical rather than descriptive and in nearly all cases include quantitative analyses. Often the topic is a specific policy problem in a Fellow's own country.

Class Format: research

Grading: yes pass/fail option, yes fifth course option

ECON 545  (S)  Growth Diagnostics  (QFR)

Cross-listings: ECON 345 ECON 545

Secondary Cross-listing

Evidence from across the developing world suggests that the "binding constraints" to economic growth can be remarkably heterogeneous—i.e., the growth potential of stagnating or underperforming economies may be unlocked in a large variety of ways. For instance, pre-reform China had been constrained by poor supply incentives in agriculture, whereas Brazil has been held back by an inadequate supply of credit, South Africa by poor employment incentives in manufacturing, El Salvador by insufficient production incentives in tradables, Zimbabwe by bad governance, and so forth. How can developing-country policymakers determine country-specific constraints like these, thus enabling them to pragmatically pursue a selected set of growth-promoting policies rather than attempting to implement a "laundry list" of reforms that are naively based on "best practice" rules-of-thumb?

This course will serve as a primer on "growth diagnostics," an empirically-driven analytical framework for identifying the most binding constraints to economic growth in a given country at a point in time, thereby allowing policymakers to develop well-targeted reforms for relaxing these constraints while being cognizant of the nation’s prevailing economic, political, and social context. The course will first build on the basic theories and empirics of economic growth to elucidate the diagnostic framework and will then employ a wide range of country-specific case studies to demonstrate how the framework can be operationalized for policy making. Throughout the semester, students will be required to work in groups, each representing a given developing or emerging-market economy, in order to build a growth diagnostic for their group’s assigned country by the end of the course.

Requirements/Evaluation: extensive class participation, two short (5-page) papers, two 15-page team papers comprising a country growth diagnostic, and a team presentation on the diagnostic

Prerequisites: for undergraduates ECON 251, ECON 252, and either ECON 255 or STAT 346

Enrollment Limit: 19

Enrollment Preferences: CDE fellows and senior Economics majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 345(D2) ECON 545(D2)
Quantitative/Formal Reasoning Notes: The course material will be drawn heavily on mathematical and statistical models of economic growth and macroeconomic development, and students will be required to routinely develop mathematical models and/or conduct econometric analysis in their assignments.

Not offered current academic year

ECON 548 (S) Human Capital and Development

Cross-listings: ECON 548 ECON 348

Secondary Cross-listing

Children around the world face unequal opportunities to attend school, and to learn. This course will introduce students to economic studies of education, focusing on pre-school through high school. The course will mainly cover research in low-income and middle-income countries, but will also discuss connections to policy debates in the United States and elsewhere. Topics will include the importance of early-life conditions and investments; the connections between health and education; the roles of information, incentives, inputs, and technology; research methods; and decisions between policy options. Students in this course will analyze data themselves, and will critically read published research.

Requirements/Evaluation: Grades are principally based on readings questions, problem sets, two in-class exams, and short presentations by students.

Prerequisites: ECON 255, POEC 253, STAT 346, or permission of the instructor. CDE Fellows should have taken ECON 502 or 503.

Enrollment Limit: 20

Enrollment Preferences: Economics majors and CDE Fellows

ECON 570 Data Science for Economic Analysis

The goal of data science is to use empirical information from a broad range of sources to improve our understanding of the world around us. Economists increasingly rely on the tools of data science to access novel sources of data and information, characterize the economic environment, and conduct empirical analysis. This course provides an introduction to data science tools most relevant for economic analysis including data visualization, exploratory data analysis, and statistical learning. The objective of the course is to help students: (i) formulate economic research questions that can be explored using data science tools, (ii) identify sources of data and prepare data for analysis, (iii) produce persuasive visualizations, and (iv) analyze data using both classical statistics and machine learning.

Class Format: The course includes traditional lectures, interactive activities in both Stata and R, and in-class presentations by students. Some prior knowledge of either Stata or R is helpful, but not required.

Requirements/Evaluation: Grades are based on in-class participation and performance on two take-home exams as well as problem sets and data visualization/analysis projects.

Prerequisites: ECON 255 or STAT 201, STAT 202, or STAT 346 or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: Economics majors

Expected Class Size: 25

Grading:

Distributions: (D2)

ECON 571 (S) Global Health Policy Challenges
Poor health is both a cause and a consequence of poverty. It can trap individuals in poverty and reduce aggregate economic growth. This course will be structured around major global health challenges, including maternal health, infectious diseases (e.g. HIV/AIDS, tuberculosis, COVID), neglected tropical diseases (e.g. malaria, dengue, Ebola), nutritional deficiencies, and mental health. We will focus primarily, but not exclusively, on health in low-income countries in this course. Students will read papers and conduct empirical assignments related to the various topics, as well as develop their own research idea during the semester related to one of the topics covered.

**Requirements/Evaluation:** empirical problem sets, midterm exam and a substantive research paper that includes some analysis of existing data

**Prerequisites:** ECON 251 and (POEC 253 or ECON 255 or STAT 346) or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** juniors and sophomores

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

- Stephen J. Tifft, Professor of English
- Emily Vasiliauskas, Associate Professor of English; on leave Fall 2023
- Ricardo A Wilson, Associate Professor of English; on leave 2023-2024

The study of English allows students to explore the critical role language and literature play in the shaping of human culture and social experience. Department courses cover a variety of national, regional, and diasporic literary traditions; acquaint students with a range of genres and cultural practices, including poetry, prose, drama, film, and mixed or emerging media; and employ a range of critical and methodological approaches. All foster skills of critical analysis, interpretation, and written argument and expression. By cultivating a sophisticated awareness of linguistic and literary representation, and by encouraging the ability to read critically and write persuasively, the English major provides students with intellectual and analytical skills that they can draw upon to follow a wide range of paths.

COURSES AND COURSE-NUMBERING

100-level Courses

At the introductory level, the department offers a range of writing-intensive 100-level courses which focus on interpretive skills as well as skills in writing and argumentation. All 100-level courses are designed primarily for first-year students, although they are open to interested sophomores, juniors, and seniors. A 100-level course is required for admission to most upper-level English courses, except in the case of students who have placed out of the introductory courses by receiving a score of 5 on the Advanced Placement examination in English Literature or of 6 or 7 on the Higher Level International Baccalaureate English exam.

200-level Courses
Most 200-level courses are designed primarily for qualified first-year students, sophomores, and junior and senior non-majors, but they are open to junior and senior majors and count as major courses. Several 200-level courses have no prerequisites; see individual descriptions for details. 200-level Gateway courses are designed for first- and second-year students who are considering becoming English majors, or who are interested in pursuing upper-level course work in the department. All Gateway courses are writing-intensive. First-year students who have placed out of the 100-level courses are encouraged to take a Gateway course as their introduction to the department.

300-level Courses
The majority of English Department courses are designed primarily for students who have some experience with textual analysis, and are open to sophomores, juniors, and seniors. First-year students who wish to enroll in a 300-level course are advised to consult the instructor.

400-level Courses
400-level courses are intensive, discussion-oriented classes. Limited to 15 students, 400-level courses should be attractive to any student interested in a course that emphasizes student initiated independent work. Majors considering Honors work and who wish to prepare for it are urged to take a 400-level course before senior year.

ADVISING
All students who wish to discuss English Department offerings are invited to see any faculty member or the department chair. Prospective majors are particularly encouraged to discuss their interest with faculty as early as possible. In the spring of the sophomore year, newly declared majors must meet with a faculty member to discuss the Major Plan. Declared majors will be assigned a permanent advisor shortly after they declare the major.

MAJOR
Major Plan. Shortly after declaring the major, all English majors must complete a short written plan for how they intend to complete the major. In this plan, students should consider how they can most fruitfully explore the broad range of genres, historical periods, and national and cultural traditions that literature in English encompasses, and how they wish to focus upon a particular intellectual interest within English. Students are encouraged to begin discussing the Major Plan with a faculty member as soon as they become interested in the major; junior majors must meet with faculty advisors to revisit Major Plans as they register for courses. There will also be informational meetings and web resources available to assist new majors in developing the Major Plan.

Students majoring in English must take at least nine courses, including the following:

- Any 100-level English class. Students exempted by the department from 100-level courses will substitute an elective course.
- At least one 200-level Gateway course (grouped at the end of the 200-level course descriptions). Gateway courses are designed for first- and second-year students contemplating the major or intending to pursue more advanced work in the department; these courses focus on analytical writing skills while introducing students to critical methods and historical approaches that will prove fruitful as they pursue the major. (Note: a Gateway course can fulfill a Literary Histories or Criticism requirement as well as the Gateway requirement.)
- At least one Criticism course (identified in parentheses at the end of the course description). A course fulfilling the criticism requirement entails a sustained and explicit reflection on problems of critical method, whether by engaging a range of critical approaches and their implications or by exploring a particular method, theorist, or critic in depth. (Please note that when a Criticism course is also listed as satisfying the Literary Histories requirement, the course may be used to satisfy either requirement, but not both.)
- At least three courses at the 300-level or above.
- At least three courses designated as Literary Histories. Literary Histories courses concern the emergence or development of a specific literary tradition or problem and/or its transformation across multiple historical periods. Literary Histories are identified by LH-A, LH-B, or LH-C in parentheses at the end of the course description.
  - LH-A: courses dealing primarily with literature written before 1800.
  - LH-B: courses dealing primarily with literature written before 1900 but not included in LH-A (courses on literature from 1800-1900 and some surveys).
  - LH-C: courses dealing primarily with literature written after 1900.
- Of the three Literary Histories courses required for the major, at least two must focus on literature before 1900 (LH-A or LH-B), with at least one of these focusing primarily on literature before 1800 (LH-A). For further clarification, please see the English Department website at english.williams.edu.

Courses Outside the Department
The department will give one elective course credit toward the major for a course taken in literature of a foreign language, whether the course is taught in the original language or in translation. Such a course may not be used to satisfy the department’s Literary Histories, Criticism, or Gateway
STUDY AWAY

Majors who plan to study abroad should be proactive in understanding how this will affect their plans for completing major requirements. Such plans should be discussed in advance with the student’s advisor as well as the department’s academic assistant. Approval of departmental credit for courses taken off-campus must be obtained in advance from the department chair.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments. In most cases we require syllabus, readings, and assignments. The one exception is the Oxford Program. We need only the title and description for that particular program.

Does your department or program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes, for most programs we allow only two electives towards the major. Again, the exception is the Oxford Program where we allow four.

Does your department or program place restrictions on the types of courses that can be awarded credit towards your major?

Yes.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes, students cannot receive credit for the Gateway requirement. It is difficult to receive credit for our criticism requirement as well.

Are there specific major requirements in your department or program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. Students must be aware that if they do not take a Gateway before their study away they will have to do it when they come back. Likewise for our criticism requirement.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

This happens most often when the student does not come to see the Chair before they leave or if they change their plans once they are away at their program.

THE DEGREE WITH HONORS IN ENGLISH

The English Department offers three routes toward honors: a creative writing thesis, a critical thesis, and a critical specialization. Candidates for the program should have at least a 3.5 average in courses taken in English, but admission will not depend solely on course grades. Formal application to pursue honors must be made to the director of honors (Emily Vasiliauskas) by April of the junior year.

All routes require students to take a minimum of ten regular-semester courses (rather than the nine otherwise required for the major). Students doing a creative writing thesis must, by graduation, take at least nine regular semester courses, and, in addition, take English 497 (Honors Thesis) and English W31 (Senior Thesis, winter study) during senior year. Students writing a critical thesis must, by graduation, take at least eight regular-semester courses, and, in addition, take English 493 and English 494 (Fall Honors Colloquium and Spring Honors Thesis) and English W31 (Senior Thesis, winter study) during senior year. Students pursuing a critical specialization must, by graduation, take at least eight regular-semester courses, and, in addition, take English 493 and English 494 (Fall Honors Colloquium and Spring Honors Thesis) and English W30 (Senior Thesis: Specialization Route, winter study) during senior year.

Creative Writing Thesis

The creative writing thesis is a significant body of (usually) fiction or poetry completed during the fall semester and winter study of the senior year, and usually including revised writing done in earlier semesters. (With permission of the honors committee, the thesis may be undertaken during the winter study period and the spring semester of the senior year.) Requirements for admission include outstanding work in an introductory and an advanced workshop (or, in exceptional cases, not including poetry or fiction, a substantial body of work in place of an advanced workshop), a recommendation from one of the creative writing teachers (who will then act as thesis advisor), and the approval of the departmental honors committee. A creative thesis begun in the fall is due on the last day of winter study; one begun in winter study is due the third Monday after spring break. The methods of evaluation are identical to those for critical projects (but their page limits do not apply).
Critical Thesis

The critical thesis is a substantial critical essay written during both semesters as well as the winter study period of the senior year. It must consider critical and/or theoretical as well as literary texts. The thesis is normally about 15,000 words (45 pages); in no case should it be longer than 25,000 words (75 pages). The proposal, a 3-page description of the thesis project, should indicate the subject to be investigated and the arguments to be considered, along with a bibliography. The finished thesis is due on the third Monday following spring break. After the critical thesis has been completed, students publicly present their work.

Critical Specialization

The critical specialization route is a series of forays into a broad area of interest related to work undertaken in at least two courses. At least one of these courses must be in the English Department, and both need to have been taken by the end of fall term in senior year. The specialization route entails: (1) a set of three 10-page essays which together advance a flexibly related set of arguments; (2) an annotated bibliography (5 pages) of secondary sources, explaining their importance to the area of specialization; (3) a meeting with the three faculty evaluators (one of whom is the advisor) during the last two weeks in February to discuss the trio of essays and the annotated bibliography; (4) a fourth essay of 12 pages, considering matters that arose during the faculty-student meeting and reflecting on the outcome of the specialization. The 3-page proposal for the specialization should specify the area and range of the study, the issues likely to be explored, and the methods to be used for their investigation. It should also describe the relation between previous course work and the specialization, and include a brief bibliography of secondary works. The first two papers are due by the end of fall semester; the third paper is due at the end of winter study; the bibliography is due mid-February; and the final paper is due the third Monday after spring break.

Applying to the Honors Program

All students who wish to apply to the honors program are required to consult with a prospective faculty advisor and the director of honors before April of the junior year. Prior to pre-registration in April, candidates for critical theses and specializations submit a 3-page proposal that includes an account of the proposed project and a bibliography. Students applying to creative writing honors submit a brief proposal describing the project they wish to pursue. Decisions regarding admission to the honors program will be made by the end of May. Admission to the honors program depends on the department’s assessment of the qualifications of the student, the feasibility of the project, and the availability of an appropriate advisor.

When pre-registering for Fall classes of their senior year, students who are applying to critical honors should register for the Honors Colloquium as one of their four courses.

Progress and Evaluation of Honors

While grades for the fall and winter study terms are deferred until both the honors project and review process are completed, students must do satisfactory work to continue in the program. Should the student’s work in the fall semester not meet this standard, the course will convert to a standard independent study (English 397), and the student will register for a regular winter study project. A student engaged in a year-long project must likewise perform satisfactorily in winter study (English W30 or W31) to enroll in English 494 in the spring semester. When such is not the case, the winter study course will be converted to an independent study “99.”

Students are required to submit one electronic copy to the department academic assistant at pmalanga@williams.edu. Students should also give a final hard copy to their thesis advisor. Both the electronic copy and the hard copy are due on the dates applicable to the type of project pursued (see the above descriptions of each type of project for the due dates). All honors projects are evaluated by the advisor and two other faculty members. The colloquium director, in consultation with the advisor, gives the first semester grade, and the advisor determines the student’s second semester grade in honors, while the two external readers recommend to the department that the project receive Highest Honors, Honors, or no Honors. Honors of any kind are contingent upon satisfactory completion of courses in the major during the senior year. Highest Honors are normally awarded only to students whose performance in both the honors program and regular courses in the major has been exceptional.

ENGL 102 (W) Representing US Childhoods

Childhood as it is understood today in the US is a relatively recent invention. In this course we will read works of literature, history, and cultural studies, as well as consider such mediums as art, films, podcasts and music, and analyze material culture (objects such as toys and clothing) associated with childhood and children in the U.S. Along the way, we will consider questions such as how childhood has emerged as a distinct stage of life; how definitions of childhood vary (or not) across differences such as race, gender, class; what places and spaces define childhood; how writers and artists contribute to constructing particular visions of childhood and what the resonances of these representations are; and what it means to “grow up.” An emphasis will be placed on learning to analyze closely a variety of texts and objects.

Requirements/Evaluation: There will be at least three short (2-5 page) writing assignments; a revision of at least one of those papers; and a short final reflection essay. As an intensive winter study, this class will require approximately 12-15 hours of in-person class time a week, as well as time
ENGL 103  (W)  The Art of the Undergraduate Essay  (WS)
Writing papers for college courses feels different -- and, for most people, more challenging -- than writing papers in high school. No longer can you get away with papers written according to the old formula,"tell-'em-what-you're-going-to-tell-'em, tell 'em, tell-'em-what-you-told-'em" formula. Professors now assume that you will design complex arguments supported by subtle evidence and in-depth analysis. In this course, we will study and practice the art of the college essay. We will work in three disciplines or fields: literature, interdisciplinary social studies, and visual art/film. At the end of this intensive course, you will feel comfortable answering the prompts and assignments in a wide range of courses. Readings will be relatively short; assignments will be frequent; drafts and revisions will be built into the curriculum.

Class Format: During the visual art unit, we may visit local museums. Drop-in office hours will be available several afternoons every week.
Requirements/Evaluation: attendance and active classroom participation (including occasional field trips); daily writing exercises and several short papers; regular one-on-one meetings with professor for writing critiques.
Prerequisites: permission of a dean
Enrollment Limit: 12
Enrollment Preferences: students who need to make up a deficiency
Expected Class Size: NA
Grading: no pass/fail option, no fifth course option
Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in ENGL 103 and ENGL 42.
Distributions: (D1)  (WS)
Writing Skills Notes: This in-person class will include regular time for writing with plenty of feedback during the drafting process.
Attributes: ENGL Criticism Courses
Not offered current academic year

ENGL 104  (F)  Borders, Migration, and the Literatures of Displacement  (DPE)  (WS)
In this course we will read literature that is about migration experiences, border-crossings, and various forms of colonial displacement. Our aim in reading such literature will be not merely to study the problem of borders, displacement, and forced migration from a top-down perspective (like that of the analyst who, for the best of reasons, seeks to understand an issue in order to resolve it); but to shift our own perspective away from a position that assumes that the problem is not truly ours in the first place to deal with. While the contemporary issue of global migration and its particular manifestations in and around the site of the U.S.-Mexico border will be a central component of this course, our readings will not be limited to texts that deal exclusively with the historical present or the U.S.-Mexico border alone. As such, readings will likely include work by figures such as: Américo Paredes, Gloria Anzaldúa, Jason De León, Carmen Boulosia, Héctor Tobar, Javier Zamora, Tayeb Salih, Karen Tei Yamashita, Amara Lakhouss, and others.
Requirements/Evaluation: at least 20 pages of writing, regular homework assignments, class participation
Prerequisites: none
Enrollment Limit: 19
**Enrollment Preferences:** first-year students who do not have a 5 on the AP and have not previously taken a 100-level English class

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** The instructor will provide written feedback on student work. Students will receive timely feedback on essay assignments with suggestions for improvement and will revise their essays.

**Difference, Power, and Equity Notes:** This course offers students the opportunity to think critically about the experiences of socially marginalized groups throughout the globe with a particular emphasis on the Latin American diaspora in the U.S. It emphasizes forms and experiences of displacement produced by the histories of European colonialism and U.S. imperialism.

**Attributes:** LATS Countries of Origin + Transnationalism Elect

Fall 2023

SEM Section: 01 Cancelled

ENGL 105 (F) American Girlhoods (DPE) (WS)

**Cross-listings:** WGSS 105 ENGL 105

**Primary Cross-listing**

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of “manners and morals” does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

**Requirements/Evaluation:** at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 105(D2) ENGL 105(D1)

**Writing Skills Notes:** Students do at least 20 pages of writing (4-5 papers) and are required to revise several papers. We also devote significant class time to talking about successful academic writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equality and power and what kinds of literary and cultural forms writers utilize to illuminate these differences.

Fall 2023

SEM Section: 01 TR 11:20 am - 12:35 pm Kathryn R. Kent

ENGL 107 (S) Temptation (WS)

**Cross-listings:** COMP 106 ENGL 107

**Primary Cross-listing**

We want most those things we can’t--or shouldn’t--have. Or, to put it another way, it is when limitations are placed on our actions by law, religion, or the facts of our own biology that we experience desire most acutely. In this course, we will examine fictional narratives, lyric poems, and philosophical
meditations in which people are tempted to act against their better judgement. Free will, ambition, temperance, suspense, despair, and repression will be our conceptual preoccupations. We will get to know such writers and artists as Homer, Euripides, Ovid, Augustine, Shakespeare, Donne, Milton, Laclos, Mozart, Freud, Frost, and Scorsese.

**Requirements/Evaluation:** Four five-page papers, in-class presentation, thoughtful participation in discussions

**Prerequisites:** None

**Enrollment Limit:** 19

**Enrollment Preferences:** First-year students who have not taken or placed out of a 100-level ENGL course

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 106(D1) ENGL 107(D1)

**Writing Skills Notes:** Students will write four five-page papers, each of which will receive timely and extensive written feedback from the instructor. Students will be invited to discuss their papers with the instructor at the draft stage.

Not offered current academic year

**ENGL 108 (F)(S) Idleness & Insubordination: Literatures Against Work (WS)**

Under the regime of idleness, to kill the time, which kills us second by second, there will be shows and theatrical performances always and always.

--Paul Lafargue, "The Right to Be Lazy" What right do we have to stay in bed? To laze about in the heat of the day? What is the relationship between loafing and literary production? Departing from the ancient paradigm of otium (idleness, leisure, retirement) and negotium (work, service, activity), this course tracks the diversions and detours by which artists and writers have insisted on not keeping busy. We'll consider the possibilities and limits of idleness in the space of the household and on Wall Street; we'll read about people who literally wander and those who stay in place and say, "I prefer not to." Encountering Virgil's world-weary shepherd-songs, Shakespeare's colonial imaginary, and contemporary meditations on pastoral retreat, we'll ask after the difference between idleness as rest and idleness as protest. What poetic, narrative, and visual forms constitute an "idle aesthetic"?

Alongside literature and a few films, we'll dip into a selection of theoretical essays that think about how repeated refusals to work can cultivate new subjectivities under capitalism. What forms of creativity and community are developed when we withhold our labors? How do such forms resist and remake the world? Our inquiry will likely include works by Nanni Balestrini, Zora Neale Hurston, June Jordan, Clarice Lispector, Herman Melville, Andrew Marvell, Arthur Rimbaud, Ed Roberson, Ousmane Sembène, Agnès Varda, among others.

**Requirements/Evaluation:** 4-5 papers, with revisions; a creative assignment. Regular discussion posts, self-reflections, and annotation/journal-entries. Two conferences with instructor.

**Prerequisites:** None

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students who have not taken or placed out of a 100-level ENGL course

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Students will produce at least 20 pages of polished writing across the semester. We'll devote class time regularly to discussing successful writing and revisions skills. Students will receive timely feedback on their assignments. As regular writing is part of an engaged reading practice, students will also be asked to do frequent short informal exercises (in class and out).

**ENGL 109 (S) Narrating Change (DPE) (WS)**

How do we narrate change? Change is radical (from radix, "root," thus pertaining to what is essential) when it alters how we experience, think, and act.
If we change radically, and the structure of our experience is altered, how are we then to connect what comes before to what comes after? On the other hand, if change does not cause such a transformation in the self, then how is it experienced? The works we will consider in this class will help us examine the ways human beings work through, think about, and represent change.

Requirements/Evaluation: Four writing assignments, participation in classroom discussions and roundtables, and at least two individual conferences.

Prerequisites: no prerequisites

Enrollment Limit: 19

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will write more than 20 pages. They will receive extensive feedback on their writing from me and will revise and expand one essay. Texts read in class will also be examined as models for how to organize thought through writing.

Difference, Power, and Equity Notes: Almost all readings for this class require sustained engagement with questions of power, identity, and socioeconomic inequality.

Spring 2024

SEM Section: 01 MR 2:35 pm - 3:50 pm Paresh Chandra

ENGL 110 (F) Ruined America: New American Dystopian Novels (WS)

Dystopian novels have become commonplace. But why now? Why do we seem to be experiencing a heightened anxiety over apocalypse? We will consider two types of dystopian visions—those that present a post-apocalyptic world, and those that conjure up wrecked societies out of current evils. Both types present the world we know now as either lost or full of losers. As we visit a variety of recently imagined American dystopias, we will focus on the ethical dilemmas imposed by prospects of our diminished state: the inevitable issues of class, and the divisions of race and gender; the prospects of anarchy and political oppression; and the threat of technology to our identity and our environment. The class will also focus on techniques to improve your critical reasoning and analytical skills with the goal of writing interesting and well-argued essays.

Requirements/Evaluation: Two five-page essays, and one final 10-page essay, as well as several short writing assignments. Active seminar participation.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: First-year students

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: The class is primarily design as a writing intensive. I plan on assigning two five-page essays and one 8-10 page essay. The shorter essays will be graded with comments, and either be peer reviewed, or short passages will be selected for class discussion and revision. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: ENGL Criticism Courses

ENGL 111 (S) Poetry and Politics (WS)

"Poets are the unacknowledged legislators of the world" wrote Shelley in his 1821 "Defence of Poetry," countering the widely held view of poetry's airy irrelevance to the material progress of humanity. His claims are echoed a century and a half later in Audre Lorde's "Poetry is Not a Luxury," in which she argues that poetry is a vital and essential part of her own political struggle as a Black lesbian feminist. But when W.B. Yeats--himself a very politically involved poet--writes in 1917 that "from the quarrel with others comes rhetoric; from the quarrel with ourselves comes poetry," he implies that poetry would suffer from too much involvement with the "quarrel with others" that is politics. And when W. H. Auden writes in 1939 that "poetry makes nothing happen" he appears to locate poetry's value precisely in its irrelevance to politics as such. This course will focus on the vexed relationship
between poetry and political struggle, reading predominantly poetry and poetics (writings about poetry) of the last two centuries in an effort to answer the questions: what can poetry do for politics? what does politics do for (or to) poetry? Is poetry essential to political struggle, or do poetry and politics mix only to the detriment of both, producing, on the one hand, bad poetry, and on the other, mere distractions from the "real" work of politics? The primary goal of the course is to make students better readers and appreciators of poetry, and better readers and writers of argumentative prose.

Class Format: discussion
Requirements/Evaluation: graded essays, final in-class team project
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course
Expected Class Size: 14
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (WS)
Writing Skills Notes: Students will write 5 essays total. After each essay, students meet individually with the professor to discuss their writing and plan specific improvements in their writing skills. Two of the essays will be revised after peer-review tutorials.

Spring 2024
SEM Section: 01 MWF 10:00 am - 10:50 am Alison A. Case

ENGL 112 (S) Introduction to Literary Criticism (WS)
What determines meaning? How we interpret is inevitably inflected by our own priorities and preoccupations, by the contexts in which we read, by literary and other conventions, and by the historical and personal circumstances of a work's composition, as well as deriving from the particular words of a text and from the mutable life of language itself. So how to go about the task of reading literature well? This course will focus on key introductory methods and critical approaches, and is intended to develop your skills in reading, writing about, discussing and interpreting literary texts. Our readings--mainly short fiction and poetry, along with selected introductory work in critical theory--will invite increased self-consciousness about literary form, the functions of criticism, and the process of reading and interpretation. In the last weeks of the course, we will address longer texts, including at least one play, one novel and one film.

Requirements/Evaluation: Four papers rising from 3-6 pages, discussion board postings, and contribution to class discussions.
Prerequisites: None
Enrollment Limit: 19
Enrollment Preferences: First-year students who have not taken or placed out of a 100-level ENGL course
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)
Writing Skills Notes: Four papers, rising from 3 pages for the first, to 6 pages for the last. Regular postings on Glow discussion boards. Extensive written feedback on longer papers, plus the option of revision.

Spring 2024
SEM Section: 01 MWF 10:00 am - 10:50 am James L. Pethica

ENGL 113 (F) The Feminist Poetry Movement (DPE) (WS)
Cross-listings: AMST 113 WGSS 113 ENGL 113
Primary Cross-listing
Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the
Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery
Requirements/Evaluation: two-three short analysis papers, creative (1-2 pages), Perusall, curated final project (archival exhibit and digital project), presentations
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first years
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 113(D2) WGSS 113(D2) ENGL 113(D1)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: Perusall annotation, three four-to-five-page graded papers, one creative assignment, and a final digital research project (8-10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

ENGL 114 (F) Literary Speakers (WS)
The general purpose of this course is to develop students' skills as interpreters of poetry and short fiction. Its particular focus is on how—and with what effects—poets create the voices of their poems, and fiction writers create their narrators. We'll consider the ways in which literary speakers inform and entice, persuade and sometimes deceive, their audiences. Readings will include texts from various historical periods, with particular emphasis on twentieth-century writers (including works by James Joyce, Henry James, Vladimir Nabokov, Robert Frost, Toni Cade Bambara, Raymond Carver, and Seamus Heaney).

Requirements/Evaluation: 4 or 5 papers, of varying lengths, spaced throughout the term (about 15-20 pages total); detailed feedback will be provided on each paper, along with opportunities for revision. There will be no examinations in this course.
Prerequisites: None
Enrollment Limit: 19
Enrollment Preferences: first-year students and then sophomores who have not yet taken a 100-level course in English
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (WS)
Writing Skills Notes: There will be 4-5 papers assigned, spaced evenly throughout the term, ranging in length from 1-2 pages to about 5 pages. Detailed feedback will be provided on each paper. There will be opportunities for revisions, and for conferences before and after each paper. At least
two classes during the term will be specifically devoted to issues related to paper writing.

Fall 2023

SEM Section: 01      Cancelled

ENGL 115  (F)  The Literature of Sports (DPE) (WS)

Cross-listings:  AFR 115 ENGL 115

Primary Cross-listing

The ubiquity of the sporting event, the athlete as hero, the athlete as failure, the crowd, the fan, the stadium, and all of the complex conflicts therein have long been the subjects of some of the finest writing in America and throughout the world. Writers have used sport as a context through which to explore and examine ideas such as beauty, the sublime, tragedy, politics, race, class, sexuality, and gender. This course will focus on poetry, fiction, and non-fiction invested in the public spectacles and private revelations of sport ranging from the poetics of praise to issues of urbanism, colonialism, globalization with readings by Pindar, Rankine, CLR James, Baldwin, Hemingway, Oates, DeLillo, and many others.

Requirements/Evaluation:  Students will be expected to complete a number of short (5 pages or less) papers during the semester and one longer paper (8-10 pages) at the end of the semester.

Prerequisites:  None.

Enrollment Limit:  14

Enrollment Preferences:  first-year students who have not taken or placed out of a 100-level ENGL course.

Expected Class Size:  14

Grading:  yes pass/fail option,     yes fifth course option

Distributions:  (D1)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 115(D1) ENGL 115(D1)

Writing Skills Notes:  Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes:  This course will focus on literature about sports that addresses, among other topics, civil rights activism, gentrification, race dynamics and race relations both inside and outside of the USA, American exceptionalism, sociocultural construction of emotional displays, mental health, religious conflict, and anti-blackness.

Not offered current academic year

ENGL 116  (F)  The Remix: Adaptation and Revelation (WS)

This course explores the ideas of remaking and adaptation. We examine twentieth and twenty-first-century fiction, poetry, film, and hybrid texts that interact with subject matter stretching from Greek mythology to New World castaway stories to global pandemics. What is the nature of the work they attempt? What is lost and gained in these re-visions? In response to these questions, emphasis is placed on critical reading and writing (and rewriting), as well as on research skills. Works considered throughout the term come from, among others, Jorge Luis Borges, Anne Carson, J.M. Coetzee, Alfonso Cuarón, and Natasha Trethewey.

Requirements/Evaluation:  at least 20 pages of writing; GLOW posts; class participation

Prerequisites:  none

Enrollment Limit:  14

Enrollment Preferences:  first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size:  14

Grading:  yes pass/fail option,     yes fifth course option

Distributions:  (D1)  (WS)

Writing Skills Notes:  Students will do at least 20 pages of writing (4 papers) and will be required to significantly revise one paper. Students will also provide two detailed editorial responses to the work of another student. Significant class time will be spent covering strategies for effective and persuasive academic writing. Throughout the semester, students will receive written feedback from the instructor with specific suggestions for revision and improvement.
ENGL 117  (F)(S)  Introduction to Cultural Theory  (WS)

Cross-listings:  COMP 117 ENGL 117

Primary Cross-listing

This course has a clear purpose. If you had signed up for a course in biology, you would know that you were about to embark on the systematic study of living organisms. If you were registered for a course on the American Civil War, you would know that there had been an armed conflict between the northern and southern states in the 1860s. But if you decide you want to study "culture," what exactly is it that you are studying? The aim of this course is not to come up with handy and reassuring definitions for this word, but to show you why it is so hard to come up with such definitions. People fight about what the word "culture" means, and our main business will be to get an overview of that conceptual brawl. We will pay special attention to the conflict between those thinkers who see culture as a realm of freedom or equality or independence or critical thought and those thinkers who see culture as a special form of bondage, a prison without walls. The course will be organized around short theoretical readings by authors ranging from Matthew Arnold to Laura Mulvey, but we will also, in order to put our new ideas to the test, watch several films (mostly of the class's choosing) and listen to a lot of rock and roll. Why do you think culture matters? Once you stop to pose that question, there's no turning back.

Class Format: discussion

Requirements/Evaluation: four formal writing assignments totaling 20 pages (three full essays + one lead-in assignment), informal writing twice weekly, class attendance and participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 117(D1) ENGL 117(D1)

Writing Skills Notes: Students will write three five- to seven-page papers, on which I will provide extensive feedback. Before writing their first papers, students will submit theses and introductions, which I will help them refine. We will hold three extra writing sessions, to discuss how best to organize arguments. Students will write informally before every class.

ENGL 118  (F)  Creative Non-fiction  (WS)

In this course we will read some of the most prominent practitioners of creative non-fiction--writers like John McPhee, Joan Didion, Malcolm Gladwell, Susan Orlean, Janet Malcolm, Joshua Foer, Zadie Smith and Oliver Sacks. Students will also write in a variety of non-fiction modes--explainers, profiles, essays, memoirs. We will probe the border between invention and fact and consider the ways that narratives are constructed.

Class Format: workshop

Requirements/Evaluation: four short exercises of three pages or less; three longer assignments of five pages; and a final assignment, which is a revision and expansion of an earlier essay

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 14
Graduation: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Four short exercises of three pages or less; three longer assignments of five pages; and a final assignment, which is a revision and expansion of an earlier essay. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Fall 2023

SEM Section: 01  TR 8:30 am - 9:45 am    John E. Kleiner

ENGL 120  (F)(S)  The Nature of Narrative  (WS)

Cross-listings: ENGL 120 COMP 111
Secondary Cross-listing

Narrative--storytelling--is a fundamental human activity. Narratives provide us with maps of how the world does or should or might work, and we make sense of our own experiences through the narratives we construct ourselves. This course examines the nature and functions of narrative using texts from a wide range of literary traditions, media, and genres. Readings may span classics (e.g. Homeric epic and/or The Tale of Genji), fiction ranging from nineteenth-century realism to postmodern experimentation (possibly including Kafka, Tolstoy, Garcia-Marquez, Toni Morrison, and/or James Baldwin), and visual literature from film and drama to graphic memoir (possibly including Mizoguchi Kenji, Art Spiegelman, Alison Bechdel, and/or Asghar Farhadi). We may also read some short works of literary theory from around the world to help us broaden our idea of what literature can be and do. All readings in English.

Class Format: The second half of the course may incorporate a modified tutorial format, where small groups meet with the instructor once a week, with students' papers and responses forming the basis of the discussion.

Requirements/Evaluation: Regular attendance and participation in class; short and mid-length writing assignments spaced throughout the semester; revision of selected assignments after receiving instructor feedback.

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Students considering a major in Comparative Literature

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 120(D1) COMP 111(D1)

Writing Skills Notes: Multiple writing assignments that build upon each other, including drafts and revisions, with substantial individualized feedback on writing from the instructor.

ENGL 123  (F)(S)  The Short Story  (WS)

The reading for this course will consist entirely of short stories by such writers as Poe, Hawthorne, James, Doyle, Hemingway, Faulkner, Gilman, Chopin, Cather, Toomer, McCullers, O'Connor, Borges, Nabokov, Kincaid, Saunders, Diaz, and Shepard. We will read one or two per class meeting; at the end of the course, we'll be reading one collection, by Raymond Carver. Reading short stories will allow us to pay close attention to the form of our texts, and to paragraphs, sentences, and words. The premise of the essays you will write is that short stories and short essays are both arts based on controlling the release of information and meaning, and that studying the two genres together will have reciprocal benefits for reading and writing.

Class Format: class meetings will be devoted almost entirely to discussion
Requirements/Evaluation: grades will be based on the five formal writing assignments, with rewards for improvement, plus class participation
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-year students who have not taken a 100-level English course; then sophomores who have not taken a 100-level English course
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)
Writing Skills Notes: There will be five formal writing assignments, totaling about twenty pages. My response to each paper will include extensive marginal comments on technical issues, and a typed page of comments on the ideas and structure of the paper as a whole. Final grades will be determined by both the student's intellectual engagement and his or her increasing mastery of the art of writing essays.

ENGL 130 Writing for the Humanities (WS)
Compelling academic prose is a rare beast. In this course we will investigate what makes for good academic writing and how we can produce it ourselves. We will begin with words, then progress to sentences, paragraphs, and essays. Our reading will be close, our writing closer. Topics include the following: Are adverbs incredibly important? When is less more, and when isn't it? Is your garden English, or is it Chinese? What is the "uneven U" and why does it work? How does your audience affect how you write? In addition to reading writing about writing by Orwell, Fish, Tufte, Hayot, and (inevitably) Strunk and White, we will look closely at academic prose out in the wild, both good and bad. This course is for anyone who is interested in exploring in more depth the craft of writing, whether you have always considered yourself a "good writer" or struggle to fill a single page (or both). Our focus will be on academic writing for the humanities, but the skills we will develop are relevant to many other contexts as well.
Requirements/Evaluation: Regular attendance and active participation in class; writing assignments ranging in length from sentences to essays of varying length (500 words to 5-7 pages).
Prerequisites: None
Enrollment Limit: 12
Enrollment Preferences: First- and second-year students
Expected Class Size: 12
Grading:
Distributions: (D1) (WS)
Writing Skills Notes: The course will center on explicit, in-depth discussion of writing. We will read and discuss both writing on writing, and examples of prose. Students will complete weekly writing assignments of varying lengths and degrees of formality on which they will receive feedback from the instructor with particular attention to the craft of writing; some assignments will also be shared with the rest of the class.
Not offered current academic year

ENGL 131 (F) All About Sonnets (WS)
Fourteen lines in a fixed pattern. When Sir Thomas Wyatt introduced the sonnet to England in the 1500s with his translations of Petrarch, the form quickly became entrenched in English, and has been in regular use ever since. Originally penned as expressions of idealized love, sonnets soon expanded to address other kinds of emotionally intense relationships--to God, Nature, art, a particular place, the State, oppressors--while still, obsessively, returning to love in all its myriad forms. This makes the sonnet, deeply personal though it is, also a kind of pocket-sized literary tradition, as each new generation of poets extends, disrupts, and comments upon the whole history of sonnets. "A sonnet is a moment's monument," wrote D.G. Rossetti (in, of course, a sonnet)--speaking of the sonnet's tendency to offer just a snapshot of the poet's mental and emotional state--but the tradition of producing numbered sequences of sonnets can also string those moments into a kind of narrative. Similarly, while the sonnet is founded in strong
feeling, it is also obsessed with logic, delighting in logical argumentation, contradictions and paradoxes. This course will focus on a broad range of sonnets, historically, geographically and thematically, as well as criticism and theory relating to sonnets. Studying sonnets that are variously inspiring, devastating, and lol funny, we will become Sonnet Experts, while developing broadly useful skills in careful reading, concise writing and sound argumentation. Poets will include Shakespeare, Wordsworth, Keats, Elizabeth Barret Browning, DG and Christina Rossetti, Claude McKay, Edna St. Vincent Millay, John Berryman, Seamus Heaney, Vikram Seth, and many, many more. No prior experience with poetry is presumed.

Class Format: first week in regular class meetings, followed by weekly tutorial meetings in pairs

Requirements/Evaluation: five tutorial essays 3-5 pages; five responses to partners tutorial essays; 10 sonnet paraphrases and/or "prose sonnets;" thoughtful participation in tutorial meetings

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Bi-weekly short analytic papers (1000 words) which will be critiqued in tutorial meetings and revised as needed. Bi-weekly critique of partner's paper. Regular sonnet paraphrases and or "prose sonnets" that will be critiqued for linguistic precision and succinctness.

ENGL 138  (F)  What is a Self? Investigations in Literature, Philosophy, and Psychology  (WS)

The experience of having a self (or a subjective point of view) informs and colors literally everything we think, see, and feel. And yet what is a self? Is it the unchanging essence of who we are as individuals? Or is it the historically contingent product of ever-changing cultural and political forces (like the media, gender norms, and ideologies about race, to name just a few)? Or, perhaps, is the belief that we have a self just one big illusion, as the Buddha suggested millennia ago and as modern philosophers and scientists have argued in their own different ways more recently? In this class, we'll explore the deep mystery of human existence that we call "the self" or "subjectivity," looking at various attempts to capture, represent, and explain it (even escape it!). Our investigations will be wide-ranging, looking at examples from literature, philosophy, religion, and psychology. Works we'll study include: Tim O'Brien's *The Things They Carried*, Toni Morrison's *Beloved*, and theoretical writings on the self by Plato, Thoreau, and Jean-Paul Sartre among others. We'll even try our hand at meditation, while learning about the Buddhist idea of "no self." Students who genuinely find the experience of the self puzzling and fascinating will get the most out of this class. Bring an open mind about what it is to have a mind in the first place.

Requirements/Evaluation: four essays totaling 18-20 pages; active class participation; participation in other short informal writing assignments.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Four essays (ranging in length from 4-6 pages long) in multiple drafts, adding up to 18-20 pages total. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

SEM Section: 02 TF 1:10 pm - 2:25 pm Bernard J. Rhie

ENGL 140  (F)  Introduction to Creative Writing: The Short Story

This course introduces students to the art of fiction writing through the crafting of short stories. Students sharpen their tastes and inclinations by reading and responding to short stories from significant contributors to the form. The writing exercises and overall course trajectory are designed to
build a writing community in order to facilitate a better understanding of students' own writing processes. Individual conferences with the instructor are a central part of the course.

Requirements/Evaluation: though students will be required to produce at least 30 mixed-genre pages, this is not a WS class, because of its emphasis on creative rather than critical writing

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students who have not taken a creative writing course; students who received an AP 5 in Literature are eligible

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: ENGL Creative Writing Courses

Not offered current academic year

ENGL 150  (S)  Expository Writing  (WS)
Writing clearly is the most important skill you can learn in college. Do you suffer from writer's block? Do you receive consistent criticism of your writing without also learning strategies for how to improve? This course is for students who want to learn how to write a well-argued, intelligible essay based on close, critical analysis of texts. We will derive our method for mastering the complex art of writing from Atul Gawande's bestselling book, The Checklist Manifesto. In addition to sharpening your skills in reading, note-taking and literary analysis, this class will give you tools for generating drafts, peer editing, revising, and polishing your writing. The majority of the readings for this course will be literary essays, mostly contemporary, mostly American.

Requirements/Evaluation: Requirements include active class participation (including peer-editing), drafts and revisions of four to five papers totaling at least 20 pages. Overall evaluation will include improvement and effort.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first-year students, especially students with demonstrated need for help with analytical writing

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)  (WS)

Writing Skills Notes: This course is devoted to the study of writing, focusing especially on expository essays. Four to five papers are assigned, totaling at least 20 pages. Special attention will be paid to drafts, revision and building peer editing skills. Regular, one-on-one meetings with professor will be encouraged.

SEM Section: 01    MW 11:00 am - 12:15 pm     Cassandra J. Cleghorn

ENGL 151  (F)  Lying About the Truth: Writing about Autobiographical Writing  (WS)
The goal of this course is to teach you how to write a clear, well-argued, intelligible and interesting analytical paper. We will spend most of our class time actively engaged in a variety of techniques to improve your critical reasoning and analytical skills, both written and oral. Though the skills you learn will be applicable to other disciplines, and a central purpose of the course is to improve all aspects of your writing, this is a literature class, designed partly to prepare you for upper level courses in the English Department, so we will, therefore, spend equal time on the interpretation of literature, in this case, contemporary American autobiographical fiction. All readers fall prey to it: the autobiographical fallacy--the conflation of author and narrator. Writers know readers are susceptible to it. A course designed to explore the uses and abuses of the autobiographical fallacy by contemporary American authors. How do writers of autobiographical fiction take advantage of this tendency? What role does the autobiographical play in a writer's authority? What's the relationship between reader and writer in autobiographical writing? What do writers of such fiction want from a reader, and how does encouraging the autobiographical fallacy get them what they want? Reading list may include: Tim O'Brien, Yiyun Li, Junot Diaz, ZZ Packer, Lorrie Moore, Amy Hempel, Nam Le, Dorothy Allison, Ocean Vuong.
**Requirements/Evaluation:** Several short essays, most with drafts and revisions, one student-led class discussion, written comments on published and student work, active participation in discussions.

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** Preference to First Year students who do not have a 5 on the AP Lit exam or a 6 or 7 on the IB and have not previously taken a 100-level course.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Five papers, of varying lengths, most of which will go through multiple drafts. Extensive time spent in and out of class on every stage of the writing process. Opportunities to meet with professor outside of class at any stage of writing. Revision built into the course assignments. Commenting on published and peer work as a way to further develop one's own editorial eye.

**Attributes:** ENGL Literary Histories C

---

**ENGL 152 (F) Family Matters: Family in Recent American Fiction (WS)**

"Anyone who has survived childhood has enough material to write for the rest of his or her life" (Flannery O'Connor). A course designed to explore the representations of family in recent American literature. Family is our first community, and in the literature of family one commonly accepted convention emerges: family members are morally bound to one another. These bonds of blood, both liberating and limiting, have always been a literary convention. In this course, we will examine recent American fiction that explores such bonds. What do such narratives claim we want from our families? What do such narratives claim we're willing to do to get it? Have recent narratives developed particular and characteristic strategies for approaching this topic? And are there importantly particularizing aspects of the American family? The goal of this course is to teach you how to write a clear, well-argued, and interesting analytical paper. We will spend most of our class time actively engaged in a variety of techniques to improve your critical reasoning and analytical skills, both written and oral. Though the skills you learn will be applicable to other disciplines, and a central purpose of the course is to improve all aspects of your writing, this is a literature class, designed partly to prepare you for upper level courses in the English Department, so we will, therefore, spend equal time on the interpretation of literature. Authors to be considered may include: Kali Fajardo-Anstine, Danielle Evans, Rick Moody, Junot Diaz, Amy Hempel, ZZ Packer, Lorrie Moore, Gish Jen, Cormac McCarthy, Edward Jones, among others.

**Requirements/Evaluation:** Active participation, written and verbal comments on published and peer work, the leading of one class discussion, five essays (2-7 pages each, most in multiple drafts, including a final radical revision of an essay of the student's choice).

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** First Year students

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Five essays ranging from 2-7 pages each, most in multiple drafts. Students will receive extensive written comments on their writing skills, with suggestions for improvement, and may choose to meet with the professor individually outside of class as often as they'd like. Students will also comment (verbal and written) on published work and their peers' drafts, operating under the assumption that becoming a better writer involves becoming a better reader.

*Not offered current academic year*

**ENGL 155 (S) Contemporary Mexican Cinema and the World (WS)**

**Cross-listings:** ENGL 155 COMP 155

**Primary Cross-listing**
This expository writing course is grounded in an exploration of contemporary Mexican cinema and develops students’ ability to critically write about film. We will focus on feature-length films, documentaries, and short films that not only grapple with Mexican history and identity but also those that travel beyond the borders of Mexico. The list of directors whose work will be considered includes Natalia Beristáin, Alfonso Cuarón, Jonás Cuarón, Guillermo del Toro, Alejandro González Iñárritu, Alejandra Márquez Abella, Kenya Márquez, Jorge Pérez Solano, and Patricia Riggen.

**Requirements/Evaluation:**
Active participation, written and verbal comments on peer work, five papers (including one revision)

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 155(D1) COMP 155(D1)

**Writing Skills Notes:** Students will do at least 20 pages of writing (4 papers) and will be required to significantly revise one paper. Students will also provide two detailed editorial responses to the work of another student. Significant class time will be spent covering strategies for effective and persuasive academic writing. Throughout the semester, students will receive written feedback from the instructor with specific suggestions for revision and improvement.

**Attributes:** LATS Countries of Origin + Transnationalism Elect

---

**ENGL 156 (S) New American Fiction** (WS)

The goal of this course is to teach you how to write a clear, well-argued, and interesting analytical paper. We will spend most of our class time actively engaged in a variety of techniques to improve your critical reasoning and analytical skills, both written and oral. Though the skills you learn will be applicable to other disciplines, and a central purpose of the course is to improve all aspects of your writing, this is a literature class, designed partly to prepare you for upper level courses in the English Department, so we will, therefore, spend equal time on the interpretation of literature, in this case, contemporary American fiction, examining the very, very recent (last thirty years) developments in American fiction. We will read short stories and novels by writers such as Danielle Evans, George Saunders, Kali Fajardo-Anstine, Mary Robison, Karen Russell, ZZ Packer, among others.

**Requirements/Evaluation:** Active participation, written and verbal comments on published and peer work, five essays (2-5 pages each, most in multiple drafts, including a final radical revision of an essay of the student's choice).

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** First-Year students

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Five essays ranging from 2-5 pages each, most in multiple drafts. Students will receive extensive written comments on their writing skills, with suggestions for improvement, and may choose to meet with the professor individually outside of class as often as they’d like. Students will also comment (verbal and written) on published work and their peers’ drafts, operating under the assumption that becoming a better writer involves becoming a better reader.

Not offered current academic year

---

**ENGL 158 (F) Expository Writing: Contemporary Linked Stories** (WS)

In this expository writing and writing intensive course, we will read and write about several collections of linked short stories about altered states of mind and body, immigrant experiences, and the magic of everyday life. We will examine linked stories as a form organizing narratives that can stand alone, but that resonate powerfully with one another, sharing themes, settings, and sometimes even characters. Texts may include Denis Johnson's *Jesus’ Son*, Bryan Washington’s *Lot*, Carmen Maria Machado's *Her Body and Other Parties*, and Alice Munro's *Juliet* stories. Class time will be split nearly equally between analysis of the assigned texts and active work with student writing, including freewriting, rewriting, sentence and paragraph
workshops, peer editing, and writing strategy sessions.

Requirements/Evaluation: 4 or 5 two-page assignments, two with required revisions; 4 five-page papers, all with required revisions; discussion participation; attendance.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: First preference goes to first-year students who have not received a 5 on AP LITERATURE or a 6 or 7 on the IB. Additional rules via English Department Website.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: This course is dedicated to the teaching of college-level expository writing. Students will complete several assignment sequences that build from 2-page response papers to 5-page argumentative essays and that include required revisions at multiple stages. About half the class time will be spent discussing and practicing writing strategies and mechanics.

Attributes: ENGL Literary Histories C

Not offered current academic year

ENGL 159 (F) Other People’s Lives: Contemporary American Memoir (WS)

The goal of this course is to teach you how to write a clear, well-argued, intelligible and interesting analytical paper. We will spend most of our class time actively engaged in a variety of techniques to improve your critical reasoning and analytical skills, both written and oral. Though the skills you learn will be applicable to other disciplines, and a central purpose of the course is to improve all aspects of your writing, this is a literature class, designed partly to prepare you for upper level courses in the English Department, so we will, therefore, spend equal time on the interpretation of literature, in this case, contemporary American memoir, examining the ways in which recent American memoirists represent themselves through prose and the choices they make in shaping their life stories. Given the techniques shared by novelists and memoirists, how firm is the line between fiction and non-fiction? What are the sources of a memoirist’s authority? What are the ethics of memoir-writing? What kind of relationships do memoirists seek with their readers, and how do they go about achieving them?

Requirements/Evaluation: Several short essays, most with drafts and revisions, one student-led class discussion, written comments on published and student work, active participation in discussions.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Preference to First Year students who do not have a 5 on the AP Lit exam or a 6 or 7 on the IB and have not previously taken a 100-level course.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Five papers, of varying lengths, most of which will go through multiple drafts. Extensive time spent in and out of class on every stage of the writing process. Opportunities to meet with professor outside of class at any stage of writing. Revision built into the course assignments. Commenting on published and peer work as a way to further develop one’s own editorial eye.

Attributes: ENGL Literary Histories C

Not offered current academic year

ENGL 161 (F) Metafiction (WS)

Cross-listings: ENGL 161 COMP 161

Primary Cross-listing

This course will examine ways in which literary works reflect on their status as texts. We’ll look at the formal pleasures and puzzles generated by techniques including frame narratives, recursion, and self-reference, in novels, films, and stories by Vladimir Nabokov, Kelly Link, Paul Park, and others. Ultimately, we will use our study of metafiction to focus inquiry into the socializing force of self-consciousness in human development. Note that students will be required to use, as well as interpret, metafictional techniques in their assigned writing, and will write two of their essays in collaboration
ENGL 162  (S)  Robots, Puppets, and Dolls  (WS)

Is Pinocchio alive? How about the Terminator, or Chat GPT-3? This course explores our persistent interest in human simulacra (robots, puppets, dolls; but also automata and cyborgs) and what they suggest about human identity, independence, and free will. We'll look at a wide range of simulacra as they appear in literature, film, and, increasingly, in the actual world ("reborn" dolls, therapy robots, AI). We will frame our explorations with readings in artificial intelligence, neurology, and psychoanalysis (Freud on the uncanny; Winnicott on transitional objects). Throughout, we will wonder: why this fascination with the almost living? How is it that we often care more for Wall-E or the Velveteen Rabbit than we do for real people?

Requirements/Evaluation:  students write five essays over the course of the term, in addition to a number of ungraded but required exercises

Prerequisites: none

Enrollment Limit:  19

Enrollment Preferences:  first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size:  19

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D1)  (WS)

Writing Skills Notes: The course requires frequent and serious written work: six exercises, and five essays of between 750 and 1500 words, over the course of the semester. All the essays receive letter grades, and comments addressed to their design and execution.

ENGL 202  (S)  Modern Drama

Cross-listings:  COMP 202 ENGL 202 THEA 229

Secondary Cross-listing

An introduction to major plays and key movements in European and American theatre since the late nineteenth century. Our focus will be on close reading, with attention also to questions of performance and production. Plays to be discussed will likely include: Ibsen, Hedda Gabler; Wilde, The Importance of Being Earnest; Chekhov, The Cherry Orchard; Pirandello, Six Characters in Search of an Author; Brecht, Mother Courage; Miller, Death of a Salesman; Beckett, Waiting for Godot; Hansberry, A Raisin in the Sun; Pinter, Betrayal; Churchill, Cloud Nine; Stoppard, Arcadia.

Requirements/Evaluation:  Two 6-page papers; regular short responses and discussion board postings; and active participation in class discussions.

Prerequisites: none

Enrollment Limit:  18

Enrollment Preferences:  Theatre, English, and Comparative Literature majors
ENGL 204  (S)  Hollywood Film

For almost a century, Hollywood films have been the world's most influential art form, shaping how we dress and talk, how we think about sex, race, and power, and what it means to be American. We'll examine both the characteristic pleasures provided by Hollywood's dominant genres—including action films, horror films, thrillers and romantic comedies—and the complex, sometimes unsavory fantasies they mobilize. We will do this by looking carefully at a dozen or so iconic films, probably including Psycho, Casablanca, The Godfather, Schindler's List, Bridesmaids, Groundhog Day, 12 Years a Slave and Get Out.

Requirements/Evaluation: Two 2-page essays, two editing exercises, a midterm, and a final exam

Prerequisites: None

Enrollment Limit: 60

Expected Class Size: 60

Grading: no pass/fail option, yes fifth course option

ENGL 206  (S) Beyond the Tiger Mom: Depictions of East Asian Mothers in Contemporary American Literature  (WS)

Cross-listings:  ENGL 206 AAS 206

Primary Cross-listing

A tutorial designed to explore the interpretative difficulties and possibilities of East Asian mothers and motherhood in contemporary American literature (fiction and memoir). The "Tiger Mom"--highly controlling, strict, severe almost to the point of abuse--has become the go-to phrase for many Americans when referring to traditional East Asian mothering styles. This attempt to categorize and simplify cultural differences fails to capture the complex nature of East Asian mothering. While the American public imagines East Asian parenting as only unwavering and harsh, immigrant parents, for example, must often find a parenting strategy that bridges traditional East Asian and mainstream American norms. This course will explore the ways that contemporary Asian American authors depict the complexity of East Asian mothering. While the American public imagines East Asian parenting as only unwavering and harsh, immigrant parents, for example, must often find a parenting strategy that bridges traditional East Asian and mainstream American norms. This course will explore the ways that contemporary Asian American authors depict the complexity of East Asian mothering and mothers. What kinds of mothering does the reductive category of Tiger Mom ignore? What are the central questions these authors pose about mothers and motherhood? How do they negotiate the tension between the individual versus the community, or the pursuit of the child's own interests as opposed to success as defined by the parent when it comes to that child's future? And what are the pitfalls of reading literature as social science? In keeping with tutorial format, students will meet in pairs with the instructor once a week; during these meetings, one student will present a short analytical paper on the texts covered that week. The other student will write a response paper and join the instructor in a discussion of both papers. The reading list may include work by Ocean Vuong, Yiyun Li, Michelle Zauner, Celeste Ng, Amy Tan, Jessamine Chan, Ed Lin, Maxine Hong Kingston, Trung Le Nguyen, and Amy Chua, among others.

Class Format: In keeping with tutorial format, students will meet in pairs with the instructor once a week; during these meetings, one student will present a short analytical paper on the texts covered that week. The other student will write a response paper and join the instructor in a discussion of both papers.

Requirements/Evaluation: A paper or response each week; extensive comments (verbal and written) on published and student work; active participation in class; creation of writing assignments and discussion questions.
Prerequisites: A 100-level English course, or the equivalent.

Enrollment Limit: 10

Enrollment Preferences: Anyone who has taken a 100-level English course, or the equivalent.

ENGL 208  (S) Designer Genes  (DPE)

Cross-listings: ENGL 208 STS 208 AMST 206 WGSS 208

Secondary Cross-listing

In this course, we explore cultural texts that attempt to come to terms with--or exploit--the revolution in contemporary genetics with a particular focus on gender, race, class, and sexuality. The mapping of the human genome in 2001 opened incredible opportunities for medicine, law, and society, but it also, as Alice Wexler has written, "opened a vast arena for contests of power over what it means to be human, who has the power to define what is normal, [and] who has access to what resources and when." Wexler was writing before the final sequencing of the human genome. Now we have CRISPR technology, ushering in a new, more pressing set of ethical concerns. We are currently in the midst of a "global race to genetically modify humans," as the anthropologist Eben Kirksey has documented in his new book The Mutant Project. How will we come to define the human? Who gets to decide? Our writers and filmmakers make clear that genetic medicine cannot be thought apart from a profit-driven American health care system or family and gender dynamics. Joanna Rudnick's documentary In the Family, for instance, explores the personal and political issues associated with hereditary breast cancer and the patenting of genes. Octavia Butler's Afro-futurist novel Dawn explores black female sexuality, reproduction, and the survival of the species in her character's encounter with a genetically enhanced alien species. The film Gattaca shows us a fully realized dystopian society where genetically modified humans are the norm--a society that now "has discrimination down to a science." The transgender artist Tamara Pertamina, on the other hand, "hopes to decolonize the science of genetic engineering," as Kirksey has written, with her performance artist projects.

Our texts come from a number of different genres, including the memoir, science fiction, film, documentary, art, and non-fiction writing at the intersections of science, medicine, philosophy, anthropology, and law.

Requirements/Evaluation: Personal essay, short analysis papers, Perusall annotations, final research group project

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Majors, concentrators, juniors and seniors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 208(D2) STS 208(D2) AMST 206(D2) WGSS 208(D2)

Difference, Power, and Equity Notes: This course asks students to think deeply about questions of social justice in the context of the revolution in modern genetics. Race, class, gender, and sexuality all play a role in who has access to new life-saving technologies, and how these technologies are used. This course employs critical tools (feminist and queer theory, ethics' case studies, close reading) to help students question and articulate the social injustices at play in scientific research and bioengineering.

Attributes: AMST Critical and Cultural Theory Electives  ENGL Criticism Courses  ENGL Literary Histories C  WGSS Racial Sexual + Cultural
ENGL 209  (F)  Theories of Language and Literature  (WS)

Cross-listings:  ENGL 209 COMP 265

Primary Cross-listing

This course is made up of questions: What is literature and why would anyone want to study it? What can you figure out by examining language that you can't figure out by studying history or psychology? Do students of literature have distinctive ways of asking questions about the world? Why do we call some language literary? Can any language be literary if it appears in the right kind of book? Is there a difference between verbal forms of art and visual or auditory ones? Can novels do things that plays and poetry cannot? Why does anyone read poetry anyway?

Requirements/Evaluation:  informal writing every week; three 6-page papers; class attendance and participation

Prerequisites:  none

Enrollment Limit:  19

Enrollment Preferences:  first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size:  19

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D1)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 209(D1) COMP 265(D1)

Writing Skills Notes:  Informal writing before every class (about 500 words); three 6-page essays, plus a lead-in assignment on which the professor comments; two special writing sessions; fifteen pages of writing advice. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ENGL 210  (F)  American Modernism  (WS)

Modernism in art lasts from about 1850 until about 1950; this course focuses on American fiction centering on the 1920s. Texts in the course run from the familiar (Cather, Fitzgerald, Hemingway) through the difficult (Faulkner), very difficult (Jean Toomer), and impossible (Gertrude Stein); but we'll learn how to read them all. Even the familiar texts turn out to be stylistically experimental, and experiments in style, in every case, are linked to novel conceptions of religion (especially Hemingway, Fitzgerald), race or ethnicity (Faulkner, Toomer), and gender (Cather, Hemingway, Stein); most of our texts interrelate all of these concerns. After the Great War, the urgency of questions of form, in relation to questions of identity, is whether the world can be redeemed by the reformation of linguistic and generic conventions.

Requirements/Evaluation:  Four papers totaling about 16 pages. Participation in class discussions will also be a factor in the final grade.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit:  14

Enrollment Preferences:  First-year students and sophomores contemplating the English major; other English majors lacking a Gateway; American Studies majors.

Expected Class Size:  14

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D1)  (WS)

Writing Skills Notes: There will be four papers, totaling about 16 pages. Papers will be read closely both for content and expression. There will be one course meeting devoted entirely to questions of style and composition.

Attributes:  AMST Arts in Context Electives  ENGL Literary Histories C
ENGL 213 (S) Making Radio

This course has two aims. The first is to teach the necessary skills (including interview technique, field recording, editing, and scoring) to make broadcast-worthy audio nonfiction. The second is to use this process to investigate fundamental aspects of narrative. How does a story build a contract with listeners? What's the role of the narrator? How can one appropriately speak for (and sometimes against) another person? This is less a course in journalism than an experiment in documentary cinema for the ear. We'll do some reading in narrative theory and radio technique, and will listen to exemplary works (including episodes of This American Life, RadioLab, Love and Radio, and Snap Judgment), but most of our time--and this is a time-consuming course--will be spent making and critiquing each other's pieces. Students will produce five or six pieces total, at least two of which must develop out of interviews with strangers.

Requirements/Evaluation: Five short audio pieces; attendance and active participation.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: sophomores; English majors; students with radio or studio art training

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: The student version of Hindenburg audio software ($95); students on financial aid will have this expense covered by the college.

Distributions: (D1)

Attributes: ENGL 200-level Gateway Courses FMST Core Courses

ENGL 216 (S) Introduction to the Novel

There was a time when novels as we understand them didn't exist; then there was a time—centuries—when novels were overwhelmingly the dominant storytelling and literary mode in English. This course, part lecture and part seminar, will stage encounters with 7 or 8 novels, each the product of a distinct configuration of subject position, history, form, and ambition. We will move from the English novel's beginnings through (at least) the late 20th century, when novels competed for cultural space with new storytelling modes. Along the way we will think about what stories are for, generally; why this kind of long-form storytelling was invented; and what cultural work English-language novels do, have done, and may yet do. Possible writers to be studied include Samuel Richardson, Jane Austen, Charlotte Brontë, Elizabeth Gaskell, Charles Dickens, Joseph Conrad, Virginia Woolf, James Joyce, Vladimir Nabokov, Toni Morrison, Salman Rushdie, and Zadie Smith.

Requirements/Evaluation: Midterm and final exams, one critical essay, and some short writing assignments. Quizzes possible.

Prerequisites: none

Enrollment Limit: 45

Enrollment Preferences: students who have pre-registered for the course; thereafter, seniors, then juniors, sophomores, and first-years

Expected Class Size: 45

Grading: yes pass/fail option, yes fifth course option

ENGL 220 (S) Introduction to African American Literature

Cross-listings: AFR 220 ENGL 220 AMST 220

Primary Cross-listing

What does it mean, socially, culturally, historically, personally, and spiritually, to be African American? No single, simple answer suffices, but African American literature as a genre is defined by its ongoing engagement with this complex question. This course will examine a series of texts that in various ways epitomize the fraught literary grappling with the entailments of American blackness. Readings will include texts by Frederick Douglass, Booker T. Washington, Zora Neale Hurston, Langston Hughes, Richard Wright, Ralph Ellison, Amiri Baraka, Toni Morrison, and Ishmael Reed.
This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: AMST Arts in Context Electives AMST Comp Studies in Race, Ethnicity, Diaspora ENGL Literary Histories C

Not offered current academic year

ENGL 221  (F) Hip Hop Culture  (DPE) (WS)
Cross-listings: ENGL 221 AFR 222 MUS 217 AMST 222

Secondary Cross-listing

The course examines how young people of color created hip hop culture in the postindustrial ruins of New York City, a movement that would eventually grow into a global cultural industry. Hip hop music producers have long practiced "diggin' in the crates"—a phrase that denotes searching through record collections to find material to sample. In this course, we will examine the material and technological history of hip hop culture, with particular attention to hip hop's tendency to sample, remix, mash-up, and repurpose existing media artifacts to create new works or art. We will use a media archaeological approach to examine the precise material conditions that first gave rise to graffiti art, deejaying, rapping, and breakdancing, and to analyze hip hop songs, videos, and films. Media archaeology is a critical and artistic practice that seeks to interpret the layers of significance embedded in cultural artifacts. How does hip hop archaeology remix the past, the present, and the future? How do the historical, political, and cultural coding of hip hop artifacts change as they increasingly become part of institutional collections, from newly established hip hop archives at Cornell and Harvard to the Smithsonian National Museum of African American History and Culture?

Requirements/Evaluation: Four papers, project with presentation, and a final exam.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: AMST majors or prospective majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 221(D1) AFR 222(D2) MUS 217(D1) AMST 222(D2)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to use an effective descriptive and critical vocabulary to discuss and analyze artifacts of hip hop culture, with attention to race, gender, class, sexuality, and other categories of social difference. They must understand the material, technological, historical, and cultural contexts that gave rise to hip hop culture, and proficiently synthesize scholarly perspectives related to the formation and transformations of hip hop from the early 70s to the early 21st cent.

Attributes: AFR Culture, Performance, and Popular Technologies AMST Arts in Context Electives AMST Comp Studies in Race, Ethnicity, Diaspora
ENGL 222 (S) Lyric Poetry (WS)
The goal of this writing-skills gateway course is to advance our abilities as rigorous, subtle, and imaginative interpreters of poetry. Our focus will be on
lyrics—relatively short poems in which a single speaker describes (often in intense language) his or her emotions, attitudes, or state of mind. Our
readings will be drawn from a range of historical periods from the seventeenth century forward, with particular emphasis on poems written since the
mid-nineteenth century. Among the poets we are likely to study: Ben Jonson, Wordsworth, Coleridge, Keats, Dickinson, Hardy, Owen, Yeats, Auden,
Frost, Gluck, and Heaney. We will also discuss works by two poets at Williams: Lawrence Raab and Jessica Fisher.

Requirements/Evaluation: active participation in seminar discussions, and four or five papers (about 20 pages total)
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 19
Enrollment Preferences: sophomores and first-year students who have not yet taken an ENGL Gateway course
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (WS)

Writing Skills Notes: There will be 4 or 5 papers assigned, ranging in length from 4-6 pages, spaced evenly throughout the term. Total writing will be
about 20 pages. Detailed feedback will be provided on each paper. There will be opportunities for revisions, and for conferences related to the papers.

Spring 2024
SEM Section: 01 MWF 10:00 am - 10:50 am Stephen Fix

ENGL 223 (S) Apocalypse Now and Then: Poets Confronting Political Crisis (DPE) (WS)
In moments of great crisis, common wisdom says to turn to the poets; where, then, do the poets turn? Tracing the history of Poetry of Witness
throughout the 20th and 21st Centuries, this course explore various strategies poets have used to write about the end of the world, however that may
be defined. We will read contemporary poets (such as Danez Smith, Ilya Kaminsky, Aracelis Girmay, and Solmaz Sharif) alongside 20th Century
writers who were responding to the catastrophes of their own times (Paul Celan, Pablo Neruda, Gwendolyn Brooks, Bei Dao, and others). Looking
backward to other times when the world seemed to be ending, this course will examine some of the strategies that poets have used to navigate writing
about war, genocide, forced migration, gendered violence, climate crisis, and other dystopias. The readings we encounter will span various schools
and poetic forms, from documentary poetics, to surrealism and the avant garde, to the Black Arts Movement, to speculative writing, and so on. They
will be supplemented with critical texts on the political stakes of writing and reading practices by thinkers like Eve Sedgwick, James Baldwin, and
Audre Lorde. This is a course that views creative writing as a valid form of critical inquiry; therefore, students will have opportunities to engage
creatively with texts throughout the semester. For the final, students will have the option of either writing an analytical paper or submitting a creative
project with a critical introduction.

Requirements/Evaluation: Students will write short weekly response papers, a 3-5 page midterm essay and an 8-10 page final essay. Creative
options will be available in place of some of these assignments.
Prerequisites: None.
Enrollment Limit: 16
Enrollment Preferences: Freshmen and sophomores intending to pursue more advanced work in English; non-English majors interested in creative
writing. Application may be required.
Expected Class Size: 16
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will produce and receive feedback on short writing assignments throughout the semester. These assignments will
build skills for students to write either a final comparative analysis paper or a creative project accompanied by a critical introduction.
Difference, Power, and Equity Notes: This course focuses on the interactions between political engagements and poetic craft in the 20th and 21st
centuries. As such, we will discuss the interplay between artists and the popular resistance movements of their times, the effects of power on literary
forms, and the shaping of minoritarian aesthetics. Readings will center writing by poets from marginalized backgrounds whose work engages race,
class, ethnicity, gender, sexuality, religion, and disability.
Attributes: ENGL 200-level Gateway Courses
ENGL 224 (S) American Drama: Hidden Knowledge (WS)
The Buddha is said to have identified three things that cannot stay hidden: the sun, the moon, and the truth. What's the secret? Who is lying? Who is breaking the rules? American drama abounds with hidden knowledge and false representations. (This is not surprising: theatre is always on some level a deceptive practice, a place where one person pretends to be another, and where what is spoken is always open to skeptical scrutiny. We might say theatre is always lying as much as lying is always theatre.) This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty-first. Beginning with excerpted critical and historical writings on secrecy and lying (The Adventures of Pinocchio, Machiavelli’s The Prince, Thomas Carlson's Lying and Deception: Theory and Practice, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Eugene O'Neill, Edward Albee, Sarah Ruhl, Arthur Miller, Amy Herzog, Susan Glaspell, Sophie Treadwell, Annie Baker, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what can we learn in particular from American drama about a national relationship to honesty and its opposites.

Requirements/Evaluation: weekly papers/response papers; weekly meeting with instructor and tutorial partner
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Theatre and English majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)
Writing Skills Notes: Weekly papers will prompt extensive commentary. The amount of writing in the course will be substantial and well spaced, followed by timely evaluation and suggestions for improvement. The course requires multiple assignments, each returned with comments which address writing problems and strategies, as appropriate. Student will receive guidance on structure, style, argumentation, and other significant aspects of writing throughout the semester.
Attributes: AMST Arts in Context Electives

ENGL 225 Introduction to Asian American Literature: Fiction and Memoir (WS)
This Gateway is for students who want an opportunity to explore some of the wonderful fiction and creative nonfiction written by Asian American writers over the past hundred years. Likely readings include: Carlos Bulosan's America is in the Heart (1946); John Okada's No-No Boy (1957); Maxine Hong Kingston's Woman Warrior (1976); Chang-rae Lee's Native Speaker (1995); Jhumpa Lahiri's Interpreter of Maladies (1999); lê thi diem thúy's The Gangster We are All Looking For (2003); Ruth Ozeki's A Tale for the Time Being (2013); and Celeste Ng's Everything I Never Told You (2014). As we read, we will attend to the various ways in which the often difficult, and sometimes traumatic, historical experiences of Asian Americans have informed their acts of literary invention. And in order to better understand the broader, ever shifting, social contexts in and against which these literary works were created, we will supplement our primary readings with texts that discuss the experiences of Asian Americans from a historical and sociological perspective.

Requirements/Evaluation: four papers totaling about 20 pages; engaged participation in class discussions
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 19
Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course
Expected Class Size: 19
Grading:
Distributions: (D1) (WS)
Writing Skills Notes: Four 5-page essays in multiple drafts. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.
Attributes: ENGL 200-level Gateway Courses
ENGL 227 (F) Elegies (WS)

This tutorial explores elegies as a literary genre. In their most familiar form, elegies honor and memorialize the dead. More broadly conceived, the genre includes works lamenting other kinds of loss as well: the loss of a lover, place, country, or cherished version of one’s past. We'll consider the special challenges and opportunities of the elegiac voice: how it manages to give public expression to private grief; negotiates problems of tone and perspective; worries about and celebrates the capacity of language to generate hope and consolation; and seeks a kind of solace in the literary effort to evoke, preserve, or rewrite a lost life or an absent past. This course focuses primarily on poetry, English and American, across a broad historical range. We'll first read poems from 1600-1900—including works by Jonson, Milton, Donne, Dryden, Gray, Shelley, Tennyson, and Whitman, and then turn to some of the twentieth-century's great poetic elegists—Wilfred Owen, W.B.Yeats, W.H.Auden, Robert Lowell, and Seamus Heaney. Finally, we'll consider how the elegiac voice works in fiction, especially in stories by James Joyce (“The Dead”) and Vladimir Nabokov (“Spring in Fialta”).

Requirements/Evaluation: Active participation in tutorial meetings. Students will write a 4- to 5-page paper every other week (five in all), and comment on their partners' papers in alternate weeks

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 10

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: All tutorials (at least in English) are by definition Writing Skills courses. Students will write either the main paper or a response critique in alternate weeks. Students will also have the opportunity to revise.

TUT Section: T1 Cancelled

ENGL 228 (F) The Renaissance in England and the European Continent: Self and World (DPE) (WS)

Cross-listings: COMP 230 ENGL 228

Primary Cross-listing

At the same time as the individual human being in possession of a distinctive personality was taking on enormous importance in politics, philosophy, literature, and the visual arts, early modern Europeans were encountering unprecedented levels of cultural diversity. In this interdisciplinary course, we will consider these two developments both separately and together. As Renaissance humanists were acquiring a sophisticated understanding of the distance between the present and various European pasts (the recent medieval past and the remote history of antiquity), they were also coming into contact with non-European cultures in Africa, the Americas, and Asia via trade and economic development, imperial expansion, and religious conversion. Always at stake in these encounters was the question of who counted as an individual; the self was not considered to be intrinsic to human nature but rather the product of historical and cultural developments. Themes will include religious pluralism, the sacred and the secular, vernacularity, exploration and empire, the relationship between mind and body, slavery, trade, wealth, gender, self-fashioning, and style. We will consider such English writers as the Pearl poet, More, Marlowe, Spenser, Shakespeare, Browne, and Milton; such continental intellectuals as Descartes, Erasmus, Las Casas, and Castiglione; and such continental artists as Michelangelo, Velázquez, Bruegel, and Rembrandt.

Requirements/Evaluation: Five four-page papers, in-class presentation, thoughtful participation in discussions

Prerequisites: A 100-level ENGL course, a score of 5 on the AP English Literature exam, a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 19

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
**Writing Skills Notes:** The course asks students to write five four-page papers and offers exposure to a range of humanistic modes, from close reading to visual analysis to the exposition of philosophical claims. One paper will involve independent research. The instructor will provide frequent and extensive written feedback on student work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course examines the role of historical and cultural difference within and beyond Europe at the very beginning of globalization. Students will become acquainted with the origins of colonialism and the global traffic in slaves, as well as with the complex role of writers and intellectuals in questioning, defending, and imagining these practices. We will consider the epistemological challenges of accessing the testimony of subordinated persons.

**ENGL 231 (F)(S) Literature of the Sea (DPE)**

**Cross-listings:** ENGL 231 MAST 231

**Secondary Cross-listing**

The ocean, and human relationships with it, have been central features of literatures and cultures around the world for more than a thousand years. But since literary study is typically based around authors’ homelands, careful examination of the oceanic experience is often pushed to the periphery—an "empty space" to be crossed between nations, a "vast darkness" antithetical to human life, or a mirror for land-borne concerns. Increasingly, however, scholars and readers are centering the sea and stories about it as a means stepping outside human frameworks of space and time, situating the complex emotions and narratives inspired by the ocean into a complex network of geologic history and teeming other-than-human life. This course examines a wide range of texts and perspectives on the ocean and human relationships with it. Doing so will help us consider how literature both plays into and subverts dominant viewpoints of the ocean. Through texts that consider 19th-century whaling, the Middle Passage, the postcolonial Caribbean, and islands throughout the Pacific Ocean, we will explore a range of questions, including: What can we learn from examining efforts to write about the ocean? How do ocean stories help individuals understand themselves, their communities, and their place in global environments? What can the range of cultural and literary perspectives on our “single, global ocean” reveal about the ways different people are both connected with and profoundly distant from each other? Most importantly, we will practice, as a classroom community, different strategies for carefully reading texts while connecting them to cultural traditions, surrounding environments, and personal experiences.

**Class Format:** weekly roundtable discussions, including coastal and near-shore field trips and multiple field seminars.

**Requirements/Evaluation:** regular papers, class participation, journal-writing, and a final assignment

**Prerequisites:** N/A

**Enrollment Limit:** 25

**Enrollment Preferences:** Williams-Mystic Students only

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

ENGL 233 (F) Great Big Books (WS)

Cross-listings: COMP 293 ENGL 233

Primary Cross-listing

Some of the greatest novels are really, really long--so long that they are too seldom read and taught. This course takes time to enjoy the special pleasures of novels of epic scope: the opportunity to immerse oneself in a wide and teeming fictional world; to focus sustained attention on the changeable fortunes of characters and societies over a long span of time; to appreciate the detailed grounding of lives in their social environment and historical moment; to experience the leisurely and urgent rhythms, with their elaborate patterning of build-ups and climaxes, that are possible in such works. We will read but two novels, both preoccupied with the disruption and evolution of lives and loves at moments of historic upheaval: War and Peace (1869), Leo Tolstoy's epic of the Napoleonic Wars, and Parade's End (1924-28), Ford Madox Ford's modernist masterpiece about World War I and its traumatic impact on English social life. Set a century apart, the novels are distinguished by vivid and scrupulous representation of their respective wars, by their shrewd accounts of political and social pressures informing the crises, and by their insight into the struggles of those whose lives are engulfed in global crisis. Tolstoy's and Ford's approaches to fictional representation, however, provide intriguing contrasts: one favors the lucidity of classic realism, the other the challenges of modernist innovation; one deploys a single multiplot novel, the other a tetralogy of shorter novels developing a single plot. We will discuss the differing strategies and effects of these two approaches, as well as the more general difficulties of reading and interpreting long fiction.

Requirements/Evaluation: regular class participation and four 5-page papers, two of them submitted in both a draft and a revision

Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option
ENGL 234  (F)(S)  The Video Essay

While people today experience an unprecedented flood of moving images, few have had the chance to think critically about film and video. Fewer still have had the opportunity to think with the medium, exploiting the resources of film and video in an effort to understand how these media affect viewers. The Video Essay offers a chance to do that. After being introduced to the fundamentals of film analysis and receiving training in basic video editing, students will spend the term alternating between making short video essays and commenting on the essays produced by their partners. Note that this is primarily a course in film analysis: students will not shoot any original material. No prior experience is required.

Class Format: We will meet together for three weeks, then break into groups of four. Students in each group will alternate weekly between creating video essays on film topics, and writing commentaries on the essays of their partner.

Requirements/Evaluation: four written exercises (1-2 pages); five video essays, increasing from two to six minutes; and four written commentaries on one's partner's video essays.

Cross-listings: THEA 233 ENGL 235

Secondary Cross-listing

How well do you know Stanislavsky, Strasberg or Adler? This tutorial offers an exploration of the most notable theatre artists from the past and present. Students will select a specific master with a unique theatrical style, and will study that iconic artist's particular method or approach. Students will be encouraged to choose any master who had made a significant contribution to theatre -- such as Constantine Stanislavsky, Stella Adler, Sanford Meisner, Lee Strasberg, Bertolt Brecht, Michael Chekhov, Jerzy Grotowski, Tadeusz Kantor, Pina Bausch, Tadashi Suzuki, Anne Bogart, etc. Each student will conclude their exploration by writing a script and presenting the essence of their research in a brief performance (for the camera) -- portraying the legendary icon at work, in a social situation, or in solitude. You learn more about others when you become them, if only for a moment.

Requirements/Evaluation: Research, development, creativity, final performance.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: none

Expected Class Size: 10
ENGL 236 (F) Fields of Barley, Streets of Gold: Utopia in Fiction  (WS)

Each of the gates was a single pearl; And the street of the city was pure gold, As it were transparent glass. Revelations 21:21 It makes us happy to imagine the future in apocalyptic terms, partly because we love to say I told you so. You didn't listen, and now look. Fort Lee is on fire, and zombies are smashing down your parents' door. Catastrophe satisfies us on many levels; by contrast, the utopian vision provides a more delicate thrill. For a writer, the task is to provide a fiction that will not feel like a moral lesson or the illustration of some theory about how we should behave. This course will consider different utopian stories in a vaguely chronological sequence: Classical Era, Renaissance, Enlightenment, and then moving through the 19th and 20th centuries, and then into modern science fiction. You'd be right if you think this sounds as if I haven't yet finalized the list, but it will include familiar and unfamiliar names—Plato, More, Bacon, Campanella, Fourier, Bellamy, Skinner, LeGuin, Bisson, Kim Stanley Robinson, and various Afro-Futurists. Mostly you will be reading (or else listening to the instructor describe) excerpts and summaries rather than full texts, as utopian visions are often quite long and we want to consider large numbers of them. The emphasis in this class will be on writing rather than reading. Most assignments will consist of either sketching out or actually writing a short story set in one of these imagined worlds, a story that would serve as a critique. In addition, as a final project, students will invent a personal utopia and present it to the class.

Requirements/Evaluation: You will be graded on the basis of class participation, plus ten short written assignments and two longer ones. The instructor will require revisions on the longer assignments in order for you to receive a grade.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: If the course is over-enrolled, I will give preference to seniors, then juniors, then sophomores.

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)  (WS)

Writing Skills Notes: This course will involve weekly writing assignments of perhaps three pages each as well as two longer pieces of perhaps 15 pages each: In total, I hope, not more than sixty pages per student. The shorter assignments will consist of a page or so of commentary on a piece of utopian writing, and a scene-by-scene sketch for a story set in it that illustrates that commentary or critique. The larger projects are (1.) a full rendering of one of those sketches and (2.) your own utopian vision.

ENGL 241  (S)  Introduction to Comparative Literature

**Cross-listings:** COMP 225 ENGL 241

**Secondary Cross-listing**

Comparative literature involves reading and analyzing literature drawn from different times, movements, cultures, and media. In this class, we will study English translations of texts from eras spanning the ancient to the contemporary; literary movements including romanticism, realism, and postmodernism; national traditions arising in Europe, Asia, and the Americas; and media from prose fiction to theater, comics, and film. Throughout the course, we will consider what it means to think about all these different works as literary texts. To help with this, we will also read selections of literary theory that define literature and its goal in abstract or philosophical terms. Assignments will focus on close, creative reading of relatively short texts by authors like Homer, Sei Shônagon, Kleist, Lermontov, Zola, Borges, Wilde, Bechdel, and others. *All readings will be in English.*

**Requirements/Evaluation:** attendance, participation, two 5-page papers, a few short responses, midterm exam

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** Comparative Literature majors

**Expected Class Size:** 25

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** This course can be substituted for COMP 111 to satisfy the gateway requirement for Comparative Literature majors.

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

LEC Section: 01  MR 2:35 pm - 3:50 pm  Christopher A. Bolton

ENGL 242  Bewilderment: Contemporary U.S. Poetry and the Ethics of Unknowing  (DPE) (WS)

"I perceive I have not really understood any thing, not a single object, and that no man ever can," wrote Walt Whitman in a great poem of 1860. "Tell all the truth, but tell it slant," answered Emily Dickinson a few years later, as if suggesting a strategy for how to write one’s way into Whitman’s radical uncertainty. These articulations of knowing and unknowing, of telling and untelling, continue to thread their way into U.S. poetry today. This course will explore bewilderment as both a poetic strategy and an ethical position. How do error, randomness, contradiction, obliquity, and dissociation serve the poem and the poet? How do such strategies counter ideas of literary mastery, heroism, virtuosity, privilege and celebrity? What are the political possibilities of such counter stances, especially as embodied and expressed by poets who speak from outside the stronghold of the white male establishment? We will primarily read from recently published work in the U.S., but will also be interested to track the literary traditions that have shaped how contemporary poets think and write. Authors read may include: Wanda Coleman, Eileen Myles, Anne Carson, Layli Long Soldier, Vanessa Angelica Villarreal, Fanny Howe, Terrance Hayes, Jennifer Chang, Tiana Clark, Brenda Hillman, Jane Wong, Tommy Pico, Paisley Rekdahl, Brian Teare, Diana Khoi Nguyen, and C. D. Wright.

**Requirements/Evaluation:** Classroom participation in discussion, several papers of graduated lengths and complexity (for a total of 20 pages of writing).
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: potential sophomore English majors have first choice, then prospective or current American Studies majors

Expected Class Size: 19

Grading:

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Gateway courses in English traditionally emphasize writing skills, and this course is no exception. Attention will be paid to drafts and revisions of essays.

Difference, Power, and Equity Notes: The vast majority of works read are authored by poets outside the white male straight cisgender establishment. More importantly, we will constantly engage the question of how poetry may serve the needs of equity and inclusion in the U.S. contemporary literary marketplace.

Not offered current academic year

ENGL 244 (F) Interpreting Film (WS)

From the earliest days of narrative film, it was clear that the new medium enjoyed an unparalleled capacity to absorb spectators in the sheer passive enjoyment of the cinematic spectacle, so for many viewers cinema has seemed naturally to be a form of entertainment rather than an art form or a medium for exploring ideas. But not only have entertaining “movies” and artistic “films” always co-existed amicably, but in many cases have coincided: some of the greatest works of cinematic art first billed themselves unassumingly as enjoyable diversions. In order to appreciate the aesthetic and intellectual richness of such films, one must learn to “read” their crucial scenes closely, analyzing their visual and auditory language as well as their dramatic content, and must learn to interpret their surprisingly complex larger patterns of thought. This tutorial offers concrete training in both of these skills. During the first four weeks, students will write and discuss short weekly papers analyzing key sequences of a film, learning to identify diverse cinematic effects in order to illuminate dramatic patterns. During the last six weeks of the semester each student in a tutorial pairing will write a longer interpretive paper in alternate weeks, learning to construct fuller arguments addressing the whole of a film. Most films will be drawn from classical Hollywood cinema of the 1930s and 1940s, but we will also study European, Indian, and Japanese films. Readings during the first part of the semester will concern technical features of cinema; later readings will address larger interpretive issues (e.g., patterns in film genres, such as the nature of the gangster as a tragic hero; or social issues reflected in films, such as the newly empowered roles of women during the early 1940s and their influence in shaping the dangerous heroines of film noir).

Requirements/Evaluation: six short (2- to 6-page) papers and three short responses to one’s partner’s paper, totalling 25 pages of writing; active, sustained participation in tutorial discussions

Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate

Enrollment Limit: 10

Enrollment Preferences: sophomores and first-year students who have satisfied or placed out of the English Department’s 100-level prerequisite

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Tutorial—constant writing and critique. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: ENGL Literary Histories C

Not offered current academic year

ENGL 246 (S) The Craft of Writing

An introduction to writing short fiction in a course that emphasizes elements of craft. Discussion of published fiction will be combined with exercises, a student workshop, and individual conferences with the instructor. Students should expect a course that focuses on reading as well as writing.

Requirements/Evaluation: Requirements/Evaluation: active participation, close readings of published work, successful completion of assigned exercises and story drafts, and a final portfolio of revised fiction.
ENGL 247    Art of the Essay
The "essay" is one way of writing about the intersection of self and world. Writers from 16th century French Michel Montaigne to contemporary American physician Siddhartha Mukherjee and Canadian lyric essayist Anne Carson have experimented in this form, varying the proportion of self-scrutiny to outward focus. We will study the meandering history of this rich literary form, learning both how to analyze and interpret representative examples from multiple traditions, and how to try our hand at our own creative nonfiction. That is, you will do both critical writing and creative writing for this course. Throughout, we will track how this genre serves those writers and readers who gravitate toward its special arts. Works read include those by the writers named above, as well as a selection from the following list: Henry David Thoreau, William James, Gertrude Stein, James Baldwin, James Agee, John McPhee, Alice Walker, Gloria Anzaldúa, Claudia Rankine, Theresa Hak Kyung Cha, and Maggie Nelson.

Requirements/Evaluation: four papers (two critical and two creative), of varying lengths (from 2-10 pages), for a total of 20 pages

ENGL 250    Americans Abroad
This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war, peace, and pandemic. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler's expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? How did recent lockdowns and border closings impact and/or interrupt these complex experiences? Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their (and our) concept of “home” into something that reflects individual identity, and not one imposed by any national culture--American or foreign.

Requirements/Evaluation: each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student's own experiences

Prerequisites: any literature course at Williams or permission of instructor
Expected Class Size: 18
Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 250(D1) AMST 242(D1) GBST 242(D1) COMP 242(D1)

Difference, Power, and Equity Notes: We will read and analyze primary materials and literature that reflect on Americans who chose, or were forced to, reinvent themselves abroad to escape oppressive situations in the United States related to gender, class, race, or political views. The socio-historical context of each writer will be crucial to understanding their situations. Students will write critical papers, and their own narrative in which they reflect on a situation of personal dislocation, either while traveling, or at home.

Not offered current academic year

ENGL 253 (F) Feminist Theatres: A Global Perspective (DPE) (WS)

Cross-listings: THEA 250 COMP 247 ENGL 253 WGSS 250

Secondary Cross-listing
What makes a work of theatre "feminist"? How do plays and performances across global networks engage with different models of feminism: liberal, radical, materialist, and intersectional? Why has feminism mattered to theatre-makers of the past? Should it still matter now? If so, what forms might future feminist theatres take? In this tutorial course, students will work in pairs to examine the social and political relation of feminism to the art and practice of theatre. Taking a global and comparative perspective on the subject, we will focus on the intersectionalities of gender, race, class, ethnicity, nationality, and sexual identity in the production of feminist-driven theatrical practices. Artists, companies, and movements to be considered may include: Spiderwoman Theatre, Adrienne Kennedy, Caryl Churchill, Sphinx Theatre Company, Nozake Shange, Griselda Gambaro, Manjula Padmanabhan, Cherríe Moraga, Lisa Kron, Arethusa Speaks, Maya Krishna Rao, Tracie Chima Utch-Ezeajugh, Alexis Scheer, Tori Sampson, Clare Barron, and others. Close analysis of source material will be informed by critical and autobiographical writings by: Audre Lorde, Judith Butler, bell hooks, Gloria Anzaldúa, Kimberlé Crenshaw, Eve K. Sedgwick, Gayatri Spivak, Jill Dolan, José E. Muñoz, and Donna Haraway. This course will follow a standard tutorial format, with students taking turns presenting or responding to their peer every other week; for their presentations, students will write
a 5-page paper or, in up to two cases if they choose, offer their argumentation through more performance-driven methods (such as an oral argument, spoken-word monologue, or activist prompt).

**Requirements/Evaluation:** students will meet with instructor in pairs for an hour each week; every other week they will be responsible for sharing either a 5-page paper or, if they choose, in up to two cases, a more performance-driven presentation, such as: an oral argument, spoken-word monologue, or activist prompt (five presentations/papers in all). They will comment on / respond to their partner’s papers/presentations in alternate weeks; emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and written and oral communication.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** THEA majors; WGSS majors; ENGL majors; COMP majors. Students from all majors are welcome and invited to contact Prof. Holzapfel about their interest in the class: ash2@williams.edu

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**
THEA 250(D1) COMP 247(D1) ENGL 253(D1) WGSS 250(D2)

**Writing Skills Notes:** This course fulfills the writing skills requirement by engaging students in the active and creative process of critical writing, based on the notion that "writing is thinking, not thinking written down." Emphasis will be given to crafting and developing an argument, clarifying prose, selecting evidence, gaining authority, and incorporating theoretical ideas into an essay. We will also focus on the performance and presentation of written arguments.

**Difference, Power, and Equity Notes:** This tutorial examines intersections between gender, race, sexuality, class, nationality, and ethnicity in relation to theatre's ongoing engagement with feminism. We will consider how articulations of difference, power, and equity arise and are, in fact, prioritized in quite different ways within the politics of feminism itself, leading to their variable expressions through art.

---

**ENGL 254 (F) Catastrophe/Apocalypse: The Movie**

The film industry has always appreciated the visual and dramatic possibilities of catastrophe, and given that the apocalyptic and post-apocalyptic sensibility seems to be everywhere in our culture, being plugged into the zeitgeist might at this point necessarily entail a familiarity with the tropes and assumptions of this subgenre. This course will consider the ways in which such films model for us those moments when our expectations and/or actions collide with the devastating realities of our physical world and/or political situation. How do we measure loss when loss occurs at the upper end of the human scale? How do we consider collectively, in either secular or metaphysical terms, the issue of our own complicity in--if not responsibility for--disaster? Films to be studied will include Alfonso Cuaron's *Children of Men*, Jordan Peele's *Get Out*, Ridley Scott’s *Blade Runner*, Alfred Hitchcock's *The Birds*, Danny Boyle's *28 Days Later*, Lorene Scafaria's *Seeking a Friend for the End of the World*, Jeff Nichols' *Take Shelter*, Armando Iannucci's *The Death of Stalin*, Juan Carlos Fransadillo's *28 Weeks Later*, Bruce McDonald's *Pontypool*, Yoshiro Nakamura's *Fish Story*, and Joshua Oppenheimer's *The Act of Killing*.

**Requirements/Evaluation:** Three short papers and in-class presentations

**Prerequisites:** an introductory film course or permission of the instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** English majors

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**Attributes:** ENGL Literary Histories C
We want to make sense of things. In nearly all of our academic pursuits, the point of analysis is to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can’t do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

**Requirements/Evaluation:** Evaluation will be based on weekly tutorial papers/response papers, and active participation in weekly tutorial sessions.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** Theatre, English, and Comparative Literature majors.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 252(D1) COMP 256(D1) ENGL 256(D1)

**Writing Skills Notes:** Weekly tutorial papers and response papers, plus regular feedback on writing/argumentation skills. The course will provide consistent and ongoing feedback on students' writing, and will require multiple assignments, each prompting comments which address writing problems and strategies, as appropriate.

TUT Section: T1 TBA Robert E. Baker-White

The personal essay as a literary form includes a wide range of genres including literary journalism, creative nonfiction and the lyric essay. (Note the exclusion of "memoir" or "autobiography" in this list. This course is NOT a course in memoir or autobiography.) As a Gateway to the English major, this course will focus on critical methods and analytical writing skills that will serve students who want to pursue more advanced work in the department. (Note: this is not a creative writing course.) We will consider the literary history of the personal essay from Montaigne to yesterday, attending primarily to writers from the 20th and 21st centuries, and from the U.S. The reading list may include: James Baldwin, James Agee, Annie Dillard, Audre Lorde, John McPhee, Joan Didion, Adrian NicholeLeBlanc, Jennifer S. Cheng, Anne Carson, Samuel Delaney, Maggie Nelson, Alexander Chee, Lydia Yuknavitch, Saidiya Hartman and Karen Green.

**Requirements/Evaluation:** Evaluation will be based on class participation, peer editing, writing and revision, with special attention given to the student's engagement in every aspect of the writing process.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

**Enrollment Limit:** 19

Fall 2023
SEM Section: 01  TF 2:35 pm - 3:50 pm  Cassandra J. Cleghorn

ENGL 258 (F) Poetry and the City (WS)
In this course we will consider poems generated out of the experiences of urban life. The city provides for poets a vivid mental and imaginative landscape in which to consider the relation of vice and squalor to glamour; the nature of anonymity and distinction; and the pressure of myriad bodies on individual and mass consciousness. We will explore ways in which the poet's role in the body politic emerges in representations of the city as a site both of civilized values and/or struggles for power marked by guile and betrayal. Taking into account the ways in which cities have been transformed over time by changing social and economic conditions, we will consider such issues as what the New York of the 1950s has to do with the London of the late eighteenth and early nineteenth centuries, and why poetry as a genre might be particularly suited to representing the shifting aspects and populations of urban life. Poets will include Dante, Pope, Swift, Blake, Wordsworth, Whitman, Baudelaire, Yeats, Crane, Moore, Hughes, Brooks, Lorca, Bishop, Ginsberg, Baraka, Ashbery, Yau, Bitsui, Rankine, and Diaz. We will also draw on essays by Simmel, Benjamin, Williams, and Canetti, photographs by Hines, Weegee, Abbott, and Nishino; the blues, as sung by Holliday and Vaughan; and films such as Man with a Movie Camera, Rear Window, and Breathless.

Class Format: discussion-based

Requirements/Evaluation: class participation; the course will require four 5-page essays in multiple drafts

Prerequisites: 100-level English course or a 5 on the AP literature exam, or permission of the instructor.

Enrollment Limit: 19

Enrollment Preferences: first-year and sophomore students who are thinking of majoring in English, and majors who have not yet taken a Gateway course.

ENGL 262 (F) European Cinema and Film Theory (WS)
This seminar explores the foundations of contemporary European cinema by studying a range of films from 1920-1985, and offers a grounding in film theory and aesthetics by pairing such films with theoretical essays by philosophers and aestheticians from the silent era through the 1970s. We will establish a kind of map of cinematic styles and movements, ranging from German expressionism and Soviet montage in silent films of the 1920s, through French realism of the prewar and Italian neorealism of the early postwar era, to the insurrectionary films of the French New Wave and the stylistic innovations of the German New Wave and of Swedish cinema in the 1960s and 1970s. We will study films by such directors as Wiene, Murnau, Lang, Eisenstein, Vertov, Dreyer, Renoir, Riefenstahl, Rossellini, Fellini, Truffaut, Godard, Varda, Herzog, Bergman, Tarkovsky, and Almodóvar.

Requirements/Evaluation: regular class participation and four 5-page papers, two of them submitted in both a draft and a revision

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

ENGL 263 (S) Novel Worlds (WS)

Cross-listings: ENGL 263 COMP 268

Primary Cross-listing

Reading a novel can feel like falling into another world, each novel its own trip down a granularly detailed rabbit hole. From Jane Austen's "3 or 4 families in a country village" to the teeming novels of Charles Dickens, the novel's distinctive power is in making both the few and the many feel like a complete world. But what are worlds, anyway? Are they spaces? Or are they not a thing at all, but social systems—ways of belonging that are constantly being made and remade? This course is about the specific world—imagining powers of the novel, tracing out various techniques and strategies by which literary texts create worlds. Our hunch: the modern notion of "world" finds its origin in the novel, and the novel constitutes one of the most sophisticated sites of reflection upon that notion. We'll read a number of novels, ranging from 19th-century authors like Austen and Dickens, to contemporary genre writing—science fiction and the detective novel—to see how novels, and ideas of world, shift over time and space. To get at our central questions, we'll read some philosophical and critical texts preoccupied by world-ness, consider the colonial contexts of some novel worlds, and engage contemporary debates around the possibilities of "World Literature." Likely authors include Jane Austen, Charles Dickens, Lewis Carroll, Arthur Conan Doyle, Oscar Wilde, Italo Calvino, and China Mieville.

Requirements/Evaluation: papers (approximately 20 pages), other forms of writing in-class and otherwise, engaged participation in course discussions.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Attributes: ENGL 200-level Gateway Courses ENGL Literary Histories C

Not offered current academic year

ENGL 265 (S) Dislocating the Harlem Renaissance (WS)

Cross-listings: AFR 244 ENGL 265

Primary Cross-listing

Beginning with Alain Locke's The New Negro: An Interpretation, this course introduces students to the black literary and cultural production of the 1920s and 30s that we have come to regard as the Harlem Renaissance. While canonical figures will be covered, significant attention will also be paid to artists that have garnered less attention as well as those that sit outside the geographic boundaries of Harlem. Figures to be considered throughout the term include Sterling Brown, Miguel Covarrubias, Jessie Redmon Fauset, Angelina Weld Grimké, Langston Hughes, Zora Neale Hurston, Nella Larsen, Claude McKay, Richard Bruce Nugent, Anne Spencer, Jean Toomer, Eric Walrond, and Walter White.

Requirements/Evaluation: weekly reading responses, active class participation, two close readings (500 words each), annotated bibliography, class presentation, final paper (8-10 pages)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: majors and prospective majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

ENGL 267 Stop Making Sense: Absurd(ist) Theatre in Historical Context (WS)

In most academic work the point of analysis is to make sense, to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? How and when have strategies of nonsense, circular reasoning, linguistic obfuscation, and intentional theatrical absence been employed to disguise, or deflect attention from, specific didactic (even political) agendas? What role specifically does theatre, theatricality, or performativity play in the presentation of art that refuses understanding? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek, Richard Foreman). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an
hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

**Requirements/Evaluation:** Standard tutorial requirements; weekly paper or response paper from each member of the tutorial pair. Evaluation based on improvement in written expression and engaged contribution to weekly discussions.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** Theatre, English, and Comparative Literature majors and prospective majors.

**Expected Class Size:** 10

**Grading:**

**Distributions:** (D1) (WS)

**Writing Skills Notes:** This tutorial will demand writing from each student each week (either a primary paper or a shorter response paper), and each student will receive regular, extensive feedback including a focus on strategies for successful persuasive argumentation.

**ENGL 268 (F) Being Muslim, Being American: American Muslim Literature in the 21st century** (DPE)

**Cross-listings:** REL 166 AMST 166 COMP 166 ENGL 268

**Secondary Cross-listing**

Islam and Muslims in the United States are the subject of extensive public scrutiny and media coverage in broader public discourses. It is less common, however, to hear Muslims' own voices speak about their lives, experiences, beliefs, and commitments. This course will take a literary approach to exploring American Muslims' own narratives about themselves, which will serve as an introduction to religion in contemporary U.S. culture. We will address questions such as: How do American Muslims attempt to fashion their identity in the wake of 9/11? What are the pressures and demands of American national belonging and cultural citizenship that Muslims must navigate? How are race, gender, ethnic heritage, and immigration definitive of Muslim experiences and self-understandings? How are Muslims approaching the tensions between communal belonging and individuality? What are the competing claims and contestations about authentic expressions of Islam? We will be engaging such themes through an analysis of popular memoirs, autobiographies, novels, short stories, poetry, films, and comedy.

**Requirements/Evaluation:** regular reading responses, short midterm essays, and final paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** First-year students and sophomores

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

REL 166(D2) AMST 166(D2) COMP 166(D2) ENGL 268(D2)

**Difference, Power, and Equity Notes:** This course will explore the intersections of power in American Muslim life, such as: Muslims as a religious minority in the context of the War on Terror; racial and ethnic differences in Muslim communities; immigration and national belonging; competing claims to religious authenticity and authority; and conflicting gendered norms. Students will learn to identify these multiple layers and configurations in the texts, and how to analyze their workings in nuanced multidimensional ways.

*Not offered current academic year*

---

**ENGL 278 (S) Buddhism and Contemporary American Literature**

The influence of Buddhism on American literature is long-standing and appears to be growing ever deeper with time. A very partial list of contemporary American writers who have been influenced by Buddhist practice and theory includes: Ruth Ozeki, George Saunders, Charles Johnson, Alice Walker, bell hooks, Maxine Hong Kingston, Ocean Vuong, Maggie Nelson, Jane Hirshfield, and Norman Fischer. This class, conceived as a follow-up to the introductory course "Zen and the Art of American Literature" (though it's not necessary that students have taken that course), will offer a deeper look into the role that Buddhism is playing in contemporary American literature. Our focus will fall squarely on literary texts (mostly novels and poems by the authors named above, including Ruth Ozeki's latest novel, *The Book of Form and Emptiness*), but we'll make occasional forays into Buddhist
nonfiction, to supplement our understanding of how Buddhism is speaking to pressing contemporary problems like racism and the ecological crisis. Students who want to take this course should already be familiar with the practice of meditation (see pre-reqs below), which they will be asked to continue (for 15-20 minutes a day) alongside their study of texts by writers who have themselves engaged in similar contemplative practices (often as an integral part of their own writing practice). Ideally, practice and theory, reading and experience will mutually inform one another.

Requirements/Evaluation: Attendance will be strictly required (after two allowed absences, each subsequent absence will lower a student's final course grade by 1/3). Other requirements: daily meditation practice (15-20 minutes a day), a weekly meditation journal, various informal in-class and take-home writing assignments, and a final 10-12 page essay.

Prerequisites: Students must have successfully completed a course at Williams that includes a substantial introduction to the practice and theory of meditation. Examples include ENGL 239, ENGL 277, REL 269, REL 232, REL 254, REL/PHIL 288.

Enrollment Limit: 25

Enrollment Preferences: After you preregister, please email me at brhie@williams.edu with an explanation of what draws you to the course, as well as the name of the course you've taken that satisfies the meditation-related prerequisite.

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

ENGL 279 (S) Introduction to Latinx Literature: From 'I Am Joaquin' to Borderless-Future Dreams (DPE) (WS)
This course is designed to introduce you to Latinx literary and cultural production from the 1930s through the present. We will read and encounter some of the most urgent and exciting literary-artistic texts produced by Latinxs in the U.S., focusing our attention on the post-war period and the flourishing of the Chicano Movement-related cultural renaissance of the late 1960s and early 70s, along with the Movement's significant aftershocks. This focus highlights the significant contributions Chicano voices have made to Latinx literary studies and creates space for the incorporation of other Latin American-descended peoples (including Nuyoricans, Cubanos, Central Americans, Afro-Latinxs, and more). In addition to traditional narrative forms, we will also study poetry, films, photography, plays, murals, and performance art. In this way, you will gain a critical awareness of how Latinxs have historically engaged in various modes of artistic experiment to better question some of the twentieth and twenty-first centuries' most pressing global and local political issues (from migration to racism to coloniality to heterosexism to gentrification to U.S. imperialism and more). The course, at its core, will explore issues of identity-formation, particularly as they relate to Latinx struggles for equality on the fault lines of race, class, and gender/sexuality. Who and/or what is the Latinx subject, and how does the question of identity relate to struggles for cultural recognition and political equality? To what extent does the Latinx subject's political freedom rest upon practices and processes of identity-formation or, alternatively, dis-identification? As we explore these questions, we will also examine how Latinxs come to inhabit and articulate a sense of space and place in the shifting landscapes of culture—from the city to the campo to the cultural in-between of the border.

Requirements/Evaluation: Active participation in in-class and online discussion, four 4-5 page essays, writing-related homework assignments, and an in-class presentation.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 19

Enrollment Preferences: Sophomores considering the English major, but juniors and seniors are also welcome.

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: The instructor will provide written feedback on student work. Students will receive timely feedback on essay assignments with suggestions for improvement and will revise their essays.

Difference, Power, and Equity Notes: This course offers students the opportunity to learn and think critically about Latinx community struggles throughout U.S. social history while examining the forms of cultural expression that arise out of and in relation to those struggles. It also delves into the intersectional nature of Latinx community struggles as they emerge along the fault lines of race, class, and gender/sexuality.

ENGL 281 (F)(S) Introductory Workshop in Poetry

Poetry is a capacious genre, and notoriously difficult to define. Emily Dickinson wrote of it this way: "If I read a book and it makes my whole body so cold no fire can ever warm me, I know that is poetry. If I feel physically as if the top of my head were taken off, I know that is poetry. These are the only ways I know it. Is there any other way?" In this introductory workshop, we will develop an expansive definition of poetry and a facility with its many strategies. We'll read broadly in canonical and contemporary poetry and will engage in various exercises, improvisations, and collaborations. You will write your own poems, as well as brief reflection papers. You will give thoughtful feedback on one others' poems, and revise your own work as part of a final portfolio.

Requirements/Evaluation: engaged participation; successful completion of assignments; demonstrated commitment and substantial improvement, as evidenced by a final portfolio of revised poems.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: All interested students should pre-register and will be emailed with instructions if the course is over-enrolled.

ENGL 282 (F) Introductory Workshop in Memoir

A course in basic problems and possibilities that arise in the composition of memoir. Individual meetings with the instructor will be available. Class sessions will be devoted to the discussion of both published and student work. Students will receive written critiques from other students as well as the instructor. Evaluation will be based on class participation, critiques of classmates' work, the successful completion of several writing exercises, two workshop pieces, and a final portfolio of 25 pages of memoir. No prerequisites. Enrollment limited to 12. Selection will be based on writing samples.

Requirements/Evaluation: Evaluation will be based on class participation, critiques of classmates' work, the successful completion of several writing exercises, two workshop pieces, and a final portfolio of 25 pages of memoir.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: All interested students should preregister. If the class is overenrolled, preregistered students will be notified with instructions for submitting a writing sample.

ENGL 286 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: AMST 283 AFR 283 WGSS 283 ENGL 286

Secondary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

ENGL 288 (S) Introductory Poetry Workshop: Writing as Experiment

Some writing gets categorized as "experimental" or "avant-garde." But a spirit of experimentation—of rigorous, playful curiosity—is crucial for writers of all levels and styles to cultivate. In this introductory poetry course, we will engage in games and exercises designed to help us explore the wide set of tools available to poets. We will read works by canonical and contemporary poets, from Shakespeare and Dickinson to Fatimah Asghar, Haryette Mullen, Douglas Kearney, and more. We will also discuss the ways race, gender, and power affect interpretations of the risks such poets take in their work, asking: What are the boundaries of what is considered to be poetry, and what possibilities for writing might we discover by pushing against those boundaries? How might a poem live, not just on the page, but also on a sidewalk, on a screen, in performance? This is a course that approaches writing as a laboratory to test out ideas and asks students to think critically about their own creative processes. Students will be expected to create
new writing, submit reflection papers, give feedback on each others' poems, and revise work as part of a final portfolio.

Requirements/Evaluation: Class participation, completion of writing exercises, feedback/reflection papers, and a final portfolio with revisions.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: if course becomes over-enrolled, enrollment will be determined by application.

ENGL 290  (S) Technologies of Friendship

Cross-listings: STS 290 ENGL 290

Secondary Cross-listing

Contemporary friendships--whether among roommates, near neighbors, or friends living thousands of miles apart--are highly mediated. We communicate and signal our attachment through Zoom windows, apps, and social media platforms, and we create ambiguous relationships with people whom we "follow" or "friend" without having met in person. Sometimes we text as much as we talk even with intimate friends, and carrying on in-person friendships was complicated in myriad ways by the Covid-19 pandemic. But friendships have always been mediated, and in this tutorial we will examine how writers across centuries have described the tools and technologies of friendship: some perhaps quaint or sentimental (for example the written letter) and others creepy or invasive (for example Apple's "Find My" app or social media's "suggestions"). We will ask common and important questions, such as "Can one have too many friends?"; "Are long-distance friendships sustainable?"; and "What health risks do we take for friendship, and what other risks do technologies of friendship carry?" Readings will include works of fiction and journalism, and scholarship from psychology, the history of technology, and science and technology studies. The technologies we will consider include emojis, coffeehouses, memes, letters, telephones, video games, social media, and novels themselves.

Requirements/Evaluation: Students will write essays and critique their partner's essays in alternate weeks. Essays will receive detailed instructor feedback, including writing instruction.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: STS concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENGL 294 (F) On Occupations: Work, Colonization and Contemporary Life (DPE) (WS)
Cross-listings: ENGL 294 COMP 299
Primary Cross-listing

Reading political essays, critical theory, historiography, and literary works, in this course we will ask what thinking through the different senses of "occupation" can teach us about contemporary life. The course wagers that there is a connection between why some nations are or were "under" occupation and why, as individuals, all of us must "have" occupations. On the one hand, we will think about work: What does it mean to have an occupation today? There was a time when most people could distinguish between the time of work and that of leisure. But we live under a different regime. What now is the difference between work and leisure for those working "gigs"? In the case of "creatives," Bifo Berardi says, it is the soul itself that has been put to work. And then there are those who are unemployed, i.e., those occupied by the most widespread form of work there is--looking for work. On the other hand, we will ask questions about colonialism: Did not Europe's occupation of the globe birth this world in which the only way to live is to be occupied in a narrow sense, i.e., to always be working or looking for work? And isn't one economic function of the occupation of peoples in our own times to create a cheap workforce? Finally, we will ask what art and political organizing can teach us about a "de-occupied" life--a life after work, a life without colonization. Writers will include Marx, Jyotiba Phule, Du Bois, Raymond Williams, Premchand, M. E. O'Brien and Eman Abdelhadi, Bifo Berardi, David Graeber, Mahatma Gandhi, Rabindra Nath Tagore, Mahasweta Devi, Edward Said etc.

Requirements/Evaluation: Students will read fifty to eighty pages each week. Each student will participate in at least one roundtable discussion. Writing assignments: three essays of 5-6 pages, one of which will be revised and expanded as a final essay of 8-10 pages.

Prerequisites: 100-level English course or a 5 on the AP literature exam, or permission of the instructor.

Enrollment Limit: 19
Enrollment Preferences: first-years and sophomores considering majoring in English or Comparative Literature, and English majors who have not yet taken a gateway course.

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 299 (F) Let the Record Show: U.S. Literature of Research and Witness (DPE) (WS)
Cross-listings: AMST 299 ENGL 299
Secondary Cross-listing

This is a course on the literature of research and witness in the U.S., from 1853 to the present. We will train our attention on works of long form
journalism that stand at the intersection of reportage, archival history, documentary nonfiction, narrative and activism. The writers we study present quantitative and qualitative data that document the existence and effects of systemic racism, xenophobia, sexism, homophobia and uneven economic development. How have American writers defied disciplinary boundaries to speak truth to power? What critical reading skills are mobilized by books of sweeping scope and unflinching detail? The course will be taught in reverse chronological order. Readings include: Sarah Schulman, Let the Record Show; Layli Long Soldier, Whereas; Nicholas Lemann, The Promised Land; Theresa Hak Kyung Cha, Dictee; James Agee, Let Us Now Praise Famous Men; Tillie Olsen, Yonnondio; Ida B. Wells, A Red Record; and Harriet Beecher Stowe, Key to Uncle Tom's Cabin.

Requirements/Evaluation: Evaluation will be based on class participation, writing and discussion. According to the tutorial format, you will be assigned a semester-long partner. You will be expected to write a critical paper every other week, alternating with the critical response to your partner's work.

Prerequisites: None
Enrollment Limit: 10

Enrollment Preferences: This is a tutorial for sophomores. Priority will be given to potential American Studies majors, especially those who have taken AMST101; potential English majors will be considered as space is available.

Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 299(D2) ENGL 299(D1)

Writing Skills Notes: As per traditional tutorial format, this course will be writing intensive. Every week, one student will write a 5-page paper responding to the readings of the week; the other student will craft a response (a combination of written notes and critical conversation). The total amount of writing for each student will thus be upwards of 30 pages. there will be considerable attention given to argument, use of evidence, etc. The option to revise a paper will always be available.

Difference, Power, and Equity Notes: This course shares the core mission of the DPE initiative: to teach students how to "analyze the shaping of social differences, dynamics of unequal power, and processes of change." The course is built around U.S. texts that speak truth to power. Researching and exposing the quantitative and qualitative data that prove the existence and effects of systemic racism, xenophobia, sexism, homophobia and uneven economic development, the writers we will study merge research, writing and activism.

ENGL 300 (F) Re/Generations I: Memory Against Forgetting and the Global American Empire (DPE)

Cross-listings: COMP 357 AMST 300 ENGL 300

Secondary Cross-listing

This is a two-part junior seminar in which we take an expansive approach to memoir as a form, genre, and practice, with specific attention given to texts reckoning with the traumas, transgressions, and transformations of what we understand as "America" and its many discontents. In this first part, we focus on authors charting the lives and afterlives of chattel slavery, settler colonialism, genocide, war, and the expansion of the global American empire, from the 19th through 20th centuries. How do these authors remediate the critical (il)legibility of personhood and place, community and nation? What myths must be dispelled and/or rewritten? What structural elements are deployed to tackle the obstacles of hegemonic power and historical amnesia, and how do these authors re/generate "what remains of lost histories and histories of loss" (Eng and Kazanjian)?

Texts to be considered may include: Narrative of the Life of Frederick Douglass, an American Slave; Hawaii's Story by Hawaii's Queen (Lili'oukalani); Notes of a Native Son (James Baldwin); Borderlands/La Frontera (Gloria Anzaldúa); Dictee (Theresa Hak Kyung Cha).

Requirements/Evaluation: weekly reading responses, midtern and final papers

Prerequisites: American Studies 101 and/or 301, previous coursework in race, ethnicity, and diaspora, junior or senior standing, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: American Studies majors

ENGL 301  (F)  Sublime Confusion: A Survey of Literary and Critical Theory

Cross-listings: ENGL 301 COMP 301

Secondary Cross-listing

Which is more appealing, a roller coaster or a rose? For much of its history, art and literary theory has conceived itself as a science devoted to explaining and defining "beauty." But running alongside this is an edgier countercurrent that worships something else: an experience of excitement, fear, suspense, or thrilling confusion often described as "the sublime." The sublime interested early critics, from classical rhetoricians to the German Idealists, as a way to make aesthetics more scientific paradoxically by identifying the doorway through which art and literature escaped the realm of reason. More recently the notion of literature's exciting confusion has played a key role in modern critical theory from Russian formalism to new criticism, deconstruction, postmodernism, and posthumanism. (In fact, poststructuralist criticism itself has a thrillingly confusing quality that we will not ignore.) We will take up a cross section of critical theory from classical times to the present, focusing on careful reading of relatively short texts by Plato, Aristotle, Addison, Burke, Schiller, Nietzsche, Shklovsky, I.A. Richards, Barthes, Derrida, Lyotard, Fredric Jameson, Haraway, and others. Case studies ranging from opera to Xbox will enlighten, thrill, and confound you. Written assignments will encourage you to parse these theories carefully and apply them to the literary texts that most interest you: prose, poetry, or drama from any time and place; film, visual art, or architecture; music, new media, or digital media, and beyond.

Requirements/Evaluation: attendance and active participation, several short response assignments, final project consisting of a scripted oral presentation and a 15-page final paper

Prerequisites: 200- or 300-level course in literature, theory, or philosophy, or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: students majoring or considering a major in a related field

ENGL 302  (S)  "A language to hear myself": Advanced Studies in Feminist Poetry and Poetics  (DPE)

Cross-listings: ENGL 302 WGSS 330 AMST 310

Primary Cross-listing

The title of this course comes from Adrienne Rich's 1969 poem "Tear Gas," grounding our study in 1960s, 70s, and 80s feminist activist poetry but also in our current moment to answer a fundamental question: what can poetry do for us? In this period, feminist activist poets were at the center of a revolutionary social justice movement that changed the world. Feminist presses published much of the new poetry. This course focuses on the theory and practice of feminist poetry and print culture during this period, and how feminist experiments in language changed how we understand American poetry. We focus on the theoretical writings and poetry chapbooks of a diverse group of poets who powered the movement, including Audre Lorde, Mitsuye Yamada, Nelly Wong, Robin Morgan, June Jordan, Joy Harjo, Gloria Anzaldúa, Sonia Sanchez, Adrienne Rich, Judy Grahn, and Pat Parker. We also read the work of some later feminist theorists, such as Sara Ahmed. We spend time in the archives, analyzing documents from the period, including feminist magazines and original publications of poetry chapbooks often published by the period's many feminist presses and consider how
such attention allows us to construct alternative narratives for feminism and American poetry. Writing at the intersections of race, class, gender, and sexuality, and of multiple social justice movements (Civil Rights, anti-Vietnam War, LGBTQ activism, and Black Power), these poets gave us a new language to "hear," not only ourselves, but the experience and pain of others, and, in so doing, they moved personal experience into public discourse around issues of inequality and human flourishing in a democratic society.

Requirements/Evaluation: short analysis papers (4-5 pages), creative (1-2 pages), Perusall annotations, longer final researched paper (10-12 pages) or alternative digital project, curated exhibition of archival materials in Special Collections

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: English, Women's, Gender, and Sexuality Studies, American Studies majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 302(D1) WGSS 330(D1) AMST 310(D1)

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the feminist movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the period.

transatlantic enslavement. As prophetic modes overlap with and inflect controversies such as the querelle des femmes, the witch hunt, and the execution of Charles I, we'll interrogate the construction and deconstruction of social identities. Thus a collateral concern will be recent critical approaches to the early modern category of "woman"—in Black feminism, queer studies, and Marxist-feminism. Throughout our inquiry, we'll take seriously the claim that the seventeenth century was "radical"—in the sense of enacting a "departure from what is usual or traditional" and in the sense of being the "root, basis, or foundation" of a modernity we are still living in and through (see Oxford English Dictionary, "radical" def. 7c and def. 2).

Requirements/Evaluation: Two 8-page papers (one at midterm and one final); maintenance of a reading journal or "commonplace book"; regular discussion posts; brief collaborative research exercises; and a creative response.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 305 (S) The American Modernist Novel

For the purposes of this course, the American modernist novel will include prose fiction written between 1910 and 1940 by such writers as Gertrude Stein, Willa Cather, F. Scott Fitzgerald, Ernest Hemingway, Jean Toomer, and William Faulkner. The emphasis will be on formal prose experimentation for the sake of representing new realities: radical re-conceptions of race and gender, revolutionary technologies such as the car or telephone, the Great War discrediting of all forms of authority. Newly unmoored questions of how to lead a life or organize a society are reflected by a set of unique innovations in how to write a novel.

Requirements/Evaluation: Three papers of ascending weight in determining the final grade, 3-4 pp., 4-5 pp., 5-7 pp. Class participation is expected and rewarded.

Prerequisites: 100-level English course or permission of instructor.

Enrollment Limit: 25

Enrollment Preferences: English majors; prospective English majors; American Studies majors.

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

ENGL 308 (S) Race and the Zombie Apocalypse

Cross-listings: ENGL 308 AFR 305

Primary Cross-listing

This course takes a critical approach to our contemporary understanding of the figure of the zombie and its inextricable link to discourses on race and blackness in the Americas. An introductory grounding in theories of social death allows an opportunity to explore the racial anxiety that gave birth to the genre and trace its development throughout the hemisphere. The course considers the novels, films, and critical texts that frame the genre in order to pose the following questions: What can the figure of the zombie teach us about our evolving relationship to race? What roles do gender and sexuality play in the construction of the genre? And, finally, how does the recent proliferation of zombie-related television shows, movies, books, and video games reflect our present-day concerns?

Requirements/Evaluation: weekly reading responses, active class participation, three close readings (500 words each), annotated bibliography, class presentation, final paper (13-15 pages)
ENGL 309 (S) Ibsen, Chekhov and the emergence of Modern drama

Cross-listings: ENGL 309 COMP 387 THEA 387

Secondary Cross-listing
This course will center on the plays of Henrik Ibsen and Anton Chekhov, key figures in the development of Modern European drama. Prospective readings will include Ibsen's *A Doll's House* (1879), *The Wild Duck* (1884), *Rosmersholm* (1886) and *Hedda Gabler* (1890); Chekhov's *The Seagull* (1896), *Uncle Vanya* (1900), *Three Sisters* (1901) and *The Cherry Orchard* (1904); along with August Strindberg's *Creditors* (1889) and Oscar Wilde's *An Ideal Husband* (1894). We will chart the development of dramatic realism and naturalism, and situate these plays in the context of the late-nineteenth century "ache of modernism", with supplemental readings that highlight changing conceptions of identity and subjectivity, emerging strains and contestations over gender and sexuality, and the wider sociological, political and technological changes of the period. The course will also be centrally concerned with these playwrights' innovative explorations of the investigations of theatre's capacities and limitations in representing social reality and the 'performance' of selfhood.

Requirements/Evaluation: Five papers, alternating weeks with your tutorial partner; critical responses to your partner's essays; evaluation of participation.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Theatre, English and Comparative Literature majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENGL 311 (S) Black Critical Theory, Black Avant-Garde

Cross-listings: AMST 374 ENGL 311 AFR 376

Secondary Cross-listing
What is the relationship between violence and what constitutes the Black avant-garde and Black critical theory? Is it possible to conceptualize the latter two without an investigation of Black rebellion and its relationship between Black artistic and intellectual production? Can one argue that Black critique is none other than Black experimentation in form, or that Black abstraction is the requisite effector for all modes of Black praxis and thought? This course will explore these questions through a study of Black continental and diasporic avant-garde texts in multiple mediums. Alongside, we will also consider the emergence of contemporary Black critical theory, chronicling its development as both experimental and critical. Through the works of historical subjects of experimentation also considered to be objects critiquing in experimental form, the course will approach Black avant-gardism and Black critical theory as a productive opportunity to think about Blackness as critique, as experimentation, and as theoria. This pairing of Black avant-gardes and Black critical theory takes "avant" at its root--indicating what precedes or takes precedent--and "garde" as what is preeminent, or what protects. As such, we will start with the question of whether blackness, as an ideological fiction produced through violent historical ideologies and practices, could ever, or ever not, be anything but avant-garde?
Requirements/Evaluation: Weekly discussion posts and questions, a research presentation, and two 10-12 page papers
Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: Preference will be given to AMST majors and prospective majors, as well as ENGL and AFR majors or prospective majors.
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option

ENGL 315 (S) Milton’s Paradise Lost
Cross-listings: REL 319 ENGL 315

Primary Cross-listing
If you know anything about John Milton, you probably think of him as some blind guy who wrote a really long poem about the Bible. It’s hard to shake the feeling that Milton is the fustiest of English poets—dull, pious, brilliant and all, and not someone you would read if you didn’t have to. But then what are we to make of the following? The first piece that Milton wrote that was read widely throughout Europe was a boisterous defense of the English Revolution. Milton was most famous in his lifetime as the poet who went to bat for the Puritan insurgents—the poet who came right out and said that the king looked better without his head. Of all the major English poets, Milton is the revolutionary. So a course on Milton is by necessity a course on literature and revolution. We will read Paradise Lost, widely regarded as the greatest non-dramatic poem in English, and a few other books to help us prepare for that big one. Some questions: How did the mid-seventeenth century, probably the most tumultuous decades in the history of modern Britain, transform the culture of the English-speaking world? What is the relationship between literature and the state or between literature and radical politics? Is there a poetics of revolution? How can a poet who seems to be writing for Sunday school—about God and Adam and Eve and the serpent—really have been writing about rebellion all along?

Requirements/Evaluation: one 6- to 8-page paper, one 10- to 12-page paper, informal weekly writing assignments, and active seminar participation
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam.

ENGL 316 (F) Unfinishing America (DPE) (WS)
Cross-listings: ENGL 316 AMST 326

Secondary Cross-listing

The Great American Novel is a moribund cliché. Few would argue that any one work of fiction could capture the essence of American life. In this class, we will flip the Great American Novel on its head by reading Ralph Ellison's unfinished second novel. After publishing the acclaimed Invisible Man in 1952, Ellison seemed poised to deliver the next Great American Novel. But he never did. When he died in 1994, 42 years later, he left behind thousands of pages of material, but no finished second novel. Why wasn't he able to finish it? Some of it was bad luck. Some of it was a struggle with genre and form. However, perhaps the real reason Ellison's novel proved impossible is what it was trying to say. This is a book about the historical trauma of racism. Therefore, the thesis of this class is that the Great American Novel cannot be written as long as American history remains whitewashed. Ellison's manuscript shows this in surprising ways, from its depiction of racial passing and the taboo of interracial sex to its extended exploration of Black and Indigenous cultures in the former Oklahoma Territory. In addition to Ellison, we will read the work of the Chicano author Tomás Rivera, whose fragmentary fictions provoke similar questions. This class culminates in a final project that asks students to "unfinish" an American cultural object.

Requirements/Evaluation: Class participation, Discussion facilitation, "Show and Tell" presentation of a cultural object, Reader's Guide, Final Project

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Sophomores, Juniors, and Seniors

Expected Class Size: 10-15

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 316(D1) AMST 326(D2)

Writing Skills Notes: Each student will be responsible for producing a reader's guide to Ellison's unfinished second novel. Students will write, rewrite, and revise their reader's guide throughout the semester. Three drafts will be due throughout the semester. A quality reader's guide will highlight the book's main themes, profile the main characters, and retrace the book's development. Students will also complete one draft of a guide to Rivera's novella, due at the end of the semester.

Difference, Power, and Equity Notes: "Unfinishing America" satisfies the Difference, Power and Equity requirement because it calls into question mainstream American culture from Black, Chicano, and Indigenous perspectives. It interrogates the relations of power that have driven American history, from the Civil War and Westward expansion in the 19th century to the struggle for Civil Rights against Jim Crow in the 20th. Finally, it asks what it would mean to have true equity amidst great diversity in American culture.

ENGL 317 (F) Black Migrations: African American Performance at Home and Abroad

Cross-listings: THEA 317 COMP 319 AMST 317 DANC 317 ENGL 317 AFR 317

Secondary Cross-listing

In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

Class Format: discussion

Requirements/Evaluation: class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page
ENGL 318 (S) Literary Taste and After Taste

Why are some literary works acclaimed or neglected when they first appear, and why do their critical assessments change—sometimes drastically—over time? What does it mean to think of a work as 'before its time'? What is the relation between critical trends and their affinity for particular literary styles? In thinking about these issues, we will consider a few crucial instances: modernist poets and New Critics' celebration of Donne and Marvell over Milton in the early 20th century; 18th and 19th century writers' fascination with medievalism and the Gothic; deconstructionist critics' absorption with Romantic poetry; Marxist and neo-Marxist critics' qualified embrace of realism and critique of postmodernism; and recent and contemporary debates about the relation of aesthetic forms to representations of race, ethnicity, and gender.

Requirements/Evaluation: class participation and two essays, approximately 20 pages of writing

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 321 (S) Samuel Johnson and the Literary Tradition

Samuel Johnson (1709-1784) has been exceptionally influential not only because he was a distinguished writer of poems, essays, criticism, and biographies, but also because he was the first true historian of English literature, the first who sought to define its "tradition." We will read Johnson's own works and James Boswell's Life of Johnson to discover Johnson's talents, tastes, and standards as an artist, as a moral and literary critic, and as a man. We next will use Johnson's Preface to Shakespeare and Lives of the Poets to examine how this great intelligence assessed writers from the Renaissance through the eighteenth century. While reading his commentary on Shakespeare and his critical biographies of Milton, Dryden, Pope, and Gray, we will analyze selected works by these writers so as to evaluate Johnson's views and sharpen our understanding of the relationship between his standards and values, and the ones we hold today--both individually and collectively.

Requirements/Evaluation: midterm and final papers (15-20 pages total), and a take-home final exam

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 20

ENGL 322 (S) Borges, Nabokov, Beckett

Jorge Luis Borges, Vladimir Nabokov, and Samuel Beckett were the three most influential writers in western fiction during the 1960s and 1970s; they helped to turn literary history from modernism to post-modernism. What they share is extreme self-consciousness of two kinds: the self is a labyrinth; the text is a labyrinth. Though born around the turn of the twentieth century, each came to international prominence only after the catastrophe of World War II. Unable to follow their modernist teachers in conceiving of art as the last best hope for the redemption of history, Borges, Nabokov, and Beckett each offered a unique, complex, and witty intelligence as compensation.

Requirements/Evaluation: There will be three formal writing exercises of increasing length and weight; participation in class discussions will also be a factor in the final grade.

Prerequisites: A 100-level English course, or a 5 on the AP literature exam, or a 6 or 7 on the advanced English IB exam.
ENGL 323 (S) A Novel Education  (WS)

All novels are conscious of their readers; eighteenth-century novels are obsessed with them. In the century when the genre first flourished, readers are the ultimate objects of novelists' plots. We are addressed, teased, pleaded with, embarrassed, flattered, made fun of, praised, chided, solicited, warned, reminded, rebuked, asked for sympathy, and--always--closely watched. Eighteenth-century novelists--and their narrators--aggressively educate their readers, not only teaching us how to interpret the novel itself, but also demanding that we self-consciously question the powers of mind and habits of heart we bring to the process of interpreting a book, ourselves, and our world. In this tutorial course, we will explore the narrative and rhetorical strategies two of the century's greatest novelists use in creating, shaping, and finally educating their readers. We will focus principally on Henry Fielding’s Tom Jones (1749) and Laurence Sterne’s Tristram Shandy (1760-67)--long, brilliantly intricate novels that go about their work in very different ways, but that are equally committed to the project of giving their readers a novel education. We will consider--much more briefly--Fielding's Joseph Andrews and Bunyan's Pilgrim's Progress. We will also read criticism by such "reader response" theorists as Stanley Fish and Wolfgang Iser, and--in the individualized setting of a tutorial--students will be asked to develop and articulate their own theories of reading by examining critically the ways in which texts affect and educate them. Emphasis will be placed on developing skills not only in reading and interpretation, but also in constructing critical arguments and responding to them in written and oral critiques.

Class Format: Students will meet with the instructor in pairs for one hour each week

Requirements/Evaluation: Students will write and present a 4- to 5-page paper every other week, and comment on their partners' papers in alternate weeks

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: English majors, not open to first-year students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: All tutorials (at least in English) are by definition Writing Skills courses. Students will write either the main paper or a response critique in alternate weeks. Students will also have the opportunity to revise.

ENGL 324 (F) Romanticism, Belatedly  (DPE)

Cross-listings: ENGL 324 COMP 327

Primary Cross-listing

What is Romanticism? Instead of searching for an answer at the movement's supposed point of origin (1790-1830, in Germany, England, and France), we will begin in early twentieth-century South Asia. In the nineteenth century, English Romantic poetry and, to a lesser extent, ethico-political and aesthetic ideas associated with German Idealism circulated in South Asia as part of a colonial education aimed at producing "a class of persons Indian in blood and color, but English in tastes, in opinions, in morals and in intellect" (Macaulay). The intentions of this plan of education aside, it unwittingly opened channels for literary, philosophical, and political exchange that were harmful to colonial rule, and essential to how we understand worlds of literature today. Behind the backs of its homegrown, self-anointed inheritors, Romanticism in the "colonies" led multiple other lives and was transformed in encounters that must--belatedly--be read back into its originary texts. Hence, in counter-chronological fashion, in this class we will begin with important postcolonial works by Faiz Ahmad Faiz (Urdu), Suryakant Tripathi Nirala (Hindi), Mahadevi Verma (Hindi), Sarojini Naidu (English), Mohammad Iqbal (Urdu and Persian), and Rabindranath Tagore (Bengali), to move on to Karl Marx and Heinrichs Heine (German), Charles
Considering these texts with an eye to poetics and interpretation, we will pay close attention to concepts that they bring to the fore, key among them "belatedness" (Nachträglichkeit), "allegory," "critique," "non-identity." We will read non-English language texts in translation, though we will have occasion to discuss originals.

**Requirements/Evaluation:** One mid-term essay (6-8 pages), one presentation or participation in roundtable, one final paper (12 pages)

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**ENGL 325  (S)  Joyce, Woolf, and Proust**

**Cross-listings:** ENGL 325 COMP 366

**Primary Cross-listing**

This seminar focuses on novels by three of the most important writers of modernist fiction: Marcel Proust (Swann's Way, the first novel of his sequence In Search of Lost Time); Virginia Woolf (To the Lighthouse); and James Joyce (Ulysses, read in slightly abridged form). By juxtaposing these pathbreaking texts, we will examine the distinctive yet related ways in which they explore crucial preoccupations of modernism: the threat and the exhilaration of cultural loss in face of social and political transformations in the early twentieth century; the turn to memory, to art, and to objects as stays against de-stabilized subjectivity and as means of re-thinking value; the emergence of new forms of political and sexual identity; the heightening of consciousness to the verge of transport or disintegration; and the roots and perversities of desire. Students who have studied Ulysses in a previous course are welcome.

**Requirements/Evaluation:** regular class participation, two 8- to 10-page papers

**Prerequisites:** a 100-level ENGL course, a score of 5 on the AP English Lit exam, or a score of 6 or 7 on the Higher Level IB English exam; students who have taken ENGL 360 are welcome

**ENGL 327  (F)  Autofiction**
At a minimum, autofiction refers to contemporary fiction with writer-protagonists who plausibly resemble their author and who often share a name with him or her. When did it begin? Perhaps *In Search of Lost Time* and *Portrait of the Artist as a Young Man* are modernist precursors, but the category comes into its own in the twenty-first century, when writers who know that reality is a fiction nevertheless crave truth, and authors who know that selves are constructs need to express themselves. Or perhaps they know that if the world and self are already fictions, why disguise it by traditional plotting and characterizing? The critical world isn't sure yet what to make of this widespread confounding of novel and memoir, so the course will be exploratory. We'll read about seven books of the quasi-genre, chosen from early prototypes by Marguerite Duras and Peter Weiss, canonized exemplars by Ben Lerner and Dave Eggers, and recent experiments by Sheila Heti, Tao Lin, Jenny Offill, Nell Zink, Will Self, Rachel Cusk, and Ron Currie.

**Requirements/Evaluation:** No exams. Three papers, 4 pp., 5 pp., 6-8 pp. The final paper may have a creative component. Contribution to class discussions is expected and rewarded.

**Prerequisites:** 100-level English course or permission of instructor.

**ENGL 328 (S) Austen and Eliot**

Austen and Eliot profoundly influenced the course of the novel by making internal consciousness crucial to narrative form. In this course we will explore Austen's innovative aesthetic strategies and the ways in which Eliot assimilated and transformed them. By placing each writer's work in its political and philosophical context-in Austen's case, reactions to the aftermath of the French Revolution, in Eliot's, to the failed mid-century European revolutions and the pressures of British imperialism-we will consider how each writer conceives social and historical exigencies to shape comedies and dramas of consciousness. Readings will include Austen's *Pride and Prejudice*, *Emma*, *Mansfield Park*, and *Persuasion*; Eliot's *The Mill on the Floss*, *The Lifted Veil*; and *Daniel Deronda*; selected letters and prose; and critical essays.

**Class Format:** discussion

**Requirements/Evaluation:** two papers of approximately 8-10 pages

Spring 2024

**ENGL 329 (S) Austen, Eliot, Woolf**

**Cross-listings:** ENGL 329 WGSS 329

**Primary Cross-listing**

At roughly fifty-year intervals, Britain produced three brilliant female novelists -- Jane Austen, George Eliot, and Virginia Woolf -- who would each become renowned, in her own way, for her ability to combine minutely detailed social observation with a rich depiction of the inner lives of her characters. This course will examine some of their major fiction-- with an emphasis on Austen and Eliot -- with special attention to the nature and
implications of their narrative methods for representing the consciousnesses of characters, and of the authorial narrative voices that mediate among them. Questions to be considered: how is our understanding of novelistic characters and consciousness shaped by our real-life experience in interpreting the thoughts and character of others, and vice versa? Do "omniscient" narrators lay claim to a privileged kind of knowing presumed to be unavailable either to their character or to readers, or are they modelling humanly available interpretive stances toward a world of others? How do these authors' preoccupations with interior thought relate to their focus on women's experience? Possible texts include Austen's Emma and Persuasion, Eliot's Middlemarch, Daniel Deronda, and The Lifted Veil, and Woolf's The Waves.

Class Format: seminar

Requirements/Evaluation: one six-eight-page and one ten-twelve-page essay

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 331  (F)  Fanaticism

Cross-listings: ENGL 331 COMP 333

Primary Cross-listing

From the early modern period on, writers of literature and political philosophy have repudiated fanaticism, whether as a religious, political, or amorous posture. But what is fanaticism, and why should it be considered such a threat? In this course, we will examine these questions by considering literary texts that dramatize fanaticism in light of accounts by philosophers and historians. Readings will draw on literary works by Spenser, Swift, M. Shelley, Hogg, Dickens, Eliot, Conrad, among others, and political philosophy and historical writings by Hobbes, Locke, Hume, Voltaire, Kant, Diderot, Burke, Hume, Carlyle, Adorno, and a range of recent critics. We will also watch films by Riefenstahl, Hitchcock and Pontecorvo, and look at paintings, drawings and sculpture by Fragonard, Goya, and Shibonare. Since fanaticism has recently had considerable political currency, we will also examine contemporary accounts that reanimate the debates and concerns of the course.

Requirements/Evaluation: Regular class participation and two papers, 7-10 pages in length.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 22

Enrollment Preferences: English and Comparative Literature majors, then qualified sophomores and first-year students.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

ENGL 332  (S)  Aesthetic Outrage

Cross-listings: COMP 307 ENGL 332

Primary Cross-listing
In this course we will explore interdisciplinary ways of understanding and theorizing the outraged reception of provocative works of film, theater, and fiction. When riots, censorship, trials, and vilification greet such works in moments of political and social upheaval, the public outrage is often strangely out of proportion to either the work's aesthetic nature or its overt commentary on the political crisis. Something powerfully symptomatic is at work, then: a set of threatened investments, unacknowledged values, and repressed ideas which surface explosively, but indirectly, in the aesthetic outrage. In an attempt to understand the strange logic of public outrage against works of art, we will explore the respective works' historical contexts, and use theoretical models--aesthetic, political, psychological, social--as a means of illuminating the dynamics of outrage and exposing understated linkages between a work's figurative logic and the political passions of its historical moment. We will study instances of outrage in the context of the French Revolution (Beaumarchais' *The Marriage of Figaro*), the wave of anarchist terrorism in turn-of-the-century Paris (Jarry's *Ubu the King*), the trials of Oscar Wilde for "gross indecency" (*The Picture of Dorian Gray*), the Irish Revolution (Synge's *The Playboy of the Western World* and O'Casey's *The Plough and the Stars*), and Stalinist collectivization (Eisenstein's suppressed film *Bezhin Meadow*). Non-literary reading will include historiographic work on these crises, as well as essays and excerpts by theorists from various disciplines, such as Kristeva, Foucault, Freud, Girard, Arendt, Sedgwick, Bakhtin, Douglas, and Rancière.

**Requirements/Evaluation:** active participation in class discussions, two papers 8-10 pages in length.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 22

**ENGL 333** *(F)*  The Nineteenth-Century British Novel

**Cross-listings:** WGSS 333 ENGL 333

**Primary Cross-listing**

In nineteenth-century Britain, the novel took on the world. Shaking off its early disrepute, and taking advantage of growing literacy and innovations in production and distribution, it achieved in this period an unrivalled synthesis of mass appeal and aesthetic and social ambition. Its representational aspirations were breathtaking: attempting to comprehend in its pages the dizzying complexity of new social, political, and economic structures, as well as to delineate in finest detail the texture of individual lives and minds. In an age obsessed with the social, it engaged directly with the most compelling issues of the day, including industrialization and the gap between rich and poor, the role of women, nationalism and imperialism, and more broadly, the very nature of historical change itself. But it did so, for the most part, by telling fine-grained stories of ordinary men and women, people trying to make a living, worrying about their families and their neighbors, facing illness and death, and falling in--and sometimes out of--love. Since so many of these stories remain highly accessible works of popular culture, we will work hard to focus on what is strange and specific about the fiction of the nineteenth century, while also recognizing the roots of much that is modern in our own culture. We will also take seriously their social ambitions, looking especially at the ways they formulate, promote, and contest their readers' understanding of themselves as subjects and agents of an ongoing social history. Likely authors include Jane Austen, Walter Scott, Charlotte Bronte, Charles Dickens, Anthony Trollope, and George Eliot.

**Requirements/Evaluation:** Heavy (but entertaining!) reading load. Flexible writing requirement includes options for short essays, weekly journal, creative work, and research paper. Students must complete 4 units of writing, with the research paper, if chosen, counting for two. There will be additional bits of informal writing, evaluated as part of the class contribution grade, such as participating in the production of a "brainstorming" doc on Google.

**Prerequisites:** 100-level ENGL course, or a score of 5 on the AP English Literature Exam, or 6 or 7 on Higher Level IB English exam, or permission of instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** English majors, Women's, Gender and Sexuality majors, Comparative Literature majors, seniors

ENGL 334 (F) James Baldwin and His Interlocutors

Cross-listings: ENGL 334 AFR 361

Primary Cross-listing

This seminar explores the life and writing of James Baldwin. Through an examination of both his fiction and nonfiction, we chart his interrogation and development of ideas surrounding, among other topics, race, courage, love, nation, revolution, and belonging. We also trace his impact on our national consciousness by engaging with authors whose own bodies of work intersect with his. This list includes, among others, Amiri Baraka, Nikki Giovanni, Lorraine Hansberry, Barry Jenkins, Audre Lorde, Norman Mailer, Richard Wright, and Malcolm X.

Requirements/Evaluation: weekly reading responses, active class participation, three close readings (500 words each), annotated bibliography, class presentation, final paper (13-15 pages)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

ENGL 335 (S) Moving Words, Wording Dance (DPE) (WS)

Cross-listings: DANC 302 ENGL 335

Secondary Cross-listing

How can we capture the "liveness" of dance and performance through writing? How can the spoken and written word promote a deeper understanding of felt emotions expressed through embodied practice? In this tutorial, we will explore different modes of writing about performance such as fiction, ethnography, and performative writing. While there will be skill-based goals and a set outline for the tutorial, core texts that will anchor the conversations and paired writing assignments will be selected according to the interests of enrolled students. Texts will be complemented with visual materials and/or virtual conversation with artist-scholars to encourage a multilayered experience with writing about performance. The course is reading and writing intensive, and oriented towards juniors, seniors, and those with deep interest in analytical and creative writing. Students will (i) read several monographs during the semester, (ii) produce creative and critical writing (at least 5-6 pages every two weeks and a longer final essay) (iii) be committed to the peer review and revision process of their own work and that of their writing partners, and (iv) participate in discussions about course materials and reflections about their writing process.

Class Format: enrollment in the course will require each student to have in-person or zoom meeting with the instructor before the first class meeting.

Requirements/Evaluation: This tutorial is reading and writing intensive, and oriented towards juniors, seniors, and those with deep interest in analytical and creative writing. Students will (i) read several monographs during the semester, (ii) produce creative and critical writing (at least 5-6 pages every two weeks and a longer final essay) (iii) be committed to the peer review and revision process of their own work and that of their writing partners, and (iv) participate in discussions about course materials and reflections about their writing process.
Prerequisites: none
Enrollment Limit: 8

Enrollment Preferences: Juniors and seniors, and those with specific interest in performance, creative, and analytical writing. Prior dance or performance experience not required.

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

DANC 302(D1) ENGL 335(D1)

Writing Skills Notes: Each student will write three 5- to 6-page papers on which the professor and peers will provide critical feedback on content, style, and form. After each cycle of feedback, students will submit a revision, and will discuss the revision process and the revised paper. As the final assignment, students will select one of the three papers to develop into a longer essay, which will be 10-15 pages.

Difference, Power, and Equity Notes: The monographs that will anchor the tutorial engage with politics of identity as it manifests in both staged and in everyday performances. The introductory points of exploration and the objects of analysis in the course are bodies in motion. So our inquiry throughout the semester will necessarily include how bodies "make meaning" in a network of power relationships within the context of historical associations to markers of race, class, gender, sexuality, and socially constructed differences.

ENGL 338 (S) Literature of the American Renaissance

Cross-listings: ENGL 338 AMST 338

Primary Cross-listing

The term "American Renaissance" refers to a period of US writing, primarily a couple of decades before the Civil War but extending after it: the time of Poe, Emerson, Thoreau, Hawthorne, Melville, Dickinson, Whitman, Jacobs, and Douglass. At stake throughout was the soul of the nation in a time of exuberant political expansion, spiritual optimism, social experimentation, deadening social conventionality, spiritual constriction, labor exploitation, and slavery. The question repeatedly asked was what it means to be free. The question is personal, political, social, and spiritual, and always, for writers, literary: what are the limits or possibilities of writing freely?

Requirements/Evaluation: Three papers: 4 pp., 5 pp., 6-8 pp. Active class participation is expected and rewarded.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on he Higher Level IB English exam, or permission of the instructor

ENGL 339 (F) William Faulkner

William Faulkner was an experimental modernist; he was also deeply mired in the whole history of racism in the South and in the U.S. generally. What is the relation of these two facts? What is revealed, and what is hidden, in the brilliant obscurity of his prose? Faulkner seems to have known, consciously or unconsciously, as much as any white person in the twentieth century about race; for that reason, his African American contemporaries and ours have often sought him out in particular for a dialogue on the topic. Thus, we'll read Jesmyn Ward's "Sing Unburied, Sing" alongside Faulkner's five great novels from 1929-1940.
Requirements/Evaluation: Three papers of increasing length, a total of about 15 pages. Participation in class discussions will also be a factor in the final grade.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: English majors, or potential English majors.

Expected Class Size: 25

ENGL 341 (S) Sexuality in US Modernisms (DPE)

Cross-listings: ENGL 341 WGSS 342

Primary Cross-listing

This course investigates how sexual identities, desires, and acts are represented and reproduced in U.S. literary and popular culture. Focusing on 1880-1940 (when, in the U.S. the terms "homosexual" and "heterosexual" came to connote discrete sexual identities), we will explore what it means to read and theorize "queerly." Among the questions we will ask are: What counts as "sex" or "sexual identity" in a text? Are there definably queer and/or transgender writing styles or cultural practices? What does sexuality have to do with gender? How are sexual subjectivities intertwined with race, ethnicity, class, and other identities and identifications? Why has "queerness" proven to be such a powerful and sometimes powerfully contested concept? We will also explore what impact particular literary developments--the move from realism to modernism--and historical events such as the rise of sexology, first-wave feminism and the Harlem Renaissance--have had on queer cultural production. The class will also introduce students to some of the most influential examples of queer literary and cultural theory. Readings may include works by authors such as James, Cather, Far, Hughes, Nugent, Stein, Fitzgerald, and Larsen, as well as queer literary theory and critique by scholars such as Butler, Coviello, Ferguson, Foucault, Freeman, Freund, Hartman, Lorde, Love, Muñoz, Rich, Rodriguez, Ross, and Sedgwick.

Class Format: discussion/seminar

Requirements/Evaluation: active class participation, several short writing assignments, two 5-page papers, and one 7-9 -page paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 25

ENGL 342 (S) Advanced Topics in Cultural Theory

Many people these days have views about the politics of pop culture. Audiences show up at superhero movies already asking questions about how Marvel has opted to represent this or that group. Fans don't need to be told that hip-hop in the US involves questions of power. So what are the
questions we ask next? Can we get more precise about the role of politics in culture? Or about the role of culture in politics? Is there, for instance, a right way to represent injustices? And how exactly could culture and the media be made more democratic? Can the arts help us imagine better ways of organizing our societies? Does all political struggle have to involve the media? And what is the fate of art in societies in which everything is for sale? Readings will include Antonio Gramsci, Raymond Williams, Fredric Jameson, Theodor Adorno, Ernst Bloch, and others.

Requirements/Evaluation: one 6- to 8-page paper, one 10- to 12-page paper, informal weekly writing assignments, and active seminar participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam.

ENGL 343 (S) Whitman and Dickinson in Context (WS)

In this tutorial, we will read closely the works of two of the most influential and experimental poets in the nineteenth-century U.S., Walt Whitman and Emily Dickinson. In addition to studying in depth their poems and other writings—In Whitman's case, his essays, in Dickinson's, her letters—we will delve into some of the major critical debates surrounding their work, both individually and when compared to one another. For example, Whitman is often viewed as perhaps the most public nineteenth-century American poet, whereas Dickinson is regarded as perhaps the most "private." We will interrogate this assumption, exploring how each poet represents publicity and privacy in their work, as well as their efforts to "perform" and/or reform an American self. We will also examine how each poet engages questions of gender and sexuality, as well as contemporary debates surrounding such issues as abolition, slavery, women's suffrage, temperance, and settler colonialism. We will consider what role their whiteness plays in their poetry and personas. Finally, we will explore Whitman and Dickinson's relation to significant literary and philosophical movements of the period, including transcendentalism and the culture of sentiment. Throughout the course, emphasis will be on analyzing and generating interpretations of Whitman and Dickinson's works, constructing critical arguments in dialogue with other critics, formulating cogent written critiques, and carrying on an oral debate about a variety of interpretations. Students will meet with the instructor in pairs for an hour each week. They will alternate between writing 5- to 7-page papers and commentaries on their partner's papers.

Requirements/Evaluation: five 5- to 7-page papers, final paper, oral presentation and critique

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 10

Enrollment Preferences: English majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will write at least five 5-7 page papers, five responses to their partner's writing, and on-going commentary from the instructor on their writing skills.

ENGL 345 (S) Shakespeare on Page, Stage and Screen: Text to Performance (WS)

Cross-listings: ENGL 345 COMP 343 THEA 340

Secondary Cross-listing

Four centuries on, Shakespeare still challenges us. How should we weigh the respective claims of our own era's concerns—with matters of gender, sexuality, race, class, or materiality, for instance—against historicist attention to the cultural, political and theatrical circumstances in which his plays
were actually written? And when it comes to realizing the text in dramatic performance, such challenges--and opportunities--multiply further. Critical fidelity to Shakespeare's times, language and theatrical milieu prioritizes a historical authenticity that can be constraining or even sterilizing. At the other extreme, staging the plays with the primary aim of making them "speak to our times" risks revisionary absorption in our own interests. We will focus on six Shakespeare plays, from different genres and periods of his career: *Romeo and Juliet*, *Henry V*, *Twelfth Night*, *Hamlet*, *Antony and Cleopatra*, and *A Midsummer Night's Dream*. Proceeding with each from close reading of the text, we will attend to the demands and opportunities of both interpretation and performance, and assess a range of recent film and stage productions.

**Requirements/Evaluation:** Three papers ranging from 4 to 7 pages; several short reading responses and regular discussion board postings; class participation.

**Prerequisites:** A THEA course; a 100-level ENGL course; a score of 5 on the AP Literature exam or a 6 or 7 on the IB exam; or permission of instructor.

**ENGL 346 (S) Literary History: Shakespeare, Dickinson, Celan, Knausgaard**

This course will consider literature as a distinctive kind of historical object, one that emerges within a specific linguistic, cultural, and political context and that, nevertheless, travels far beyond its point of origin into unknown and, indeed, unknowable futures. The four figures who will concern us this semester are interested in one another - the later writers are careful readers of the earlier ones - but our thinking will go beyond reception history and the dynamics of literary influence. Instead, we will focus on the way in which literature's own temporality structures its history and, indeed, the way in which history itself might be conceived in literary terms. We will read a lot of lyric poems, but we will end the semester with perhaps the most important contemporary European novel. We will also read a significant body of theory and criticism, including works by Theodor Adorno, Giorgio Agamben, Maurice Blanchot, Martin Buber, Sharon Cameron, Anne Carson, Jonathan Culler, Joel Fineman, Virginia Jackson, Boris Maslov, and Sianne Ngai.

**Requirements/Evaluation:** Midterm paper of 6-8 pages, final research paper of 10-12 pages, thoughtful participation in class discussions

**Prerequisites:** either a 100-level ENGL course, a score of 5 on the AP English Literature exam, a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** English majors and those intending to major in English. Reading knowledge of German welcome but not expected.

**ENGL 347 (F) Love and Revolution**

**Cross-listings:** COMP 344 ENGL 347

**Primary Cross-listing**

"Love" is here a kind of shorthand for questions of sexuality and gender: why do novels, plays, and films about contemporaneous political revolutions so often get caught up in seemingly superfluous and unrelated disturbances in the field of sexuality and gender relations? In this course we will study...
such works, which are especially responsive to social currents whose logic they cannot fully articulate. In these texts a state of political revolution almost irresistibly touches off sexual subversiveness as well, inviting the reader or spectator to interpret just what sexual upheaval has to do with political revolution. We will take up this problem in the setting of several historical revolutions and some literary and cinematic works that represent them: for example, the French Revolution (Beaumarchais’ *The Marriage of Figaro* and the Marquis de Sade’s *Philosophy in the Bedroom*); the Irish Revolution (plays by Synge, O’Casey, and Yeats); the Russian Revolutions of 1905 and 1917 (Bely’s *Petersburg*, Babel’s *Red Cavalry*); the revolution constituted by Nazism (Hitler’s *Mein Kampf*, the films *Triumph of the Will* and *The Damned*); the Prague Spring (Kundera’s *The Unbearable Lightness of Being*); and the Algerian Revolution (Pontecorvo’s film *The Battle of Algiers*). We will confront such questions as why an author might suggest that revolution can only be sustained through incest and libertinism; why passionate nationalist revolutionaries should be scandalized by the idea of oedipal violence and take refuge in myths of female purity; how to interpret revolution and gender relations in the context of disparate cultures. We will examine historical and social texts as well as artistic ones, learning how literature and history might be read together and inversely: that is, learning to read literature or film as a kind of political event, and to read history literarily, with an eye to its rhetoric and figuration.

**Requirements/Evaluation:** active participation in class discussions, several short written exercises, two 8-page papers

**Prerequisites:** a 100-level English course, or a score of 5 on the Advanced Placement examination in English literature or a 6 or 7 on the International Baccalaureate

**ENGL 349 (S) Contemporary American Theatre: Poetry, Politics, Place**

**Cross-listings:** ENGL 349 COMP 355 THEA 345

**Secondary Cross-listing**

As Gertrude Stein once remarked, “The hardest thing is to know one’s present moment.” What is going on in U.S. theatre today? Who are the dramatists and theatre makers of the present moment? This survey course will introduce students to twenty-first century American drama and performance, focusing on the poetic, political, and environmental aspects of the art form. Topics to be considered may include: theatre as social practice, participatory, site-specific, and immersive theatre, social justice theatre, lyrical theatre, supernaturalism, changing labor practices in the industry, and the turn to digital performance. Artists and companies to be considered may include: Suzan Lori-Parks, Branden Jacobs-Jenkins, Quiara Alegría Hudes, Anne Washburn, Taylor Mac, Hansol Jung, Clare Barron, Jeremy O. Harris, Lucas Hnath, Lauren Yee, Larissa FastHorse, Jihae Park, The Civilians, Eboni Booth, Sanaz Toossi, Alexis Scheer, and Jacklyn Backhaus. Assignments will include both critical and creative responses to the material addressed in the class. Whenever possible, we will attend live performances on campus and in the regional community.

**Requirements/Evaluation:** written and dramaturgical-based assignments, a 10-minute oral presentation in pairs, a 5-page mid-term paper, and a final 7-9 page paper, 20-page script, or 5-10 minute performance

Spring 2024
ENGL 350 (S) Modern Poetry
A study of British and American poetry between 1890 and 1945, centering on the radical aesthetic, formal and political shifts which took place during the Modernist era. We will consider the changing authorial and public perceptions of the place and function of poetry during the period, the cross-polinations and strains between the British and American literary traditions, and the writers' individual relationships with the culture of their times. Readings will focus primarily on the poetry of W.B. Yeats, Robert Frost, T.S. Eliot, William Carlos Williams, Ezra Pound, Marianne Moore, Wallace Stevens and W.H. Auden.

Requirements/Evaluation: Two 6+ page papers; several written reading responses plus regular discussion board postings; and class participation.

Prerequisites: a 100-level ENGL course; or a score of 5 on the AP English Literature exam; or a score of 6 or 7 on the Higher Level IB English exam; or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: English and Comparative Literature majors

ENGL 352 (S) Separation: An Introduction to Postcolonial Literature (DPE)

Cross-listings: COMP 350 ENGL 352 ASIA 353

Primary Cross-listing

Few themes in the history of human societies have produced as much writing as that of separation—from a lover, from one's homeland, from God(s). In the past two centuries, this theme has been essential to representing experiences of exile and migration in the wake of the colonially mediated transition to world capitalism. In this course, we will take up the theme of separation as a privileged point of entry into postcolonial literature and towards understanding the multiple meanings of "postcoloniality." We will encounter examples in which this theme shapes critical thought and helps imagine new modes of existence, as well as those in which the grief of separation shades into such overpowering melancholy that writing becomes impossible. We will also look at what the preoccupation with separation can tell us about the ways human beings relate to human and non-human objects, and how they make and experience history. To think through these issues, we will read nineteenth and twentieth century works dealing with experiences of love, ecstasy, migrancy, exile, and slavery, composed in diverse geographical, socio-political, and linguistic contexts. We will read works (novels, poems, memoirs, essays) and watch films from South Asia, Egypt, the Caribbeans, the US, and Europe, composed in multiple languages (English, Hindi, Urdu, Persian, French, Arabic, Bengali and Malayalam).

Requirements/Evaluation: mid-term paper (6-page), participation in class discussions and one roundtable, final paper (15-page)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors, then sophomores considering the major

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 350(D1) ENGL 352(D1) ASIA 353(D1)

Difference, Power, and Equity Notes: This course examines how the political impact of colonization upon both "colonizer" and "colonized" gets expressed in literary productions of the nineteenth and the twentieth centuries. It explores the way these literary works understand the axes of social identity that shape oppression and inequity—coloniality, race, caste, gender—as constitutive of the unevenly developing world of capitalism. The concepts upon which the course focuses are essential to contemporary social critique.

Attributes: ENGL Literary Histories C
ENGL 354 (F) Contemporary American Fiction

This course centers on American fiction from a late phase of postmodernism: we take for granted that history is a form of literature, and that race, gender, and self are constructions. Now what? The premise of the authors of this course is that we can return from these assumptions to write about history, race, gender, and the self in self-conscious but not debilitatingly self-conscious ways. Novels likely to be in the course that move from self or autobiography outwards: Dave Eggers, *A Heartbreaking Work of Staggering Genius*; Junot Diaz, *The Brief Wondrous Life of Oscar Wao*; Ben Lerner, *10:04*; Emma Donoghue, *Room*. Novels likely to be included that work from history inward: Colson Whitehead, *The Underground Railroad*; George Saunders, *Lincoln in the Bardo*. A novel likely to be included that is poised between self and history: Jesmyn Ward, *Sing, Unburied, Sing*.

Requirements/Evaluation: Three papers, totaling about 15 pages. Participation in class discussions will be reflected in the final grade.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: English majors; American Studies majors

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

ENGL 355 (S) Motherhood and Horror: The Movie (WS)

Horror might be the most durable of film genres as well as the genre that's done the most work in terms of transforming the medium as a whole, and its transgressive nature has insured it attention, giving its most famous texts enormous cultural reach when it comes to ongoing conversations as to what defines evil, what constitutes normality, or what comprises the taboo. A look at the particular anxieties the genre has--especially recently--mobilized through its portraits of mothers and motherhood. The course will also touch on other genres that suggest an unspeakable invisible beneath the maternal quotidian. Films to be studied will include Henry Selick's *Coraline*, Alfred Hitchcock's *Psycho*, Jee-Woo Kim's *A Tale of Two Sisters*, Juan Antonio Bayona's *The Orphanage*, Jordan Peele's *Get Out*, Bong Joon Ho's *Mother*, Jennifer Kent's *The Babadook*, Juan Carlos Fresnadillo's *28 Weeks Later*, and Veronika Franz's and Severin Fiala's *Goodnight Mommy*.

Requirements/Evaluation: bi-weekly papers and responses for each student in the tutorial pairings

Prerequisites: English 203 or 204 or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: All interested students should preregister. In the event of over enrollment, entry will be based upon writing samples, with some preference given to English majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will be required to 5-6 page papers every other week, and 2-3 page written response papers in between.

ENGL 356 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Cross-listings: COMP 322 AFR 323 ENGL 356 AMST 323 ARTH 223

Secondary Cross-listing

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories.
Drawing on graphic novels such as the late Congressman John Lewis' *March* and Ebony Flowers' *Hot Comb*, this course illustrates and critiques multiple ways the graphic novel commingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will build comic creation and analysis skills through short exercises, eventually building up to the final project of a graphic short story that illustrates historical and/or autobiographical narratives. No art experience is required, only an openness to expanding one's visual awareness and composition skills. This course is often taught in collaboration with the Williams College Museum of Art's Object Lab program, which allows the class to have its own space and art objects that are directly related to the course topic. This class may feature Object Lab participation, film screenings, and collaborations with guest speakers.

**Requirements/Evaluation:** class participation, written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story)

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** If the enrollment limit is exceeded, preference will be given to Africana Studies concentrators or students who have taken AFR 200, the department's introductory course.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** this course is part of the Gaudino Danger Initiative

**Distributions:** (D2)

**ENGL 357 (S) Film and Philosophy: Cavell and Hollywood Cinema**

A central figure in the movement known as ordinary language philosophy who wrote compelling studies of Wittgenstein, Emerson, Thoreau, and Heidegger, Stanley Cavell was also passionately devoted to Hollywood cinema. Although the highly popular films of Hollywood's "Golden Age" in the '30s and '40s have often been dismissed as light entertainment, Cavell took such films very seriously. Following his early major study of the aesthetics of cinema (*The World Viewed: Reflections on the Ontology of Film*), he transformed the critical understanding of two central Hollywood genres that had previously been regarded as slight and commercial, in *Pursuits of Happiness: The Hollywood Comedy of Remarriage and Contesting Tears: The Melodrama of the Unknown Woman*. For Cavell, the seeming frivolity or pathos of such films energizes the subtle engagement of philosophical and political ideas that he traces in them. Cavell's culminating work on cinema, *Cities of Words*, explores ideas of moral perfectionism in essays on prominent philosophers and literary artists, paired with analyses of Hollywood films that for him pursue the same issues. His essays explore these films' meditations on the nature of happiness, the instability of identity and difficulty of self-knowledge, the surprising forms fidelity may take, the genuineness of false appearance, the explosiveness of desire in a world of compromise, and the claims and possibilities of moral growth. Yet his analyses never lose sight of the immediate pleasurability of such films as a popular art-form, and his acute eye allows him to single out and make use of their striking cinematic qualities. In few other thinkers is the disarming appeal of popular art brought together with the resonances of philosophical and literary thought so productively. Readings will be drawn from the four books named above, and will be analyzed together with films such as *The Lady Eve, The Philadelphia Story, Gaslight, Adam's Rib, Stella Dallas, It Happened One Night, Letter from an Unknown Woman*, and *The Awful Truth*.

**Requirements/Evaluation:** Active and regular participation in class discussions, and two papers 8-10 pages in length.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or consent of the instructor

**Enrollment Preferences:** English majors, then Philosophy majors

**Expected Class Size:** 18

**Grading:** yes pass/fail option, yes fifth course option
ENGL 359  (F)  Irregular Unions in James and Ford

Henry James and Ford Madox Ford helped to inspire the crucial shift in British fiction from late 19th-century classic realism to the pathbreaking modernism of the 1920s. Their formal experiments were driven in striking ways by their response to recent dissident trends in attitudes toward sexuality, gender, and marriage, and their consequent engagement with so-called "irregular unions," sexual relationships forged out of wedlock in the face of societal repression and in the name of more liberated ideas of sexual morality. For James and Ford, such revolutions in the social sphere prompted renewed scrutiny of conceptions of moral fidelity and integrity, new ways of capturing subjectivity and its limitations, and a radical probing of what it means to know. Their work reflects the transition from the norms of Victorianism to a disorienting modern world marked by newly permissive social behavior, class mobility and conflict, emergent technological and commercial forms, suffragism and "the New Woman," and world war. We will study such novels as James's *What Maisie Knew* and *The Ambassadors* and Ford's *The Good Soldier* and *Parade's End*.

Requirements/Evaluation:  regular class participation, two 8- to 10-page papers

Prerequisites:  a 100-level ENGL course, a score of 5 on the AP English Lit exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 360  (S)  James Joyce's "Ulysses"

This course will explore in depth the demanding and exhilarating work widely regarded as the most important novel of the twentieth century, James Joyce's *Ulysses*, which both dismantled the traditional novel and revitalized the genre by opening up new possibilities for fiction. We will discuss the ways in which compelling issues of character and theme (e.g., questions of heroism and betrayal, sexuality and the politics of gender, civic engagement and artistic isolation, British imperialism and Irish nationalism) are placed in counterpoint with patterns drawn from myth, theology, philosophy, and other literature, and will consider the convergence of such themes in an unorthodox form of comedy. In assessing *Ulysses* as the outstanding paradigm of modernist fiction, we will be equally attentive to its radical and often funny innovations of structure, style, and narrative perspective. In addition to Joyce's novel, readings will include its epic precursor, Homer's *Odyssey*, as well as critical essays. Students unfamiliar with Joyce's short novel *A Portrait of the Artist as a Young Man*, which introduces characters later followed in *Ulysses*, are urged to read it in advance of the course.

Requirements/Evaluation:  active participation in class discussions, several group reports, a midterm exam, a 5-page paper, and an 8- to 10-page paper

Prerequisites:  a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 364  (F)  Boucicault to McDonagh: Irish Theatre, 1870 to the present  (DPE)
Cross-listings: COMP 360 ENGL 364 THEA 336

Secondary Cross-listing

During the Irish Literary Revival of c.1885-1920, Irish writers sought to assert “Irishness” as culturally distinctive, and resisted the marginalizing impacts of British colonial rule. The achievement of Independence in 1923 brought years of insularity and censorship, but over the past three decades Ireland’s embrace of globalization and the hybridizing impacts of postmodernism has led to a remarkable flowering of creative vitality. This course will trace the evolution of Irish theatre over the past century-and-a-half. We will read plays by Dion Boucicault, Oscar Wilde, W.B.Yeats, J.M.Syne, Augusta Gregory, George Bernard Shaw, Douglas Hyde, Sean O’Casey, Samuel Beckett, Brendan Behan, Brian Friel, Marina Carr, Frank McGuinness, Christina Reid, Conor McPherson, and Martin McDonagh, and also chart the course of the founding and history of the Abbey Theatre, one of first National Theatres in Europe.

Requirements/Evaluation: Two essays of 6+ pages; regular Glow posts; class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Theatre majors, English and Comparative Literature majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 360(D1) ENGL 364(D1) THEA 336(D1)

Difference, Power, and Equity Notes: This course is centrally concerned with identity politics within a colonial context. Irish writers prior to independence from Britain sought to assert “Irishness” as culturally distinctive. After 1923, they continued to wrestle with the legacies of colonial subjection and the inferiorizing identifications that had been ingrained during colonial rule. The texts we will read centre on questions of cultural self-definition and explore (and resist) the process of othering.

ENGL 365 (F) Wonderland(s): Alice in Translation

Cross-listings: COMP 345 GBST 345 ENGL 365

Secondary Cross-listing

“What do you mean by that?” said the Caterpillar, sternly. “Explain yourself!” “I can't explain myself, I'm afraid, Sir,” said Alice, “because I'm not myself, you see?” The confusion around personal identity, which Alice is seen to experience as she makes her way through Wonderland, can be examined productively as an allegory of translation. Beyond living through the developmental and socio-cultural transitions of a child, what happens to Alice, a seminal text in children's literature, when it travels down the rabbit hole to a new linguistic wonderland? For starters, the seven-year-old girl becomes Marie in Danish, Arihi in Maori, Ai-chan in Japanese, and Paapachchi in Kannada. Then there are the highly idiosyncratic humor, word play, embedded English nursery rhymes, and iconic illustrations by Tenniel. How do they fare in new linguistic, cultural, and even genre contexts? Lewis Carroll told his publisher in 1866: “Friends here seem to think the book is untranslatable.” And yet. Over 200 translations later, including Kazakh, Shona, Papiamento, Braille, and Emoji, Alice continues to delight and confound readers all over the world and to pose myriad challenges as well as opportunities for translators. This course will serve as an introduction to the theory and practice of translation using Carroll’s Alice as an anchoring primary text. We will examine key disciplinary issues and concepts, such as equivalence, domestication, foreignization, and autonomy and challenge the old canard that translation leads ineluctably, and exclusively, to loss.

Requirements/Evaluation: active and substantive class participation; discussion leading; weekly translation exercises; 2-3 short writing assignments; final project

Prerequisites: students must have at least three years of college-level second-language instruction or the equivalent (advanced proficiency), or permission of the instructor

Enrollment Limit: 16

Enrollment Preferences: COMP majors; language majors; language students
**ENGL 368 (S) Ireland in Film**

In 1909, James Joyce was briefly the manager of one of Dublin's first cinemas. The medium of film has long attracted Irish writers--as a means to explore and represent the country's political and cultural history, to interrogate the very notion of "Irishness", and to promote their work to a wider audience. In turn, Ireland has long provided a rich subject for Hollywood fantasy, often being portrayed by non-Irish directors as either a mythic space for emerald-green romanticism, or, more darkly, as a place of political terror and enduring ideological rivalries. In this course we will view and discuss major films from the canon of Irish cinema, to assess the country's newly ascendant film movement. We will consider the impact of commercial considerations, and the powerful influence of British and American films on Irish filmmakers. We will also read the literary texts on which some films were based, so as to weigh the strengths and limitations of the medium as a resource for writers who initially worked only in print. This course will introduce participants to the technical vocabulary of film art, as well as to major developments in modern Irish history and culture. Films to be viewed will likely include: *Man of Aran, The Informer, The Quiet Man, Eat the Peach, In the Name of the Father, Butcher Boy, Intermission, Into the West, The Field, The Crying Game, December Bride, The Commitments, Michael Collins, Ondine, Six Shooter, In Bruges and The Guard*; and we will also assess one or more short independent films such as *Budawanny and Adam and Paul*. Special attention will be given to the work of Neil Jordan, Jim Sheridan, Terry George, and Martin McDonagh.

**Requirements/Evaluation:** Two long papers, regular short responses and discussion board postings, class participation.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam; not open to first-year students

**ENGL 369 (S) American Poetry**

In this course, we'll read the work of some of the key figures in American poetry and poetics from the last hundred years. We'll get an overview of the 20th century's major poetic movements and trends, as well as an intimate sense of several contemporary poets, some of whom we will hear and meet in person. We'll read a few writers deeply, tracing both their inheritances and also the ways they "make it new," in Pound's phrase, and asking what these innovations disclose about the formal, political, and experiential possibilities of poetry as a cultural form. At the same time, we will examine what these works reveal about the transactions between poetic practice and social life. How do these poems encounter the conditions of their day--wars on other shores, economic crises and globalization, commodity fetishism, technological progress, racial and gender oppression, ecological devastation--and theorize their work in relation to other forms of media? What do these poems tell us about life in the "American century"?

**Requirements/Evaluation:** midterm paper of 6-8 pages, final research paper of 10-12 pages, thoughtful participation in class discussions

**Prerequisites:** either a 100-level ENGL course, a score of 5 on the AP English Literature exam, a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** English majors and those intending to major in English

**Expected Class Size:** 25

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1)
ENGL 370  (F)  Literary and Critical Theory in the Twentieth Century

Cross-listings:  COMP 380 ENGL 370

Secondary Cross-listing
From the rise of modern literary criticism around 1900 to the explosion of high theory in the 1980s and 1990s, the twentieth century witnessed an international flowering of new ideas about how to interpret art and literature: Russian Formalism, American New Criticism, French Structuralism and Deconstruction, and a welter of post-prefixed concepts that claim to transcend national boundaries: the poststructural, the postmodern, the postcolonial, the posthuman. What are the ideas associated with these different movements, and how are they connected? Does each represent a radical break with previous ways of reading, or do they actually build on one another and evolve in a systematic way? And given the entanglement between criticism and teaching, which are the theories that seem to define the work we do (and want to do) here at Williams? This course will focus on a very careful reading of essays representing major 20th-century critical schools (and a couple of their earlier precursors), by critics like Plato, Schiller, Shklovsky, Richards, Barthes, Derrida, de Man, Beauvoir, and Butler. Written assignments will encourage you to parse these theories carefully and apply them to the literary texts that most interest you: prose or poetry from any time and place; film, visual art, or architecture; music, new media, or digital media, etc.

Requirements/Evaluation:  attendance and active participation, several short response assignments, final project consisting of a scripted oral presentation and a 15-page final paper

Prerequisites:  at least one previous literature or theory course

Enrollment Limit:  15

Enrollment Preferences:  Comparative Literature majors

Grading:  no pass/fail option,  yes fifth course option

Distributions:  (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 371  (F)  The Brothers Karamazov  (WS)

Cross-listings:  COMP 331 RUSS 331 ENGL 371

Secondary Cross-listing
Widely hailed as one of the greatest novels ever written, Dostoevsky's *The Brothers Karamazov* contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside *The Brothers Karamazov*, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of *The Brothers Karamazov*.

Requirements/Evaluation:  completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions

Prerequisites:  at least one 200-level literature class

Enrollment Limit:  10

Enrollment Preferences:  students majoring or considering a major in Russian, Comparative Literature, or English
ENGL 372 (F) Documentary Poetry

One of the most vibrant trends in contemporary writing, documentary poetry draws on various kinds of source materials in the creation of innovative forms. This course will be a joint adventure in the reception and production of such projects, and is designed for anyone interested in the intersections of archival research and creative writing. Part of our work will be to historicize and theorize this mode of literary making, which emerges out of Modernist experiments in polyvocality, collage, and what Ezra Pound termed the "poem including history." We will begin the semester by looking at Muriel Rukeyser's 1938 poetic sequence, "The Book of the Dead," which exposes the complicity of Union Carbide in the silicosis contracted by the miners who dug the Hawk's Nest Tunnel in Gauley Bridge, West Virginia. Rukeyser wrote of her desire for a "poetry [that] can extend the document"; our subsequent readings in this course will look to a number of contemporary book-length projects that do just that. Our documentary models--by such writers as Heimrad Bäcker, Anne Carson, Layli Long Soldier, Don Mee Choi, M. NourbSe Philip, Mark Nowak, and Claudia Rankine--treat a wide range of subjects, yet all share both an investigative approach and a commitment to thinking about the way individual lives are shaped by larger social and historical structures. Generically, these works make use of the strategies of poetry, but also frequently incorporate essay, narrative, and image to create distinctly mixed forms. Students likewise will choose topics to investigate over the term, conducting original archival research and thinking inductively through the material toward a final project that will be shared with the public on our course website.

Class Format: Each week, we will read and discuss one of the assigned texts; throughout the semester, you'll also be working on your evolving projects, which we will workshop in small groups and in individual conferences.

Requirements/Evaluation: This class asks students to engage deeply with the assigned books, to do significant original research on a topic of their choosing, and to work creatively to bring that research to life. Frequent short writing assignments will assure students' understanding of the readings, as well as help them to pace themselves in the making of their own documentary projects. The semester will culminate with the workshopping, revision, and publishing of students' final projects.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 12

Enrollment Preferences: Preregistered students; if overenrolled, preference will be given to English majors.

ENGL 373 (S) Troubled Spirits

"Trouble" and "spirit" are both words with various and contrasting meanings and surprising overlaps. To be troubled is one thing, to be in trouble can mean several quite different things. Spirit began as breath, yet it transcended breathing. Hoping to soothe and grasp the troubled spirits of their own moment, writers and shamans often seek to conjure up spirits from the past. Some wish to exorcise those spirits, others to be haunted by them. This course will examine the manifestations of troubled spirits in works by American writers, especially African and Native Americans and white Southerners. The authors will include Edgar Allan Poe, William Faulkner, Toni Morrison, Leslie Marmon Silko, N. Scott Momaday, H. P. Lovecraft, Joy Harjo, Alice Walker, Toni Cade Bambara, and Randall Keenan.
ENGL 375  (F)  Black Masculinities  (DPE)
Cross-listings:  AFR 331 ENGL 375 WGSS 318 AMST 350

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 20th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. By examining representations and presentations of Black masculinities, we will pursue questions such as: How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men’s sexuality inform representations of Black masculinities? What is the future of Black Gender? We will trouble the relationship between manhood and masculinity by examining the ways in which masculinity can move across various kinds of bodies. In addition to reading critical and creative texts, we will view films and engage other kinds of media. Students will be responsible for 2 short papers and a final project.

Requirements/Evaluation:  students will be responsible for 2 short papers and a final project
Prerequisites:  none
Enrollment Limit:  19
Enrollment Preferences:  WGSS Majors will get preference, then Juniors and Seniors

ENGL 378  (S)  Proust's "In Search of Lost Time"
Cross-listings:  RLFR 378 COMP 378 ENGL 378

In this seminar we will study Marcel Proust's novel-sequence In Search of Lost Time, widely regarded as one of the most transformative works of 20th-century fiction. The first-person narrative chronicling the life of a fictional figure bearing a close relationship to Proust himself spans several decades from the late 19th to the early 20th century, centering on French high society as it enters the modern world, shaped by historical events such as the Dreyfus Affair and the First World War. Proust's exploration of the consciousness of the protagonist, an aspiring writer, has led readers to see him as a philosopher of aesthetics, of the psyche, of time and memory, and of the nature of desire. His narrative ranges from meditations on such subjects to social satire to absorbing and sometimes soap opera-like plots exploring upward and downward social mobility and a wide array of sexual
entanglements, straight and queer. Through his fluent prose, Proust renders the vicissitudes of desire, loss, and joy, of betrayal and emotional intransigence, and tests the power of memory and the imagination to recapture the past. Because of the length of *In Search of Lost Time*, the emphasis of the course will be more on reading (about 7 to 7½ hours per week) and less on writing (four or five 1½-page journal entries and a final paper of 8-10 pages) than the average 300-level course; and approximately one-third of the sequence will be bracketed as optional reading.

**Requirements/Evaluation:** Regular class participation, several 2-page journal entries, and a final paper of 8-10 pages

**Prerequisites:** a 100-level ENGL course, a score of 5 on the AP English Lit exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 22

**ENGL 379 (S) Writing Art**

**Cross-listings:** ARTH 379 ENGL 379

**Primary Cross-listing**

This course is conceived primarily as an experiential adventure in creative forms of art writing. We'll read several recent examples of such work (from writers including John Ashbery, Roland Barthes, John Berger, Teju Cole, Jorie Graham, Robin Coste Lewis, Eileen Myles, Ali Smith, Roberto Tejada, and John Yau) to get a sense of the range of approaches, from the ekphrastic poem to the essay to the novel, alive today; and we will spend considerable time in local museums, engaging intimately with works of art through various writing prompts, as you create your own creative responses to visual art. Along the way, we will work to historicize and theorize the relation between the verbal and visual arts, and to ask what looking at art brings to creative writing, as well as the ways creative writing might extend or alter the work of art history.

**Class Format:** This will be a hybrid course. We will divide our time between seminar meetings, where we will discuss published texts; museum visits, where you'll engage directly with visual art; and small group meetings, where you'll get feedback on your evolving work.

**Requirements/Evaluation:** engaged participation; successful completion of assignments; demonstrated commitment and quality of the work, as evidenced by a final portfolio of revised writing.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

**Enrollment Limit:** 12

**Enrollment Preferences:** Undergraduate majors in English or Art and graduate students in Art.

**Expected Class Size:** 12

**Secondary Cross-listing**
In this course we will examine the various ways Black scholars, artists, & writers use science fiction and visionary fiction to imagine freedom and new world orders. We will focus on the role of history, particularly slavery, in the Black radical imagination. "Freedom" is the keyword throughout the course. We will grapple with the various and sometimes conflicting meanings and uses of freedom as it relates to blackness, gender, sexuality, class and ability. We will explore multiple forms of scholarship and cultural productions, including film, music, novels, short-stories, art, poetry, and other academic texts. All students will be asked to discover and develop their writerly voices through various critical, creative, experimental and performative assignments.

**Requirements/Evaluation:** active participation, completion of various short assignments, one 5-page paper and one 7- to 10-page final paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**ENGL 382  (F)  Advanced Workshop in Poetry**

As an advanced poetry workshop and reading seminar, this class assumes that its members are already practicing poets with a grounding in the foundational techniques of poetry writing. We will work in a spirit of shared experiment, pushing our inquiries into this art form further and developing a community of writers engaged in collaborations on and off the page. Readings and assignments will investigate different impulses--formal, textural, tonal, thematic--in poetry across time. I will ask you to inhabit, query, stretch, and even resist these impulses as you develop your own poems. My hope is that through sustained interaction and collaboration with each other, your writing will undergo a variety of productive evolutions.

**Class Format:** This workshop will include weekly readings and writing assignments, frequent improvisations and collaborations, and the attendance of several arts events.

**Requirements/Evaluation:** engaged participation; successful completion of assignments; demonstrated commitment and substantial improvement, as evidenced by a final portfolio of revised poems.

**Prerequisites:** ENGL 281 or permission of instructor.

**Enrollment Limit:** 12

**Enrollment Preferences:** All interested students should pre-register and will be emailed with instructions if the course is over-enrolled.

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1)

**ENGL 383  (F)  Advanced Fiction**

A further consideration of the complexities and possibilities involved in the writing of short fiction. Exercises, short assignments, and discussion of published fiction will be combined with workshops of student stories and individual conferences with the instructor.

**Requirements/Evaluation:** 30 pages of fiction and six exercises

**Prerequisites:** ENGL 283 or 385 or permission of the instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** should the course over-enroll selection will be made on the basis of writing samples
ENGL 384 (S) Advanced Fiction Workshop

This course will help more advanced fiction writers improve their skills in a supportive workshop context, which encourages experimentation and attention to craft. We focus on technique, close reading, and the production of new work. Writers submit manuscripts for discussion, receive feedback from peers, and revise their work. They keep a process journal and practice mindfulness to cultivate powers of focus and observation. We read Reading Like a Writer by Francine Prose, and short fiction by authors in different genres. (This workshop will be taught by Ruth Ozeki, author of A Tale for the Time Being and the Book of Form and Emptyness.)

Requirements/Evaluation: Active participation, successful completion of assigned exercises and story drafts, and a final portfolio of revised fiction.

Prerequisites: ENGL 283 or 385 or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: Students who have preregistered; all interested students should pre-register and will be emailed with instructions if the course is over-enrolled.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

ENGL 389 (F) Fiction of Virginia Woolf

Cross-listings: WGSS 389 ENGL 389

Primary Cross-listing

"Let us record the atoms as they fall upon the mind in the order in which they fall, let us trace the pattern, however disconnected and incoherent in appearance, which each sight or incident scores upon the consciousness. Let us not take it for granted that life exists more fully in what is commonly thought big than in what is commonly thought small" ("Modern Fiction"). Virginia Woolf's fiction represents a self-conscious and highly experimental challenge to the conventions of Victorian and Edwardian fiction, in an effort to re-center the novel on lived experience. This course will explore the evolution of the innovative fictional forms by which she tried to bridge the gap between the experience of consciousness and its representation in language. We will also consider the links between Woolf's concern with in the fluidity of consciousness and her interest in gender fluidity and androgyny. We will read most of the major novels, probably including The Voyage Out, Jacob's Room, Mrs. Dalloway, To the Lighthouse, Orlando, The Waves, and Between the Acts, together with selected short fiction and critical essays.

Requirements/Evaluation: discussion, weekly journal, three 4- to 6-page essays

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: none

Enrollment Preferences: English majors, WGSS majors, seniors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 389(D1) ENGL 389(D1)

Attributes: ENGL Literary Histories C
ENGL 390  (F)  Robert Frost and Seamus Heaney

This seminar examines the achievement of two of the most influential poets of the last hundred years: America’s Robert Frost (1874-1963), and Seamus Heaney (1939-2013)—the Nobel laureate widely acknowledged as the greatest Irish poet since Yeats. They have garnered high praise from elite literary critics, and also captured the imaginations of a broad reading public. They write in an idiom that is deeply rooted in the ordinary vernacular speech of their respective countries, but rises above it into a universal language that transcends place and time. Their images first focus our gaze on the natural world we can see all around us, but then subtly shift our attention to what can’t be readily observed or reliably known. Their poems can initially appear simple or self-evident in their meanings, but then quietly double-back on us with unexpected forms of mystery and complexity. To get a comprehensive sense of the arc of their careers, we will read most all of their poems, with each class discussion focusing on a few particularly important texts. We will also read some of their essays and lectures on the art and purpose of poetry. Where appropriate, we will attend to the biographical, cultural, and (especially with Heaney) political circumstances that shaped their opportunities as artists.

Requirements/Evaluation:  Midterm and final papers (15-20 pages in total)
Prerequisites:  A 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.
Enrollment Limit: 20
Enrollment Preferences:  English majors, but non-majors with a strong interest in poetry are also most welcome.

ENGL 391  (F)  Contemporary North American Queer Literatures and Theories  (DPE) (WS)

Cross-listings:  ENGL 391 WGSS 391
Primary Cross-listing

Moving through the mid-twentieth century and into the twenty-first, this course will consider how North American writers have represented queer life in all its complexities. From the problem of the happy ending to the intersectional politics of representation, the narrative complexities of coming out to the rejection of identity, the course will consider the relationship between literary form and queer content. In so doing, it will also touch upon some of the key debates in queer literary theory and consider the impact of events such as civil rights movements, gay and lesbian and trans uprisings, the AIDS crisis, debates over respectability politics, and current efforts to police what students read in schools on literary and cultural production. Readings may include work by such authors as Baldwin, Highsmith, Rich, Lorde, Delany, Kushner, Feinberg, Bechdel, Thom, and Machado and theorists such as Ferguson, Sedgwick, Fawaz, Love, Butler, and Hartman.

Requirements/Evaluation:  active class participation, several short writing assignments, two 5-page papers, and one longer research paper.
Prerequisites:  a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor;
Enrollment Limit: 19
Enrollment Preferences:  English majors; WGSS majors

ENGL 392 (S) Acción Poética: Poetic Art's Critiques of an Americas of Conquest (DPE)

Can poems be thought of as social acts, or as a kind of “acción poética” (poetic action)? What would it mean, in other words, to resituate our understanding of poetry within the realms of speech act theory, performance studies, and the local and global histories of social conflict in the Americas? In this course, we will examine the long history of poetic form in the Americas to trace the emergence of separate, but related poetic experimentalisms, particularly in the literary traditions of modern Latin American and U.S.-Latinx poetry and performance art. Throughout the course, we’ll ask what it means to write with and without the body in mind. We’ll attend to the embodied forms of poetic expression that emerge prior to the twentieth century while investigating poetry’s articulations of geo-social space in the Americas. Our course will then focus on the vanguard poetries of twentieth-century Latin America (Neruda, Mistral, Vallejo, Zurita, et al.) and on the transcultural modernities of U.S.-Latinx poetry and performance. Through our explorations of poetic form’s encounters with a social history of the Americas, we’ll receive a glimpse of what poetry looks like in a world of spiritual, political, ecological, and humanitarian crises. Readings will likely include works by: Gabriela Mistral, Pablo Neruda, Vicente Huidobro, César Vallejo, Raúl Zurita, Cecilia Vicuña, Miguel Algarín, Sandra María Esteves, Willie Perdomo, Julia de Burgos, Emmy Pérez, Gloria Anzaldúa, Lorna Dee Cervantes, Sandra Cisneros, Francisco X. Alarcón, Guillermo Gómez-Peña, Coco Fusco, Laura Aguilar, Asco, Sor Juana Inés de la Cruz, Phyllis Wheatley, José Martí, Rubén Darío, Walt Whitman, Emily Dickinson, and more. Although useful, reading knowledge of Spanish is not expected or required; Spanish-language texts will be provided in English translation alongside the original.

Requirements/Evaluation: Active participation in in-class and online discussion, two close-reading papers (5 pages each), contributions to course blog, and a final 8-10 page research paper.

Prerequisites: A 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 25

Enrollment Preferences: English majors, but non-majors with a strong interest in the subject are welcome.

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course offers students the opportunity to think critically about the experiences of socially marginalized groups throughout U.S. and Latin American history. The course emphasizes the experiences of colonization and U.S. imperialism in Latin America and those of social conflict in border regions throughout the U.S. Moreover, it invites students to ask what it means to write poetry from the standpoint of various subject positions (as determined by race, class, gender/sexuality, etc.).

ENGL 393 (F) Staging Identities

Cross-listings: ENGL 393 THEA 393

Secondary Cross-listing

The construction of selfhood is always to some extent a performative act—as Shakespeare’s Jacques says, “All the world’s a stage / And all the men and women merely players[.].” That performance is inherently dual, since constituted both for the audience of the wider social world, and for the self who seeks to act. Drama as a genre, with its constant negotiation of the competing claims of illusion and the operations of reality, is invariably interested in the exploration of social identity, in the tensions between public and private selfhood, and in the functions of ‘performance’. In this course we will examine theatre’s response to the challenge of self-fashioning in the modern era, and consider the wider ontological status of performance as a category within the context of twentieth century drama and theatrical staging. Readings will include Shakespeare’s Hamlet and plays by Chekhov, Pirandello, Churchill, Shepard, Lori-Parks, Beckett, Walcott, Pinter and others, along with selected criticism, theory, and psychoanalytical writings.

Requirements/Evaluation: Two papers totaling about 12 pages, regular posting on discussion boards, and active participation in discussion.

Prerequisites: A THEA course, a 100-level ENGL course, or a score of 5 on the AP English Literature exam.
**ENGL 394 (F) The Nature of Nature**

**Cross-listings:** ENGL 394 ENVI 390

**Primary Cross-listing**

"Nature” is one of the most common words in English. And yet what does it mean? Is it primarily descriptive (all living things), or normative (“natural” foods, “human nature”)? This course will consider some of the richly incoherent ways we think about the living world, paying particular attention to the difficulty of narrating processes that are too big, too small, too quick, or too slow for direct human apprehension. We’ll explore the way popular nature writing mingles scientific reporting with implicit and explicit judgments about human identity, and take up the insoluble problem of our proper relation to animals. Considerable attention will be paid to the racial, cultural and class dimensions of contemporary forms of environmental consciousness.

Writers studied will include Elizabeth Kolbert, Jem Bedell, William Cronon, and Charles Darwin. We’ll also consider the intermediations of nature and technology in documentaries by David Attenborough and Lynette Wallworth, among others.

**Requirements/Evaluation:** Several short written exercises, an eight page comparative midterm essay, and a final twelve to fifteen page essay incorporating audiovisual materials. Active participation in class.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**ENGL 395 (F) Shakespeare's Hands: Literary Labors and the Politics of Embodiment**

The body part that might be said to distinguish the human, a "hand" also signifies metonymically--to indicate a person doing manual (from the Latin manus and French main), domestic, or aesthetic labor. Think of a sailor, a weaver, a soldier, but also an artist, musician, writer, or actor. This course will read a handful of Shakespeare's plays and poems with an attention to the oftentimes marginally marginal figurations of labor and work, asking how such a focus can illuminate the politics of embodiment in the early modern era (as well as in later modern stagings and rewritings). What might allusions to textile production in Othello tell us about the play’s contestation of ethnicity and sexuality? How does the performance of hauling wood in The Tempest afford an inquiry into racial formation and its connection with enclosure, colonization, and enslavement? What’s the relationship between the “mechanical” craftwork and the mercantile imaginary of A Midsummer Night's Dream? We'll also spend some time considering the economy of early modern play-making, and the disciplining of the hand in the early modern schoolroom. How does the study of such literary labors change or inflect the way we describe generic forms (tragedy, comedy, lyric) and the way we read otherwise central gestures of Shakespearean plots: clasping, lending, building, mending, praying, stealing, murdering, mothering. Each of Shakespeare’s plays will anchor a set of other readings in Shakespeare's sources and contemporaries (e.g. Burton, Montaigne, Hayklut, Petrarch, Marlowe, More) and in theories of work, labor, and the body (e.g. Ahmed, Arendt,
ENGL 396  Theater and Voyeurism

Seventeenth-century philosophy was ambivalent about the senses. Around the same time as Descartes was wondering whether everything he had ever seen, heard, and felt might have been an illusion produced by an evil deceiver, Francis Bacon was placing the close observation of nature at the center of a new scientific practice. Do the senses shore up the subject by distancing her from objects and from others and by providing her with insight about them? Or do the senses make her vulnerable to a world that is endlessly and often violently imposing itself on her? We will consider this problem in cultural and intellectual history through the case of the theater, with a special focus on tragedy. Ancient Greek tragedy made the mere fact of seeing the basis of an epistemological difference between the audience (whose looking is a privileged form of knowing) and the protagonist (who is paradigmatically blind), and this difference can be understood as a way of reflecting on the conditions of the theatrical medium itself: the audience sees the character, but the character does not see the audience. Early modern tragedy drew on the Greek tradition of dramatic irony, but wondered whether looking was as straightforward as it looked, making voyeurism a two-way street: one form of seeing what others don’t involves being forced to see something unbearable, and early modern theater took a special interest in obscenity, which Greek theater tended to avoid or marginalize. We will consider works by Homer, Sophocles, Euripides, Aristotle, Ovid, Seneca, Marlowe, Spenser, Shakespeare, Vermeer, Jonas Barish, Laura Mulvey, Jacques Rancière, and Michael Fried.

Requirements/Evaluation: One 7-page midterm paper, one 12-page final paper, thoughtful participation in class discussions

Prerequisites: a 100-level English course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 399 (F)  Poetry & Performance
Though poetry was an oral art form before it was anything else, its contemporary relationship to performance is varied and complex. This course explores poetry writing for/as performance, including works that might be categorized as "spoken word poetry" as well as those that sit far outside of that designation. Course readings will include contemporary and canonical writers, from Walt Whitman, to Sonia Sanchez, to Sarah Kay. We will also study works that blur the genres of poetry, performance art, and theater. Students will engage in writing and performance activities in class, create collaboratively, and exchange feedback on each other's work. The semester will culminate in a final performance open to the campus community.

Students must have taken at least one course on the practice of creative writing, acting, or another performance discipline.

Class Format: Combined seminar/studio

Requirements/Evaluation: In addition to in-class participation, students will be graded based on thorough completion of readings, creative exercises, reflection/response papers, feedback letters, revisions, and the final performance.

Prerequisites: ENGL 140, 281, or 288. Other courses on the practice of creative writing and/or performance (e.g., THEA 101) will also be considered.

Enrollment Limit: 12

Enrollment Preferences: Pre-registered students. Should the course over-enroll, selection will be made based on a short application including work samples.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option
Distributions: (D1)

ENGL 402 (S)  The Historical Novel

Cross-listings: COMP 406 ENGL 402

Primary Cross-listing

Setting a novel in a prior time period risks estranging a reader, yet the genre has roused deep-rooted interest, intense critical debate, and aesthetic daring. In this course, we will explore the complex and layered uses of a historical past in literary works of the seventeenth through twenty-first centuries, by way of novels by Madame de Lafayette, Scott, M. Shelley, Dickens, Eliot, Ford, Woolf, Morrison, Sebald, and Roy. Exploring the uses of gothic and sensational effects, dystopian and utopian possibilities, and fractured time, we will consider the aesthetic and political experiments historical novels have spawned. We will do so in context of the sustained critical engagement with the genre by such thinkers as Lukacs, Benjamin, Adorno, Jameson, McKeon and Moretti.
ENGL 417 (F) The 19th Century and Its Shadow

Cross-listings: AFR 303 ENGL 417

Primary Cross-listing

This course explores canonical American literature from the nineteenth century alongside a selection of contemporary literary and cinematic texts that call on and intervene with this body of work. Following Toni Morrison's charge that the contemplation of a black presence "is central to any understanding of our national literature and should not be permitted to hover at the margins of the literary imagination," this course focuses on how ideas of race are explored throughout the canon and how they have been carried forward. Works considered throughout the term come from, among others, Julie Dash, Frederick Douglass, Saidiya Hartman, Harriet Jacobs, Mat Johnson, Herman Melville, Toni Morrison, Nate Parker, Edgar Allen Poe, Quentin Tarantino, Mark Twain, and Colson Whitehead.

Requirements/Evaluation: weekly reading responses, active class participation, three close readings (500 words each), annotated bibliography, class presentation, final paper (13-15 pages)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 15

Enrollment Preferences: English majors, then sophomores considering the major

writers that can be discovered at the intersections of literary history and archives. Students will also have the opportunity to work in the Sterling Brown archive here at Williams. Recently acquired by Williams College Library Special Collections, this significant archive documents the life, work, and poetic practice of African-American writer and educator Sterling Brown, whose poetry and prose spans nearly five decades of the twentieth century, yet Brown has often been left out of the narrative we tell about modern poetry. Work in the Sterling Brown archive will culminate in a curated public exhibition featuring your discoveries. Iain Bailey has argued that we should think of the archive "as a place of work, rather than as a cache from which to draw certainties." With this caveat in mind and in the spirit of discovery, we will act over the course of the semester as investigators, curators, collaborators, and inquirers in the workshop of literary production and its aesthetic products.

Requirements/Evaluation: Short papers, archival presentations, final paper or digital project (12-15 pages)
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 421 (F) Fanaticism
Cross-listings: ENGL 421 COMP 421

Primary Cross-listing
Eighteenth and nineteenth-century writers of literature and political philosophy repudiate fanaticism, whether as a religious, political or amorous posture. But what is fanaticism, and why should it be considered such a threat, particularly during a period that embraced an enlightened secular rationalism? In this course, we will examine these questions by considering literary texts that dramatize fanaticism in light of accounts by philosophers and historians. Readings will include novels by M. Shelley, Hogg, Dickens, Eliot, Conrad, among others, and political philosophy and historical writings by Voltaire, Kant, Diderot, Burke, Hume, Carlyle, Adorno, and a range of recent critics. We will also watch films by Riefenstahl, Hitchcock and Pontecorvo, and look at paintings, drawings and sculpture by Fragonard, Goya, and Shibonare. Since fanaticism has recently had considerable political currency, we will also examine contemporary accounts that reanimate the debates and concerns of the course.
Requirements/Evaluation: two shorter or one long paper(s), approximately 20 pages

Winter Study

ENGL 32 Screening Emily Dickinson in the Twenty-First Century
In the last five years, a set of films and television shows have reinterpreted the life, and in some cases, the work of this unique nineteenth-century poet, finding in her a model of proto-lesbian and/or queer subjectivity, feminist consciousness, anti-racist sentiment, and more. In this course we will concentrate on episodes of the Apple TV series, Dickinson, and analyze them alongside Dickinson's poems to consider how the show interprets her life and work. We will read reviews of the show, and listen to selected interviews with the writer. We will also listen to episodes of the podcast, "The Slave is Gone: The Show that Talks Back to AppleTV's Dickinson," which offers historical context for, critiques of, and contemporary poets of color in dialogue with the show and Dickinson's poetry. Finally, we will consider what it means to reimagine a nineteenth century poet through the lens of twenty-first century concerns: what are the political and ethical consequences of doing so? What is lost and what is gained in regards to our understanding of Dickinson and her poetry? No prior experience with Dickinson's poetry is required.

Requirements/Evaluation: Final podcast or paper, short writing assignments
Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: None
Expected Class Size: 15
Grading:
Materials/Lab Fee: One month subscription to AppleTV
ENGL 41 (W) Representing US Childhoods

Childhood as it is understood today in the US is a relatively recent invention. In this course we will read works of literature, history, and cultural studies, as well as consider such mediums as art, films, podcasts and music, and analyze material culture (objects such as toys and clothing) associated with childhood and children in the U.S. Along the way, we will consider questions such as how childhood has emerged as a distinct stage of life; how definitions of childhood vary (or not) across differences such as race, gender, class; what places and spaces define childhood; how writers and artists contribute to constructing particular visions of childhood and what the resonances of these representations are; and what it means to “grow up.” An emphasis will be placed on learning to analyze closely a variety of texts and objects.

Requirements/Evaluation: There will be at least three short (2-5 page) writing assignments; a revision of at least one of those papers; and a short final reflection essay. As an intensive winter study, this class will require approximately 12-15 hours of in-person class time a week, as well as time outside out of class on reading and writing assignments.

Prerequisites: permission of a dean

Enrollment Limit: 19

Enrollment Preferences: students who need to make up a deficiency

Expected Class Size: 19

Grading: pass/fail only

Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in both ENGL 102 and ENGL 41.
ENVIRONMENTAL STUDIES PROGRAM

ENVIRONMENTAL STUDIES MAJOR
Chair: Associate Professor Nicolas Howe
Associate Director: Lecturer Sarah Gardner

MEMBERS OF THE CENTER FOR ENVIRONMENTAL STUDIES (2020-21)

- Alex Apotsos, Visiting Lecturer in Geosciences
- Henry W. Art, Professor of Biology and Environmental Studies, Emeritus
- Sonya Auer, Visiting Assistant Professor of Biology
- Lois M. Banta, Professor of Biology
- Ron D. Bassar, Assistant Professor of Biology
- Julie C. Blackwood, Associate Professor of Mathematics
- Roger E. Bolton, Professor of Economics, Emeritus
- Ralph Bradburd, David A. Wells Professor of Political Economy
- Alice C. Bradley, Assistant Professor of Geosciences
- Nicole G. Brown, Assistant Professor of Classics
- Cory E. Campbell, Instructional Technology Specialist
- Anthony Carrasquillo, Assistant Professor of Chemistry
- Gregory Casey, Assistant Professor of Economics
- David Cassuto, Class of 1946 Visiting Distinguished Professor of Environmental Studies
- Phoebe A. Cohen, Associate Professor of Geosciences
- Jose E.A. Constantine, Associate Professor of Geosciences
- Mea S. Cook, Associate Professor of Geosciences
- David P. Dethier, Professor of Geosciences, Emeritus
- Joan Edwards, Samuel Fessenden Professor of Biology
- Laura Ephraim, Associate Professor of Political Science
- Michael Evans, Assistant Director of The Zilkha Center
- Jessica M. Fisher, Assistant Professor of English
- Antonia Foias, Professor of Anthropology and Sociology
- Giuseppina Forte, Assistant Professor of Studio Art and Environmental Studies
- Jennifer L. French, Rosenburg Professor of Spanish and Environmental Studies
- Sarah S. Gardner, Lecturer in Environmental Studies
- Matthew Gibson, Associate Professor of Economics
ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise. The major and concentration in Environmental Studies are designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, social sciences, arts and humanities;
- Understand the physical nature of environmental systems;
- Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
- Understand the political and economic factors that inform, enable, and constrain environmental policy;
- Apply scientific methods to collect environmental data and evaluate environmental quality;
- Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental
challenges;

- Have an appreciation for the ambiguity and uncertainty inherent in many environmental issues;
- Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, the CES is considered to be the first environmental studies center at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student organizations and student-initiated activities, and generous support for summer research and internships. The Class of 1966 Environmental Center, a Living Building and the Program’s home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. CES manages the Hopkins Memorial Forest, 2,600-acre natural area 1.5 miles from campus, in which there are field study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. The CES also operates the Environmental Analysis Laboratory in Morley Science Center.

ADVISING

Majors (or first-years and sophomores interested in the major offered by CES) are encouraged to talk at any time with the Chair, Associate Director of Environmental Studies, or any other Environmental Studies faculty. All incoming majors will be assigned a faculty advisor in the spring of their sophomore year.

Advisors for 2022-2023: Sarah Gardner, Nick Howe, Laura Martin, Brittany Meché.

STUDY AWAY

Many study away options are available to students in Environmental Studies, including the Williams-Mystic Maritime Studies Program. Students considering either a semester or year away who intend to major in Environmental Studies should consult the Chair or Associate Director of Environmental Studies and the Dean in charge of study abroad as early as possible to discuss their options. Students may take up to two courses outside of Williams toward their major, but must have approval in writing from the Chair of Environmental Studies.

THE MAJOR IN ENVIRONMENTAL STUDIES

The Environmental Studies major is a ten-course major. All majors are required to take ENVI 101 and ENVI 102; three “foundational” courses in the sciences, social sciences, and humanities (one in each category chosen from a list of options); and one 400-level seminar (chosen from a list of options). In addition to these six core courses, students select four electives, three of which must be from one of the main curricular areas (sciences, social sciences, and humanities).

ENVI 101 – Nature and Society: An Introduction to Environmental Studies, establishes an intellectual framework for interdisciplinary environmental thinking in the humanities, policy studies, and social sciences. ENVI 102 – Introduction to Environmental Science, introduces students to the interdisciplinary study of the Earth’s systems through the synthesis of physical, chemical, geological, and biological perspectives. Students with a score of 5 on the AP Environmental Science exam may take a 200-level environmental science lab course (cross-listed with Environmental Studies) in lieu of ENVI 102.

In addition to 101 and 102, all majors must take three more advanced “foundational” courses in the three main branches of the environmental curriculum: humanities, social science and policy, and environmental science—one from each of three lists of courses (see below).

Building on this five-course foundation, Environmental Studies majors gain depth in their chosen area of study by taking three electives from one of the three main curricular branches, plus a fourth elective from another branch to provide cross-disciplinary breadth. These electives should be chosen in close consultation with a faculty to adviser to ensure intellectual coherence and academic rigor.

In their junior or senior year, students choose a 400-level senior seminar (or “research practicum”) that focuses on advanced, interdisciplinary research and/or problem-solving, typically with an applied, experiential, and/or service-learning focus.

Planning for Prerequisites on your Path through the Major

While ENVI 101 or ENVI 102 are recommended starting points for the major, and are prerequisites for many other ENVI course offerings, please note that some of the course options for the major may have other courses as prerequisites that may not count toward the programs. For example, ENVI/ECON 213 (Intro to Environmental and Natural Resource Economics) has a prerequisite of ECON 110 (Principles of Microeconomics). We strongly suggest that you do advance planning to avoid being blocked from taking a relevant course.

Credit for AP, IB, A-levels and other pre-Williams Courses

Students are not allowed to place out of ENVI 101. Students with a score of 5 on the AP Environmental Science exam may take a 200-level environmental science lab course (cross-listed with Environmental Studies) in lieu of ENVI 102.

Introductory Required Courses (2 courses)

ENVI 101 Nature and Society: An Introduction to Environmental Studies
Foundational Required Courses for all Environmental Studies Majors (3 courses, 1 from each category)

Culture/Humanities Foundational (1 course)

ENVI 229 / HIST 264(F) SEM Environmental History
  Taught by: Laura Martin
  Catalog details
ENVI 244 / PHIL 244(S) TUT Environmental Ethics
  Taught by: Julie Pedroni
  Catalog details
ENVI 246 / AMST 245 / HIST 265 SEM Race, Power, & Food History
  Taught by: April Merleaux
  Catalog details
ENVI 250 / STS 250 SEM Environmental Justice
  Taught by: Laura Martin
  Catalog details
ENVI 260 / ARTS 261(S) SEM Design and Environmental Justice
  Taught by: Giuseppina Forte
  Catalog details
ENVI 298 SEM Cultural Geography
  Taught by: Nicolas Howe
  Catalog details
RLSP 216 / ENVI 233 SEM Latin American Environmental Literature and Cultural Production
  Taught by: Jennifer French

  Taught by: Alice Bradley
  Catalog details

Social Science/Policy Foundational (1 course)

ECON 213 / ENVI 213(S) LEC Introduction to Environmental and Natural Resource Economics
  Taught by: Sarah Jacobson
  Catalog details
ENVI 206 SEM Global Environmental Politics
  Taught by: April Merleaux
  Catalog details
ENVI 275 / STS 275(S) SEM Environmental Science, Policy, and Justice
  Taught by: Laura Martin
  Catalog details
ENVI 288 / GBST 288(S) SEM Environmental Security: Policy Dilemmas and Solutions
  Taught by: Brittany Méché
  Catalog details
ENVI 297 / GBST 287 SEM Global Sustainable Development
  Taught by: Brittany Méché
  Catalog details
ENVI 307 / PSCI 317(F) LEC Environmental Law
  Taught by: David Cassuto
  Catalog details
Electives (4 courses)

Four electives from three lists of approved courses in Environmental Studies or cross-listed courses in other units. These three lists correspond with the three categories of foundational courses (e.g. environmental science, social science and policy, culture and humanities). Students must choose at least three of these four electives from one list, ensuring depth in their general area of interest. See the Environmental Studies Program website for up-to-date lists of electives in each category.

Senior Seminar Required Course (1 course)

In the junior or senior year, students take one 400-level seminar in Environmental Studies. One of these seminars, Environmental Planning, is offered every fall. The others are offered regularly on rotation. These seminars focus on advanced, interdisciplinary research and/or problem-solving, typically with an applied, experiential, and/or service-learning focus.

INDEPENDENT STUDY AND WINTER STUDY

In addition to courses fulfilling the Environmental Studies major requirements, the following courses are offered:

- ENVI 397, 398 Independent Study of Environmental Problems
- ENVI 493-W31-494 Honors Thesis and Senior Research

Winter Study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year’s Winter Study offerings.

HONORS IN ENVIRONMENTAL STUDIES MAJOR

Candidates for honors in Environmental Studies will complete a thesis in their senior year. A student earns honors by successfully completing a rigorous independent project under the supervision of a member of the CES faculty. The thesis may either be a one-semester plus Winter Study project, or a full-year project (two semesters plus Winter Study). Students who are majoring in Environmental Studies, and who opt to complete a year-long thesis project, have the option of substituting the second semester of their thesis work for the spring semester senior seminar. Honors will be awarded on the basis of the academic merit and originality demonstrated by the student in the completed thesis. Because many theses will require sustained field, laboratory or archival work that is difficult to combine with conventional coursework, students doing full-year theses are strongly encouraged to spend the summer before senior year and/or their senior year Winter Study doing advance research.

Funds to support student summer research are available from endowment funds of the CES, and an open competition is held each spring to allocate summer funding resources. Other departments may also provide limited support for summer thesis research. Students and their faculty sponsors should plan the thesis with the expectation of such research in mind.

Juniors who wish to apply to pursue honors should submit a 5-page proposal to their intended advisor and the Chair of Environmental Studies by the first Friday in March. If a student wishes to pursue thesis research advised by a faculty member not affiliated with CES, the student must also identify a co-advisor from within the program. Students applying to conduct an honors thesis in Environmental Studies will be notified before spring break whether or not their proposal has been approved.

Students doing a full-year thesis give a presentation in October to their thesis advisor, second reader, and environmental studies community. Further details on the honors program are available through the Environmental Studies website: https://ces.williams.edu/academic-program/honors/
Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 100(D3) ENVI 100(D3)

Quantitative/Formal Reasoning Notes: This course will have regular problem sets which require substantial quantitative reasoning. Labs will require analysis, presentation, and explanation of quantitative data, and exams will require some quantitative problem solving.

ENVI 101 (F)(S) Nature and Society: An Introduction to Environmental Studies

Environment and society interact on scales from the local to the global. This course explores these interactions and introduces students to the interdisciplinary methods of environmental studies. We will investigate the social, political, and historical aspects of environmental problems -- including environmental racism, species extinction, climate change, and more -- as well as their possible solutions. We will survey policy-making and activism in a variety of contexts and will examine art, literature, film, music, maps, advertisements, and other cultural objects. Throughout the course, we will ask how unequal distributions of power affect people and environments. Case studies, readings, discussions, and field exercises will help students develop their understanding how natural systems influence and are influenced by human activities.

Requirements/Evaluation: participation, in-class exercises, several short writing assignments (varying from 2-5 pages), mid-term exam, final exam

Prerequisites: none

Enrollment Limit: 30/section

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 30/section

Grading: yes pass/fail option, yes fifth course option

Unit Notes: required course for the Environmental Studies major and concentration

ENVI 102 (S) Introduction to Environmental Science

Environmental Science is an interdisciplinary field that develops scientific and technical means for assessing and mitigating human impacts on the environment. This course provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere, hydrosphere, and biosphere. Students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine real-world case studies at global and local scales. Topics may include: climate change, air and water pollution, resource extraction and management, land use change, and their effects on environmental quality, biodiversity, and human health. During weekly fieldwork and laboratory sessions, students gain hands-on experience in collecting, analyzing, and interpreting data that can be used to make recommendations for addressing local environmental issues.
ENVI 103  (F)  Global Warming and Environmental Change
Cross-listings:  ENVI 103  GEOS 103
Secondary Cross-listing
Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and wildfires, the natural processes that shape Earth's surface are tied to temperature and precipitation. People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with geography. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate. We will also visit and engage with Black communities and community leaders across New England who are grappling with the unjust distribution of resources to mitigate climate impacts and who have been disproportionate bearers of environmental risk.
Requirements/Evaluation:  written reports from laboratories and readings, class participation, a midterm and final exam
Prerequisites:  none
Enrollment Limit:  48
Enrollment Preferences:  first year and second year students, Geosciences majors and Environmental Studies majors and concentrators
Expected Class Size:  48
Grading:  yes pass/fail option, no fifth course option
Distributions:  (D3)

Not offered current academic year

ENVI 104  (F)  Oceanography
Cross-listings:  ENVI 104  MAST 104  GEOS 104
Secondary Cross-listing
The oceans cover three quarters of Earth's surface, yet oceanography as a modern science is relatively young: the first systematic explorations of the geology, biology, physics and chemistry of the oceans began in the late 19th century. This introduction to ocean science includes the creation and
destruction of ocean basins with plate tectonics; the source and transport of seafloor sediments and the archive of Earth history they contain; currents, tides, and waves; photosynthesis and the transfer of energy and matter in ocean food webs; the composition and origin of seawater, and how its chemistry traces biological, physical and geological processes; oceans and climate change; and human impacts.

**Class Format:** three 50-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast of New England.

**Requirements/Evaluation:** lab activities (25%), homework (25%), quizzes (5%), three exams (45%)

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first year and second year students, Geosciences majors, Maritime Studies concentrators

**Expected Class Size:** 48

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** This course and GEOS 110 Oceans and Society cannot both be taken for credit.

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 104(D3) MAST 104(D3) GEOS 104(D3)

**Attributes:** ENVI Natural World Electives EXPE Experiential Education Courses GEOS Group A Electives - Climate + Oceans

Not offered current academic year

---

**ENVI 105 (F) The Co-Evolution of Earth and Life**

**Cross-listings:** GEOS 101 ENVI 105

**Secondary Cross-listing**

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will examine the relationship between Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system and learn about the dramatic changes that have occurred throughout the history of our planet. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve and how did this biological event lead to profound changes in the world's oceans and atmospheres? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and spread of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth's dynamic history.

**Class Format:** one laboratory per week plus one all-day field trip

**Requirements/Evaluation:** lab assignments, weekly quizzes, and a final independent project

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** first year and second year students, Geosciences majors

**Expected Class Size:** 30

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 108 (F) Energy Science and Technology (QFR)

Cross-listings: ENVI 108 PHYS 108

Secondary Cross-listing

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating and lighting, and energy storage. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

Class Format: twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours

Requirements/Evaluation: weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative

Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130

Enrollment Limit: 20

Enrollment Preferences: non-physics majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: ENVI Natural World Electives

Not offered current academic year

ENVI 109 (F) Oceans and Society

Cross-listings: MAST 110 GEOS 110 ENVI 109

Secondary Cross-listing

Oceans impact society in many ways: they provide much of our protein, they hide untapped mineral wealth, their circulation regulates global climate, they transport and accumulate our plastic garbage, marine storms batter coastal infrastructure, and sea-level rise threatens communities. However, despite the oceans’ importance throughout history—for trade, as a source of food, and because of their unpredictable dangers—we know shockingly little about them. More than 6000 people have reached the summit of Everest, Earth’s highest elevation; but only 22 have visited Challenger Deep, the deepest point below the ocean surface. We have mapped the surfaces of Mars and Venus in far more detail than the topography of Earth’s ocean basins. New marine organisms are discovered regularly. And we still don’t fully understand the complex details of how ocean and atmosphere work together as the planet’s climate engine. In this course, you will examine ocean science themes with direct societal relevance that are also at the forefront of scientific investigation. Topics will be selected based on current events, but are likely to include deep sea mining, meridional overturning, sea level rise, atmospheric rivers, and aquaculture. By taking focused dives into a range of subjects you will learn about the evolution and operation of the ocean as a physical and geological system as well as investigating the intersections between ocean functions, climate change, and human societies. Exercises and discussions will foreground active learning. A field trip to the Atlantic coast will integrate experiential investigation of the intersection between coastal change, extreme weather, and communities. The aim is to have energised interdisciplinary discussions about topics of pressing societal relevance, to understand some of the fundamentals of ocean science, to develop expertise in gathering and distilling information by researching new topics, and thereby to improve critical and analytical thinking.

Class Format: Two 75-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast.

Requirements/Evaluation: Evaluation is based on engagement with in-class activities, six graded lab exercises, four short writing/research assignments, and a five-page term paper

Prerequisites: none

Enrollment Limit: 60
Enrollment Preferences: First year and second year students

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course and GEOS 104 Oceanography cannot both be taken for credit.

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 134 (F) The Tropics: Biology and Social Issues (DPE)

Cross-listings: BIOL 134 ENVI 134

Secondary Cross-listing

Biology and Social Issues of the Tropics explores the biological dimensions of social and environmental issues in tropical societies, focusing specifically on the tropics of Africa, Asia, Latin America, Oceania, and the Caribbean. Social issues are inextricably bound to human ecologies and their environmental settings. Each section of the course provides the science behind the issues and ends with options for possible solutions, which are debated by the class. The course highlights differences between the tropics and areas at higher latitudes while also emphasizing global interconnectedness. It begins with a survey of the tropical environment, including a global climate model, variation in tropical climates and the amazing biodiversity of tropical biomes. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria, AIDS and Covid-19 (SARS-CoV-2). The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the interaction of humans with their supporting ecological environment, and global climate change. This course fulfills the DPE requirement. Through lectures, debates and readings, students confront social and environmental issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

Class Format: Debate

Requirements/Evaluation: two hour exams, a short paper, debate presentation, and a final exam

Prerequisites: none

Enrollment Limit: 62

Enrollment Preferences: Preference will be given to Environmental Studies majors/concentrators, students in need of a Division III or DPE requirement, and then Seniors, Juniors, Sophomores, and First Year students.

Expected Class Size: 62

Grading: no pass/fail option, no fifth course option

Unit Notes: Does not count for credit in the Biology major.

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
BIOL 134(D3) ENVI 134(D3)

Difference, Power, and Equity Notes: This course highlights differences between the tropics and higher latitudes. For each section we focus on difference--different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and different contributions to and impacts of climate change. For each section we highlight differences in power and the inequities of resource distribution. We then debate potential solutions to ameliorate these inequities.

Attributes: ENVI Natural World Electives GBST African Studies Electives PHLH Biomedical Determinants of Health
ENVI 201 (S) The Geoscience of Epidemiology and Public Health (DPE)

Cross-listings: ENVI 201 GEOS 207

Secondary Cross-listing

The Coronavirus pandemic has highlighted the many ways that diseases can be transmitted in the environment. As a society we are becoming aware of the many ways that geological processes and materials and influence human health, in ways both beneficial and dangerous. This course unites geoscience, biomedicine and public health approaches to address a wide range of environmental health problems. These include water-related illnesses (e.g. diarrhea, malaria); minerals and metals, both toxic (e.g. asbestos, arsenic) and essential (e.g. iodine); radioactive poisoning (e.g. radon gas); and the transport of pathogens by water and wind. In many cases, the environmental health problems disproportionately affect marginalised populations, contributing to greater disease and death among poor communities and populations of colour. We will examine the broad array of dynamic connections between human health and the natural world. We will discuss the social justice implications of a range of environmental health problems. And we will examine current research into how coronaviruses, such as the one causing COVID-19, are transported in the environment. This course is in the Sediments and Life group for the Geosciences Major.

Requirements/Evaluation: Evaluation will be based on short weekly writing assignments as well as an individual project and poster presentation.

Prerequisites: No prerequisites

Enrollment Limit: 34

Enrollment Preferences: Preference to first-years, sophomores, and prospective Geosciences majors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 201(D3) GEOS 207(D3)

Difference, Power, and Equity Notes: Through a series of case studies, we will examine ways in which marginalised groups (whether due to poverty, race, or ethnicity) are disproportionately affected by environmental health issues. Themes of power and equity in terms of decision making, access to knowledge, and funding availability, will be woven into all aspects of the class and will underpin our analysis of the science.

ENVI 202 (S) Critical Practice of Architecture: Theories, Methods, and Techniques (DPE)

Cross-listings: ARTS 222 ENVI 202

Secondary Cross-listing

In this course, students will transform an architectural or urban space through design interventions that contribute to reorienting public perception, imagination, and politics. Skills taught include methods and techniques for critical architecture practice, including architecture drawing, 2D graphic design, and 3D modeling (digital and physical). Students will also build on design strategies (e.g., spatial hijacking and détournement), community architecture, and visual techniques to rethink normative understandings of space and time. Through selected readings and discussions, we will examine key ideas that have inspired design thinking and activism. The class culminates in a presentation to external reviewers and a final exhibition.

Requirements/Evaluation: This is an intensive studio tutorial requiring working in the architecture studio and/or PC lab outside of scheduled class hours. The class will meet in large and small groups throughout the semester for critique and discussion. Assignments include weekly discussions and design projects requiring drawings and model design. Final project: design project to reorient public perception, imagination, and politics. Evaluation will be based on the design quality at theoretical/conceptual levels.

Prerequisites: Drawing I or permission of instructor.

Enrollment Limit: 12

Enrollment Preferences: Studio Art majors, Art History and Studio Art majors, Envi majors and concentrators

Expected Class Size: 10
Distributions:  (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTS 222(D1) ENVI 202(D1)

Difference, Power, and Equity Notes: This design studio invites students to think critically about how power, equity, and difference are manifested through the built environment. It will equip them with the tools to become active agents of change through design activism. We will use design as a cultural practice and creative technique to envision more just and equitable futures through interventions in architectural or urban spaces.

STU Section: 01    T 9:55 am - 12:35 pm     Giuseppina Forte

ENVI 203  (F) Ecology  (QFR)
Cross-listings:  ENVI 203 BIOL 203

Secondary Cross-listing
This course combines lectures & discussion with field and indoor laboratory activities to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to engage students in the natural history of the region and build skills in data analysis and scientific writing.

Requirements/Evaluation: pre-class quizzes, lab reports, two mid-term exams, and a final exam
Prerequisites:  BIOL 102, or ENVI 102, or permission of instructor
Enrollment Limit:  30
Enrollment Preferences:  students planning to pursue Biology and/or ENVI
Expected Class Size:  30
Grading:  yes pass/fail option,     yes fifth course option
Unit Notes: satisfies the distribution requirement for the Biology major
Distributions:  (D3)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 203(D3) BIOL 203(D3)

Quantative/Formal Reasoning Notes: Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component (based in R). Students are introduced to t-tests, chi-square analysis, and regression.

ENVI 204  (F) Colonialism, Capitalism and Climate Crisis  (DPE)
Cross-listings:  GBST 233 ENVI 204 AFR 233

Secondary Cross-listing
Evolutions are part of human existence. These changes are not necessarily natural, uniform or linear across space and time. As colonial conquests sought to capture, dominate and exploit vast swathes of land, nature and people, supported by economic theories, violent, wide-ranging and long-term changes profoundly altered the environment and human-nature relationships. This course examines these transformations, specifically attending to the relationship between colonized/colonial (hu)man, nature and non-human species, drawing in perceptions of nature and the economy. Our starting point for this intellectual journey is the colonial imprint on human-ecological relations i.e. economic man, or Sylvia Wynter's conception of "ethno-class man" and "homo-economicus". We will consider social difference especially race as a central conjuncture of the changing relationship of capitalism and social organization relative to natural resource extraction, techno-scientific knowledge, industrial development and resulting accumulation of greenhouse gases that induce climate and ecological crises. We will also examine economic perspectives of climate change as a market failure, loss of economic value or a financial risk to stock portfolios that may be at odds with humane ways of organizing our collective planet. This course exposes the hierarchies of social difference and resulting inequalities (class, race, gender, species) under climate crisis to advance reparative and decolonial understandings. Drawing upon experiences from social, labor and environmental movements for climate justice, students will be able evaluate situated political economic responses to the climate crisis.

Requirements/Evaluation: 'Colonialism and my community' writing/poster assignment (5 pages) 20%; Either a video essay on a 'green' technology (10 minutes), recorded interview with an environmental justice movement/activist/practitioner (20 minutes) or critical in-class presentation on an emerging 'green' technology (10 minutes) 25%; Creative activist project that reflects on histories and axes of power - gender, race, class, species (6-8 pages); Participation and attendance (leading a discussion/presentation) 20%

ENVI 206 (S) Global Environmental Politics

This course examines the history and current status of international environmental cooperation and conflict. We will consider the interactions of nation-states, multilateral international organizations, non-governmental organizations, and social movements in the formation of transnational environmental policy and treaties. We will also examine non-state approaches to global environmental challenges. After reviewing competing explanations for the causes of global environmental problems and diverse disciplinary approaches to studying those issues, we will read case studies covering a range of topics. These include fresh water conflict, fisheries and oceans, climate change, waste and pollution, agriculture, pesticides, population and development, wildlife, forestry, and consumerism. The reading assignments are drawn from the fields of environmental and foreign policy history, political science, international relations, geography, and anthropology in order to develop an interdisciplinary approach to international policy analysis. The written assignments are a series of policy briefs. You will also be responsible for two oral presentations during the semester, related to the policy briefs.

Class Format: Depending on enrollment, some discussion may be scheduled outside of the class hours, as would be the case in a tutorial.

Requirements/Evaluation: 2-3 short writing assignments based on assigned readings (3 pages each), 2 oral presentations, discussion participation, 2 policy briefing papers based on library research (5 pages each)

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: environmental studies majors and concentrators
**ENVI 208 (F) Saharan Imaginations**  (DPE) (WS)

**Cross-listings:** COMP 234 ENVI 208 ARAB 209

**Secondary Cross-listing**

Deconstructing reductive Saharanism, which the course conceptualizes as a universalizing discourse about deserts, this course seeks to critically examine the myriad assumptions that are projected upon deserts across times and cultures. In addition to their depiction as dead and empty, deserts have become a canvas for the demonstration of religiosity, resilience, heroism and athleticism. Cultural production, particularly literature and film, do, however, furnish a critical space in which important questions can be raised about deserts’ fundamental importance to different cultures and societies. Drawing on novels, films, and secondary scholarship, the course will help students understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the desert sub-genre of African, Euro-American, and Middle Eastern literatures. Whether grappling with transcontinental issues of climate change, cannibalization of biodiversity or overexploitation of natural resources, desert-focused cultural production invites us to interrogate the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature.

**Requirements/Evaluation:** active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** Students are admitted into the course on a first-come-first-serve basis. If the course is over-enrolled, preference will be given to Arabic Studies and Comparative Literature majors and certificates.

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 234(D1) ENVI 208(D1) ARAB 209(D1)

**Writing Skills Notes:** Students will receive constant and extensive feedback on their written work. Students will write regular weekly responses on Glow, a reflection statement, two 5pp. papers for midterms, and one 10pp. final paper.

**Difference, Power, and Equity Notes:** Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

**Cross-listings:** ENVI 209 GEOS 309

**Secondary Cross-listing**

What will happen to the Earth’s climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects--like the albedo feedback associated with sea ice and glacier loss--and how these processes can accelerate
climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gases in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** 4 multi-week lab projects and several short quizzes

**Prerequisites:** Any of GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** GEOS and ENVI majors

**Expected Class Size:** 20

**ENVI 211** (S) Race, Environment, and the Body

**Cross-listings:** SOC 211 AFR 211 ENVI 211 AMST 211

**Secondary Cross-listing**

This course is organized around three distinct, but overlapping, concerns. The first concern is how polluting facilities like landfills, industrial sites, and sewage treatment plants are disproportionately located in communities of color. The second concern is the underlying, racist rationales for how corporations, in collaboration with state agencies, plot manufacturers of pollution. The final concern is how the environmental crises outlined in the first two sections of the course are experienced in the body. In reviewing a range of Black cultural productions--like literature, scholarship, music, and film--we will not only consider how environmental disparities physically affect human bodies, but also how embodiments of eco-crises lend to imaginaries of the relationship between the self and the natural world.

**Class Format:** discussion

**Requirements/Evaluation:** class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** preference given to AFR concentrators, ENVI concentrators and majors, and ANSO majors.

**ENVI 212** (F) The Economics and Ethics of CO2 Offsets  (WS)

**Cross-listings:** ENVI 212 ECON 214

**Secondary Cross-listing**
Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Class Format: Each student will be the tutorial partner of one other student, and each pair of tutorial partners will meet with the instructor for 75 minutes each week.

Requirements/Evaluation: a 5- to 7-page paper every other week; a 3-page written critique every other week; one re-write paper

Prerequisites: ECON 110 or the equivalent, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 213 (S) Introduction to Environmental and Natural Resource Economics (QFR)

Cross-listings: ENVI 213 ECON 213

Secondary Cross-listing

We’ll use economics to examine why we harm the environment and overuse natural resources, and what we can do about it. We’ll study cost benefit analysis, pollution in general, climate change, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We’ll talk about how economists put a dollar value on nature and ecosystem services (as well as human health and life!), and the concerns involved in doing so. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth. Consideration of justice and equity will be woven throughout the whole semester.

Requirements/Evaluation: problem sets, short essays, final paper; intermediate assignments may include a poster, one or more short presentation(s), other brief writing assignment(s)

Prerequisites: ECON 110 or equivalent

Enrollment Limit: 30

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course will count toward both the Environmental Studies major and concentration

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS has opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, weekly quizzes, and a research project

Prerequisites: at least one course in Geosciences or Environmental Studies

Enrollment Limit: 18

Enrollment Preferences: Geosciences majors and Environmental Studies majors and concentrators.

ENVI 215  (S)  Climate Changes  (QFR)

Cross-listings: ENVI 215 GEOS 215

Secondary Cross-listing

Paleoclimatology is the reconstruction of past climate variability and the forces that drove the climate changes. The Earth's climate system is experiencing unprecedented and catastrophic change because of anthropogenic emission of greenhouse gases and land use change. Paleoclimatology allows humans to put modern climate changes into the context of the history of this planet, and shows how and why it is unprecedented and catastrophic. Each climate event we study from Earth's past teaches us lessons on why the climate system responds to anthropogenic perturbations, what climate changes we're committed to in the future, how long-lasting they will be, and what climate consequences we can avoid if we take action and reduce greenhouse gas emissions sooner. In this course, we will discuss the major mechanisms that cause natural climate variability, how climate of the past is reconstructed, and how climate models are used to test mechanisms that drive climate variation. With these tools, you will analyze and interpret data and model simulations from climate events from Earth's history, and apply these findings to anthropogenic climate changes happening now and that are projected to happen in the future. Laboratories and homework will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: This class has three scheduled lectures per week, and one lab meeting per week which will consist of field excursions, lab exercises, problem solving and discussion
ENVI 216  (S)  Philosophy of Animals

Cross-listings: PHIL 216 ENVI 216

Secondary Cross-listing

Animals are and always have been part of human life. To name just a few ways: We treat animals as companions, as food, as objects of wonder in the wild, as resources to be harvested, as testing grounds for science, and as religious sacrifice. The abstract philosophical question before us is, what are animals such that they can be all these things? In this course we aim to engage that abstract question through two more focused projects. Firstly, we will try to understand the mental lives of non-human animals. Secondly, we will try to make sense of the moral dimensions of our relationship to animals. Throughout we will aim to fuse a rigorous scientific perspective with more humanistic themes and philosophical inquiry. Topics include sentience, animal cognition, language in non-human animals, empathy and evolution, the history of domestication, animal rights, cross-cultural views on animals, arguments against and for vegetarianism and veganism, the morality of zoos, hunting and fishing, and pets and happiness.

Requirements/Evaluation: four 3-to-4 page papers and one 8-to-10 page final paper. In addition, students are required to attend remotely at least four talks in the speaker series associated with the course. These will be during the Friday course time slot. (When there is no speaker, there will not be class during that slot, so class itself will be solely on Mondays and Wednesdays.)

Prerequisites: none, though at least one course in philosophy is recommended.

Enrollment Limit: 16

Enrollment Preferences: students with at least one previous philosophy or cognitive science course; there is no need to email the professor in advance to indicate special interest in the course.

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

ENVI 219  (F)  Evolution of and on Volcanic Islands  (WS)

Cross-listings: GEOS 220 ENVI 219

Secondary Cross-listing

Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and
Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics. This course is in the Solid Earth group for the Geosciences major.

**Class Format:** One-hour weekly meetings with tutorial partner and instructor

**Requirements/Evaluation:** five 5-page papers and critiques of partner's papers

**Prerequisites:** 100-level GEOS course or permission of instructor

ENVI 222  (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics  (WS)

Cross-listings:  GEOS 221 ENVI 222 LEAD 221

Secondary Cross-listing

Former President Barack Obama once said: “There’s one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate.” While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

ENVI 224  (F) The Rise and Fall of Civilizations

Cross-listings:  ANTH 214 ENVI 224

Secondary Cross-listing

Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human prehistory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

Class Format:  Class discussion and debates will complement lectures based on powerpoint presentation.

Requirements/Evaluation:  midterm, final exam, 15pp analytical paper, two quizzes

Prerequisites:  none
Enrollment Limit: 30
Enrollment Preferences: First and second years.

ENVI 226 (S) Climate Data Analysis
Cross-listings: GEOS 227 ENVI 226

Secondary Cross-listing
In this tutorial, students will learn how to access and work with the datasets that show how our climate is changing. The course introduces a series of analytical methods used in climate science, and students then apply these 'recipes' to data of their choosing to research parts of the climate system. Over the course of the term, a student might investigate the seasonality of global atmospheric carbon dioxide levels, maps of sea level anomalies, and the impact El Niño patterns have on Western US rainfall. Students will present their findings, and their insights into the particular aspect of the climate system, at weekly tutorial meetings. Analytical approaches covered in the class include climatologies, time series analysis (trends, periodicity, and autocorrelation), anomaly maps, composites, and zonal/meridional averaging. As for regions and climate systems students can explore: the sky is the limit. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: Asynchronous recorded lectures will provide instruction on new analytical techniques every two weeks. Students will meet in pairs for one hour every week with the instructor: each student will present the results of their data analysis and their interpretation for discussion every other week.
Requirements/Evaluation: Five 3-4 page papers including figures made from analyzing data.
Prerequisites: At least one GEOS or ENVI course
Enrollment Limit: 10
Enrollment Preferences: Students with a strong interest in Geosciences and Geoscience majors.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 229 (F) Environmental History
Cross-listings: HIST 264 ENVI 229

Primary Cross-listing
This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local,
national, and global scale.

Class Format: with field trips

Requirements/Evaluation: several short essays; final research project

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: juniors, seniors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

SEM Section: 01 TR 8:30 am - 9:45 am Laura J. Martin

ENVI 230 (S) Geographies of Food Justice (DPE)
Recent scholarship & reporting clearly show inequalities of race, class, & gender in access to adequate, nutritious, & culturally appropriate food. Observers often call poor, segregated urban areas food deserts, evoking a landscape dominated by fast food & devoid of vegetables. Farmer & food sovereignty activist Leah Penniman instead refers to these places as experiencing food apartheid to emphasize that the inequalities are the result of structural racism. Notably, deserts & apartheid are both spatial metaphors, referring not only to the environments in which people eat, but also the systems of social, political, & economic power that define those places. This course considers the relationship between food, power, & geography by looking at such places. We ask: How does where people eat shape what they eat? What can we learn about structural racism & settler colonialism by looking at the diverse sites of food insecurity? How do people experience a globalized food system in uniquely localized ways? How do struggles over land & labor shape the possibilities for justice in the food system? Does it matter where our food is produced? We begin with an exploration of the concepts of food security, sovereignty, and justice. Subsequent units include a critical reevaluation of the concept of food deserts, drawing on works by scholars who question the term's usefulness. Next, we consider disruptions to indigenous hunting & fishing practices from settler colonialism-induced climate change & toxic contamination. Finally, we evaluate evidence about whether local food is the solution to the social and environmental problems with our food systems. We will read works by geographers, anthropologists, sociologists, planners, & journalists, among others. Several "lab" sessions throughout the semester introduce participants to data analysis tools used by policymakers and activists working on food security and justice.

Requirements/Evaluation: 2-3 short papers on assigned topics, several lab exercises focused on data analysis, final research paper, class discussion, occasional short oral presentations

Prerequisites: ENVI 101 or permission

Enrollment Limit: 19

Enrollment Preferences: Environmental studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course considers how race, racism, and class shape access to food. We will discuss accountability within the food movement, and discuss ways to address inequalities in this area.

Not offered current academic year

ENVI 231 (S) Africa and the Anthropocene (DPE)

Cross-listings: AFR 231 STS 231 ENVI 231

Primary Cross-listing
Despite its low contributions to global carbon emissions, the continent of Africa is predicted to experience some of the worst effects of climate change. This interdisciplinary course investigates the causes and consequences of this troubling contradiction. It positions the African continent as an important site for understanding how legacies of empire, racial and gendered inequality, resource extraction, and capital accumulation impact contemporary global environmental politics. Students will engage theoretical texts, reports from international organizations, films, novels, and web-based content. Topics include: humanism/post-humanism; migration and displacement; representations of conflict; and sustainable development.

Requirements/Evaluation: Assignments include: 2 short written commentaries (2-3 pages each), mid-term current event analysis (5-7 pages), final analytical essay (10-12 pages) and class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 231(D2) STS 231(D2) ENVI 231(D2)

Difference, Power, and Equity Notes: Africa and the Anthropocene considers inequity in environmental politics from the vantage of the African continent. Through selected readings and classroom discussions students will tackle questions of power, racial and gendered difference, empire, and economic stratification. The course contributes to the DPE requirement by helping students to develop skills to better analyze abiding challenges in global society.

ENVI 232 (S) The Garden in the Ancient World

Cross-listings: REL 235 CLAS 235 COMP 235 ENVI 232

Secondary Cross-listing

Drawing on the literature, art, and archaeology of ancient gardens and on real gardens of the present day, this course examines the very nature and experience of the garden and the act of gardening. Using a multi-disciplinary approach, we will explore the garden as a paradise; as a locus for philosophical discussion and religious encounter; as a site of labor, conquest, and resistance; and as a place for solace, inspiration, and desire. This course will be grounded in crucial readings from antiquity, such as the Hebrew Bible, Homer, Sappho, Cicero, Lucretius, Vergil, Horace, Columella, and Augustine, and in the perspectives of more modern writers, from Jane Austen and Tom Stoppard to contemporary cultural historian George McKay. Ultimately, our goal is to analyze conceptions and expressions of beauty, power, and love-in the garden. All readings are in translation.

Requirements/Evaluation: class participation, short written assignments, and a final project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Classics majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 233 (S) Latin American Environmental Literature and Cultural Production (DPE)

Cross-listings: RLSP 216 ENVI 233

Secondary Cross-listing

This foundational course explores a wide array of ecocultural texts from Latin America, ranging from accounts of Europeans’ first arrival to the crisis of mass extinction and anthropogenic climate change today. In between we consider an eclectic mix of styles and genres, including poetry, essays, prose fiction and speeches produced by a varied group of cultural agents. We read classic texts by canonical figures (José Martí’s “Our América,” the Popol vuh), which take on new meaning in the current context, as well as some little-known gems of ecological consciousness. Readings and discussion trace connections between environmental thought and the region’s long and multi-layered history of colonialism, and students are encouraged to develop their own positions by responding to some of the leading theoretical discourses that animate the field of Latin American ecocriticism: decolonial and creole ecologies, ecofeminism, transcultural materialism, and postdevelopment. Conducted in English.

Requirements/Evaluation: Students will write and revise three formal essays over the course of the semester. There will also be shorter written assignments and intermittent discussion-leading.

Prerequisites: None.

Enrollment Limit: 15

Enrollment Preferences: Preference given to students majoring in Spanish or Environmental Studies.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
RLSP 216(D1) ENVI 233(D1)

Difference, Power, and Equity Notes: This course meets the goals of the DPE requirement in that it focalizes the current environmental crisis through the long history of political, economic and cultural struggles in Latin America. We examine the genealogies of environmental culture, tracing the emergence of ecofeminism, for example, through generations of writers. We also examine the phenomenon of creolization and its relationship to the environmental cultures of Latin America's originary peoples.

ENVI 234 (S) Global Poverty and Economic Development (DPE)

Cross-listings: ENVI 234 ECON 507 ECON 204

Secondary Cross-listing

Why are some nations rich while other nations are poor, and what can be done to end global poverty and promote shared prosperity? This course explores the historical determinants of global poverty and inequality, and analyzes the range of policy options available to promote economic development and equalize opportunities. Drawing on research in development economics, development studies, political science, and anthropology, we seek to understand the factors that shaped the global economy and contributed to the cross-country income disparities observed today. In addition, we'll use the tools of modern empirical microeconomics to assess the possibilities for eliminating global poverty and underdevelopment in the future. Undergraduate students will receive 200-level credit and should not register at the 500-level.

Class Format: discussion

Requirements/Evaluation: short written assignments and empirical exercises; two individual take-home exams; final group project

Prerequisites: one economics course or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 234(D2) ECON 507(D2) ECON 204(D2)

Difference, Power, and Equity Notes: This course provides a setting for students to learn about the causes and consequences of poverty in
developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. Through exercises and a group project, the course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

ENVI 235  (S)  Survival and Resistance: Environmental Political Theory

Cross-listings: ENVI 235  PSCI 235

Secondary Cross-listing

Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have "rights"? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet's health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory's traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Requirements/Evaluation: formal and informal writing assignments and class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

ENVI 238  (F)  Sustainable Economic Growth

Cross-listings: ECON 238  ENVI 238

Secondary Cross-listing

Is it possible to have infinite economic growth on a finite planet? This question has sparked a great deal of inquiry across the social sciences. Some argue that we need to slow or even end economic growth to prevent environmental catastrophe. Others argue that market forces, especially changing prices and improved technology, will ensure that growth can continue unabated without significant negative consequences. Still others argue that government intervention is necessary to limit negative consequences of economic progress, but that effective interventions are still compatible with sustained economic growth. In this class, we will explore the insights that economics has to offer on this important question. We will start by considering the importance of finite inputs used in production, including fossil fuels, minerals, and land, among others. Then, we will consider whether undesirable byproducts of economic growth will prevent sustained growth. This second part of class will place a lot of emphasis on climate change. Throughout the class, we will pay special attention to the role that government intervention can or cannot play in promoting sustainable economic growth. This class will reinforce important concepts taught in introductory microeconomics and introductory macroeconomics.

Class Format: The first half of the class is lecture-based. The second half of the class is discussion-based.

Requirements/Evaluation: midterms exams, final exam, problem sets, short writing assignments, video-taped presentations, class participation

Prerequisites: ECON 110 and ECON 120
Enrollment Limit: 25
Enrollment Preferences: potential or declared social science majors
Expected Class Size: 20
Grading: yes pass/fail option, no fifth course option
Distributions: (D2)

ENVI 243 (F) Reimagining Rivers (WS)
Cross-listings: ENVI 243 ANTH 243

Primary Cross-listing
In the era of climate change and widening inequality, how we live with rivers will help define who we are. Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including increased flooding, drought, pollution, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and ecological resilience far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Drawing on scholarship from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, and more.

Class Format: This class will be taught in a modified tutorial format, with five groups of three students, each of which will meet for one 75-minute session per week.
Requirements/Evaluation: Each week, each student will either write a 5-page essay on assigned readings or write a 2-page critique of a partner's paper.
Prerequisites: Environmental Studies 101
Enrollment Limit: 10
Enrollment Preferences: Environmental Studies majors and concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 243(D2) ANTH 243(D2)
Writing Skills Notes: Students take turns writing 5-page essays and 2-page responses to those essays, with each writing 6 in total. For each five-page paper, I meet with the student to discuss technical aspects of the paper and specific ways in which it could be improved. At the end of the semester, students have the option of handing in one revised paper as part of a portfolio of papers from throughout the semester. This enables me to have an ongoing, in-depth discussion with each student about their writing skills.
Attributes: ENVI Humanities, Arts + Social Science Electives
Not offered current academic year

ENVI 244 (S) Environmental Ethics (WS)
Cross-listings: PHIL 244 ENVI 244

Primary Cross-listing
What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Most sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral
standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

**Requirements/Evaluation:** five essays (5-7 pages each) and five prepared oral responses to partners’ essays; evaluation will be based on essays, oral responses, and quality of discussion

**Prerequisites:** ENVI 101 or one course in PHIL

**Enrollment Limit:** 10

**Enrollment Preferences:** declared and prospective Environmental Studies majors and concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** meets Value Theory requirement only if registration is under PHIL

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 244(D2) ENVI 244(D2)

**Writing Skills Notes:** Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

**Attributes:** ENVI Humanities, Arts + Social Science Electives EVST Culture/Humanities PHIL Contemporary Value Theory Courses

---

Have you ever wondered why Spam is so popular in Hawaii and why Thai food is available all across the United States? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging in to the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of obesity discourse. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, health, and gender.

**Requirements/Evaluation:** two to three papers on assigned topics (4-6 pages); one longer final paper (8-10 pages); participation in discussion and online activities

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Environmental Studies majors and concentrators; American Studies majors; Public Health concentrators; history majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 245(D2) ENVI 246(D2) HIST 265(D2)

**Difference, Power, and Equity Notes:** This course considers the production and consumption of food as a locus of power over the last 300 years, and contextualizes current movements for food justice and sovereignty in light of those histories. Students will have opportunities to reflect on questions of power, privilege, and racism in contemporary food movements. Our final unit focuses on challenges to critical food studies from fat
ENVI 247  (F)  Race, Land and Settler (Racial) Capitalism: Ongoing Topics in (Dis)/(Re)possession

Cross-listings: AMST 234 AFR 234 ENVI 247 HIST 274

Secondary Cross-listing

This sequential studio course serves as an introduction to ongoing topics in colonialism, racial thinking, African Diaspora studies, Global, Caribbean, and local studies. We will examine how race, gender and class operate under racial capitalism and settler colonialism. The readings in this class will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, Indigenous theorists, among other critical, anti-capitalist or decolonial scholars. Reading in this course will take up the question(s) of land and land-making; race, racialization, and racial thinking; alongside questions of space and place as they all relate to the various processes, projects and methods of (dis)/(re)possession. This course is the first part of a complementary course, which will be offered in the Spring, titled, "Race, Land, Space and (Dis)/(Re)possession: Critical Topics in Environmental Injustice and Subaltern Geographies," which tracks both the "historical breaks" and ongoing processes of (dis)/(re)possession to more contemporary materializations. Weekly in-class discussion will be combined with guest lectures in order to provide the opportunity for exploring how race, space and (dis)re)possession can be understood geographically, and to also explain how a range of these territorializing processes operate in the transnational and local contexts. Those who take this studio course can expect to be actively engaged in directing their learning experience through research/final creative projects of their own selection. Sound, music and other audio engagements will also complement discussions in this course. Therefore, the capacity of deep listening, in-and-out of class, is mandatory. Sample topics covered in the course include the following: indigeneity and Blackness; dispossession and accumulation; environmental imperialism, war and colonial resistance. You are strongly encouraged to participate in both courses in this complementary sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%

ENVI 249  (S)  Food, Agriculture, and Globalization

This course examines the history and current politics of the international political economy of food with a focus on how agriculture and food provisioning have been transformed through imperialism and globalization. We examine the interactions of corporations, nation-states, multilateral international organizations, non-governmental organizations, and social movements in the formation of a globalized food system. Topics include the historical antecedents of our present system, plantation agriculture, the influences of war and settler colonialism on global food production, Cold War transformations in the international food system, the origins of sustainable development discourse, international anti-hunger programs, fair trade and other labeling schemes, labor migration, the antiglobalization and local food movements, and neoliberalism. We will pay particular attention to theories about how producers and consumers are connected to one other through the political economy of food. The reading assignments are drawn from the fields of environmental, food, and policy history, and we will also read works from political scientists, international relations scholars, geographers, anthropologists, and advocacy organizations.
ENVI 250  (F)  Environmental Justice  (DPE)

Cross-listings: STS 250 ENVI 250

Primary Cross-listing
How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Requirements/Evaluation: several short essays, final essay
Prerequisites: ENVI 101 or permission of the instructor
Enrollment Limit: 12
Enrollment Preferences: juniors, seniors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 250(D2) ENVI 250(D2)

Difference, Power, and Equity Notes: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. This is a service-based learning course, and students will hone skills to address environmental injustices.

ENVI 251  Science and Militarism in the Modern World  (WS)

In 1961, United States President Dwight D. Eisenhower warned of the global dangers of what he called the "military-industrial complex." In this course, we will interrogate the military-scientific complex, or the imbrication of militarism and scientific knowledge. This tutorial takes up a number of environmental themes, including the role of environmental science within military campaigns, conservation and environmental racism, nuclear waste and ecological contamination. Surveying conflicts from World War II through the present-day War on Terror, this course will investigate how environmental scientists, politicians, soldiers, activists, and artists have grappled with the intertwined legacies of science and militarism. Students will engage a range of textual materials including books, films, photographs, and news reports.

Requirements/Evaluation: Course requirements include bi-weekly response papers (5-7 pages) and tutorial discussions.
Prerequisites: None
Enrollment Limit: 10
Enrollment Preferences: ENVI and STS majors and concentrators
Expected Class Size: 10

Grading:

Distributions: (D2) (WS)

Writing Skills Notes: Over the course of the semester, students will write 5 papers (5-7 pages each). They will receive bi-weekly detailed feedback on their writing from the professor and their tutorial partner. This feedback will include advice on strengthening their argumentation and use of textual evidence, as well as grammar and usage suggestions/corrections. Students will be graded on the portfolio of papers, with specific attention to how they have incorporated feedback in each subsequent paper.

ENVI 253  (S)  Race, Land, Dis/Re-possession: Critical Topics in Environmental Injustice and Subaltern Geographies

Cross-listings:  AFR 235  ENVI 253  HIST 275  AMST 235  GBST 235

Secondary Cross-listing

This course is an introduction to ongoing and contemporary topics in colonialism, racial thinking, African Diaspora and, Global and Caribbean studies, studies of ‘the environment,’ and dispossession. We will examine how race, gender and class operate under racial capitalism and settler colonialism as ongoing, sometimes continuous and discontinuous processes. The readings will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, and other critical, anti-capitalist or decolonial scholars. Readings, as in AFR 234, will take up the question(s) of land and land-making; race, racialization, and racial thinking; of space and place as they all relate to the various processes, projects and methods of (dis)(re)possession, both "past" and "contemporary." We will interrogate temporal binaries, settler time, notions of [the] "progress(ives)" and other bifurcated understandings of the world. This course is the second part of a complementary course, titled, "Race, Land and Settler (Racial) Capitalism," which focuses on the historical geography of processes of (dis)(re)possession from a Black and Indigenous Atlantic perspective. In this iteration, weekly in-class discussion will be combined with guest lectures to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to explain how a range of these territorializing processes operate. Sound, music and other audio will complement discussions. Therefore, the capacity of deep listening, in-and-out of class, is a grounding. Sample topics covered in the course include: indigeneity and Blackness; (dis)possession and accumulation; plantation geographies and economies; housing and houselessness; the problem of parks and conservation; prisons and carceral geographies; Black geographies; environmental racism and colonial resistance. You are strongly encouraged to participate in both courses in this sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). ENVI 254  (S)  Food, Forests, & Fungi: Environmental Health in the Anthropocene  (DPE) (WS)

Cross-listings:  ENVI 254 ANTH 254 STS 254

Secondary Cross-listing

This tutorial will examine the impacts of the climate crisis on human, environmental, and planetary health via the lens of food systems & plant medicines in the Anthropocene. We use anthropological, environmental, evolutionary, & ecological approaches to explore the ecosystems connecting
humans, plants, animals, and fungi that have been massively disrupted by systems of industrial agriculture, industrial forestry, corporate food systems, and corporate biomedicine. We will dwell on the growing signs of our climate catastrophe including the sharp rise of global temperatures, floods, hurricanes, alongside declining freshwater reserves, melting cryosphere, and falling crop yields, that are helping produce a growing wave of hunger and climate refugees in every world region. Along the way, we will hear from and read about youthful climate activists from Extinction Rebellion, Ende Gelände, Fridays for the Future, 350.org, and the Sunrise Movement who are designing and implementing innovative, local, and sustainable solutions to inaction, apathy, and inertia even as situations of internal migration or displacement, food scarcity, food sovereignty, water shortages, and other climate-related disruptions are increasing in both developing and developed parts of our globe. We learn how activist narratives intersect with wider movements to promote more local and circular economies of regenerative agriculture and forestry, ethically produced and sourced organic food, wild & cultivated botanicals, and complementary medicines that are healing both humans and the planet.

Requirements/Evaluation: Weekly attendance, reading 200-300 pages/week, weekly lead essays or oral responses to texts, showing up in mind & body each week.

Prerequisites: none, but a class in ENVI or ANTH preferred

Enrollment Limit: 10

Enrollment Preferences: ANTH, ENVI, STS majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 254(D2) ANTH 254(D2) STS 254(D2)

Writing Skills Notes: Students will write essays: either a lead essay of 1400 words, or written & oral feedback on the lead essay plus an oral response to text. Students receive intensive weekly feedback on their essays and a mid semester writing chat with instructor to negotiate and understand strengths and weaknesses of their writing.

Difference, Power, and Equity Notes: We will examine the ways that food systems reproduce social and structural inequalities within public health, environmental health, climate health. We also examined the interconnected nature of the health of our planet, food systems, forests, and fungal networks and how climate activism and action can fight unequal access to food, forests, nature, and health.

TUT Section: T1 TBA Kim Gutschow

ENVI 255 (F) Environmental Observation

Cross-listings: ENVI 255 GEOS 255

Secondary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: Weekly labs, four quizzes, and a final project

Prerequisites: at least one prior course in GEOS or ENVI

Enrollment Limit: 20

Enrollment Preferences: sophomores, then GEOS majors

Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

ENVI 257  (S) Cities, Suburbs, and Rural Places  (DPE)

Cross-listings: ENVI 257 AMST 247 LATS 230

Secondary Cross-listing

Long associated with cities in the scholarly and popular imagination, immigrants have increasingly settled in U.S. suburbs. Through the lens of new destinations for im/migrants, this course introduces spatial methods, perspectives, and concepts to understand cities, suburbs, and rural places and the relationships between these various spaces. We ask how geographically specific forces and actors shape these trends, as well as the spatially uneven outcomes of complex processes like globalization. This interdisciplinary course highlights racial, legal, economic, political, environmental, social, and cultural dimensions of how transnational migrants become part of and create homes in new places. Through a range of textual materials (academic, technical, popular, visual), we explore why people migrate, the origin of the "illegal alien" figure, economic restructuring and local immigration policies, environmental justice, place-making and community development. Rooted in critical race geographies, case studies are often comparative across different racial and ethnic groups in the U.S. West, South, Midwest, and Northeast. We analyze how documentation status and perceptions of illegality affect the lived experiences of Latines. This course will be mostly discussion-based, with grading based on participation, short writing exercises, three assignments, a midterm examination, and a final exam.

Class Format: This is also a discussion course. While I will spend some time at the beginning of the class lecturing, most of the time will be spent in class discussions.

Requirements/Evaluation: Class participation, weekly in-class writing, three 3-6 page essays, a midterm, and a final examination. All writing materials and exams are based on coursework.
**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** LATS concentrators or those intending to become LATS concentrators

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 257(D2) AMST 247(D2) LATS 230(D2)

**Difference, Power, and Equity Notes:** Students examine how race, gender, sexuality, class, and documentation status also impact how immigrants ‘transition’ to new migration destinations. We consider how the exercise of unequal power affects migration, settlement, and place-making. Students analyze representations and demographic data to determine how people are portrayed and what their material conditions are.

**ENVI 260  (S) Design and Environmental Justice**  (DPE)

**Cross-listings:** ARTS 261 ENVI 260

**Primary Cross-listing**

This seminar/digital art studio offers key literature to examine the relationship between design and environmental justice. It will help build a vocabulary to study the environment as disputed terrain between technological fixes and issues of race, ethnicity, gender, sexuality, class, and colonial status. Students will develop textual/graphic projects about a chosen case study aiming to reorient public perception and imagination around environmental justice. Case studies include contemporary issues like "natural" disasters, eco-cities, and urbanization in the Global South and North. Skills taught include design-thinking and collaborative design, digital art (Photoshop), and participation in collective reviews and public presentations. The class culminates in a presentation to external reviewers and a final exhibition.

**Class Format:** Because this seminar is cross-listed with ARTS, there is a studio component (short assignments and final project).

**Requirements/Evaluation:** Active presence in class discussions and presentations, quality of work, depth and quality of the investigative process, willingness to experiment, and contributions to a collaborative learning environment. This intensive seminar/digital art studio requires working in the architecture studio and/or PC lab outside of scheduled class hours.

**Prerequisites:** Drawing I, ENVI 101, or permission from the instructor.

**Enrollment Limit:** 15

**Enrollment Preferences:** Envi majors and concentrators, Studio Art majors, Art History and Studio Art majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $300-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTS 261(D1) ENVI 260(D2)

**Difference, Power, and Equity Notes:** This seminar/digital art studio examines the interrelationship between design and environmental justice from an intersectional perspective. It encourages students to develop a critical understanding of the role that technical rationality, devoid of ethics and respect for difference, plays in producing racist, heteropatriarchal, and ecocidal forms of oppression. In parallel, we will explore place-based practices that counter neoliberal and extractivist approaches to the (built) environment.

**ENVI 261 (F) Science and Militarism in the Modern World (WS)**

**Cross-listings:** STS 261 ENVI 261

**Primary Cross-listing**

In 1961, United States President Dwight D. Eisenhower warned about the global dangers of what he called the "military-industrial complex." In this course, we will interrogate the military-scientific complex, or the imbrication of militarism and scientific knowledge. Surveying conflicts from World War II through to the present-day War on Terror, this course will consider how empire, networks of expert knowledge, resource extraction, environmental contamination, and land degradation have shaped the modern world. Students will engage a range of textual materials including books, films, photographs, and news reports. Course requirements include weekly writing assignments and participation in small group discussions.

**Class Format:** This course adopts a tutorial model. Students will be divided into 5 groups of 2. Each week the groups will meet with me. Each pair will include one "presenter," who shares a 5-7 page paper responding to the week's theme, and one "respondent," who will offer a 2-3 page response to the presenter's paper. The roles of presenter and respondent will alternate each week. Each student will produce 5 papers as "presenter" and 5 papers as "respondent."

**Requirements/Evaluation:** Each student will produce five (5-7 page) papers as "presenter" and five (2-3 page) papers as "respondent." Grades will be issued based on the portfolio of papers and active participation in discussions.

**Prerequisites:** None

**Enrollment Limit:** 10

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

STS 261(D2) ENVI 261(D2)

**Writing Skills Notes:** This is a writing intensive tutorial. Students will complete weekly written assignments and receive in-depth feedback to improve their writing. Over the course of the semester, students will write 10 papers ranging from 2-7 pages.

**Attributes:** ENVI Humanities, Arts + Social Science Electives

**ENVI 263 (S) The Global Ocean: An Interdisciplinary Introduction**

**Cross-listings:** MAST 263 ENVI 263

**Secondary Cross-listing**

Though it covers most of the planet, the ocean's importance to everyday life is easy to overlook. Its roles as a cultural symbol, resource, highway, and climate regulator make it essential to life around the world. This interdisciplinary course, team-taught by the faculty of the Williams-Mystic Program, will examine key issues in each of the world's oceans while introducing students to the ways these issues connect multiple disciplines and transcend physical, political, and imaginary ocean boundaries. By drawing on the expertise of the five professors -- from humanities, social sciences, and sciences -- this course facilitates the critical study of the ocean from an interdisciplinary perspective and helps them consider their own role in the shifting relationship between humanity and the ocean. This seminar-style course will meet twice a week online, with students assessed by their participation, response papers, and final project, while helping them apply interdisciplinary skills to pressing sustainability issues connecting the environment and society.

**Requirements/Evaluation:** Five 2-page papers, participation, and a 6-8 page final paper

**Prerequisites:** none, open to all students

**Enrollment Limit:** 20

**Enrollment Preferences:** 1. first years, 2. sophomores, 3. MAST concentrators
Expected Class Size: 15

ENVI 265  (F)  Coral Reefs: Ecology, Threats, & Conservation

Cross-listings: MAST 265 BIOL 165 ENVI 265

Secondary Cross-listing

Coral reefs are a fascinating ecosystem found throughout the world's tropical oceans. Corals can thrive in nutrient-poor oceans because of the mutualistic relationship with algal symbionts. And as a foundational species, corals provide a habitat for numerous species, possibly the highest diversity found on the planet. However, these complex and beautiful ecosystems are declining worldwide from a variety of local and global threats. In this course, we will explore coral reef ecology through an in-depth examination of the biotic and abiotic factors contributing to the ecosystem's functioning. We will also investigate the causes and consequences of threats to coral reefs, such as ocean warming, ocean acidification, and resource extraction. Finally, we will identify the many efforts worldwide to conserve coral reefs and promote their resilience. In this seminar course, you will demonstrate your proficiency through knowledge assessments, short writing reflections, a virtual coral fragmentation experiment, and a creative advocacy project. This course aims to deepen your awareness of the complex species interactions on coral reefs and the physical factors affecting coral survival while fostering hope through current conservation efforts.

Requirements/Evaluation: Four 1-paragraph discussion board post, One 20-question knowledge assessment (quiz), Three 2-page writing reflections, One lab results and discussion write-up 2-3 pages figures included, and a creative (medium is student choice) advocacy project.

Prerequisites: none, open to all students

Enrollment Limit: 20

Enrollment Preferences: 1. First-Year, 2. Sophomores

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

ENVI 266  (S)  Reading Water  (WS)

Cross-listings: MAST 266 ENVI 266

Secondary Cross-listing

Water has such profound and far-reaching influence on individuals, societies, and the planet that it simultaneously risks going overlooked and appearing clichéd. Human beings are made of it and need it to live, yet will die if immersed in it. It is venerated by cultures around the world, yet most people either cannot access clean water, or don't know where their clean water is piped in from. It covers the earth's surface, and has shaped it over eons, yet scientists are still not sure how it came to be here in the first place. This wide-ranging influence also presents challenges for traditional academic structures; thinking about water demands crossing times, spaces, and disciplines. This course will explore the wide-ranging and diverse ways water impacts individuals, cultures, and the environments they call home by drawing on a range of content: hydrology, literature, political theory, storytelling, geography, and more. To do this, we will also develop and examine methods of critically reading as "non-experts"—reading scientific articles as rhetorical objects and reading for scientific principles in literature, for instance—to explore what interdisciplinary thinking opens up (and inhibits), and thus how to effectively engage with and create interdisciplinary work. The goal here is not to define water's cultural or scientific importance, or to determine which disciplines "best" combine to explain water, or to come up with humanities-based solutions to "the water crisis."
Rather, these texts, and the water that flows through them will help us explore the opportunities and limits of human perceptions of the other-than-human world. It will help us consider the extent to which those perceptions both shape, and are shaped by, a seemingly simple molecule. And it will help us imagine epistemologies and ontologies that account for the ways water simultaneously flows through us, around us, and through the deep geological history of the planet. Course Texts: Tristan Gooley -- *How to Read Water* (selections) Vandana Shiva -- *Water Wars* (selections) Luna Leopold -- *Water, Rivers, and Creeks* (selections) Richard White -- *The Organic Machine* Linda Hogan -- *Solar Storms* Marc Reisner -- *Cadillac Desert* Jesmyn Ward -- *Salvage the Bones* John McPhee -- "Atchafalaya" Emmi Itäranta -- *Memory of Water* Brenda Hillman -- "The Hydrology of California"

**Class Format:** The class will be primarily discussion-based, and will ask students to lead and structure discussions. Students will have questions, reflections, and insights prepared before class, and use those to drive our in-class activities.

**Requirements/Evaluation:** 100pg of reading a week, give or take. Approx 20-25 pages of written work throughout the semester.

**Prerequisites:** None

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference to majors, and then to sophomores and juniors, respectively.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 266(D1) ENVI 266(D1)

**Writing Skills Notes:** Students will write four papers of increasing complexity that will require workshopping and drafts. Each of these papers will receive forward-looking writing feedback from me. The first paper centers on paragraph-level stylistic choices, the second on argument/evidence connections, the third on genre, and the final paper synthesizes these writing skills. In addition, students' final grades will allow for revision of earlier papers to encourage and assess growth of writing skills.

Not offered current academic year

**ENVI 268 (S) Debating Ocean Biodiversity at the Intersection of Science and Policy**

**Cross-listings:** ENVI 268 MAST 268

**Secondary Cross-listing**

Biodiversity in the ocean is facing an onslaught of challenges, both directly and indirectly. It is likely that we are undergoing a sixth mass extinction event, where diversity of life on earth is startlingly at risk. Fortunately, however, we are also finding innovative ways to solve issues and attempt to stave off these dramatic changes to our ecosystems. These solutions potentially have both positive and negative effects. Difficult tradeoffs must be weighed and decisions must be made as people wrestle with known knowns, known unknowns, and unknown unknowns. In this class, we will explore five issues that relate to biodiversity in the ocean. You will have the opportunity to investigate one side of an issue, to collect supporting information, and to advocate for your position all while learning about current biodiversity issues in the ocean. You will be challenged to weigh conflicting evidence to find a positive outcome. Throughout the class you will practice critical thinking, evaluation, and synthesizing skills as you work with multiple viewpoints. Class time will include lecture, in-class group work, and student-led debates of timely, controversial issues. You will be assessed on summaries of information, reflections on topics, and a final project on an issue of your choice relating to ocean biodiversity.

**Requirements/Evaluation:** Five 2-page papers, participation, and a 6-8 page final paper

**Prerequisites:** none, open to all students

**Enrollment Limit:** 20

**Enrollment Preferences:** 1. first years, 2. sophomores, 3. MAST concentrators

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

ENVI 271 (S) Theatre & Environment: Site, Nature, Ecoperformance, Utopia (DPE)

Cross-listings: ENVI 271 THEA 272

Secondary Cross-listing

What is theatre's relation to the environment, whether natural or social? How does the site, place, or ecology of a performance change its meaning and reception? What role can live performance play in grassroots campaigns for climate action or environmental justice? How can we use theatre to, in the words of adrienne maree brown, “practice, in every possible way, the world we want to see?” In this combined seminar/studio course, participants will work collaboratively to create a series of mini-performances based on four categories: site, nature/ecology, ecoperformance, and utopia.

Acknowledging the deep inequities (racial, gendered, ethnic, class-based) that constitute all human and environmental interaction, we will work to understand how art's relationship to the environment is itself shaped by the historical legacies of empire and global capitalism. As a contribution to the work of the studio, each student will share independent research on an artist, activist movement, or collective of their choice, such as: Hito Steyerl, Ellie Ga, Marta Rosler, Joan Jonas, Paul Chan, Theaster Gates, Bread and Puppet, Punch Drunk, En Garde Arts, Artichoke Dance, Talking Birds, Extinction Rebellion, Greenpeace, and others. As a special project in the class, we will collaborate with The Zilkha Center to create performances that engage directly with topics relevant to the campus and surrounding community. This is a seminar and maker's course that invites students to create, develop, perform, and share their work with each other and, in some cases, public audiences.

Class Format: This is a maker-based studio and seminar course that requires deep collaboration on the creation, development, and performing of original works of live performance.

Requirements/Evaluation: Creation and presentation of a series of four mini-performance pieces; a 15-minute independent oral presentation on a chosen artist or collective; weekly journal writing; deep and active participation and collaboration.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: if overenrolled, preference will be given to Theatre majors and Environmental Studies majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 271(D1) THEA 272(D1)

Difference, Power, and Equity Notes: This course interrogates the deep inequities, injustices (racial, gendered, ethnic, and class-based), and power relations that constitute all of humanity's relation with earth's environment, ecosystem, and ecology. Students will not only study artists and collectives engaged with the work of environmental justice, accountability, and action, they will also make such art themselves.

Attributes: ENVI Humanities, Arts + Social Science Electives

Not offered current academic year

ENVI 275 (S) Environmental Science, Policy, and Justice (DPE)

Cross-listings: ENVI 275 STS 275

Primary Cross-listing

Environmental science is much more than collecting data. Scientific experts are often called upon--and often position themselves--to guide environmental governance, which means that science has (some) power over public life. What is, and what should be, the relationship between science, on the one hand, and the creation and implementation of environmental policy, on the other? In this seminar we will study how science shapes governance and how science itself is governed. We will explore how legislatures, agencies, and courts respond to scientific information and uncertainty. And we will learn about how communities facing environmental racism and injustice collect data and use it in their advocacy. Along the way, we will challenge the idea of a unified "scientific method," and we will think about how Western scientific knowledge relates to other ways of knowing, including non-Western sciences, embodied knowledge, and traditional knowledge. Topics include: international climate negotiation, chemical exposure, the regulation of biotechnology, agricultural policy, pandemic responses, and plastics and electronics waste.

Requirements/Evaluation: several short essays, final essay

Prerequisites: none

Enrollment Limit: 18
Enrollment Preferences: juniors, seniors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 275(D2) STS 275(D2)

Difference, Power, and Equity Notes: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. Using case studies we will analyze how communities facing environmental racism interact with scientists and sciences.

ENVI 280 Carbon dioxide uptake and our climate future (WS)

Because of the failure to substantially reduce global greenhouse gas emissions, it is now clear that removal of carbon dioxide already emitted to the atmosphere is necessary to meet the 1.5 degree Celsius maximum warming target to avoid severe and irreversible consequences from continued greenhouse gas emissions. Natural carbon sinks have already taken up two thirds of the excess carbon dioxide from the atmosphere, and these terrestrial and marine systems are being investigated to determine if this uptake can be enhanced by geoengineering: human intervention to offset the impacts of climate change. In addition, technologies are being developed to capture carbon dioxide directly from the atmosphere, though none are yet operating at a large enough scale and low enough cost. In this tutorial, students will study the terrestrial, near-coastal, and deep-ocean carbon cycles, and analyze both the capacity for future natural uptake, the potential augmented uptake that could be achieved by deliberate manipulation of these systems, and the impacts of these carbon cycle perturbations on ecosystems and humans. Students will evaluate the scientific basis behind real startup ventures and carbon credit schemes that capitalize on the exploding interest and investment in carbon uptake technologies. And they will write a research proposal for investigating and/or testing a scientifically compelling carbon uptake strategy. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: evaluation will be based on the critical analysis of readings through discussion, writing and revision
Prerequisites: one GEOS course or ENVI 102
Enrollment Limit: 10
Enrollment Preferences: students with a strong interest in Geosciences, Geosciences majors, Environmental Studies majors and concentrators
Expected Class Size: 10
Grading:

Distributions: (D3) (WS)

Writing Skills Notes: Each student will write five 5-page papers and five 1-page response papers; students will give and receive feedback through peer review and tutorial meeting discussion and will develop their writing and critical analysis skills through revision.

**ENVI 291** (S)  Religion and Ecology in America  (WS)

**Cross-listings:** REL 291 ENVI 291 SOC 291

**Primary Cross-listing**

This course examines the relationship between religious and environmental thought in America. Exploring a broad range of practices, symbols, and beliefs, we will examine the religious roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have writers, thinkers, and artists from different religious and cultural backgrounds shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? How have they influenced each other to produce distinctively American forms of eco-spirituality? In pursuit of these questions, we will consider a diverse array of topics and cases, including struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoorsmanship, Catholic climate activism, Jewish eco-mysticism, atheist biology, Buddhist therapy, and more.

**Requirements/Evaluation:** Each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper.

**Prerequisites:** ENVI 101 or instructor permission

**Enrollment Limit:** 10

**Enrollment Preferences:** Environmental Studies majors and concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Writing Skills Notes:** Each student will write five five-page papers and five two-page papers in this class. They will be given extensive weekly feedback on their writing in the form of one-on-one meetings and written comments, and they will be given multiple opportunities for revision. Emphasis will be placed on the mechanics of argumentation, logic and rhetoric, and the development of a distinctive voice.

**ENVI 297** (F)  Global Sustainable Development  (DPE)

**Cross-listings:** GBST 287 ENVI 297

**Primary Cross-listing**
In 2015, the United Nations launched the Sustainable Development Goals, an ambitious multi-pronged effort to eliminate poverty, improve health outcomes, advance clean energy, address the effects of climate change, and support more equitable forms of life on earth. This course explores the historical antecedents and contemporary manifestations of global sustainable development, a constellation of ideas and a set of policy imperatives. This course will ask: what is sustainability and how did it emerge as a key paradigm in the present? Relatedly, how have different organizations and actors worked to address entrenched global challenges? Students will engage a range of materials, including policy documents from the United Nations, World Bank, and international non-governmental organizations. Students will also explore critical scholarship on the possibilities and limitations of global development. Together we will grapple with ways to build more sustainable futures.

Requirements/Evaluation:  Class discussions; 2 Policy Analysis Papers (4-6 pages each); Class presentations; Final Take-Home exam (8-10 pages)

Prerequisites:  none

Enrollment Limit:  19

Enrollment Preferences:  Envi majors and concentrators

Expected Class Size:  19

Grading:  no pass/fail option, yes fifth course option

Distributions:  (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 287(D2)  ENVI 297(D2)

Difference, Power, and Equity Notes:  This class considers topics of global inequality, including the impacts of colonialism, uneven development, extractive capitalism, gender-based discrimination/violence, and racial/ethnic environmental disparities. Students are invited to reconsider stereotypes about the "developing world" through a deep engagement with history and policy-making.

---

**ENVI 298 (F) Cultural Geography**

Why do things happen where they do? What is the relationship between place and identity? How do history and politics shape the way people conceptualize space? What can landscapes tell us about the values, beliefs, and ideas of the people who inhabit them? Questions like these drive the vibrant field of cultural geography. Cultural geographers study how humans shape, experience, and imagine the material world. They explore the relationship between humans and their environment at scales ranging from the global to the local, and they ask how we may better understand ourselves and others by examining the places and landscapes we create. Drawing on case studies from around the world and exploring our local area, this class will survey the major theoretical, methodological, and empirical themes that have preoccupied modern geographers. Along the way, students will acquire some useful tools for making a world that is more beautiful, sustainable, and just.

Requirements/Evaluation:  Three 5-7-pages essays and several shorter writing assignments.

Prerequisites:  Environmental Studies 101

Enrollment Limit:  19

Enrollment Preferences:  Environmental Studies majors and concentrators.

Expected Class Size:  15

Grading:  no pass/fail option, no fifth course option

**ENVI 300 (S) "Rebel Ecologies": Black and Indigenous Struggles for Land and Life"**

Cross-listings:  AFR 300 WGSS 362 ENVI 300 AMST 362

Secondary Cross-listing

This course will ask, what other socioecological models exist? We will weave together a study of differing, yet often converging or synergistic traditions of Black/Womanist eco-feminism that often confronts the social constructions of race, gender, class and sexuality, dominant religion as a means of social control, imperialism, capitalism, and colonialism; Ecosocialism which often frames ecology in terms of a mode of production beyond or outside
of capitalism; and Indigenous perspectives on resistance to capitalist extraction, imperialism, and colonialism. Given ongoing struggles against the extraction of land and labor, the urgent calls raised in the present-day "climate strike," the COVID-19 Pandemic, Black-led pandemic rebellions, along with long(er) histories of land-based peoples around the planet opposing racial capitalism, settler colonialism, and imperialism, this class will explore not only what those in opposition to both extractivism and expropriation resist, but also what we want. We will critique binaries, settler notions of time and explore theories of change. Additionally, this class will look to an array of literature, film, sound, and other forms of cultural production in order to not just "locate," but describe and reveal rebel ecological visions emerging "from below." Ultimately this class will consider how the above ecological praxis can work simultaneously and within a sense of plurality, examining what we can learn from the work of activists, intellectuals, and defenders on the frontline. This course is an extension of Dr. Guess' concept of a "rebel ecology."

**Requirements/Evaluation:** The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader at least twice 20%; Weekly 500-word Literature Review 20%; One Final Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More projects might include, an annotated bibliography of 7 texts, film analysis, syllabus, book review, a written play, an op-ed, etc. We will discuss further possibilities in class.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** If the course is overenrolled, preference will be given to Africana studies concentrators.

**Expected Class Size:** 7

**Grading:** no pass/fail option, no fifth course option

**ENVI 303  (S) Cultures of Climate Change**

**Cross-listings:** ENVI 303 SOC 303

**Primary Cross-listing**

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about what climate change means? How does something as complex as climate change become a "problem" in the first place? And what can its many proposed "solutions" tell us about the role of culture in environmental policy, politics, and decision-making. This course will explore a broad array of factors, from religion to race, class to colonialism. Emphasizing ethnographic and historical accounts of climate change as lived experience, it will apply a range of theories from the social sciences and humanities to case studies from around the world.

**Requirements/Evaluation:** a 15- to 18-page research paper and several shorter writing assignments

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Environmental Studies majors and concentrators first; Anthropology and Sociology majors second

**Expected Class Size:** 19

**ENVI 304  (S) Sacred Custodians: Environmental Conservation in Africa  (DPE)**

**Cross-listings:** GBST 304 HIST 304 ENVI 304 AFR 335
In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of deforestation. Ken Saro-Wiwa was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental crisis that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction, game parks, desertification, wildlife and hunting, traditional practices, and climate change.

**Requirements/Evaluation:** active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and one exam.

**Prerequisites:** None

**Enrollment Limit:** 25

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 304(D2) HIST 304(D2) ENVI 304(D2) AFR 335(D2)

**Difference, Power, and Equity Notes:** This course will intensively explore the question of how various global and local actors have defined environmental degradation and promoted approaches to conservation in Africa. It guides students through an examination of the different power dynamics that have shaped environmental conservation thought and practices on the continent. This course, therefore, provides a critical lens through which to examine the inequalities rooted in race, gender, and other forms of difference.

**ENVI 307 (F) Environmental Law**

**Cross-listings:** ENVI 307 PSCI 317

**Primary Cross-listing**

We rely on environmental laws to make human communities healthier and protect the natural world, while allowing for sustainable economic growth. Yet, despite 40 years of increasingly varied and complex legislation, balancing human needs and environmental quality has never been harder than it is today. Environmental Studies 307 analyzes the transformation of environmental law from fringe enterprise to fundamental feature of modern political, economic and social life. ENVI 307 also addresses the role of community activism in environmental law, from local battles over proposed industrial facilities to national campaigns for improved corporate citizenship. By the completion of the semester, students will understand both the successes and failures of modern environmental law and how these laws are being reinvented, through innovations like pollution credit trading and "green product" certification, to confront globalization, climate change and other emerging threats.

**Requirements/Evaluation:** Several short writing assignments, active participation in class and a final examination

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Preference to Environmental Studies majors and concentrators and sophomores and above.

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

ENVI 310  (F)  Design for the Pluriverse: Architecture, Urban Design, and Difference  (DPE)

Cross-listings:  ENVI 310 ARTS 314

Secondary Cross-listing
The built environment has a critical role in shaping how people enact, reproduce, and refashion social relations over time. Spatial forms, such as architecture and urbanism, are enmeshed in relationships, contestations, and change processes. This studio tutorial investigates the role of different environments in supporting or preventing specific spatial practices and ensuring spatial justice. Using approaches from activist design, students will work in pairs to re-imagine spaces where different ways of being in the world can thrive and coexist—the pluriverse. Students will use a media they master to investigate a theme connecting design, the built environment (architecture and urbanism), and spatial justice.

Requirements/Evaluation:  This is an intensive studio tutorial requiring working outside of scheduled class hours. In this course, students can work with the following media assuming that they can master them for a 300-level course: architecture models (physical and digital), photo reportages, 2D collages (e.g., Photoshop), creative writing (image-text booklets), digital humanities (cartographies, countermapping, oral histories, digital archives), and curatorial platforms. Students will participate in tutorials plus a final project of significant scope. Evaluation will be based primarily on the quality of the final project but also on participation.

Prerequisites:  200-level course on students' medium of choice (for the final project) or permission of instructor.

Enrollment Limit:  10

Enrollment Preferences:  Studio Art majors, Art History and Studio Art majors, Envi majors and concentrators

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Materials/Lab Fee:  $350-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions:  (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 310(D1) ARTS 314(D1)

Difference, Power, and Equity Notes:  “Pluriverse” refers to various ways of being in the world. This tutorial will employ theories and approaches from design activism and critical environmental studies to analyze the relationship between space and difference, including, but not limited to, race, class, ethnicity, gender, sexuality, religion, and species. Students will apply these theories and approaches to creating place-based projects.

Fall 2023

ENVI 311  (S)  Environmental Literature and Film in Latin America  (DPE) (WS)

Cross-listings:  RLSP 304 ENVI 311 COMP 311

Secondary Cross-listing
What use are aesthetics when the world is (literally) on fire? We will take up this question and others in a critical engagement with Latin American cultural production of the twentieth and twentieth centuries, especially works of literature and film that directly or indirectly engage with environmental crisis. Students can expect to explore a variety of media, forms and genres, including works that range from (more or less) mainstream to cutting edge. Our examinations of literature and film will be supported by theoretical writings produced in the Americas and other places. Writers and directors whose work may be considered include, but are not limited to: Lucrecia Martel, Ciro Guerra, Rafael Barrett, Samanta Schweblin, Ernesto Cardenal, Juan Rufio, María Luisa Bombal, Eduardo Gudynas, Silvia Rivera Cusicanqui, Eduardo Viveiros de Castro, Isabelle Stengers.

Requirements/Evaluation:  This course will be conducted seminar-style. Students will be expected to prepare thoroughly and be active, engaged participants in class discussions. In addition to day to day preparation and participation, other graded assignments will include discussion-leading, one
short (5-7 page) essay and a longer (15-20 page) paper combining research and original analysis.

Prerequisites: One college literature of film course at the 200-level or above.

Enrollment Limit: 19

Enrollment Preferences: Envi majors and concentrators, Comp Lit majors, Spanish majors and those working towards the Spanish certificate.

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RLSP 304(D1) ENVI 311(D1) COMP 311(D1)

Writing Skills Notes: All students in the course will write (and rewrite) no less than 20 pages. Major writing assignments will be scaffolded, with explicit discussion of the writing process (pre-writing, drafting, revision) and consultation.

Difference, Power, and Equity Notes: The works of literature and film that we will be examining challenge North American conceptions of climate change (and environmental crisis more broadly) by making visible (often uncomfortably so) the colonial and neocolonial history of extractivism.

Spring 2024

SEM Section: 01 Cancelled

ENVI 316  (F) Governing Cities by Design: the Built Environment as a Technology of Space  (DPE)

Cross-listings: ARTS 316 ENVI 316

Primary Cross-listing

Like in the classic era, cities of the 19th century were metaphors for government: good government could not exist without good governance of the city. This creative seminar charts the transformation of the built environment (architecture and urbanism) as a technology of space to govern cities and citizens from the mid-19th century until the present. Through debates and case studies across geographies and historical timeframes, we will analyze how regimes of government shape and are shaped by the built environment. The seminar has a studio component that consists of an urban project where students will apply theories and approaches to a real case study using digital art (2D and 3D modeling).

Class Format: Because this seminar is cross-listed with ARTS, there is a studio component (short assignments and final project)

Requirements/Evaluation: Active presence in class discussions and presentations, willingness to experiment, contributions to a collaborative seminar/studio environment, quality of work, depth and quality of the investigative process.

Prerequisites: ENVI 101 or instructor permission

Enrollment Limit: 15

Enrollment Preferences: Envi majors and concentrators, Studio Art majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $300-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 316(D1) ENVI 316(D2)

Difference, Power, and Equity Notes: Using theoretical perspectives from urban studies, this seminar/workshop explores how the built environment, as a technology of space, contributes to the production of difference, the establishment of certain regimes of power, and the erasure of specific urban histories–mainly those of underrepresented groups. Students will engage in multimedia place-based projects to imagine and create more equitable built environments.

Attributes: ENVI Humanities, Arts + Social Science Electives

Fall 2023
ENVI 318 (S) Myths and the Making of Latine California  (WS)

Cross-listings: REL 318 COMP 328 AMST 318 LATS 318 ENVI 318

Secondary Cross-listing

California is home not only to the largest ethnic Mexican population in the USA but also to the largest Central American population, while also being home to long-standing Latine communities hailing from Chile to Cuba. Since the era of Spanish colonization, especially starting in 1769, California has been woven into fantastic imaginations among many peoples in the Americas. Whether imagined as Paradise or Hell, as environmental disaster or agricultural wonderland, as a land of all nations or a land of multiracial enmity, many myths have been inscribed onto and pursued within the space we call California. In a state whose name comes from an early modern Spanish novel, how did certain narratives of California come to be, who has imagined California in certain ways, and why? What impact have these myths had on different Latine populations in the history of California, and how have different Latines shaped, contested, and remade these myths as well as the California landscape that they share with other peoples? In this course, we consider "myth" as a category of socially powerful narratives and not just a simple term that refers to an "untrue story." We examine myths by focusing on a few specific moments of interaction between the Latine peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest are select creation stories (found in Jewish, Christian, and Indigenous traditions), imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as part of Greater México, California as "spawling, multicultural dystopia," and California as "west of the west," including its imagination as a technological and spiritual "frontier."

Requirements/Evaluation: this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Latina/o Studies concentrators, Religion majors, American Studies majors, Environmental Studies majors and concentrators, Comparative Literature majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
REL 318(D2) COMP 328(D1) AMST 318(D2) LATS 318(D2) ENVI 318(D2)

Writing Skills Notes: The students are expected to engage in regular writing of response papers, a mandatory revision of their first essay after receiving instructor feedback, a second essay, and a scaffolded final project with instructor and peer feedback at different stages. Attention to writing and the ways that writing interacts with myths, peoples, and place-making is part of the practice and the theoretical orientation of the course.

ENVI 322 (F) Waste and Value

Cross-listings: ENVI 322 GBST 322 ANTH 322

Secondary Cross-listing

What is trash and what is treasure? In what ways does value depend upon and necessitate waste, and how is the dialectic between the two inflicted by culture? When we 'throw away' things at Williams College, where exactly do they go, and who handles them 'down the line'? What are the local and global economies of waste in which we are all embedded and how are they structured by class, race, caste, gender and nation? In this seminar we critically examine the production of waste - both as material and as category - and its role in the production of value, meaning, hierarchy and the environment. Readings include ethnographic accounts of sanitation labor and social hierarchy; studies of the political and environmental consequences of systems of waste management in the colonial period and the present; and theoretical inquiries into the relation between filth and culture, including work by Mary Douglas, Dipesh Chakrabarty and Karl Marx. Geographically the foci are South Asia, Japan, and the United States. There is also a fieldwork component to the course. In fieldtrips we follow the waste streams flowing out of Williams - to an incinerator, a sewage
ENVI 322  (D2/WS) Geomorphology
Cross-listings: GEOS 301 ENVI 331
Secondary Cross-listing
Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth's surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture, three hours per week and laboratory, three hours per week
Requirements/Evaluation: weekly lab exercises, a research project, and a midterm and final exam
Prerequisites: At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor
Enrollment Limit: 18
Enrollment Preferences: GEOS and ENVI majors
Expected Class Size: 18
Grading: yes pass/fail option, yes fifth course option

ENVI 332  (F) (De)colonial Ecologies  (DPE) (WS)
Cross-listings: ENVI 332 AMST 332 AFR 347
Secondary Cross-listing
What is the relationship between race, colonialism, and capitalism? How do such structures organize nature, including human nature? How do ideas of "nature" and "the human" come to structure race, colonialism, and capitalism? From the "discovery" and plunder of the "New World," to 18th-century claims that climate determined racial character, to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, it is clear that race, colonialism, capitalism constitute asymmetric world ecologies, and give rise to interconnected liberation struggles. Anchored in the contexts of U.S. colonialism and racial capitalism, and drawing on environmentalist, Black Marxist, and feminist works, this course aims to expose students to a world history of colonial and decolonial ecologies. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward human and non-human natures. Students should also be able to analyze how such orientations toward human and non-human natures mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples’ visions, representations, and practices of liberation constitute decolonial ecologies that contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

Prerequisites: AMST 101, AFR 200, and/or ENVI 101

Enrollment Limit: 15

Enrollment Preferences: AMST, AFR, ENVI

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 332(D2) AMST 332(D2) AFR 347(D2)

Writing Skills Notes: One thesis paper at 15 pages. The writing process is staggered, with each part graded, and with critical feedback from professor and peers. Specifically, one research proposal (including thesis outline and annotated bibliography of primary texts) with feedback from professor; one thesis paper draft with feedback from peers; one letter of revision explaining the student's revision process; one final draft with critical feedback from professor; and student presentation and discussion.

Difference, Power, and Equity Notes: The course addresses issues of difference, power, and equity, and offers theoretical tools and perspectives to understand these issues. Specifically, students learn how to interpret how racialized and colonized peoples' visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

Not offered current academic year

ENV 335  (F)  The Nile  (DPE)

Cross-listings: GBST 320 ENVI 335 ARAB 308 AFR 350 HIST 308

Secondary Cross-listing

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It was on the banks of this river that the great Egyptian empires were founded that led to the building of some of humanity’s most astounding structures and artworks. While the Nile seems eternal and almost beyond time and place, now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This alarming nexus of demography, climate change, and economic development has led to increasingly urgent questions of the Nile’s future. Is the Nile dying? How has the river, and people’s relationship with it, changed over the last century? This course will consider the history of the Nile and and its built and natural environment. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. By following an imaginary droplet flowing from tributaries until it makes its way into the Mediterranean Sea, we will learn about the diverse peoples and cultures along the way. We will evaluate the numerous attempts to manage and control the Nile, including the building of big dams, and the continuous efforts to utilize the river for economic development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the major urban centers with the Nile and whether the tensions among Nile riparian states will lead to “water wars” in East Africa and the Middle East.

Requirements/Evaluation: short papers and final project/paper

Prerequisites: none, though background in Middle East history is preferable
Enrollment Limit: 19
Enrollment Preferences: History and Arabic Studies majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
GBST 320(D2) ENVI 335(D2) ARAB 308(D2) AFR 350(D2) HIST 308(D2)

Difference, Power, and Equity Notes: The course fulfills the DPE requirement because it evaluates the differing experiences of the Nile among different cultural groups. It will evaluate how the central government is constantly trying to change how people use their water and therefore over-determine how people interact with their natural environment.

ENVI 339 (F) Conservation Biology

Cross-listings: BIOL 329 ENVI 339

Secondary Cross-listing
Conservation Biology focuses on protection of the Earth’s biodiversity. This course starts with an overview of biodiversity including patterns of species richness, causes of species loss (extinction), and the critical contributions of biodiversity to ecosystem function and human welfare. Then we analyze ways to conserve biodiversity at the genetic, population, species and community/ecosystem levels. Labs are field oriented, and focus on local New England communities and ecosystems. Labs emphasize knowing the dominant species in each system; they also stress how to collect and analyze the field data on ecological community structure and function that are critical to test hypotheses that relate to different conservation goals.

Class Format: lectures, discussions, and a weekly lab.

Requirements/Evaluation: Evaluation will be based on lab assignments and reports, discussion participation, two exams and an independent project.

Prerequisites: BIOL 203/ENVI 203 or BIOL 220 or BIOL 305 or permission of instructor.

Enrollment Limit: 24
Enrollment Preferences: Biology majors, Environmental Studies majors, seniors, and juniors
Expected Class Size: 15

ENVI 346 (F) Environmental Psychology

Cross-listings: PSYC 346 ENVI 346

Secondary Cross-listing
This is a course on contemporary social psychology as it pertains to the natural environment. Our two primary questions in this course are: (1) how
can research and theory in social psychology help us understand the ways in which people engage with threats to the natural environment?, and (2) how can social psychology help us encourage environmentally responsible behavior and sustainable practices? Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of environmental solutions.

Requirements/Evaluation: a series of papers, two essay exams, written and oral reports of research

Prerequisites: PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.

Enrollment Limit: 19

Enrollment Preferences: Psychology majors, Environmental Studies majors, and Environmental Studies concentrators

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

PSYC 346(D3) ENVI 346(D3)

Attributes: AMST Space and Place Electives ENVI Humanities, Arts + Social Science Electives PSYC Area 4 - Social Psychology

Not offered current academic year
Difference, Power, and Equity Notes: The course addresses issues of difference, power, and equity, and offers theoretical tools and perspectives to understand these issues. Specifically, students learn how to interpret how racialized and colonized peoples' visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

ENVI 351  (F)(S)  Marine Policy  (DPE) (WS)
Cross-listings:  ENVI 351 MAST 351 PSCI 319

Secondary Cross-listing
Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions:  (D2)  (DPE)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 351(D2) MAST 351(D2) PSCI 319(D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

ENVI 354  (F)  Drugs, Empire, & Environment in Historical Perspective
This course considers the political economy & environmental impacts of licit & illicit drugs. We begin with the premise that drugs are commodities that
gained global significance in the context of liberalism & empire. Imperial nations--notably Britain--consolidated political & economic power in the 19th century by promoting the opium trade against the wishes of Chinese & Indian officials. Most illicit drugs originated as plants--cannabis, poppies, & coca. The production of these internationally traded agricultural commodities helped transform rural livelihoods & landscapes in the 19th century; attempts at suppressing drug crops in the 20th century have also had environmental impacts. After the turn of the 20th century, the United States led an international movement to end the opium trade. Since then, the War on Drugs has expanded as a means for the United States to exercise domestic & global power. Our focus is primarily illicit drugs, but historical shifts in the categories of licit/illicit are a key theme. Other themes include race & racism in drug policy, imperialism, agriculture, & debates over toxicity. The course is divided into four units, stretching from the 19th century through the present. First, we discuss British colonialism in India & China through the lens of the opium trade. Next, we study the emerging drug control regime, focusing on coca, cocaine, & Indigenous producers in the Andes in the 1940s & 1950s. The third unit looks at environmental justice activists who oppose pharmaceutical companies' waste disposal in Puerto Rico. Finally, we evaluate the environmental impacts of the recent cannabis boom. We ask whether the legal architecture on which the industry is built can overcome the colonial & racist legacies of drug control. Readings include works by historians, novelists, anthropologists, & public policy experts.

Requirements/Evaluation: 2-3 short papers on assigned topics, final research paper, class discussion and participation
Prerequisites: ENVI 101 or instructor permission
Enrollment Limit: 19
Enrollment Preferences: environmental studies majors and concentrators; juniors and seniors
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

Not offered current academic year

ENVI 363  (F)  Environmental Organic Chemistry
Cross-listings: ENVI 363 CHEM 363
Secondary Cross-listing
This course introduces students to the methods used to assess the risks posed by organic chemicals to human, animal, and ecosystem health. Our goal is to develop a quantitative understanding for how specific features of organic molecular structure directly dictate a given molecule's environmental fate. We will begin by using thermodynamic principles to estimate the salient physiochemical properties of molecules (e.g., vapor pressure, solubility, charging behavior, etc.) that impact the distribution, or partitioning, of organic chemicals between air, water, soils, and biota. Then, using quantitative structure activity relationships, we will predict the degradation kinetics resulting from natural nucleophilic, photochemical, and biological processes that determine chemical lifetime in the environment.
Class Format: lecture, three hours per week and laboratory, four hours per week
Requirements/Evaluation: weekly problem sets, laboratory exercises, two midterm exams, a final exam, participation in lecture and lab
Prerequisites: CHEM 155 or CHEM 256 and CHEM 156; or CHEM 200 and CHEM 201
Enrollment Limit: 16
Enrollment Preferences: junior and senior Chemistry and Environmental Studies majors with a demonstrated interest in environmental chemistry
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option

ENVI 364  (S)  Instrumental Methods of Analysis

Cross-listings:  ENVI 364

Secondary Cross-listing

Instrumental methods of analysis provide scientists with different lenses to observe and elucidate fundamental chemical phenomena and to measure parameters and properties at the atomic, molecular, and bulk scales. This course introduces a framework for learning about a variety of instrumental techniques that typically include chromatography, mass spectrometry, thermal methods, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies. Students complete laboratory projects and gain hands-on experience and project planning skills to study molecules and materials of interest. This practical experience is complemented by lectures that cover the theory and broader applications of these techniques. Students also explore the primary literature and highlight recent advances in instrumental methods that address today's analytical questions. The skills learned are useful in a wide variety of scientific areas and will prepare you well for research endeavors.

Class Format: lecture, two times per week and laboratory, four hours per week

Requirements/Evaluation:  Weekly data analysis, laboratory assignments and reports, readings for class, problem sets, one oral presentation of an application of instrumental methods, a final independent literature project and presentation; demonstrated progress in research skills, and project engagement.

Prerequisites:  CHEM 155 or CHEM 256 and CHEM 251 (may be taken concurrently with CHEM 256 with permission of instructor)

Enrollment Limit:  16

Enrollment Preferences:  Chemistry and Environmental Studies majors

Expected Class Size:  16

Grading:  no pass/fail option,  no fifth course option

ENVI 376  (F)  Economics of Environmental Behavior  (QFR)

Cross-listings:  ENVI 376 ECON 477

Secondary Cross-listing

A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to assess how policies can help or hurt the environment. Topics may study include: common pool resources, voluntary conservation, social norms and nudges, discrimination and justice, rationality, firm responses to mandatory and voluntary rules, voting and public opinion, and boycotts and divestment. We'll also build familiarity with the main methodologies of modern economic research: theoretical modeling, empirical analysis of observational data, and experiments.

Class Format: Class sessions will largely consist of presentations and discussions of academic research papers, as well as lab sessions to work on empirical exercises; we may break the class into groups for some discussions

Requirements/Evaluation:  regular reading markup, empirical exercises, class participation, 2 oral presentations, and a final original research paper using an experiment, existing data, or theory

Prerequisites:  ECON 251 and (ECON 255 or STAT 346)

Enrollment Limit:  19

Enrollment Preferences:  senior Economics majors

Expected Class Size:  19

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 376(D2) ECON 477(D2)

Quantitative/Formal Reasoning Notes:  The research students will consume and produce in the class will be based on math-based theory and/or econometric-based empirical analysis.
ENVI 380  (F)  Animals and Society
Cross-listings:  ENVI 380 STS 379

Primary Cross-listing
How do humans and animals shape each other's lives? People encounter animals in farms, laboratories, zoos, wildernesses, and backyards, on purpose and by chance. They treat animals as family members, entertainment, food, vectors of disease, and objects of scientific wonder. Drawing on the works of biologists, philosophers, and feminist science and technology studies scholars, this seminar will examine our relationships with animals and help clarify our responsibilities to them. We will ask: What are the social and environmental consequences of consuming animals? Should humans swim with dolphins, feed manatees, use gene-editing to create species that can survive climate change? Should moral standing depend upon the ability to communicate or the ability to experience emotions like grief and joy? What can animal models tell us about human health and society, and when is animal otherness too large a gap to bridge? What might human violence toward animals tell us about sexism, racism, or capitalism, and what will human-animal relationships look like in the future?

Requirements/Evaluation: short essays, final portfolio
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: juniors and seniors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

ENVI 387  (S)  Economics of Climate Change  (QFR)
Cross-listings:  ECON 387 ENVI 387 ECON 522

Secondary Cross-listing
This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

Requirements/Evaluation: problem sets, midterm, group presentation, final exam
Prerequisites: ECON 251, familiarity with statistics
Enrollment Limit: 25
Enrollment Preferences: Junior/Senior Economics majors and CDE fellows
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 390  (F)  The Nature of Nature

Secondary Cross-listing

"Nature" is one of the most common words in English. And yet what does it mean? Is it primarily descriptive (all living things), or normative ("natural" foods, "human nature")? This course will consider some of the richly incoherent ways we think about the living world, paying particular attention to the difficulty of narrating processes that are too big, too small, too quick, or too slow for direct human apprehension. We'll explore the way popular nature writing mingles scientific reporting with implicit and explicit judgments about human identity, and take up the insoluble problem of our proper relation to animals. Considerable attention will be paid to the racial, cultural and class dimensions of contemporary forms of environmental consciousness. Writers studied will include Elizabeth Kolbert, Jem Bedell, William Cronon, and Charles Darwin. We'll also consider the intermediations of nature and technology in documentaries by David Attenborough and Lynette Wallworth, among others.

Requirements/Evaluation: Several short written exercises, an eight page comparative midterm essay, and a final twelve to fifteen page essay incorporating audiovisual materials. Active participation in class.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors; Environmental Studies majors and concentrators; Philosophy majors.

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

ENVI 395  (F)  Black Reparations Within/Beyond Borders  (DPE)

Cross-listings: AFR 395 WGSS 395 ENVI 395 GBST 395

Secondary Cross-listing

Generations of Black people around the world have demanded restitution for the harms and legacies of enslavement, indigenous genocide and colonialism in order to advance social justice, new ways of living and freedom. In this way, freedom fighters, Black Power leaders, abolitionist movements, Pan-Africanists, maroons, Rastafarians, Black politicians, climate justice leaders, and revolutionary anti-capitalists have all put forward ideas on and approaches to reparations and reparatory justice. This course will analyze 'geographies of Black struggle', the differences and commonalities among these approaches, the political strategies and movements, including responses to global climate change and socio-environmental disasters that advance reparations as a just remedy within and beyond borders. We give particular attention to Pan-Africanist and Black feminist perspectives, as well as liberal and popular struggles for reparations within the African diaspora across space and time. Do Pan-Africanism and Black feminism offer new visions for reparations movements in the 21st century? Employing speeches, writings, audio-visual content and documentary film from and about these earlier and emerging movements and their leaders, we will draw long lines between historical circumstances and drivers, and examine Black (un)freedoms within the context of calls for reparation today.

Requirements/Evaluation: Attendance and Participation including serving as a class discussion leader (20%); Written double-spaced essay about and the legacies and role that Pan-Africanism or Black Feminist perspectives play in contemporary global reparations movement (8 pages plus bibliography) (25%); Research and creatively present using written text, flyer, video, audio-visuals or poster a profile of Pan-African feminist leader focusing on her ideas, movement activities, and role in the reparations movement including innovative ideas (max. 5 pages or 10 minutes) (25%); Final
**Project:** Simulation activity of a Pan-African Congress on Reparations (30%)

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** If over-enrollment, preference to AFR, GBST and HIST students

**Expected Class Size:** 10

**ENVI 397 (F) Independent Study of Environmental Problems**

Individuals or groups of students may undertake a study of a particular environmental problem. The project may involve either pure or applied research, policy analysis, laboratory or field studies, or may be a creative writing or photography project dealing with the environment. A variety of nearby sites are available for the study of natural systems. Ongoing projects in the College-owned Hopkins Forest include ecological studies, animal behavior, and acid rain effects on soils, plants, and animals. Students may also choose to work on local, national, or international policy or planning issues, and opportunities to work with town and regional planning officials are available. Projects are unrestricted as to disciplinary focus. Students should consult with faculty well before the start of the semester in which they plan to carry out their project.

**Prerequisites:** approval by the Chair of Environmental Studies

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** No divisional credit

**ENVI 402 (F) Environmental Planning Workshop: Community Project Experience**
Cross-listings: AMST 406 ENVI 402

Primary Cross-listing

In this class you apply your education to effect social and environmental change in the Berkshires. Students work in small collaborative groups to address pressing issues facing the region. Class teams partner with community organizations and local & regional governments to work with clients to develop solutions. You will learn while doing and contribute to the community. The field of environmental planning encompasses the built environment, such as housing, zoning, transportation, renewable energy, waste, neighborhood design; the natural environment, such as open space, farmland, habitat and species protection, natural resource protection, air and water pollution and climate change, and the social environment, such as racial zoning, recreation, placemaking, ecojustice, food security, and healthy communities. Skills taught include basic land use planning, GIS mapping, developing and conducting surveys, interview techniques, community-based research, project management, public presentations and professional report-writing. The class culminates in public presentations to the client organizations. The class hours include time for team project work, client meetings and team meetings with the professor. Recent project topics: https://ces.williams.edu/environmental-planning-papers/

Class Format: The weekly conference session (1 hour) is dedicated to site visit field trips, team project work, client meetings and team meetings with professor.

Requirements/Evaluation: Response papers (three 1-page papers), in-class exercises, class discussion, small group work, public meeting attendance, project work, final report (due in segments during semester) and final presentation.

Prerequisites: ENVI 101 recommended; open to juniors and seniors.

Enrollment Limit: 16

Enrollment Preferences: Environmental Studies majors and concentrators, American Studies majors, Maritime Studies concentrators.

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Unit Notes: Course fulfills senior seminar requirement for Environmental Studies Majors, Environmental Studies Concentrators, and Maritime Studies Concentrators. American Studies Space & Place elective. Course is an Environmental Studies Concentration elective (ENVI Policy and ENVI Humanities, Arts + Social Science) and Environmental Studies Major elective.

ENVI 404 (F) Coastal Processes and Geomorphology (QFR)

Cross-listings: MAST 404 ENVI 404 GEOS 404

Secondary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change.
Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

**Class Format:** lecture two times a week with a lab one time per week

**Requirements/Evaluation:** lab reports, quizzes, and an independent research project

**Prerequisites:** Either GEOS 104 or GEOS 210; or permission of instructor. No prior knowledge is necessary, but this course does build on principles used to explore complex scientific challenges.

**Enrollment Limit:** 12

**Enrollment Preferences:** senior Geosciences majors, then juniors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major. This course counts toward the GEOS Group B Electives - Sediments + Life.

**Distributions:** (D3) (QFR)

---

**ENVI 410 (S) The Cryosphere**

**Cross-listings:** ENVI 410 GEOS 410

**Secondary Cross-listing**

The Earth's climate system is often described in terms of its spheres, including the atmosphere, biosphere, lithosphere, oceans, and the cryosphere. The cryosphere is the naturally occurring ice on Earth in all its many forms: snow, glaciers, ice sheets, sea ice, frozen lakes and rivers, and permafrost (frozen soil). These parts of the climate system may seem remote, but have implications for climate and weather around the world. Melting glaciers and ice sheets have already contributed to sea level rise, and are projected to do so even more in the future. This course will explore the cryosphere, including snow, sea ice, permafrost, and glaciers through lectures, hands-on and data analysis labs, reading journal articles, and a final project. A spring break field trip to Alaska offers the opportunity to get boots-on-the-snow experience with glaciers, sea ice, and permafrost. As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major.

**Class Format:** Class periods and lab periods will be used interchangeably based on the weather. The spring break trip to Alaska is optional.

**Requirements/Evaluation:** Evaluation will be based on short papers, labs responses, and a research project

**Prerequisites:** GEOS 215 or GEOS 255 or GEOS 309 or MAST 311 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Senior GEOS majors, then other GEOS majors and senior ENVI majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

**Materials/Lab Fee:** Labs will be outside during the winter: students should be prepared to dress appropriately for the weather.

**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

- ENVI 410(D3)

ENVI 413 (F) The Big Ideas: Intended and Unintended Consequence of Human Ambition (DPE) (WS)

Cross-listings: HIST 413 ARAB 413 GBST 413 ENVI 413

Secondary Cross-listing

What have been the most consequential ideas of the last 100 years? This course will explore some of the more audacious and ambitious plans to alter natural and urban environments in the late 19th century to the early part of the 21st, specifically those that sought to improve the human condition through science, engineering, and technology. By building big bold things, politicians around the globe sought to bring prosperity to their nation and embark on a path of modernity and independence. Through an intellectual, political and environmental history of major construction projects such as the building of the Suez Canal and the Aswan Dam, extensive river valley developments in Iran, Turkey and Iraq, and utopian and futuristic city planning in western Asia, students will consider how, with the benefit of hindsight, to best evaluate the feasibility of such bold schemes. Who has benefitted and who has not, what have been some of the unanticipated consequences, what was sacrificed or neglected, and what do these projects tell us about the larger processes of global capitalism, decolonization, and climate change?

Requirements/Evaluation: A presentation, shorter writing assignments and a longer research paper (20-25 pages) in the end. Students will submit shorter drafts of final paper in order to receive constructive feedback prior to final submission.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Seniors, especially History, Arabic and Environmental Studies majors.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
Writing Skills Notes: A 20-25 page research paper will be required at the end of the semester. Prior to getting to that point, students will submit an annotated bibliography, a two page proposal, a five and eventually a ten page draft. Each draft will receive extensive comments and suggestions from peers and instructor. In this way, the student will think about the process of writing and the best way to set themselves up for success.

Difference, Power, and Equity Notes: This course examines how a number of different nations in Africa and Asia sought to improve the living conditions of the masses through major construction projects. Though ostensibly these schemes were supposed to improve the livelihood of all, often they primarily benefitted the few - the urban elite - and not the general population. This course will therefore explore how certain class, gender and racial lines were solidified and maintained through economic development plans.

ENVI 420 (F) Architecture and Sustainability in a Global World (WS)

Cross-listings: ENVI 420 ARTH 420 GBST 420

Secondary Cross-listing

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Requirements/Evaluation: weekly reading discussion question posts on GLOW, leading class discussions, and a final project/paper (15-20 pages) with presentation

Prerequisites: none, although a course in art/architectural history or environmental studies would be advantageous

Enrollment Limit: 12

Enrollment Preferences: Art History majors, Environmental Studies majors, History and Studio majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 420(D1) ARTH 420(D1) GBST 420(D1)

Writing Skills Notes: This course develops writing proficiency using a series of sequenced assignments that culminate with the formation of a well-articulated, compelling final project. Students will receive extensive feedback on these assignments via a progression-oriented evaluative system that involves both instructor and peer feedback, and will take part in a writing seminar towards gaining the necessary tools for drafting work, formulating ideas, organizing sections, and crafting an abstract.

ENVI 430 (S) Race, Identity, Nature (DPE) (WS)

Cross-listings: AMST 430 ENVI 430 AFR 390

Secondary Cross-listing

From 18th-century claims that climate determined character to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, race, colonialism, identity, and "nature" operate as interconnected terrains of power. Anchored in the contexts of U.S. colonialisms, racialization, and accumulation, this course aims to expose students to the cultural politics of "nature" as a way of "doing" American Studies. Specifically, this course investigates formations of and struggles against U.S. colonialisms, racialization, and accumulation via the many symbolic and material iterations, negotiations, and contestations of the contingent relations between and among human and non-human natures. Organized around a significant
research paper and weekly written responses, this course ultimately aims to foster students' critical writing, reading, analytical thinking, and comparative inquiry skills across such contexts and sites of contestation, and across texts of different genres and media. We will work with a wide range of primary sources, including published fiction and poetry, legal documents, newspaper articles, speeches, recorded songs, and films, photos, paintings and other visual culture. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward non-human natures, as well as analyze how ideas of “nature” mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples’ visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

Requirements/Evaluation: Evaluation will be based upon the following: Class Participation: 25%; Weekly Responses (350-500 words): 25%; Final Research Essay: 50%, broken down by Research Proposal (2-3 pgs, 10%), Peer Review and Feedback (2 pgs, 10%), Presentation (10%); Essay (15 pgs): 20%.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: American Studies majors will be given preference; secondary preference given to students specializing in Native American and Indigenous Studies, as well as Africana and Environmental Studies majors.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 430(D2) ENVI 430(D2) AFR 390(D2)

Writing Skills Notes: Emphasis on revision and writing process includes: One thesis paper at 15 pages (receiving critical feedback from professor and peers); one thesis paper revision with critical feedback from professor and peers, including one letter of revision explaining the student's revision process; one research proposal (including thesis outline and annotated bibliography of primary texts) with critical feedback from professor; student presentations and roundtable discussion based on the final paper.

Difference, Power, and Equity Notes: By the end of this course, students should be able to interpret how racialized and colonized peoples’ visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation. In order to addresses such issues of difference, power, and equity, this course provides students with the necessary th

ENV 450 (F) Senior Seminar: Environmental Ethnography

A key question orients this course: What can the embodied, place-based, and detailed approach of ethnographic study bring to our understandings of the environment? This upper-level seminar will explore this question through classroom discussions and a semester-length research project. Students will engage different styles of environmental ethnography while undertaking their own ethnographic projects involving the Williams College community and surrounding areas. Students will learn to work across different kinds of evidence as they draft fieldnotes, code fieldwork data, extrapolate key ideas from their fieldwork materials, and discover new ways of building environmental knowledge. Students will use these materials to collectively assemble an edited volume of ethnographic snapshots to be presented to the wider Environmental Studies community at Williams.

Requirements/Evaluation: Participation in seminar discussions; Weekly fieldnotes (2-3 pages per week); Mid-term Coded fieldwork notes and summary statements (8-10 pages); Final ethnographic snapshot/presentation (13-15 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; Juniors and Seniors

ENV 454 (F) Climate Change Physiology
Cross-listings: ENVI 454 BIOL 454

Secondary Cross-listing

Animals are increasingly faced with rapid climate change driven by human activities across the globe. How do they cope with challenges imposed by increasing temperature? And, how might physiological mechanisms at the organismal level scale up to influence population processes? This course uses an integrative approach to understand the impacts of climate change at multiple levels of biological organization in both terrestrial and aquatic environments. We examine physiological mechanisms underlying animal responses and the role of acclimation versus adaptation in coping with rapidly shifting thermal environments. We then consider the impacts of these mechanisms on whole organism performance and their consequences for population persistence. Finally, we learn the analytical tools used to incorporate physiological mechanisms into ecological models to predict future responses to global climate change. Class discussions will focus on readings drawn from the primary literature.

Requirements/Evaluation: Evaluation will be based on class participation and several short papers.

Prerequisites: BIOL 203 or BIOL 205, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Biology seniors who have not yet taken a 400 level course

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: Satisfies the distribution requirement for the Biology major.

ENV 460 (S) Communicating Climate Change

Long-term, probabilistic thinking about scary scenarios is hard. When the relevant time frames extend to centuries and millennia, it is really hard. And when the degree of scariness is determined by sciences that very few people understand, it is really, really hard. This describes the challenge of climate communication. No matter what your interests or career paths might be, you will need to be able to communicate effectively about environmental problems, often with people who see them very differently from you. It is difficult to communicate about any problem across social, political, and cultural divides. But environmental problems present special challenges. For one thing, they typically involve complicated, contested science. For another, their effects are often difficult to perceive yet potentially devastating in their consequences, especially for future generations and marginalized people. For yet another, their solutions often seem hopelessly difficult to implement. And finally, they are thoroughly entangled with almost every other problem we face, from pandemics to racism to wealth inequality. How do we communicate clearly, persuasively, and responsibly about something so complex? This seminar brings together students with interests in the humanities, arts, social sciences and sciences to seek answers to this fundamental question. Over the course of the seminar, we will explore research on climate change communication in a diverse array of fields while seeking to put our findings into practice locally, working together as a team to solve concrete climate communication problems here in our community.

Requirements/Evaluation: One 5-7-page paper; final collaborative project; participation.

ENVI 465 (S) Solutions to the Biodiversity Crisis
The biodiversity crisis is one of the greatest challenges of our century. Faced with climate change, persistent pollution, and habitat fragmentation, species are declining locally and globally. In this upper-level seminar we will integrate knowledge from the natural sciences, social sciences, policy, arts, and the humanities to design and implement biodiversity interventions. Through readings, discussions with experts, and applied projects, we will learn how biodiversity conservation and restoration can be socially just; how spaces can be designed to promote the flourishing of life; and how much local environmental management can alter global trends. We will also envision what the biotic world might look like in 10, 100, and 1000 years and consider who gets to decide which species live and which die, and who should decide.

Requirements/Evaluation: One 5-7-page paper; final collaborative project
Prerequisites: Environmental Studies 101 and 102

ENVI 470 (S) Science for Environmental Justice (DPE)
Cross-listings: ENVI 470 GEOS 470
Secondary Cross-listing
Economically challenged communities and communities of color are disproportionately affected by environmental contamination and disturbance. Although environmental racism caused by industrial pollution has been made clear in scholarship for some time, the integrated stresses of climate change and industrial contamination are now triggering new challenges to life in underprivileged communities. Resolving environmental injustice will require meaningful engagement from scientists across a range of disciplines, from chemistry and the geosciences to ecology and public health. In this senior seminar, you will learn about the history of the environmental justice movement while examining how science has been used to address cases of environmental contamination and mismanagement. You can expect experiences in field data collection, laboratory analyses, and numerical modeling, skills that are required to assist communities suffering from environmental injustice. And we will work in partnership with residents of Tallevast, Florida, who have long suffered from the impacts of groundwater contamination and governmental neglect. This partnership will involve a residential field trip to Tallevast during spring break, where you will undertake an environmental study in support of the community.

Class Format: Weekly lectures, paper discussions, and hands-on labs. Required week-long spring break field trip.
Requirements/Evaluation: weekly lab exercises and seminar presentations; a research project; a final presentation; and a spring break field trip
Prerequisites: At least one 200-level Division III course and at least one 300-level Geosciences or Environmental Studies course or permission of instructor.
Enrollment Limit: 12
Enrollment Preferences: Fourth year, and then third year, Geosciences majors and Environmental Studies majors or concentrators
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Unit Notes: As a 400-level seminar, this capstone course is intended to build and extend knowledge and skills that students have developed during previous courses in either the Geosciences or Environmental Studies majors.
Materials/Lab Fee: The spring break field trip is being funded by the Freeman Foote Field Trip Fund for the Sciences.
Distributions: (D3) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 470(D3) GEOS 470(D3)
Difference, Power, and Equity Notes: The course will examine the history of the environmental justice movement, unraveling the roles of governmental neglect and complicity in fostering the harm of vulnerable communities. We will review strategies of collective action in fighting climate and environmental injustice and the complicated role that scientists have played in this pursuit. We will then leverage scientific skills and perspectives to imagine ways that scientists can become responsible agents of change.

ENVI 478  (S)  Cold War Landscapes

Cross-listings: HIST 478 AMST 478 ENVI 478

Secondary Cross-listing

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in nations across the globe. We will begin this seminar by exploring several distinct “Cold War landscapes” in the United States and North America. We will then move on to examining others in Europe and the Soviet Union. Our approach to our topics will be interdisciplinary throughout the semester, with the additional goal of helping students frame their final projects. Students are encouraged to write their research papers on any geographical area of the world that interests them.

Requirements/Evaluation: class participation and semi-weekly critical writing on the reading; students will also be expected to keep up through the stages of the research paper process, which will involve submitting a short research plan, annotated bibliography, outline, and a rough draft, as well as the final 20- to 25-page paper.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History, ENVI, and AMST majors if over-enrolled

Expected Class Size: 10

ENVI 491  (S)  The Suburbs  (WS)

Cross-listings: HIST 491 AMST 490 ENVI 491

Secondary Cross-listing

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies?
Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

**Class Format:** Students will be assigned a tutorial partner, and tutorial pairs will meet with the professor for one hour each week at a regularly scheduled meeting time.

**Requirements/Evaluation:** Typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors and students with previous coursework in History

**Expected Class Size:** 10

**Grading:** No pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 491(D2) AMST 490(D2) ENVI 491(D2)

**Writing Skills Notes:** Students will reflect on what their writing goals are for the semester, and they will receive weekly feedback on their writing from the professor and from their tutorial partner. The final writing assignment will afford students the chance also to reflect back on their previous papers and the semester’s course content.

FACULTY AFFILIATES OF THE PROGRAM IN ENVIRONMENTAL STUDIES (2022-2023)

- Alex Apotsos, Visiting Lecturer in Geosciences
- Henry W. Art, Professor of Biology and Environmental Studies, Emeritus
- Sonya Auer, Visiting Assistant Professor of Biology
- Lois M. Banta, Professor of Biology
- Ron D. Bassar, Assistant Professor of Biology
- Julie C. Blackwood, Associate Professor of Mathematics
- Roger E. Bolton, Professor of Economics, Emeritus
- Ralph Bradburd, David A. Wells Professor of Political Economy
- Alice C. Bradley, Assistant Professor of Geosciences
- Nicole G. Brown, Assistant Professor of Classics
- Cory E. Campbell, instructional Technology Specialist
- Anthony Carrasquillo, Assistant Professor of Chemistry
- Gregory Casey, Assistant Professor of Economics
- David Cassuto, Class of 1946 Visiting Distinguished Professor of Environmental Studies
- Phoebe A. Cohen, Associate Professor of Geosciences
- Jose E.A. Constantine, Associate Professor of Geosciences
- Mea S. Cook, Associate Professor of Geosciences
- David P. Dethier, Professor of Geosciences, Emeritus
- Joan Edwards, Samuel Fessenden Professor of Biology
- Laura Ephraim, Associate Professor of Political Science
- Michael Evans, Assistant Director of The Zilkha Center
- Jessica M. Fisher, Associate Professor of English
- Antonia Foias, Professor of Anthropology and Sociology
- Giuseppina Forte, Assistant Professor of Environmental Studies and Studio Art
- Jennifer L. French, Rosenburg Professor of Environmental Studies and Spanish
- Sarah S. Gardner, Lecturer in Environmental Studies
- Matthew Gibson, Associate Professor of Economics
ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise. The concentration in Environmental Studies is designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
- Understand the physical nature of environmental systems;
- Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
- Apply scientific methods to collect environmental data and evaluate environmental quality;
- Understand the political and economic factors that inform, enable, and constrain environmental action and policy;
- Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
• Have an appreciation for the ambiguity and uncertainty inherent in many environmental issues;
• Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES is considered to be the first environmental studies center at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations and student-initiated activities, and generous support for summer research and internships. The Class of 1966 Environmental Center, a Living Building and the Program’s home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. CES manages the Hopkins Memorial Forest, a 2600-acre natural area 1.5 miles from campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center.

ADVISING

Majors (or first-years and sophomores interested in the major offered by CES) are encouraged to talk at any time with the Chair, Associate Director of Environmental Studies, or any other Environmental Studies faculty for advice. All incoming majors will be assigned a faculty advisor in the spring of their sophomore year.

Advisors for 2022-2023: Nicolas Howe, Sarah Gardner, Laura Martin, Brittany Meché.

STUDY AWAY

Many study away options are available to students in Environmental Studies, including the Williams-Mystic Maritime Studies Program. Students considering either a semester or year away who intend to major in Environmental Studies should consult the Chair or Associate Director of Environmental Studies and the Dean in charge of study abroad as early as possible to discuss their options. Students may take up to two courses outside of Williams toward their major but must have advance approval in writing from the Chair of Environmental Studies.

CONCENTRATION IN ENVIRONMENTAL STUDIES

The Environmental Studies concentration provides students with an opportunity to explore how humans interact with the environment, including physical, biological, philosophical, and social elements. The concentration is designed so that students will understand the complexity of issues and perspectives that inhere in environmental problems and will appreciate that most environmental issues lack distinct disciplinary boundaries. The goal of the concentration is to educate students to be well-informed, environmentally literate citizens who have the capacity to become active participants in the local and global community. To this end, the concentration is designed to develop the capability to think in interdisciplinary ways and to use synthetic approaches to solve problems while incorporating the knowledge and experiences gained from majoring in other departments at the College.

The Environmental Studies concentration is a six-course concentration in which students gain broad exposure to environmental studies while pursuing another major. In addition to the core introductory courses of ENVI 101 and ENVI 102, students pursuing the concentration will take one elective from each group that represents a broad category of inquiry: Environmental Policy; Humanities, Arts and Social Sciences; and the Natural World. In their junior or senior year, they will take a hands-on 400-level seminar.

THE MAJOR IN ENVIRONMENTAL STUDIES

The Environmental Studies major is a ten-course major. All majors are required to take ENVI 101, ENVI 102, and one 400-level Senior Seminar. ENVI 101 – Nature and Society: An Introduction to Environmental Studies, is a broad introduction to the field, emphasizing the humanities and social sciences. ENVI 102 – Introduction to Environmental Science, introduces students to the interdisciplinary study of the Earth’s systems through the synthesis of physical, chemical, geological, and biological perspectives. The 400-level senior seminars focus on advanced interdisciplinary research and problem-solving in range of fields, including environmental planning, design, ethnography, and history. The remaining core requirements are comprised of three foundational 200-level courses, one from each of three lists of courses (see below). These lists represent the three main branches of the environmental curriculum: Environmental humanities, environmental social science/policy, and environmental science. Students choose, in consultation with their major advisor, the course they will take from each of the three lists.

In addition to these core courses, students choose four electives from a large body of courses in Environmental Studies and cross-listed courses in other fields. To ensure depth in the student’s area of interest, at least three of these courses must be from one of the three curricular branches: environmental humanities, environmental social science/policy, and environmental science. Lists of approved electives will be updated each year. When declaring their major, students should consult with their major advisor to discuss which electives are right for them.

Planning for Prerequisites on your Path through the Major

While ENVI 101 or ENVI 102 are recommended starting points for the major, and are prerequisites for many other ENVI course offerings, please note that some of the course options for the major may have other courses as prerequisites that may not count toward the programs. For example, ENVI/ECON 213 (Intro to Environmental and Natural Resource Economics) has a prerequisite of ECON 110 (Principles of Microeconomics). We strongly suggest that you do advance planning to avoid being blocked from taking a relevant course. Students interested in the program are
encouraged to consult with members of the Environmental Studies Program and to contact the Chair or Associate Director.

**Credit for AP, IB, A-levels and other pre-Williams Courses**

Students are not allowed to place out of ENVI 101. Students with a score of 5 on the AP Environmental Science exam may take a 200-level environmental science lab course (cross-listed with Environmental Studies) in lieu of ENVI 102.

**Introductory Required Courses (2 courses)**

- ENVI 101 Nature and Society: An Introduction to Environmental Studies

Electives (4 courses)

In addition to ENVI 101, 102, three Foundational courses, and one 400-level senior seminar, each student must take four electives from a list of approved courses in Environmental Science, Social Science/Policy, and Culture/Humanities. To ensure depth in the area of interest, at least three of these courses must be from one list. Courses taken abroad may be included with the approval of the Chair or Associate Director.

Senior Seminar Required Course (1 course)

In the junior or senior year, students will take one 400-level seminar in Environmental Studies. These seminars will focus on advanced, interdisciplinary research and/or problem-solving, typically with an applied, experiential, and/or service-learning focus.

INDEPENDENT STUDY AND WINTER STUDY

In addition to courses fulfilling the Environmental Studies major requirements, the following courses are offered:

- ENVI 397, 398 Independent Study of Environmental Problems
- ENVI 493-W31-494 Honors Thesis and Senior Research

Winter Study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year’s Winter Study offerings.

HONORS IN ENVIRONMENTAL STUDIES

Candidates for honors in Environmental Studies will complete a thesis in their senior year. A student earns honors by successfully completing a rigorous independent project under the supervision of a member of the Environmental Studies faculty. The thesis may either be a one-semester plus Winter Study project, or a full-year project (two semesters plus Winter Study). Students who are majoring in environmental studies, and who opt to complete a year-long thesis project, have the option of substituting the second semester of their thesis work for the senior seminar. Honors will be awarded on the basis of the academic merit and originality demonstrated by the student in the completed thesis. Because many theses will require sustained field, laboratory or archival work that is difficult to combine with conventional coursework, full-year thesis students are strongly encouraged to spend the summer before senior year and/or their senior year Winter Study doing advance research.

Funds to support student summer research are available from endowment funds of the CES, and an open competition is held each spring to allocate summer funding resources. Other departments may also provide limited support for summer thesis research. Students and their faculty sponsors should plan the thesis with the expectation of such research in mind.

Juniors who wish to apply to pursue honors should submit a 5-page proposal to their intended advisor and the Chair of Environmental Studies by the first Friday in March. If a student wishes to pursue thesis research advised by a faculty member not affiliated with CES, the student must also identify a co-advisor from within the program. Students applying to conduct an honors thesis in Environmental Studies will be notified before spring break whether or not their proposal has been approved.

Students doing a full-year thesis give a presentation in October to their thesis advisor, second reader, and environmental studies community. Further details on the honors program are available through the Environmental Studies website: https://ces.williams.edu/academic-program/honors/

ENVI 100  (S)  Introduction to Weather and Climate  (QFR)

Cross-listings:  GEOS 100 ENVI 100

Secondary Cross-listing

How is it that we have such a hard time predicting if it’s going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore how fundamental laws of physics determine why air moves and changes, creating the wind, clouds,
precipitation, and extreme events that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop an understanding of earth's climate system, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will use weather and climate models to learn how scientists and meteorologists predict future conditions. Labs include benchtop experiments, data analysis projects, and self-scheduled meteorological observations. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly problem sets, lab assignments, midterm exam, and final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
GEOS 100(D3) ENVI 100(D3)

Quantative/Formal Reasoning Notes: This course will have regular problem sets which require substantial quantitative reasoning. Labs will require analysis, presentation, and explanation of quantitative data, and exams will require some quantitative problem solving.

ENVI 101  (F)(S)  Nature and Society: An Introduction to Environmental Studies

Environment and society interact on scales from the local to the global. This course explores these interactions and introduces students to the interdisciplinary methods of environmental studies. We will investigate the social, political, and historical aspects of environmental problems -- including environmental racism, species extinction, climate change, and more -- as well as their possible solutions. We will survey policy-making and activism in a variety of contexts and will examine art, literature, film, music, maps, advertisements, and other cultural objects. Throughout the course, we will ask how unequal distributions of power affect people and environments. Case studies, readings, discussions, and field exercises will help students develop their understanding how natural systems influence and are influenced by human activities.

Requirements/Evaluation: participation, in-class exercises, several short writing assignments (varying from 2-5 pages), mid-term exam, final exam

Prerequisites: none

Enrollment Limit: 30/section

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 30/section

Grading: yes pass/fail option, yes fifth course option

ENVI 102  (S)  Introduction to Environmental Science
Environmental Science is an interdisciplinary field that develops scientific and technical means for assessing and mitigating human impacts on the environment. This course provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere, hydrosphere, and biosphere. Students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine real-world case studies at global and local scales. Topics may include: climate change, air and water pollution, resource extraction and management, land use change, and their effects on environmental quality, biodiversity, and human health. During weekly fieldwork and laboratory sessions, students gain hands-on experience in collecting, analyzing, and interpreting data that can be used to make recommendations for addressing local environmental issues.

Class Format: Two 75-minute lecture/discussion sessions and one 3-hour field/laboratory session each week.

Requirements/Evaluation: Weekly short quizzes, three exams, lab assignments, participation

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first- and second-year students, Environmental Studies majors and concentrators

Expected Class Size: 48

Grading: no pass/fail option, no fifth course option

Unit Notes: Required course for Environmental Studies major and concentration

Distributions: (D3)

ENVI 103 (F) Global Warming and Environmental Change

Cross-listings: ENVI 103 GEOS 103

Secondary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and wildfires, the natural processes that shape Earth's surface are tied to temperature and precipitation. People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with geography. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate. We will also visit and engage with Black communities and community leaders across New England who are grappling with the unjust distribution of resources to mitigate climate impacts and who have been disproportionate bearers of environmental risk.

Requirements/Evaluation: written reports from laboratories and readings, class participation, a midterm and final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first year and second year students, Geosciences majors and Environmental Studies majors and concentrators

Expected Class Size: 48

Grading: yes pass/fail option, no fifth course option

**ENVI 104  (F)  Oceanography**

**Cross-listings:** ENVI 104 MAST 104 GEOS 104

**Secondary Cross-listing**

The oceans cover three quarters of Earth's surface, yet oceanography as a modern science is relatively young: the first systematic explorations of the geology, biology, physics and chemistry of the oceans began in the late 19th century. This introduction to ocean science includes the creation and destruction of ocean basins with plate tectonics; the source and transport of seafloor sediments and the archive of Earth history they contain; currents, tides, and waves; photosynthesis and the transfer of energy and matter in ocean food webs; the composition and origin of seawater, and how its chemistry traces biological, physical and geological processes; oceans and climate change; and human impacts.

**Class Format:** three 50-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast of New England.

**Requirements/Evaluation:** lab activities (25%), homework (25%), quizzes (5%), three exams (45%)

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first year and second year students, Geosciences majors, Maritime Studies concentrators

**Expected Class Size:** 48

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** This course and GEOS 110 Oceans and Society cannot both be taken for credit.

**Cross-listings:** GEOS 101 ENVI 105

**Secondary Cross-listing**

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will examine the relationship between Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system and learn about the dramatic changes that have occurred throughout the history of our planet. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve and how did this biological event lead to profound changes in the world's oceans and atmospheres? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and spread of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth's dynamic history.

**Class Format:** one laboratory per week plus one all-day field trip

**Requirements/Evaluation:** lab assignments, weekly quizzes, and a final independent project

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** first year and second year students, Geosciences majors

**Expected Class Size:** 30

**Grading:** yes pass/fail option, no fifth course option

Cross-listings: ENVI 108 PHYS 108

Secondary Cross-listing
Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating and lighting, and energy storage. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

Class Format: twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours
Requirements/Evaluation: weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative
Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130
Enrollment Limit: 20
Enrollment Preferences: non-physics majors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions:  (D3)  (QFR)

ENVI 109  (F) Oceans and Society
Cross-listings: MAST 110 GEOS 110 ENVI 109

Secondary Cross-listing
Oceans impact society in many ways: they provide much of our protein, they hide untapped mineral wealth, their circulation regulates global climate, they transport and accumulate our plastic garbage, marine storms batter coastal infrastructure, and sea-level rise threatens communities. However, despite the oceans’ importance throughout history—for trade, as a source of food, and because of their unpredictable dangers—we know shockingly little about them. More than 6000 people have reached the summit of Everest, Earth's highest elevation; but only 22 have visited Challenger Deep, the deepest point below the ocean surface. We have mapped the surfaces of Mars and Venus in far more detail than the topography of Earth's ocean basins. New marine organisms are discovered regularly. And we still don't fully understand the complex details of how ocean and atmosphere work together as the planet's climate engine. In this course, you will examine ocean science themes with direct societal relevance that are also at the forefront of scientific investigation. Topics will be selected based on current events, but are likely to include deep sea mining, meridional overturning, sea level rise, atmospheric rivers, and aquaculture. By taking focused dives into a range of subjects you will learn about the evolution and operation of the ocean as a physical and geological system as well as investigating the intersections between ocean functions, climate change, and human societies. Exercises and discussions will foreground active learning. A field trip to the Atlantic coast will integrate experiential investigation of the
intersection between coastal change, extreme weather, and communities. The aim is to have energised interdisciplinary discussions about topics of pressing societal relevance, to understand some of the fundamentals of ocean science, to develop expertise in gathering and distilling information by researching new topics, and thereby to improve critical and analytical thinking.

**Class Format:** Two 75-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast.

**Requirements/Evaluation:** Evaluation is based on engagement with in-class activities, six graded lab exercises, four short writing/research assignments, and a five-page term paper

**Prerequisites:** none

**Enrollment Limit:** 60

**Enrollment Preferences:** First year and second year students

**Expected Class Size:** 60

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** This course and GEOS 104 Oceanography cannot both be taken for credit.

**Distributions:** (D3)

**ENVI 134 (F) The Tropics: Biology and Social Issues (DPE)**

**Cross-listings:** BIOL 134 ENVI 134

**Secondary Cross-listing**

Biology and Social Issues of the Tropics explores the biological dimensions of social and environmental issues in tropical societies, focusing specifically on the tropics of Africa, Asia, Latin America, Oceania, and the Caribbean. Social issues are inextricably bound to human ecologies and their environmental settings. Each section of the course provides the science behind the issues and ends with options for possible solutions, which are debated by the class. The course highlights differences between the tropics and areas at higher latitudes while also emphasizing global interconnectedness. It begins with a survey of the tropical environment, including a global climate model, variation in tropical climates and the amazing biodiversity of tropical biomes. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria, AIDS and Covid-19 (SARS-CoV-2). The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the interaction of humans with their supporting ecological environment, and global climate change. This course fulfills the DPE requirement. Through lectures, debates and readings, students confront social and environmental issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

**Class Format:** Debate

**Requirements/Evaluation:** two hour exams, a short paper, debate presentation, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 62

**Enrollment Preferences:** Preference will be given to Environmental Studies majors/concentrators, students in need of a Division III or DPE requirement, and then Seniors, Juniors, Sophomores, and First Year students.

**Expected Class Size:** 62

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Does not count for credit in the Biology major.

**Distributions:** (D3) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
BIOL 134(D3) ENVI 134(D3)

**Difference, Power, and Equity Notes:** This course highlights differences between the tropics and higher latitudes. For each section we focus on
difference--different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of
agriculture and different contributions to and impacts of climate change. For each section we highlight differences in power and the inequities of
resource distribution. We then debate potential solutions to ameliorate these inequities.

**ENVI 201 (S) The Geoscience of Epidemiology and Public Health** (DPE)

**Cross-listings:** ENVI 201 GEOS 207

**Secondary Cross-listing**

The Coronavirus pandemic has highlighted the many ways that diseases can be transmitted in the environment. As a society we are becoming aware
of the many ways that geological processes and materials and influence human health, in ways both beneficial and dangerous. This course unites
geoecology, biomedicine and public health approaches to address a wide range of environmental health problems. These include water-related
illnesses (e.g. diarrhea, malaria); minerals and metals, both toxic (e.g. asbestos, arsenic) and essential (e.g. iodine); radioactive poisoning (e.g. radon
gas); and the transport of pathogens by water and wind. In many cases, the environmental health problems disproportionately affect marginalised
populations, contributing to greater disease and death among poor communities and populations of colour. We will examine the broad array of
dynamic connections between human health and the natural world. We will discuss the social justice implications of a range of environmental health
problems. And we will examine current research into how coronaviruses, such as the one causing COVID-19, are transported in the environment. This
course is in the Sediments and Life group for the Geosciences Major.

**Requirements/Evaluation:** Evaluation will be based on short weekly writing assignments as well as an individual project and poster presentation.

**Prerequisites:** No prerequisites

**Enrollment Limit:** 34

**Enrollment Preferences:** Preference to first-years, sophomores, and prospective Geosciences majors

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 201(D3) GEOS 207(D3)

**Difference, Power, and Equity Notes:** Through a series of case studies, we will examine ways in which marginalised groups (whether due to poverty,
race, or ethnicity) are disproportionately affected by environmental health issues. Themes of power and equity in terms of decision making, access to
knowledge, and funding availability, will be woven into all aspects of the class and will underpin our analysis of the science.

**ENVI 202 (S) Critical Practice of Architecture: Theories, Methods, and Techniques** (DPE)

**Cross-listings:** ARTS 222 ENVI 202

**Secondary Cross-listing**

In this course, students will transform an architectural or urban space through design interventions that contribute to reorienting public perception,
imagination, and politics. Skills taught include methods and techniques for critical architecture practice, including architecture drawing, 2D graphic
design, and 3D modeling (digital and physical). Students will also build on design strategies (e.g., spatial hijacking and détournement), community
architecture, and visual techniques to rethink normative understandings of space and time. Through selected readings and discussions, we will
examine key ideas that have inspired design thinking and activism. The class culminates in a presentation to external reviewers and a final exhibition.
Requirements/Evaluation: This is an intensive studio tutorial requiring working in the architecture studio and/or PC lab outside of scheduled class hours. The class will meet in large and small groups throughout the semester for critique and discussion. Assignments include weekly discussions and design projects requiring drawings and model design. Final project: design project to reorient public perception, imagination, and politics. Evaluation will be based on the design quality at theoretical/conceptual levels.

Prerequisites: Drawing I or permission of instructor.

Enrollment Limit: 12

Enrollment Preferences: Studio Art majors, Art History and Studio Art majors, Envi majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $350-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

This course combines lectures & discussion with field and indoor laboratory activities to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to engage students in the natural history of the region and build skills in data analysis and scientific writing.

Requirements/Evaluation: pre-class quizzes, lab reports, two mid-term exams, and a final exam

Prerequisites: BIOL 102, or ENVI 102, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: students planning to pursue Biology and/or ENVI

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 203(D3) BIOL 203(D3)

Quantitative/Formal Reasoning Notes: Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component (based in R). Students are introduced to t-tests, chi-square analysis, and regression.

Attributes: ENVI Natural World Electives EVST Environmental Science
ENVI 204  (F)  Colonialism, Capitalism and Climate Crisis  (DPE)

Cross-listings:  GBST 233 ENVI 204 AFR 233

Secondary Cross-listing

Evolutions are part of human existence. These changes are not necessarily natural, uniform or linear across space and time. As colonial conquests sought to capture, dominate and exploit vast swathes of land, nature and people, supported by economic theories, violent, wide-ranging and long-term changes profoundly altered the environment and human-nature relationships. This course examines these transformations, specifically attending to the relationship between colonized/colonial (hu)man, nature and non-human species, drawing in perceptions of nature and the economy. Our starting point for this intellectual journey is the colonial imprint on human-ecological relations i.e. economic man, or Sylvia Wynter's conception of "ethno-class man" and "homo-economicus". We will consider social difference especially race as a central conjuncture of the changing relationship of capitalism and social organization relative to natural resource extraction, techno-scientific knowledge, industrial development and resulting accumulation of greenhouse gases that induce climate and ecological crises. We will also examine economic perspectives of climate change as a market failure, loss of economic value or a financial risk to stock portfolios that may be at odds with humane ways of organizing our collective planet. This course exposes the hierarchies of social difference and resulting inequalities (class, race, gender, species) under climate crisis to advance reparative and decolonial understandings. Drawing upon experiences from social, labor and environmental movements for climate justice, students will be able evaluate situated political economic responses to the climate crisis.

Requirements/Evaluation:  'Colonialism and my community' writing/ poster assignment (5 pages) 20%; Either a video essay on a 'green' technology (10 minutes), recorded interview with an environmental justice movement/activist/practitioner (20 minutes) or critical in-class presentation on an emerging 'green' technology (10 minutes) 25%; Creative activist project that reflects on histories and axes of power - gender, race, class, species (6-8 pages); Participation and attendance (leading a discussion/presentation) 20%

Prerequisites:  None

Enrollment Limit:  15

Enrollment Preferences:  If over enrolled preference goes to Africana Studies and then Environmental Studies students.

Expected Class Size:  10

Grading:  no pass/fail option, no fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 233(D2) ENVI 204(D2) AFR 233(D2)

Difference, Power, and Equity Notes:  The course addresses from a global perspective and from different contexts how social groups, societies and organizations are being transformed under climate crisis.

ENVI 206  (S)  Global Environmental Politics

This course examines the history and current status of international environmental cooperation and conflict. We will consider the interactions of nation-states, multilateral international organizations, non-governmental organizations, and social movements in the formation of transnational environmental policy and treaties. We will also examine non-state approaches to global environmental challenges. After reviewing competing explanations for the causes of global environmental problems and diverse disciplinary approaches to studying those issues, we will read case studies covering a range of topics. These include fresh water conflict, fisheries and oceans, climate change, waste and pollution, agriculture, pesticides, population and development, wildlife, forestry, and consumerism. The reading assignments are drawn from the fields of environmental and foreign policy history, political science, international relations, geography, and anthropology in order to develop an interdisciplinary approach to international policy analysis. The written assignments are a series of policy briefs. You will also be responsible for two oral presentations during the semester,
Class Format: Depending on enrollment, some discussion may be scheduled outside of the class hours, as would be the case in a tutorial.

Requirements/Evaluation: 2-3 short writing assignments based on assigned readings (3 pages each), 2 oral presentations, discussion participation, 2 policy briefing papers based on library research (5 pages each)

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: environmental studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

ENVI 208  (F) Saharan Imaginations  (DPE) (WS)

Cross-listings: COMP 234 ENVI 208 ARAB 209

Secondary Cross-listing

Deconstructing reductive Saharanism, which the course conceptualizes as a universalizing discourse about deserts, this course seeks to critically examine the myriad assumptions that are projected upon deserts across times and cultures. In addition to their depiction as dead and empty, deserts have become a canvas for the demonstration of religiosity, resilience, heroism and athleticism. Cultural production, particularly literature and film, do, however, furnish a critical space in which important questions can be raised about deserts' fundamental importance to different cultures and societies. Drawing on novels, films, and secondary scholarship, the course will help students understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the desert sub-genre of African, Euro-American, and Middle Eastern literatures. Whether grappling with transcontinental issues of climate change, cannibalization of biodiversity or overexploitation of natural resources, desert-focused cultural production invites us to interrogate the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature.

Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Students are admitted into the course on a first-come-first-serve basis. If the course is over-enrolled, preference will be given to Arabic Studies and Comparative Literature majors and certificates.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 234(D1) ENVI 208(D1) ARAB 209(D1)

Writing Skills Notes: Students will receive constant and extensive feedback on their written work. Students will write regular weekly responses on GLOW, a reflection statement, two 5pp. papers for midterms, and one 10pp. final paper.

Difference, Power, and Equity Notes: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

ENVI 209 (F) Modern Climate (QFR)

Cross-listings: ENVI 209 GEOS 309

Secondary Cross-listing

What will happen to the Earth's climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects—like the albedo feedback associated with sea ice and glacier loss—and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: 4 multi-week lab projects and several short quizzes

Prerequisites: Any of GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: GEOS and ENVI majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 209(D3) GEOS 309(D3)

Quantitative/Formal Reasoning Notes: Lab projects consist of a series of numerical climate modeling projects, which require significant quantitative and logical reasoning.

ENVI 211 (S) Race, Environment, and the Body

Cross-listings: SOC 211 AFR 211 ENVI 211 AMST 211

Secondary Cross-listing

This course is organized around three distinct, but overlapping, concerns. The first concern is how polluting facilities like landfills, industrial sites, and sewage treatment plants are disproportionately located in communities of color. The second concern is the underlying, racist rationales for how corporations, in collaboration with state agencies, plot manufacturers of pollution. The final concern is how the environmental crises outlined in the first two sections of the course are experienced in the body. In reviewing a range of Black cultural productions—like literature, scholarship, music, and film—we will not only consider how environmental disparities physically affect human bodies, but also how embodiments of eco-crises lend to imaginaries of the relationship between the self and the natural world.

Class Format: discussion

Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference given to AFR concentrators, ENVI concentrators and majors, and ANSO majors.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 212  (F)  The Economics and Ethics of CO2 Offsets  (WS)

Cross-listings: ENVI 212 ECON 214

Secondary Cross-listing

Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Class Format: Each student will be the tutorial partner of one other student, and each pair of tutorial partners will meet with the instructor for 75 minutes each week.

Requirements/Evaluation: a 5- to 7-page paper every other week; a 3-page written critique every other week; one re-write paper

Prerequisites: ECON 110 or the equivalent, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 212(D2) ECON 214(D2)

Writing Skills Notes: Each student will write five 5-7 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write five 3-page critiques of their partner's papers. As the final assignment, each student will revise one of their five papers.

ENVI 213  (S)  Introduction to Environmental and Natural Resource Economics  (QFR)

Cross-listings: ENVI 213 ECON 213

Secondary Cross-listing

We'll use economics to examine why we harm the environment and overuse natural resources, and what we can do about it. We'll study cost benefit analysis, pollution in general, climate change, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We'll talk about how economists put a dollar value on nature and ecosystem services (as well as human health and life!), and the concerns involved in doing so. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth. Consideration of justice and equity will be woven throughout the whole semester.

Requirements/Evaluation: problem sets, short essays, final paper; intermediate assignments may include a poster, one or more short presentation(s), other brief writing assignment(s)

Prerequisites: ECON 110 or equivalent

Enrollment Limit: 30

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

ENVI 214  (F)  Mastering GIS

Cross-listings: GEOS 214 ENVI 214

Secondary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS has opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, weekly quizzes, and a research project

Prerequisites: at least one course in Geosciences or Environmental Studies

Enrollment Limit: 18

Enrollment Preferences: Geosciences majors and Environmental Studies majors and concentrators.

Expected Class Size: 18

ENVI 215  (S)  Climate Changes  (QFR)

Cross-listings: ENVI 215 GEOS 215

Secondary Cross-listing

Paleoclimateology is the reconstruction of past climate variability and the forces that drove the climate changes. The Earth's climate system is experiencing unprecedented and catastrophic change because of anthropogenic emission of greenhouse gases and land use change. Paleoclimateology allows humans to put modern climate changes into the context of the history of this planet, and shows how and why it is unprecedented and catastrophic. Each climate event we study from Earth's past teaches us lessons on why the climate system responds to anthropogenic perturbations, what climate changes we're committed to in the future, how long-lasting they will be, and what climate consequences we can avoid if we take action and reduce greenhouse gas emissions sooner. In this course, we will discuss the major mechanisms that cause natural
climate variability, how climate of the past is reconstructed, and how climate models are used to test mechanisms that drive climate variation. With these tools, you will analyze and interpret data and model simulations from climate events from Earth's history, and apply these findings to anthropogenic climate changes happening now and that are projected to happen in the future. Laboratories and homework will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: This class has three scheduled lectures per week, and one lab meeting per week which will consist of field excursions, lab exercises, problem solving and discussion.

Requirements/Evaluation: lab exercises and homework (25%), three quizzes (50%), and a final project (25%)

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor

Enrollment Limit: 24

Enrollment Preferences: Geosciences majors and Environmental Studies majors and concentrators and Maritime Studies concentrators

ENVI 216 (S) Philosophy of Animals

Cross-listings: PHIL 216 ENVI 216

Secondary Cross-listing

Animals are and always have been part of human life. To name just a few ways: We treat animals as companions, as food, as objects of wonder in the wild, as resources to be harvested, as testing grounds for science, and as religious sacrifice. The abstract philosophical question before us is, what are animals such that they can be all these things? In this course we aim to engage that abstract question through two more focused projects. Firstly, we will try to understand the mental lives of non-human animals. Secondly, we will try to make sense of the moral dimensions of our relationship to animals. Throughout we will aim to fuse a rigorous scientific perspective with more humanistic themes and philosophical inquiry. Topics include sentience, animal cognition, language in non-human animals, empathy and evolution, the history of domestication, animal rights, cross-cultural views on animals, arguments against and for vegetarianism and veganism, the morality of zoos, hunting and fishing, and pets and happiness.

Requirements/Evaluation: four 3-to-4 page papers and one 8-to-10 page final paper. In addition, students are required to attend remotely at least four talks in the speaker series associated with the course. These will be during the Friday course time slot. (When there is no speaker, there will not be class during that slot, so class itself will be solely on Mondays and Wednesdays.)

Prerequisites: none, though at least one course in philosophy is recommended.

Enrollment Limit: 16

Enrollment Preferences: students with at least one previous philosophy or cognitive science course; there is no need to email the professor in advance to indicate special interest in the course.

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

ENVI 219  (F)  Evolution of and on Volcanic Islands  (WS)

Cross-listings: GEOS 220 ENVI 219

Secondary Cross-listing

Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics. This course is in the Solid Earth group for the Geosciences major.

Class Format: One-hour weekly meetings with tutorial partner and instructor
Requirements/Evaluation: five 5-page papers and critiques of partner’s papers
Prerequisites: 100-level GEOS course or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Geosciences majors and students with a demonstrated interest in geosciences
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

ENVI 222 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WS)

Cross-listings: GEOS 221 ENVI 222 LEAD 221

Secondary Cross-listing

Former President Barack Obama once said: “There’s one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate.” While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly papers (2 - 5 pages in length) and a final oral presentation

ENVI 224 (F) The Rise and Fall of Civilizations

Cross-listings: ANTH 214 ENVI 224

Secondary Cross-listing

Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human prehistory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the
state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

**Class Format:** Class discussion and debates will complement lectures based on powerpoint presentation.

**Requirements/Evaluation:** midterm, final exam, 15pp analytical paper, two quizzes

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** First and second years.

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**ENVI 226 (S) Climate Data Analysis**

**Cross-listings:** GEOS 227 ENVI 226

**Secondary Cross-listing**

In this tutorial, students will learn how to access and work with the datasets that show how our climate is changing. The course introduces a series of analytical methods used in climate science, and students then apply those 'recipes' to data of their choosing to research parts of the climate system. Over the course of the term, a student might investigate the seasonality of global atmospheric carbon dioxide levels, maps of sea level anomalies, and the impact El Niño patterns have on Western US rainfall. Students will present their findings, and their insights into the particular aspect of the climate system, at weekly tutorial meetings. Analytical approaches covered in the class include climatologies, time series analysis (trends, periodicity, and autocorrelation), anomaly maps, composites, and zonal/meridional averaging. As for regions and climate systems students can explore: the sky is the limit. This course is in the Oceans and Climates group for the Geosciences major.

**Class Format:** Asynchronous recorded lectures will provide instruction on new analytical techniques every two weeks. Students will meet in pairs for one hour every week with the instructor: each student will present the results of their data analysis and their interpretation for discussion every other week.

**Requirements/Evaluation:** Five 3-4 page papers including figures made from analyzing data.

**Prerequisites:** At least one GEOS or ENVI course

**Enrollment Limit:** 10

**Enrollment Preferences:** Students with a strong interest in Geosciences and Geoscience majors.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**ENVI 229 (F) Environmental History**

**Cross-listings:** HIST 264 ENVI 229

**Primary Cross-listing**
This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: with field trips
Requirements/Evaluation: several short essays; final research project
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: juniors, seniors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option

ENVI 230  (S)  Geographies of Food Justice  (DPE)
Recent scholarship & reporting clearly show inequalities of race, class, & gender in access to adequate, nutritious, & culturally appropriate food. Observers often call poor, segregated urban areas food deserts, evoking a landscape dominated by fast food & devoid of vegetables. Farmer & food sovereignty activist Leah Penniman instead refers to these places as experiencing food apartheid to emphasize that the inequalities are the result of structural racism. Notably, deserts & apartheid are both spatial metaphors, referring not only to the environments in which people eat, but also the systems of social, political, & economic power that define those places. This course considers the relationship between food, power, & geography by looking at such places. We ask: How does where people eat shape what they eat? What can we learn about structural racism & settler colonialism by looking at the diverse sites of food insecurity? How do people experience a globalized food system in uniquely localized ways? How do struggles over land & labor shape the possibilities for justice in the food system? Does it matter where our food is produced? We begin with an exploration of the concepts of food security, sovereignty, and justice. Subsequent units include a critical reevaluation of the concept of food deserts, drawing on works by scholars who question the term's usefulness. Next, we consider disruptions to indigenous hunting & fishing practices from settler colonialism-induced climate change & toxic contamination. Finally, we evaluate evidence about whether local food is the solution to the social and environmental problems with our food systems. We will read works by geographers, anthropologists, sociologists, planners, & journalists, among others. Several "lab" sessions throughout the semester introduce participants to data analysis tools used by policymakers and activists working on food security and justice.

Requirements/Evaluation: 2-3 short papers on assigned topics, several lab exercises focused on data analysis, final research paper, class discussion, occasional short oral presentations
Prerequisites: ENVI 101 or permission
Enrollment Limit: 19
Enrollment Preferences: Environmental studies majors and concentrators
Expected Class Size: 19
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (DPE)
Difference, Power, and Equity Notes: This course considers how race, racism, and class shape access to food. We will discuss accountability within the food movement, and discuss ways to address inequalities in this area.
ENVI 231  (S) Africa and the Anthropocene  (DPE)

Cross-listings: AFR 231 STS 231 ENVI 231

Primary Cross-listing

Despite its low contributions to global carbon emissions, the continent of Africa is predicted to experience some of the worst effects of climate change. This interdisciplinary course investigates the causes and consequences of this troubling contradiction. It positions the African continent as an important site for understanding how legacies of empire, racial and gendered inequality, resource extraction, and capital accumulation impact contemporary global environmental politics. Students will engage theoretical texts, reports from international organizations, films, novels, and web-based content. Topics include: humanism/post-humanism; migration and displacement; representations of conflict; and sustainable development.

Requirements/Evaluation: Assignments include: 2 short written commentaries (2-3 pages each), mid-term current event analysis (5-7 pages), final analytical essay (10-12 pages) and class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 231(D2) STS 231(D2) ENVI 231(D2)

Difference, Power, and Equity Notes: Africa and the Anthropocene considers inequity in environmental politics from the vantage of the African continent. Through selected readings and classroom discussions students will tackle questions of power, racial and gendered difference, empire, and economic stratification. The course contributes to the DPE requirement by helping students to develop skills to better analyze abiding challenges in global society.

ENVI 232  (S) The Garden in the Ancient World

Cross-listings: REL 235 CLAS 235 COMP 235 ENVI 232

Secondary Cross-listing

Drawing on the literature, art, and archaeology of ancient gardens and on real gardens of the present day, this course examines the very nature and experience of the garden and the act of gardening. Using a multi-disciplinary approach, we will explore the garden as a paradise; as a locus for philosophical discussion and religious encounter; as a site of labor, conquest, and resistance; and as a place for solace, inspiration, and desire. This course will be grounded in crucial readings from antiquity, such as the Hebrew Bible, Homer, Sappho, Cicero, Lucretius, Vergil, Horace, Columella, and Augustine, and in the perspectives of more modern writers, from Jane Austen and Tom Stoppard to contemporary cultural historian George McKay. Ultimately, our goal is to analyze conceptions and expressions of beauty, power, and love-in the garden. All readings are in translation.

Requirements/Evaluation: class participation, short written assignments, and a final project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Classics majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option
ENVI 233  (S)  Latin American Environmental Literature and Cultural Production  (DPE)
Cross-listings:  RLS 216 ENVI 233
Secondary Cross-listing
This foundational course explores a wide array of ecocultural texts from Latin America, ranging from accounts of Europeans' first arrival to the crisis of mass extinction and anthropogenic climate change today. In between we consider an eclectic mix of styles and genres, including poetry, essays, prose fiction and speeches produced by a varied group of cultural agents. We read classic texts by canonical figures (José Martí's "Our América," the Popol Vuh), which take on new meaning in the current context, as well as some little-known gems of ecological consciousness. Readings and discussion trace connections between environmental thought and the region's long and multi-layered history of colonialism, and students are encouraged to develop their own positions by responding to some of the leading theoretical discourses that animate the field of Latin American ecocriticism: decolonial and creole ecologies, ecofeminism, transcultural materialism, and postdevelopment. Conducted in English.

Requirements/Evaluation:  Students will write and revise three formal essays over the course of the semester. There will also be shorter written assignments and intermittent discussion-leading.
Prerequisites:  None.
Enrollment Limit:  15
Enrollment Preferences:  Preference given to students majoring in Spanish or Environmental Studies.
Expected Class Size:  15
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D1)  (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
RLSP 216(D1) ENVI 233(D1)

Difference, Power, and Equity Notes:  This course meets the goals of the DPE requirement in that it focalizes the current environmental crisis through the long history of political, economic and cultural struggles in Latin America. We examine the genealogies of environmental culture, tracing the emergence of ecofeminism, for example, through generations of writers. We also examine the phenomenon of creolization and its relationship to the environmental cultures of Latin America's originary peoples.

ENVI 234  (S)  Global Poverty and Economic Development  (DPE)
Cross-listings:  ENVI 234 ECON 507 ECON 204
Secondary Cross-listing
Why are some nations rich while other nations are poor, and what can be done to end global poverty and promote shared prosperity? This course explores the historical determinants of global poverty and inequality, and analyzes the range of policy options available to promote economic development and equalize opportunities. Drawing on research in development economics, development studies, political science, and anthropology, we seek to understand the factors that shaped the global economy and contributed to the cross-country income disparities observed today. In addition, we'll use the tools of modern empirical microeconomics to assess the possibilities for eliminating global poverty and underdevelopment in the future. Undergraduate students will receive 200-level credit and should not register at the 500-level.
Class Format:  discussion
Requirements/Evaluation:  short written assignments and empirical exercises; two individual take-home exams; final group project
Prerequisites:  one economics course or permission of instructor
Enrollment Limit:  25
Enrollment Preferences:  first-year and sophomore students
**Expected Class Size:** 25  
**Grading:** no pass/fail option, yes fifth course option  
**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 234(D2) ECON 507(D2) ECON 204(D2)

**Difference, Power, and Equity Notes:** This course provides a setting for students to learn about the causes and consequences of poverty in developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. Through exercises and a group project, the course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

**ENVI 235 (S) Survival and Resistance: Environmental Political Theory**

**Cross-listings:** ENVI 235 PSCI 235

**Secondary Cross-listing**

Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have "rights"? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet's health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory's traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

**Requirements/Evaluation:** formal and informal writing assignments and class participation

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** first-years and sophomores

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**ENVI 238 (F) Sustainable Economic Growth**

**Cross-listings:** ECON 238 ENVI 238

**Secondary Cross-listing**

Is it possible to have infinite economic growth on a finite planet? This question has sparked a great deal of inquiry across the social sciences. Some argue that we need to slow or even end economic growth to prevent environmental catastrophe. Others argue that market forces, especially changing prices and improved technology, will ensure that growth can continue unabated without significant negative consequences. Still others argue that government intervention is necessary to limit negative consequences of economic progress, but that effective interventions are still compatible with sustained economic growth. In this class, we will explore the insights that economics has to offer on this important question. We will start by considering the importance of finite inputs used in production, including fossil fuels, minerals, and land, among others. Then, we will consider whether
undesirable byproducts of economic growth will prevent sustained growth. This second part of class will place a lot of emphasis on climate change. Throughout the class, we will pay special attention to the role that government intervention can or cannot play in promoting sustainable economic growth. This class will reinforce important concepts taught in introductory microeconomics and introductory macroeconomics.

**Class Format:** The first half of the class is lecture-based. The second half of the class is discussion-based.

**Requirements/Evaluation:** midterms exams, final exam, problem sets, short writing assignments, video-taped presentations, class participation

**Prerequisites:** ECON 110 and ECON 120

**Enrollment Limit:** 25

**Enrollment Preferences:** potential or declared social science majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

ENVI 243  (F)  Reimagining Rivers  (WS)

**Cross-listings:** ENVI 243 ANTH 243

**Primary Cross-listing**

In the era of climate change and widening inequality, how we live with rivers will help define who we are. Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including increased flooding, drought, pollution, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and ecological resilience far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Drawing on scholarship from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, and more.

**Class Format:** This class will be taught in a modified tutorial format, with five groups of three students, each of which will meet for one 75-minute session per week.

**Requirements/Evaluation:** Each week, each student will either write a 5-page essay on assigned readings or write a 2-page critique of a partner's paper.

**Prerequisites:** Environmental Studies 101

**Enrollment Limit:** 10

**Enrollment Preferences:** Environmental Studies majors and concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 243(D2) ANTH 243(D2)

**Writing Skills Notes:** Students take turns writing 5-page essays and 2-page responses to those essays, with each writing 6 in total. For each five-page paper, I meet with the student to discuss technical aspects of the paper and specific ways in which it could be improved. At the end of the semester, students have the option of handing in one revised paper as part of a portfolio of papers from throughout the semester. This enables me to have an ongoing, in-depth discussion with each student about their writing skills.

**Attributes:** ENVI Humanities, Arts + Social Science Electives

Not offered current academic year
ENVI 244 (S) Environmental Ethics (WS)  
Cross-listings: PHIL 244 ENVI 244  

Primary Cross-listing

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Most sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Requirements/Evaluation: five essays (5-7 pages each) and five prepared oral responses to partners' essays; evaluation will be based on essays, oral responses, and quality of discussion

Prerequisites: ENVI 101 or one course in PHIL

Enrollment Limit: 10

Enrollment Preferences: declared and prospective Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: meets Value Theory requirement only if registration is under PHIL

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
PHIL 244(D2) ENVI 244(D2)

Writing Skills Notes: Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

Cross-listings: AMST 245 ENVI 246 HIST 265  

Primary Cross-listing

Have you ever wondered why Spam is so popular in Hawaii and why Thai food is available all across the United States? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging into the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of obesity discourse. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, health, and gender.

Requirements/Evaluation: two to three papers on assigned topics (4-6 pages); one longer final paper (8-10 pages); participation in discussion and online activities

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; American Studies majors; Public Health concentrators; history majors

Expected Class Size: 19
This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 247 (F) Race, Land and Settler (Racial) Capitalism: Ongoing Topics in (Dis/(Re)possession

**Cross-listings:** AMST 234 AFR 234 ENVI 247 HIST 274

**Secondary Cross-listing**
This sequential studio course serves as an introduction to ongoing topics in colonialism, racial thinking, African Diaspora studies, Global, Caribbean, and local studies. We will examine how race, gender and class operate under racial capitalism and settler colonialism. The readings in this class will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, Indigenous theorists, among other critical, anti-capitalist or decolonial scholars. Reading in this course will take up the question(s) of land and land-making; race, racialization, and racial thinking; alongside questions of space and place as they all relate to the various processes, projects and methods of (dis)/repossession. This course is the first part of a complementary course, which will be offered in the Spring, titled, "Race, Land, Space and (Dis)/(Re)possession: Critical Topics in Environmental Injustice and Subaltern Geographies," which tracks both the "historical breaks" and ongoing processes of (dis)/(re)possession to more contemporary materializations. Weekly in-class discussion will be combined with guest lectures in order to provide the opportunity for exploring how race, space and (dis)/repossession can be understood geographically, and to also explain how a range of these territorializing processes operate in the transnational and local contexts. Those who take this studio course can expect to be actively engaged in directing their learning experience through research/final creative projects of their own selection. Sound, music and other audio engagements will also complement discussions in this course. Therefore, the capacity of deep listening, in and out of class, is mandatory. Sample topics covered in the course include the following: indigeneity and Blackness; dispossession and accumulation; environmental imperialism, war and colonial resistance. You are strongly encouraged to participate in both courses in this complementary sequence, but are not required to do so.

**Requirements/Evaluation:** The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%

ENVI 249 (S) Food, Agriculture, and Globalization

This course examines the history and current politics of the international political economy of food with a focus on how agriculture and food provisioning have been transformed through imperialism and globalization. We examine the interactions of corporations, nation-states, multilateral
international organizations, non-governmental organizations, and social movements in the formation of a globalized food system. Topics include the historical antecedents of our present system, plantation agriculture, the influences of war and settler colonialism on global food production, Cold War transformations in the international food system, the origins of sustainable development discourse, international anti-hunger programs, fair trade and other labeling schemes, labor migration, the antiglobalization and local food movements, and neoliberalism. We will pay particular attention to theories about how producers and consumers are connected to one other through the political economy of food. The reading assignments are drawn from the fields of environmental, food, and policy history, and we will also read works from political scientists, international relations scholars, geographers, anthropologists, and advocacy organizations.

Requirements/Evaluation: 2 short concept papers (3-4 pages); 1 research paper (10 pages); several short policy exercises

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENVI 250  (F)  Environmental Justice  (DPE)

Cross-listings: STS 250  ENVI 250

Primary Cross-listing

How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Requirements/Evaluation: several short essays, final essay

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: juniors, seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 250(D2)  ENVI 250(D2)

Difference, Power, and Equity Notes: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. This is a service-based learning course, and students will hone skills to address environmental injustices.

ENVI 251  Science and Militarism in the Modern World  (WS)

In 1961, United States President Dwight D. Eisenhower warned of the global dangers of what he called the "military-industrial complex." In this course, we will interrogate the military-scientific complex, or the imbrication of militarism and scientific knowledge. This tutorial takes up a number of environmental themes, including the role of environmental science within military campaigns, conservation and environmental racism, nuclear waste and ecological contamination. Surveying conflicts from World War II through the present-day War on Terror, this course will investigate how
environmental scientists, politicians, soldiers, activists, and artists have grappled with the intertwined legacies of science and militarism. Students will engage a range of textual materials including books, films, photographs, and news reports.

**Requirements/Evaluation:** Course requirements include bi-weekly response papers (5-7 pages) and tutorial discussions.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** ENVI and STS majors and concentrators

**Expected Class Size:** 10

**Grading:**

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Over the course of the semester, students will write 5 papers (5-7 pages each). They will receive bi-weekly detailed feedback on their writing from the professor and their tutorial partner. This feedback will include advice on strengthening their argumentation and use of textual evidence, as well as grammar and usage suggestions/corrections. Students will be graded on the portfolio of papers, with specific attention to how they have incorporated feedback in each subsequent paper.

**ENVI 253 (S) Race, Land, Dis/Re-possession: Critical Topics in Environmental Injustice and Subaltern Geographies**

**Cross-listings:** AFR 235 ENVI 253 HIST 275 AMST 235 GBST 235

**Secondary Cross-listing**

This course is an introduction to ongoing and contemporary topics in colonialism, racial thinking, African Diaspora and Global and Caribbean studies, studies of "the environment," and dispossession. We will examine how race, gender and class operate under racial capitalism and settler colonialism as ongoing, sometimes continuous and discontinuous processes. The readings will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, and other critical, anti-capitalist or decolonial scholars. Readings, as in AFR 234, will take up the question(s) of land and land-making; race, racialization, and racial thinking; of space and place as they all relate to the various processes, projects and methods of (dis)/re)possession, both "past" and "contemporary." We will interrogate temporal binaries, settler time, notions of [the] "progress(ives)" and other bifurcated understandings of the world. This course is the second part of a complementary course, titled, "Race, Land and Settler (Racial) Capitalism," which focuses on the historical geography of processes of (dis)re)possession from a Black and Indigenous Atlantic perspective. In this iteration, weekly in-class discussion will be combined with guest lectures to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to explain how a range of these territorializing processes operate. Sound, music and other audio will complement discussions. Therefore, the capacity of deep listening, in-and-out of class, is a grounding. Sample topics covered in the course include: indigeneity and Blackness; (dis)possession and accumulation; plantation geographies and economies; housing and houselessness; the problem of parks and conservation; prisons and carceral geographies; Black geographies; environmental racism and colonial resistance. You are strongly encouraged to participate in both courses in this sequence, but are not required to do so.

**Requirements/Evaluation:** The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). ENVI 254 (S) Food, Forests, & Fungi: Environmental Health in the Anthropocene (DPE) (WS)

Cross-listings: ENVI 254 ANTH 254 STS 254

Secondary Cross-listing

This tutorial will examine the impacts of the climate crisis on human, environmental, and planetary health via the lens of food systems & plant medicines in the Anthropocene. We use anthropological, environmental, evolutionary, & ecological approaches to explore the ecosystems connecting humans, plants, animals, and fungi that have been massively disrupted by systems of industrial agriculture, industrial forestry, corporate food systems, and corporate biomedicine. We will dwell on the growing signs of our climate catastrophe including the sharp rise of global temperatures, floods, hurricanes, alongside declining freshwater reserves, melting cryosphere, and falling crop yields, that are helping produce a growing wave of hunger and climate refugees in every world region. Along the way, we will hear from and read about youthful climate activists from Extinction Rebellion, Ende Gelände, Fridays for the Future, 350.org, and the Sunrise Movement who are designing and implementing innovative, local, and sustainable solutions to inaction, apathy, and inertia even as situations of internal migration or displacement, food scarcity, food sovereignty, water shortages, and other climate-related disruptions are increasing in both developing and developed parts of our globe. We learn how activist narratives intersect with wider movements to promote more local and circular economies of regenerative agriculture and forestry, ethically produced and sourced organic food, wild & cultivated botanicals, and complementary medicines that are healing both humans and the planet.

Requirements/Evaluation: Weekly attendance, reading 200-300 pages/week, weekly lead essays or oral responses to texts, showing up in mind & body each week.

Prerequisites: none, but a class in ENVI or ANTH preferred

Enrollment Limit: 10

Enrollment Preferences: ANTH, ENVI, STS majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 254(D2) ANTH 254(D2) STS 254(D2)

Writing Skills Notes: Students will write essays: either a lead essay of 1400 words, or written & oral feedback on the lead essay plus an oral response to text. Students receive intensive weekly feedback on their essays and a mid semester writing chat with instructor to negotiate and understand strengths and weaknesses of their writing.

Difference, Power, and Equity Notes: We will examine the ways that food systems reproduce social and structural inequalities within public health, environmental health, climate health. We also examined the interconnected nature of the health of our planet, food systems, forests, and fungal networks and how climate activism and action can fight unequal access to food, forests, nature, and health.

TUT Section: T1 TBA Kim Gutschow

ENVI 255 (F) Environmental Observation

Cross-listings: ENVI 255 GEOS 255

Secondary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and
Climate group for the Geosciences major.

**Requirements/Evaluation:** Weekly labs, four quizzes, and a final project

**Prerequisites:** at least one prior course in GEOS or ENVI

**Enrollment Limit:** 20

**Enrollment Preferences:** sophomores, then GEOS majors

**Expected Class Size:** 10

**Cross-listings:** ENVI 257 AMST 247 LATS 230

**Secondary Cross-listing**

Long associated with cities in the scholarly and popular imagination, immigrants have increasingly settled in U.S. suburbs. Through the lens of new destinations for im/migrants, this course introduces spatial methods, perspectives, and concepts to understand cities, suburbs, and rural places and the relationships between these various spaces. We ask how geographically specific forces and actors shape these trends, as well as the spatially uneven outcomes of complex processes like globalization. This interdisciplinary course highlights racial, legal, economic, political, environmental, social, and cultural dimensions of how transnational migrants become part of and create homes in new places. Through a range of textual materials (academic, technical, popular, visual), we explore why people migrate, the origin of the "illegal alien" figure, economic restructuring and local immigration policies, environmental justice, place-making and community development. Rooted in critical race geographies, case studies are often
comparative across different racial and ethnic groups in the U.S. West, South, Midwest, and Northeast. We analyze how documentation status and perceptions of illegality affect the lived experiences of Latines. This course will be mostly discussion-based, with grading based on participation, short writing exercises, three assignments, a midterm examination, and a final exam.

Class Format: This is also a discussion course. While I will spend some time at the beginning of the class lecturing, most of the time will be spent in class discussions.

Requirements/Evaluation: Class participation, weekly in-class writing, three 3-6 page essays, a midterm, and a final examination. All writing materials and exams are based on coursework.

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: LATS concentrators or those intending to become LATS concentrators

Expected Class Size: 20

Cross-listings: ARTS 261 ENVI 260

Primary Cross-listing

This seminar/digital art studio offers key literature to examine the relationship between design and environmental justice. It will help build a vocabulary to study the environment as disputed terrain between technological fixes and issues of race, ethnicity, gender, sexuality, class, and colonial status. Students will develop textual/graphic projects about a chosen case study aiming to reorient public perception and imagination around environmental justice. Case studies include contemporary issues like "natural" disasters, eco-cities, and urbanization in the Global South and North. Skills taught include design-thinking and collaborative design, digital art (Photoshop), and participation in collective reviews and public presentations. The class culminates in a presentation to external reviewers and a final exhibition.

Class Format: Because this seminar is cross-listed with ARTS, there is a studio component (short assignments and final project).

Requirements/Evaluation: Active presence in class discussions and presentations, quality of work, depth and quality of the investigative process, willingness to experiment, and contributions to a collaborative learning environment. This intensive seminar/digital art studio requires working in the architecture studio and/or PC lab outside of scheduled class hours.

Prerequisites: Drawing I, ENVI 101, or permission from the instructor.

Enrollment Limit: 15

Enrollment Preferences: Envi majors and concentrators, Studio Art majors, Art History and Studio Art majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $300-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 261(D1) ENVI 260(D2)
Difference, Power, and Equity Notes: This seminar/digital art studio examines the interrelationship between design and environmental justice from an intersectional perspective. It encourages students to develop a critical understanding of the role that technical rationality, devoid of ethics and respect for difference, plays in producing racist, heteropatriarchal, and ecocidal forms of oppression. In parallel, we will explore place-based practices that counter neoliberal and extractivist approaches to the (built) environment.

ENVI 261 (F) Science and Militarism in the Modern World (WS)

Cross-listings: STS 261 ENVI 261

Primary Cross-listing

In 1961, United States President Dwight D. Eisenhower warned about the global dangers of what he called the "military-industrial complex." In this course, we will interrogate the military-scientific complex, or the imbrication of militarism and scientific knowledge. Surveying conflicts from World War II through to the present-day War on Terror, this course will consider how empire, networks of expert knowledge, resource extraction, environmental contamination, and land degradation have shaped the modern world. Students will engage a range of textual materials including books, films, photographs, and news reports. Course requirements include weekly writing assignments and participation in small group discussions.

Class Format: This course adopts a tutorial model. Students will be divided into 5 groups of 2. Each week the groups will meet with me. Each pair will include one "presenter," who shares a 5-7 page paper responding to the week's theme, and one "respondent," who will offer a 2-3 page response to the presenter's paper. The roles of presenter and respondent will alternate each week. Each student will produce 5 papers as "presenter" and 5 papers as "respondent."

Requirements/Evaluation: Each student will produce five (5-7 page) papers as "presenter" and five (2-3 page) papers as "respondent." Grades will be issued based on the portfolio of papers and active participation in discussions.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: ENVI and STS majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 261(D2) ENVI 261(D2)

Writing Skills Notes: This is a writing intensive tutorial. Students will complete weekly written assignments and receive in-depth feedback to improve their writing. Over the course of the semester, students will write 10 papers ranging from 2-7 pages.

ENVI 263 (S) The Global Ocean: An Interdisciplinary Introduction

Cross-listings: MAST 263 ENVI 263

Secondary Cross-listing

Though it covers most of the planet, the ocean’s importance to everyday life is easy to overlook. Its roles as a cultural symbol, resource, highway, and climate regulator make it essential to life around the world. This interdisciplinary course, team-taught by the faculty of the Williams-Mystic Program, will examine key issues in each of the world's oceans while introducing students to the ways these issues connect multiple disciplines and transcend physical, political, and imaginary ocean boundaries. By drawing on the expertise of the five professors -- from humanities, social sciences, and sciences -- this course facilitates the critical study of the ocean from an interdisciplinary perspective and helps them consider their own role in the
shifting relationship between humanity and the ocean. This seminar-style course will meet twice a week online, with students assessed by their participation, response papers, and final project, while helping them apply interdisciplinary skills to pressing sustainability issues connecting the environment and society.

Requirements/Evaluation: Five 2-page papers, participation, and a 6-8 page final paper
Prerequisites: none, open to all students
Enrollment Limit: 20
Enrollment Preferences: 1. first years, 2. sophomores, 3. MAST concentrators
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option

ENVI 265  (F)  Coral Reefs: Ecology, Threats, & Conservation
Cross-listings: MAST 265 BIOL 165 ENVI 265
Secondary Cross-listing
Coral reefs are a fascinating ecosystem found throughout the world's tropical oceans. Corals can thrive in nutrient-poor oceans because of the mutualistic relationship with algal symbionts. And as a foundational species, corals provide a habitat for numerous species, possibly the highest diversity found on the planet. However, these complex and beautiful ecosystems are declining worldwide from a variety of local and global threats. In this course, we will explore coral reef ecology through an in-depth examination of the biotic and abiotic factors contributing to the ecosystem's functioning. We will also investigate the causes and consequences of threats to coral reefs, such as ocean warming, ocean acidification, and resource extraction. Finally, we will identify the many efforts worldwide to conserve coral reefs and promote their resilience. In this seminar course, you will demonstrate your proficiency through knowledge assessments, short writing reflections, a virtual coral fragmentation experiment, and a creative advocacy project. This course aims to deepen your awareness of the complex species interactions on coral reefs and the physical factors affecting coral survival while fostering hope through current conservation efforts.

Requirements/Evaluation: Four 1-paragraph discussion board post, One 20-question knowledge assessment (quiz), Three 2-page writing reflections, One lab results and discussion write-up 2-3 pages figures included, and a creative (medium is student choice) advocacy project.
Prerequisites: none, open to all students
Enrollment Limit: 20
Enrollment Preferences: 1. First-Year, 2. Sophomores
Expected Class Size: 16
Grading: yes pass/fail option, yes fifth course option
Unit Notes: Does not count for Biology major credit.
Distributions: (D3)

ENVI 266  (S)  Reading Water  (WS)
Cross-listings: MAST 266 ENVI 266
Secondary Cross-listing
Water has such profound and far-reaching influence on individuals, societies, and the planet that it simultaneously risks going overlooked and appearing clichéd. Human beings are made of it and need it to live, yet will die if immersed in it. It is venerated by cultures around the world, yet most
people either cannot access clean water, or don't know where their clean water is piped in from. It covers the earth's surface, and has shaped it over eons, yet scientists are still not sure how it came to be here in the first place. This wide-ranging influence also presents challenges for traditional academic structures; thinking about water demands crossing times, spaces, and disciplines. This course will explore the wide-ranging and diverse ways water impacts individuals, cultures, and the environments they call home by drawing on a range of content: hydrology, literature, political theory, storytelling, geography, and more. To do this, we will also develop and examine methods of critically reading as "non-experts"--reading scientific articles as rhetorical objects and reading for scientific principles in literature, for instance--to explore what interdisciplinary thinking opens up (and inhibits), and thus how to effectively engage with and create interdisciplinary work. The goal here is not to define water's cultural or scientific importance, or to determine which disciplines "best" combine to explain water, or to come up with humanities-based solutions to "the water crisis."

Rather, these texts, and the water that flows through them will help us explore the opportunities and limits of human perceptions of the other-than-human world. It will help us consider the extent to which those perceptions both shape, and are shaped by, a seemingly simple molecule. And it will help us imagine epistemologies and ontologies that account for the ways water simultaneously flows through us, around us, and through the deep geological history of the planet. Course Texts: Tristan Gooley -- *How to Read Water* (selections) Vandana Shiva -- *Water Wars* (selections) Luna Leopold -- *Water, Rivers, and Creeks* (selections) Richard White -- *The Organic Machine* Linda Hogan -- *Solar Storms* Marc Reisner -- *Cadillac Desert* Jesmyn Ward -- *Salvage the Bones* John McPhee -- "Atchafalaya" Emmi Itäranta -- *Memory of Water* Brenda Hillman -- "The Hydrology of California"

**Class Format:** The class will be primarily discussion-based, and will ask students to lead and structure discussions. Students will have questions, reflections, and insights prepared before class, and use those to drive our in-class activities.

**Requirements/Evaluation:** 100pg of reading a week, give or take. Approx 20-25 pages of written work throughout the semester.

**Prerequisites:** None

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference to majors, and then to sophomores and juniors, respectively.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 266(D1) ENVI 266(D1)

**Writing Skills Notes:** Students will write four papers of increasing complexity that will require workshopping and drafts. Each of these papers will receive forward-looking writing feedback from me. The first paper centers on paragraph-level stylistic choices, the second on argument/evidence connections, the third on genre, and the final paper synthesizes these writing skills. In addition, students' final grades will allow for revision of earlier papers to encourage and assess growth of writing skills.

Not offered current academic year

**ENVI 268  (S)  Debating Ocean Biodiversity at the Intersection of Science and Policy**

**Cross-listings:** ENVI 268 MAST 268

**Secondary Cross-listing**

Biodiversity in the ocean is facing an onslaught of challenges, both directly and indirectly. It is likely that we are undergoing a sixth mass extinction event, where diversity of life on earth is stunningly at risk. Fortunately, however, we are also finding innovative ways to solve issues and attempt to stave off these dramatic changes to our ecosystems. These solutions potentially have both positive and negative effects. Difficult tradeoffs must be weighed and decisions must be made as people wrestle with known knowns, known unknowns, and unknown unknowns. In this class, we will explore five issues that relate to biodiversity in the ocean. You will have the opportunity to investigate one side of an issue, to collect supporting information, and to advocate for your position all while learning about current biodiversity issues in the ocean. You will be challenged to weigh conflicting evidence to find a positive outcome. Throughout the class you will practice critical thinking, evaluation, and synthesizing skills as you work with multiple viewpoints. Class time will include lecture, in-class group work, and student-led debates of timely, controversial issues. You will be assessed on summaries of information, reflections on topics, and a final project on an issue of your choice relating to ocean biodiversity.

**Requirements/Evaluation:** Five 2-page papers, participation, and a 6-8 page final paper

**Prerequisites:** none, open to all students

**Enrollment Limit:** 20

**Enrollment Preferences:** 1. first years, 2. sophomores, 3. MAST concentrators
This course interrogates the deep inequities, injustices (racial, gendered, ethnic, and class-based), and power relations that constitute all of humanity's relation with earth's environment, ecosystem, and ecology. Students will not only study artists and collectives engaged with the work of environmental justice, accountability, and action, they will also make such art themselves.

**Attributes:** ENVI Humanities, Arts + Social Science Electives

Not offered current academic year
uncertainty. And we will learn about how communities facing environmental racism and injustice collect data and use it in their advocacy. Along the way, we will challenge the idea of a unified "scientific method," and we will think about how Western scientific knowledge relates to other ways of knowing, including non-Western sciences, embodied knowledge, and traditional knowledge. Topics include: international climate negotiation, chemical exposure, the regulation of biotechnology, agricultural policy, pandemic responses, and plastics and electronics waste.

Requirements/Evaluation: several short essays, final essay
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: juniors, seniors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 275(D2) STS 275(D2)

Difference, Power, and Equity Notes: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. Using case studies we will analyze how communities facing environmental racism interact with scientists and sciences.

ENVI 280 Carbon dioxide uptake and our climate future (WS)
Because of the failure to substantially reduce global greenhouse gas emissions, it is now clear that removal of carbon dioxide already emitted to the atmosphere is necessary to meet the 1.5 degree Celsius maximum warming target to avoid severe and irreversible consequences from continued greenhouse gas emissions. Natural carbon sinks have already taken up two thirds of the excess carbon dioxide from the atmosphere, and these terrestrial and marine systems are being investigated to determine if this uptake can be enhanced by geoengineering: human intervention to offset the impacts of climate change. In addition, technologies are being developed to capture carbon dioxide directly from the atmosphere, though none are yet operating at a large enough scale and low enough cost. In this tutorial, students will study the terrestrial, near-coastal, and deep-ocean carbon cycles, and analyze both the capacity for future natural uptake, the potential augmented uptake that could be achieved by deliberate manipulation of these systems, and the impacts of these carbon cycle perturbations on ecosystems and humans. Students will evaluate the scientific basis behind real startup ventures and carbon credit schemes that capitalize on the exploding interest and investment in carbon uptake technologies. And they will write a research proposal for investigating and/or testing a scientifically compelling carbon uptake strategy. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: evaluation will be based on the critical analysis of readings through discussion, writing and revision
Prerequisites: one GEOS course or ENVI 102
Enrollment Limit: 10
Enrollment Preferences: students with a strong interest in Geosciences, Geosciences majors, Environmental Studies majors and concentrators
Expected Class Size: 10
Grading:
Distributions: (D3) (WS)
Writing Skills Notes: Each student will write five 5-page papers and five 1-page response papers; students will give and receive feedback through peer review and tutorial meeting discussion and will develop their writing and critical analysis skills through revision.

ENVI 288 (S) Environmental Security: Policy Dilemmas and Solutions
Cross-listings: ENVI 288 GBST 288
Primary Cross-listing

Water wars. Climate refugees. Scarcity-induced conflict. These and other challenges shape collective discourses about the climate change present and future. This course explores the relationship between environmental and security issues. It surveys the emergence of environmental security as a field of study and a policy arena. Students will engage a range of materials, including policy documents from the United Nations, international non-governmental organizations, global think tanks, the United States Department of Defense, and other security agencies. Students will also explore critical scholarship on the possibilities and limitations of environmental security as a leading policy paradigm.

Requirements/Evaluation: Class discussions; Two short response papers (2-5 pages each); Semester-long group policy project, including a mid-term policy report (4-6 pages) and a final group presentation as part of a mini conference put on by the class.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: environmental studies majors and concentrators; global studies concentrators

Expected Class Size: 19

ENVI 291 (S) Religion and Ecology in America (WS)

Cross-listings: REL 291 ENVI 291 SOC 291

Primary Cross-listing

This course examines the relationship between religious and environmental thought in America. Exploring a broad range of practices, symbols, and beliefs, we will examine the religious roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have writers, thinkers, and artists from different religious and cultural backgrounds shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? How have they influenced each other to produce distinctively American forms of eco-spirituality? In pursuit of these questions, we will consider a diverse array of topics and cases, including struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoorsmanship, Catholic climate activism, Jewish eco-mysticism, atheist biology, Buddhist therapy, and more.

Requirements/Evaluation: Each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner’s paper.

Prerequisites: ENVI 101 or instructor permission

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 291(D2) ENVI 291(D2) SOC 291(D2)

Writing Skills Notes: Each student will write five five-page papers and five two-page papers in this class. They will be given extensive weekly feedback on their writing in the form of one-on-one meetings and written comments, and they will be given multiple opportunities for revision. Emphasis will be placed on the mechanics of argumentation, logic and rhetoric, and the development of a distinctive voice.

Attributes: AMST Space and Place Electives ENVI Humanities, Arts + Social Science Electives
ENVI 297  (F) Global Sustainable Development  (DPE)

Cross-listings: GBST 287 ENVI 297

Primary Cross-listing

In 2015, the United Nations launched the Sustainable Development Goals, an ambitious multi-pronged effort to eliminate poverty, improve health outcomes, advance clean energy, address the effects of climate change, and support more equitable forms of life on earth. This course explores the historical antecedents and contemporary manifestations of global sustainable development, a constellation of ideas and a set of policy imperatives. This course will ask: what is sustainability and how did it emerge as a key paradigm in the present? Relatedly, how have different organizations and actors worked to address entrenched global challenges? Students will engage a range of materials, including policy documents from the United Nations, World Bank, and international non-governmental organizations. Students will also explore critical scholarship on the possibilities and limitations of global development. Together we will grapple with ways to build more sustainable futures.

Requirements/Evaluation:  Class discussions; 2 Policy Analysis Papers (4-6 pages each); Class presentations; Final Take-Home exam (8-10 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Envi majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions:  (D2)  (DPE)

Difference, Power, and Equity Notes: This class considers topics of global inequality, including the impacts of colonialism, uneven development, extractive capitalism, gender-based discrimination/violence, and racial/ethnic environmental disparities. Students are invited to reconsider stereotypes about the "developing world" through a deep engagement with history and policy-making.

Attributes: ENVI Environmental Policy  EVST Social Science/Policy

Not offered current academic year

ENVI 298  (F) Cultural Geography

Why do things happen where they do? What is the relationship between place and identity? How do history and politics shape the way people conceptualize space? What can landscapes tell us about the values, beliefs, and ideas of the people who inhabit them? Questions like these drive the vibrant field of cultural geography. Cultural geographers study how humans shape, experience, and imagine the material world. They explore the relationship between humans and their environment at scales ranging from the global to the local, and they ask how we may better understand ourselves and others by examining the places and landscapes we create. Drawing on case studies from around the world and exploring our local area, this class will survey the major theoretical, methodological, and empirical themes that have preoccupied modern geographers. Along the way, students will acquire some useful tools for making a world that is more beautiful, sustainable, and just.

Requirements/Evaluation: Three 5-7-pages essays and several shorter writing assignments.

Prerequisites: Environmental Studies 101

Enrollment Limit: 19

ENVI 300 (S) "'Rebel Ecologies': Black and Indigenous Struggles for Land and Life"

Cross-listings: AFR 300 WGSS 362 ENVI 300 AMST 362

Secondary Cross-listing

This course will ask, what other socioecological models exist? We will weave together a study of differing, yet often converging or synergistic traditions of Black/Womanist eco-feminism that often confronts the social constructions of race, gender, class and sexuality, dominant religion as a means of social control, imperialism, capitalism, and colonialism; Ecosocialism which often frames ecology in terms of a mode of production beyond or outside of capitalism; and Indigenous perspectives on resistance to capitalist extraction, imperialism, and colonialism. Given ongoing struggles against the extraction of land and labor, the urgent calls raised in the present-day "climate strike," the COVID-19 Pandemic, Black-led pandemic rebellions, along with long(er) histories of land-based peoples around the planet opposing racial capitalism, settler colonialism, and imperialism, this class will explore not only what those in opposition to both extractivism and expropriation resist, but also what we want. We will critique binaries, settler notions of time and explore theories of change. Additionally, this class will look to an array of literature, film, sound, and other forms of cultural production in order to not just "locate," but describe and reveal rebel ecological visions emerging "from below." Ultimately this class will consider how the above ecological praxis can work simultaneously and within a sense of plurality, examining what we can learn from the work of activists, intellectuals, and defenders on the frontline. This course is an extension of Dr. Guess' concept of a "rebel ecology."

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader at least twice 20%; Weekly 500-word Literature Review 20%; One Final Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More projects might include, an annotated bibliography of 7 texts, film analysis, syllabus, book review, a written play, an op-ed, etc. We will discuss further possibilities in class.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: If the course is overenrolled, preference will be given to Africana studies concentrators.

Expected Class Size: 7

Grading: no pass/fail option, no fifth course option

ENVI 303 (S) Cultures of Climate Change

Cross-listings: ENVI 303 SOC 303

Primary Cross-listing

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about what climate change means? How does something as complex as climate change become a "problem" in the first place? And what can its many proposed "solutions" tell us about the role of culture in environmental policy, politics, and decision-making. This course will explore a broad array of factors, from religion to race, class to colonialism. Emphasizing ethnographic and historical accounts of climate change as lived experience, it will apply a range of theories from the social sciences and humanities to case studies from around the world.

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators first; Anthropology and Sociology majors second

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

ENVI 304 (S) Sacred Custodians: Environmental Conservation in Africa (DPE)

Cross-listings: GBST 304 HIST 304 ENVI 304 AFR 335

Secondary Cross-listing

In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of deforestation. Ken Saro-Wiwa was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental crisis that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction, game parks, desertification, wildlife and hunting, traditional practices, and climate change.

Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and one exam.

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: If course is over-enrolled, preference to History Majors and students with a demonstrated interest in African studies.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 304(D2) HIST 304(D2) ENVI 304(D2) AFR 335(D2)

Difference, Power, and Equity Notes: This course will intensively explore the question of how various global and local actors have defined environmental degradation and promoted approaches to conservation in Africa. It guides students through an examination of the different power dynamics that have shaped environmental conservation thought and practices on the continent. This course, therefore, provides a critical lens through which to examine the inequalities rooted in race, gender, and other forms of difference

ENVI 307 (F) Environmental Law

Cross-listings: ENVI 307 PSCI 317

Primary Cross-listing

We rely on environmental laws to make human communities healthier and protect the natural world, while allowing for sustainable economic growth. Yet, despite 40 years of increasingly varied and complex legislation, balancing human needs and environmental quality has never been harder than it is today. Environmental Studies 307 analyzes the transformation of environmental law from fringe enterprise to fundamental feature of modern political, economic and social life. ENVI 307 also addresses the role of community activism in environmental law, from local battles over proposed industrial facilities to national campaigns for improved corporate citizenship. By the completion of the semester, students will understand both the successes and failures of modern environmental law and how these laws are being reinvented, through innovations like pollution credit trading and “green product” certification, to confront globalization, climate change and other emerging threats.

Requirements/Evaluation: Several short writing assignments, active participation in class and a final examination

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Preference to Environmental Studies majors and concentrators and sophomores and above.
Expected Class Size: 19

ENVI 310 (F) Design for the Pluriverse: Architecture, Urban Design, and Difference (DPE)

Cross-listings: ENVI 310 ARTS 314

Secondary Cross-listing
The built environment has a critical role in shaping how people enact, reproduce, and refashion social relations over time. Spatial forms, such as architecture and urbanism, are enmeshed in relationships, contestations, and change processes. This studio tutorial investigates the role of different environments in supporting or preventing specific spatial practices and ensuring spatial justice. Using approaches from activist design, students will work in pairs to re-imagine spaces where different ways of being in the world can thrive and coexist—the pluriverse. Students will use a media they master to investigate a theme connecting design, the built environment (architecture and urbanism), and spatial justice.

Requirements/Evaluation: This is an intensive studio tutorial requiring working outside of scheduled class hours. In this course, students can work with the following media assuming that they can master them for a 300-level course: architecture models (physical and digital), photo reportages, 2D collages (e.g., Photoshop), creative writing (image-text booklets), digital humanities (cartographies, countermapping, oral histories, digital archives), and curatorial platforms. Students will participate in tutorials plus a final project of significant scope. Evaluation will be based primarily on the quality of the final project but also on participation.

Prerequisites: 200-level course on students' medium of choice (for the final project) or permission of instructor.
Enrollment Limit: 10

Enrollment Preferences: Studio Art majors, Art History and Studio Art majors, Envi majors and concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $350-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 310(D1) ARTS 314(D1)

Difference, Power, and Equity Notes: "Pluriverse" refers to various ways of being in the world. This tutorial will employ theories and approaches from design activism and critical environmental studies to analyze the relationship between space and difference, including, but not limited to, race, class, ethnicity, gender, sexuality, religion, and species. Students will apply these theories and approaches to creating place-based projects.

ENVI 311 (S) Environmental Literature and Film in Latin America (DPE) (WS)

Cross-listings: RLSP 304 ENVI 311 COMP 311

Secondary Cross-listing
What use are aesthetics when the world is (literally) on fire? We will take up this question and others in a critical engagement with Latin American
cultural production of the twentieth and twenty-first centuries, especially works of literature and film that directly or indirectly engage with environmental crisis. Students can expect to explore a variety of media, forms and genres, including works that range from (more or less) mainstream to cutting edge. Our examinations of literature and film will be supported by theoretical writings produced in the Americas and other places. Writers and directors whose work may be considered include, but are not limited to: Lucrecia Martel, Ciro Guerra, Rafael Barrett, Samanta Schweblin, Ernesto Cardenal, Juan Rufó, María Luisa Bombal, Eduardo Gudynas, Silvia Rivera Cusicanqui, Eduardo Viveiros de Castro, Isabelle Stengers.

**Requirements/Evaluation:** This course will be conducted seminar-style. Students will be expected to prepare thoroughly and be active, engaged participants in class discussions. In addition to day to day preparation and participation, other graded assignments will include discussion-leading, one short (5-7 page) essay and a longer (15-20 page) paper combining research and original analysis.

**Prerequisites:** One college literature of film course at the 200-level or above.

**Enrollment Limit:** 19

**Enrollment Preferences:** Envi majors and concentrators, Comp Lit majors, Spanish majors and those working towards the Spanish certificate.

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

RLSP 304(D1) ENVI 311(D1) COMP 311(D1)

**Writing Skills Notes:** All students in the course will write (and rewrite) no less than 20 pages. Major writing assignments will be scaffolded, with explicit discussion of the writing process (pre-writing, drafting, revision) and consultation.

**Difference, Power, and Equity Notes:** The works of literature and film that we will be examining challenge North American conceptions of climate change (and environmental crisis more broadly) by making visible (often uncomfortably so) the colonial and neocolonial history of extractivism.

**Attributes:** ENVI Humanities, Arts + Social Science Electives

Spring 2024

ENVI 318  (S) Myths and the Making of Latine California  (WS)

Cross-listings: REL 318 COMP 328 AMST 318 LATS 318 ENVI 318

Secondary Cross-listing

California is home not only to the largest ethnic Mexican population in the USA but also to the largest Central American population, while also being home to long-standing Latine communities hailing from Chile to Cuba. Since the era of Spanish colonization, especially starting in 1769, California has been woven into fantastic imaginations among many peoples in the Americas. Whether imagined as Paradise or Hell, as environmental disaster or agricultural wonderland, as a land of all nations or a land of multiracial enmity, many myths have been inscribed onto and pursued within the space we call California. In a state whose name comes from an early modern Spanish novel, how did certain narratives of California come to be, who has imagined California in certain ways, and why? What impact have these myths had on different Latine populations in the history of California, and how have different Latines shaped, contested, and remade these myths as well as the California landscape that they share with other peoples? In this course, we consider "myth" as a category of socially powerful narratives and not just a simple term that refers to an "untrue story." We examine myths by focusing on a few specific moments of interaction between the Latine peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest are select creation stories (found in Jewish, Christian, and Indigenous traditions), imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as part of Greater México, California as "sprawling, multicultural dystopia," and California as "west of the west," including its imagination as a technological and spiritual "frontier."

Requirements/Evaluation: this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Latina/o Studies concentrators, Religion majors, American Studies majors, Environmental Studies majors and concentrators, Comparative Literature majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)  (WS)

ENVI 322  (F) Waste and Value

Cross-listings: ENVI 322 GBST 322 ANTH 322

Secondary Cross-listing
What is trash and what is treasure? In what ways does value depend upon and necessitate waste, and how is the dialectic between the two inflected by culture? When we 'throw away' things at Williams College, where exactly do they go, and who handles them 'down the line'? What are the local and global economies of waste in which we are all embedded and how are they structured by class, race, caste, gender and nation? In this seminar we critically examine the production of waste - both as material and as category - and its role in the production of value, meaning, hierarchy and the environment. Readings include ethnographic accounts of sanitation labor and social hierarchy; studies of the political and environmental consequences of systems of waste management in the colonial period and the present; and theoretical inquiries into the relation between filth and culture, including work by Mary Douglas, Dipesh Chakrabarty and Karl Marx. Geographically the foci are South Asia, Japan, and the United States. There is also a fieldwork component to the course. In fieldtrips we follow the waste streams flowing out of Williams - to an incinerator, a sewage treatment plant, recycling and composting facilities and other sites - and students explore in individual, participant-observation-based research projects the everyday social life of waste in our communities.

Requirements/Evaluation: regular posting of critical response papers, field notes on waste streams, research-based final paper

Prerequisites: none

Enrollment Limit: 12

ENVI 331  (F)  Geomorphology

Cross-listings: GEOS 301 ENVI 331

Secondary Cross-listing

Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth's surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, a research project, and a midterm and final exam

Prerequisites: At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: GEOS and ENVI majors

Fall 2023
ENVI 332 (F) (De)colonial Ecologies (DPE) (WS)

Cross-listings: ENVI 332 AMST 332 AFR 347

Secondary Cross-listing

What is the relationship between race, colonialism, and capitalism? How do such structures organize nature, including human nature? How do ideas of "nature" and "the human" come to structure race, colonialism, and capitalism? From the "discovery" and plunder of the "New World," to 18th-century claims that climate determined racial character, to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, it is clear that race, colonialism, capitalism constitute asymmetric world ecologies, and give rise to interconnected liberation struggles. Anchored in the contexts of U.S. colonialism and racial capitalism, and drawing on environmentalist, Black Marxist, and feminist works, this course aims to expose students to a world history of colonial and decolonial ecologies. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward human and non-human natures. Students should also be able to analyze how such orientations toward human and non-human natures mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation constitute decolonial ecologies that contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

Prerequisites: AMST 101, AFR 200, and/or ENVI 101

Enrollment Limit: 15

Enrollment Preferences: AMST, AFR, ENVI

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 332(D2) AMST 332(D2) AFR 347(D2)

Writing Skills Notes: One thesis paper at 15 pages. The writing process is staggered, with each part graded, and with critical feedback from professor and peers. Specifically, one research proposal (including thesis outline and annotated bibliography of primary texts) with feedback from professor; one thesis paper draft with feedback from peers; one letter of revision explaining the student's revision process; one final draft with critical feedback from professor; and student presentation and discussion.

Difference, Power, and Equity Notes: The course addresses issues of difference, power, and equity, and offers theoretical tools and perspectives to understand these issues. Specifically, students learn how to interpret how racialized and colonized peoples' visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

ENVI 335 (F) The Nile (DPE)

Cross-listings: GBST 320 ENVI 335 ARAB 308 AFR 350 HIST 308

Secondary Cross-listing

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It was on the banks of this river that the great Egyptian empires were founded that led to the building of some of humanity's most astounding structures and artworks. While the Nile seems eternal and almost beyond time and place, now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This alarming nexus of demography, climate change, and economic development has led to increasingly urgent questions of the Nile’s future. Is the Nile dying? How has the river, and people's relationship with it, changed over the last century? This course will consider the history of the Nile and and its built and natural environment. After a brief overview of the role of the river in
ancient Egypt, we will explore the modern political and cultural history of the Nile. By following an imaginary droplet flowing from tributaries until it makes its way into the Mediterranean Sea, we will learn about the diverse peoples and cultures along the way. We will evaluate the numerous attempts to manage and control the Nile, including the building of big dams, and the continuous efforts to utilize the river for economic development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the major urban centers with the Nile and whether the tensions among Nile riparian states will lead to "water wars" in East Africa and the Middle East.

Requirements/Evaluation: short papers and final project/paper

Prerequisites: none, though background in Middle East history is preferable

Enrollment Limit: 19

Enrollment Preferences: History and Arabic Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 320(D2) ENVI 335(D2) ARAB 308(D2) AFR 350(D2) HIST 308(D2)

Difference, Power, and Equity Notes: The course fulfills the DPE requirement because it evaluates the differing experiences of the Nile among different cultural groups. It will evaluate how the central government is constantly trying to change how people use their water and therefore over-determine how people interact with their natural environment.

ENVI 339  (F) Conservation Biology

Cross-listings: BIOL 329 ENVI 339

Secondary Cross-listing

Conservation Biology focuses on protection of the Earth's biodiversity. This course starts with an overview of biodiversity including patterns of species richness, causes of species loss (extinction), and the critical contributions of biodiversity to ecosystem function and human welfare. Then we analyze ways to conserve biodiversity at the genetic, population, species and community/ecosystem levels. Labs are field oriented, and focus on local New England communities and ecosystems. Labs emphasize knowing the dominant species in each system; they also stress how to collect and analyze the field data on ecological community structure and function that are critical to test hypotheses that relate to different conservation goals.

Class Format: lectures, discussions, and a weekly lab.

Requirements/Evaluation: Evaluation will be based on lab assignments and reports, discussion participation, two exams and an independent project.

Prerequisites: BIOL 203/ENVI 203 or BIOL 220 or BIOL 305 or permission of instructor.

Enrollment Limit: 24

Enrollment Preferences: Biology majors, Environmental Studies majors, seniors, and juniors

ENVI 346  (F)  Environmental Psychology

Cross listings: PSYC 346 ENVI 346

Secondary Cross Listing
This is a course on contemporary social psychology as it pertains to the natural environment. Our two primary questions in this course are: (1) how can research and theory in social psychology help us understand the ways in which people engage with threats to the natural environment?, and (2) how can social psychology help us encourage environmentally responsible behavior and sustainable practices? Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of environmental solutions.

Requirements/Evaluation: a series of papers, two essay exams, written and oral reports of research

Prerequisites: PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.

Enrollment Limit: 19

Enrollment Preferences: Psychology majors, Environmental Studies majors, and Environmental Studies concentrators

ENVI 349  (S)  Race, Development, and Food Sovereignty  (DPE) (WS)

Cross listings: AMST 342 AFR 349 ENVI 349

Secondary Cross Listing
What does it mean to "settle" land? What racial encounters and acts of survival took place around the plantation? How have farmworkers and landowners faced off against government policies and "agribusiness" corporations? What was the "Green Revolution" and why did it happen? Agriculture as a relation to land based on domestication, enclosure, and commerce has long been a means of and justification for racial and colonial dispossession and exploitation across the Americas, including what is now the United States. At the same time, an array of embodied practices in relation to the land and one another complicate and contest these histories of racial and colonial dispossession. Broadly, this course aims to familiarize students with the historical and present-day entwining of colonial and racial dispossession, exploitation, and resistance at the heart of U.S. economies of agriculture. By the end of this course, students should be able to analyze how the historical foundations of U.S. agriculture have entailed and intertwined the taking of lands and removal of Indigenous peoples, the enslavement of African peoples, mass migration, and various forms of exploitative labor. Students should also be able to assess how these historical foundations continued to serve as the material conditions reproduced throughout the course of the 19th and 20th centuries under discriminatory government policies and powerful "agribusiness" corporations, as well as the possibilities and limits of redress and reform through state and corporate action. Finally, students should be able to interpret how embodied practices in relation to the land and one another precede, exceed, and push against the logics and histories of racial and colonial dispossession. The course is organized around three units that interrogate economies of agriculture within and beyond the U.S. nation-state. Each unit interrogates a key period of time from the founding of the United States, through 20th-century Pax Americana, and on into the present. Finally, each unit does so while attending to the emergence and enactment of "food sovereignty" movements--efforts to foster a new international trade regime, agrarian reform, a shift to agroecological production practices, attention to gender relations and equity, and the protection of intellectual and indigenous property rights.

Prerequisites: AMST 101, AFR 200, and/or ENVI 101

ENVI 351 (F)(S) Marine Policy (DPE) (WS)

Cross-listings: ENVI 351 MAST 351 PSCI 319

Secondary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 351(D2) MAST 351(D2) PSCI 319(D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

Attributes: ENVI Environmental Policy EXPE Experiential Education Courses POEC Depth
ENVI 354  (F)  Drugs, Empire, & Environment in Historical Perspective

This course considers the political economy & environmental impacts of licit & illicit drugs. We begin with the premise that drugs are commodities that gained global significance in the context of liberalism & empire. Imperial nations--notably Britain--consolidated political & economic power in the 19th century by promoting the opium trade against the wishes of Chinese & Indian officials. Most illicit drugs originated as plants--cannabis, poppies, & coca. The production of these internationally traded agricultural commodities helped transform rural livelihoods & landscapes in the 19th century; attempts at suppressing drug crops in the 20th century have also had environmental impacts. After the turn of the 20th century, the United States led an international movement to end the opium trade. Since then, the War on Drugs has expanded as a means for the United States to exercise domestic & global power. Our focus is primarily illicit drugs, but historical shifts in the categories of licit/illicit are a key theme. Other themes include race & racism in drug policy, imperialism, agriculture, & debates over toxicity. The course is divided into four units, stretching from the 19th century through the present. First, we discuss British colonialism in India & China through the lens of the opium trade. Next, we study the emerging drug control regime, focusing on coca, cocaine, & Indigenous producers in the Andes in the 1940s & 1950s. The third unit looks at environmental justice activists who oppose pharmaceutical companies' waste disposal in Puerto Rico. Finally, we evaluate the environmental impacts of the recent cannabis boom. We ask whether the legal architecture on which the industry is built can overcome the colonial & racist legacies of drug control. Readings include works by historians, novelists, anthropologists, & public policy experts.

Requirements/Evaluation:  2-3 short papers on assigned topics, final research paper, class discussion and participation
Prerequisites:  ENVI 101 or instructor permission

ENVI 363  (F)  Environmental Organic Chemistry

Cross-listings:  ENVI 363 CHEM 363
Secondary Cross-listing
This course introduces students to the methods used to assess the risks posed by organic chemicals to human, animal, and ecosystem health. Our goal is to develop a quantitative understanding for how specific features of organic molecular structure directly dictate a given molecule’s environmental fate. We will begin by using thermodynamic principles to estimate the salient physiochemical properties of molecules (e.g., vapor pressure, solubility, charging behavior, etc.) that impact the distribution, or partitioning, of organic chemicals between air, water, soils, and biota. Then, using quantitative structure activity relationships, we will predict the degradation kinetics resulting from natural nucleophilic, photochemical, and biological processes that determine chemical lifetime in the environment.
Class Format:  lecture, three hours per week and laboratory, four hours per week
Requirements/Evaluation:  weekly problem sets, laboratory exercises, two midterm exams, a final exam, participation in lecture and lab
Prerequisites:  CHEM 155 or CHEM 256 and CHEM 156; or CHEM 200 and CHEM 201
Enrollment Limit:  16
Enrollment Preferences:  junior and senior Chemistry and Environmental Studies majors with a demonstrated interest in environmental chemistry
Expected Class Size:  16

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 364 (S) Instrumental Methods of Analysis

Cross-listings: ENVI 364

Secondary Cross-listing

Instrumental methods of analysis provide scientists with different lenses to observe and elucidate fundamental chemical phenomena and to measure parameters and properties at the atomic, molecular, and bulk scales. This course introduces a framework for learning about a variety of instrumental techniques that typically include chromatography, mass spectrometry, thermal methods, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies. Students complete laboratory projects and gain hands-on experience and project planning skills to study molecules and materials of interest. This practical experience is complemented by lectures that cover the theory and broader applications of these techniques. Students also explore the primary literature and highlight recent advances in instrumental methods that address today's analytical questions. The skills learned are useful in a wide variety of scientific areas and will prepare you well for research endeavors.

Class Format: lecture, two times per week and laboratory, four hours per week

Requirements/Evaluation: Weekly data analysis, laboratory assignments and reports, readings for class, problem sets, one oral presentation of an application of instrumental methods, a final independent literature project and presentation; demonstrated progress in research skills, and project engagement.

Prerequisites: CHEM 155 or CHEM 256 and CHEM 251 (may be taken concurrently with CHEM 256 with permission of instructor)

Enrollment Limit: 16

Enrollment Preferences: Chemistry and Environmental Studies majors

Cross-listings:  ENVI 380 STS 379

Primary Cross-listing

How do humans and animals shape each other's lives? People encounter animals in farms, laboratories, zoos, wildernesses, and backyards, on purpose and by chance. They treat animals as family members, entertainment, food, vectors of disease, and objects of scientific wonder. Drawing on the works of biologists, philosophers, and feminist science and technology studies scholars, this seminar will examine our relationships with animals and help clarify our responsibilities to them. We will ask: What are the social and environmental consequences of consuming animals? Should humans swim with dolphins, feed manatees, use gene-editing to create species that can survive climate change? Should moral standing depend upon the ability to communicate or the ability to experience emotions like grief and joy? What can animal models tell us about human health and society, and when is animal otherness too large a gap to bridge? What might human violence toward animals tell us about sexism, racism, or capitalism, and what will human-animal relationships look like in the future?

Requirements/Evaluation:  short essays, final portfolio

Prerequisites:  none

Enrollment Limit:  18

Enrollment Preferences:  juniors and seniors

Expected Class Size:  10

Grading:  no pass/fail option,   no fifth course option

Distributions:  (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 387  (S)  Economics of Climate Change  (QFR)

Cross-listings:  ECON 387 ENVI 387 ECON 522

Secondary Cross-listing

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

Requirements/Evaluation:  problem sets, midterm, group presentation, final exam
Prerequisites: ECON 251, familiarity with statistics
Enrollment Limit: 25

Enrollment Preferences: Junior/Senior Economics majors and CDE fellows
Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 390  (F)  The Nature of Nature

Cross-listings: ENGL 394 ENVI 390

Secondary Cross-listing

"Nature" is one of the most common words in English. And yet what does it mean? Is it primarily descriptive (all living things), or normative ("natural" foods, "human nature")? This course will consider some of the richly incoherent ways we think about the living world, paying particular attention to the difficulty of narrating processes that are too big, too small, too quick, or too slow for direct human apprehension. We'll explore the way popular nature writing mingles scientific reporting with implicit and explicit judgments about human identity, and take up the insoluble problem of our proper relation to animals. Considerable attention will be paid to the racial, cultural and class dimensions of contemporary forms of environmental consciousness.

Writers studied will include Elizabeth Kolbert, Jem Bedell, William Cronon, and Charles Darwin. We'll also consider the intermediations of nature and technology in documentaries by David Attenborough and Lynette Wallworth, among others.

Requirements/Evaluation: Several short written exercises, an eight page comparative midterm essay, and a final twelve to fifteen page essay incorporating audiovisual materials. Active participation in class.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 25

Enrollment Preferences: English majors; Environmental Studies majors and concentrators; Philosophy majors.

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

ENVI 395  (F)  Black Reparations Within/Beyond Borders  (DPE)

Cross-listings: AFR 395 WGSS 395 ENVI 395 GBST 395

Secondary Cross-listing

Generations of Black people around the world have demanded restitution for the harms and legacies of enslavement, indigenous genocide and colonialism in order to advance social justice, new ways of living and freedom. In this way, freedom fighters, Black Power leaders, abolitionist movements, Pan-Africanists, maroons, Rastafarians, Black politicians, climate justice leaders, and revolutionary anti-capitalists have all put forward ideas on and approaches to reparations and reparatory justice. This course will analyze 'geographies of Black struggle', the differences and commonalities among these approaches, the political strategies and movements, including responses to global climate change and socio-environmental disasters that advance reparations as a just remedy within and beyond borders. We give particular attention to Pan-Africanist and
Black feminist perspectives, as well as liberal and popular struggles for reparations within the African diaspora across space and time. Do Pan-Africanism and Black feminism offer new visions for reparations movements in the 21st century? Employing speeches, writings, audio-visual content and documentary film from and about these earlier and emerging movements and their leaders, we will draw long lines between historical circumstances and drivers, and examine Black (un)freedoms within the context of calls for reparation today.

Requirements/Evaluation: Attendance and Participation including serving as a class discussion leader (20%); Written double-spaced essay about and the legacies and role that Pan-Africanism or Black Feminist perspectives play in contemporary global reparations movement (8 pages plus bibliography) (25%); Research and creatively present using written text, flyer, video, audio-visuals or poster a profile of Pan-African feminist leader focusing on her ideas, movement activities, and role in the reparations movement including innovative ideas (max. 5 pages or 10 minutes) (25%); Final project: simulation activity of a Pan-African Congress on Reparations (30%)

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If over-enrollment, preference to AFR, GBST and HIST students

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

ENVI 397 (F) Independent Study of Environmental Problems
Individuals or groups of students may undertake a study of a particular environmental problem. The project may involve either pure or applied research, policy analysis, laboratory or field studies, or may be a creative writing or photography project dealing with the environment. A variety of nearby sites are available for the study of natural systems. Ongoing projects in the College-owned Hopkins Forest include ecological studies, animal behavior, and acid rain effects on soils, plants, and animals. Students may also choose to work on local, national, or international policy or planning issues, and opportunities to work with town and regional planning officials are available. Projects are unrestricted as to disciplinary focus. Students should consult with faculty well before the start of the semester in which they plan to carry out their project.

Prerequisites: approval by the Chair of Environmental Studies

Grading: yes pass/fail option, yes fifth course option

Cross-listings: AMST 406 ENVI 402

Primary Cross-listing

In this class you apply your education to effect social and environmental change in the Berkshires. Students work in small collaborative groups to address pressing issues facing the region. Class teams partner with community organizations and local & regional governments to work with clients to develop solutions. You will learn while doing and contribute to the community. The field of environmental planning encompasses the built environment, such as housing, zoning, transportation, renewable energy, waste, neighborhood design; the natural environment, such as open space, farmland, habitat and species protection, natural resource protection, air and water pollution and climate change, and the social environment, such as racial zoning, recreation, placemaking, ecojustice, food security, and healthy communities. Skills taught include basic land use planning, GIS mapping, developing and conducting surveys, interview techniques, community-based research, project management, public presentations and professional report-writing. The class culminates in public presentations to the client organizations. The class hours include time for team project work, client meetings and team meetings with the professor. Recent project topics: https://ces.williams.edu/environmental-planning-papers/

Class Format: The weekly conference session (1 hour) is dedicated to site visit field trips, team project work, client meetings and team meetings with professor.

Requirements/Evaluation: Response papers (three 1-page papers), in-class exercises, class discussion, small group work, public meeting attendance, project work, final report (due in segments during semester) and final presentation.

Prerequisites: ENVI 101 recommended; open to juniors and seniors.

Enrollment Limit: 16

Enrollment Preferences: Environmental Studies majors and concentrators, American Studies majors, Maritime Studies concentrators.

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Unit Notes: Course fulfills senior seminar requirement for Environmental Studies Majors, Environmental Studies Concentrators, and Maritime Studies Concentrators. American Studies Space & Place elective. Course is an Environmental Studies Concentration elective (ENVI Policy and ENVI Humanities, Arts + Social Science) and Environmental Studies Major elective.

ENVI 404 (F) Coastal Processes and Geomorphology (QFR)

Cross-listings: MAST 404 ENVI 404 GEOS 404

Secondary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in
densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

**Class Format:** lecture two times a week with a lab one time per week

**Requirements/Evaluation:** lab reports, quizzes, and an independent research project

**Prerequisites:** Either GEOS 104 or GEOS 210; or permission of instructor. No prior knowledge is necessary, but this course does build on principles used to explore complex scientific challenges.

**Enrollment Limit:** 12

**Enrollment Preferences:** senior Geosciences majors, then juniors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major. This course counts toward the GEOS Group B Electives - Sediments + Life.

**Distributions:** (D3) (QFR)

**ENVI 410  (S)  The Cryosphere**

**Cross-listings:** ENVI 410 GEOS 410

**Secondary Cross-listing**

The Earth's climate system is often described in terms of its spheres, including the atmosphere, biosphere, lithosphere, oceans, and the cryosphere. The cryosphere is the naturally occurring ice on Earth in all its many forms: snow, glaciers, ice sheets, sea ice, frozen lakes and rivers, and permafrost (frozen soil). These parts of the climate system may seem remote, but have implications for climate and weather around the world. Melting glaciers and ice sheets have already contributed to sea level rise, and are projected to do so even more in the future. This course will explore the cryosphere, including snow, sea ice, permafrost, and glaciers through lectures, hands-on and data analysis labs, reading journal articles, and a final project. A spring break field trip to Alaska offers the opportunity to get boots-on-the-snow experience with glaciers, sea ice, and permafrost. As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major.

**Class Format:** Class periods and lab periods will be used interchangeably based on the weather. The spring break trip to Alaska is optional.

**Requirements/Evaluation:** Evaluation will be based on short papers, labs responses, and a research project

**Prerequisites:** GEOS 215 or GEOS 255 or GEOS 309 or MAST 311 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Senior GEOS majors, then other GEOS majors and senior ENVI majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option
Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major.

Materials/Lab Fee: Labs will be outside during the winter: students should be prepared to dress appropriately for the weather.

ENVI 412 (S) Senior Seminar: Perspectives on Environmental Studies (WS)

Cross-listings: MAST 402 ENVI 412

Primary Cross-listing

The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice, and they will have opportunities throughout the semester to meet with guest speakers to discuss environmental work outside the academy.

Requirements/Evaluation: active participation, discussion leading, several smaller assignments and multi-step capstone project

Prerequisites: declared major/concentration in Environmental Studies or Maritime Studies, ideally to be taken in final semester at Williams

Enrollment Limit: 14

Enrollment Preferences: Environmental Studies majors and concentrators, Maritime Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: required course for students wishing to complete the Maritime Studies concentration

Distributions: No divisional credit (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 402 No divisional credit ENVI 412 No divisional credit

Writing Skills Notes: This course is focused on building up cross-disciplinary writing and communication skills. There will be a multi-step capstone project that emphasizes writing, and there will be opportunities to revise and resubmit work.

Attributes: ENVI Core Courses EVST Core Courses EVST Senior Seminar

ENVI 413 (F) The Big Ideas: Intended and Unintended Consequence of Human Ambition (DPE) (WS)

Cross-listings: HIST 413 ARAB 413 GBST 413 ENVI 413

Secondary Cross-listing

What have been the most consequential ideas of the last 100 years? This course will explore some of the more audacious and ambitious plans to alter natural and urban environments in the late 19th century to the early part of the 21st, specifically those that sought to improve the human condition through science, engineering, and technology. By building big bold things, politicians around the globe sought to bring prosperity to their nation and embark on a path of modernity and independence. Through an intellectual, political and environmental history of major construction projects such as the building of the Suez Canal and the Aswan Dam, extensive river valley developments in Iran, Turkey and Iraq, and utopian and futuristic city planning in western Asia, students will consider how, with the benefit of hindsight, to best evaluate the feasibility of such bold schemes. Who has benefitted and who has not, what have been some of the unanticipated consequences, what was sacrificed or neglected, and what do these projects tell us about the larger processes of global capitalism, decolonization, and climate change?

Requirements/Evaluation: A presentation, shorter writing assignments and a longer research paper (20-25 pages) in the end. Students will submit shorter drafts of final paper in order to receive constructive feedback prior to final submission.

Prerequisites: None
Enrollment Limit: 15

Enrollment Preferences: Seniors, especially History, Arabic and Environmental Studies majors.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 413(D2) ARAB 413(D2) GBST 413(D2) ENVI 413(D2)

Writing Skills Notes: A 20-25 page research paper will be required at the end of the semester. Prior to getting to that point, students will submit an annotated bibliography, a two page proposal, a five and eventually a 10 page draft. Each draft will receive extensive comments and suggestions from peers and instructor. In this way, the student will think about the process of writing and the best way to set themselves up for success.

Difference, Power, and Equity Notes: This course examines how a number of different nations in Africa and Asia sought to improve the living conditions of the masses through major construction project. Though ostensibly these schemes were supposed to improve the livelihood of all, often they primarily benefitted the few - the urban elite - and not the general population. This course will therefore explore how certain class, gender and racial lines were solidified and maintained through economic development plans.

ENVI 420 (F) Architecture and Sustainability in a Global World (WS)

Cross-listings: ENVI 420 ARTH 420 GBST 420

Secondary Cross-listing

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Requirements/Evaluation: weekly reading discussion question posts on GLOW, leading class discussions, and a final project/paper (15-20 pages) with presentation

Prerequisites: none, although a course in art/architectural history or environmental studies would be advantageous

Enrollment Limit: 12

Enrollment Preferences: Art History majors, Environmental Studies majors, History and Studio majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ENVI 430(DPE) ARTH 430(DPE) GBST 430(DPE)
From 18th-century claims that climate determined character to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, race, colonialism, identity, and "nature" operate as interconnected terrains of power. Anchored in the contexts of U.S. colonialisms, racialization, and accumulation, this course aims to expose students to the cultural politics of "nature" as a way of "doing" American Studies. Specifically, this course investigates formations of and struggles against U.S. colonialisms, racialization, and accumulation via the many symbolic and material iterations, negotiations, and contestations of the contingent relations between and among human and non-human natures. Organized around a significant research paper and weekly written responses, this course ultimately aims to foster students' critical writing, reading, analytical thinking, and comparative inquiry skills across such contexts and sites of contestation, and across texts of different genres and media. We will work with a wide range of primary sources, including published fiction and poetry, legal documents, newspaper articles, speeches, recorded songs, and films, photos, paintings and other visual culture. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward non-human natures, as well as analyze how ideas of "nature" mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

Requirements/Evaluation:
- Class Participation: 25%
- Weekly Responses (350-500 words): 25%
- Final Research Essay: 50%, broken down by Research Proposal (2-3 pgs, 10%), Peer Review and Feedback (2 pgs, 10%), Presentation (10%); Essay (15 pgs): 20%

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: American Studies majors will be given preference; secondary preference given to students specializing in Native American and Indigenous Studies, as well as Africana and Environmental Studies majors.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

ENVI 450 (F) Senior Seminar: Environmental Ethnography

A key question orients this course: What can the embodied, place-based, and detailed approach of ethnographic study bring to our understandings of the environment? This upper-level seminar will explore this question through classroom discussions and a semester-length research project. Students will engage different styles of environmental ethnography while undertaking their own ethnographic projects involving the Williams College community and surrounding areas. Students will learn to work across different kinds of evidence as they draft fieldnotes, code fieldwork data, extrapolate key ideas from their fieldwork materials, and discover new ways of building environmental knowledge. Students will use these materials to collectively assemble an edited volume of ethnographic snapshots to be presented to the wider Environmental Studies community at Williams.

Requirements/Evaluation: Participation in seminar discussions; Weekly fieldnotes (2-3 pages per week); Mid-term Coded fieldwork notes and summary statements (8-10 pages); Final ethnographic snapshot/presentation (13-15 pages)

ENVI 454  (F)  Climate Change Physiology
Cross-listings: ENVI 454 BIOL 454
Secondary Cross-listing
Animals are increasingly faced with rapid climate change driven by human activities across the globe. How do they cope with challenges imposed by increasing temperature? And, how might physiological mechanisms at the organismal level scale up to influence population processes? This course uses an integrative approach to understand the impacts of climate change at multiple levels of biological organization in both terrestrial and aquatic environments. We examine physiological mechanisms underlying animal responses and the role of acclimation versus adaptation in coping with rapidly shifting thermal environments. We then consider the impacts of these mechanisms on whole organism performance and their consequences for population persistence. Finally, we learn the analytical tools used to incorporate physiological mechanisms into ecological models to predict future responses to global climate change. Class discussions will focus on readings drawn from the primary literature.
Requirements/Evaluation: Evaluation will be based on class participation and several short papers.
Prerequisites: BIOL 203 or BIOL 205, or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Biology seniors who have not yet taken a 400 level course
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

ENVI 460  (S)  Communicating Climate Change
Long-term, probabilistic thinking about scary scenarios is hard. When the relevant time frames extend to centuries and millennia, it is really hard. And when the degree of scariness is determined by sciences that very few people understand, it is really, really hard. This describes the challenge of climate communication. No matter what your interests or career paths might be, you will need to be able to communicate effectively about environmental problems, often with people who see them very differently from you. It is difficult to communicate about any problem across social, political, and cultural divides. But environmental problems present special challenges. For one thing, they typically involve complicated, contested science. For another, their effects are often difficult to perceive yet potentially devastating in their consequences, especially for future generations and marginalized people. For yet another, their solutions often seem hopelessly difficult to implement. And finally, they are thoroughly entangled with almost every other problem we face, from pandemics to racism to wealth inequality. How do we communicate clearly, persuasively, and responsibly about something so complex? This seminar brings together students with interests in the humanities, arts, social sciences and sciences to seek answers to this fundamental question. Over the course of the seminar, we will explore research on climate change communication in a diverse array of fields while seeking to put our findings into practice locally, working together as a team to solve concrete climate communication problems here in our community.
Requirements/Evaluation: One 5-7-page paper; final collaborative project; participation.
Prerequisites: Environmental Studies 101.
Enrollment Limit: 19

ENVI 465 (S) Solutions to the Biodiversity Crisis

The biodiversity crisis is one of the greatest challenges of our century. Faced with climate change, persistent pollution, and habitat fragmentation, species are declining locally and globally. In this upper-level seminar we will integrate knowledge from the natural sciences, social sciences, policy, arts, and the humanities to design and implement biodiversity interventions. Through readings, discussions with experts, and applied projects, we will learn how biodiversity conservation and restoration can be socially just; how spaces can be designed to promote the flourishing of life; and how much local environmental management can alter global trends. We will also envision what the biotic world might look like in 10, 100, and 1000 years and consider who gets to decide which species live and which die, and who should decide.

Requirements/Evaluation: One 5-7-page paper; final collaborative project

Prerequisites: Environmental Studies 101 and 102

Enrollment Limit: 19

Enrollment Preferences: Environmental/Maritime Studies majors and concentrators; seniors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ENVI 470 (S) Science for Environmental Justice (DPE)

Cross-listings: ENVI 470 GEOS 470

Secondary Cross-listing

Economically challenged communities and communities of color are disproportionately affected by environmental contamination and disturbance. Although environmental racism caused by industrial pollution has been made clear in scholarship for some time, the integrated stresses of climate change and industrial contamination are now triggering new challenges to life in underprivileged communities. Resolving environmental injustice will require meaningful engagement from scientists across a range of disciplines, from chemistry and the geosciences to ecology and public health. In this senior seminar, you will learn about the history of the environmental justice movement while examining how science has been used to address cases of environmental contamination and mismanagement. You can expect experiences in field data collection, laboratory analyses, and numerical modeling, skills that are required to assist communities suffering from environmental injustice. And we will work in partnership with residents of Tallevast, Florida, who have long suffered from the impacts of groundwater contamination and governmental neglect. This partnership will involve a residential field trip to Tallevast during spring break, where you will undertake an environmental study in support of the community.

Class Format: Weekly lectures, paper discussions, and hands-on labs. Required week-long spring break field trip.

Requirements/Evaluation: weekly lab exercises and seminar presentations; a research project; a final presentation; and a spring break field trip

Prerequisites: At least one 200-level Division III course and at least one 300-level Geosciences or Environmental Studies course or permission of instructor.

Enrollment Limit: 12

Enrollment Preferences: Fourth year, and then third year, Geosciences majors and Environmental Studies majors or concentrators

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option
Unit Notes: As a 400-level seminar, this capstone course is intended to build and extend knowledge and skills that students have developed during previous courses in either the Geosciences or Environmental Studies majors.

Materials/Lab Fee: The spring break field trip is being funded by the Freeman Foote Field Trip Fund for the Sciences.

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 470(D3) GEOS 470(D3)

Difference, Power, and Equity Notes: The course will examine the history of the environmental justice movement, unraveling the roles of governmental neglect and complicity in fostering the harm of vulnerable communities. We will review strategies of collective action in fighting climate and environmental injustice and the complicated role that scientists have played in this pursuit. We will then leverage scientific skills and perspectives to imagine ways that scientists can become responsible agents of change.

ENVI 478 (S) Cold War Landscapes

Cross-listings: HIST 478 AMST 478 ENVI 478

Secondary Cross-listing
The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in nations across the globe. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States and North America. We will then move on to examining others in Europe and the Soviet Union. Our approach to our topics will be interdisciplinary throughout the semester, with the additional goal of helping students frame their final projects. Students are encouraged to write their research papers on any geographical area of the world that interests them.

Requirements/Evaluation: class participation and semi-weekly critical writing on the reading; students will also be expected to keep up through the stages of the research paper process, which will involve submitting a short research plan, annotated bibliography, outline, and a rough draft, as well as the final 20- to 25-page paper.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History, ENVI, and AMST majors if over-enrolled

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

ENVI 491 (S) The Suburbs (WS)

Cross-listings: HIST 491 AMST 490 ENVI 491

Secondary Cross-listing
The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race),
consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

Class Format: Students will be assigned a tutorial partner, and tutorial pairs will meet with the professor for one hour each week at a regularly scheduled meeting time.

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History majors and students with previous coursework in History

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 491(D2) AMST 490(D2) ENVI 491(D2)

Writing Skills Notes: Students will reflect on what their writing goals are for the semester, and they will receive weekly feedback on their writing from the professor and from their tutorial partner. The final writing assignment will afford students the chance also to reflect back on their previous papers and the semester's course content.

ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise. The concentration in Maritime Studies is designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
- Understand ecological principles and the nature of living systems;
• Apply scientific methods to collect environmental data and evaluate environmental quality;
• Understand the political and economic factors that inform, enable, and constrain environmental policy;
• Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
• Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
• Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES was one of the first environmental studies programs at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, and generous support for summer research and internships. The Class of 1966 Center, a Living Building and the Program’s home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. The CES manages the Hopkins Memorial Forest, a 2600-acre natural area northwest of campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center. The Maritime Studies concentration builds on the course offerings of the Williams-Mystic Maritime Studies Program at Mystic Seaport.

ADVISING

Concentrators (or first-years and sophomores interested in the concentration offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES or Maritime Studies for advice. All incoming concentrators will choose a faculty advisor in the spring of their sophomore year.

Advisors for 2019-20: Henry Art, Sarah Gardner, Pia Kohler, Laura Martin, Mea Cook, James Manigault-Bryant.

CONCENTRATION IN MARITIME STUDIES

The Maritime Studies concentration provides students with an opportunity to explore how humans interact with the environment, including the maritime environment. Understanding the oceans and our interactions with them is of increasing importance in this era of climate change, sea-level rise, fisheries crises, and the internationalization of the high seas. We encourage students to investigate our WaterWorld from the perspectives of the humanities, social sciences, and physical sciences. Maritime Studies is an interdisciplinary, cross-divisional program that includes the literature, history, policy issues, and science of the ocean. Candidates for the concentration in Maritime Studies must complete a minimum of seven courses: the interdisciplinary introductory course (GEOS 104 Oceanography), four intermediate core courses (at Williams-Mystic), an elective, and the senior seminar.

Students who have completed other study-away programs that emphasize maritime studies should consult with the CES chair about the possibility of completing the Maritime Studies concentration.

Required Courses (7 courses)

Introductory Course

MAST/ENVI/GEOS 104 Oceanography

Students who take MAST 211/GEOS 210 Oceanographic Processes at Williams-Mystic can substitute an extra elective in lieu of GEOS 104.

Capstone Course

ENVI/MAST 412 Senior Seminar: Perspectives on Environmental Studies

Core Courses (taken as part of Williams-Mystic program at Mystic Seaport):

MAST/ENGL 231 Literature of the Sea

MAST 311/BIOL 231 Marine Ecology OR MAST 211/GEOS 210 Oceanographic Processes

MAST/ENVI 351/ PSCI 319 Marine Policy

MAST/HIST 352 America and the Sea, 1600-Present

Elective Courses

Elective courses are listed based on either a clear maritime statement in the course description or broad practical/theoretical applicability to maritime studies. Concentrators will take a minimum of one course from the list below. If concentrators find other courses in the catalog that they believe meet the requirements for a MAST elective, they may bring them to the attention of the Chair or Associate Director.
INDEPENDENT STUDY AND WINTER STUDY

In addition to courses fulfilling the Maritime Studies concentration requirements, the following courses are offered:

  MAST 397, 398 Independent Study: Maritime Studies
  MAST 493-W31-494 Senior Thesis: Maritime Studies

Winter study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year’s Winter Study offerings.

HONORS IN MARITIME STUDIES

Candidates for honors in Maritime Studies will complete a thesis in their senior year. The project will involve original research (archive, museum, field, or laboratory) followed by on-campus analysis and write-up of results. The thesis may either be a one-semester plus winter study project, or a full year (two semesters plus winter study). In either case, data collection during the summer before the senior year may be necessary. In some cases, the thesis project may be a continuation and expansion of the student’s Williams-Mystic research project. Honors will be awarded if the thesis shows a high degree of scholarship, originality, and intellectual insight.

MAST 104 (F) Oceanography
The oceans cover three quarters of Earth's surface, yet oceanography as a modern science is relatively young; the first systematic explorations of the geology, biology, physics and chemistry of the oceans began in the late 19th century. This introduction to ocean science includes the creation and destruction of ocean basins with plate tectonics; the source and transport of seafloor sediments and the archive of Earth history they contain; currents, tides, and waves; photosynthesis and the transfer of energy and matter in ocean food webs; the composition and origin of seawater, and how its chemistry traces biological, physical and geological processes; oceans and climate change; and human impacts.

Class Format: three 50-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast of New England.

Requirements/Evaluation: lab activities (25%), homework (25%), quizzes (5%), three exams (45%)
Prerequisites: none
Enrollment Limit: 48
Enrollment Preferences: first year and second year students, Geosciences majors, Maritime Studies concentrators
Expected Class Size: 48
Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course and GEOS 110 Oceans and Society cannot both be taken for credit.

Distributions: (D3)
This course is cross-listed and the prefixes carry the following divisional credit:

MAST 110  (F)  Oceans and Society

Cross-listings: MAST 110 GEOS 110 ENVI 109

Secondary Cross-listing

Oceans impact society in many ways: they provide much of our protein, they hide untapped mineral wealth, their circulation regulates global climate, they transport and accumulate our plastic garbage, marine storms batter coastal infrastructure, and sea-level rise threatens communities. However, despite the oceans’ importance throughout history—for trade, as a source of food, and because of their unpredictable dangers—we know shockingly little about them. More than 6000 people have reached the summit of Everest, Earth's highest elevation; but only 22 have visited Challenger Deep, the deepest point below the ocean surface. We have mapped the surfaces of Mars and Venus in far more detail than the topography of Earth's ocean basins. New marine organisms are discovered regularly. And we still don’t fully understand the complex details of how ocean and atmosphere work together as the planet's climate engine. In this course, you will examine ocean science themes with direct societal relevance that are also at the forefront of scientific investigation. Topics will be selected based on current events, but are likely to include deep sea mining, meridional overturning, sea level rise, atmospheric rivers, and aquaculture. By taking focused dives into a range of subjects you will learn about the evolution and operation of the ocean as a physical and geological system as well as investigating the intersections between ocean functions, climate change, and human societies. Exercises and discussions will foreground active learning. A field trip to the Atlantic coast will integrate experiential investigation of the intersection between coastal change, extreme weather, and communities. The aim is to have energised interdisciplinary discussions about topics of pressing societal relevance, to understand some of the fundamentals of ocean science, to develop expertise in gathering and distilling information by researching new topics, and thereby to improve critical and analytical thinking.

Class Format: Two 75-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast.

Requirements/Evaluation: Evaluation is based on engagement with in-class activities, six graded lab exercises, four short writing/research assignments, and a five-page term paper
Prerequisites: none
Enrollment Limit: 60
Enrollment Preferences: First year and second year students
Expected Class Size: 60
Grading: yes pass/fail option, yes fifth course option
Unit Notes: This course and GEOS 104 Oceanography cannot both be taken for credit.

Distributions: (D3)

MAST 211  (F)(S)  Oceanographic Processes

Cross-listings: MAST 211 GEOS 210

Primary Cross-listing

Part of the Williams-Mystic Coastal and Ocean Studies Program, this course provides an introduction to physical, geological, chemical, and biological oceanography. Using local field sites as well as places visited on field seminars, we will investigate why the Earth has oceans, why they are salty, how they move and flow, reasons for sea level change on both long and short timescales, and how our oceans interact with the atmosphere to control global climate. We will emphasise societal interactions with the ocean, and will consider coastal processes including land loss. We will apply an environmental justice and anti-racist lens to our discussions. Field work will take place on shores in southern New England, as well as during field seminars on the Atlantic ocean, the West Coast and the Mississippi River Delta. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: Flipped classroom will focus on active learning using data-based exercises. Mini-symposia will involve student research and discussion.

Requirements/Evaluation: graded lab exercises, mini-symposium participation, and a research project

Prerequisites: none

Enrollment Limit: 24

Enrollment Preferences: none

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: This course is taught at our Mystic Seaport campus. Students must be enrolled in the Williams-Mystic Coastal and Ocean Studies Program.

MAST 231  (F)(S)  Literature of the Sea  (DPE)

Cross-listings: ENGL 231 MAST 231
The ocean, and human relationships with it, have been central features of literatures and cultures around the world for more than a thousand years. But since literary study is typically based around authors’ homelands, careful examination of the oceanic experience is often pushed to the periphery—an "empty space" to be crossed between nations, a "vast darkness" antithetical to human life, or a mirror for land-borne concerns. Increasingly, however, scholars and readers are centering the sea and stories about it as a means stepping outside human frameworks of space and time, situating the complex emotions and narratives inspired by the ocean into a complex network of geologic history and teeming other-than-human life. This course examine a wide range of texts and perspectives on the ocean and human relationships with it. Doing so will help us consider how literature both plays into and subverts dominant viewpoints of the ocean. Through texts that consider 19th-century whaling, the Middle Passage, the postcolonial Caribbean, and islands throughout the Pacific Ocean, we will explore a range of questions, including: What can we learn from examining efforts to write about the ocean? How do ocean stories help individuals understand themselves, their communities, and their place in global environments? What can the range of cultural and literary perspectives on our "single, global ocean" reveal about the ways different people are both connected with and profoundly distant from each other? Most importantly, we will practice, as a classroom community, different strategies for carefully reading texts while connecting them to cultural traditions, surrounding environments, and personal experiences.

Class Format: weekly roundtable discussions, including coastal and near-shore field trips and multiple field seminars.

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final assignment

Prerequisites: N/A

Enrollment Limit: 25

Enrollment Preferences: Williams-Mystic Students only

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: offered only at Mystic Seaport

MAST 263 (S) The Global Ocean: An Interdisciplinary Introduction

Cross-listings: MAST 263 ENVI 263

Primary Cross-listing

Though it covers most of the planet, the ocean’s importance to everyday life is easy to overlook. Its roles as a cultural symbol, resource, highway, and climate regulator make it essential to life around the world. This interdisciplinary course, team-taught by the faculty of the Williams-Mystic Program, will examine key issues in each of the world’s oceans while introducing students to the ways these issues connect multiple disciplines and transcend physical, political, and imaginary ocean boundaries. By drawing on the expertise of the five professors -- from humanities, social sciences, and sciences -- this course facilitates the critical study of the ocean from an interdisciplinary perspective and helps them consider their own role in the shifting relationship between humanity and the ocean. This seminar-style course will meet twice a week online, with students assessed by their participation, response papers, and final project, while helping them apply interdisciplinary skills to pressing sustainability issues connecting the environment and society.

Requirements/Evaluation: Five 2-page papers, participation, and a 6-8 page final paper

Prerequisites: none, open to all students
Enrollment Limit: 20
Enrollment Preferences: 1. first years, 2. sophomores, 3. MAST concentrators

Expected Class Size: 15

MAST 265 (F) Coral Reefs: Ecology, Threats, & Conservation

Cross-listings: MAST 265 BIOL 165 ENVI 265

Primary Cross-listing
Coral reefs are a fascinating ecosystem found throughout the world's tropical oceans. Corals can thrive in nutrient-poor oceans because of the mutualistic relationship with algal symbionts. And as a foundational species, corals provide a habitat for numerous species, possibly the highest diversity found on the planet. However, these complex and beautiful ecosystems are declining worldwide from a variety of local and global threats. In this course, we will explore coral reef ecology through an in-depth examination of the biotic and abiotic factors contributing to the ecosystem's functioning. We will also investigate the causes and consequences of threats to coral reefs, such as ocean warming, ocean acidification, and resource extraction. Finally, we will identify the many efforts worldwide to conserve coral reefs and promote their resilience. In this seminar course, you will demonstrate your proficiency through knowledge assessments, short writing reflections, a virtual coral fragmentation experiment, and a creative advocacy project. This course aims to deepen your awareness of the complex species interactions on coral reefs and the physical factors affecting coral survival while fostering hope through current conservation efforts.

Requirements/Evaluation: Four 1-paragraph discussion board post, One 20-question knowledge assessment (quiz), Three 2-page writing reflections, One lab results and discussion write-up 2-3 pages figures included, and a creative (medium is student choice) advocacy project.

Prerequisites: none, open to all students
Enrollment Limit: 20
Enrollment Preferences: 1. First-Year, 2. Sophomores

Expected Class Size: 16
Grading: yes pass/fail option, yes fifth course option

Unit Notes: Does not count for Biology major credit.

MAST 266 (S) Reading Water (WS)

Cross-listings: MAST 266 ENVI 266

Primary Cross-listing
Water has such profound and far-reaching influence on individuals, societies, and the planet that it simultaneously risks going overlooked and appearing clichéd. Human beings are made of it and need it to live, yet will die if immersed in it. It is venerated by cultures around the world, yet most people either cannot access clean water, or don't know where their clean water is piped in from. It covers the earth's surface, and has shaped it over eons, yet scientists are still not sure how it came to be here in the first place. This wide-ranging influence also presents challenges for traditional academic structures; thinking about water demands crossing times, spaces, and disciplines. This course will explore the wide-ranging and diverse ways water impacts individuals, cultures, and the environments they call home by drawing on a range of content: hydrology, literature, political theory, storytelling, geography, and more. To do this, we will also develop and examine methods of critically reading as "non-experts"--reading scientific articles as rhetorical objects and reading for scientific principles in literature, for instance--to explore what interdisciplinary thinking opens up (and
inhibits), and thus how to effectively engage with and create interdisciplinary work. The goal here is not to define water's cultural or scientific importance, or to determine which disciplines "best" combine to explain water, or to come up with humanities-based solutions to "the water crisis." Rather, these texts, and the water that flows through them will help us explore the opportunities and limits of human perceptions of the other-than-human world. It will help us consider the extent to which those perceptions both shape, and are shaped by, a seemingly simple molecule. And it will help us imagine epistemologies and ontologies that account for the ways water simultaneously flows through us, around us, and through the deep geological history of the planet. Course Texts: Tristan Gooley -- *How to Read Water* (selections) Vandana Shiva -- *Water Wars* (selections) Luna Leopold -- *Water, Rivers, and Creeks* (selections) Richard White -- *The Organic Machine* Linda Hogan -- *Solar Storms* Marc Reisner -- *Cadillac Desert* Jesmyn Ward -- *Salvage the Bones* John McPhee -- "Atchafalaya" Emmi Itäranta -- *Memory of Water* Brenda Hillman -- "The Hydrology of California"

**Class Format:** The class will be primarily discussion-based, and will ask students to lead and structure discussions. Students will have questions, reflections, and insights prepared before class, and use those to drive our in-class activities.

**Requirements/Evaluation:** 100pg of reading a week, give or take. Approx 20-25 pages of written work throughout the semester.

**Prerequisites:** None

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference to majors, and then to sophomores and juniors, respectively.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MAST 266(D1) ENVI 266(D1)

**Writing Skills Notes:** Students will write four papers of increasing complexity that will require workshopping and drafts. Each of these papers will receive forward-looking writing feedback from me. The first paper centers on paragraph-level stylistic choices, the second on argument/evidence connections, the third on genre, and the final paper synthesizes these writing skills. In addition, students' final grades will allow for revision of earlier papers to encourage and assess growth of writing skills.

Not offered current academic year

**MAST 268 (S) Debating Ocean Biodiversity at the Intersection of Science and Policy**

**Cross-listings:** ENVI 268 MAST 268

**Primary Cross-listing**

Biodiversity in the ocean is facing an onslaught of challenges, both directly and indirectly. It is likely that we are undergoing a sixth mass extinction event, where diversity of life on earth is stunningly at risk. Fortunately, however, we are also finding innovative ways to solve issues and attempt to stave off these dramatic changes to our ecosystems. These solutions potentially have both positive and negative effects. Difficult tradeoffs must be weighed and decisions must be made as people wrestle with known knowns, known unknowns, and unknown unknowns. In this class, we will explore five issues that relate to biodiversity in the ocean. You will have the opportunity to investigate one side of an issue, to collect supporting information, and to advocate for your position all while learning about current biodiversity issues in the ocean. You will be challenged to weigh conflicting evidence to find a positive outcome. Throughout the class you will practice critical thinking, evaluation, and synthesizing skills as you work with multiple viewpoints. Class time will include lecture, in-class group work, and student-led debates of timely, controversial issues. You will be assessed on summaries of information, reflections on topics, and a final project on an issue of your choice relating to ocean biodiversity.

**Requirements/Evaluation:** Five 2-page papers, participation, and a 6-8 page final paper

**Prerequisites:** none, open to all students

**Enrollment Limit:** 20

**Enrollment Preferences:** 1. first years, 2. sophomores, 3. MAST concentrators

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

Cross-listings: BIOL 231 MAST 311  

Primary Cross-listing  

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.  

Class Format: including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project  

Requirements/Evaluation: two tests, a research project, and a presentation  

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor  

Enrollment Limit: 16  

Enrollment Preferences: none  

Expected Class Size: 12  

Grading: yes pass/fail option, yes fifth course option  

Unit Notes: This course is only offered through the Williams-Mystic Maritime Studies Program located in Mystic, CT. satisfies the distribution requirement for the Biology major.  

Distributions: (D3)

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.  

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.
Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 351(D2) MAST 351(D2) PSCI 319(D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

MAST 352 (F)(S) American Maritime History (DPE) (WS)

Cross-listings: MAST 352 HIST 352

Primary Cross-listing

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

Class Format: Seminars, discussions, and field seminars

Requirements/Evaluation: Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

Prerequisites: None

Enrollment Limit: 27

Enrollment Preferences: If course over-enrolls, preference will be given to sophomores and juniors

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: Offered only at Mystic Seaport

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
MAST 352(D2) HIST 352(D2)
Writing Skills Notes: Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

Cross-listings: MAST 402 ENVI 412
Secondary Cross-listing
The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice, and they will have opportunities throughout the semester to meet with guest speakers to discuss environmental work outside the academy.
Requirements/Evaluation: active participation, discussion leading, several smaller assignments and multi-step capstone project
Prerequisites: declared major/concentration in Environmental Studies or Maritime Studies, ideally to be taken in final semester at Williams
Enrollment Limit: 14
Enrollment Preferences: Environmental Studies majors and concentrators, Maritime Studies concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Unit Notes: required course for students wishing to complete the Maritime Studies concentration
Distributions: No divisional credit  (WS)

Cross-listings: MAST 404 ENVI 404 GEOS 404

Secondary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces—wind, waves, storms, and people—that shape the coastal zone, as well as the geologic formations—sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs—that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, quizzes, and an independent research project

Prerequisites: Either GEOS 104 or GEOS 210; or permission of instructor. No prior knowledge is necessary, but this course does build on principles used to explore complex scientific challenges.

Enrollment Limit: 12

Enrollment Preferences: senior Geosciences majors, then juniors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major. This course counts toward the GEOS Group B Electives - Sediments + Life.

Experiential education, involving "learning by doing" outside the classroom, is a robust part of the Williams curriculum. In addition to the use of traditional laboratory work in the natural sciences and studio work in art, faculty have been challenging students to become engaged more personally in the Williams curriculum through field work, whether in the form of research, sustained work on special projects, or through placement with community organizations. Courses which include experiential learning provide students with opportunities to encounter firsthand the issues that they read and study about, requiring them to apply academic learning to nonacademic settings and challenging them to use their experiences in those settings to think more critically and deeply about what they are studying. Experiential courses, as defined above, range from fully integrated off-campus programs such as the Williams-Mystic Maritime Studies Program to courses involving a small field research exercise or project. The amount and nature of the experiential component(s) varies according to the instructor’s judgment. More information can be found on the Center for Learning in Action website.
Film and Media Studies is a vibrant interdisciplinary field. It studies traditional visual and audio-only forms, such as film, television and radio, as well as new media such as podcasts, video installations, interactive video projects, video games, augmented reality, animation, streaming video and other forms that will undoubtedly emerge in the future. Given the explosive growth in the variety of moving-image media, and their penetration into entertainment, art, science and public discourse, the study of film and related media must encompass a variety of theoretical approaches and must cultivate a number of specific skills in production and analysis. Production and analysis feed into each other, together providing the necessary tools for understanding why and how the moving image generates meaning in the world. The field of film and media studies thus unites numerous aspects of production, theoretical lenses of analysis and interpretation, and critical understanding of the complex relations between media and larger social and cultural forces.

Students interested in Film and Media Studies will naturally take different paths through the numerous relevant courses offered at Williams. It is however strongly recommended that they seek a balance between production courses (most of which are offered by Art Studio, Computer Science, and Theatre) and theoretical courses (offered by numerous departments in Divisions I and II). This will help students to think critically both about and with moving images, in the same way that they think with and about words.

Currently, students interested in film and media can major in the field only through the Contract Major. Guidance on course selection (with or without the aim of completing the contract major in film and media studies) can be sought from the faculty with whom students take the first couple of film and media courses. In addition, Professor Bojana Mladenovic (Philosophy) has volunteered to serve as an advisor to students interested in this field.
MAJOR—French Language and Literature

The French major seeks to provide training in literary and cultural analysis and linguistic expression through the study of selected texts from the French-speaking world. Emphasis is placed on the changes in form and subject matter from the early modern period to the contemporary era.

The major consists of nine courses. One of these courses must be the 400-level senior seminar during the student’s final year at the College. Students entering the major program at the 200-level may, with the permission of the Department, choose as part of their major program, one course in Art History, History, Philosophy, Comparative Literature or other subjects that relate to and broaden their study of French. Students entering the major program at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program.

Working with the major advisor, the student will formulate a curricular plan that will ensure balance and coherence in courses taken. Such balance and coherence will be based on the above areas of literary and cultural investigation. Prospective majors should discuss their program with the major advisor by the end of their sophomore year. This is especially imperative for students who are planning to spend a part or all of their junior year in France.

Inasmuch as all courses in French assume the active participation of each student in discussions conducted in the foreign language, regular attendance at class meetings is expected.

MAJOR—French Studies

The major in French Studies is an interdisciplinary program that provides students with the opportunity to acquire skills and knowledge embracing the cultural, historical, social, and political heritage of France and the Francophone world. The program allows for an individualized course of study involving work in several departments and the opportunity to study abroad.

Students electing the French Studies major should register with the French Studies faculty advisor during their sophomore year. At that time, they should submit a feasibility plan that articulates their projected program.

The French Studies major consists of ten courses satisfying the following requirements:

at least five RLFR courses in French language, literature, film, or culture;
the RLFR senior seminar during the student’s final year at the College;
Electives: The remaining courses needed to complete the major must be drawn from at least three different departments and relate primarily to an aspect of the cultures, histories, societies, and politics of France and the Francophone world. These courses will be selected in consultation with members of the Department of Romance Languages. Appropriate electives might include:

AFR 360 Political Thought Frantz Fanon
ARTH 254 Manet to Matisse
HIST 390 Haitian and French Revolutions
RLFR 101-450 All courses in French and Francophone language, literature, film, and culture

THE DEGREE WITH HONORS IN FRENCH

Students majoring in French may apply to be admitted to the Honors Program in French upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional
This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether they can proceed with the thesis, and if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent reading, researching (in relevant archives or with field work), and compiling a more detailed bibliography.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493-W31-494). The thesis will be written in French and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in French. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

THE CERTIFICATE IN FRENCH

The Certificate in French Language and Cultures consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher.

For students with no prior study of French, the course sequence will consist of RLFR 101-102, RLFR 103, RLFR 104, and three additional courses, with at least one of these at the 200-level or higher taken at Williams. For students starting the sequence at RLFR 103 or higher, six additional courses must be taken, including at least three French courses at the 200-level or higher. For these students starting at French 103 or higher, two electives may be taken in other departments: one elective should be in French or Francophone culture (art, literature, theatre, music) and the other in French or Francophone civilization (history, political science, philosophy).

PLACEMENT

A placement test in French is administered at Williams at the opening of the fall semester. Incoming first-year students who register for any French course above the 101 level must take this test, regardless of their previous preparation.

STUDY ABROAD

We encourage all students of French to complement their courses at Williams with the life-changing experience of studying abroad in a Francophone country. In particular, French majors and certificate students are strongly advised to complete part of the requirements for the major or certificate by studying abroad, for either a semester or a year. Most study abroad programs require applicants to have completed a fifth-semester French course in college (French 105) or higher before they go abroad. Credit for up to a total of 4 courses towards the major or certificate can be granted for either a semester or a full year abroad, at the discretion of the Romance Languages Department. Students who are planning to get credit for their study abroad courses should meet with a French faculty member in advance, to review the courses they intend to take abroad. Normally, only courses that focus on French language or Francophone literature, history, politics, art, and culture may be counted towards the major or certificate. The final assignment of course credit will be authorized in consultation with the student's French advisor, once the student has returned to Williams. Such credits can only be determined by review of course format, course materials, and evidence of satisfactory academic performance; students should thus provide not only their study abroad transcript, but retain course materials (including syllabi, papers, exams, and other projects) for potential review back at Williams. While students can gain credit for 100-, 200-, and 300-level courses during their time abroad, the 400-level senior seminar must be taken during the senior year at Williams. Early planning is essential: Students interested in studying abroad are strongly urged to attend the yearly Francophone Study Away Information Session (held each October) during their first year or sophomore year. Students will receive credit for only those study abroad programs recommended and approved by the Dean of Study Away and the Romance Languages Department. Williams has long-term affiliations with the following programs: Hamilton College (Paris), Sweet Briar College (Paris), CUPA (Paris), Middlebury College (Paris), Wellesley College (Aix-en-Provence), Boston University (Grenoble), and both SIT and CIEE (in Morocco, Senegal, and Madagascar). For more on all approved study-abroad programs, see the webpages for the French program (french.williams.edu) and Study Away (study-away.williams.edu/programs). Finally, the Department does not administer proficiency exams (for study abroad, fellowships, or job applications) to students who have not completed a French course at Williams; and most study abroad programs will not accept students who have not taken any college courses in French (at Williams) prior to their application. Students should thus plan well ahead (as early as their first year and sophomore year) to take appropriate courses at Williams, before applying for and taking part in study abroad programs in the Francophone world.
This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, and active engagement with music, video, and film, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. Conducted in French.

**Requirements/Evaluation:** Active class participation, workbook exercises and compositions, chapter tests, midterm, and final exam.

**Prerequisites:** None. For students who've never formally studied French. Students who've previously studied French (in any formal course, at any level) must take the French Placement Test in the summer or during First Days. For more info: https://french.williams.edu

**Enrollment Limit:** 18

**Enrollment Preferences:** All are welcome, but if over-enrolled, preference will be given to first-year and second-year students and those with compelling justification for admission.

**Expected Class Size:** 18

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** RLFR 101-102 is a year-long course. Credit is granted only if both semesters (RLFR 101 and 102) are taken. RLFR 101-102 students must also take the French Winter Study Course.

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** Through its focus on French and Francophone cultures around the world, this course enables students to gain both linguistic and cultural proficiency, and to engage with the great diversity of colonial and post-colonial cultures, histories, and identities in France and Belgium, Québec and Martinique, Sénégal and Morocco.

---

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, video-observations, and film-viewing, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. Conducted in French.

**Class Format:** This class meets 5 times a week from M-F. Students are required to attend class from Monday to Friday.

**Requirements/Evaluation:** participation, daily homework including weekly short writing assignments, oral and written mid-semester and final exams

**Prerequisites:** RLFR 101, or by Placement Test, or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference will go to first- and second-year students and those with compelling justification for admission. Statement of interest solicited if overenrolled.

**Expected Class Size:** 18

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

---

As a continuation of French 101-102, this dynamic first-semester intermediate course is designed to help you improve your French, while at the same
time learning more about French and Francophone cultures, politics, literature, and film. Through the active study and daily practice of listening, speaking, reading, and writing in French, you will: continue developing your communication skills and learn to express your opinions and ideas; improve your command of spoken and written French through a revision of important grammatical structures; strengthen your reading and writing skills in order to prepare you for further study of literary texts; and develop an increased vocabulary and cultural appreciation of French-speaking cultures around the world.

Class Format: This class is scheduled to meet 5 times a week. Students will meet with the instructor 3 times a week, with the French TA once a week, and will do guided group work once a week.

Requirements/Evaluation: Class participation, Homework, Regular tests, Short Writing Assignments and Final Exam.

Prerequisites: RLFR 101-102, or by Placement Test, or Permission of Instructor

Enrollment Limit: 18

Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to first-year and second-year students and those with compelling justification for admission.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

RLFR 105  (F)  Advanced French: Advanced Studies in French Language and Francophone Culture  (DPE) (WS)

In this French course, we will read and examine literary texts from the twelfth to the 19th centuries, and films from the twentieth and twenty-first centuries. In order to analyze them, we will briefly situate them in their social and historical contexts. These works will help us better understand contemporary France and explore France's colonial past. We will also learn how to write two short research paper in French in the form of an explication de texte. While the themes, authors, time periods will vary, our approach will remain the same. Three themes, love, fear, and France's colonial past, will serve as the course's organizing principles. A small section of the course will be devoted to grammar revisions in order to continue to improve our reading and language skills. Throughout the semester we will develop our writing skills in French. Conducted in French

Requirements/Evaluation: class participation, online grammar exercises, 2 four-page papers, 1 class introduction, 2 low-stakes one-page response papers
**Prerequisites:** RLFR 104, placement exam, or by permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** All are welcome, but if overenrolled, preference will be given to first- and second-year students and French major and certificate students. If necessary, a statement of interest will be solicited.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** In this course students will practice writing two short structured papers in French where there will present their interpretation of literary or visual text. Students will write two response papers.

**Difference, Power, and Equity Notes:** In this course student will examine visual and literary texts that reframe difference, power and equity in relation to race, class, gender, ethnicity, sexuality, and religion.

**RLFR 106 (S) Advanced French: Danger and Desire in French Film and Fiction** (DPE)

**Cross-listings:** COMP 107 RLFR 106

**Primary Cross-listing**

This is an advanced course in French language designed to help you improve your speaking, comprehension, reading, and writing, through the dynamic study of short literary texts and films focusing on danger and desire in nineteenth-, twentieth-, and twenty-first-century France. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French literature and cinema. As a focus for improving your French, we will examine a broad range of texts and films on danger and desire in France from 1820 to 2024, with an emphasis on passion and ambition, infatuation and seduction, betrayal and vengeance, courage and cruelty, warfare and resistance. Works to include nineteenth-century texts by Chateaubriand, Duras, Balzac, Mérimée, Flaubert, Maupassant, Zola; twentieth-century texts by Colette, Camus, Sartre, Beauvoir, Duras, Ernaux, Guibert, Quint, Lindon, Vilrouge; and twenty-first-century films by Caron, Ozon, Ducastel, Martineau, Dercourt, and Becker. Conducted in French.

**Requirements/Evaluation:** Active class participation, grammar exercises, two short papers, midterm, and final paper.

**Prerequisites:** Exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor.

**Enrollment Limit:** 16

**Enrollment Preferences:** All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

**Expected Class Size:** 16

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COMP 107(D1) RLFR 106(D1)

**Difference, Power, and Equity Notes:** This course centers on a critical examination of difference, power, and equity in French film and fiction. The content examines the effects of class, ethnicity, gender, and sexuality on social inequalities among rich and poor, soldiers and civilians, nations and colonies, men and women. The course employs critical tools to teach students how to articulate and interrogate social injustice, through reading, viewing, discussion, writing, and revision.

**Spring 2024**

SEM Section: 01  TR 9:55 am - 11:10 am  Brian Martin
This advanced course is designed to help you refine your French speaking, comprehension, and writing skills in preparation for studying abroad or for more advanced French coursework. We will explore the themes of formation (the French term that means at once education and training) and personal transformation, through fictional and autobiographical texts and films. How do individuals find their place in societies and both define and redefine their own identities? Is it possible to reflect critically on one's own formation, or is it easier to do so through works of fiction? We will also reflect on our own educational experiences as we read works by authors such as Marguerite Duras, Maryse Condé, Annie Ernaux, and Pierre Bourdieu, and watch both recent and classic films from 1950s France to 2020s Québec.

Requirements/Evaluation: One close-reading presentation and essay, one discussion-leading presentation, two analytical essays, final project

Prerequisites: Successful performance in RLFR 105 or 106, or by placement test, or permission of the instructor.

Enrollment Limit: 20

Enrollment Preferences: Students from all majors welcome, but if over-enrolled, preference will be given to French majors and certificate students.

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course explores questions of difference, power, and equity through a critical analysis of educational systems in France and the Francophone World. Although education is assumed to create equity (in both France and in North America), the content of this course will help students nuance this view and articulate how different social identities are often excluded from the power and opportunity that education seems to promise.

Not offered current academic year
RLFR 213 (F) Francophone North America in the 21st Century: Revendications, réparations et retrouvailles

This course investigates post-2000 productions from Acadie, Haiti, Louisiana, and Quebec to examine the socio-literary changes and the current phenomenon of "L'Archipel linguistique." Looking at the concept of "Retrouvailles," or the gathering of Francophone regions through literary expression in a largely Anglophone continent, we will examine how literature depicts current affairs, as well as what it can do to produce change. In addition to novels and films, we will rely on radio shows, news pieces, and tv shows to get a broader picture of the present stakes. All course discussions will be in French. Topics will include socio-political and cultural issues, (neo)colonialism, activism, linguistic insecurity, and race relations as they are addressed in visual art, music, and literature. Some of the texts covered in this course are Kukum (2019) by Michel Jean, L'Enigme du retour (2009) by Dany Laferrière, Ô Malheureuse (2019) by Ashlee Michot, Suite des sens (2023) by Jean Arceneaux, Alma (2006) by Georgette LeBlanc. Conducted in French.

Requirements/Evaluation: Evaluation is based on active in-class engagement, two short written compositions, two short presentations, and a final project.

Prerequisites: French 105 or 106, or results of the Williams College French Placement Test, or permission of instructor.

Enrollment Limit: 20

Enrollment Preferences: Preference given to French majors or French certificate students and Comp Lit majors.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Fall 2023

SEM Section: 01  TF 1:10 pm - 2:25 pm  Chase Cormier

RLFR 214 (S) Everything New is Old Again: Legacies of Medieval France

In the twelfth century, the French language shifted from a mostly ephemeral spoken language to a language that deserved to be written down. Authors began recording stories that had only been told aloud, and readers of Latin begin translating classical literature for French-speaking audiences. This huge burst of creative expression remade popular culture in ways that we can still recognize today—if we know what to look for. In this course, we will explore how our twenty-first-century passion for memes on TikTok and other social media has similar roots in twelfth-century tastes, and how the literature and culture of medieval France have shaped what we now think of as literature and pop culture. We will explore four major themes: the reinvention and adaptation of classical literature, the invention of modern romantic love, the introduction of King Arthur, and hilarious short fiction (also known as twelfth-century memes). Readings to include love poetry, short narratives both funny and serious, and longer texts about adventure and love. Conducted in French.

Requirements/Evaluation: active class participation, midterm paper, class presentation, and final project

Prerequisites: strong performance in RLFR 105; successful performance in RLFR 106; or by French placement exam; or by permission of instructor

Enrollment Limit: 16

Enrollment Preferences: French majors and certificate students; and those with compelling justification for admission

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

RLFR 216 (F) Women Behaving Badly: Deviant Women in Early Modern French Literature (DPE)

Cross-listings: RLFR 216 WGSS 216

Primary Cross-listing

Female deviance often implies resisting a dominant and oppressive patriarchal status quo embedded within cultural and historical backgrounds. This course explores female characters in early modern French literature who refuse to conform to established gender roles. Defying social constructs of femininity, through either judicious negotiations or more aggressive and violent behavior, is an important trope in the writings of both male and female authors of the seventeenth and eighteenth centuries. What constitutes deviant behavior, however, depends on social definitions of gender roles, which
evolve over time. In this course, we will first examine women's place within the historical and socio-cultural context of the Ancien Régime, which will lead to an examination of female behavior censured during the seventeenth and eighteenth centuries. We will then reflect on how we, as modern readers, perceive such deviancy at it relates to the past. Finally, we will discuss the relevance of studying deviant women in light of current events, such as the #MeToo movement, which has led to a new level of consciousness and empathy for the plight of marginalized groups. Potential readings to include Corneille's Médée, Madame de la Fayette's Princesse de Clèves, Laclos's Liaisons dangereuses, and Isabelle de Charrière's Lettre à Mistriss Henley.

**Requirements/Evaluation:** active class participation, one presentation (8-10 minutes), three to four papers (3-5 pages), and a longer final paper

**Prerequisites:** strong performance in RLFR 105; successful performance in RLFR 106; or by French placement exam; or by permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French majors and certificate students; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

RLFR 216(D1) WGSS 216(D1)

**Difference, Power, and Equity Notes:** This course focuses on a critical examination of difference, power, and equity in early modern France. Through the study of deviant women, the course thus challenges students to examine the effects of class, race, ethnicity, gender, and sexuality in narratives on women, misogyny, and criminality.

*Not offered current academic year*

**RLFR 217 (F) Fierté, Sororité, Vitalité: Trans and Non-Binary Narratives of Francophone Expression**

Ten years have passed since Time magazine announced to the world with its June 2014 cover story that the "Transgender Tipping Point" was upon us. The cover spoke to a nation confronting transgender equality as "America's Next Civil Rights Frontier." While this "tipping point" is perhaps salient in the United States, trans(gender), non-binary, and genderqueer identities have world histories with their own vocabularies, knowledge systems, and critiques of normativities. As an important branch of feminist, gender, and sexuality studies, transgender studies continue to revolutionize intersectional inquiry and activist initiatives. In this course, students will explore the genealogical roots of Francophone trans literatures, art, and media as they overlap with fields like critical race studies, Indigenous studies, medicine and technology, carcerality, care, sex work, and entertainment. This course provides an introduction trans studies and trans of color critique and focuses particularly on the contemporary period to gives students insight into the ongoing debates that structure the field and its near future. The course will also have a strong focus on genre and medium as students engage with visual art collections (Kehinde Wiley's Tahiti and Namsa Leuba's Illusions), documentary film (Véronique Kanor's Les femmes viennent aussi de Mars), serial web comics (Sophie Labelle's Assignée garçon), podcasts (Lauren Bastide's La Poudre with Paul Preciado), poetry and performance art (Kama La Mackerei's Zom-Fam), short stories (Chantal Spitz's "Joséphine" and Magali Nirina Marson's "Je me déserte..."), and novels (Ananda Devi's Le rire des déesses, Emmanuelle Bayamack-Tam's Arcadie, and Abdellah Taïa's Un pays pour mourir). Conducted in French.

**Requirements/Evaluation:** Evaluation will be based on active participation and preparation, one presentation, one short essay, one multimedia midterm project, and a final paper.

**Prerequisites:** French 105 or 106, or results of the College Placement Exam, or permission of instructor.

**Enrollment Limit:** 20

**Enrollment Preferences:** French majors and certificate students.

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

---

**RLFR 218 (S) Translating French: An Introduction to Theory and Practice**
Primary Cross-listing

What decisions do translators make in order to render texts accurately (and even beautifully) into another language? What makes one translation "better" than another? Should we consider translation as a literary genre in its own right, and should we read translated texts differently from texts in their original language? This advanced course will invite you into the world of translation studies, bringing together aspects of translation theory and technical translation methodologies in order to develop your skills as translators, readers, and speakers of French. We will translate texts from a range of genres mostly from French into English and occasionally from English into French, paying particular attention to the formal and linguistic differences that can pose problems for translators. In addition to completing an independent translation project on your choice of text or media, you will also consider your own priorities as translators, formulating and revising two translation statements over the course of the semester. This course will be taught in French, and the class format will vary between lectures, seminar-style discussions, workshops, and student presentations.

Requirements/Evaluation: Active class participation, three written translations, and final translation project (including a written translation and class presentation).

Prerequisites: Strong performance in RLFR 106, successful performance in another 200-level French course, or by placement, or by permission of the instructor.

Enrollment Limit: 20

Enrollment Preferences: Preference will be given to French majors and certificate students, and to Comparative Literature majors.

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 225  (F)  Remembering the Great War: The First World War in Literature and Film  (DPE)

Cross-listings: RLFR 225 COMP 224

Secondary Cross-listing

From 1914 to 1918, the First World War ravaged Europe and slaughtered millions of soldiers and civilians from across the globe. Known as the "war to end (all) war(s)," World War I set the stage for an entire century of military conflict and carnage. New technologies led to unprecedented violence in the trenches, killing and wounding as many as 41 million soldiers and civilians. Beyond the slaughter at the front, the Great War also led to the global influenza pandemic that claimed up to 50 million lives, and the Armenian genocide that presaged the later atrocities of the Holocaust. The war also led to massive political transformation, from the Irish Rebellion and Russian Revolution, to the collapse of the German, Russian, Austro-Hungarian, and Ottoman Empires, and the redrawing of national borders across Europe and the Middle East. Even the end of the war with the Treaty of Versailles lay the groundwork for new animosities that would lead to the Second World War just two decades later. However, the First World War also inspired great social change, from the emergence of the United States as a global leader and the founding of the League of Nations, to growing discontent with colonial rule in Asia and Africa, and greater power for women whose wartime labor influenced the post-war passage of their right to vote in countries across Europe and North America. In our study of the Great War, we will examine texts and films that bear witness to the suffering and courage of soldiers and civilians, and consider the legacy of the war in the twentieth- and twenty-first centuries. Readings to include memoirs and novels by Barbusse, Barker, Brittain, Cocteau, Graves, Hemingway, Jünger, Remarque, Wharton, Woolf; poetry by Apollinaire, Brooke, Mackintosh, McCrae, Owen, Sassoon; films by Attenborough, Boyd, Carion, Chaplin, Jeunet, Ozon, Renoir, Trumbo, Walsh, Weir; and archival materials on the roles of Williams students and faculty during the First World War. Readings and Discussions in English.

Requirements/Evaluation: Active class participation, two shorter papers (4-5 pages), a midterm, and a longer final paper (5-7 pages).

Prerequisites: None.

Enrollment Limit: 16

Enrollment Preferences: All are welcome, but if the course is overenrolled, preference will be given to Comparative Literature majors and French majors and certificate students; if the course is over-enrolled, students will submit a form online.

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)
difference, power, and equity notes: as the course description explains, this course centers on a critical examination of difference, power, and equity during WWI. the content examines the effects of class, race, ethnicity, gender, and sexuality on social inequalities among soldiers & civilians, nations & colonies, men & women. the course also employs critical tools to teach students how to articulate and interrogate the social injustices of the great war, from reading & discussion, to analytical essays & archival investigation.

RLFR 229 Black Outside the U.S.

This course explores multiple ways Black identity evolves, adapts and is experienced differently depending on location. Students analyze Black experience in the U.S., France and Senegal through a range of texts from books and social media to music and film. one key aspect of the course is a study abroad trip to Senegal, which increases cultural awareness through experiential learning. This combination of textual learning with experiential knowledge exemplifies how language, religion, gender, geography, and performance shape one’s racial identity. In the first section of the course, students investigate Black experience in the U.S., focusing on such topics as the one-drop rule, racial profiling and where mixed people fit within Black/White tensions. The second section highlights the politics of language in France. Students explore how words like “Black,” “noir” and “race” have strong political connotations in France and spur both resistance to and alliance with Black American civil rights history. In the third part of the course, students visit Dakar, Senegal, and analyze Blackness through their own observations and encounters. Their trip insights jumpstart the final focus of the course on Senegal. Students investigate the influence of French colonialism on Black identity in Senegal, which makes the two geographical experiences of Blackness very different but still forever linked.

Class Format: seminar, the course includes a required spring break trip to Dakar, Senegal, which is no additional cost to students

Requirements/Evaluation: evaluation will be based on class participation, short weekly reading responses, two 4-5 page papers, a presentation based on the spring break trip, and a final presentation including a short 2-page report

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: students who have taken other AFR courses, Francophone speakers and students

RLFR 232 (S) Liberté, Égalité, Fraternité ? Race, Gender, and Political Power in Eighteenth-Century France (DPE)

Cross-listings: RLFR 232 COMP 219

Primary Cross-listing

The French Revolution of 1789 was, to a large extent, inspired by Enlightenment thinkers such as Voltaire, Rousseau, and Diderot who promoted ideas on individual liberty, scientific progress, religious freedom, and secularism. The Revolution brought with it promises of a society freed from the abuses of an absolute monarchy. Yet as feminist thinker Olympe de Gouges would note, when France redefined its notion of citizenship after 1789, it did not include women and people of color. This course examines Enlightenment ideas that led to the French Revolution, while analyzing how those ideas failed to bring true equality. Voltaire, Buffon, and Montesquieu all advocated for the abolition of slavery, but they also held racist and sexist views, justified by pseudoscientific discourse. By further juxtaposing these thinkers with feminist and abolitionist authors such as Olympe de Gouges and Claire de Duras, we will examine how eighteenth-century female authors advocated for the rights of women. Finally, we will analyze artworks such as Marie-Guillemine Benoist's Portrait d'une nègresse (1800) and discuss how France is using such works today to reckon with its history of discrimination.

Requirements/Evaluation: active class participation, one presentation (8-10 minutes), three to four papers (3-5 pages), and a longer final paper

Prerequisites: excellent performance in RLFR 105; successful performance in RLFR 106; other RLFR 200-level courses; or by French placement exam; or by permission of instructor
Difference, Power, and Equity Notes: In its focus on Race, Gender, and Political Power, this course centers on a critical examination of difference, power, and equity in eighteenth-century France. Through the study of enlightenment and feminist thinkers and leaders, the course asks students to analyze the social, political, and discursive effects of class, race, ethnicity, gender, and sexuality in narratives on revolution, and to re-examine both past and present definitions of "liberty, equality, fraternity."

Not offered current academic year

RLFR 234 (S) Francophone Oceania: The Other Side of the Postcard

Manava i Te Ao Ma'ohi! Tongan-Fijian author Epeli Hau'ofa writes: "Centuries before Europeans entered the Pacific, in the days when boundaries were not imaginary lines in the ocean but points of entry that were constantly negotiated and even contested, the sea was open to anyone who could navigate a way through." Of critical importance to Oceanian communities and scholarship today is the project of remembering and re-membering the stories, knowledges, travel routes, and more-than-human ecologies that have crisscrossed the vast aqueous landscapes of this "other" side of the globe. This course is a comprehensive survey of the literature, modern history, and aesthetics that inform the field of contemporary Francophone Oceanian Studies. Major concepts in Indigenous Oceanian philosophy and genealogies of thought (from Ma’ohi, Kanak, and Ni-Vanuatu communities in particular), European imperialism and racial politics, gender and sexuality, maritime knowledges, the French nuclear agenda and climate fiction will be studied. Students will use multimedia formats and storytelling techniques to cross-examine narrative development, philosophy, and Oceanian history from a comparative perspective. Texts may include: Déwé Gorodé's Sous les cendres des conques (1985), Chantal T. Spitz's L’île des rêves écrasés (1991), Claudine Jacques' L’Âge du perroquet-banane, Parabole païenne (2002), Ari’irau's Matamimi ou la vie nous attend (2006), Nicholas Kurtovic'h's Dans le ciel splendide (2015), Titaua Peu's Pina (2016), and Titaua Porcher's Hina, Maui et compagnie (2018) among others. Conducted in French.

Requirements/Evaluation: Evaluation will be based on active participation and preparation, two short presentations, a guided journal, and a final project.

Prerequisites: RLFR 105 or 106; or results of the College Placement exam; or permission of Instructor.

SEMC 260 (F) Francophone Graphic Novels (DPE)

Cross-listings: RLFR 260 COMP 260

Primary Cross-listing

In this class we will read contemporary graphic novels and bandes dessinées from Côte d'Ivoire, Morocco, Guadeloupe, Lebanon, France, and Québec to analyze how they approach subjects such as colonial history, migration and discrimination, gender and sexuality, and representations of disability and the racialized body. We will pay particular attention to the visual form and the critical theory of the graphic novel to further understand why this hybrid genre has become so popular and widespread, and how it is shaping conversations about difference and power in the Francophone world. Conducted in French.

Requirements/Evaluation: weekly 1-page response papers, two short 4-5-page papers, presentation and final 7-8-page research paper
Prerequisites: RLFR 105, 106, by placement or by permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and certificate students, Comparative Literature majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 260(D1) COMP 260(D1)

Difference, Power, and Equity Notes: The readings in this course focus on French colonial and Francophone postcolonial history, contemporary migration, and structures of discrimination built on race, religion, gender, and ableism in the French-speaking world. We will explore how graphic novels in their hybrid visual/verbal forms propose different ways of shaping the dynamics and the discourse of difference and power.

Not offered current academic year

RLFR 262 (S) Lâche pas la patate: Francophone Culture in Louisiana

The expression "Lâche pas la patate," or "don't drop the potato" is a way of saying "don't ever stop speaking French in Louisiana." This begs the question: why preserve a language? In Louisiana, Francophone activists have been fighting to preserve their unique dialect of French--or what Professor Barry Jean Ancelet calls "the problem language"--for decades. By promoting the education and use of French in the state, what else are they preserving? From historical, thematic, and literary perspectives, this course is designed to provide an answer to such questions through the examination of Francophone Louisiana from its foundation as a French colony to today. In this course, we rely on contemporary publications and media in French to get a broader picture of the current stakes in Francophone Louisiana. Topics will include sociolinguistics, race relations, creolization, activism, and Americanization. Primary sources include rituals, cartoons, films, memes, music, literature, and cuisine. Texts and media (such as films and podcasts) included are Les Aventures de Boudini et ses amis, Tout bec doux, Ô Malheureuse, Film Quest, L'Habitation Saint-Ybars, Bayou zen, Finding Cajun, Mille misères La Veillée, Charrer-Veiller, Feux Follets, Istrouma : Manifeste Houma. Conducted in French.

Requirements/Evaluation: Evaluation is based on active in-class engagement, a mid-term exam, two short presentations, and a final research project.

Prerequisites: French 105 or 106; or results of the College Placement Test, or permission of instructor.

Enrollment Limit: 20

Enrollment Preferences: French majors/certificate students, comp lit majors.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

RLFR 300 (S) The Banlieue in Literature, Music, and Film (DPE) (WS)

Cross-listings: COMP 336 AFR 339 RLFR 300

Primary Cross-listing

The banlieue looms large in the French collective imagination. From its origins in medieval law, the term banlieue at the end of the 20th century has taken on multiple, at times overlapping, but almost exclusively negative meanings. It designates a peripheral geographical space often in contrast to its city center, social exclusion, "urban culture"--as in Hip Hop-produced within that space, and last but not least the symbolic bias through which its inhabitants are viewed (Vieillard-Baron). In this course, we will examine various constructions of the banlieue in French music, a manifesto, film, blogs, and literature to focus on the analytical, contestatory and affirmative dimensions of these narratives. Two decades after the film La haine, and ten years after the riots, how are filmmakers, artists, authors, and scholars of the banlieue reimagining and reframing the banlieue? What do current depictions of banlieues in the French media tell us about the State, French politics, and the state of French politics? What do "banlieue films" and "banlieue lit" tell us about the banlieue? In this course, conducted in French, we will read, watch, and listen to various constructions of the banlieue in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.
**Requirements/Evaluation:** 3 thesis five-page research papers, 2 start-of-the-class brief presentations, active participation in class discussions and mini-conference on the banlieue (class final project).

**Prerequisites:** RLFR 105 and above

**Enrollment Limit:** 14

**Enrollment Preferences:** French majors and certificate students, Africana and Comparative literature students

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 336(D1) AFR 339(D1) RLFR 300(D1)

**Writing Skills Notes:** To hone their research and writing skills (and prepare for their conference on the banlieue), students will write three research papers (with thesis statement and subheadings) from which they will receive professor feedback.

**Difference, Power, and Equity Notes:** This course, Banlieue in Lit, Music, Film fosters difficult but carefully framed conversations about race, class, gender, citizenship, housing segregation, discursive practices, immigration and belonging in contemporary France and how identities and power relationships are expressed in banlieue film, literature and French hip hop music.

**Attributes:** FMST Core Courses

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 308(D1) RLFR 307(D1)

**Difference, Power, and Equity Notes:** This course examines the French colonial history and postcolonial futures of five major Francophone cities and pays particular attention to questions of representation of class, race and gender in the historical, literary and visual record.

Not offered current academic year

---

**RLFR 318 (F) Twentieth-Century French Novel: From Adversity to Modernity** (DPE)

**Cross-listings:** RLFR 318 COMP 318

**Primary Cross-listing**

In his futurist novel *Paris in the Twentieth Century* (1863), Jules Verne envisions an era of technological superiority, complete with hydrogen cars and high-speed trains, televisions and skyscrapers, computers and the internet. But in Verne’s vision of modernity, technological sophistication gives way to intellectual stagnation and social indifference, in a world where poetry and literature have been abandoned in favor of bureaucratic efficiency, mechanized surveillance, and the merciless pursuit of profit. To contest or confirm this dystopic vision, we will examine a broad range of
twentieth-century novels and their focus on adversity and modernity. In a century dominated by the devastation of two World Wars, the atrocities of colonial empire, and massive social and political transformation, the novel both documented and interrogated France's engagement with race and ethnicity, gender and sexuality, colonialism and immigration. Within this historical context, we will discuss the role of the novel in confronting war and disease, challenging poverty and greed, and exposing urban isolation and cultural alienation in twentieth-century France. Readings to include novels by Colette, Genet, Camus, Duras, Ernaux, Guibert, Begag. Lectures to include discussions of Gide, Proust, Sartre, Beauvoir, Cixous, Foucault, Jelloun, Djébar. Films to include works by Fassbinder, Annau, Lioret, Ducastel, Martineau, Téchiné, Charef. Conducted in French.

Requirements/Evaluation: Active class participation, two shorter papers, a midterm, and a longer final paper.

Prerequisites: A 200-level course (at Williams or abroad), or by placement test, or permission of the instructor.

Enrollment Limit: 16

Enrollment Preferences: French majors and certificate students, Comparative Literature majors, and those with compelling justification for admission. Seniors returning from Study Abroad (in France or other Francophone countries) are particularly welcome.

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 318(D1) COMP 318(D1)

Difference, Power, and Equity Notes: As the course description explains, this course focuses on a critical examination of difference, power, and equity in twentieth-century France. The course also employs critical tools to teach students how to examine the roles of race and ethnicity, gender and sexuality, colonialism and immigration, in the French novel's critical representation of war and disease, poverty and greed, urban isolation and cultural alienation during the twentieth-century.

Fall 2023

SEM Section: 01    TR 9:55 am - 11:10 am     Brian  Martin

RLFR 320  (F) Transcending Boundaries: The Creation and Evolution of Creole Cultures  (DPE)

Cross-listings:  RLFR 320 GBST 306 AFR 306 COMP 310

Primary Cross-listing

Born out of a history of resistance, Creole cultures transcend racial boundaries. This course provides a comprehensive framework for understanding the creation of Creole nations in various parts of the world. Beginning with an examination of the dark history of slavery and French colonialism, we will reflect upon the cultural transformation that took place when people speaking mutually unintelligible languages were brought together. We will then delve into the study of how deterritorialized peoples created their languages and cultures, distinct from the ones imposed by colonizing forces. As we journey from the past to the present, we will also explore how international events such as a worldwide pandemic, social justice, racism, and police brutality are currently affecting these islands. Potential readings will include prominent authors from different Creole-speaking islands, including Frantz Fanon and Aimé Césaire from Martinique, Maryse Condé from Guadeloupe, Ananda Devi from Mauritius and Jacques Roumain from Haiti. Conducted in French with introductions to different creoles.

Requirements/Evaluation: Active class participation, three papers (of 3-4 pages each), presentation, final research paper (7-8 pages)

Prerequisites: Any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: All are welcome. If overenrolled, preference will be given to French majors and certificate students; Comparative Literature majors; Africana Studies students; Global Studies students; and those with compelling justification for admission

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 320(D1) GBST 306(D2) AFR 306(D2) COMP 310(D1)

Difference, Power, and Equity Notes: This course qualifies for a Difference, Power, and Equity requirement because it examines the history of slavery as related to French colonialism in different parts of the world. It also considers International issues of social justice, racism and police brutality.
RLFR 360 (S) Repairing a Broken World: Intro to North African Contemporary Art (DPE)

Cross-listings: ARTH 560 RLFR 360 ARAB 360 COMP 361 ARTH 460

Primary Cross-listing

How do artists respond to a world in crisis? How does visual art engage violent histories, injured bodies, social injustice and ecological disaster? In this course we will explore the political and ethical concept of repair as it emerges in the work of contemporary North African visual artists. Repair is both a material and symbolic transformational practice of putting together something that is torn or broken. It is never complete, nor does it redeem a history of harm or violence. Rather repair is an invitation: a bringing of people, histories, objects, buildings, feelings and geographies into relation with one another in order to link worlds that have been splintered and separated. It is also a call to imagine other futures. North African contemporary artists have deeply engaged in this type of repair work, attending to colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity and broken transmission of memory. We will dive into the work of individual artists as well as collectives while reading theoretical texts about broken-world thinking, reparative epistemology, alternative archives, and material reparations.

Class Format: Section 1 is conducted entirely in French. Section 2 is conducted in English (with the option of selected reading in French). Students are welcome to sign up for either section but students taking the course for RLFR credit must register for section 1.

Requirements/Evaluation: For undergrads: Active participation, weekly glow posts, 5-page mid-term paper, 10-12 page final paper and presentation. For grad students: Active participation, weekly glow posts, 5-page mid-term paper, and 20-page final paper and presentation.

Prerequisites: For RLFR students, any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18/sec

Enrollment Preferences: If over-enrolled, preference will be given to RLFR, ARAB, ARTH and COMP majors, and only 4 spots will be offered to Grad Art students.

Expected Class Size: 15/sec

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTH 560(D1) RLFR 360(D1) ARAB 360(D1) COMP 361(D1) ARTH 460(D1)

Difference, Power, and Equity Notes: This course critically examines art work that engages colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity.

Not offered current academic year

RLFR 378 (S) Proust's "In Search of Lost Time"

Cross-listings: RLFR 378 COMP 378 ENGL 378

Secondary Cross-listing

In this seminar we will study Marcel Proust's novel-sequence In Search of Lost Time, widely regarded as one of the most transformative works of 20th-century fiction. The first-person narrative chronicling the life of a fictional figure bearing a close relationship to Proust himself spans several decades from the late 19th to the early 20th century, centering on French high society as it enters the modern world, shaped by historical events such as the Dreyfus Affair and the First World War. Proust's exploration of the consciousness of the protagonist, an aspiring writer, has led readers to see him as a philosopher of aesthetics, of the psyche, of time and memory, and of the nature of desire. His narrative ranges from meditations on such subjects to social satire to absorbing and sometimes soap opera-like plots exploring upward and downward social mobility and a wide array of sexual entanglements, straight and queer. Through his fluent prose, Proust renders the vicissitudes of desire, loss, and joy, of betrayal and emotional intransigence, and tests the power of memory and the imagination to recapture the past. Because of the length of In Search of Lost Time, the emphasis of the course will be more on reading (about 7 to 7½ hours per week) and less on writing (four or five 1½-page journal entries and a final paper of 8-10 pages) than the average 300-level course; and approximately one-third of the sequence will be bracketed as optional reading.

Requirements/Evaluation: Regular class participation, several 2-page journal entries, and a final paper of 8-10 pages

Prerequisites: a 100-level ENGL course, a score of 5 on the AP English Lit exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 22
Enrollment Preferences: English, French, and Comparative Literature majors
Expected Class Size: 16-18
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 378(D1) COMP 378(D1) ENGL 378(D1)
Attributes: ENGL Literary Histories C

Spring 2024
SEM Section: 01  MR 2:35 pm - 3:50 pm  Stephen J. Tifft

RLFR 410  (F)  Senior Seminar: Movement and Migration  (DPE)
How do movement and migration produce and disrupt constructions of identity, home, and the nation? In the context of movement and migration, how
is place is imagined, experienced and remembered? What are the relationships between movement and containment, flight and freedom? Over the
course of the semester, we will examine literary texts, film and visual art from French-speaking communities that focus on: the immigration experience
in France, the construction of a Francophone Atlantic identity, internal migration between rural and urban spaces, clandestine migration between Africa
and Europe, population displacement due to war, and the possibility of creating portable or nomadic places of memory. Works by Chamoiseau,
Glissant, Diome, Condé, Maffre, Pineau, and Binebine among others. Conducted in French.
Requirements/Evaluation: Weekly 1-page response papers, 5-page mid-term paper and a final 10-page research paper and presentation.
Prerequisites: Any 200-level RLFR course, or by permission of instructor
Enrollment Limit: 15
Enrollment Preferences: Senior French majors and students completing the certificate in French, but open to advanced students of French.
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: Students will explore how literature, film and art narratives on migration and movement challenge (and also
sometimes replicate) discourses of exclusion and structures of discrimination based on race and ethnic identity and gender. While the course focuses
on French-speaking communities and people, we will think broadly about difference and power as they relate to movement, flight and freedom.
Not offered current academic year

RLFR 414  (S)  Senior Seminar: Coming of Age: French and Francophone Childhood and Adolescent Film  (DPE)
Cross-listings: RLFR 414 COMP 414
Primary Cross-listing
Like the bildungsroman in literature, the coming of age story is a genre in itself in cinema. In this senior seminar, we will watch, discuss, and analyze
French and Francophone childhood and adolescent narrative films whose protagonists bring into focus larger issues such as racial discrimination,
class, gender, sexual identity, social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking. We
will watch seminal films by Euzhan Palcy, the Dardennes brothers, Céline Sciamma, Férid Boughedir, François Truffaut, Faïza Ambah, and Raoul
Peck.
Requirements/Evaluation: three three-page response papers; thesis statement, methodology, and works cited list on one page; 2 low-stakes
presentations and one script of a video essay or academic journal "special issue" essay
Prerequisites: 200-level RLFR courses
Enrollment Limit: 19
Enrollment Preferences: French and Comparative Literature majors and certificate students
Expected Class Size: 10
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 414(D1) COMP 414(D1)

Difference, Power, and Equity Notes: This course qualifies for a Difference, Power, and Equity requirement because the films we focus on racial inequality, class, gender, sexual identity, post slavery society in the Caribbean, lack of social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking.

Not offered current academic year

RLFR 415 (S) Breaking the Silence: Women Voices, Empowerment and Equality in the Francophone World (DPE)

Cross-listings: COMP 415 WGSS 415 RLFR 415

Primary Cross-listing
How have Francophone women challenged the historical and current effects of colonialism and gendered racism in France and the Francophone world? How have Francophone women writers challenged the status quo of patriarchy and advocated for change? Beginning with political activist Olympe de Gouges, who published *Le droit de la femme et de la citoyenne* (1791) challenging gender inequality in France, we will then examine Claire de Duras' portrayal of the intersection between race and gender, Simone de Beauvoir's challenge to traditional femininity and gender roles, and Ananda Devi's intimate portrayal of violence against women in post-colonial societies. Throughout the course, we will use a feminist and intersectional lens to analyze how Francophone women writers have broken the silence then and now.

Requirements/Evaluation: Three 3-4-page response papers, a final 10-page research paper, presentation and active participation.

Prerequisites: Any 200-level RLFR course, or by permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Senior French majors and students completing the certificate in French, but open to advanced students of French; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 415(D1) WGSS 415(D2) RLFR 415(D1)

Difference, Power, and Equity Notes: In its focus on Race, Gender, and Political Power, this course centers on a critical examination of difference, power, and equity. This course uses a feminist and intersectional lens to analyze how French and Francophone women writers have challenged the historical and current effects of colonialism and gendered racism.

Spring 2024
SEM Section: 01    MW 11:00 am - 12:15 pm     Preea Leelah

RLFR 493 (F) Senior Thesis: French

HON Section: 01    TBA     Leyla Rouhi

RLFR 494 (S) Senior Thesis: French
French senior thesis; this is part of a full-year thesis (493-494).

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)
RLFR 497 (F) Independent Study: French
French independent study.
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

RLFR 498 (S) Independent Study: French
French independent study.
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

RLFR 511 (F) Intensive French Grammar and Translation
This course is designed to offer students a thorough and systematic review of sentence structures and grammar to develop a reading knowledge of French. Through this intensive study, students will learn to decipher the subtleties of the written language, and as they become more confident they will start translating a variety of short excerpts. Students are also expected to learn and develop a wide lexical range centered on art history and criticism, but not limited to it.
Class Format: classes meet twice weekly and are conducted in English
Requirements/Evaluation: class participation, papers, a midterm, and a final examination
Prerequisites: a strong interest and need to learn French
Enrollment Preferences: although this course is to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll by permission of the instructor
Grading: pass/fail option only
Distributions: (D1)
Not offered current academic year

RLFR 512 (S) Readings in French Art History and Criticism
This course is designed to provide Graduate Program students and interested others with knowledge of French acquired through translation and interpretation. The core of this course is based on the reading and translating of a variety of critical works covering different periods and genres in the field of art history. The material read will be analyzed in form and content, translated or summarized, in order to develop the skills and understand the techniques necessary for reading French accurately. Grammar will be reviewed in context.
Requirements/Evaluation: evaluation is based on class participation, papers, a midterm, and a final examination
Prerequisites: RLFR 511 or permission of instructor; undergraduates are welcome with permission of instructor
Grading: pass/fail option only
Distributions: (D1)
Not offered current academic year
MAJOR

The Geosciences major offers an understanding of the evolution of our planet and its interacting global systems. In this era of global change, geoscience provides the tools that can help us learn to live sustainably with our environment, and appreciate our place within the vastness of Earth history. Forces within the Earth create mountain ranges and ocean basins and drive the movements of continents. Wind, water and ice shape the surface of the Earth, making and changing the landscapes around us. Sedimentary rocks and the fossils within them teach us how life and climate have evolved over the vastness of time.

Geosciences graduates have a wide range of career options, both with and without graduate training. The many choices include environmental consulting, hazard assessment, hydrology, geology, the energy and mining industries, outdoor education, and research and teaching in universities, colleges, and secondary schools. Many students choose to double-major in fields as diverse as Art, Economics, History, Physics, Mathematics, English, and Philosophy, and often find jobs where they can apply the synergies of their Geosciences double major. No matter what field they enter, all our Geosciences graduates pursue their lives and careers with a deeper appreciation for the natural world around them.

The major is designed to provide a solid grounding in the geosciences while being adaptable enough to accommodate diverse paths driven by student interests. There are no required courses, but students work through the menu below, which allows a lot of scheduling flexibility.

The requirements for the Geosciences major were revised in 2022. The new requirements are immediately below, and the old requirements follow. Students who entered Williams before fall 2020 are under the old requirements. Students who entered Williams in fall 2020 and after are under the new requirements. Both sets of requirements follow. If you have questions about the major, or how the different requirements apply to you, please contact the Geosciences Chair.

Geosciences major requirements for students who are entering Williams in or after fall 2020 or after:

The Geosciences major requires a minimum of nine courses, distributed by course level and topic group; one course can fulfill both a course level and topic group requirement. To complete the minimum nine courses, students can add electives at any level, as long as they have a GEOS prefix, and the total number of 100 levels does not exceed two.

Course Level Requirements:

At least one and at most two 100-level courses:

GEOS 100 Introduction to Weather and Climate
GEOS 101 Co-Evolution of Earth and Life
GEOS 102 An Unfinished Planet
GEOS 103 Global Warming and Environmental Change
GEOS 104 Oceanography
GEOS 107 Astrobiology

At least two 200-level courses selected from this group:

GEOS 201 Field Methods and Structural Geology
GEOS 202 Mineralogy
GEOS 205 Economic Geology and Earth Resources
GEOS 207 The Geoscience of Epidemiology in Public Health
GEOS 208 Understanding the Modern Carbon Cycle Through Stable Isotopes
MAST 211/GEOS 210 Oceanographic Processes (at Mystic)
GEOS 212 Paleobiology
GEOS 214 Mastering GIS
GEOS 215 Climate Changes
GEOS 217 Planets and Moons
GEOS 255 Environmental Observation

At least two 300-level courses selected from this group:

- GEOS 301 Geomorphology
- GEOS 302 Sedimentology
- GEOS 303 Igneous and Metamorphic Petrology
- GEOS 308 Life on Mars?
- GEOS 309 Modern Climate
- GEOS 324 Corals and Sea Level

At least one of the following 400-level courses:

- GEOS 401 Global Tectonics and the Rise of Mountains
- GEOS 404 Coastal Processes and Geomorphology
- GEOS 405 Geochemistry: Understanding Earth’s Environment
- GEOS 410 The Cryosphere
- GEOS 411 Geobiology
- GEOS 414 Reading Deep Time

Topic Group Requirements: Courses taken for the major must also include at least one and preferably two courses from each of the following three groups at the 200, 300, or 400 level. Note that 100-level courses do not fulfill topic group requirements.

Climate and Oceans (Group A electives), at least one and preferably two:

- GEOS 208 Understanding the Modern Carbon Cycle Through Stable Isotopes
- GEOS 215 Climate Changes
- GEOS 227T Climate Data Analysis
- GEOS 226T Ocean Circulation and Climate
- GEOS 255 Environmental Observation
- GEOS 309 Modern Climate
- GEOS 405 Geochemistry: Understanding Earth’s Environment
- GEOS 410 The Cryosphere
- GEOS 411 Geobiology

Sediments and Life (Group B electives), at least one and preferably two:

- GEOS 207 The Geoscience of Epidemiology in Public Health
- GEOS 212 Paleobiology
- GEOS 301 Geomorphology
- GEOS 302 Sedimentology
- GEOS 308 Life on Mars?
- GEOS 312T Mass Extinctions: Patterns and Processes
- GEOS 414 Reading Deep Time
- GEOS 404 Coastal Processes and Geomorphology
- GEOS 411 Geobiology
Solid Earth (Group C electives), at least one and preferably two:

GEOS 201 Field Methods and Structural Geology
GEOS 202 Mineralogy
GEOS 205 Economic Geology and Earth Resources
GEOS 217 Planets and Moons
GEOS 220T Evolution of and on Volcanic Islands
GEOS 250T Climate, Tectonics and Erosion
GEOS 303 Igneous and Metamorphic Petrology
GEOS 401 Global Tectonics and the Rise of Mountains

Geosciences major requirements for students who entered Williams prior to fall 2020:

At least one and at most two 100-level courses:

GEOS 100 Introduction to Weather and Climate
GEOS 101 Co-Evolution of Earth and Life
GEOS 102 An Unfinished Planet
GEOS 103 Global Warming and Environmental Change
GEOS 104 Oceanography
GEOS 107 Astrobiology

At least two 200-level courses selected from this group:

GEOS 201 Field Methods and Structural Geology
GEOS 202 Mineralogy
GEOS 205 Economic Geology and Earth Resources
MAST 211/GEOS 210 Oceanographic Processes (only offered at Williams-Mystic)
GEOS 212 Paleobiology
GEOS 214 Mastering GIS
GEOS 215 Climate Changes
GEOS 217 Planets and Moons
GEOS 255 Environmental Observation

At least two 300-level courses selected from this group:

GEOS 301 Geomorphology
GEOS 302 Sedimentology
GEOS 303 Igneous and Metamorphic Petrology
GEOS 309 Modern Climate
GEOS 314 Analytical Historical Geology
GEOS 324 Corals and Sea Level

At least one of the following 400-level courses:

GEOS 401 Global Tectonics and the Rise of Mountains
GEOS 404 Coastal Processes and Geomorphology
GEOS 405 Geochemistry: Understanding Earth’s Environment
GEOS 410 The Cryosphere
GEOS 411 Geobiology

To complete the minimum nine courses, students can add electives at any level, as long as they have a GEOS prefix, and the total number of 100 levels does not exceed two. In addition, majors must take at least two courses from each of the three disciplinary groupings (i.e. Climate & Oceans, Sediments & Life, and Solid Earth).

Climate and Oceans:
GEOS 100 Introduction to Weather and Climate
GEOS 104 Oceanography
MAST 211/GEOS 210 Oceanographic Processes (only offered at Williams-Mystic)
GEOS 215 Climate Changes
GEOS 221T Climate Science and Politics
GEOS 255 Environmental Observation
GEOS 309 Modern Climate
GEOS 324 Corals and Sea Level

Sediments and Life:
GEOS 101 Co-Evolution of Earth and Life
GEOS 103 Global Warming and Environmental Change
GEOS 107 Astrobiology
GEOS 212 Paleobiology
GEOS 301 Geomorphology
GEOS 302 Sedimentology
GEOS 312T Mass Extinctions
GEOS 314 Analytical Historical Geology

Solid Earth:
GEOS 102 An Unfinished Planet
GEOS 202 Mineralogy
GEOS 201 Field Methods and Structural Geology
GEOS 205 Economic Geology and Earth Resources
GEOS 217 Planets and Moons
GEOS 220T Evolution of and on Volcanic Islands
GEOS 250T Tectonic Geomorphology and Landscape Evolution
GEOS 303 Igneous and Metamorphic Petrology

PREPARATION FOR GRADUATE SCHOOL
Although many of our majors take geoscience jobs after graduation, many choose to go to graduate school, and most graduate programs will expect students to have a background in mathematics as well as a year or so of study in related sciences, in addition to the requirements of the Geosciences major. Students considering graduate work in geosciences should therefore consult with faculty to ensure that they plan wisely. The selection of outside courses will depend on the field in which a student wants to specialize. Graduate programs in solid-earth geosciences commonly expect entering students to have taken courses in chemistry. For those going into environmental geosciences, courses in chemistry, computer science and/or statistics are recommended. For those considering geobiology programs, biology courses are important. For students entering planetary geology, physics is recommended.

THE DEGREE WITH HONORS IN GEOSCIENCES
The degree with honors in Geosciences provides students with an opportunity to undertake an independent research project under the supervision of a faculty member, culminating in a thesis that demonstrates outstanding achievement of an original and innovative nature. In addition to the major requirements listed above, those who are candidates for the degree with honors take the following sequence in the Fall, Winter Study, and Spring of their senior year:

GEOS 493-031-494 Senior Research and Thesis

The principal considerations in admitting a student to a program of independent research are interest and motivation, mastery of fundamental material and skills, and ability to pursue independent study successfully. Interested students should talk to members of the department about project options at any time, but generally no later than January of the Junior year.

STUDY AWAY
Students planning to study off-campus should meet as early as possible with the Department Chair to plan and to discuss how potential courses might be used in the major. Although most study-away programs do not offer geoscience courses, there are some that dovetail well with Geosciences.
Examples include the Williams-Mystic program, the Frontiers Abroad program at Canterbury University in New Zealand, and the program at the University of Otago in New Zealand. Courses offered at Norwegian Technical Universities and at several universities in the United Kingdom have also been accepted. Up to two geoscience courses taken away from Williams can be counted toward the nine-course major. Be sure to meet with a Geosciences faculty advisor or Department Chair to discuss your plans and ideas for off-campus work.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Generally not until after a student returns and can provide course material for review (e.g. Syllabus and/or completed work such as exams, portfolios, lab reports and the like).

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Complete syllabus and course description, including readings, assignments, evaluation criteria.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. A maximum of two courses can be credited toward major requirements.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Students should consult with the chair or other department faculty members to plan ahead and make sure that requirements can be met.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

GEOS 100  (S)  Introduction to Weather and Climate  (QFR)

Cross-listings:  GEOS 100 ENVI 100

Primary Cross-listing

How is it that we have such a hard time predicting if it’s going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore how fundamental laws of physics determine why air moves and changes, creating the wind, clouds, precipitation, and extreme events that form our weather. Building off of our understanding of the atmosphere, we’ll look at longer time scales to develop an understanding of earth’s climate system, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will use weather and climate models to learn how scientists and meteorologists predict future conditions. Labs include benchtop experiments, data analysis projects, and self-scheduled meteorological observations. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation:  weekly problem sets, lab assignments, midterm exam, and final exam

Prerequisites:  none
Enrollment Limit: 40
Enrollment Preferences: first year and second year students, Geosciences majors
Expected Class Size: 60
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
GEOS 100(D3) ENVI 100(D3)

Quantitative/Formal Reasoning Notes: This course will have regular problem sets which require substantial quantitative reasoning. Labs will require analysis, presentation, and explanation of quantitative data, and exams will require some quantitative problem solving.

LAB Section: 03 R 12:30 pm - 2:30 pm Alice C. Bradley

GEOS 101 (F) The Co-Evolution of Earth and Life
Cross-listings: GEOS 101 ENVI 105

Primary Cross-listing

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will examine the relationship between Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system and learn about the dramatic changes that have occurred throughout the history of our planet. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve and how did this biological event lead to profound changes in the world's oceans and atmospheres? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and spread of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth's dynamic history.

Class Format: one laboratory per week plus one all-day field trip
Requirements/Evaluation: lab assignments, weekly quizzes, and a final independent project
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: first year and second year students, Geosciences majors
Expected Class Size: 30
Grading: yes pass/fail option, no fifth course option
Distributions: (D3)

LAB Section: 03 W 1:00 pm - 3:00 pm Phoebe A. Cohen
GEOS 102 (S) An Unfinished Planet

The Earth is a work-in-progress, an evolving planet whose vital signs—as expressed by earthquakes, volcanic eruptions, and shifting plates—are still strong. In a geological time frame, nothing on Earth is permanent: ocean basins open and close, mountains rise and fall, continental masses collide and pull apart. There is a message here for all of us who live, for an infinitesimally brief time, on the moving surface of the globe. This course uses the plate tectonics model—one of the fundamental scientific accomplishments of the past century—to interpret the processes and products of a changing Earth. The emphasis will be on mountain systems (on land and beneath the oceans) as expressions of plate interactions. Specific topics include the rocks and structures of modern and ancient mountain belts, the patterns of global seismicity and volcanism, the nature of the Earth’s interior, the changing configurations of continents and ocean basins through time, and, in some detail, the formation of the Appalachian Mountain system and the geological assembly of New England. Readings will be from a physical geology textbook, a primary source supplement, selected writings of John McPhee, and references about the geology of the Northeast. This course is in the Solid Earth group for the Geosciences major.

Class Format: lecture three hours per week and lab (several involving field work) two hours per week; one required all-day field trip on the last Monday of the semester to the Connecticut Valley and the highlands of western Massachusetts

Requirements/Evaluation: three hour-tests and weekly lab work

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 40

Grading: yes pass/fail option, no fifth course option

Distributions: (D3)

Attributes: ENVI Natural World Electives EXPE Experiential Education Courses

Not offered current academic year

GEOS 103 (F) Global Warming and Environmental Change

Cross-listings: ENVI 103 GEOS 103

Primary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and wildfires, the natural processes that shape Earth’s surface are tied to temperature and precipitation. People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with geography. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate. We will also visit and engage with Black communities and community leaders across New England who are grappling with the unjust distribution of resources to mitigate climate impacts and who have been disproportionate bearers of environmental risk.

Requirements/Evaluation: written reports from laboratories and readings, class participation, a midterm and final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first year and second year students, Geosciences majors and Environmental Studies majors and concentrators

Expected Class Size: 48

Grading: yes pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 104 (F) Oceanography
Cross-listings: ENVI 104 MAST 104 GEOS 104

Primary Cross-listing

The oceans cover three quarters of Earth’s surface, yet oceanography as a modern science is relatively young: the first systematic explorations of the geology, biology, physics and chemistry of the oceans began in the late 19th century. This introduction to ocean science includes the creation and destruction of ocean basins with plate tectonics; the source and transport of seafloor sediments and the archive of Earth history they contain; currents, tides, and waves; photosynthesis and the transfer of energy and matter in ocean food webs; the composition and origin of seawater, and how its chemistry traces biological, physical and geological processes; oceans and climate change; and human impacts.

Class Format: three 50-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast of New England.

Requirements/Evaluation: lab activities (25%), homework (25%), quizzes (5%), three exams (45%)

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first year and second year students, Geosciences majors, Maritime Studies concentrators

Expected Class Size: 48

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course and GEOS 110 Oceans and Society cannot both be taken for credit.

Distributions: (D3)

GEOS 107 (F) Astrobiology

Cross-listings: GEOS 107 ASTR 107

Primary Cross-listing

Astrobiology is the study of the origin, evolution, and distribution of life in the universe. As such it is an inherently interdisciplinary field, incorporating all of the basic natural sciences: biology, chemistry, physics, astronomy, and the earth sciences, as well as aspects of philosophy, sociology, and engineering. Questions we will seek answers to in this class include: How, why, when, and where did life evolve on Earth, and what does that tell us about how it might evolve elsewhere? What are the chances that there is life on other planets and moons in our solar system, and why? Are there habitable planets elsewhere in the universe, and will we ever truly know if any of them contain life? We will approach these questions using a combination of lectures, activities, labs, homework assignments, and visits from some of the country's leading Astrobiology researchers. Examples of lab and homework activities include exploring our definition of life by making observations about living and non-living systems, examining evidence for ancient habitable environments in rocks, and modeling chemical fingerprinting tools used by Mars rovers. Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will present a mock NASA mission proposal. This course requires no previous experience in the sciences. This course is in the Sediments and Life group for the Geosciences major.

Class Format: Lectures will be partially flipped with student responsible for watching videos before class; class time will be split between short lectures, small group activities, and class discussions. Lab groups will meet in person every other week and have group project work on alternate weeks that may be done virtually or in person.

Requirements/Evaluation: Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will present a mock NASA mission proposal.

Prerequisites: none

Enrollment Limit: 46

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 46

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course counts towards the GEOS Group B Electives - Sediments and Life

**GEOS 109 (S) Geologic Hazards**

Dramatic geologic events like earthquakes, volcanic eruptions, and tsunamis can inflict devastating tolls on human life, infrastructure, and economies, as the recent earthquake in Turkey and Syria has sadly demonstrated. These events loom large in our imagination because of this same destructive power. Pop culture is full of references to natural disasters. (Think Hollywood movies like Don't Look Up, San Andreas, or The Day After Tomorrow. Even South Park has a volcano.) Most of these portrayals are based on some tiny seed of established scientific idea or fact, but much of the (mis)information they present is inaccurate. This course seeks to set the record straight. We will develop a framework based on fundamental geologic principles to understand why the most potent natural hazards are concentrated at tectonic plate boundaries. Case studies from recent and historical events will be used to investigate both how volcanoes and earthquakes work and how cascading systems failures exacerbate the human impacts of these phenomena. Exploration of these topics will include lectures, hands-on activities, and weekly laboratory exercises. Occasional comparison to disaster movies will be used to separate fact from fiction. The course will culminate in a final creative or written project.

**Requirements/Evaluation:** weekly lab assignments, 2 midterms, final project

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first and second year students

**Expected Class Size:** 48

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)

**GEOS 110 (F) Oceans and Society**

**Cross-listings:** MAST 110 GEOS 110 ENVI 109

**Primary Cross-listing**

Oceans impact society in many ways: they provide much of our protein, they hide untapped mineral wealth, their circulation regulates global climate, they transport and accumulate our plastic garbage, marine storms batter coastal infrastructure, and sea-level rise threatens communities. However, despite the oceans’ importance throughout history—for trade, as a source of food, and because of their unpredictable dangers—we know shockingly little about them. More than 6000 people have reached the summit of Everest, Earth's highest elevation; but only 22 have visited Challenger Deep, the deepest point below the ocean surface. We have mapped the surfaces of Mars and Venus in far more detail than the topography of Earth's ocean basins. New marine organisms are discovered regularly. And we still don't fully understand the complex details of how ocean and atmosphere work together as the planet's climate engine. In this course, you will examine ocean science themes with direct societal relevance that are also at the forefront of scientific investigation. Topics will be selected based on current events, but are likely to include deep sea mining, meridional overturning, sea level rise, atmospheric rivers, and aquaculture. By taking focused dives into a range of subjects you will learn about the evolution and operation of the ocean as a physical and geological system as well as investigating the intersections between ocean functions, climate change, and human societies. Exercises and discussions will foreground active learning. A field trip to the Atlantic coast will integrate experiential investigation of the intersection between coastal change, extreme weather, and communities. The aim is to have energised interdisciplinary discussions about topics of pressing societal relevance, to understand some of the fundamentals of ocean science, to develop expertise in gathering and distilling information by researching new topics, and thereby to improve critical and analytical thinking.

**Class Format:** Two 75-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast.

**Requirements/Evaluation:** Evaluation is based on engagement with in-class activities, six graded lab exercises, four short writing/research assignments, and a five-page term paper
GEOS 111 (F) Radical Science—How Geology Changed the Way We See the World  (WS)

Copernicus shocked Europe when he suggested that the Earth is not the center of the universe. Hutton and other geologists made an equally radical proposal more than two centuries later when they introduced the concept of deep time and argued that the Earth was much older than 6,000 years, as determined by biblical scholars. Several decades later, Darwin and Wallace shook the foundation of western philosophy once more when they proposed that organisms evolved. When geologists reinterpreted landscape features once attributed to the great flood as evidence for past continental glaciation, the concept of extreme climate change through time sprung to life. During the 20th century, the permanence of Earth’s geography was challenged by the continental drift hypothesis, which was initially rejected for decades until it reemerged as plate tectonic theory. This tutorial explores how geologic breakthroughs challenged western views of humans as the center of creation living in a world with limited change. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics. This course is in the Solid Earth group for the Geosciences major.

Requirements/Evaluation: five 5-page papers and five oral critiques of partner’s papers

GEOS 201 (F) Field Methods and Structural Geology  (WS)

Geologic history is preserved in rocks and it can be deciphered using fundamental principles such as superposition and cross-cutting relationships. Field observations are essential to understanding the rock record, and data and interpretations are encoded in geologic maps. This course introduces students to topographic and geologic maps, best practices for geologic field work, the field identification of common minerals and rocks, geologic contacts, and structures such as folds, and faults. Students will develop skills for presenting field data in papers, figures, and oral presentations. This course is in the Solid Earth group for the Geosciences major.

Class Format: lecture and discussion, three hours per week and laboratory, three hours per week
Requirements/Evaluation: short weekly writing assignments will form the basis for two 10-page papers based on field trips and a final independent project
Prerequisites: Any 100 level geosciences course or permission of instructor.

Enrollment Limit: 16

Enrollment Preferences: Geosciences majors or students with a strong interest in geosciences

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $15 for field supplies

Distributions: (D3) (WS)

Writing Skills Notes: There will be two 10-page papers, each based on four field trips. Students will submit short field descriptions and figures with captions after each field trip. The shorter assignments will be incorporated in two papers. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

GEOS 202  (F)  Mineralogy
This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in the major, it provides a systematic framework for the study of minerals--Earth's building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography through element distribution and crystal chemistry to the phase relations, compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical emission spectroscopy; wavelength- and energy-dispersive x-ray spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section. This course is in the Solid Earth group for the Geosciences major.

Class Format: Lecture three hours per week and laboratory three hours per week; independent study of minerals in hand specimen; one afternoon field trip

Requirements/Evaluation: one hour test, lab work, and a final exam

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: sophomores and juniors planning to take GEOS 301, 302 and/or 303 in the subsequent year

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

GEOS 207  (S)  The Geoscience of Epidemiology and Public Health  (DPE)

Cross-listings: ENVI 201 GEOS 207

Primary Cross-listing

The Coronavirus pandemic has highlighted the many ways that diseases can be transmitted in the environment. As a society we are becoming aware of the many ways that geological processes and materials influence human health, in ways both beneficial and dangerous. This course unites geoscience, biomedicine and public health approaches to address a wide range of environmental health problems. These include water-related illnesses (e.g. diarrhea, malaria); minerals and metals, both toxic (e.g. asbestos, arsenic) and essential (e.g. iodine); radioactive poisoning (e.g. radon gas); and the transport of pathogens by water and wind. In many cases, the environmental health problems disproportionately affect marginalised populations, contributing to greater disease and death among poor communities and populations of colour. We will examine the broad array of dynamic connections between human health and the natural world. We will discuss the social justice implications of a range of environmental health problems. And we will examine current research into how coronaviruses, such as the one causing COVID-19, are transported in the environment. This
course is in the Sediments and Life group for the Geosciences Major.

Requirements/Evaluation: Evaluation will be based on short weekly writing assignments as well as an individual project and poster presentation.

Prerequisites: No prerequisites

Enrollment Limit: 34

Enrollment Preferences: Preference to first-years, sophomores, and prospective Geosciences majors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 208  (F)  The Modern Carbon Cycle: the Story from Stable Isotopes

Burning fossil fuels, industrial agriculture, and microbial processes all emit greenhouse gases to the atmosphere, and therefore contribute to climate change. But in what proportions? Enter stable isotopes. Everything around you—including the lithosphere, biosphere and hydrosphere—contains a mixture of carbon of mass 12 or 13. By learning the processes that control the ratio of these two stable isotopes in different Earth materials, we can better understand the modern carbon cycle, including its inputs and outputs, transformative processes, and interaction with global climate. In this course, we will review the basics of stable carbon isotope theory and analysis and use these tools to better understand the carbon cycle on different spatial and temporal scales. We will consider how to model both global and local sources of carbon to the atmosphere, both conceptually and through simple box models using stable isotopes. In lab, students will write models in R (no prior experience required), prepare organic and inorganic materials for carbon isotope analysis by a commercial laboratory, and correct and analyze real isotope data. This course is in the Oceans and Climate Group for the Geoscience major.

Class Format: 2.5 hours lecture per week and one 3 hour lab per week

Requirements/Evaluation: Weekly lab assignments, bi-weekly (open book) quizzes, a final project including a written report and oral presentation.

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: sophomore and junior GEOS majors

GEOS 210  (F)(S)  Oceanographic Processes

Cross-listings: MAST 211 GEOS 210

Secondary Cross-listing

Part of the Williams-Mystic Coastal and Ocean Studies Program, this course provides an introduction to physical, geological, chemical, and biological oceanography. Using local field sites as well as places visited on field seminars, we will investigate why the Earth has oceans, why they are salty, how they move and flow, reasons for sea level change on both long and short timescales, and how our oceans interact with the atmosphere to control global climate. We will emphasise societal interactions with the ocean, and will consider coastal processes including land loss. We will apply an environmental justice and anti-racist lens to our discussions. Field work will take place on shores in southern New England, as well as during field seminars on the Atlantic ocean, the West Coast and the Mississippi River Delta. This course is in the Oceans and Climate Group for the Geosciences major.
Class Format: Flipped classroom will focus on active learning using data-based exercises. Mini-symposia will involve student research and discussion.

Requirements/Evaluation: graded lab exercises, mini-symposium participation, and a research project

Prerequisites: none

Enrollment Limit: 24

Enrollment Preferences: none

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: This course is taught at our Mystic Seaport campus. Students must be enrolled in the Williams-Mystic Coastal and Ocean Studies Program.

GEOS 212 (S) Paleobiology
Cross-listings: BIOL 211 GEOS 212

Primary Cross-listing
The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. We will explore how, why, when, and where fossils form and learn about the major groups of fossilized organisms and how they have changed through time. In addition, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

Class Format: One day field trip to the the Paleozoic of New York State

Requirements/Evaluation: Weekly lab assignments, frequent short quizzes and writing assignments, and a final project with a written and oral presentation component.

Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205

GEOS 214 (F) Mastering GIS

Cross-listings: GEOS 214 ENVI 214

Primary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS has opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, weekly quizzes, and a research project

Prerequisites: at least one course in Geosciences or Environmental Studies

Enrollment Limit: 18

Enrollment Preferences: Geosciences majors and Environmental Studies majors and concentrators.

GEOS 215 (S) Climate Changes (QFR)

Cross-listings: ENVI 215 GEOS 215

Primary Cross-listing

Paleoclimatology is the reconstruction of past climate variability and the forces that drove the climate changes. The Earth's climate system is experiencing unprecedented and catastrophic change because of anthropogenic emission of greenhouse gases and land use change. Paleoclimatology allows humans to put modern climate changes into the context of the history of this planet, and shows how and why it is unprecedented and catastrophic. Each climate event we study from Earth's past teaches us lessons on why the climate system responds to anthropogenic perturbations, what climate changes we're committed to in the future, how long-lasting they will be, and what climate consequences we can avoid if we take action and reduce greenhouse gas emissions sooner. In this course, we will discuss the major mechanisms that cause natural
climate variability, how climate of the past is reconstructed, and how climate models are used to test mechanisms that drive climate variation. With these tools, you will analyze and interpret data and model simulations from climate events from Earth's history, and apply these findings to anthropogenic climate changes happening now and that are projected to happen in the future. Laboratories and homework will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: This class has three scheduled lectures per week, and one lab meeting per week which will consist of field excursions, lab exercises, problem solving and discussion

Requirements/Evaluation: lab exercises and homework (25%), three quizzes (50%), and a final project (25%)

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor

Enrollment Limit: 24

GEOS 220 (F) Evolution of and on Volcanic Islands (WS)

Cross-listings: GEOS 220 ENVI 219

Primary Cross-listing

Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics. This course is in the Solid Earth group for the Geosciences major.

Class Format: One-hour weekly meetings with tutorial partner and instructor

Requirements/Evaluation: five 5-page papers and critiques of partner’s papers

Prerequisites: 100-level GEOS course or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors and students with a demonstrated interest in geosciences

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics  (WS)

Cross-listings: GEOS 221 ENVI 222 LEAD 221

Primary Cross-listing

Former President Barack Obama once said: “There’s one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate.” While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly papers (2 - 5 pages in length) and a final oral presentation

Prerequisites: none

Enrollment Limit: 10

Not offered current academic year

GEOS 227 (S) Climate Data Analysis

Cross-listings: GEOS 227 ENVI 226

Primary Cross-listing

In this tutorial, students will learn how to access and work with the datasets that show how our climate is changing. The course introduces a series of analytical methods used in climate science, and students then apply those ‘recipes’ to data of their choosing to research parts of the climate system. Over the course of the term, a student might investigate the seasonality of global atmospheric carbon dioxide levels, maps of sea level anomalies, and the impact El Niño patterns have on Western US rainfall. Students will present their findings, and their insights into the particular aspect of the climate system, at weekly tutorial meetings. Analytical approaches covered in the class include climatologies, time series analysis (trends, periodicity, and autocorrelation), anomaly maps, composites, and zonal/meridional averaging. As for regions and climate systems students can explore: the sky is the limit. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: Asynchronous recorded lectures will provide instruction on new analytical techniques every two weeks. Students will meet in pairs for one hour every week with the instructor: each student will present the results of their data analysis and their interpretation for discussion every other week.

Requirements/Evaluation: Five 3-4 page papers including figures made from analyzing data.

Prerequisites: At least one GEOS or ENVI course
Enrollment Limit: 10

Enrollment Preferences: Students with a strong interest in Geosciences and Geoscience majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 250 (F) Climate, Tectonics, and Erosion (WS)

Traditionally tectonics investigated processes operating deep in the crust and mantle, whereas geomorphology focused on surficial processes that shape the landscape. This course explores the complex interactions between tectonic and surficial processes. It has long been recognized that crustal uplift during mountain building creates new landscapes, but we now suspect that variations in erosion rate can fundamentally influence the development of mountains. Climate plays a central role in this feedback loop; the rise of mountains can change climate, and such changes can alter regional erosion rates. This course will examine how geologists use characteristic markers to estimate the amount of surface uplift, methods for determining uplift rate, surface response to faulting and folding, measuring displacement of the crust with GPS and interferometry methods, how mountain building affects erosion and exhumation rates, the limits to relief in mountains, and the interaction between mountains and climate. This course is in the Solid Earth group for the Geosciences major.

Class Format: After an initial group meeting, students will meet in pairs for one hour each week with the instructor; each student will orally present a written paper every other week for criticism during the tutorial session.

Requirements/Evaluation: five 4- to 5-page papers based on journal articles

Prerequisites: at least one of the following courses: GEOS 101, 102, 103, 201, 215, 301, 302, 304, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors and students with a strong interest in Geosciences

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

Writing Skills Notes: Five 4- to 5-page papers distributed throughout the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

TUT Section: T1  Cancelled

GEOS 255 (F) Environmental Observation

Cross-listings: ENVI 255 GEOS 255

Primary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and
Climate group for the Geosciences major.

Requirements/Evaluation: Weekly labs, four quizzes, and a final project
Prerequisites: at least one prior course in GEOS or ENVI
Enrollment Limit: 20
Enrollment Preferences: sophomores, then GEOS majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

GEOS 280 Carbon dioxide uptake and our climate future (WS)

Because of the failure to substantially reduce global greenhouse gas emissions, it is now clear that removal of carbon dioxide already emitted to the atmosphere is necessary to meet the 1.5 degree Celsius maximum warming target to avoid severe and irreversible consequences from continued greenhouse gas emissions. Natural carbon sinks have already taken up two thirds of the excess carbon dioxide from the atmosphere, and these terrestrial and marine systems are being investigated to determine if this uptake can be enhanced by geoengineering: human intervention to offset the impacts of climate change. In addition, technologies are being developed to capture carbon dioxide directly from the atmosphere, though none are yet operating at a large enough scale and low enough cost. In this tutorial, students will study the terrestrial, near-coastal, and deep-ocean carbon cycles, and analyze both the capacity for future natural uptake, the potential augmented uptake that could be achieved by deliberate manipulation of these systems, and the impacts of these carbon cycle perturbations on ecosystems and humans. Students will evaluate the scientific basis behind real startup ventures and carbon credit schemes that capitalize on the exploding interest and investment in carbon uptake technologies. And they will write a research proposal for investigating and/or testing a scientifically compelling carbon uptake strategy. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: evaluation will be based on the critical analysis of readings through discussion, writing and revision
Prerequisites: one GEOS course or ENVI 102
Enrollment Limit: 10
Enrollment Preferences: students with a strong interest in Geosciences, Geosciences majors, Environmental Studies majors and concentrators
Expected Class Size: 10
Grading:
Distributions: (D3) (WS)

Writing Skills Notes: Each student will write five 5-page papers and five 1-page response papers; students will give and receive feedback through peer review and tutorial meeting discussion and will develop their writing and critical analysis skills through revision.

Attributes: ENVI Natural World Electives GEOS Group A Electives - Climate + Oceans

Not offered current academic year

GEOS 301 (F) Geomorphology

Cross-listings: GEOS 301 ENVI 331

Primary Cross-listing

Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth's surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and
Life group for the Geosciences major.

**Class Format:** lecture, three hours per week and laboratory, three hours per week

**Requirements/Evaluation:** weekly lab exercises, a research project, and a midterm and final exam

**Prerequisites:** At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** GEOS and ENVI majors

**Expected Class Size:** 18

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

---

**GEOS 302 (S) Sedimentology** (WS)

Sediments and sedimentary rocks are the book in which Earth's history is recorded, where we read the stories of ancient oceans and continents, and how life evolved. Sand and dirt preserve information about the rocks that were eroded to form them, the fluids and forces that transported them, the ways in which they were deposited, and the ecosystems that they supported. Understanding sediments is also fundamental to society, for many kinds of civil engineering as well as pollution and environmental remediation. We will investigate sediment composition, fluid mechanics, bedforms, and depositional environments, building to an integrated understanding of erosion, deposition, and changes over time. We will also acknowledge and examine the roles that racism and colonialism have played in sedimentologic research. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** lecture/discussion three hours per week and laboratory three hours per week; field trips: two half-day and one all-day

**Requirements/Evaluation:** lab and field exercises, writing assignments, participation in discussions

**Prerequisites:** At least one course in GEOS Group B (Solid Earth) AND one course in GEOS Group C (Sediments and Life); or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Geosciences majors

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (WS)

**Writing Skills Notes:** Weekly 2-3 page writing assignments will be thoroughly edited for style, grammar, and syntax; each student will compile their papers as a growing body of work, and each new assignment will be read and edited in the context of previous submissions.

**GEOS 303 (S) Igneous and Metamorphic Petrology**

Using plate tectonics and the geologic assembly of New England as a template, this course explores the origin of crystalline rocks–volcanic, plutonic,
and metamorphic – that comprise 94% of the Earth's crust. Field and lab studies are the crux of the course, supported by experimental work and thermodynamic principles. Chemical and mineralogical compositions and rock fabrics provide evidence for crystallization environments and tectonic settings, past and present. This course is in the Solid Earth group for the Geosciences major.

**Class Format:** Discussion, three hours per week and laboratory, two hours per week; several field trips during lab hours.

**Requirements/Evaluation:** lab work, one hour test, and a final exam

**Prerequisites:** GEOS 202 or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** GEOS majors

**Expected Class Size:** 7

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)

**Attributes:** GEOS Group C Electives - Solid Earth

**Not offered current academic year**

---

**GEOS 304 (S) Mineralogy and Petrology**

Minerals are Earth's basic building blocks. They form, deform, and transform in response to environment conditions, and in doing so, they record a wide range of processes in the Earth system. In this course, we will use minerals to understand the geologic record at multiple timescales, from the slow process of continental assembly and break-up to rapid processes such as volcanic eruptions and biogeochemical cycles. Central to this analysis is rock and mineral characterization. Therefore, laboratory and field studies will hone fundamental observational skills of minerals at multiple scales, from atomic scale crystalline structures to macroscopic physical properties in hand sample. Discussion of experimental and natural data (phase relationships, thermodynamics, and major and trace element geochemistry) in conjunction with these petrographic approaches, will create a framework for interpreting the dynamic processes and geologic settings where igneous and metamorphic rocks form. The semester will culminate in a final project that applies both the observation and interpretive skills developed, giving students the chance to collect data and “read the geologic record” left behind in rocks from around the world.

**Class Format:** three lectures per week with two lab sections.

**Requirements/Evaluation:** This class may include field trips, problem sets, 2-3 exams and an final project

**Prerequisites:** 1 100-level GEOS course

**Enrollment Limit:** 24

**Enrollment Preferences:** GEOS majors who have taken at least one 100-level GEOS course.

**Expected Class Size:** 24

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3)

**Attributes:** GEOS Group C Electives - Solid Earth

**Not offered current academic year**

**GEOS 308 (S) Life on Mars?**

On February 18th, 2021, the Perseverance Rover landed in the Jezero Crater on Mars, with the objective to "seek signs of ancient life and collect samples of rock and regolith (broken rock and soil) for possible return to Earth." In this course, we will investigate what "signs" would point to ancient or modern life, both on the Martian surface and in the chemistry of any samples (eventually) returned to Earth. Topics to be covered include the visual and chemical evidence for life on Earth and its application to Martian environments; if and how compounds indicative of life could be preserved in Martian rocks; insights from Earth analogues for Mars environments; the potential for modern subsurface life on Mars; and whether life on Earth could have originated on Mars. In lab, we will grow our own microbial mats, and characterize the visual and chemical characteristics that make them "alive."

As a final project, students will prepare a mock manuscript for publication in the journal Astrobiology. This course is in the Sediments and Life Group for the Geoscience major.

**Class Format:** 3 hours per week of class, 3 hours per week of lab

**Requirements/Evaluation:** Weekly lab assignments, two reports on primary literature, final paper in the style of a manuscript for publication

**Prerequisites:** any 100-level GEOS course
GEOS 309 (F) Modern Climate (QFR)

Cross-listings: ENVI 209 GEOS 309

Primary Cross-listing

What will happen to the Earth's climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects--like the albedo feedback associated with sea ice and glacier loss--and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: 4 multi-week lab projects and several short quizzes

Prerequisites: Any of GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: GEOS and ENVI majors

GEOS 312 (F) Mass Extinctions: Patterns and Processes (WS)

Over the last 541 million years of Earth history, five major mass extinctions have occurred, each dramatically changing the makeup and course of life on our planet. During some of these events, over 75% of all marine animal species went extinct; during others, groups like the dinosaurs vanished from the planet after tens of millions of years of ecological dominance. This tutorial course will explore the idea of extinction from the evolution of the concept in human thought to current research on the mechanisms and patterns of extinctions through time. We will examine what makes an extinction “mass”, delve into the causes and consequences of the major mass extinction events of the Phanerozoic, and discuss the potential human-induced "6th extinction" event occurring in the present day. This course is in the Sediments and Life group for the Geosciences major.

Class Format: Weekly 1-hour tutorial meetings with pairs of students; one required all-day field trip.

Requirements/Evaluation: four 4-5-page papers, one revision, tutorial presentations, the student's effectiveness as a critic, and 1 problem set

Prerequisites: GEOS 107 or GEOS 212; or permission of instructor + any 200 level GEOS course

Enrollment Limit: 10
Enrollment Preferences: Geosciences majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

Writing Skills Notes: This is a tutorial that involves students writing 4 original response papers and one substantial revision to their writing.

Attributes: GEOS Group B Electives - Sediments + Life

Not offered current academic year

GEOS 317 (S) Current topics in Planetary Geology (WS)

Cross-listings: ASTR 317 GEOS 317

Primary Cross-listing

We will look in detail at geological processes on rocky and icy bodies of the Solar System. Each week will have a specific theme, and students will read a series of scientific articles on that topic. The readings will form the basis for writing and discussion. Areas to be investigated may include ice ages on Mars, the origin of Earth's moon, tectonics on Venus, chaos terrain on Europa, geysers on Enceladus, cryovolcanism on Triton, methane lakes on Titan, the viability of mining in the Asteroid Belt, and the prospects for life on other worlds. This course is in the Solid Earth group for the Geosciences major.

Class Format: Students meet with the professor weekly, in pairs, with one student writing each week and the other critiquing; and both engaging in detailed discussion of the readings.

Requirements/Evaluation: Evaluation is based on written papers, critiques, and discussion.

Prerequisites: GEOS/ASTR 217 (Planets and Moons); OR any two courses at 200-level or higher in Geosciences and/or Astronomy; OR permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences and Astronomy majors and prospective majors

Expected Class Size: 6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ASTR 317(D3) GEOS 317(D3)

Writing Skills Notes: This tutorial-style course focuses on writing, with 6 papers (5-7 pages) written bi-weekly throughout the semester, and partner critiques in alternate weeks.

Attributes: GEOS Group C Electives - Solid Earth

Not offered current academic year

GEOS 401 (F) Global Tectonics and the Rise of Mountains (WS)

Fifty years after the sea-floor spreading hypothesis was first verified using magnetic anomalies, we have spectacular data sets from paleomagnetism, seismology, volcanism, the Global Positioning System, and digital elevation models that provide rich details into the kinematics and mechanisms of present and past plate motions. We will read journal articles to explore how plate tectonics can help explain the evolution of mountain belts with special emphasis on the Appalachians.

Class Format: Remote, weekly one-hour meetings with tutorial partner and instructor

Requirements/Evaluation: five papers based on journal articles, and critiques of partner's papers

Prerequisites: GEOS 203, 302, or 303 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: senior Geosciences majors, then juniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during
GEOS 404 (F) Coastal Processes and Geomorphology (QFR)

**Cross-listings:** MAST 404 ENVI 404 GEOS 404

**Primary Cross-listing**

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces—wind, waves, storms, and people—that shape the coastal zone, as well as the geologic formations—sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs—that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

**Class Format:** lecture two times a week with a lab one time per week

**Requirements/Evaluation:** lab reports, quizzes, and an independent research project

**Prerequisites:** Either GEOS 104 or GEOS 210; or permission of instructor. No prior knowledge is necessary, but this course does build on principles used to explore complex scientific challenges.

**Enrollment Limit:** 12

**Enrollment Preferences:** senior Geosciences majors, then juniors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major. This course counts toward the GEOS Group B Electives - Sediments + Life.

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 404(D3) ENVI 404(D3) GEOS 404(D3)

GEOS 409 (F) Volcanology

Volcanism can be defined as the set of processes by which magma and its associated gases are transported through the crust and extruded to Earth's surface and atmosphere. This course will explore the underlying chemistry and physics that govern these processes and give rise to volcanic systems as diverse in appearance and eruptive style as Kilauea, Mount St. Helens, and Yellowstone. Understanding a volcanic system and its associated hazards requires interdisciplinary approaches including field mapping, physical characterization of erupted products, geochemical analysis,
and geophysical monitoring. Leveraging insights from these disciplines, we will develop a holistic view of volcanism sensu stricto: how magma is formed, transported, stored, and erupted on Earth. This course will also take a broader perspective recognizing that while individual eruptions may last for just seconds, the sum of volcanism over geologic time is immense. Through a combination of lectures, laboratory experiments, journal articles readings, reflections, and a final project, we will also interrogate the role of volcanoes in plate tectonics, global geochemical cycles, Earth's habitability, and mass extinctions. This course is in the Solid Earth group for the Geosciences major.

**Requirements/Evaluation:** weekly lab assignments, journal article presentations and discussions, final project

**Prerequisites:** One of the following: GEOS 102, GEOS 304, PHYS 131, or CHEM 151, or permission from the instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** senior GEOS majors, then junior GEOS majors, then juniors and seniors with a prerequisite

**GEOS 414 (S) Reading Deep Time** (QFR)
Ancient sedimentary rocks and the fossils they contain are time machines - direct windows into the deep history of life on Earth and the environments that life inhabited. In this course you will learn to "read" these deep time records by collecting, interpreting, and analyzing paleontological, stratigraphic, and sedimentological data. The course will be organized around a week-long spring break trip to explore the rocks of the House Range of Utah. The Cambrian and Ordovician strata of the House Range offers an outstanding record of one of the most important periods in Earth history, tracking the rise of animal ecosystems and major increases in fossil diversity. The first 6 weeks of class will be spent learning the fundamentals of quantitative methods in paleontology and stratigraphy (often referred to as historical geology). Labs will focus on skill building including learning basic coding in R (no experience needed or expected), and learning how to interpret paleontological, sedimentological, and stratigraphic data. We will also read widely on the field locality and on the Cambrian and Ordovician Periods. During the field trip, we will explore the House Range. Students will learn skills including interpreting geological maps, measuring stratigraphic sections, finding and identifying fossils, and correlating rock units across basins. We will collect samples and data on the field trip and bring them back to Williams. The second 6 weeks of the course will be spent processing and analyzing the samples and data collected during the field trip, culminating in final projects to be done in small groups. Students will help determine what data we will collect in the field and what projects emerge. Examples might be interpreting carbon isotopic analyses to reconstruct ancient oceanographic conditions, biostratigraphic correlation using fossils to reconstruct basin dynamics, determining paleoenvironment based on analyses of thin sections, or digging into trilobite fossil preservation and evolutionary trends. Students will draw on previous experiences and course content in the Geosciences and bring small group research projects to completion by the end of the semester, which will be presented in poster form. This course fulfills the Geosciences Group B Elective: Sediments and Life.

Class Format: weekly lectures, paper discussions, and hands-on labs. Required week-long spring break field course.

Requirements/Evaluation: Short papers and lab assignments, spring break field course participation (REQUIRED), and a final group project presented in poster form.

Prerequisites: GEOS majors who have taken at least one of the following courses: GEOS 212, GEOS 203, GEOS 201, GEOS 301, GEOS 302, GEOS 312T, or permission of instructor.

Enrollment Limit: 12

Enrollment Preferences: Senior, and then Junior, Geosciences majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course will rely on the programming language R. Students will learn how to code in R, and will use R to analyze large data sets of geological data. The majority of labs, as well as the final project, will rely on R, statistical analyses, and wrangling data.

Not offered current academic year

GEOS 470  (S) Science for Environmental Justice  (DPE)

Cross-listings: ENVI 470 GEOS 470

Primary Cross-listing

Economically challenged communities and communities of color are disproportionately affected by environmental contamination and disturbance. Although environmental racism caused by industrial pollution has been made clear in scholarship for some time, the integrated stresses of climate change and industrial contamination are now triggering new challenges to life in underprivileged communities. Resolving environmental injustice will require meaningful engagement from scientists across a range of disciplines, from chemistry and the geosciences to ecology and public health. In this senior seminar, you will learn about the history of the environmental justice movement while examining how science has been used to address cases of environmental contamination and mismanagement. You can expect experiences in field data collection, laboratory analyses, and numerical modeling, skills that are required to assist communities suffering from environmental injustice. And we will work in partnership with residents of Tallevast, Florida, who have long suffered from the impacts of groundwater contamination and governmental neglect. This partnership will involve a residential field trip to Tallevast during spring break, where you will undertake an environmental study in support of the community.

Class Format: Weekly lectures, paper discussions, and hands-on labs. Required week-long spring break field trip.

Requirements/Evaluation: weekly lab exercises and seminar presentations; a research project; a final presentation; and a spring break field trip

Prerequisites: At least one 200-level Division III course and at least one 300-level Geosciences or Environmental Studies course or permission of instructor.
Enrollment Limit: 12
Enrollment Preferences: Fourth year, and then third year, Geosciences majors and Environmental Studies majors or concentrators
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Unit Notes: As a 400-level seminar, this capstone course is intended to build and extend knowledge and skills that students have developed during previous courses in either the Geosciences or Environmental Studies majors.
Materials/Lab Fee: The spring break field trip is being funded by the Freeman Foote Field Trip Fund for the Sciences.
Distributions: (D3) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 470(D3) GEOS 470(D3)
Difference, Power, and Equity Notes: The course will examine the history of the environmental justice movement, unraveling the roles of governmental neglect and complicity in fostering the harm of vulnerable communities. We will review strategies of collective action in fighting climate and environmental injustice and the complicated role that scientists have played in this pursuit. We will then leverage scientific skills and perspectives to imagine ways that scientists can become responsible agents of change.

STUDY OF GERMAN LANGUAGE AND GERMAN-LANGUAGE CULTURE

The department provides language instruction to enable the student to acquire all four linguistic skills: understanding, speaking, reading, and writing. German 101-W-102 stresses communicative competence and covers German grammar in full. German 103 combines a review of grammar with extensive practice in reading and conversation. German 104 aims to develop facility in speaking, writing, and reading. German 120 is an intensive communicative German course that strives to cover two semesters of the language in one. German 201 emphasizes accuracy and idiomatic expression in speaking and writing. German 202-209 combines advanced language study with the examination of topics in German-speaking cultures. The 202 and up course level may be taken twice with different content for major credit. Each year the department offers upper-level courses treating various topics from the German-language intellectual, cultural, and social world in which reading, discussion and writing are in German. Students who have studied German in secondary school should take the placement test given during First Days in September to determine which course to take.

STUDY ABROAD

The department strongly encourages students who wish to attain fluency in German to spend a semester or year studying in Germany or Austria, either independently or in one of several approved foreign study programs. German 104 or the equivalent is the minimum requirement for junior-year abroad programs sponsored by American institutions. Students who wish to enroll directly in a German-speaking university should complete at least 201 or the equivalent. In any case, all students considering study-abroad should discuss their language preparation with a member of the department.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

The department can tentatively pre-approve courses for major or certificate credit, based on information from the study away program or the course catalog, if direct enrollment, but final credit is only granted after review of the courses and the grades once taken.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, plus conversations with the student if necessary.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. The maximum number of credits is four.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. Students may not count language courses in other languages (e.g., Italian) for major credit, nor natural science or math courses.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

One of our majors who is pre-med thought he could take Chemistry of Biology in Germany and have it count toward the German major, but that is not the case. It is not sufficient for the language of instruction in a given course to be German; the content must also have to do with the culture, history, politics, economics, etc. of Germany, Austria, or Switzerland.

THE CERTIFICATE IN GERMAN

To enhance a student’s educational and professional profiles, the department offers the Certificate in German. It requires seven courses—three
fewer than the major—and is especially appropriate for students who begin study of the language at Williams.

Students who enter Williams with previous training in German may substitute more advanced courses for the 100-level courses; they can also be exempted from up to two of the required courses.

The student must achieve proficiency at the level of a B in German 104 or the equivalent.

Appropriate elective courses can usually be found among the offerings of German, Art History, History, Music, Philosophy, Political Science, and Theatre.

**Required Courses**

- German 101
- German 102
- German 103
- German 104
- German 201

**Elective Courses**

- at least one course (in German or English) on German cultural history (literature, art, drama, music)
- at least one course (in German or English) on German intellectual, political, or social history

**THE MAJOR**

The German major offers students an interdisciplinary approach to German intellectual and cultural history by combining courses in German language and literature with courses in History, Philosophy, Music, and other appropriate fields.

For students who start German at Williams, the major requires a minimum of ten courses: German 101-102, 103, 104, 201 and 202; two 300-level German courses; and two electives from either German courses numbered above 202 or appropriate offerings in other departments.

For students who have acquired intermediate or greater proficiency in the language before coming to Williams, the minimum requirement is nine courses: German 202; two 300-level German courses; and six other courses selected from German courses numbered above 102 and appropriate offerings in other departments.

**Examples of appropriate courses in other departments are:**

- Art History 267 Art in Germany: 1960 to the Present
- History 239 Modern German History
- History 338 The History of the Holocaust
- Music 108 The Symphony
- Music 117 Mozart
- Music 118 Bach
- Music 120 Beethoven
- Philosophy 309 Kant

Students may receive major credit for as many as four courses taken during study abroad in Germany or Austria in the junior year.

**THE DEGREE WITH HONORS IN GERMAN**

Students earn honors by completing a senior thesis (German 493-W31-494) of honors quality.

Students interested in honors should consult with the department chair no later than April 15 of their junior year. The usual qualifications for pursuing honors are: (1) an overall GPA of 3.33 or better, (2) a departmental GPA of 3.67 or better, (3) a strong interest in a specific topic for which an appropriate faculty advisor will be available in the senior year.

GERM 101 (F) Elementary German
German 101-102 is for students with no previous study of German. The course employs a communicative approach involving all five language skills: listening comprehension, speaking, reading, writing, and culture. We focus initially on practice in understanding the spoken language and then move rapidly to basic forms of dialogue and self-expression. In the second semester, reading and especially writing come increasingly into play.

**Class Format:** Various types of instruction and learning; meets five days a week

**Requirements/Evaluation:** Active class participation, written homework, written and oral assessments

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** First- and second-year students

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** Credit granted only if both semesters (GERM 101, 102 and Winter Study Sustaining Program) are taken.

**Distributions:** (D1)

---

**GERM 102 (S) Elementary German II**

German 102 is the continuation of German 101, and will provide you with a further introduction to the language and cultures of German-speaking countries. You will have the opportunity to practice listening, reading, writing, and speaking in German both through in-class activities and homework assignments. During the semester, you will learn about various cultural perspectives, products, and practices of German-speaking countries. Some of the topics that will be addressed this semester include the following: housing; housework; geography and landscape; transportation; travel plans and experiences; food and drink; cooking and ordering food at restaurants; childhood and youth; fairy tales; health and personal hygiene; family, marriage, and partnership; community issues in a multicultural society; literature, music, and film. The use of easy readers in the target language will also help to enhance reading comprehension. Active and dedicated participation including homework is expected. *This course is taught exclusively in German.*

**Requirements/Evaluation:** Active class participation, midterm & final exams, essays, quizzes, homework

**Prerequisites:** GERM 101 or placement test

**Enrollment Limit:** 15

**Enrollment Preferences:** If course over-enrolls (beyond cap), preference will be given to students who have completed GERM 101

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** students registered for GERM 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (GERM 101 and 102) are taken

**Distributions:** (D1)

---

**GERM 103 (F) Intermediate German I**

In this course students will further develop their German language skills, by discussing a variety of cultural topics and themes in the German-speaking world. Through extensive work on expanding vocabulary, reviewing major grammar topics, conversation and composition exercises, students will strengthen their language skills and develop cultural competency. The course focuses on real communication in meaningful contexts and aims to develop and consolidate students’ speaking, listening, reading and writing abilities at the intermediate level. Using a variety of media, such as texts, video and audio, students will explore various themes and cultural topics in the German-speaking world. Students will have the opportunity to practice and improve their spoken and written German skills through in-class activities and homework assignments. The use of easy readers in the target language will also help to enhance reading comprehension. The mandatory weekly conversation sessions with the German-speaking teaching associates will greatly contribute to enhancing the learners’ speaking and listening comprehension. *The course is taught exclusively in German. Active and dedicated participation including homework is expected.*
GERM 104 (S) Intermediate German II

German 104 is the continuation of German 103 and a prerequisite to all advanced courses in German. You will practice your speaking and writing skills, watch film clips and other media (such as music videos, interviews, news reports), and read a variety of contemporary texts ranging from magazine articles to short stories. The assigned materials are centered around one culturally relevant theme, which enables you to continuously add to your knowledge and combine and compare contents throughout the term. This course includes reviews of advanced grammar topics. Conducted in German.

Requirements/Evaluation: active class participation, quizzes, essays, homework.

Prerequisites: GERM 103 or permission of the instructor.

Enrollment Limit: 19

Enrollment Preferences: If course over-enrolls (beyond cap), preference will be given to students in GERM.

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

GERM 110 (F) Spies Like Us: Espionage, Surveillance, and Protest in German Cinema and Literature (WS)

Cross-listings: COMP 109 GERM 110

Primary Cross-listing

This First Year tutorial, available in English, investigates the mutual mistrust between the two Germanies in the Cold War period up until the peaceful popular protests that brought down the Berlin Wall. The political tensions between communist East Germany, the German Democratic Republic (GDR) and its capitalist Western counterpart, the Federal Republic (FRG), created a fascinating culture of governmental spying, but also led to aggravated periods of state surveillance of its own citizens. How were families affected across generations by these divisive politics, including the two states' differing treatment of the Nazi legacy? What was the involvement of the KGB and the CIA? How did East German intelligence try to destabilize the West from inside? Which locations in Berlin served as centers for spying, given that the city's terrain is quite flat and exposed? High-profile cases of conflicting loyalties include the Guillaume spy affair that brought down Willy Brandt as Chancellor of the FRG in 1974, and the Brasch family in the GDR, where the father, a communist true believer, turned his three sons over to the Stasi for their dissident activism and engaged art. We will debate filmic treatments of the recruitment of spies as double agents (Coded Message for the Boss, 1979), the chilling effects of police surveillance during the Baader-Meinhof radical left terrorist attacks (The Lost Honor of Katharina Blum, 1975; Knife in the Head, 1978) the afterlives of former terrorists who were offered new identities as 'ordinary' East Germans (The legend of Rita, 2000), to the effects of the Stasi files becoming accessible to their victims after the fall of the wall (Es ist nicht vorbei, Anderson). We will also discuss popular film representations of spying in Lives of Others (2007) and Bridge of Spies (2015), and selected episodes from the popular TV-series Germany 83 and 86 (2018). Literature will likely include: Thomas Brasch, The Sons Die Before the Fathers (1977), Christa Wolf, What Remains (1993), Monika Maron, Flight of Ashes (1981), Heinrich Böll, The Lost Honour of Katharina Blum (1974). All texts in English, films have English subtitles.
**Class Format:** Students in this course will be separated into small tutorial groups of 3 students, in order to promote intensive exchange of ideas. In a typical week, the students in each group will: (1) study a substantial "text" or film; (2) watch mini-lectures or power points by the instructor to supplement the assigned primary texts.

**Requirements/Evaluation:** 5 5-page tutorial papers and 2-page responses (in English)

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** First Years, in groups of 3 students.

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 109(D1) GERM 110(D1)

**Writing Skills Notes:** This tutorial will teach students to analyze visual media and fiction in German Studies in combination with secondary sources from a variety of related disciplines (History, Political Science, journalism). The toggling between these different types of sources promotes critical thinking skills.

Not offered current academic year

**GERM 120 (S) Turbodeutsch: Intensive Elementary German**

An accelerated version of Elementary German, covering nearly all the material of GERM 101-102 in one semester. The course employs a communicative approach involving all four language skills: listening comprehension, speaking, reading, and writing. Best suited to very committed students who have had no previous German, or to students who have had some previous German but who did not place into GERM 103. The course will meet every day, including three 50-minute periods on MWF and 2 75-minute periods on TR, plus a required TA session at a time to be arranged.

**Requirements/Evaluation:** active participation, tests, quizzes, final exam

**Prerequisites:** students with demonstrated need to take the language in only one semester; students also need to show a great deal of commitment to learning German

**Enrollment Limit:** 12

**Enrollment Preferences:** students who need German for their academic goals

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

Spring 2024

**GERM 201 (F) “Oida!” Living Language in Vienna**

Language is a living being, varied, like identity itself, across cultures and across time. This course has as its thematic focus Wienerisch, the very special variety of German that has developed in the multi-linguistic metropolis of Vienna; listening and reading work will center on Viennese German. But the thrust of the course is honing the students' own German. It will provide extensive study of German grammar and style, and intensive practice in speaking and writing idiomatically. Readings and discussion in German.

**Requirements/Evaluation:** Intensive class participation, regular written and oral exercises, midterm and final projects

**Prerequisites:** GERM 104 or contact instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Prospective German majors and German certificate students

**Expected Class Size:** 8

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)
GERM 202  (S)  German Comics
The goal of this advanced course is to study language and culture through the exploration of German-language comics. Despite the boom in the production of comics since the reunification and the appearance of numerous talented artists in the German speaking world, German comics remain largely unknown and unrecognized abroad. This course seeks to introduce students to this rich, active genre and to deepen their understanding of it by allowing them to engage with its broad spectrum of subjects and styles. The course will address a variety of recent comics ranging from graphic novels by Nora Krug, Olivia Vieweg to literary comics by Flix, Isabel Kreitz, as well as historical comics by Simon Schwartz and Reinhardt Kleist. What are the recurrent themes in German comics? What kind of current political issues do these comics raise and what type of contemporary anxieties do they express? These are some of the questions the course seeks to answer. **This course is conducted entirely in German.**

**Requirements/Evaluation:** short oral presentations, three 1-2-page papers, two 3- to 5-page papers, and one final project

**Prerequisites:** GERM 104 and GERM 201

**Enrollment Limit:** 19

**Enrollment Preferences:** German Majors and German Certificate

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

Not offered current academic year

GERM 206  (F)  Seh'n Se, det is Berlin
In the history of Germany, Berlin has always been a very important cultural and political center: it was successively the capital of the Kingdom of Prussia, the German Empire, the Weimar Republic, the Third Reich, and the German Democratic Republic, before becoming the capital of a reunited Federal Republic of Germany in 1990. In order to understand the fascination held by this metropolis before and after WWII and its increasing popularity today, it is crucial to gain an insight into the cultural and historical aspects of the capital of Germany throughout the 20th century. In order to do so, we will read texts by Erich Kästner, Kurt Tucholsky, Thomas Brussig, and Wladimir Kaminer, look at paintings by Ernst Ludwig Kirchner, Otto Dix and photographs by August Sander, watch movies by Fritz Lang, Wolfgang Staudte, Hannes Stöhr, Detlev Buck, and Burhan Qurbani, listen to cabaret songs by Marlene Dietrich and Hildegard Knef, hip hop songs by Seed, Sido, and Bushido, and electronic music by Ellen Alien. We will also explore the multicultural facets of the German capital, such as Queer Berlin, Black Berlin, Turkish Berlin as well as the techno club scene. Active and dedicated class participation is expected. **Conducted in German.**

**Class Format:** seminar

**Requirements/Evaluation:** Midterm, final exam, several short papers

**Prerequisites:** GERM 201 or equivalent

**Enrollment Limit:** 12

**Enrollment Preferences:** German major or certificate

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Fall 2023

SEM Section: 01    MW 7:00 pm - 8:15 pm    Christophe A. Koné

GERM 208  (S)  Translation in Practice
When we’re learning a new language, we’re constantly told not to translate--“Don't write in English and then translate into German!” “Don't translate in your head, think in your own German!” The goal is to immerse yourself as deeply as possible in the target language so that you can engage with it idiomatically. Translation is a different kind of operation than language learning, but it presents its own challenges and joys in working with the language. In this course we will read literary and theoretical texts that engage with translation as a phenomenon, we will compare English transmissions
of German and Austrian literature, and we will talk with some professional literary translators about their process. In addition, students will prepare their own translations of German into English and/or their native languages. Readings and discussion in German.

**Requirements/Evaluation:** In addition to consistent and active class participation, students will write two 3-5-page analytic papers and prepare an 8-10-page translation as a final project. Students will be expected to correct the language errors in their analytic papers, and the translation projects will be workshopped in tutorial format. Evaluation will be holistic, taking into account initiative and effort as well as the results of the work.

**Prerequisites:** GERM 201 or permission of the instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** German students

**Expected Class Size:** 6

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

---

**GERM 234 (F) Europe and the Black Diaspora (DPE) (WS)**

**Cross-listings:** GERM 234 COMP 238 AFR 236

**Primary Cross-listing**

This course provides an overview of the relationships and interactions between the Black diaspora and the European continent in the nineteenth and twentieth centuries. Drawing from biographies, autobiographies, reports, literature, creative arts and academic articles, we will consider the different relationships that have evolved between Black people and Europe over the course of time. Focusing on Central Europe, we will discuss the relationships established between Europe and the Black diaspora, such as Africans, African-Americans, Afro-Latinx and Afro-Caribbeans. Some of the themes we will address include the influence of cultural contact on intellectuals, writers, soldiers, politicians and asylum seekers and their works, factors that established and influenced their relationship with Europe, as well the ways in which these selected people did or did not exert influence on European cultures. We will conclude by looking at some of the current discussions that still revolve around the relationship between the Black diaspora and Europe. Reading and Discussion in English.

**Requirements/Evaluation:** Active class participation, written homework, short papers and final research paper.

**Prerequisites:** None.

**Enrollment Limit:** 19

**Enrollment Preferences:** If course overenrolls (beyond cap), preference given to first-years, sophomores, and juniors.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GERM 234(D1) COMP 238(D1) AFR 236(D2)

**Writing Skills Notes:** Students will write two 3-5-page essays each written in two drafts with instructor comments. They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** We will discuss how minorities and minoritized individuals and the identities they hold can be affected by the dominant cultures around them. While we will focus on Europe, we will approach discussions with a comparative view, so as to encourage the students to reflect on how difference, power and equity interact and impact minorities in the context of the United States or wherever they come from.

Fall 2023

**SEM Section:** 01  MR 2:35 pm - 3:50 pm   Gail M. Newman

**GERM 251 (F) Dolls, Puppets and Automatons (WS)**
Cross-listings: COMP 251 GERM 251

Secondary Cross-listing

Since their origin, humans have always made anthropomorphic representations, first in the form of idols, fetishes, or statues for religious worship, later in the shape of puppets, dolls, or automatons for their entertainment qualities. And yet, these objects have always played multiple roles in human society; modernity in particular shows a great interest paired with great ambivalence towards dolls, puppets, and automatons, regarded both as uncanny Doppelgänger or threatening machines. In order to comprehend the scope of our modern fascination with these figures, we will explore their haunting presence in literary texts by ETA Hoffmann, Achim von Arnim, Theodor Storm, Felisberto Hernandez, discuss theoretical texts by Sigmund Freud and Heinrich von Kleist, look at paintings by Oskar Kokoschka and at photographs by Hans Bellmer & Cindy Sherman, watch a ballet by Andreas Heise and films by Fritz Lang and Alex Garland, and watch fashion shows by Alexander McQueen and Jean-Paul Gaultier. Conducted in English.

Class Format: This seminar will be taught online.

Requirements/Evaluation: active class participation, oral presentations on the reading materials, three 5- to 8-page papers

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature majors, or those considering a major in Comparative Literature

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 251(D1) GERM 251(D1)

Writing Skills Notes: Each student will write three 5- to 8-page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write two 3-4 page papers on which I will provide written feedback regarding grammar, style, and textual analysis.

GERM 301 (F) From Red Riding Hood to Autobahn: German Forests in Literature, Culture, and Economy

Over the centuries, German and other Western literary traditions projected widely diverse notions onto the forest. It served as a placeholder for romantic concepts of origination as well as threatening notions of wilderness. It is “the shadow of civilization” (R.P. Harrison), a liminal space, an imagined refuge for the marginalized -- and home to countless fairy-tale characters. Consistently, both positive and negative idealizations stand in stark contrast to the woods’ predominantly economic and embattled role in German society: Wood fueled the early industrial revolution and today environmentalists occupy trees to protect them from lignite mining and highway construction. In this course, we will trace these histories and notions as well as their tensions and contradictions in German literary texts from the 19th to the 21st century. We will pay special attention to the central symbolic role the forest has played in German culture and nation-building, and reflect on its multiple poetic, political, and economic functions. The earliest texts we will read include Grimms’ fairy tales and Droste-Hülshoff’s Judenbuche. We will read well-known authors of the 20th century, such as Brecht and Grass, and discuss more recent poetry and novels, such as excerpts from Strubel’s In den Wäldern des menschlichen Herzens. The literary texts will be complemented by a limited number of key essays in Ecocriticism and the Environmental Humanities. We will also take advantage of our location in the Berkshires to explore de- and reforestation in the region during a field trip. Discussion and primary readings in German.

Class Format: One field trip planned to learn about the history of de- and reforestation in the region from an ecologist based in the area

Requirements/Evaluation: Careful reading and preparation of texts, written assignments, short oral presentations

Prerequisites: GERM 202 or equivalent

Enrollment Limit: 15

Enrollment Preferences: If course over-enrolls (beyond the cap), preference will be given to students in GERM

Expected Class Size: 10 - 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year
GERM 304 (S) Rebels and Conformists: Postwar Germany from The 'Economic Miracle' to the Fall of the Wall

Primary Cross-listing

In postwar West Germany, a thorough examination of the Nazi past took a backseat to economic recovery and repairing the country's international standing, whereas to some extent the reverse was true for the East. An authoritarian democracy, an emphasis on consumerism and the qualitatively different experiences of younger generations led them to question whether the Federal Republic was a restoration or a new beginning? In the East, the cold war led to an increasingly Stalinist interpretation of communist principles, while communist ideals were upheld as an antidote to Nazism and the new materialism. This tutorial will cover a wide range of social protest as reflected in literature and film of the two Germanies: critical responses to the Holocaust in the two countries, the 1968 student revolution, anti-capitalist terrorism by the Baader-Meinhof gang, the feminist and gay rights movements, reformers and repression under Ulbricht and Honecker in the GDR, minority rights and environmental activists. Authors will include: Peter Weiss, Die Ermittlung, Heinrich Böll, Und sagte kein einziges Wort, Gisela Elsner, Riesenwürge, Emine Sevgi Özdamar, Das Leben ist eine Karawanserei, Volker Braun, Unvollendete Geschichte, Alice Schwarzer, Der kleine Unterschied und seine großen Folgen, Christian Kracht, Faserland, Thomas Brussig, Wasserfarben. Films may include: Gerhard Klein, "Berlin-Ecke Schönhauser," Ulrich Plenzdorf, "Die Legende von Paul und Paula," Rainer Werner Fassbinder, "Angst essen Seele auf," Reinhard Hauff, "Messer im Kopf," Uli Edel, "Der Baader-Meinhof Komplex," Margarethe v. Trotta, "Das zweite Erwachen der Christa Klages," Heiner Carow, "Coming Out," Hans Weingartner, "Die fetten Jahre sind vorbei."

Requirements/Evaluation: alternating 4-page tutorial papers in German, and 2-page critiques

Prerequisites: GERM 202 or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: German majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $80 books

GERM 313 (F)(S) The Mediation of Nationalism in Germany (1871-1918)

The German unification of 1871 was a fusion of different kingdoms, grand duchies, duchies, principalities and free cities that created a shared cultural identity. This course examines how nationalism was mediated to create, achieve, and sustain a German identity in the German Empire from 1871 until 1918 when it ended. This course surveys the role of the mass media, public art, and other forms of cultural expression in maintaining a sense of German community and resolving the tensions between different geographical, cultural and religious identities while also simultaneously mediating and juxtaposing a collective German identity against non-Germans. Our materials include literature, magazine publications, paintings, monuments and popular culture in the Empire. Some specific themes we will address include the aims of the agents and "architects" of nationalism and the roles of religion and geography in nationalism and of national heroes and legends, and the definition of national identity in opposition to a perceived Other (France and Africans). The course will proceed thematically, focusing on the relationship between nationalism and public figures, nationalism and the Other, as well as nationalism and visual culture. We also touch on the intersection between nationalism and children's literature and some opposition to nationalism in the German Empire. We will conclude by considering how the nationalism of the German Empire still informs politics today. Reading and Discussion in German.

Requirements/Evaluation: Active class participation, written homework, written and oral assessments.

Prerequisites: GERM 202 or permission of the instructor.

Enrollment Limit: 19

Enrollment Preferences: If course overenrolls (beyond cap), preference given to German Students.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Fall 2023
GERM 314 (S) Underground Berlin: Art, Performance, and Film, 1980s to Present (DPE)

Cross-listings: GERM 314 ARTH 315 WGSS 344

Secondary Cross-listing

Subsequent to the National Socialist suppression of sexual expression, the intersections of politics and art in the post-World War II era reflected an organic embeddedness within the context of the city of Berlin. This course reflects upon this history to understand Berlin's present, its contradictory mix of new and old, "deep history" and nostalgia. Often described as an island moored within the communist territory of East Germany during the years of the Berlin Wall, West-Berlin became the city towards which many queer artists, musicians, and activists gravitated in order to avoid the involuntary conscription in the Bundeswehr, as an unexpected outcome of the government's plan to boost population in the former capital. We will focus on the excavation and recognition of inter/cultural positions that challenge German nationalism, at the same time that the country reestablished itself as a world power. Over the semester, we will rethink Berlin with respect to the once nascent geopolitics of the European Union, and the city's social fluctuations and periods of migration as registered through audiovisual and performative forms in advance of and in the decades following the fall of the wall in 1989. Focusing on art, performance, and film, we will examine the architectural, discursive, and cultural spaces in which these forms of creative and political expression take shape—from art museums and theater houses to occupied buildings, from independent publishing imprints and collaborative nonprofit organizations to night clubs. This course will examine the changing city with respect to activism, collectivity, alienation, solidarity, and belonging.

Requirements/Evaluation: Weekly response papers (1-2 pages); participation in class; one research paper (12-15 pages)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Art History majors, German majors, then any interested student

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Difference, Power, and Equity Notes: Artistic works and subcultural formations addressed in this class reflect the intersection of difference, power, and equity in contemporary culture and society. Situating the work of artists and activists within a specific and evolving social and geopolitical context, it promotes greater understanding and skills for engaging in cultural debates on racism, homophobia, and sexism.

Not offered current academic year

GERM 315 (F) Kafka and His/Our World (WS)

Cross-listings: GERM 315 COMP 316

Primary Cross-listing

"It's so Kafkaesque!" We love to use the most famous Austro-Hungarian-Czech-Jewish writer of all time to characterize puzzling and dispiriting situations. But close examination of Franz Kafka's work and life reveals a multi-dimensional world that goes far beyond the cliché. Jewish in an increasingly anti-Semitic environment, German-speaking surrounded by Czech-speakers, deeply alone in a family that didn't understand him, Kafka produced texts that simultaneously demand and refuse to be interpreted. In this tutorial we will begin with intensive readings of selected short stories and parables, then move on to an exploration of the Kafka's own words from diaries and letters, as well as secondary sources. The course will conclude with discussions of how Kafka's texts and their contexts might relate to contemporary conditions and/or to students' own lives and thoughts. This will be a modified tutorial, with five groups of three students apiece. Students may take the tutorial in either German or English; groups will be formed accordingly.

Class Format: The class will be divided into groups of 3. At each weekly meeting, one of the 3 will present a 5-page paper, another will present a formal response, and the third will participate actively in discussion. Students will incorporate at least one of their papers into a final project that links their discussions of Kafka to their own interests and/or to contemporary issues. Students can take the course in German or English (or a combination
of the two), and groups will be formed accordingly

**Requirements/Evaluation:** Three 5-page papers, three 1-2 page responses, one final project, discussion leading. Evaluation: Tutorial papers will receive extensive comments, but no grade; the instructor will meet with individual students at least twice during the semester to discuss how things are going for them. Responses will not be evaluated by the instructor, but instead will function well or less well in the context of the discussion. The final project will receive a grade, and the final grade will be determined by the overall trajectory of the student's learning.

**Prerequisites:** For German speakers: GERM 202 or the equivalent preferred, though students with less experience should contact the instructor. For students taking the course in English: one college literature course.

**Enrollment Limit:** 15

**Enrollment Preferences:** German students, majors or potential majors in Comp Lit or German

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GERM 315(D1) COMP 316(D1)

**Writing Skills Notes:** The course has a modified tutorial format, with groups of three meeting weekly instead of pairs. Each student will write three 5-page papers plus three 1-2-page responses during the semester, and will prepare a final project. Each paper will receive extensive feedback from the instructor.

Not offered current academic year
In this course, we will reflect on the intimate relationship between love, lust, and violence, examining how love and lust do not exclude violence, but rather include—if not provoke—it. In order to gain a better understanding of the dynamics formed by this fascinating triangle, we will read novels by Goethe and Schnitzler, short stories by Kleist, Hoffmann, Mann, plays by Büchner, Hauptmann and Wedekind, and watch films by Faßbinder, Hanek and Muskala. Conducted in German.

Requirements/Evaluation: papers and oral presentations
Prerequisites: GERM 202 or the equivalent
Enrollment Limit: 10
Enrollment Preferences: German majors
Expected Class Size: 10
Grading: no pass/fail option, yes fifth course option
Distributions: (D1) (WS)

Writing Skills Notes: Students will submit multiple drafts of their papers. Focus is on argument and thesis statement, introduction and conclusion as well as literary analysis and interpretation of primary and secondary literature. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Not offered current academic year

GERM 335 (S) Afro-Germans: History, Culture, and Literature

Even though Afro-Germans have been a part of Germany for centuries and have undergone efforts at establishing themselves as an organized cultural group, their culture and literature have been often dismissed, relegated at the margins of dominant white German culture. In the aftermath of the Black Lives Matter movement in Germany, the country’s belated debate about German colonialism, and its recent reckoning with race and racism, Afro-Germans have lately gained an unprecedented visibility in the German public sphere. Through their work, Afro-German journalists, writers, activists, and artists are all contributing to questioning and redefining German identity, culture, and history. Focusing primarily on Afro-German history, culture, and literature of the twentieth and twenty-first centuries, this upper-level seminar starts by examining acts of racist violence in German history (the Herero and Namaqua genocide in Namibia in 1904, the "schwarze Schmach” campaign in 1920’s, the killing of Black French soldiers by the Wehrmacht in 1940). We will address issues of race, bi-racialism, and racism in a post-war context in West as well as East Germany through the poems by May Ayim, the essays by Aubre Lorde and Alice Hasters, the memoirs by Hans-Jürgen Massaquoi, Theodor Michael, Lucia Engombe, Stefanie Lahya-Aukongo, and Ika-Hügel Marshall, the novels by Harald Gerunde, Noah Sow, Sharon Dodua, Olivia Wenzel, Ijoma Mangold, the documentary films by Nadja Ofuatey-Alazard, and the artworks by Marc Brandenburg.

Requirements/Evaluation: Short oral presentations, active participation in the discussion, two 2-3-page papers and three 3-5-page papers
Prerequisites: GERM 202 and GERM 300
Enrollment Limit: 12
Enrollment Preferences: German Majors and German Certificate
Expected Class Size: 10
Grading: yes pass/fail option, no fifth course option
Distributions: (D1)

GERM 377 (F) Austria and its Borders

For centuries, Austria was characterized not just by the sheer expanse of its territory, extending from the Adriatic Sea to the South to Ukraine in the North, from Switzerland in the west to nearly Turkey in the east. Its identity was also closely associated with the many porous internal borders among its various ethnic groups: German, Polish, Romanian, Slavic, Italian, etc. The first World War put an end to this multiethnic, multilingual identity, leaving a primarily ethnic-German "Rest-Österreich" whose fatal passivity in the face of German expansionism led to the erasure of the nation altogether. After World War II, Austria expended far too much energy cordoning off its own past as a perpetrator, creating through willful ignorance a psychic and political boundary that only began to open with the election of a former Nazi to the symbolic office of president in the mid-eighties. Austria’s entrance into the European Union in 1995 coincided with an influx of refugees from the Balkan Wars; it would seem that Austria was on its way back to expansive borders. But the 2000s have seen a two-track development: on the one hand rapidly increasing ethnic, linguistic, and cultural diversity and on the other a ferocious defense of ostensibly "Austrian" identity. This course will trace the Austrian relationship to its internal and

Class Format: This will be a "tritorial," with groups of three students meeting in tutorial format with the instructor.

Requirements/Evaluation: Three-four 5-page papers, three-four 1-2 page responses, one final project, discussion leading. Evaluation: Tutorial papers will receive extensive comments, but no grade; the instructor will meet with individual students at least twice during the semester to discuss how things are going for them. Responses will not be evaluated by the instructor, but instead will function well or less well in the context of the discussion. The final project will receive a grade, and the final grade will be determined by the overall trajectory of the student's learning.

GERM 515  (F)  Reading German for Beginners

German 515 is a beginning course for students whose principal reason for acquiring German is to work with written materials. It is particularly appropriate for students for whom the ability to read primary and secondary texts in German can be crucial. The focus of the course is on German for art history and criticism. Students will learn the key elements of grammar and acquire a core vocabulary. They will also practice reading and translating a variety of short texts.

Requirements/Evaluation: regular participation, homework

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: although this course is designed to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll with permission of the instructor

Expected Class Size: 12

Grading: pass/fail option only

Distributions: (D1)

Not offered current academic year

GERM 516  (S)  Readings in German Art History and Criticism

In this continuation of German 515 students develop the skills and vocabulary necessary for reading German accurately. The course introduces advanced grammatical topics and students practice reading in a variety of textual genres. Texts are selected from classical works of art history and criticism as well as from contemporary publications. By the end of the course the students will have a solid foundation for building proficiency in German, whether through self-study or further course work.

Requirements/Evaluation: regular participation, homework

Prerequisites: GERM 515 or equivalent preparation (placement test)

Enrollment Limit: 20

Enrollment Preferences: although this course is designed to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll with permission of the instructor

Expected Class Size: 9

Grading: pass/fail option only

Winter Study

-------------------------------

GERM 25  Berlin: The German Capital of Modernity, Freedom, and Diversity

The Winter Study Travel Course 2024 to “Berlin: The German Capital of Modernity, Freedom, and Diversity” is meant to be an intense learning experience, both cultural and linguistic. This two-week long, full immersion travel course is the opportunity to visit Berlin, discover its history, and explore its multicultural identity. We will do walking tours and visits focusing on the capital of Germany’s cultural history as well as its various communities (Jewish, Turkish, Black, LGBTQ) that largely contributed to make Berlin the vibrant cosmopolitan city it is today. We will also partake in Berlin’s rich cultural life by visiting museums and art galleries, going to the movie’s and the clubs, and attending opera, theater, and cabaret performances. Because the Winter Study Travel Course also pursues a linguistic goal, all tours and visits will be conducted in German and all cultural events will be in German. Students will be required to take a language pledge and expected to speak German for the whole duration of their stay in Berlin. Students will attend morning classes (12 hours total) and participate in mandatory tours and visits in the afternoon under the supervision of their Williams professor. In class, groups of students will give presentations in German on the tours and visits of the previous days, reflect on their learning experience, and share their impressions with the group. A short film and an exhibit at the College will be the final assignment. This travel course is a perfect complement to the GERM 206 seminar on Berlin (history, culture, literature) which I will be offering in the Fall of 2023. Because the students
enrolled in this class will benefit the most from a trip to the capital of Germany, they will be given priority. Williams students enrolled in upper level German classes are strongly encouraged to apply. Students who are registered in GERM 103 by the time of their application will also be considered.

Requirements/Evaluation: Final project or presentation.

Prerequisites: Students must either be enrolled in GERM 103 to apply for this course or have already completed GERM 103 and above.

Enrollment Limit: 15

Enrollment Preferences: Preference for students enrolled in my GERM 200 level class on Berlin and students enrolled in my GERM 300 level seminar on the New Woman in the Weimar Republic

Expected Class Size: 15

Grading: TRVL Winter Study Travel Course

Not offered current academic year
An informed engagement with the world is an indispensable part of the liberal education that is the goal of the Williams experience. The Global Studies Program enables students to achieve this goal through a cross-disciplinary and comparative curriculum. The program offers multiple tracks, on a region of the world or theme, around which students construct their global studies concentration.

Requirements

To complete the concentration, students must: take one introduction course from the Global Studies 101-110 series; take a comparative course; fulfill the requirements of a track; and complete a senior exercise in their track.

Global Studies 101-110 Series

All students wishing to pursue the concentration should take one introduction course from the Global Studies 101-110 series early in their careers. The topics and regions covered will vary and be selective, but all will be designed to place cultural, political, economic and technological issues in conversation with one another to illustrate the necessity of cross-disciplinary and comparative perspectives. On occasion, students may petition to substitute a course equivalent in scope to Global Studies 101 to meet this requirement.

TRACKS

After taking an introductory course from the Global Studies 101-110 series, students are asked to select a track that will structure their global studies curriculum. There are two types of track. The first focuses on a particular region of the world or a contact zone where multiple communities encounter one another. The second type is organized thematically and permits students to explore a cultural, political, economic or technological issue globally and comparatively. Each track is administered by faculty teaching in that track in consultation with the advisory committee. At present the program consists of the following tracks:

Area Tracks

- African Studies
- East Asian Studies
- Latin American Studies
- Middle Eastern Studies
- Russian and Eurasian Studies
- South and Southeast Asian Studies

Thematic Tracks

- Borders, Exile and Diaspora Studies
- Economic Development Studies
- Urbanizing World

To fulfill the requirements of a track, students must complete three approved courses from at least two disciplines and address their track in their senior exercise. Faculty in each track may set an additional requirement of a level of language competency for its concentrators. Students may petition to use courses completed on approved study away programs to fulfill elective requirements. Students may not count a course toward more than one requirement in the track.

Senior Exercise

All concentrators must complete a senior exercise. The senior exercise will be a substantial piece of writing (20-25 pages) that draws together concentrators’ disciplinary skills and their expertise in their track. It might be work done in the context of a senior capstone course in a relevant department or in the context of a shared seminar sponsored by the Global Studies program. Concentrators present their final senior exercise in class
or in a Global Studies colloquium, or in both.

Concentrators must also take a comparative course—that is, a course that might not cover material directly dealing with the track, but would enrich a student’s engagement through comparative inquiry.

Honors

A candidate for honors in Global Studies must maintain at least a B+ average in the concentration and be admitted to candidacy by the program faculty. An honors candidate must complete their project in a semester (and Winter Study). An honors candidate will prepare a forty-page thesis or its equivalent while enrolled in the senior thesis course, 491 or 492 (and Winter Study). This course will be in addition to the courses required to fulfill the concentration.

A student wishing to become a candidate for honors in Global Studies should secure a faculty sponsor and inform the program chair in writing before spring registration of her/his junior year.

Study Away, Research, and Internships

Although not a requirement, study away, research, and/or relevant internships are an essential component of Global Studies. Where relevant to the curriculum plan of concentrators, the program Chair, in coordination with the Study Away Advisor and the Career Center, will advise students on opportunities in these areas.

FAQ

Students MUST contact department/program BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No, but students should not expect to get more than 3 study abroad courses counted towards the concentration.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Typically the Introduction to Global Studies and the senior exercise cannot be fulfilled abroad.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

Note: as course offerings change every year, students should feel free to check with the Program Chair to see if courses not listed below might count as electives.

In spite of predictions that religion would wither away in the face of modernization, even casual observation indicates that it remains a powerful force in contemporary political life. Our goal is to obtain an enhanced understanding and appreciation of the salience of religion in public life. The course will be divided into three parts. The first part focuses on different theoretical approaches to making sense of the relation between religion, politics, and society, discussing especially the concept of the ‘secular’ in Western thought and decolonial critique thereof. The second part will take a global perspective on the relation between religion and politics. We will discuss cases of Buddhism, Christianity (Catholicism and Protestantism), Confucianism, Hinduism, Islam (Sunni and Shi’a), and Judaism. The third part focuses on religion in the USA. Here, we will discuss the role of religion in American political culture, the relation of religion to the state, the relevance of religious interests and their political mobilization, religious minorities in the United States, and many other aspects of religion in the US society. Although the study of religion and politics raises a host of deep philosophical questions, the principal aim of the course is to understand how religion affects politics (and vice versa), rather than to explore the normative dimensions of questions raised by the interaction of these two forces.

Requirements/Evaluation: Class participation and three papers, in these proportions: 10% attendance; 20% participation; 20% first paper (7 pages); 30% second paper (8-10 pages); and 20% third paper (7 pages). No final exam.

Prerequisites: none

Secondary Cross-listing

This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination.

Requirements/Evaluation: participation, online responses, quizzes, midterm, and final exam

Prerequisites: none

Enrollment Limit: 40

Expected Class Size: 30-40

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

GBST 103 (S) America and the World

Cross-listings: PSCI 161 GBST 103 LEAD 165

Secondary Cross-listing

This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made on a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation to Iran; terrorist threats; humanitarian disasters in Syria and Libya; and long-term challenges like climate change. We will not only describe American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning only sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a "grand strategy." By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

Class Format: discussion

Requirements/Evaluation: short papers, class participation, and final exercise

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first-years and sophomores

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option
GBST 104  (S)  Race and a Global War: Africa during World War II  (DPE)  (WS)

Cross-listings:  HIST 104 GBST 104 AFR 104

Secondary Cross-listing

This course highlights African experiences of World War II. Although most histories have excluded Africa's role in the war, the continent and its people were at the center of major developments during this global conflict. In fact, many Africans remember the Italian invasion of Ethiopia in 1935 as the start of the war. African servicemen fought alongside the Allied and Axis forces on major warfronts in Europe, Africa and Asia. African communities and individuals also established war charity campaigns to collect funds, which they sent to war ravaged societies in Europe. Indeed, African economies, despite their colonial statuses, kept European imperial nations afloat in their most hour of need. At the same time, African colonial subjects faced severe food shortages, the loss of working-age men to labor and military recruiters, and dramatically increased taxes. We will examine the impact of these and other wartime pressures on different African communities. How did African societies meet such challenges and how did they view the war? In this course we will examine the roles that women played during the war, and the various other ways that African communities met wartime demands. Other topics we will explore include the role of African women; colonial propaganda; political protest against the war; race and racial thought in the wartime era; war crimes; African American support for the liberation of Ethiopia; and the war's impact on decolonization across the continent. We will further study how Africans and outsiders have differently conceptualized the continent's role in the war by analyzing a variety of sources, including scholarly writings, archival materials, films, former soldiers' biographies, and propaganda posters.

Requirements/Evaluation:  active participation in discussion, map quiz, 2 reading responses, and 3 essays (of about 5 pages)

Prerequisites:  first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit:  19

Enrollment Preferences:  first-year students and then sophomores who have not previously taken a 100-level seminar

Expected Class Size:  19

Grading:  no pass/fail option, no fifth course option

Distributions:  (D2)  (DPE)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 104(D2) GBST 104(D2) AFR 104(D2)

Writing Skills Notes:  Students will write two 3-5-page essays each written in two drafts with instructor comments. They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes:  This course explores the colonial relationship during a major global crisis. Students will examine existing narratives of African contributions to the war and to come up with their own interpretations, and will be called to critically engage the question of why and how colonies made significant contributions to the Allied cause by producing needed materials and resources or by joining the fight. Africans made these contributions despite various and complex inequities.

The course will give a global perspective on Islamophobia and how it is structuring and used by political actors in various territories. The course will show how Muslims were constructed as subjects in history, politics, and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. The course is based on the literature of multidisciplinary studies by leading scholars in the field, drawing from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology. This course's goal is to show how the racialization of Islam and Muslims has been constitutive to the latter's imagination. It looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. The course goes back to the founding moments of an imagined white-Christian Europe and how the racialization of Muslim bodies was central to this project and how anti-Muslim racism continues to be relevant in our world today. The course will give a global perspective on Islamophobia and how it is structuring and used by political actors in various territories. The course will show how Muslims were constructed as subjects in history, politics, and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. The course is based on the literature of multidisciplinary studies by leading scholars in the field, drawing from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology.

Requirements/Evaluation: Class participation and two papers, in these proportions: 10% attendance; 20% participation; 35% first paper (7 pages); 35% second paper (7 pages). No final exam.

Prerequisites: no

Enrollment Limit: 35

Enrollment Preferences: freshmen and concentrations

PSCI 173(D2) GBST 105(D2) REL 107(D2)

Difference, Power, and Equity Notes: The course critically examines difference, power, and equity. Thematically, it looks at the racialization of Islam and the intersection of race, religion, class, and gender in the construction of the 'Muslim problem' from a historical as well as a global contemporary perspective. On one side, the course content explores forms of difference and power. On the other side, the course attempts to help students to engage in alternative forms of action to address these inequalities.

GBST 116  (F)(S)  The Art of Playing: An Introduction to Theatre and Performance

Cross-listings: THEA 101 GBST 116 COMP 151

Secondary Cross-listing

This is an introduction to the global art and practice of making theatre. Students will learn about the history, aesthetics, and approaches to the performer's labor associated with select performance forms from around the world. Emphasis will be on the analysis of embodied practices and the relationship between the stage and everyday life. Through readings, audiovisual materials, performance exercises, and discussions we will engage with theatre as a constantly evolving art form, sharpening our analytical skills through theoretical approaches from performance studies. Central to our exploration will be excavating the Eurocentric assumptions that conventionally shape the practice and study of theater in the United States. We will seek ways to decolonize our perspectives and ask critical questions about performance's potential to enact strategies of anti-racism and anti-imperialism. This course, open to all students, is a gateway to the major in Theatre, and is a prerequisite for THEA 201, THEA 204, THEA 301, and THEA 401.

Requirements/Evaluation: two 5-page critical essays, journal reflections, studio exercises, and active participation in all activities

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: prospective Theatre majors or Theatre majors or Comparative Literature majors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option
GBST 117  (F)  Bombay/Mumbai: Making of a Modern Metropolis  (WS)

Cross-listings:  ASIA 117 HIST 117 GBST 117

Secondary Cross-listing

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of colonial and modern India through the history of its most important city.

Requirements/Evaluation: assessment will be based on class participation and weekly written responses to readings (2 pages), 2-3 short papers (4-5 pages), leading to an oral presentation and final paper (10-12 pages). All writing assignments are structured to build up the final paper.

Prerequisites:  First years and sophomores only

Enrollment Limit:  19

Enrollment Preferences:  first-years, and then sophomores who have not previously taken a 100-level seminar.

Expected Class Size:  12-15

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

sites to racial justice and environmental crises and their historical roots in colonial surplus extraction. By examining literary and economic writings of Caribbeanists and Caribbean connected contributors side by side, we seek to uncover these links to how the Caribbean economy, its seascape and society are framed, conceptualized and traversed as transplanted spaces, economic zones, and extractive geographies today. Unorthodox perspectives on economic and social thought that emerged to explain the region's integral role in merchant and industrial capitalism, New World social formations and contemporary globalization will also be discussed. We will closely analyze critical texts of contributors to the New World Group that centers the Caribbean within global economic transformations. Some events this course covers are indigenous genocide, labor regimes, agrarian change, structural adjustment, economic and ecological crises, postcolonial debt, technology, current fragmentation of global neoliberalism. These events will help shape an appreciation for the material and socio-cultural understandings of economic phenomena starting from the plantation to the plot within cultural and literary works in pluralistic, productive, and powerful ways.

Requirements/Evaluation: Oral or poster presentation analyzing a literary and Caribbean economist's work side-by-side (15 minutes or full-length/multi-page poster); critical analysis of a Caribbean economic sector or major regional report—choice made after discussion with instructor (10 pages); final project: review of a specific Caribbean community defined by group, geography or economic status drawing upon class, race, gendered axes of analysis (15 pages); participation (creative presentation of a reading drawing upon Caribbean cultural traditions that raise questions for class discussion)

GBST 151 (F) Global Questions, Global Frameworks (DPE)

In this foundational course in the Global Scholars Program, students will be introduced to an interdisciplinary approach to exploring critical global issues. Students will engage with new frameworks and concepts to consider global processes and examine the complexities of the changing and increasingly interconnected world. The first part of the course will explore critical topics in Global Studies and grapple with influential theories on global trends and experiences. The second part will be focused on a particular country and city and how some of the major global trends impact the reality of life in that area. One purpose of this module is to prepare students for their Winter Study trip to that region and engage in research related to their academic interests. Only students admitted to the Global Scholars Program will be able to register for this course.

Class Format: Discussion-based class

Requirements/Evaluation: Participation in class discussions, reading course materials, engaging with our speakers, two 5pp. papers and a final project.

Prerequisites: None

Enrollment Limit: 12

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Taking an interdisciplinary approach to exploring critical global issues, students will grapple with difference, power and equity in a global context particularly by being introduced to some of the leading theories of global experiences as well as how these issue impact particular communities around the world. One purpose of this course is to enable students to become better equipped to conduct research on pressing issues around the world and to be more responsible global citizens.

GBST 162 (S) Languages of East Asia

Cross-listings: CHIN 162 GBST 162 ANTH 162 ASIA 162

Secondary Cross-listing

A survey of the Chinese, Japanese, and Korean languages in their linguistic and cultural context. Working with various types of multimedia including audio, video, animation, and texts, we'll take up the phonetics, phonology, morphology, syntax, and lexicon of these three major East Asian languages, including also their history and writing systems as well as how they function in the societies where they are spoken. Though the emphasis of the course is on linguistic description and analysis, there will also be an applied component, as part of which we'll learn several dozen common expressions in each language. Some of the questions to be discussed are: What are the similarities and differences among these three languages? How are and how aren't they related? How did the modern standard form of each develop and what is its relationship to any non-standard languages or dialects? How do these three languages reflect sociolinguistic phenomena such as gender, class, and politeness? How do the writing systems of these languages function and what is the role of Chinese characters in them? What has been the influence of Classical Chinese on Modern Chinese, Japanese, and Korean? How have these languages changed due to influence from English and other languages? How are they used in Asian American speech communities? And what are the prospects for their future development, including the influence of computers and digital communications? While this course is not intended as a comprehensive introduction to linguistics, it does introduce many basic terms and concepts from that discipline.

Class Format: combination of lecture, discussion, and language practice

Requirements/Evaluation: three quizzes, two 2- to 3-page papers, an oral presentation, and an 8- to 10-page term paper

Prerequisites: none (lectures, class discussions, and readings in English; no prior background in linguistics or any Asian language required)

Enrollment Limit: 20

Enrollment Preferences: open to all with preference to first-year students and sophomores as well as majors/concentrators in CHIN, JAPN, EALC, ANTH, ASIA and GBST

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

GBST 203 (F) Colonial Rule and Its Aftermaths in Africa (DPE)

Cross-listings: GBST 203 AFR 227 HIST 204

Secondary Cross-listing

This course focuses on the history of Africa during the colonial and post-colonial periods, especially focusing on the period between 1885 and 2000. The first part of the course will explore the imposition of colonial rule and its attendant impacts on African societies. During this section, we will especially examine how Africans responded to colonialism, including the various resistance movements that arose at different moments to contest colonial rule. We will also explore the various transformations wrought by colonialism. The second part of the course will explore the African struggle to decolonize their societies and to fashion viable political systems. In addition to historical texts, the course will make use of cultural materials such as novels and films.

Class Format: Mixed format of lecture and discussion seminar

Requirements/Evaluation: active participation in discussion, map quiz, response papers, midterm and final exams, and case study paper (7-10 pages)

Prerequisites: None

Enrollment Limit: 30

Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies
Expected Class Size: 30
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
GBST 203(D2) AFR 227(D2) HIST 204(D2)

Difference, Power, and Equity Notes: This course will introduce students to how Africans contended with the forces of colonialism and its aftermaths. It will examine how different African societies as well as social groups on the continent were affected by and responded to colonial rule. All of the readings, discussions, and assignments will ask students to contend with the issues of how to write African lives into the history of colonialism.

GBST 204 (S) To See the Past: Russian and Soviet Cinema on History
Cross-listings: GBST 204 COMP 204 RUSS 204

Secondary Cross-listing
This course surveys Soviet and Russian cultural history of the 20th- and 21st-centuries through the history of the cinematic medium. We will watch and analyze key films of this period--films by Eisenstein, Vertov, Tarkovsky, Muratova, Balabanov, Zviagintsev, and Fedorchenko among others--from a double perspective. On the one hand, we will study the cultural and historical contexts of the Soviet Union and Russia; on the other hand, we will learn the formal and stylistic aspects of the cinematic medium as it developed historically (from silent, to sound, to color, to digital etc.). From this double perspective, we will try to answer a larger question that underlies this course: What kind of historical thinking can we learn through cinema as a medium? In other words, we will take cinema neither simply as a direct reflection of state ideology nor as pure aesthetic form or entertainment for the masses. Rather, we will approach the films of this period as audio-visual texts that are rich in historical content and require our informed and attentive interpretation.

Requirements/Evaluation: For each class you'll watch 1 or 2 film(s) and read typically 1 article under 20 pages. You will submit short viewing response before each class. Additionally, there will be short viewing or creative assignments to familiarize students with formal aspects of film. Evaluation will be based on participation, one presentation, short sequence analysis, and final paper or video essay

Prerequisites: none, open to all students
Enrollment Limit: 15
Enrollment Preferences: declared or prospective Russian or Comparative Literature majors, Russian Certificate seekers, Global Studies concentrators
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

GBST 208 (F) The U.S. and Afghanistan: A Post-Mortem (DPE)
Cross-listings: GBST 208 ASIA 208 ANTH 208 PSCI 220

Secondary Cross-listing
The United States attacked and defeated the Afghan Taliban regime over in the course of a few short weeks in 2001. Within a few years, the finality of that victory was brought into question as the Taliban regrouped and eventually reasserted itself as a formidable guerilla army that the U.S. military could not easily defeat. At the same time that it was facing a more difficult military challenge than anticipated, the United States got bogged down in the process of nation-building, as well as efforts at social reform. This course examines the history of American involvement in Afghanistan, beginning with the Cold War when the U.S. used Afghanistan as a test case for new models of political modernization and economic development. We will go on to discuss the U.S. support for Islamist political parties during the Soviet occupation of Afghanistan in the 1980s and the consequent rise of the Taliban, and the role of Afghanistan in the September 11th attacks and the "War on Terror" that followed. The course will conclude with a
consideration of the impact and legacy of the two decades of nation-building and social reform carried out by the United States since 9/11.

**Requirements/Evaluation:** grading will be determined by class participation, two short (500 word) essays, and a 15-page research paper

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Anthropology and Sociology majors, Global Studies concentrators, Political Science and Asian Studies majors will get preference

**Expected Class Size:** 15-20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 208(D2) ASIA 208(D2) ANTH 208(D2) PSCI 220(D2)

**Difference, Power, and Equity Notes:** Among the topics relevant to power and difference to be considered in this course are the American support and later disavowal of Islamist political parties to advance US geopolitical goals, public relations efforts "to save Afghan women" after 9/11, and the uses and misuses of American military, economic, and political power to build a western-style democratic government and bring western-oriented social reforms to a society radically different from U.S. society.

**GBST 212 (F) Foundations of China**

**Cross-listings:** HIST 214 GBST 212 REL 218 ASIA 211 CHIN 214 ANTH 212

**Secondary Cross-listing**

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

**Requirements/Evaluation:** short writing assignments (approximately 750-1000 words each), quizzes, a mid-term, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** Chinese majors, History majors, Religion majors, and Anthropology majors

**GBST 214 (F) Asian/American Identities in Motion (DPE)**

**Cross-listings:** ASIA 216 DANC 216 THEA 216 AMST 213 GBST 214 AAS 216

**Secondary Cross-listing**

The course aims to explore dance and movement-based performances as mediums through which identities in Asian and Asian-American (including
South-Asian) communities are cultivated, expressed, and contested. Students will engage with how social and historical contexts influence the processes through which dance practices are invested with particular sets of meanings, and how artists use performance to reinforce or resist stereotypical representations. Core readings will be drawn from Dance, Performance, Asian, and Asian American Studies to engage with issues such as nation formation, racial and ethnic identity politics, appropriation, tradition and innovation among other topics. This is primarily a discussion-based seminar course, and might also include screenings, discussion with guest artists and scholars, and opportunities for creative projects. No previous dance experience is required.

Requirements/Evaluation: reading responses, in-class writing assignments, participation in discussions and presentations, essays, and a final cumulative essay assignment.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: first years and sophomores

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 216(D1) DANC 216(D1) THEA 216(D1) AMST 213(D2) GBST 214(D2) AAS 216(D2)

Difference, Power, and Equity Notes: This course introduces students to the role of performance in nation formation in Asia and the history of Asian-Americans in the US through analysis of dance practices. Student will explore how race was central to the formation of Asian and the American nation, and how social and legal discriminatory practices against minorities influenced popular culture. The assigned material provide examples of how artists address these inequalities and differences in social power.

GBST 217 (F) Viral Inequality: Power and Difference in Pandemics (DPE)

Cross-listings: GBST 217 STS 215

Secondary Cross-listing

From contested data to controversial containment strategies, the shape and course of pandemics are influenced at every level by the question: Who matters? Whose lives are prioritized and protected? Whose expertise is made actionable, and why? Focusing on the uneven distribution of risk and care during pandemics, this course explores how global health emergencies are not states of exception, but rather events that lay bare the priorities and interests of their host societies. Our investigation into pandemics--including Black Death, cholera, "Spanish" flu, HIV/AIDS, Ebola and novel coronaviruses--will provide a critical entry point into understanding the social, political, and economic processes that shape health interventions and outcomes, and their divergences along lines of social difference. We will ground our discussion and analysis using key concepts in Science & Technology Studies, while drawing from critical medical anthropology, disability studies, theories of capitalism and disaster studies to enrich our conversation.

Class Format: Online seminar

Requirements/Evaluation: Several short essays and reflection papers

Prerequisites: None, open to all students

Enrollment Limit: 12

Enrollment Preferences: If overenrolled, preference will be given to first-years and sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 217(D2) STS 215(D2)

Difference, Power, and Equity Notes: This course takes an intersectional approach to understanding how global pandemics unfold. It will emphasize
how power dynamics and social differences shape responses to, and outcomes of, health emergencies. Readings in social and critical race theory are designed to give students a deeper appreciation of these issues.

GBST 218 (F) Capital and Coercion (DPE)

Cross-listings: ECON 218 GBST 218

Secondary Cross-listing

Capital, tradable ownership shares in long-lived corporations, invented in the 17th century, has connected people of different races, religions, and geographies. There are huge profits from such economic interactions, but also risks: of being cheated, deceived, or coerced. This course uses insights from the economics of incentives (principal-agent models, contracts, mechanism design) to investigate the interplay between capital, coercion, and resistance. The role of prejudice will be central, as will the rise of middlemen as enforcers of coercion. Case studies span the 17th century to the 20th and include: the spice trade and conflict in the Indian Ocean, capital markets and fraud in Amsterdam and London, the Atlantic trade in enslaved people, the Dutch "cultivation system" in Java, the slow end of slavery in Brazil, and colonial control and independence in Kenya. Required readings for this class will include primary historical sources, and even excerpts from autobiographical novels!

Requirements/Evaluation: Students will be evaluated based on weekly reading responses, class participation, a midterm and a final.

Prerequisites: Econ 110

Enrollment Limit: 15

Enrollment Preferences: If overenrolled, students will be asked to submit a short statement of interest.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 218(D2) GBST 218(D2)

Difference, Power, and Equity Notes: This course analyzes the evolution of economic inequity. It analyzes how global market opportunities have been shaped by race, religion, wealth, and power.

GBST 219 (S) Indigeneity Today: Comparative Indigenous Identities in the US and Russia (DPE) (WS)

Cross-listings: GBST 219 ANTH 217 RUSS 217

Secondary Cross-listing

Indigenous movements for land, rights, and cultural preservation have spread to and originated in all corners of the world. However, the global nature of these movements at times obscures ways of being Indigenous in differing contexts. This course analyzes Indigeneity in both the United States and Russia today. Through reading and analyzing ethnography, theory, and literature, it focuses on Indigenous peoples in a comparative context. Rather than prioritizing concern with Indigenous peoples emerging from the US, it attempts to demonstrate what Indigeneity has been in both the United States and Russia and what it is and means today. It asks the following questions: what is Indigeneity and who is Indigenous; how is Indigenous identity constructed and by whom; and what convergences and divergences exist in Indigeneity between the US and Russia or for that matter in other contexts? To help answer these questions, in this course we will grapple with Indigeneity as a social category and other social formations, especially ethnicity, nationality, and race. Topics include: Indigeneity and the State, Revitalization and Resurgence, Indigenous People and Nature Protection, and Hemispheric and Global Indigenities.

Requirements/Evaluation: 10 posts to the course Glow discussion page, 3 times leading class discussion on the assigned readings, 1 short presentation, 1 extended portfolio project with regular shorter and longer writing submissions, and 1 final paper and final presentation (as the final part of the portfolio).

Prerequisites: None
Enrollment Limit: 16

Enrollment Preferences: Majors and certificate-seekers in Russian, then majors in Anthropology and Sociology, and then Global Studies concentrators

Expected Class Size: 12-15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
GBST 219(D2) ANTH 217(D2) RUSS 217(D1)

Writing Skills Notes: This course has the following assignments: Weekly post to the Glow discussion page, 1 short presentation, 1 extended project with regular writing submissions, 1 final paper and final presentation. For the extended project, we will have instructor feedback for all project assignments. In instructor feedback, comprehension of the material and the content of the writing, improvement in writing style and clarity, and development of voice will be discussed. There will also be peer feedback/review.

Difference, Power, and Equity Notes: In the course, students will learn about Indigeneity as a context-specific social formation. It understands Indigeneity as a category of difference with past and present importance. We will read about, discuss, and write about Indigeneity as a social category, along with other social categories it arose alongside (such as race, ethnicity, and nationality), and how it has been mobilized by both those who identify as Indigenous and by those who designate others as Indigenous.

GBST 221  (S) South Asia: Colonialism to Independence, 1750-1947 CE

Cross-listings: GBST 221 ASIA 221 HIST 221

Secondary Cross-listing
This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from c. 1750 to 1947. This period spans the decline of the Mughal Empire through British colonial rule, South Asians’ struggle for independence, and the Partition of India. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and podcasts. One objective of this course is to introduce students to the different political and social processes that led to the creation of India and Pakistan; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

Class Format: This class will also have a small but significant discussion component.

Requirements/Evaluation: class participation, response papers (2-3 pages), two short essays (4-5 pages), midterm and final exams

Prerequisites: none; open to all

Enrollment Limit: 40

Enrollment Preferences: history majors if the the class is overenrolled.

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

GBST 226  (F) The Working Globe: North and South Workers in Globalized Production  (DPE)
The course introduces students to the concept of globalization of production by focusing on how workers from distant cities and villages across the Global North and South are joined together in the same transnational labor processes. We will reflect on case studies that trace the real-world production of everyday goods and services like automobiles, garments, retail, and electronics. We will map global supply chains and investigate how they exploit and reproduce global inequalities. Focusing specifically on the labor process and on the condition of workers, students will acquire a grounded perspective on the global economy, as well as on the dynamics underlying precarity, deindustrialization, and uneven development. The key guiding concern for the course will be to understand the relationship between workers of the North and South: Does global production place these workers in a relation of fundamental conflict, or can a community of interest emerge between them?

**Class Format:** Assignments will require group work and presentations

**Requirements/Evaluation:** Class participation; 1-2 group presentations; 1 final paper

**Prerequisites:** None, open to all students

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference given to ANTH/SOC majors and GBST concentrators

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

SOC 226(D2) GBST 226(D2)

**Difference, Power, and Equity Notes:** Primarily the course investigates how historical inequalities between countries are reproduced by centering production relations and the site of work. Students will delve deeply into the inequality between workers of the global North and South, and they will also encounter situations where these differences intersect with racial and gendered dynamics.

Fall 2023

SEM Section: 01    MWF 10:00 am - 10:50 am     Bhumika Chauhan

**GBST 229  Performance Practices of India (DPE)**

This course explores ancient and contemporary performance practices in India. Our objects of study will include the text and performance of Sanskrit plays, contemporary and experimental theater productions, as well as forms of dance and ritual. We will discuss dramaturgical structure, staging, acting conventions, gender representation, performer training, the experience and role of the audience, as well as mythological and political themes. Thinking historically and ethnographically, we will seek to understand the aesthetics and social purposes of these practices, in addition to the relationship that performance has with everyday life, contested concepts of the nation, and caste. Throughout the semester we will interrogate the ways in which Western categories such as "classical," "folk," "religious," "traditional," and even the distinction between "dance/theater/music/visual arts" are not indigenous or accurate concepts for organizing thinking about performance in this part of the world.

**Requirements/Evaluation:** Evaluation will be based on participation in discussion, reading responses, an oral presentation, and one 10-page paper.

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** preference for seniors and juniors

**Expected Class Size:** 12

**Grading:**

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** We will examine British colonial edicts that prohibited performance practices as a form of social control as well as in the name of Christian morality. From here we will explore how upper-caste Independence era artists and leaders sought to reinvent the arts as vessels of "Indian" identity, at the cost of further marginalizing hereditary performance communities. We will also interrogate how the Indian state has promoted narrow visions of "femininity" and how artists contest religious nationalism

GBST 232 (S) Islam in Africa (DPE)

Cross-listings: REL 232 GBST 232 AFR 232 ARAB 232 HIST 202

Secondary Cross-listing

Islam in Africa is often relegated to the peripheries in the study of Islam, a religion most associated with Arabs and the Middle East. On the flip side, Islam is also portrayed as foreign to African belief systems and institutions. The relationship between Islam and Africa, however, begins with the very advent of Islam when early Arab Muslim communities took refuge in the Abyssinian empire in East Africa. This course explores the history of Islam and Muslim societies on the African continent by focusing on the localized practices of Islam while also connecting it to Islam as a global phenomenon. The course will begin with a historical focus on the spread of Islam in Africa from East Africa and North Africa in the seventh century all the way to the spread of Islam through Sufi brotherhoods in the eighteenth and nineteenth centuries. The course will also take an anthropological approach, exploring the diverse practices of Islam in African Muslim communities and the social and cultural impact of Islam on African societies. Among the topics the course will cover include African Muslim intellectual traditions, local healing practices, religious festivals, early modern African Muslim abolitionist movements, and the historical interactions between African and Asian Muslim communities in the Indian ocean world.

Requirements/Evaluation: Two essays during the semester and final project.

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: REL, HIST, ARAB, AFR, GBST majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

GBST 233 (F) Colonialism, Capitalism and Climate Crisis (DPE)

Cross-listings: GBST 233 ENVI 204 AFR 233

Secondary Cross-listing

Evolutions are part of human existence. These changes are not necessarily natural, uniform or linear across space and time. As colonial conquests sought to capture, dominate and exploit vast swathes of land, nature and people, supported by economic theories, violent, wide-ranging and long-term changes profoundly altered the environment and human-nature relationships. This course examines these transformations, specifically attending to the relationship between colonized/colonial (hu)man, nature and non-human species, drawing in perceptions of nature and the economy. Our starting point for this intellectual journey is the colonial imprint on human-ecological relations i.e. economic man, or Sylvia Wynter's conception of "ethno-class man" and "homo-economicus". We will consider social difference especially race as a central conjuncture of the changing relationship of capitalism and social organization relative to natural resource extraction, techno-scientific knowledge, industrial development and resulting accumulation of greenhouse gases that induce climate and ecological crises. We will also examine economic perspectives of climate change as a market failure, loss of economic value or a financial risk to stock portfolios that may be at odds with humane ways of organizing our collective planet. This course exposes the hierarchies of social difference and resulting inequalities (class, race, gender, species) under climate crisis to advance reparative and decolonial understandings. Drawing upon experiences from social, labor and environmental movements for climate justice, students will be able evaluate situated political economic responses to the climate crisis.

Requirements/Evaluation: 'Colonialism and my community' writing/ poster assignment (5 pages) 20%; Either a video essay on a 'green' technology (10 minutes), recorded interview with an environmental justice movement/activist/practitioner (20 minutes) or critical in-class presentation on an emerging 'green' technology (10 minutes) 25%; Creative activist project that reflects on histories and axes of power - gender, race, class, species (6-8 pages); Participation and attendance (leading a discussion/presentation) 20%

Prerequisites: None

GBST 235 (S) Race, Land, Dis/Re-possession: Critical Topics in Environmental Injustice and Subaltern Geographies

Cross-listings: AFR 235 ENVI 253 HIST 275 AMST 235 GBST 235

Secondary Cross-listing

This course is an introduction to ongoing and contemporary topics in colonialism, racial thinking, African Diaspora and, Global and Caribbean studies, studies of 'the environment,' and dispossession. We will examine how race, gender and class operate under racial capitalism and settler colonialism as ongoing, sometimes continuous and discontinuous processes. The readings will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, and other critical, anti-capitalist or decolonial scholars. Readings, as in AFR 234, will take up the question(s) of land and land-making; race, racialization, and racial thinking; of space and place as they all relate to the various processes, projects and methods of (dis)(re)possession, both "past" and "contemporary." We will interrogate temporal binaries, settler time, notions of (the) "progress(ives)" and other bifurcated understandings of the world. This course is the second part of a complementary course, titled, "Race, Land and Settler (Racial) Capitalism," which focuses on the historical geography of processes of (dis)(re)possession from a Black and Indigenous Atlantic perspective. In this iteration, weekly in-class discussion will be combined with guest lectures to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to explain how a range of these territorializing processes operate. Sound, music and other audio will complement discussions. Therefore, the capacity of deep listening, in-and-out of class, is a grounding. Sample topics covered in the course include: indigeneity and Blackness; (dis)possession and accumulation; plantation geographies and economies; housing and houselessness; the problem of parks and conservation; prisons and carceral geographies; Black geographies; environmental racism and colonial resistance. You are strongly encouraged to participate in both courses in this sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%

GBST 236 (S) Reading the Qur'an

Cross-listings: GBST 236 REL 236 COMP 213 ARAB 236

Secondary Cross-listing

In the nearly 1500 years of Islamic history, the Qur'an has been a central source of spiritual insight, ethical and legal guidance, sacred stories, and theological principles. Considered the divine word of God, the Qur'an is central to devotional life. This course will explore the Qur'an as a text that is always in a state of production. We will focus significantly on close readings of the text of the Qur'an, in addition to pre-modern and modern Qur'anic exegesis. The course will begin with a historical account of the revelation and collection of the Qur'an, placing the form and content of the text in the context of 7th century Arab society and the life of the Prophet. We will then study Qur'anic commentaries to discuss how Muslims have drawn theological, legal, philosophical, and mystical meaning from the Qur'an. We will pose some of the following questions: What do the different exegetical methods tell us about the intertextual nature of the Qur'an? How have these shifting notions affected the meaning made from Qur'anic verses and passages? What role do interpretive communities play in determining what the Qur'an says? Lastly, through an exploration of the art of Qur'an recitation, calligraphy, and Qur'an manuscripts, we will explore the ways in which the Qur'an is also an object of devotion in Muslim life.

Requirements/Evaluation: class participation, weekly reading responses, 3- to 4-page midterm paper, and a final project with a media component and a 4- to 6-page analytical essay

GBST 241  (F)  History of Sexuality

Cross-listings:  REL 241 GBST 241 HIST 292 WGSS 239

Secondary Cross-listing

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

Requirements/Evaluation:  reading responses, two essays, and final research paper

Secondary Cross-listing

This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war, peace, and pandemic. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler's expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? How did recent lockdowns and border closings impact and/or interrupt these complex experiences? Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their (and our) concept of “home” into something that reflects individual identity, and not one imposed by any national culture—American or foreign.

Requirements/Evaluation:  each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student's own experiences

Prerequisites:  any literature course at Williams or permission of instructor

Enrollment Limit:  18
Enrollment Preferences: Comparative Literature, English or American Studies majors, and/or students who have studied away or plan on doing so.

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 250(D1) AMST 242(D1) GBST 242(D1) COMP 242(D1)

Difference, Power, and Equity Notes: We will read and analyze primary materials and literature that reflect on Americans who chose, or were forced to, reinvent themselves abroad to escape oppressive situations in the United States related to gender, class, race, or political views. The socio-historical context of each writer will be crucial to understanding their situations. Students will write critical papers, and their own narrative in which they reflect on a situation of personal dislocation, either while traveling, or at home.

GBST 243 (S) Anti-Muslim Racism: A Global Perspective (DPE)

Cross-listings: GBST 243 PSCI 244 REL 247

Primary Cross-listing

The racialization of Islam and Muslims has been constitutive to how they have been imagined in Europe and elsewhere. This course looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. It goes back to the founding moments of an imagined white (at the beginning Christian) Europe and how the racialization of Muslim and Jewish bodies was central to this project, and how anti-Muslim racism continues to be relevant in our world today. The course will not only show how Muslims were constructed as subjects in history, politics and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. Rather, it also looks at how Muslims live through Islamophobia. It looks at processes of racialization of Muslims within the Muslim community and between Muslim communities, while also considering which agencies Muslims take to determine their own future. The course draws from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology.

Requirements/Evaluation: Active class participation, two response papers, and a comprehensive, open-book and open-note final exam.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Global Studies concentrators and Religion majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Unit Notes: Also qualifies for the GBST Urbanizing World track

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 243(D2) PSCI 244(D2) REL 247(D2)

Difference, Power, and Equity Notes: The course critically examines difference, power, and equity. Thematically, it looks at the racialization of Islam and the intersection of race, religion, class and gender in the construction of the 'Muslim problem' from a historical as well as a global contemporary perspective. It aims to promote a self-conscious and critical engagement with the practice and experience of difference, especially as it relates to the dynamics of power in structuring that experience.

Attributes: GBST Borders, Exiles + Diaspora Studies Electives

Not offered current academic year

GBST 246 (F) Asian American Performance: Activism and Aesthetics (DPE)

Cross-listings: THEA 246 GBST 246 AMST 249

Secondary Cross-listing

This seminar will explore contemporary Asian American plays, stand-up comedy, performance art, and spoken word with an eye to how artists do politics through their cultural labor. We will begin with a brief survey of images from popular media to identify legacies of Orientalism. From here we will
move towards examining the ways in which Asian American artists from various eras subvert stereotypes and pursue projects of social justice. In watching performances and reading scripts, essays, and interviews, we will attend to narratives, acting methods, theatrical design, spectatorship, and the political economy of cultural production that shapes how Asian American artists make and show work. In addition, we will explore how artists stake political claims in the public sphere through teaching and community organizing.

**Requirements/Evaluation:** two 5-page critical essays, reading responses, class presentations, and active discussion participation

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** sophomores, juniors, and seniors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
THEA 246(D1) GBST 246(D1) AMST 249(D1)

**Difference, Power, and Equity Notes:** Course fosters critical engagement with artistic practices that seek to address the concerns of populations in the US who have historically had unequal access to resources and audiences for representing themselves and their political concerns. Students will ask questions about how Asian American artists address legacies of Orientalism, as well as how they facilitate community engagement and approach projects of social justice.

**GBST 249 (S) Penning the Path: Writing and Publishing Black Studies**

**Cross-listings:** AFR 249 AMST 250 GBST 249

**Secondary Cross-listing**

Since the mid-20th century, Black intellectuals from Africa and the Diaspora have founded seminal journals within and beyond academic boundaries. Despite being separated by global distances and different contexts, these initiatives have decisively contributed to the emergence and consolidation of Black and Pan-African studies. *Presence Africaine*, founded in Paris in 1947 by Senegalese intellectual Alioune Diop; *Quilombo*, first published in 1948 by the Afro-Brazilian intellectual Abdias do Nascimento; and *The Black Scholar*, founded in California in 1969 by Robert Chrisman, Nathan Hare, and Allan Ross are just a few groundbreaking examples. From this global perspective, students will explore these and other cornerstone journals which paved the way for the emergence of Black and Pan-African Studies in the US and abroad. Additionally, the course aims to encourage students to be part of a collective effort to relaunch Kaleidoscopes: Diaspora Re-imagined, a student-led journal created in 2014 in the Africana Studies Department by Sevonna Brown (’15), Ahmad Greene-Hayes (’16), and Nneka Dennie (’13). Students will receive guidance and mentoring to conceive and write articles, essays, audiovisual creations, and interviews with students and intellectuals from the African continent and the Diaspora in the Americas and the Caribbean.

**Class Format:** Students will be required to develop and give a class presentation focused on pioneering Black Studies journals.

**Requirements/Evaluation:** Class participation and attendance (asking questions and leading discussions); weekly e-reading response papers (300-500 words); formal class presentation (individually or in groups); final projects (such as essays, papers, interviews, and audiovisual creations) aimed to be published in the new edition of Kaleidoscopes: Diaspora Re-imagined (Spring 2024).

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** Students interested in expanding their knowledge and skills in writing and publishing, focusing on Black Studies/Africana journals. Should the course be overenrolled, preference will be given to Africana Studies students.

**Expected Class Size:** 10-15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

GBST 252 (S) Black Migrations: Histories of African Diasporas to the U.S.

Cross-listings: GBST 252 AFR 252

Secondary Cross-listing

Migration remains an integral aspect of Black experiences. This comprehensive course centers the histories of Black migration to and within the United States. Migration includes the involuntary, forceful movement of populations, but it also comprises voluntary movement of populations that seek new economic opportunities. Therefore, this course covers three historical periods of migration: 17th-19th century (Transatlantic slave trade), early 20th century (Great Migration and the arrival of Caribbean migrants to major urban centers in the United States), and the late 20th and early 21st century (Migration continental Africans to the U.S.). This course will ask the following questions as it relates to Black migration: What were the social, political, and economic factors that contributed to the migration of Black populations to and within the US especially in the 20th and 21st century? How do current-day Black migration patterns differ from earlier periods? In what ways can migration be utilized as a form of resistance to oppression both domestically and internationally?

Class Format: discussion

Requirements/Evaluation: Class participation, weekly response papers (2 pages), and a final paper.

GBST 255 Comparative Politics of South Asia

South Asia is home to around 2 billion people (over 24% of the world), making it the most populous and densely populated region in the world. The region is also one of the poorest in the world and lags in human development. Ethnic, linguistic, and religious diversity is offset by common cultural traditions and practices that serve to unite the people of the Indian Subcontinent. The course introduces students to the comparative politics of South Asia, highlighting the complexities and potential of the region. Every week we explore a different component of South Asian politics. The course covers the creation of the states of modern South Asia, partition and independence, democratization, electoral politics and political parties, economic and social development, ethnic identity and conflict, and the contemporary regional challenges of democratic backsliding and climate change.

Requirements/Evaluation: three 5-7 page papers or one research paper; presentation; class participation

Prerequisites: no pre-requisites

GBST 256  Electoral Politics in the Developing World

Electoral politics in the developing world often differs from democratic politics in Western Europe and the U.S. Electoral volatility, decrepit state institutions, weak parties, clientelism, and electoral violence in developing democracies complicate foundational theories on representation and accountability. The course surveys the electoral politics of low and middle-income democracies in the developing world, investigating its similarities and differences with the historical and contemporary politics of developed democracies. It examines work on electoral systems, formal and informal institutions, bureaucratic politics, political parties, party systems, clientelism, ethnic politics, and political violence. We will draw on case studies from Latin America, Africa, South Asia, Southeast Asia, and the Middle East to analyze the effectiveness of these theories. Assignments focus on crafting solutions to contemporary political challenges in the developing world.

Requirements/Evaluation: one to two papers, midterm, group policy brief, presentation
Prerequisites: no prerequisites
Enrollment Limit: 25
Enrollment Preferences: preference given to political science majors
Expected Class Size: 25

GBST 262 (S) Paper Trails (DPE)

Cross-listings: GBST 262 SOC 262 STS 262

Secondary Cross-listing

Long before the invention of the passport, states or state-like entities sought to document and manage populations and discipline bodies. This course invites students to critically reflect on documentation practices and systemic violence, particularly against racial, ethnic, sexual, and political minorities. Students will explore identity-making through documentary practices such as the three-generation life history, a biographical form that Soviet-allied countries used to reward loyalty and punish disloyalty. Labels, such as a criminal record or pre-existing health conditions, also trail or precede individuals their whole lives. Students will grapple with what happens when the paper trail goes cold--when identification documents are invalidated, birth certificates withheld, household registries purged, and archives destroyed. Students will explore the rise of surveillance and biometric data alongside the actors, technologies, and industries that try to circumvent them in places such as the Xinjiang Uyghur Autonomous Region and along the US-Mexico border. In this project-based course, students will exhume paper trails and imagine alternative ways to create, alter, and subvert them.

Requirements/Evaluation: thoughtful and consistent class participation, facilitation of guest speakers, Special Collections visit, project memos, and final project and presentations
Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: Anthropology and sociology majors, Global Studies concentrators; Science and Technology Studies concentrators
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 279 (S) Islam on the Indian Ocean

Cross-listings: ASIA 279 REL 279 GBST 279 ARAB 279
Secondary Cross-listing
While colonial and Eurocentric geographies speak in terms of continental separation, historically the continents of Africa and Asia have been connected to one another through a dual link: Islam and the Indian Ocean. Indian Ocean trade and travel have historically connected East Africa, the Arabian Peninsula, South Asia, and South East Asia, shaping the lives of people and communities who lived not only along the coasts but also inland. This course focuses on these transregional connections, looking at the Indian ocean as a connective space that binds people and regions together rather than separating them. The course will also examine the role of Islam as a religious, economic, social and political force that brought together Muslim communities throughout the regions along the Indian ocean. In exploring these connections, the course will cover a broad historical period, from the 7th century with the rise of Islam to European colonialism and the emergence of a global economy in the nineteenth century.

Requirements/Evaluation: weekly responses, midterm essay, final paper
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: majors

GBST 281 (S) Contemporary African Politics (DPE)
Cross-listings: PSCI 281 GBST 281

Secondary Cross-listing
This course is an introduction to the contemporary politics of Africa, with the aim of sparking a life-long interest in the affairs of the region. Comprised of nearly 50 countries and home to over 1 billion people, sub-Saharan Africa is remarkable in its diversity, particularly in regards to a number of outcomes central to the study of political science: how do institutions of the past shape current dynamics of political competition and economic growth? Why are some countries stable democracies while others struggle with military coups or authoritarian rule? What sparks political violence and how can countries emerge from conflict? Our focus is both contemporary and comparative, organized thematically around common political experiences and attributes across the region. We begin with the legacies of colonialism, the slave trade, and the politics of liberation. We then interrogate dynamics central to political life in Africa over the 60 years since independence: the role of ethnic diversity in shaping competition, the prominence of patronage politics, and the evolution of elections. We next assess major dimensions that have historically shaped the study of African politics, including conflict and violence, economic development, and foreign aid. The final section takes a comparative approach to some of the most pressing issues in Africa today: health crises, migration and mobility, technological revolution, climate change, and the emerging power of women and youth.

Class Format: A typical class session will be about 60% lecture and 40% discussion
Requirements/Evaluation: Class Participation, Map Quiz, 3 short papers (5 pages)
Prerequisites: None.
Enrollment Limit: 25
Enrollment Preferences: all first-years and sophomores; those juniors and seniors majoring in political science or concentrating in Global Studies.
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
PSCI 281(D2) GBST 281(D2)

Difference, Power, and Equity Notes: This course takes the racial, ethnic, linguistic, and religious diversity of sub-Saharan Africa as a starting point for understanding the contemporary politics of the region. The course addresses the legacies of systemic inequality as well as strategies of resistance
to oppression. We also examine how ethnic and religious diversity shape political institutions, competition, and conflict, comparing different countries and over time.

GBST 282  (F)  Africanist Project to Black Consciousness

Cross-listings:  PSCI 282 GBST 282

Secondary Cross-listing

In 1957, when it was clear the African Nation Congress was unwilling to change its multiracialist and nonracialist language in favor of Africanist pronouncements, Robert Mangaliso Sobukwe left the party and became the editor of The Africanist newspaper. Two years later he formed the Pan-Africanist Congress. Similarly frustrated that the National Union of South African Students was dominated by white liberals, in 1968 Bantu Steve Biko helped form the black-only South Africa Students’ Organization and, four years later, was the key figure in founding of the Black People’s Convention, created to promote black consciousness ideas within the broader South African population. This course focuses on Sobukwe’s Africanist project and Biko’s Black Consciousness Movement, the strategies against apartheid they promoted, and the visions of a free South Africa they imagined.

Requirements/Evaluation:  class participation; 3 two-page response papers; and a 10-12 final paper.

Prerequisites:  None

Cross-listings:  GBST 287 ENVI 297

Secondary Cross-listing

In 2015, the United Nations launched the Sustainable Development Goals, an ambitious multi-pronged effort to eliminate poverty, improve health outcomes, advance clean energy, address the effects of climate change, and support more equitable forms of life on earth. This course explores the historical antecedents and contemporary manifestations of global sustainable development, a constellation of ideas and a set of policy imperatives. This course will ask: what is sustainability and how did it emerge as a key paradigm in the present? Relatedly, how have different organizations and actors worked to address entrenched global challenges? Students will engage a range of materials, including policy documents from the United Nations, World Bank, and international non-governmental organizations. Students will also explore critical scholarship on the possibilities and limitations of global development. Together we will grapple with ways to build more sustainable futures.

Requirements/Evaluation:  Class discussions; 2 Policy Analysis Papers (4-6 pages each); Class presentations; Final Take-Home exam (8-10 pages)

Prerequisites:  none

Enrollment Limit:  19

GBST 300  (S)  Far-Right Populism Across the Atlantic

Cross-listings:  PSCI 336 GBST 300

Primary Cross-listing

The course will discuss the relationship between nationalism and far-right populism, also often referred to as alt-right politics in the United States. We will explore the causes of the rise of nationalism and far-right populism in the US and Europe, discuss their relations with liberal democracy, conservatism, and authoritarian politics to study varieties of far-right populism and nationalism not only within the nominal far-right but all political parties in Western democracies. We will address basic questions such as ‘What is populism?’ and discuss the causes of the rise of far-right populism, the origins of far-right ideology, and the phenomenon of successful populist voter mobilization. Central notions such as democracy, identity, and their relation to far-right populism will be discussed alongside questions of contemporary mobilization strategies.

Requirements/Evaluation:  active class participation; three response papers (2 pages); final research paper (12 pages); no final exam

Prerequisites:  statement of interest

Enrollment Limit:  20

Enrollment Preferences:  juniors and majors

Expected Class Size:  15

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
GBST 304 (S) Sacred Custodians: Environmental Conservation in Africa  (DPE)

Cross-listings: GBST 304 HIST 304 ENVI 304 AFR 335

Secondary Cross-listing
In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of deforestation. Ken Saro-Wiwa was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental crisis that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction, game parks, desertification, wildlife and hunting, traditional practices, and climate change.

Requirements/Evaluation: Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and one exam.

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: If course is over-enrolled, preference to History Majors and students with a demonstrated interest in African studies.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
GBST 304(D2) HIST 304(D2) ENVI 304(D2) AFR 335(D2)

Difference, Power, and Equity Notes: This course will intensively explore the question of how various global and local actors have defined environmental degradation and promoted approaches to conservation in Africa. It guides students through an examination of the different power dynamics that have shaped environmental conservation thought and practices on the continent. This course, therefore, provides a critical lens through which to examine the inequalities rooted in race, gender, and other forms of difference.

Attributes: ENVI Humanities, Arts + Social Science Electives  HIST Group A Electives - Africa

GBST 305 (S) A History of Health and Healing in Africa  (DPE)

Cross-listings: AFR 304 HIST 305 GBST 305

Secondary Cross-listing
This class will explore the history of health and healing in Africa, with emphasis on the colonial and post-colonial eras. During the semester we will explore diverse medical and social interventions in African health over the past 150 years. How have African societies understood healthy communities and public health? We will examine this question through the study of spirit possession and other African healing practices but also how they have intersected with different biomedical practices and public health programs. We will also study the patterns and social impacts of new diseases in the twentieth century, as well as transformations in the understanding and treatment of diseases long present on the continent. In particular we will explore shifting understandings of the causes, treatment, and social implications of sleeping sickness, malaria, and HIV/AIDS. The development of colonial rule, shifting environmental conditions, changing diets, and urbanization all impacted the disease landscape, as well as the way African societies have understood public health. Indeed, the themes of health, medicine and disease provide a useful lens for understanding important social transformations across the continent.
Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, a primary source analysis paper (3-5 pages), presentation, and one research paper (8-12 pages).

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 304(D2) HIST 305(D2) GBST 305(D2)

Difference, Power, and Equity Notes: This course explores transformations in how Africans in the recent past have experienced, practiced and conceptualized health and healing. These transformations have been triggered by the expansion of global biomedicine, new and lethal epidemics, old diseases in changing environments, and new political and economic decisions by policymakers. The history of health and healing in Africa provides a critical lens through which to examine societal imbalances and inequalities.

GBST 306 (F) Transcending Boundaries: The Creation and Evolution of Creole Cultures (DPE)

Cross-listings: RLFR 320 GBST 306 AFR 306 COMP 310

Secondary Cross-listing

Born out of a history of resistance, Creole cultures transcend racial boundaries. This course provides a comprehensive framework for understanding the creation of Creole nations in various parts of the world. Beginning with an examination of the dark history of slavery and French colonialism, we will reflect upon the cultural transformation that took place when people speaking mutually unintelligible languages were brought together. We will then delve into the study of how deterritorialized peoples created their languages and cultures, distinct from the ones imposed by colonizing forces. As we journey from the past to the present, we will also explore how international events such as a worldwide pandemic, social justice, racism, and police brutality are currently affecting these islands. Potential readings will include prominent authors from different Creole-speaking islands, including Frantz Fanon and Aimé Césaire from Martinique, Maryse Condé from Guadeloupe, Ananda Devi from Mauritius and Jacques Roumain from Haiti. Conducted in French with introductions to different creoles.

Requirements/Evaluation: Active class participation, three papers (of 3-4 pages each), presentation, final research paper (7-8 pages)

Prerequisites: Any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: All are welcome. If overenrolled, preference will be given to French majors and certificate students; Comparative Literature majors; Africana Studies students; Global Studies students; and those with compelling justification for admission

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 320(D1) GBST 306(D2) AFR 306(D2) COMP 310(D1)

Difference, Power, and Equity Notes: This course qualifies for a Difference, Power, and Equity requirement because it examines the history of slavery as related to French colonialism in different parts of the world. It also considers International issues of social justice, racism and police brutality.

Fall 2023

SEM Section: 01   MW 11:00 am - 12:15 pm   Preea Leelah

GBST 312 (S) The Mughal Empire: Power, Art, and Religion in India
Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith--much larger than any European empire in the early modern world--the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor's memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

**Requirements/Evaluation:** participation, several short essays, one final paper

**Prerequisites:** none, open to first-year students with instructor permission

**Enrollment Limit:** 20

**Enrollment Preferences:** History majors and potential History majors

### GBST 315 (F) Globalization

**Cross-listings:** GBST 315 ECON 215

**Secondary Cross-listing**

This course will examine the causes and consequences of globalization. This includes studying topics such as trade, immigration, foreign direct investment, and offshoring. The impact of these forms of globalization on welfare, wages, employment, and inequality will be a focal point. Throughout we will rely on economic principles, models, and empirical tools to explain and examine these contentious issues.

**Class Format:** discussion

**Requirements/Evaluation:** problem sets, two midterms, and a final paper and presentation

**Prerequisites:** ECON 110

**Enrollment Limit:** 25

**Expected Class Size:** 25

**Grading:** no pass/fail option, no fifth course option

Secondary Cross-listing

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It was on the banks of this river that the great Egyptian empires were founded that led to the building of some of humanity's most astounding structures and artworks. While the Nile seems eternal and almost beyond time and place, now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This alarming nexus of demography, climate change, and economic development has led to increasingly urgent questions of the Nile’s future. Is the Nile dying? How has the river, and people’s relationship with it, changed over the last century? This course will consider the history of the Nile and and its built and natural environment. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. By following an imaginary droplet flowing from tributaries until it makes its way into the Mediterranean Sea, we will learn about the diverse peoples and cultures along the way. We will evaluate the numerous attempts to manage and control the Nile, including the building of big dams, and the continuous efforts to utilize the river for economic development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the major urban centers with the Nile and whether the tensions among Nile riparian states will lead to "water wars" in East Africa and the Middle East.

Requirements/Evaluation: short papers and final project/paper

Prerequisites: none, though background in Middle East history is preferable

Enrollment Limit: 19

Enrollment Preferences: History and Arabic Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

**GBST 322 (F) Waste and Value**

**Cross-listings:** ENVI 322 GBST 322 ANTH 322

**Secondary Cross-listing**

What is trash and what is treasure? In what ways does value depend upon and necessitate waste, and how is the dialectic between the two inflected by culture? When we 'throw away' things at Williams College, where exactly do they go, and who handles them 'down the line'? What are the local and global economies of waste in which we are all embedded and how are they structured by class, race, caste, gender and nation? In this seminar we critically examine the production of waste - both as material and as category - and its role in the production of value, meaning, hierarchy and the environment. Readings include ethnographic accounts of sanitation labor and social hierarchy; studies of the political and environmental consequences of systems of waste management in the colonial period and the present; and theoretical inquiries into the relation between filth and culture, including work by Mary Douglas, Dipesh Chakrabarty and Karl Marx. Geographically the loci are South Asia, Japan, and the United States. There is also a fieldwork component to the course. In fieldtrips we follow the waste streams flowing out of Williams - to an incinerator, a sewage treatment plant, recycling and composting facilities and other sites - and students explore in individual, participant-observation-based research projects the everyday social life of waste in our communities.

**Requirements/Evaluation:** regular posting of critical response papers, field notes on waste streams, research-based final paper

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** majors in ANSO, ENVI, ASST

**GBST 335 (F) Nowheres (DPE)**

**Cross-listings:** GBST 335 SOC 335
Secondary Cross-listing

We live in a world of nation-states. The world map, according to journalist Joshua Keating, is “itself as an institution, an exclusive club of countries” that rarely accepts new members. Throughout the course, we question how countries conquered the world and became the taken-for-granted political unit. We do so, paradoxically, by looking at contemporary nations that do not appear on the world map. These include nations without statehood, such as Somaliland; those that span countries, including indigenous nations across the US and Canada; and nations that have lost their countries, such as Palestine and South Vietnam. By interrogating "nowheres," we tease out what it means to be a country, and pinpoint when and why the definitions do not apply uniformly. Students will reflect on why the world map has been so remarkably static since the end of the Cold War. We will further probe the social, political, and human costs of the exceptions to this general rule. Students will raise questions and attempt answers to what our interconnected world means for "nowheres" looming on the horizon--nation-states that, as a result of climate change, will soon vanish.

Requirements/Evaluation: Thoughtful and consistent class participation, visits to Sawyer Library and WCMA, three short response papers, and a final assessment on a "nowhere" of students' choosing

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology majors, Global Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 335(D2) SOC 335(D2)

Difference, Power, and Equity Notes: This course asks students to grapple with the asymmetries of modern statehood--why some places meet the criteria for statehood but are denied it, while others fall short of formal definitions but are still considered states. Students will assess the stakes of statehood for places that cannot achieve it or do not aspire to. They will creatively marshal these lessons to become the class expert on a "nowhere" that provides us with a lens for interrogating the world map as it currently exists.

GBST 342  (F)  Democratic Erosion

Cross-listings:  GBST 342 PSCI 343

Secondary Cross-listing

A central tenet of political science is that once a country reaches a certain level of political and economic development, democracy will endure indefinitely. The contemporary moment calls on us to revisit this assumption. This course explores the causes and consequences of democratic erosion through the lens of comparative politics. We ask three central questions to inform our investigation: 1) What is democracy and its alternatives? 2) How do we identify democratic breakdown? and 3) What are strategies to counteract backsliding when it occurs? Importantly, this course is not intended as a partisan critique of any particular American politician or political party. Rather, it is designed to provide an opportunity to engage, critically and carefully, with claims about the state of democracy in the US and elsewhere; to evaluate whether those claims are valid; and, if they are, to consider strategies for mitigating the risk of democratic erosion here and abroad. Readings draw from academic scholarship, media commentary, and current events as they unfold. We will address both empirical and normative dimensions of the issues, as well as learn about examples of democratic erosion around the world from early 20th century until today. As a collaborative class taught at dozens of other colleges, the course enables you to engage in debates about democratic erosion with students throughout the US and around the world.

Requirements/Evaluation: Active Class Participation, 3 Short Response Papers, Country Case Study (15-20 pages, written incrementally throughout semester) and Presentation.

Prerequisites: Prior coursework in political science or permission of instructor.

Enrollment Limit: 12

Enrollment Preferences: Political Science Majors, Global Studies Concentrators

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)
American Studies emerged with the idea that transdisciplinarity is crucial for comprehending the concept of America. Building on this framework, this course foregrounds transepistemology as an equally important method for understanding the dynamics of America, both locally and globally, at the level of the world-system. In addition to tracing the consubstantial genealogy of racism and capitalism, we will examine their local manifestations, mainly in Asia, Europe, Africa and America, as well as their current geopolitical, social and economic outcomes, especially the reproduction of systemic inequalities and domination. Through an interdisciplinary approach and engagement with a variety of resources from economics, anthropology, sociology, critical race theory, comparative ethnic studies and decolonial thinking, this course will address the following: i) review the different forms of economic organization of human societies throughout history (with special focus on the work of Karl Polanyi); ii) trace the epistemological origins of capitalism and investigate what makes capitalism and its crises unique; iii) trace the genealogy of the concepts of race, racism and discrimination; iv) interrogate the intersection of racism and capitalism in different traditions of thought and epistemologies in Asia, Europe, Africa, and the Americas. For example, we will read key texts from "French theory", (Deleuze, Foucault, etc.), US Black tradition, (W. E. B. Du Bois and Cedric Robison, etc.), Chinese social sciences (Li Shenming, Cheng Enfu, etc.) and African economy and anthropology (Mahdi Elmandjra, Cheikh Anta Diop, etc.) and Latin American decolonial philosophy (Quijano, Dussel, Mignolo, etc.) By doing this, we will situate the rupture that capitalism and racism introduced at the level of global history, which is the first step to conceptualizing racism and capitalism. After showing that the development of capitalism and racism are historically linked, we will proceed to examine the manifestations of their interaction at local and global levels. Locally, we will focus on the effects of racism on the labor market: discrimination in hiring, wage discrimination, segregation, duality and stratification of the labor market, etc. We will also analyze how sexism and racism play out in the labor market in racialized communities. We will also reflect on the links between racism and politics and their effects on economic policies. From a more global perspective, we will analyze the roots of the global economic crisis and the resulting geopolitical issues at the international level and the racist dynamics they generate. Overall, as we will move through readings, we will situate the United States in a cross-regional perspective that would enable us to develop critical insights concerning links and convergences between capitalism and racism.

Requirements/Evaluation: Requirements: An active participation is required of students in terms of engaging in the in-class debates and weekly response paper as a feedback on the lectures as well as a final paper. Evaluation: Participation 25%; Weekly Response (350-500 words) 30%; Final Research Paper (12-15 pages) 45%

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: American Studies majors and seniors

Fall 2023

SEM Section: 01 W 1:10 pm - 3:50 pm Souhail Chichah
"What do you mean by that?" said the Caterpillar, sternly. "Explain yourself!" "I can't explain myself, I'm afraid, Sir," said Alice, "because I'm not myself, you see?" The confusion around personal identity, which Alice is seen to experience as she makes her way through Wonderland, can be examined productively as an allegory of translation. Beyond living through the developmental and socio-cultural transitions of a child, what happens to Alice, a seminal text in children's literature, when it travels down the rabbit hole to a new linguistic wonderland? For starters, the seven-year-old girl becomes Marie in Danish, Arihi in Maori, Ai-chan in Japanese, and Paapachchi in Kannada. Then there are the highly idiosyncratic humor, word play, embedded English nursery rhymes, and iconic illustrations by Tenniel. How do they fare in new linguistic, cultural, and even genre contexts? Lewis Carroll told his publisher in 1866: "Friends here seem to think the book is untranslatable." And yet. Over 200 translations later, including Kazakh, Shona, Papiamento, Braille, and Emoji, Alice continues to delight and confound readers all over the world and to pose myriad challenges as well as opportunities for translators. This course will serve as an introduction to the theory and practice of translation using Carroll's Alice as an anchoring primary text. We will examine key disciplinary issues and concepts, such as equivalence, domestication, foreignization, and autonomy and challenge the old canard that translation leads ineluctably, and exclusively, to loss.

Requirements/Evaluation: active and substantive class participation; discussion leading; weekly translation exercises; 2-3 short writing assignments; final project

Prerequisites: students must have at least three years of college-level second-language instruction or the equivalent (advanced proficiency), or permission of the instructor

GBST 348  (S)  Altering States: Post-Soviet Paradoxes of Identity and Difference  (DPE)  (WS)

Cross-listings:  RUSS 348  SOC 348  GBST 348

Secondary Cross-listing

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the war Russia is currently waging on Ukraine, or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides.

We will focus especially closely on Russia, but will also read studies on East Germany, Bulgaria, Poland, and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

Requirements/Evaluation:  5-page paper every other week, written comments on the partner's paper in alternate weeks

Prerequisites:  none

GBST 351  (S)  The New Left and Neoliberalism in Latin America  (DPE)

Cross-listings:  PSCI 351  GBST 351

Secondary Cross-listing

Recent years have seen a resurgence of the political left in Latin America. This course seeks to understand the origins of this new left, the ideas and character of its protagonists, the neoliberal philosophy it opposes, and the arena of democratic politics it inhabits today. We first read polemics from both sides, before stepping back to consider Latin American political economy, including the twentieth-century left, from a more historical and analytical perspective. With this preparation, we then look more closely at major contemporary figures and movements in Venezuela, Bolivia, Mexico, Brazil, and other countries. After considering explanations of the rise of the left and assessments of its performance in power, we end our common readings by asking what it might mean today to be on the left in Latin America—or anywhere—both in policy and political terms.
Class Format: discussion then seminar

Requirements/Evaluation: three 3-page essays, a 1-page reflection paper, and a 12-page research proposal

Prerequisites: a course on Latin America and a course in Economics or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Political Science majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 351(D2) GBST 351(D2)

Difference, Power, and Equity Notes: The New Left in Latin America originated in efforts to remedy inequalities born of the Conquest, uneven capitalist development, and racial prejudice. Its neoliberal foes generally do not doubt the existence of these inequalities, but they question the proposition that the state could adequately address them. This course engages, contextualizes, and deepens the debate.

GBST 352 (F) Politics in Mexico (DPE)

Cross-listings: GBST 352 PSCI 352

Secondary Cross-listing

Geography has decreed that the futures of Mexico and the United States will be tightly bound. Yet Mexico enters this future with a very different past, a distinctive political system, important cultural differences, and mixed feelings about its neighbor to the north. This course has four parts differing in content and format. The first is historical and mostly lecture. It considers several themes, including the slow emergence of a stable national state and the interplay between politics and economic change. In the second section, following a modified tutorial format, we consider politics and cultural policies around Mexican national identity in the twentieth century, looking at films, journalism, popular music, and cultural criticism. Topics include the politics of race; rapid urbanization, especially in the valley of Mexico; and the cultural impact of the turn toward the north, after 1990, in economic policy. Then, after a few discussion classes on migration, organized crime, political corruption, the COVID-19 pandemic, and other issues facing the current government of Andrés Manuel López Obrador, we turn to a seminar-style discussion of student research projects.

Class Format: lectures will be recorded for viewing before class sessions; four weeks of modified tutorials in pairs or small groups online; discussion classes to include in-person and online, in distinct sections if appropriate; online seminar

Requirements/Evaluation: map quiz; one three-page and three two-page essays; two one-page commentaries; and a seven- to eight-page research proposal, an early version to be presented to the class in online seminar

Prerequisites: some knowledge of Mexican history

Enrollment Limit: 15

Enrollment Preferences: Political Science majors and seniors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 357 Democratization in South Asia

Democratization has had both successes and failures in postcolonial South Asia. The region is home to the world’s largest democracy in India, often cited as an unlikely and puzzling success story. At the same time, periods of democratic rule in Pakistan and Bangladesh are broken up by military interference, Sri Lanka’s democracy is plagued by ethnic conflict, and Afghanistan has been unable to sustain democracy due to weak state institutions. What explains this diverse and uneven pattern of democracy in South Asia? The course delves into theories on political parties, ethnic politics, electoral institutions, civil-military relations, political violence, state-building, inter-state conflict, and civil wars to understand the variation in regime type in the region. It covers domestic and international factors that lead to democratization and democratic backsliding. We will focus on the role of political parties in democratization; the emergence of political dynasties; changes in the characteristics of the political elite; investigate claims of democratic deepening; and examine the effect of inter-state wars, land disputes, and insurgencies on democratic stability in the region.

Requirements/Evaluation: three 5 to 7-page papers or one research paper; presentation; class participation

Prerequisites: previous course in political science or permission of the instructor

REL 358(D2) GBST 358(D2)

Difference, Power, and Equity Notes: Law is seen as both a repressive and liberatory force. In taking a critical approach to the nature of law and legal interpretation, this course prepares students to think about the language of "rule of law," "order," and "justice" as a complex relationship between law and power.

Not offered current academic year

GBST 365 (F) Race and Psychoanalysis: Slavery and the Psyche (DPE)

Cross-listings: AMST 365 GBST 365 ENGL 320 AFR 365

Secondary Cross-listing

This course explores slavery and the psyche through a constellation of Black diasporic literary, visual, and theoretical texts from the US, Caribbean, and Africa. Unwieldy and generative, the opacity of race within the field (and practice) of psychoanalysis shares a fraught intimacy with the
co-constitutive terrains of violence and race that form the unconscious. Querying what escapes the hermeneutics of psychoanalysis and aesthetics in the fantasies race engenders, we will examine modernity's articulation of racialization through conceptualizations--both fantastmatic and real--of self, world, knowledge, and possibility. Course texts may include: Edwidge Danticat's The Farming of Bones, Adrienne Kennedy's Funnyhouse of a Negro, Bessie Head's A Question of Power, Arthur Jafa's APEX and Love is the Message and the Message is Death, Conceição Evaristo's Poncíà Vicência, Lars von Trier's Manderlay, Charles Burnett's Killer of Sheep, Derek Walcott's "Laventille"; and, selections from Sigmund Freud, Jacques Lacan, David Marriott, Kathleen Pogue White, Franz Fanon, Hortense Spillers, Nathan Gorelick, Jaqueline Rose, Melanie Klein, Jacques-Alain Miller, Melanie Suchet, and Jean Laplanche. Note: This course will reflect the Continental tradition in philosophy. Student should be familiar with the basic interventions of psychoanalysis.

Requirements/Evaluation: Weekly discussion posts and questions, 2 Papers, 10-12 pages, Research presentation

Prerequisites: One Writing Skills or writing intensive course; one intro course in one of following: American Studies, Africana Studies, Comparative Literature, English, Global Studies, Philosophy, Psychology, Women, Gender, and Sexuality Studies

Enrollment Limit: 15

Enrollment Preferences: Juniors or Seniors with majors or concentrations in any of the areas: American Studies, Africana Studies, Comparative Literature, English, Global Studies, Philosophy, Psychology, and Women's, Gender, and Sexuality Studies

GBST 366 (S) OutofHaiti: Haiti, Black Sovereignty and the Global Political Economy

Cross-listings: GBST 366 AFR 366

Secondary Cross-listing

In the Western hemisphere, Haiti (Ayiti kreyòl) is a symbol of many extremes related to revolution, impoverishment, governance and institutional sabotage, Black liberation, artistic and cultural achievement, and underdevelopment. This course places Haiti at the center of broad global political economic transformations. Starting from the Haitian Revolution and its reverberations throughout colonial empires to the present, this course will critically interrogate these superlatives and depictions of Haiti. Recent media portrayals of a 'Haitian migrant crisis' at the United States border defy empirical facts, and whitewash imperial misadventures and harm, further exposing a narrative of Haitian anti-blackness that has been pervasive throughout US history. We will unpick these imageries and material realities to consider broader perspectives within historical and contemporary significance of struggles for Black sovereignty and liberation. Taking economic and political history as data sources, documentary films and recent academic, artistic and popular works as starting points for discussion, the course will stir debate and a broader appreciation of the political contributions of civic movements and figures within Haiti and the Haitian diaspora. From the perspective of 'connected Blackness', the course explores how Black peoples' links through global struggles for liberation and freedom and against imperialism emerge today.

Requirements/Evaluation: Journal entries (250 words each); individual essay on documentary film or media (10 pages); research report on a major contemporary social/economic/environmental issue in Haiti (10 pages); "Haiti Black Liberation Space" group public education project on the contemporary importance of Haiti to global Black liberation/ racial justice and a summative reflection on a meaningful aspect of this project (5 pages); class participation (discussion and readings)

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If over-enrolled, preference to AFR and Global Studies concentrators

Grading: no pass/fail option, no fifth course option

Distributions: (D2)
GBST 367  (S)  Decolonizing International Relations  (DPE)

Cross-listings:  GBST 367 PSCI 367

Secondary Cross-listing

The Oxford English Dictionary defines Decolonization as "the withdrawal from its colonies of a colonial power; the acquisition of political or economic independence by such colonies." The emergence of an international system of sovereign states—the core foundation of international relations—presumes the process of dismantling systems of domination, extraction, and exclusion ended long ago. However, there is increasing recognition that International Relations in all forms, including theory, research, and policy, continue to be structured by traditional paradigms of power (e.g., white, male, elite). This course begins with the premise that knowledge is embedded within, and often reproduces, power hierarchies. Thus, this class is organized as a collaborative investigation with the aims of: 1) examining how whiteness and other historically dominant perspectives shape International Relations theory and research areas; 2) expanding and improving our understanding of International Relations through different lenses (e.g., race, class, gender, disability, indigenous, queer, subaltern); and 3) exploring the implications of a more inclusive approach to International Relations, both within the classroom as well as contemporary decolonization movements in the US and around the world.

Requirements/Evaluation: Participation, 3 response/reflection papers, annotated bibliography

Prerequisites: One prior course in International Relations or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Juniors and Seniors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Secondary Cross-listing

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Amazigh poetics in the Maghreb, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? What is the connection between the recent "boom" of English translations of Indigenous texts and neoliberalism, multiculturalism and neo-colonialism? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.
**Requirements/Evaluation:** active class participation, several short response assignments (3-4 pages), two film reviews (1 page), a performance project, and a final paper (7-10 pages)

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Comparative Literature majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 369(D1) COMP 369(D1) HIST 306(D1) ARAB 369(D1)

**Writing Skills Notes:** This course will enable students to write weekly while engaging with various forms of writing skills: articulating arguments in short response papers (3-4 pages each), developing visual criticism through writing two film reviews, (1 page each), journaling through writing a personal reflections on a performance project, and honing research language in producing a final paper of 7-10 pages. Instructor's feedback and peer review sessions will include review of drafts and argumentative structures.

**Difference, Power, and Equity Notes:** At the heart of this course is the history of global Indigenous struggle for liberation and decolonization. The various novels, short stories, poems, films and other texts that students will engage with narrate histories of colonial dispossession, racial oppression, economic subjugation and dehumanization of minoritized Indigenous communities in the Americas, North Africa and the Middle East.

**GBST 370 (S) Archives of Global Solidarity: Records of Collective Memory of Emancipation** (DPE) (WS)

**Cross-listings:** COMP 370 ARAB 370 GBST 370

**Secondary Cross-listing**

Departing from the Arabic notions of takaful and taddamun as interlinked expressions of social and political solidarity, this course seeks to investigate the textual and visual cultural production of solidarity in the Arabic-speaking world. While both terms have informed the shaping of modern Arab politics in the mid 20th century--from the birth of the socialist state to the rise of pan-Arabism--their instrumentalization as key principles of internationalism, Third Worldism, trans-nationalism, and global camaraderie since the 1990s is parallel to the emergence of social movements and popular resistance across the Middle East, North Africa and beyond. What is the meaning of solidarity and how it mobilized collective emancipation is the guiding question of this course. To interrogate this question we will read novels, poems, memoirs, labor unions and feminist manifestos, and essays that feature multidirectional solidarity and alliance building across borders of East-East and South-South. We will also examine visual and digital archives that documents particular historical moments that marked a turning point of global solidarity, such as the Spanish Civil War, the Cuban Revolution, the Algerian War, the Prague Spring, the Palestinian Intifada, the Zapatista Uprising, and most recently, the Arab Uprisings. As we approach these historical moments through a variety of texts and genres, we will identify encounters between activists and writers who established cross-regional movements and the cultural exchange between artistic collaborations.

**Requirements/Evaluation:** Students will write five responses to partner's papers (2 pages long); two 5-7 pages paper discussing aspects of the readings; one 10-minutes oral presentation of a reflection on digital solidarity, and a final poster project on archiving global solidarity.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** This tutorial will be aimed at first year and second year students interested in majoring in Arabic Studies, and/or concentrating in Comparative Literature and Global Studies.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 370(D1) ARAB 370(D1) GBST 370(D1)

**Writing Skills Notes:** Students will engage a variety of writing forms, including weekly response papers to their tutorial partner, a research final paper, an outline for an oral presentation, a reflection on digital media and a design of a poster. Throughout this process, they will receive oral and written
feedback and work with revisions. The interdisciplinary material that will be covered in the tutorial will also require the production of distinct formats of writings and research skills.

**Difference, Power, and Equity Notes:** South-South and East-East encounters during the 1960s in the writings of contemporary Arab writers and activists resisting dictatorship and police states is the core of this tutorial. Students will gain a deeper understanding of DPE through a close examination of the triangulation of colonial boundaries, postcolonial states, and imperialist domination that shape the context of global solidarity in the Arab world and beyond.

**GBST 391  (S) When India was the World: Trade, Travel and History in the Indian Ocean  (DPE) (WS)**

**Cross-listings:** ASIA 391 GBST 391 HIST 391

**Secondary Cross-listing**

What do Ibrahim Ben Yiju, a Jewish merchant from 11th century Yemen, Ibn Batutah, a Muslim scholar from 15th century Morocco and Captain Kidd, a 17th century English pirate have in common? All three men travelled and lived in the Indian Ocean region! This course explores the history of one of the world's oldest maritime highways that has connected the diverse cultures of Asia, Africa and Europe for millennia, thus making it a vital element in the birth of globalization. Moving away from conventional land-centric histories, we will focus instead on understanding the human past through oceanic interactions. South Asian ports and port cities remained the fulcrum of the Indian Ocean world throughout its history; traders, travellers, nobles, scholars, pilgrims and pirates from all over the world travelled to the Indian coast in search of adventure, spices, knowledge and wealth. Thus we will primarily focus on India's role in the Indian Ocean roughly from the rise of Islam in the seventh century CE through the expansion of various European communities in the region and the subsequent rise of the global economy and colonialism in the nineteenth century. Rather than following a strict temporal chronology we will concentrate on themes such as travel and adventure; trade and exchange; trust and friendship; religion and society; pilgrimage; piracy; the culture of port cities; and food across time.

**Requirements/Evaluation:** class participation and weekly responses to readings, 4 short papers (4-5 pages), an oral presentation and final research (10 pages) paper based on any one of the 4 papers written during the course.

**Prerequisites:** none; open to all

**Enrollment Limit:** 15

**Enrollment Preferences:** history majors and students with demonstrable interest in maritime/Indian Ocean history

**Expected Class Size:** 10-12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 391(D2) GBST 391(D2) HIST 391(D2)

**Writing Skills Notes:** Students will write 4 short papers (4-5 pages) each and receive detailed feedback from the instructor. One of the four papers will become the basis of a final research paper (10-12 pages) on which each student will work closely with the instructor and receive feedback on improving research and writing skills.

**Difference, Power, and Equity Notes:** This course questions the conventional view that global interconnectedness was the result of Europe's discovery of 'new worlds'. Instead, it centers non-European actors in facilitating global networks before colonialism. Throughout, students will critically engage questions of how Asian and African players forged and shaped global connections across the Indian Ocean arena and examine the ways in which these contributions have been overshadowed in traditional historiography.

**GBST 395  (F) Black Reparations Within/Beyond Borders  (DPE)**

**Cross-listings:** AFR 395 WGSS 395 ENVI 395 GBST 395

**Secondary Cross-listing**

Generations of Black people around the world have demanded restitution for the harms and legacies of enslavement, indigenous genocide and colonialism in order to advance social justice, new ways of living and freedom. In this way, freedom fighters, Black Power leaders, abolitionist movements, Pan-Africanists, maroons, Rastafarians, Black politicians, climate justice leaders, and revolutionary anti-capitalists have all put forward
ideas on and approaches to reparations and reparatory justice. This course will analyze 'geographies of Black struggle', the differences and commonalities among these approaches, the political strategies and movements, including responses to global climate change and socio-environmental disasters that advance reparations as a just remedy within and beyond borders. We give particular attention to Pan-Africanist and Black feminist perspectives, as well as liberal and popular struggles for reparations within the African diaspora across space and time. Do Pan-Africanism and Black feminism offer new visions for reparations movements in the 21st century? Employing speeches, writings, audio-visual content and documentary film from and about these earlier and emerging movements and their leaders, we will draw long lines between historical circumstances and drivers, and examine Black (un)freedoms within the context of calls for reparation today.

Requirements/Evaluation: Attendance and Participation including serving as a class discussion leader (20%); Written double-spaced essay about and the legacies and role that Pan-Africanism or Black Feminist perspectives play in contemporary global reparations movement (8 pages plus bibliography) (25%); Research and creatively present using written text, flyer, video, audio-visuals or poster a profile of Pan-African feminist leader focusing on her ideas, movement activities, and role in the reparations movement including innovative ideas (max. 5 pages or 10 minutes) (25%); Final project: simulation activity of a Pan-African Congress on Reparations (30%)

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If over-enrollment, preference to AFR, GBST and HIST students

This seminar focuses on the entwined histories of liberation movements against racism, enslavement, and imperialism in the US, Cuba, and Africa. Readings include: Hugh Thomas, *Cuba: A History*; Che Guevara, *The Motorcycle Diaries*; Walter Rodney, *How Europe Underdeveloped Africa*; Laird Bergad, *The Comparative Histories of Slavery in Brazil, Cuba, and the United States*; Thomas Sankara, *Women's Liberation and the African Freedom Struggle*; Nelson Mandela and Fidel Castro, *How Far We Slaves Have Come!* Students will read and analyze texts, screen documentaries, collectively compile a comprehensive bibliography, and present group analyses. The seminar is open to all students; however, priority is given to seniors majoring in American Studies.

**Requirements/Evaluation:** Reading and analysis of texts, collective compilation of a comprehensive bibliography, presentation of group analyses; two brief papers due at midterm and the end of the semester

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** Seniors majoring in American Studies

**Expected Class Size:** 12

GBST 412 (F) Gandhi: History, Ideas and Legacy (WS)

**Cross-listings:** LEAD 322 ASIA 412 REL 412 GBST 412 HIST 496

**Secondary Cross-listing**

This course studies the life, work, and ideas of M.K. Gandhi (1869-1948), one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. This tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the context and nature of Gandhian nationalism? Did it help to integrate the Indian nation? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

**Requirements/Evaluation:** 5-7-page essays or 2-page critique due each week and a final report (3-4 pages) at the end of the semester.

**Prerequisites:** None, except students who have taken HIST488T will not be permitted to take this class.

**Enrollment Limit:** 10

**Enrollment Preferences:** Senior history majors and students who have previously taken HIST221. Students who have previously taken HIST488T will not be permitted to take this class.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

GBST 413  (F)  The Big Ideas: Intended and Unintended Consequence of Human Ambition  (DPE) (WS)

Cross-listings: HIST 413 ARAB 413 GBST 413 ENVI 413

Secondary Cross-listing

What have been the most consequential ideas of the last 100 years? This course will explore some of the more audacious and ambitious plans to alter natural and urban environments in the late 19th century to the early part of the 21st, specifically those that sought to improve the human condition through science, engineering, and technology. By building big bold things, politicians around the globe sought to bring prosperity to their nation and embark on a path of modernity and independence. Through an intellectual, political and environmental history of major construction projects such as the building of the Suez Canal and the Aswan Dam, extensive river valley developments in Iran, Turkey and Iraq, and utopian and futuristic city planning in western Asia, students will consider how, with the benefit of hindsight, to best evaluate the feasibility of such bold schemes. Who has benefitted and who has not, what have been some of the unanticipated consequences, what was sacrificed or neglected, and what do these projects tell us about the larger processes of global capitalism, decolonization, and climate change?

Requirements/Evaluation: A presentation, shorter writing assignments and a longer research paper (20-25 pages) in the end. Students will submit shorter drafts of final paper in order to receive constructive feedback prior to final submission.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Seniors, especially History, Arabic and Environmental Studies majors.

Expected Class Size: 15

Grading:  no pass/fail option,      no fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 413 (D2) ARAB 413 GBST 413 ENVI 413

Writing Skills Notes: A 20-25 page research paper will be required at the end of the semester. Prior to getting to that point, students will submit an annotated bibliography, a two page proposal, a live and eventually a 10 page draft. Each draft will receive extensive comments and suggestions from peers and instructor. In this way, the student will think about the process of writing and the best way to set themselves up for success.

Difference, Power, and Equity Notes: This course examines how a number of different nations in Africa and Asia sought to improve the living conditions of the masses through major construction project. Though ostensibly these schemes were supposed to improve the livelihood of all, often they primarily benefitted the few - the urban elite - and not the general population. This course will therefore explore how certain class, gender and racial lines were solidified and maintained through economic development plans.

GBST 420  (F)  Architecture and Sustainability in a Global World  (WS)

Cross-listings: ENVI 420 ARTH 420 GBST 420

Secondary Cross-listing

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. In recognizing the relationship between the way things are constructed
(technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

**Requirements/Evaluation:** weekly reading discussion question posts on GLOW, leading class discussions, and a final project/paper (15-20 pages) with presentation

**Prerequisites:** none, although a course in art/architectural history or environmental studies would be advantageous

**Enrollment Limit:** 12

**Enrollment Preferences:** Art History majors, Environmental Studies majors, History and Studio majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

---

**GBST 480 (F) Media and Society in Africa** (DPE) (WS)

**Cross-listings:** HIST 480 GBST 480 AFR 381

**Secondary Cross-listing**

The Media have long played important roles in African societies. As early as the second half of the 19th century, African intellectuals were using print technology to address the people. As radio technology was in its infancy during the first half of the twentieth century, Africans were gathering around re-diffusion stations and later around single receivers to listen to news and entertainment programing. In this tutorial, we will examine these histories of media and media technologies on the continent. Ultimately, we will explore the roles that media played in serving particular community needs and how communities also adapted new media technologies to fit local conditions. Media content has historically been determined based on standards beyond viewers’, readers’ and listeners’ control. We will examine the influences that editors and political leaders on the continent have exerted on content as well as what forces they responded to. We will also further explore the media’s role in major events on the continent, from governmental changes to the ending of apartheid in South Africa and the role that media have played in areas of conflict.

**Requirements/Evaluation:** Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

**Prerequisites:** This course open to all students

**Enrollment Limit:** 10

**Enrollment Preferences:** Preference will be given to history majors and students with prior experience with African history. If the course is over-enrolled, students may be asked to complete a questionnaire to determine enrollment

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 480(D2) GBST 480(D2) AFR 381(D2)

**Writing Skills Notes:** Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers’ writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular feedback and critiques- both oral and written - from the professor, as well as oral critiques from tutorial partners.

**Difference, Power, and Equity Notes:** Modern media developed in Africa as means of control and cultivating dutiful colonial subjects. However, media then emerged as sites of contestation and even tools with which colonial subjects challenged colonial rule. They have continued to be revealing
sites for issues of gender, race, class, and ethnicity. As such, this course immensely explores diversity, power and equity and how these all-important societal concerns are expressed through the media in Africa.

Winter Study

GBST 98 (W) Indep. Study: Global Studies
Open to upperclass students. Students interested in doing an on-campus independent project during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

Not offered current academic year
The course offerings in Classics enable students to explore the ancient Greek, Roman, and Mediterranean worlds from various perspectives, including literature, history, art, archaeology, philosophy, and religion. Courses are of two types: language (Greek and Latin) and courses in which all the readings are in English translation (Classical Studies). The 100-level language courses are intensive introductions to Greek and Latin grammar and reading skills; the 200-level language courses combine grammar review with primary readings from Greek or Latin texts of key historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Classical Studies courses offer introductions to and more specialized study of the literature, visual and material culture, history, and other aspects of the Greek and Roman worlds.

MAJOR

Majors and prospective majors are encouraged to consult with the department’s faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course in ancient history is strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for advanced study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Route A emphasizes more coursework in Greek and Latin, while Route B emphasizes more Classical Studies courses.

Route A: (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language. (2) Three additional courses from the offerings in Greek, Latin, or Classical Studies or from approved courses in other departments and programs.

Route B: (1) One course each from any two of the following categories: literature (CLAS 101 or CLAS 102); visual and material culture (CLAS 209 or CLAS 210); history (CLAS 222 or CLAS 223). (2) Four courses in Greek or Latin with at least one at the 400-level, or the four-course sequence CLLA 101, 102, 201, and 302. (3) Three additional courses from the offerings in Classical Studies or from approved courses in other departments and programs.

Classics Colloquium: All Classics majors in residence are expected to participate fully in the life of the department through attendance at lectures and other departmental events.

THE DEGREE WITH HONORS IN CLASSICS

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

COURSE NUMBERING SYSTEM

Language Courses: The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of Greek and Latin literature. Students may enter the rotation at 100-level, 200-level, or 300-level, depending on previous experience.
Classical Studies Courses: The numbering of these courses does not reflect a strict sequence, and most of them do not assume prior experience in Classics or a cross-listed field. The following pairs of courses offer excellent introductions to key areas of study within Classics: CLAS 101 and 102 (literature), CLAS 209, 210 (visual and material culture), CLAS 222, 223 (history).

STUDY AWAY
We strongly encourage Classics majors to study away in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Mediterranean world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department’s faculty are always available to advise students, the chair has materials to share, and students can visit the department’s website for information and links to helpful sites. Majors who are considering studying away should especially consult with faculty members about the implications for language study.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in some cases, if appropriate course information is available in advance (e.g., syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
No, but students should consult with the department about language sequences.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

CLGR 101 (F) Introduction to Greek
This full-year, intensive course presents the fundamentals of ancient Greek grammar, syntax, and vocabulary. While finishing the formal study of the language in the second semester, students begin reading prose and poetry of the classical period, usually works by Xenophon and Euripides.

Requirements/Evaluation: frequent quizzes, tests, and a final exam
Prerequisites: none; designed for students who are beginning Greek or have studied less than two years of Greek in secondary school; students with some previous experience in Greek may want to enroll in CLGR 102 only (consult the department)
Enrollment Limit: 15
Enrollment Preferences: Classics majors or intended Classics majors, first years and sophomores
Expected Class Size: 8-10
Grading: no pass/fail option, yes fifth course option
CLGR 102  (S)  Introduction to Greek
This full-year, intensive course presents the fundamentals of Greek grammar, syntax, and vocabulary and introduces students, in the second semester, to works of the classical period (usually Xenophon and Euripides).

Requirements/Evaluation:  frequent quizzes, tests, and a final exam
Prerequisites:  CLGR 101 or permission of department
Enrollment Limit:  15
Enrollment Preferences:  Classics majors or intended Classics majors, first years and sophomores
Expected Class Size:  8-10
Grading:  no pass/fail option, yes fifth course option

Spring 2024
LEC Section: 01    MWF 11:00 am - 12:15 pm     Felipe  Soza

CLGR 201  (F)  Intermediate Greek
This course will be based on readings from Plato's *Ion* and Hesiod's *Theogony* in their original Greek. These texts will give you a taste of both Classical prose and Archaic poetry and enable you to improve your ability to read, comprehend, and translate ancient Greek literature. Plato and Hesiod also offer important and influential perspectives on the origins, effects, and value of poetry, and we will use their work as a starting point for asking ourselves questions like: what is poetry? Where does it come from? What is it good for? Students who successfully complete this course will be well-prepared for advanced study of Greek language and literature.

Requirements/Evaluation:  Evaluation will be based on classroom participation, quizzes and exams, and take-home assignments (including, e.g., essays and brief prose composition tasks).
Prerequisites:  CLGR 101-102 or two years of Greek in secondary school
Enrollment Limit:  12
Enrollment Preferences:  Classics majors and intended Classics majors
Expected Class Size:  5-10
Grading:  yes pass/fail option, yes fifth course option

Fall 2023
SEM Section: 01    MWF 10:00 am - 10:50 am     Amanda R. Wilcox

CLGR 402  (S)  Homer: The Odyssey
From the early archaic era through the classical and beyond, Homer's *Iliad* and *Odyssey* remained foundational in Greek discourse about community, leadership, war, heroism, family, friendship, loyalty, the gods, justice, and much more. Nearly all of subsequent Greek literature, both poetry and prose, developed out of a dialogue with these epics. In this course, we will read extensive selections from the *Odyssey* in Greek and the entire epic in translation.

Requirements/Evaluation:  class participation, short written assignments and/or oral reports, a midterm and final exams, and a final paper
Prerequisites:  CLGR 201 or permission of instructor
CLGR 404 (S) Tragedy
This course will focus on reading, in Greek, a complete tragedy by Sophocles or Euripides. It will thus improve your ability to read and analyze Greek poetry in a variety of styles and meters. While focusing on questions of particular importance for the play we are reading in Greek, we will also situate that play in a larger context by exploring, for instance: aspects of the social and political situations in and for which fifth-century tragedies were first produced; the several performance genres out of which tragedy was created; developments in the physical characteristics of the theater and in elements of staging and performance; problems of representation particularly relevant to theatrical production and performance.

Requirements/Evaluation: contributions to class, exams, and a final paper
Prerequisites: CLGR 201 or permission of instructor

CLGR 405 (F) Greek Lyric Poetry
This course will explore the development of Greek lyric poetry from the eighth to the fifth centuries BCE. Beginning with Archilochus, Sappho, and Alcaeus, and proceeding through such poets as Solon, Anacreon, Ibycus, and Theognis, we will examine the formal, social, and performative contexts of lyric, the influence of epic and choral poetry on the evolution of the genre, and the difficulties of evaluating a fragmentary corpus. Finally, we will explore the influence of political and economic changes in the early fifth century on the work of Simonides. The goal throughout is to investigate the structures, innovations, and problems of poetic self-expression in early Greek poetry.

Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam
Prerequisites: CLGR 201 or permission of instructor

CLGR 406 (F) Aristophanes and Plato
This course explores Aristophanes' comedy Clouds and Plato's dramatic dialogue Apology of Socrates through close reading, commentary, translation, and analysis. Together, these texts provide a point of entry for grasping the political and social processes that culminated in the trial, conviction, and execution of Socrates in 399 BCE because "he corrupts the youth and does not recognize the gods the city recognizes (Apology 28b-c)." More broadly, these texts open up perspectives on how scientific inquiry, Socratic conversation, and rhetorical education were viewed in fifth-century Athens and prime us to reconsider core questions ranging from the proper methods, purpose, and stakes of scientific and rhetorical education to the proper role of tradition in familial and civic life and the costs of nonconformity.

Requirements/Evaluation: Evaluation will be based on class participation, several short written assignments, a midterm and final exam, and a longer final paper.
Prerequisites: CLGR 201 or instructor permission
CLGR 409 (F) Plato

Plato's writing has exercised an incalculable influence on the development of subsequent philosophy and literature, but his dialogues are equally compelling when they are read independently of the works they have inspired. In this course we will read substantial selections from one or more of the so-called middle dialogues (Symposium, Phaedo, Republic, Phaedrus), in which a variety of speakers, including Socrates, ask and provisionally answer questions such as what are love, beauty, and justice, and how does the human soul in possession of these goods participate in the divine?

Class Format: For the fall of 2020, this course will taught online. The seminar will meet at the regularly scheduled time twice a week or at a mutually agreed on time that does not conflict with other course work.

Requirements/Evaluation: evaluation will be based on class participation, several short written assignments, a midterm and final exam, and a longer final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: if oversubscribed, preference given to majors in Classics, Philosophy, Comparative Literature, English or another literature

Expected Class Size: 5-6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLGR 412 (F) Herodotus

This course will focus on the reading in Greek of Herodotus' Histories, his multivalent and deeply human account of how and why several hundred years of contact and conflict between the Greek city-states and non-Greek peoples to the east culminated in the Persian invasion of Greece. We will explore the ways in which his rich narrative style and intellectual landscape reflect the influence of Greek and near-eastern oral traditions, Ionian philosophical thought, Greek tragedy, and contemporary Athenian rhetoric and philosophy. We will also study his use of anthropological methods, ethnography, and geography in explaining human events. Among the many themes that permeate his work, we will pay special attention to the working of divine versus human justice, the mutability of human affairs, the nature of authority, the role of family, and the quest for wisdom.

Requirements/Evaluation: class participation, two short written assignments, a midterm exam, a final paper, and a final exam

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Classics majors

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLGR 422 (S) Crete in the Ancient Greek Imagination

The island of Crete appears across ancient Greek literature as a place of mythic origins, monstrosity, and technological marvels. It plays a paradoxical role as an origin point for quintessentially-Greek practices, such as the paean (hymn to Apollo), as well as a site of difference and even perversion. The god Zeus and the half-human, half-bull Minotaur were both, after all, born on Crete. In this course, we will explore the representation of Crete and...
Cretans in Greek poetry, including hexameter epic (Homer, the *Homeric Hymns*), lyric (Bacchylides), and tragedy (Euripides’ *Hippolytus*). The range of reading selections will improve students’ understanding of ancient Greek grammar and syntax, and deepen their appreciation of different metrical patterns, dialects, and genres. They will also enable us to consider how the representation of Crete functioned as a way for poets to articulate various elements of Greek identity. In addition to advancing their understanding of Greek language and literature, students in this course will learn about the history, geography, and culture of Crete in the Archaic and Classical periods as it relates to our literary sources, and complete research projects on significant Cretan sites in Greek art, literature, and culture. All students enrolled in this course will have the option of participating in a short-term travel course to Crete in May, conducted in collaboration with CLLA 422.

**Requirements/Evaluation:** class participation, translation exams, seminar paper and presentation

**Prerequisites:** CLGR 201

**Enrollment Limit:** 10

**Enrollment Preferences:** Classics majors and intending majors

**Expected Class Size:** 4

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

GENERAL STATEMENT OF GOALS

The History department seeks to cultivate a critical understanding and awareness of the past and the development of our students’ intellectual, analytical, and rhetorical abilities. In pursuit of the first objective, through its curricular offerings the department seeks both to expose students to the richness, diversity, and complexities of human history over long periods of time and in different geographic regions and to provide students with the opportunity to explore aspects of the past in depth. At the same time, the department endeavors to develop students’ ability to think historically and to foster in them an appreciation of the contested nature and the value of historical knowledge by confronting them with the variety of ways in which historians have approached and interpreted the past, engaging them in issues that provoke historical debate, and familiarizing them with the nature and uses of historical evidence. By engaging students in the critical study of the past, finally, the department seeks to develop their ability to formulate historically informed analyses and their analytical and rhetorical skills.
These writing-intensive courses give students an opportunity to explore an exciting historical topic in-depth, learn about the discipline of history, and improve their research and writing skills. Because these courses emphasize the acquisition of skills required for the advanced study of History, they are ideal for students contemplating a major in History.

Each 100-level seminar is normally limited to nineteen students and focuses both on training in research skills (such as using the library, navigating on-line resources, formulating a research question and developing a research agenda, and learning how to use different types of evidence) and on the acquisition of reading skills (such as how to interpret different kinds of historical writing and the arguments historians make). These seminars especially emphasize the importance of writing and include varied assignments that stress the mechanics of writing and revision and focus on issues of argumentation, documentation, and style. Enrollment preference in 100-level seminars is normally given to first-year students and then to sophomores.

Each 100-level tutorial stresses the importance of interpreting historical evidence and evaluating the arguments made by historians and likewise fulfills the writing-intensive requirement. Enrollment in these courses is limited to ten students, each of whom is expected to write five or six interpretive essays and present five or six oral critiques of another student’s work. First-year students and sophomores will normally be given equal enrollment preference in 100-level tutorials.

First-year seminars and tutorials can be counted toward the History major and used to meet the department’s group and concentration requirements.

Introductory Survey Courses (202-299): These courses are open to all students and are intended to provide a basic understanding of the history of peoples, countries, and geographic regions over relatively long time-spans. Most of all, they will provide students with the background necessary for more advanced study in history at the 300 and 400 level. They are offered in either small or large formats, depending on the individual course.

Major Seminars (301): Major seminars explore the nature and practice of history, are required for the degree in History, and are normally restricted to junior History majors. Although these seminars vary in topic and approach, each focuses on the discipline of history itself—on the debates over how to approach the past, on questions of the status of different kinds of evidence and how to use it, on the purpose of the study of history. Focusing on questions of methodology, epistemology, and historiography, these courses ask: What kind of knowledge do historians claim to produce? What does it mean to study the past? How do historians approach the project of studying the past? Each year several major seminars will be offered. Students who plan to study abroad during their junior year may take their major seminar in the spring semester of their sophomore year (space permitting), and those planning to be away for the whole of their junior year are encouraged to do so.

Advanced Electives (302-396): These advanced, topical courses are more specialized in focus than are the introductory survey courses (202-299) and are intended to follow such courses. Enrollment is often limited. Because these courses may presume some background knowledge, the instructor may recommend that students enroll in an appropriate introductory course before registering for an advanced elective.

Advanced Seminars (402-479): These are advanced courses normally limited in enrollment to fifteen students. Each seminar will investigate a topic in depth and will require students to engage in research that leads to a substantial piece of historical writing. All History majors are required to complete either an advanced seminar (402-479) or a tutorial (480-492). Instructors may recommend prior coursework in the area of the seminar. Preference is given to senior History majors, followed by junior History majors.

Advanced Tutorials (480-492, 495): These are advanced reading and writing courses that offer an in-depth analysis of a topic in tutorial format. Tutorials are limited in enrollment to ten students and preference is given to senior History majors. All History majors are required to complete either an advanced seminar (402-479) or a tutorial (480-492). Instructors may recommend prior coursework in the area of the tutorial. The writing of five or six essays and the oral presentation of five or six critiques of another student’s essays are central to tutorials.

Within each of these levels, courses are further divided by geographical area:

- Africa and the Middle East: 102-111, 202-211, 302-311, 402-411
- Asia: 112-121, 212-221, 312-321, 412-421
- Europe and Russia: 122-141, 222-241, 322-341, 422-441
- Latin America and the Caribbean: 142-151, 242-251, 342-351, 442-451
- United States: 152-191, 252-291, 352-387, 452-471
- Transnational/Comparative: 192-199, 292-299, 388-396, 472-479

ADVISING
Both majors and non-majors are encouraged to talk at any time with the department chair, the department administrative assistant, or any other member of the department about the History major.

All incoming majors will choose a faculty advisor in the spring of their sophomore year. All majors must meet with their advisor in the beginning of the fall semester, to develop their Concentration (see below), and at the time of the spring semester registration period in order to have their courses and plans for the History major approved. Students who are interested in the senior thesis program or graduate school should contact the faculty director of the Thesis Program. Prospective study abroad students should contact the department’s administrative assistant.

THE MAJOR

The major consists of at least nine semester courses as follows:

Required Courses in the Major

One Major Seminar (History 301)

At least one Advanced Seminar (History 402-479) or Tutorial (History 480-492)

Elective Courses

Seven (or more) additional semester courses in History, at least one to be chosen from among three of the following groups:

Group A: The History of Africa
Group B: The History of Asia
Group C: The History of Europe and Russia
Group D: The History of Latin America and the Caribbean
Group E: The History of the Middle East
Group F: The History of the United States and Canada
Group G: Global History

In addition, students must take at least one course dealing with the premodern period (designated Group P in the catalog); this may be one of the courses used to fulfill the group requirement (Groups A-G).

A single course can meet the requirement for no more than one of Groups A through G.

Concentration In The Major

Students are encouraged, in consultation with their advisors, to design a concentration within the History major. A concentration should consist of at least three courses that are linked by common themes, geography, or time period. Only one of those courses can be a 100-level seminar while at least one must be a 300- or 400-level course. Courses in the concentration may be used to fulfill the group requirements. Courses taken abroad may be included in the concentration with the approval of the department chair.

THE DEGREE WITH HONORS IN HISTORY

The History Department offers a thesis route to the degree with honors in History. This involves a ten-course major as well as an independent WSP. Students wishing to undertake independent research or considering graduate study are encouraged to participate in the thesis program and seminar.

Application to enter the thesis program is made by spring registration in the junior year and is based on a solid record of work of honors caliber, normally defined as maintaining at least a B+ average in courses taken for the major. Students who intend to write a thesis submit a proposal to the History Department at this time. Students who will be away during the spring semester of their junior year make arrangements to apply before leaving. Normally, it is the responsibility of the student to secure the agreement of a member of the department to act as their thesis advisor, normally a faculty member with whom the student has worked in the past. The student therefore consults with a member of the department about a thesis topic and secures the faculty member’s agreement to serve as their thesis advisor prior to submitting a proposal to the department. The thesis proposal must be signed by a member of the History Department. Normally, the thesis topic is related to course work that the student has completed. Students should be aware that, while the department tries to accommodate all students who qualify to write a thesis, particular topics may be deemed unfeasible. Final admission to the thesis program depends on the department’s assessment of the qualifications of the student and the feasibility of the project.

Once the student has been notified of admission to the thesis program, they register for History 493, Senior Thesis Seminar, in the fall semester, for History 031 during winter study, and for History 494, Senior Thesis Seminar, in the spring. In addition to researching and writing a thesis of approximately 75-100 pages, students attend special presentations under the History Department’s Class of 1960 Scholars Program.
During the fall, students work regularly on their research and consult frequently with their advisors. Throughout the semester, thesis writers also present progress reports for group discussion to the seminar (History 493). Performance in the seminar is taken into consideration in determining students’ continued participation in the thesis program and is taken into account in determining their final thesis grades calculated at the end of the year. Students are required to submit one draft thesis chapter to their advisor and the director of the thesis seminar by the end of the fall semester. During the first week of winter study students present their draft chapter to the thesis seminar and members of the history department thesis committee. Students deemed to be making satisfactory progress on their research and writing at this point are allowed to continue with the thesis. They devote the entire winter study period to thesis work. They normally conclude their research during winter study and must complete a second draft chapter of their thesis for submission to their advisor and the director of the thesis seminar before the end of winter study. By the beginning of spring semester, the thesis committee formally consults with advisors and makes a recommendation to the department on which students are allowed to proceed with the thesis. Those students continuing with the thesis present a draft chapter of their thesis to the thesis seminar and members of the department’s thesis committee during the early weeks of the second semester.

Completed theses are due in mid-April, after which each student prepares and makes a short oral presentation of their thesis at the departmental Thesis Colloquium. Another student who has read the thesis then offers a critique of the thesis, after which the two faculty readers of the thesis offer their own comments and questions, followed by a general discussion of the thesis by students and other members of the department.

LANGUAGE

Study of a foreign language is basic to the understanding of other cultures. Particularly those students who might wish to do graduate work in History are encouraged to enroll in language courses at Williams.

STUDY ABROAD

The History Department considers immersion in and familiarity with a foreign culture not only to be valuable in themselves, but also to provide an important way of understanding the past. Students who major in History therefore are encouraged to study a foreign language and to consider studying abroad during their junior year. History courses taken as part of a study abroad program that is recognized by the college normally can be used to satisfy departmental distribution and general requirements, up to a maximum of three courses (this limit does not apply to tutorials taken as part of the Williams-Exeter Program). Courses taken abroad, even at Oxford, cannot be used to satisfy the major seminar and advanced seminar/tutorial requirements, with only one exception: the tutorial on “Historiography: Tacitus to Weber” that is offered through the Williams-Exeter Program can count for major seminar credit. Students who plan to study abroad during their junior year may take their major seminar in the spring semester of their sophomore year, and those planning to be away the whole of their junior year are strongly encouraged to do so.

Students interested in studying abroad during their junior year should discuss their plans with a member of the department as well as with the department’s administrative assistant. Approval of departmental credit for courses taken abroad normally must be obtained from the chair or from the administrative assistant prior to the commencement of the study abroad program.

FAQ

Can your department or program typically pre-approve courses for major/concentration credit?

Yes. HIST 301 (with the exception of one particular tutorial offered through the Williams-Oxford Programme) and a 400-level seminar or tutorial.

Does your department or program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. The maximum number of credits is three.

Does your department or program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. The courses need to be historical in approach and content for credit. This means that courses not listed under History in the study abroad program might be considered for history major credit.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. HIST 301 (with the exception of one particular tutorial offered through the Williams-Oxford Programme) and a 400-level seminar or tutorial.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No. Students who will be studying abroad for the entire year are encouraged to take HIST 301 before their junior year.
Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None recently.

**HIST 100  (W) The Fourteenth Amendment and the Meanings of Equality**

For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment’s meaning in the century that followed. Central themes in this course include the contested interpretations of "birthright citizenship," "due process," "privileges and immunities," "equal protection," and "life, liberty or property"; the rise, fall, and rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality.

**Requirements/Evaluation:** There will be three short (4-5 page) research-based writing assignments; a revision of one of those papers; and a short final reflection essay. As an intensive winter study, this class will require approximately 12-15 hours of in-person class time a week, as well as time outside out of class on reading and writing assignments.

**Prerequisites:** no prerequisites

**Enrollment Limit:** 19

**Enrollment Preferences:** This course is for students who have incurred deficiencies in a previous semester

**Expected Class Size:** 15-19

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar’s Office will register students in HIST 100 and HIST 40.

**HIST 104  (S) Race and a Global War: Africa during World War II  (DPE) (WS)**

**Cross-listings:** HIST 104 GBST 104 AFR 104

**Primary Cross-listing**

This course highlights African experiences of World War II. Although most histories have excluded Africa's role in the war, the continent and its people were at the center of major developments during in this global conflict. In fact, many Africans remember the Italian invasion of Ethiopia in 1935 as the start of the war. African servicemen fought alongside the Allied and Axis forces on major warfronts in Europe, Africa and Asia. African communities and individuals also established war charity campaigns to collect funds, which they sent to war ravaged societies in Europe. Indeed, African economies, despite their colonial statuses, kept European imperial nations afloat in their most hour of need. At the same time, African colonial subjects faced severe food shortages, the loss of working-age men to labor and military recruiters, and dramatically increased taxes. We will examine the impact of these and other wartime pressures on different African communities. How did African societies meet such challenges and how did they view the war? In this course we will examine the roles that women played during the war, and the various other ways that African communities met wartime demands. Other topics we will explore include the role of African women; colonial propaganda; political protest against the war; race and racial thought in the wartime era; war crimes; African American support for the liberation of Ethiopia; and the war's impact on decolonization across the continent. We will further study how Africans and outsiders have differently conceptualized the continent's role in the war by analyzing a variety of sources, including scholarly writings, archival materials, films, former soldiers' biographies, and propaganda posters.

**Requirements/Evaluation:** active participation in discussion, map quiz, 2 reading responses, and 3 essays (of about 5 pages)

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Limit: 19
Enrollment Preferences: first-year students and then sophomores who have not previously taken a 100-level seminar
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
HIST 104(D2) GBST 104(D2) AFR 104(D2)
Writing Skills Notes: Students will write two 3-5-page essays each written in two drafts with instructor comments. They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.
Difference, Power, and Equity Notes: This course explores the colonial relationship during a major global crisis. Students will examine existing narratives of African contributions to the war and to come up with their own interpretations, and will be called to critically engage the question of why and how colonies made significant contributions to the Allied cause by producing needed materials and resources or by joining the fight. Africans made these contributions spite of various and complex inequities.

HIST 109 (S) The Iranian Revolution (DPE) (WS)
Cross-listings: ARAB 109 HIST 109
Primary Cross-listing
The Iranian Revolution was a major turning point in world history that resulted in the establishment of the Islamic Republic of Iran. This tutorial will evaluate the causes and impact of the revolution and how this seminal event continues to have widespread repercussions around the globe. The first weeks will explore the history of pre-revolutionary Iran with special attention to religious and intellectual trends such as the ideas of Ayatollah Ruhollah Khomeini, Jalal al-e Ahmad, and Ali Shariati. We will then evaluate the revolution itself including the US hostage crisis, the downfall of the Shah Muhammad Reza Pahlavi Shah, and how Khomeini’s vision of society became paramount. Finally, we will explore the aftermath of the revolution including Iran’s geopolitics, the nature of the theocratic system in Iran as well as how the revolution impacted every day lives of Iranians in Iran and abroad particularly how they reflect on the revolution in memoirs, films, and literature.
Requirements/Evaluation: Weekly meetings. Weekly papers - either a 5 page primary paper or a 2-3 page response paper.
Prerequisites: No prerequisites.
Enrollment Limit: 10
Enrollment Preferences: First Years and Sophomores.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 109(D2) HIST 109(D2)
Writing Skills Notes: As a tutorial, students are expected to regularly write analytical and critical papers on the readings. They will receive regular and consistent feedback from the instructor and their partner and will be given the opportunity to re-write some of their assignments.
Difference, Power, and Equity Notes: The Iranian Revolution, like other major social movements, offered a compelling critique of the status quo and promised a more just society that would be more equitable for all Iranians. The tutorial will consider the relationship between the rhetoric of the Revolution and the lived reality, especially how this seminal event impacted the lives ordinary Iranians. Was the Revolution simply a change in the composition of the political elite or did it yield new realities and more access for Iranians.

HIST 112 (F) The Asia-Pacific War (WS)
Cross-listings: HIST 112 ASIA 111
Primary Cross-listing

The "Asia-Pacific War," as it is known in Japan, raged from the full-scale Japanese invasion of China in 1937 until Japan's total defeat in 1945. This war, though certainly tied to the Allied war against Germany and Italy, was viewed by many participants at the time as truly a war apart due to the immense distances involved, the gleeful, racism-fueled brutality on both sides of the conflict, and the resultant abuses of POWs, use of atomic weapons, and other atrocities. Students will explore the intersection of colonialism, racism and opportunism that fed the conflagration, and the remarkable rapprochement between American and Japanese former enemies immediately after the war. It will examine in depth the roles of China and the USSR in this conflict, which are often mentioned but functionally ignored in the West. It will cover the various warzones and home fronts, focusing as much as possible on conveying the experiences of participants through primary sources. It will likewise seek to bridge the analysis of the military and socio-political sides of this conflict, which are often treated as distinct, by drawing on key academic works in the field.

Requirements/Evaluation:  Weekly meetings with professor and one peer partner; 5-page papers (6 total); 2-page critiques of partner's papers (6 total)

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: History majors and Asian Studies concentration students, then everyone else.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 112(D2) ASIA 111(D2)

Writing Skills Notes: Students will alternate weekly between writing 5-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular written feedback on their writing from the professor, as well as oral critiques from the professor and tutorial partners.

HIST 116 (S) Understanding 9/11 and the War in Iraq (DPE) (WS)

Cross-listings: HIST 116 ARAB 211

Primary Cross-listing

What were some of the causes of 9/11/2001 and what were some of the consequences? Why and how did the United States invade Iraq in 2003 and what impact did the subsequent occupation of that country have on the rest of the Middle East and the world in general? In this course on recent political and cultural international history, that will also consider this history in film and popular culture, the monumental ramifications of the "War on Terror" will be considered and how this framework has shaped the 21st century. In the first part of the course, US-Middle Eastern relations will be explored and the eventual emergence of al-Qaeda in the late 1990s. Then the terrorist attacks on American soil on 9/11 will be studied. In this segment, students will engage with oral histories and memoirs related to the fateful events of that day. In the following module the political and cultural responses will be considered. Particular attention will be on the prelude to the Iraq War, especially how that war was justified and rationalized. Here students will analyze political rhetoric, public discourse, and activism through a range of sources including in the media, the academy, and in popular culture. Then the attention will be turned to the invasion of Iraq in March 2003, and the eventual occupation of Iraq. The myriad Iraqi responses will be studied along with American military experience. Finally, the course will evaluate the significance of the first decade of the 21st century and how these events, and the memory of this decade, continue to reverberate today.

Requirements/Evaluation: Several short papers and a final oral history.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: First-years and sophomores.

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:

HIST 116(D2) ARAB 211(D2)

**Writing Skills Notes:** In this writing-intensive first-year seminar, students will engage with primary sources such as oral histories, autobiographies and political tracts and write short interpretive essays that will go through several editing stages. The final writing project will be an oral history of an individual who has a direct personal connection with either 9/11 and/or the wars in Iraq. The students will learn how to synthesize a range of experiences into a 10-12 page paper.

**Difference, Power, and Equity Notes:** This course will consider power and difference in a number of ways. First, it will evaluate how the US government used its political power to convince the public to support a military operation under questionable premises. Second, it will critically assess the "War on Terror" and who has benefited from it. Third, it will examine how the American military occupied Iraq and the ways in which Iraqis tried to resist the American designs on their country.

**HIST 117 (F) Bombay/Mumbai: Making of a Modern Metropolis (WS)**

**Primary Cross-listing**

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of colonial and modern India through the history of its most important city.

**Requirements/Evaluation:** assessment will be based on class participation and weekly written responses to readings (2 pages), 2-3 short papers (4-5 pages), leading to an oral presentation and final paper (10-12 pages). All writing assignments are structured to build up the final paper.

**Prerequisites:** First years and sophomores only

**Enrollment Limit:** 19

**Enrollment Preferences:** first-years, and then sophomores who have not previously taken a 100-level seminar.

**Expected Class Size:** 12-15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**HIST 122 (S) The Black Death (WS)**
In what ways does a pandemic change society? Historians and scientists still debate the development and impact of the second plague pandemic, also known as the Black Death, which decimated the people of Asia, Africa, and Europe in the mid-fourteenth century. For many medieval people, the plague was experienced as a terrifying judgment of God upon the world. In this class, we will see how the plague exposed and exacerbated divisions within society, encouraging new political movements, economic changes, and new forms of expression in art and literature. We will read multiple first-hand accounts of the plague, with an eye to seeing how medieval people tried to understand the calamity through science and religion, and how modern scholars have interpreted the evidence of both written records and archaeology and related sciences. The Black Death is the first global pandemic that produced an extensive written record, and the sources offer us a detailed look at how multiple complex societies handled the crisis.

Requirements/Evaluation:  Attendance and participation, three short (3- to 5-page) papers, a final 8-10-page research paper  
Prerequisites: None  
Enrollment Limit: 19  
Enrollment Preferences: First- and second-year students. Others will need the permission of the instructor.  
Expected Class Size: 10-15  
Grading:  yes pass/fail option,  yes fifth course option  
Distributions:  (D2)  (WS)  
Writing Skills Notes: Students will write three short (3-5 page) papers and a longer (8-10 page) research paper. They will receive feedback on all of these. The research paper will be produced in several stages, with the instructor commenting on each step.
