national history. Thus, in nationalist renderings, archaeological sites and artifacts are not merely relics of the past; they can also be potent and
conspicuous symbols of national identity for the modern nation-state. In the Middle East, with its rich archaeological heritage, the relationship among
politics, nationalism, and archeology has been particularly strong and interesting. This tutorial addresses the powerful nexus between history and
nationalism with a special emphasis on the Middle East. It will explore the battle over who controls history and the "stuff" of history such as antiquities,
land, heritage sites, and museum exhibitions and how that control has expressed itself in several Middle Eastern countries, including Iraq, Israel,
Turkey, Egypt, Lebanon, and Iran. Furthermore, it will discuss how archaeology entered the political discourse, the ethics of repatriation and
appropriation, and archaeology's role in contested terrains and political disputes.

Requirements/Evaluation: Format: tutorial. Requirements: 5-7 page essays or 2-3 response papers due each week

Prerequisites: None, though a demonstrated interest in the Middle East is important.

Enrollment Limit: 10

Enrollment Preferences: Seniors and to History and Arabic Studies majors.

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 408(D2) HIST 489(D2)

Writing Skills Notes: As a tutorial, students will receive extensive feedback on their writing each week both from the professor and their partner.
Further, students will be given the opportunity to rewrite two of their papers in light of the criticism that they receive during the semester.

Difference, Power, and Equity Notes: This is a tutorial on a particular form of power, namely how the powerful seek to control the past. The ultimate
question that this tutorial seeks to answer is: who owns the past? Which history is emphasized and which histories are overlooked? How do modern nation states in different Middle Eastern states cherry-pick the past in order to maintain and develop a national narrative that is suitable to the political and economic powers often at the expense of religious or linguistic minorities.

HIST 490  (S)  Memory, History, and the Extermination of the Jews of Europe  (WS)
Cross-listings: JWST 490 HIST 490

Primary Cross-listing

This course is about the postwar legacy of the Holocaust. Nazi Germany's extermination of European Jews has become a moral and cultural touchstone for people in Europe and in many other parts of the world. This tutorial explores a series of topics from the immediate aftermath of the Second World War to the present. Engaging with a wide-range of sources, we will wrestle with historical, legal, moral, political, and cultural issues and debates that have emerged out of the confrontation with the extermination of the Jews of Europe. They include: Why was the Holocaust "unprecedented" and "unimaginable"? Is it a Jewish story or universal story? Does the Holocaust raise different issues than other historical events for the historian? How should the Holocaust be represented in words and images, and what are the implications of different means of representing it? Has Germany faced up to its past? Were Germans also victims of World War II? Who were the "bystanders" as compared to the "perpetrators"? Were the postwar trials of perpetrators a travesty of justice? What "lessons" have we learned and should we learn from the Holocaust? By the end of the course, students will have grappled with the ongoing controversies that have arisen among scholars, artists, governments, and lay people about the meaning of the Holocaust for the postwar world. In a world in which extraordinary acts of violence continue to be perpetrated and many nations' pasts are marked by episodes of extreme criminality and/or trauma, exploring the manner by which one such episode has been remembered, avenged, and adjudicated has relevance for considering other societies' efforts to confront their own traumatic pasts.

Class Format: tutorial; class time consists of weekly one-hour sessions with the instructor and a fellow student
Requirements/Evaluation: Every other week the student will write and present orally a 5- to 7-page paper on the assigned readings of that week; on alternate weeks, the student will write a 2-page critique of the fellow student's paper; a final written paper on the issues raised in the tutorial to cap off the semester's work.
Prerequisites: permission of instructor
Enrollment Limit: 10
Enrollment Preferences: History majors and Jewish Studies concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
JWST 490(D2) HIST 490(D2)

Writing Skills Notes: Bi-weekly 5- to 7-page- papers. Students will receive regular and individualized feedback on their writing to help them work on different writing issues throughout the semester.

HIST 491  (S)  The Suburbs  (WS)
Cross-listings: HIST 491 AMST 490 ENVI 491

Primary Cross-listing

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-WWII suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some
of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

**Class Format:** Students will be assigned a tutorial partner, and tutorial pairs will meet with the professor for one hour each week at a regularly scheduled meeting time.

**Requirements/Evaluation:** typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors and students with previous coursework in History

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**HIST 492 (S) Making Race in Early Modern Europe (DPE)**

In modern scholarship, racism has most often been portrayed as a child of the European Enlightenment, a set of ideas about embodied human difference and its heritability that arose after the abandonment of the Biblical account of human creation and the rise of a new natural science. This tutorial asks: what racial ideas and practices preceded the Enlightenment? Beginning in the late Middle Ages, Europeans participated in enormous economic and cultural transformations, including increased global mobility and the establishment of new, transoceanic empires. Intensified interactions with people in the Americas, Africa, and Asia shaped European understandings of human difference, as did the burgeoning Atlantic economy and its cruelties. In this tutorial, we will place the emergence of modern racism in a long-term perspective, reconstructing the deep history out of which Enlightenment racial theory emerged. Proceeding both chronologically and thematically, we will consider how the major global transformations of the sixteenth through eighteenth centuries shaped European racial understandings with enduring consequence. In the process, we will develop a conceptual vocabulary to describe in a historically sensitive manner how embodied human difference has been interpreted differently across space and time. Throughout, we will read a variety of historical primary sources in conjunction with recent scholarship. Ultimately, our historical study will afford a comparative perspective on contemporary views of races and racism.

**Requirements/Evaluation:** Attendance and active participation; weekly tutorial papers (5 "long" papers and 5 responses).

**Prerequisites:** 200- or 300-level History classes

**Enrollment Limit:** 10

**Enrollment Preferences:** Junior and seniors; History majors.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** The aim of the tutorial is threefold: (i) to introduce students to the comparative study of race across time and place, in order to help them contextualize and historicize the racial dispensation of the contemporary US; (ii) to treat the history of race not just as a history of ideas and theories, but of practices of race- and knowledge-making; (iii) to advance our understanding of the past through a dialectical process of empirical research and theoretical interpretation.

HIST 493 (F) Senior Thesis: Research Seminar
This seminar is intended solely for writers of senior theses during their first semester. Although each student's major work for the year will be the writing of a thesis in consultation with an individual advisor, students are also required to meet in the context of the thesis seminar in order to present and critique each other's proposals and drafts and to discuss common problems in the research and design of a long analytical essay. For students proceeding to HIST 494, performance in the fall semester will be factored into the thesis grade calculated at the end of the year. The quality of a student's performance in the seminar segment of History 493, as well as their performance in all aspects of the May colloquium at which theses are presented and critiqued, figure in the overall grade the student earns for History 493-494 and the departmental decision to award Honors or Highest Honors at Commencement.

Requirements/Evaluation: class participation and completed written work, and will determine if a student will continue in the thesis program
Prerequisites: limited to seniors accepted into the History Department's Thesis Program
Enrollment Limit: none
Enrollment Preferences: limited to seniors accepted into the History Department's Thesis Program
Expected Class Size: 10-15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

HIST 495 (S) The Medieval World System: Globalization before 1500 (WS)
In recent years, scholars have turned increasing attention to global history in the pre-modern period. This tutorial takes as its focus the global Middle Ages: roughly speaking, the period between 500 and 1500 CE. This was a period that saw mass-produced consumer goods cross from China to India, East Africa, and the Middle East, inspiring admiration and imitation in multiple different markets. It saw games, music, and forms of literature become popular across continents, and saw religious communities forge networks spanning thousands of kilometers. To study the global Middle Ages is to place exchange and networks, both commercial and cultural, at the heart of our analysis. We will read and analyze many accounts by medieval travelers, merchants, and pilgrims who crossed Afro-Eurasia, alongside works by modern historians and archaeologists who have pieced together the patterns of movement and exchange that tied together the diverse societies of pre-modern Afro-Eurasia.

Requirements/Evaluation: Students will meet in pairs with the instructor once a week. Every other week each student will present a paper of
approximately 5-7 pages on a topic determined by the instructor, due by 5pm the day before the tutorial meeting. The student not writing the paper will critique the paper written by their tutorial partner. Each student will write six papers and serve as a critic on the six papers of their tutorial partner.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** Junior and senior History majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**HIST 496 (F)  Gandhi: History, Ideas and Legacy  (WS)**

**Cross-listings:** LEAD 322 ASIA 412 REL 412 HIST 496 GBST 412

**Primary Cross-listing**

This course studies the life, work, and ideas of M.K. Gandhi (1869-1948), one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. This tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the context and nature of Gandhian nationalism? Did it help to integrate the Indian nation? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

**Requirements/Evaluation:** 5-7-page essays or 2-page critique due each week and a final report (3-4 pages) at the end of the semester.

**Prerequisites:** None, except students who have taken HIST488T will not be permitted to take this class.

**Enrollment Limit:** 10

**Enrollment Preferences:** Senior history majors and students who have previously taken HIST221. Students who have previously taken HIST488T will not be permitted to take this class.

**Expected Class Size:** 10

Winter Study *************************************************************************

HIST 40 (W) The Fourteenth Amendment and the Meanings of Equality
For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment's meaning in the century that followed. Central themes in this course include the contested interpretations of "birthright citizenship," "due process," "privileges and immunities," "equal protection," and "life, liberty or property"; the rise, fall, and rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality.

Requirements/Evaluation: There will be three short (4-5 page) research-based writing assignments; a revision of one of those papers; and a short final reflection essay. As an intensive winter study, this class will require approximately 12-15 hours of in-person class time a week, as well as time outside out of class on reading and writing assignments.

Prerequisites: no prerequisites
Enrollment Limit: 19
Enrollment Preferences: This course is for students who have incurred deficiencies in a previous semester
Expected Class Size: 15-19
Grading: pass/fail only

Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in HIST 100 and HIST 40.

INTERDISCIPLINARY STUDIES (No Div)

This program is designed to facilitate and promote innovations in curricular offerings in relation both to interdisciplinary conceptual focus and experimental pedagogical form. It provides support for faculty efforts to develop a curriculum that creatively responds to intellectual needs and modes of teaching/learning that currently fall outside the conventional pattern. Faculty members interested in offering courses that fall outside the aegis of departmental or existing interdisciplinary programs submit such courses directly to the Committee on Educational Affairs by the Registrar’s deadline for course submission in early spring. Courses that fit within the curricula of departments and interdisciplinary programs, even if interdisciplinary or experimental in nature, are found listed within those departments and programs.

INTR 219 (F) Women and Girls in (Inter)National Politics (DPE)
Cross-listings: AFR 217 AMST 217 INTR 219 LEAD 219 WGSS 219
Primary Cross-listing

This tutorial focuses on the writings and autobiographies of women who have shaped national politics through social justice movements in the 20th-21st centuries. Women and girls studied include: Fannie Lou Hamer, Shirley Chisholm, Safiya Bukhari, Erica Garner, Greta Thunberg, Malala Yousafzai, Marielle Franco, Winnie Mandela.

Requirements/Evaluation: Weekly 5-page primary analytical papers and 2-page response papers.
Prerequisites: none

Romance Languages (Div I)

Italian

Chair: Professor Leyla Rouhi

Visiting Assistant Professor: M. Sassi

The study of Italian in the target language encourages students to gain a deep appreciation of the language, culture and literature through active participation and meaningful experience with the culture on its own terms. Italian courses at Williams are therefore conducted exclusively in Italian in order to enhance and reinforce the emotive and cognitive involvement of the students as they are introduced to the Italian world-view in a lively and natural manner. Students desirous of more contact with Italian are encouraged to attend the weekly Italian Table in the designated college dining hall. More information can be found at cflc.williams.edu/italian.

Rlit 101 (F) Elementary Italian

This course is designed for beginners. Its goal is to allow students to develop basic oral/listening and reading/writing proficiency in Italian. During the semester, students will be trained in grammar, pronunciation, listening-oral skills, reading, and writing in Italian by studying various communication settings and real-life situations. The class is conducted entirely in Italian.

Class Format: five hours a week with the professor

Requirements/Evaluation: participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams

Prerequisites: none; not open to those who have had one year or more of high school Italian

Enrollment Limit: 20

Enrollment Preferences: instructor will prioritize on the basis of study abroad plans and year at Williams

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Unit Notes: students registered for Rlit 101-102 are required to attend and pass the sustaining program during Winter Study; credit granted only if both semesters (RLIT 101 and 102) are taken

Distributions: (D1)

Fall 2023

Sem Section: 01 M-F 9:00 am - 9:50 am Mario Sassi

Rlit 102 (S) Elementary Italian

This course is designed for beginners who already have some basic knowledge of Italian. Its goal is for students to review and expand their oral/listening and reading/writing proficiency in Italian. During the semester, students will continue to learn Italian grammar, vocabulary, and pronunciation while improving listening-oral skills, reading, and writing in Italian. The class is conducted entirely in Italian.

Requirements/Evaluation: participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams

Prerequisites: Rlit 101 and the Winter Study sustaining program; not open to those who have had one year or more of high school Italian

Enrollment Limit: 20

Enrollment Preferences: instructor will prioritize on the basis of study abroad plans and year at Williams

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Spring 2024
RLIT 105 (F) Pathway to Proficiency

The course aims primarily to enhance the student's speaking, reading, and writing ability while introducing the formal study of Italian culture and society by analyzing short literary texts, articles, films, shows, and podcasts. In addition, students will review and expand the previous semesters' grammar structures to achieve a higher level of fluency and sophistication in language production. Italian 105 is intended for study-abroad returnees and other advanced speakers; students who have been particularly successful in Italian 101-102 are also encouraged to enroll. *The class is conducted entirely in Italian.*

**Requirements/Evaluation:** oral presentations, midterm and final exams, tests, compositions, participation

**Prerequisites:** RLIT 101/102 or by permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Students from 101/102 classes, as well as study-abroad returnees.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)
DEPARTMENT of ASIAN LANGUAGES, LITERATURES, & CULTURES
CHINESE, JAPANESE, EAST ASIAN LANGUAGES & CULTURES

(Div I & II, see explanation below)

Chair: Professor Li Yu

Cecilia Chang, Frederick Latimer Wells Professor of Chinese; Masashi Harada, Assistant Professor of Japanese; Man He, Associate Professor of Chinese; Shinko Kagaya, Professor of Japanese; Cornelius C. Kubler, Stanfield Professor of Asian Studies; Christopher M. B. Nugent, Professor of Chinese; Kasumi Yamamoto, Frank M. Gagliardi Professor of Japanese; Li Yu, Professor of Chinese

Visitors: Xiaoming Hou, Visiting Assistant Professor of Chinese; Ju-Yin Wang, Visiting Lecturer in Chinese; Language Fellows: Jiayuan Li, Ai-Chen Wang; Teaching Associate: Yuk Man Ng

Department Mission Statement and Curricular Goal

The mission of the Department of Asian Languages, Literatures, and Cultures is to produce “global citizens” who will be able to make contributions in different sectors of society in a globalized and diverse world with multilingual abilities, intercultural communicative competence, and multicultural leadership skills. Graduates of our department will not only achieve proficiency in at least one Asian language but also become competent in intercultural communication. They will develop interpretive and analytical skills using both primary texts and secondary sources and become familiar with the textual and cultural traditions in Asia.

The department offers three distinct major tracks: Chinese, Japanese, and East Asian Languages & Cultures. Each major requires a minimum of ten courses. Up to four study-away credits can be counted toward a major.

Learning Objectives for the Chinese Major

Students who complete the requirements for a major in Chinese will be able to:

- Attain the Advanced level in speaking, listening, and reading, and Intermediate High level in writing based on the ACTFL proficiency guidelines.
- Read and analyze basic texts written in Classical Chinese.
- Gain intercultural communicative skills to competently navigate a wide range of social and cultural contexts in Chinese-speaking environments.
- Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.
- Engage critically with important aspects of the historical and cultural developments and trends in China’s diverse and complex past and present.
- Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.

THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Mandarin Chinese language courses (CHIN 101, 102, 201, 202, 301, 302, 401, 402) and at least one course in Classical Chinese (CHIN 312). To gain a deeper understanding of Chinese cultural traditions, students should take at least one Chinese core elective in Chinese literary, linguistic, or cultural studies (taught either in English or in Chinese) with prefixes and primary cross-listings in CHIN.

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the Japanese Major

Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL Intermediate High to Advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Japanese language courses (JAPN 101, 102, 201, 202, 301, 302, 401, 402), at least one Japanese core elective in Japanese literary, linguistic, or cultural studies (taught either in English or in Japanese) with prefixes and primary cross-listings in JAPN, and one approved elective related to Japanese language and culture (including additional JAPN core electives, additional Asian language courses, or Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the East Asian Languages and Cultures Major

Students who complete the requirements for a major in East Asian Languages and Cultures will be able to:

- Attain a minimum of Intermediate High level in speaking, listening and reading of either Chinese or Japanese, and Intermediate Low level in writing in the language based on the ACTFL proficiency guidelines.
- Acquire research, problem-solving, and critical thinking skills by engaging in linguistic or literary analysis in the field of Chinese studies or Japanese studies.
- Obtain basic intercultural communicative skills to navigate some social and cultural contexts in Chinese- or Japanese-speaking environments.
- Continue their engagement with an Asian language and culture as lifelong learners and users of the target language.
- Students who choose the dual-language option will attain the Advanced level in speaking, listening, and reading in either Chinese or Japanese, and the intermediate level in a second Asian language based on the ACTFL proficiency guidelines.

THE MAJOR

East Asian Languages and Cultures (EALC) major: In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least six language courses (or attain a minimum proficiency equivalent to the completion of 302) in one East Asian language offered by the department (currently Chinese Mandarin and Japanese). To gain a deeper understanding of the Chinese or Japanese cultural traditions and to develop research skills in the Chinese or Japanese fields, they should take at least two Chinese/Japanese core electives in literary, linguistic, or cultural studies in their primary focus of study with prefixes and primary cross-listings in CHIN/JAPN, and two approved electives related to Chinese/Japanese language and culture (including additional CHIN/JAPN core electives, additional Asian language courses, or Chinese/Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

This major offers students who are able to complete the 402 level in either Chinese or Japanese by the end of their sophomore year a dual-language option which will allow them to learn a second Asian language and reach the Intermediate level in speaking that language by the time of graduation. Please consult with the chair or language coordinator for more information about this option.

LANGUAGE PLACEMENT

Students who have studied or otherwise developed some familiarity with Chinese or Japanese language before coming to Williams and who wish to continue their language study at the college should complete a placement evaluation before pre-registering for a language course. More information about the Chinese placement evaluation can be found at https://chinese.williams.edu/faq/. Students who wish to take the Japanese placement test should contact the Japanese faculty.

THE DEGREE WITH HONORS

The department offers students the option of pursuing a degree with Honors in Chinese, Japanese, or East Asian Languages and Cultures through writing an honors thesis. Honors theses allow students a unique opportunity to undertake an examination of topics and texts with a greater depth than regular courses allow. The great majority of students who undertake the challenge of writing an honors thesis find it to be one of their most rewarding academic experiences at Williams.

Students interested in pursuing a degree with Honors should begin thinking about their thesis topic and materials as early as possible. This is particularly true for students who need to gather materials or conduct research abroad, as this will typically take place during their junior year or the summer between their junior and senior years. It is the responsibility of the student to approach faculty members to inquire about their willingness to serve as a thesis advisor. Ideally, students should have previously taken a course with that faculty member in an area related to the subject matter of the thesis. Faculty members will usually only advise a single thesis per year, and never more than two, with students who first approach the faculty
member about serving as advisor being given priority. It is recommended that students approach the faculty members with whom they are interested in working for their thesis by the end of the fall semester of their junior year.

Students must submit a proposal to the department chair and their intended advisor before they pre-register for senior year courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. If the department approves the thesis proposal, the student should enroll in CHIN 493-W31-494, or JAPN 493-W31-494, depending on their major track. Please note that admission to the honors thesis program will normally be limited to students with a consistent record of honors-level work, as indicated by at least a B+ average in their courses for the major.

Students will typically meet with their advisor once a week at a set time other than office hours. The advisor will present the student with a set of deadlines for different stages in the thesis, ranging from a bibliography to the final draft. While these deadlines will vary for different advisors and theses, two deadlines will apply to all theses, whether analytic or translation. 1) Students must submit a finished first chapter or substantial section of polished translation by the last day of the first semester reading period. If the student misses this deadline, he or she will not be allowed to continue the thesis. 2) The finished thesis is due to the advisor by 4:00 pm on the Monday two weeks after the last day of Spring Recess. The student should submit three copies of the thesis at this time. There will be no extensions.

The department will assign two readers, separate from the advisor, to each thesis. The readers will give a written assessment of the thesis that will be an important factor in the final determination of the student’s grades for the thesis and what honors designation, if any, will be given. These written comments will be shared with the student. Within two weeks after submission, the department will schedule an oral defense. This will be a one to one-and-a-half hour session in which the student will give a public presentation of his or her thesis to members of the department and invited guests followed by a question and answer period. A final, corrected copy of the thesis must be submitted to the Technical Services Department of Sawyer Library by 4:00 P.M. on the last day of the final examination period.

In order to qualify for Honors, the department must agree that the student has earned two semester grades of B+ or higher, based on his or her thesis and oral defense. Students whose thesis and defense are deemed by the department to be of exceptional merit will be awarded Highest Honors. A letter from the department chair will inform students of these decisions.

STUDY ABROAD

Students intending to major in the department are strongly encouraged to study in Asia at some point during their time at Williams—for a summer or for a semester or full year. Study-abroad in an immersive environment in the target culture is an indispensable step toward advanced proficiency in a second language. Prospective majors or language students who are planning to study abroad must attend the fall semester study-abroad information sessions organized by the department or discuss their plans with department faculty as far in advance as possible. The department administers the Linen Fellowships for Summer Study in Asia which fund selected students’ summer intensive language study or research projects. Up to four study-abroad courses may be transferred and counted toward graduation and toward the majors offered in the department. Students MUST contact the department faculty BEFORE assuming study-away credit will be granted toward the major in the department. Upon return, students should ask their study-away program to send their transcript to the Registrar’s office so that the appropriate number of credits can be transferred and granted by the department chair.

DEPARTMENT EMAIL LISTS

To be informed about the events, activities and funding opportunities in the department, please use your Williams login to sign up for one or more of the following GLOW special interest email lists.

“DALLC Majors and Faculty” (open to all current and prospective Chinese, Japanese, or East Asian Languages and Cultures majors):
https://glow.williams.edu/enroll/AWTMXP

“Asia-Related Funding Opportunities” (open to all students who would like to seek internal or external funding related to Asia):
https://glow.williams.edu/enroll/PGJHAC

“Special Interest Chinese” (open to all students interested in Chinese language and culture): https://glow.williams.edu/enroll/XEYMPG

“Special Interest Japanese” (open to all students interested in Japanese language and culture): https://glow.williams.edu/enroll/DAYTN3

JAPN 101  (F) Elementary Japanese

An introduction to modern spoken and written Japanese, the course aims to instill proficiency in Japanese by developing four necessary skills of speaking, listening, reading, and writing to successfully interact with native speakers. The relationship between language and culture and the
sociolinguistically appropriate use of language will be stressed throughout. Audio, video and computer--assisted learning materials will be used extensively. Classes consist of a combination of "act" classes, conducted exclusively in Japanese, where students use the language in various types of drills and communicative activities, and "fact" classes, conducted in Japanese and English, where students learn about the language and culture.

**Class Format:** fact classes, three hours per week; act classes three hours per week

**Requirements/Evaluation:** daily classroom performance, homework, quizzes, chapter tests, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** current or prospective majors in the Department of Asian Languages, Literatures, and Cultures

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** students registered for JAPN 101-102 are required to attend and pass the sustaining program during the Winter Study period; credit granted only if both semesters (JAPN 101 and 102) are taken

**Distributions:** (D1)

---

**JAPN 102 (S) Elementary Japanese**

An introduction to modern spoken and written Japanese, the course aims to instill proficiency in Japanese by developing four necessary skills of speaking, listening, reading, and writing to successfully interact with native speakers. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Audio, video and computer--assisted learning materials will be used to facilitate learning. Classes consist of a combination of "act" classes, conducted exclusively in Japanese, where students use the language in various types of drills and communicative activities, and "fact" classes, conducted in Japanese and English, where students learn about the language and culture.

**Class Format:** fact classes, three hours per week; act classes three hours per week

**Requirements/Evaluation:** daily classroom performance, homework, quizzes, chapter tests, and a final exam

**Prerequisites:** JAPN 101

**Enrollment Limit:** 20

**Enrollment Preferences:** current or prospective majors in the Department of Asian Languages, Literatures, and Cultures

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** students registered for JAPN 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (JAPN 101 and 102) are taken

**Distributions:** (D1)

**JAPN 131 (F) Introduction to Japanese Formal Linguistics**

**Cross-listings:** ASIA 131 JAPN 131

**Primary Cross-listing**

This course offers a general introduction to Japanese theoretical linguistics, a scientific study of the Japanese language. We will study the major
subfields of theoretical linguistics, which addresses speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meaning (semantics). We will study those topics as we mainly compare Japanese and English. The knowledge and hands-on experience gained will enable us to pursue one of the above core fields and start investigating applied linguistics more effectively, including first/second language acquisition, pragmatics, psycholinguistics, neurolinguistics, sociolinguistics, historical linguistics and language change, and cross-linguistic variation and language universals. Although there is no prerequisite, Japanese language proficiency would be beneficial.

**Class Format:** combination of lecture and discussion

**Requirements/Evaluation:** quizzes, problem sets, mid-term exam, and final exam

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** current or prospective majors in the Department of Asian Languages, Literatures, and Cultures

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ASIA 131(D1) JAPN 131(D1)

**Attributes:** Linguistics

---

**JAPN 201 (F) Intermediate Japanese**

This course is a continuation of First-Year Japanese 101-102, further developing the four skills of speaking, listening, reading, and writing. The same general methodology will be used. Upon completing the course, students will have been introduced to most of the major structural patterns of contemporary Japanese and will be able to read simple expository prose.

**Class Format:** fact classes, three hours per week; act classes three hours per week

**Requirements/Evaluation:** daily performance, homework, quizzes, chapter tests, and a final exam

**Prerequisites:** JAPN 101-102 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** current or prospective majors in the Department of Asian Languages, Literatures, and Cultures

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

---

**JAPN 202 (S) Intermediate Japanese**

This course is a continuation of Japanese 201, further developing the four skills of speaking, listening, reading, and writing. The same general methodology will be used. Upon completing the course, students will have been introduced to most of the major structural patterns of contemporary Japanese and will be able to read simple expository prose.

**Class Format:** fact classes, three hours per week; act classes three hours per week

**Requirements/Evaluation:** daily performance, homework, quizzes, chapter tests, and a final exam

**Prerequisites:** JAPN 201 or permission of instructor

**Enrollment Limit:** 12
**Enrollment Preferences**: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures

**Expected Class Size**: 10

**Grading**: no pass/fail option, yes fifth course option

**Distributions**: (D1)

**JAPN 220 (S) Being Korean in Japan**  (DPE)

**Cross-listings**: ASIA 220 JAPN 220

**Primary Cross-listing**

Who are Zainichi Koreans (Koreans in Japan)? How are they different from Koreans in Korea or in the United States? Contemporary Korean TV dramas and films have depicted Koreans as attractive and successful people appealing to Hallyu (Korean Wave) fans around the world. However, Zainichi Koreans, who are the largest ethnic minority in Japan, have been frequently portrayed as abusive husbands/fathers, pitiful wives/mothers, or juvenile delinquents in both Japanese and Korean cinema and literature. Through close readings of films, novels, and short essays, we will explore little-known yet significant representations of Zainichi Koreans by focusing on Japanese and Korean historical contexts. By doing so, we will discover new aspects of transnational exchange not only between Japanese and Koreans, but also between South and North Koreans in Japan. All class materials will be available in English translation or with English subtitles.

**Requirements/Evaluation**: attendance/participation; short written responses; midterm essay; group presentation; final essay

**Prerequisites**: none

**Enrollment Limit**: 16

**Enrollment Preferences**: Open to all students, but if over-enrolled, priority will be given to Asian Studies and Japanese majors

**Expected Class Size**: 16

**Grading**: yes pass/fail option, yes fifth course option

**Distributions**: (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 220(D1) JAPN 220(D1)

**Difference, Power, and Equity Notes**: This course looks at the dynamics of unequal power in the social marginality of Korean immigrants in Japan. Exploring historical contexts, students will analyze how the ethnic particularity of the Korean minority has engaged with and against Japanese society. Students will also examine how we might associate the minority culture and history with extensive global issues, including the relationships between environmental problems and minorities, wars and women, and imperialism and migration.

**Attributes**: GBST Borders, Exiles + Diaspora Studies Electives  GBST East Asian Studies Electives

Not offered current academic year

---

**JAPN 223 (S) Japanese Food Culture in a Global Context**  (DPE)

**Cross-listings**: COMP 223 JAPN 223

**Primary Cross-listing**

The bourgeoning popularity of Japanese food on a global scale has resulted in a surge of new research, literature, and films. Conversely, the effects of globalization have transformed the dining experience within Japan to be ever more multiethnic. This interdisciplinary course explores the complex relationship between food and culture in Japan, and the emergence of Japanese cuisine as a global phenomenon, referring to a variety of materials and practices. Topics to be addressed include modernization, nation-building, militarization, globalization, the environment, and popular culture.

**Requirements/Evaluation**: active class participation, three response papers, two small written report (including class presentations), and one research paper and presentation

**Prerequisites**: none

**Enrollment Limit**: 20
Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 223(D1) JAPN 223(D1)

Difference, Power, and Equity Notes: This course explores the complex relationship between food and culture in and out of Japan, in relation to a variety of topics such as modernization, nation-building, militarization, globalization, environmentally sustainable development, and popular culture. Students will have the opportunity to critically analyze how various social/cultural, historical, and political contexts shaped and unveiled (in)difference, (dis)power, and (in)equity in food production and consumption.

Not offered current academic year

JAPN 240 (S) Toward Healing Trauma in Japanese and Korean Cinema (DPE)

Cross-listings: JAPN 240 ASIA 240

Primary Cross-listing

This course examines Japanese and Korean cinema from the 1930s to the present, with a focus on narratives of trauma. We will analyze cinematic representations of social conflicts caused by continuous negotiations of tradition and progress, gender and identity, and everyday life and war wounds in the transition from imperial/colonial to post-imperial/post-colonial periods. Along with exploring historical contexts, we will compare the ways in which Japanese and Korean filmmakers have confronted social injustice by addressing the pain of trauma. In doing so, we will discover the meanings of cultural confrontation in the process of healing and reconciliation in our society. All readings and screenings will be available in English translation or with English subtitles.

Requirements/Evaluation: class attendance and participation, weekly GLOW posts, two short essays (4-5 pages each), and a final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Open to all students, but if over-enrolled, priority will be given to majors in the Department of Asian Languages, Literatures, and Cultures

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

JAPN 240(D1) ASIA 240(D1)

Difference, Power, and Equity Notes: This course traces the trajectories of Japanese and Korean films that deal with contentious issues which have left deep scars in society, including the legacies of Japanese colonialism and Cold War politics in East Asia. Students will have the opportunity to think critically about the implications of such cultural representations of social wounds and injustice on the way toward reconciliation.

Not offered current academic year

JAPN 301 (F) Upper-Intermediate Japanese

This course is a continuation of Japanese 201 and 202. Students will further develop the four skills of speaking, listening, reading, and writing, while consolidating the foundations built in Elementary and Intermediate Japanese. The same general methodology will be used. In this course, students begin to emphasize vocabulary building through the study of situationally oriented materials stressing communicative competence. The reading of expository prose in both semi-authentic and authentic materials of intermediate difficulty will also receive some extensive attention.

Class Format: three 75-minute classes

Requirements/Evaluation: daily performance, homework, quizzes, a midterm, and a final exam

Prerequisites: JAPN 202 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures
JAPN 302 (S) Upper-Intermediate Japanese

This course is a continuation of Japanese 301. Students will further develop the four skills of speaking, listening, reading, and writing, while consolidating the foundations built in Elementary and Intermediate Japanese. In this course, students work on the reading skills for comprehending primary source materials and expository prose of intermediate difficulty; the communication skills for conducting practical conversations and presentations; and the listening skills for interpreting various types of information.

Class Format: three 75-minute classes

Requirements/Evaluation: daily performance, homework, quizzes, a midterm, and a final exam

Prerequisites: JAPN 301 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

THE PROGRAM IN JEWISH STUDIES

Jewish Studies is an interdisciplinary field that encompasses the texts, history, languages, philosophy, and culture of Jews and Judaism as they have changed over three millennia and throughout the world. The program offers courses in multiple disciplines including but not limited to Religion, Classics, History, Philosophy, Anthropology, Sociology, and Comparative Literature. Across these disciplines, the program examines topics such as religious belief and practice, textual interpretation, the development of Zionism, life in the Diaspora, the historicization and memorialization of the Holocaust, and historical, political and philosophical questions surrounding Jewish identity. Investigating the foundations and development of these various Jewish topics, as well as their interaction with and influence on other traditions, provides an opportunity to explore the continuities and diversity of Jewish life and thought. Students will gain exposure to a common body of knowledge and scholarly approaches through which to engage in their own rich and varied intellectual explorations of Jewish and related topics.

CONCENTRATION IN JEWISH STUDIES

The concentration in Jewish Studies requires five courses with at least two different prefixes: one gateway course, two core courses, one elective, and one capstone course. Senior concentrators should consult with the chair about arrangements for a capstone course.

Gateway Courses (can also count as core courses):

REL 203 / JWST 101 SEM Judaism: Before The Law
Taught by: Jeffrey Israel
Catalog details

REL 222 / JWST 222(F) SEM The Jewish Art of Interpretation
Taught by: Jeffrey Israel, Edan Dekel
Catalog details

REL 222 / JWST 222(F) SEM The Jewish Art of Interpretation
Elective Courses

Students may meet the elective requirement with a course partially related to Jewish Studies or another core course. In an elective course partially related to Jewish Studies, a student will normally focus at least one of the major writing assignments on a topic relevant to Jewish Studies or approximately one-third of the course will be devoted to Jewish subjects. The list of relevant electives changes regularly, so the course catalog should be checked for details. Listed below are examples of courses partially related to Jewish Studies. Students may meet the elective requirement with a course not listed here, subject to the approval of the Chair of Jewish Studies.

**HIST 207 / GBST 102 / ARAB 207 / LEAD 207 / JWST 217 / REL 239(F) LEC The Modern Middle East**
Taught by: Magnus Bernhardsson

**HIST 239(F) SEM Germany in the Twentieth Century**
Taught by: Thomas Kohut

**PSCI 339 / JWST 339 TUT Politics in Dark Times: Hannah Arendt**
Taught by: Laura Ephraim

Taught by: TBA

**SILP 102(S) LEC Elementary Hebrew**
Taught by: TBA

Capstone Course

**HIST 433 / JWST 433 SEM Colonialism and the Jews**
Taught by: Maud Mandel

**HIST 490 / JWST 490 TUT Memory, History, and the Extermination of the Jews of Europe**
Taught by: Alexandra Garbarini

**REL 330 / PSCI 375 / JWST 492 SEM Modern Jewish Political Theory**
Taught by: Jeffrey Israel

THE DEGREE WITH HONORS IN JEWISH STUDIES

The degree with honors offers students the opportunity to undertake advanced research under the supervision of one or more of the faculty members in Jewish Studies. Students normally must have at least a 3.5 GPA in the concentration and secure a faculty sponsor to be eligible. In addition to completing the five courses required for the concentration, candidates must enroll in either JWST 493 and a Winter Study course or a Winter Study course and JWST 494 in their senior year, and prepare a substantial written thesis. Honors in Jewish Studies may be granted to concentrators after an approved candidate completes an honors thesis and is awarded an honors grade by her/his advisor and one other faculty reader. Students interested in becoming candidates for honors should consult with the program in the spring of the junior year.

**Croghan Professorship**

Each year, in addition to the regular course offerings listed above, Williams sponsors the Croghan Bicentennial Visiting Professor in Religion who offers one course in Judaism and/or Christianity

OVERSEAS STUDIES

Studying in Israel is highly recommended for students interested in Jewish Studies. Many students have spent a semester or year at Hebrew University, Tel Aviv University, or the University of Haifa. With the approval of the Jewish Studies program chair, students may count a study-abroad
program towards up to two core requirements.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Gateway course and Capstone course.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

FUNDING

The Bronfman Fund for Judaic Studies was established in 1980 by Edgar M. Bronfman ’50, Samuel Bronfman II ’75, and Matthew Bronfman ’80. The Bronfman Fund provides opportunities for the Williams community to learn about Jewish history and culture, both within the College’s formal curriculum and through the planning of major events on Jewish themes.

The Morris Wiener and Stephen R. Wiener ’56 Fund for Jewish Studies was established in 1997 through the estate of Stephen R. Wiener ’56. The Wiener gifts have provided an endowment to support a faculty position in modern Jewish thought, and are used to underwrite an annual lecture, forum or event relevant to contemporary Jewish life.

JWST 101  (F)  Judaism: Before The Law

Cross-listings: JWST 101 REL 203

Secondary Cross-listing

This course introduces the academic study of Judaism through a humanistic exploration of "the Law" as a concept in Jewish thought and practice. Coverage will include the Law of Moses in the Hebrew Bible, the rabbinic distinction between "Oral Law" and "Written Law," medieval philosophical justifications for the Law, modern interpretations of the Law as Moral Law, Hasidic challenges to the centrality of the Law, and twentieth-century Jewish fiction that is haunted by a felt absence of the Law. Topics may also include the nature of rabbinic authority, methods of Jewish legal interpretation and innovation, and Jewish law as it pertains specifically to women, gentiles, idolaters, food consumption, and the Land of Israel. Course materials will include classical sources such as the Talmud and Midrash, modern philosophical texts, Franz Kafka’s The Trial with his parable "Before The Law," ethnographic accounts of contemporary Jewish observance, and much else. All readings will be in translation.

Requirements/Evaluation: class participation, three short papers, and a final longer paper

Enrollment Limit: 30

Enrollment Preferences: Jewish Studies concentrators, Religion majors and students who are considering these options

Expected Class Size: 15
JWST 205  (S)  Ancient Wisdom Literature
Cross-listings:  COMP 217 JWST 205 REL 205 CLAS 205
Secondary Cross-listing
The Biblical books of Proverbs, Ecclesiastes, and Job are often grouped together under the Hebrew category of *hokhmah*, 'wisdom.' Although these books are very different in content, they can all be interpreted as meditations on ethical and practical philosophy. In this way, they represent the Hebrew Bible's canonical embrace of a widespread Near Eastern literary phenomenon. From the instructional literature of Egypt and Mesopotamia to Greek didactic poetry and fables, ancient Mediterranean cultures offer a wide range of texts that engage the issues of personal behavior, leadership, and justice. Starting with the central wisdom books of the Hebrew Bible and moving through relevant material from the Apocrypha, New Testament, and the Egyptian and Babylonian traditions, this course will examine the literature of wisdom throughout the ancient world with an eye toward understanding its various social, political, and philosophical contexts. We will then consider the Greek wisdom tradition in such texts as Hesiod's *Works and Days*, Aesop's fables, and fragments from the pre-Socratic philosophers. Finally, we will explore the influence of these ancient sources on later expressions of wisdom in medieval European literature, as well as more recent examples such as Benjamin Franklin's *Poor Richard's Almanack*.
All readings are in translation.

JWST 206  (S)  The Book of Job and Joban Literature
Cross-listings:  REL 206 COMP 206 JWST 206
Secondary Cross-listing
The Book of Job has often been described as the most philosophical book of the Hebrew Bible. The story of one man's struggle to understand the cause of his suffering and his relationship to God represents the finest flowering of the Near Eastern wisdom literature tradition. Through its exploration of fundamental issues concerning human suffering, fate and divinity, and the nature of philosophical self-examination, Job has served as a touchstone for the entire history of existential literature. At the same time, the sheer poetic force of the story has inspired some of the greatest artistic and literary meditations in the Western tradition. This course will engage in a close reading of the Book of Job in its full cultural, religious, and historical context with special attention to its literary, philosophical, and psychological dimensions. We will then proceed to investigate key modern works in several genres that involve Joban motifs, themes, and text both explicitly and implicitly. These texts will include Franz Kafka's *The Trial*, Archibald MacLeish's *J.B.*, Robert Frost's "Masque of Reason," Carl Jung's *Answer to Job*, and William Blake's *Illustrations to the Book of Job*. All readings are in translation.
Class Format:  For the spring of 2021, this course will be taught online. The seminar will meet at the regularly scheduled time twice a week.
Requirements/Evaluation:  Evaluation will be based on class participation, weekly short written assignments, and two longer papers.
Prerequisites:  none
Enrollment Limit:  12
Enrollment Preferences: If the course is overenrolled, preference will be given to students who have already taken a course in biblical literature.

JWST 207 (F) From Adam to Noah: Literary Imagination and the Primeval History in Genesis

Cross-listings: CLAS 207 REL 207 JWST 207 COMP 250

Secondary Cross-listing

How long did Adam and Eve live in the Garden of Eden? What was the mark of Cain? Why did Enoch not die? Who was Noah's wife? How did Giants survive the Flood? These are only a few of the captivating questions that ancient readers and interpreters of the Book of Genesis asked and attempted to answer. The first ten chapters of Genesis present a tantalizingly brief narrative account of the earliest history of humankind. The text moves swiftly from the Creation to the Flood and its immediate aftermath, but this masterful economy of style leaves many details unexplained. This course will explore the rich and varied literary traditions associated with the primeval history in the Genesis. Through a close reading of ancient noncanonical sources such as the Book of Enoch, Jubilees, and the Life of Adam and Eve, as well as Jewish traditions represented in Josephus, Philo, and Rabbinic literature and other accounts presented in early Christian and Gnostic texts, we will investigate the ways in which the elliptical style of Genesis generated a massive body of ancient folklore, creative exegesis, and explicit literary re-imagining of the early history of humankind. We will then turn to some continuations of these variant traditions in medieval literature, with particular attention to the material on the figures of Cain and Noah. All readings are in translation.

Class Format: For the fall of 2020, this course will be taught online. The seminar will meet at the regularly scheduled time twice a week.

Requirements/Evaluation: Class participation and several writing assignments.

Prerequisites: None.

JWST 209 (S) Jewish America

Cross-listings: JWST 209 REL 209

Secondary Cross-listing

Who and what counts as "Jewish" in America? Does stand-up comedy have a distinctly Jewish pedigree? What about neoconservatism? How is it possible to answer such questions without falling into what David Hollinger has called the "booster-bigot trap"? How is it possible, that is, to avoid answers that uncritically celebrate "Jewish contributions" or perversely suggest "Jewish influence"? This course will explore the various meanings of Jewishness in American culture as expressed by artists, rabbis, activists, intellectuals, boosters, bigots and others. We will seek to avoid the booster-bigot trap by focusing vigilantly on what is at stake wherever Jewishness is invoked, defined or ascribed. We will draw methodological support from scholars like Hollinger, Jonathan Freedman, Laura Levitt, Yuri Slezkine, Shaul Magid, Andrea Most and others. Particular attention will be given to the appearance of Jewish themes and involvement in popular culture and political action, as well as to Jewish American communal institutions, the everyday lives of Jewish Americans, and Jewish variations on American religion. Coursework will involve some historical, sociological and ethnographic readings, but will focus primarily on close analysis of films, literary fiction, stand-up comedy, political magazines, theological texts, and
television shows. We may, for instance, watch films like The Jazz Singer (1927 and 1980), Exodus and Annie Hall; read John Updike's Bech: A Book, Philip Roth's Operation Shylock or Cynthia Ozick's The Puttermesser Papers; listen to the comedy of Mort Sahl, Lenny Bruce and Sarah Silverman; read from Henry Ford's Dearborn Independent, the Menorah Journal or Commentary; study works by Rabbis Stephen Wise, Abraham Joshua Heschel and Meir Kahane; and watch episodes of Bridget Loves Bernie, Northern Exposure and Curb Your Enthusiasm. We will also study arguments about the role and meaning of Jewishness in American secularization, "therapeutic culture," the civil rights movement, the sexual revolution, and feminism.

Requirements/Evaluation: class participation, two short papers, a midterm take-home exam, and a final paper interpreting an example of Jewishness in America chosen by the student

Prerequisites: none

JWST 222 (F) The Jewish Art of Interpretation
Cross-listings: REL 222 JWST 222

Turn it and turn it, for everything is in it. This famous rabbinic dictum offers an enigmatic yet comprehensive account of the principles that have defined the Jewish practice of interpretation for over two millennia. The imperative to keep a text, word, image, or concept in constant motion, in order to generate as many meanings and cross-meanings as possible, challenges us to transform the act of interpretation itself into a virtuosic craft or art that can engage the human imagination as diversely and powerfully as the creation of the works being interpreted. At the same time, emphasis on the dynamism between text and interpreter should dispel the notion that only expansive works have expansive meanings. If interpretation itself is an art, then even the shortest text can contain "everything" within it when it participates in that art. This course will engage students in a radical experiment in the art of interpretation. Through a deep encounter with a selection of miniature texts, ranging from ancient rabbinic proverbs and medieval fables to the modern parables and fragments of Franz Kafka, as well as folklore and jokelore from every period in Jewish history up to the present, we will develop an interpretive practice that combines analytic, critical, and creative principles in both written and oral contexts. The goal throughout is to explore interactively how the making of meaning is an integral part of the human experience.

Requirements/Evaluation: class participation, regular short written and oral assignments, and a final project

JWST 230 (F) Modern European Jewish History, 1789-1948

Cross-listings: HIST 230 JWST 230

What does it mean to be a Jew? The vexed question of Jewish identity emerged anew at the end of the eighteenth century in Europe and has dominated Jewish history throughout the modern period. Although Jewish emancipation and citizenship followed different paths in different parts of Europe, in general Jews were confronted by unprecedented opportunities for integration into non-Jewish society and unprecedented challenges to Jewish communal life. Focusing primarily on France and Germany, and to a lesser extent on the Polish lands, this course will introduce students to the major social, cultural, religious, and political transformations that shaped the lives of European Jews from the outbreak of the French Revolution to the aftermath of World War II. We will explore such topics as emancipation, Jewish diversity, the reform of Judaism, competing political ideologies, Jewish-gentile relations, the rise of modern antisemitism, the role of Jewish women, interwar Jewish life and culture, Jewish responses to Nazism and the Holocaust, and the situation of Jews in the immediate postwar period. In addition to broad historical treatments, course materials will include memoirs, diaries, and fiction.

Class Format: discussion
Requirements/Evaluation: class participation, two papers, and a final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: Jewish studies concentrators, first-years, sophomores
Expected Class Size: 10-20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
This course will investigate intellectual traditions, political movements, and cultural objects that portray Jews, Jewishness, or Judaism as essentially pernicious. We will analyze materials from a variety of times and places, including the ancient world, the medieval period, and the present day. We will assess the impact of anti-Semitism on the lives of Jews and non-Jews. But we will also read theoretical approaches to the study of anti-Semitism that raise key questions for our investigation. Where does the term "anti-Semitism" come from and how exactly should it be defined? Is anti-Semitism a continuous phenomenon that connects every claim of Jewish perniciousness, wherever it is alleged, for over two thousand years of human history? Or should every context be treated as fundamentally distinct, so that the claim of Jewish perniciousness is presumed to have a distinct meaning, origin, and purpose in each case? What motivates charges of Jewish perniciousness? What are the particular threats typically alleged to be posed by Jews, Jewishness, and Judaism? How do constructions of Jewish perniciousness fit with constructions of race, gender, ethnicity, religion, class, sexuality, and nationality in different times and places?

Requirements/Evaluation: Three 5-7 page papers, class participation

Prerequisites: none

Enrollment Limit: 15

JWST 268 (S) Where are all the Jews? (DPE) (WS)

Cross-listings: ARAB 363 REL 268 COMP 363 JWST 268

Secondary Cross-listing

Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance Israelite Universelle's schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews' departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, ethnographies, historiographical works, and anthropological texts alongside documentaries films, the students will understand how literature and film have become a locus in which amnesia about Arab/Berber Jews is actively contested by recreating a bygone world. Resisting both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.
Requirements/Evaluation: 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: students interested in critical and comparative literary, religious or historical studies.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

JWST 299 (S) Shakespeare’s Torah

Cross-listings: JWST 299 REL 299

Secondary Cross-listing

For readers and speakers of the English language over the past five centuries, no literary body of work has been more central than the writings of William Shakespeare. His plays and poems have shaped the linguistic, philosophical, and artistic representation of human experience in ways that permeate every aspect of our lives. Shakespeare’s capacious work and its central preoccupation with the essential questions of humanity have also inspired an extensive tradition of commentary, interpretation, and performance. In this regard, his work occupies a position similar to the one held by the collection of writings known in the Jewish tradition as Torah. This term refers both to the set of books contained in the Hebrew Bible and to the rabbinic tradition that emerged from reading those books, which in turn has provided the core principles for over two millennia of Jewish interpretive practice. This course invites students to read Shakespeare as Torah by applying the essential features of that practice to his extraordinary work. Through a deep and sustained encounter with four plays in four different genres (Hamlet, Henry IV, Twelfth Night, and The Tempest), we will combine analytic, critical, and creative principles to make meaning in and out of these texts. The goal throughout is to explore how the Jewish art of interpretation can illuminate our experience of Shakespeare’s humanity.

Requirements/Evaluation: class participation, regular short written and oral assignments, and a final project

Secondary Cross-listing

Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur’an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar’s wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur’an, as well as the more expansive pleasures of linking post-scriptural expressions together.

JWST 339 (S) Politics in Dark Times: Hannah Arendt (WS)

Cross-listings: JWST 339 PSCI 339

Secondary Cross-listing

Hannah Arendt (1906-75) bore witness to some of the darkest moments in the history of politics. Born a Jew in Germany, Arendt lived through—and reflected deeply on--two world wars, the rise of totalitarianism, and the detonation of the first atomic bomb. She narrowly escaped imprisonment by the Gestapo and internment in a refugee camp in Vichy France before fleeing to New York. Yet, in the face of these horrors, Arendt never lost her faith in political action as a way to express and renew what she called "love of the world." She wrote luminously about the darkness that comes when terror extinguishes politics and the shining, almost miraculous events of freedom through which politics is sometimes renewed. In this tutorial, we will investigate what Arendt’s vision of politics stands to offer to those struggling to comprehend and transform the darkest aspects of the contemporary political world. Our time and Arendt’s are similarly darkenened by the shadows of racism, xenophobia, inequality, terror, the mass displacement of refugees, and the mass dissemination of lies. It may be tempting to conclude from these similarities—as some recent commentators have—that we are witnessing the return of "totalitarianism" as Arendt understood it. She would be the first to refuse to use inherited concepts as if they were keys to unlock the present. Her words and her example should impel us to reject shortcuts to authentic understanding, the "unending activity by which...we come to terms with and reconcile ourselves to reality." We will turn to Arendt as an interlocutor, not a guide, as we seek to reconcile ourselves to the contingency and specificity of past and present political realities. And we will search her works and our world for embers of hope that even seemingly inexorable political tragedies may yet be interrupted by assertions of freedom in political action.

JWST 430 (S) Postcolonial Reparations: Trauma, History, and Memory after European Imperialism (DPE) (WS)

Cross-listings: HIST 430 JWST 430

Secondary Cross-listing

How have European states responded to calls to acknowledge and atone for the crimes of Empire? This course places recent calls for reparations in a historical context. Weaving together a wide-range of historical and contemporary case studies -- including the Conference on Jewish Material Claims Against Germany (1951), Germany's official recognition of the Herero Genocide (2021), and ongoing debates in France about the restitution of colonial-era looted art, this course investigates how the language and mechanisms of restorative justice have historically developed, evaluates which past efforts of restorative justice were successful and why, and examines what role historical memory and historians-as-activists should play in campaigns that seek reparations for colonial injustices. In doing so, it evaluates how activists have deployed scholarly vocabularies on memory, justice, and violence in a number of national and international contexts.

Requirements/Evaluation: Class participation, weekly 500-word discussion posts and a 20-page research paper

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: History majors, seniors, and then juniors

Expected Class Size: 10-15

Grading: no pass/fail option, no fifth course option

Where are Jews in colonial history? Where is colonialism in Jewish history? In many ways, these questions haunt contemporary Jewish and often
world politics. Indeed, in the twenty-first century, the relationship between Jews and colonialism has been present in debates about Zionism, the history of capitalism, Jewish-Muslim relations, the wider Middle East, the future of European identity, the aims and roots of American empire, and the intersections of race and religion in colonial domination. And yet, typically, the subject of Jews and colonialism is more polemicized or avoided than probed. This course will seek to address this lacunae by introducing students to new historical scholarship that has begun tracing these questions. Students will consider the ways in which imperial legal forms, economic structures, and cultural and intellectual underpinnings shaped Jewish lives from the British antipodes to French North Africa, and throughout the Russian and Ottoman Empires, as well as in metropolitan Europe. Among other issues, we will ask: How did Jews become defined and define themselves in the colonial venture? In their various roles in colonial empires, are Jews best understood as subjects or agents of empire or are there more fruitful ways to conceptualize their engagement? What was the impact of anti-colonial struggles on modern Jewish politics and historical development? The course will approach this topic thematically rather than as a comprehensive survey. By introducing students to some of the key debates in this emerging field, we will consider what it takes to construct a successful historical argument and how to engage critically with works in an emerging field. A semester-long writing project will expand students' capacities to pose thoughtful historical questions; conduct research and gather compelling evidence; read deeply and critically; carefully assess evidence; and write inquiry-based essays.

Requirements/Evaluation: Class participation; brief weekly writing on the readings; a final research paper written in stages, including two "research updates"; an analysis of a source; a research proposal; a rough draft of one paper section; a rough draft of the paper; and a final 25-page paper.

Prerequisites: None; open to all students (however, a background in European history and/or Jewish Studies will be helpful).

Enrollment Limit: 15

Enrollment Preferences: Junior and Senior History Majors and Jewish Studies Concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 433(D2) JWST 433(D2)

Writing Skills Notes: Before each course, students will submit a 2-3 paragraph critique and a list of 3 questions for discussion. The final assignment will be a research paper (approximately 25 pages) or historiographical essay. Assignments en route to the final deadline, include: 1) two early "research updates" to document process and progress; 2) analysis of a source; 3) research proposal; 4) rough draft of a section; 5) draft of paper; 6) final paper. Only some work will graded, but all will receive feedback.

Difference, Power, and Equity Notes: This course considers the complex ways that religion, ethnicity and national identities shaped the colonial and post-colonial world. Never controlling or collectively representing a European power, Jews were also rarely situated at the bottom of any colonial hierarchy, sometimes occupying more than one social or political role in a single colonial territory. This course provides insight into the many ways hierarchies of power could operate in colonial and post-colonial settings.

JWST 490 (S) Memory, History, and the Extermination of the Jews of Europe (WS)

Cross-listings: JWST 490 HIST 490

Secondary Cross-listing

This course is about the postwar legacy of the Holocaust. Nazi Germany's extermination of European Jews has become a moral and cultural touchstone for people in Europe and in many other parts of the world. This tutorial explores a series of topics from the immediate aftermath of the Second World War to the present. Engaging with a wide-range of sources, we will wrestle with historical, legal, moral, political, and cultural issues and debates that have emerged out of the confrontation with the extermination of the Jews of Europe. They include: Why was the Holocaust "unprecedented" and "unimaginable"? Is it a Jewish story or universal story? Does the Holocaust raise different issues than other historical events for the historian? How should the Holocaust be represented in words and images, and what are the implications of different means of representing it? Has Germany faced up to its past? Were Germans also victims of World War II? Who were the "bystanders" as compared to the "perpetrators"? Were the postwar trials of perpetrators a travesty of justice? What "lessons" have we learned and should we learn from the Holocaust? By the end of the course, students will have grappled with the ongoing controversies that have arisen among scholars, artists, governments, and lay people about the meaning of the Holocaust for the postwar world. In a world in which extraordinary acts of violence continue to be perpetrated and many nations' pasts are marked by episodes of extreme criminality and/or trauma, exploring the manner by which one such episode has been remembered, avenged, and adjudicated has relevance for considering other societies' efforts to confront their own traumatic pasts.
Class Format: tutorial; class time consists of weekly one-hour sessions with the instructor and a fellow student.

Requirements/Evaluation: Every other week the student will write and present orally a 5- to 7-page paper on the assigned readings of that week; on alternate weeks, the student will write a 2-page critique of the fellow student's paper; a final written paper on the issues raised in the tutorial to cap off the semester's work.

Prerequisites: permission of instructor

Enrollment Limit: 10

Enrollment Preferences: History majors and Jewish Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

JWST 492 (S) Modern Jewish Political Theory

Cross-listings: JWST 492 PSCI 375 REL 330

Secondary Cross-listing

By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst burgeoning national self-consciousness throughout the continent, despite the liberatory promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re-constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of "Jews" and "Judaism" in these arguments. And we will ask persistently: what constitutes a "Jewish justification" for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.

Requirements/Evaluation: six short (1-2 pages) response papers; two 6- to 8-page papers, each analyzing a different view in depth; a final 18- to 20-page paper that incorporates the two previously submitted 6-8 page papers, but also compares the two views and adjudicates between them

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Religion majors, Jewish Studies concentrators, and Political Science students on the "Theory" track

Expected Class Size: 18

Justice and Law Studies is an interdepartmental program designed to give students a background in and framework for understanding the ways that philosophers, government officials, and others think about justice, and the related ways in which societies marshal power and implement law. This liberal arts program provides tools for thinking critically and arguing about what justice might entail, how it works in practice, and how rules, aspirations, laws, and norms evolve over time and in different parts of the world.

THE CONCENTRATION
The concentration in Justice and Law Studies consists of six courses: an interdisciplinary introductory course, four electives taken from at least two departments, and a senior seminar. Electives are listed below. Other courses, not listed below, may be approved by the Chair.

Students may declare a program concentration at any point during their academic career.

Senior Seminar
In 2018-19, the senior seminar will be *The Unwritten Constitution* taught by Professor Hirsch.

STUDY ABROAD

Students who study abroad should consult with the program chair to ensure that they can complete the requirements. Courses abroad may qualify as JLST electives if appropriate.

JLST 101 (F) Introduction to Justice and Law

This course will examine various aspects of America’s legal system, including its historical and constitutional underpinnings; the processes of resolving disputes, e.g., trials, plea-bargaining, and civil settlement; and the roles of diverse participants in the system, e.g., judges, jurors, litigants, lawyers, and legislators. The course will emphasize the deeply interdisciplinary nature of law, exploring the law’s intersections with politics, history, economics,
Our practice of holding people responsible seems justified as long as their choices are free. But when does a choice qualify as free? We're all deeply influenced by factors ranging from the general laws of nature to specific features of our genetic endowment and social environment (including religion, political ideology, and advertising). These affect not only our particular choices but also, more fundamentally, who we are and what we value. The key question, then, is whether, and how, free choice is possible amidst all of these influences. We'll attempt to answer this question by examining recent philosophical work on the nature of free will and responsibility.

Requirements/Evaluation: Five tutorial papers (5-6 pages in length) and five critiques (2-3 pages in length)
Prerequisites: one PHIL course (or permission of instructor; please email with any questions)
Enrollment Limit: 10
Enrollment Preferences: current and prospective Philosophy majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
PHIL 272(D2) JLST 272(D2)
Writing Skills Notes: Students will write a tutorial paper (5-6 pages in length) every other week, and a peer critique (2-3 pages in length) in alternating weeks, evenly spaced throughout the semester. The instructor will provide timely comments on writing skills, with suggestions for improvement.

JLST 401 (S) The Unwritten Constitution

"The eight thousand words of America's written constitution only begin to map out the basic ground rules that actually govern our land." So begins Akhil Amar's book America's Unwritten Constitution. Amar recasts the debate over whether America has a "living Constitution," a debate usually revolving around whether change in constitutional meaning requires resort to the formal amendment process or can be achieved through judicial interpretation. Amar supports the latter view, but proposes something far-reaching: history itself effectively amends the Constitution. Thus, for example, he argues that speeches by Martin Luther King and precedents set by George Washington, as well as the daily activities and assumptions of ordinary Americans, have become constitutional subtext requiring consideration when we interpret the Constitution. Is that notion convincing? Preposterous? A healthy way of understanding the inevitable intersection of law, history, and politics? A transparent excuse to read one's own views into the Constitution? Through a careful reading of Amar, and other important constitutional theorists, we will probe different ways of thinking about the supreme law of the land.

Requirements/Evaluation: three papers and class participation
Prerequisites: PSCI 216 or PSCI 217 (or consent of the instructor)
Enrollment Limit: 19
Enrollment Preferences: Justice and Law Studies concentrators
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)

Spring 2024
SEM Section: 01 MWF 11:10 am - 12:15 pm Alan Hirsch
The course offerings in Classics enable students to explore the ancient Greek, Roman, and Mediterranean worlds from various perspectives, including literature, history, art, archaeology, philosophy, and religion. Courses are of two types: language (Greek and Latin) and courses in which all the readings are in English translation (Classical Studies). The 100-level language courses are intensive introductions to Greek and Latin grammar and reading skills; the 200-level language courses combine grammar review with primary readings from Greek or Latin texts of key historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Classical Studies courses offer introductions to and more specialized study of the literature, visual and material culture, history, and other aspects of the Greek and Roman worlds.

MAJOR

Majors and prospective majors are encouraged to consult with the department’s faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course in ancient history is strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for advanced study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Route A emphasizes more coursework in Greek and Latin, while Route B emphasizes more Classical Studies courses.

**Route A:** (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language. (2) Three additional courses from the offerings in Greek, Latin, or Classical Studies or from approved courses in other departments and programs.

**Route B:** (1) One course each from any two of the following categories: literature (CLAS 101 or CLAS 102); visual and material culture (CLAS 209 or CLAS 210); history (CLAS 222 or CLAS 223). (2) Four courses in Greek or Latin with at least one at the 400-level, or the four-course sequence CLLA 101, 102, 201, and 302. (3) Three additional courses from the offerings in Classical Studies or from approved courses in other departments and programs.

**Classics Colloquium:** All Classics majors in residence are expected to participate fully in the life of the department through attendance at lectures and other departmental events.

THE DEGREE WITH HONORS IN CLASSICS

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

COURSE NUMBERING SYSTEM

**Language Courses:** The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of Greek and Latin literature. Students may enter the rotation at 100-level, 200-level, or 300-level, depending on previous experience.

**Classical Studies Courses:** The numbering of these courses does not reflect a strict sequence, and most of them do not assume prior experience in Classics or a cross-listed field. The following pairs of courses offer excellent introductions to key areas of study within Classics: CLAS
STUDY AWAY

We strongly encourage Classics majors to study away in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Mediterranean world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department’s faculty are always available to advise students, the chair has materials to share, and students can visit the department’s website for information and links to helpful sites. Majors who are considering studying away should especially consult with faculty members about the implications for language study.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g., syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No, but students should consult with the department about language sequences.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

CLLA 101  (F)  Introduction to Latin

This is a full-year course on the fundamentals of the Latin language. We focus throughout on learning grammar and vocabulary, and we regularly incorporate selections from literature, inscriptions, and other sources. Over time, we gradually increase the emphasis on reading selections from Latin poetry (e.g., Ovid’s Metamorphoses) and prose (e.g., Piny’s Letters).

Requirements/Evaluation: frequent quizzes, classroom exercises, two midterms, a final project

Prerequisites: none; this course is designed for the student with no previous preparation in Latin or with only a little Latin who wishes a refresher; students with some previous experience in Latin may want to enroll in CLLA 102 only (consult the department)

Enrollment Limit: 15

Enrollment Preferences: Classics majors or intended Classics majors, first years and sophomores

Expected Class Size: 8-10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: credit granted only if both semesters (CLLA 101 and 102) are taken
CLLA 102 (S) Introduction to Latin
This is a full-year course on the fundamentals of the Latin language. We focus throughout on learning grammar and vocabulary, and we regularly incorporate selections from literature, inscriptions, and other sources. Over time, we gradually increase the emphasis on reading selections from Latin poetry (e.g., Ovid's *Metamorphoses*) and prose (e.g., Piny's *Letters*).

Class Format: recitation/discussion
Requirements/Evaluation: frequent quizzes, tests, classroom exercises, and a final exam
Prerequisites: CLLA 101 or permission of department
Enrollment Limit: 18
Enrollment Preferences: Students who have completed CLLA 101
Expected Class Size: 10-12
Grading: yes pass/fail option, yes fifth course option
Unit Notes: credit granted only if both semesters (CLLA 101 and 102) are taken
Distributions: (D1)

CLLA 201 (F) Intermediate Latin: The Late Republic
This course aims to strengthen skills gained in previous study. In order to develop greater fluency and familiarity with classical Latin, we will read, translate, and analyze Cicero's *Pro Caelio* and selected short poems of Catullus. Both authors are brilliant stylists, though each writes in a very different mode. Taken together, these texts offer an excellent introduction to the expressive capacity of Latin in prose and verse. They also open up intriguing overlapping perspectives on the social, sexual, and political mores of late Republican Rome. We will consider the cultural context and implications of these texts as time permits.

Requirements/Evaluation: Engaged participation in class, occasional quizzes and short written assignments, a midterm and final exam
Prerequisites: CLLA 101-102 or 3-4 years of Latin in secondary school; consult the department
Enrollment Limit: 12
Enrollment Preferences: Classics majors and prospective majors
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

CLLA 302 (S) Vergil's Aeneid
This course is a comprehensive introduction to Vergil's *Aeneid*. Students will develop their ability to read and translate the Latin text of the poem, while at the same time exploring the major interpretive issues surrounding the definitive Roman epic. Through a combination of close reading and large-scale analysis, we will investigate the poem's literary, social, and political dimensions with special attention to Vergil's consummate poetic craftsmanship.

Requirements/Evaluation: Class participation, a midterm exam, a final paper, and a final exam.
Prerequisites: CLLA 201 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: If the course is overenrolled, preference will be given to Classics majors and prospective majors.
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

Spring 2024
SEM Section: 01  TF 2:35 pm - 3:50 pm   Edan Dekel

CLLA 403 (S) The Invention of Love: Catullus and the Roman Elegists
This course will explore the development of Latin love poetry in the first century BCE. Beginning with Catullus, we will examine the influence of Greek lyric poetry on the evolution of the genre as well as Roman attitudes toward love exhibited in other literature of the Late Republic. We will then turn to the full development of the elegiac form in the love poems of Propertius, Tibullus, and Sulpicia. Finally, we will explore the transformation of the genre in Ovid's Amores. The goal throughout is to investigate the conventions, innovations, and problems of expressing personal desire and longing amid the social and political upheaval of the transition from Republic to Principate.
Requirements/Evaluation: evaluation will be based on class participation, a midterm exam, a final paper, and a final exam
Prerequisites: CLLA 302 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: Classics majors
Expected Class Size: 10-12
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
Not offered current academic year

CLLA 405 (S) Livy and Tacitus: Myth, History and Morality in Ancient Rome
We will begin the semester in mythical Rome by reading selections from Book 1 of Livy's history in which Roman values, practices and institutions are given their origin stories, and the mythical figures of Rome's past are established as moral exempla for Rome's present. We will examine how Livy deploys the storyteller's art to excite his readers' pathos, indignation and sympathy; we will examine as well how he constructs Rome's past through the filter of his own Augustan present. Writing more than a century after Livy, Tacitus offers a different and jaded view of Augustus and his legacy, one conditioned by his own experiences living through the terrors of the reign of Domitian. His compressed and fastidious prose is the vehicle for complex and gripping accounts of imperial scandals and tragedies as well as of individual acts of heroism and nobility. We will read primarily selections from Tacitus' Annals as well as selections from either his Germania or Agricola.
Class Format: discussion
Requirements/Evaluation: Evaluation will be based on class preparation and participation, an 8- to 10-page paper, a midterm, and a final exam
Prerequisites: CLLA 302 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: Classics majors
Expected Class Size: 6-8
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
Not offered current academic year

CLLA 406 (F) Horace's Odes
This course will explore the poetic delights of Horace's extraordinary experiment in crafting Latin personal verse using Greek lyric forms. We will immerse ourselves in the poems' intricate construction and examine how they engage such themes as love and friendship, landscape and memory, youth and old age, politics, and morality. At the same time, we will consider the variety of voices and perspectives within the poems and their complex

Enrollment Limit: 12
Enrollment Preferences: If the course is overenrolled, preference will be given to Classics majors and prospective majors.
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
relationship both to Greek and Latin poetic traditions and to Horace's own contemporary world. The goal throughout is to investigate the literary, social, political, and philosophical dimensions of the odes, as well as their consummate poetic artistry.

Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam

Prerequisites: CLLA 302 or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Classics majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2023
SEM Section: 01 TF 2:35 pm - 3:50 pm Edan Dekel

CLLA 407 (S) Caesar and Cicero

The one a brilliant strategist, the other preeminent in the courts, Caesar and Cicero were both master politicians whose ambitions for their country and themselves brought them into bitter conflict. Their combined oeuvres provide compelling, detailed accounts of the events and personalities that ended the Roman republic and ushered in an era of prolonged civil war. Moreover, despite striking stylistic differences, their works jointly are regarded as the acme of classical Latin prose. In this course we will read extensive selections from Caesar's commentaries and Cicero's speeches and correspondence, aiming throughout at better understanding their rhetorical brilliance and pragmatic persuasive goals.

Class Format: discussion

Requirements/Evaluation: class participation, several short written assignments (such as article reviews), a midterm exam and essay of moderate length, plus a final exam and longer paper

Prerequisites: CLLA 302 or permission of instructor

Enrollment Limit: 12

Expected Class Size: 6-9

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLLA 408 (F) Roman Comedy

The comic plays that still survive all had their first productions within roughly forty years between 200 and 160 BCE, as Rome rapidly expanded its military, economic, and political reach beyond the Apennine peninsula. They present critically important evidence for how Roman literature and cultural identity developed in the second century, and they document formulas for slapstick action and low-brow jokes that remain in use even today. Staged in Greek costume and featuring ostensibly Greek characters, the comedies revel in mocking stereotypical Roman values but ultimately reassert them. Sometimes what the Romans found funny is all too familiar; sometimes it's shocking. Our main focus will be on the Mostellaria of Plautus, often translated as "The Haunted House." Characteristic of its genre, the Mostellaria focuses on generational conflict within a household, especially between father and son. To enrich our conversation, we will read several other comedies in translation as well as selected scholarly investigations of this play, its genre, and the historical context.

Class Format: Discussion/recitation. For the fall of 2020, this course will be taught online. The seminar will meet at the regularly scheduled time twice per week.

Requirements/Evaluation: Evaluation will be based on class participation, several written assignments of varying length, and possibly short quizzes as well as a midterm exam and a final exam and/or essay.

Prerequisites: CLLA 302 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: If the course is oversubscribed, preference will be given to majors and potential majors in Classics and Comparative Literature

Expected Class Size: 8-10
CLLA 409  (F)  Seneca and the Self

This course considers ethical and literary dimensions of self-fashioning, self-examination, and the conception of selfhood in the Stoic philosophy of the younger Seneca through close reading of extensive selections from his philosophical works and tragedies. The focus of this course lies squarely in the first century CE and on the analysis of Seneca's own texts. We begin, however, with an introduction to the ethics of Roman Stoicism through the personae theory of Panaetius as transmitted by Cicero's De Officiis. Moreover, we will read and discuss reflections on selfhood from some of Seneca's most famous philosophical and literary heirs, including Montaigne, Emerson, and Foucault, both to enrich our understanding of his work and to gain an appreciation of his considerable influence on later writing about the self.

Requirements/Evaluation: class participation, several short written and oral assignments, midterm and final exams, and a final paper

Prerequisites:  CLLA 302 or permission of instructor

Enrollment Limit:  12

Expected Class Size:  5-10

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D1)

Not offered current academic year

CLLA 414  (F)  Vergil's Eclogues and Georgics

This course will explore the two major works of Vergil that precede the Aeneid: the Eclogues, a series of ten pastoral poems that range widely across personal, political, and mythological themes; and the Georgics, a longer didactic poem in four books that uses an agricultural framework to examine issues of life, death, power, suffering, and love. The goal throughout is to investigate the literary, political, and social dimensions of the poems with special attention to their relationship to earlier models, as well as their exquisite poetic craftsmanship

Requirements/Evaluation:  class participation, a midterm exam, a final paper, and a final exam

Prerequisites:  CLLA 302 or permission of instructor

Enrollment Limit:  15

Enrollment Preferences:  Classics majors

Expected Class Size:  10

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D1)

Not offered current academic year

CLLA 422  (S)  Crete in the Ancient Roman Imagination

Appeals to origins "long ago" and "far away" occur as a basis for positive cultural claims in ancient literature, but also function to banish or contain taboo desires and practices by placing them safely beyond the limits of civilized time and place. For the Romans, the island of Crete fulfilled both these roles. In this course, we will explore the representation of Crete and Cretans in several authors and genres, with special attention to Catullus 64 and Ovid's Metamorphoses. We will consider how representations of Crete helped our authors navigate perennial tensions at Rome between philhellenism and xenophobia and attend to the complex play of poetic intertextuality among Roman texts as well as their intimate engagement with Greek predecessors. Moreover, to complement our literary investigation, students will gain familiarity with the history of Roman rule on the island from its establishment as a province in 67 BCE through late antiquity, and will consider vestiges of the Roman imperial presence that endured much longer. Students will research Roman activity on Crete with an emphasis on material culture as well as written sources. All students enrolled in this course will have the option of participating in a short-term travel course to Crete in May, conducted in collaboration with CLGR 422.

Requirements/Evaluation:  class participation, translation quizzes and exams, occasional short writing assignments, seminar paper and presentation

Prerequisites:  CLLA 302

Enrollment Limit:  10

Enrollment Preferences:  Classics majors and intending majors
Expected Class Size: 6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2024

LATINA/O STUDIES (Div II)
Chair: Professor Carmen Whalen

- Efrain Agosto, Bennett Boskey Distinguished Visiting Professor in Latina/o Studies
- Maria Elena Cepeda, Professor of Latina/o Studies; affiliated with: Latina/o Studies, Women, Gender & Sexuality Studies, American Studies
- Jacqueline Hidalgo, Professor of Latina/o/x Studies and Religion; affiliated with: Religion, Latina/o Studies; on leave 2023-2024
- Roger A. Kittleson, Chair and John J. Gibson Professor of History; affiliated with: History, Latina/o Studies
- Carlos Macías Prieto, Assistant Professor of Spanish and Faculty Affiliate in Latina/o Studies; affiliated with: Romance Languages, Latina/o Studies; on leave 2023-2024
- Nelly A. Rosario, Associate Professor of Latina/o Studies; on leave 2023-2024
- Edgar Sandoval, Assistant Professor of Latina/o Studies
- Carmen T. Whalen, Chair of Latina/o Studies Program, Carl W. Vogt '58 Professor of History; affiliated with: Latina/o Studies, History

Latina and Latino Studies is an interdisciplinary, comparative, and relational field of study that examines the histories, representations, and experiences of Latinas, Latinos, and Latinxs in the United States. Latinas, Latinos, and Latinxs include peoples who come from or whose ancestors come from Latin America and the Spanish-speaking Caribbean. The program seeks to cover the widest range of experiences, encompassing Mexican-Americans, Puerto Ricans, Cubans, and Dominicans, as well as migrations from a wide variety of Central and South American countries.

Courses, most of which use a comparative and relational approach, seek to provide students with the tools to continue their work in areas of their particular interest. Focusing on a diverse group with a long history in the United States, which is also one of the fastest-growing populations in the contemporary era, provides an opportunity to study complex dynamics globally and within the context of the United States. The program examines topics such as the political and economic causes of migration, the impact of globalization, economic incorporation, racialization, the formation and reformulations of identities and communities, religious and spiritual practices, the uses of urban spaces, inter-ethnic relations, artistic expression, aesthetics, and visual and popular culture.

THE CONCENTRATION

The concentration in Latina/o Studies requires five courses. Students are required to take the introductory course (LATS 105), one 400-level Latina/o Studies seminar, and three electives. Two electives must be core electives, and one elective can be a related course in Comparative Race and Ethnic Studies or in Countries of Origin and Transnationalism. The three electives must include two different areas of study, and at least one elective must be at the 300 or 400 level. Additional courses may be approved by the Chair. Students, especially those considering graduate work or professional careers in the field, are encouraged to enroll in Spanish language courses at Williams.

Required course:

One of the following 400-level seminars:

- **HIST 470 / LATS 470 / WGSS 470(S) SEM Latinx Migrations: Stories and Histories**
  - Taught by: Carmen Whalen
  - Catalog details

- **LATS 409 / WGSS 409 / AMST 411 SEM Transnationalism and Difference: Comparative Perspectives**
  - Taught by: Maria Elena Cepeda
  - Catalog details

Two of the following core electives:

- **HIST 385 / LATS 385 SEM Latinx Activism: From the Local to the Transnational**
  - Taught by: Carmen Whalen
  - Catalog details

- **LATS 105(F) LEC Latina/o Identities: Constructions, Contestations, and Expressions**
  - Taught by: Maria Elena Cepeda, Edgar Sandoval
  - Catalog details
LATS 115 / REL 115 / WGSS 115(F) TUT Latina Feminist Spiritualities

Taught by: TBA
Catalog details

LATS 219 / REL 215(F) SEM Religion in Latinx Literature, Art & Film

Taught by: Efrain Agosto
Catalog details

LATS 222 / ENGL 252 LEC Ficciones: A Course on Fiction

Taught by: Nelly Rosario
Catalog details

LATS 224 / AMST 224 / REL 224(S) LEC U.S. Latinx Religions

Taught by: Efrain Agosto
Catalog details

LATS 230 / AMST 247 / ENVI 257(S) LEC Cities, Suburbs, and Rural Places

Taught by: Edgar Sandoval
Catalog details

LATS 232 / ENGL 232 SEM We the People in the Stacks: Democracy and Literatures of Archives

Taught by: Nelly Rosario
Catalog details

LATS 240 / COMP 210 / AMST 240 SEM Latina/o/x Language Politics: Hybrid Voices

Taught by: Maria Elena Cepeda
Catalog details

LATS 253 / REL 292(F) LEC Religion and Politics in the Caribbean and the Diaspora

Taught by: Efrain Agosto
Catalog details

LATS 254 / AAS 253 / AMST 253(F) SEM Embodied Knowledges: Latinx, Asian American, and Black American Writing on Invisible Disability

Taught by: Maria Elena Cepeda
Catalog details

LATS 278(S) SEM Latinxs and Their Scriptures: Christian, Muslim, & Jewish

Taught by: Efrain Agosto
Catalog details

LATS 286 / HIST 286(F) SEM Conquests and (Im)migrations: Latina/o History, 1848 to the Present

Taught by: Carmen Whalen
Catalog details

LATS 313 / AAS 313 / AMST 313 / WGSS 313 / AFR 326(S) SEM Gender, Race, and the Power of Personal Aesthetics

Taught by: Maria Elena Cepeda
Catalog details

LATS 315(S) SEM Research Design in Geography: Social Science Perspectives

Taught by: TBA

One additional related course from either of the following subcategories OR from the core electives above:

**Countries of Origin and Transnationalism**

**AFR 234 / AMST 234 / ENVI 247 / HIST 274** STU Race, Land and Settler (Racial) Capitalism: Ongoing Topics in (Dis)(Re)possession

- Taught by: Allison Guess

**AFR 235 / AMST 235 / GBST 235 / ENVI 253 / HIST 275** SEM Race, Land, Dis/Re-possession: Critical Topics in Environmental Injustice and Subaltern Geographies

- Taught by: Allison Guess

**ARTH 210(F) LEC** Intro to Latin American and Latinx Art: Contradictions & Continuities, Postcolonial to the Present

- Taught by: Mari Rodriguez Binnie

**ENGL 104(F) SEM** Borders, Migration, and the Literatures of Displacement

- Taught by: TBA

**ENGL 155 / COMP 155** SEM Contemporary Mexican Cinema and the World

- Taught by: Ricardo A Wilson

**ENGL 279(S) SEM** Introduction to Latinx Literature: From 'I Am Joaquín' to Borderless-Future Dreams

- Taught by: TBA

**HLSP 209 / LATS 209(F) SEM** Spanish for Heritage Speakers

- Taught by: Sahai Couso Diaz

**LATS 254 / AAS 253 / AMST 253(F) SEM** Embodied Knowledges: Latinx, Asian American, and Black American Writing on Invisible Disability

- Taught by: Carlos Macías Prieto

**WGSS 337 / ANTH 337** SEM Race, Sex & Gender in Brazil

- Taught by: Gregory Mitchell

**Comparative Race and Ethnic Studies**

Students can check with the program chair to see if other courses not listed here might count as electives.

**AFR 200(F, S) LEC** Introduction to Africana Studies

- Taught by: VaNatta Ford

**LATS 254 / AAS 253 / AMST 253(F) SEM** Embodied Knowledges: Latinx, Asian American, and Black American Writing on Invisible Disability

- Taught by: Carlos Macías Prieto
HONORS

Honors in Latina/o Studies may be granted to concentrators after an approved candidate completes an honors project, delivers a public presentation of the work, and is awarded an honors grade by the Latinx Studies faculty. In consultation with the advisor and the chair, faculty readers may be from outside the Latina/o Studies Program.

The final project, completed over one semester and winter study, may be a research thesis of 30–50 pages, or another form of presentation, or combine a shorter research thesis with another medium.

Eligibility:

- Declared concentrator
- Grade point average, generally, of 3.3 in LATS courses
- Approval of project proposal in spring of Junior year
- The honors course and winter study are in addition to the five courses required for the concentration.

Application:

- Juniors must submit a thesis proposal to Professor Carmen Whalen by 4:00 pm EDT on Monday, May 8, 2023.
- Students should meet with their potential advisor no later than a week prior to the proposal due date, to see if the potential advisor approves their proposal and is able to serve as their thesis advisor.
- The proposal should include the project’s aims and methodology, demonstrating what you already know, what you hope to learn, and why it is important. It should also identify your proposed LATS faculty advisor for the project, and include evidence of competence in the relevant media for non-thesis forms.
- The proposal should be no longer than 5 pages plus a bibliography.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description. Although syllabus and description, including readings and assignments, would be preferable.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. 1 of 5 for the concentration and can only count as an elective.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Requirements that cannot be fulfilled: Intro Course, Senior Seminar, 2 Core Electives.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.
LATS 105  (F)  Latina/o Identities: Constructions, Contestations, and Expressions

What, or who, is a Hispanic or Latina/o/x? How have these shifting terms tried to encompass the identities and experiences of such large and diverse groups of peoples? In this course, we focus on the complex nature of "identity," as we delve into the interdisciplinary field that has emerged to give voice to groups that were too often excluded from or misrepresented in academic disciplines and discourses. Viewing identities as historically and socially constructed, we assess how racial, ethnic, class, and gendered identities take shape within specific contexts in the Hispanic Caribbean and Latin America, as well as in the United States. We examine the impact of (im)migration and the rearticulation of identities in the United States, as we consider that each group has a unique history, settlement pattern, community formation, and transnational activities. Identity is also a contested terrain. As immigrants and migrants arrive, the United States' policymakers, the media, and others seek to define the "newcomers" along with long-term Latina/o citizens. At the same time, Latinas/os rearticulate, live, assert, and express their own sense of identity. We examine these diverse expressions as they relate to questions of class, race, ethnicity, gender, sexual orientation, and national origins.

Class Format: This is a discussion based course.

Requirements/Evaluation: participation and several short papers (1-5 pages) throughout the semester

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Latina/o Studies concentrators or those intending to become concentrators.

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Unit Notes: This is a required course for concentration in Latina/o Studies

Distributions: (D2)

LATS 115  (F)  Latina Feminist Spiritualities  (DPE) (WS)

Cross-listings: WGSS 115 REL 115 LATS 115

Primary Cross-listing

Self-proclaimed feminist activists, who hail from a variety of ethnic Latina/o/x/e (Latine) backgrounds, have often appealed to "ancestral" and "spiritual traditions" as integral to their activism and commitments. Some Latine feminists turned to "spiritual" traditions including brujería/witchcraft; curanderismo and Indigenous healing traditions; Santería/Lukumi and other AfroDiasporic traditions; astrology; home altars; various "mystical" traditions such as Kabbalah and Sufism, as well as Christian mystics like Teresa of Avila or Sor Juana Inés de la Cruz. Others have turned to the appropriation of "Eastern" traditions such as yoga, Tibetan Buddhism, and Zen Buddhism. This course engages students in an intensive introduction to some of the varieties of Latine feminist thought and contexts, including how activists, writers, and artists think about women, gender, sexuality, race, class, colonialism, the earth, healing, and a better world. How do these feminists of different Latine backgrounds and contexts imagine a better world? How and why do they appeal to spiritual traditions as a source of wisdom, healing, and lived practice for a better world? In this course, we seek to understand both particular Latine feminist spiritual practices on their own terms, as well as why such writers and activists appeal to "the spiritual" in Latine contexts. We will also consider how they frame notions of "the spiritual" in relationship to notions of "the religious" and "the secular."

Requirements/Evaluation: Grading is based on 5-6 page papers written on alternating weeks and brief 1-2 page response papers shared on alternating weeks as well as participation and two paper revisions.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Latina/o Studies concentrators, religion majors, first-year students interested in Latina/o Studies and/or religion

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 115(D2) REL 115(D2) LATS 115(D2)

Writing Skills Notes: Grading is based on alternating weeks writing a lead paper and other weeks writing a brief response paper. This course will require students to write regularly and revise two of their lead papers for grades.

Difference, Power, and Equity Notes: This course examines how Latine feminists have responded to a variety of differential power inequities, especially in terms of gender, sexuality, race, ethnicity, language, and class. It also considers the ways they have imagined better and more equitable worlds, and with what consequences they have done so.

Attributes: LATS Core Electives

LATS 219 (F) Religion in Latinx Literature, Art & Film
Cross-listings: REL 215 LATS 219

Primary Cross-listing
LATS 219--Religion in Latinx Literature, Art & Film This course will examine how a selective range of US Latinx writers, artists, and filmmakers--particularly in fiction, memoir, visual arts and films by and about Latinidad--depict, describe, and discuss religious themes, broadly considered. Latinx-authored novels and memoirs, artwork by Latina/o/x visual artists, and films depicting Latinx life through the lens of Latinx film-makers will be read, viewed, and studied to facilitate discussion about what it means to be Latina/o/x and religious. How do fictional, autobiographical and artistic depictions of Latinx people, communities, and their religiosity/spiritualities promote or deter understanding of Latinidad in the U.S.A.?

Requirements/Evaluation: In this course, students will read and write short essays about novels and/or memoirs (4-5 pages), critically analyze film and artwork in short papers (3-4 pages), and write a research paper (8-10 pages) that analyzes the nexus of Latinx religion and art, whether fiction, film, memoir, or the visual arts. Attendance, participation, Glow discussion forums, and written assignments will all constitute assessment tools for this course.
Prerequisites: No prerequisites.
Enrollment Limit: 20
Enrollment Preferences: Students with at least one prior LATS or Religion course will be given preference if an enrollment overload. Also sophomores, juniors, and seniors will be given preference over first year students.

Expected Class Size: 15-20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
LATS 222(D2) ENGL 252(D2)

Difference, Power, and Equity Notes: Student work will encourage personal and cultural expression, with the opportunity to analyze the shaping of social differences, dynamics of unequal power, and processes of change.

Attributes: LATS Core Electives

Not offered current academic year

LATS 224 (S) U.S. Latinx Religions

Cross-listings: REL 224 LATS 224 AMST 224

Primary Cross-listing

In this course, we will engage aspects of Latinx religious experiences, practices, and expressions in the United States of America. Given the plurality of Latinx communities and religious lives in the U.S.A., we can only consider select contexts that help us understand the challenges of studying and defining the "religious" and "hybridity" in Latinx contexts. We will survey certain selected religious traditions and practices—such as popular Catholic devotions to Guadalupe, crypto-Judaism, curanderismo, Latinx Pentecostalism, Latinx Muslims, and Santeria, as well as Latinx approaches to traditional US religious expressions of Roman Catholicism and Protestantism. We will do so by focusing on particular moments of religious expression as elucidated in specific historiographies, ethnographies, art, literature, and film.

Class Format: discussion

Requirements/Evaluation: class participation, discussion forum posts, a 3-4 short essay on the nature of Latinx spirituality; a 5-page essay on a religious tradition previously unfamiliar to the student, and an 8-10-page final research paper doing comparative religious study.
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: LATS concentrators and AMST and REL majors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)

LATS 230 (S) Cities, Suburbs, and Rural Places (DPE)
Cross-listings: ENVI 257 AMST 247 LATS 230
Primary Cross-listing

Long associated with cities in the scholarly and popular imagination, immigrants have increasingly settled in U.S. suburbs. Through the lens of new destinations for im/migrants, this course introduces spatial methods, perspectives, and concepts to understand cities, suburbs, and rural places and the relationships between these various spaces. We ask how geographically specific forces and actors shape these trends, as well as the spatially uneven outcomes of complex processes like globalization. This interdisciplinary course highlights racial, legal, economic, political, environmental, social, and cultural dimensions of how transnational migrants become part of and create homes in new places. Through a range of textual materials (academic, technical, popular, visual), we explore why people migrate, the origin of the "illegal alien" figure, economic restructuring and local immigration policies, environmental justice, place-making and community development. Rooted in critical race geographies, case studies are often comparative across different racial and ethnic groups in the U.S. West, South, Midwest, and Northeast. We analyze how documentation status and perceptions of illegality affect the lived experiences of Latines. This course will be mostly discussion-based, with grading based on participation, short writing exercises, three assignments, a midterm examination, and a final exam.

Class Format: This is also a discussion course. While I will spend some time at the beginning of the class lecturing, most of the time will be spent in class discussions.

Requirements/Evaluation: Class participation, weekly in-class writing, three 3-6 page essays, a midterm, and a final examination. All writing materials and exams are based on coursework.

Prerequisites: None
Enrollment Limit: 25
Enrollment Preferences: LATS concentrators or those intending to become LATS concentrators
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 257(D2) AMST 247(D2) LATS 230(D2)
Difference, Power, and Equity Notes: Students examine how race, gender, sexuality, class, and documentation status also impact how immigrants 'transition' to new migration destinations. We consider how the exercise of unequal power affects migration, settlement, and place-making. Students analyze representations and demographic data to determine how people are portrayed and what their material conditions are.

LATS 232 (S) We the People in the Stacks: Democracy and Literatures of Archives (DPE)

Cross-listings: LATS 232 ENGL 232

Primary Cross-listing

"Archives have never been neutral they are the creation of human beings, who have politics in their nature. Centering the goals of liberation is at the heart of the issue" (Jarrett Drake, former digital archivist at Mudd Manuscript Library, Princeton University). In this generative writing and critical-practice course, students examine the concept of archives through the lens of democratic ideals. A primary focus is on how Latinidades and works of Global South literatures engage archives--their creation and deletions, their contents and omissions, their revelations and concealments. Drawing from the values explored in class, students have opportunities to contribute to existing archival collections and/or to curate their own.

Requirements/Evaluation: attendance and class participation, short writing exercises, midterm project, final creative project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: LATS concentrators

Expected Class Size: 12-15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

LATS 232(D2) ENGL 232(D2)

Difference, Power, and Equity Notes: This course examines the relationship between archives and power--creation and deletion, contents and omissions, revelations and concealments--taking into account the diverse affective roles and responsibilities of the archivist, records creator, records subject, and to community engagement.

Attributes: LATS Core Electives

Not offered current academic year

LATS 240 (S) Latina/o/x Language Politics: Hybrid Voices

Cross-listings: COMP 210 LATS 240 AMST 240

Primary Cross-listing

In this interdisciplinary course we will focus on issues of language and identity in the contemporary cultural production and lived experience of various Latina/o/x communities. As such, how are cultural values and material conditions expressed through Latina/o/x language and literature? How does Latina/o/x identity challenge traditional notions of the relationship between language, culture, and nation? In what ways might Latina/o/x literary and linguistic practices serve as tools for social change? Departing from an overview of common linguistic ideologies, we will examine code-switching or Spanglish, bilingual education, linguistic public policy, the English Only movement, and Latina/o/x linguistic attitudes and creative responses. In addition to a consideration of language and identity grounded in sociolinguistics, anthropopolitical linguistics, Latinx studies, and cultural studies, we will survey a variety of literary genres including memoir, novel, and poetry. Both directly and/or indirectly, these texts address Latina/o/x language politics, as well as the broader themes of power, community, ethno-racial identity, gender, sexuality, class, and hybridity.

Requirements/Evaluation: participation, two essays, final written reflection

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, Comparative Literature majors by seniority

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

LATS 253 (F) Religion and Politics in the Caribbean and the Diaspora

Cross-listings: REL 292 LATS 253

Primary Cross-listing

This course analyzes the role of religion in Caribbean history and politics, with a focus on Puerto Rico and Cuba. These Caribbean Islands have lived out contested colonized histories and experiences, as well as diasporic realities in several key US communities, such as New York City and Miami. The US government and military have played a significant role in both since the turn of the last century, forcibly shaping their economies and politics. Religion, particularly the Protestant missionary enterprise since the US invasions in 1898, has also shaped histories and politics on the islands and throughout their diasporas. We will explicate the role and impact of Protestant religion in these historically indigenous, African descendent, and Roman Catholic religious spaces, as well as how these religious engagements and theologies impacted migration and the creation of diasporic communities in the US. Both the role of religion in the imperialist endeavor and the solidarity movements that responded will occupy our time in this course, with special attention to key figures in both sides of such efforts. With some enhanced understanding of the intertwining of religion and politics in Puerto Rico, Cuba and their diasporic communities, participants in this class will also consider implications for other Caribbean nations, such as the Dominican Republic, as well as Latin American countries that have experienced US interventions and the creation of diasporic communities.

Class Format: This course will follow a lecture-discussion format, in which students are expected to come to class prepared to address the assigned readings, to have completed short assignments in preparation for discussions, to make presentations to the class, and/or to lead discussions.

Requirements/Evaluation: Evaluation in this course will be based on class participation, online discussion forum posts based on readings, two short 5-page essays on an aspect of Puerto Rican or Cuban political/religious reality discussed in class, and a final 8-10 page research essay on a theme in the course agreed upon by student and professor.

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: LATS concentrators and Religion majors, and those with expressed interest in these fields

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

LATS 254 (F) Embodied Knowledges: Latinx, Asian American, and Black American Writing on Invisible Disability (DPE)

Cross-listings: AAS 253 LATS 254 AMST 253

Primary Cross-listing

This interdisciplinary course assumes an expansive approach towards disability, defining it not exclusively as a legible identity that one can lay claim to, but rather as an identity grounded in one’s relationship to power (Kim and Schalk, 2020). This course centers on the critical role of lived experience as a key site of everyday theorization for the multiply marginalized, and specifically on the ways in which invisibly disabled Latinx, Asian American, and Black American individuals write the self. As scholars in disability studies argue, self-representations of disabled individuals carry the potential for us as a society to move beyond the binary narratives of “tragedy or inspiration” so often associated with disability. Rather, the self-produced narratives of US disabled writers of color offer a much more nuanced portrayal of everyday life with disability/ies for the multiply marginalized. Much like invisible disability itself, these self-representations ultimately refute traditional depictions of disability, and underscore the ways in which the bodymind serves as a rich, albeit often overlooked, site of knowledge. Embodied Knowledges draws on the insights of disability studies, crip studies, anthropology, literary studies, medicine, psychology, education, cultural studies, ethnic studies, American studies, gender and sexuality studies, sociology, and trauma studies. We will examine the works of Latinx, Asian American, and Black American writers and scholars others in relationship to one another, and as points of departure for examining issues such as the relationship between immigration and disability; intergenerational trauma; the impacts of paradigms such as the Model Minority Myth and notions of cultural deficit; passing; the politics of disability disclosure, the paradoxes of invisible disability; invisible disability in academic spaces; the role of culture and categories of difference such as race, gender, class and immigration status in societal approaches to and understandings of invisible disability; and future visions in the realm of disability justice and care work.
Requirements/Evaluation: Two 5-6 page essays; One group question assignment; Final reflection document

Prerequisites: None.

Enrollment Limit: 12

Enrollment Preferences: Preference given to majors or concentrators in LATS, AMST, and AAST, in order of seniority.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AAS 253(D2) LATS 254(D2) AMST 253(D2)

Difference, Power, and Equity Notes: This course takes up issues of difference and power in every one of its readings and materials. In particular, we examine the intersection of race, ethnicity, dis/ability, gender, sexuality and nation in our discussions of how disability helps to define our understanding of US identity and citizenship, particularly for US communities of color.

LATS 278 (S) Latinxs and Their Scriptures: Christian, Muslim, & Jewish
This course studies the nature of authorized religious writings—"Scriptures"—among Latinx communities in the US in three major religious traditions—Christianity, Islam, and Judaism. Beginning with an understanding of the nature and function of "scriptures" in religion as a whole, this course will turn to a brief history and current status of Latinidad in the US, including its religious traditions, and how scriptures have functioned in those traditions, especially among Latina/o/x adherents. Then we will do close readings of major texts in Latinx Christianity, Islam, and Judaism, both the scriptures of those communities and interpretative readings of them by adherents and scholars alike. Our goal will be a more thorough understanding of Latinx religious reading practices, interpretations, and implications on the life and overall well-being of Latinx communities in the US.

Requirements/Evaluation: Class participation; Glow Discussion Forum posts based on readings; two short essays and one longer research paper.

Prerequisites: No prerequisites

Enrollment Limit: 20

Enrollment Preferences: Students should have at least one previous LATS course or one previous Religion course.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

LATS 285 (F) The Bible and Migration: Latinx Perspectives

Cross-listings: LATS 285 REL 286

Secondary Cross-listing
This course seeks to understand migration in the current historical moment, around the globe but especially on the US border. The lenses through which we will explore migration include Religion, with special focus on the Christian Bible. We will explore instances of and reflections on migration in the Bible, as well as various interpretations of the Bible emerging today in debates over migration. The course will approach US migration from the perspective of Latinx communities in the US - historically, culturally, politically, and religiously. Readings will include: The Bible, monographs and essays on the Bible and Migration, especially from the perspectives of Latinx authors and thinkers.

Requirements/Evaluation: Participation in class discussions; two to three short essays (3-5 pages each) analyzing selected readings; a longer final
LATS 286 (F) Conquests and (Im)migrations: Latina/o History, 1848 to the Present (DPE)

Cross-listings: HIST 286 LATS 286

Primary Cross-listing

The first Latinx communities were formed in 1848 when the United States conquered half of Mexico's territory. In 1898 the United States annexed Puerto Rico and has retained sovereignty to this day. These early conquests and continuing im/migrations created Mexican and Puerto Rican communities in the United States. U.S. imperialism continued to shape the im/migrations that created Cuban, Dominican, Salvadoran, Guatemalan and other Latinx communities in the United States. This course explores U.S. military, political, and economic interventions and their impact on im/migrations and the making of Latinx communities. We also explore the impact of U.S. employers’ and the U.S. government's recruitment of low wage workers in shaping im/migrations, destinations, and the formation of Latinx working-class communities. Im/migration and refugee policies have long defined who is eligible to enter and how, as well as who is deemed eligible for citizenship and belonging. Within this context, Latinas and Latinos have developed survival and family reunification strategies for themselves, their families, and their communities.

Class Format: This course is a discussion format.

Requirements/Evaluation: Class participation, short 1-2 page writing assignments, two 4-5 page essays, and a final 5-7 page essay. All writing assignments are based on course materials.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: LATS concentrators, History majors, or those intending to become concentrators or majors, seniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

LATS 313 (S) Gender, Race, and the Power of Personal Aesthetics

Cross-listings: AFR 326 WGSS 313 AAS 313 AMST 313 LATS 313

Primary Cross-listing

This course focuses on the politics of personal style among women of color in the digital era. With a comparative, transnational emphasis on the ways
in which gender, sexuality, ethno-racial identity, neoliberal capitalism and class inform standards of beauty and ideas about the body, we will examine a variety of materials including commercial websites, podcasts, histories, personal narratives, ethnographies, and sociological case studies. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions among others:

- What are some of the everyday functions of personal style among women of color in the US and globally?
- How do Latina/x, Black, Arab American and Asian American female aesthetics reflect the specific circumstances of their creation?
- What role do transnational media and popular culture play in the development and circulation of gendered and raced aesthetic forms?
- How might the belief in personal style as activist strategy complicate traditional understandings of feminist political activity?

**Requirements/Evaluation:** participation, one student-led discussion period, two written essays of 5-7 pages, final written reflection.

**Prerequisites:** LATS 105, AMST 201, AFR 200, WGSS 101 or permission of instructor; first year students are not permitted to take this course.

**Enrollment Limit:** 12

**Enrollment Preferences:** Latina/o Studies concentrators, American Studies majors, Africana Studies majors, and Women's, Gender and Sexuality Studies majors by seniority. If the class is overenrolled students may be asked to submit a brief writing sample.

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**LATS 315 (S) Research Design in Geography: Social Science Perspectives (WS)**

How do you design a research project? Which methods of data collection and analysis are appropriate for research questions in Latinx Studies? This course provides an introduction to the process of designing and carrying out a research project, including related to Latinidades, or a plurality of Latinx identities. It introduces students to how social science knowledge is produced to understand the research process, how research emerges, and how we affect research. Course objectives for students are: 1) to design social science research effectively; 2) to critically evaluate the research design of others; 3) to strengthen their academic research and writing skills; and 4) to develop an appreciation for how knowledge is acquired, organized, and communicated. Students will iteratively develop an original research proposal involving several pieces of synthesis. Through applying different research methods to case studies in Latinx Studies, students will understand that the complexity of the issues affecting Latinx communities requires thoughtful research. Students will receive practical training in research protocols, organization methods, project management, and analytical approaches.

**Class Format:** This class will have short lectures with most of the time dedicated to group discussions. Students should expect to carry out research methods outside of class.

**Requirements/Evaluation:** Class participation. Assignments where students carry out research methods. Five writing assignments of various page lengths (1-10 pgs) compose students’ research proposal project. Each component of the project will be revised by students after professor feedback. These revisions will culminate into a final paper (~20 pages). There will be a final exam.

**Prerequisites:** N/A

**Enrollment Limit:** 19

**Enrollment Preferences:** LATS concentrators or those intending to become LATS concentrators; juniors interested in a senior honors thesis.

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will have five writing assignments that build upon each other, from the statement of research topic, initial research questions, annotated bib, draft lit review, and proposed methodology. Students receive critical feedback on grammar, style, and argument and submit revised versions of their assignments. Students submit a completed research project proposal as their final paper.

**Attributes:** LATS Core Electives
LATS 318 (S) Myths and the Making of Latine California (WS)

Cross-listings: REL 318 COMP 328 AMST 318 LATS 318 ENVI 318

Primary Cross-listing

California is home not only to the largest ethnic Mexican population in the USA but also to the largest Central American population, while also being home to long-standing Latine communities hailing from Chile to Cuba. Since the era of Spanish colonization, especially starting in 1769, California has been woven into fantastic imaginations among many peoples in the Americas. Whether imagined as Paradise or Hell, as environmental disaster or agricultural wonderland, as a land of all nations or a land of multiracial enmity, many myths have been inscribed onto and pursued within the space we call California. In a state whose name comes from an early modern Spanish novel, how did certain narratives of California come to be, who has imagined California in certain ways, and why? What impact have these myths had on different Latine populations in the history of California, and how have different Latines shaped, contested, and remade these myths as well as the California landscape that they share with other peoples? In this course, we consider "myth" as a category of socially powerful narratives and not just a simple term that refers to an "untrue story." We examine myths by focusing on a few specific moments of interaction between the Latine peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest are select creation stories (found in Jewish, Christian, and Indigenous traditions), imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as part of Greater México, California as "sprawling, multicultural dystopia," and California as "west of the west," including its imagination as a technological and spiritual "frontier."

Requirements/Evaluation: this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Latina/o Studies concentrators, Religion majors, American Studies majors and concentrators, Comparative Literature majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
REL 318(D2) COMP 328(D1) AMST 318(D2) LATS 318(D2) ENVI 318(D2)

Writing Skills Notes: The students are expected to engage in regular writing of response papers, a mandatory revision of their first essay after receiving instructor feedback, a second essay, and a scaffolded final project with instructor and peer feedback at different stages. Attention to writing and the ways that writing interacts with myths, peoples, and place-making is part of the practice and the theoretical orientation of the course.

LATS 330 (S) DNA + Latinx: Decoding the "Cosmic Race" (DPE)

Scientists working to assemble maps of the human genome have found a goldmine in the DNA of Latinx, Latin American, and other populations that derive ancestry from multiple continents. This interdisciplinary course explores Latinidades through a genealogical lens: What culture-specific issues emerge around history, identity, ethics, forensics, immigration, commerce, surveillance, art, science, and medicine? Through discussion, materials, and activities that engage personal, historical, and scientific perspectives, this course offers students the opportunity to explore the many codes embedded in the double-helix. Readings include scholarship out of Stanford University's Bustamante Lab, The Cosmic Race by José Vasconcelos, The Cosmic Serpent by Jeremy Narby, Bird of Paradise: How I Became Latina by Raquel Cepeda, and The Social Life of DNA: Race, Reparations, and Reconciliation After the Genome by Alondra Nelson.
LATS 335  (S)  Contemporary Immigration Landscapes: Producing Difference and Value in Migration

Cross-listings:  WGSS 321 LATS 335 AMST 312

What is the relationship between racial formations, transnational migrations, and power? How do geometries of power shape our relationship to place? This course examines geographies of transnational migration, bringing together insights from critical race theory, queer theory, Indigenous studies, and postcolonial theories to enrich our understanding of human geography. We will look at the use of ethnic and racial formations as a bridge between cultural and political geography in the contemporary US immigration landscape. Through an interdisciplinary exploration of ‘migration,’ we will examine the depth and range of migrants’ experiences and how these communities’ lives are structured through various axes of difference, such as race, gender, sexuality, class, and documentation status. We will consider how gender and sexuality structure racial formations and determine notions of value. We will give attention to the variegated landscape of immigration enforcement and its relationship to issues of labor, political economy, and environmental justice, among others. Through materials that embrace both historical and contemporary perspectives, this course will help students develop a critical understanding of how space matters when considering transnational processes of migration as well as migrant communities’ cultural place-making practices throughout the US. This course asks students to compare and contrast the intellectual genealogies covered and apply these theories of transnational racial formations to case studies that focus on political interventions for social justice (such as UndocuQueers in the immigrant justice movement).

Requirements/Evaluation:  Class Participation (20%): Preparation for, and active participation in, class discussions. Short writing assignments weekly around class readings. Pair share (10%): Two engage class with thoughts for one 30 minute class segment. Essays (20% each): Two 4-5 page essays. Final Paper (30%): An examination of the articulation of Latinx migrations and belonging in a case study that interrogates and builds on a major course theme, approximately 12 pages double-spaced, plus references / endnotes / images.

Prerequisites:  None

Enrollment Limit:  25

LATS 341  (F)  Performing Masculinity in Global Popular Culture  (DPE)
This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia, hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

Prerequisites: none; WGSS 202 would be helpful

Enrollment Limit: 15

Enrollment Preferences: a short statement of interest will be solicited; a subsection of applicants may be interviewed

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

LATS 348  (S) Drawing Democracy: Graphic Narratives as Democratic Ideals  
Cross-listings: COMP 348 AMST 348 LATS 348  

Primary Cross-listing  
This course examines the graphic narrative in terms of how each author/illustrator employs narrative elements (plotting, structure, characterization, text, and visuals) to express social realities within the context of democratic ideals. Regular assignments and in-class exercises throughout the course offer students the opportunity to create their own graphic narratives.  

Requirements/Evaluation: attendance and class participation, short writing exercises, 4-5 page midterm paper (close-reading a text), 10-15 page final creative paper  
Prerequisites: none  
Enrollment Limit: 19  
Enrollment Preferences: LATS concentrators  
Expected Class Size: 19
LATS 385 (F) Latinx Activism: From the Local to the Transnational  (DPE) (WS)

Cross-listings: HIST 385 LATS 385

Secondary Cross-listing
Latinas/os/x’s have long sought inclusion in the U.S. polity and society, while the meanings of inclusion and the means to achieve it have shifted historically. For Latinxs, activism is often shaped by the specific dynamics of each group’s migration to the United States and by their arrival into a particular context. Home country politics and transnational connections can remain important. Yet local activism to meet immediate needs and to address critical issues becomes important as well. Working within existing structures, Latinx communities have at times questioned and challenged those existing structures, as activists have addressed a wide variety of often intersecting issues. This course roots itself in the historical progression of Puerto Rican and Mexican-American activism, before turning to the social and political movements of the late 1960s and 1970s, as shaped by Puerto Ricans, Chicanos/as, Cubans, and Dominicans. The 1980s witnessed increased immigration from several Central and South American countries, arriving in the context of reactions to those political and social movements, as well as increased U.S. intervention in their countries of origin—a context that again shaped both local and transnational activism. Students’ final projects will be anchored within this historical framing and within the lens of local and transnational activism, while moving forward in time to consider more contemporary dimensions of Latinx activism.

Class Format: This is a discussion-based and writing intensive course, so reading and full participation is important. Students will be expected to read each other’s work and to provide thoughtful and constructive feedback.

Requirements/Evaluation: Class participation and presentations; several 3-4 page essays; final paper of 12-15 pages, as well as proposal, bibliography, and drafts

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: History majors and Latina/o Studies concentrators, seniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 385(D2) LATS 385(D2)

Writing Skills Notes: Several writing assignments of 3-4 pages provide the foundation for 12-15 page final papers. In consultation with the professor, students select a topic and submit a 3-4 page proposal with a bibliography. Students submit a draft for a workshop session with other students. A final presentation is another opportunity to hone arguments and use of evidence, as well as to receive feedback on revised drafts from the professor.

Difference, Power, and Equity Notes: This course examines how Latinx communities have sought inclusion in U.S. society and polity, in the face of marginalization based on race, ethnicity, class, gender, sexuality, and/or political perspective, as well as other intersecting markers of difference. Questions of difference, power, and equity are analyzed at the structural, community, and individual levels.

LATS 409 (F) Transnationalism and Difference: Comparative Perspectives

Cross-listings: AMST 411 WGSS 409 LATS 409

Primary Cross-listing

In the age of digital communications and mobile applications such as WhatsApp and Skype, transnational living has rapidly emerged as the norm as opposed to the exception. However, what does it really mean to "be transnational"? How are the lived experiences of transnational individuals and communities shaped by categories of difference such as gender, ethno-racial identity, sexuality, and class? What impacts do the growing number of transnational citizens and residents in the U.S. have on our understanding of "American" identity in the local, national, and global contexts? In this interdisciplinary seminar we will analyze recent theories regarding the origins and impacts of transnationalism. Particular attention will be paid throughout the semester to the intersections of gender, ethno-racial identity, sexuality, and class in connection with everyday transnational dynamics. The broad range of case studies examined includes Central American, Colombia, the Dominican Republic, Haiti, Indonesia, Jamaica, Mexico, the Middle East, and Peru.

Class Format: This course will follow a discussion format.

Requirements/Evaluation: student participation, an original 12-15 page semester-long research paper conducted in stages, and student presentation

Prerequisites: LATS 105, WGSS 101 or AMST 201; junior or senior standing

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, Women's, Gender, and Sexuality Studies majors, and American Studies majors by seniority. If the course is overenrolled students may be asked to submit a brief writing sample.

LATS 410 (F) Arquivistas: An Archival Storytelling Course (DPE) (WS)

Archival storytelling: the "creative practice of resurfacing hidden, untapped, and untold historical treasures and reimagining that content in various storytelling presentations that speak to modern-day audiences" (Arbo Radiko). In this generative writing and critical-practice course, students explore/inhabit the role of writers and storytellers as preservers of history and culture. With a focus on documenting and/or reimagining Latinidades, the course invites students to address: the unique narrative forms archives may take beyond collections of artifacts; how archives can inform the creation--and definition--of literary work; the relationship between archives and power; information the archivist/storyteller may choose to include or omit, reveal or conceal; how the archivist/storyteller might practice what scholars Michelle Caswell and Marika Cifor call "radical empathy," one that takes into account the diverse affective roles and responsibilities of the: archivist, records creator, records subject, records user, and community member. The course is designed to help students address the above through assignments that build towards final projects. Through the creative process, students learn to: research, compile, and analyze materials from various open-access repositories; identify and write emergent stories from
collected material; and present these stories to the public using narrative elements and tools in the digital humanities. Projects may include virtual exhibits, data stories, annotated maps, historical fiction, ekphrastic poetry, finding aids, and interactive timelines. Projects may also examine the Latinx experience on campus, building on archival efforts initiated by students for the LATS Program 15th Anniversary Exhibit at Williams College Library.

Requirements/Evaluation: Assignments and in-class exercises; attendance; participation; peer review

Prerequisites: n/a

Enrollment Limit: 19

Enrollment Preferences: LATS concentrators; students who haven't taken creative-writing courses but are interested in the topic; students interested in the digital humanities; students who have met their other curricular requirements

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Two five-page papers (each receiving critical feedback from professor on grammar, style, and argument); a midterm project proposal with critical feedback from professor and peers; one taxonomy glossary based on course readings and proposed project; one annotated bibliography; artist statement and notes on craft; one final paper submitted with corresponding creative project.

Difference, Power, and Equity Notes: This course examines various forms of difference, power, and equity related to creating and engaging archives. In exploring and creating archives themselves, students pay close attention to any omissions and concealments in the documentation of historical memory, particularly in relation to diverse Latinx experiences.

Attributes: LATS 400-level Seminars

Not offered current academic year

LATS 421  (F)  Latinx Geographies  (WS)

This research seminar examines the history, framework, and scholarship of the growing field of Latinx Geographies within the context of interdisciplinary Latine Studies. This course explores the perspectives, experiences, spatial politics, and place-making practices of Latines to consider their relationship to the built environment. We will examine recent theories regarding space, place, and race; explore them through various Latinx positionalities, such as gender, sexuality, class, and citizenship status; and apply them to literary and media representations of Latine spaces and places, such as the US-Mexico borderlands, barrios, and rural fields. We will consider how undocumented queer and trans migrants have become prominent political actors in social movements, how migration, race, and the environment interact in pollution and activism, how undocumented women negotiate motherhood, how non-profit organizations market Latinidad for infrastructural development, and more. In this interdisciplinary and comparative course, students will be exposed to the genealogy of Latinx Geography, which finds its genesis embedded in Black Geography, Queer (Women) of Color Critique, Latinx Studies, and Ethnic Studies. Students will learn a geographical vernacular to think and articulate spatially in the social sciences and humanities, as they develop their own research projects. Collectively, we will interrogate case studies of Latines in the built environment to make visible how race and space are fundamental tenets of a Latinx geographical analysis. Students will select a research topic and develop their own research project independently and through coursework. Evaluation will be based on class participation, leading discussion, presentations, research proposal, annotated bibliography, short writing assignments, writing workshop participation, and a final 20-page research paper.

Requirements/Evaluation: Class participation, leading class discussion, proposal, annotated bibliography, short writing assignments, writing workshop participation, presentation, drafts of final paper, and final 15-20 page research paper.

Prerequisites: N/A

Enrollment Limit: 19

Enrollment Preferences: LATS concentrators; seniors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: This research seminar supports students as they define an appropriate topic, identify and use primary and secondary sources, and complete a 15-20 page final research paper. Several short writing assignments focus on interpretations of primary sources and on key arguments in secondary sources. The final paper is written in stages, including a proposal, an annotated bibliography, a draft for workshop with other students and faculty feedback, and a final presentation along with a revised draft.

LATS 470 (S) Latinx Migrations: Stories and Histories (WS)

Cross-listings: WGSS 470 HIST 470 LATS 470

Secondary Cross-listing

Latinx migration histories are often told with sweeping data and within broad historical contexts. While these are important, the voices of the people leaving their home countries and coming to the United States can be lost or buried. During the 1970s, the emerging subfield of social history asserted the need to craft histories that took into consideration the everyday lives of everyday people. Oral history emerged a key tool in capturing the personal stories too often missed in historical archives. At the same time, Puerto Rican Studies, Chicano Studies, and later, Latinx Studies emerged to tell the histories of groups too often omitted from or misrepresented in the scholarship. These fields relied on traditions of testimonios or storytelling. This course focuses on Latinx oral histories, autobiographies, memoirs, testimonios, and other first-person narratives to explore how people are impacted by and experience those broad historical contexts, as well as how the decisions they make and the actions they take shape those broad historical contexts. As Latinx Studies is a field that has been at the forefront of exploring intersectionality, we also analyze how attention to first-person narratives and lived experiences reveal the complexities of race, ethnicity, gender, sexuality, and class, as well as other visible and invisible markers of difference. Examining first-person narratives in the context of specific Latinx groups in particular historical, geographical, and social contexts, we interrogate the methodological and interpretive challenges of working with oral histories and other first-person primary sources. Course topics include the gendered dimensions of migration, geopolitics and stories of exile, and the connections between lived experiences and political activism, particularly the feminist activism of the late 1960s and 1970s-- all while students develop and share their own research topics.

Requirements/Evaluation: class participation and presentations, short writing assignments, proposals, annotated bibliography, drafts of research paper, final presentation, and final paper of 15 to 20 pages

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: History majors, WGSS majors, and Latina/o Studies concentrators, seniors

Leadership Studies focuses on the universal phenomenon of leadership in human groups. Leadership Studies asks what leadership means within a wide variety of social contexts—whether in a family, a team, a theatre company, a philanthropy, a university, a multinational corporation, or a nation-state waging war. It seeks to understand the dynamics of the relationships between leaders and followers. It studies authority, power, and influence. It seeks to grasp the bases of legitimacy that leaders claim, and followers grant, in all of these relationships.

Through a wide range of courses in the social sciences and the humanities, the curriculum addresses a number of questions. How do we define leadership? What are the bases of leaders' legitimacy in different historical contexts? How should we understand the variation between leaders emerging through tradition, charisma, and legal sanction? How do different types of leaders exercise and maintain their authority? What are the distinctive habits of mind of leaders in different cultural settings? What are the moral dilemmas that leaders across all settings face? What are the typical challenges to established leadership? How does one analyze the experiences of leaders in widely disparate contexts to generate systematic comparative understandings of why history judges some leaders great and others failures? How and why do these evaluations about the efficacy of leaders shift over time?

To meet the requirements of the concentration, students must complete one of the two sequences outlined below (6 courses total). Additional and/or substitute electives are offered each year; students should consult the course offerings in the catalog for the full list of elective offerings in a given year and contact the chair if they wish to suggest additional courses that might count toward the concentration.

LEADERSHIP STUDIES—TRADITIONAL TRACK

The introductory course:

LEAD/PSCI 155 Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies

One required course on ethical issues related to leadership, typically:

PHIL 119(F) SEM Why Obey the Law? On Democracy and Justice
Taught by: Jana Sawicki
Catalog details
PSCI 130(F, S) SEM Introduction to Political Theory
Taught by: Laura Ephraim, Nimu Njoya
Catalog details

Two core courses dealing with specific facets or domains of leadership, such as:

ARTH 501 / LEAD 301 / ARTH 401(S) SEM Museums: History and Practice
Taught by: Michael Conforti
Catalog details
ASTR 240 / LEAD 240 / STS 240 SEM Great Astronomers and Their Original Publications
Taught by: Kevin Flaherty
Catalog details
HIST 207 / GBST 102 / ARAB 207 / LEAD 207 / JWST 217 / REL 239(F) LEC The Modern Middle East
Taught by: Magnús Bernhardsson
Catalog details
LEAD 205 / PSCI 212(S) LEC From Tocqueville to Trump: Leadership and the Making of American Democracy
Taught by: Mason Williams
Catalog details
LEAD 320 / PSCI 320 SEM Heroes and Villains: Iconic Leadership and the Politics of Memory
Taught by: Mason Williams
LEAD 425 / PSCI 414(S) SEM Senior Seminar: Leadership and the Anxieties of Democracy
Taught by: Mason Williams

PSCI 215 / LEAD 215 SEM Race and Inequality in the American City
Taught by: Mason Williams

PSCI 216 / LEAD 216(S) LEC American Constitutionalism I: Structures of Power
Taught by: Justin Crowe

PSCI 217 / LEAD 217 LEC American Constitutionalism II: Rights and Liberties
Taught by: Justin Crowe

PSCI 218 / LEAD 218(S) SEM The American Presidency
Taught by: Nicole Mellow

PSCI 310 / LEAD 332(F) SEM New York City Politics: The Urban Crisis to the Pandemic
Taught by: Mason Williams

PSCI 312 / LEAD 312 TUT American Political Thought
Taught by: Justin Crowe

PSCI 314 / LEAD 314 TUT How Change Happens in American Politics
Taught by: Nicole Mellow

PSCI 345 / ASIA 345(F) SEM The Meaning of Life and Politics in Ancient Chinese Thought
Taught by: George Crane

One Leadership Studies Winter Study course (listed separately in the catalog)

Capstone course:
LEAD 425 Leadership and the Anxieties of Democracy

LEADERSHIP STUDIES—KAPLAN PROGRAM IN U.S. FOREIGN POLICY TRACK

An introductory course: 
HIST 262 The United States and the World, 1776 to 1914
HIST 263 The United States and the World, 1914 to the Present
PSCI/LEAD 120 America and the World
LEAD/PSCI 155 Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies

One required course on issues related to American domestic leadership, such as:
LEAD 155 / PSCI 155(F) SEM Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies
Taught by: Mason Williams

LEAD 205 / PSCI 212(S) LEC From Tocqueville to Trump: Leadership and the Making of American Democracy
Taught by: Mason Williams

LEAD 320 / PSCI 320 SEM Heroes and Villains: Iconic Leadership and the Politics of Memory
Taught by: Mason Williams

PSCI 218 / LEAD 218(S) SEM The American Presidency
Taught by: Nicole Mellow

PSCI 310 / LEAD 332(F) SEM New York City Politics: The Urban Crisis to the Pandemic
Taught by: Mason Williams

Three required courses dealing with specific facets of American foreign policy leadership, such as:
HIST 388(F) SEM Decolonization and the Cold War
Taught by: Jessica Chapman
Catalog details
HIST 389 / ASIA 389 / LEAD 389 SEM The Vietnam Wars

Taught by: Jessica Chapman
Catalog details
PSCI 225 / LEAD 225(S) LEC International Security

Taught by: Galen E Jackson
Catalog details
PSCI 262 / HIST 261 / LEAD 262 LEC America and the Cold War

Taught by: TBA
Catalog details
PSCI 266 LEC The United States and Latin America

Taught by: James Mahon
Catalog details
PSCI 364 TUT Noam Chomsky and the Radical Critique of American Foreign Policy

Taught by: James McAllister
Catalog details

One capstone course:

- LEAD/PSCI 327 Leadership and Strategy
- LEAD 330/PSCI 420 The Nuclear Revolution
- LEAD/PSCI 365 U.S. Grand Strategy
- PSCI 361 The CIA and American Foreign Policy
- LEAD 425 Leadership and the Anxieties of Democracy

(There is no official Winter Study component to the American Foreign Policy Leadership track; students who wish to count a Winter Study course toward that track should contact the chair.)

For either track, students should check with the program chair to see if other courses not listed here might count as electives.

HONORS IN LEADERSHIP STUDIES

Although there currently is no Honors route in the Leadership Studies program, it often is possible for students pursuing the concentration to undertake an Honors project within their major disciplines on topics that enables them to develop and explore their interests in Leadership Studies. Faculty in the program are happy to discuss this possibility with concentrators and to help them develop suitable Honors thesis topics. In some cases, depending on the topic and the department involved, a faculty member in the program might also be able to serve as an official or unofficial co-supervisor for an Honors project in another discipline.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the program chair.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Not formally, but, typically, one course per semester abroad is counted toward the concentration.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes: the introductory course and the senior capstone.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Yes: the introductory course has historically been taught only in one semester (usually the fall).

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

**LEAD 155 (F) Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies**

**Cross-listings:** LEAD 155 PSCI 155

**Primary Cross-listing**

This course introduces students to the major issues in the study of leadership, a central concept in the study of politics. The first part of the course will examine key theoretical problems that have occupied political thinkers from Plato and Confucius to Machiavelli and the American framers: What makes a leader successful? What kinds of regimes best serve to encourage good leaders and to constrain bad ones? What is the relationship between leadership and morality—can the ends justify the means? What functions does leadership fill, and what challenges do leaders face, in modern democratic states? The second half of the course will look at leaders in action, charting the efforts of politicians, intellectuals, and grassroots activists to shape the worlds in which they live. Case studies will include antislavery politics and the American Civil War; the global crises of the 1930s and 1940s; and the social movements of the 1960s and 1970s. In addition to active class participation, students will be expected to write a 5-page proposal for a research paper on a leader of their choice, a 10-page research paper, an in-class midterm exam, and a cumulative, in-class final exam.

**Requirements/Evaluation:** active class participation, 5-page research proposal, 10-page research paper, in-class midterm exam, and a cumulative in-class final exam

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** first-year students and sophomores

**Expected Class Size:** 25

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** subfield open in Political Science major

**Distributions:** (D2)

**Cross-listings:** PSCI 161 GBST 103 LEAD 165

**Secondary Cross-listing**

This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made on a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation to Iran; terrorist threats; humanitarian disasters in Syria and Libya; and long-term challenges like climate change. We will not only describe American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning only sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a "grand strategy." By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

**Class Format:** discussion

**Requirements/Evaluation:** short papers, class participation, and final exercise
LEAD 205 (S) From Tocqueville to Trump: Leadership and the Making of American Democracy (DPE)

Cross-listings: PSCI 212 LEAD 205

Primary Cross-listing

America's founders didn't mean to create a democracy. But since the Revolution, leaders have been fighting to make real for all Americans the promise of government of, by, and for the people. In this course, we will look at how leaders have marshaled ideas, social movements, and technological changes to expand the scope of American democracy--and the reasons they have sometimes failed. We will examine how founders such as Benjamin Franklin and James Madison envisioned the relation between the people and the government; how workers, African Americans, and women fought to participate in American politics; and how globalization, polarization, and inequality are straining American democracy and political leadership in the 21st century. We will examine leadership to better understand American democracy--and vice versa. We will ask: What explains why some leaders have succeeded where others have failed? Have some periods of American democratic politics been more amenable to particular kinds of leadership than others? What makes American political leadership distinctive in international comparison? Who, exactly, has been permitted to participate in American politics, and on what terms? How has the relation between the governors and the governed changed over time, and what factors and events have shaped those relations? How has America's democratic experiment compared with (and interacted with) democracy elsewhere in the world? Is America really a democracy at all?

Requirements/Evaluation: bi-weekly short writing assignments, term paper, midterm and final in-class exams

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Leadership Studies concentrators and Political Science majors

LEAD 214 (F) The Economics of National Defense

Cross-listings: LEAD 214 ECON 217

Secondary Cross-listing

National defense is one of the largest components of the US Federal Budget (~15%) and remains a significant part of the nation's GDP (~3%). The study of defense economics in this course will apply principles of microeconomics and macroeconomics to analyze, within the context of national security strategy and policy, issues concerning resource allocation in wartime and peacetime, labor supply and demand, industrial organization and defense acquisition, and the formation and maintenance of alliances. While the focus of the course will be on economics, to provide context on what makes defense economics a special topic, we will also consider questions unique to the military such as how to deter conflict, how to fight wars, how to provide humanitarian assistance and protection to civilians in conflict or disaster areas, and how the national defense may adapt to issues like climate change. We will also consider historical examples from America's wars--e.g., the Civil War, World War 2, Vietnam, and the more recent conflicts in Iraq and Afghanistan. The plan is to use a variety of sources--academic materials, popular media such as news footage and films, and guest speakers--to provide a full-range of perspective on the course topics.

Class Format: Mix of lecture and discussion

Requirements/Evaluation: Individual Papers, Group Paper and Presentation, Midterm and Final Exam

Prerequisites: ECON 110 and ECON 120

Not offered current academic year
LEAD 215 (S) Race and Inequality in the American City

Cross-listings: LEAD 215 PSCI 215

Secondary Cross-listing

In the past half-century, American cities have gotten both much richer and much poorer. The making of "luxury cities" has gone hand-in-hand with persistent, concentrated poverty, extreme racial segregation, mass incarceration, and failing public services-social problems borne primarily by people of color. This course will examine the political underpinnings of inequality in American cities, with particular attention to the racialization of inequality. Among the topics we will cover are: the structures of urban political power; housing and employment discrimination; the War on Crime and the War on Drugs (and their consequence, mass incarceration); education; and gentrification. We will ask: How have city leaders and social movements engaged with urban problems? How have they tried to make cities more decent, just, and sustainable? Under what circumstances has positive leadership produced beneficial outcomes, and in what circumstances has it produced perverse outcomes? We will engage primarily with political science, but also with scholarship in other disciplines, including sociology, history, geography, and legal studies, all of which share an interest in the questions we will be exploring. Students will leave this course with a deeper understanding of contemporary urban problems, a knowledge of the political structures within which those problems are embedded, and a better sense of the challenges and opportunities leaders face in contemporary urban America.

LEAD 216 (S) American Constitutionalism I: Structures of Power

Cross-listings: PSCI 216 LEAD 216

Secondary Cross-listing

How has the American Constitution been debated and understood over time? What is the relationship between constitutional and political change? This course examines the historical development of American constitutional law and politics from the Founding to the present. Our focus is on the structures of power -- the limits on congressional lawmaking, growth of presidential authority, establishment of judicial review, conflicts among the three branches of the federal government, and boundaries between the federal and state and local governments. The specific disputes under these rubrics range from secession to impeachment, gun control to child labor, waging war to spurring commerce; the historical periods to be covered include the Marshall and Taney Court years, the Civil War and Reconstruction, the Progressive Era, the New Deal, the Warren Court, and the contemporary conservative ascendancy. Readings are drawn from Supreme Court opinions, presidential addresses, congressional debates and statutes, political party platforms, key tracts of American political thought, and secondary scholarship on constitutional development. Throughout the semester, our goal will be less to remember elaborate doctrinal rules and multi-part constitutional "tests" than to understand the changing nature of, and changing relationship between, constitutional power and constitutional meaning in American history.

Class Format: discussion

Requirements/Evaluation: three essays (3-4 pages, 5-6 pages, 7-8 pages), a two-part final exam, and class participation

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Political Science majors

**Cross-listings:** LEAD 218 PSCI 218

**Secondary Cross-listing**

Impeachments. Investigations. Polarization. Many argue that the presidency has been fundamentally altered by the tenure of Donald Trump. Is this right? To study the presidency is to study human nature and individual personality, constitution and institution, rules and norms, strategy and contingency. This course will examine the problems and paradoxes that attend the exercise of the most powerful political office in the world's oldest democracy: Can an executive office be constructed with sufficient energy to govern and also be democratically accountable? What are the limits on presidential power? How much do we attribute the shaping of politics to the agency of the individual in the office and to what extent are politics the result of structural, cultural, and institutional factors? Are the politics of the presidency different in foreign and domestic policy? How are national security concerns balanced with the protection of civil rights and liberties? How is the office and purpose of the presidency affected by an economic order predicated on private capital? By the character of the occupant? Exploration of these and other questions will lead us to examine topics such as presidential selection, the bases of presidential power, character and leadership, congressional-executive interactions, social movement and interest group relations, and media interactions. Attention will focus largely on the modern, twentieth and twenty-first century, presidency, though older historical examples will also be used to help us gain perspective on these problems.

**Class Format:** The course will feature both seminar discussion and several small group research projects.

**Requirements/Evaluation:** three 5 to 7-page papers, small group projects, and class participation involving weekly writing

**Prerequisites:** none
Enrollment Limit: 25

PSCI 221(D2) AFR 224(D2) LEAD 220(D2) AMST 220(D2) INTR 220(D2)

Difference, Power, and Equity Notes: This tutorial examines the Cold War between the US and the USSR and attempts to use intellectuals to shape and promote the objectives of powerful state entities. The power struggle between the two "superpowers" impacted cultural production and authors. Some of those authors influenced or enlisted into the Cold War sought equity and equality for their communities and eventually fought against the very political powers that employed them.

Not offered current academic year

LEAD 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics (WS)

Cross-listings: ENVI 222 GEOS 221 LEAD 221

Secondary Cross-listing

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly papers (2 - 5 pages in length) and a final oral presentation

LEAD 223 (S) Roman History

Cross-listings: LEAD 223 CLAS 223 HIST 223

Secondary Cross-listing

The history of ancient Rome can be seen as an account of formative events, practices, and thought in the history of western culture; it also is the history of the most far-reaching experience of diverse cultures, beliefs, and practices known in the Western tradition until modern times. By studying Roman history from Rome's emergence in central Italy in the 7th century BCE through the reign of the emperor Constantine in the early fourth century CE, we will see the complex and fascinating results of an ambitious, self-confident nation's evolution, transformation, and expansion throughout the
Mediterranean world. We will consider questions such as, How did a republic with an aversion to autocratic rule and devotion to *libertas* understand its existence as an imperial power as well as its own elite's dominant rule over Romans and non-Romans alike? How and why did the Roman republic and its deeply entrenched republican ideology give way to the effective rule by one man, Augustus, and the increasingly monarchical rule of the emperors who followed? Did Roman political life in the later republic cause the violence that left it in crisis, or did the persistence of violence in Roman life account for the nature of Roman politics? Who were the non-elites of Rome, Italy, and the Roman empire that often get left in the shadows in our ancient sources? Who were the important writers, politicians, poets, philosophers, and innovators whose works constitute a rich cultural heritage worthy of both appreciation and critique? Throughout the course there will be an emphasis on the problems of historical and cultural interpretation, on how the Roman experience is relevant to our own, and, importantly, on the pleasures of historical investigation. Readings for this course will include a variety of original sources, a range of scholarly essays on specific topics, and a textbook that will provide our chronological framework.

**Requirements/Evaluation:** Class preparation and participation, several short response papers, one longer 6- to 8-page paper, a midterm exam, and a final exam. Students who have a B+ average or better at the end of the semester may substitute a 10 to 15-page research paper for the final exam.

**Prerequisites:** None; open to all

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference given to students who are or are considering majoring in Classics or History, or who are concentrating in Leadership Studies. Preference is then given to first-year students and sophomores.

**LEAD 225  (S) International Security**

**Cross-listings:** LEAD 225 PSCI 225

**Secondary Cross-listing**

This is a course about war and peace. It deals with some of the most foundational questions that concern scholars of security studies: What accounts for great power conflict and cooperation? Is intense security competition between major states inevitable, or can they get along, provided their main interests are protected? Does the structure of the international system necessarily cause conflict? Do particularly aggressive states? Can wars occur "by accident"? When and why do states choose to use military force? What role does statecraft play in matters of war and peace? How do nuclear weapons affect great power politics? The course will consider these questions from an interdisciplinary perspective that combines political science concepts with an historical approach to the evidence. The bulk of the course deals with the major events in the history of great power politics, such as the causes and conduct of World War I and World War II; the origins and course of the Cold War; the nuclear revolution; and the post-Cold War period. The course concludes with an examination of a number of major contemporary policy debates in security studies.

**Requirements/Evaluation:** class participation, two 6- to 8-page papers, final

LEAD 226 (S) Nuclear Weapons and World Politics

Cross-listings: PSCI 226 LEAD 226

Secondary Cross-listing

This is a course about international politics in the nuclear age. The class will address a combination of conceptual, empirical, and policy questions, such as: Have nuclear weapons had a "revolutionary" effect on world politics, such that, fundamentally, international relations no longer works in more or less the same way that it did before the advent of nuclear weapons in 1945? Do nuclear weapons have an essentially stabilizing or destabilizing effect? How, if at all, do nuclear weapons affect how political disputes run their course? How significant of a threat are concerns like nuclear proliferation, nuclear terrorism, and nuclear accidents? How does a state's nuclear posture affect basic political outcomes? Is it possible to return to a world without nuclear weapons? The course will focus on these questions using an interdisciplinary perspective that leverages political science concepts, historical case studies, and contemporary policy debates to generate core insights. It will not only survey the history of the nuclear age--and of individual countries' nuclear development--but also grapple with important contemporary policy dilemmas in the nuclear realm.

Requirements/Evaluation: class participation; two 6-8 page papers; short in-class presentations; final exam

Prerequisites: PSCI 202 or a significant amount of other PSCI coursework

Enrollment Limit: 25

Enrollment Preferences: Preference to students majoring in political science, particularly in the international relations subfield, and/or doing a concentration in leadership studies

LEAD 227 (S) International Relations of the Middle East

Cross-listings: PSCI 227 LEAD 227

Secondary Cross-listing

This is a course about the Middle East in international politics. The structure of the course combines political science concepts with a detailed survey of the region's diplomatic history. The basic format of the course will be to combine brief lectures--either posted on the class website beforehand or given at the start of each class--with an in-depth discussion of each class session's topic. The goal of these discussions is to generate debates over the conceptual, historical, and policy significance of the subjects that we cover. Specifically, the first section of the course will cover the emergence of the Persian Gulf as an area of strategic importance in international politics; U.S. policy toward Saudi Arabia and Iran after World War II; the origins of the Arab-Israeli dispute; the June 1967 and October 1973 Middle East conflicts; Egyptian-Israeli peace; the Iranian Revolution and the Iran-Iraq War; the 1991 Persian Gulf War and its consequences; and the rise of Al Qaeda, Hezbollah, and Hamas. The second part of the course focuses on the Iraq War and its consequences; the rise of ISIS; the Arab Spring; Turkey's changing foreign relations; and the war in Syria. The last section of the course covers contemporary policy challenges confronting the Middle East.

Requirements/Evaluation: class participation, two 6- to 8-page papers, final

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Political Science majors with an International Relations concentration, History majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

LEAD 239 (S) Music in the Global Cold War (WS)

Cross-listings: MUS 239 LEAD 239

Secondary Cross-listing

Throughout the Cold War (1947-1991), music was deployed as a weapon, as a source of nationalist and ideological inspiration, as a form of political protest and resistance, and as propaganda. Music both echoed and helped shape political views and, therefore, prompted various forms of regulation and censorship (McCarthyism in the U.S.; the Union of Soviet Composers). To counter Soviet claims of American cultural inferiority and racism, the U.S. sponsored numerous musical diplomacy efforts showcasing both jazz (Armstrong; Ellington; Brubeck) and classical musicians and composers (Bernstein; American orchestras). Cold War politics and the threat of nuclear war influenced musical styles (Copland; Soviet Socialist Realism; the popular American folk music revival; serialism; rock behind the Iron Curtain), specific musical events (Tokyo East West Music Encounter; concerts celebrating the fall of the Berlin Wall), and individual careers (Shostakovich; Robeson; Van Cliburn). To investigate music's political roles and capacity for expressing communist and democratic capitalist ideologies, we will adopt a case study approach. The Cold War was a global political and, frequently, militaristic struggle. Though our focus will be on music in the U.S.S.R. and U.S.A. we will also consider musical developments impacted by the Cold War throughout Western and Eastern Europe, in Latin America, and in East Asia.

Class Format: Class discussion will be central to this course.

Requirements/Evaluation: 20% = Participation; 20% = Paper #1, 5-6 pages; 25% = Paper #2, 8 pages; 35% = Paper #3, 12 pages, due during exam period

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Students with relevant experience in Political Science, History, or Music studies.

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

LEAD 240 (F) Great Astronomers and Their Original Publications (WS)

Cross-listings: STS 240 ASTR 240 LEAD 240

Secondary Cross-listing

In this course we will study some of the greatest figures in astronomy and consider their leadership in advancing progress in the field. We will consider their lives and works, especially as represented by original copies of their books and other publications. These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; Dialogo, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619, Rudolphine Tables 1627); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (Principia Mathematica: laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (Miscellanea curiosa, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); George Ellery Hale (Mt. Wilson Observatory 100"
telescope, 1917; Palomar Observatory 200" telescope, 1948), Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe's expansion rate, 2000s). First editions will be available in Williams' Chapin Library of rare books, where we will meet in an adjacent classroom. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the Gutenberg Bible (c. 1453) and a Shakespeare First Folio (1623, with a discussion of astronomical references in Shakespeare's plays). The course will be taught in collaboration between an astronomer and a rare-books librarian, with remote lectures by experts from around the world.

Class Format: Meeting on campus in the Chapin Library classroom (Sawyer 452)

Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper; student choice of additional readings from a provided reading list

Prerequisites: none

LEAD 254  (F)  Sovereignty, Resistance, and Resilience: Native American Histories to 1865  (DPE)

Cross-listings: LEAD 254 AMST 254 HIST 254

Secondary Cross-listing

This course surveys Native American/Indigenous North American histories from beginnings through the mid-nineteenth century, tracing the complex ways that sovereign tribal nations and communities have shaped Turtle Island/North America. Equally important, it reckons with the ongoing effects of these pasts in the twenty-first century, and communities' own forms of interpretation, critique, action, and pursuits of justice. It also introduces foundational methodologies in Native American and Indigenous Studies (NAIS) and strategies for pursuing decolonizing scholarship and action. Emphasis is on primary and secondary works produced by Indigenous authors/creators. Starting with the diversity of Indigenous societies that have inhabited and cared for lands and waters since "time out of mind," it foregrounds the complexity of Native peoples, nations, and worldviews situated in particular homelands, as well as accounts of origins and migrations. It addresses how societies confronted devastating epidemics resulting from the "Columbian Exchange," and contended with Euro-colonial processes of colonization, extraction, and enslavement. Indigenous nations' multifaceted efforts to maintain sovereignty and homelands through pervasive violence, attempted genocide, and dispossession are addressed, as well as forms of relations and kinship with African-American and Afro-Indigenous people. It concludes with how different communities negotiated the tumultuous eras of the American Revolution, forced removal in the 1830s, and Civil War, and created pathways for endurance, self-determination, and security in its aftermath. The course centers on Indigenous actors--intellectuals, diplomats, legal strategists, knowledge keepers, spiritual leaders, artists, and many others--and consistently connects historical events with present-day matters of land, historical memory, education, caretaking, and activism. Additionally, it provides an opportunity to engage with original materials in the Williams College Archives/Special Collections and Art Museum. While the scope of the course is continental and transoceanic, it devotes significant attention to the Native Northeast and the Stockbridge-Munsee Mohican homelands in which Williams College is located.

Class Format: Lecture with small- and whole-group discussions

Requirements/Evaluation: Attendance at lectures, active participation in class discussion, midterm exam, short essays based on readings and discussion topics, museum/archives exercise, final essay/project.

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History and American Studies majors, followed by first- and second-year students

Expected Class Size: 30-40

Grading: no pass/fail option, yes fifth course option

LEAD 262  (S)  America and the Cold War

Cross-listings:  PSCI 262  LEAD 262  HIST 261

Secondary Cross-listing

This course examines the rise and fall of the Cold War, focusing on four central issues. First, why did America and the Soviet Union become bitter rivals shortly after the defeat of Nazi Germany? Second, was one side primarily responsible for the length and intensity of the Cold War in Europe? Third, how did the Cold War in Europe lead to events in other areas of the world, such as Cuba and Vietnam? Finally, could the Cold War have been ended long before the collapse of the Soviet Union in 1989? Political scientists and historians continue to argue vigorously about the answers to all these questions. We examine both traditional and revisionist explanations of the Cold War, as well as the new findings that have emerged from the partial opening of Soviet and Eastern European archives. The final section of the course examines how scholarly interpretations of the Cold War continue to influence how policymakers approach contemporary issues in American foreign policy.

Class Format:  lecture/discussion

Requirements/Evaluation:  one medium length paper, an in-class midterm and final exam, and a series of short assignments

Prerequisites:  none;  PSCI 202 is recommended but not required

LEAD 270  (F)  Sport and the Global Color Line  (DPE)

Cross-listings:  AFR 270  LEAD 270  HIST 270

Secondary Cross-listing

Throughout the twentieth century, African Americans have broken racial barriers, confronted racial stereotypes, and garnered unprecedented success within popular culture, most notably sport. In this course, students will explore the relationship of the black athlete to the color line. We will complicate the historical view of sport as a site of professional advancement and race reform by demonstrating how societal racial practices were reconstructed within athletics. In essence, this course will emphasize the role sport performed in structuring racial exclusion as athletic arenas—like movie theaters, railroads, schools, and other public sites—shaped what Historian Grace Elizabeth Hale has termed the "culture of segregation." Though our primary focus will be on the experiences African Americans encountered, we will also probe the color line beyond its typical black-white binary. Thus, we will examine the achievements and altercations that other ethnic and racial groups realized in their transnational push for equality and inclusion.

Class Format:  Lecture and discussion.
Requirements/Evaluation: Students will be graded on class participation and will have two take-home midterm essay examination (4-6 pages). In addition, students will write two or three response papers (2-3 pages) and a final research paper.

Prerequisites: None.

Enrollment Limit: 40

Enrollment Preferences: Open to all students with completion of course admission survey if overenrolled.

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

LEAD 280  (S)  Emancipation to BlackLivesMatter

Cross-listings: AFR 280 HIST 280 LEAD 280

Secondary Cross-listing

This introductory course surveys the cultural, political, and social history of African Americans from Reconstruction to the present. It offers a balance between a "top-down" and "bottom-up" approach and focuses primarily on African Americans' quest for citizenship, equality, justice, and opportunity. In addition to examining major historical developments and popular figures within the modern black past, we will explore the lesser-known histories of everyday people who helped shaped the black freedom struggle. In so doing, we will interrogate conventional narratives of progressive movements since emancipation. Some of the main topics include: the transition from slavery to freedom; the rise of Jim Crow and the politics of racial uplift; the Great Migration and the emergence of the New Negro; the Great Depression and the New Deal; World War II and the struggle for economic and racial inclusion; the postwar period and the intersecting movements of Civil Rights and Black Power; and the impacts of deindustrialization and mass incarceration on the black community. We will end with a discussion of the Obama years and Black Lives Matter.

Class Format: Class will be a mix of lecture/seminar

Requirements/Evaluation: Students will be graded on class participation and will have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two response papers (2-3 pages) and will complete a mapping project based on The Negro Motorist Green Handbook.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Students with demonstrated interest in material. If the course is overenrolled, students will be asked to complete a questionnaire.

LEAD 296  (S)  Human Rights and National Security: Seeking Balance in the United States

Cross-listings: HIST 296 LEAD 296

Secondary Cross-listing
This course will ask if ensuring collective security and preserving individual rights are inherently contradictory or if they may, in fact, be mutually reinforcing. Focusing on developments and issues within the United States since its founding, the class will explore how Americans have sought to reconcile concerns about national security and a broad array of rights in the past, and the implications of this history for contemporary debates. The course will challenge students to consider how debates over national security and rights have reflected broader partisan divides and served diverse political objectives. Moreover, students will explore how these debates reflected competing visions of national identity and purpose, and question how and why the costs of security measures disproportionately burdened people based on race and religious identification. The course will initially survey these issues through a historical lens, demonstrating how questions of security and rights have been present since the nation’s founding. It will draw on key moments in U.S. history to explore issues of foreign subversion, dissent, surveillance, habeas corpus, presidential power in times of war, and border security and immigration. Familiarity with historic precedents will ensure that students are prepared to grapple with a closer examination of contemporary studies of refugees and immigration; cybersecurity and surveillance; domestic terrorism and hate crimes; and counter-terrorist detention and interrogation. Students will be assessed on participation, short writing assignments, and a group podcast project.

Requirements/Evaluation:  Students will be assessed on participation, short writing assignments, and a group podcast project.

Prerequisites:  None

Enrollment Limit:  25

LEAD 301  (S)  Museums: History and Practice

Cross-listings:  LEAD 301 ARTH 501 ARTH 401

Secondary Cross-listing

Art museums express the cultural, aesthetic and social ideals of their period of formation and many of those ideals are embedded in the values and practices of institutions today. Comparing institutions past and present internationally, seminar participants will envision the art museum's future while addressing programmatic and organizational challenges at this moment of participatory civic engagement and social, political unrest. With growing skepticism of institutional collecting practices and authoritative narratives, art museums, especially those in the United States, face internal and external pressure to "decolonize" as they attempt to alter their canon. There is pressure, as well, to embrace a more active role in climate and social justice movements. It is a time marked by calls for compensation transparency, participatory decision making, staff and trustee diversity, and greater scrutiny of funders. The seminar will consider this environment against past and current norms of governance, management and curatorial policies and practices. We will examine the traditional role of architecture and installation in interpretation and experience, prevailing and proposed guidelines in the accessioning and deaccessioning of works of art and both internal and external attitudes towards the repatriation and restitution of cultural property. Studying museums ranging in size and type from the "encyclopedic" to newly established contemporary arts institutions and alternative spaces, seminar participants will hear how museum leaders are dealing with challenges to current practice through weekly zoom sessions. Participants will also ponder how future museums might strive to balance the institution's traditional scholarly and artistic role with new civic and social responsibilities, mindful of financial stability in a market-driven, metric-conscious, not-for-profit environment; doing so while addressing, in proposed program and practice, the demands on museums emanating from a more ethically insistent internal and external world.

Requirements/Evaluation:  oral presentations and discussion in class and one seminar paper (with class presentation) at the end of the semester

Prerequisites:  undergraduates should email michael.conforti@williams.edu to schedule a discussion before registering for the course

Enrollment Limit:  10

Enrollment Preferences:  graduate students, then senior art history majors, then other undergraduates

LEAD 311  (F) Congress

Cross-listings: PSCI 311 LEAD 311

Secondary Cross-listing

Even before the pandemic, scholars, pundits, and the public thought Congress was in a state of crisis. Riven by polarized partisanship and gridlock, the most powerful assembly in the world seemed incapable of representing citizens and addressing problems. This seminar focuses on how Congress organizes itself to act as a collective body. In an organization comprised of equals, how and why do some senators and representatives acquire more power and authority than others? How does Congress act as an institution and not just a platform for 535 individuals? Why does Congress not act, especially when the U.S. confronts so many pressing problems, and how do legislators justify inaction? In what ways does this institution promote or hinder the legitimacy, responsiveness, and responsibility expected of a democratic governing institution?

Requirements/Evaluation: class participation, two short papers, and a final research paper

Cross-listings: PSCI 312 LEAD 312

Secondary Cross-listing

From democracy to liberty, equality to community, foundational ideas -- about what makes for good government, about what constitutes the good society, about what is necessary to lead a good life -- define the American political tradition and consume the American political imagination. Designed not only to uncover these (sometimes melodious, sometimes cacophonous) values but also to place current ideological debates about them in a broader developmental context, this tutorial will offer a topical tour of American political thinking from the birth of nationalism in the colonial period to the remaking of conservatism and liberalism in the early twenty-first century. Utilizing primary source material ranging from presidential speeches to party platforms, newspaper editorials to novels, we will seek to interrogate -- reconciling where possible, distinguishing where necessary, interpreting in all instances -- the disparate visions and assessments of the American political experience offered by politicians, artists, intellectuals, activists, and ordinary citizens over the course of more than two centuries. Our focus, then, is nothing less than the story of America -- as told by those who lived it.

Requirements/Evaluation: five 5- to 7-page essays, five 2- to 3-page critiques, and a revised and extended 10- to 12-page final essay

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Political Science majors and prospective majors

Grading: no pass/fail option, no fifth course option
LEAD 314 (F) How Change Happens in American Politics

**Cross-listings:** PSCI 314 LEAD 314

**Secondary Cross-listing**

An unprecedented assault on the U.S. Capitol, the rise of white nationalism, a pandemic, a volatile economy, racial reckoning, and rapidly evolving environmental crises have all rocked American politics in the last year. What might we expect to come next? From the Founding to the present, the American political order has undergone cataclysmic and thoroughly going transformations, yet it has also proven to be remarkably enduring. How can this be? Where do we find continuities and where upheavals? What accounts for the continuities, and what for the changes? What sorts of transformations have been possible, and who or what has made them possible? Finally, what are the costs of change (and of continuity)--and who pays them? The goal of this course is to assess American political change, or lack of, and to gain a sense of the role that political leaders have played in driving change. We will examine when and how individuals and leadership have mattered vis-à-vis broader historical and contextual factors, including economic developments, demographic change, war, and constitutional and institutional parameters. After examining general models of change and of leadership, we will consider specific case studies, such as civil rights for African-Americans, gender equality, labor advances, social conservatism, and populism. We will consider some of the complicated legacies of change. Finally, we will look at arguments that America has been "exceptional"--or, unlike other countries--as well as critiques of these arguments, to help us gain an understanding of future prospects for political transformation.

LEAD 315 (S) Parties in American Politics

**Cross-listings:** LEAD 315 PSCI 315

**Secondary Cross-listing**

Is the American party system what's wrong with American politics? It has been said that parties are essential to democracy, and in the U.S., political parties have played a central role in extending democracy, protecting rights, and organizing power. But their worth is a continuing subject of debate. Although parties have been celebrated for linking citizens to their government and providing the unity needed to govern in a political system of separated powers, they have also been disparaged for inflaming divisions among people and grid-locking the government. Other critics take aim at the two-party system with the claim that the major parties fail to offer meaningful choices to citizens. This course will investigate this debate over parties by examining their nature and role in American political life, both past and present. Throughout the course, we will explore such questions as: What constitutes a party? For whom do they function? How and why have they changed over time? Why a two-party system, and what role do third parties play? Is partisanship good or bad for democracy? For governance? What is the relationship between parties and presidents? How does partisanship become tribalism or hyper-partisanship, and can this be prevented? We will explore answers to these questions through seminar discussion, analytic essays, and independent research culminating in the writing of a longer (15 to 20 page) research paper.
Requirements/Evaluation: In addition to active seminar participation, students will be responsible for writing two shorter (5-7 page) papers and a longer, research paper (15-20 pages).
Prerequisites: PSCI course at the 200 or 300 level or permission of instructor
Enrollment Limit: 14

LEAD 320 (F) Heroes and Villains: Iconic Leadership and the Politics of Memory (WS)
Cross-listings: PSCI 320 LEAD 320
Primary Cross-listing
Americans have been arguing intensely in recent years about how we should remember the leaders from our nation's past. Does Thomas Jefferson's statue belong on a university campus? Should college dorms be named for John C. Calhoun and Woodrow Wilson? Should Harriet Tubman's portrait replace Andrew Jackson's on the $20 bill? In this course we will look at how people in the United States and elsewhere have used their leaders'
images to hash out larger political issues of national identity, purpose, and membership. Why has historical commemoration gotten so contentious--or has it always been contentious? What's really at stake when we depict our leaders? How (if at all) should we reconcile contemporary morality with historical context in assessing the leaders from our past? To address these questions, we will study portrayals of some of the most famous leaders in American history—including Alexander Hamilton, Abraham Lincoln, and Martin Luther King, Jr. Our sources will include political speeches, literature, film, and journalism as well as monuments and museum exhibits; though our examples will be drawn mostly from the United States, our conceptual framework will be transnational. As a final assignment, students will write an 18-20 page research paper on a topic of their choice related to the core themes of the course.

Requirements/Evaluation:  Seminar participation, research proposal, peer workshop, research paper, in-class research presentation

Prerequisites:  previous course in Leadership Studies, or Political Science, or permission of instructor

LEAD 322  (F)  Gandhi: History, Ideas and Legacy  (WS)

Cross-listings:  LEAD 322 ASIA 412 REL 412 HIST 496 GBST 412

Secondary Cross-listing

This course studies the life, work, and ideas of M.K. Gandhi (1869-1948), one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. This tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the context and nature of Gandhian nationalism? Did it help to integrate the Indian nation? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Requirements/Evaluation:  5-7-page essays  or 2-page critique due each week and a final report (3-4 pages) at the end of the semester.

Prerequisites:  None, except students who have taken HIST488T will not be permitted to take this class.

Enrollment Limit:  10

Enrollment Preferences:  Senior history majors and students who have previously taken HIST221.  Students who have previously taken HIST488T will not be permitted to take this class.

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

LEAD 324  (F)  Migration Governance: A Global Perspective  (DPE)

Cross-listings:  GBST 321  PSCI 322  LEAD 324

Secondary Cross-listing

This class is interested in thinking critically and empirically about one of the most polarizing and relevant issues of our time: how countries regulate cross-border mobility. Currently over 281 million international migrants live in a country different from where they were born, about 1 out of every 30 humans in the world and a population that has roughly doubled since 1990. How are international organizations and domestic governments regulating this level of unprecedented global mobility in destination countries as well as countries of origin? Throughout the semester we interrogate three themes central to migration politics (and political science): rights, access, and agency. The course is organized with a focus on legal status: which "categories" of people (i.e. illegal migrants, refugees) have differential access to rights, services, and representation depending on how they are classified where they live (and where they are from). We will critically analyze how those categories are constructed at the international and domestic levels, as well as how those categorizations are also racialized, politicized, and gendered. While we address current debates over migration governance in the United States, we situate US migration policy within the contemporary global context. The course places the US in conversation not only with European countries, but also (and especially) considerations of migration governance in destination countries in Latin America, the Middle East, Asia and Africa. We also attend to the emigration governance of diaspora citizens particularly from the Global South. Students will have the opportunity to apply course readings to real-world contexts through guest speakers from global organizations at the frontlines of migration policy (UNHCR, Doctors without Borders), and filmmakers documenting border crossing around the world.

Requirements/Evaluation:  Participation, 3 Short Response Papers, Research Paper (15 pages)

Prerequisites:  PSCI 202 or PSCI 204 or permission of the instructor

Enrollment Limit:  15

Enrollment Preferences:  Political Science majors and Leadership Studies Concentrators

Expected Class Size:  15

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 321(D2)  PSCI 322(D2)  LEAD 324(D2)

Difference, Power, and Equity Notes:  This class attends to the racial and gendered dimensions of global migration governance. We also focus on the diverse, uneven, and often arbitrary ways global migration governance is executed on the ground depending on destination country, where migrants are from, and why they are crossing borders. Finally, this class foregrounds global migration governance from the vantage of the Global South, highlighting migration policies within sub-Saharan Africa, Latin America, Asia, and the Middle East.

LEAD 330  (F)  Senior Seminar: The Nuclear Revolution

Cross-listings:  PSCI 420  LEAD 330

Secondary Cross-listing

This is a course about international politics in the nuclear age. In broad terms, it focuses on a very basic question: Does international politics still work essentially the same way as it did in the prenuclear era, or has it undergone a "revolution," in the most fundamental sense of the word? The structure of the course combines political science concepts and historical case studies, with the goal of generating in-depth classroom debates over key conceptual, historical, and policy questions. The basic format of the course will be to combine very brief lectures with detailed class discussions of each session's topic. The course will begin--by focusing on the Manhattan Project--with a brief technical overview of nuclear physics, nuclear technologies, and the design and effects of nuclear weapons. The course will then examine the following subjects: the dropping of the atomic bombs on Japan; theories of the nuclear revolution; the early Cold War period; the development and implications of thermonuclear weapons; the Berlin and Cuban missile crises; nuclear accidents; nuclear terrorism and illicit nuclear networks; the future of nuclear energy; regional nuclear programs;
preventive strikes on nuclear facilities; nuclear proliferation; and contemporary policy debates.

**Requirements/Evaluation:** class participation, three 8- to 10-page papers

**Prerequisites:** PSCI 202

**LEAD 332 (F) New York City Politics: The Urban Crisis to the Pandemic (WS)**

**Cross-listings:** PSCI 310 LEAD 332

**Secondary Cross-listing**

This course examines New York City's political history from the 1970s to the present—a period during which the city underwent staggering economic and social changes. In the mid-1970s, New York was a poster child of urban crisis, plagued by arson and housing abandonment, crime, the loss of residents and jobs, and failing public services. By the early 21st century, the city had largely met these challenges and was once again one of the most diverse and economically vital places on earth—but also one marked by profound inequality. This course will examine how New Yorkers have contested core issues of capitalism and democracy—how those contests have played out as the city itself has changed and how they have shaped contemporary New York. Broad themes will include the city's role as a showcase for neoliberalism, neoconservatism, technocratic centrism, and progressivism; the politics of race, immigration, and belonging; the relation of city, state, and national governments; and the sources of contemporary forms of inequality. Specific topics will include policing, school reform, and gentrification. As the primary assignment in the course, students will design, research, and write a 20-page paper on a topic of their choice.

**Requirements/Evaluation:** active class participation, 2-page preliminary proposal, 10-page research proposal, 2-page peer feedback, 18- to 20-page research paper

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** Political Science majors and Leadership Studies concentrators

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**LEAD 389 (S) The Vietnam Wars (DPE)**

**Cross-listings:** ASIA 389 HIST 389 LEAD 389
Secondary Cross-listing
This course explores Vietnam's twentieth century wars, including an anti-colonial war against France (1946-1954), a massive Cold War conflict involving the United States (1965-1973), and postcolonial confrontations with China and Cambodia in the late-1970s. Course materials will focus primarily on Vietnam's domestic politics and its relations with other countries. Lectures, readings, films, and discussions will explore the process by which Vietnam's anti-colonial struggle became one of the central conflicts of the Cold War, and examine the ramifications of that fact for all parties involved. The impact of these wars can hardly be overstated, as they affected the trajectory of French decolonization, altered America's domestic politics and foreign policy, invigorated anti-colonial movements across the Third World, and left Vietnam isolated in the international community. Students will read a number of scholarly texts, primary sources, memoirs, and novels to explore everything from high-level international diplomacy to personal experiences of conflict and dramatic social change wrought by decolonization and decades of warfare.

Requirements/Evaluation: class participation, several short papers, and a 10- to 12-page final paper
Prerequisites: none; open to all
Enrollment Limit: 15
Enrollment Preferences: History and Asian Studies majors
Expected Class Size: 10-15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

LEAD 396 (F) The Pivotal Decade--The 1970s Origins of Contemporary America

Cross-listings: HIST 396 LEAD 396

Secondary Cross-listing
Often overshadowed by the long 1960s and the conservative ascendancy of the 1980s, the 1970s provides an important transitional moment for the United States. It was also a decade fraught with contradictions. On the one hand, Americans experienced widespread disillusionment with the power of the federal government to promote and protect the minority from the majority. Historians seeking to understand the collapse of the welfare state or the origins of white resistance to civil rights' initiatives often point to the 1970s as the time when the federal government shifted the burden of the social welfare system onto the market, state and local governments, and onto poor people themselves. And yet, the 1970s also saw an explosion of progressive social activism, as the women's movement, the gay rights movement, and the environmental movement, among others, all came into their own. Likewise, this was a time when U.S. realignment internationally and military overextension intersected with new hegemonies of human rights regimes, multinational corporations, and "globalization." This course will emphasize a wide array of social movements and activism--both left and right--and the interplay among formal politics, grassroots organizing, and popular culture. It will ask students to consider how and why the 1970s catalyzed many of the domestic and international dynamics and debates that define American politics and society today. Students will be assessed on participation, short response papers, and an individual research project culminating in a poster presentation. In Fall 2022, this course will be offered at both Amherst and Williams College campuses. There will be an end of the semester symposium at Williams College that all enrolled students are required to attend as part of the final project.

Requirements/Evaluation: Students will be assessed on participation, short response papers, and an individual research project culminating in a poster presentation

LEAD 425  (S) Senior Seminar: Leadership and the Anxieties of Democracy  (WS)
Cross-listings:  LEAD 425 PSCI 414
Primary Cross-listing
This course, the senior capstone for both Leadership Studies and the American Politics subfield in Political Science, examines the challenges and opportunities facing political leaders in contemporary liberal democracies. We will begin by surveying institutional constraints confronting contemporary political leaders: globalization, sclerotic institutions, polarization, endemic racism, and a changing media environment, among others. Then, we will look at some important factors that shape how followers approach would-be leaders: inequality and economic precarity; identity and group consciousness; notions of membership, community, and hierarchy; and declining local institutions. While the course will focus primarily on the United States, our conceptual framework will be global; though our main interest will be contemporary, we will also examine previous eras in which democratic leadership has come under great pressure. Our primary questions will be these: Why does transformative leadership seem so difficult today? How does political leadership in the 21st century differ from leadership in earlier eras? What conditions are necessary to sustain effective leadership in the contemporary world? As a final assignment, students will craft an 18-20-page research paper on a topic of their choice related to the themes of the course.
Requirements/Evaluation:  Seminar participation, research proposal, peer workshop, research paper, in-class research presentation
Prerequisites:  LEAD 125 or permission of the instructor
Enrollment Limit:  15
Enrollment Preferences:  Open to Leadership Studies concentrators or with the permission of the instructor; preference given to Political Science majors
Expected Class Size:  15
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D2)  (WS)
This course is cross-listed and the prefixes carry the following divisional credit:

LINGUISTICS
Advisor: Associate Professor Lama Nassif

How is language structured? What are the social forces associated with the development of language? How does the mind process and produce language? What are the best methods for teaching and learning a new language? Linguistics is a vibrant and multifaceted field that bridges the academic and the everyday. From Sociolinguistics to Linguistic Anthropology to Applied Linguistics, each of the various disciplines associated with the general area of Linguistics provides an illuminating perspective on the ways in which language works.

At Williams, students can gain insight into the intricacies of linguistic functions in courses located in several different academic units.

ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise. The concentration in Maritime Studies is designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;

- Understand ecological principles and the nature of living systems;
- Apply scientific methods to collect environmental data and evaluate environmental quality;
- Understand the political and economic factors that inform, enable, and constrain environmental policy;
- Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
- Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
- Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES was one of the first environmental studies programs at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, and generous support for summer research and internships. The Class of 1966 Center, a Living Building and the Program's home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. The CES manages the Hopkins Memorial Forest, a 2600-acre natural area northwest of campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center. The Maritime Studies concentration builds on the course offerings of the Williams-Mystic Maritime Studies Program at Mystic Seaport.

**ADVISING**

Concentrators (or first-years and sophomores interested in the concentration offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES or Maritime Studies for advice. All incoming concentrators will choose a faculty advisor in the spring of their sophomore year.

*Advisors for 2019-20: Henry Art, Sarah Gardner, Pia Kohler, Laura Martin, Mea Cook, James Manigault-Bryant.*

**CONCENTRATION IN MARITIME STUDIES**

The Maritime Studies concentration provides students with an opportunity to explore how humans interact with the environment, including the maritime environment. Understanding the oceans and our interactions with them is of increasing importance in this era of climate change, sea-level rise, fisheries crises, and the internationalization of the high seas. We encourage students to investigate our WaterWorld from the perspectives of the humanities, social sciences, and physical sciences. Maritime Studies is an interdisciplinary, cross-divisional program that includes the literature, history, policy issues, and science of the ocean. Candidates for the concentration in Maritime Studies must complete a minimum of seven courses: the interdisciplinary introductory course (GEOS 104 Oceanography), four intermediate core courses (at Williams-Mystic), an elective, and the senior seminar.

Students who have completed other study-away programs that emphasize maritime studies should consult with the CES chair about the possibility of completing the Maritime Studies concentration.

**Required Courses (7 courses)**

**Introductory Course**

MAST/ENVI/GEOS 104 Oceanography

Students who take MAST 211/GEOS 210 Oceanographic Processes at Williams-Mystic can substitute an extra elective in lieu of GEOS 104.

**Capstone Course**

ENVI/MAST 412 Senior Seminar: Perspectives on Environmental Studies

**Core Courses (taken as part of Williams-Mystic program at Mystic Seaport):**

MAST/ENGL 231 Literature of the Sea

MAST 311/BIOL 231 Marine Ecology OR MAST 211/GEOS 210 Oceanographic Processes

MAST/ENVI 351/ PSCI 319 Marine Policy

MAST/HIST 352 America and the Sea, 1600-Present

**Elective Courses**

Elective courses are listed based on either a clear maritime statement in the course description or broad practical/theoretical applicability to maritime studies. Concentrators will take a minimum of one course from the list below. If concentrators find other courses in the catalog that they believe meet the requirements for a MAST elective, they may bring them to the attention of the Chair or Associate Director.
INDEPENDENT STUDY AND WINTER STUDY

In addition to courses fulfilling the Maritime Studies concentration requirements, the following courses are offered:

- MAST 397, 398 Independent Study: Maritime Studies
- MAST 493-W31-494 Senior Thesis: Maritime Studies

Winter study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year’s Winter Study offerings.

HONORS IN MARITIME STUDIES

Candidates for honors in Maritime Studies will complete a thesis in their senior year. The project will involve original research (archive, museum, field, or laboratory) followed by on-campus analysis and write-up of results. The thesis may either be a one-semester plus winter study project, or a full year (two semesters plus winter study). In either case, data collection during the summer before the senior year may be necessary. In some cases, the thesis project may be a continuation and expansion of the student’s Williams-Mystic research project. Honors will be awarded if the thesis shows a high degree of scholarship, originality, and intellectual insight.

- MAST 104  (F)  Oceanography
Cross-listings: ENVI 104 MAST 104 GEOS 104

Secondary Cross-listing

The oceans cover three quarters of Earth's surface, yet oceanography as a modern science is relatively young: the first systematic explorations of the geology, biology, physics and chemistry of the oceans began in the late 19th century. This introduction to ocean science includes the creation and destruction of ocean basins with plate tectonics; the source and transport of seafloor sediments and the archive of Earth history they contain; currents, tides, and waves; photosynthesis and the transfer of energy and matter in ocean food webs; the composition and origin of seawater, and how its chemistry traces biological, physical and geological processes; oceans and climate change; and human impacts.

Class Format: three 50-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast of New England.

Requirements/Evaluation: lab activities (25%), homework (25%), quizzes (5%), three exams (45%)

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first year and second year students, Geosciences majors, Maritime Studies concentrators

Expected Class Size: 48

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course and GEOS 110 Oceans and Society cannot both be taken for credit.

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

MAST 110 (F) Oceans and Society

Cross-listings: MAST 110 ENVI 109 GEOS 110

Secondary Cross-listing

Oceans impact society in many ways: they provide much of our protein, they hide untapped mineral wealth, their circulation regulates global climate, they transport and accumulate our plastic garbage, marine storms batter coastal infrastructure, and sea-level rise threatens communities. However, despite the oceans’ importance throughout history—for trade, as a source of food, and because of their unpredictable dangers—we know shockingly little about them. More than 6000 people have reached the summit of Everest, Earth’s highest elevation; but only 22 have visited Challenger Deep, the deepest point below the ocean surface. We have mapped the surfaces of Mars and Venus in far more detail than the topography of Earth’s ocean basins. New marine organisms are discovered regularly. And we still don’t fully understand the complex details of how ocean and atmosphere work together as the planet's climate engine. In this course, you will examine ocean science themes with direct societal relevance that are also at the forefront of scientific investigation. Topics will be selected based on current events, but are likely to include deep sea mining, meridional overturning, sea level rise, atmospheric rivers, and aquaculture. By taking focused dives into a range of subjects you will learn about the evolution and operation of the ocean as a physical and geological system as well as investigating the intersections between ocean functions, climate change, and human societies. Exercises and discussions will foreground active learning. A field trip to the Atlantic coast will integrate experiential investigation of the intersection between coastal change, extreme weather, and communities. The aim is to have energised interdisciplinary discussions about topics of pressing societal relevance, to understand some of the fundamentals of ocean science, to develop expertise in gathering and distilling information by researching new topics, and thereby to improve critical and analytical thinking.

Class Format: Two 75-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast.

Requirements/Evaluation: Evaluation is based on engagement with in-class activities, six graded lab exercises, four short writing/research assignments, and a five-page term paper

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: First year and second year students

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option
Unit Notes: This course and GEOS 104 Oceanography cannot both be taken for credit.

MAST 211  (F)(S) Oceanographic Processes

Cross-listings: MAST 211 GEOS 210

Primary Cross-listing

Part of the Williams-Mystic Coastal and Ocean Studies Program, this course provides an introduction to physical, geological, chemical, and biological oceanography. Using local field sites as well as places visited on field seminars, we will investigate why the Earth has oceans, why they are salty, how they move and flow, reasons for sea level change on both long and short timescales, and how our oceans interact with the atmosphere to control global climate. We will emphasise societal interactions with the ocean, and will consider coastal processes including land loss. We will apply an environmental justice and anti-racist lens to our discussions. Field work will take place on shores in southern New England, as well as during field seminars on the Atlantic ocean, the West Coast and the Mississippi River Delta. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: Flipped classroom will focus on active learning using data-based exercises. Mini-symposia will involve student research and discussion.

Requirements/Evaluation: graded lab exercises, mini-symposium participation, and a research project

Prerequisites: none

Enrollment Limit: 24

Enrollment Preferences: none

Expected Class Size: 10

Grading: no pass/fail option,  no fifth course option

Unit Notes: This course is taught at our Mystic Seaport campus. Students must be enrolled in the Williams-Mystic Coastal and Ocean Studies Program.

MAST 231  (F)(S) Literature of the Sea  (DPE)

Cross-listings: ENGL 231 MAST 231
The ocean, and human relationships with it, have been central features of literatures and cultures around the world for more than a thousand years. But since literary study is typically based around authors' homelands, careful examination of the oceanic experience is often pushed to the periphery—an "empty space" to be crossed between nations, a "vast darkness" antithetical to human life, or a mirror for land-borne concerns. Increasingly, however, scholars and readers are centering the sea and stories about it as a means stepping outside human frameworks of space and time, situating the complex emotions and narratives inspired by the ocean into a complex network of geologic history and teeming other-than-human life. This course examines a wide range of texts and perspectives on the ocean and human relationships with it. Doing so will help us consider how literature both plays into and subverts dominant viewpoints of the ocean. Through texts that consider 19th-century whaling, the Middle Passage, the postcolonial Caribbean, and islands throughout the Pacific Ocean, we will explore a range of questions, including: What can we learn from examining efforts to write about the ocean? How do ocean stories help individuals understand themselves, their communities, and their place in global environments? What can the range of cultural and literary perspectives on our "single, global ocean" reveal about the ways different people are both connected with and profoundly distant from each other? Most importantly, we will practice, as a classroom community, different strategies for carefully reading texts while connecting them to cultural traditions, surrounding environments, and personal experiences.

**Class Format:** weekly roundtable discussions, including coastal and near-shore field trips and multiple field seminars.

**Requirements/Evaluation:** regular papers, class participation, journal-writing, and a final assignment

**Prerequisites:** N/A

**Enrollment Limit:** 25

**Enrollment Preferences:** Williams-Mystic Students only

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** offered only at Mystic Seaport

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 231(D1) MAST 231(D1)

**Difference, Power, and Equity Notes:** This course focuses on the range of cultural perspectives about the sea, as well as the ways those perspectives can unsettle and challenge dominant narratives about the sea and its role in colonial expansion. Furthermore, this course centers voices that are typically overlooked in the genre of "Sea Literature," paying particular attention to Indigenous and African-American narratives about the ocean.

**MAST 263 (S) The Global Ocean: An Interdisciplinary Introduction**

**Cross-listings:** MAST 263 ENVI 263

Though it covers most of the planet, the ocean’s importance to everyday life is easy to overlook. Its roles as a cultural symbol, resource, highway, and climate regulator make it essential to life around the world. This interdisciplinary course, team-taught by the faculty of the Williams-Mystic Program, will examine key issues in each of the world’s oceans while introducing students to the ways these issues connect multiple disciplines and transcend physical, political, and imaginary ocean boundaries. By drawing on the expertise of the five professors -- from humanities, social sciences, and sciences -- this course facilitates the critical study of the ocean from an interdisciplinary perspective and helps them consider their own role in the shifting relationship between humanity and the ocean. This seminar-style course will meet twice a week online, with students assessed by their participation, response papers, and final project, while helping them apply interdisciplinary skills to pressing sustainability issues connecting the environment and society.

**Requirements/Evaluation:** Five 2-page papers, participation, and a 6-8 page final paper

**Prerequisites:** none, open to all students
Enrollment Limit: 20
Enrollment Preferences: 1. first years, 2. sophomores, 3. MAST concentrators
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option

MAST 265 (F) Coral Reefs: Ecology, Threats, & Conservation
Cross-listings: MAST 265 BIOL 165 ENVI 265
Primary Cross-listing
Coral reefs are a fascinating ecosystem found throughout the world's tropical oceans. Corals can thrive in nutrient-poor oceans because of the mutualistic relationship with algal symbionts. And as a foundational species, corals provide a habitat for numerous species, possibly the highest diversity found on the planet. However, these complex and beautiful ecosystems are declining worldwide from a variety of local and global threats. In this course, we will explore coral reef ecology through an in-depth examination of the biotic and abiotic factors contributing to the ecosystem's functioning. We will also investigate the causes and consequences of threats to coral reefs, such as ocean warming, ocean acidification, and resource extraction. Finally, we will identify the many efforts worldwide to conserve coral reefs and promote their resilience. In this seminar course, you will demonstrate your proficiency through knowledge assessments, short writing reflections, a virtual coral fragmentation experiment, and a creative advocacy project. This course aims to deepen your awareness of the complex species interactions on coral reefs and the physical factors affecting coral survival while fostering hope through current conservation efforts.
Requirements/Evaluation: Four 1-paragraph discussion board post, One 20-question knowledge assessment (quiz), Three 2-page writing reflections, One lab results and discussion write-up 2-3 pages figures included, and a creative (medium is student choice) advocacy project.
Prerequisites: none, open to all students
Enrollment Limit: 20
Enrollment Preferences: 1. First-Year, 2. Sophomores
Expected Class Size: 16
Grading: yes pass/fail option, yes fifth course option
Unit Notes: Does not count for Biology major credit.
Distributions: (D3)

Attributes: ENVI Natural World Electives
Not offered current academic year

MAST 266 (S) Reading Water (WS)
Cross-listings: MAST 266 ENVI 266
Primary Cross-listing
Water has such profound and far-reaching influence on individuals, societies, and the planet that it simultaneously risks going overlooked and appearing clichéd. Human beings are made of it and need it to live, yet will die if immersed in it. It is venerated by cultures around the world, yet most people either cannot access clean water, or don't know where their clean water is piped in from. It covers the earth's surface, and has shaped it over eons, yet scientists are still not sure how it came to be here in the first place. This wide-ranging influence also presents challenges for traditional academic structures; thinking about water demands crossing times, spaces, and disciplines. This course will explore the wide-ranging and diverse ways water impacts individuals, cultures, and the environments they call home by drawing on a range of content: hydrology, literature, political theory, storytelling, geography, and more. To do this, we will also develop and examine methods of critically reading as "non-experts"—reading scientific articles as rhetorical objects and reading for scientific principles in literature, for instance--to explore what interdisciplinary thinking opens up (and
inhibits), and thus how to effectively engage with and create interdisciplinary work. The goal here is not to define water's cultural or scientific importance, or to determine which disciplines "best" combine to explain water, or to come up with humanities-based solutions to "the water crisis." Rather, these texts, and the water that flows through them will help us explore the opportunities and limits of human perceptions of the other-than-human world. It will help us consider the extent to which those perceptions both shape, and are shaped by, a seemingly simple molecule. And it will help us imagine epistemologies and ontologies that account for the ways water simultaneously flows through us, around us, and through the deep geological history of the planet. Course Texts: Tristan Gooley -- *How to Read Water* (selections) Vandana Shiva -- *Water Wars* (selections) Luna Leopold -- *Water, Rivers, and Creeks* (selections) Richard White -- *The Organic Machine* Linda Hogan -- *Solar Storms* Marc Reisner -- *Cadillac Desert* Jesmyn Ward -- *Salvage the Bones* John McPhee -- "Atchafalaya" Emmi Itäranta -- *Memory of Water* Brenda Hillman -- "The Hydrology of California"

**Class Format:** The class will be primarily discussion-based, and will ask students to lead and structure discussions. Students will have questions, reflections, and insights prepared before class, and use those to drive our in-class activities.

**Requirements/Evaluation:** 100pg of reading a week, give or take. Approx 20-25 pages of written work throughout the semester.

**Prerequisites:** None

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference to majors, and then to sophomores and juniors, respectively.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 266(D1) ENVI 266(D1)

**Writing Skills Notes:** Students will write four papers of increasing complexity that will require workshopping and drafts. Each of these papers will receive forward-looking writing feedback from me. The first paper centers on paragraph-level stylistic choices, the second on argument/evidence connections, the third on genre, and the final paper synthesizes these writing skills. In addition, students' final grades will allow for revision of earlier papers to encourage and assess growth of writing skills.

Not offered current academic year

---

**MAST 268 (S) Debating Ocean Biodiversity at the Intersection of Science and Policy**

**Cross-listings:** ENVI 268 MAST 268

**Primary Cross-listing**

Biodiversity in the ocean is facing an onslaught of challenges, both directly and indirectly. It is likely that we are undergoing a sixth mass extinction event, where diversity of life on earth is stunningly at risk. Fortunately, however, we are also finding innovative ways to solve issues and attempt to stave off these dramatic changes to our ecosystems. These solutions potentially have both positive and negative effects. Difficult tradeoffs must be weighed and decisions must be made as people wrestle with known knowns, known unknowns, and unknown unknowns. In this class, we will explore five issues that relate to biodiversity in the ocean. You will have the opportunity to investigate one side of an issue, to collect supporting information, and to advocate for your position all while learning about current biodiversity issues in the ocean. You will be challenged to weigh conflicting evidence to find a positive outcome. Throughout the class you will practice critical thinking, evaluation, and synthesizing skills as you work with multiple viewpoints. Class time will include lecture, in-class group work, and student-led debates of timely, controversial issues. You will be assessed on summaries of information, reflections on topics, and a final project on an issue of your choice relating to ocean biodiversity.

**Requirements/Evaluation:** Five 2-page papers, participation, and a 6-8 page final paper

**Prerequisites:** none, open to all students

**Enrollment Limit:** 20

**Enrollment Preferences:** 1. first years, 2. sophomores, 3. MAST concentrators

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 268(D2) MAST 268(D2)
MAST 311  (F)(S)  Marine Ecology

Cross-listings: BIOL 231 MAST 311

Primary Cross-listing

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.

Class Format: including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: none

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course is only offered through the Williams-Mystic Maritime Studies Program located in Mystic, CT. satisfies the distribution requirement for the Biology major.

Primary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.
Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 351(D2) MAST 351(D2) PSCI 319(D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

MAST 352 (F)(S) American Maritime History (DPE) (WS)

Cross-listings: HIST 352 MAST 352

Primary Cross-listing

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

Class Format: Seminars, discussions, and field seminars

Requirements/Evaluation: Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

Prerequisites: None

Enrollment Limit: 27

Enrollment Preferences: If course over-enrolls, preference will be given to sophomores and juniors

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: Offered only at Mystic Seaport

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352(D2) MAST 352(D2)
Writing Skills Notes: Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

MAST 402 (S) Senior Seminar: Perspectives on Environmental Studies (WS)
Cross-listings: MAST 402 ENVI 412
Secondary Cross-listing
The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice, and they will have opportunities throughout the semester to meet with guest speakers to discuss environmental work outside the academy.
Requirements/Evaluation: active participation, discussion leading, several smaller assignments and multi-step capstone project
Prerequisites: declared major/concentration in Environmental Studies or Maritime Studies, ideally to be taken in final semester at Williams
Enrollment Limit: 14
Enrollment Preferences: Environmental Studies majors and concentrators, Maritime Studies concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Unit Notes: required course for students wishing to complete the Maritime Studies concentration
Distributions: No divisional credit (WS)
This course is cross-listed and the prefixes carry the following divisional credit:

MAST 402 No divisional credit
ENVI 412 No divisional credit

Writing Skills Notes: This course is focused on building up cross-disciplinary writing and communication skills. There will be a multi-step capstone project that emphasizes writing, and there will be opportunities to revise and resubmit work.

Attributes: ENVI Core Courses  EVST Core Courses  EVST Senior Seminar

Not offered current academic year

MAST 404 (F) Coastal Processes and Geomorphology  (QFR)

Cross-listings: MAST 404  ENVI 404  GEOS 404

Secondary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces—wind, waves, storms, and people—that shape the coastal zone, as well as the geologic formations—sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs—that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, quizzes, and an independent research project

Prerequisites: Either GEOS 104 or GEOS 210; or permission of instructor. No prior knowledge is necessary, but this course does build on principles used to explore complex scientific challenges.

Enrollment Limit: 12

Enrollment Preferences: senior Geosciences majors, then juniors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major. This course counts toward the GEOS Group B Electives - Sediments + Life.

Distributions: (D3)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 404(D3)  ENVI 404(D3)  GEOS 404(D3)

Quantitative/Formal Reasoning Notes: This course will involve the use of MATLAB software to quantitatively analyze coastal process and geomorphological data.

Attributes: ENVI Natural World Electives  GEOS Group B Electives - Sediments + Life

**Spring 2024**

HON Section: 01  TBA  Nicolas C. Howe
Materials Science is an interdisciplinary field which combines microscopic physics and chemistry in order to understand and control the properties of materials such as plastics, semiconductors, metals, liquid crystals, and biomaterials. Williams students with an interest in the properties of materials or in pursuing careers in materials science or a variety of engineering disciplines would benefit from following the courses in this program.
MAJOR IN MATHEMATICS

The major in Mathematics is designed to meet two goals: to introduce some of the central ideas in a variety of areas of mathematics and statistics, and to develop problem-solving ability by teaching students to combine creative thinking with rigorous reasoning. Mathematics is a gateway to many career paths including statistics, teaching, consulting, business, engineering, finance, actuarial studies and applied mathematics. Students are strongly encouraged to consult with the department faculty on choosing courses appropriate to an individualized program of study.

REQUIREMENTS (9 courses plus colloquium)

The major in Mathematics consists of nine courses taken at Williams plus the colloquium requirement. Mathematics is highly cumulative, and students should plan a route to completing the major that ensures the proper sequencing and prerequisites for all needed courses. Note that not all upper level courses are offered every year.

Calculus (2 courses)

Mathematics 140 Calculus II

Mathematics 150 or 151 Multivariable Calculus
Applied/Discrete Mathematics/Statistics (1 course)
  or Mathematics 210 Mathematical Methods for Scientists (Same as Physics 210)
  or Mathematics 200 Discrete Mathematics
  or Statistics 201 Statistics and Data Analysis
  Mathematics 309 Differential Equations
  or a more advanced applied/discrete/statistics course with prior department approval

Core Courses (3 courses)
  Mathematics 250 Linear Algebra
  Mathematics 350 Real Analysis or Mathematics 351 Applied Real Analysis
  Mathematics 355 Abstract Algebra

Completion (3 courses plus colloquium)
  Two mathematics or statistics electives from courses numbered 300 and above
  One Senior Seminar: Any mathematics or statistics course numbered between 400 and 479, taken in the junior or senior year.
  Participation in the Department Colloquium, in which all senior majors present a talk on a mathematical or statistical topic of their choice. Each major must attend at least 20 colloquia (reduced to 15 during the Academic Year 2020-2021), and up to 5 attendances may be counted in their junior year. Students engaged in study away may petition the department in advance to count up to 5 suitable colloquia attendances from their study away program.

Pass/Fail policies during the Academic Year 2020-2021
  Information about the Department of Mathematics and Statistics Pass/Fail policies during the Academic Year 2020-2021 can be found here.

ADVANCED PLACEMENT
  Students who come to Williams with advanced placement will be moved up in the Mathematics major, and should consult with faculty to be placed in the best class reflecting their experience and background. A student who places out of a course substitutes another course of equal or higher level in Mathematics or Statistics to complete the nine course major. Students should select courses best suited to their preparation and goals, and consult with the department faculty concerning appropriate courses and placement. The department reserves the right to refuse registration in any course for which the student is overqualified.
  For Example, a student starting in MATH 130 might take MATH 130 and 140 the first year, MATH 150 and MATH 200 the second year, MATH 250 and MATH 350 the third year, MATH 355 and a senior seminar the fourth year, plus the two required electives some time. Students are encouraged to consult freely with any math faculty about course selection and anything else.

CALCULUS PLACEMENT
  Recommended placement for students who have taken an Advanced Placement Examination in Calculus (AB or BC) is:
    BC 1, 2 or AB 2, 3 Math 140
    AB 4 or 5 Math 150
    BC 3, 4 or 5 Math 151
  Consult with department faculty for any Calculus or Statistics placement questions. Students who have had calculus in high school, whether or not they took the Advanced Placement Examination, are barred from 130 unless they obtain permission from the instructor.

NOTES
  Substitutions, Study Abroad, and Transfer Credit: In some cases, and with prior permission of the Mathematics and Statistics Department, appropriate courses from other institutions or a course from another Williams department may be substituted for electives. Programs like the "Budapest Semester in Mathematics" are recommended for majors who wish to focus on mathematics away. The department, though, normally accommodates students who select other study away programs. The department offers its core courses in both the fall and the spring to allow students to spend more easily a semester away.
  Double Counting: No course may count towards two different majors.
  Planning Courses: Core courses Mathematics 350/351 and 355, are normally offered every year. Most other 300-level topics are offered in alternate years. Topology, Complex Analysis, and second courses in real analysis and abstract algebra are normally offered at least every other year.
Each 400-level topic is normally offered every two to four years. Students should check with the department before planning far into the future.

**Course Admission:** Courses are normally open to all students meeting the prerequisites, subject to any course caps. Students with questions about the level at which courses are conducted are invited to consult department faculty.

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in many cases, though students should be sure to contact the department.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description, and complete syllabus including readings/assignments.

**Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

No.

**Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

Yes. They have to be approved MATH/STAT courses.

**Are there specific major requirements that cannot be fulfilled while on study away?**

Yes. Colloquium requirement, Senior Seminar requirement.

**Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

Yes. The highly cumulative structure of the major.

**Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:**

None to date.

**THE DEGREE WITH HONORS IN MATHEMATICS**

The degree with honors in Mathematics is awarded to the student who has demonstrated outstanding intellectual achievement in a program of study which extends beyond the requirements of the major. The principal considerations for recommending a student for the degree with honors will be: Mastery of core material and skills, breadth and, particularly, depth of knowledge beyond the core material, ability to pursue independent study of mathematics or statistics, originality in methods of investigation, and, where appropriate, creativity in research.

An honors program normally consists of two semesters (MATH/STAT 493 and 494) and a winter study (WSP 031) of independent research, culminating in a thesis and a presentation. Under certain circumstances, the honors work can consist of coordinated study involving a one semester (MATH/STAT 493 or 494) and a winter study (WSP 030) of independent research, culminating in a “minithesis” and a presentation. Note that during the Academic Year 2020-2021 the winter study requirement for thesis and “minithesis” is waved. At least one semester should be in addition to the major requirements, and thesis courses do not count as 400-level senior seminars.

An honors program in actuarial studies requires significant achievement on four appropriate examinations of the Society of Actuaries.

Highest honors will be reserved for the rare student who has displayed exceptional ability, achievement or originality. Such a student usually will have written a thesis, or pursued actuarial honors and written a mini-thesis. An outstanding student who writes a mini-thesis, or pursues actuarial honors and writes a paper, might also be considered. In all cases, the award of honors and highest honors is the decision of the Department.

**APPLIED MATHEMATICS TRACK**

Students interested in applied mathematics, engineering, or other sciences should consider:

- Mathematics 140 Calculus II
- Mathematics 150 or 151 Multivariable Calculus
- Statistics 201 Statistics and Data Analysis
- Mathematics 250 Linear Algebra
- Mathematics 351 Applied Real Analysis
- Mathematics 355 Abstract Algebra
Some programming or numerical analysis (e.g. MATH 361, 318T, or anything if you’ve had CSCI 134)

MATH 309 or Post-core Differential Equations/Numerical Methods

Senior seminar (e.g. Math Ecology MATH 410T or Mathematical Modeling MATH 433)

Other recommended courses: complex analysis, discrete mathematics (e.g. combinatorics or graph theory), operations research, optimization, probability, statistics, appropriate courses in Biology, Chemistry, Computer Science, Economics, Neuroscience, Physics, etc.

Williams has exchange and joint programs with good engineering schools. Interested students should consult the section on engineering near the beginning of the Bulletin and the Williams pre-engineering advisor for further information.

GRADUATE SCHOOL TRACK

Students interested in continuing their study of mathematics in graduate school should consider:

- Mathematics 140 Calculus II
- Mathematics 150 or 151 Multivariable Calculus
- Mathematics 250 Linear Algebra
- Mathematics 350 Real Analysis
- Mathematics 355 Abstract Algebra
- Complex Analysis
- Topology
- Some second semester analysis
- Some second semester algebra
- Some post-core geometry
- Thesis

[With prior permission, in unusual circumstances, senior seminar can be waived in favor of harder post-core electives.]

Students headed for graduate school generally take more than this relatively small number of courses required for a liberal arts major. Reading knowledge of a foreign language (French, German, or Russian) can be helpful.

Students interested in studying statistics in graduate school should take STAT 201, 346, 360, a 400 level statistics course and MATH 350/351 and 341 in addition to their other math requirements.

OTHER CAREER PATHS

- Other Graduate and Professional Schools: An increasing number of graduate and professional schools require mathematics and statistics as a prerequisite to admission or to attaining their degree. Students interested in graduate or professional training in business, medicine, economics, or psychology are advised to find out the requirements in those fields early in their college careers.

- Statistics and Actuarial Science: Students interested in statistics or actuarial science should consider Mathematics 341, Statistics courses, and Economics 255. Additionally, students should consider taking some number of the actuarial exams given by the Society of Actuaries, which can constitute part of an honors program in actuarial studies (see section on honors above).

- Teaching: Students interested in teaching mathematics at the elementary or secondary school level should consider courses on teaching, number theory, geometry, statistics, and practice as a tutor or teaching assistant. Winter study courses that provide a teaching practicum are also highly recommended. Consult the Program in Teaching (Professor Susan Engel) and the Office of Career Counseling.

- Business and Finance: Students interested in careers in business or finance should consider Mathematics 333 and Statistics courses. Since these courses address different needs, students should consult with the instructors to determine which seem to be most appropriate for individuals.

There are three types of 300-level courses. There are the core courses: Real Analysis, MATH 350/351, and Abstract Algebra Math 355. There are the “precore” courses, which do not have the core courses as prerequisites and have numbers 300-349. Finally, there are those courses that have an Abstract Algebra or Real Analysis prerequisite, which are numbered 360-399.
MATH 100 (W) Mathematics Immersion: The Beauty of Numbers  (QFR)
This course will be an introduction to logic and number theory, with emphasis throughout on mathematics as a way of thinking. Have you ever wondered what keeps your credit card information safe every time you buy something online? Number theory! Number Theory is one of the oldest branches of mathematics. In this course, we will discover the beauty and usefulness of numbers, from ancient Greece to modern cryptography. We will look for patterns, make conjectures, and learn how to prove these conjectures. Starting with nothing more than basic high school algebra, we will develop the logic and critical thinking skills required to realize and prove mathematical results. Topics to be covered include the meaning and content of proof, prime numbers, divisibility, rationality, modular arithmetic, Fermat's Last Theorem, the Golden ratio, Fibonacci numbers, coding theory, and unique factorization. This course is meant to give you an appreciation for numbers and mathematics and to enhance your logical reasoning skills. Although most people will not use calculus or geometry in their jobs or everyday lives, mathematics enhances our abilities to think logically and reason effectively. This skill is useful in all aspects of life. Number theory, in particular, is a great area of mathematics that allows one to jump in right away without a lot of pre-requisite knowledge. We will look at examples, look for patterns, make conjectures, and we will spend a lot of time learning how to rigorously prove those conjectures.

Class Format: Students will attend lecture Monday - Thursday mornings from 10am - noon. In the afternoons, students will attend interactive math labs from approximately 1 - 3 pm Monday - Thursday.

Requirements/Evaluation: Evaluation will be based on daily homework and activities, exams, projects, and participation in class and math labs.

Prerequisites: Permission of a dean.

Enrollment Limit: 20

Enrollment Preferences: Students who need to make up a deficiency.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Unit Notes: This course is designed to count for both full semester, Winter Study, and QFR credit. Once a dean approves enrollment, the Registrar's Office will register students in both MATH 100 and MATH 40.

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: We will be proving theorems and learning mathematical logic.

Not offered current academic year

MATH 102 (F) Foundations in Quantitative Skills
This course will strengthen a student's foundation in quantitative reasoning in preparation for the science curriculum and QFR requirements. The material will be at the college algebra/precalculus level, and covered in a tutorial format with students working in small groups with the professor. Access to this course is limited to placement by a quantitative skills counselor.

Requirements/Evaluation: homework, presentations during the tutorial meetings, and projects

Prerequisites: access to the course is limited to placement by a quantitative skills counselor

Enrollment Limit: 10

Enrollment Preferences: students who need most help with the quantitative reasoning

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Fall 2023

TUT Section: T1 TBA Julie C. Blackwood

MATH 119 (F) The Mathematics of Pandemics: From the Spread of Infections to Cost-Benefit Analyses of Responses  (QFR)
The goal of the class is to help students learn to ask the right questions, and to gather and analyze the data needed to answer them, to understand the covid pandemic and the worldwide responses. Through local experts and numerous guest speakers playing key roles in these problems, we will discuss numerous aspects, from mathematical models for virus propagation to analyzing the economic, educational, social and emotional consequences of lockdowns and social distancing; from moral and legal dilemmas created by the pandemic and responses to the international political scene and relations between countries. Offered as Math 119 or Math 312 (those taking as Math 312 will have some of the readings replaced with more
technical modeling papers and subsequent homework). Pre-requisites: None for Math 119; for Math 312 linear algebra is recommended.

Requirements/Evaluation: Homework, writing, class participation.

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: all students will have an equal chance; if possible none will be turned away.

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: We will discuss mathematical models and use statistics to analyze data.

Not offered current academic year

MATH 130 (F)(S) Calculus I (QFR)

Calculus permits the computation of velocities and other instantaneous rates of change by a limiting process called differentiation. The same process also solves "max-min" problems: how to maximize profit or minimize pollution. A second limiting process, called integration, permits the computation of areas and accumulations of income or medicines. The Fundamental Theorem of Calculus provides a useful and surprising link between the two processes. Subtopics include trigonometry, exponential growth, and logarithms.

Requirements/Evaluation: Weekly homework and quizzes, 2 exams during the semester, and one final

Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test); this is an introductory course for students who have not seen calculus before

Enrollment Limit: 50

Enrollment Preferences: first-year students

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students who have previously taken a calculus course may not enroll in MATH 130 without the permission of instructor

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This a calculus course.

Fall 2023
LEC Section: 01    MWF 8:00 am - 8:50 am     Lori A. Pedersen
LEC Section: 02    MWF 9:00 am - 9:50 am     Lori A. Pedersen

Spring 2024
LEC Section: 01    MWF 9:00 am - 9:50 am     Lori A. Pedersen

MATH 140 (F)(S) Calculus II (QFR)

Calculus answers two basic questions: how fast is something changing (the derivative) and how much is there (the integral). This course is about integration. and the miracle that unites the derivative and the integral (the Fundamental Theorem of Calculus.) Understanding calculus requires in part the understanding of methods of integration. This course will also solve equations involving derivatives ("differential equations") for population growth or pollution levels. Exponential and logarithmic functions and trigonometric and inverse functions will also play an important role. This course is the right starting point for students who have seen derivatives, but not necessarily integrals, before.

Requirements/Evaluation: homework, quizzes, and/or exams

Prerequisites: MATH 130 or equivalent; students who have received the equivalent of advanced placement of AB 4, BC 3 or higher may not enroll in MATH 140 without the permission of instructor

Enrollment Limit: 50

Enrollment Preferences: based on who needs calculus the soonest

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option
Unit Notes: students who have higher advanced placement must enroll in MATH 150 or above

Distributions:  (D3)  (QFR)

Quantative/Formal Reasoning Notes: This is a math class

Fall 2023
LEC Section: 01  MWF 8:00 am - 8:50 am  Bhagya Athukorallage
LEC Section: 02  MWF 9:00 am - 9:50 am  Bhagya Athukorallage

Spring 2024
LEC Section: 01  MWF 10:00 am - 10:50 am  Lori A. Pedersen

MATH 150  (F)(S)  Multivariable Calculus  (QFR)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives, multiple integrals. There is also a unit on infinite series, sometimes with applications to differential equations.

Requirements/Evaluation: Problem sets and exams

Prerequisites: MATH 140 or equivalent, such as satisfactory performance on an Advanced Placement Examination

Enrollment Limit: 50

Enrollment Preferences: Preference will be given to prospective math and stats majors, or students who need this as a course to serve as a prerequisite for other courses.

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Students with the equivalent of advanced placement of AB 4 or above should enroll in MATH 150, students with a BC 3 or higher should enroll in Math 151 when it is being offered, and Math 150 otherwise.

Distributions:  (D3)  (QFR)

Quantative/Formal Reasoning Notes: mathematics

Fall 2023
LEC Section: 01  MWF 10:00 am - 10:50 am  Stewart D. Johnson

Spring 2024
LEC Section: 01  MWF 10:00 am - 10:50 am  Mihai Stoiciu

MATH 151  (F)  Multivariable Calculus  (QFR)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives and multiple integrals. The goal of the course is Stokes Theorem, a deep and profound generalization of the Fundamental Theorem of Calculus. The difference between this course and MATH 150 is that MATH 150 covers infinite series instead of the theorems of vector calculus. Students with the equivalent of BC 3 or higher should enroll in MATH 151, as well as students who have taken the equivalent of an integral calculus and who have already been exposed to infinite series. For further clarification as to whether MATH 150 or MATH 151 is appropriate, please consult a member of the math/stat department.

Requirements/Evaluation: problem sets and exams

Prerequisites: AP BC 3 or higher or integral calculus with infinite series

Enrollment Limit: 50

Enrollment Preferences: First-years, sophomores, and juniors

Expected Class Size: 40
Grading: yes pass/fail option, yes fifth course option

Unit Notes: MATH 151 satisfies any MATH 150 prerequisite; credit will not be given for both MATH 150 and MATH 151

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course builds quantitative skills

Fall 2023
LEC Section: 01 MWF 9:00 am - 9:50 am Colin C. Adams
LEC Section: 02 MWF 10:00 am - 10:50 am Colin C. Adams
LEC Section: 03 MWF 11:00 am - 11:50 am Colin C. Adams

MATH 197 (F) Independent Study: Mathematics
Directed 100-level independent study in Mathematics.
Requirements/Evaluation: decided by the department
Prerequisites: permission of department
Enrollment Limit: 20
Enrollment Preferences: decided by the department
Expected Class Size: 1
Grading: yes pass/fail option, yes fifth course option

Enrollment Preferences: decided by the department
Expected Class Size: 1
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)

Spring 2024
IND Section: 01 TBA Cesar E. Silva

MATH 200 (F)(S) Discrete Mathematics (QFR)
In contrast to calculus, which is the study of continuous processes, this course examines the structure and properties of finite sets. Topics to be covered include mathematical logic, elementary number theory, mathematical induction, set theory, functions, relations, elementary combinatorics and probability, and graphs. Emphasis will be given on the methods and styles of mathematical proofs, in order to prepare the students for more advanced math courses.
Requirements/Evaluation: Fall: Homework, proof portfolio, group work, presentations, quizzes/exams, reflections. Spring: The grade will be based on homework and 4 exams.
Prerequisites: Calculus at the level of an AP course or Williams College Math 130 or 140. Students who have taken a 300-level or 400-level math course should obtain permission of the instructor before enrolling.
Enrollment Limit: 40

Enrollment Preferences: Preference given to first and second year students intending to major in mathematics or computer science.

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course involves developing the formal mathematical language of logic and set theory. It also involves using quantitative tools to solve problems relating to combinatorics, probability, and other fields of discrete mathematics.

MATH 210  (S)  Mathematical Methods for Scientists  (QFR)

Cross-listings: PHYS 210 MATH 210

Secondary Cross-listing

This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. An optional session in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: three hours per week

Requirements/Evaluation: several exams and weekly problem sets, all of which have a substantial quantitative component

Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

Enrollment Limit: 50

Enrollment Preferences: sophomores and juniors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
PHYS 210(D3) MATH 210(D3)

Quantitative/Formal Reasoning Notes: This course will have weekly problem sets using advanced calculus methods

Spring 2024
LEC Section: 01   TR 9:55 am - 11:10 am   Frederick W. Strauch

MATH 250  (F)(S)  Linear Algebra  (QFR)

Many social, political, economic, biological, and physical phenomena can be described, at least approximately, by linear relations. In the study of systems of linear equations one may ask: When does a solution exist? When is it unique? How does one find it? How can one interpret it geometrically? This course develops the theoretical structure underlying answers to these and other questions and includes the study of matrices, vector spaces, linear independence and bases, linear transformations, determinants and inner products. Course work is balanced between theoretical and computational, with attention to improving mathematical style and sophistication.

Requirements/Evaluation: homework and exams

Prerequisites: MATH 150/151 or MATH 200
Enrollment Limit: 60
Enrollment Preferences: Students who have officially declared a major that requires Math 250.
Expected Class Size: 40
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: In this course, students will engage in both quantitative and formal reasoning.

MATH 303 (F) Introduction to Dynamics, p-Adics, and Measure (QFR)
At its most basic level a dynamical system consists of a set of points and a transformation or map acting on the set (i.e., sending points in the set to other points in the set). In this setting we can already ask about the existence, and prevalence, of periodic points (points that come back to
themselves). One can also ask about the orbit of a point: the set of points that is obtained as one iteratively applies the transformation the point. An important dynamical notion that comes up here is that of chaos. The course will start by studying basic dynamical systems using notions from calculus. Then we will introduce the p-adic numbers and use them to study dynamical systems. The course will end with an exploration of the notion of measure and its connection with dynamical systems.

Requirements/Evaluation: Homework, class participation, exams.

Prerequisites: Math 250.

Enrollment Limit: 30

Enrollment Preferences: Juniors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Mathematics

Not offered current academic year

MATH 307 (S) Computational Linear Algebra (QFR)

Linear algebra is of central importance in the quantitative sciences, including application areas such as image and signal processing, data mining, computational finance, structural biology, and much more. When the problems must be solved computationally, approximation, round-off errors, convergence, and efficiency matter, and traditional linear algebra techniques may fail to succeed. We will adopt linear algebra techniques on a large scale, implement them computationally, and apply them to core problems in scientific computing. Topics may include: systems of linear and nonlinear equations; approximation and statistical function estimation; optimization; interpolation; data scraping; singular value decomposition; and more. This course could also be considered a course in numerical analysis or computational science.

Class Format: This course is taught in a flipped classroom format. Students read and watch lecture videos prior to each class session. The instructor uses class time for discussion and collaborative learning activities. This course will be a good fit for students with a strong interest in applied mathematics and a willingness to devote significant effort to learning/doing computer programming.

Requirements/Evaluation: Students will complete regularly assigned activities and problem sets. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor follows an "ungrading" scheme.

Prerequisites: MATH 250; CSCI 134 or equivalent prior experience with computer programming (in any language). These prerequisites will be strictly enforced.

Enrollment Limit: 24

Enrollment Preferences: Preference given to students who need to make use of linear algebra in their major fields of study. First-day attendance is required.

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course involves developing the formal mathematical language of linear algebra. It also involves using quantitative tools to solve problems relating to a wide range of applications in the physical and social sciences.

Not offered current academic year

MATH 308 (S) Mathematical and Computational Approaches to Social Justice (DPE) (QFR)

Cross-listings: MATH 308 AMST 363 STS 363

Primary Cross-listing

Civil rights activist, educator, and investigative journalist Ida B. Wells said that "the way to right wrongs is to shine the light of truth upon them." In this research-based tutorial, students will bring the vanguard of quantitative approaches to bear on issues of social justice. Each tutorial group will carry out a substantial project in an area such as criminal justice, education equity, environmental justice, health care equity, economic justice, or inclusion in arts/media. All students should expect to invest substantial effort in reading social justice literature and in acquiring new skills in data science.

Class Format: This is a research-based tutorial.

Requirements/Evaluation: To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor follows an "ungrading"
methodology.

**Prerequisites:** Across each 3 - 5 person tutorial group: multivariable calculus (e.g., Math 150/151), linear algebra (e.g., Math 250), statistics (e.g., Stat 161/201), computer programming (e.g., Comp 134), some working knowledge of or interest in social justice issues.

**Enrollment Limit:** 20

**Enrollment Preferences:** Students will be admitted in groups based on a proposal submitted prior to preregistration. The instructor is happy to facilitate formation of groups and to give feedback on draft proposals. Contact the instructor early, prior to preregistration.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
MATH 308(D3) AMST 363(D3) STS 363(D3)

**Difference, Power, and Equity Notes:** Students study issues of equity, diversity, and inclusion in areas such as criminal justice, arts/media, environmental justice, education, and health care, and along identity axes such as gender, race/ethnicity, disability status, and sexual orientation.

**Quantitative/Formal Reasoning Notes:** Students use multiple mathematical, statistical, and computational frameworks to acquire, model, and analyze real-world data.

Not offered current academic year

**MATH 309 (F)(S) Differential Equations** (QFR)
Ordinary differential equations (ODEs) frequently arise as models of phenomena in the natural and social sciences. This course presents core ideas of ODEs from an applied standpoint. Topics covered early in the course may include numerical solutions, separation of variables, integrating factors, and constant coefficient linear equations. Later, we will focus on nonlinear ODEs, for which it is usually impossible to find analytical solutions. Tools from dynamical systems will be introduced to allow us to obtain information about the behavior of the ODEs without explicitly knowing the solution.

**Requirements/Evaluation:** quizzes/exams, problem sets, participation

**Prerequisites:** MATH 150/151 and MATH 250

**Enrollment Limit:** 40

**Enrollment Preferences:** discretion of the instructor

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** 300-level mathematics course

Fall 2023
LEC Section: 01 TR 11:20 am - 12:35 pm Julie C. Blackwood

Spring 2024
LEC Section: 01 MWF 11:00 am - 11:50 am Bhagya Athukorallage

**MATH 311 (F) Advanced topics in applied mathematics** (QFR)
Applied mathematics is an expansive field that uses mathematical methods to explore problems that arise in biology, physics, engineering, and many other disciplines. In this course, we will explore a diversity of methods that may include stochastic processes, optimization, signal processing, and numerical analysis. We will also explore how these methods can be utilized to understand questions in other disciplines.

**Requirements/Evaluation:** This course will have some combination of problem sets, presentations, exams, and a final project

**Prerequisites:** Differential equations (Math 309) or permission of the instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** If over-enrolled, the instructor will request a statement of interest

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option
MATH 312  (F) The Mathematics of Pandemics: From the Spread of Infections to Cost-Benefit Analyses of Responses  (QFR)

The goal of the class is to help students learn to ask the right questions, and to gather and analyze the data needed to answer them, to understand the covid pandemic and the worldwide responses. Through local experts and numerous guest speakers playing key roles in these problems, we will discuss numerous aspects, from mathematical models for virus propagation to analyzing the economic, educational, social and emotional consequences of lockdowns and social distancing; from moral and legal dilemmas created by the pandemic and responses to the international political scene and relations between countries. Offered as Math 119 or Math 312 (those taking as Math 312 will have some of the readings replaced with more technical modeling papers and subsequent homework). Pre-requisites: None for Math 119; for Math 312 linear algebra is recommended.

Requirements/Evaluation:  Class participation, writing, homework problems.
Prerequisites:  Linear algebra recommended.
Enrollment Limit:  none
Enrollment Preferences:  all students will have an equal chance; if possible none will be turned away.
Expected Class Size:  30
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D3)  (QFR)
Quantative/Formal Reasoning Notes: We will discuss mathematical models and use statistics to analyze data.

MATH 313  (S) Introduction to Number Theory  (QFR)

The study of numbers dates back thousands of years, and is fundamental in mathematics. In this course, we will investigate both classical and modern questions about numbers. In particular, we will explore the integers, and examine issues involving primes, divisibility, and congruences. We will also look at the ideas of numbers and primes in more general settings, and consider fascinating questions that are simple to understand, but can be quite difficult to answer.

Requirements/Evaluation:  Problem sets and exams
Prerequisites:  MATH 250 or permission of instructor
Enrollment Limit:  30
Enrollment Preferences:  Students who have not taken Math 355 and seniors who need the course to complete the major and have no other options.
Expected Class Size:  30
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D3)  (QFR)
Quantative/Formal Reasoning Notes: This course requires working with various number systems, performing explicit computations, and proving mathematical results using logical reasoning practices.

MATH 314  (F) Cryptography  (QFR)

We will discuss some classical ciphers, current asymmetric cryptosystems (DES, AES, Rijndael), public key cryptosystems (RSA, Diffie-Hellman key exchange, ElGamal), and Error Correcting Codes. We will devote a substantial part of the semester covering the necessary mathematical background from number theory and asymptotic analysis. Time permitting, we may also discuss some special topics, such as primality testing (including the polynomial-time AKS algorithm), quantum computers, hash functions, digital signatures, zero-knowledge proofs, information theory, and elliptic curve cryptography.

Requirements/Evaluation:  exams, problem sets, quizzes
Prerequisites:  MATH 250 or permission of instructor.
Enrollment Limit:  30
Enrollment Preferences: Juniors and seniors.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: The course will contain mathematical proofs.

Fall 2023

LEC Section: 01    TF 2:35 pm - 3:50 pm     Leo Goldmakher

MATH 315 (S) Methods for Solving Diophantine Equations (QFR)

A Diophantine equation is an equation with integer (or rational) coefficients that is to be solved in integers (or rational numbers). A focus of study for hundreds of years, Diophantine analysis remains a vibrant area of research. It has yielded a multitude of beautiful results and has wide ranging applications in other areas of mathematics, in cryptography, and in the natural sciences. In this project-based tutorial, we will focus on studying and implementing various methods for solving previously unsolved infinite families of Diophantine equations. Depending on their interests, students may choose one or several methods to apply to open problems in the field. Please note that this tutorial will be held virtually.

Requirements/Evaluation: The grade for this course will be a combination of weekly problem sets, weekly oral presentations (approx. 15 min. each), quarterly self-reflections, and a final written project manuscript that will be continually edited throughout the semester (minimum of 5 pages).

Prerequisites: MATH 250 or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: Sophomores, Juniors, and Seniors based on a short questionnaire of interests. In the event of over-enrollment, preference will be given to those that need the course to graduate.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course requires working with various number systems, performing explicit computations, and proving mathematical results using logical reasoning practices.

Not offered current academic year

MATH 317 (F) Introduction to Operations Research (QFR)

In the first N math classes of your career, you can be misled as to what the world is truly like. How? You're given exact problems and told to find exact solutions. The real world is sadly far more complicated. Frequently we cannot exactly solve problems; moreover, the problems we try to solve are themselves merely approximations to the world! We are forced to develop techniques to approximate not just solutions, but even the statement of the problem. Additionally, we often need the solutions quickly. Operations Research, which was born as a discipline during the tumultuous events of World War II, deals with efficiently finding optimal solutions. In this course we build analytic and programming techniques to efficiently tackle many problems. We will review many algorithms from earlier in your mathematical or CS career, with special attention now given to analyzing their run-time and seeing how they can be improved. The culmination of the course is a development of linear programming and an exploration of what it can do and what are its limitations. For those wishing to take this as a Stats course, the final project must have a substantial stats component approved by the instructor.

Prerequisites: Linear Algebra (MATH 250) and one other 200-level or higher CSCI, MATH or STATS course, or permission of the instructor.

Requirements/Evaluation: homework, exams, projects

Prerequisites: MATH 150, MATH 250 and one other 200-level or higher CSCI, MATH or STATS course, or permission from the instructor.

Enrollment Limit: 40

Enrollment Preferences: Computer Science, Mathematics and Statistics majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: http://web.williams.edu/Mathematics/sjmiller/public_html/317/

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: 300 level mathematics course.
MATH 319  (S)  Integrative Bioinformatics, Genomics, and Proteomics Lab  (QFR)

Cross-listings:  CSCI 319 BIOL 319 MATH 319 CHEM 319 PHYS 319

Secondary Cross-listing

What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

Class Format: The lab for this course will meet for two afternoons per week. Some lab sessions will be shorter than 3 hours.

Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

Prerequisites:  BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Limit:  12

Enrollment Preferences:  seniors, then juniors, then sophomores

Expected Class Size:  12

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D3)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
CSCI 319(D3) BIOL 319(D3) MATH 319(D3) CHEM 319(D3) PHYS 319(D3)

Quantative/Formal Reasoning Notes: Through lab work, homework sets and a major project, students will learn or further develop their skills in programming in Python, and about the basis of Bayesian approaches to phylogenetic tree estimation.

MATH 321  (S)  Knot Theory  (QFR)

Take a piece of string, tie a knot in it, and glue the ends together. The result is a knotted circle, known as a knot. For the last 100 years, mathematicians have studied knots, asking such questions as, "Given a nasty tangled knot, how do you tell if it can be untangled without cutting it open?" Some of the most interesting advances in knot theory have occurred in the last ten years. This course is an introduction to the theory of knots. Among other topics, we will cover methods of knot tabulation, surfaces applied to knots, polynomials associated to knots, and relationships between knot theory and chemistry and physics. In addition to learning the theory, we will look at open problems in the field.

Requirements/Evaluation: problem sets, midterms, a paper and a final exam

Prerequisites:  MATH 250 or permission of instructor

Enrollment Limit:  30

Enrollment Preferences:  seniors, junior, sophomores, first year

Expected Class Size:  25

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D3)  (QFR)
Quantative/Formal Reasoning Notes: This is a quantitative course.

MATH 328 (S) Combinatorics (QFR)
Combinatorics is a branch of mathematics that focuses on enumerating, examining, and investigating the existence of discrete mathematical structures with certain properties. This course provides an introduction to the fundamental structures and techniques in combinatorics including enumerative methods, generating functions, partition theory, the principle of inclusion and exclusion, and partially ordered sets.

Class Format: interactive activities and discussion
Requirements/Evaluation: quizzes/exams, homework, activities
Prerequisites: “MATH 250, and MATH 200 or permission of instructor”
Enrollment Limit: 30
Enrollment Preferences: discretion of the instructor
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This is an upper level course in mathematics

Spring 2024

LEC Section: 01    TR 8:30 am - 9:45 am    Daniel Condon

MATH 329 (S) Discrete Geometry (QFR)
Discrete geometry is one of the oldest and most consistently vibrant areas of mathematics, stretching from the Platonic Solids of the ancient Greeks to the modern day applications of convex optimization and linear programming. In this tutorial we will learn about polygons and their higher-dimensional cousins, polyhedra and polytopes, and the various ways to describe, compute, and classify such objects. We will learn how these objects and ideas can be applied to other areas, from computation and optimization to studying areas of math like algebraic geometry. Throughout this course we will be engaging with mathematical work and literature from as old as 500 BCE and as recent as “posted to the internet yesterday.”

Requirements/Evaluation: Evaluation will be based primarily on participation, problem sets, oral presentations, a written midterm exam, an oral final exam, and a final project
Prerequisites: MATH 200 or Math 250, or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: First-years and sophomores
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: All of the content in this course is quantitative or formal reasoning.

Not offered current academic year

MATH 332 (F) Topics in Applied Linear Algebra (QFR)
This course focuses on applications of Linear Algebra. We will start with a review of the material covered in Math 250, then move on to more advanced topics and applications. We will cover Singular Value Decomposition (SVD), QR factorization, Cholesky factorization, Least Squares problems, the Taylor approximation, the Regression model, Clustering techniques, as well as Linear Dynamical Systems and some of their applications.

Requirements/Evaluation: Homework assignments and exams.
Prerequisites: Math 250
Enrollment Limit: 30
Enrollment Preferences: Mathematics Majors, Seniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This is an advanced mathematics course, building upon the core course Math 250 - Linear Algebra.

Fall 2023

LEC Section: 01    TR 11:20 am - 12:35 pm     Palak Arora

MATH 334 (F) Graph Theory (QFR)

A graph is a collection of vertices, joined together by edges. In this course, we will study the sorts of structures that can be encoded in graphs, along with the properties of those graphs. We'll learn about such classes of graphs as multi-partite, planar, and perfect graphs, and will see applications to such optimization problems as minimum colorings of graphs, maximum matchings in graphs, and network flows.

Requirements/Evaluation: problem sets, exams, and a short final project

Prerequisites: MATH 200 or MATH 250

Enrollment Limit: 30

Enrollment Preferences: Math majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course involves the writing of mathematical proofs.

Not offered current academic year

MATH 335 (F) Decisions, Games, and Evolutionary Dynamics (QFR)

Given goals, options, and uncertainty, how does one make a rational choice? What happens when we interact with others who are also choosing? How might this play out over time? We will first cover the principles of decision theory including preference, uncertainty, utility, imperfect information, and rational choice. The majority of the course will be spent on the main topics of game theory: sequential games, bimatrix games, parlor games, Nash equilibria, bargaining, repeated games, Bayesian belief, and signaling. Applying these principles to populations that evolve over time through variation, selection, and copying, we will develop basic models of the dynamics of evolution.

Class Format: lecture

Requirements/Evaluation: Weekly homework, midterm exams, and a final.

Prerequisites: Math 150/151 and Math 250. Some background in probability and differential equations is highly recommended.

Enrollment Limit: 35

Enrollment Preferences: Math majors.

Expected Class Size: 35

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Lots of math.

Not offered current academic year

MATH 338 (S) Intermediate Logic (QFR)

Cross-listings: MATH 338 PHIL 338

Secondary Cross-listing

In this course, we will begin with an in-depth study of the theory of first-order logic. We will first get clear on the formal semantics of first-order logic and various ways of thinking about formal proof: natural deduction systems, semantic tableaux, axiomatic systems and sequent calculi. Our main goal will
be to prove things about this logical system rather than to use this system to think about ordinary language arguments. In this way the goal of the course is significantly different from that of Logic and Language (PHIL 203). Students who have take PHIL 203 will have a good background for this class, but students who are generally comfortable with formal systems need not have taken PHIL 203. We will prove soundness and completeness, compactness, the Lowenheim-Skolem theorems, undecidability and other important results about first-order logic. As we go through these results, we will think about the philosophical implications of first-order logic. From there, we will look at extensions of and/or alternatives to first-order logic.

Possible additional topics would include: modal logic, the theory of counterfactuals, alternative representations of conditionals, the use of logic in the foundations of arithmetic and Godel's Incompleteness theorems. Student interest will be taken into consideration in deciding what additional topics to cover.

Requirements/Evaluation: problem sets and exams
Prerequisites: some class in which student has studied formal reasoning
Enrollment Limit: 20
Enrollment Preferences: Philosophy majors; juniors and seniors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
MATH 338(D2) PHIL 338(D2)

Quantitative/Formal Reasoning Notes: This is a class in Formal Logic. PHIL 203 satisfies the QFR requirement. If anything, this class will be significantly more formal.

Attributes: PHIL Contemp Metaphysics + Epistemology Courses

Not offered current academic year

MATH 340 Applications of Mathematics to the Real World (QFR)

Often for real world applications one does not need to find the optimal solution, which can be extremely difficult, but instead just find something close, or at least better than what is currently being done. We will develop material and techniques from mathematics, statistics and allied fields with an eye to applications. In addition to standard homework assignments and exams there will be a group project where students will work with a local business, write a report and present the results. Pre-requisites are multivariable calculus and linear algebra, or permission of the instructor. Knowledge of some statistics or programming is beneficial but not required.

Class Format: In addition to standard lectures and assignments, we will be partnering with local businesses to apply mathematics to solve real world problems.

Requirements/Evaluation: Lectures and class participation, homework, exams and encouragement to do a project. We already have several local businesses with projects for students. Working on a project will entail meeting with officials from the company, clearly defining what the problem is, and writing a solution. This will include a presentation, a write-up, and potentially implementable code. Based on previous similar courses, these papers typically run from 10 to 40 pages.

Prerequisites: Mathematics 150 or 151, and Linear Algebra, or permission of the instructor.

Enrollment Limit: 40

Enrollment Preferences: Students who have taken at least one statistics or computer science class

Expected Class Size: 25

Grading:

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This is a 300 level mathematics class

Not offered current academic year

MATH 341 (F)(S) Probability (QFR)

Cross-listings: MATH 341 STAT 341

Primary Cross-listing

The historical roots of probability lie in the study of games of chance. Modern probability, however, is a mathematical discipline that has wide
applications in a myriad of other mathematical and physical sciences. Drawing on classical gaming examples for motivation, this course will present
axiomatic and mathematical aspects of probability. Included will be discussions of random variables (both discrete and continuous), distribution and expectation, independence, laws of large numbers, and the well-known Central Limit Theorem. Many interesting and important applications will also be presented, including some from classical Poisson processes, random walks and Markov Chains.

Requirements/Evaluation: homework, classwork, and exams
Prerequisites: MATH 150 and MATH 250 or permission of the instructor
Enrollment Limit: 50
Enrollment Preferences: Priority will be given to Mathematics majors and to Statistics Majors.
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
MATH 341(D3) STAT 341(D3)

Quantitative/Formal Reasoning Notes: This is a 300-level Math/Stat course.

Fall 2023
LEC Section: 01 TR 9:55 am - 11:10 am Thomas A. Garrity

Spring 2024
LEC Section: 01 TR 11:20 am - 12:35 pm Thomas A. Garrity

MATH 342 (F) Logic (QFR)
This course will introduce the main ideas and basic results of mathematical logic, and explain their applications to other areas of mathematics and computer science. We will begin with a study of first-order logic, covering structures and definability, theories, models and categoricity, as well as formal proofs. We will prove Gödel's completeness and compactness theorems and the Lowenheim-Skolem theorems. The course will briefly dive into computability theory, enough to prove Gödel's Incompleteness theorems and basic undecidability results.

Requirements/Evaluation: Evaluation based on homework, exams, and class participation.
Prerequisites: Math 250 - Linear Algebra
Enrollment Limit: 20
Enrollment Preferences: Junior and Senior Math Majors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Mathematics course in logic and applications.

Not offered current academic year

MATH 344 (S) The Mathematics of Sports (QFR)
The purpose of this class is to use sports as a springboard to study applications of mathematics, especially in gathering data to build and test models and develop predictive statistics. Examples will be drawn from baseball, basketball, cross country, football, hockey, soccer, track, as well as class choices. Pre-requisites are linear algebra (Math 250) and either a 200 level statistics class or a 100 level programming class, or permission of the instructor.

Requirements/Evaluation: Homework, exams, projects
Prerequisites: Math 250: Linear Algebra
Enrollment Limit: 40
Enrollment Preferences: None. If the course is over-enrolled preference will be given to math and stats majors, and then if needed by performance on a small assignment.
Expected Class Size: 30
MATH 345 (S) Introduction to Numerical Analysis (QFR)

Numerical analysis is the study of algorithms that use numerical approximation to solve problems which arise in scientific applications. This course provides an introduction to the theory, development, and analysis of algorithms for obtaining numerical solutions. Topics discussed in the course include: Error Analysis and Convergence Rates of Algorithms; Root Finding for Nonlinear Equations; Approximating Functions using Lagrange Interpolation and Cubic Spline Approximation; Numerical Differentiation and Integration; Numerical Solution of Ordinary Differential Equations; Iterative Methods for Solving Linear Systems

Requirements/Evaluation: Evaluation will be based on homework, projects, and exams.

Prerequisites: Math 250

Enrollment Limit: 30

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This is an advanced mathematics class that will cover the fundamental ideas of Numerical Analysis. The students will study in depths various algorithms that provide numerical solutions to various questions in science.

Not offered current academic year

MATH 349 (F) Operations of Order (WS) (QFR)

One of the greatest challenges in mathematics is justifying interchanging orders of operations. Most of the time you cannot switch orders. Frequently this is obvious: the square root of a sum is typically not the sum of the square roots; however, there are many important situations where orders can be reversed. The purpose of this class is to highlight some of the difficulties and dangers in such attempts. This will be a writing intensive course, where we work on content for a book that collects counter-examples and theorems in one convenient place while also showcasing the utility of switching orders. We will discuss at great lengths how to do engaging, technical writing, keeping in mind the content and the audience. Students will receive feedback from the professor and probably other professional mathematicians and editors.

Requirements/Evaluation: Mix of homework, exams, and writing, including at least one chapter (consisting of theory, examples, images, homework problem creation and solutions).

Prerequisites: Math 250 or permission of the instructor.

Enrollment Limit: 19

Enrollment Preferences: If over-enrolled, students will be chosen uniformly at random.

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (WS) (QFR)

Writing Skills Notes: Students will be working closely with me and colleagues, receiving feedback on their writing from numerous sources (myself, editors, experts in the field), and their work will be part of the final, published manuscript. We will have numerous discussions about how to write, taking into account the audience and the content.

Quantitative/Formal Reasoning Notes: This is a 300 level math course.

Fall 2023

LEC Section: 01 MWF 10:00 am - 10:50 am Steven J. Miller

MATH 350 (F)(S) Real Analysis (QFR)
Why is the product of two negative numbers positive? Why do we depict the real numbers as a line? Why is this line continuous, and what do we mean when we say that? Perhaps most fundamentally, what is a real number? Real analysis addresses such questions, delving into the structure of real numbers and functions of them. Along the way we'll discuss sequences and limits, series, completeness, compactness, derivatives and integrals, and metric spaces. Results covered will include the Cantor-Schroeder-Bernstein theorem, the monotone convergence theorem, the Bolzano-Weierstrass theorem, the Cauchy criterion, Dirichlet's and Riemann's rearrangement theorem, the Heine-Borel theorem, the intermediate value theorem, and many others. This course is excellent preparation for graduate studies in mathematics, statistics, and economics.

Requirements/Evaluation: Problem sets, oral exams, and possibly a take-home exam and/or an expository essay.

Prerequisites: MATH 250 or permission of instructor.

Enrollment Limit: 40

Enrollment Preferences: Juniors and Seniors.

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: It's math.

Fall 2023
LEC Section: 01  MR 2:35 pm - 3:50 pm  Leo Goldmakher

Spring 2024
LEC Section: 01  MWF 11:00 am - 11:50 am  Mihai Stoiciu

MATH 351  (S)  Applied Real Analysis  (QFR)
This course is designed to introduce students to the underpinnings of real analysis, primarily in the context of Fourier series. By the end of the semester people will be comfortable making epsilon and delta type arguments. These types of arguments are one of the main pillars of modern mathematics. In a similar way, Fourier series and their generalizations are one of the pillars of the modern digital world.

Requirements/Evaluation: homework, classwork, and exams

Prerequisites: MATH 150 and MATH 250 or permission of the instructor.

Enrollment Limit: 50

Enrollment Preferences: Seniors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Math

Spring 2024
LEC Section: 01  TR 9:55 am - 11:10 am  Thomas A. Garrity

MATH 355  (F)(S)  Abstract Algebra  (QFR)
Algebra gives us tools to solve equations. The integers, the rationals, and the real numbers have special properties which make algebra work according to the circumstances. In this course, we generalize algebraic processes and the sets upon which they operate in order to better understand, theoretically, when equations can and cannot be solved. We define and study abstract algebraic structures such as groups, rings, and fields, as well as the concepts of factor group, quotient ring, homomorphism, isomorphism, and various types of field extensions. This course introduces students to abstract rigorous mathematics.

Requirements/Evaluation: Problem sets and exams

Prerequisites: MATH 250 or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: Students who have officially declared a major that requires Math 355.
**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** 300-level math course

**MATH 361 (S) Theory of Computation (QFR)**

**Cross-listings:** CSCI 361 MATH 361

**Secondary Cross-listing**

This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory--the examination of what problems can be solved and what problems cannot be solved--and the study of complexity theory--the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

**Class Format:** Students should sign up for lecture and one conference section.

**Requirements/Evaluation:** online multiple choice and short answer questions, weekly problem sets in groups, a research project, and a final examination

**Prerequisites:** CSCI 256 or both a 300-level MATH course and permission of instructor

**Enrollment Limit:** 60; 12/con

**Enrollment Preferences:** current or expected Computer Science majors

**Expected Class Size:** 60

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

CSCI 361(D3) MATH 361(D3)

**Quantitative/Formal Reasoning Notes:** This course include regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

**Attributes:** COGS Interdepartmental Electives

**MATH 374 (F) Topology (QFR)**

In Real Analysis you learned about metric spaces—any set of objects endowed with a way of measuring distance—and the topology of sets in such spaces (open, closed, bounded, etc). In this course we flip this on its head: we explore how to develop analysis (limits, continuity, etc) in spaces where the topology is known but the metric is not. This will lead us to a bizarre and fascinating version of geometry in which we cannot distinguish between
Shapes that can be continuously deformed into one another. Not only does this theory turn out to be beautiful in the abstract, it plays an important role in math, physics, and data analysis. This course is excellent preparation for graduate programs in mathematics.

Requirements/Evaluation: Problem sets, exams, an expository essay.

Prerequisites: MATH 350 or 351; not open to students who have taken MATH 323. If you didn't cover metric spaces in real analysis, that's OK!

Enrollment Limit: 30

Enrollment Preferences: Juniors and seniors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: It's math.

Not offered current academic year

**MATH 382 (S) Fourier Analysis** (QFR)

Fourier analysis is the study of waves and frequencies. More precisely, the goal of Fourier analysis is to decompose a complicated function into a simple combination of pure waves, thereby gleaning insight into the behavior of the function itself. It's difficult to overstate the impact of this branch of mathematics; it is foundational throughout theoretical mathematics (e.g., to study the distribution of prime numbers), applied mathematics (e.g., to solve differential equations), physics (e.g., to study properties of light and sound), computer science (e.g., to compute with large integers and matrices), audio engineering (e.g., to pitch-correcting algorithms), medical science (e.g., throughout radiology), etc. The goal of this course is to cover the basic theory (fourier series, the fourier transform, the fast fourier transform) and explore a number of applications, including Dirichlet's theorem on primes in arithmetic progressions, the isoperimetric inequality, the heat equation, and Heisenberg's uncertainty principle.

Class Format: Every week, each student will either give a lecture (based on provided readings) or explain solutions to selected problems.

Requirements/Evaluation: Evaluation will be based on lectures and presentation of problem solutions.

Prerequisites: MATH 350 or MATH 351 or permission of instructor.

Enrollment Limit: 10

Enrollment Preferences: By lottery.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: It's math!

Spring 2024

TUT Section: T1 TBA Leo Goldmakher

**MATH 383 (F) Complex Analysis** (QFR)

The calculus of complex-valued functions turns out to have unexpected simplicity and power. As an example of simplicity, every complex-differentiable function is automatically infinitely differentiable. As examples of power, the so-called "residue calculus" permits the computation of "impossible" integrals, and "conformal mapping" reduces physical problems on very general domains to problems on the round disc. The easiest proof of the Fundamental Theorem of Algebra, not to mention the first proof of the Prime Number Theorem, used complex analysis.

Requirements/Evaluation: homework, classwork, and exams

Prerequisites: MATH 350 or MATH 351 or permission of instructor

Enrollment Limit: 40

Enrollment Preferences: 40

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course is not a senior seminar, so it does not fulfill the senior seminar requirement for the Math major

Distributions: (D3) (QFR)
MATH 390  Undergraduate Research Topics in Algebra  (QFR)
The well-known trace map on matrices can be generalized to a map on other algebraic objects. Undergraduates, graduates students and experts in Representation Theory, Commutative Algebra and Algebraic Geometry have been driving recent developments in the theory of trace modules and finding exciting new applications in all of these these fields. This course will serve as an introduction to mathematical research with the aim of producing original research in modern trace theory. Students in this tutorial will read and synthesize research papers, discuss the formation of research questions in pure mathematics, and engage in original mathematical research.

Requirements/Evaluation: oral presentations; writing assignments (summarizing papers, reflections on mathematical research, original research); participation in the course project
Prerequisites: Math 355
Enrollment Limit: 10
Enrollment Preferences: Juniors and Seniors
Expected Class Size: 7
Grading: (D3)  (QFR)

Quantative/Formal Reasoning Notes: This is post-core math class; students will be required to produce mathematical proofs.
Not offered current academic year

MATH 391  (F)  Introduction to computer algebra  (QFR)
Students will learn new mathematics in the context of computer-based exposition, experimentation, and interaction. They will gain proficiency with Sage, GAP, Macaulay2, or Mathematica, and possibly one of the more-specialized systems SnapPea, kenzo, magma, MATLAB, Perseus, coq, etc. Individuals and teams will build interactive demonstrations of mathematical theorems, which will then be appreciated by the instructor and the rest of the class. No prior programming experience is expected.

Requirements/Evaluation: exams, homework, projects
Prerequisites: Math 355 or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: math majors
Expected Class Size: 15
Grading: yes pass/fail option, no fifth course option
Distributions: (D3)  (QFR)

Quantative/Formal Reasoning Notes: Mathematical programming requires complete synthesis of abstract concepts to produce computer code, which is necessarily formal.
Not offered current academic year

MATH 392  (S)  Undergraduate Research Topics in Graph Theory  (WS)  (QFR)
Graph theory is a vibrant area of research with many applications to the social sciences, psychology, and economics. In this project-based tutorial, students will select among the presented topics and will develop research questions and undertake original research in the field. Student assessment is based on drafts of research project manuscript and presentations.

Requirements/Evaluation: presentations and written project manuscript
Prerequisites: MATH 355 or permission of the instructor
Enrollment Limit: 10
Enrollment Preferences: programming experience, students with interests in the intersection of combinatorics and graph theory

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS) (QFR)

Writing Skills Notes: This course will require multiple revisions of a manuscript related to the research project at hand. The final result will be a 10-20 page research article and the course will be designed as a writing intensive course.

Quantitative/Formal Reasoning Notes: The course deals with mathematical research in graph theory and is a quantitative and formal reasoning course.

Not offered current academic year

MATH 393 (S) Research Topics in Combinatorics (WS) (QFR)

Combinatorics provides techniques and tools to enumerate, examine, and investigate the existence of discrete mathematical structures with certain properties. There are numerous areas of applications including algebra, discrete geometry, and number theory. In this project-based research course students will work in small groups to learn combinatorial techniques and tools in order to develop research questions and begin tackling unsolved problems in combinatorics.

Requirements/Evaluation: Students will be evaluated through written drafts of a manuscript and its revisions and multiple in-class presentation.

Prerequisites: Math 355

Enrollment Limit: 19

Enrollment Preferences: Post-core mathematics majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS) (QFR)

Writing Skills Notes: The main goal of this course is to undertake original research in combinatorics, as such student assessment is based on developing positive collaboration skills, and improving technical written and oral skills in mathematics through manuscript draft submissions and in-class presentations. Students will provide multiple drafts of their manuscript and in right of this the course will be writing intensive.

Quantative/Formal Reasoning Notes: The main goal of this course is to undertake original research in the math field of mathematics. See above for more details.

Not offered current academic year

MATH 394 (S) Galois Theory (QFR)

Some equations--such as \( x^5-1=0 \)--are easy to solve. Others--such as \( x^5-x-1=0 \)--are very hard, if not impossible (using finite combinations of standard mathematical operations). Galois discovered a deep connection between field theory and group theory that led to a criterion for checking whether or not a given polynomial can be easily solved. His discovery also led to many other breakthroughs, for example proving the impossibility of squaring the circle or trisecting a typical angle using compass and straightedge. From these not-so-humble beginnings, Galois theory has become a fundamental concept in modern mathematics, from topology to number theory. In this course we will develop the theory and explore its applications to other areas of math.

Requirements/Evaluation: problem sets and oral exams

Prerequisites: MATH 355

Enrollment Limit: 30

Enrollment Preferences: Juniors and seniors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

MATH 401  (S)  Functional Analysis  (QFR)
Functional analysis can be viewed as linear algebra on infinite-dimensional spaces. It is a central topic in Mathematics, which brings together and
extends ideas from analysis, algebra, and geometry. Functional analysis also provides the rigorous mathematical background for several areas of
theoretical physics (especially quantum mechanics). We will introduce infinite-dimensional spaces (Banach and Hilbert spaces) and study their
properties. These spaces are often spaces of functions (for example, the space of square-integrable functions). We will consider linear operators on
Hilbert spaces and investigate their spectral properties. A special attention will be dedicated to various operators arising from mathematical physics,
especially the Schrodinger operator.

Class Format: lecture
Requirements/Evaluation: weekly problem sets, two midterm exams, final exam
Prerequisites: MATH 350 or 351 or permission of instructor
Enrollment Limit: 40
Enrollment Preferences: Mathematics and Physics majors; seniors
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)  (QFR)

Quantitative/Formal Reasoning Notes: This is an advance course in Mathematical Analysis.
Not offered current academic year

MATH 402  (F)  Measure Theory and Hilbert Spaces  (QFR)
How large is the unit square? One might measure the number of individual points in the square (uncountably infinite), the area of the square (1), or the
dimension of the square (2). But what about for more complicated sets, e.g., the set of all rational points in the unit square? What's the area of this
set? What's the dimension? In this course we'll come up with precise ways to measure size -- length, area, volume, dimension -- that apply to a broad
array of sets. Along the way we'll encounter Lebesgue measure and Lebesgue integration, Hausdorff measure and fractals, space-filling curves and
the Banach-Tarski paradox. We will also investigate Hilbert spaces, mathematical objects that combine the tidiness of linear algebra with the power of
analysis and are fundamental to the study of differential equations, functional analysis, harmonic analysis, and ergodic theory, and also apply to fields
like quantum mechanics and machine learning. This material provides good preparation for graduate studies in mathematics, statistics and economics.
Class Format: Discussion-based course.
Requirements/Evaluation: performance on homework assignments and exams
Prerequisites: MATH 350 or MATH 351 or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: Seniors
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: Math
Not offered current academic year

MATH 405 (S) Representation Theory and Special Functions (QFR)

Representation theory is at the heart of much of modern mathematics. It provides a link between ideas of symmetries, groups and matrices. It has applications from number theory to Fourier Analysis to elementary particle theory. In part, representation theory is a method for producing interesting functions. While not having a single definition, special functions are "functions that have names." Over the last few hundred years, scientists have needed to define and develop certain families of functions, in order to describe different physical phenomena. These families started to be named, and include Bessel functions, Hermite functions, Laguerre functions and more generally hypergeometric functions. In recent years it has been seen that these different types of functions are best understood through the lens of symmetry and in particular via representation theory. This course will be an introduction to representation theory, starting with finite groups, while at the same time being an introduction to special functions. Thus the course will be a mix of abstract algebra, matrices, calculus and analysis.

Requirements/Evaluation: By exams and homework
Prerequisites: Math 350 or Math 351, and Math 355
Enrollment Limit: 50
Enrollment Preferences: By instructor preference
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This is a math course
Not offered current academic year

MATH 407 (F) Dance of the Primes (QFR)

Prime numbers are the building blocks for all numbers and hence for most of mathematics. Though there are an infinite number of them, how they are spread out among the integers is still quite a mystery. Even more mysterious and surprising is that the current tools for investigating prime numbers involve the study of infinite series. Function theory tells us about the primes. We will be studying one of the most amazing functions known: the Riemann Zeta Function. Finding where this function is equal to zero is the Riemann Hypothesis and is one of the great, if not greatest, open problems in mathematics. Somehow where these zeros occur is linked to the distribution of primes. We will be concerned with why anyone would care about this conjecture. More crassly, why should solving the Riemann Hypothesis be worth one million dollars? (Which is what you will get if you solve it, beyond the eternal fame and glory.)

Requirements/Evaluation: exams and weekly homework assignments
Prerequisites: MATH 350 or MATH 351, and MATH 355
Enrollment Limit: 30
Enrollment Preferences: seniors
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
MATH 408 (F) L-Functions and Sphere Packing (QFR)

Optimal packing problems arise in many important problems, and have been a source of excellent mathematics for centuries. The Kepler Problem (what is the most efficient way to pack balls in three-space) is a good example. The original formulation has been used in such diverse areas as stacking cannonballs on battleships to grocers preparing fruit displays, and its generalizations allow the creation of powerful error detection and correction codes. While the solution of the Kepler Problem is now known, the higher dimensional version is very much open. There has been remarkable progress in the last few years, with number theory playing a key role in these results. We will develop sufficient background material to understand many of these problems and the current state of the field. Pre-requisites are real analysis.

Requirements/Evaluation: Class participation, homework, exams and participation in writing a textbook on the material. Each student will be responsible for working on a chapter of a book based on this material. In addition to obtaining critical writing feedback from myself and my co-author (who is a world expert in the subject), depending on timing we will also be able to share comments from an editor of a major publishing house or a referee. Chapters can range from short snapshots of a subject, on the order of 5 pages, to longer technical derivations of perhaps 10-30 pages.

Prerequisites: Math 350 or 351

Enrollment Limit: 40

Enrollment Preferences: Senior math majors, students planning on graduate study in a STEM field

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is a 400 level math class

Not offered current academic year

MATH 409 (F) The Little Questions (QFR)

Using math competitions such as the Putnam Exam as a springboard, in this class we follow the dictum of the Ross Program and “think deeply of simple things”. The two main goals of this course are to prepare students for competitive math competitions, and to get a sense of the mathematical landscape encompassing elementary number theory, combinatorics, graph theory, and group theory (among others). While elementary frequently is not synonymous with easy, we will see many beautiful proofs and ‘a-ha’ moments in the course of our investigations. Students will be encouraged to explore these topics at levels compatible with their backgrounds.

Requirements/Evaluation: Homework, exams, presentations.

Prerequisites: Real Analysis (either Math 350 or 351) and Abstract Algebra (Math 355), or permission of the instructor.

Enrollment Limit: 30

Enrollment Preferences: Math/stat senior majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is a 400 level math class.

Not offered current academic year

MATH 411 (F) Commutative Algebra (QFR)

Commutative Algebra is an essential area of mathematics that provides indispensable tools to many areas, including Number Theory and Algebraic Geometry. This course will introduce you to the fundamental concepts for the study of commutative rings, with a special focus on the notion of “prime ideals,” and how they generalize the well-known notion of primality in the set of integers. Commutative algebra has applications ranging from algebraic geometry to coding theory. For example, one can use commutative algebra to create error correcting codes. It is perhaps most often used, however, to study curves and surfaces in different spaces. To understand these structures, one must study polynomial rings over fields. This course will be an
introduction to commutative algebra. Possible topics include polynomial rings, localizations, primary decomposition, completions, and modules.

**Requirements/Evaluation:** homework and exams

**Prerequisites:** MATH 355 or permission of instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** Math majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** It is a 400-level math course

Not offered current academic year

---

**MATH 412 (S) Mathematical Biology (QFR)**

This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications may include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

**Requirements/Evaluation:** problem sets, quizzes/exams, participation, final project and paper

**Prerequisites:** MATH 250 and MATH 309, or permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** preference for senior math/stats major and also based on an interest statement

**Expected Class Size:** 30

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** The course will introduce methods for developing and analyzing mathematical models.

**Attributes:** PHLH Methods in Public Health

Not offered current academic year

---

**MATH 413 (S) Computational Algebraic Geometry (QFR)**

Algebraic geometry is the study of shapes described by polynomial equations. It has been a major part of mathematics for at least the past two hundred years, and has influenced a tremendous amount of modern mathematics, ranging from number theory to robotics. In this course, we will develop the Ideal-Variety Correspondence that ties geometric shapes to abstract algebra, and will use computational tools to explore this theory in a very explicit way.

**Requirements/Evaluation:** Evaluation will be based on weekly problem sets, three exams, and final project. Any students who have taken Math 411 should consult with the instructor before enrolling in this course.

**Prerequisites:** Math 355

**Enrollment Limit:** 30

**Enrollment Preferences:** Preference given to senior math majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course is all quantitative and formal reasoning.

Not offered current academic year

---

**MATH 415 (F) Advanced Matrix Analysis (QFR)**
This course will start with a review of various attributes of matrices (determinants, rank, etc), as well as eigenvalues, eigenvectors, and their properties. Then we will move on to study special matrices and their decompositions, along with similarities, and Jordan canonical forms. In the third segment, we will define norms on vectors and matrices and study their analytic properties. Finally, we will discuss another important class of matrices - positive definite and semidefinite matrices. If time permits, we will also cover positive and negative matrices and their properties.

**Requirements/Evaluation:** Homework assignments and exams.

**Prerequisites:** Math 350/351 or permission of instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** Mathematics and Statistics Majors, Seniors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This is an advanced mathematics class that covers complex properties of matrices and some of their applications.

---

**MATH 419 (F) Algebraic Number Theory (QFR)**

We all know that integers can be factored into prime numbers and that this factorization is essentially unique. In more general settings, it often still makes sense to factor numbers into "primes," but the factorization is not necessarily unique! This surprising fact was the downfall of Lamé's attempted proof of Fermat's Last Theorem in 1847. Although a valid proof was not discovered until over 150 years later, this error gave rise to a new branch of mathematics: algebraic number theory. In this course, we will study factorization and other number-theoretic notions in more abstract algebraic settings, and we will see a beautiful interplay between groups, rings, and fields.

**Requirements/Evaluation:** homework assignments and exams

**Prerequisites:** MATH 355, or permission of instructor

**Enrollment Limit:** 25

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

---

**MATH 420 (S) Analytic Number Theory (QFR)**

How many primes are smaller than x? How many divisors does an integer n have? How many different numbers appear in the N x N multiplication table? Precise formulas for these quantities probably don't exist, but over the past 150 years tremendous progress has been made towards understanding these and similar questions using tools and methods from analysis. The goal of this tutorial is to explain and motivate the ubiquitous appearance of analysis in modern number theory—a surprising fact, given that analysis is concerned with continuous functions, while number theory is concerned with discrete objects (integers, primes, divisors, etc). Topics to be covered will include some subset of the following: asymptotic analysis, partial and Euler-Maclaurin summation, counting divisors and Dirichlet's hyperbola method, the randomness of prime factorization and the Erdos-Kac theorem, the partition function and the saddle point method, the prime number theorem and the Riemann zeta function, primes in arithmetic progressions and Dirichlet L-functions, the Goldbach conjecture and the circle method, and sieve methods and gaps between primes.

**Requirements/Evaluation:** Regularly preparing lectures and writing expository essays in LaTeX. No exams.

**Prerequisites:** MATH 350 or MATH 351 and familiarity with basic modular arithmetic are hard prerequisites. Familiarity with complex analysis and abstract algebra recommended, but not required.

**Enrollment Limit:** 10
Enrollment Preferences: Students with complex analysis background will be given priority.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: It's math.

Not offered current academic year

MATH 427 (S) Tiling Theory (QFR)

Since people first used stones and bricks to tile the floors of their domiciles, tiling has been an area of interest. Practitioners include artists, engineers, designers, architects, crystallographers, scientists and mathematicians. This course will be an investigation into the mathematical theory of tiling. The course will focus on tilings of the plane, including topics such as the symmetry groups of tilings, types of tilings, random tilings, the classification of tilings and aperiodic tilings. We will also look at tilings of the sphere, tilings of the hyperbolic plane, and tilings in in higher dimensions, including "knotted tilings".

Requirements/Evaluation: problem assignments, exams and a presentation/paper

Prerequisites: MATH 250 Linear Algebra and MATH 355 Abstract Algebra

Enrollment Limit: 30

Enrollment Preferences: senior majors, seniors, juniors, sophomores, first-year students (this is a senior seminar, one of which is required for all senior majors, so they have first preference)

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Mathematics course

Not offered current academic year

MATH 433 (S) Mathematical Modeling (QFR)

Mathematical modeling means (1) translating a real-life problem into a mathematical object, (2) studying that object using mathematical techniques, and (3) interpreting the results in order to learn something about the real-life problem. Mathematical modeling is used in biology, economics, chemistry, geology, sociology, political science, art, and countless other fields. This is an advanced, seminar-style, course appropriate for students who have strong enthusiasm for applied mathematics, data science, and collaborative teamwork.

Requirements/Evaluation: Students will complete reading assignments, writing assignments, modeling activities, research projects, and will record several presentations to be shared with the rest of the class. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor follows the policy of "ungrading." Over the course of the semester, students will develop a rubric to assess their own learning and will evaluate themselves according to this rubric.

Prerequisites: MATH 250; MATH 309 or similar; and some experience with computer programming (equivalent to CSCI 134 or MATH 307).

Enrollment Limit: 20

Enrollment Preferences: Professor's discretion

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course focuses substantially on using mathematical and statistical tools and frameworks to describe, predict, and understand real-world systems.

Not offered current academic year

MATH 434 (S) Applied Dynamics and Optimal Control (QFR)

We seek to understand how dynamical systems evolve, how that evolution depends on the various parameters of the system, and how we might manipulate those parameters to optimize an overall outcome. The primary focus of this course will be optimal control using Pontryagin's maximum
principle and Hamilton-Jacobi-Bellman equations. These tools have broad application in ecology, economics, finance, and engineering, and we will draw on basic models from these fields to motivate our study. The course will begin with a solid review of modeling with dynamical systems, and deepening our understanding of differential and difference equations, parameter dependence, and bifurcations.

Requirements/Evaluation: exams, homework assignments, and projects

Prerequisites: MATH 309 or PHYS 210, and MATH 350 or 351, or permission of the instructor

Enrollment Limit: 25

Enrollment Preferences: Preference will be given to senior math majors.

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This is a 400 level math course.

Spring 2024

LEC Section: 01 TR 8:30 am - 9:45 am Stewart D. Johnson

MATH 435 (F) Chip-firing Games on Graphs (QFR)

Starting with a graph (a collection of nodes connected by edges), place an integer number of poker chips on each vertex. Move these chips around according to "chip-firing moves", where a vertex donates a chip along each edge. These simple and intuitive games quickly lead to challenging mathematics with applications ranging from dynamical systems to algebraic geometry. In this course we'll build up a mathematical framework for studying chip-firing games, drawing on linear algebra and group theory. We'll discover algorithms for winning these games, and study their complexity; and we'll prove graph-theoretic versions of famous results like the Riemann-Roch theorem. A key component of this course will be research projects that draw on open questions about chip-firing.

Requirements/Evaluation: Weekly homework for the first eight weeks, four quizzes spaced evenly throughout the semester, and a cumulative project worked on throughout the semester (10-20 pages)

Prerequisites: Math 250 and Math 355

Enrollment Limit: 25

Enrollment Preferences: Math majors who need the course to graduate

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: All topics are quantitative

Not offered current academic year

MATH 441 (F) Information Theory and Applications

Cross-listings: CSCI 441 MATH 441 STAT 441

Secondary Cross-listing

What is information? And how do we communicate information effectively? This course will introduce students to the fundamental ideas of Information Theory including entropy, communication channels, mutual information, and Kolmogorov complexity. These ideas have surprising connections to fields as diverse as physics (statistical mechanics, thermodynamics), mathematics (ergodic theory and number theory), statistics and machine learning (Fisher information, Occam's razor), and electrical engineering (communication theory).

Requirements/Evaluation: Weekly homeworks, midterm(s), final exam.

Prerequisites: Math/Stat 341; Math 150 or 151; or permission of instructor.

Enrollment Limit: 30

Enrollment Preferences: Seniors; mathematics and statistics majors.

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

CSCI 441(D3)  MATH 441(D3)  STAT 441(D3)

Not offered current academic year

MATH 442 (F) Introduction to Descriptive Set Theory  (QFR)
Descriptive set theory (DST) combines techniques from analysis, topology, set theory, combinatorics, and other areas of mathematics to study definable (typically Borel) subsets of Polish spaces. The first part of this course will cover the topics necessary to understand the main objects of study in DST: we will develop comfort with point-set topology (enough to juggle with Polish spaces and Borel sets), and set theory (just well-orderings and cardinality). The second part of the course will feature selected topics in descriptive set theory: for example, trees, the perfect set property, Baire category, and infinite games.

Requirements/Evaluation: Evaluation based on homework, exams, and classroom participation.
Prerequisites: Math 250 - Linear Algebra, Math 350/351 Real Analysis/Applied Real Analysis

Enrollment Limit: 14
Enrollment Preferences: Senior Math Majors, then non-Senior Math Majors
Expected Class Size: 14
Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)  (QFR)

Quantative/Formal Reasoning Notes: Mathematics course in descriptive set theory.

Not offered current academic year

MATH 443 Introduction to Optimal Transport Theory  (QFR)
This course will introduce you to the fascinating world of transportation optimization, a field that has important applications in many areas of science and engineering, such as economics, image processing, and machine learning. We will start by exploring the discrete Optimal Transport (OT) problem, which involves finding the most efficient way to transport a set of objects from one location to another. While the discrete OT problem can be formulated as a linear programming problem, finding an optimal solution to this problem can be computationally expensive, especially for large-scale problems. To overcome this computational challenge, a popular approach is to use entropy regularization. We will also investigate the entropy regularized OT problem, which provides us with an approximation of optimal transport, with lower computational complexity and easy implementation.

In the second half of the course, we will delve into the continuous case, which allows us to consider transport between infinitely many locations. We will study the famous Monge-Kantorovich problem, which involves finding the optimal transportation plan that minimizes the total cost of moving a given amount of mass from one location to another, subject to various constraints. Throughout the course, we will use a combination of theoretical and practical approaches to understand and apply the concepts we cover. By the end of the course, you will have a strong foundation in OT theory, which will prepare you for further studies in this exciting and rapidly evolving field. Recommended Textbooks / Articles: Topics in Optimal Transportation - Cédric Villani Optimal Transport for Applied Mathematicians - Filippo Santambrogio Computational Optimal Transport - Gabriel Peyré, Marco Cuturi

Prerequisites: Math 350/351 or permission of instructor

Enrollment Limit: 25
Enrollment Preferences: Mathematics and Statistics majors
Expected Class Size: 20
Grading:

Distributions: (D3)  (QFR)

Quantative/Formal Reasoning Notes: This is a senior seminar course in mathematics and will require students to use advanced quantitative and formal reasoning skills.

Not offered current academic year

MATH 445 (S) Topics in Numerical Analysis  (QFR)
Numerical analysis is a field of mathematics that focuses on developing algorithms and computational methods to solve problems that cannot be solved exactly. In this senior seminar course on numerical analysis we will cover advanced topics such as numerical solutions of Partial Differential Equations, Random Numbers and Monte Carlo simulation, Fast Fourier Transform and signal processing, as well as applications or the Singular Value Decomposition for matrices. The course will start with a review of basic concepts from calculus, linear algebra, and differential equations. Students who have taken Introduction to Numerical Analysis (Math 345) are welcome to take this course.

Requirements/Evaluation: exams and homework assignments
Prerequisites: Math 309 or Math 345 or permission of instructor
Enrollment Limit: 25
Enrollment Preferences: Mathematics Majors, Seniors
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (QFR)
Quantative/Formal Reasoning Notes: This is a senior seminar course in mathematics.

Spring 2024
LEC Section: 01 MWF 9:00 am - 9:50 am Bhagya Athukorallage

MATH 453 (S) Partial Differential Equations (QFR)
In this course, we further explore the world of differential equations. Mainly, we cover topics in partial differential equations. Partial Differential Equations (PDEs) are fundamental to the modeling of many natural phenomena, arising in many fields, including fluid mechanics, heat and mass transfer, electromagnetic theory, finance, elasticity, and more. The goals of this course are to discuss the following topics: classification of PDEs in terms of order, linearity and homogeneity; physical interpretation of canonical PDEs; solution techniques, including separation of variables, series solutions, integral transforms, and the method of characteristics.

Requirements/Evaluation: Evaluation will be based on homework, projects, and exams.
Prerequisites: MATH 150-151; MATH/PHYS 210 or MATH 309
Enrollment Limit: 20
Enrollment Preferences: Mathematics and Physics majors.
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (QFR)
Quantative/Formal Reasoning Notes: This is an advanced mathematics class dedicated to the study of partial differential equations (PDEs). These equations are the most important mathematical tools for the study of complex physical phenomena such as waves and fluids (including both air and water), heat transfer, electromagnetism, and finance.
Not offered current academic year

MATH 456 (F) Representation Theory (QFR)
Representation theory has applications in fields such as physics (via models for elementary particles), engineering (considering symmetries of structures), and even in voting theory (voting for committees in agreeable societies). This course will introduce the concepts and techniques of the representation theory of finite groups, and will focus on the representation theory of the symmetric group. We will undertake this study through a variety of perspectives, including general representation theory, combinatorial algorithms, and symmetric functions.

Requirements/Evaluation: evaluation will be based primarily on homework, in class presentations, and exams
Prerequisites: MATH 355
Enrollment Limit: 40
Enrollment Preferences: junior and senior Math majors
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option
MATH 457  (S)  Partition Theory  (QFR)
We discuss partition theory, a rich area within combinatorics with applications to algebra and mathematical physics.

Requirements/Evaluation:  Written homework; Written/Oral Exams
Prerequisites:  A course in abstract algebra such as MATH 355, or permission of instructor.
Enrollment Limit:  25
Enrollment Preferences:  Priority given to Junior and Seniors, and according to previous experience with subject.
Expected Class Size:  10
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D3)  (QFR)
Quantative/Formal Reasoning Notes:  This is an advanced course in mathematics.

Spring 2024
LEC Section: 01    TR 11:20 am - 12:35 pm     Daniel Condon

MATH 458  (S)  Algebraic Combinatorics  (WS) (QFR)
Algebraic combinatorics is a branch of mathematics at the intersection of combinatorics and algebra. On the one hand, we study combinatorial structures using algebraic techniques, while on the other we use combinatorial arguments and methods to solve problems in algebra. In this collaborative project-based course, students will select among the presented topics, develop research questions, and undertake original research in the field. Student assessment is based building positive and supportive collaborative working relationships with their peers, drafts of research project manuscript, and oral presentations.

Requirements/Evaluation:  Drafts of manuscript, oral presentations, reflections, peer collaboration skills
Prerequisites:  MATH 200 and MATH 355
Enrollment Limit:  25
Enrollment Preferences:  Senior mathematics majors, students with programming experience, students with interests in algebra and combinatorics.
Expected Class Size:  20
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D3)  (WS) (QFR)
Writing Skills Notes:  This course will require multiple revisions of a manuscript on the mathematical tent and collaborative work. The final result will be a 10-20 page research article and the course will be designed as a writing intensive course.
Quantative/Formal Reasoning Notes:  This is a mathematics course in the area of algebraic combinatorics and is a quantitative and formal reasoning course.

Not offered current academic year

MATH 474  (S)  Tropical Geometry  (QFR)
This course offers an introduction to tropical geometry, a young subject that has already established deep connections between itself and pure and applied mathematics. We will study a rich variety of objects arising from polynomials over the min-plus semiring, where addition is defined as taking a minimum, and multiplication is defined as usual addition. We will learn how these polyhedral objects connect to other areas of mathematics like algebraic geometry, and how they can be applied to solve problems in scheduling theory, phylogenetics, and other diverse fields.

Requirements/Evaluation:  participation, problem sets, quizzes, exams, and a final project
Prerequisites:  MATH 355 or permission of instructor
Enrollment Limit:  25
Enrollment Preferences:  Senior math majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course builds quantitative skills
Not offered current academic year

MATH 481 (S) Measure theory and Hilbert spaces (QFR)
How large is the unit square? One might measure the number of individual points in the square (uncountably infinite), the area of the square (1), or the dimension of the square (2). But what about for more complicated sets, e.g., the set of all rational points in the unit square? What's the area of this set? What's the dimension? In this course we'll come up with precise ways to measure size---length, area, volume, dimension, etc.---that apply to a broad array of sets. Along the way we'll encounter Lebesgue measure and Lebesgue integration, Hausdorff measure and fractals, space-filling curves and the Banach-Tarski paradox. We will also investigate Hilbert spaces, mathematical objects that combine the tidiness of linear algebra with the power of analysis and are fundamental to the study of differential equations, functional analysis, harmonic analysis, and ergodic theory, and also apply to fields like quantum mechanics and machine learning. This material provides excellent preparation for graduate studies in mathematics, statistics and economics.

Requirements/Evaluation: Problem sets, exams, an expository essay
Prerequisites: At least one previous course that has Math 350 or 351 as a prerequisite (eg Math 374, 383, 401, 404, 408, 420, 426, 485), or permission of instructor.
Enrollment Limit: 20
Enrollment Preferences: Juniors and seniors.

MATH 493 (F) Senior Honors Thesis: Mathematics
Mathematics senior honors thesis; this is part of a full-year thesis (493-494). Each student carries out an individual research project under the direction of a faculty member that culminates in a thesis. See description under The Degree with Honors in Mathematics.

Grading: yes pass/fail option, yes fifth course option

MAJOR IN STATISTICS

The major in Statistics is designed to meet three goals: to introduce some of the central ideas of information and data science, to develop problem-solving ability by teaching students to combine creative thinking with rigorous reasoning, and to develop interdisciplinary skills by applying statistics to an application area of interest.

REQUIREMENTS (10 courses plus colloquium)

The major in Statistics consists of ten courses plus a colloquium requirement. The major includes courses in mathematics, computer science and statistics. Students interested in continuing their study of statistics in graduate school should strongly consider taking Math 350/351 in addition to the other requirements.

Mathematics (2 courses)

Math 150 or 151 Multivariable Calculus or equivalent high school course
Math 250 Linear Algebra

Except in unusual circumstances, students planning to major in statistics should complete the calculus sequence (Math 130, 140, 150/151)
before the spring of the sophomore year, at the latest. MATH 150 is a prerequisite for STAT 201 and MATH 250 is a prerequisite for STAT 346.

**Computer Science (1 course)**

CSCI 134 Intro to Computer Science or CSCI 135 Diving into the Deluge of Data or CSCI 136 Data Structures and Advanced Programming or some other course in the Computer Science Department with prior approval of the Math/Stat department.

**Core Courses (4 courses)**

- STAT 201 Statistics and Data Analysis, STAT 202 Introduction to Statistical Modeling or STAT 302 Applied Statistical Modeling
- STAT 346 Regression and Forecasting
- STAT 341 Probability
- STAT 360 Inferential Statistics

**Continuation (2 courses)**

Any two courses among the 300 or 400 level courses in the department with a STAT prefix.

**Capstone Course (1 course)**

The capstone course is a 400-level STAT course taken in the senior year. Although the specific methodological emphasis of the course may vary from year to year, an in-depth project with both a written report and an oral presentation is typically part of the capstone course.

**Pass/Fail policies during the Academic Year 2020-2021**

Information about the Department of Mathematics and Statistics Pass/Fail policies during the Academic Year 2020-2021 can be found [here](#).

**Colloquium Requirement**

Participation in the Department Colloquium, in which each senior major presents a talk on a mathematical or statistical topic of their choice. Each major must also attend at least 20 colloquia (15 during the Academic Year 2020-2021), and up to 5 attendances may be counted in their junior year. Up to 5 colloquia in mathematics or computer science may also be counted. Students engaged in study away may petition the department in advance to count up to 5 suitable colloquia attendances from their study away program.

**PLACEMENT**

Students with an AP Stat score of 5 or 4 are placed in the advanced introductory course Stat 202.

**NOTES**

Substitutions, Study Abroad, and Transfer Credit: In some cases, and with prior permission of the Mathematics and Statistics Department, appropriate courses from other institutions may be substituted for the application and continuation requirements, but at least eight courses must be taken from the Department of Mathematics and Statistics at Williams.

These can, with prior permission, include courses taken away. Students with transfer credit should contact the department about special arrangements.

**Double Counting:** No course may count towards two different majors.

**Early Senior Capstone Course:** In exceptional circumstances, with the prior permission of the department, a student may be allowed to satisfy the Senior Capstone Course requirement in the junior year, provided that the student has completed at least three 300-level statistics courses before enrolling in the capstone course.

**Planning Courses:** Core courses are normally offered every year. Other 300 and 400 level statistics courses are offered on an irregular basis. Students should check with the department before planning far into the future.

**Course Admission:** Courses are normally open to all students meeting the prerequisites, subject to any course caps. Students with questions about the level at which courses are conducted are invited to consult department faculty.

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in many cases, though students should be sure to contact the department.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description, and complete syllabus including readings/assignments.

**Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study**
No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
Yes. They have to be approved MATH/STAT courses.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes. Colloquium requirement, Senior Seminar requirement.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Yes. The highly cumulative structure of the major.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

THE DEGREE WITH HONORS IN STATISTICS

The degree with honors in Statistics is awarded to the student who has demonstrated outstanding intellectual achievement in a program of study which extends beyond the requirements of the major. The principal considerations for recommending a student for the degree with honors will be: Mastery of core material and skills, breadth and, particularly, depth of knowledge beyond the core material, ability to pursue independent study of statistics, originality in methods of investigation, and, where appropriate, creativity in research.

An honors program normally consists of two semesters (STAT 493 and 494) and a winter study (WSP 031) of independent research, culminating in a thesis and a presentation. During the Academic Year 2020-2021 the winter study requirement for the honors program in Statistics is waved. One of STAT 493 or STAT 494 can count as a continuation course, but not both. Neither counts as the 400-level senior capstone course.

An honors program in actuarial studies requires significant achievement on four appropriate examinations of the Society of Actuaries.

Highest honors will be reserved for the rare student who has displayed exceptional ability, achievement or originality. Such a student usually will have written a thesis or pursued actuarial honors. In all cases, the award of honors and highest honors is the decision of the Department.

STAT 101  (F)(S)  Elementary Statistics and Data Analysis  (QFR)

It is impossible to be an informed citizen in today’s world without an understanding of data. Whether it is opinion polls, unemployment rates, salary differences between men and women, the efficacy of vaccines, etc, we need to be able to interpret and gain information from statistics. This course will introduce the common methods used to analyze and present data with an emphasis on interpretation and informed decision making.

Requirements/Evaluation:  weekly homework, quizzes, exams, and a project
Prerequisites:  MATH 102 (or demonstrated proficiency on a diagnostic test)
Enrollment Limit:  50
Enrollment Preferences:  juniors and seniors
Expected Class Size:  35
Grading:  yes pass/fail option,  yes fifth course option
Unit Notes:  Students with MATH150 but no statistics should enroll in STAT201. Students with AP Stat 4/5 or STAT 101/161 should enroll in STAT 202.
Distributions:  (D3)  (QFR)
Quantative/Formal Reasoning Notes:  It is a quantitative course.

STAT 161 (F)(S) Introductory Statistics for Social Science (QFR)
This course will cover the basics of modern statistical analysis with a view toward applications in the social sciences. Topics include exploratory data analysis, linear regression, basic statistical inference, and elements of probability theory. The course focuses on the application of statistical tools to solve problems, to make decisions, and the use of statistical thinking to understand the world.

Requirements/Evaluation: Weekly homework, quizzes, two midterms and a final exam (midterms include take-home components), and a data analysis project. Students will need to become familiar with the statistical software STATA.

Prerequisites: MATH 130 (or equivalent); not open to students who have completed STAT 101 or equivalent

Enrollment Limit: 40
Enrollment Preferences: Economics majors, sophomores
Expected Class Size: 40
Grading: yes pass/fail option, no fifth course option

Unit Notes: Students with calculus background should consider STAT 201. Students without any calculus background should consider STAT 101. Students with AP Stat 4 or 5 should consider Stat 202. Please refer to the placement chart on the Math&Stat department website for more information.

Enrollment Limit: 20
Enrollment Preferences: decided by the department

Expected Class Size: 1
Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science, is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped back, “Data, data, data! I can't make bricks without clay.” In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves computational programming and incorporates modern statistical techniques.

Requirements/Evaluation: weekly homework and projects, midterm exams, and a final exam.
Prerequisites: MATH 150 or equivalent; not open to students who have completed STAT 101 or STAT 161 or equivalent
Enrollment Limit: 40
Enrollment Preferences: Prospective Statistics majors, students for whom the course is a major prerequisite, and seniors
Expected Class Size: 40
Grading: yes pass/fail option, yes fifth course option

**STA 201 (F)(S) Statistics and Data Analysis (QFR)**

Data come from a variety of sources: sometimes from planned experiments or designed surveys, sometimes by less organized means. In this course we'll explore the kinds of models and predictions that we can make from both kinds of data, as well as design aspects of collecting data. We'll focus on model building, especially multiple regression, and talk about its potential to answer questions about the world -- and about its limitations. We'll emphasize applications over theory and analyze real data sets throughout the course.

Requirements/Evaluation: Homework problems; quizzes; exams; a final project (on a topic that interests you!). Participation matters! Engagement with your peers is an important part of learning, of being a statistician in the Real World...and of your evaluation in this course. While your assignments will be submitted (and graded) individually, you'll be responsible for giving and receiving peer feedback, contributing to class discussions, and working together with classmates on practice problems.
Prerequisites: MATH 140 and STAT 101/161/201/AP Statistics 4/5, or permission of instructor.
Enrollment Limit: 40
Enrollment Preferences: Prospective Statistics majors and more senior students
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option

Unit Notes: Students with a 4 on the AP Stats exam should contact the department for proper placement. Students with STAT 201 are strongly encouraged to take STAT 346 or other 300-level statistics electives.
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course uses mathematical tools and computing programs to create models, make predictions, assess uncertainty, and describe data. We’ll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.

STAT 302 (S) Applied Statistical Modeling (QFR)
Data may come from various sources and studies with different purpose of analysis. Statistical modeling provides a unified framework to embrace different data types, and focuses on the goals of understanding relationships, assessing differences and making predictions. We will explore different types of statistical models (linear regression, ANOVA, logistic regression etc), and focus on their conditions, the interactive modeling process, as well as the statistical inference tools for drawing conclusions from them. Throughout the course, real datasets will be modeled for interesting questions about the world, and the limitations will be addressed as well.
Requirements/Evaluation: weekly homework assignments, quizzes, exams and a course project.
Prerequisites: One of the following: i) STAT 201; ii) MATH 140 and STAT 101/161/AP Statistics 4/5; iii) Permission of instructor
Enrollment Limit: 19

Enrollment Preferences: Students interested in statistics who have background in calculus and intro stat. Students cannot take STAT 302 either simultaneously or after STAT 346.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: It is an intermediate statistics class with prerequisites that are QFR courses

Not offered current academic year

**STAT 310 (F) Data Visualization (QFR)**

This course is about preparing, visualizing, reporting and presenting different types of data. We will start with creating common plots (e.g., barcharts, histograms, density plots, boxplots, time series and lattice plots), but also discuss visualizing results of statistical models, such as linear or logistic regression models. We will use the ggplot library in R but then switch to the plotly library for interactive graphs with mouse-over and click events. Using R's shiny and DT libraries, we will learn how to create and publish web-apps and dashboards that explore datasets and support online filtering. We will end the class with creating web apps that contain multiple graphs or maps which react to user inputs (such as selecting which variables to plot) or provide real time monitoring of streaming data. Throughout, we will use version control software (Github) to organize and keep track of our code. This course will be taught in a semi-flipped style. While the instructor will introduce certain topics, students will often be responsible for reading material ahead of time and then work individually or in pairs to reproduce material or implement it on their own data.

Requirements/Evaluation: Grading will almost entirely be based on class participation, individual and team-work, project presentations and the student's portfolio.

Prerequisites: Stat 201/202/302; Good knowledge of R

Enrollment Limit: 15

Enrollment Preferences: Preference may be given to stats majors who need the course in order to graduate, but then random selection.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course teaches how to organize and present data graphically, but also how to critique existing data visualizations.

Not offered current academic year

**STAT 315 (S) Applied Machine Learning (QFR)**

How does Netflix recommend films based on your viewing history? How does Facebook group its users and send out targeted ads? How did Google select from thousands of search terms to predict flu? Machine learning (ML) is a rapidly growing field that is concerned with algorithms and models to find patterns in data and solve these practical problems at the intersection between statistics, data science and computer science. This course provides a broad introduction to ideas and methods in machine learning, with emphasis on statistical intuitions and practical data analysis. Topics including regularized regression, SVM, supervised/unsupervised learning, text analysis, neural networks will be covered. Students will use R extensively throughout the course while getting introduced to some ML tools in Python.

Class Format: Students cannot take both STAT 315 and STAT 442. Only one of the two can be taken for credit.

Requirements/Evaluation: weekly homework, one class project, and two or three exams

Prerequisites: MATH 140, and STAT 201/202, or equivalent; or permission of instructor. Students cannot take both STAT 315 and STAT 442. Only one of the two can be taken for credit.

Enrollment Limit: 15

Enrollment Preferences: Seniors.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This is a statistics class with a focus on mathematical, computational, and data analysis skills as well as
STAT 319  (S)  Statistical Computing  (QFR)
This course introduces a variety of computational and data-centric topics of applied statistics, which are broadly useful for acquiring, manipulating, visualizing, and analyzing data. We begin with the R language, which will be used extensively throughout the course. Then we'll introduce a variety of other useful tools, including the UNIX environment, scripting analyses using bash, databases and the SQL language, alternative data formats, techniques for visualizing high-dimensional data, and text manipulation using regular expressions. We'll also cover some modern statistical techniques along the way, which are made possible thanks to advances in computational power. This course is strongly computer oriented, and assignments will be project-based.

Requirements/Evaluation: based primarily on projects, homework, and exams
Prerequisites: STAT 201 or 202 and CSCI 134, 135, or 136
Enrollment Limit: 30
Enrollment Preferences: juniors and seniors, Statistics majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This course uses statistical tools and programming techniques to acquire data, create visualizations, and make future predictions.
Not offered current academic year

STAT 335  (S)  Introduction to Biostatistics and Epidemiology  (QFR)
Epidemiology is the study of disease and disability in human populations, while biostatistics focuses on the development and application of statistical methods to address questions that arise in medicine, public health, or biology. This course will begin with epidemiological study designs and core concepts in epidemiology, followed by key statistical methods in public health research. Topics will include multiple regression, analysis of categorical data (two sample methods, sets of 2x2 tables, RxC tables, and logistic regression), survival analysis (Cox proportional hazards model), and if time permits, a brief introduction to regression with correlated data.

Requirements/Evaluation: Evaluation will be primarily based on weekly assignments (regular homework or mini-projects), two midterm exams, and a final exam.
Prerequisites: Stat 201 or Stat 202, or permission of instructor (prior experience should include a working understanding of multiple linear regression, the basics of statistical inference, and R).
Enrollment Limit: 20
Enrollment Preferences: Statistics majors and prospective majors who have not yet taken Stat 346; public health concentrators
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: Students will learn how to choose, implement, and interpret statistical analyses relevant to public health studies.
Attributes: PHLH Statistics Courses

Spring 2024
LEC Section: 01    MWF 8:30 am - 9:45 am    Anna M. Plantinga

STAT 341  (F)(S)  Probability  (QFR)
Cross-listings: MATH 341 STAT 341
Secondary Cross-listing
The historical roots of probability lie in the study of games of chance. Modern probability, however, is a mathematical discipline that has wide applications in a myriad of other mathematical and physical sciences. Drawing on classical gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables (both discrete and continuous), distribution and expectation, independence, laws of large numbers, and the well-known Central Limit Theorem. Many interesting and important applications will also be presented, including some from classical Poisson processes, random walks and Markov Chains.

**Requirements/Evaluation:** homework, classwork, and exams

**Prerequisites:** MATH 150 and MATH 250 or permission of the instructor

**Enrollment Limit:** 50

**Enrollment Preferences:** Priority will be given to Mathematics majors and to Statistics Majors.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 341(D3) STAT 341(D3)

**Quantitative/Formal Reasoning Notes:** This is a 300-level Math/Stat course.

---

**STAT 342 (S) Introduction to Stochastic Processes (QFR)**

Stochastic processes are mathematical models for random phenomena evolving in time or space. Examples include the number of people in a queue at time t or the accumulated claims paid by an insurance company in an interval of time t. This course introduces the basic concepts and techniques of stochastic processes used to construct models for a variety of problems of practical interest. The theory of Markov chains will guide our discussion as we cover topics such as martingales, random walks, Poisson process, birth and death processes, and Brownian motion.

**Requirements/Evaluation:** weekly homework/labs, classwork, and exams

**Prerequisites:** STAT 341

**Enrollment Limit:** 30

**Enrollment Preferences:** senior Statistics majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This is a statistics class with a focus on mathematical skills and translating real world phenomena into mathematical descriptions.

Not offered current academic year

---

**STAT 344 (F) Statistical Design of Experiments (QFR)**

When you hear the word experiment you might be picturing white lab coats and pipettes, but businesses, especially e-commerce, are constantly experimenting as well. How do you get the most out of both scientific and business investigations? By doing the right experiment in the first place. We'll explore the techniques used to plan experiments that are both efficient and statistically sound. We'll learn how to analyze the data that come from these experiments and the conclusions we can draw from that analysis. We'll look at both classical tools like fractional factorial designs as well as optimal design, and see how these two frameworks differ in their philosophy and in what they can do. Throughout the course, we'll make extensive use of both R and JMP software to work with real-world data.

**Requirements/Evaluation:** Homework problems--both individual and in groups, midterm, final, and projects (on topics that interest you!).

**Prerequisites:** STAT 161 or 201 or 202, or equivalent, and Math 140 or equivalent, or permission of instructor
**STAT 346 (F)(S) Regression Theory and Applications** (QFR)

This course focuses on the building of empirical models through data in order to predict, explain, and interpret scientific phenomena. Regression modeling is the most widely used method for analyzing and predicting a response data and for understand the relationship with explanatory variables. This course provides both theoretical and practical training in statistical modeling with particular emphasis on simple linear and multiple regression, using R to develop and diagnose models. The course covers the theory of multiple regression and diagnostics from a linear algebra perspective with emphasis on the practical application of the methods to real data sets. The data sets will be taken from a wide variety of disciplines.

**Requirements/Evaluation:** Weekly homework, theory and data analysis exams, final course project.

**Prerequisites:** MATH/STAT 341, MATH 250, and at least one of STAT 201 or 202. Or permission of the instructor.

---

**STAT 355 (F) Multivariate Statistical Analysis** (QFR)

To better understand complex processes, we study how variables are related to one another, and how they work in combination. In addition, we want to make inferences about more than one variable at a time. Elementary statistical methods might not apply. In this course, we study the tools and the intuition that is necessary to analyze and describe such datasets with more than multiple variables. Topics covered will include data visualization techniques for high dimensional data sets, parametric and non-parametric techniques to estimate joint distributions, techniques for combining variables and making inferences, and several classification and clustering algorithms.

**Requirements/Evaluation:** Homework, projects, quizzes, and exams.

**Prerequisites:** MATH 250, and STAT 346 or permission of instructor

---

**Enrollment Limit:** 20

**Enrollment Preferences:** Statistics majors, seniors, juniors, sophomores, first years

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This course uses mathematical tools and computing programs to design experiments, analyze their results, and assess their effectiveness. We'll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** It is an advanced statistics class with prerequisites that are QFR courses
STAT 356  (F)  Time Series Analysis  (QFR)
Time series -- data collected over time -- crop up in applications from economics to engineering to transit. But because the observations are generally not independent, we need special methods to investigate them. This course will include exploratory methods and modeling for time series, including descriptive methods and checking for significance, and a foray into the frequency domain. We will emphasize applications to a variety of real data, explored using R.

Requirements/Evaluation: Evaluation is primarily based on quizzes and projects (on topics that interest you!). You'll be given the opportunity to assess your own work and resubmit/reattempt assignments as you gain mastery of a topic. Participation matters! Engagement with your peers is an important part of learning, of being a statistician in the Real World...and of your evaluation in this course. While most assignments will be submitted (and graded) individually, you'll be responsible for giving and receiving peer feedback, contributing to live and online discussions, and working together with classmates on practice problems.

Prerequisites:  STAT 346 (may be taken concurrently) or permission of instructor

Enrollment Limit:  15

Enrollment Preferences:  Statistics majors, seniors

Expected Class Size:  15

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D3)  (QFR)

Quantative/Formal Reasoning Notes:  This course uses mathematical tools and computing programs to create models, make predictions, assess uncertainty, and describe data. We'll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.

Not offered current academic year

STAT 358  (S)  Introduction to Categorical Data Analysis  (QFR)
This course focuses on methods for analyzing categorical response data. In contrast to continuous data, categorical data consist of observations classified into two or more categories. Traditional tools of statistical data analysis (such as linear regression) are not designed to handle such data and pose inappropriate assumptions. We will develop methods specifically designed for modeling categorical data, with applications in the social and biological sciences as well as in medical research, engineering and economics. This course has two parts. The first part will discuss statistical inference for parameters of categorical distributions (Bernoulli, Binomial, Multinomial, Poisson) and for measures of association arising in contingency tables (difference and ratio of proportions and odds ratios). Inferential methods covered include Wald, score and likelihood ratio tests and confidence intervals, as well as the bootstrap. The longer second part will focus on statistical modeling of categorical response data via generalized linear models, with a heavy focus on logistic regression models with both quantitative and categorical predictors and their interactions. Model fitting and inference will be based on maximum likelihood and carried out via R.

Requirements/Evaluation:  Weekly homework assignments consisting of exercises from the textbook as well as data analysis problems, carried out using R. Occasional short in-class quizzes at the beginning of class. One Midterm (with both in-class and take-home component). Final Project with presentation. Final exam. Homework accounts for roughly 15% of the grade, quizzes for another 15%, midterm (in-class and take-home combined) and final for about 30% each, and project for the remaining 10%.

Prerequisites:  STAT 346: Regression and Forecasting

Enrollment Limit:  15

Enrollment Preferences:  stats majors

Expected Class Size:  15

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D3)  (QFR)

Quantative/Formal Reasoning Notes:  Students learn how to analyze data and communicate results.

Not offered current academic year

STAT 360  (F)  Statistical Inference  (QFR)
How do we estimate unknown parameters and express the uncertainty we have in our estimate? Is there an estimator that works best? Many topics
from introductory statistics such as random variables, the central limit theorem, point and interval estimation and hypotheses testing will be revisited and put on a more rigorous mathematical footing. The focus is on maximum likelihood estimators and their properties. Bayesian and computer intensive resampling techniques (e.g., the bootstrap) will also be considered.

**Requirements/Evaluation:** Homework, Quizzes, Exams

**Prerequisites:** MATH 250, STAT 201 or 202, STAT 341

**Enrollment Limit:** 15

**Enrollment Preferences:** Statistics majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** A rigorous mathematical course laying the foundation for reasoning with data

Bernhard Klingenberg**

**STAT 365 (S) Bayesian Statistics (QFR)**

Prior knowledge being constantly updated by empirical observations -- the essence of Bayesian thinking provides a natural, intuitive, and more importantly, mathematically sounded, probabilistically principled way to characterize the process of learning. With some of its key ideas formulated based on Bayes’ Theorem dating back to 18th century, Bayesian inference is one of oldest schools of statistics (more than a century earlier than the Frequentist!). Yet it was not until the recent developments in sampling algorithms and computational powers that Bayesian inference gained its revival. Bayesian, and Bayesian-based methods, with their flexibilities in modeling (generative) process of data, interpretability with posterior probability statements, and coherent principles to incorporate empirical evidence *a priori*, have played key roles in modern data analysis, especially for those "big data" with enhanced complexity and connectivity. This course is designed to provide students a comprehensive understanding to what is Bayesian and how's and why's. Students will be introduced to classic Bayesian models, basic computational algorithms/methods for Bayesian inference, as well as their applications in various fields, and comparisons with classic Frequentist methods. As Bayesian inference finds its roots and merits particularly in application, this course puts great emphasis on enhancing students' skills in statistical computation (mostly with R) and data analysis.

**Requirements/Evaluation:** weekly homework and exams

**Prerequisites:** MATH/STAT 341 and STAT 346, or permission of instructor

**Enrollment Limit:** 20

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course utilizes mathematics and computer-based tools for the Bayesian approach for analyzing data and making statistical inferences.

**Spring 2024**

**LEC Section:** 01  
**TR 11:20 am - 12:35 pm  
Shaoyang Ning**

**STAT 372 (S) Longitudinal Data Analysis (QFR)**

This course explores modern statistical methods for drawing scientific inferences from longitudinal data, i.e., data collected repeatedly on experimental units over time. The independence assumption made for most classical statistical methods does not hold with this data structure because we have multiple measurements on each individual. Topics will include linear and generalized linear models for correlated data, including marginal and random effect models, as well as computational issues and methods for fitting these models. As time permits, we will also investigate joint modeling of longitudinal and time-to-event data. We will consider many applications in the social and biological sciences.

**Requirements/Evaluation:** Weekly homework, midterm exams, a final exam, and a data analysis project

**Prerequisites:** STAT 346 (and an appropriate introductory statistics course, typically STAT 201 or 202)
Enrollment Limit: 20
Enrollment Preferences: junior and senior Statistics majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: The course will cover a variety of statistical analysis methods for longitudinal data.

STAT 465 (F) Bayesian Statistics (QFR)

Interest and application of Bayesian methods have exploded in recent decades, being facilitated by recent advances in computational power. Indeed, the Bayesian approach is now recognized across scientific disciplines as a modern and powerful tool. We begin with an introduction to Bayes’ Theorem, the theoretical underpinning of Bayesian statistics which dates back to the 1700's, and the concepts of prior and posterior distributions, conjugacy, and closed-form Bayesian inference. Building on this, we introduce modern computational approaches to performing Bayesian inference, including Markov chain Monte Carlo (MCMC), Metropolis-Hastings sampling, and the theory underlying these simple and powerful methods, before moving on to multivariate sampling methods and methodology. Students will become comfortable with modern software tools for MCMC using a variety of applied hierarchical modeling examples, and will use R for all statistical computing. The course will culminate in an independent Bayesian research project.

Requirements/Evaluation: Homework, exams, and project

Prerequisites: STAT 346, or permission of instructor

COURSES AND COURSE-NUMBERING

100-level courses are introductory in nature. They aim to acquaint students with a variety of topics in music, ranging from the materials of music (introductory music theory and musicianship) to various musical cultures (African, American, Asian, Caribbean, and European) and styles within those cultures (classical, folk, and popular). Most 100-level courses are designed for the general student and have no prerequisites; they assume no prior musical training, and are open to all students interested in increasing their understanding and appreciation of music. The two 100-level courses that can serve to satisfy specific music theory requirements for the music major (MUS 103 and 104a or 104b) require a working knowledge of musical notation; these courses are geared to potential majors and students with strong instrumental or vocal background, and are particularly suitable for first-year students interested in taking more advanced courses in music.

200-level courses offer students the opportunity to explore a range of more specialized musical topics, from performance, technology, and musicianship-based classes to courses focused on specific styles, periods, composers, and examinations of meaning in music. Most regular 200-level courses have no prerequisites but do require the ability to read music, and are usually open to all students who can do so, regardless of class year. Some 200-level tutorials and writing intensive courses have no prerequisites and do not require the ability to read music, but the workload and more advanced approach to the subject matter makes these courses best suited to sophomores, juniors, and seniors. The two 200-level courses that complete the music theory requirements for the music major (MUS 201 and 202) have prerequisites; these courses are geared to potential majors, majors, and students with strong instrumental or vocal background.

300-level courses are designed for sophomores, juniors, and seniors with a background in instrumental or vocal performance and fluency in reading musical notation to focus on specialized topics. Some 300-level courses are experiential in nature, including performance-based coursework in conducting, composition, arranging, orchestration, and improvisation. Others are advanced courses in music theory and analysis, musicology, or ethnomusicology, taught in a seminar context that emphasizes original research and analysis.

400-level courses are intended for advanced juniors and seniors, usually music majors, wishing to pursue thesis, independent study, or small seminar coursework in composition, theory and analysis, musicology, ethnomusicology, or performance, under the guidance of an individual faculty advisor.

MAJOR
A minimum of ten courses are required for the major, as detailed below.

**Four courses in Music Theory and Musicianship to be taken in sequence:**
- Music 103
- Music 104a (Music Theory and Musicianship I) or Music 104b (Jazz Theory and Improvisation I)
- Music 201
- Music 202

**Three courses in European and American Music History:**
- Music 231
- Music 232
- Music 233

Majors may choose to replace a maximum of one of these three specific courses with a course in music history covering aspects of the same period. The courses that may substitute for MUS 231, 232, and 233 are listed below:
- Music 231: 133, 164, 172, 234, 235 or 261
- Music 232: 143, 146, 165, or 166
- Music 233: 118, 119, 138, 150, 151, 238, 239, 244, 251, 252, 254, or 316

**One course in World Music/Ethnomusicology from the following:**
- DANC 201 / AFR 201 / MUS 220(F) STU African Dance and Percussion  
  Taught by: Sandra Burton, Tendai Muparutsa  
  Catalog details
- DANC 202 / AFR 206 / MUS 221(S) STU African Dance and Percussion  
  Taught by: Sandra Burton, Tendai Muparutsa  
  Catalog details
- MUS 111(F) LEC Music in Global Circulation  
  Taught by: Corinna Campbell  
  Catalog details
- MUS 120 / AFR 113(F) LEC Musics of Africa  
  Taught by: Corinna Campbell  
  Catalog details
- MUS 125 / DANC 125 SEM Music and Social Dance in Latin America  
  Taught by: Corinna Campbell  
  Catalog details
- MUS 177 / WGSS 177(S) SEM Gender and Sexuality in Music  
  Taught by: Corinna Campbell  
  Catalog details
- MUS 211 SEM Music, Nationalism, and Popular Culture  
  Taught by: Corinna Campbell  
  Catalog details
- MUS 323 / THEA 321 / DANC 323(S) SEM Arts Organizing in Africa and the Diaspora  
  Taught by: Corinna Campbell  
  Catalog details

**Two electives:**  
One must be taken in the senior year and at the 400-level to serve as a capstone course. The second semester of a year-long honors thesis, MUS 494, will satisfy the 400-level elective requirement; for students in the class of 2024 and subsequent years, Advanced Musical Performance, MUS 491 or 492, will not satisfy the 400-level capstone elective. The other elective may be fulfilled in any semester by any Music course but must be taken in addition to courses selected to satisfy the history, theory, and world music/ethnomusicology requirements detailed above.

**Performance:**
Majors are required to participate in faculty-directed departmental ensembles for at least four semesters.

Majors must enroll in partial credit music lessons for at least two semesters.
THE DEGREE WITH HONORS IN MUSIC

Three routes provide the opportunity for honors or highest honors consideration in the Music major:

Composition: A Composition thesis must include one major work completed during the senior year supported by a 10- to 15-page discussion of the student’s work or analysis of a major 20th century or contemporary work. The student’s general portfolio of compositions completed during the junior and senior years will also be considered in determining honors.

Performance: A Performance thesis must include an honors recital given during the spring of the senior year supported by a 15- to 20-page discussion of one or more of the works performed. The student’s general performance career will also be considered in determining honors.

History, Theory and Analysis, or Ethnomusicology: A written Historical, Theoretical/Analytical, or Ethnomusicological thesis between 65 and 80 pages in length. A written thesis should offer new insights based on original research. A public oral thesis defense is also required.

In order for a thesis proposal to be approved, a student must have at least a 3.3 GPA in Music courses (this GPA must be maintained in order to receive honors), and must have demonstrated outstanding ability and experience through coursework and performance in the proposed thesis area. Students are encouraged to seek the advice of their potential thesis advisor early in the junior year and no later than the first month of the second semester. A 1- to 2-page proposal written in consultation with the faculty advisor must be received by the Music chair by the end of spring break.

Honors candidates must enroll in Music 493(F)-W31-494(S) during their senior year. A student who is highly qualified for honors work, but is unable to pursue a year-long project for compelling reasons, may petition the department for permission to pursue a WS/one-semester thesis. The standards for evaluating such a thesis remain the same. Completed thesis is due by April 15.

LESSONS

Courses in individual vocal or instrumental instruction are fully subsidized for all students. (See Music 281-288 and Advanced Musical Performance 391, 392, 491, 492). For further information, check the Music Department webpage or contact the Department of Music.

STUDY ABROAD

One study abroad course may satisfy the one free elective requirement for the major, if approved by the department. A second study abroad course might satisfy any one of the specific required courses if the proposed course is clearly equivalent and if the substitution is approved by the department. Majors planning to study abroad should meet with the department chair to propose specific study abroad courses that might be approved to satisfy major requirements under this policy. No more than two courses taken abroad may count toward the major. Music lesson courses and ensemble participation pursued while studying abroad may count toward the performance requirements with approval of the department.

MUS 101  (F)  Listening to Music: An Introduction to the Western Classical Tradition

When you listen to music -- on your phone or computer, on the radio, at a concert -- how much do you really hear? This course refines students’ listening skills through study of the major composers, styles, and genres of the Western classical tradition. We will explore music from the Baroque, Classical, Romantic, and Modern eras, including works by Bach, Mozart, Beethoven, Chopin, Tchaikovsky, Brahms, Stravinsky, and other composers. Genres to be covered include the symphony, string quartet, sonata, opera, song, and choral music.

Requirements/Evaluation: Grades will be based on weekly GLOW posts, two 2-3 page concert reports, a quiz, and two exams.

Prerequisites: none; intended for non-major students with little or no formal training in music

Enrollment Limit: 19

Enrollment Preferences: first-years, sophomores and any student who expresses a strong interest in the course

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2023

LEC Section: 01   TR 11:20 am - 12:35 pm   Marjorie W. Hirsch

MUS 102  (F)  Introduction to Music Theory

The course presents an introduction to the materials and structures of music. Through a variety of applied and theoretical exercises and projects,
students will develop an understanding of the elements of music (e.g. pitch, scales, triads, rhythm, meter, and their notation) and explore their combination and interaction in the larger-scale organization of works of classical, jazz and popular music (i.e. harmony, counterpoint, form, rhetoric). Practical musicianship skills will be developed through singing, keyboard, and rhythmic exercises.

**Requirements/Evaluation:** regular worksheets (1-2 pages), written and applied quizzes, model composition projects, midterm and final exam, participation

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** first-year students

**Expected Class Size:** 16

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1)

---

**MUS 103 (F) Music Theory and Musicianship I**

*MUS 103 and 104 are designed for potential majors and for students with strong instrumental or vocal backgrounds. Students entering MUS 103 should have a solid understanding of musical rudiments (intervals, scales, keys) and reading proficiency in both bass and treble clefs. A short diagnostic exam will be administered at the first class meeting of MUS 103 to determine if a student requires any additional work to complement and fortify course work during the early weeks of the semester, or whether placement in MUS 102 would be more appropriate. Students with a strong background in music theory may take a placement exam during First Days to see whether they can pass out of one or both semesters. MUS 103 and 104 are required for the music major. MUS 103 presents the materials, structures and procedures of tonal music, with an emphasis on the harmonic and contrapuntal practice of the baroque and classical periods (ca. 1650-1825). The course explores triadic harmony, voice leading, and counterpoint with an emphasis on the chorale style of J.S. Bach and his predecessors. Keyboard harmony and figured bass exercises, sight singing, dictation, analysis of repertoire, written exercises and emulation projects will develop both an intellectual and an aural understanding of music of the period. Projects include chorale harmonization, arranging, and the composition of canons.**

**Class Format:** In addition to the two lecture meetings each week, the class requires three weekly lab meetings (for keyboard skills, music writing skills, and aural skills).

**Requirements/Evaluation:** weekly written work, written and applied quizzes, and midyear and final projects

**Enrollment Limit:** 24

**Enrollment Preferences:** first-years, potential Music majors, and those with strong musicianship backgrounds

**Expected Class Size:** 24

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

---

**MUS 104 (S) Music Theory and Musicianship I**

*Music 104a continues the practical musicianship work of Music 103, while expanding the scope of harmonic topics to include seventh chords and chromatic harmony. Music 104a further explores the transformation of chorale harmony in contrapuntal works of the eighteenth century. Projects include the composition of preludes and fugues on baroque models.**

**Class Format:** lecture two days a week; lab meetings (for keyboard skills, music writing skills, and ear training) three days a week

**Requirements/Evaluation:** weekly written work, written and applied quizzes, and midterm and final projects
MUS 103

Prerequisites: MUS 103
Enrollment Limit: 24
Enrollment Preferences: first-year students, potential or declared Music majors, and those with strong musicianship backgrounds

MUS 104 (S) Jazz Theory and Improvisation I
Cross-listings: MUS 104 AFR 212
Primary Cross-listing
The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based composition etc. Appropriate for students with basic skill on their instrument and some theoretical knowledge including all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. This is a performance practice course and instrumental competence is essential. Vocalists and drummers will be encouraged to study the piano; pianists guitarists and bassists should be able to sight read chords on a jazz lead sheet.
Class Format: alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire
Requirements/Evaluation: weekly assignments (e.g., harmonic analysis and exercises in transposition and transcription), a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance
Prerequisites: MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged
Enrollment Limit: 15
Enrollment Preferences: prospective Music majors, then Jazz Ensemble members, then Music majors
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option
Unit Notes: this course will share aural skills labs with MUS 104a; students considering taking this course should consult the lab times and plan their schedules accordingly
Distributions: (D1)

MUS 106 (F) Skills for Singing
Skills for Singing is a course designed for students who wish to develop their skills in vocal technique and reading music. Students will be given an introduction to vocal technique and physiology through vocalises, repertoire, analysis, and studio class sessions. They will engage in group singing and solo presentation in a collaborative, master-class setting. They will also build knowledge of western music notation through basic music theory, score-reading, and sight-singing. Upon completion of the class, interested students will have established the foundational skills necessary to sing more confidently in both solo and ensemble environments.

**Requirements/Evaluation:** Reading and listening assignments, daily sight-singing practice and vocal exercises, music theory written assignments, musical preparation of solos, final presentation of prepared solo as part of a class recital.

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** first year students and those who have auditioned unsuccessfully for either voice lessons or choral ensembles

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

---

**MUS 110 (S) Electronic Music Genres, a Creative Approach**

In this course, students will study the theoretical and practical fundamentals of audio technology, MIDI production, sound design, and interactive composition. Students are not required to have any background in Music Technology. We will start by covering the basics of Electronic Music but the class will move at a fast pace covering more advance subjects in a short period of time. We will go over concepts of Physics acoustic, MIDI (sequencing, etc), Sound editing, Digital Signal Processing Effects, Sound Synthesis, and Interactive electronic music composition using Ableton Live, Max4Live, as well as Max MSP for students to learn how to program their own virtual synthesizers and/ or algorithmic composition to create interactive music in real time. Electronic Music Composition is a central part of the class. Students can choose any aesthetic of their choice for the composition projects, since the the focus of the class is on teaching students the technological tools to create the music of their choice. Students will be encouraged to mix different styles of music creating fusion.

**Requirements/Evaluation:** Four fusion composition projects and weekly presentation of students mini-projects focused on the electronic music techniques studied in class, and based on student research of musical styles chosen for their projects.

**Prerequisites:** One of the following: MUS 102, MUS 103, or permission of instructor for those students that have taken music lessons in their previous school: please contact iperez@williams.edu

**Enrollment Limit:** 8

**Enrollment Preferences:** Music majors, students with previous experience in Music.

**Expected Class Size:** 8

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1)

---

**MUS 111 (F) Music in Global Circulation**

This course introduces a variety of musical genres and practices from around the world, alongside a discussion of the processes and politics of their global circulation. Through learning about a combination of contemporary styles and longstanding musical traditions spanning a broad geographical range, students will develop a working knowledge of musical terms, concepts, and influential musicians. Beyond engaging with music's sound and structure, we will address its capacity to express personal and group identity, and its ability to both reflect and shape broader social ideas and circumstances. In particular, we will consider music's global circulation, and how its contents and meanings reflect those processes. Genres covered in the course vary intermittently but often include: "throat singing" genres in Tuva and Sardinia, Zimbabwean mbira and Chimurenga music, Argentine Tango, Ghanaian azonto and highlife, Balinese gamelan, and North Indian classical music. No prior musical training is required.
Requirements/Evaluation: class attendance and participation, regular short assignments/study questions, three 5-7 page written assignments, and an 8-10 page final paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: current or prospective majors in Music, upperclassmen.
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: Not only are students exposed to a wide range of musical material from across the globe, they also consider how music becomes meaningful and powerful in light of local contexts and the politics of circulation. Discussions and written assignments address issues including gender identity, economic disparity, the politics of cultural preservation, and music's potential in situations of political unrest.

Attributes: MUS World Music/Ethnomusicology

Fall 2023
LEC Section: 01 MW 11:00 am - 12:15 pm Corinna S. Campbell

MUS 118  (S)  Hearing Race in America, 1890-1955  (DPE)
The rise of Rock ‘n’ Roll in the mid-1950s has typically been viewed as a temporary confluence in American culture, suggesting possibilities for musical and racial integration even as various forms of appropriation and exclusion were perpetuated. This course will explore the earlier multiple musical streams that merged at this moment. We will start by engaging with contemporary and historical perspectives on race, adopting a radically interdisciplinary approach. Our focus will then be on several of the most prominent vernacular and commercial forms of American music during this period: ragtime, blues, early jazz, rhythm and blues, Tin Pan Alley, country and western, bluegrass, Tex-Mex/Tejano conjunto, “Latin jazz,” and Cajun/zydeco. Prior to the 1950s, these musical styles were segregated, at least in terms of production and marketing. How did racial assumptions and histories shape the creation, dissemination, and reception of this music? Can we hear the multiple ways in which race played out in American music in the first half of the twentieth century?
Class Format: lecture/discussion
Requirements/Evaluation: Evaluation will be based on a 5-page paper, a midterm, a 7-page paper, a final exam, and on class participation.
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Random selection.
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: We will focus on how racial imagination and systemic racism shaped the creation, marketing, and reception of multiple genres and styles in American popular music from 1890 to 1955. Before embarking on this historical study, we will first become familiar with current theories of race and with dominant American perceptions of race c. 1900. Perceptions of difference (in multiple forms), realities of market power, and issues of artistic and financial equity directly impacted music in this period.

Not offered current academic year

MUS 120  (F)  Musics of Africa
Cross-listings: AFR 113 MUS 120

Primary Cross-listing
This course introduces musical traditions spanning the geographical breadth of continental Africa. We will prioritize hands-on experience and musical practice, critical listening, and deep social and political contextualization as strategies of musical engagement. Following an introductory exploration of overarching aesthetic and social trends in African musical practice, the course will then focus on 3-4 geographically rooted case studies, allowing us to discuss how different musical practices and subcultures (featuring traditional, contemporary, and popular forms) interrelate in a musical soundscape. The geographical focus of the case studies may vary but previous case studies have included: Ghana, Zimbabwe, Ethiopia, Egypt, Mali and the
Democratic Republic of Congo.

Class Format: discussion

Requirements/Evaluation: grade based on attendance and participation, one synthesizing assignment at the end of each unit (for instance a 5-7 pg. paper, a podcast or performance-oriented assignment, an album review or curated listening list) and an 8-10pg final paper.

Prerequisites: no prerequisites: prior musical background is not essential for this class

Enrollment Limit: 20

Enrollment Preferences: current or prospective majors in Music and Africana Studies, seniors.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

MUS 125 (S) Music and Social Dance in Latin America (DPE)

Cross-listings: MUS 125 DANC 125

Primary Cross-listing

This course offers a full-spectrum introduction to a number of Latin American social dance forms, including samba, salsa, tango, and the Suriname Maroon genre, awasa. Through critical listening and viewing assignments, performance workshops, and readings from disciplines spanning ethnomusicology, anthropology, dance studies, Latin American studies and history, students will combine a technical understanding of the musical and choreographic features of these genres with a consideration of their broader contexts and social impact. Among the questions that will drive class discussions are: How do sound and movement interrelate? What aspects of gender, sexuality, class, race and ethnicity arise in the performance and consumption of Latin American genres of social dance? How do high political, economic, and personal stakes emerge through activities more commonly associated with play and leisure? This class is driven by academic inquiry into these various social dance practices; it does not prioritize gaining performance skills in the genres discussed. While there will be experiential components included throughout the course (for instance music or dance workshops), the majority of the class will be conducted in a discussion/seminar format. While the ability to read musical notation is helpful, it is not required.

Class Format: seminar/studio

Requirements/Evaluation: Regular short assignments, three 5-7 page papers, final project or paper (10-12pgs)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: upperclassmen, majors in music, dance, Latino/a studies.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: MUS World Music/Ethnomusicology

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
MUS 125(D1) DANC 125(D1)

Difference, Power, and Equity Notes: Together, the music and dance genres discussed here indicate the diversity of social dance practices within Latin America, broadly conceived. Each unit of the course delves into aspects of political, historical, and cultural context and their resonance within the realm of music and dance. Specific attention is paid to racial and intercultural aspects each genre's formulation, practice, and circulation, as well as the politics of representation in embodied expression.

Attributes: GBST Latin American Studies Electives MUS World Music/Ethnomusicology
MUS 133  (S) Musics of the Spanish Colonial Empire, ca. 1500-1800  (DPE)

With territories around the globe from the Americas to the Philippines to portions of Western Europe, the Spanish colonial empire was, at its height, one of the largest and most expansive in history. This course explores the myriad ways in which Spanish colonial powers influenced, interacted with, and reacted to the musical cultures of the colonized and how indigenous and/or colonized peoples persisted in asserting their musical voices over the course of several centuries—from the time of the Spanish arrival in the Americas (as well as southern Italy and the East Indies) during the fifteenth and sixteenth centuries to the empire's eventual decline in the nineteenth century. We will begin by defining the concepts of "colonialism" and "imperialism" in order to understand how such political and socio-economic power structures developed and attempted to exert control and influence over subjugated populations—and consequently over their music. From there, we will investigate some of the musical developments and repertories that resulted from these efforts through a series of modules on various territories colonized by Spain, including the Spanish territories of Naples/southern Italy, New Spain, and the Philippines. Coursework will include discussion-based and written responses to weekly readings and listening assignments and small group presentations on a Spanish colonized space not covered in one of the central course modules. The ability to read musical notation is not required.

Class Format: Lecture-discussion

Requirements/Evaluation:  Attendance/participation; weekly discussion-leading and informal written forum responses to assigned materials; two close reading/listening papers; and a final collaborative presentation project to be conducted in small groups

Prerequisites:  none

Enrollment Limit:  20

Enrollment Preferences:  Preference given to first years and sophomores

Expected Class Size:  15

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D1)  (DPE)

Difference, Power, and Equity Notes:  The course explores how political and socio-economic power structures exerted control and influence over subjugated populations in the Spanish colonial empire—and consequently over their music, and examines the myriad ways in which Spanish colonial powers influenced, interacted with, and reacted to the musical cultures of the colonized and how indigenous and/or colonized peoples persisted in asserting their musical voices over the course of several centuries

MUS 141  (F) Opera

Cross-listings:  MUS 141 THEA 141

Primary Cross-listing

An introduction to the history of opera, from the genre's birth c. 1600 to the present. At various points in its 400-year development, opera has been considered the highest synthesis of the arts, a vehicle for the social elite, or a form of popular entertainment. Opera's position in European cultural history will be a primary focus of our inquiry. We will also study the intriguing relationship between text and music, aspects of performance and production, and the artistic and social conventions of the operatic world. The multidimensional nature of opera invites a variety of analytical and critical perspectives, including those of music analysis, literary studies, feminist interpretations, and political and sociological approaches. Works to be considered include operas by Monteverdi, Lully, Charpentier, Handel, Gluck, Mozart, Rossini, Donizetti, Verdi, Wagner, Bizet, Puccini, Strauss, Berg, Britten, Glass, and Adams.

Class Format: discussion

Requirements/Evaluation:  a midterm, a brief paper, an 8-page paper, and a final exam

Prerequisites:  none

Enrollment Limit:  20

Enrollment Preferences:  Students with experience in music and/or theater studies.

Expected Class Size:  15
**MUS 143 (F) The Symphony**

This course traces the European symphonic tradition from the late eighteenth century through the mid-twentieth century, focusing on works by Mozart, Haydn, Beethoven, Berlioz, Liszt, Mendelssohn, Schumann, Brahms, Dvorak, Mahler, Strauss, and Shostakovich. We will examine developments in musical form and harmony, social contexts for listening, and contemporary aesthetic debates about the nature of genius, the idea of musical tradition, and the narrative capacity of instrumental music.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** students will be evaluated on three 3- to 5-page essays, two exams, and short weekly assignments, ability to read music not required

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** first-years and sophomores

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

*Not offered current academic year*

---

**MUS 149 (S) The Language of Film Music**

Filmmakers have relied on music from the earliest days of silent movies (often accompanied by live musical performance) to our present age of slickly-produced online video. Along the way, trends have arisen (and have been artfully thwarted) in countless film scores, whether constructed from preexisting works or specially crafted by composers like Max Steiner, Duke Ellington, Bernard Herrmann, John Williams, James Horner, Micachu, or Björk. In this class, we will look at and listen to films from different periods and cultures, observing which techniques evolved, which have changed very little, and considering when an idea is borrowed and when it might actually be new. We will also discuss the impact this language has on the experience of the viewer, and how film music functions in the wider culture. Assignments will consist of listening/viewing, responding in writing, and re-interpreting film clips with music you will compose or borrow.

**Requirements/Evaluation:** Evaluations include: several short writing and creative assignments, two quizzes, a midterm essay, and a final creative project.

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** given to juniors and seniors

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**Attributes:** FMST Core Courses

**MUS 150 (S) The Broadway Musical (DPE)**

**Cross-listings:** THEA 150 MUS 150

**Primary Cross-listing**
Named for a specific road but enjoying a global impact, the Broadway musical has intersected with multiple styles and societal concerns over the past century. In this course, we explore the American musical theater's roots and relationship to opera, operetta, vaudeville, minstrelsy, and Tin Pan Alley. Traveling through the genre's history, we will encounter a wide range of musical styles, including ragtime, jazz, rock, and hip hop, and will explore several genre transformations, such as movies made into musicals and musicals into movies. We will develop a range of analytical skills as we investigate connections between choreography, lyrics, music, staging, and production. Throughout the semester, we will consider the genre's representations and reflections of ethnicity, race, sexuality, and class. The syllabus includes representative works by Gilbert and Sullivan, Cohan, Gershwin, Kern, Weill, Rodgers and Hammerstein, Lerner and Loewe, Bernstein, Sondheim, Lloyd Webber, Tesori, and Miranda, with particular focus on such works as Showboat, Oklahoma!, Guys and Dolls, West Side Story, Hair, Rent, and Hamilton.

Class Format: discussion
Requirements/Evaluation: a midterm, a brief paper, an 8-page paper, and a final exam
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: Seniors and Juniors and music majors.
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
THEA 150(D1) MUS 150(D1)

Difference, Power, and Equity Notes: We will develop skills aimed at analyzing and interpreting how perceptions of race, gender, and class shaped, and were shaped by, Broadway. We will consider the extent to which, for example, blackface minstrelsy and ethnic-based humor persisted and how specific musicals aimed to engage with critical social and political issues throughout the genre's history. Musicals have played a major role in the contested and ongoing endeavor to define "America."

Spring 2024
LEC Section: 01 MR 1:10 pm - 2:25 pm W. Anthony Sheppard

MUS 151 (F) History of Jazz

"There are only three things that America will be remembered for 200 years from now when they study the civilization: The Constitution, Jazz Music and Baseball. These are the three most beautiful things this culture's ever created."--(Gerald Early) Jazz is the most common name for a great African American Art form that still defies definition. Over the past century this elastic tradition has laid down firm roots for numerous other American and World musics, while itself in the throes of a seemingly permanent identity crisis. Jazz is perennially declared dead or dying yet consistently summoned by advertisers to lend vitality and sex appeal to liquor or automobiles. By any name and regardless of its health status, jazz has a rich history of conservative innovators, at once restless and reverent, who made fascinating leaps of creativity out of inspiration or necessity. This "listening intensive" class will look at the past century of jazz music through ideas, "what-if" questions and movements that changed the way the music was created, presented and perceived. Both musical concepts (such as syncopation and cross instrumental-influence) and cultural connections (racial, technological and economic) will be examined, giving us freedom to link similar kinds of musical thought across disparate settings and decades. Our inquiry will include (but not be limited to) the lives and music of Louis Armstrong, Fletcher Henderson, Mary Lou Williams, Duke Ellington, Charlie Parker, Thelonious Monk, Dizzy Gillespie, Art Blakey, John Lewis, Miles Davis, John Coltrane, and Wayne Shorter.

Class Format: All meetings online. Some meetings will be in smaller discussion groups
Requirements/Evaluation: class participation including regular reading and listening assignments; 4 quizzes, two short papers/projects
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: first-years and sophomores
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

LEC Section: 01    MWF 8:30 am - 9:45 am    Marjorie W. Hirsch

MUS 166  (S)  Beethoven

This course provides an introduction to the life and music of Ludwig van Beethoven. The composer's difficult childhood, loss of hearing, secret affair
with his "Immortal Beloved," tempestuous relationship with his suicidal nephew, along with political, philosophical, social, and cultural developments of
the late 18th and early 19th centuries, will provide context for our study of his artistic achievements. Students will listen to a broad selection of
Beethoven's music, including sonatas, string quartets, symphonies, overtures, concertos, choral works, and opera. Some of the topics we will discuss
include the nature of his genius, his compositional methods, his influence on later composers such as Schubert, Wagner, and Brahms, Beethoven in
popular culture, and the continuing impact of his music around the globe.

Class Format: lecture/discussion

Requirements/Evaluation: class participation, two 5-7 page papers, several listening quizzes, midterm and final exams

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students with a demonstrated interest in music

MUS 172  (F)  Early Modern Music and Spectacle

Nuns, shepherds, demi-gods, tyrants, warriors, angels, and saints. No matter what story you tell, spectacle is never just spectacle. Whether in an
opera, a pageant, or a comic play, the costumes, stage machinery, and visual effects are deeply encoded with political, religious, and cultural
meanings. In this course, we will explore how music and spectacle worked together to create complex layers of meaning in various cultural contexts
throughout the late medieval and early modern world (ca. 1400-1750). In doing so, we will consider how the magnificent representations of aristocratic,
imperial, and colonial power central to such dramatic performances reveal wider cultural issues of gender, race, and religion. The course structure will
follow a series of thematic modules, each addressing several case studies, on topics such as colonial power, women and madness, religious fervor,
political propaganda, and patronage. Each week, students will take an active role in analyzing, discussing, and presenting on these topics and their
related case studies both in and outside of class. For the final project, students will work in groups to develop fictional podcast interviews between
historical spectators of an early modern musical-dramatic performance of their choosing. The ability to read musical notation is not required
Class Format: lecture-discussion

Requirements/Evaluation: Attendance/participation; weekly discussion-leading and written informal forum responses to assigned materials; two close reading/listening papers; and a semester-long group podcasting project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference given to first years and sophomores

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

MUS 177  (S)  Gender and Sexuality in Music  (DPE)

Cross-listings: WGSS 177 MUS 177

Primary Cross-listing
This course explores key themes in the expression of gender and sexuality through music. It draws from primarily 21st century examples, across cultures and genres, ranging from pop boy bands to Indian bhangra dance to the musical avant-garde. Themes will include: communicating gendered ideals, dance and embodiment, transgressive performances, biography and subjectivity, intersectionality, music and sexual violence, and marketing. We will explore the ways that ideas and identities related to sex and gender are formulated and mobilized in music's performance and consumption. Inevitably, issues of sound and stagecraft intersect with factors such as race, age, and class, further informing these experiences. Students will consider their own processes of identifying and interpreting expressions of gender and sexuality in sound and movement, and contemplate the role of culture and society in informing those interpretations.

Requirements/Evaluation: attendance/participation, intermittent GLOW posts and short assignments (2 pgs or less), midterm project, and either a 12-page final paper or a project with supplementary paper (length to be determined in consultation with the instructor).

Prerequisites: open to all students; familiarity with musical terminology is helpful but not required

Enrollment Limit: 20

Enrollment Preferences: WGSS and MUSC majors/prospective majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 177(D2) MUS 177(D1)

Difference, Power, and Equity Notes: This course critically examines the ways in which music constructs and reflects gendered and sexual identities in intersectional space. We discuss how normative viewpoints come to be accepted and interpreted as 'natural,' and how musicians and audiences have maneuvered within and against those socio-political expectations. Music and readings span a wide range of sources—elite, popular, counter-cultural; from Euro-American sources to genres hailing from Brazil, Korea, and India.

MUS 179  (F)  James Baldwin's Song

Cross-listings: COMP 129 MUS 179 AFR 128

Secondary Cross-listing

"It is only in his music [. . .] that the Negro in America has been able to tell his story. It is a story which otherwise has yet to be told and which no
American is prepared to hear,” wrote James Baldwin in *Notes of a Native Son* in 1955. In this course, we strive to listen more closely to racialized experience through James Baldwin’s musical literature. Through analysis and creation of music, we hope to better understand cultural difference and collective humanity. In this course, we closely analyze James Baldwin’s use of song names, creation of musician characters, and replication of musical elements in his writing. Baldwin’s musical word play crosses historical and genre boundaries. So we will explore texts from his early to late career, such as the gospel music of his youth in the semi-autobiographical novel *Go Tell It on the Mountain*, the metaphor of the blues in the play written during the civil-rights movement *Blues for Mr. Charlie*, the jazz musician protagonist in “Sonny’s Blues” written after World War II in Paris, and his only musical recording in *A Lover’s Question* set down near the end of his life. In addition to closely analyzing James Baldwin’s attention to music throughout his literature, students will learn basic music writing and production skills. The tutorial will draw on a range of musical resources, including playlists, music workshops, guest lectures and performances. All of these resources will guide students to a more attuned hearing not only of music but also of the African American experience it reflects. By the end of the course, students will have written several short 1-2 page close analysis essays and song lyrics. For their final project, students will produce an original song based on key insights from the course. No musical experience is required, though an openness to learn and practice songwriting is expected.

**Requirements/Evaluation:** Several short 1-2 page close analysis essays of Baldwin's work, oral peer feedback presentations, song lyrics, and an original song composition for the final project

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** This course is specifically for first-year students and they will receive preference in this class; a statement of interest will be solicited from pre-registrants.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**MUS 201 (F) Music Theory and Musicianship II**

Music 201 continues to greater degrees the study of music techniques from the common practice period by means of analysis, composition, written exercises, sightsinging, and dictation. We will expand our understanding of chromaticism. We will learn how chromaticism is used as a voice-leading tool, and how it participates in music even at deeper levels of the structure. We will learn about innovations that occurred from the early 19th century through the beginning of the 20th century and will trace the origins for these new harmonic tendencies. We will also learn how composers create larger formal structures.

**Class Format:** In addition to the scheduled lecture block, the class requires a weekly aural-skills meeting, to be scheduled in the first week of class. The one-on-one meeting will take place with a lab instructor for approximately 10-15 minutes

**Requirements/Evaluation:** homework, theory quizzes, analysis papers, compositional projects, final project, class attendance, preparation, participation, and on the results of the lab portion of the class

**Prerequisites:** MUS 104

**Enrollment Limit:** 12

**Enrollment Preferences:** Music majors and potential Music majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1)

MUS 211 (F) Music, Nationalism, and Popular Culture (DPE)

This course surveys the manner, function, and contexts through which sound and ideas of national belonging are linked. We will consider influential and iconic musicians (e.g. Umm Kalthoum, Amalia Rodriguez, Bob Marley, Carlos Gardel), international forums for the expression of national sentiment (the Olympics, Miss Universe and Eurovision competitions), and a wide range of instruments, genres, and anthems that are strong conduits for national sentiment. Drawing on the work of critical theorists including Benedict Anderson, Michael Herzfeld, and Homi K. Bhabha, we will pursue a number of analytical questions: What parallels exist between musical and political structure? How do nations adjust as their policies and demographics change? How are cultural forms implicated in postcolonial nation building projects? What marginal populations or expressive forms are included, excluded, or appropriated in the formation of national identity? Finally, what differences emerge as we change our focus from a national to an international perspective, or from officially endorsed representations of national culture to unofficial popular forms of entertainment?

Requirements/Evaluation: Class participation, regular short (1 page) written responses, two 5- to 6-page papers, a Final Paper/Project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Upperclass students and music majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: Owing to its global focus and attention to power and privilege in political and musical structures, this course meets the DPE requirement. Topics include the use of music for social control and subversion in Mobutu's Zaire, its affective power in U.S. campaign ads, and the ways in which constructions of 'folk music' impact power differentials in a national political structure. Assignments help students develop an awareness of the specific strategies whereby music mobilizes national ideologies.

MUS 214 (S) Divas and Dervishes: Introduction to Modern Arab Music and Performance (DPE) (WS)

Cross-listings: MUS 214 ARAB 214 COMP 270

Secondary Cross-listing

From Sufi rituals to revolutionary uprisings, music has long played a central role in the social, political, and religious life of the Arab world. This is especially audible in the modern era, when new technologies and institutions began to record, amplify, and broadcast the region's sounds, preserving centuries-old traditions while also producing new forms of popular music. This course introduces students to Arab musical genres and practices as they developed from the late nineteenth century. We will cover a broad geographical range, exploring the classical Andalusian repertoires of Algeria, ecstatic dervish chants in Egypt, patriotic pop tunes from Lebanon, and other topics. To highlight connections between musical traditions as well as their unique local features, we will ask questions such as: What can music tell us about interactions between sacred and secular life? How is music used to define social groups and negotiate identity, gender, and class? Which musical characteristics are associated with Arab "heritage" and "modernity," and how are these performed? In what ways does music shape everyday life in the Arab world? Class sessions and discussion will be based on academic readings and at-home listening assignments. No previous knowledge of Arabic or Arab music are required.

Requirements/Evaluation: In-class participation, short essays (1 page) every two weeks, midterm presentation, and a final paper (12-14 pages).

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies and Music majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

MUS 214(D1) ARAB 214(D1) COMP 270(D1)

Writing Skills Notes: Students will develop their writing skills by submitting one-page unit responses every two weeks and a final paper of 12-14 pages on a topic of their choice. Students will receive feedback on each writing assignment and have opportunities for multiple drafts and peer review during the semester.

Difference, Power, and Equity Notes: Through the lens of music, this course critically examines modern Arab society and power dynamics related to politics, gender, race, and class.

SEM Section: 01 TR 9:55 am - 11:10 am Nicholas R Mangialardi

MUS 217 (F) Hip Hop Culture (DPE) (WS)

Cross-listings: ENGL 221 MUS 217 AFR 222 AMST 222

Secondary Cross-listing

The course examines how young people of color created hip hop culture in the postindustrial ruins of New York City, a movement that would eventually grow into a global cultural industry. Hip hop music producers have long practiced "diggin' in the crates"--a phrase that denotes searching through record collections to find material to sample. In this course, we will examine the material and technological history of hip hop culture, with particular attention to hip hop's tendency to sample, remix, mash-up, and repurpose existing media artifacts to create new works or art. We will use a media archaeological approach to examine the precise material conditions that first gave rise to graffiti art, deejaying, rapping, and breakdancing, and to analyze hip hop songs, videos, and films. Media archaeology is a critical and artistic practice that seeks to interpret the layers of significance.
embedded in cultural artifacts. How does hip hop archaeology remix the past, the present, and the future? How do the historical, political, and cultural coding of hip hop artifacts change as they increasingly become part of institutional collections, from newly established hip hop archives at Cornell and Harvard to the Smithsonian National Museum of African American History and Culture?

Requirements/Evaluation: Four papers, project with presentation, and a final exam.
Prerequisites: None
Enrollment Limit: 19
Enrollment Preferences: AMST majors or prospective majors
Expected Class Size: 19
Grading: no pass/fail option, yes fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 221(D1) MUS 217(D1) AFR 222(D2) AMST 222(D2)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to use an effective descriptive and critical vocabulary to discuss and analyze artifacts of hip hop culture, with attention to race, gender, class, sexuality, and other categories of social difference. They must understand the material, technological, historical, and cultural contexts that gave rise to hip hop culture, and proficiently synthesize scholarly perspectives related to the formation and transformations of hip hop from the early 70s to the early 21st cent.

MUS 220 (F) African Dance and Percussion
Cross-listings: AFR 201 MUS 220 DANC 201

Secondary Cross-listing
We will examine two forms that embody continuity of tradition or the impact of societal, political or economic change. Lamban was created by the Djeli, popularly called Griots served many roles in the kingdoms of Ghana and Old Mali from the 12th century to current times. This dance and music form continues as folklore in modern day Guinea, Senegal, Mali and The Gambia where it is practiced by the Mandinka people. Bira is an ancient and contemporary spiritual practice of Zimbabwe’s Shona people. While these forms are enduring cultural practices, Kpanlogo from the modern West African state of Ghana represents the post-colonial identity of this nation's youth and their aspirations for independence at the end of the 1950s. We will also consider the introduction of these forms outside of their origin. This course can be taken for academic and/or PE credit

Class Format: Class hours will be used to learn and use the dance and music of at least two forms including historical context, and individual or group performance project. When possible, our process will include guest artists and field trips to see live performances. As well as use of the archives at Jacob's Pillow Dance Festival, Sawyer Library and the art collection at Williams College Museum of Art.

Requirements/Evaluation: Discussion of assignments, semester long group performance project rooted in the materials taught. Students enrolled for PE credit are responsible only for the performance-based projects

Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: Students who have taken a 100 level dance course or DANC 202; have experience in a campus-based performance ensemble; or have permission of the instructors

MUS 221  (S)  African Dance and Percussion

Cross-listings:  AFR 206 DANC 202 MUS 221

Secondary Cross-listing

Before the 20th century, the African continent was the source of dance and music that influenced new forms rooted on and off the continent. These forms are shaped by the impact of religion, colonialism, national political movements, travel, immigration, and the continuing emergence of technology. In South Africa, the labor conditions of miners instigated the creation of Isicathulo, Gum boots, and in Brazil the history of colonialism is a factor that anchors Samba as a sustaining cultural and socioeconomic force. The birth of Hip Hop in the 20th century finds populations across the globe using its music, dance, lyrics, and swagger as a vehicle for individual and group voice. Hip Hop thrives as a cultural presence in most countries of the African continent and in the Americas. We will examine the factors that moved this form from the Bronx, New York, to Johannesburg, South Africa, and Rio, Brazil. We will examine at least two of these forms learning dance and music technique and composition material that will inform their practice. Each of these genres generated new physical practices, new and enduring communities while continuing to embody specific histories that have moved beyond their place of origin. What is their status in this century?

Class Format:  Class hours will be used to learn and use the dance and music of at least two forms including historical context, and individual or group performance project. When possible, our process will include guest artists and field trips to see live performances. As well as use of the archives at Jacob’s Pillow Dance Festival, Sawyer Library and the art collection at Williams College Museum of Art.

Requirements/Evaluation:  Discussion of assignments, semester long group performance project rooted in the materials taught. Students enrolled for PE credit are responsible only for the performance-based projects

Prerequisites:  none

Enrollment Limit:  16

Enrollment Preferences:  students who have taken DANC 107,108 or DANC 201; have experience in a campus based performance ensemble; or have permission of the instructors

MUS 231  (F)  Music in History I: Music and Culture from Antiquity to 1750

This course explores over 1500 years of music-making in (and around) Europe and the Americas from antiquity to 1750 through an investigation of significant musical styles, forms, and theories in cultural and historical context. Our primary inquiry will be to consider how and why these musical styles and forms were created and circulated--through both oral performance and the written medium--by considering the major historical, cultural, technological, and aesthetic issues surrounding them. We will further contextualize these developments within a deeper consideration of the political, religious, racial, and gender-based interactions and divisions throughout history. In doing so, the course introduces the modern study of music history, sampling a broad range of recent scholarship reflecting an array of critical approaches to the study of early music in our own day. Weekly coursework will include readings on music historical topics, as well as listening and score analysis of key repertory in modern transcription. Assessments will take place throughout the semester through listening/score quizzes, exams, primary source presentations, and a research-based essay project focused on repertories and practices outside of the traditional musical canon.
Class Format: lecture-discussion
Requirements/Evaluation: Attendance/participation; presentations/discussion-leading on one secondary scholarship article and one primary source; 3-4 short quizzes; final exam; and a research-based essay project
Prerequisites: ability to read music; open to qualified non-majors with the permission of instructor
Enrollment Limit: 15
Enrollment Preferences: music majors, those planning to major in music, and any student with a strong background and interest in music.
Expected Class Size: 8
Grading: yes pass/fail option, yes fifth course option
Unit Notes: Required course for Music majors. Music majors may not take MUS 231 as pass/fail or 5th course option if they are using it to fulfill the Medieval/Renaissance/Baroque music history requirement for the music major.
Distributions: (D1)

SEM Section: 01 MR 2:35 pm - 3:50 pm Elizabeth G. Elmi

MUS 232  (S)  Music in History II: Classical and Romantic Music
MUS 232 traces the development of Western art music from 1750 to 1900. Through listening, reading, and score analysis, we will study a broad range of composers and genres, Classical and Romantic aesthetics, and connections between music and political, philosophical, social, and cultural developments of the period. Composers include Haydn, Mozart, Beethoven, Schubert, Robert Schumann, Clara Schumann, Fanny Mendelssohn Hensel, Berlioz, Chopin, Liszt, Verdi, Wagner, Brahms, Tchaikovsky, Mahler, and others. Some of the topics we will discuss include the changing role of composers in society, music's relationship to the other arts, challenges faced by female composers, controversies surrounding music and meaning, the interaction of music and drama in opera, and musical nationalism.

Class Format: lecture-discussion
Requirements/Evaluation: class participation, two 5-6 page papers, GLOW posts, midterm and final exams
Prerequisites: ability to read music
Enrollment Limit: 15
Enrollment Preferences: Music majors, those planning to major, and any student with a strong interest in music
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Unit Notes: Music majors may not take MUS 232 as pass/fail or 5th course option if they are using it to fulfill the Classical-Romantic music history requirement for the music major.
Distributions: (D1)

MUS 233  (F)  Music in History III: Musics of the Twentieth Century
A survey of musics in both Western and non-Western society from the close of the nineteenth century to the present. Emphasis will be on the contextual study of the music of major composers of Western art music, on the musical expressions of selected areas of world music such as Africa, Asia, India, and the Americas, and on the intermingling of musical influences of pop, jazz, and art music. Our study will focus on issues of exoticism and globalization.

Class Format: discussion
Requirements/Evaluation: class participation, two papers, a midterm, and a final exam
Prerequisites: ability to read music
Enrollment Limit: 15
Enrollment Preferences: Music majors or students with some musical background.
MUS 234 (F) Soundscapes of Renaissance Europe

What was the sonic experience of living in late-medieval and early-modern Europe? This course will explore the sights and sounds of daily life for cultural elites as well as the average urban resident. Although it is often vocal polyphony that first comes to mind when thinking about Renaissance music, acoustic environments were complex, noisy, and diverse. This course aims to reflect that heterogeneity: topics include bells, processions, music and architecture, instrumental music, plainchant, visual depictions of music-making, and uses of music to project power, as well as sacred and secular vocal polyphony. Students will zoom in on cities, courts, and churches, especially the musical centers of Bruges, Florence, Ferrara, the Imperial Court of Holy Roman Emperor Charles V, and Bavaria. The course will examine music by some of the most important composers of the era, including Guillaume Du Fay, Josquin des Prez, Philippe Verdelot, Nicolas Gombert, and Orlando di Lasso.

Class Format: Meeting twice per week. Class discussion will be central to this course.

Requirements/Evaluation: in-class preparation and participation, short mid-term paper, final presentation, and final paper

Prerequisites: ability to read musical notation

Enrollment Limit: 20

Enrollment Preferences: music majors, those planning to major in music, or any student with a strong interest in music or Renaissance Europe

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

MUS 235 (S) Music in the Global Middle Ages, ca. 500-1500

Spanning 1000 years, the period encompassing the Middle Ages (ca. 500-1500) was a time of experimentation, exploration, and growing interconnection around the world. From economic expansions to developing trade routes and from violent religious crusades to flourishing universities, cities, and courts, opportunities for cultural investment and exchange among regions in Western Europe, North Africa, and Central and East Asia were plentiful, if not always peaceful. In this seminar, we will consider how a global historical perspective shifts our understanding of music in the Middle Ages from one based on hegemonic European progress in isolation to one that reveals a multitude of influences, interactions, and interconnections among people of various cultures, races, and religions both within and outside of the European continent. Through a series of case studies, we will address how and where these global interconnections took place and what musical practices flourished as a result. We will give special consideration to the following topics: orality and literacy, race and difference, the politics of religion, economic power, and manuscript culture. Coursework will include weekly readings on musical and broader historical topics, listening and score analysis of key repertory in modern transcription, and study of original notation through manuscript facsimiles. Students should be comfortable reading music notation.

Class Format: lecture-discussion

Requirements/Evaluation: Attendance/participation; presentations/discussion-leading on one secondary scholarship article and one primary source; a semester-long collaborative music mapping project; and either a final research paper or a comparable creative project with supplementary paper.

Prerequisites: ability to read music; open to qualified non-majors with the permission of instructor

Enrollment Limit: 15

Enrollment Preferences: music majors, those planning to major in music, and any student with a strong background and interest in music

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Music majors should not take MUS 235 as pass/fail or 5th course option if they are using it to fulfill the Medieval/Renaissance/Baroque music history requirement for the music major or as a major elective.
MUS 239 (S) Music in the Global Cold War

Cross-listings: MUS 239 LEAD 239

Primary Cross-listing

Throughout the Cold War (1947-1991), music was deployed as a weapon, as a source of nationalist and ideological inspiration, as a form of political protest and resistance, and as propaganda. Music both echoed and helped shape political views and, therefore, prompted various forms of regulation and censorship (McCarthyism in the U.S.; the Union of Soviet Composers). To counter Soviet claims of American cultural inferiority and racism, the U.S. sponsored numerous musical diplomacy efforts showcasing both jazz (Armstrong; Ellington; Brubeck) and classical musicians and composers (Bernstein; American orchestras). Cold War politics and the threat of nuclear war influenced musical styles (Copland; Soviet Socialist Realism; the popular American folk music revival; serialism; rock behind the Iron Curtain), specific musical events (Tokyo East West Music Encounter; concerts celebrating the fall of the Berlin Wall), and individual careers (Shostakovich; Robeson; Van Cliburn). To investigate music's political roles and capacity for expressing communist and democratic capitalist ideologies, we will adopt a case study approach. The Cold War was a global political and, frequently, militaristic struggle. Though our focus will be on music in the U.S.S.R. and U.S.A., we will also consider musical developments impacted by the Cold War throughout Western and Eastern Europe, in Latin America, and in East Asia.

Class Format: Class discussion will be central to this course.

Requirements/Evaluation: 20% = Participation; 20% = Paper #1, 5-6 pages; 25% = Paper #2, 8 pages; 35% = Paper #3, 12 pages, due during exam period

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Students with relevant experience in Political Science, History, or Music studies.

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
MUS 239(D1) LEAD 239(D2)

Writing Skills Notes: Students will write three papers during the semester: a 6 page, 8 page, and a 12 page paper. Drafts of papers 2 and 3 will be required prior to the due dates listed below. This is a "writing skills" course. Students will receive detailed comments on each paper, allowing them to build upon those comments in subsequent writing assignments.

Spring 2024

LEC Section: 01 TR 9:55 am - 11:10 am W. Anthony Sheppard

MUS 252 (F) Introduction to the Music of John Coltrane

Cross-listings: MUS 252 AFR 242

Primary Cross-listing

This course offers the serious music student an opportunity to study the unique body of work produced by saxophonist and composer John Coltrane (1926-1967). The course traces the evolution of Coltrane's compositional and performance styles in the context of the musical and cultural environment in which they developed. Emphasis placed on Coltrane's musical style, representing a unique synthesis of influences, including jazz, world, and European Classical music and spirituality. Substantial listening and reading assignments, including a biography and related criticism, as well as detailed score analysis and study, are required.

Requirements/Evaluation: in-class participation including small quizzes, midterm, class presentation, and final paper

Prerequisites: MUS 103 and/or 203 strongly recommended; musical literacy sufficient to deal with the material and/or permission of instructor

Enrollment Limit: 19
Enrollment Preferences: musically literate students and Music majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
MUS 252(D1) AFR 242(D2)

Fall 2023
LEC Section: 01 TR 9:55 am - 11:10 am Kris Allen

MUS 254 (S) Bebop: The (R)evolution of Modern Jazz

Cross-listings: MUS 254 AFR 254

Primary Cross-listing

In the 1940s, Jazz turned a corner, transitioning from the functional and popular music of the swing era to the increasingly complex art music known as bebop. The practitioners of this new sub-genre were seen not as showmen or entertainers, but (in the words of poet Ralph Ellison) as "frozen faced introverts, dedicated to chaos." This music was simultaneously old and new, a musical evolution interpreted through the lens of cultural revolution. This class will survey the lives, music and continuing impact of bebop's most pivotal figures: Charlie Parker, Thelonious Monk, Dizzy Gillespie, Bud Powell and Kenny Clarke among many others. Through score study, guided listening and performance, the class will examine the melodic, harmonic and rhythmic innovations associated with this pivotal era in jazz history. We will evaluate, compare and contrast examples of contemporary theoretical scholarship concerning this musical vocabulary and it's evolution. Intersections between the music and parallel artistic, social and political movements will also be addressed.

Requirements/Evaluation: weekly reading, listening, musical memorization and performance. Short written responses to discussion prompts and participation in class discussion; quizzes on assigned readings and listening, and final exam

Prerequisites: MUS 104b or permission of instructor, instrumental or vocal proficiency.

Enrollment Limit: 12

Enrollment Preferences: Music majors, Jazz Ensemble members, Africana Studies concentrators

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
MUS 254(D1) AFR 254(D1)

MUS 272 (S) Music and Meaning (WS)

Nearly everyone finds music meaningful, but what exactly does it mean? Without the help of words, this largely non-referential art presents special challenges to interpretation. While most would agree that musical sounds can do such things as mimic the rumbling of thunder, evoke the countryside, suggest the act of chasing, or express rage, the capacity of music to convey meaning remains controversial among scholars, performers, and listeners. Some, following music critic Eduard Hanslick, assert that musical works are essentially "tonally moving forms"—patterns of sound with no reference to the world outside themselves; a work's meaning derives solely from the interplay of musical elements. Others counter that music can signify aspects of human experience, its sounds and structures merely referring to the outside world but even relating complex narratives. Certain writers have argued that, without the assistance of language, what music signifies remains vague, while others insist that the meaning of music is actually more precise than that of words. In this tutorial course, we will explore a range of questions regarding musical meaning. How can combinations of pitches, rhythms, and instrumental timbres signify something beyond themselves? Is the subject of musical meaning more relevant to some historical styles or genres than others? How can we determine the meaning(s) of a work? Should we concentrate on formal processes within the music? Consider socially constructed meanings? Seek the composer's intentions? Emphasize our personal responses? What makes some
interpretations more convincing than others? In grappling with these questions, students will engage with writings by Agawu, Cone, Hanslick, Kramer, Langer, Lewin, Newcomb, and Schopenhauer, among others. Music to be studied includes works by Beethoven, Schubert, Chopin, Brahms, Mahler, Tchaikovsky, Ravel, Stravinsky, Glass, and Adams.

Requirements/Evaluation: Students will write and present a 5- to 6-page paper every other week and a 1-2 page response to their partner's paper in the alternate weeks; evaluation will be based on five papers/presentations, and five responses.

Prerequisites: Ability to read music, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Any student who expresses a strong interest in the course

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: In this tutorial course, students will write and present a 5- to 6-page paper every other week (five papers total) and a 1- to 2-page response to their partner's paper in the alternate weeks (five responses total). Through discussion in the tutorial sessions and comments on the papers, the course will place strong emphasis on developing students' critical thinking and writing skills.

Not offered current academic year

MUS 273 (F) Dangerous Music (WS)

As a largely non-referential art whose meanings are far from transparent, music might seem to pose little danger. How could mere sounds represent a threat? Yet precisely because its meanings can be obscure, enabling it to achieve its ends surreptitiously, music has intertwined with danger throughout history. With its power to stir the emotions, stimulate bodily movement, encode messages, and foment rebellion, music has often been perceived as an agent of harm. Plato claimed that too much music could make a man effeminate or neurotic, and warned that certain musical modes, melodies, and rhythms promote licentious behavior and anarchic societies. Puritans, Victorians, and totalitarians, as well as opponents of ragtime, rock ‘n roll, and rap, have also accused certain musical genres or styles of exerting dangerous influences, and sought to limit or suppress them. In Afghanistan, the Taliban banned music altogether. While music has often been unfairly accused, its potential for placing people in actual danger is undeniable. Works that are played at ear-splitting decibel levels, that call upon performers to injure themselves, that are used as a form of psychological torture, or that incite violence demand reconsideration of the widely shared view that music is fundamentally a form of entertainment.

Requirements/Evaluation: evaluation will be based on participation, five 5-6-page papers/presentations, and five 1-2 page responses

Prerequisites: an ability to read music is desirable but not required

Enrollment Limit: 10

Enrollment Preferences: students with demonstrated interest in music

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will write five 5-6 page papers and five 1-2 page responses, and will receive extensive feedback on their writing.

Not offered current academic year

MUS 279 (F) American Pop Orientalism (DPE) (WS)

This tutorial will investigate the representation of Asians and Asian Americans in American popular culture since the late nineteenth century. Our focus will be on music's role in Orientalist representation in a wide variety of media and genres, including Hollywood film, television, popular song, music videos, Broadway musicals, hip hop, and novels. We will begin with major texts in cultural theory (Said, Bhabha) and will attempt throughout the semester to revise and refine their tenets. Can American Orientalism be distinguished in any fundamental way from nineteenth-century European imperialist thought? How does Orientalist representation calibrate when the "exotic others" being represented are themselves Americans? Our own critical thought will be sharpened through analysis and interpretation of specific works, such as Madame Butterfly, "Chinatown, My Chinatown," Sayonara, Flower Drum Song, Miss Saigon, Rising Sun, M. Butterfly, Aladdin, and Weezer's Pinkerton. We will end the semester by considering the current state of Orientalism in American popular culture.

Requirements/Evaluation: five 5- to 6-page essays and five critical oral responses

Prerequisites: previous related coursework and/or musical experience is desirable, but is not required
Enrollment Limit: 10
Enrollment Preferences: students with prior related course experience
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will receive detailed comments on each paper, allowing them to build upon those comments in subsequent writing assignments. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Students will develop analytical and interpretive skills applicable to their future engagements with a wide range of art forms as we investigate the musical, literary, and visual techniques employed in works of exotic representation. We will focus on how popular culture has shaped and reflected perceptions of race and gender in American history since the late 19th century.

Attributes: AMST Arts in Context Electives ASAM Core Courses

Not offered current academic year

MUS 281 (F)(S) Individual Vocal and Instrumental Instruction

Individual vocal or instrumental lessons offered as a partial credit fifth course. Students are encouraged to take this course for a letter grade. (Note: partial credit music lessons taken pass/fail do not count as one of the three pass/fail options available to students for regular semester courses.)

Students are required to prepare for 10 lessons during the semester with a minimum expectation of one hour practice per day and to perform publicly on at least one departmental studio recital during the semester. Lessons are scheduled TBA based upon instructor schedule. Make-up lessons are given at the discretion of the instructor. Courses in individual vocal or instrumental instruction are fully subsidized for all students who meet the 10 lesson commitment. There is no registration via Williams Student Records. To register for the course, a student must first contact the appropriate teacher; they may do this using the inquiry form. The inquiry form, an outline of the registration process, and the lesson registration deadlines are available on the Music Department website at https://music.williams.edu/courses/#individual-vocal-and-instrumental-instruction. Students will be reassigned to course numbers 281-288 based on the number of semesters of instruction already taken in one particular section. Specific instrument or voice sections are as follows: 01 Bassoon, 02 Cello, 03 Clarinet, 04 Bass, 05 Flute, 06 Guitar, 07 Harpsichord, 08 Horn, 09 Jazz Piano, 10 Oboe, 11 Organ, 12 Percussion, 13 Piano, 14 Classical Saxophone, 15 Trumpet, 16 Viola, 17 Violin, 18 Voice, 19 Jazz Bass, 20 Jazz Vocal, 21 Trombone, 22 Harp, 23 Jazz Drum, 24 Jazz Saxophone, 25 Jazz Trumpet, 26 Euphonium, 27 Tuba, 28 African Drumming, 29 Jazz Guitar, 30 Mbira, 31 Vocal/Songwriting, 32 Jazz Trombone 33 Sitar, 34 Tabla, 35 Erhu, 36 Yangqin, 37 Zheng, 38 Liuqin/Pipa, 39 Zhongruan

Requirements/Evaluation: Lesson preparation, public performance, and progress throughout the semester.

Prerequisites: permission of the individual instructor; enrollment limits apply to each section based upon studio space and student qualifications

Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: NA
Grading: yes pass/fail option, half credit fifth course option

Unit Notes: Enrollment in more than one studio must be approved each semester by the chair beforehand.

Distributions: No divisional credit

MUS 291 (F)(S) Chamber Music Workshop

Classical and Jazz Chamber Music and other small departmental ensembles (including Chamber Choir, Percussion Ensemble, Chinese Ensemble, and Brass Ensemble) coached by faculty on a weekly basis culminating in a performance. Offered as a partial credit fifth course that can only be taken on a pass/fail basis. Students in ad hoc groups organized each semester by the director of the chamber music or jazz programs are required to prepare for 10 one-hour coaching sessions during the semester. It is recommended that each group rehearse a minimum of 2 hours each week in preparation of the coaching. Each ensemble is responsible for keeping a weekly log of rehearsal times and attendance. The logs are to be handed in
to the coaches at the end of the semester. In addition, students are expected to practice the assigned music individually and are required to perform on the Classical or Jazz Chamber Music concert at the end of the semester. The ensembles will be organized based on skill levels and the instruments represented. To register for the course, a student must contact the Chamber Music Performance Coordinator. If you are accepted into a chamber group the instructor will send you a link to an online form to complete registration. The Music Department will submit the registration to the Registrar’s Office. It is not possible for the student to register directly through PeopleSoft. Students will be assigned to course numbers 291-298 based on the number of semesters of instruction already taken in one particular section.

Class Format: partial credit fifth course

Requirements/Evaluation: preparation for weekly coachings

Prerequisites: Permission of the Chamber Music Staff; enrollment limits will depend upon instructor availability. Enrollment in more than one chamber group must be approved by the chair.

Enrollment Limit: 12

Enrollment Preferences: Preference given to more advanced students, to be determined by audition as necessary.

Expected Class Size: 12

Grading: pass/fail option only

Unit Notes: The deadlines for registration follow: Fall (291) -- Registration Deadline: By the end of Add/Drop period and Spring (291) -- Registration Deadline: By the end of Add/Drop period. Registration for Chamber Music must be completed during the drop/add period of each semester. It is recommended that students wishing to take Chamber Music instruction in the fall semester attend the Music Department open house. Open to first year students.

Distributions: No divisional credit

MUS 301 (F) Counterpoint

Counterpoint, the study of the ways independent melodic lines can be joined in music, has been essential to musical and compositional instruction for centuries. Counterpoint was taught by Mozart, studied by Beethoven, and to this day remains an integral part of compositional training. The course will introduce students to species counterpoint in two and three voices--exercises that develop discipline in polyphonic writing, hearing, and thinking. The exercises will focus on the constraints of sixteenth-century vocal polyphony (music of Palestrina and Lassus) but will illustrate how such contrapuntal discipline is also manifest in music of Corelli, Bach, Brahms and Debussy.

Requirements/Evaluation: written exercises and emulation projects

Prerequisites: MUS 103 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Music majors and those with previous music theory training

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

MUS 307 (F)(S) Composition III

Advanced individual instruction in composition. Projects will be initiated largely by the students with guidance from the instructor. Student is responsible for arranging performance of their own work. Student may enroll for up to four semesters by taking these courses in sequence, with the lower numbered course being the prerequisite for the next higher numbered course. May not be taken in conjunction with Music 493 or 494, the honors courses in composition.

Requirements/Evaluation: satisfactory completion of student-initiated projects

Prerequisites: MUS 205, 206 and permission of instructor
MUS 308 (F)(S) Composition IV

Advanced individual instruction in composition. Projects will be initiated largely by the students with guidance from the instructor. Student is responsible for arranging performance of their own work. Student may enroll for up to four semesters by taking these courses in sequence, with the lower numbered course being the prerequisite for the next higher numbered course. May not be taken in conjunction with Music 493 or 494, the honors courses in composition.

Requirements/Evaluation: satisfactory completion of student-initiated projects
Prerequisites: MUS 205, 206 and permission of instructor

MUS 309 (F) Jazz Arranging and Composition

This is a course designed to acquaint the student with the basic principles of composing and arranging for Jazz Ensemble, beginning with lead sheet format and progressing through the big band. Intensive score study and some transcription from selected recordings required. Evaluation will be based on the successful completion and performance of original arrangements and/or compositions during the semester, to include several lead sheet compositions, one quintet and one sextet arrangement, and one arrangement for big band. Students must attend extra small ensemble and large ensemble rehearsals when work is being rehearsed and/or performed. A solid background in jazz chordSCALE theory is required.

Class Format: weekly lecture and targeted ensemble rehearsals generally last 2 hours total; additional individual tutorial style meetings are generally an hour a week, more frequently and for longer amounts of time as needed
Requirements/Evaluation: project based 4-5 compositions/arrangements
Prerequisites: MUS 104B or permission of the instructor
MUS 316 (F) Music in Asian American History (DPE) (WS)

Cross-listings: AMST 366 MUS 316

Primary Cross-listing

Is "Asian American music" all music made by Asian Americans, music by Asian Americans specifically drawing on Asian heritage, or music engaging with Asian American issues? This course embraces all three definitions and the full diversity of Asian American musical experience. We will study the historical soundscapes of immigrant communities (Chinese opera in North America; Southeast Asian war refugees) and how specific traumatic political events shaped musical life (Japanese American internment camps). We will encounter works by major classical composers (Chou Wen-Chung; Chen Yi; Tan Dun; Bright Sheng) and will investigate the careers and reception of prominent classical musicians (Midorí; Seiji Ozawa; Yo-Yo Ma). Afro-Asian fusions, inspired by civil rights protest movements, manifested in jazz (Jon Jang; Fred Ho; Anthony Brown; Hiroshima; Vijay Iyer) and hip hop (MC Jin; Awkwafina; Desi rappers). Asian Americans have been active in popular music at home and abroad (Don Ho; Yoko Ono; Wang Leehom; Mitski). Finally, we will investigate communal forms of Asian American music making that have crossed racialized and gendered boundaries (taiko drumming; Indonesian gamelan; belly dance; Suzuki method). This seminar is designed to develop research skills, as we pursue original fieldwork, archival research, and oral history interviews.

Requirements/Evaluation: Active class participation; two short papers (5-6 pp.) and a research term paper (12-15 pp.).
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Students with curricular experience in Asian American history or music studies.
Expected Class Size: 10
Grading: no pass/fail option, yes fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 366(D1) MUS 316(D1)

Writing Skills Notes: Students will write three papers during the semester: two 5-6 page papers and a 12-15 page research paper, written in stages. Students will receive detailed comments on each paper and at each stage of the research paper process, allowing them to build upon those comments in subsequent writing assignments.

Difference, Power, and Equity Notes: Political and cultural forces of exclusion not only determined Asian American musical participation in American music history but have shaped Asian American styles of music. We will study the history of Asian American political struggles as they have intersected with music and how Asian Americans have at certain points sought allegiance through music with other marginalized groups. We will explore as well popular media representations of Asian American musicians revealing race-based assumptions.

Not offered current academic year

MUS 323 (S) Arts Organizing in Africa and the Diaspora (DPE)

Cross-listings: DANC 323 THEA 321 MUS 323

Primary Cross-listing

At the heart of this class is the question, how do artists and organizations use the performing arts to effect social change in their communities? Drawing from a number of case studies from throughout Africa and the African Diaspora, we will first endeavor to understand and contextualize issues related to education, social uplift, the environment, and the economy as they relate to specific communities. We will then examine how a series of organizations (from grassroots campaigns to multinational initiatives) utilize the performing arts in response to those issues. Among the issues we will discuss at length are: -How do performers and organizations navigate the interplay between showcasing the performance talents of individuals and groups and foregrounding an issue or cause? More broadly, what dilemmas emerge as social and aesthetic imperatives intermingle? -What are the dynamics between people acting on a local level within their communities and their various international partnerships and audiences? -How can government or NGO sponsorship help and/or hinder systemic change? By the end of the semester, students will be equipped with conceptual frameworks and critical vocabularies that can help them ascertain the functions of performance within larger organizations and in service to complex societal issues. Throughout the course, we will watch and listen to a variety of performances from traditional genres to hip-hop, however this class is less about learning to perform or analyze any particular genre than it is about thinking through how performance is used as a vehicle for social change. Case studies will include youth outreach and uplift in Tanzania through the United African Alliance, campaigns to promote girls’ education in Benin and
Zimbabwe, community-wide decolonizing initiatives through the Yole!Africa Center in the Democratic Republic of Congo, and the cultural reclamation of a mining town in Suriname through the arts organization, Stichting Kibii.

Requirements/Evaluation: Four case study profiles, midterm essay (5-7 pages), and a final project. Regular participation in class discussion.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If the course exceeds the maximum enrollment, selection will be made based on students' explanations for why they want to take the class.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

DANC 323(D1) THEA 321(D1) MUS 323(D1)

Difference, Power, and Equity Notes: This course interrogates on a fundamental level issues of power and equity. Using the performing arts as a critical lens, we discuss a series of social and environmental challenges that communities of African descent face. These are in direct dialogue with global systems of power and economic factors. Issues include: environment, education, local communities' interactions with multinational corporations, and representational politics in performance.

Attributes: MUS World Music/Ethnomusicology

Spring 2024

SEM Section: 01 MW 7:00 pm - 8:15 pm Corinna S. Campbell

MUS 352 (S) Interplay: Collaborative Traditions in Jazz

"Meaningful theorizing about jazz improvisation at the level of the ensemble must take the interactive, collaborative context of musical invention as a point of departure" - Ingrid Monson, Saying Something. Collaboration gives birth to specific musical moments, shapes the dramatic arc of whole pieces and performances, and is the foundation out of which the styles and larger artistic identities of individuals and groups arise. This class is an opportunity for advanced students of jazz music to investigate the uniquely collaborative nature of jazz language assimilation and communication. Participants will transcribe and analyze examples of musical interplay from the recorded works of the Miles Davis Quintet of the 1960's, the John Coltrane Quartet of the 1960's, and other notable jazz ensembles. They will also undertake a thorough profile of a modern-day ensemble, including a performance-based final project. Essays on jazz aesthetics by Berliner, Monson, Hobson and Rinzler among others will serve to broaden our discussions as we examine the ideas of musical collaboration and group identity through social and commercial lenses.

Requirements/Evaluation: an assortment of weekly writing/listening/transcription/analysis/composition/performance projects

Prerequisites: advanced jazz theory and performance skills, permission of instructor, MUS 104b, 204 highly suggested

Enrollment Limit: 10

Enrollment Preferences: Music majors, jazz ensemble members

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

MUS 381 (S) Choral Conducting

The purpose of this course is to become fully acquainted with the fundamentals of conducting gesture, score study, and rehearsal technique as it relates to the choral rehearsal. Using the class as the primary practice choir, students will learn to express specific musical ideas and concepts through conducting patterns and body language, and will develop fluency and ease in these mediums through the study of varied repertoire and techniques. Regular videotaping of conducting sessions will provide opportunities for students to study themselves. Repertoire will include a broad survey of works from the early Renaissance to early 21st century, accompanied and a cappella, and issues of conducting ensembles at various skill levels will be addressed.

Class Format: coaching sessions
MUS 382  (F)  Orchestral Conducting
This course will introduce and develop a broad range of subjects associated with conducting, including: leadership, rehearsal techniques, physical and aural skills, interpretation, performance practices, and programming. Related areas to be discussed include: balance, intonation, rhythm, articulation, bowings, and complex meters. Weekly conducting and score reading assignments will form the core of the workload. Larger projects may include conducting existing instrumental ensembles, and along with score reading, will be the basis of the midterm and final exams. This course includes instrument demos, and conducting videos.

Class Format: lab

MUS 391  (F)(S)  Advanced Musical Performance
Individual Instruction in instrumental and vocal lessons offered at the advanced level as a regular full credit course. Intended primarily for music majors, full credit lessons must be approved by the entire music faculty. Students are expected to have demonstrated a high level of accomplishment on their instrument/voice, through at least 4 semesters of partial-credit study with their instructor. MUS 391, 392, 491, 492 must be taken as a graded course and it is strongly recommended that it be taken only as part of a four-course load; the numbers 391, 392, 491, 492 should be used for four sequence courses in the same instrument; if a different instrument is elected, the numbering sequence should start again at 391; numbers are selected without regard to semester taken or class year of student. To register for the course, a student and their instructor must submit an application to the assistant to the department chair by the Tuesday before the first Friday of the semester. Information on the registration process is available on the music Department website https://music.williams.edu/courses under *Advanced Musical Performance.*

Class Format: individual instruction

MUS 392  (F)  Advanced Musical Performance

Unit Notes: Music majors may register for a total of four semesters, non-majors may register for two semesters. A student must submit an application and registration/billing form for each semester. MUS 391, 392, 491, 492 must be taken as a graded course and it is strongly recommended that it be taken only as part of a four-course load.

MUS 471  (S)  Timbre
Timbre is central to the experience of all music and often enables us to identify styles and cultures nearly instantaneously. However, timbre is not commonly discussed in detail since our technical vocabulary for describing this musical element has been comparatively limited. Our work in this seminar will involve readings in music theory and history, ethnomusicology, and cognitive studies as well as in the emerging field of sound studies as we attempt to define timbre, explore its manifestations in a wide variety of music, and develop an analytical approach and descriptive vocabulary tailored specifically to this musical element. We will consider how composers and performers of both art and popular musics have wielded timbre as an expressive device and how technology may allow us to analyze details of timbral performance and perception. We will investigate the relationship between timbre and orchestration, from the rise of Haydn's orchestra to the Klangfarbenmelodie of Schoenberg. We will consider extremes of timbral distortion in both vocal and electric guitar effects in rock music as well in such traditions as Korean p'ansori and will explore various forms of speech
music and the work of composers of spectral music to expand our case studies. Finally, our own experiments with timbral effects will bring our seminar to bear on our musical performance.

**Requirements/Evaluation:** evaluation will be based on papers, presentations, and class participation

**Prerequisites:** MUS 103-104, and two from MUS 231, 232, or 233 (or equivalents). MUS 201-202 are also recommended but not required.

**Enrollment Limit:** 10

**Enrollment Preferences:** senior Music majors, junior Music majors

**Expected Class Size:** 5

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

---

**MUS 474 (S) Music and Corporeality (WS)**

Music is often said to derive its own special quality from the fact that it exists outside of visual representation and is not contained within a physical form, yet musical sound and practice are created through and act upon bodies in numerous ways. This course aims to address how music and bodies shape and respond to one another. Drawing from sources across musical sub-disciplines and extending to fields including cognitive science, sound studies, performance studies, and anthropology, we will follow four lines of inquiry related to music and corporeality: 1.) **Embodied practices:** techniques and pedagogies in performance and in listening (including praxis [Bourdieu], Deep Listening [Oliveros, Becker], Alexander Technique); 2.) **Music's physical effects and affects:** pleasure and pain, the vocalic body [Bonefant, Connor, Barthes], cognitive processes; 3.) **Ideological moves:** questioning the universality of music and of bodies and Cartesian dualism; 4.) **Music and bodies at their limits:** cyberfeminism, futurism, disembodiment, ecstasy, questions of artificiality/virtuality. Musical examples will be drawn from classical and popular sources from Euro/American idioms and beyond, predominantly from the late 20th and 21st centuries.

**Requirements/Evaluation:** midterm project, final paper (including rough draft and final copy) and presentation, intermittent 1- to 3-page papers and exercises

**Prerequisites:** familiarity with music terminology and the ability to read music notation is expected; questions can be directed to the instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** senior and junior Music majors

**Expected Class Size:** 8

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** This course culminates in a final presentation and paper, meant to showcase the student's critical achievements, including their ability to formulate and substantiate their argument. Assignments and exercises throughout the course are aimed at honing students' ability to write and present effectively.

---

**MUS 475 (S) Hearing Through Seeing: Music and Visuality (WS)**

We hear music, but seldom is the experience purely aural -- the visual also plays a crucial role. Sound and sight converge when we observe musicians performing in concert venues, patterns of notes and rhythms on the musical score, pictures and text on album and sheet music covers, moving images on screens in films, music videos, and video games. A programmatic work conjures specific images, even whole narratives, in our "mind's eye," or imagination. A work of absolute music, such as a fugue or symphony, can do so as well, although what we envision here may be largely abstract. With hybrid genres, such as opera, musical theater, and dance, the musical and the visual jointly command our attention, often in a spectacular display. This seminar explores myriad ways that "seeing" mediates our experience of hearing, making, and understanding music. We will examine a broad range of topics, including synesthesia; visuality in performance and interpretation; visual metaphors such as line, color, and space in music analysis and criticism; music and representation; intersections between music and painting, sculpture, and architecture; operatic staging; illuminated music manuscripts; eye music and graphic notation; and sound and image in digital media.

**Class Format:** Students will give presentations on the subjects of their papers.

**Requirements/Evaluation:** evaluation will be based on three 5-6 page papers, three presentations, a final 8-10 page paper, and class participation

**Prerequisites:** ability to read music
Enrollment Limit: 8
Enrollment Preferences: junior and senior music majors, and any student with a demonstrated interest in music
Expected Class Size: 8
Grading: no pass/fail option, yes fifth course option
Unit Notes: satisfies the 400-level course requirement for the music major
Distributions: (D1) (WS)
Writing Skills Notes: Students will write three 5-6 page papers and will revise/expand one of them to produce a final 8-10 page paper. Students will receive detailed feedback on their writing.

Spring 2024
SEM Section: 01 W 1:10 pm - 3:50 pm Marjorie W. Hirsch

MUS 491 (F)(S) Advanced Musical Performance
Individual Instruction in instrumental and vocal lessons offered at the advanced level as a regular full credit course. Intended primarily for music majors, full credit lessons must be approved by the entire music faculty. Students are expected to have demonstrated a high level of accomplishment on their instrument/voice, through at least 4 semesters of partial-credit study with their instructor. MUS 391, 392, 491, 492 must be taken as a graded course and it is strongly recommended that it be taken only as part of a four-course load; the numbers 391, 392, 491, 492 should be used for four sequence courses in the same instrument; if a different instrument is elected, the numbering sequence should start again at 391; numbers are selected without regard to semester taken or class year of student. To register for the course, a student and their instructor must submit an application to the assistant to the department chair by the Tuesday before the first Friday of the semester. Forms for full credit lessons can be obtained from a student's instructor, or from the assistant to the chair. Information on the registration process is available on the music Department website https://music.williams.edu/courses under "Advanced Musical Performance."

Class Format: individual instruction
Requirements/Evaluation: Lesson preparation, public performance, and progress throughout the semester.
Prerequisites: Intended primarily for music majors. Students should have at least 4 semesters of partial-credit study with their instructor. Completed application, registration and instructor recommendation due by the Tuesday before the first Friday of the semester.

Enrollment Limit: none
Enrollment Preferences: Permission of the instructor and music faculty. Students are expected to have demonstrated a high level of accomplishment on their instrument/voice, through at least 4 semesters of partial-credit study with their instructor.
Expected Class Size: NA
Grading: no pass/fail option, yes fifth course option
Unit Notes: Music majors may register for a total of four semesters, non-majors may register for two semesters. A student must submit an application and registration/billing form for each semester. MUS 391, 392, 491, 492 must be taken as a graded course and it is strongly recommended that it be taken only as part of a four-course load.

Spring 2024
IND Section: 01    TBA     Ed  Gollin
Neuroscience is a rapidly growing interdisciplinary field concerned with understanding the relationship between brain, mind, and behavior. The interdisciplinary nature of the field is apparent when surveying those who call themselves neuroscientists. Among these are anatomists, physiologists, chemists, psychologists, philosophers, molecular biologists, computer scientists, linguists, and ethologists. The areas that neuroscience addresses are equally diverse and range from physiological and molecular studies of single neurons, to investigations of how systems of neurons produce phenomena such as vision and movement, to the study of the neural basis of complex cognitive phenomena such as memory, language, and consciousness. Applications of neuroscience research are rapidly growing and include the development of drugs to treat neurodegenerative disorders such as Alzheimer’s disease and Parkinson’s disease, the use of noninvasive techniques for imaging the human brain such as fMRI and near infrared optical imaging, and the development of methods for repair of the damaged human brain such as the use of brain explants and implants. Combining this wide range of approaches and research methods to study a single remarkably complex organ—the brain—and the behavioral outcomes of its activity requires a unique interdisciplinary approach. The Neuroscience Program is designed to provide students with the opportunity to explore this approach.

THE PROGRAM
The program in neuroscience consists of seven courses: The Cell (Biology 101); Introductory Psychology (Psychology 101); Neuroscience (Neuroscience 201); Topics in Neuroscience (Neuroscience 401); and three electives. Either Biology 101 or Psychology 101 must be taken prior to enrolling in the core course, Neuroscience (Neuroscience 201), which is the foundational neuroscience course and provides the background for upper-level electives in the concentration. Ideally, Neuroscience is taken the fall of the sophomore year. Electives are designed to provide in-depth coverage of specific areas within the field and many electives include laboratory experiences. At least one elective course is required from those designated as Group A (Neuroscience courses cross-listed with Biology). At least one elective course is required from those designated as Group B (Neuroscience courses cross-listed with Psychology). A third required elective may come from Group A or Group B offerings or it may come from Group C which consists of courses that are not cross-listed with neuroscience but include significant neuroscience content. Students may also petition the advisory committee to consider courses that are not listed among these groups including neuroscience-related courses that may be taken while studying abroad. Topics in Neuroscience (Neuroscience 401) is designed to provide an integrative culminating experience and is taken by all senior concentrators during the senior year.

Required Courses

**BIOL 101(F) LEC The Cell**
Taught by: Steven Swoap, Tim Lebestky
Catalog details

**NSCI 201 / BIOL 212 / PSYC 212(F) LEC Neuroscience**
Taught by: Matt Carter, Shivon Robinson
Catalog details

**NSCI 401(F) SEM Topics in Neuroscience**
Taught by: Yunshu Fan
Catalog details

**PSYC 101(F, S) LEC Introductory Psychology**
Taught by: Kris Kirby, Jeremy Cone
Students can ask the Neuroscience Program Chair whether courses not listed here might count as electives.

**Elective Courses**

Three elective courses are required. At least one elective must be from Group A and at least one elective must be from Group B. The third elective may come from Group A, Group B, or Group C. Students may also consult the Chair to consider courses that are not listed among these groups including neuroscience-related courses that may be taken while studying abroad.

THE DEGREE WITH HONORS IN NEUROSCIENCE

The degree with honors in Neuroscience provides students with the opportunity to undertake an original research project under the supervision of one or more of the Neuroscience faculty. In addition to completing the requirements of the Neuroscience Program, candidates for an honors degree must enroll in Neuroscience 493-W31-494 and write a thesis based on an original research project. Presentation of a thesis, however, should not be interpreted as a guarantee of a degree with honors. Students interested in pursuing a degree with honors should contact the Neuroscience Advisory Committee by winter study of their junior year.

STUDY ABROAD

FAQ

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions). Securing syllabi is often difficult, so a discussion with the program Chair is certainly necessary. Under no circumstances should a student assume that a course taken at another institution will count toward the concentration.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

The program Chair and advisory committee will consider the course title, course description, and complete syllabus, including readings/assignments. Exams or other written work will also be considered. Written work may be requested if the course description suggests that it is only tangentially related to the field of neuroscience. Written work would, therefore, need to demonstrate that there was sufficient emphasis on neuroscience material.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. Generally there is a maximum of 2 credits that can be completed through a study abroad program.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. NSCI 201 and NSCI 401 can not generally be completed abroad. NSCI should be taken during the sophomore year if possible and includes a laboratory component that is rarely comparable in study abroad courses.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

NSCI 201 is only taught during the fall semester. As such, students planning to study away should plan to take it during the sophomore year.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

Some students (rarely) have failed to discuss the course in advance of their study abroad experiences. They may also have assumed that approval of a course by another department (e.g., Biology or Psychology) would necessarily mean that they would receive Neuroscience credit for the course. This is not necessarily the case.

NSCI 201  (F)  Neuroscience

Cross-listings:  PSYC 212 NSCI 201 BIOL 212

Primary Cross-listing

This course is designed to give an overview of the field of neuroscience progressing from a molecular level onwards to individual neurons, neural circuits, and ultimately regulated output behaviors of the nervous system. Topics include a survey of the structure and function of the nervous system, basic neurophysiology and neurochemistry, development, learning and memory, sensory and motor systems, and clinical disorders. Throughout the course, many examples from current research in neuroscience are used to illustrate the concepts being considered. The lab portion of the course will
emphasize a) practical hands-on exercises that amplify the material presented in class; b) interpreting and analyzing data; c) presenting the results in written form and placing them in the context of published work; and d) reading and critiquing scientific papers.

Requirements/Evaluation: Evaluation will be based on participation in discussion groups, exercises, problem sets and quizzes performed in small groups, lab reports, midterm exams, and a final exam.

Prerequisites: PSYC 101 or BIOL 101; open to first-year students only with permission of instructor

Enrollment Limit: 72

Enrollment Preferences: Sophomores and Biology and Psychology majors

Expected Class Size: 72

Grading: yes pass/fail option, no fifth course option

NSCI 209 (F) Animal Communication (WS)

Cross-listings: BIOL 209 NSCI 209

Secondary Cross-listing

Animal communication systems come in as many varieties as the species that use them. What they have in common are a sender that encodes information into a physical signal and a receiver that senses the signal, extracts the information, and adjusts its subsequent behavior accordingly. This tutorial will consider all aspects of communication, using different animal systems to explore different aspects of the biology of signaling. Topics will include the use of syntax to carry meaning in chickadee calls, the "piracy" of signaling system by fireflies, statements of identity and affiliation in the form of toothed whales' signature whistles, long-distance chemical attractants that allow male moths to find the object of their desire, and cultural evolution within learned signaling systems.

Requirements/Evaluation: evaluation will be based on five 5-page papers, five short response papers, & the student's effectiveness in tutorial presentations.

Prerequisites: BIOL 101 and 102; open to sophomores, juniors, and seniors

Enrollment Limit: 10

Enrollment Preferences: Biology majors and senior Neuroscience concentrators who need a Biology elective to complete the concentration

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

Fall 2023

TUT Section: T1 TBA Heather Williams
NSCI 311 (F) Neural Systems and Circuits

Cross-listings: BIOL 311 NSCI 311

Secondary Cross-listing

This course will examine the functional organization of the mammalian brain, emphasizing both neuroanatomy and neurophysiology. How do specific populations of neurons and their connections encode sensory information, form perceptions of the external and internal environment, make cognitive decisions, and execute movements? How does the brain produce feelings of reward/motivation and aversion/pain? How does the nervous system regulate homeostatic functions such as sleep, food intake, and thirst? We will explore these questions using a holistic, integrative approach, considering molecular/cellular mechanisms, physiological characterizations of neurons, and connectivity among brain systems. Journal article discussions will complement course topics, providing experience in reading, understanding, and critiquing primary research papers. Writing an original literature review article will provide experience in expository writing and anonymous peer review. Laboratory sessions will provide experience in examining macroscopic and microscopic neural structures, as well as performing experiments to elucidate the structure and function of neural systems using classical and cutting-edge techniques.

Requirements/Evaluation: Class participation, completion of labs, literature review assignment, hour exams, a final exam

Prerequisites: BIOL 212 (same as PSYC 212 or NSCI 201) or BIOL 205

Enrollment Limit: 24

Enrollment Preferences: Biology majors and Neuroscience concentrators

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: NSCI Group A Electives

Not offered current academic year

NSCI 312 (F) Sensory Biology

Cross-listings: NSCI 312 BIOL 312

Secondary Cross-listing

How do animals sense properties of the physical world? How do they convert physical or chemical energy to a signal within a cell that carries information? How is that information represented? What are the limits on what can be sensed? We will look for answers to these questions by investigating the molecular and cellular mechanisms of sensory transduction and how these mechanisms constrain the types of information that the nervous system encodes and processes. We will also ask how natural selection shapes the type of sensory information that animals extract from the world, and what adaptations allow some species to have "special" senses. Some of the examples we will consider are: bat echolocation (hair cells in the ear), detecting visual motion (amacrine cells in the mammalian retina), the constant reshaping of the olfactory system (chemical mapping of odors), what makes a touch stimulus noxious, and enhanced color vision (in birds, bees, and shrimp). Laboratory exercises will focus on the nematode C. elegans, an important model system, to explore and extend how we understand touch, temperature sensation, chemosensation, and light sensation.

Requirements/Evaluation: Four take-home exams, an independent group research project (proposal, followed by results/discussion), presentation about a non-standard sensory system, many short online quizzes, and lab + class participation.

Prerequisites: BIOL 101 and either BIOL 212/NSCI 201 or BIOL 205

Enrollment Limit: 24

Enrollment Preferences: Preference to senior Biology majors who need a 300-level course; then to senior Neuroscience concentrators who need a Group A elective; then to Biology majors. Not open to students who have taken Biology 213.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

NSCI 312 (D3) BIOL 312 (D3)
NSCI 313 (S) Opioids and the Opioid Crisis: The Neuroscience Behind an Epidemic

Cross-listings: NSCI 313 PSYC 313

Secondary Cross-listing

Opioid misuse, including addiction, has emerged as a major health epidemic in the United States. This course will explore the science of opioids as well as the historical and societal context surrounding their use and abuse. We will examine the neurobiological mechanisms through which opioids interact with pain pathways and reward circuits within the brain and we will explore how changes in these systems contribute to opioid tolerance, dependence, and addiction. We will consider how genetic, environmental and behavioral factors can powerfully influence these processes. Finally, we will consider alternative approaches to pain management as well as interventions for the treatment of opioid abuse. Students will be expected to design and conduct an empirical project related to the course material. Critical evaluation of peer-reviewed primary literature from animal and human studies will serve as a foundation for class discussions. Evaluation will be based on class presentations, participation in discussions and empirical projects, written assignments, and a poster presentation of the empirical project.

Requirements/Evaluation: class presentations, participation in discussions and empirical projects, five short position papers (approximately 2 pages double-spaced), an APA style empirical paper (approximately 20 pages double-spaced) and poster presentation of the empirical project.

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)

Enrollment Limit: 16

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

NSCI 314 (S) Learning and Memory in Health and Disease

Cross-listings: NSCI 314 PSYC 314

Secondary Cross-listing

This class will examine the neuroscientific basis of different types of learning and memory (such as declarative memory, motor memory, and associative memory), including the brain circuits, cellular mechanisms, and signaling pathways that mediate these different processes. In addition, we will explore how these processes can be disrupted in different diseases and disorders (such as Alzheimer's disease or post-traumatic stress disorder) and we will discuss the strategies and targets for therapeutic intervention. Class meetings will include a mix of lectures, discussions, and student presentations. Critical evaluation of peer-reviewed studies involving both human and animal models will serve as a foundation for class discussions. Working in small teams, students will also design and conduct an empirical project related to the course material.

Requirements/Evaluation: In-class presentations and participation in discussions, completion of an empirical research project which will include a project proposal (3-5 pages), data collection and analysis, and a final report (10-20 pages) along with a poster presentation.

Prerequisites: PSYC 212/NSCI 201/BIOL 212

Enrollment Limit: 16

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Not offered current academic year

NSCI 316 (S) Neuroscience of Decision-Making

Cross-listings: PSYC 316 NSCI 316

Secondary Cross-listing
Humans are constantly making decisions: big and small, conscious and unconscious. This seminar will explore different aspects of the decision-making process, including (1) the algorithms for decision-making, (2) the neurological basis of decision-making and (3) the psychological, social, and physiological factors that influence our decision-making. We will examine how scientific approaches can help us understand complex social issues related to decision making. For example: how can stereotypes be understood as a failure in belief updating; how does confirmation bias lead to partisanship; and how to think of xenophobia from the "explore-exploit trade-off" perspective? In this course, we will explore how the brain and its neural networks contribute to these phenomena. The laboratory component of the course will introduce the research tools for studying different aspects of decision-making, including experimental paradigms, computational models and methods of analysis. Students will apply these tools to collaboratively design and conduct behavioral experiments and will analyze neural recording data to understand the relationship between neural activity and decision-making behaviors. Over the course of the semester, students will have the opportunity to develop skills in computer programming to better understand computational models and data analysis.

Requirements/Evaluation: Class presentations, participation in discussions, keeping a decision journal, short response papers and laboratory assignments, participation and presentation of empirical laboratory studies.

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201) or permission of instructor.

Enrollment Limit: 16

Enrollment Preferences: Psychology majors, Neuroscience concentrators, and Cognitive Science concentrators

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

NSCI 319 (F) Neuroethics (WS)

Cross-listings: STS 319 PSYC 319 NSCI 319

Secondary Cross-listing
Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

Requirements/Evaluation: six 5-page position papers and five 2-page response papers as well as participation in discussions

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Psychology majors and Neuroscience concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
STS 319(D3) PSYC 319(D3) NSCI 319(D3)

Writing Skills Notes: In alternating weeks, each student in a tutorial pair will write a 5-page essay based on the assigned readings. Essays will be discussed during tutorial meetings and written feedback from the professor will be provided for each essay. At the end of the semester, students will choose one of their prior essays to revise as their final submission. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Not offered current academic year

NSCI 322 (F) From Order to Disorder(s): The Role of Genes & the Environment in Psychopathology
Cross-listings: NSCI 322 PSYC 312

Secondary Cross-listing
This course examines how experimental methods in neuroscience can be used to understand the role of nature (genes) and nurture (the environment) in shaping the brain and behavior. In particular, we will explore how neuroscience informs our understanding of psychiatric disorders such as anxiety, depression, and schizophrenia. We will investigate the biological underpinning of these disorders as well as their treatments. Readings will include human studies as well as work based on animal models. Topics will include: the ways in which environmental and genetic factors shape risk and resiliency in the context of psychiatric disease, the neural circuits and peripheral systems that contribute to psychopathology, and the mechanisms through which interventions may act. In the laboratory component of the course, students will gain hands-on experience in using animal models to study complex behavior and their associated neural mechanisms.

Requirements/Evaluation: class presentations, participation in discussions, two article previews (1-2 pages each), literature review (5 pages), research project proposal (5 pages), oral presentation of project proposal.
Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)

Enrollment Limit: 19
Enrollment Preferences: Psychology majors and Neuroscience concentrators
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option

NSCI 347 (S) Neurobiology of Emotion
Cross-listings: BIOL 407 NSCI 347

Secondary Cross-listing
Emotion is influenced and governed by a number of neural circuits and substrates, and emotional states can be influenced by memory, cognition, and many external stimuli. We will read and discuss articles about mammalian neuroanatomy associated with emotion as defined by classic lesion studies, pharmacology, electrophysiology, fMRI imaging, knockout and optogenetic mouse studies, for investigating neural circuit function in order to gain an understanding of the central circuits and neurotransmitter systems that are implicated in emotional processing. We will focus initially on the neural circuits involved in fear, as a model for how human and animal emotion and physiology is studied, with special sessions on emotional responses to music and art, as well as discussions about burgeoning neurobiological research into the emotion of disgust. The larger goal of the course is to give students opportunities and experience in critical evaluation and discussion of primary scientific literature, and to develop and refine strategies on how
to use scientific evidence in building arguments in essays.

Requirements/Evaluation: class participation and several short papers

Prerequisites: BIOL212/NSCI201; open to juniors and seniors. Sophomores must get instructor's consent prior to enrolling.

Enrollment Limit: 12

Enrollment Preferences: senior Biology majors who have not taken a 400-level Biology course; then to eligible NSCI concentrators

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

NSCI 401 (F) Topics in Neuroscience

Neuroscientists explore issues inherent in the study of brain and behavior. The overall objective of this seminar is to create a culminating senior
experience in which previous course work in specific areas in the Neuroscience Program can be brought to bear in a synthetic, interdisciplinary approach to understanding complex problems. The specific goals for students in this seminar are to evaluate original research and critically examine the experimental evidence for theoretical issues in the discipline. Topics and instructional formats will vary somewhat from year to year, but in all cases the course will emphasize an integrative approach in which students will be asked to consider topics from a range of perspectives including molecular, cellular, systems, behavioral and clinical neuroscience. Previous topics have included autism, depression, stress, neurogenesis, novel neuromodulators, language, retrograde messengers, synaptic plasticity, and learning and memory.

Requirements/Evaluation: Participation in class discussion, presentation of research articles, several short papers

Prerequisites: Open only to seniors in the Neuroscience program

Enrollment Limit: 20

Enrollment Preferences: Senior Neuroscience concentrators

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Unit Notes: Required of all senior students in the Neuroscience program

NSCI 455 (S) Neural Regeneration

Cross-listings: BIOL 455 NSCI 455

Secondary Cross-listing

Injury to the human nervous system can cause lasting impairment, but non-mammalian animals have prodigious capacity to regenerate neurons, regrow axons, and repair scars. What accounts for these differences? Regeneration can occur in multiple modes: replacement of injured neurons, repairs such as axonal regrowth to reconnect to a target structure, or repurposing existing neurons for new tasks through neural plasticity. We will explore the molecular foundations that underlie neuronal proliferation, neural plasticity, and inflammatory responses. We will consider the potential for translating these findings to inform treatments for humans who suffer from neural injury or neurodegenerative disease. Class discussions will focus on readings from the primary literature.

Class Format: Discussion, 3 hours per week

Requirements/Evaluation: Evaluation will be based on class participation, brief weekly responses, and four short research proposals.

Prerequisites: BIOL 212/NSCI 201 or permission of instructor.

Enrollment Limit: 10

Enrollment Preferences: Biology seniors who have not yet taken a 400 level course and Neuroscience senior concentrators who need a Group A elective.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Spring 2024
HON Section: 01 TBA Tim J. Lebestky
To engage in philosophy is to ask a variety of questions about the world and our place in it—questions that we confront in our everyday lives or that underlie our ordinary practices. What is a good, meaningful, or happy human life (ethics and politics)? What do we owe non-human species and future generations (applied ethics/practical philosophy)? Does god exist? (metaphysics)? What can we know, and what makes a belief or statement true (epistemology)? Are there objective standards for judging works of art? Thus, philosophers also address questions relevant to many disciplines.

The program in philosophy is designed to aid students in thinking about such questions, by acquainting them with influential work in the field, past and present, and by giving them tools to grapple with these issues themselves. The program emphasizes training in clear, critical thinking and in effective writing. Most of our courses are offered as small seminars or tutorials in which students have multiple opportunities to develop skills in reasoning and writing interpretive and critical essays.

MAJOR

The Philosophy major consists of nine semester courses: three required courses and six electives. The required courses are: any 100-level philosophy course, Philosophy 201 (History of Ancient Greek Philosophy) or Philosophy 202 (History of Modern Philosophy), and Philosophy 401 (Senior Seminar). The six electives are structured by a distribution requirement. Students must take at least one course in each of three areas: Contemporary Metaphysics and Epistemology [M&E], Contemporary Value Theory [V], and History [H]. These requirements apply to majors in the Class of 2018 and after.

Courses taught in other departments at Williams or at other institutions will not count toward the distribution requirement (Williams-Exeter tutorials may count, however, with the approval of the Department Chair). Up to two cross-listed courses taught in other departments may count as electives toward the major. No more than one 100-level course may count toward the major (and one 100-level course is required for the major—no exceptions).

We recommend the following trajectory through the major:

By the end of the first year, take a 100-level philosophy course (this is typically the first step in the major) and one other philosophy course.

By the end of the second year, complete a 100-level philosophy course, Phil 201 or Phil 202, and at least one other philosophy course. (If you will be away for the whole of your junior year, you should complete at least five courses by the end of the second year, preferably six.)

By the end of the junior year, complete a 100-level philosophy course, Phil 201 or Phil 202, and at least four other philosophy courses.

Other recommendations: take at least one tutorial; distribute your six electives evenly across the three distribution baskets; take a logic course; and take both PHIL 201 and PHIL 202.

The Degree with Honors in Philosophy

The degree with honors in Philosophy is awarded to students who have demonstrated outstanding achievement in a program of study that extends beyond the requirements of the major. This additional required work can take the form either of a senior essay written over one semester plus winter study (maximum 40 pages) or a year-long thesis (maximum 75 pages). Students planning to pursue a degree with honors must first write a brief proposal after having consulted with an advisor, then submit the proposal to the Department in mid-March (before spring break) of the junior year. To be eligible for honors candidates must have GPAs of 3.6 or higher in their courses in philosophy at the end of the junior and senior years. A
recommendation for graduation with honors will be made on the basis of the thoroughness, independence, and originality of the student’s written work as well as their performance in a defense that will be organized by their advisor in consultation with the Chair.

STUDY AWAY

The Williams-Exeter Programme at Oxford (WEPO): the first full Oxford philosophy tutorial will count as the equivalent of two full-semester philosophy courses at Williams; the second full Oxford philosophy tutorial will count as the equivalent of one full-semester philosophy course at Williams, for a total of three Williams philosophy courses. Courses must be pre-approved by the Chair of the Philosophy Department, who will also determine which, if any, courses will count toward the philosophy major distribution requirements.

Courses taken in other Study Away programs: Students may petition the Philosophy Department for credit for philosophy courses taken at their Study Away institution. They should consult with the department Chair before they commit to a program. Final determinations will be made on the basis of the course syllabus and the quality of the student’s written work for the course. Typically, courses taken while studying away will not fulfill distribution requirements for the philosophy major at Williams.

PHILOSOPHY RELATED COURSES

The following courses offered in other departments, while not cross-listed with Philosophy, may be of interest to philosophy students:

- **PSCI 130(F, S) SEM Introduction to Political Theory**
  - Taught by: Laura Ephraim, Nimu Njoya
  - Catalog details
- **PSCI 235 / ENVI 235 SEM Survival and Resistance: Environmental Political Theory**

- **PSCI 339 / JWST 339 TUT Politics in Dark Times: Hannah Arendt**
  - Taught by: Laura Ephraim
  - Catalog details
- **REL 238 SEM Islam and Reason**
  - Taught by: Zaid Adhami
  - Catalog details
- **REL 250 / ASIA 250 LEC Scholars, Saints and Immortals: Virtue Ethics in East Asia**
  - Taught by: Jason Josephson Storm
  - Catalog details
- **REL 255 / ANTH 255 / ASIA 255 LEC Buddhism: Ideas and Practices**
  - Taught by: Georges Dreyfus
  - Catalog details
- **REL 308 / PSCI 306 / SOC 308 / STS 308 SEM What is Power?**
  - Taught by: Jason Josephson Storm
  - Catalog details

**PHIL 100  (W)  Philosophy of Sex  (WS)**

What is sex? Are the current biological explanations of human sexuality sufficient to explain the meaning that sex has in our lives? Is human sexuality subject to ethical evaluations? Should it be regulated by social customs and sanctions, by law, or should sexual choices and practices be left to individuals? In thinking about these broad questions, we will also consider some more specific ones: What is sexual orientation, and does it constitute a person’s sexual identity? Are there pathological sexual desires and practices, and if so, how should we distinguish them from normal and healthy sexuality? Is anything wrong with adultery, promiscuity, polyamory, pornography, or with exchanging sex for money? What counts as consensual sex, and are all consensual sexual relationships ethically acceptable? The course will place special emphasis on developing the following skills: close, analytical reading; recognizing, reconstructing and evaluating claims, and reasons that support them; producing original ideas and arguments; participating in vigorous discussions in a respectful and reasonable manner; speaking and listening skills; and writing clear, polished, well-argued papers, generated through several revisions.

**Class Format:** The course will meet approximately 20 hours per week, Monday through Thursday, between 11am and 4pm; there will be an hour long lunch break. The course will consist of short lectures, substantive class discussions, one-on-one writing workshops, and tutorial-style meetings. There will be daily reading and writing assignments.
PHIL 109  (F)  Skepticism and Relativism  (WS)

Intellecutally, we are ready skeptics and relativists. We doubt, we point out that no one can be certain in what she believes, and we are suspicious of declarations of transcendent reason or truth (unless they are our own). Emboldened by our confidence in skeptical arguments, we claim that knowledge is inevitably limited, that it depends on one's perspective, and that everything one believes is relative to context or culture. No domain of inquiry is immune to this destructive skepticism and confident relativism. Science is only "true" for some people, agnosticism is the only alternative to foolish superstition, and moral relativism and, consequently, nihilism are obvious. But is the best conclusion we can come to with respect to our intellectual endeavors that skepticism always carries the day and that nothing at all is true? In this tutorial, we will investigate the nature of skepticism and the varieties of relativism it encourages. Our readings will come primarily from philosophy, but will be supplemented with material from anthropology, physics, psychology, and linguistics. We will look at relativism with respect to reason and truth in general as well as with respect to science, religion, and morality. Along the way, we will need to come to grips with the following surprising fact. With few exceptions, thoroughgoing skepticism and relativism have not been the prevailing views of the greatest minds in the history of philosophy. Were they simply too unsophisticated and confused to understand what is for us the irresistible power of skepticism and relativism? Or might it be that our skepticism and relativism are the result of our own laziness and failure? Of course, this question cannot really be answered, nor is there any value in trying to answer it, and any "answer" will only be "true" for you. Right?

Requirements/Evaluation: participants will present substantial written work in the tutorial every other week, and will be responsible for commenting on their tutorial partner's work.

Prerequisites: none; this tutorial is an appropriate first course in PHIL.

Enrollment Limit: 8

Enrollment Preferences: This tutorial was specifically designed for first-year students, and they will be given preference. Do not write to the instructor indicating a special interest, this will make no difference. If oversubscribed, students will be selected randomly.

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Unit Notes: meets 100-level PHIL major requirement

Distributions: (D2)  (WS)

Writing Skills Notes: Students will write a tutorial essay every other week and will receive written feedback on composition and structure. Essays later in the semester will reflect the writing lessons of earlier in the semester.

Not offered current academic year

PHIL 110  (F)  History of Modern Moral and Political Philosophy  (WS)

This course is a survey of 17th- and 18th-century moral and political philosophy. We will consider whether our individual actions and our societal structures are based in our self-interested desires, our natural instincts, and/or our nature as rational, free, and equal human beings. Authors will include: Hobbes, Locke, Rousseau, Hutcheson, Hume, Smith, and Kant.

Requirements/Evaluation: Students will write a number of short essays.
Enrollment Limit: 19
Enrollment Preferences: first-years
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (WS)

Writing Skills Notes: Students will write a series of short essays, developing key skills of philosophical writing, including, most prominently, formulating a thesis and developing an argument. Students will receive feedback on drafts, and be required to substantially revise a one graded paper as a final project.

Fall 2023
SEM Section: 01 TR 9:55 am - 11:10 am Justin B. Shaddock

PHIL 114  (F)  Freedom and Society  (WS)
Freedom is widely held as one of our fundamental values. But how often do we ask: What is freedom? and Why do we value it? In the first unit of this course, we will consider the relationship between freedom and social order. Do our society's laws limit our freedom in order to make us safe? Or do our laws somehow enhance or enable our freedom? We will read Thomas Hobbes, John Locke, and Jean-Jacques Rousseau in seeking answers to these questions. We will then turn to some specific social forms in the second unit, and ask whether they promote or preclude our freedom. We will read Adam Smith and Karl Marx on capitalism, Simone de Beauvoir on gender, and Charles Mills on race.

Requirements/Evaluation: short weekly essays; longer midterm and final papers

PHIL 115  (S)  Personal Identity  (WS)
Through lectures, discussions, close readings and assigned writings, we will consider a variety of philosophical questions about the nature of persons, and personal identity through time. Persons are subjects of experiences, have thoughts and feelings, motivation and agency; a person is thought of as continuous over time, and as related to, recognized and respected by other persons. Thus, the concept of person plays a significant role in most branches of philosophy, e.g. metaphysics, epistemology, moral and political philosophy, philosophy of mind. Conceptions of person are equally important in science (especially in psychology), law, and the arts. Questions about persons are of central importance for a myriad of our theories and practices, and for the ways in which we live our lives. The aim of this course is to explore and evaluate a number of rival conceptions of persons and personal identity over time. Some of the questions which we will discuss are: What is a person? How do I know that I am one? What constitutes my knowledge of myself as a person, and does that knowledge differ in any significant respect from my knowledge of physical objects and of other people? Our starting and central question will be: What makes me the particular person that I am, and how is my identity as this individual person preserved over time? The course will place special emphasis on developing students' intellectual skills in close, analytical reading; reconstructing and evaluating claims and reasons that support them; producing original ideas and arguments, orally and in writing; responding to the claims and arguments presented in texts and in class; and writing clear, polished, well-argued papers.

Requirements/Evaluation: Class attendance, preparedness and participation; additional small group weekly meetings; 12 short writing assignments.
PHIL 116 (S) Mind, Knowledge, and Reality  (WS)

This course is an introduction to philosophy through three major themes: The nature of the universe, the existence of gods, and the mind/body problem. Throughout, we will appeal to reason and evidence in forming our best beliefs. Our discussions will range over historical and contemporary works in the Western tradition.

Requirements/Evaluation: active participation; four (5-6 page) essays
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Strong preference given to first-years and sophomores; do not contact the instructor to plead for special enrollment consideration.
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Unit Notes: meets 100-level PHIL major requirement
Distributions: (D2)  (WS)
Writing Skills Notes: Students will craft 4 six page essays, and each will receive extensive comments on structure and composition with an eye toward developing skills in philosophical writing.

Spring 2024
SEM Section: 01    TR 11:20 am - 12:35 pm     Joseph L. Cruz

PHIL 117 (S) Arguing about God  (WS)

"Faith is a fine invention," according to Emily Dickinson's poem, "when gentlemen can see; but microscopes are prudent in an emergency." This introduction to philosophy will see how far the microscopes of reason and logic can carry us in traditional arguments about the existence and nature of God. We will closely analyze classical arguments by Augustine, Avicenna, Aquinas, Anselm, Maimonides, Descartes, and others. Pascal's wager is a different approach: it argues that even though proof of the existence of God is unavailable, you will maximize your expected utility by believing. We will examine the wager in its original home of Pascal's Pensees, and look at William James' related article, "The Will to Believe." The millennia old problem of whether human suffering is compatible with God's perfection is called "the problem of evil." We will examine this issue in Hume's Dialogues Concerning Natural Religion, classic sources and contemporary articles. Students should be aware that, in the classic tradition, this class resembles a logic course.

Class Format: seminar
Requirements/Evaluation: 5 short papers
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first-years and sophomores
Expected Class Size: 19
PHIL 118  (S)  Meaning, Communication and Society  (DPE) (WS)
The primary way we interact with others is through the use of language. We use language to communicate meanings in order to accomplish a variety of goals: to convey information, make requests, establish rules, utilize power, issue protests, and much more. We coordinate our lives through sounds from mouths, signs from hands, and squiggles on paper because somehow sounds, signs, and squiggles have meanings. This course is an investigation into how language is used to express meaning, and how such expression can have real interpersonal and societal impact. Using resources from philosophy and linguistics, we will study various ways in which literal and non-literal uses of language influence our social lives. Of particular interest will be how language can be used to establish, reinforce, and resist power relationships involving race and gender.

Requirements/Evaluation:  3-4 papers (6-8 pages) each preceded by a complete draft.
Prerequisites:  none
Enrollment Limit:  19
Enrollment Preferences:  Preference given to first year students and philosophy majors.
Expected Class Size:  19
Grading:  yes pass/fail option,     yes fifth course option
Distributions:  (D2)  (DPE) (WS)
Writing Skills Notes:  Students will submit papers and drafts that will receive comments on content, writing style, and argument structure. Students will periodically meet with the professor to discuss paper planning and comments on submitted work.
Difference, Power, and Equity Notes:  This course has a focus on the role of language in relationships involving power, oppression, and group inclusion between individuals belonging to various socio-political identities.
Attributes:  Linguistics

Not offered current academic year

PHIL 119  (F)  Why Obey the Law? On Democracy and Justice  (WS)
What social and political arrangements are most conducive to fostering human well-being and the common good? What makes governmental and legal authority legitimate? Is democratic rule always best? What are some of the necessary conditions for democracy? We turn first to two of Plato's most famous dialogues, The Apology and, The Republic. The remainder of the course is devoted to political writings by other figures in the Western philosophical tradition (i.e., Hobbes, Locke, Rousseau, Marx, J.S. Mill, W.E.B Dubois, John Rawls, Charles Mills). While engaging these texts, we will continually reflect on their relevance for thinking about the problems facing liberal democracies today, particularly in the U.S.

Class Format:  Class participation will consist of various individual and group exercises designed to give students hands on experiences thinking on their feet, collaborating with others, etc.
Requirements/Evaluation:  Six pass/fail short response essays of approximately 500 words each in which students will be asked to engage a particular part of the assigned text (such as explaining what a passage means, drawing connections between different parts of the text, identifying an argument, responding to an argument, etc); two 6-page papers based on professors prompts; participation.
Prerequisites:  None. Open to any student interested in the sources of our current understandings of justice, freedom and the strengths and weaknesses of democratic governance structures.
Enrollment Limit:  19
Enrollment Preferences:  In the case of over enrollment preference will be given to majors, first years and sophomores
Expected Class Size:  19
Grading:  no pass/fail option,     no fifth course option
Unit Notes:  meets 100-level PHIL major requirement
Distributions:  (D2)  (WS)
Writing Skills Notes: The professor and the teaching assistant will provide detailed comments on short and longer essays and provide occasional peer review opportunities, handouts and discussions of frequent types of errors, different possible approaches to writing and drafting, and the importance of editing and seeking the assistance of writing tutors. Students will be encouraged, but are not required, to make appointments to discuss ideas and drafts.

Attributes: JLST Interdepartmental Electives  LEAD Ethical Issues of Leadership

Fall 2023
SEM Section: 01    TR 8:30 am - 9:45 am     Jana  Sawicki

PHIL 122  (F)  Philosophical Approaches to Contemporary Moral Issues  (WS)
In this tutorial we will examine a number of prominent and controversial social issues, using our study of them both as an opportunity to better understand the moral dimensions of those issues in and of themselves, and to consider the ways in which selected classical and contemporary moral theories characterize and address those moral dimensions. Topics will depend to some extent on student interest, but are likely to include concerns that fall under such headings as euthanasia, conscientious eating, abortion, the ethics of protest, and Covid-19. The course will use a case-based approach to examine these issues, and so in most weeks we will (1) read philosophical articles focused on a key concept or set of arguments central to the issue, and (2) consider in detail one morally complex case in which the concept or arguments have special application or relevance. In addition, we will devote several class meetings interspersed throughout the semester to reading foundational sources in ethical theory.

Class Format: Groups of three students (rather than the more conventional two students) will meet weekly with the professor.

Requirements/Evaluation: three tri-weekly tutorial papers and two short papers, oral commentaries, and tutorial discussion

Prerequisites: none; this course is suitable for first-year students

Enrollment Limit: 15

Enrollment Preferences: first-year students, sophomores, Philosophy majors, and those who have previously been dropped from the course for over-enrollment

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (WS)

Writing Skills Notes: Students will write three tutorial papers of 5-7 pages in length, one of which they will revise and resubmit, as well as two 2-3 page papers. In each, students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

Attributes: JLST Interdepartmental Electives

PHIL 123  (F)  Objectivity in Ethics  (WS)
Are moral beliefs simply expressions of opinion, or can we construct good arguments on their behalf? In this course we'll examine several influential attempts to provide a rational foundation for morality, along with Nietzsche's wholesale rejection of these efforts. Readings will include work by Plato, Hobbes, Kant, Mill, Nietzsche, and contemporary authors.

Requirements/Evaluation: Participation in discussion; short response papers; four 5-page papers, evenly spaced throughout the semester

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: First-years and sophomores, and students who need to fulfill their 100-level requirement for the philosophy major

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Unit Notes: Meets 100-level PHIL major requirement

Distributions: (D2)  (WS)

Writing Skills Notes: Four 5-page papers, evenly spaced throughout the semester. Students will receive timely comments on their writing skills, with
There are three grains of sand on my desk. This is unfortunate, but at least there isn't a heap of sand on my desk. That would be really worrisome. On the other hand, there is a heap of sand in my backyard. I don't know how exactly how many grains of sand are in this heap, but let's say 100,000. My daughter removes one grain of sand. I don't know why, she just does. It seems like there is still a heap of sand in my backyard. In fact, it seems like you can't change a heap of sand into something that isn't a heap of sand by removing one grain of sand. Right? But now we have a problem. By repeated application of the same reasoning, it seems that even after she removes 99,997 grains of sand--I don't know what she wants with all this sand, but I'm starting to worry about that girl--there is still a heap of sand in my backyard. But three grains isn't enough for a heap. So there is not a heap in my backyard. Now I'm confused. Where did my reasoning go wrong? What we have here is an example of the sorites paradox. It is a paradox, because I started with seemingly true statements and used valid reasoning to arrive at contradictory conclusions. We can learn a lot about logic, language, epistemology and metaphysics by thinking through and attempting to resolve paradoxes. In this class, we'll work together to think through some ancient and contemporary paradoxes. We'll also work on writing lucid prose that displays precisely the logical structure of arguments, engages in focused critique of these arguments, and forcefully presents arguments of our own. Other topics could include: Zeno's paradoxes of motion and plurality, the liar's paradox, the surprise-exam paradox, paradoxes of material constitution, Newcomb's Problem, and the Prisoner's Dilemma.

Requirements/Evaluation: (i) short response papers; (ii) midterm paper (~5-6 pages) (iii) Final term-paper (~10 pages) in multiple drafts; (iv) Active and informed participation in class discussions.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: First and second year students. Prospective philosophy majors.

Expected Class Size: 15-19

Grading: no pass/fail option, yes fifth course option

Writing Skills Notes: Students will write a number of short papers. Both the content and the writing will be evaluated. These papers will focus on clear and precise presentation and evaluation of arguments. There will be a midterm paper revising an earlier short paper. There will be a final term-paper written in multiple drafts.
PHIL 128 (S) Utopias and Dystopias (WS)

The touchstone of our course will be Plato’s *Republic*: the first and perhaps greatest utopia as well as perhaps the greatest work in political philosophy. We will prepare for the *Republic* by reading two Socratic dialogues: the *Euthyphro* and the *Meno*. After several weeks on the *Republic* we will turn to Shakespeare’s last play: *The Tempest*. From there it is a natural transition to Aldous Huxley’s *Brave New World*.

Requirements/Evaluation: several short papers totaling at least twenty pages

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Unit Notes: meets 100-level PHIL major requirement

Distributions: (D2) (WS)

Writing Skills Notes: Five 4 or 5 page papers, evenly spaced throughout the semester. Students will receive timely comments on their writing skills, with suggestions for improvement.

Not offered current academic year

PHIL 129 (F)(S) Language and the Mind

Cross-listings: COGS 129 PHIL 129

Primary Cross-listing

Many animals communicate, but only humans can use language. What is language? Is the ability to learn it specialized, or just a matter of having enough cognitive processing power? Do successes of large language models and AI chat bots confirm or challenge traditional linguistic theory? Does language in any way determine, shape, or enable thought? How sophisticated could a mind without language be? Does knowledge of language require consciousness? In this course we will investigate (a) what makes language stand out from other kinds of communication system and (b) what makes human minds uniquely capable of acquiring language. Drawing on debates about the evolution of language, Chomskyan universal grammar, the computational theory of mind, and more, we will explore the philosophical consequences of our existence as linguistic creatures.

Requirements/Evaluation: Short reading responses (approx. 2 pages) every other week, two exams

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Priority given to first and second years

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

COGS 129(D2) PHIL 129(D2)

Attributes: Linguistics

Fall 2023
PHIL 201 (F) History of Ancient Greek Philosophy

Cross-listings: PHIL 201 CLAS 203

Primary Cross-listing

Very few people believe that everything is water, that we knew everything before birth, that philosophers ought to rule the state, or that the earth is at the center of the cosmos. Why then should we spend our time studying people who in addition to having these surprising beliefs have been dead for 2500 years? First of all, Greek thinkers, especially Plato and Aristotle, radically shaped the trajectory of western thought in every area of philosophy. No one can have an adequate understanding of western intellectual history without some familiarity with the Greeks, and we might think that an understanding of our intellectual history can deepen our understanding of our own situation. More importantly, many of the thinkers that we will read in this class are simply excellent philosophers, and it is worthwhile for anyone interested in philosophical problems to read treatments of these problems by excellent philosophers. We will begin the course by looking briefly at some of the Presocratic philosophers active in the Mediterranean world of the seventh through fifth centuries BCE, and some of the sophists active in the fifth century. We will then turn to several of Plato's dialogues, examining Plato's portrayal of Socrates and his development of a new and profoundly powerful philosophical conception. Finally, we will examine some of Aristotle's works on metaphysics, epistemology and ethics, considering some of the ways Aristotle's thought responds to that of predecessors.

Requirements/Evaluation: There will be a midterm and final exam. There will also be short writing assignments.

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Philosophy and Classics Majors.

Expected Class Size: 15-20

Grading: no pass/fail option, yes fifth course option

Unit Notes: Philosophy majors must take either PHIL 201 or PHIL 202 (and are encouraged to take both)

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
PHIL 201(D2) CLAS 203(D1)

PHIL 202 (S) History of Modern European Philosophy

This course is a survey of 17th- and 18th-century European philosophy, with a focus on metaphysics and epistemology. Topics will include: What can we know through our senses? Can we know anything through reason alone? What is the mind? What is the body? What is the relationship between the mind and the body? What are space and time? Are we rationally justified in drawing causal inferences? Are we justified in believing in God? Authors will include: Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume, and Kant.

Requirements/Evaluation: 2 take-home essays, 2 exams

Prerequisites: It is recommended that students have taken a 100-level Philosophy course, though not strictly required.

Enrollment Limit: 15

Enrollment Preferences: Enrollment preference will be given to majors, prospective majors, students who have taken a 100-level PHIL course, and first-years and sophomores.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Unit Notes: Philosophy majors must take either PHIL 201 or PHIL 202 (and can take both)

Distributions: (D2)
PHIL 203  (F) Logic and Language  (QFR)

Logic is the study of reasoning and argument. More particularly, it concerns itself with the differences between good and bad reasoning, between strong and weak arguments. We will examine the virtues and vices of good arguments in both informal and formal systems. The goals of this course are to improve the critical thinking of the students, to introduce them to sentential and predicate logic, to familiarize them with enough formal logic to enable them to read some of the great works of philosophy that use formal logic (such as Wittgenstein's Tractatus), and to examine some of the connections between logic and philosophy.

Class Format: discussion

Requirements/Evaluation: a midterm, a final, frequent homework and problem sets

Prerequisites: none

Enrollment Limit: 40/sect

Enrollment Preferences: Philosophy majors, seniors, juniors, sophomores, first-years in that order.

Expected Class Size: 40/sect

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: The main part of the course is learning two formal languages of logic: sentential logic and predicate logic

LEC Section: 02  MWF 12:00 pm - 12:50 pm  Steven B. Gerrard

PHIL 206  (S) Philosophy and Tragedy  (WS)

Tragedy and philosophy were two of the finest achievements of classical Athenian civilization, and each attempts to reveal to the reader something fundamental about our shared human condition. The worldview that underlies classical tragedy, however, seems markedly different from the one that we find in classical philosophy. While Plato and Aristotle differ on many points, they share the belief that the cosmos and the human place within it can be understood by rational means. Furthermore, they share the conviction that the most important components of a successful life are within the control of the individual human being. The picture that we find in the works of the tragedians, Aeschylus, Sophocles and Euripides is markedly different. The tragedians emphasize the ways in which the cosmos and our role in it resists any attempt to be understood, and emphasize the ways in which the success or failure of our lives often turns on things completely beyond our control. The view of the tragedians can lead to a thoroughgoing nihilism according to which --the best thing of all [for a human being] is never to have born--but the next best thing is to die soon (Aristotle's Eudemus as quoted in Nietzsche's Birth of Tragedy; see also Sophocles' Oedipus at Colonus)." Despite these rather grim pronouncements, tragic drama has continued to fascinate and educate generations. Furthermore, philosophers have continued to revisit the existential questions vividly raised by Greek tragedy. In this course, we will examine a number of Greek tragedies and philosophical writing on tragedy and the tragic. We will read the Oresteia and Prometheus Bound by Aeschylus, Sophocles' Theban Cycle, and the Hippolytus, Bacchae and Philoctetes by Euripides. As we read through these plays, we will also examine a number of philosophical works about tragedy. We will begin with Aristotle's Poetics and will continue with Hume's Of Tragedy, Hegel's various writings on tragedy, and Nietzsche's The Birth of Tragedy. If possible, we will arrange to see a live performance of a Greek tragedy.

Requirements/Evaluation: five papers, five responses and a final paper in multiple drafts; each week one student will write a paper responding to the week's readings and the other student will write a response to that paper

Prerequisites: none;

Enrollment Limit: 10

Enrollment Preferences: Philosophy and Classics Majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option
PHIL 207 (S) Contemporary Philosophy of Mind

The philosophy of mind has been one of the most active areas of philosophical inquiry over the last century. Whether the mind can be fully understood within a scientific framework has taken on an exciting urgency. In this course we will investigate the broad topics of consciousness and thought by surveying the many approaches to mind that yield the contemporary debates.

Requirements/Evaluation: weekly two page papers on focused topics and two 8- to 10-page papers

Prerequisites: at least one prior 100- or 200-level PHIL or COGS course

Enrollment Limit: 19

Enrollment Preferences: prospective Philosophy majors and Cognitive Science concentrators

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: COGS Interdepartmental Electives PHIL Contemp Metaphysics + Epistemology Courses

Not offered current academic year

PHIL 209 (S) Philosophy of Science

Cross-listings: STS 209 PHIL 209

Primary Cross-listing

It is a generally held belief, in our time and culture, that science is the best source of our knowledge of the world, and of ourselves. The aim of this course is to examine the origins, grounds, and nature of this belief. We will analyze and discuss various accounts of scientific method, structure and justification of scientific theories, scientific choice, change, and the idea that scientific knowledge is progressive in a cumulative way. The course will begin with the "received view" of science, advanced by logical empiricists, which assumes the objectivity and the rationality of science and argues that induction is the main scientific method. We will then discuss philosophies of science which emerged out of various criticisms of this view - especially those of Popper, Lakatos, Kuhn and Feyerabend - and the challenges to the assumptions of scientific objectivity and rationality their works provoked. This discussion will lead us to the relativist and social-constructivist views developed within contemporary science studies. Finally, we will analyze the current debate about cognitive credentials of science and about proper approaches to the study of science, which came to be known as "the science wars."

Class Format: short lecture component in each class

Requirements/Evaluation: class attendance, preparedness and participation; two short assignments; three five pages long papers, the last of which will be the final paper, due a week after the end of classes

Prerequisites: one PHIL course, or two STS courses, or declared major in a natural science, or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Philosophy majors and prospective majors, then Div III majors.

Expected Class Size: 10-15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 209(D2) PHIL 209(D2)

Attributes: COGS Related Courses PHIL Contemp Metaphysics + Epistemology Courses
PHIL 211  (S)  Ethics of Public Health  (WS)

From questions about contact tracing apps to racial and age disparities in health risk and outcomes, the COVID-19 pandemic has foregrounded the importance of ethics as a key concern in public health policies and activities. Moreover, the ethical issues that are implicated in responses to the pandemic reflect the range of those manifested across the field of public health as a whole. In this course, we will survey the ethics of public health through the lens of the COVID-19 pandemic, investigating concepts and arguments that are central to the ethics of public health research and practice. For example, we will examine the ethics of disease surveillance, treatment and vaccine research, resource allocation and rationing, compulsion and voluntariness in public health measures, and social determinants of health outcomes, among other topics. To do this, we will need to become familiar with key ethical theories; think deeply about such concepts as privacy, paternalism and autonomy, exploitation, cost-benefit analysis and justice; and compare the function of these concepts in the context of the COVID-19 pandemic with the way they work in responses to other public health concerns.

Requirements/Evaluation:  Biweekly 5-7 page papers, oral commentaries, and tutorial discussions.
Prerequisites:  none
Enrollment Limit:  10
Enrollment Preferences:  declared and prospective Philosophy majors and Public Health concentrators, students with a specific curricular need for the course, and students with a high level of interest who are unlikely to have an opportunity to take the course in a future term
Expected Class Size:  10
Grading:  no pass/fail option,  no fifth course option
Unit Notes:  Public Health concentrators may use either PHIL 211T Ethics of Public Health or PHIL 213T Biomedical Ethics to fulfill their 3-elective requirement, but they may not use both courses to do so.
Distributions:  (D2)  (WS)
Writing Skills Notes:  Students will write five biweekly papers of 5-7 pages in length, one of which they will revise and resubmit. In each of the tutorial papers students will describe and evaluate arguments in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.
Attributes:  PHIL Contemporary Value Theory Courses  PHLH Bioethics + Interpretations of Health

PHIL 213  (F)(S)  Biomedical Ethics  (WS)

Much like the construction of medical knowledge itself, it is from specific cases that general principles of biomedical ethics arise and are systematized into a theoretical framework, and it is to cases they must return, if they are to be both useful and comprehensible to those making decisions within the biomedical context. In this tutorial we will exploit this characteristic of biomedical ethics by using a case-based approach to examining core concepts of the field. The first portion of the course will be devoted to developing and understanding four moral principles which have come to be accepted as canonical: respect for autonomy, beneficence, nonmaleficence, and justice. The remainder of the course will consider key concepts at the core of medical ethics and central issues for the field, such as privacy and confidentiality, the distinction between killing and "letting die," and therapy vs. research. To this end, each week we will (1) read philosophical material focused on one principle or concept, and (2) consider in detail one bioethics case in which the principle or concept has special application or relevance. In some weeks, students will be asked to choose from a small set which case they would like to address; in others the case will be assigned.

Requirements/Evaluation:  bi-weekly papers, oral commentaries, and tutorial discussions
Prerequisites:  none
Enrollment Limit:  10
Enrollment Preferences:  PHIL majors, PHLH concentrators, those who have a curricular need for the course, those who have been dropped from the course in previous semesters due to over enrollment
Expected Class Size:  10
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D2)  (WS)
Writing Skills Notes:  Students will write six tutorial papers of 5-7 pages in length, one of which they will revise and resubmit. In each of the tutorial
papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

PHIL 216  (S)  Philosophy of Animals

Cross-listings:  PHIL 216 ENVI 216

Primary Cross-listing

Animals are and always have been part of human life. To name just a few ways: We treat animals as companions, as food, as objects of wonder in the wild, as resources to be harvested, as testing grounds for science, and as religious sacrifice. The abstract philosophical question before us is, what are animals such that they can be all these things? In this course we aim to engage that abstract question through two more focused projects. Firstly, we will try to understand the mental lives of non-human animals. Secondly, we will try to make sense of the moral dimensions of our relationship to animals. Throughout we will aim to fuse a rigorous scientific perspective with more humanistic themes and philosophical inquiry. Topics include sentience, animal cognition, language in non-human animals, empathy and evolution, the history of domestication, animal rights, cross-cultural views on animals, arguments against and for vegetarianism and veganism, the morality of zoos, hunting and fishing, and pets and happiness.

Requirements/Evaluation: four 3-to-4 page papers and one 8-to-10 page final paper. In addition, students are required to attend remotely at least four talks in the speaker series associated with the course. These will be during the Friday course time slot. (When there is no speaker, there will not be class during that slot, so class itself will be solely on Mondays and Wednesdays.)

Prerequisites: none, though at least one course in philosophy is recommended.

Enrollment Limit: 16

Enrollment Preferences: students with at least one previous philosophy or cognitive science course; there is no need to email the professor in advance to indicate special interest in the course.

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Unit Notes: meets Contemporary Metaphysics & Epistemology requirement only if registration is under PHIL

PHIL 221  (F)  Introduction to Formal Linguistics  (QFR)

Cross-listings:  PHIL 221 COGS 224

Secondary Cross-listing

The sentence "Every cookie is chocolate chip and three of them are oatmeal raisin" is a perfectly grammatical sentence of English, but it's self-contradictory. What does it take to realize this fact? One must grasp the meanings of the various parts of the sentence. In particular, one must grasp that "three of them" picks out a subset of the group picked out by "every cookie", and that there's no such thing as a cookie that is both chocolate chip and oatmeal raisin. There two ways to understand "Many students took every class": According to one, there is a single group of students that had their hands extremely full this semester. According to the other, every class was well-populated, potentially by different groups. The reason for this is that there are two underlying structures that the original sentence can realize. This course serves as an introduction to formal methods in the scientific study of language. Our goal will be to characterize phenomena like those above with logical and mathematical precision. The
focus will be on model-theoretic semantics, the sub-field of linguistics that studies meanings. Along the way we will discuss principles of syntax, the sub-field that studies sentence structures, and pragmatics, the sub-field that studies inferences of non-literal content. This is a formal course, but no prior logical or mathematical background will be expected. Starting from scratch, students will learn the building blocks of current-day linguistic research. This introduction will be of use to students interested in language from a variety of perspectives, including philosophy, cognitive science, and computer science.

Requirements/Evaluation: Weekly problem sets, plus a final project (paper/presentation/other type, to be discussed with instructor)

Prerequisites: No prerequisites

Enrollment Limit: 20

Enrollment Preferences: Preference given to seniors and philosophy/cognitive science majors.

PHIL 224  (F)  Nietzsche, Marx and Freud  (WS)

Nietzsche, Marx and Freud have had a profound influence on literature, philosophy, and critical theories of the 20th and 21st centuries. In this tutorial we will treat them as diagnosticians of modernity who engaged in unveiling illusions and opening up possible alternative human futures. Each
questioned the emancipatory effects of dominant understandings of reason and freedom as well as idealist and humanist accounts of moral progress in history; each aimed to liberate human beings from unnecessary suffering. We will focus on questions concerning their distinctive diagnostic and critical methods, the problems they identified, and their respective understandings of religion and modern science.

**Class Format:** We may also meet in a seminar format once or twice during the semester.

**Requirements/Evaluation:** Bi-weekly papers, 2-3 page commentaries, and tutorial discussions.

**Prerequisites:** One of the following: 100-level Philosophy course or permission of instructor. Exposure to history of modern European philosophy and/or intellectual history will be very helpful.

**Enrollment Limit:** 10

**Enrollment Preferences:** Philosophy majors or prospective majors and students with background and interest in modern philosophy and critical theories more generally.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students write five or six 5-6 page tutorial papers. Each will receive regular feedback to improve their ability to present clear, well-supported and engaging written arguments and interpretations.

**Attributes:** PHIL History Courses

---

**PHIL 225 (S) Existentialism**

We will study the philosophical and literary works of Kierkegaard, Nietzsche, Dostoevsky, Tolstoy, Kafka, Sartre, de Beauvoir, and Camus. One of our guiding questions will be: What makes a thinker an "Existentialist"? The answer is not merely that they ask the question, "What gives meaning to a human life?" And, it's not merely that their answer invokes our freedom to determine our own identities. More than this, Existentialists emphasize the subjective relation we bear to our belief systems, moral codes, and personal identities. Existentialists investigate deeply irrational phenomena of human life, including anxiety, boredom, tragedy, melancholy, despair, death, faith, sexuality, love, alienation, hate, sadism, masochism, and authenticity. And, Existentialists express their thought in philosophical treatises as often as in literary works. In this course we will seek to comprehend the dimensions in which Existentialism is a distinctive intellectual tradition.

**Class Format:** Students will meet in pairs or trios with the instructor for 60 minutes each week.

**Requirements/Evaluation:** Students will take turns as the lead writer one week, and the respondent the next. The week's lead writer will write a 5- to 6-page essay on the assigned reading, due 36 hours before the meeting. The week's respondent will write a 2-page essay on the leader's essay due at the time of the meeting. At the meetings, both students will present their essays and hold a discussion. Students will be evaluated cumulatively on their essays and contributions to discussion.

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** preference to Philosophy majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** PHIL History Courses

Spring 2024

TUT Section: T1  TBA  Justin B. Shaddock

**PHIL 228 (F) Feminist Bioethics (WS)**

**Cross-listings:** STS 228 WGSS 228 PHIL 228
In this course we will explore the ways in which feminist approaches to moral thinking have influenced both the methodology and the content of contemporary bioethics. The first portion of the course will address the emergence of the "Ethics of Care," critically assessing its origins in feminist theory, its development within the context of the caring professions, and its potential as a general approach to bioethical reasoning. The second portion of the course will use feminist philosophy to inform our understanding of the ways in which gender structures interactions with and within the health care system. To do this we will explore topics that might traditionally be considered "women's issues" in healthcare, such as medicine and body image (e.g., cosmetic surgery, eating disorders), reproductive and genetic technologies, and research on women and their health care needs. In addition we'll also look at feminist analyses of topics that traditionally have not been regarded as "gendered," such as resource allocation and end of life issues.

Class Format: discussion

Requirements/Evaluation: active participation in class discussions; periodic short papers (2-3 pages); midterm and final paper (5-7 and 7-10 pages, respectively); and one oral presentation

Prerequisites: none, although previous coursework in WGSS is desirable

Enrollment Limit: 19

Enrollment Preferences: prospective and declared majors or concentrators in PHIL, WGSS, STS, and PHLH, especially those who need the course to satisfy major or concentration requirements

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Unit Notes: meets Contemporary Value Theory requirement only if registration is under PHIL

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

Cross-listings:  PSCI 231 PHIL 231

Secondary Cross-listing
This course is a chronological survey of major works of political theory from the 16th to the 20th century. In discussions and writing, we will explore the diverse visions of modernity and of politics offered by such thinkers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, and Freud. They help us ask: What is freedom? Who is equal? Who should rule? With what limits and justifications? What form of government best serves the people? Who are the people, anyway? And on what grounds can we justify confidence in our provisional answers to such questions? Class will be primarily driven by discussion, often preceded by brief lectures. Attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Requirements/Evaluation:  three papers of 4-6 pages; class participation; brief informal writing tasks inside and outside of class meetings

PHIL 235  (S) Morality and Partiality: Loyalty, Friendship, Patriotism  (WS)

The aim of this tutorial is to critically examine the nature, importance, and ethical value of personal attachments and loyalties. Loyalty is frequently expected by family, friends and lovers, and demanded by institutions, religious, political and ethnic communities, as well as by the state. A person incapable of loyalty is often characterized as fickle, cold, self-serving and sometimes even pathological. However, the status of loyalty as a virtue has always been suspect: it has been argued that it is incompatible with impartiality, fairness and equality, and claimed that it is always exclusionary. So, some relationships with other people—such as friendships, familial ties, love, patriotism—seem to be ethically desirable, central to the quality of our lives, and yet prima facie in tension with the widely held belief that morality requires impartiality and equal treatment of all human beings. Are we ever justified in having more concern, and doing more, for our friends, family, community or nation? Does morality require that we always subordinate our personal relationships to universal principles? Is patriotism incompatible with cosmopolitanism, and if so, which of the two should we value? If loyalty is a virtue, what are the proper limits of its cultivation and expression?

Class Format:  tutorial pairs will meet with the instructor for one hour a week, and on their own for another hour.

Requirements/Evaluation:  tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner
Prerequisites:  none; open to first year students

Enrollment Limit:  10
Enrollment Preferences: Philosophy majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will get regular and detailed feedback on their writing skills, from word choice and sentence structure to overall structure of the paper.

Attributes: PHIL Contemporary Value Theory Courses

Not offered current academic year

PHIL 236 (S) Contemporary Ethical Theory

This course will examine central questions in normative ethics, including the following: Which features of actions are morally important and why (e.g., their motive, intrinsic nature, or consequences)? Which characteristics of persons give them moral status? How should moral equality be understood, and what is its foundation? When should we give morality priority over personal commitments and relationships, and why? Are we capable of disinterested altruism, or are we motivated solely by self-interest? By which methods should we pursue answers to these questions? We will examine these and related issues by looking in depth at contemporary defenses of consequentialist, deontological, and contractualist theories.

Requirements/Evaluation: Weekly seminar discussion questions; midterm paper (8-10 pages); final paper (10-12 pages)

Prerequisites: At least one previous PHIL course or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Current and prospective philosophy majors

Expected Class Size: 10-15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

SEM Section: 01 MR 1:10 pm - 2:25 pm Melissa J. Barry

PHIL 241 (S) Contemporary Metaphysics

Our focus in this class is going to be on the nature of causation. We make causal judgments constantly in our everyday lives and in scientific contexts. It turns out, however, to be surprisingly difficult to say what causation is. We will begin the course by looking at Hume's and Kant's discussion of causation. We will then turn to a variety of more recent attempts to give a clear characterization of causation. In addition to examining general accounts of causation, we will examine particular problems that come up in thinking about mental causation and causation in indeterministic contexts.

Requirements/Evaluation: one 10 page midterm paper and one 15 page final paper which will involve draft and revision, possible short response papers, and active participation in seminar

Prerequisites: one PHIL course; familiarity with formal logic helpful but not required; or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Philosophy Majors

Expected Class Size: 10-15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

PHIL 243 (F) The Philosophy of Higher Education: College Controversies (WS)

What are the purposes of higher education? What are the purposes of liberal arts colleges in America? What should be the goals of Williams College?

**Class Format:** This course is a tutorial. Students will meet in pairs with the instructor one hour per week.

**Requirements/Evaluation:** A 5- to 7-page paper every other week (6 in all), prepare and present a written critique of their partners’ papers in alternate weeks

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** I will be seeking a balance of interests and backgrounds; preference given to students who have taken at least one philosophy course

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** A 5- to 7-page paper every other week (6 in all), prepare and present a written critique of their partners’ papers in alternate weeks, and will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes:** PHIL Contemporary Value Theory Courses

Not offered current academic year

**PHIL 244 (S) Environmental Ethics** (WS)

**Cross-listings:** PHIL 244 ENVI 244

**Secondary Cross-listing**

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Most sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

**Requirements/Evaluation:** five essays (5-7 pages each) and five prepared oral responses to partners’ essays; evaluation will be based on essays, oral responses, and quality of discussion

**Prerequisites:** ENVI 101 or one course in PHIL

**Enrollment Limit:** 10

**Enrollment Preferences:** declared and prospective Environmental Studies majors and concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** meets Value Theory requirement only if registration is under PHIL

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 244(D2) ENVI 244(D2)

**Writing Skills Notes:** Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

PHIL 245  (F)  Mind and Persons in Indian Thought

Cross-listings: ASIA 244 PHIL 245 REL 244

Secondary Cross-listing

In this course, we follow the Indian philosophical conversation concerning the self and the nature of consciousness, particularly as they are found in its various Yogic traditions. We start with some of the Hindu views about the self and the mind and consider their ethical implications. We then consider a range of Buddhist critiques of these views, focusing more particularly on the Madhyamaka, which radicalizes the critique of the self into a global anti-realist and skeptical stance. We also examine the Yogacara school, which offers a process view of reality focusing on the analysis of experience. We conclude by considering some of the later Hindu holistic views of the self as responses to the Buddhist critique. In this way we come to realize that far from being the irrational foil of "the West," Indian tradition is a rich resource for thinking through some of the central questions that have challenged philosophers in both traditions.

Class Format: discussion

Requirements/Evaluation: full attendance and participation, three short essays (6 pages each)

Prerequisites: none

Enrollment Limit: 18

PHIL 250  (S)  Philosophy of Economics  (WS)

The status of economics as a predictive science has been most prominently brought into question, historically, by three unpredicted yet extremely important economic events: the Great Depression of the 1930s, stagflation of the 1970s, and bursting of the mortgage bubble in 2008. The issue of prediction was also raised by economist Donald McCloskey who, in 1988, asked his fellow economists, "If you're so smart, why ain't you rich?" Some critics find predictive failures of economists unsurprising, given the frequent reliance of the latter on assumptions known to be false (e.g., that economic agents are always selfish, have perfect information, and never make mistakes) and on models that unavoidably ignore potentially relevant factors. Perhaps, then, economics is not primarily a predictive science, but instead a descriptive, historical, and/or mathematical one. In this course, relying on works by economists and philosophers, we examine the status of economics as an academic discipline, focusing on its assumptions, methods, and results.

Requirements/Evaluation: six 6- to 8-page essays, six 2- to 3-page response papers, participation in discussions

Prerequisites: none

Enrollment Limit: 10

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)
Writing Skills Notes: Six 6- to 8-page essays. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: PHIL Contemporary Value Theory Courses

PHIL 251 (S) Offensive Art

Twenty-four centuries ago Plato argued for censorship of art. In the last century New York City mayor Rudy Giuliani attempted to shut down the Brooklyn Museum “Sensations” exhibit because he claimed it offended Christians, and the Cincinnati Contemporary Arts Center was prosecuted for exhibiting allegedly obscene photographs by Robert Mapplethorpe. Just today (15 February 2022) The New York Times removed some solutions from their recently purchased game Wordle, saying that words such as “pussy”, “slave”, and “wench” are “offensive or insensitive”. At Williams College a mural was removed from The Log and Herman Rosse's painting "Carnival of Life" was removed from the '62 Center. What should be done about offensive art? What is offensive art? Does it matter who is offended? Does offensive art harm? Is there a difference between being offended and being harmed? Is there a difference between cultural appropriation and cultural appreciation? What are the responsibilities of museum curators and theater producers when presenting art that might offend? Who gets to decide the answer to these questions; indeed, who gets to decide what questions to ask? We will attempt answers by studying classical works (such as Plato's Republic and John Stuart Mill's On Liberty), contemporary articles, and works of art in various media. Trigger Warning: all the works of art studied in this class will be chosen partly because they have offended a significant number of people. You are very likely to be offended by some of the art we discuss. This will be the only trigger warning for the class; if you don’t want to be offended then this course is not for you.

Requirements/Evaluation: several short responses (including op-eds on current controversies) and longer final projects (a 12- to 15-page paper or equivalent work in other media)

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: seniors, juniors, then sophomores in that order

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: potential additional material costs up to $50 if individual students opt for final projects in other media

Distributions: (D2)

Attributes: PHIL Contemporary Value Theory Courses

PHIL 272 (F) Free Will and Responsibility (WS)

Cross-listings: PHIL 272 JLST 272

Primary Cross-listing

Our practice of holding people responsible seems justified as long as their choices are free. But when does a choice qualify as free? We’re all deeply influenced by factors ranging from the general laws of nature to specific features of our genetic endowment and social environment (including religion, political ideology, and advertising). These affect not only our particular choices but also, more fundamentally, who we are and what we value. The key question, then, is whether, and how, free choice is possible amidst all of these influences. We’ll attempt to answer this question by examining recent philosophical work on the nature of free will and responsibility.

Requirements/Evaluation: Five tutorial papers (5-6 pages in length) and five critiques (2-3 pages in length)

Prerequisites: one PHIL course (or permission of instructor; please email with any questions)

Enrollment Limit: 10

Enrollment Preferences: current and prospective Philosophy majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 272(D2) JLST 272(D2)
PHIL 288 (F) Embodiment and Consciousness: A Cross-Cultural Exploration

Cross-listings: REL 288 PHIL 288

Secondary Cross-listing

This course examines some of the central questions raised by the study of the consciousness: the place of intentionality, the role of emotions, the relation with the body, the nature of subjectivity, the scope of reflexivity, the nature of perceptual presence, etc. In confronting these difficult questions, we do not proceed purely theoretically but consider the contributions of various observation-based traditions, from Buddhist psychology and meditative practices to phenomenology to neurosciences. We begin by examining some of the central concepts of Buddhist psychology, its treatment of the mind as a selfless stream of consciousness, its examination of the variety of mental factors and its accounts of the relation between cognition and affects. We also introduce the practice of meditation as a way to observe the mind and raise questions concerning the place of its study in the mind-sciences. We pursue this reflection by examining the views of James, Husserl, Sartre and Merleau-Ponty, particularly as they concern the methods for the study of the mind and the relation between consciousness, reflexivity and the body. In this way, we develop a rich array of analytical tools and observational practices to further our understanding of the mind. But we also question the value of these tools based on first person approaches by relating them to the third person studies of the mind. In this way, we come to appreciate the importance of considering the biology on which mental processes are based and the light that this approach throws on the nature of consciousness. We conclude by considering the relation between first and third person studies of the mind, focusing on the concept of the embodied mind as a fruitful bridge between these different traditions.

Requirements/Evaluation: regular practice of meditation, a class presentation, a short essay (6-pages); a long final research paper (15 pages)

Prerequisites: any introduction to philosophy and at least two upper level courses in PHIL, at least one of which meets the Contemporary Metaphysics or Epistemology distribution requirement for the major, no exceptions;

Enrollment Limit: 18

Enrollment Preferences: Religion and Philosophy majors

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Unit Notes: there is no need to email the professor in advance to indicate interest in the course

PHIL 307  (F)  Augustine’s Confessions  

Cross-listings: PHIL 307 CLAS 307 REL 303 

Primary Cross-listing

No thinker has done more to shape the Western intellectual tradition than Augustine (354-430 CE), and no book displays Augustine’s dynamic vision of reality more compellingly than the Confessions. Its probing and intimate reflections on the meaning of human life, the nature of God and mind, time and eternity, will and world, good and evil, love and sexuality have challenged every generation since Augustine’s own. The seminar will be structured around a close, critically engaged reading of the Confessions (in English translation) and will give attention to its historical context and significance as well as to its philosophical and theological ideas. (There will be optional, supplementary opportunity to engage with the Latin text for interested students with some facility with Latin.)

Class Format: Class meetings will consist primarily in student presentations and open, directed discussion of assigned readings.

Requirements/Evaluation: Regular reading assignments from the Confessions and related secondary literature. Weekly participation in online discussion on Glow (15% of final grade); 3 class presentations (of various lengths and kinds) (20%); a short paper (maximum 1500 words) due around the middle of the semester (20%); a term paper in two drafts (maximum 3000 words) due near and the end of the semester (40%); preparation for and participation in class that shows thoughtful engagement with the assigned readings (5%).

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Advanced students in Philosophy, Religion and/or Classics

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 312  (F)  Philosophical Implications of Modern Physics  (QFR)

Cross-listings: STS 312 PHIL 312 PHYS 312

Secondary Cross-listing

Some of the discoveries made by physicists over the last century seem to show that our common sense views are deeply at odds with our most sophisticated and best confirmed scientific theories. The course will present the essential ideas of relativity theory and quantum theory and explore their implications for philosophy. We will ask, for example, what these theories tell us about the nature of space, time, probability and causality.

Requirements/Evaluation: attendance, participation, problem sets, exams, six 1- to 2-page papers and a 12- to 15-page term paper

Prerequisites: MATH 140, high-school physics, and either a 200-level course in PHIL or a 100-level course in PHYS

Enrollment Limit: 20
**PHIL 314 (S) Linguistic Meaning and Reference**

"The 100th US President will be shorter than Aristotle was" is a sentence that is either true or false, we don't know which. Either way, it's true/false thanks to a special relationship it has to somebody in the far future and to somebody in the distant past. What is the nature of that relation? How does it work? What makes it possible? In this course we will investigate reference, a central topic in the philosophy of language. We will discuss competing theories about how different representational types refer, including names (like "Aristotle"), definite descriptions (like "the 100th US President"), indexicals (like "you"), and even non-verbal deixis (like pointing gestures). Of particular interest will be the relation between reference and linguistic meaning. Is reference all there is to meaning, or is there more to what some (or all) referring expressions mean? We'll explore this topic with an eye toward making connections with philosophical questions about the mind--do thoughts refer in the same way that words do? Must a speaker's linguistic reference always match their mental reference?

**Requirements/Evaluation:** Short reading responses, midterm and final papers (approx. 10 pages)

**Prerequisites:** At least one philosophy course

**Enrollment Limit:** 20

**Spring 2024**

**SEM Section:** 01  TF 2:35 pm - 3:50 pm  Christian De Leon

**Attributes:** PHIL History Courses

---

*Not offered current academic year*
PHIL 319  (F)  Topics in Philosophy of Race: Hegel and Africana Philosophy  (DPE)

Cross-listings:  AFR 327 PHIL 319

Primary Cross-listing

How are individual and social subjects formed, and how do they connect to questions of race? What is the nature of consciousness and how can it be unhappy, false or double? What do we mean when we talk about racial capitalism? This course introduces philosophy students to these and related questions through a parallel reading that brings together 19th century German philosopher Hegel and a tradition of Africana philosophy running through Douglas, Du Bois, Fanon, Gilroy, Hartman and Wynter. While Hegel studies tends to occur in isolation from philosophers in the Africana tradition, many of the above explicitly refer to and take up questions in Hegel. This course argues that by reference to the historically specific modes of subjectivity and sociality that resulted from the Transatlantic Slave Trade and the Haitian Revolution, for instance, we can better understand and address long-standing questions in European Social Philosophy. Topics to be considered include the nature of freedom (both individual and social), the master/slave dialectic and subject constitution, self-consciousness and double consciousness, the stages of history, and racial capitalism

Requirements/Evaluation:  Progressive writing assignments including 4 exegetical commentaries, one 5 page paper and one 10-12 page final paper.

Prerequisites:  One prior 100 level philosophy course or permission of instructor.

Enrollment Limit:  15

Enrollment Preferences:  Preference given to philosophy majors and Africana studies concentrators.

Expected Class Size:  10-15

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 327(D2) PHIL 319(D2)

Difference, Power, and Equity Notes:  Course material involves self-conscious and critical engagement with the history of racial subject formation as well as Africana philosophy, and thinking about how power’s distribution connects to questions of race.

Attributes:  PHIL History Courses

Not offered current academic year

PHIL 320  (F)  Topics in Critical Theory: Genealogy and Critique  (DPE) (WS)

What are the philosophical consequences of an inquiry into the ‘origins’ of our concepts, beliefs, and practices? If we are able to show that a current concept or belief has a contingent and dark origin, are we justified in questioning or abandoning it? Alternatively, if the origins of our present ways of thinking and acting are themselves laudatory, have we then vindicated the present? In this course I will select from a range of historical texts in Western philosophy that make use of fictional, semi-fictional or real genealogies in their arguments (Hobbes, Locke, Rousseau, Hume, Nietzsche, and Foucault). We will explore recent debates concerning genealogy in both analytic and continental philosophy in an effort to answer the following questions: What are the aims of genealogy? Can genealogy provide us with a solid foundation for either legitimizing or criticizing contemporary beliefs and practices? If so, how? If not, why not? Are there other aims which genealogy might serve?

Class Format:  We may schedule at least one seminar meeting during the semester.

Requirements/Evaluation:  Evaluation will be based on written work (six 5-6 page papers, and six 2-3 page commentaries on your partner's papers) as well as the quality and level of preparation and intellectual engagement in our weekly meetings.

Prerequisites:  Demonstrated background in history of modern philosophy (PHIL 202), modern political theory, or critical and social theories.

Enrollment Limit:  10

Enrollment Preferences:  Preference will be given to philosophy majors and prospective majors and students with demonstrated interest and background in critical or social theories.

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE) (WS)

Writing Skills Notes:  Students will write six 5-6 page papers, and six 2-3 page commentaries on their partner's papers on alternative weeks. Papers and commentaries will receive significant oral feedback in our weekly 75 minute tutorial sessions.

Difference, Power, and Equity Notes:  In this course we raise questions at the center of debates in critical theory, a form of theory oriented toward
emancipation or, at the very least, toward resisting unnecessary constraints on freedom that result in intolerable conditions and suffering. Readings will be drawn from sources in feminist theory, critical race theory, and postcolonial theory as well as philosophy.

**Attributes:** PHIL Contemporary Value Theory Courses

Not offered current academic year

**PHIL 321 (S) Introduction to Critical Theory: The Enlightenment and Its Critics**  (DPE) (WS)

**Cross-listings:** PHIL 321 WGSS 322

**Primary Cross-listing**

We often associate modern faith in the prospects of universal human dignity, rational autonomy, the rights of man, individual liberty, democracy, open scientific inquiry and social and political progress with the Enlightenment. How can we reconcile this faith with the persistence of domination today?

Critical theory aims not merely to understand the "struggles and wishes of the age" as Marx one described it, but with emancipation from domination. Understood in this way, critical theory is identified closely with the intellectual tradition of the Frankfurt School. In this tutorial, we will read works in critical theory from the 18th century to the present, some from the Frankfurt tradition, and some not. We will focus on particular topics, examples of which are the following: normative critique, capitalism, authoritarianism, mass culture, enlightenment and reason, progress, violence, the domination of nature, white supremacy, patriarchy and colonialism.

**Class Format:** students will work in pairs and meet for 75 minutes each week with the professor

**Requirements/Evaluation:** Each student will write and present a 5 or 6-page paper every other week and a commentary on their partner's essay on alternate weeks; evaluations are based on written work as well as level of preparation and the quality of intellectual engagement in tutorial meetings.

**Prerequisites:** PHIL 202, Kant course, modern political theory, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Philosophy majors and students with background in modern political theory, or other relevant demonstrated background.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 321(D2) WGSS 322(D2)

**Writing Skills Notes:** The tutorial format requires significant writing (six 2500-3000 word papers, and six 1000-1250 word commentaries), weekly commentary on writing, and instructor comments on papers.

**Difference, Power, and Equity Notes:** In this course power, difference, domination and the prospects of and obstacles to liberatory political struggle are central topics.

Not offered current academic year

**PHIL 326 (S) Foucault Now**  (DPE) (WS)

**Cross-listings:** WGSS 336 PHIL 326

**Primary Cross-listing**

If we think of Michel Foucault as engaged in writing histories, or genealogies, of his own present designed to undercut the sense of the obviousness of certain practices and ways of thinking, categorizing, and knowing, we can easily imagine that he might now be questioning different aspects of our contemporary "present" than the ones standardly associated with his name, namely, panopticons and surveillance, discipline, criminalization, the biopolitics of health, the normal and the abnormal, etc. In this course we address the question: How is the present we find ourselves living today different from the one that the author Foucault wrote about in the 1960s, 70s and early 80s before his untimely death in 1984? What differentiates today from yesterday? And what present practices and ways of thinking and knowing might be questioned using Foucault's tools, genealogy in particular, for resisting unnecessary constraints on freedom and the perpetuation of unnecessary suffering? What is his legacy today? In this tutorial you will read from a selection of Foucault's texts (books, lectures, interviews) in order to acquire a firm grasp of his method of "critique" and his way of looking at the interconnections between forms of power and the knowledge associated with particular disciplines. We will also read more recent work by Foucault inspired scholars on topics such as the biopolitics of gender, the genealogy of terrorism, the informational person (how we become our data), and neoliberal subjects.
Class Format: I may use a seminar format at least twice during the semester.

Requirements/Evaluation: evaluation will be based on written work (six 5- to 6-page papers, and six 2-3 page commentaries on their partner's papers) as well as the quality and level of preparation and intellectual engagement in our weekly meetings.

Prerequisites: Relevant background in critical theory, social theory, political theory or philosophy.

Enrollment Limit: 10

Enrollment Preferences: I will give preference to philosophy majors and to upper class students with a demonstrated background in critical theories. Some sophomores may be eligible.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 336(D2) PHIL 326(D2)

Writing Skills Notes: This is a tutorial. Students will write five or six 5-6-page papers during the course of the semester and receive significant feedback on each paper. At the end of each tutorial meeting the student is asked to reflect on how they would approach the paper differently if they were to rewrite it.

Difference, Power, and Equity Notes: In this course we address power and domination, reflect on the difference between them, and treat power relations as not only an inevitable feature of any society, but as both enabling and constraining. Moreover, we will read material that uses Foucauldian tools to address contemporary issues involving sexism and racism, digital surveillance, and the abolition of prisons.

PHIL 328  (S) Kant's Ethics

Although Kant initially planned for his magnum opus to comprise theoretical and practical chapters, his metaphysics and epistemology take up all of his Critique of Pure Reason while his ethics is spread out over a series of works--Groundwork of the Metaphysics of Morals, Critique of Practical Reason, Religion within the Boundaries of Mere Reason, and The Metaphysics of Morals. These latter writings of Kant's had a tremendous influence on the development of subsequent moral philosophy and indeed set the stage for contemporary discussions of the nature of practical reason, motivation, freedom, and morality. Our seminar will have two aims: (1) to reconstruct the single most compelling moral theory from Kant's various ethical writings, and (2) to trace the influence of Kant's ethics in contemporary philosophy.

Requirements/Evaluation: weekly seminar discussion questions; 8-10-page midterm paper; 12-14-page final paper

Prerequisites: two courses in PHIL (including a 100-level PHIL course; PHIL 201 or 202 recommended); or permission from the instructors

Enrollment Limit: 20

Enrollment Preferences: Philosophy majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: PHIL History Courses

Not offered current academic year

PHIL 329  (F) Four Challenging Moral Philosophers  (DPE) (WS)

Elizabeth Anscombe, Philippa Foot, Amelie Rorty, and Cora Diamond all challenged the prevailing philosophical tenets of their times. Anscombe and Foot resurrected virtue ethics for Anglo-American philosophy and made moral psychology academically respectable. (Foot also invented the infamous trolley car thought experiment.) Rorty challenged the very concept of morality and questioned all moral theory. Diamond investigated the methodology of moral philosophy, paying special attention to the role of literature. In order to hit the ground running, students will be expected to read The Women Are Up to Something: How Elizabeth Anscombe, Philippa Foot, Mary Midgley, and Iris Murdoch Revolutionized Ethics by Benjamin J. B. Lipscomb before the first meeting, preferably over the summer.

Requirements/Evaluation: Tutorial papers and rewrites

Prerequisites: At least three PHIL courses, including at least one in moral philosophy.
Enrollment Limit: 10

Enrollment Preferences: Philosophy majors, seniors, juniors in that order

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Students will meet with the instructor in pairs for an hour each week; a 5- to 7-page paper every other week (6 in all), prepare and present a written critique of their partners' papers in alternate weeks, and revise and re-write one of their five papers.

Difference, Power, and Equity Notes: Our four challenging moral philosophers are all women in a field dominated by men. They all challenged the prevailing philosophical tenets of their times.

PHIL 330 (S) Plato (WS)

Cross-listings: CLAS 330 PHIL 330

Primary Cross-listing

Plato is one of the most important and influential thinkers in the history of the western tradition. His depiction of the trial and death of Socrates is one of the classics of western literature, and his views on ethics and politics continue to occupy a central place in our discussions 2400 years after they were written. It is, in fact, quite difficult to get through any course of study in the liberal arts without some familiarity with Plato. Nevertheless, comparatively few people realize that the views we commonly think of as "Platonic" represent only one strand in Plato's thought. For example, we commonly attribute to Plato a theory of the Forms on the basis of his claims in the so-called "middle dialogues" (mainly Republic, Phaedo, and Symposium). However, in his philosophically more sophisticated and notoriously difficult later dialogues (such as the Parmenides, Philebus, Sophist and Statesman), Plato engages in radical criticism and revision of his earlier views. In this course, we will spend the first third of the semester attempting to understand the metaphysics and epistemology in Plato's middle dialogues. We will spend the balance of the semester coming to grips with Plato's arguments in the later dialogues. We will read several complete dialogues in translation, and will also read a wide variety of secondary source material.

Class Format: lecture/discussion; this class will be a roughly equal mixture of lectures, student presentations, and seminar discussion

Requirements/Evaluation: students will be expected to prepare a seminar presentation, to write several focused short analytical pieces, and to write a 15- to 20-page term paper in multiple drafts

Prerequisites: PHIL 101, PHIL 102 or permission of instructor; a prior course in logic will be extremely helpful, but is not necessary

Enrollment Limit: 15

Enrollment Preferences: upper-level Philosophy and Classics majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

CLAS 330(D2) PHIL 330(D2)

Writing Skills Notes: Instructor will provide regular commentary on papers.

PHIL 333 (F) Kant on Beauty, Life, and History

In this course, we will study Kant's theories of aesthetic and teleological judgments. Aesthetic judgments are puzzling, since we call things "beautiful" because they cause us to feel pleasure, and yet we expect others to find the same things beautiful as we do (e.g., the sunset over the Taconic Ridge), while we do not generally expect others to find the same things pleasurable as we do (e.g., your favorite ice cream flavor at Lickety). Teleological judgments are likewise puzzling, since we often explain living things as designed for certain purposes (e.g., the hummingbird's long bill is for accessing nectar deep inside flowers) or as striving for certain goals (e.g., the sunflower turns toward the sun to take in energy), and yet we are committed to a scientific world-view, where nature is governed by mechanistic causal laws. Indeed, we sometimes describe human history as progressive (aiming toward greater rationality, morality, equality, or freedom, e.g.), even though we regard individual humans as free to choose whether to act well or
poorly. Our course will consider Kant's attempts to account for these sorts of paradoxical judgments.

**Requirements/Evaluation:** A midterm and a final essay.

**Prerequisites:** PHIL 202 is recommended

**Enrollment Limit:** 20

**Enrollment Preferences:** Philosophy majors, prospective Philosophy majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

**Attributes:** PHIL History Courses

---

**PHIL 335 (S) Contemporary Metaethics**

We speak as if moral judgments can be true or false, warranted or unwarranted. But how should objectivity in this domain be understood? Is moral objectivity like scientific objectivity, assuming that we have a clear sense of what that involves? If not, should this concern us? What are other models for understanding moral objectivity? While answers to such questions are implicit in historically important accounts of morality, these issues became the topic of explicit, sustained debate in the twentieth and twenty-first century. Our focus will be on recent influential work in this area. We will examine several different approaches in depth, including realism, constructivism, expressivism, and skepticism.

**Class Format:** seminar

**Requirements/Evaluation:** weekly seminar discussion questions; 8-10-page midterm paper; 12-14-page final paper

**Prerequisites:** two courses in PHIL (including a 100-level PHIL course; PHIL 201 or 202 recommended); or permission from the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** current and prospective Philosophy majors

**Expected Class Size:** 10-12

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

**Attributes:** PHIL Contemporary Value Theory Courses

**PHIL 336 (F) Political Liberalism and its Critics (WS)**

Political liberalism has been both celebrated and lamented. The philosopher John Rawls is widely credited with reviving liberalism in the late 20th century and providing its most persuasive defense. In this tutorial, we'll read portions of Rawls' major works, *A Theory of Justice* and *Political Liberalism*, and trace how his theory evolved in response to an array of critics, including libertarians, perfectionists, communitarians, feminist philosophers, and critical race theorists. Among other things, these critics challenged Rawls' interpretation and defense of the social contract framework, the ideals of freedom and equality, the content of principles of justice, political neutrality about the good, the nature of the self, the division between public and private spheres, and the distinction between ideal and non-ideal theory. We'll examine these criticisms in depth. If time permits, we'll also look briefly at some recent post-Rawlsian debates about the nature of distributive justice (e.g., luck vs. relational egalitarianism, or global justice).

**Class Format:** This tutorial will meet on a fixed weekly schedule agreed to by the instructor and participants.

**Requirements/Evaluation:** Six tutorial papers (5-6 pages in length) and six critiques (2-3 pages in length)

**Prerequisites:** Two previous PHIL courses (including a PHIL 100-level course), or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Current and prospective philosophy majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option
Writing Skills Notes: Students will write a tutorial paper (5-6 pages in length) every other week, and a peer critique (2-3 pages in length) in alternating weeks, evenly spaced throughout the semester. The instructor will provide timely comments on writing skills, with suggestions for improvement.

TUT Section: T1  Cancelled

PHIL 337 (S) Justice in Health Care (WS)
Justice is a notoriously complex and elusive philosophical concept, the conditions of which are even more difficult to articulate within real world institutions and contexts than in the abstract. In this course we'll explore justice as a fundamental moral principle and as a desideratum of the US health care system. The first portion of the course will be devoted to considering general theories of justice as well as alternative conceptions of justice specifically within the health care context. While social justice and distributive justice are deeply intertwined in the health care context and we will discuss both, we will focus primarily on the concept of distributive justice. This theoretically oriented work will provide the background for subsequent examination of specific topics, which may include, among others: justice in health care financing and reform; justice in health care rationing and access to health care, with particular attention to the intersections of rationing criteria with gender, sexuality, race, disability, and age; justice in the procurement and allocation of organs for transplantation; obesity and personal responsibility for illness; and justice in medical research, including "double standards" for research conducted in low resource settings.

Requirements/Evaluation: biweekly papers, oral commentaries, and tutorial discussions

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: PHIL majors, PHLH concentrators, those with curricular need for the course, those who have been dropped from the course in previous semesters due to over enrollment, and those who are unlikely to have an opportunity to take the course in a later term

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write six tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

PHIL 338 (S) Intermediate Logic (QFR)

Cross-listings: MATH 338 PHIL 338

Primary Cross-listing

In this course, we will begin with an in-depth study of the theory of first-order logic. We will first get clear on the formal semantics of first-order logic and various ways of thinking about formal proof: natural deduction systems, semantic tableaux, axiomatic systems and sequent calculi. Our main goal will be to prove things about this logical system rather than to use this system to think about ordinary language arguments. In this way the goal of the course is significantly different from that of Logic and Language (PHIL 203). Students who have take PHIL 203 will have a good background for this class, but students who are generally comfortable with formal systems need not have taken PHIL 203. We will prove soundness and completeness, compactness, the Lowenheim-Skolem theorems, undecidability and other important results about first-order logic. As we go through these results, we will think about the philosophical implications of first-order logic. From there, we will look at extensions of and/or alternatives to first-order logic. Possible additional topics would include: modal logic, the theory of counterfactuals, alternative representations of conditionals, the use of logic in the foundations of arithmetic and Godel's Incompleteness theorems. Student interest will be taken into consideration in deciding what additional topics to cover.
Requirements/Evaluation: problem sets and exams
Prerequisites: some class in which student has studied formal reasoning
Enrollment Limit: 20
Enrollment Preferences: Philosophy majors; juniors and seniors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
MATH 338(D2) PHIL 338(D2)
Quantitative/Formal Reasoning Notes: This is a class in Formal Logic. PHIL 203 satisfies the QFR requirement. If anything, this class will be significantly more formal.

Cross-listings:  PSCI 373 AFR 340 INTR 341 PHIL 341
Secondary Cross-listing
The seminar involves a critical engagement with key Africana political leaders, theorists and liberationists. We will examine the Pan-African writings of: Cedric Robinson (Black Marxism); Walter Rodney (How Capitalism Underdeveloped Africa), Eric Williams (Capitalism and Slavery; From Columbus to Castro); Frantz Fanon (The Wretched of the Earth); Malcolm X (Malcolm X Speaks); Amilcar Cabral (Resistance and Decolonization, Unity and Struggle); C. L. R. James (The Black Jacobins).
Requirements/Evaluation: Attend all classes. Papers are due 24 hours before the start of class. Participate in class discussions.
Prerequisites: None
Enrollment Limit: 19
Enrollment Preferences: Juniors and Seniors.
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
PSCI 373(D2) AFR 340(D2) INTR 341(D2) PHIL 341(D2)
Writing Skills Notes: Three thesis papers at five pages each (each receiving critical feedback from professor); one thesis paper revision with critical feedback from professor and peers, including one letter of revision explaining the student's revision process; one keyword glossary where students develop rigorous definitions of course key terms; one roundtable discussion based on the final paper.
Difference, Power, and Equity Notes: This course focuses on anti-colonial struggles against European powers. Research will include the concept of "internal colonies" in the US.
Not offered current academic year

PHIL 343  (S)  What Philosophy Is: It's Methods, Aims and Values  (WS)
Put simply, metaphilosophy is reflection on the nature of philosophy: Can it be defined? How is it different from science? What are its distinct methods? Does philosophy yield knowledge? What role does the history of philosophy play in the discipline? Why read the history of philosophy? Unsurprisingly, philosophers have proffered a variety of answers to these questions, prompting one philosopher to remark, half-jokingly, that "there are as many definitions of philosophy as there are philosophers." Thus, Plato described the philosopher as "the one who beholds all Time and all Being." Wilfrid Sellars regarded as uncontroversial the view that it is "an attempt to see how things, in the broadest possible sense of the term, hang together in the broadest possible sense of the term." Critical theorists regard philosophy as social and ideology critique. Some understand its aim to be to answer normative questions about the nature of truth, justice, goodness and rationality. Finally, there are those who do not think philosophy can contribute much at all to answering such questions and others who question its claims to universality given its associations with colonialism, racism,
sexism, etc. In this tutorial we will read philosophical texts from a range of approaches in professional philosophy since the early 20th Century (Analytic, Pragmatist, Continental or European, and Public). Some of them explicitly engage meta-philosophical debates; others exemplify particular philosophical styles and methods. Our aim is to enrich our understanding of the discipline in order to evaluate its value and limitations.

Requirements/Evaluation: Evaluation will be based on the written work as well as the level of preparation and intellectual engagement in tutorial meetings. The professor will provide detailed comments on the first two papers, and all students have the option meeting with the professor after midterms to discuss strengths and areas they plan to work on in their final two papers.

Prerequisites: Two or three philosophy courses, or permission of instructor.

Enrollment Limit: 10

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: This is a tutorial. Students will write five 6-page papers and 2-3 page commentaries on alternate weeks. The instructor and the tutorial partner will comment extensively on each paper both orally and in writing. The aim of each tutorial meeting is enable the writer to imagine possible revisions.

Attributes: PHIL History Courses

PHIL 345 (S) Alienation

What does it mean to feel or to be alienated? Wanting things just because other people do? Not being able to identify with our social and political institutions? Or does it mean the narrowing of our activities, becoming workers who carry out tiny parts of broader processes that we can't see and that we can't control? How do ideas of alienation and meaninglessness have to do with ways that social life is organized -- with the capitalist economy, for one, but also with institutions like race and gender? This course traces different views of alienation and its critique that runs through Lukacs, Marx, Fanon, Kierkegaard, Rousseau, de Beauvoir and others. We'll also look at less conventional forms of alienation critique as part of our inquiry: Afrofuturist fiction by Octavia Butler, work on ornamentalism by Anne Anlin Cheng, and films like A Woman Under the Influence.

Requirements/Evaluation: Progressive writing assignments including: One argument reconstruction, One 6-8 page paper, commentaries on fellow student work, and one final 10-12 page paper.

Prerequisites: At least one prior philosophy course

Enrollment Limit: 19

Enrollment Preferences: Philosophy majors

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: PHIL Contemporary Value Theory Courses

PHIL 350 (S) Emotions

Philosophy is often described as thinking about thinking: variously conceived inquiries into the nature, scope and limits of human reasoning have always been at its heart. Without challenging the centrality of such projects for philosophy, this tutorial will focus on a less emphasized, but equally essential aspect of our lives: emotions. What are emotions, and how should we think about them? What is the proper ‘geography’--classification and analysis--of our emotions, and what is their relation to our somatic states, feelings, beliefs, judgments, evaluations and actions? Do we have any control over our emotions? Could we (individually and socially) educate and cultivate them? How are conscious and unconscious emotions related to a person's action, character, and her social world? In addressing these substantive questions, we will also consider which methodological approach--if a single one can be privileged--we should adopt for examining emotions. We will try to determine what is the scope and nature of an adequate theory of emotions, what are the desiderata for such a theory, and what should count as evidence in its favor. We will examine a variety of philosophical and
scientific theories of emotion, as well as some issues concerning normative aspects of emotions: the role of emotions in a good life, and the concept of emotional maturity.

**Requirements/Evaluation:** Class attendance, preparedness and participation; weekly meetings with the tutorial partner outside of the class; five lead papers (5-7 pages) and five short response papers (2-3 pages).

**Prerequisites:** two philosophy courses.

**Enrollment Limit:** 10

**Enrollment Preferences:** philosophy majors and prospective majors, then psychology majors.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**PHIL 358 (S) Reasoning and Inference: The Philosophy of Logic**  (WS)

This is a course in the philosophy of logic. What, you may ask, is the philosophy of logic? In a logic class, we think about how to represent ordinary language and thinking within formal systems and how to prove various things within these systems. In a philosophy of logic class, we think about what we are doing when we do logic. An example might be helpful. You are psyched to be reading this course description right now. At least, let's assume that you are for the sake of argument. A number of things follow from this happy assumption. Here are a few: (i) You are psyched. (ii) You are reading. (iii) You exist. (iv) It is possible that you are reading. (v) Either you are reading or you are a fish. In the first part of this course, we are going to focus on what this following-from business amounts to, and ask whether there is a special sense of following-from that characterizes logic? We will also try to get more precise in our understanding of some of the key concepts in logic, such as contradiction, consistency, logical consequence, syntax and semantics. In the second part of the course, we will turn to the fundamental questions concerning the status and structure of logic. Logic is sometimes called the study of reason. But, is logic the study of how people do reason, or is it the study of how people should reason? Against the first, people often don't seem to reason very well. On the other hand, if logic is about how we should reason, what makes it the case that we should reason one way rather than another? What makes a theorem of logic true? For that matter, what are logical theorems even about? Should we revise logic in light of empirical discoveries in, for example, physics or psychology? If so, what are the constraints on good revisions? Logicians and mathematicians have done a good deal of work developing extensions of and alternatives to classical logic. Some philosophers have wondered, however, whether the notion of an alternative logic is even coherent. We will end the course with a discussion of some of these alternatives. Among the authors we will read are: Aristotle, Frege, Russell, Quine, Kripke, Putnam, Field and Fine.

**Class Format:** There are likely to be video presentations of formal material. There may also be help sessions for problem sets.

**Requirements/Evaluation:** Students will write five tutorial papers and five response papers. In addition, they will revise one of these papers in light of comments from their partner and the instructor. Finally, there may be some problem sets to solidify understanding of formal material.

**Prerequisites:** Although not strictly necessary, a prior course in logic or discrete mathematics will be very helpful. In any case, some comfort with formal reasoning will be assumed as we will be going through an accelerated presentation of logical systems.

**Enrollment Limit:** 10

**Enrollment Preferences:** Philosophy majors. Students with a background and interest in formal reasoning.

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)  (WS)

**Writing Skills Notes:** Students will write 5 tutorial papers and 5 responses. The instructor and the respondent will attend both to the content and to the writing quality of the tutorial papers. Finally students will substantially revise one of their tutorial papers in consultation with the instructor.

**Attributes:** PHIL Contemp Metaphysics + Epistemology Courses

**PHIL 379 (S) American Pragmatism**

**Cross-listings:** PHIL 379 AMST 379

**Primary Cross-listing**
Along with jazz, pragmatism stands as the greatest uniquely American contribution to world culture. As the music wails in the background, we will study the classic pragmatists: William James, C. S. Peirce, and John Dewey. We will continue with the contemporary inheritors of the tradition: Cornel West, Richard Rorty, and Hilary Putnam. Although it has influenced both analytic and continental philosophy, pragmatism is a powerful third philosophical movement. Always asking what practical difference would it make, our authors investigate the central questions and disputes of philosophy, from epistemology and metaphysics to ethics and religion. Rather than seeing philosophy as an esoteric discipline, the pragmatic philosophers (with the possible exception of Peirce) see philosophy as integral to our culture and see themselves as public intellectuals.

**Requirements/Evaluation:** final paper, several short assignments

**Prerequisites:** at least two PHIL courses

**Enrollment Limit:** 25

**Enrollment Preferences:** Philosophy and American Studies majors, then seniors and juniors of any major

**Expected Class Size:** 12-15

**PHIL 390 (S) Discourse Dynamics (WS)**

**Cross-listings:** PHIL 390 COGS 390

**Secondary Cross-listing**

It'd be perfectly natural to say "I might've left the stove on", then check the stove, then say "I didn't leave the stove on". But perform those exact same steps in a different order--check the stove, say "I didn't leave the stove on", then say "I might've left the stove on"--and something's gone quite wrong. Conversation is dynamic--the back and forth exchange of information is a process that grows and adapts to the surrounding context. The order in which you say things matters, and it matters for what you communicate what actions you take and what events happen around you. In this course, we will investigate dynamic communicative phenomena and discuss competing theoretical explanations about how they're interpreted. Of particular interest will be the extent to which discourse dynamics are built into the meanings of linguistic expressions vs. the extent to which they're consequences of our rational cognition. Is a sentence's relation to previously uttered sentences similar to its relation to extra-linguistic events? How much inference goes into interpreting what's said? In pursuing the answers to these questions, we will discuss both classic and contemporary theories from philosophy and linguistics.

**Requirements/Evaluation:** Four short papers (3-4 pages), take-home midterm paper (5-7) pages, take-home final paper (6-8 pages)

**Prerequisites:** At least one philosophy or cognitive science course (any level), or permission of instructor.

**Enrollment Limit:** 19

**Enrollment Preferences:** Preference given to seniors and philosophy/cognitive science majors, then to students who have taken 200-Level Intro to Formal Linguistics

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

PHIL 390(D2) COGS 390(D2)

**Writing Skills Notes:** There will be four short papers (3-4 pages each) that will receive written comments on substance, argument structure, and writing style. These will be designed to include sections that, upon revision in light of comments, can be incorporated into the longer midterm and final papers (5-7 pages and 6-8 pages respectively). Students will be required to meet with the instructor before the midterm and final papers to discuss outlines and revisions of short papers.

The instructional Physical Education Program at Williams is an integral part of the student’s total educational experience. As a part of the liberal arts concept, the program develops the mind-body relationship, which is dependent upon the proper integration of physical and intellectual capacities. The main objective of the physical education program is to develop in each student an appreciation of physical fitness and wellness, and to expose them to a variety of activities that are suitable for lifetime participation.

Four credits of Physical Education represent one of the requirements for the College degree. There are five physical education units during the year. In the fall academic semester, there are two six-week physical education quarters. Winter Study is another unit, and there are two physical education quarters in the spring academic semester. Two different activities must be completed in the fulfillment of the requirement. Students must complete two physical education credits during the first year, all four physical education credits must be completed by the end of sophomore year if the student wishes to study abroad.

A schedule listing all courses offered is issued to every student before each quarter and Winter Study. Classes may vary according to availability of instructors and interest of students. More information can be found at athletics.williams.edu/physical-education.

The following courses are offered at various times during the year:

- Aqua Fitness
- Badminton
- Basketball
- Bicycling
- Boot Camp
- Bowling
- Canoeing
- Core and Conditioning
- Dance (African, Ballet, Modern)
- Diving
- Erg Fitness
- Figure Skating
- Futsol
- Golf
- Hiking
- Ice Climbing
- Kayaking
- Lifeguarding
- Lifetime Sports
- Mountain Biking
- Muscle Fitness
- Outdoor Living Skills
- Pickle Ball
- Pilates
- Rape Aggression Defense (RAD)
- Rock Climbing
- Rowing
Running
Skiing (Alpine and Cross Country)
Snowboarding
Snowshoeing
Soccer
Spinning
Squash

ASTRONOMY & ASTROPHYSICS (Div III)
Chair: Professor Jay Pasachoff

- Marek Demianski, Visiting Field Memorial Professor of Astronomy
- Kevin Flaherty, Lecturer in Astronomy and Observatory Supervisor; affiliated with: Astronomy, Physics
- Anne Jaskot, Assistant Professor of Astronomy and Associate of the Hopkins Observatory; affiliated with: Astronomy, Physics
- Protik K. Majumder, Barclay Jermain Professor of Natural Philosophy, Chair of Astronomy; affiliated with: Physics, Astronomy

How long will the Sun shine? How do we discover Earth-like planets among the many exoplanets circling other stars? How did the universe begin and how has it evolved over its 13.8-billion-year history? How do we detect not only light but also gravitational waves from afar? Astronomy is the science that asks and tries to answer questions like these. We have come a long way toward understanding what makes the sky appear as it does and how the Universe behaves. The Astronomy Department offers courses for anyone who is interested in learning about the Universe, and who would like to be able to follow new astronomical discoveries as they are made. All courses in Astronomy satisfy the Division III requirement. The Astronomy major and the Astrophysics major (administered jointly with the Physics Department) are described below.

The beginning astronomy courses are offered on two levels. Astronomy 101, 102, 104, and 330-range courses are intended primarily for non-science majors and have no prerequisite. Astronomy 111 is designed for students with some exposure to physics. It has a prerequisite of one year of high school physics or permission of the instructor, and a co-requisite of Mathematics 140 or equivalent background in calculus.

Most of the astronomy courses take advantage of our observational and computational facilities including a 24-inch computer-controlled telescope with sensitive electronic detectors, and our own computer network for image processing and data analysis. The Astronomy Department site can be found at astronomy.williams.edu.

ASTRONOMY MAJOR

The Astronomy major is designed for students with an interest in learning about many aspects of modern astronomy, but who do not choose to take the most advanced physics and math courses of the astrophysics major. It is also appropriate as a second major for students concentrating in another field; in particular, combining an Astronomy major with a related major like Geoscience or Computer Science has been a fruitful path for some of our students. The Astronomy major emphasizes understanding the observed properties of the physical systems that comprise the known Universe, from the Sun and solar system, to the evolution of stars and star clusters, to the Milky Way Galaxy, to external galaxies and clusters of galaxies. Because some knowledge of physics and calculus is necessary to understand many astronomical phenomena, the Astronomy major requires the first two semesters of the physics and calculus that are also required of Physics majors and Astrophysics majors.

There are several possible routes through the Astronomy major, depending on preparation and interest. Students considering a major in Astronomy should consult with members of the department early and often. A first-year student, if unsure about choosing between Astronomy and Astrophysics, may wish to take not only Astronomy 111 but also Physics 131, 141, or 151 and Mathematics 140 (if necessary) in the fall. Students who might place out of physics courses should read the section on placement under Physics.

Major Requirements for Astronomy

- Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond
- Two 200-level Astronomy courses (or additional 400-level Astronomy courses as substitutes)
- Two 400-level Astronomy courses
- Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement
- Physics 142 Foundations of Modern Physics or Physics 151 Seminar on Modern Physics
- Mathematics 140 Calculus II
- Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus OR equivalent placement

The total number of courses required for the Astronomy major is nine. A typical path through the major will begin with Physics 141, which is suitable for students with one year of high school physics and a background in calculus. However, students without high school physics may begin with Physics 131, and students entering with Advanced Placement in physics and/or math may obtain credit toward the major for the equivalent of Physics 142 and/or Mathematics 150 or 151 taken elsewhere. There are some aspects of astronomy that are closely related to chemistry or geosciences. In recognition of this, certain advanced courses in those departments can be accepted for credit toward the Astronomy major.
THE DEGREE WITH HONORS IN ASTRONOMY

The honors degree in Astronomy will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astronomy 493) and the winter study project (Astronomy 031). At the end of the winter study period, the department will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

ASTROPHYSICS MAJOR

The Astrophysics major is designed for students who want a rigorous introduction to the field, and includes not only those who plan graduate study in astronomy, astrophysics, or a closely related area, but also those interested in a wide variety of careers. Astrophysics alumni are not only astronomers but also computer scientists, geologists, teachers, doctors, lawyers, business school professors, and so on. In recent years, many astrophysics majors have had a second major in fields as wide ranging as mathematics, computer science, geosciences, economics, English, and art history. This major emphasizes the description of the Universe and its constituents in terms of physical processes. Potential Astrophysics majors should consult early with members of the Astronomy and Physics Departments to determine their most appropriate route through the major. An essential ingredient in such students' undergraduate training is experience in physics and mathematics. Therefore, the major normally will begin in the first year a student is at Williams with Physics 131, 141, or 151 and Mathematics 140 or 150 or 151 in the fall. Physics 141 is recommended for students with one year of high school physics and a background in calculus. Students with very good background placing them out of Physics 142 and out of Mathematics 140 may choose to take Physics 201 and Mathematics 150 or 151 instead. Astronomy 111 will often be taken in the fall of the sophomore year; however, many students take it in the fall of their first year at Williams, along with physics and math. Students who might place out of physics courses should read the section on placement under Physics; those who place out of Physics 131 or 141 into Physics 142 or 151 should particularly consider taking Astronomy 111 in the fall of their first year.

In addition to the major courses described below, other courses in geosciences, mathematics, and computer science may also be appropriate.

Major Requirements for Astrophysics

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond

Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement

Physics 142 Foundations of Modern Physics OR Physics 151 Seminar on Modern Physics

Physics 201 Electricity and Magnetism

Physics 202 Waves and Optics

Physics/Mathematics 210 Mathematical Methods for Scientists

Physics 301 Introductory Quantum Physics

Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus

Three 400-level astronomy courses OR two 400-level astronomy courses and one of the following:

Astronomy 211 Astronomical Observing and Data Analysis

Physics 302 Statistical Physics

Physics 402T Applications of Quantum Mechanics

Physics 405T Electromagnetic Theory
The total number of courses required for the Astrophysics major, an interdisciplinary major, is eleven. Students entering with Advanced Placement in physics and/or mathematics may obtain credit toward the major for the equivalent of Physics 141 and/or Mathematics 140 and/or 150 or 151 taken elsewhere, but at least 8 courses in astronomy, physics, and mathematics must be taken at Williams. There are some aspects of astrophysics that are closely related to chemistry or geosciences. In recognition of this relation, certain advanced courses in those departments can be accepted for credit toward the Astrophysics major on a two-for-one basis. It is not possible to double major in Astrophysics and Physics.

THE DEGREE WITH HONORS IN ASTROPHYSICS

The honors degree in Astrophysics will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy or Physics. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astrophysics 493) and the winter study project (Astrophysics 031). At the end of the winter study period, the departments will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The departments will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chairs as early as possible.

STUDY ABROAD

FAQ

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. PHYS 301, a required course for the Astrophysics major, is only taught in the fall, and is difficult to replicate abroad, especially regarding the lab component.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.
ASTR 101  (F)  Stars: From Suns to Black Holes

Looking at the Sun and the sky at night have you ever wondered why they are shining and what they are made of? Do they evolve and if so how do they change? The last decade has brought exciting new astronomical discoveries. For the first time a gravitational wave signal produced by merging of two black holes has been detected. The gravitational wave antennas detected the merger of two neutron stars which also caused flashes throughout the whole electromagnetic spectrum from radio waves to very energetic gamma rays. We now know that most of the heavy elements that exist in nature were formed during mergers of neutron stars. Large telescopes, new detectors, and new observational techniques have also made possible the discovery of thousands of exoplanets. The recently launched James Webb telescope is discovering galaxies that were formed soon after the Big Bang and is observing atmospheres of exoplanets to search for possible signs of life. Here on Earth, there is soon to be total solar eclipse that will be visible in the Southern and North-Eastern parts of the US on April 8, 2024. In this course, to help you appreciate and better understand the continuous stream of astronomical discoveries, we will discuss the basic methods and instruments used in astronomical observations, but also discuss what is happening at the centers of stars and how they evolve and why some stars explode and form neutron stars and black holes.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester.

Requirements/Evaluation: two hour tests, a final exam, an observing portfolio, and lab reports

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first enrolled

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course

Distributions: (D3)

Fall 2023

LEC Section: 01  MR 1:10 pm - 2:25 pm  Marek Demianski
LAB Section: 02  T 1:00 pm - 2:30 pm  Kevin Flaherty
LAB Section: 03  T 2:30 pm - 4:00 pm  Kevin Flaherty
LAB Section: 04  W 1:00 pm - 2:30 pm  Kevin Flaherty
LAB Section: 05  W 2:30 pm - 4:00 pm  Kevin Flaherty

ASTR 102  (S)  Our Solar System and Others

What makes Earth different from all the other planets? What have NASA's Curiosity and Perseverance on Mars (with their alumni/ae participation!) found about that planet's past running water and suitability for life? How has knowledge about Pluto and Arrokoth beyond it been transformed by NASA's flybys and the associated ground-based studies with which Williams College faculty and students participated? Will asteroids or comets collide with the Earth again? What is a solar eclipse like and how do we prepare for the April 8, 2024, totality? What do we learn from the rare transits of Mercury and of Venus that Williams faculty and students have studied? What may the new James Webb Space Telescope reveal about exoplanets and their atmospheres? Astronomy 102, a non-major, general introduction to the part of contemporary astronomy that comprises the study of the solar system (and the systems of planets around other stars), will provide answers to these questions and more. We will cover the historical development of humanity's understanding of the solar system, examining contributions by Aristotle, Ptolemy, Copernicus, Galileo, Kepler, Newton, Einstein, and others. We will discuss the discovery of over 4000 exoplanets around stars other than the Sun. The course gives special attention to exciting discoveries of the past few years by space probes and by the Hubble Space Telescope and the Kepler/K2/TESS missions, as well as plans and hopes for NASA's James Webb Space Telescope (which launched in December 2021). We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 101 (stars and stellar evolution) and 104 (galaxies and cosmology), and students who have taken those courses are welcome.

Class Format: lecture (three hours per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observing TAs will be available for consultation, in addition to the instructors, throughout the semester.
ASTR 104  (S)  The Milky Way Galaxy and the Universe Beyond

How was the Universe created, and how has it evolved to its presently observed structure? This course will start at the Big Bang, the beginning of everything, and move forward from there. About five centuries ago Galileo Galilei used his own primitive telescope to make many astronomical discoveries: observing the moons of the Jupiter, craters on the Moon, and Sun spots to name a few. Galileo also noticed that stars are not spread on the celestial sphere at random but form a disk like structure, which we now call the Milky Way Galaxy -- our cosmic home. Almost a hundred years ago Edwin Hubble discovered that the Universe contains many galaxies and that they are moving away from each other. Hubble discovered that the Universe -- the largest physical object -- expands, so it had a beginning. In this course we will explore the tools and techniques that astronomers use to study stars and galaxies. From the discovery of the Milky Way to the expanding Universe, we will cover the key concepts and discoveries that have shaped our understanding of the cosmos. During recent decades astronomers have made exciting -- and unsettling -- new discoveries: it turns out that most of matter in the Universe does not emit light and most probably is composed of particles of unknown origin, and that the expansion of the Universe is now accelerating, pushed by a mysterious dark energy. At this point, astronomers have evidence to show that at early epochs the Universe was very dense and very hot. This early epoch is called the Big Bang. How the Big Bang happened is not known yet but there are several interesting hypotheses that our Universe could be one of many. This course will introduce important highlights in the observation and interpretation of remarkable astronomical phenomena and explore these many mysteries.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester. Current astronomical discoveries will be discussed at the beginning of each class and by email throughout the semester.

ASTR 107  (F)  Astrobiology

Cross-listings:  GEOS 107 ASTR 107

Secondary Cross-listing
Astrobiology is the study of the origin, evolution, and distribution of life in the universe. As such it is an inherently interdisciplinary field, incorporating all of the basic natural sciences: biology, chemistry, physics, astronomy, and the earth sciences, as well as aspects of philosophy, sociology, and engineering. Questions we will seek answers to in this class include: How, why, when, and where did life evolve on Earth, and what does that tell us about how it might evolve elsewhere? What are the chances that there is life on other planets and moons in our solar system, and why? Are there habitable planets elsewhere in the universe, and will we ever truly know if any of them contain life? We will approach these questions using a combination of lectures, activities, labs, homework assignments, and visits from some of the country’s leading Astrobiology researchers. Examples of lab and homework activities include exploring our definition of life by making observations about living and non-living systems, examining evidence for ancient habitable environments in rocks, and modeling chemical fingerprinting tools used by Mars rovers. Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will present a mock NASA mission proposal. This course requires no previous experience in the sciences. This course is in the Sediments and Life group for the Geosciences major.

Class Format: Lectures will be partially flipped with student responsible for watching videos before class; class time will be split between short lectures, small group activities, and class discussions. Lab groups will meet in person every other week and have group project work on alternate weeks that may be done virtually or in person.

Requirements/Evaluation: Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will present a mock NASA mission proposal.

Prerequisites: none

Enrollment Limit: 46

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 46

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course counts towards the GEOS Group B Electives - Sediments and Life

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:
GEOS 107(D3) ASTR 107(D3)

Attributes: GEOS Group B Electives - Sediments + Life

ASTR 111  (F)  Introduction to Astrophysics  (QFR)

The science of astronomy spans vast scales of space and time, from individual atoms to entire galaxies and from the universe’s beginning to the future fate of our Sun. In this course, we will survey some of the main ideas in modern astrophysics, with an emphasis on the physics of stars and galaxies. ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the other sciences or mathematics and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include gravity and orbits, radiation laws and stellar spectra, physical characteristics of the Sun and other stars, star formation and evolution, black holes, galaxies, the expanding universe, and the Big Bang. Students will also use telescopes to observe stars, nebulae, planets, and galaxies and to make daytime observations of the Sun.

Class Format: The class has 6 afternoon labs. Nighttime observing sessions will occur throughout the semester.

Requirements/Evaluation: weekly problem sets, two hour-long tests, a final exam, lab reports, and an observing portfolio

Prerequisites: a year of high school Physics, concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

Enrollment Limit: 28

Enrollment Preferences: potential Astronomy majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course requires regular problem sets and quantitative assignments. The course will emphasize how physical equations explain the observed properties of the universe.

Fall 2023
ASTR 211 (S) Astronomical Observing and Data Analysis (QFR)

How do astronomers make scientific measurements for objects that are light-years away from Earth? This course will introduce the basics of telescopes and observations and will give students hands-on training in the techniques astronomers use to obtain, process, and analyze scientific data. We will discuss observation planning, CCD detectors, signal statistics, image processing, and photometric and spectroscopic observations. We will begin by focusing on ground-based optical observations and will move on to non-optical observations, both electromagnetic (e.g., radio waves, X-rays) and non-electromagnetic (e.g., gravitational waves, neutrinos). Throughout the course, students will use computational techniques to work with real astronomical data, taken with our 24" telescope and from data archives.

Class Format: discussion, computer lab work, and observing

Requirements/Evaluation: weekly problem sets, lab work, and observing projects

Prerequisites: MATH 150 or 151; prior experience with Unix and computer programming is helpful, but not required

Enrollment Limit: 14

Enrollment Preferences: Astronomy or Astrophysics majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course requires regular problem sets. Labs require computer programming and statistical and graphical analyses of data.

Spring 2024

LECT 01    TR 11:20 am - 12:35 pm    Marek Demianski
LAB 02    M 1:10 pm - 4:00 pm    Kevin Flaherty
LAB 03    R 1:10 pm - 4:00 pm    Kevin Flaherty

ASTR 240 (F) Great Astronomers and Their Original Publications (WS)

Cross-listings: STS 240 ASTR 240 LEAD 240

Primary Cross-listing

In this course we will study some of the greatest figures in astronomy and consider their leadership in advancing progress in the field. We will consider their lives and works, especially as represented by original copies of their books and other publications. These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; Dialogo, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619, Rudolphine Tables 1627); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (Principia Mathematica: laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (Miscellanea curiosa, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble’s law, 1929); George Ellery Hale (Mt. Wilson Observatory 100” telescope, 1917; Palomar Observatory 200” telescope, 1948), Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe’s expansion rate, 2000s). First editions will be available in Williams’ Chapin Library of rare books, where we will meet in an adjacent classroom. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the Gutenberg Bible (c. 1453) and a Shakespeare First Folio (1623, with a discussion of astronomical references in Shakespeare’s plays). The course will be taught in collaboration between an astronomer and a rare-books librarian, with remote lectures by experts from around the world.

Class Format: Meeting on campus in the Chapin Library classroom (Sawyer 452)

Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper; student choice of additional readings from a provided reading list

Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: if overenrolled, preference by written paragraph of explanation of why student wants to take the course
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
STS 240(D3) ASTR 240(D3) LEAD 240(D3)
Writing Skills Notes: Comments on submitted papers will aid in writing skills
Attributes: LEAD Facets or Domains of Leadership
Not offered current academic year

ASTR 317 (S) Current topics in Planetary Geology (WS)
Cross-listings: ASTR 317 GEOS 317
Secondary Cross-listing
We will look in detail at geological processes on rocky and icy bodies of the Solar System. Each week will have a specific theme, and students will read a series of scientific articles on that topic. The readings will form the basis for writing and discussion. Areas to be investigated may include ice ages on Mars, the origin of Earth's moon, tectonics on Venus, chaos terrain on Europa, geysers on Enceladus, cryovolcanism on Triton, methane lakes on Titan, the viability of mining in the Asteroid Belt, and the prospects for life on other worlds. This course is in the Solid Earth group for the Geosciences major.
Class Format: Students meet with the professor weekly, in pairs, with one student writing each week and the other critiquing; and both engaging in detailed discussion of the readings.
Requirements/Evaluation: Evaluation is based on written papers, critiques, and discussion.
Prerequisites: GEOS/ASTR 217 (Planets and Moons); OR any two courses at 200-level or higher in Geosciences and/or Astronomy; OR permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Geosciences and Astronomy majors and prospective majors
Expected Class Size: 6
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
ASTR 317(D3) GEOS 317(D3)
Writing Skills Notes: This tutorial-style course focuses on writing, with 6 papers (5-7 pages) written bi-weekly throughout the semester, and partner critiques in alternate weeks.
Attributes: GEOS Group C Electives - Solid Earth
Not offered current academic year

ASTR 330 (S) The Nature of the Universe
This course is a journey through space and time from the first fractions of a second after the Big Bang to the ultimate fate of the Universe billions of years into the future. Topics include the Big Bang and its remnant cosmic background radiation, cosmic inflation, conditions during the first three minutes, creation of the elements, stellar and galactic black holes, relativity, the detection of gravitational waves, galaxies and quasars, dark matter, and the formation of the large-scale structure of the Universe. We will explore current ideas about the fate of our Universe, including the acceleration of its expansion, and its implications for the end of time. Finally, we will consider the fantastic but serious theoretical proposal that ours is but one of countless universes existing within a multiverse.
Class Format: lecture/discussion, three hours per week
Requirements/Evaluation: two midterm exams, a small observing portfolio, occasional quizzes, and a final exam
Prerequisites: none
Enrollment Limit: 48
Enrollment Preferences: open only to juniors and seniors; closed to students who have taken or are taking ASTR 104, and closed to ASTR, ASPH, and PHYS majors; preference given to seniors
Expected Class Size: 25
Grading: yes pass/fail option, no fifth course option
Unit Notes: non-major course; course in the 33X sequence are meant as general education courses for students in all majors
Distributions: (D3)

**ASTR 402 (F)between the Stars: The Interstellar Medium (QFR)**

The matter between the stars—the interstellar medium—tells the story of the evolution of galaxies and the stars within them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject as they evolve, and to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars' nuclear fusion. Interpreting the emission from this interstellar gas is one of astronomers' most powerful tools to measure the physical conditions, motions, and composition of our own galaxy and others. In this course we will study the interstellar medium in its various forms, from cold, dense, star-forming molecular clouds to X-ray-emitting bubbles formed by supernovae. We will learn about the physical mechanisms that produce the radiation we observe, including radiative ionization and recombination, collisional excitation of "forbidden" lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. Finally, we will discuss the evolution of interstellar material in galaxies across cosmic time. This course is observing-intensive. Throughout the semester, students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium taken using the rooftop telescope.

Class Format: Tutorial meetings will be scheduled with the professor. Students will also complete observing projects using the rooftop telescope.

Requirements/Evaluation: student's papers, responses to the partner's papers, and observing projects
Prerequisites: ASTR 111 and PHYS 201 or permission of instructor

fall 2023

TUT Section: T1 TBA Anne Jaskot

**ASTR 404 (S) Unsolved Problems in Galaxy Evolution**

In this tutorial, we will learn about galaxies and their evolution by focusing on some of the key mysteries astronomers are trying to solve. Questions may include: How do galaxies turn their gas supply into stars? Is there a universal initial mass function for star formation? What is the origin of multiple stellar populations in globular clusters? Why do some galaxies cease star formation? Which galaxies reionized the universe? We will discuss the nature of each unsolved problem, debate the theories proposed to answer it, and consider how future progress might be made.

Requirements/Evaluation: student's papers, responses to the partner's papers, and problem sets
Prerequisites: ASTR 111 and PHYS 142 or 151 or permission of instructor

Enrollment Limit: 10
Enrollment Preferences: Juniors and Seniors
Expected Class Size: 6
Grading: no pass/fail option, no fifth course option
A star is a very interesting, very complicated physical object. Properties of stars and their evolutionary paths depend on an intricate interplay of different physical phenomena with gravity, nuclear interactions, radiation processes and even quantum and relativistic effects playing important roles. Using basic physics we will construct simple models of stars and discuss their evolution, concentrating on the key physical processes that play the dominant role at different evolutionary stages. We will discuss late stages of stellar evolution and concentrate on the basic properties of three possible remnants: white dwarfs, neutron stars and black holes. Radio and X-ray pulsars, supernovae including Type Ia and Gamma Ray Bursts will be discussed as well as observational confirmation of existence of black holes. We will explore extreme conditions existing near neutron stars and black holes and discuss their astrophysical consequences. We will also discuss the recent exciting detection of gravitational waves by the LIGO/VIRGO laser interferometric detectors.

Class Format: discussion three hours per week
Requirements/Evaluation: classroom participation, homework assignments, a midterm exam and a final exam
Prerequisites: PHYS 201 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: physics, astrophysics, and astronomy majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

ASTR 493 (F) Senior Research: Astronomy
An original experimental or theoretical investigation is carried out under the direction of a faculty member in Astronomy, as discussed under the heading of the degree with honors in Astronomy above. This is part of a full-year thesis (493-494).
Prerequisites: permission of department
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

ASTR 494 (S) Senior Research: Astronomy
An original experimental or theoretical investigation is carried out under the direction of a faculty member in Astronomy, as discussed under the heading of the degree with honors in Astronomy above. This is part of a full-year thesis (493-494).
Prerequisites: permission of department
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
An original experimental or theoretical investigation is carried out under the direction of a faculty member in Astronomy or Physics, as discussed under the heading of the degree with honors in Astrophysics above.

**Prerequisites:** permission of department

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

Not offered current academic year

**ASTR 496 (S) Senior Research: Astrophysics**

**Cross-listings:** PHYS 496 ASTR 496

Fall 2023
LEC Section: 01  F 2:35 pm - 3:50 pm  David R. Tucker-Smith

Spring 2024
LEC Section: 01  F 2:35 pm - 3:50 pm  David R. Tucker-Smith
What is light? How does a laser work? What is a black hole? What are the fundamental building blocks of the universe? Physics majors and Astrophysics majors study these and related questions to understand the physical world around us, from the very small to the very large. A physics student practices the experimental methods used to learn about this world and explores the mathematical techniques and theories developed to explain these physical phenomena. A Physics major or Astrophysics major serves as preparation for further work in physics, astrophysics, applied physics, other sciences, engineering, medical research, science teaching and writing, and other careers involving critical thinking, problem-solving, and insight into the fundamental principles of nature.

ASTROPHYSICS MAJOR
The Physics Department, in cooperation with the Astronomy Department, offers a major in Astrophysics. More information about the Astrophysics major can be found on the Astronomy Department site.

PHYSICS MAJOR

Introductory Courses
Students considering a major in physics should take both physics and mathematics as first-year students. Students typically begin with Physics 141 and Mathematics 150 or 151 (multivariable calculus); students who wish to begin with Physics 131 should consult with the department.

Physics 131 Introduction to Mechanics. This is designed as a first course in physics. It is suitable for students who either have not had physics before or have had some physics but are not comfortable solving “word problems” that require calculus.

Physics 141 Mechanics and Waves. Students in this course should have solid backgrounds in science and calculus, either from high school or college, including at least a year of high school physics.

The Department of Mathematics will place students in the appropriate introductory calculus course. The physics major sequence courses all make use of calculus at increasingly sophisticated levels. Therefore, students considering a Physics major should continue their mathematical preparation without interruption through the introductory calculus sequence (Mathematics 130, 140, and 150 or 151). Students are encouraged to take Physics 210 as early as possible.

ADVANCED PLACEMENT
Students with unusually strong backgrounds in calculus and physics may place out of Physics 141 and either: 1) begin with the special seminar course Physics 151 in the fall (typically followed by Physics 210 in the spring), or 2) begin with Physics 142 in the spring (possibly along with Physics 210). Students may take either 151 or 142 but not both. On rare occasions a student with an exceptional background will be offered the option of enrolling in Physics 201.

Placement is based on AP scores, consultation with the department, and results of a placement exam administered during First Days. The exam can also be taken later in the year by arrangement with the department chair. The exam covers classical mechanics, basic wave phenomena, and includes some use of calculus techniques.

REQUIREMENTS FOR THE MAJOR
A total of ten courses, nine in physics and one in mathematics, are required to complete the Physics major.

Required Physics Sequence Courses (7)
Physics 141 Mechanics and Waves  
Physics 142 Foundations of Modern Physics  
or Physics 151 Seminar in Modern Physics  
Physics 201 Electricity and Magnetism  
Physics 202 Waves and Optics  
Physics 210 Mathematical Methods for Scientists  
Physics 301 Quantum Physics  
Physics 302 Statistical Mechanics and Thermodynamics  

Required Mathematics Course (1)  
Mathematics 150 or 151 Multivariable Calculus  

Students entering with Advanced Placement in mathematics may obtain credit toward the major for the equivalent Mathematics 150 or 151 taken elsewhere.

Elective Courses (2)  
At least two more physics courses above the 100 level (or other approved courses as noted below) must be taken, bringing the total number of courses for the major to ten.  

Students who place out of Physics 141 must substitute one additional elective course, for a total of ten courses.  

Students who place out of both Physics 141 and 142 and begin their studies in Physics 201 must substitute one additional elective course, for a total of nine courses.  

Options  
• Mathematics 209 or 309 may substitute for Physics 210.  
• Astronomy 111 may count in place of Physics 141 if a student places out of 141 (see “advanced placement” above).  
• An additional Astronomy or Astrophysics course above the introductory level that is acceptable for the astrophysics major may be counted.  
• Two approved Division III courses may be substituted for one Physics course. Approval is on an individual basis at the discretion of the department chair.  
• Honors work is in addition to completion of the basic major so Physics 493 and 494 do not count towards the ten courses in the major.

PREPARATION FOR ADVANCED STUDY  
Students who wish to do graduate work in physics, astrophysics, or engineering should elect courses in both physics and mathematics beyond the minimum major requirements. The first-year graduate school curriculum in physics usually includes courses in quantum mechanics, electromagnetic theory, and classical mechanics that presuppose intermediate level study of these subjects as an undergraduate. Therefore, students planning graduate work in physics should elect all of the following courses:  
Physics 402T Applications of Quantum Mechanics  
Physics 405T Electromagnetic Theory  
Physics 411T Classical Mechanics  

ADVISING  
Both majors and non-majors are encouraged to consult with the department chair or course instructors about course selections or other matters.

THE DEGREE WITH HONORS IN PHYSICS  
The degree with honors in Physics will be awarded on the basis of a senior thesis presenting the results of a substantial experimental or theoretical investigation carried out under the direction of a faculty member in the department. There is no rigid grade point average required for admission to the program or for the awarding of the degree with honors, but it is normally expected that honors students will maintain at least a B average in physics and mathematics. Students will normally apply for admission to the program early in the spring of their junior year and during senior year these students will normally elect Physics 493, W31, and 494 in addition to the usual requirements for the major. At the end of winter study, the
department will decide whether the student will be admitted to honors candidacy. Both a written thesis and a colloquium presentation of the results are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill them with unusually high distinction.

Honors candidates will also be required to attend departmental colloquium talks.

STUDY ABROAD

The physics community is international in scope and a career in physics (or a related field) can provide many opportunities for travel and contact with individuals from outside the United States. The physics major at Williams is a carefully structured four-year program designed to prepare students who are so inclined for graduate study at leading research institutions. While it is possible to complete the major requirements in three years, such a major will not usually not lead to further study in the field. With careful early planning on the part of a student, and close consultation with the department chair, it is possible to complete a strong major and still study abroad provided the foreign institution can provide courses which reasonably substitute or supplement those in the Williams major program. Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Here are answers to frequently asked questions related to study abroad:

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. The laboratory component of Physics 301 serves as our “advanced lab course.” Students often cannot get equivalent experience abroad and must take this when they return senior year (non-credit). Unless there has been a recent change, our own Oxford Program is one place students cannot get lab experience.

OPTIONS FOR NON-MAJORS

Many students want to take a self-contained and rigorous full-year survey of physics. For such students, the most appropriate sequence will be either Physics 131 or Physics 141 followed by Physics 132, depending on the student’s background in science and mathematics (see Introductory Courses above). Either of these sequences satisfies the physics requirement for medical school.

The department also offers one-semester courses designed for non-majors, including Physics 107, Physics 108, and Physics 109.

PHYS 108 (F) Energy Science and Technology (QFR)

Cross-listings: ENVI 108 PHYS 108

Primary Cross-listing

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating and lighting, and energy storage. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.
**Course Information**

**Class Format:** twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours

**Requirements/Evaluation:** weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative

**Prerequisites:** high school physics, high school chemistry, and mathematics at the level of MATH 130

**Enrollment Limit:** 20

**Enrollment Preferences:** non-physics majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Attributes:** ENVI Natural World Electives

**Quantitative/Formal Reasoning Notes:** problems sets, exams, and projects will all have a quantitative aspects.

**Not offered current academic year**

**Course Description**

**PHYS 109 (S) Sound, Light, and Perception (QFR)**

Light and sound allow us to perceive the world around us, from appreciating music and art to learning the details of atomic structure. Because of their importance in human experience, light and sound have long been the subject of scientific inquiry. How are sound and light related? How do physiology and neural processing allow us to hear and see the world around us? What are the origins of color and musical pitch? This course introduces the science and technology of light and sound to students not majoring in physics. We will start with the origins of sound and light as wave phenomena, and go on to topics including color, the optics of vision, the meaning of musical pitch and tone, and the physical basis of hearing. We will also discuss some recent technological applications of light, such as lasers and optical communications. The class will meet for two 75-minute periods each week for a variable mixture of lecture, discussion, and hands-on, interactive experiments.

**Class Format:** The two weekly class sections will be located in a space suitable for both lecture and hands-on laboratory-style work

**Requirements/Evaluation:** class participation, problem sets, in-class midterm, oral presentations, and a final exam, all with a quantitative component

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** non-science majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This class will have frequent problem sets requiring substantial quantitative reasoning

**PHYS 131 (F) Introduction to Mechanics (QFR)**

We focus first on the Newtonian mechanics of point particles: the relationship between velocity, acceleration, and position; the puzzle of circular motion; forces, Newton's laws, and gravitation; energy and momentum; and the physics of vibrations. Then we turn to the basic properties of waves, such as interference and refraction, as exemplified by sound and light waves. We also study the optics of lenses, mirrors and the human eye. This course is not intended for students who have successfully completed an AP physics course in high school.

**Requirements/Evaluation:** exams, labs, and weekly problem sets, all of which have a substantial quantitative component

**Prerequisites:** MATH 130; students who scored 4 or 5 on an AP physics exam, or 6 or 7 on the IB Physics HL exam may not take this course and are encouraged to take PHYS 141 instead

**Enrollment Limit:** 30

**Enrollment Preferences:** seniority
Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

Unit Notes: PHYS 131 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This class will have weekly problem sets requiring substantial quantitative reasoning

Fall 2023

LEC Section: 01  MWF 11:00 am - 11:50 am  John H. Lacy
LAB Section: 02  M 1:00 pm - 4:00 pm  Brough Morris
LAB Section: 03  T 1:00 pm - 4:00 pm  Brough Morris

PHYS 132  (S) Electromagnetism and the Physics of Matter (QFR)
This course is intended as the second half of a one-year survey of physics with some emphasis on applications to medicine. In the first part of the semester we will focus on electromagnetic phenomena. We will introduce the concept of electric and magnetic fields and study in detail the way in which electrical circuits and circuit elements work. The deep connection between electric and magnetic phenomena is highlighted with a discussion of Faraday's Law of Induction. Following our introduction to electromagnetism we will discuss some of the most central topics in twentieth-century physics, including Einstein's theory of special relativity and some aspects of quantum theory. We will end with a treatment of nuclear physics, radioactivity, and uses of radiation.

Class Format: lecture three hours per week, laboratory three hours approximately every other week, and conference section 1 hour approximately every other week

Requirements/Evaluation: weekly problem sets, labs, quizzes and exams

Prerequisites: PHYS 131 or 141 or permission of instructor, and MATH 130 (formerly 103)

Enrollment Limit: 22 per lab

Enrollment Preferences: sophomores

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Significant homework, exams, quizzes requiring mathematical and physical reasoning.

Spring 2024

LEC Section: 01  MWF 11:00 am - 11:50 am  Protik K. Majumder
LAB Section: 02  M 1:00 pm - 4:00 pm  Catherine Kealhofer
LAB Section: 03  T 1:00 pm - 4:00 pm  Catherine Kealhofer

PHYS 141  (F) Mechanics and Waves (QFR)
This is the typical first course for a prospective physics major. It covers most of the same topics as PHYS 131, but with a higher level of mathematical sophistication. It is intended for students with solid backgrounds in the sciences, either from high school or college, who are comfortable with basic calculus.

Class Format: lecture, three hours per week; laboratory, three hours approximately every other week; conference section, 1.5 hours approximately every other week

Requirements/Evaluation: weekly problem sets, labs, two 1-hour exams, and a final exam, all of which have a substantial quantitative component

Prerequisites: High school physics (strongly recommended) and MATH 130 or equivalent placement, or permission of the instructor. High school physics at the AP, IB, or equivalent level is neither required nor expected.

Enrollment Limit: 24 per lab

Enrollment Preferences: first-year students and science majors
Physics 141 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course consists of lectures, problem-solving conferences, lab exercises, problem sets and exams, all of which have a substantial quantitative component.

Fall 2023
LEC Section: 01 MWF 11:00 am - 11:50 am Katharine E. Jensen
LAB Section: 02 M 1:00 pm - 4:00 pm Katharine E. Jensen
LAB Section: 03 T 1:00 pm - 4:00 pm Katharine E. Jensen

Physics 142 (S) Foundations of Modern Physics (QFR)
Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity, which extends physics into the realm of high speeds and high energies, requires us to rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our expectation of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system.
This course will survey ideas from each of these three arenas, and can serve either as a terminal course for those seeking to complete a year of physics or as the basis for future advanced study of these topics.

Class Format: lecture, three hours weekly; laboratory, 2-3 hours most weeks, alternating between ‘hands-on’ sessions and problem-solving/discussion sessions

Requirements/Evaluation: weekly homework, labs, two hour tests, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 141 and MATH 130, or equivalent; PHYS 131 may substitute for PHYS 141 with the permission of instructor; students may not take both PHYS 142 and PHYS 151

Enrollment Limit: 14/L

Enrollment Preferences: first-year students

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Heavily problem-solving focused, involving algebraic manipulations, single-variable calculus, generating and reading graphs, etc.

Spring 2024
LEC Section: 01 MWF 11:00 am - 11:50 am Graham K. Giovanetti
LAB Section: 02 M 1:00 pm - 4:00 pm Graham K. Giovanetti
LAB Section: 03 T 1:00 pm - 4:00 pm Graham K. Giovanetti

Physics 151 (F) Seminar in Modern Physics (QFR)
Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity has extended physics into the realm of high speeds and high energies and requires us to rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our notions of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system. This course covers the same core material as PHYS 142 but in a small seminar format for students with strong prior preparation in physics.

Class Format: lecture/discussions plus one 3-hour lab per week

Requirements/Evaluation: class participation, weekly lab assignments, weekly problem sets, exams
**Prerequisites:** placement by the department (see "advanced placement" section in the description about the department). Students may take either PHYS 142 or PHYS 151 but not both

**Enrollment Limit:** 18

**Enrollment Preferences:** first-years

**Expected Class Size:** 16

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** this is a small seminar designed for first-year students who have placed out of PHYS 141

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** all assignments in the course have a substantial quantitative component

---

**PHY 201 (F) Electricity and Magnetism (QFR)**

The classical theory of electricity and magnetism is very rich yet it can be written in a remarkably succinct form using Maxwell's equations. This course is an introduction to electricity and magnetism and their mathematical description, connecting electric and magnetic phenomena via the special theory of relativity. Topics include electrostatics, magnetic fields, electromagnetic induction, DC and AC circuits, and the electromagnetic properties of matter. The laboratory component of the course is an introduction to electronics where students will develop skills in building and debugging electrical circuits.

**Class Format:** lecture, three hours per week; laboratory, three hours per week

**Requirements/Evaluation:** problem sets, labs/conference section assignments, two take-home midterms, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 142 OR 151; MATH 150 or 151; with a preference for MATH 151

**Enrollment Limit:** 10 per lab

**Enrollment Preferences:** prospective physics majors, then by seniority

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This course involves significant problem-solving and mathematical analysis of phenomena using calculus, numerical methods, and other quantitative tools.

---

**PHY 202 (S) Vibrations, Waves and Optics (QFR)**

Waves and oscillations characterize many different physical systems, including vibrating strings, springs, water waves, sound waves, electromagnetic waves, and gravitational waves. Quantum mechanics even describes particles with wave functions. Despite these diverse settings waves exhibit several common characteristics, so that the understanding of a few simple systems can provide insight into a wide array of phenomena. In this course we begin with the study of oscillations of simple systems with only a few degrees of freedom. We then move on to study transverse and longitudinal waves in continuous media in order to gain a general description of wave behavior. The rest of the course focuses on electromagnetic waves and in particular on optical examples of wave phenomena. In addition to well known optical effects such as interference and diffraction, we will study a number of modern applications of optics such as short pulse lasers and optical communications. Throughout the course mathematical methods useful for higher-level physics will be introduced.

---

---
Class Format: lecture, three hours per week; laboratory, three hours per week

Requirements/Evaluation: problem sets, labs, midterm examinations, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 201; co-requisite: PHYS/MATH 210 or MATH 209 or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: sophomores

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course has substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Spring 2024

LEC Section: 01  MWF 10:00 am - 10:50 am  Charlie Doret

LAB Section: 02  W 1:00 pm - 4:00 pm  Charlie Doret

PHYS 210  (S)  Mathematical Methods for Scientists  (QFR)

Cross-listings: PHYS 210 MATH 210

Primary Cross-listing

This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. An optional session in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: three hours per week

Requirements/Evaluation: several exams and weekly problem sets, all of which have a substantial quantitative component

Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

Enrollment Limit: 50

Enrollment Preferences: sophomores and juniors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

PHYS 210(D3) MATH 210(D3)

Quantitative/Formal Reasoning Notes: This course will have weekly problem sets using advanced calculus methods

Spring 2024

LEC Section: 01  TR 9:55 am - 11:10 am  Frederick W. Strauch

PHYS 301  (F)  Quantum Physics  (QFR)

This course serves as a one-semester introduction to the formalism, and phenomenology of quantum mechanics. After a brief discussion of historical origins of the quantum theory, we introduce the Schrodinger wave equation, the concept of matter waves, and wave-packets. With this introduction as background, we will continue our discussion with a variety of one-dimensional problems such as the particle-in-a-box and the harmonic oscillator. We then extend this work to systems in two and three dimensions, including a detailed discussion of the structure of the hydrogen atom. Along the way we will develop connections between mathematical formalism and physical predictions of the theory. Finally, we conclude the course with a discussion of angular momentum and spins, with applications to atomic physics, entanglement, and quantum information.
Class Format: lecture, three hours per week; laboratory, three hours per week

Requirements/Evaluation: weekly problem sets, laboratory reports / write-ups, a midterm exam, and final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 309

Enrollment Limit: 20

Enrollment Preferences: physics majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: Phys 301 relies heavily upon mathematics and quantitative reasoning in all elements, including problem sets, examinations, and laboratories.

LAB Section: 03 T 1:00 pm - 4:00 pm John H. Lacy

PHYS 302 (S) Statistical Mechanics & Thermodynamics (QFR)
Macroscopic objects are made up of huge numbers of fundamental particles interacting in simple ways--obeying the Schrödinger equation, Newton's and Coulomb's Laws--and these objects can be described by macroscopic properties like temperature, pressure, magnetization, heat capacity, conductivity, etc. In this course we will develop the tools of statistical physics, which will allow us to predict the cooperative phenomena that emerge in large ensembles of interacting particles. We will apply those tools to a wide variety of physical questions, including the behavior of gases, polymers, heat engines, biological and astrophysical systems, magnets, and electrons in solids.

Class Format: lecture/discussion three hours per week and weekly laboratory work

Requirements/Evaluation: weekly problem sets, midterm exam, final exam, and labs, all of which have a substantial quantitative component

Prerequisites: required: PHYS 201, PHYS/MATH 210 or MATH 309; recommended: PHYS 202, PHYS 301

Enrollment Limit: 14 per lab

Enrollment Preferences: physics majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: weekly problem sets, exams, and labs, all of which have a substantial quantitative component

Spring 2024

PHYS 312 (F) Philosophical Implications of Modern Physics (QFR)
Cross-listings: STS 312 PHIL 312 PHYS 312

Primary Cross-listing
Some of the discoveries made by physicists over the last century seem to show that our common sense views are deeply at odds with our most sophisticated and best confirmed scientific theories. The course will present the essential ideas of relativity theory and quantum theory and explore their implications for philosophy. We will ask, for example, what these theories tell us about the nature of space, time, probability and causality.

Requirements/Evaluation: attendance, participation, problem sets, exams, six 1- to 2-page papers and a 12- to 15-page term paper
Prerequisites: MATH 140, high-school physics, and either a 200-level course in PHIL or a 100-level course in PHYS

Enrollment Limit: 20

Enrollment Preferences: Philosophy majors and Physics majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 312(D2) PHIL 312(D2) PHYS 312(D3)

Attributes: PHIL Contemp Metaphysics + Epistemology Courses

Fall 2023

LEC Section: 01 MR 2:35 pm - 3:50 pm Frederick W. Strauch, Keith E. McPartland

PHYS 314 (S) Controlling Quanta (QFR)

This course will explore modern developments in the control of individual quantum systems. Topics covered will include basic physical theories of atoms coupled to photons, underlying mathematical tools (including Lie algebras and groups), and computational methods to simulate and analyze quantum systems. Applications to quantum computing, teleportation, and experimental metaphysics (Bell's inequality) will also be discussed.

Requirements/Evaluation: tutorial preparation and participation, weekly problem sets/papers, and a final project

Prerequisites: PHYS/MATH 210 or MATH 209 or MATH 250

Enrollment Limit: 10

Enrollment Preferences: sophomores and junior Physics majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Spring 2024

TUT Section: T1 TBA Frederick W. Strauch

PHYS 315 (S) Computational Biology (QFR)

Cross-listings: PHYS 315 CSCI 315

Primary Cross-listing

This course will provide an overview of Computational Biology, the application of computational, mathematical, statistical, and physical problem-solving techniques to interpret the rapidly expanding amount of biological data. Topics covered will include database searching, DNA sequence alignment, clustering, RNA structure prediction, protein structural alignment, methods of analyzing gene expression, networks, and genome assembly using techniques such as string matching, dynamic programming, hidden Markov models, and statistics.

Requirements/Evaluation: weekly Python programming assignments, code reviews, problem sets, plus a few quizzes and a final project

Prerequisites: programming experience (e.g., CSCI 136), mathematics (PHYS/MATH 210 or MATH 150), and physical science (PHYS 142 or 151, or CHEM 151 or 153 or 155), or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: courage

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

PHYS 315(D3) CSCI 315(D3)
PHYS 319  (S) Integrative Bioinformatics, Genomics, and Proteomics Lab (QFR)

**Cross-listings:**  CSCI 319 BIOL 319 MATH 319 CHEM 319 PHYS 319

**Secondary Cross-listing**

What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high throughput approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

**Class Format:** The lab for this course will meet for two afternoons per week. Some lab sessions will be shorter than 3 hours.

**Requirements/Evaluation:** lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

**Prerequisites:** BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

**Enrollment Limit:** 12

**Enrollment Preferences:** seniors, then juniors, then sophomores

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

CSCI 319(D3) BIOL 319(D3) MATH 319(D3) CHEM 319(D3) PHYS 319(D3)

**Quantative/Formal Reasoning Notes:** Through lab work, homework sets and a major project, students will learn or further develop their skills in programming in Python, and about the basis of Bayesian approaches to phylogenetic tree estimation.

**Attributes:** BIGP Courses BIMO Interdepartmental Electives

Not offered current academic year

**PHYS 321  (S) Introduction to Particle Physics  (QFR)**

The Standard Model of particle physics incorporates special relativity, quantum mechanics, and almost all that we know about elementary particles and their interactions. This course introduces some of the main ideas and phenomena associated with the Standard Model. After a review of relativistic kinematics, we will learn about symmetries in particle physics, relativistic wave equations, Feynman diagrams, and selected applications of quantum electrodynamics, the weak interactions, and quantum chromodynamics. We will conclude with a discussion of spontaneous symmetry breaking and the Higgs mechanism.

**Requirements/Evaluation:** weekly problem sets, a midterm exam, and a final exam

**Prerequisites:** PHYS 301

**Enrollment Limit:** 15

**Enrollment Preferences:** By seniority

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option
**PHYS 402  (S)  Applications of Quantum Mechanics  (QFR)**

This course will explore a number of important topics in the application of quantum mechanics to physical systems, including perturbation theory, the variational principle and the semiclassical interaction of atoms and radiation. The course will finish up with three weeks on quantum optics including an experimental project on non-classical interference phenomena. Applications and examples will be taken mostly from atomic physics with some discussion of solid state systems.

**Requirements/Evaluation:** weekly problem sets, tutorial participation, presentations, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 301

**Enrollment Limit:** 10 per sec

**Enrollment Preferences:** Physics and Astrophysics Majors

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)  (QFR)

**Quantative/Formal Reasoning Notes:** This course has weekly problem sets, all of which have a substantial quantitative component.

**Not offered current academic year**

---

**PHYS 405  (F)  Electromagnetic Theory  (QFR)**

This course builds on the material of Physics 201, and explores the application of Maxwell's Equations to understand a range of topics including electric fields and matter, magnetic materials, light, and radiation. As we explore diverse phenomena, we will learn useful approximation techniques and beautiful mathematical tools. In addition to weekly tutorial meetings, the class will meet once a week as a whole to introduce new material.

**Class Format:** Class will meet once as a whole to introduce new material and for informal discussion.

**Requirements/Evaluation:** weekly problem sets, tutorial participation, presentations, and a final exam or final project, all of which have a substantial quantitative component

**Prerequisites:** PHYS 202 and PHYS/MATH 210 or MATH 209 or MATH 309

**Enrollment Limit:** 30

**Enrollment Preferences:** Preference will be given to physics and astrophysics majors.

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)  (QFR)

**Quantative/Formal Reasoning Notes:** Physics courses are all heavily dependent on QFR skills. Phys 405 will feature extensive use of vector calculus and differential equations while also asking students to develop facility with approximation techniques in solving complex problems throughout the semester.

---

Fall 2023

TUT Section: T1  F 1:10 pm - 2:25 pm  Charlie Doret

**PHYS 411  (F)  Classical Mechanics  (QFR)**

This course will explore advanced topics in classical mechanics. Central ideas include the calculus of variations, the Lagrangian and Hamiltonian formulations of mechanics, phase space, central-force motion, non-inertial reference frames (including implications for physics on a rotating Earth), rigid-body rotations, and non-linear dynamics & chaos, with additional topics from continuum and fluid mechanics as time permits. Numerical and perturbative techniques will be developed and used extensively. We will also examine the ways in which classical mechanics informs other fields of physics. In addition to weekly tutorial meetings the class will meet weekly as a whole to introduce and discuss new material.
**Requirements/Evaluation:** weekly problem sets, tutorial participation, presentations, a final project, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 202 and PHYS/MATH 210 or MATH 309

**Enrollment Limit:** 10/section

**Enrollment Preferences:** majors

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** weekly problem sets requiring substantial quantitative reasoning using analytical and numerical methods.

Not offered current academic year

**PHYS 418 (S) Gravity  (QFR)**

This course is an introduction Einstein's theory of general relativity. We begin with a review of special relativity, emphasizing geometrical aspects of Minkowski spacetime. Working from the equivalence principle, we then motivate gravity as spacetime curvature, and study in detail the Schwarzschild geometry around a spherically symmetric mass. After this application, we use tensors to develop Einstein's equation, which describes how energy density curves spacetime. With this equation in hand we study the Friedmann-Robertson-Walker geometries for an expanding universe, and finally, we linearize Einstein's equation to develop the theory of gravitational waves.

**Requirements/Evaluation:** weekly problem sets, a midterm exam, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 301 or PHYS 405 or PHYS 411, or permission of instructor

**Enrollment Limit:** none

**Enrollment Preferences:** none

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** All problem sets and exams will have a substantial quantitative component.

Spring 2024

LEC Section: 01     TR 8:30 am - 9:45 am     David R. Tucker-Smith

**PHYS 451 (F) Condensed Matter Physics  (QFR)**

Condensed matter physics is an important area of current research and serves as the basis for modern electronic technology. We plan to explore the physics of metals, insulators, semiconductors, superconductors, and photonic crystals, with particular attention to structure, thermal properties, energy bands, and electronic properties.

**Requirements/Evaluation:** weekly readings and problem sets, and exams

**Prerequisites:** PHYS 301 (may be taken simultaneously); or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Physics majors

**Expected Class Size:** 6

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** serious problem sets

**Attributes:** MTSC Courses

- Anand V. Swamy, The Willmott Family Third Century Professor of Economics; affiliated with: Economics, Center for Development Economics
- David J. Zimmerman, Professor of Economics and Orrin Sage Professor of Political Economy

Political Economy at Williams is the study of political and economic forces as they combine to produce public policy. These outputs of the political system are shaped by social forces, nongovernmental organizations, state institutions, markets, knowledge structures, political ideologies, normative goals, and moral values. Policy analysis seeks to both understand and evaluate public policies in their formulation, implementation, and effectiveness. The study of public policy is inherently interdisciplinary, and the Political Economy Program self-consciously incorporates the central analytical approaches of both Political Science and Economics, seeking to surmount the sometimes artificial barriers of specialization that may characterize a single discipline.

The Political Economy major takes students from introductory courses in Economics and Political Science all the way to a senior year group project of independent student research and concrete policy proposals. Three introductory courses and four electives in these two fields complement four courses peculiar to the Political Economy major. Three of these four — POEC 250, POEC 401 and POEC 402 — are taught jointly by a political scientist and an economist, and the major's culmination is a public presentation of student senior policy projects. As part of these projects, the major includes (within POEC 402) a class trip to Washington, DC during the first Sunday through Wednesday of spring break. All majors are required to participate in this trip. Given the program’s public policy orientation, majors must also have an active learning experience (such as an internship or a public policy-related winter study course) to fulfill an experiential education requirement.

MAJOR

The Political Economy major requires students to complete eleven (11) courses: three introductory courses in Economics and Political Science; one empirical methods course; three courses specific to the Political Economy Program; and four electives. The electives are organized into two categories — ‘skills’ courses and ‘depth’ courses — and must be completed across the major's two foundational departments. Finally, all majors are required to fulfill an experiential education requirement, the purpose of which is to get students out into the world interacting with people in cases where the stakes are real. This often involves some element of community service, participation in the political process, or taking part in the making of or analysis of public policy beyond a purely academic engagement. This requirement is usually fulfilled through an internship or a winter study course, and must be approved by the chair prior to the student taking POEC 402 in the spring of senior year.

Three Introductory Courses

1. ECON 110: Principles of Microeconomics
2. ECON 120: Principles of Macroeconomics
3. PSCI 110: Introduction to American Politics

One Empirical Methods Course

4. POEC 253: Empirical Methods in Political Economy
   or ECON 255: Econometrics

Three Political Economy Program Courses
Four Elective Courses

Majors are required to take four electives, two each in two different categories across the two foundational departments of Economics and Political Science.

The first category is “skills” electives. Students are required to take two such electives. One must be a course in Economics that develops the econometric analytic skills of the student. The other must be a course in Political Science that develops the social science research skills of the student.

8. One ECON skills elective
9. One PSCI skills elective

The second category is “depth” electives. Students are required to take two such electives on topics related to public policy in courses that are neither survey nor introductory. One must be a course in Political Science. The other may be taken in either Political Science or Economics.

10. One PSCI depth elective
11. One PSCI or ECON depth elective

Below are the courses that currently fulfill the “skills” and “depth” electives requirements. Note that all “skills” electives are simultaneously “depth” electives, but obviously students may not ‘double count’ a single course as fulfilling two distinct major requirements.

  Catalog details
Students in the graduating classes of 2024, 2025 and 2026 may receive major credit for courses taken under the old major structure which are no longer granted credit under the new major structure. This includes: the former PSCI 202, 203 and 204 which will be credited to majors as a “depth” elective, must be closely related, indeed must prepare the ground for the honors thesis. Since POEC 250 and juniors and seniors are generally unable to register for it. Please note that by College rule, you may take only your first course in the major pass/fail.

Students will ideally take POEC 250 during their sophomore year. POEC 401, taken fall of senior year, requires POEC 253 or ECON 255 as a prerequisite, so the methodology requirement must be completed in the sophomore or junior year. Note that both POEC 250 and POEC 253 are offered only once per year in the fall semester. Students should also get started on their electives during sophomore and junior years.

THE DEGREE WITH HONORS IN POLITICAL ECONOMY

Due to the special demands of this interdisciplinary major, the only route to honors in Political Economy is the thesis. Seniors may pursue the honors thesis course (Political Economy 493-W31) during the fall semester and winter study period. The third course contributing to such an honors program would normally be an elective in Political Science or Economics taken during the junior year. This course, which may be one of the required electives, must be closely related, indeed must prepare the ground for the honors thesis.

Juniors in the Political Economy major with at least a 3.5 GPA in the program may apply for the honors thesis program by means of a written proposal submitted to the chair by mid-April. Written guidelines for such proposals are available on the program website. The proposal should have been discussed with at least two faculty members, and at least one faculty advisor from each discipline must be solicited by the student prior to submission of the proposal.

Final decisions about admission to the honors program will be made in late May after spring grades become available.

To achieve the degree with honors in Political Economy, the thesis must be completed by the end of winter study period and be judged of honors quality by a committee consisting of the two advisors and a third reader. A thesis judged to be of particular distinction will qualify its author for the degree with highest honors.

STUDY ABROAD

Despite the fact that Political Economy requires more courses than the typical major, many Political Economy majors go abroad. Typically the major credits obtained abroad are the electives. Since POEC 250 and POEC 253 are only offered in the fall, students considering spending only one semester abroad typically find spring to be the better choice. Nonetheless, many students study away for the fall or the whole year. If you expect to be away during the fall of your junior year, it is critical that you either: (a) take POEC 253 fall of your sophomore year; or (b) complete MATH 130 as well as STAT 161 or 201 early enough that you can take ECON 255 (which is offered every semester) before the end of junior year. In addition, if you expect to be away fall of junior year, it is a good idea to take POEC 250 fall of sophomore year.

TRANSITIONING TO THE NEW MAJOR STRUCTURE

Students in the graduating classes of 2024, 2025 and 2026 may receive major credit for courses taken under the old major structure which are no longer granted credit under the new major structure. This includes: the former PSCI 202, 203 and 204 which will be credited to majors as a “depth”
elective; and any elective granted credit at the time of enrollment regardless of its current elective category status. All majors regardless of graduation year are required to complete two Political Science electives and one Economics elective, with the fourth elective coming from either department—i.e. they must abide by the departmental distribution of electives in the new major structure.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the program chair.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No, although because so many of the classes in the program are Williams-specific, there is an effective limit of 2-3.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
Yes. Only Economics or Political Science courses can be awarded credit, and they must satisfy one of the elective categories (or in rarer cases one of the ECON or PSCI intro requirements).

Are there specific major requirements that cannot be fulfilled while on study away?
Yes.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Yes. The POEC major requires 3 specific POEC courses (250, 401, and 402), and one empirical methods course (POEC 253 or ECON 255). The POEC courses are only offered in a single semester (fall for 250, 253, and 401 and spring for 402), and 401 and 402 must be taken in the senior year. 253 can be replaced with ECON 255, which is offered in fall or spring, but ECON 255 has an additional prerequisite of STAT 161, STAT 201, or STAT 202. Studying abroad in POEC requires careful planning.

POEC 250  (F)  Economic Liberalism and Its Critics
Cross-listings:  PSCI 238 POEC 250 ECON 299

Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx's revolutionary socialism, and the reformist ideas of John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Joseph Schumpeter, Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant topics relevant to the themes of the course, with applications to current public policy issues, such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; social media and addiction; economic nationalism; behavioral economics; climate change and intergenerational equity; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

Class Format: This course uses a flipped classroom approach. Before each class meeting, students watch a lecture video, and (at least six times) write an essay relating to the assigned reading and video. In-person class time is devoted primarily to Socratic discussion.

Requirements/Evaluation: six short essays and a final exam

Prerequisites: ECON 110 and 120 or equivalent; PSCI 110 (formerly PSCI 201; may be taken concurrently with POEC 250); open to non-majors

Enrollment Limit: 30
Enrollment Preferences: Political Economy majors and sophomores intending a Political Economy major

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
PSCI 238(D2) POEC 250(D2) ECON 299(D2)

Attributes: AMST Critical and Cultural Theory Electives POEC Required Courses

Fall 2023

SEM Section: 01 MR 2:35 pm - 3:50 pm James E. Mahon, William M. Gentry

POEC 253 (F) Empirical Methods in Political Economy (QFR)
This course introduces students to common empirical tools used in policy analysis and implementation. The broad aim is to train students to be discriminating consumers of public policy-relevant research. The emphasis in the course is on intuitive understanding of the central concepts. Through hands-on work with data and critical assessment of existing empirical social scientific research, students will develop the ability to choose and employ the appropriate tool for a particular research problem, and to understand the limitations of the techniques. Topics to be covered include basic principles of probability; random variables and distributions; statistical estimation, inference and hypothesis testing; and modeling using multiple regression, with a particular focus on understanding whether and how relationships between variables can be determined to be causal—an essential requirement for effective policy formation. Throughout the course, the focus will be on public policy applications relevant to the fields of political science, sociology, and public health, as well as to economics.

Requirements/Evaluation: Problem sets, group project, midterm exam, final exam

Prerequisites: MATH 130 or its equivalent; one course in ECON; not open to students who have taken ECON 255

Enrollment Limit: 20

Enrollment Preferences: Political Economy majors, Environmental Policy majors and sophomores

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: does not satisfy the econometrics requirement for the Economics major; POEC 253 cannot be substituted for ECON 255, or count as an elective towards the Economics major

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: The course teaches econometrics, i.e. statistics as economists use it, with applications in economics, political science, and other fields.

Attributes: PHLH Statistics Courses POEC Required Courses

Fall 2023

LEC Section: 01 TF 2:35 pm - 3:50 pm Anand V. Swamy

POEC 397 (F) Independent Study: Political Economy
Open to juniors or seniors majoring in Political Economy, with approval of a faculty supervisor and the chair.

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Fall 2023

IND Section: 01 TBA Darel E. Paul

POEC 398 (S) Independent Study: Political Economy
Open to juniors or seniors majoring in Political Economy, with approval of a faculty supervisor and the chair.
POEC 401 (F) Contemporary Problems in Political Economy

This course examines contemporary problems in political economy at and across diverse spatial scales. Using both Economics and Political Science methods of analysis, students will study the way societies respond to the myriad risks facing its citizens. The goal of this course is both to build upon theoretical debates encountered in POEC 250 as well as to prepare students for the public policy analysis they will do in POEC 402.

Requirements/Evaluation: one 5-7 page paper; one 10-12 page final policy paper; multiple in-class group presentations; class participation

Prerequisites: ECON 110 and 120; PSCI 110 (formerly 201); POEC 253 or ECON 255 or equivalent, or permission of instructor; open to non-majors

Enrollment Limit: 20

Enrollment Preferences: Political Economy majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Unit Notes: required for the Political Economy major

Distributions: (D2)

Attributes: POEC Required Courses

POEC 402 (S) Political Economy of Public Policy Issues

In this course, students form groups that conduct a political and economic analysis of a public policy issue of their choosing. They do extensive reading, conduct interviews in Washington, D.C. (during spring recess), write a major report on their findings and recommendations, and present and defend their findings in a public talk. Students visit Washington, D.C. Sunday night through Wednesday of the first week of spring vacation to conduct interviews relating to their group projects. This is a course requirement.

Class Format: student presentations

Requirements/Evaluation: group policy projects including an 80- to 100-page paper and 2-hour presentation

Prerequisites: POEC 250; POEC 253 or ECON 255; POEC 401; open only to Political Economy majors

Enrollment Limit: 20

Enrollment Preferences: open only to Political Economy majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: required for the Political Economy major

Distributions: (D2)

Attributes: POEC Required Courses

POEC 493 (F) Honors Thesis: Political Economy

Due to the special demands of this interdisciplinary major, the only route to honors in Political Economy is the thesis, a substantial and original work of
scholarship. Students pursue the honors thesis course (Political Economy 493-W31) during the fall semester and winter study period. They work closely with two faculty advisors -- one in Economics, one in Political Science -- throughout the thesis process.

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

Fall 2023

HON Section: 01  TBA  Darel E. Paul
Politics is most fundamentally about forging and maintaining community, about how we manage to craft a common destiny guided by shared values. It is also about how we engage in problem solving, facilitate citizen action, and participate in world-making. All communities need a way to reconcile conflicts of interest among their members and to determine their group interest; they need to allocate power and to determine its just uses. Power may be used wisely or foolishly, rightly or cruelly, but it is always there; it cannot be wished away. Political science attends to the ways that social power is grasped, maintained, challenged, or justified. The contests over power and the values that it should be used to further give politics its drama and pathos. The effort to understand politics aims not only to describe and explain, but also to improve political life.

The Political Science major is structured to allow students either to participate in the established ways of studying politics or to develop their own focus. To this end, the department offers two routes to completing the major, each requiring nine courses. We invite students either to organize their major through the subfields that structure the discipline of political science (American politics, international relations, political theory, and comparative politics), or to develop individual concentrations reflecting their particular interests, regardless of subfields.

MAJOR

Subfield Concentration Route: Upon declaring a major, students choose one subfield: American politics, international relations, political theory, or comparative politics. The subfield concentration draws at least four (4) of the nine courses from one subfield including the appropriate core course from 110-140, two electives of the student’s choice at the 200 or 300 level and the senior seminar (or an individual project) in the student’s subfield. Students selecting political theory as their subfield concentration must take Political Science 231 or Political Science 232 as one of their four subfield courses, in addition to taking Political Science 130 and prior to taking Political Science 430. With permission of the department chair, students may take a senior seminar in a different subfield, providing they take a third elective in the subfield of concentration. In addition, students must take courses in two subfields outside the subfield of concentration to satisfy the breadth requirement (all methods courses also count toward the breadth requirement).
Individual Concentration Route: Alternatively, students may devise a concentration of their own. In this event, the student prepares a curricular plan in consultation with a faculty advisor, explaining the nature of the concentration and the courses the student will take. The individual concentration also requires nine (9) courses, with at least five (5) thematically linked courses constituting the concentration. Of these five courses, one is from the 110-140 core courses, three are electives at the 200 or 300 level, and one is a senior seminar or individual project. In addition, students pursuing an individual concentration must take at least two other courses that illustrate breadth in political science. To complete the requirement, the student has their choice of any two other courses within the Political Science Department. The faculty advisor and the department chair must approve the student plan. All students must take at least one 300-level course and one research course to complete the major. (Most senior seminars are also research courses but, especially in political theory, not all are.) In addition, no more than two 100-level elective courses (courses outside of the 110-140 core courses) can count toward the major.

ADVISEMENT

When a student chooses to major in Political Science (usually at the end of the sophomore year), they may register with any Political Science faculty member. The registering faculty member will ask for preferences for a permanent faculty advisor and an effort will be made to match students with their preferred advisor. In all cases, students will be paired by the beginning of junior year with an advisor who will continue with them through graduation.

COURSE NUMBERING

The course numbering used by the Political Science Department reflects the format and specialization of a course. The 100-level courses are divided between our core courses and electives. The core courses, numbered from 110-140, serve as introductions both to the substance of politics and the subfields organizing the study of politics. The introductory subfield course must be completed before the senior year and preferably before junior year. The 100-level electives are designed to address political topics from multiple subfield perspectives; many are seminars designed for first-year students. The 200-level courses are electives that delve into political processes, problems, and philosophies, typically within one of the four subfields though occasionally in ways that cut across subfields. 100-level and 200-level courses have no prerequisites. 300-level courses are more specialized and have prerequisites. 400-level courses are senior seminars offered for students in the major; senior seminars also are open to juniors and to non-majors if space permits. In general, the main subfield of non-core courses can be read from the middle digit of the course number: 0, 1 or 5 for American politics; 2 or 6 for international relations; 3 or 7 for political theory; 4 or 8 for comparative politics. Because the relevant course number may not be available, and as some courses may not fit the subfields or may fit multiple subfields, please check the “attributes” entry to confirm how the course is categorized by the department.

WINTER STUDY PROJECT

The department welcomes relevant WSP 99 proposals that can make important contributions to the student’s understanding of public affairs and politics. Majors, seniors, and students without previous WSP 99 experience have preference.

THE JUNIOR YEAR ABROAD

A major in Political Science can be readily and usefully combined with study off-campus. Generally, only one course taken per semester abroad in a program approved by the College may be counted toward the requirements for a degree in Political Science.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, though sometimes a syllabus may be needed. How much we need may depend on our familiarity with the institution or program.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. Typically we allow not more than one course per semester, or two per year, to count for major credit. In special circumstances, the chair may consider granting an exemption and allow an additional course.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No, although this depends on the course. If, after considering description and institution, we feel it is not rigorous enough, we will not count it.
Are there specific major requirements that cannot be fulfilled while on study away?

Yes. We do not allow the senior seminar requirement to be fulfilled by study abroad.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No. One such required course (either Ancient or Modern Political Thought for those specializing in political theory within the major) can be fulfilled by an appropriate study abroad course.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

When issues arise that's almost always because the student did not keep department adequately informed of evolving plans.

PREPARATION FOR GRADUATE STUDY

The Department recommends that students contemplating graduate school, especially if they plan to study fields outside of political theory, take a course in research methods, such as PSCI 493, and/or a class in quantitative methods, such as POEC 253.

THE DEGREE WITH HONORS IN POLITICAL SCIENCE

To become a candidate for honors, the student must apply in the second semester of their junior year for PSCI 493(F), the Senior Thesis Research Design Seminar, by (1) submitting a “statement of interest and qualifications” and (2) having a record of academic excellence in Political Science, generally a major GPA of 3.5 or above. Accepted students who write a successful thesis research proposal in PSCI 493 will then be invited to continue on to PSCI 494(S), Senior Thesis Research and Writing Workshop. Also required for these students is participation in the senior thesis winter study course (PSCI 31). The fall and spring semester senior thesis courses are in addition to the required nine (9) courses for the major. Additional details can be found at the department website.

PSCI 110  (F)(S)  Introduction to American Politics: Power, Politics, and Democracy in America

Begun as an experiment over 200 years ago, the United States has grown into a polity that is simultaneously praised and condemned, critiqued and mythologized, modeled by others and remodeled itself. This course introduces students to the dynamics and tensions that have animated the American political order and that have nurtured these conflicting assessments. Topics include the founding of the American system and the primary documents (the Declaration of Independence, the Constitution, and the Federalist Papers), the primary institutions of national government then and now (Congress, the presidency, and the Supreme Court), and the politics of policy-making in the United States. We study structures, processes, key events, and primary actors that have shaped American political development. In investigating these topics, we explore questions such as these: How is power allocated? What produces political change? Is there a trade-off between democratic accountability and effective governance? How are tensions between liberty and equality resolved? Do the institutions produce good policies, and how do we define what is good?

Requirements/Evaluation: depending on the section, some combination of response papers, short-to-medium papers, projects, exams, and class participation

Prerequisites: this is an introductory course, open to first-year students and sophomores; juniors and seniors may enroll only with the permission of instructor and under special circumstances

Enrollment Limit: 30

Enrollment Preferences: first-years and sophomores

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

PSCI 120  (F)(S)  Introduction to International Relations: World Politics

This course provides an overview of the central theories, concepts and debates in international relations. It entertains competing answers to central questions in the field: What are the implications of an anarchic political structure for order and justice in world politics? What are the primary causes of war and conflict? What are the necessary conditions for peace and stability? What role do moral and legal considerations play in world politics? How has globalization changed the international system?

Requirements/Evaluation: Depending on the section, some combination of a midterm paper, one or two short response papers, a group project and presentations, a podcast, and an in-person final exam.

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first-year students and sophomores

PSCI 130  (F)(S)  Introduction to Political Theory

Is politics war by other means? Is it merely a practical way to meet our needs? Or is it, rather, the activity through which citizens pursue justice and the good life? And what is justice? How can it be established and secured? Where does it apply? To whom? What are the powers and obligations of citizenship? Who decides? On what basis? Political theory addresses questions such as these as it investigates the fundamental problems of how people can, do, and ought to live together. The questions have sparked controversy since the origins of political thinking; the answers remain controversial now. This course addresses the controversies, drawing examples from struggles over such matters as racism, colonialism, revolution, political founding, economic order, and the politics of sex and gender, while focusing on major works of ancient, modern, and contemporary theory by such authors as Plato, Aristotle, Machiavelli, Hobbes, Rousseau, Mill, Marx, Nietzsche, Beauvoir, Arendt, Fanon, Rawls, Foucault, and Young. Themes may include power, authority, freedom, justice, equality, democracy, neoliberalism, feminism, and violence, though the emphases will vary from semester to semester.

Requirements/Evaluation: Three papers, class participation, and occasional informal writing/Glow posts.

Prerequisites: none; this is an introductory course, open to all, including first-year students

Enrollment Limit: 25

Enrollment Preferences: first-years and sophomores

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

PSCI 140  (F)(S)  Introduction to Comparative Politics
The comparative study of politics looks mainly at what goes on inside countries, the domestic dynamics of power, institutions, and identities. This class considers analytic concepts central to the study of politics generally--the state, legitimacy, democracy, authoritarianism, clientelism, nationalism--to comprehend political processes and transformations in various parts of the world. Themes include: Where does political power come from? Does economic development drive political change, or the other way around? What is democracy, how does it arise, and how might it fail? How does international war leave its mark on domestic politics? How do religion and politics interact? Materials include classic texts, recent theoretical works, journalism, commentary, fiction, and a variety of sources related to current events in Ukraine and elsewhere.

Class Format: directed discussion
Requirements/Evaluation: Three 3-page papers, a short interpretive exercise, and a final exam
Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: first-years and sophomores
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Attributes: PSCI Comparative Politics Courses

PSCI 155  (F)  Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies
Cross-listings: LEAD 155 PSCI 155
Secondary Cross-listing
This course introduces students to the major issues in the study of leadership, a central concept in the study of politics. The first part of the course will examine key theoretical problems that have occupied political thinkers from Plato and Confucius to Machiavelli and the American framers: What makes a leader successful? What kinds of regimes best serve to encourage good leaders and to constrain bad ones? What is the relationship between leadership and morality-can the ends justify the means? What functions does leadership fill, and what challenges do leaders face, in modern democratic states? The second half of the course will look at leaders in action, charting the efforts of politicians, intellectuals, and grassroots activists to shape the worlds in which they live. Case studies will include antislavery politics and the American Civil War; the global crises of the 1930s and 1940s; and the social movements of the 1960s and 1970s. In addition to active class participation, students will be expected to write a 5-page proposal for a research paper on a leader of their choice, a 10-page research paper, an in-class midterm exam, and a cumulative, in-class final exam.

Requirements/Evaluation: active class participation, 5-page research proposal, 10-page research paper, in-class midterm exam, and a cumulative in-class final exam
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: first-year students and sophomores
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Unit Notes: subfield open in Political Science major
Distributions: (D2)
The course is cross-listed and the prefixes carry the following divisional credit:
LEAD 155(D2) PSCI 155(D2)
Attributes: LEAD American Domestic Leadership
PSCI 158  (F)  Power to the People?

Popular unrest. The resurgence of authoritarian styles and practices in politics. Democratic collapse. Political tumult around the globe in recent decades has put elites, and others, on edge as young democracies have collapsed and longer standing ones appear to be stumbling. In the United States, basic stability and democratic expansion have been accompanied by increasing citizen distrust of institutions, growing social divisions, contestation over basic citizenship rights, and political violence. The pandemic, related economic distress, social protests and insurrection have only sharpened the precarious state of U.S. democracy. Acute observers have long seen the U.S. as a harbinger of the promise and peril of modern democracies. What is the fate of democracy in the U.S.? What does that portend, if anything, for other democracies, or for the general principle of popular sovereignty—-the idea that the people govern themselves? We investigate these and related questions, primarily through active, project-based group research activities, guided by political theory and empirical research in the social sciences. Our investigation will include substantial class-time collaboration with a similarly structured undergraduate course taught by a sociologist at Johns Hopkins University and may include an optional weekend research trip.

Requirements/Evaluation:  active class participation, three 4-page essays, multiple group assignments, and class presentations
Prerequisites:  first-year students
Enrollment Limit:  14
Enrollment Preferences:  first-year students
Expected Class Size:  14
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D2)
Attributes:  EXPE Experiential Education Courses  PSCI American Politics Courses

PSCI 160  (F)  Refugees in International Politics  (DPE)  (WS)

Globally, refugees seem to create, and be caught up in, chronic crisis. This course evaluates how this can be--how a crisis can be chronic, and for whom this chronic crisis is a solution. We investigate who refugees are, in international law and popular understanding; read refugee stories; examine international and national laws distinguishing refugees from other categories of migrants; evaluate international organizations' roles in managing population displacement; look at the way that images convey stereotypes and direct a type of aid; consider refugee camps in theory and example; and reflect on what exclusion, integration, and assimilation mean to newcomers and host populations. In whose interest is the prevailing system? Who might change it, and how?

Requirements/Evaluation:  Ten essays: five lead, five response.  The first two weeks' essay grades will be unrecorded.
Prerequisites:  none
Enrollment Limit:  10
Enrollment Preferences:  first-year students, to be selected randomly from list of those enrolled.
Expected Class Size:  10
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D2)  (DPE)  (WS)
Writing Skills Notes:  In addition to writing every week, students will have a chance work on specific skills cumulatively.
Difference, Power, and Equity Notes:  This course examines the way in which home states categorize people and oppress some, producing refugees; the way that host states categorize people and oppress some, using immigration to shore up the prevailing ethnic hierarchy; and why we worry about some of these categories of oppression more than others.

PSCI 161  (S)  America and the World

Cross-listings:  PSCI 161 GBST 103 LEAD 165

Not offered current academic year
Primary Cross-listing
This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made on a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation to Iran; terrorist threats; humanitarian disasters in Syria and Libya; and long-term challenges like climate change. We will not only describe American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning only sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a "grand strategy." By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

Class Format: discussion
Requirements/Evaluation: short papers, class participation, and final exercise
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: first-years and sophomores
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

Cross-listings: AFR 132 AMST 132 PSCI 171
Secondary Cross-listing
This introductory seminar investigates the relationship between three major schools of thought in contemporary Africana social and political philosophy: the African, Afro-North American, and Afro-Caribbean intellectual traditions. We will discuss a range of thinkers including Dionne Brand, Aimé Césaire, Angela Davis, Édouard Glissant, Kwame Gyekye, Paget Henry, bell hooks, Katherine McKittrick, Charles Mills, Nkiru Nzegwu, Oyèrónke Oyewùmì, Ngugi wa Thiong'o, Cornel West, and Sylvia Wynter. A primary goal of the course is to provide students with the intellectual resources to decipher problems central to philosophical discourse and to allow students an opportunity to apply what they learn to critical issues in current geopolitics.
Requirements/Evaluation: attendance and participation, two 5- to 7-page essays, and one 10-page final paper
Prerequisites: none; open to all
Enrollment Limit: 15
Enrollment Preferences: first- and second-year students
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option

PSCI 172  (F)  Politics after the Apocalypse
Cross-listings: STS 135 PSCI 172
Primary Cross-listing

What shape will politics take after the apocalypse? Even before the coronavirus pandemic gave us reason to wonder if we are, in fact, living through an apocalypse, speculation about the end of the world and its aftermath pervaded recent television, movies, literature, philosophy, and critical theory. In this class we draw these works into conversation with political theories of the "state of nature" and "state of exception" to better understand what political possibilities are opened and foreclosed in times of crisis. What aspects of politics will endure the ravages of fire or pestilence? What new political realities might emerge on ground cleared by disaster? What does it say about pre-pandemic politics that we were so eager to consume stories of states falling and bands of survivors scraping together a nasty, brutish and short existence? And how will the unfolding pandemic change how we respond to these stories? Class will be driven primarily by discussion, typically introduced by a brief lecture.

Requirements/Evaluation: two 3-5 page papers, one short story (7-15 pages and including an explanatory cover letter), contributions to a class project documenting and analyzing the pandemic, and class participation

Prerequisites: first- or second-year students, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: first-year students

Cross-listings: PSCI 173 GBST 105 REL 107

Secondary Cross-listing

This course's goal is to show how the racialization of Islam and Muslims has been constitutive to the latter's imagination. It looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. The course goes back to the founding moments of an imagined white-Christian Europe and how the racialization of Muslim bodies was central to this project and how anti-Muslim racism continues to be relevant in our world today. The course will give a global perspective on Islamophobia and how it is structuring and used by political actors in various territories. The course will show how Muslims were constructed as subjects in history, politics, and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. The course is based on the literature of multidisciplinary studies by leading scholars in the field, drawing from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology. This course's goal is to show how the racialization of Islam and Muslims has been constitutive to the latter's imagination. Secondary Cross-listing
In spite of predictions that religion would wither away in the face of modernization, even casual observation indicates that it remains a powerful force in contemporary political life. Our goal is to obtain an enhanced understanding and appreciation of the salience of religion in public life. The course will be divided into three parts. The first part focuses on different theoretical approaches to making sense of the relation between religion, politics, and society, discussing especially the concept of the 'secular' in Western thought and decolonial critique thereof. The second part will take a global perspective on the relation between religion and politics. We will discuss cases of Buddhism, Christianity (Catholicism and Protestantism), Confucianism, Hinduism, Islam (Sunni and Shi'a), and Judaism. The third part focuses on religion in the USA. Here, we will discuss the role of religion in American political culture, the relation of religion to the state, the relevance of religious interests and their political mobilization, religious minorities in the United States, and many other aspects of religion in the US society. Although the study of religion and politics raises a host of deep philosophical questions, the principal aim of the course is to understand how religion affects politics (and vice versa), rather than to explore the normative dimensions of questions raised by the interaction of these two forces.

Requirements/Evaluation: Class participation and three papers, in these proportions: 10% attendance; 20% participation; 20% first paper (7 pages); 30% second paper (8-10 pages); and 20% third paper (7 pages). No final exam.

PSCI 207  (S) Approaches to Asian Studies

Cross-listings: PSCI 207 ASIA 210

Secondary Cross-listing
Home to over half of the world's population and to more than twenty of the world's largest cities, Asia has gained global prominence in recent years; the twenty-first century in fact has widely been deemed the 'Asian Century'. But what is Asia? And what does it mean to study this richly diverse region? This seminar will address these questions with the aim of introducing students to important theoretical topics and key concepts that are relevant to the comparative and critical study of Asia. One central concern will be to consider the different ways of understanding "Asia", both in terms
of how the term and the region have been historically constituted; another will be to facilitate an understanding some of the salient factors (geography, belief systems, economy and polity)--past and present--that make for Asia's coherence and divergences; a third concern will be to unpack the troubled notions of "East" and "West" and re-center Asia within the newly emerging narratives of global interconnectedness. Beginning with the evolution of the field, this course will equip students with the methodological tools to critically navigate their own specific regional, inter-regional, or interdisciplinary tracks in the Asian Studies concentration.

Requirements/Evaluation: Two short papers (5-6); one longer final paper (10-15); discussion participation.

Prerequisites: At least one prior course related to Asia

Enrollment Limit: 20

Enrollment Preferences: Asian Studies concentrators; seniors; juniors; sophomores

PSCI 208  (F)  Wealth in America  (WS)

The pursuit of wealth is an important feature of American political identity, captured by the ideas of the American dream and the Protestant work ethic. The accumulation of wealth has been lauded as both a worthy individual activity and a vital component of the nation's public interest. Yet inequality in wealth may conflict with the political equality necessary for democratic governance and public trust, leading to concerns that we are sacrificing community, fairness, and opportunity for the benefit of a small portion of the population. This course focuses on questions about the public value of wealth and its accumulation, which have become more pressing now that the richest one percent of Americans own about 40 percent of privately held wealth. Some readings will be historical, particularly those focusing on American political thought and the politics of the Gilded Age. Most readings will focus on contemporary political debates about the accumulation, concentration, and redistribution of wealth.

Requirements/Evaluation: four 5-page papers and a final 10-page paper that is a revision and extension of a short paper

Prerequisites: none; not suitable for first-year students

Enrollment Limit: 19

Enrollment Preferences: Political Science majors with concentration in American politics and Political Economy majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Unit Notes: American concentration

Distributions: (D2)  (WS)

Writing Skills Notes: Four 5-page papers, peer review, and a revision of extension of one of these papers into a 10-page paper at the end of the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Cross-listings: WGSS 209 PSCI 209

Primary Cross-listing

Although some protest that the U.S. is heading toward European-style socialism, social welfare programs in the U.S. differ in important ways from those in other wealthy and democratic nations. This course focuses on the adoption and development of policies to address poverty and inequality in the U.S. The issues we will explore include: What is poverty, and how do Americans perceive its dangers to individuals as well as the political community? What economic, historical, and sociological theories have been advanced to explain poverty? Why has the U.S. adopted some approaches to reduce poverty but not others? What enduring political conflicts have shaped the U.S. welfare state?

Cross-listings:  PSCI 212 LEAD 205

Secondary Cross-listing

America's founders didn't mean to create a democracy. But since the Revolution, leaders have been fighting to make real for all Americans the promise of government of, by, and for the people. In this course, we will look at how leaders have marshaled ideas, social movements, and technological changes to expand the scope of American democracy--and the reasons they have sometimes failed. We will examine how founders such as Benjamin Franklin and James Madison envisioned the relation between the people and the government; how workers, African Americans, and women fought to participate in American politics; and how globalization, polarization, and inequality are straining American democracy and political leadership in the 21st century. We will examine leadership to better understand American democracy--and vice versa. We will ask: What explains why some leaders have succeeded where others have failed? Have some periods of American democratic politics been more amenable to particular kinds of leadership than others? What makes American political leadership distinctive in international comparison? Who, exactly, has been permitted to participate in American politics, and on what terms? How has the relation between the governors and the governed changed over time, and what factors and events have shaped those relations? How has America's democratic experiment compared with (and interacted with) democracy elsewhere in the world? Is America really a democracy at all?

Requirements/Evaluation:  bi-weekly short writing assignments, term paper, midterm and final in-class exams

PSCI 213  (F)  Mass Media and American Politics
According to recent estimates, the average American spends 11 hours per day consuming media--that is, watching television and movies, reading print sources, listening to music, radio, and podcasts, and scrolling social media. How does all of that media consumption influence the American political system? Scholars, practitioners, and observers of American politics have debated whether the net effect is positive or negative. Critics argue that today's media is shallow and uninformative, a vector of misinformation, and a promoter of extremism and violence. Some defenders argue that the media is a convenient scapegoat for problems that are endemic to human societies, while others claim that it actually facilitates political action aimed at addressing long-ignored injustices. In addition to addressing this important question about the health of American democracy, students will learn how the traditional media and social media influences Americans' political attitudes and behaviors. Among the topics we will discuss are the incentives, norms, and practices of news-making organizations; how politicians try to sway the public during campaigns; how the media covers campaigns; and how the media influences Americans' racial attitudes.

PSCI 214 (S) Racial and Ethnic Politics in America

Cross-listings: AAS 214 PSCI 214

Primary Cross-listing

Arguably, the dominant discourse in American politics today is about race. Race is connected to salient issues like immigration and police conduct; to politicians across the political spectrum; and (some argue) to virtually everything in American politics, including fundamental concepts that have no manifest racial content, like partisanship and the size and scope of government. We will evaluate the role of race as it relates to public opinion, political behavior, campaigns, political institutions, and public policy debates, with special attention devoted to the nature of racial attitudes. Most of the course will focus on the historical and contemporary relations between whites and African Americans, but we will also explore topics involving other pan-ethnic communities, particularly Latinos and Asian Americans.

Requirements/Evaluation: class participation, one to two short papers (5-7 pages), one medium paper (8-12 pages), an oral presentation, and a final exam

Spring 2024

SEM Section: 01 MR 2:35 pm - 3:50 pm Matthew Tokeshi
In the past half-century, American cities have gotten both much richer and much poorer. The making of "luxury cities" has gone hand-in-hand with persistent, concentrated poverty, extreme racial segregation, mass incarceration, and failing public services-social problems borne primarily by people of color. This course will examine the political underpinnings of inequality in American cities, with particular attention to the racialization of inequality. Among the topics we will cover are: the structures of urban political power; housing and employment discrimination; the War on Crime and the War on Drugs (and their consequence, mass incarceration); education; and gentrification. We will ask: How have city leaders and social movements engaged with urban problems? How have they tried to make cities more decent, just, and sustainable? Under what circumstances has positive leadership produced beneficial outcomes, and in what circumstances has it produced perverse outcomes? We will engage primarily with political science, but also with scholarship in other disciplines, including sociology, history, geography, and legal studies, all of which share an interest in the questions we will be exploring. Students will leave this course with a deeper understanding of contemporary urban problems, a knowledge of the political structures within which those problems are embedded, and a better sense of the challenges and opportunities leaders face in contemporary urban America.

PSCI 217  (S)  American Constitutionalism II: Rights and Liberties

Cross-listings: LEAD 217 PSCI 217

Primary Cross-listing

How has the American Constitution been debated and understood over time? What is the relationship between constitutional and political change? This course examines the historical development of American constitutional law and politics from the Founding to the present. Our focus is on rights and liberties -- freedom of speech and religion, property, criminal process, autonomy and privacy, and equality. The specific disputes under these rubrics range from abortion to affirmative action, hate speech to capital punishment, school prayer to same-sex marriage; the historical periods to be covered include the early republic, the ante-bellum era, the Civil War and Reconstruction, World Wars I and II, the Warren Court, and contemporary America. Readings are drawn from Supreme Court opinions, presidential addresses, congressional debates and statutes, political party platforms, key tracts of American political thought, and secondary scholarship on constitutional development. Throughout the semester, our goal will be less to remember elaborate doctrinal rules and multi-part constitutional "tests" than to understand the changing nature of, and changing relationship between, constitutional rights and constitutional meaning in American history.

Requirements/Evaluation: three essays (3-4 pages, 5-6 pages, 7-8 pages), a two-part final exam, and class participation

PSCI 218  (S)  The American Presidency

Cross-listings: LEAD 218 PSCI 218

Primary Cross-listing

Impeachments. Investigations. Polarization. Many argue that the presidency has been fundamentally altered by the tenure of Donald Trump. Is this right? To study the presidency is to study human nature and individual personality, constitution and institution, rules and norms, strategy and contingency. This course will examine the problems and paradoxes that attend the exercise of the most powerful political office in the world's oldest democracy: Can an executive office be constructed with sufficient energy to govern and also be democratically accountable? What are the limits on presidential power? How much do we attribute the shaping of politics to the agency of the individual in the office and to what extent are politics the result of structural, cultural, and institutional factors? Are the politics of the presidency different in foreign and domestic policy? How are national security concerns balanced with the protection of civil rights and liberties? How is the office and purpose of the presidency affected by an economic order predicated on private capital? By the character of the occupant? Exploration of these and other questions will lead us to examine topics such as presidential selection, the bases of presidential power, character and leadership, congressional-executive interactions, social movement and interest group relations, and media interactions. Attention will focus largely on the modern, twentieth and twenty-first century, presidency, though older historical examples will also be used to help us gain perspective on these problems.

Class Format: The course will feature both seminar discussion and several small group research projects.

Requirements/Evaluation: three 5 to 7-page papers, small group projects, and class participation involving weekly writing

PSCI 220 (F) The U.S. and Afghanistan: A Post-Mortem (DPE)

Cross-listings: GBST 208 ASIA 208 ANTH 208 PSCI 220

Secondary Cross-listing

The United States attacked and defeated the Afghan Taliban regime over in the course of a few short weeks in 2001. Within a few years, the finality of that victory was brought into question as the Taliban regrouped and eventually reasserted itself as a formidable guerilla army that the U.S. military could not easily defeat. At the same time that it was facing a more difficult military challenge than anticipated, the United States got bogged down in the process of nation-building, as well as efforts at social reform. This course examines the history of American involvement in Afghanistan, beginning with the Cold War when the U.S. used Afghanistan as a test case for new models of political modernization and economic development. We will go on to discuss the U.S. support for Islamist political parties during the Soviet occupation of Afghanistan in the 1980s and the consequent rise of the Taliban, and the role of Afghanistan in the September 11th attacks and the "War on Terror" that followed. The course will conclude with a consideration of the impact and legacy of the two decades of nation-building and social reform carried out by the United States since 9/11.

Requirements/Evaluation: grading will be determined by class participation, two short (500 word) essays, and a 15-page research paper

Prerequisites: none

Enrollment Limit: 20
Enrollment Preferences: Anthropology and Sociology majors, Global Studies concentrators, Political Science and Asian Studies majors will get preference

Difference, Power, and Equity Notes: This tutorial examines the Cold War between the US and the USSR and attempts to use intellectuals to shape and promote the objectives of powerful state entities. The power struggle between the two "superpowers" impacted cultural production and authors. Some of those authors influenced or enlisted into the Cold War sought equity and equality for their communities and eventually fought against the very political powers that employed them.

Not offered current academic year

PSCI 222  (F)  International Relations in the Cyber Age

This is a class about international politics in the age of cyberweapons. At a general level, it focuses on a set of core conceptual questions: How has the advent of cyberweapons changed how international politics works? Are cyberweapons that target critical infrastructure similar to nuclear weapons, or is that comparison fundamentally flawed? Do concerns about information security alter states' most basic political calculations? How can we expect cyberweapons to shape the future of warfare, intelligence, and security competition? How effective are strategies like cross-domain deterrence? Should the world try to regulate the use of these technologies and, if so, how exactly? The course begins with several sessions that provide a technical overview of key information security concepts and an examination of some prominent hacks. In addition, the beginning of the course will include several classes on the theoretical implications of the advent of the cyber age, as well as a brief historical overview of information security in the
post-World War II period. From there, the course will cover a number of important topics and case studies, such as Stuxnet, NotPetya, cyber espionage, intellectual property theft, threats to critical infrastructure, misinformation, propaganda, election interference, the potential implications of quantum computing, and the prospects for the establishment of an international cyber arms control regime. In general, the course will focus on competition between some of the world’s premier cyber powers, such as China, Iran, Israel, North Korea, Russia, and the United States.

Requirements/Evaluation:  Class participation; Two analytical essays, 6-7 pages in length; Final exam

PSCI 223  (F)  International Law

International law embodies the rules that govern the society of states. It spells out who can be a sovereign state and how to become one, what states can do, what they cannot do, and who can punish transgressions. It also creates status for other actors, such as international organizations, soldiers, national liberation movements, refugees, terrorists, transnational air and sea shipping companies, and multinational corporations. International law is similar to domestic law, with one very crucial difference: it is not enforced by a centralized, sovereign state. There is no world government. In most other respects, it is the same: it protects the status quo, including the unequal distribution of power among its members; it spells out legitimate and illegitimate ways of resolving conflicts of interest; it is biased toward the powerful and legitimates their interests; it tells its members how to act to coordinate their interests and minimize direct conflict; some of it is purely aspirational, some of it necessary for survival. Like domestic law, it is enforced only some of the time, and then against the weak more than the strong. Yet, law is still where we look for justice and, perhaps, for power to be tamed by the pressure to be legitimate.

Requirements/Evaluation:  quizzes, Glow posts, two papers on assigned topics, two projects (video, audio, or paper)

Prerequisites:  None, although those who have not taken PSCI 202 at Williams will be required to review one lecture ppt, then pass a basic quiz based on it by the end of the first week.

Enrollment Limit:  25

Enrollment Preferences:  Political Science majors, JLST concentrators

Expected Class Size:  25

Grading:  no pass/fail option,  yes fifth course option

PSCI 224  (F)  Neo-liberalism: What Is It and Why Does It Matter?

We live in the era of neo-liberalism. But what does this mean? This course will focus on neo-liberalism in comparative perspective, looking mainly at the US and Europe. It will consider how neo-liberalism is defined, the role of states in making and maintaining neo-liberalism, the centrality of markets to neo-liberal conceptions, and the kinds of politics that produced and are produced by neo-liberalism. Economically, the course will look at the institutional configuration of neo-liberalism, changes in economies, growing inequality, the financial crises, and prevalence of debt. Politically, the course will address changes in the role of government, what governments do and do not do, the growing influence of financial interests, the role of identities in mobilizing support for and legitimating governments, and the impact of these developments on the status of citizenship and democracy.

Requirements/Evaluation:  three papers: one 3-page, one 5-page, and one 10-page paper

Prerequisites:  none
Enrollment Limit: 20
Enrollment Preferences: Political Science majors
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option

PSCI 225 (S) International Security

Cross-listings: LEAD 225 PSCI 225

Primary Cross-listing
This is a course about war and peace. It deals with some of the most foundational questions that concern scholars of security studies: What accounts for great power conflict and cooperation? Is intense security competition between major states inevitable, or can they get along, provided their main interests are protected? Does the structure of the international system necessarily cause conflict? Do particularly aggressive states? Can wars occur "by accident"? When and why do states choose to use military force? What role does statecraft play in matters of war and peace? How do nuclear weapons affect great power politics? The course will consider these questions from an interdisciplinary perspective that combines political science concepts with an historical approach to the evidence. The bulk of the course deals with the major events in the history of great power politics, such as the causes and conduct of World War I and World War II; the origins and course of the Cold War; the nuclear revolution; and the post-Cold War period. The course concludes with an examination of a number of major contemporary policy debates in security studies.

Requirements/Evaluation: class participation, two 6- to 8-page papers, final
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Political Science majors
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option

PSCI 226 (S) Nuclear Weapons and World Politics

Cross-listings: PSCI 226 LEAD 226

Primary Cross-listing
This is a course about international politics in the nuclear age. The class will address a combination of conceptual, empirical, and policy questions, such as: Have nuclear weapons had a "revolutionary" effect on world politics, such that, fundamentally, international relations no longer works in more or less the same way that it did before the advent of nuclear weapons in 1945? Do nuclear weapons have an essentially stabilizing or destabilizing effect? How, if at all, do nuclear weapons affect how political disputes run their course? How significant of a threat are concerns like nuclear proliferation, nuclear terrorism, and nuclear accidents? How does a state's nuclear posture affect basic political outcomes? Is it possible to return to a world without nuclear weapons? The course will focus on these questions using an interdisciplinary perspective that leverages political science concepts, historical case studies, and contemporary policy debates to generate core insights. It will not only survey the history of the nuclear age--and of individual countries' nuclear development--but also grapple with important contemporary policy dilemmas in the nuclear realm.
**Requirements/Evaluation:** class participation; two 6-8 page papers; short in-class presentations; final exam

**Prerequisites:** PSCI 202 or a significant amount of other PSCI coursework

**Enrollment Limit:** 25

**Enrollment Preferences:** Preference to students majoring in political science, particularly in the international relations subfield, and/or doing a concentration in leadership studies

**Expected Class Size:** 20-25

**Grading:** no pass/fail option, yes fifth course option

**PSCI 227 (S) International Relations of the Middle East**

**Cross-listings:** PSCI 227 LEAD 227

**Primary Cross-listing**

This is a course about the Middle East in international politics. The structure of the course combines political science concepts with a detailed survey of the region's diplomatic history. The basic format of the course will be to combine brief lectures–either posted on the class website beforehand or given at the start of each class–with an in-depth discussion of each class session's topic. The goal of these discussions is to generate debates over the conceptual, historical, and policy significance of the subjects that we cover. Specifically, the first section of the course will cover the emergence of the Persian Gulf as an area of strategic importance in international politics; U.S. policy toward Saudi Arabia and Iran after World War II; the origins of the Arab-Israeli dispute; the June 1967 and October 1973 Middle East conflicts; Egyptian-Israeli peace; the Iranian Revolution and the Iran-Iraq War; the 1991 Persian Gulf War and its consequences; and the rise of Al Qaeda, Hezbollah, and Hamas. The second part of the course focuses on the Iraq War and its consequences; the rise of ISIS; the Arab Spring; Turkey's changing foreign relations; and the war in Syria. The last section of the course covers contemporary policy challenges confronting the Middle East.

**Requirements/Evaluation:** class participation, two 6- to 8-page papers, final

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Political Science majors with an International Relations concentration, History majors

**Expected Class Size:** 12

**PSCI 228 (S) International Organization**

Tens of thousands of international organizations populate our world. IGOs, whose members are sovereign states, range from the Nordic Association for Reindeer Research to NATO and the UN; INGOs, whose members are private groups and individuals, include the International Seaweed Association as well as Doctors Without Borders and Human Rights Watch. We will investigate theories about where they come from, what they do, and to whom they matter, and explore controversies surrounding their agency, legitimacy, efficiency, and accountability. We cover the history, structures and functions of international organizations using case studies.

**Requirements/Evaluation:** two short papers, a presentation, one longer paper, one group project.
Prerequisites: none, but the introduction to international politics (202) is strongly recommended. If you have not taken that, you will need to go through a four-hour online tutorial I have set up by the end of our first week. Open to first-year students

PSCI 229  (S)  Global Political Economy

This course offers a broad introduction to the contemporary global political economy, emphasizing the inherent and inseparable intertwining of politics and economics, power and wealth, the state and the market. The core of the course is made up of analyses of global trade, global finance, natural resources, and migration, with special attention to subjects such as free trade, currency wars, and border walls. Four class debates will focus general concepts on a specific topic: the global implications of the Russo-Ukrainian War. We conclude the course with a look toward the future of global capitalism and of the liberal world order.

Requirements/Evaluation: two 2000-2500 word papers, in-class debate, final exam, class participation

Prerequisites: none

PSCI 231  (F)  Ancient Political Thought

Cross-listings: PHIL 231 PSCI 231

Primary Cross-listing

The core activity of this seminar is the careful reading and sustained discussion of selected works by Plato and Aristotle, but we will also engage such other thinkers as Epictetus and Augustine, and, from a political and theoretical point of view, selections from the Hebrew Bible and New Testament. Among the questions that we will address: What is justice? How can it be known and pursued? How is political power generated and exercised? What are the social and ethical prerequisites—and consequences—of democracy? Must the freedom or fulfillment of some people require the subordination of others? Does freedom require leading (or avoiding) a political life? What distinguishes that kind of life from others? What does it mean to be "philosophical" or to think "theoretically" about politics? Although we will attempt to engage the readings on their own terms, we will also ask how the vast differences between the ancient world and our own undercut or enhance the texts' ability to illuminate the dilemmas of political life for us.

Class Format: discussion

Requirements/Evaluation: three 7- to 8-page papers

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Political Science majors

Cross-listings:  PSCI 232 PHIL 232

Primary Cross-listing
This course is a chronological survey of major works of political theory from the 16th to the 20th century. In discussions and writing, we will explore the diverse visions of modernity and of politics offered by such thinkers as Machiavelli, Hobbes, Locke, Rousseau, Marx, Mill, and Freud. They help us ask: What is freedom? Who is equal? Who should rule? With what limits and justifications? What form of government best serves the people? Who are the people, anyway? And on what grounds can we justify confidence in our provisional answers to such questions? Class will be primarily driven by discussion, often preceded by brief lectures. Attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Requirements/Evaluation:  three papers of 4-6 pages; class participation; brief informal writing tasks inside and outside of class meetings
Prerequisites:  none; open to all
Enrollment Limit:  25

Spring 2024
SEM Section: 01   MR 2:35 pm - 3:50 pm   Laura D. Ephraim

PSCI 234  (S)  Freedom
We all want to be free--at least most of us say we do. The desire for political freedom is as old as the ancient world and as new as today's movements and liberation struggles. But what do we mean when we claim to want freedom? What institutions and social conditions make political freedom possible? For instance, do the claims of individual freedom conflict with those of community? With equality? With authority? Does freedom make us happy? Is it what we really want? And if it is, will we find it by engaging or turning away from politics? This course confronts these questions through readings drawn from a variety of classic and contemporary sources, including works of fiction, autobiography, journalism, law, philosophy and political theory, and social science. Our discussions will address such topics as activism and stoicism; equality and economic freedom; sexual freedom and gender politics; freedom of speech and religion; citizenship, migration, and cosmopolitanism; racism and colonialism; mass incarceration; and the uses and limits of state power. This course is part of a joint program between Williams' Center for Learning in Action and the Berkshire County Jail in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates and will be held at the jail. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Transportation will be provided by the college. *Please note the atypical class hours, T. 4:45-8:30 pm*

Requirements/Evaluation:  Class attendance and active participation, short essays, and a final paper.
Prerequisites:  Not open to first-year students.
Enrollment Limit:  9
Enrollment Preferences:  Final selection will be made on the basis of statements of interest solicited after pre-registration, and interviews with the instructor.
Expected Class Size:  9
PSCI 235  (S)  Survival and Resistance: Environmental Political Theory

Cross-listings:  ENVI 235 PSCI 235

Primary Cross-listing

Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have "rights"? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet's health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory's traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Requirements/Evaluation:  formal and informal writing assignments and class participation

Prerequisites:  none

PSCI 236  (S)  Feminist Legal Theory  (DPE)

Cross-listings:  WGSS 236 PSCI 236

Primary Cross-listing

What can a critical analysis of gender and sexuality bring to the study of law, constitutions, legal interpretation, and the task of judging? Well-known contributions by feminist theorists include the conceptualization and critique of anti-discrimination frameworks, the legal analysis of intersecting systems of social subordination (particularly gender, race, class, sexuality, disability), and the theorization of "new" categories of rights (e.g. sexuate rights). Accompanying these interventions in the legal field is a deep and sustained inquiry into the subject of law: Who can appear before the law as the proper bearer of civil and human rights? What kinds of violations and deprivations can be recognized as harms in need of redress? Who gets to make these judgments, and according to what rules? While our examples will be drawn mainly from family law, the regulation of sex/reproduction, and workplace discrimination, the main task of this course will be to deepen our understanding of how the subject of law is constituted. Illustrative cases to aid our inquiry will be drawn primarily from the USA and Canada, with additional examples from India, South Africa, and possibly European law. Theorists we read will represent many kinds of feminist work that intersect with the legal field, including academic studies in political theory, philosophy, and cultural theory, along with contributions from community organizers engaged in anti-violence work and social justice advocacy.

Requirements/Evaluation:  One oral presentation; three 6-8 page papers; regular class participation.

Prerequisites:  None.

Enrollment Limit:  25
Enrollment Preferences: Preference will be given to PSCI and WGSS majors and JLST concentrators.

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

PSCI 238 (F) Economic Liberalism and Its Critics

Cross-listings: PSCI 238 POEC 250 ECON 299

Secondary Cross-listing

Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx's revolutionary socialism, and the reformist ideas of John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Joseph Schumpeter, Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant topics relevant to the themes of the course, with applications to current public policy issues, such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; social media and addiction; economic nationalism; behavioral economics; climate change and intergenerational equity; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

Class Format: This course uses a flipped classroom approach. Before each class meeting, students watch a lecture video, and (at least six times) write an essay relating to the assigned reading and video. In-person class time is devoted primarily to Socratic discussion.

Requirements/Evaluation: six short essays and a final exam

Prerequisites: ECON 110 and 120 or equivalent; PSCI 110 (formerly PSCI 201; may be taken concurrently with POEC 250); open to non-majors

Enrollment Limit: 30

Enrollment Preferences: Political Economy majors and sophomores intending a Political Economy major

PSCI 240 (S) Political Theory and Comparative Politics
We live in a society that takes liberalism and capitalism for granted, as the norm that naturally centers collective life. This course draws on foundational thinkers in political theory and comparative politics to explore that premise. To that end, the course will discuss the origins, logic, and meaning of liberalism and capitalism and the relationships between them. Asking whether liberal thought, to borrow the famous joke about economists, assumes the can openers of liberalism and capitalism, taking as given that which is constructed historically, the course will look at leading theories about the role states play in constituting and maintaining capitalist economies, the definition and nature of power in liberal societies, and, more recently, the connection between identities, politics, classes, and states. The readings include Alexis de Tocqueville, Karl Marx, Max Weber, Karl Polanyi, Barrington Moore, Robert Putnam, Michel Foucault, and Edward Said.

**PSCI 244 (S) Anti-Muslim Racism: A Global Perspective**  (DPE)

**Cross-listings:** GBST 243 PSCI 244 REL 247
Secondary Cross-listing

The racialization of Islam and Muslims has been constitutive to how they have been imagined in Europe and elsewhere. This course looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. It goes back to the founding moments of an imagined white (at the beginning Christian) Europe and how the racialization of Muslim and Jewish bodies was central to this project, and how anti-Muslim racism continues to be relevant in our world today. The course will not only show how Muslims were constructed as subjects in history, politics and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. Rather, it also looks at how Muslims live through Islamophobia. It looks at processes of racialization of Muslims within the Muslim community and between Muslim communities, while also considering which agencies Muslims take to determine their own future. The course draws from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology.

Requirements/Evaluation: Active class participation, two response papers, and a comprehensive, open-book and open-note final exam.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Global Studies concentrators and Religion majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Unit Notes: Also qualifies for the GBST Urbanizing World track

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 246 (F) Introduction to Capitalism
Must we choose between “socialism or barbarism?” A century after Rosa Luxemburg’s challenge, it is clear that socialism did not win. Does this mean that we have descended to barbarism? Tracing the path of capitalist development in the rich democracies suggests a range of responses. Some states have developed robust institutions that provide for citizens’ basic needs and check the power of business; others leave the poor threatened by starvation and workers exposed to exploitation. How and why has capitalism evolved in different forms in different countries? This course introduces students to capitalism by examining the struggles between social groups that lead to variation in distributional outcomes and economic performance. Students will develop a conceptual toolkit to study the politics of capitalism based in the economic history of the rich democracies (Europe, United States) in the twentieth century. The second half of the course challenges students to apply this toolkit to the twenty-first century, focusing on attempts to transition from industrial manufacturing to services. We engage pressing questions around technological innovation, populism, financialization, and globalization.

Requirements/Evaluation: Class participation, two presentations, three essays.

Prerequisites: None.

Enrollment Limit: 25

Enrollment Preferences: Potential and actual PSCI and POEC majors.

PSCI 248 (F) The USA in Comparative Perspective (WS)

Politics in the USA is often considered unique and incomparable, and US political science separates the study of American politics from comparative politics. This course overcomes this divide, considering politics and society in the United States comparatively, from a variety of viewpoints and by authors foreign and American, historical and contemporary. Important topics include: the colonial experience and independence; race relations and the African diaspora; national identity and authoritarian populist nationalism; war and state-building; American exceptionalism, religion, and foreign policy;
criminal justice; and the origins and shape of the welfare state. (As the list suggests, the most common comparisons are with Latin America and Western Europe, but several of our authors look beyond these regions.)

Class Format: a lecture in the first week; then ten weeks of tutorial; then a discussion class in the final week

Requirements/Evaluation: five 5- to 6-page papers, five 1- to 2-page responses, and one 1-page essay for the final class

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: sophomores and students who have been denied enrollment in the course previously

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Assignments are graded and returned weekly. After each student has written one long paper and one response, professor meets with them individually to discuss the composition and presentation of each genre. For the final class, students bring a one-page response written in "E-prime," English without the verb "to be."

Cross-listings: AMST 218  PSCI 249

Secondary Cross-listing

What does it take to be free in the free world? In this class we explore the dark side of democracy. The title is inspired by C.L.R. James' famous book, Black Jacobins, about the Haitian Revolution (1791-1804). This revolution was the most successful revolt of the enslaved in recorded history. But the irony is that their oppressors were the leaders of the French Revolution across the Atlantic. Those who proclaimed "liberty, egalit, fraternity" for themselves violently denied them to others. There is a similar dismal irony to the American Revolution, as captured by the title of Frederick Douglass’ famous 1852 speech, "What to the Slave Is the Fourth of July?" Not even the Civil War could resolve this issue, as demonstrated by the failure of Reconstruction and the rise of Jim Crow. To revisit this history, we will read W.E.B. Du Bois’ great book, Black Reconstruction in America. Alongside a selection of readings by canonical postcolonial writers and current political theorists, James and Du Bois provoke us to ask what it would take for the democratic world to be truly free.

Requirements/Evaluation: Participation, weekly journal, two 5-page essays

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: AMST majors or prospective majors

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 218(D2)  PSCI 249(D2)

Writing Skills Notes: "Black and Brown Jacobins" is a writing-intensive course that requires weekly journaling. Journal entries are a means for students to track the progress of their learning, reflect on the reading assignments, practice their writing skills, and receive written feedback. In addition, students will write two persuasive essays in response to a prompt.

Difference, Power, and Equity Notes: "Black and Brown Jacobins" calls into question the success of modern democracy from the perspective of minoritized groups, in particular Black Americans and Afro-Caribbeans. Students will grapple with the legacy of enslavement in the Americas, the Haitian Revolution (1791-1804), the American Civil War and Reconstruction (1861-1877), Jim Crow, and our current era of mass incarceration. The question driving this course is, what does it take to be free in the free world?

PSCI 250  (F)  Political Psychology
This course will examine the role of psychology in politics. The goal is to develop a rich understanding of the foundations of public opinion and political behavior. We will examine the role of social identities, partisan affiliation, concrete interests, values, issues, and ideology in shaping opinion and behavior, as well as the role of external forces such as campaigns, the media, and political elites. Along the way, we will consider a number of longstanding questions in the study of politics, such as: is the public rational? What are the root causes of racism? How does racism influence political choices? Why do people identify with political parties? Why do people vote or engage in other types of political action? How does the mass media and campaigns influence public opinion?

Requirements/Evaluation: class participation, 1-2 short papers (5-7 pages), 1 medium paper (8-12 pages), an oral presentation, and a final exam
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: If the course over-enrolls, please give first enrollment preference to political science majors, followed by political economy majors.
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option

PSCI 252  (F)  Campaigns and Elections
The 2022 midterm elections are happening in November. Though midterm elections historically generate less involvement than presidential elections, much is at stake in the upcoming midterms, as control of Congress and statehouses will likely determine what, if anything, President Biden achieves in the remainder of his term. This course will examine how we conduct the most fundamental of democratic processes in the United States: the people's choice of their representatives. We will examine factors that shape election outcomes such as the state of the economy, issues, partisanship, ideology, social identities with a special focus on race, interest groups, media, and the candidates themselves. A central question we will consider throughout the course if how "democratic" the conduct of campaigns actually is. For instance, does the citizenry have the motivation and capacity to hold public officials accountable? How do resource gaps tied to inequality in society (such as race and class) influence who votes and for whom? Do the mass media and political elites inform or manipulate the public? How closely do candidates resemble the constituencies they represent, and does it matter? We will apply our learning on many of these topics to the ongoing 2022 midterm elections.

PSCI 253  (S)  The Tragedy of Venezuela
The recent history of Venezuela offers a window into many of the most important political and economic issues faced by people in developing countries. Why does an abundance of oil seem to solve some problems while often leading to perverse economic and political outcomes? How can democracy be made to work better for ordinary people? What does it mean for a government to be truly sovereign? How does corruption grow and...
what can we do about it? When should we leave important decisions to technocratic experts? What does it mean today to be progressive? The course first briefly reviews Venezuelan post-Independence history, with an emphasis on the post-1958 democratic settlement. It then explores more deeply the reasons for the breakdown of this settlement, the rise of Hugo Chavez, and the decay of the “21st Century Socialist” regime under Chavez and Maduro. Materials include biographies, documentary films, short videos, economic data, and news reports.

Class Format: discussion

PSCI 255 (F) Comparative Politics of South Asia

South Asia is home to around 2 billion people (over 24% of the world), making it the most populous and densely populated region in the world. The region is also one of the poorest in the world and lags in human development. Ethnic, linguistic, and religious diversity is offset by common cultural traditions and practices that serve to unite the people of the Indian Subcontinent. The course introduces students to the comparative politics of South Asia, highlighting the complexities and potential of the region. Every week we explore a different component of South Asian politics. The course covers the creation of the states of modern South Asia, partition and independence, democratization, electoral politics and political parties, economic and social development, ethnic identity and conflict, and the contemporary regional challenges of democratic backsliding and climate change.

Requirements/Evaluation: three 5-7 page papers or one research paper; presentation; class participation

PSCI 256 (S) Electoral Politics in the Developing World

Electoral politics in the developing world often differs from democratic politics in Western Europe and the U.S. Electoral volatility, decrepit state institutions, weak parties, clientelism, and electoral violence in developing democracies complicate foundational theories on representation and accountability. The course surveys the electoral politics of low and middle-income democracies in the developing world, investigating its similarities and differences with the historical and contemporary politics of developed democracies. It examines work on electoral systems, formal and informal institutions, bureaucratic politics, political parties, party systems, clientelism, ethnic politics, and political violence. We will draw on case studies from Latin America, Africa, South Asia, Southeast Asia, and the Middle East to analyze the effectiveness of these theories. Assignments focus on crafting solutions to contemporary political challenges in the developing world.

Requirements/Evaluation: one to two papers, midterm, group policy brief, presentation

PSCI 259  (F)  George Orwell: Capitalism, Socialism and Totalitarianism

It is hard to overstate the enduring influence of George Orwell on political discourse in the 20th century and beyond. Before his death in 1950 at the young age of forty six, Orwell produced a stunningly large and diverse body of work in the fields of journalism, literature, and political commentary. Much of this work was inspired by his own experiences as a police officer in Burma, several years working and traveling with destitute workers in England and France, as well as his experiences fighting against fascism during the Spanish Civil War in the late 1930s. While a fairly obscure and struggling author for much of his life, Orwell achieved worldwide fame after the Second World War with the publication of Animal Farm (1945) and 1984 (1949). This tutorial has two main objectives. First, it will introduce students to Orwell's most important books and essays in the context of a turbulent political era marked by the Great Depression, the rise of totalitarianism, world war, and the emerging Cold War. Second, the tutorial will examine the past and ongoing uses and abuses of Orwell's legacy by scholars and analysts on both the political left and the right. As Louis Menand argues, "almost everything in the popular understanding of Orwell is a distortion of what he really thought and the kind of writer he was." The course will conclude by examining what Orwell's thought contributes to a consideration of current issues ranging from the emergence of cancel culture to the possibilities of democratic socialism in the 21st century.

Requirements/Evaluation: 4 lead essays of 5-6 pages and 4 response essays of 2 pages.

Prerequisites: At least one introductory political science course.

Enrollment Limit: 10

Enrollment Preferences: Declared and prospective political science majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

PSCI 260  (F)  Power, Feminist-Style  (DPE) (WS)

Cross-listings: PSCI 260 WGSS 260

Secondary Cross-listing

This course examines one of the most important concepts in the analysis of sex and gender and efforts to envision sexual and gender justice, the concept of power, from multiple feminist perspectives. At the core of feminism lies the critique of inequitable power relations. Some feminists claim that power itself is the root of all evil and that a feminist world is one without power. Others portray the feminist agenda as one of taking power, or of reconstructing society by exercising a specifically feminist mode of power. In this course, we will look at feminist critiques of power, how feminists have employed notions of power developed outside of the arena of feminist thought, and efforts to develop specifically feminist ideas of power. Along the way, we will ask: Are some concepts of power more useful to feminism? Can certain forms of power be considered more feminist than others? How can feminist power be realized? Thinkers we will engage include Judith Butler, Audre Lorde, Catherine MacKinnon, Hannah Arendt, and Patricia Hill Collins.

Requirements/Evaluation: eight short writing assignments (ranging from 250 words to 750 words), drafting and revision of a 10 pg final essay

Prerequisites: none

Enrollment Limit: 19
Enrollment Preferences: Women's, Gender, and Sexuality Studies majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 260(D2) WGSS 260(D2)

Writing Skills Notes: This course aims to carefully unpack the writing process by focusing on particular elements of writing (summary, critical analysis) while also introducing students to tools they can use to improve their writing (freewriting). Short writing assignments like the proposal, outline, and abstract build on one another and culminate in a final essay that goes through the process of drafting and, after peer and teacher review, revision.

Difference, Power, and Equity Notes: This course requires students to focus on what power does and should look like from the perspective of difference, exploring the relationship between power and equity in the process. Students will reflect on and discuss the working of power in their own lives, why certain forms of power are more or less visible to particular groups, and how different ideas about power promote different interests in society at large.

PSCI 261 (F) The Arab-Israeli Conflict (WS)

This tutorial will cover the Arab-Israeli dispute—from both historical and political science perspectives—from the rise of the Zionist movement in the late nineteenth century to the present day. It will examine the various explanations that scholars have offered for why the conflict has persisted for so long, how it has evolved over time, the role that outside powers have played in shaping it, and how its perpetuation (or settlement) is likely to impact Middle East politics in the future. More specifically, the class will examine the origins of the Zionist movement; the role that the First World War played in shaping the dispute; the period of the British mandate; the rise of Palestinian nationalism; the Second World War and the creation of the state of Israel; the 1948, 1956, 1967, and 1973 Arab-Israeli wars; Israel's 1982 invasion of Lebanon and its consequences; the promise and ultimate collapse of the Oslo peace process during the 1990s and early 2000s; the rise of groups such as Hamas, Hezbollah, and Palestinian Islamic Jihad; the rightward shift in Israeli politics since 2000; the intensification of Israeli-Iranian antagonism and its implications; the shift in Israel's relations with the Sunni Arab world that has occurred in recent years; and the future of the conflict.

Requirements/Evaluation: Biweekly response papers; Biweekly critiques of partner's response papers; Class participation; Final analytical essay

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Political Science Majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: This class will require students either to write a paper or critique their partner's paper on a weekly basis. Students will also be required to redraft their papers—based on feedback from both their partner and the instructor—with the goal of improving their ability to make compelling arguments in writing.

PSCI 262 (S) America and the Cold War

Cross-listings: PSCI 262 LEAD 262 HIST 261

Primary Cross-listing

This course examines the rise and fall of the Cold War, focusing on four central issues. First, why did America and the Soviet Union become bitter rivals shortly after the defeat of Nazi Germany? Second, was one side primarily responsible for the length and intensity of the Cold War in Europe?
Third, how did the Cold War in Europe lead to events in other areas of the world, such as Cuba and Vietnam? Finally, could the Cold War have been ended long before the collapse of the Soviet Union in 1989? Political scientists and historians continue to argue vigorously about the answers to all these questions. We examine both traditional and revisionist explanations of the Cold War, as well as the new findings that have emerged from the partial opening of Soviet and Eastern European archives. The final section of the course examines how scholarly interpretations of the Cold War continue to influence how policymakers approach contemporary issues in American foreign policy.

Class Format: lecture/discussion

Requirements/Evaluation: one medium length paper, an in-class midterm and final exam, and a series of short assignments

Prerequisites: none; PSCI 202 is recommended but not required

PSCI 266 (S) The United States and Latin America (DPE)

This course examines the most important political and diplomatic divide in the Western Hemisphere. The first half is a historical survey of U.S.-Latin American foreign relations from the early Spanish American independence movements through the end of the Cold War and recent developments. We consider how this history confirms or undermines influential views about U.S. foreign relations and about international relations generally. We also compare historical U.S. foreign policy toward the hemisphere to U.S. policy toward the entire world after the Cold War. The second half covers the most important current issues in hemispheric relations: the rise of leftist governments in Latin America; the war on drugs; immigration and border security; and competition with China for influence. At the end we briefly reconsider current U.S. policies in historical perspective.

Class Format: more lecture in the first half, more discussion and several in-class debates in the second

Requirements/Evaluation: a map quiz, a 2-page paper, two 3-page papers, and either another 3-page paper and a regular final exam, or a 12-page research paper and a short final exam

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: Political Science majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: In the paper that considers the first part of the course, the students weigh to what extent U.S. policy toward Latin America was affected by the largely derogatory attitudes of U.S. diplomats toward Latin Americans. A unit in the second part of the course critically analyzes current U.S. immigration policy in this context.

PSCI 268 (S) Israeli Politics

This is an introductory course on Israeli politics. Approaching questions historically, it centers on but is not restricted to the conflict between Zionism and Palestinians. It begins by addressing the arrival of Zionists, the pursuit of statehood and the in-gathering of Jews, and the responses of neighboring Arab states and local Palestinians. The course also will examine the arrival of Arab Jews in the 1950-60, the conflicts between them and European Jews, and the effects of their conflicts on Israeli politics. The course then will turn to Israeli settlement policies on the West Bank, the controversies surrounding the Oslo Agreement, and the contemporary situations in the West Bank and Gaza. Finally, the course will address
contemporary controversies about what it means to be a Jew in Israel, about the feasibility of a "two-state" solution to the Palestinian issue, about the prospects and implications of a "one-state" solution, and about the implications for Israel of not resolving the Palestinian issue to the mutual satisfaction of Israelis and Palestinians.

PSCI 280  (S)  Silicon Valley: Digital Transformation and Democracy  (WS)
Nearly every country in the world seeks to drive economic growth by promoting digital technologies. The universal model is Silicon Valley. In this tutorial, students will examine the origins of the Silicon Valley model and other countries' attempts to emulate it. Departing from "just so" stories of technological determinism, we take up the lens of comparative political economy to investigate the politics that allowed US tech firms to shape economic policy to meet their interests. It is no accident that tech became a symbol for economic growth in the 1970s, precisely when it also began to build powerful alliances in Washington. After investigating the origins of the Silicon Valley model, we trace attempts to adopt it in Europe and Asia, which highlight the model's political contingencies and some of the more salient conflicts over the tech sector. We focus on the ways in which the Silicon Valley model can threaten social welfare through economic inequality and precarious employment, and engage a variety of perspectives, including workplace ethnography, to examine these threats, as well as potential regulatory responses. The course concludes by considering what policies could be appropriate for supporting, while also regulating, the tech sector in the twenty-first century.

Requirements/Evaluation: Five 5-page papers; five 2-page responses; participation
Prerequisites: One introductory course in political science and/or permission of the instructor.
Enrollment Limit: 10
Enrollment Preferences: Preference will be given to sophomores and juniors majoring in PSCI and POEC.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

PSCI 281  (S)  Contemporary African Politics  (DPE)
Cross-listings: PSCI 281 GBST 281
Primary Cross-listing
This course is an introduction to the contemporary politics of Africa, with the aim of sparking a life-long interest in the affairs of the region. Comprised of nearly 50 countries and home to over 1 billion people, sub-Saharan Africa is remarkable in its diversity, particularly in regards to a number of outcomes central to the study of political science: how do institutions of the past shape current dynamics of political competition and economic growth? Why are some countries stable democracies while others struggle with military coups or authoritarian rule? What sparks political violence and how can countries emerge from conflict? Our focus is both contemporary and comparative, organized thematically around common political experiences and attributes across the region. We begin with the legacies of colonialism, the slave trade, and the politics of liberation. We then interrogate dynamics central to political life in Africa over the 60 years since independence: the role of ethnic diversity in shaping competition, the prominence of patronage politics, and the evolution of elections. We next assess major dimensions that have historically shaped the study of African politics, including conflict and violence, economic development, and foreign aid. The final section takes a comparative approach to some of the most pressing issues in Africa today: health crises, migration and mobility, technological revolution, climate change, and the emerging power of women and youth.
Class Format: A typical class session will be about 60% lecture and 40% discussion

Requirements/Evaluation: Class Participation, Map Quiz, 3 short papers (5 pages)

Prerequisites: None.

Enrollment Limit: 25

Enrollment Preferences: all first-years and sophomores; those juniors and seniors majoring in political science or concentrating in Global Studies.

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

PSCI 286 (F) Conservative Political Thought
Conservative thinkers claim to be leading an intellectual transformation away from the tired nostrums of liberalism. They see themselves as original, dynamic, serious. This course will read leading conservative political thinkers with a view to identifying their central tenets, both negative and positive. What is it that they oppose and support? What, if anything, defines contemporary conservative thinking? Is it a coherent body of thought, a doctrine, or a collection of disparate and conflicting thinkers? What is the relationship of thinkers who emphasize the market, order, and traditional values? And what are their views on diversity, citizenship, and race, and how do heterodox leftists fit with conservative critiques of managerial liberalism?
Requirements/Evaluation: Two 8-10 page papers and final exam
Prerequisites: Political Science Majors

PSCI 288 (F) Transnational Political Movements
This course focuses on the international dimensions of when people demand political change. We explore transnational dynamics of contentious politics, including how international actors shape domestic campaigns for democracy, peace, and justice, as well as how global advocacy movements (e.g., climate change) are organized and mobilized. Building from an international relations framework, the course brings together a variety of texts, including documentaries, social media, and guest speakers working on the front lines of global advocacy (refugee rights, anti-colonial liberation struggles, and contemporary pro-democracy movements). We critically analyze how external actors and resources inform politics on the ground, both around the world and over time, as well as evaluate the normative implications of "foreign intervention."
Requirements/Evaluation: Participation, 3 short papers, final project

PSCI 289 (S) The welfare state in comparative perspective
Cross-listings: PSCI 289
Primary Cross-listing
Modern life has, in some ways, become less risky. You are unlikely to be trampled by a mammoth. But social risk has not disappeared—you could lose your job, get into an accident, or find yourself plunged somehow into poverty. Most countries around the world have built elaborate institutions to ensure citizens' welfare by protecting some people from some risks, but not all people and not all risks. Moreover, these institutions vary considerably
both over time and between countries. This course examines those institutions. Our goal is to explain how and why welfare states vary and why there is so much inequality in the distribution of risk. We will do so by investigating the different kinds of institutions that mediate risks throughout the lifecycle, from parental leave to old age pensions, and by comparing these institutions between different countries. While focusing primarily on the welfare states of Western Europe, we will also examine how the politics of social risk unfold around the world, extending our investigation to Africa, Asia, and Latin America. We will conclude by reflecting on what lessons the welfare state offers for managing this century's biggest social risk: climate change.

PSCI 291 (S) American Political Events (WS)

Scandals. Wars and assassinations. Contested elections, Supreme Court decisions, and constitutional amendments. As large as they loom in our daily experience and our historical memory, these sorts of events--concrete, discrete things that happen in and around the political world--are often underestimated as catalysts of political change. Indeed, in the study of American political development, we often look to complex processes and underlying causes as explanations for how and why ideas, institutions, and policies both emerge and evolve. Yet for all our focus on long-term and subtle causal mechanisms, events often serve as political turning points in ways that vary over time, last for extended periods of time, and are not always entirely predictable at the time. Beginning from the presumption that change often has proximate as well as latent causes, this tutorial focuses on events as critical junctures in American politics. Our concern with these events is not with why they happened as or when they did but, rather, with how they altered the American political order once they did--with how they caused shifts in political alignments, created demands for political action, or resulted in a reordering of political values. Over the course of the semester, we will look at ten different types of events, ranging from those that seem bigger than government and politics (economic collapse) to those that are the daily grist of government and politics (speeches), in each instance juxtaposing two different occurrences of a particular category of event. In so doing, we will seek to use controversial and consequential moments in American politics as a window into deeper questions about political change and the narratives we tell about it.

Requirements/Evaluation: five 5-to 7-page essays, five 2- to 3-page critiques, and a recorded oral final reflection

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-years and sophomores considering a major in Political Science

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Weekly writing with extensive attention to feedback, revision, and improvement.

PSCI 306 (S) What is Power?

Cross-listings: SOC 308 REL 308 PSCI 306 STS 308

Secondary Cross-listing

What is power? Despite the importance of notions of power across the social sciences, there is a broad lack of consensus. Is power essentially domination or resistance? Is it freedom, empowerment, privilege, or oppression? Are there forms of unequal social power which are morally neutral or
even good? Is power the kind of thing held by individuals, races, genders, classes, discourses, causal mechanisms, institutions, or social structures? What is the connection between social and physical power? Does power obey laws? How does power relate to technology? Or knowledge? Or agency? Or ideology? This course begins with the observation that power is often described as a causal relation—an individual’s power is supposed to equal their capacity to produce a change in someone else’s behavior. This suggests that the better we can understand the nature of cause and effect, the better we can understand power. Fortunately, in recent decades philosophers have made significant progress in theorizing causation. Hence, this seminar will put two very different bodies of theory in conversation: critical theory about power and philosophy of science about cause and effect. We will touch on classic philosophical accounts of power and causation, but focus our attention on more recent developments in philosophy of science, political theory, and other fields. The insights we gain in this course from analyzing the nature of power should empower us to more effectively transform society. It will help students in the social sciences to understand the nature of causation in the social world, and it will help students interested in political action to better understand the nature of power. Thinkers to be considered may include: Aristotle, Amy Allen, Hannah Arendt, Bourdieu, Judith Butler, Nancy Cartwright, Foucault, Gramsci, Byung-Chul Han, Han Feizi, Giddens, Steven Lukes, Machiavelli, J.L. Mackie, Marx, Nietzsche, and Max Weber. (Note that in 2023 this course will also fulfill the senior seminar requirement for STS)

Requirements/Evaluation: critical annotations for every class, midterm review essay (4-6 pages), final essay (10-12 pages)

Prerequisites: None.

Enrollment Limit: 15

Enrollment Preferences: STS concentrators, then Religion, Sociology, and Political Science majors.

PSCI 308 (F) In Search of the American State

When Donald Trump campaigned in 2016 to "drain the swamp," he built on the idea held by Republicans since Ronald Reagan's 1981 pronouncement that "government is not a solution to our problem, government is the problem." Skepticism of government has deep roots and strong resonance throughout American political history. Despite this, national government has grown in scope and size for much of this history, including under both Democratic and Republican administrations. This tension over what government is doing and what it should be doing is only heightened in times of crisis, such as the moment the country is in now. This course explores the relationship between citizens and their government by examining the growth of the American state in various arenas over time, as well as the assaults on government legitimacy in recent years. We will assess traditional theories about the weakness of the American state in light of arguments about the state as: regulator of family and "private" life, adjudicator of relations between racial and ethnic groups, manager of economic inequalities, insurer of security, and arbiter of the acceptable uses of violence and surveillance.

Requirements/Evaluation: Students will be responsible for writing three 5-page papers and three 2-page papers, and will also be asked to take responsibility for managing discussion and presenting work at different points in the semester.

PSCI 310 (F) New York City Politics: The Urban Crisis to the Pandemic (WS)

Cross-listings: PSCI 310 LEAD 332

Primary Cross-listing

This course examines New York City's political history from the 1970s to the present—a period during which the city underwent staggering economic and social changes. In the mid-1970s, New York was a poster child of urban crisis, plagued by arson and housing abandonment, crime, the loss of residents and jobs, and failing public services. By the early 21st century, the city had largely met these challenges and was once again one of the most diverse and economically vital places on earth—but also one marked by profound inequality. This course will examine how New Yorkers have contested core issues of capitalism and democracy—how those contests have played out as the city itself has changed and how they have shaped contemporary New York. Broad themes will include the city's role as a showcase for neoliberalism, neoconservatism, technocratic centrist, and progressivism; the politics of race, immigration, and belonging; the relation of city, state, and national governments; and the sources of contemporary forms of inequality. Specific topics will include policing, school reform, and gentrification. As the primary assignment in the course, students will design, research, and write a 20-page paper on a topic of their choice.

Requirements/Evaluation: active class participation, 2-page preliminary proposal, 10-page research proposal, 2-page peer feedback, 18- to 20-page research paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Political Science majors and Leadership Studies concentrators

Primary Cross-listing

Even before the pandemic, scholars, pundits, and the public thought Congress was in a state of crisis. Riven by polarized partisanship and gridlock, the most powerful assembly in the world seemed incapable of representing citizens and addressing problems. This seminar focuses on how Congress organizes itself to act as a collective body. In an organization comprised of equals, how and why do some senators and representatives acquire more power and authority than others? How does Congress act as an institution and not just a platform for 535 individuals? Why does Congress not act, especially when the U.S. confronts so many pressing problems, and how do legislators justify inaction? In what ways does this institution promote or hinder the legitimacy, responsiveness, and responsibility expected of a democratic governing institution?

From democracy to liberty, equality to community, foundational ideas -- about what makes for good government, about what constitutes the good society, about what is necessary to lead a good life -- define the American political tradition and consume the American political imagination. Designed not only to uncover these (sometimes melodic, sometimes cacophonous) values but also to place current ideological debates about them in a broader developmental context, this tutorial will offer a topical tour of American political thinking from the birth of nationalism in the colonial period to the remaking of conservatism and liberalism in the early twenty-first century. Utilizing primary source material ranging from presidential speeches to party platforms, newspaper editorials to novels, we will seek to interrogate -- reconciling where possible, distinguishing where necessary, interpreting in all instances -- the disparate visions and assessments of the American political experience offered by politicians, artists, intellectuals, activists, and ordinary citizens over the course of more than two centuries. Our focus, then, is nothing less than the story of America -- as told by those who lived it.

Requirements/Evaluation: five 5- to 7-page essays, five 2- to 3-page critiques, and a revised and extended 10- to 12-page final essay

PSCI 314  (F) How Change Happens in American Politics

Cross-listings: PSCI 314 LEAD 314

Primary Cross-listing

An unprecedented assault on the U.S. Capitol, the rise of white nationalism, a pandemic, a volatile economy, racial reckoning, and rapidly evolving environmental crises have all rocked American politics in the last year. What might we expect to come next? From the Founding to the present, the American political order has undergone cataclysmic and thoroughgoing transformations, yet it has also proven to be remarkably enduring. How can this be? Where do we find continuities and where upheavals? What accounts for the continuities, and what for the changes? What sorts of transformations have been possible, and who or what has made them possible? Finally, what are the costs of change (and of continuity)--and who pays them? The goal of this course is to assess American political change, or lack of, and to gain a sense of the role that political leaders have played in driving change. We will examine when and how individuals and leadership have mattered vis-à-vis broader historical and contextual factors, including economic developments, demographic change, war, and constitutional and institutional parameters. After examining general models of change and of leadership, we will consider specific case studies, such as civil rights for African-Americans, gender equality, labor advances, social conservatism, and populism. We will consider some of the complicated legacies of change. Finally, we will look at arguments that America has been "exceptional"--or, unlike other countries--as well as critiques of these arguments, to help us gain an understanding of future prospects for political transformation.

PSCI 315  (S) Parties in American Politics

Cross-listings: LEAD 315 PSCI 315

Primary Cross-listing

Is the American party system what's wrong with American politics? It has been said that parties are essential to democracy, and in the U.S., political parties have played a central role in extending democracy, protecting rights, and organizing power. But their worth is a continuing subject of debate. Although parties have been celebrated for linking citizens to their government and providing the unity needed to govern in a political system of separated powers, they have also been disparaged for inflaming divisions among people and grid-locking the government. Other critics take aim at the two-party system with the claim that the major parties fail to offer meaningful choices to citizens. This course will investigate this debate over parties by examining their nature and role in American political life, both past and present. Throughout the course, we will explore such questions as: What constitutes a party? For whom do they function? How and why have they changed over time? Why a two-party system, and what role do third parties play? Is partisanship good or bad for democracy? For governance? What is the relationship between parties and presidents? How does partisanship become tribalism or hyper-partisanship, and can this be prevented? We will explore answers to these questions through seminar discussion, analytic essays, and independent research culminating in the writing of a longer (15 to 20 page) research paper.

Requirements/Evaluation: In addition to active seminar participation, students will be responsible for writing two shorter (5-7 page) papers and a longer, research paper (15-20 pages).
**PSCI 316 (S) Policy Making Process**

Politics as usual. It's a phenomenon we all love to hate. But what does it mean? When government policy is decided by politics, does that mean the policy is necessarily bad? Can we get rid of politics in policy making or improve on it somehow? What would "politics as unusual" look like anyway? This class examines the policy making process with particular emphasis on the United States: How do issues get defined as problems worthy of government attention? What kinds of alternatives are considered as solutions to these problems? Why do we end up with some policies but not others? Do certain kinds of processes yield better policies than others? How should we decide what constitutes a good policy?

**Requirements/Evaluation:** several short papers, research paper, class participation

**Prerequisites:** one course in PSCI or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Political Science and Political Economy majors, and students with an interest in public policy

**Expected Class Size:** 12

**PSCI 317 (F) Environmental Law**

We rely on environmental laws to make human communities healthier and protect the natural world, while allowing for sustainable economic growth. Yet, despite 40 years of increasingly varied and complex legislation, balancing human needs and environmental quality has never been harder than it is today. Environmental Studies 307 analyzes the transformation of environmental law from fringe enterprise to fundamental feature of modern political, economic and social life. ENVI 307 also addresses the role of community activism in environmental law, from local battles over proposed industrial facilities to national campaigns for improved corporate citizenship. By the completion of the semester, students will understand both the successes and failures of modern environmental law and how these laws are being reinvented, through innovations like pollution credit trading and "green product" certification, to confront globalization, climate change and other emerging threats.

**Requirements/Evaluation:** Several short writing assignments, active participation in class and a final examination

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Preference to Environmental Studies majors and concentrators and sophomores and above.

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)
Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 351(D2) MAST 351 PSCI 319(D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

Secondary Cross-listing

Americans have been arguing intensely in recent years about how we should remember the leaders from our nation's past. Does Thomas Jefferson's statue belong on a university campus? Should college dorms be named for John C. Calhoun and Woodrow Wilson? Should Harriet Tubman's portrait replace Andrew Jackson's on the $20 bill? In this course we will look at how people in the United States and elsewhere have used their leaders' images to hash out larger political issues of national identity, purpose, and membership. Why has historical commemoration gotten so contentious—or has it always been contentious? What's really at stake when we depict our leaders? How (if at all) should we reconcile contemporary morality with historical context in assessing the leaders from our past? To address these questions, we will study portrayals of some of the most famous leaders in American history—including Alexander Hamilton, Abraham Lincoln, and Martin Luther King, Jr. Our sources will include political speeches, literature, film, and journalism as well as monuments and museum exhibits; though our examples will be drawn mostly from the United States, our conceptual framework will be transnational. As a final assignment, students will write an 18-20 page research paper on a topic of their choice related to the core themes of the course.

Requirements/Evaluation: Seminar participation, research proposal, peer workshop, research paper, in-class research presentation

Prerequisites: previous course in Leadership Studies, or Political Science, or permission of instructor

PSCI 321 (F) Immigration Politics in the U.S.

The U.S. Census Bureau estimates that non-Hispanic whites will no longer be the majority racial group in the U.S. by 2044. This demographic change is fueled by past and current immigration, and the politics surrounding American immigration policy have intensified as a result. Donald Trump's rise to the presidency was fueled in part by his pledge to build a wall between the U.S. and Mexico. Meanwhile, efforts to reform the nation's immigration laws have been stuck in gridlock for years. How did we get to this point and what does the future hold? Why is immigration policy so contentious? What is at stake, and what do different groups believe to be at stake? To answer these questions, we will examine immigration from a multidisciplinary lens, but with special attention to immigration politics and policy. We will examine the history of immigration to the U.S. and the policies that have shaped it; recent developments in electoral and protest politics; the policy initiatives of recent presidential administrations, Congress, and state and local governments; and the incorporation of immigrants into U.S. society and politics, past and present.

Requirements/Evaluation: one 2- to 3-page paper; one 5- to 7-page paper; one oral presentation; one 15- to 20-page research paper; and class participation

This class is interested in thinking critically and empirically about one of the most polarizing and relevant issues of our time: how countries regulate cross-border mobility. Currently over 281 million international migrants live in a country different from where they were born, about 1 out of every 30 humans in the world and a population that has roughly doubled since 1990. How are international organizations and domestic governments regulating this level of unprecedented global mobility in destination countries as well as countries of origin? Throughout the semester we interrogate three themes central to migration politics (and political science): rights, access, and agency. The course is organized with a focus on legal status: which "categories" of people (i.e. illegal migrants, refugees) have differential access to rights, services, and representation depending on how they are classified where they live (and where they are from). We will critically analyze how those categories are constructed at the international and domestic levels, as well as how those categorizations are also racialized, politicized, and gendered. While we address current debates over migration governance in the United States, we situate US migration policy within the contemporary global context. The course places the US in conversation not only with European countries, but also (and especially) considerations of migration governance in destination countries in Latin America, the Middle East, Asia and Africa. We also attend to the emigration governance of diaspora citizens particularly from the Global South. Students will have the opportunity to apply course readings to real-world contexts through guest speakers from global organizations at the frontlines of migration policy (UNHCR, Doctors without Borders), and filmmakers documenting border crossing around the world.

Requirements/Evaluation: Participation, 3 Short Response Papers, Research Paper (15 pages)

Prerequisites: PSCI 202 or PSCI 204 or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Political Science majors and Leadership Studies Concentrators

PSCI 328 (F) Human Rights Claims in International Politics (WS)

For decades, people and countries have used "human rights" to advance their position, delegitimize their opposition, and lodge their interests in an unassailable political category. This research seminar investigates who uses this category, to what ends, and with what success. How people ground this concept–what they think its origin is–does matter, but evaluating those foundations is not our focus. Politics is our focus. Who gains and loses from the idea that people have human rights? Does the concept fit well with, and reinforce, some institutions and configurations of power, and make others difficult to sustain (or even to conceive)? Why not simply claim that something is an interest rather than also a right? How has "human rights" been deployed in international politics, and by whom? The class is divided into four sections. The first concentrates on common readings on these questions, and prioritizes discussion, explication, and hypothesis brainstorming. The second introduces social science methodology, covering hypotheses, literature reviews, and evidence while continuing half time with materials about human rights. The third emphasizes research design, allowing students to finalize their own project while bringing in primary sources such as original documents, debates, and data. The last quarter of class focuses on student projects, on integrating and revising research to produce a set of findings and an evaluation of their meaning. The course is designed to teach political science majors the nuts, and maybe also the bolts, of social science research.

Requirements/Evaluation: Class discussion, short writing, worksheets, peer reviews, drafts of various sections, final paper, final presentation

Prerequisites: Two classes in political science, at least one of which must be in international politics.

Enrollment Limit: 12

Enrollment Preferences: Political science majors
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (WS)

PSCI 331 (F) The Politics of Algorithms
Cross-listings: PSCI 331 AMST 349 STS 349

Primary Cross-listing
Every day, you interact with or through computer algorithms. In ways often obscure to users, they structure communication or conduct in social media, education, healthcare, shopping, entertainment, dating, urban planning, policing, criminal sentencing, political campaigns, government regulation, and war. Moving from the emergence of cybernetics during World War II through such contemporary examples as facial recognition software, this seminar approaches algorithms as complex technological artifacts that have social histories and political effects. Asking how algorithms are political and what that tells us about politics today (particularly in the U.S.), we will consider how their design expresses forms of power and their deployment shapes ways of living. What behaviors do different algorithms solicit, reward, discourage, or stigmatize? What kinds of selfhood and relationships do they promote or thwart? How do various algorithms influence political partisanship and beliefs and intersect with existing hierarchies of race, class, gender, and sexuality? When inequities are built into a design, can that be addressed by rooting out “bias,” or do such efforts miss something more inherent in the kinds of artifacts algorithms are or what they can be in a capitalist economy? Might developments in artificial intelligence transform our sense of the human or even threaten the species? Many of the seminar's themes, including democracy, power, inequality, judgment, deliberation, publicity, subjectivity, and agency, are central to political theory, but readings and course materials will also be drawn from such fields as media theory, surveillance studies, sociology, American studies, critical data science, film, and contemporary art. The course neither requires nor teaches any computer science skills.

Requirements/Evaluation: Class attendance and participation, regular short posts or exercises, and either three eight-page essays or one 8-page essay and one longer final paper.
Prerequisites: At least one course in political, cultural, or social theory or the critical study of science and technology, or permission of the instructor. Not open to first-year students.
Enrollment Limit: 15
Enrollment Preferences: Political Science and American Studies majors and STS concentrators; then qualified students from all other majors welcome, space permitting.
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
PSCI 332  (S)  The Body as Property  (DPE)
From an ethical standpoint, human bodies are fundamentally different from objects that can be owned, acquired, and exchanged. Yet history furnishes us with countless examples of laws, administrative rules, and social conventions that treat the human body as a form of property. The institution of slavery is a particularly egregious example. But there are other examples of treating the body as property that seem more ambiguous, or even benign: the employment contract in which bodily services are offered in exchange for payment; the feminist slogan "my body, my choice"; or even the every-day transfer of bodily properties into creative projects that then become part of the things people own --- chairs, tables, houses, music, art, and intellectual property. If it is not itself a form of property, how can we explain the use of the human body to acquire possessions, create wealth, and mediate the exchange of other kinds of property? These and other tensions between the concept of property and that of humanity will be the focus of this course. How is property defined, and how far should law go to erode or reinforce distinctions between property and humanity? Course readings focus on Locke, Hegel, Marx, and critical perspectives from feminist theory, critical theory, and critical legal studies (Cheryl Harris, Alexander Kluge, Oskar Negt, Carole Pateman, Rosalind Petchesky, and Dorothy Roberts, among others).

Requirements/Evaluation: five 5- to 7-page essays, five 2- to 3-page critiques, and a revised and extended 10- to 12-page final essay
Prerequisites: prior coursework in political theory, cultural theory, philosophy, or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Political Science majors (priority given to those concentrating in Political Theory ); Justice & Law Studies concentrators (priority given to those with extensive JLST coursework).
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions:  (D2)  (DPE)
Difference, Power, and Equity Notes: The course fulfills the Difference, Power, and Equity (DPE) requirement by examining how, in the context of legally-sanctioned power relations, bodily differences are constructed, monetized, and used to generate wealth. Race, class, and gender inequalities are central to the analysis.

PSCI 333  (F)  Asian/African American Cultural and Political Theory
Cross-listings:  PSCI 333  AFR 344  AMST 325
Secondary Cross-listing
Contrasted as "model minorities" or "incorrigible minorities" Asian Americans and African Americans have been pitted against one another in social standing and political objectives. However, throughout the twentieth century, African/Asian solidarity and alliances existed in political movements and literary and cultural productions. From Ho Chi Minh's anti-lynching writing, the founding conference of the WIDF (Women's International Democratic Federation) in China in 1945, through the Bandung Conference, coalitions against U.S. wars in Southeast Asia, and alignments with Chinese anti-imperialist endeavors, black and Asian peoples have joined in international political formations. Contributions to theory include the writings and activism of Langston Hughes, W.E.B. Du Bois, Richard Wright, Robert Williams, Yuri Kochiyama, Grace Lee and Jimmy Boggs, Ishmael Reed, and Amiri Baraka; films of Bruce Lee; music of Fred Ho; revolutionary praxis of Mao Tse Tung's Little Red Book and his writings on art and society; the Marxism of the Black Panther Party; the Afro-futurism of Sun Ra and Samuel Delany; and contemporary "Afro-pessimism." Such cultural works depict futurities and possibilities for Black and Asian diasporas. This seminar examines theory, politics, literature, film, and music produced from and linked to twentieth-century movements against capitalism, racism, colonialism, and imperial wars to think through how Black and Yellow Power have shaped solidarity to challenge white supremacy and racial capitalism. Requirements: One midterm paper (5-6 pp.) = 30%; final paper/project (10-12 pp.) with a creative option = 50%; short response paper and GLOW posts = 10%; participation (attendance and class discussion) = 10% Course cap: 19 Priority given to AMST majors, Africana concentrators
Requirements/Evaluation: One midterm paper (5-6 pp.) = 30%; Final paper/project (10-12 pp.) with a creative option = 50%; Short response paper
PSCI 333 (D2) Theorizing Global Justice

While economic exchanges, cultural convergence, and technological innovations have brought people in different parts of the world closer together than ever before, globalization has also amplified differences in material wealth and social inequalities. Ill health, inadequate sanitation, and lack of access to safe drinking water are increasingly common. Yet, more than ever before, the means exist in affluent regions of the world to alleviate the worst forms of suffering and enhance the well-being of the poorest people. How are we to understand this contradiction as a matter of justice? What is the relationship between justice and equality, and what do we owe one another in a deeply divided world? Course readings will engage your thinking on the central debates in moral philosophy, normative approaches to international political economy, and grassroots efforts to secure justice for women and other severely disadvantaged groups. Key theorists include Amartya Sen, Martha Nussbaum, John Rawls, Thomas Pogge, Nancy Fraser, Paul Farmer, Vandana Shiva, Majid Rahnema, and Enrique Dussel.

Class Format: discussion

Requirements/Evaluation: oral presentation, weekly blog posts, and three papers (3 pages, 7 pages and 8-10 pages)

Prerequisites: at least one course in political theory or philosophy or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Political Science majors and concentrators in Political Theory

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

PSCI 336 (S) Far-Right Populism Across the Atlantic

Cross-listings: PSCI 336 GBST 300

Secondary Cross-listing

The course will discuss the relationship between nationalism and far-right populism, also often referred to as alt-right politics in the United States. We will explore the causes of the rise of nationalism and far-right populism in the US and Europe, discuss their relations with liberal democracy, conservativism, and authoritarian politics to study varieties of far-right populism and nationalism not only within the nominal far-right but all political parties in Western democracies. We will address basic questions such as "What is populism?" and discuss the causes of the rise of far-right populism, the origins of far-right ideology, and the phenomenon of successful populist voter mobilization. Central notions such as democracy, identity, and their relation to far-right populism will be discussed alongside questions of contemporary mobilization strategies.

Requirements/Evaluation: active class participation; three response papers (2 pages); final research paper (12 pages); no final exam

Prerequisites: statement of interest
**PSCI 337 (S) Visual Politics**

**Cross-listings:** AMST 370 ARTH 337 PSCI 337

**Primary Cross-listing**

Even casual observers know that appearances matter politically and that the saturation of politics by visual technologies, media, and images has reached unprecedented levels. Yet the visual dimensions of political life are at best peripheral topics in contemporary political science and political theory. This seminar explores how our understanding of politics and political theory might change if visuality were made central to our inquiries. Treating the visual as a site of power and struggle, order and change, we will examine not only how political institutions and conflicts shape what images people see and how they make sense of them but also how the political field itself is visually constructed. Through these explorations, which will consider a wide variety of visual artifacts and practices (from 17th century paintings to the optical systems of military drones and contemporary forms of surveillance), we will also take up fundamental theoretical questions about the place of the senses in political life. Readings may include excerpts from ancient and modern theorists, but our primary focus will be contemporary and will bring political theory into conversation with other fields, particularly art history and visual studies but also film and media studies, psychoanalysis, neuroscience, and STS. Possible authors include Arendt, Bal, Belting, Benjamin, Browne, Buck-Morss, Butler, Campt, Clark, Crary, Deleuze, Deurbord, Deleuze, Fanon, Foucault, Freedberg, Hobbes, Kittler, Mercer, Mitchell, Mulvey, Plato, Rancière, Scott, Sexton, Starr, Virilio, Warburg, and Zeki.

**Requirements/Evaluation:** regular, engaged class participation, several Glow posts, and "either" three 7- to 8-page papers "or" on short and one much longer paper.

**Prerequisites:** at least one prior course in political theory, cultural theory, visual studies, or art history; or permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** Political Science and Art History majors (including students in the grad program); then qualified students from all disciplines welcome, space permitting

**PSCI 339 (S) Politics in Dark Times: Hannah Arendt** (WS)

**Cross-listings:** JWST 339 PSCI 339

**Primary Cross-listing**

Hannah Arendt (1906-75) bore witness to some of the darkest moments in the history of politics. Born a Jew in Germany, Arendt lived through--and reflected deeply on--two world wars, the rise of totalitarianism, and the detonation of the first atomic bomb. She narrowly escaped imprisonment by the Gestapo and internment in a refugee camp in Vichy France before fleeing to New York. Yet, in the face of these horrors, Arendt never lost her faith in political action as a way to express and renew what she called "love of the world." She wrote luminously about the darkness that comes when terror
extinguishes politics and the shining, almost miraculous events of freedom through which politics is sometimes renewed. In this tutorial, we will investigate what Arendt's vision of politics stands to offer to those struggling to comprehend and transform the darkest aspects of the contemporary political world. Our time and Arendt's are similarly darkened by the shadows of racism, xenophobia, inequality, terror, the mass displacement of refugees, and the mass dissemination of lies. It may be tempting to conclude from these similarities—as some recent commentators have—that we are witnessing the return of "totalitarianism" as Arendt understood it. She would be the first to refuse to use inherited concepts as if they were keys to unlock the present. Her words and her example should impel us to reject shortcuts to authentic understanding, the "unending activity by which...we come to terms with and reconcile ourselves to reality." We will turn to Arendt as an interlocutor, not a guide, as we seek to reconcile ourselves to the contingency and specificity of past and present political realities. And we will search her works and our world for embers of hope that even seemingly inexorable political tragedies may yet be interrupted by assertions of freedom in political action.

**Requirements/Evaluation:** five 5-page papers; five 2-page responses; participation

**PSCI 340 (S) Why States Fail**

This course considers the origins of political violence and state failure at the end of the 20th century. It seeks to address why there was a resurgence of political violence at the dawn of the 21st century. Toward that end, we begin by considering competing explanations of political violence (ethnicity, democratization, natural-resource endowments, and predatory elites). We then move on to the empirical section of the course in which we cover case studies of state failure in parts of Eastern Europe, Africa and the Middle East.

**Class Format:** discussion

**Requirements/Evaluation:** seminar participation, two oral presentations and a research paper proposal

**Prerequisites:** one of the following: PSCI 201, 202, 203, 204, 229, 243, 250, 254 or the permission of instructor

**PSCI 342 (S) Beyond the welfare state**

"Not me. Us" became a rallying cry of Bernie Sanders' presidential campaign in late 2019. Sanders' slogan reflects a vision of a robust welfare state, defined by a widespread commitment to solidarity, where citizens share social risks as well as economic rewards. But what role can the welfare state play in the twenty-first century? How have its constitutive institutions, from pensions to unemployment insurance, evolved since the post-war "Golden Age"? Is solidarity possible only in utopia, or can we realize it in the world as well? This course identifies the political conditions under which welfare states developed in the twentieth century, and examines how they have responded to globalization, immigration, digital transformation, and other contemporary challenges. If the welfare state has a future, it will look different from the past, but how? Taking up a handful of alternative paradigms, from social investment to mutual aid, we will assess different trajectories of solidarity in the twenty-first century.
**PSCI 343 (F) Democratic Erosion**

**Cross-listings:** GBST 342 PSCI 343

**Primary Cross-listing**

A central tenet of political science is that once a country reaches a certain level of political and economic development, democracy will endure indefinitely. The contemporary moment calls on us to revisit this assumption. This course explores the causes and consequences of democratic erosion through the lens of comparative politics. We ask three central questions to inform our investigation: 1) What is democracy and its alternatives? 2) How do we identify democratic breakdown? and 3) What are strategies to counteract backsliding when it occurs? Importantly, this course is *not* intended as a partisan critique of any particular American politician or political party. Rather, it is designed to provide an opportunity to engage, critically and carefully, with claims about the state of democracy in the US and elsewhere; to evaluate whether those claims are valid; and, if they are, to consider strategies for mitigating the risk of democratic erosion here and abroad. Readings draw from academic scholarship, media commentary, and current events as they unfold. We will address both empirical and normative dimensions of the issues, as well as learn about examples of democratic erosion around the world from early 20th century until today. As a collaborative class taught at dozens of other colleges, the course enables you to engage in debates about democratic erosion with students throughout the US and around the world.

**Requirements/Evaluation:** Class participation; Two short papers; Two presentations; Take-home final essay

**PSCI 344 (S) Palestinian Nationalism**

Palestinian Nationalism: This tutorial will cover the history, bases of support, objectives, and accomplishments and failures of Palestinian nationalism over the past century. It will address how the Palestinian nation has been defined, who has defined it, what factions and classes have controlled its organizations, and the reasons why it has failed to achieve its goals. The tutorial will address the evolution of Palestinian nationalism historically and thematically, employing both primary and secondary sources. The readings will consist mostly of Palestinian authors, with an emphasis on documents, histories, and political analyses. Two questions will anchor the tutorial: how is the nation defined and what, if any, class interests are folded into various definitions?

**Requirements/Evaluation:** Read the assigned materials, write a 5-page paper every other week, and comment on the student's partner's paper in the other weeks.

**Prerequisites:** Political Science Majors and students with background in Middle East

**Enrollment Limit:** 10
Enrollment Preferences: Political Nationalism

PSCI 345 (F) The Meaning of Life and Politics in Ancient Chinese Thought

Cross-listings: ASIA 345 PSCI 345

Primary Cross-listing

How can we live a good life? What standards should we use to judge how political power is constituted and used? This class will involve students in close reading of, and exegetical writing about, core texts of ancient Chinese philosophy in English translation. The purpose is to gain an understanding of a number of different perspectives on life and politics, especially Confucianism, Legalism and Daoism. While the primary focus will be on the meaning of the texts in the context of their own times, contemporary applications of core concepts will also be considered. The class will begin with background readings, since no prior work in Chinese philosophy or history is assumed. Then the class will read significant portions of the following canonical works: Yijing, Analects, Mencius, Daodejing, Zhuangzi, and Han Feizi.

Requirements/Evaluation: two 5-page papers and one 15-page paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference to seniors but all are welcome.

PSCI 349 (S) Cuba and the United States (DPE) (WS)

We examine the long and deeply felt history of dependence and conflict between Cuba and its colossal neighbor to the north. The course begins with the political economy of the colony, then covers the Cuba-US relationship from José Martí and 1898 through the Cold War to the present, emphasizing the revolutionary period. Tutorial topics include: sovereignty and the Platt Amendment; culture and politics; race and national identity; policies on gender and sexual identity; the institutions of "popular power"; the post-Soviet "Special Period"; the evolution of the Cuban exile community in the US; and the fraught agenda of reform and generational transition. Materials include journalism, official publications, biographies, travel accounts, polemics, policy statements of the US government, and a wide range of academic works.

Class Format: a lecture in the first week; then ten weeks of tutorial; then a discussion class in the final week

Requirements/Evaluation: five 5- to 6-page papers, five 1- to 2-page responses, and one 1-page essay for the final class

Prerequisites: any course on Latin America or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Political Science majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Assignments are graded and returned weekly. After each student has written one long paper and one response, the professor
meets with them individually to discuss the composition and presentation of each genre. For the final class, students write a one-page paper in E’ (E-prime), English without the verb "to be."

**Difference, Power, and Equity Notes:** Among other topics, the course describes an independence war fought by insurgents dedicated to color-blind citizenship (even as the "civilized world" embraced scientific racism); neo-colonialism under the Platt Amendment and after; race and the Revolution; gender and the changing treatment of sexual identity under the Revolution; and the categorical power differences that arise when only one political party is permitted to organize.

**PSCI 351 (S) The New Left and Neoliberalism in Latin America (DPE)**

**Cross-listings:** PSCI 351 GBST 351

**Primary Cross-listing**

Recent years have seen a resurgence of the political left in Latin America. This course seeks to understand the origins of this new left, the ideas and character of its protagonists, the neoliberal philosophy it opposes, and the arena of democratic politics it inhabits today. We first read polemics from both sides, before stepping back to consider Latin American political economy, including the twentieth-century left, from a more historical and analytical perspective. With this preparation, we then look more closely at major contemporary figures and movements in Venezuela, Bolivia, Mexico, Brazil, and other countries. After considering explanations of the rise of the left and assessments of its performance in power, we end our common readings by asking what it might mean today to be on the left in Latin America—or anywhere—both in policy and political terms.

**Class Format:** discussion then seminar

**Requirements/Evaluation:** three 3-page essays, a 1-page reflection paper, and a 12-page research proposal

**Prerequisites:** a course on Latin America and a course in Economics or permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Political Science majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 351(D2) GBST 351(D2)

**Difference, Power, and Equity Notes:** The New Left in Latin America originated in efforts to remedy inequalities born of the Conquest, uneven capitalist development, and racial prejudice. Its neoliberal foes generally do not doubt the existence of these inequalities, but they question the proposition that the state could adequately address them. This course engages, contextualizes, and deepens the debate.

**PSCI 352 (F) Politics in Mexico (DPE)**

**Cross-listings:** GBST 352 PSCI 352

**Primary Cross-listing**

Geography has decreed that the futures of Mexico and the United States will be tightly bound. Yet Mexico enters this future with a very different past, a distinctive political system, important cultural differences, and mixed feelings about its neighbor to the north. This course has four parts differing in content and format. The first is historical and mostly lecture. It considers several themes, including the slow emergence of a stable national state and the interplay between politics and economic change. In the second section, following a modified tutorial format, we consider politics and cultural policies around Mexican national identity in the twentieth century, looking at films, journalism, popular music, and cultural criticism. Topics include the politics of race; rapid urbanization, especially in the valley of Mexico; and the cultural impact of the turn toward the north, after 1990, in economic policy. Then, after a few discussion classes on migration, organized crime, political corruption, the COVID-19 pandemic, and other issues facing the
current government of Andrés Manuel López Obrador, we turn to a seminar-style discussion of student research projects.

**Class Format:** lectures will be recorded for viewing before class sessions; four weeks of modified tutorials in pairs or small groups online; discussion classes to include in-person and online, in distinct sections if appropriate; online seminar

**Requirements/Evaluation:** map quiz; one three-page and three two-page essays; two one-page commentaries; and a seven- to eight-page research proposal, an early version to be presented to the class in online seminar

**Prerequisites:** some knowledge of Mexican history

**Enrollment Limit:** 15

**Enrollment Preferences:** Political Science majors and seniors

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 352(D2) PSCI 352(D2)

**Difference, Power, and Equity Notes:** One unit of the course directly engages the tension between racial and cultural diversity, on one side, and national identity in 20th century Mexico. Another critically analyzes the reception in Mexican national discourse of the experiences of discrimination suffered by migrants in the USA.

**PSCI 353 (F) What is Democracy?**

This is a research course that will investigate the meaning of democracy through readings and a research paper. The readings will begin with claims that democracy consists of government by elites, that the democratic component consists of elections that amount to choosing between rival slates of elites, and that agreements among elites set the boundaries for permissible democratic decision making. To examine this claim, the readings will address two fundamental issues. First, it will consider the terms of American foreign policy after the Cold War, how it sets these, and continuities and discontinuities between the Clinton and Bush administrations. Where did Democratic and Republican foreign policy elites agree and disagree and what happened to proposals that were outside the elite consensus? Second, the course will consider the prelude and official responses to the 2008-11 financial crisis. What policies paved the way for and resolved the crisis, how were they reached, and who participated in formulating them? In other words, to what extent and in what respects were these fundamental turning points made "democratically"? Having done preliminary reading on these two issues, students will conduct in-depth research into aspects of one of these questions and write a research paper.

**Requirements/Evaluation:** One 5 page paper, 25 page research paper, presentation of paper to class, and class participation.

**Prerequisites:** Instructors permission.

**Enrollment Limit:** 14

**Enrollment Preferences:** Political Science majors or prospective majors, sophomores, juniors, and seniors, and permission of instructor.

**PSCI 354 (F) Nationalism in East Asia**

**Cross-listings:** PSCI 354 ASIA 354 HIST 318

Primary Cross-listing
Nationalism is a major political issue in contemporary East Asia. From anti-Japanese demonstrations in China, to tensions on the Korea peninsula, to competitive elections in Taiwan, to controversies in Japan about how history is portrayed in high school textbooks, national identity is hotly debated and politically mobilized all across the region. This course begins with an examination of the general phenomena of nationalism and national identity and their historical development in East Asia. It then considers how nationalism is manifest in the contemporary politics and foreign relations of China, Japan, South Korea, North Korea and Taiwan.

PSCI 356  (S) Democratization in South Asia
Democratization has had both successes and failures in postcolonial South Asia. The region is home to the world's largest democracy in India, often cited as an unlikely and puzzling success story. At the same time, periods of democratic rule in Pakistan and Bangladesh are broken up by military interference, Sri Lanka's democracy is plagued by ethnic conflict, and Afghanistan has been unable to sustain democracy due to weak state institutions. What explains this diverse and uneven pattern of democracy in South Asia? The course delves into theories on political parties, ethnic politics, electoral institutions, civil-military relations, political violence, state-building, inter-state conflict, and civil wars to understand the variation in regime type in the region. It covers domestic and international factors that lead to democratization and democratic backsliding. We will focus on the role of political parties in democratization; the emergence of political dynasties; changes in the characteristics of the political elite; investigate claims of democratic deepening; and examine the effect of inter-state wars, land disputes, and insurgencies on democratic stability in the region.

PSCI 358  (F) Media, Politics, and Power
Concerns about 'misinformation,' 'fakenews,' and 'propaganda' abound in discussions of politics in social media, news, entertainment and movies, and in daily conversations. Conflicting groups regularly accuse each other of being 'duped' by 'biased' sources of information on crucial issues like war, elections, sexuality, racism, and history. But is anyone immune to media influence? What is it and how might it work? And who are the groups who shape how media portray the world to us? This seminar explores such questions by investigating the political use of media in the organization of power. Readings and discussions provide a view on the past and ongoing use of media in the shaping of popular knowledge, collective actions, and public policies. We interrogate the terms 'media,' 'politics,' and 'power.' We study techniques to politically use media as well as research techniques to uncover political practices and relations. The course is divided into three parts. The first module engages students in readings on the economic and political situation of dominant types of media (AI, social media, news, etc.) and dominant media companies (Google, FaceBook, CNN, FOX, etc.).
second engages students with theory and methods for understanding and analyzing media contents (the stories, images, etc. that media convey). The final module introduces students to theory and methods for analyzing media relations (how a given media connects particular groups in particular ways). In the second and third modules, students develop research questions that they pair with research methods to politically analyze a chosen media channel. The course is designed to introduce students to fundamental components of social science research and critical thinking on media as a political tool.

Requirements/Evaluation: Participation in class discussions and activities, written reflections on readings, data gathering and analysis, two 8-10 page papers, peer review, 2 in-class presentations.

**PSCI 360  (S)  Right-Wing Populism**

After the fall of the Berlin Wall in 1989, the political scientist Francis Fukuyama famously declared "the end of history". From now on only liberal democracy, free market capitalism, and global integration had a future. Everything else—including political ideology, nationalism, conservative religion, and sovereignty—was consigned to the ash heap. Thirty years later the future looks seriously derailed. A right-wing populism marked by Brexit, Trump, Le Pen, and a host of 'far-right' political movements in the very heartland of democratic globalizing capitalism has shaken liberal certainties.

This course is an investigation into contemporary right-wing populism in Europe and North America in its social, economic, and political context. We will discuss theories of right-wing populism's appeal from both Left and Right perspectives. We will also investigate cases of right-wing populism including France's National Rally and the Eric Zemmour phenomenon, Sweden's Sweden Democrats, Hungary's Fidesz, Poland's Law and Justice Party, and Trumpism, the alt-right and QAnon. Finally we will entertain right-wing populism as both a cause and a symptom of a crisis in liberal democracy.

**PSCI 361  (S)  Black Political Thought**

Cross-listings: AFR 364  PSCI 361

Primary Cross-listing

This seminar will introduce students to the study of Black Political Thought as a set of critical normative and diagnostic gestures that help theorize the Black experience. By thrusting students into the "problem space" of Black Political Thought, students will examine the historical and structural conditions, normative arguments, theories of action, ideological conflicts, and conceptual evolutions that help define African American political imagination. Students will take up the central philosophical questions that shaped the tradition from the early nineteenth century to the present by engaging historical thinkers like Anna Julia Cooper, W.E.B. DuBois, Frantz Fanon, Ida B. Wells-Barnett, and Ella Baker and contemporary theorists like Saidiya Hartman, Charles Mills, bell hooks, and Frank Wilderson—among others. Guided by a Black diasporic consciousness, students will explore the canon's structural and ideological accounts of slavery, colonialism, patriarchy, racial capitalism, Jim Crow, and state violence and, subsequently, critique and imagine visions of Black liberation. With a theoretical grounding in the "Black radical tradition," students will leave this course with the conceptual resources and philosophical tools needed to realize political theory's potential as an instrument they can employ in their daily lives to normatively and diagnostically evaluate political, economic, cultural, and social institutions.

Requirements/Evaluation: Weekly discussion questions; two (1-2 pages) short reading responses; and three essay-style writing assignments,
Prerequisites: at least one prior course in political theory or permission of the instructor

Enrollment Limit: 16

Enrollment Preferences: political theory concentrators, Political Science majors, Africana majors

PSCI 364 (F) Noam Chomsky and the Radical Critique of American Foreign Policy

Noam Chomsky emerged as one of the most influential figures in the development of modern linguistics during the 1950’s. However, since the Vietnam War, Chomsky has also established himself as perhaps the most influential critic of American foreign policy and the Washington national security establishment. This tutorial will examine his wide-ranging critique of American foreign policy over the last half century, focusing on his analysis of the role that he believes the media and academics have played in legitimizing imperialism and human rights abuses around the world. We will also explore the controversies and criticisms of his work from both the right and the left because of his political stance on issues ranging from the Arab-Israeli conflict to humanitarian intervention to free speech. Finally, we will also examine how Chomsky’s views, largely considered to be radical for much of his life, have become far more mainstream over time.

Requirements/Evaluation: Students will write five 6-7 page papers over the course of the semester. On weeks that students are not writing the lead paper, they will write a 1-2 page critique of the essay submitted by their tutorial partner.

Prerequisites: One of the following courses is strongly recommended: PSCI 120, 127, 202.

Enrollment Limit: 10

Enrollment Preferences: Students with some previous coursework in American foreign policy or world politics.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: International Relations Subfield

Distributions: (D2)

Attributes: LEAD American Foreign Policy Leadership PSCI International Relations Courses

Not offered current academic year

PSCI 367 (S) Decolonizing International Relations (DPE)

Cross-listings: GBST 367 PSCI 367

Primary Cross-listing

The Oxford English Dictionary defines Decolonization as "the withdrawal from its colonies of a colonial power; the acquisition of political or economic independence by such colonies." The emergence of an international system of sovereign states--the core foundation of international relations--presumes the process of dismantling systems of domination, extraction, and exclusion ended long ago. However, there is increasing recognition that International Relations in all forms, including theory, research, and policy, continue to be structured by traditional paradigms of power (e.g. white, male, elite). This course begins with the premise that knowledge is embedded within, and often reproduces, power hierarchies. Thus, this class is organized as a collaborative investigation with the aims of: 1) examining how whiteness and other historically dominant perspectives shape International Relations theory and research areas; 2) expanding and improving our understanding of International Relations through different lenses (e.g. race, class, gender, disability, indigenous, queer, subaltern); and 3) exploring the implications of a more inclusive approach to International Relations, both within the classroom as well as contemporary decolonization movements in the US and around the world.

Requirements/Evaluation: Participation, 3 response/reflection papers, annotated bibliography
PSCI 372 (S) CAPSTONE: Sylvia Wynter, Black Lives, and Struggle for the Human

Cross-listings: AFR 450 PSCI 372

Secondary Cross-listing

How do we judge the value of life? What is the significance of death and arbitrary threats to our existence? Why probe modern notions of black and blackness? What defines optimism, pessimism, enslavement, freedom, creativity, and being human? Do black lives matter? This capstone seminar will explore these and related questions through an examination of the life and work of Jamaican novelist, playwright, cultural critic, and philosopher Sylvia Wynter. Methodologically interdisciplinary, the course shall examine written and audiovisual texts that explore Wynter’s inquiries into the central seminar queries. We will study figures and movements for black lives whose geopolitics frame the milieu of Wynter’s work. Our examination of intellectuals and activists, with their explicit and implicit engagements with Wynter, shall facilitate assessing the possibilities, challenges, and visions of black living. We will also explore the current implications of Wynter’s thought for Africana political theory, Afro-futurism, social justice, human rights, and critiques of liberal humanism. In the latter half of the course, students will have the opportunity to design, conduct, and present their own final research projects.

Requirements/Evaluation: attendance and participation; a 7-page midterm essay; class presentation; and a final research project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Africana Studies concentrators and Political Science majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Writing Skills Notes: Three thesis papers at five pages each (each receiving critical feedback from professor); one thesis paper revision with critical feedback from professor and peers, including one letter of revision explaining the student's revision process; one keyword glossary where students develop rigorous definitions of course key terms; one roundtable discussion based on the final paper.

Difference, Power, and Equity Notes: This course focuses on anti-colonial struggles against European powers. Research will include the concept of "internal colonies" in the US.

Not offered current academic year

PSCI 375  (S)  Modern Jewish Political Theory

Cross-listings: JWST 492 PSCI 375 REL 330

Secondary Cross-listing

By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst bourgeoning national self-consciousness throughout the continent, despite the liberatory promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re-constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of "Jews" and "Judaism" in these arguments. And we will ask persistently: what constitutes a "Jewish justification" for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.

Requirements/Evaluation: six short (1-2 pages) response papers; two 6- to 8-page papers, each analyzing a different view in depth; a final 18- to 20-page paper that incorporates the two previously submitted 6-8 page papers, but also compares the two views and adjudicates between them

Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Religion majors, Jewish Studies concentrators, and Political Science students on the "Theory" track
Expected Class Size: 18
Grading: no pass/fail option, no fifth course option

PSCI 376  (S)  The Impact of Black Panther Party Intellectuals on Political Theory  (DPE) (WS)

Cross-listings: LEAD 319 INTR 320 PSCI 376 AMST 308

Secondary Cross-listing

This seminar examines the historical and contemporary impact of the Black Panther Party—and key allies such as Angela Davis—on political theory. Texts include: narratives from 1966-2016; memoirs; political critiques; theoretical analyses; interviews; speeches; government documents. The
seminar will examine: original source materials; academic/popular interpretations and representations of the BPP; hagiography; iconography; political rebellion, political theory. Readings: Liberation, Imagination and the Black Panther Party; Soledad Brother: The Prison Writings of George Jackson; Mao’s Little Red Book; The Communist Manifesto; Still Black, Still Strong; Imprisoned Intellectuals; Comrade Sisters: Women in the Black Panther Party.

**Requirements/Evaluation:** Requirements: students attend each seminar class and come prepared to discuss the readings; participate in discussions; present a collective analysis with Q/A for the seminar; submit a mid-term paper and a final paper or a group project.

**Prerequisites:** None.

**Enrollment Limit:** 19

**Enrollment Preferences:** Juniors and Seniors with previous courses taken in Africana Studies, American Studies, Political Science, Philosophy.

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**PSCI 378 (F) Origins of the State**

When and how did the state come into existence as a form of political organization? This course explores theories of the origins of the state, asking how myths and other speculative accounts in the Western tradition draw boundaries between past and present, as well as between self and other. Paying attention to common oppositions such as nature/civilization, primitive/advanced, anarchy/social order, feminine/masculine, ruler/ruled and stasis/progress, we will investigate how these antagonisms work together to create the conception of the state that still dominates politics today. Course readings touch briefly on social contract theories (Locke, Hobbes, Rousseau, Kant) before turning to the core material for our exploration: alternative accounts of the origins of the state based on ancient Greek and Roman mythology and the ethnological writings of nineteenth-century socialists (Marx, Engels, Bebel, and others). More recent perspectives and critical interpretations will be drawn from feminist theory (Spivak, Pateman, MacKinnon, Folbre) and critical anthropology (Cassirer, Fabian, Graeber & Wengrow). Among our questions: Is it really possible to pinpoint a moment in time when the state came into existence? And if the aim is not to provide a historically accurate account, what exactly is at stake in constructing or deconstructing the origins of the state?

**Requirements/Evaluation:** oral presentation and three papers (3 pages, 5 pages and 12-15 pages)

**Prerequisites:** Not open to first-year students.

**Enrollment Limit:** 16

**Enrollment Preferences:** Political Science majors and concentrators in Political Theory

**Expected Class Size:** 16

**Grading:** no pass/fail option, yes fifth course option

PSCI 380 (S) Sex Marriage Family

Cross-listings: PSCI 380 SOC 390

Primary Cross-listing

Something has happened to America over the past fifteen years. Large minorities of young adults, especially young men, are now celibate. Cohabitation has skyrocketed but marriage is disappearing, and the country's birth rate is at an all-time low. Not surprisingly, loneliness has become epidemic. A similar story can be told for most other developed countries. The implications for political polarization, economic growth, social insurance programs, public health, military defense, even national survival are grim. What is the cause of this loss of faith in the future? Can public policy reverse these trends? This course is an investigation into relations between the sexes in the developed world, the fate of children and the family, and government attempts to shape them. The course investigates family models in historical and comparative context; the family and the welfare state; the economics of sex, gender, marriage, and class inequality; the dramatic value and behavioral changes of Gen Z around sex, cohabitation, and parenthood; and state policies to encourage partnership/marriage and childbearing in both left-wing (Scandinavia) and right-wing (Central Europe) variants.

Requirements/Evaluation: Two 4-5 page papers, 12-15 page research paper, discussion questions, class participation

Prerequisites: none

PSCI 381 (S) The Conservative Welfare State

Conservatives in the United States are traditionally hostile to state power in general and the welfare state in particular. In much of the rest of the world,
however, conservatives harbor no hatred of the state and, when in power, have constructed robust systems of social welfare to support conservative values. This course offers an analysis of the conservative welfare state with particular interest in public policies around social insurance, employment, the family, and immigration. The course traces the conservative welfare state's development from its origins in late nineteenth and early twentieth century corporatism, through the rise of Christian Democracy and the consolidation of conservative welfare regimes in continental Europe after World War Two, to its contemporary challenges from secularism, feminism, and neoliberalism. The course also investigates divergent conservative models in East Asia and Latin America as well as new 'illiberal' welfare states in contemporary Hungary and Poland. It concludes with a discussion of the prospects of right-populist politics in the United States.

Requirements/Evaluation: Two short papers, research paper proposal, every-class discussion questions, class participation.

Prerequisites: One course in Political Science

Enrollment Limit: 19

Enrollment Preferences: Juniors and seniors majoring in Political Science or Political Economy

SEM Section: 01    TF 1:10 pm - 2:25 pm    Darel E. Paul

PSCI 382 (F) The Politics of Migration: Citizen, Immigrant, Alien, Refugee (DPE)

Currently 272 million international migrants live in a country different from where they were born, an increase of 78% since 1990. What are the social, economic, and political consequences of unprecedented global mobility in both destination countries and countries of origin? This class investigates one of the most polarizing and relevant issues of our time: the politics of migration. Throughout the semester we interrogate four themes central to migration politics: rights, representation, access, and agency. The course is organized with a focus on status: which "categories" of people (i.e. citizens, migrants, refugees) have differential access to rights, services, and representation and why. Drawing on political speeches, documentary films, humanitarian campaigns, and a variety of academic texts, we critically analyze how those categories are constructed, as well as the political work they do in making claims, justifying policies, and shaping public opinion. The class situates contemporary US migration policies within a global context and over time, placing the US case in conversation with considerations of migration politics and policies in countries around the world. As an experiential education course, we will (virtually) attend a US naturalization ceremony as well as interview officials from organizations working with migrants and refugees here and abroad.

Requirements/Evaluation: Active class participation, 3 short papers (3 pages each), policy project (8-10 pages), and presentation.

Prerequisites: Prior course work in political science or global studies.

Enrollment Limit: 12

Enrollment Preferences: Political Science majors, Global Studies Concentrators.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course examines the politics of migration with a focus on the power inherent within particular categorizations of people in relation to the state (i.e. citizens, migrants, aliens, refugees). We compare policies shaping the lives of migrants around the world, with particular considerations of how race, gender, age, and religion shape migration experiences (and migration policy). We focus on rights, access, and migrant agency throughout the course.

PSCI 386 (F) Identity Politics: Conflicts in Bosnia, Israel-Palestine, Northern Ireland, & South Africa

Identities have been either the stakes, or the guise taken by other kinds of conflicts, in Bosnia, Israel-Palestine, Northern Ireland, and South Africa for centuries. They have led to, or expressed, political divisions, clashing loyalties, and persistent and sometimes consuming violence. They also have
produced attempts by both internal and external actors to resolve the issues. This research seminar will engage the origins of the conflicts and the role of identities in them, the role of disputes about sovereign power in creating and intensifying them, the strategies for reconciling them that are adopted domestically and internationally, the deals that have been struck or have not been struck to bring peace in these societies, and the outcomes of the various efforts in their contemporary politics. The course will begin by reading about both the general theoretical issues raised by conflicts in these "divided societies" and various responses to them. After familiarizing ourselves with what academic and policy literatures have to say about them, we then will read about the histories and contemporary politics in each society. With that as background, students will choose an aspect or aspects of these conflicts as a subject for their individual research.

Requirements/Evaluation: 2 10-12-page papers
Prerequisites: Political Science majors
Enrollment Limit: 15
Enrollment Preferences: Political Science majors or permission of instructor
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

PSCI 387 (S) The Firm
The rise of gigantic tech firms--Google, Apple, Facebook, Amazon--has sparked widespread worries about the role of business power in capitalist democracy. Are these firms monopolies? How can they be better regulated? Should they be? This course studies the politics of business by centering analysis on the firm. From the perspective of the workplace, we investigate the firm as an arena of power, where workers and managers meet each other in continuous contests for control. From the perspective of the public sphere, we investigate the firm as an actor whose power maps uneasily onto the channels of democratic representation. Approaching the firm as both arena and actor in a number of capitalist democracies, we will compare the politics of business across different sectors, but will focus especially on tech and finance.

Requirements/Evaluation: Class participation; two 5- to 7-page essays; one presentation; one final essay.
Prerequisites: One introductory course in political science or economics, and/or permission of the instructor.
Enrollment Limit: 15
Enrollment Preferences: Preference will be given to sophomores and juniors majoring in PSCI and POEC.

PSCI 412  (F)  Senior Seminar: Interpretations of American Politics
American politics are in upheaval, and most Americans believe the country to be headed down "the wrong track." Yet assessments of what is at the heart of the country's problems vary. Many worry that the United States is threatened by anti-democratic actors intent on consolidating white nationalist power and corporate rule. Yet at the same time, others worry that the U.S. has abandoned the Anglo-Protestant traditions that made it strong and has entered a period of moral decay and decline. What are we to make of these different assessments? What do left and right see when they survey the nation, and why is what they see so different? Any diagnosis of contemporary maladies is premised on a vision of what a healthy functioning republic looks like. Our task in the seminar is to uncover and interrogate those visions. We will do this by exploring different interpretations of the American political order, each with its own story of narrative tensions and possible resolutions. We will then use our investigation of how different authors, and different traditions, understand the nation to help us assess contemporary politics and come to our own conclusions about what animates conflicts.
Requirements/Evaluation: brief weekly writing assignments; three short essays; and oral examination
Prerequisites: at least one course in American politics
Enrollment Limit: 12
Enrollment Preferences: senior Political Science majors with a concentration in American politics
Expected Class Size: 10
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)
PSCI 413 (S) Senior Seminar in American Politics: Polarized America

With red states and blue states, partisan divisions in Congress, and even disputes about wearing masks to protect against the coronavirus, few question the fact of a polarized America. But what is the polarization about and what caused it? Is it manufactured by a political elite using the rules of the game to maintain power while ignoring the concerns of the people? Is it a capitalist strategy to divide the public in order to advance the interests of the wealthy corporate elite? Does it reflect a polity divided by racial and ethnic tensions with different visions of the nation’s past and future? Does it reflect increased inequality in a fast-changing global economy? How can a government of separated institutions operate and come to collective decisions given this discord? Can the framers’ vision of deliberative, representative government meet the challenges of a polarized polity?

Requirements/Evaluation: class participation, weekly writing assignments, two short papers, final project

Prerequisites: At least one course in American politics

Enrollment Limit: 16

Enrollment Preferences: Seniors majoring in political science with concentration in American politics

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

PSCI 414 (S) Senior Seminar: Leadership and the Anxieties of Democracy (WS)

Cross-listings: LEAD 425 PSCI 414

Secondary Cross-listing

This course, the senior capstone for both Leadership Studies and the American Politics subfield in Political Science, examines the challenges and opportunities facing political leaders in contemporary liberal democracies. We will begin by surveying institutional constraints confronting contemporary political leaders: globalization, sclerotic institutions, polarization, endemic racism, and a changing media environment, among others. Then, we will look at some important factors that shape how followers approach would-be leaders: inequality and economic precarity; identity and group consciousness; notions of membership, community, and hierarchy; and declining local institutions. While the course will focus primarily on the United States, our conceptual framework will be global; though our main interest will be contemporary, we will also examine previous eras in which democratic leadership has come under great pressure. Our primary questions will be these: Why does transformative leadership seem so difficult today? How does political leadership in the 21st century differ from leadership in earlier eras? What conditions are necessary to sustain effective leadership in the contemporary world? As a final assignment, students will craft an 18-20-page research paper on a topic of their choice related to the themes of the course.

Requirements/Evaluation: Seminar participation, research proposal, peer workshop, research paper, in-class research presentation

Prerequisites: LEAD 125 or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Open to Leadership Studies concentrators or with the permission of the instructor; preference given to Political Science majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

LEAD 425(D2) PSCI 414(D2)

Writing Skills Notes: Students receive iterative feedback on their research projects: Their initial proposals receive substantive feedback from fellow students as well as substantive and stylistic feedback from the professor looking toward a formal proposal; and their formal proposals receive extensive comments from both the professor and a student colleague looking toward the final paper. The students will submit writing for feedback the third week of March, the third week of April, and the third week of May.
PSCI 420  (F)  Senior Seminar: The Nuclear Revolution

Cross-listings:  PSCI 420 LEAD 330

Primary Cross-listing

This is a course about international politics in the nuclear age. In broad terms, it focuses on a very basic question: Does international politics still work essentially the same way as it did in the prenuclear era, or has it undergone a "revolution," in the most fundamental sense of the word? The structure of the course combines political science concepts and historical case studies, with the goal of generating in-depth classroom debates over key conceptual, historical, and policy questions. The basic format of the course will be to combine very brief lectures with detailed class discussions of each session's topic. The course will begin--by focusing on the Manhattan Project--with a brief technical overview of nuclear physics, nuclear technologies, and the design and effects of nuclear weapons. The course will then examine the following subjects: the dropping of the atomic bombs on Japan; theories of the nuclear revolution; the early Cold War period; the development and implications of thermonuclear weapons; the Berlin and Cuban missile crises; nuclear accidents; nuclear terrorism and illicit nuclear networks; the future of nuclear energy; regional nuclear programs; preventive strikes on nuclear facilities; nuclear proliferation; and contemporary policy debates.

Requirements/Evaluation:  class participation, three 8- to 10-page papers
Prerequisites:  PSCI 202
Enrollment Limit:  15
Enrollment Preferences:  Political Science major seniors with an International Relations concentration
Expected Class Size:  15
Grading:  no pass/fail option,  no fifth course option

Not offered current academic year

PSCI 421  (F)  Senior Seminar: The Liberal Project in International Relations

The most powerful actors in global politics are liberal ones, and a liberal project around democratic states, international law and organizations, and free trade dominates the global agenda. This course is an investigation into this global liberal project, engaging both theory and practice. We will discuss signature liberal theorists both classic and current as well as some of their most notable critics. We will also attend to empirical evaluations of signature liberal efforts around democratization, development, and human rights. The course ends with a discussion of the successes and failures of the European Union as the principal embodiment of the liberal project today.

Requirements/Evaluation:  1-3 papers of 5-7 pages, short oral presentations, daily discussion questions, 12-15 page final paper, class participation
Prerequisites:  senior Political Science major or permission of instructor
Enrollment Limit:  16
Enrollment Preferences:  senior Political Science majors concentrating in International Relations
Expected Class Size:  16
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D2)
Attributes:  PSCI International Relations Courses

Not offered current academic year

PSCI 423  (S)  Senior Seminar: Humanitarianism  (DPE)
Since the mid-1980s, humanitarianism has been one dominant attitude that powerful and privileged countries, organizations and people have adopted with regard to poverty or disaster elsewhere. Humanitarianism aims at rescue, striving to keep marginal people alive until some solution can be found. It aims not to address crises' causes nor to assist with solutions—which it considers political—just to keep human bodies alive. Critics contend that humanitarianism produces harm, provides structural incentives for people to do more or less than they need to, and deepens inequality between actors and targets. They contend that it legitimates a view of the status quo, in which such terrible things are bound to happen without real cause. This course confronts humanitarianism as an ideology through reading its defenders and critics, and as a political strategy assessing its usefulness, to whom.

Class Format: three students start class discussion every day; one reads a short (4-page) essay and two read shorter (two-page) essays
Requirements/Evaluation: three longer essays, six shorter essays, constructive participation
Prerequisites: PSCI 202 and at least one elective in international relations
Enrollment Limit: 16
Enrollment Preferences: Political science seniors then juniors; other seniors, then juniors
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course asks students to investigate the way that assumptions about superiority, and "helping practices" adopting those assumptions, can either reinforce or undermine unequal social and political outcomes and categories. We evaluate liberal and postcolonial (structural violence) models of international aid.

PSCI 431 Senior Seminar in Political Theory: Rethinking the Political
What is politics? The question, an important part of political theory at least since Socrates, has taken on renewed significance in recent years, as theorists have sought to rethink the political in response to twentieth century dictatorships and world wars; feminist, queer, anti-racist, post- and decolonial struggles; the transformations wrought by neoliberal globalization; the emergence of "algorithmic governance"; the recent resurgence of populist nationalism; and deepening recognition of climate crises. This seminar engages some of the major attempts at rethinking produced in the 20th and 21st centuries, particularly at those that, characterizing liberalism as masking structures of subordination and elements of conflict in political life, undervaluing the importance of citizen action and public space, or being ill-suited to altered technological and ecological conditions, seek to rework or move beyond it. In addition to those who argue for an expanded and emancipatory conception of politics, we will consider arguments against politics as primary path to improvement or focus of commitment. Authors read may include Schmitt, Strauss, Rawls, Arendt, Wolin, Rancière, Brown, Connolly, Hartman, Sharpe, Moten, Wynter, Sexton, Edelman, Muñoz, Coulthard, Simpson, Lazzarato, Haraway, Latour.
Requirements/Evaluation: Regular, engaged class participation; short Glow posts; one 6-8 page paper; one 10-12 page paper
Prerequisites: Junior or senior standing and two or more theory courses or consent of instructor. Non-majors with theory interests and backgrounds are welcome
Enrollment Limit: 15
Enrollment Preferences: Juniors and seniors concentrating in political theory
Expected Class Size: 11
Grading:
Distributions: (D2)
Attributes: PSCI Political Theory Courses
Not offered current academic year

PSCI 432 (S) Senior Seminar: Critical Theory
This seminar focuses on the political thought of Herbert Marcuse, investigating the influences of leftist social movements of the 1960s on his critical theory. Marcuse famously supported the aims of student activism, feminism, black liberation movements and Third World anti-colonialism during that
period, publicly affirming their efforts to integrate ethical idealism with concrete concerns for the economic wellbeing and political freedom of oppressed groups. Drawing on Freud, and challenged by his philosophical exchanges with Angela Davis, Marcuse came to the view that these movements were addressing not only material deprivations such as poverty and structural oppression, but also the effects of social alienation and a damaged psychic life. He saw these movements as successfully bridging the longstanding tension between the ideal elements of our humanity and the physical conditions for human existence (a tension represented in philosophy by the contrast between Kant and Marx). Yet he stopped short of identifying new social movements with the Marxist notion of a revolutionary class. Why this hesitation? Was his caution warranted? To provide a broader context for Marcuse's critical theory, we will read a selection of his writings alongside related texts by Kant, Marx, Freud, and Davis. Looking at but also beyond his political solidarity with the emancipatory movements of the 1960s, we will then consider how Marcuse's work can be placed in conversation with more recent critical theory, including ideas emerging from the Occupy Wall Street movement and feminist approaches to aesthetics and psychoanalytic theory.

**Requirements/Evaluation:** regular class participation, short (1 pg) response papers, and drafts leading up to a 15-page final essay

**Prerequisites:** junior or senior standing required; in addition, prior coursework in political theory, cultural theory, philosophy, or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Senior Political Science majors with concentration in Political Theory, then other Political Science majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** PSCI Political Theory Courses

---

**PSCI 442 (F) Senior Seminar: Authoritarian Regimes**

Authoritarian regimes are plentiful in the world today. Some appear durable and resilient; they are not simply transient political failures awaiting a breakthrough to democracy. This course will consider the history and contemporary experience of authoritarian regimes, beginning with political philosophical analyses of classical theorists such as Montesquieu, Moore, and Arendt. Attention then turns to how post-World War II authoritarianism has been understood from a variety of perspectives, including: the "transitions to democracy" approach; analysis of problems of authoritarian control and authoritarian power-sharing; and examination of "authoritarian reliance," among others.

**Requirements/Evaluation:** 3 papers of 5-7 pages, discussion leadership, oral report on an authoritarian regime of student's choice, class participation.

**Prerequisites:** Political science major or permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** Senior comparative politics concentrators; other political science senior majors; other political science majors; permission of instructor.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** PSCI Comparative Politics Courses

---

**PSCI 493 (F) Senior Thesis Research Design Seminar**

Reserved for and required of those students accepted into the honors program during the second semester of their junior year, the fall semester Senior Thesis Research Design Seminar is intended to serve three purposes for aspiring senior thesis writers. First, through a variety of readings and discussions (including, perhaps, with the assigned scholars themselves), it aims to introduce students to the challenges of original scholarly research
and expose them to the range of ways political scientists approach those challenges. Second, through a series of regular exercises and assignments, it seeks to stimulate critical thinking about fundamental questions of research design (crafting a question, performing a literature review, selecting appropriate methodological tools, evaluating data sources) and hone an array of practical skills—whether interpretive, historical, or quantitative—involved in political science research. Third, through ongoing, self-guided reading on students' individual topics as well as feedback from both the seminar leader and other seminar participants on their written work about that topic, it endeavors to guide students to frame a viable and meaningful research project. At the conclusion of the seminar, each student will submit a substantial and rigorous 10-12 page research proposal, with an annotated bibliography, for a roughly 35 page "article-length" thesis to be completed during Winter Study and the spring semester. Those whose proposals are accepted by a committee of faculty chosen by the department will continue on as thesis students, under the supervision of an advisor to be assigned by the department, for the remainder of the academic year; those whose proposals are not accepted will complete an abridged version of their project as an independent study in Winter Study but not continue in the honors program in the spring semester.

Requirements/Evaluation: short weekly exercises, a series of written assignments culminating in a 10-12 page research proposal (with an annotated bibliography), and active class participation

Prerequisites: departmental approval during junior spring

Enrollment Limit: 12

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Fall 2023

SEM Section: 01 MWF 10:00 am - 10:50 am Justin Crowe

PSCI 494 (S) Senior Thesis Research and Writing Workshop

Reserved for and required of those students invited to continue in the honors program following the department's approval of their research proposal at the end of the fall semester seminar, the spring semester Senior Thesis Research and Writing Workshop provides a focused forum for the exchange of ideas among thesis writers, who will regularly circulate excerpts of their work-in-progress for peer review and critique. During this time, students will work primarily with their assigned faculty advisor, with the workshop leader's primary role becoming one of coordination, troubleshooting, and general guidance. Near the end of the semester, students will receive feedback on their complete draft from their advisor and two additional faculty readers selected by the workshop leader; following revisions, the final work—a roughly 35 page piece of original scholarship—will be submitted to and evaluated by a committee of faculty chosen by the department for the awarding of honors as well as presented publicly to the departmental community at an end-of-year collective symposium.

Requirements/Evaluation: a roughly 35 page piece of original scholarly work that will be submitted to an advisor and faculty readers and then revised in accordance with their feedback, peer review of other thesis writers' work-in-progress, public presentation at an end-of-year collective symposium

Prerequisites: PSCI 493 and departmental approval at the conclusion of that course

Enrollment Limit: 12

Enrollment Preferences: permission of the department

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

PSYCHOLOGY

(Div III, with some exceptions as noted in course descriptions)

Chair: Professor Noah Sandstrom

- Anna Miley Akerstedt, STINT - Research Scholar
- Victor A. Cazares, Assistant Professor of Psychology; affiliated with: Psychology, Neuroscience; on leave 2023-2024
- Jeremy D. Cone, Associate Professor of Psychology
- Eliza L Congdon, Assistant Professor of Psychology
- Rebecca J. Crochiere, Assistant Professor of Psychology
- Susan L. Engel, Senior Lecturer in Psychology; Senior Faculty Fellow, Rice Center for Teaching, The Class of 1959 Director of Program in Teaching
- Yunshu Fan, Visiting Assistant Professor of Psychology
- Steven Fein, Professor of Psychology
- Alex Flores, Assistant Professor of Psychology; on leave Fall 2023
- Cynthia Guo, Visiting Assistant Professor of Psychology
- Amie A. Hane, Professor of Psychology; affiliated with: Psychology, Public Health, Neuroscience; on leave Spring 2024
- Nicole T. Harrington, Visiting Assistant Professor of Psychology
- Kris N. Kirby, Professor of Psychology
- Nate Kornell, Professor of Psychology, Chair of Cognitive Science Program; affiliated with: Psychology, Cognitive Science; on leave Fall 2023
- Shivon A. Robinson, Assistant Professor of Psychology; affiliated with: Psychology, Neuroscience
- Mariene J. Sandstrom, Hales Professor of Psychology; on leave 2023-2024
- Noah J. Sandstrom, Chair and Professor of Psychology; affiliated with: Psychology, Neuroscience
- Kenneth K. Savitsky, Professor of Psychology
- Catherine B. Stroud, Professor of Psychology

MAJOR

For the degree in Psychology, students must complete a minimum of nine courses as outlined below:

- PSYC 101 Introductory Psychology
- PSYC 201 Experimentation and Statistics

Three 200-level courses from the list below:

- COGS/PHIL/PSYC 222 Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science
- NSCI 201/BIOL 212/PSYC 212 Neuroscience
- PSYC 221 Cognitive Psychology
- PSYC 232 Developmental Psychology
- PSYC 242 Social Psychology
- PSYC 252 Psychological Disorders
- PSYC 272 Psychology of Education

Either PSYC 221 or 222, but not both, can count towards the three required 200-level courses.

Three 300-level courses from at least two of the areas listed below:
Area 1: Behavioral Neuroscience (courses with middle digit 1)
Area 2: Cognitive Psychology (courses with middle digit 2)
Area 3: Developmental Psychology (courses with middle digit 3)
Area 4: Social Psychology (courses with middle digit 4)
Area 5: Clinical Psychology (courses with middle digit 5)
Area 6: Other/Interdisciplinary Psychology (courses with middle digit 6)
Area 7: Educational Psychology (courses with middle digit 7)

At least one of these courses must be from among those carrying the format designation Empirical Lab Course.

One 400-level Psychology course.

Students who place out of Psychology 101 are still required to take nine courses to complete the major.

The department recommends that students take Psychology 201 in their sophomore year. The department requires that 201 be completed by the end of the junior year.

COURSE NUMBERING RATIONALE
As is the case in all departments, the first digit of a Psychology course number indicates the relative level of the course. Where appropriate, the second digit corresponds to the Areas listed above.

THE DEGREE WITH HONORS IN PSYCHOLOGY
Students who are candidates for honors need take only two 300-level courses from two different areas, but they must enroll in Psychology 493-W31-494 and write a thesis based on original empirical work. Presentation of a thesis, however, should not be interpreted as a guarantee of a degree with honors. Guidelines for pursuing the degree with honors are available from the department.

STUDY ABROAD
With some advance planning, studying abroad (especially for one semester) can easily be worked into the psychology major. To facilitate this, we recommend that students:

- Meet with the Study Abroad advisor as soon as they decide that they are interested in studying abroad.
- Take PSYC 201 (Experimentation and Statistics) in the sophomore year.
- Think ahead to the 300-level courses they are interested in taking so that they can fulfill the 200-level prerequisites before they go away or, if possible, while they are away. In our experience, study abroad programs in the following places are most likely to offer psychology courses: England, Ireland, Scotland, Spain, Australia, New Zealand, Hawaii, and Scandinavia. Students should procure the descriptions of the psychology courses they are considering taking and bring them to their meeting with the advisor.

There are some costs to studying away, particularly for the year. This limits students’ opportunity to choose the particular 300-level courses they would like to take and they must sometimes settle for those that are open, those which happen to be offered, or those for which they have the prerequisites, once they return in their senior year. Many students who are keen on psychology begin doing research with professors during their junior year, and for some this leads to an honors thesis in the senior year, summer research, etc. If you are going away for the entire year and do not make such connections with a professor ahead of time (i.e., before you go), you may lose out on some of these opportunities to deepen your involvement in the major on campus. On the other hand, studying abroad can be an invaluable learning experience, so you need to think carefully, in consultation with your advisor and/or the Study Abroad advisor, about the costs and benefits of it. Very occasionally, a student who just begins taking psychology courses late in the sophomore year and wishes to go abroad for the year finds that they are not able to do both, or is restricted in the choice of study-abroad programs.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description, complete syllabus, including readings/assignments, and exams or other written work. In addition, the course content
Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. Students are required to take at least one empirical project course (which includes a lab component and data collection). This must be completed at Williams.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. The empirical project course must be completed here (see answer to previous question above). Other major requirements that must be completed here are the Senior Seminar and our Statistics and Experimentation course (PSYC 201). On very rare occasions students have been given credit for PSYC 201 taken elsewhere, but this is extremely unlikely. Most institutions break the material up into two different courses, or don’t include all of the components that we feel are an important foundation for the major.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. Students should be sure that have taken PSYC 201 PRIOR to their senior year at the latest. It is best to take it during sophomore year whenever possible.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

There have been instances.

**PSYC 100 (W) Intensive: Social Psychology**

A survey of theory and research in social psychology. Topics include conformity, group dynamics, stereotyping and prejudice, aggression, altruism, attraction and love, the self, social perception, attitudes and attitude change, and cultural psychology. Applications in areas such as advertising, law, economics and business, and politics will also be discussed.

**Requirements/Evaluation:** two in-class exams, one paper (5 pages), and a final exam  
**Prerequisites:** permission of a dean  
**Enrollment Limit:** 25  
**Enrollment Preferences:** students who need to make up a deficiency  
**Expected Class Size:** NA  
**Grading:** no pass/fail option, no fifth course option  
**Unit Notes:** This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in PSYC 100 and PSYC 40.  
**Distributions:** (D3)

Winter 2024  
LEC Section: 01 TBA Jeremy D. Cone

**PSYC 101 (F)(S) Introductory Psychology**

An introduction to the major subfields of psychology: behavioral neuroscience, cognitive, developmental, social, and psychological disorders and treatment. The course aims to acquaint students with the major methods, theoretical points of view, and findings of each subfield. Important concepts are exemplified by a study of selected topics and issues within each of these areas.

**Class Format:** Lectures will be presented during the scheduled time. To complement the lectures, students will participate in two short discussions/laboratory experiences that will be offered at a variety of times outside the lecture period.

**Requirements/Evaluation:** five unit quizzes, a final exam, and two brief lab reports (or related brief reports, depending on the availability of labs)  
**Prerequisites:** none
PSYC 127 (S) The Psychology of Success (WS)
This course will examine the psychology of success from a scientific perspective. After considering what success means, we will examine two broad influences on success: personality (e.g., intelligence, grit, and mental illness) and environment (e.g., schooling, parenting, and practice). We will talk about barriers to success, the search for success, and the cost of searching for success. Each week we will read a book or a set of articles (or possibly documentaries or podcasts). One partner will write a paper and the other will write a response. This course is not meant to make you more successful; the goal is to think critically about important issues, use evidence to make arguments, be skeptical, and practice writing and speaking in a convincing and engaging way.

Requirements/Evaluation: written work and discussion of that work; a five-page paper will be due every other week and a one-page response will be required other weeks

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: highest priority will be given to incoming first-years followed by rising sophomores

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will submit a paper every other week (minimum 5 pages), and in alternate weeks they will write a response to their partner's paper. The instructor will provide detailed feedback on the papers.

Spring 2024

TUT Section: T1 TBA Nate Kornell

PSYC 201 (F)(S) Experimentation and Statistics (QFR)
An introduction to the basic principles of research in psychology. We focus on how to design and execute experiments, analyze and interpret results, and write research reports. Students conduct a series of research studies in different areas of psychology that illustrate basic designs and methods of analysis. You must register for lab and lecture with the same instructor.

Requirements/Evaluation: research reports, exams, and problem sets

Prerequisites: PSYC 101; not open to first-year students except with permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Psychology majors

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course has problem sets focused on experimental design and quantitative data analysis. Students will help design and conduct experiments, analyze the data, and report their findings.
PSYC 212 (F) Neuroscience

Cross-listings: PSYC 212 NSCI 201 BIOL 212

Secondary Cross-listing

This course is designed to give an overview of the field of neuroscience progressing from a molecular level onwards to individual neurons, neural circuits, and ultimately regulated output behaviors of the nervous system. Topics include a survey of the structure and function of the nervous system, basic neurophysiology and neurochemistry, development, learning and memory, sensory and motor systems, and clinical disorders. Throughout the course, many examples from current research in neuroscience are used to illustrate the concepts being considered. The lab portion of the course will emphasize a) practical hands-on exercises that amplify the material presented in class; b) interpreting and analyzing data; c) presenting the results in written form and placing them in the context of published work; and d) reading and critiquing scientific papers.

Requirements/Evaluation: Evaluation will be based on participation in discussion groups, exercises, problem sets and quizzes performed in small groups, lab reports, midterm exams, and a final exam.

Prerequisites: PSYC 101 or BIOL 101; open to first-year students only with permission of instructor

Enrollment Limit: 72

Enrollment Preferences: Sophomores and Biology and Psychology majors

Expected Class Size: 72

Grading: yes pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

PSYC 222  (S) Minds, Brains, and Intelligent Behavior: An Introduction to Cognitive Science
Cross-listings:  COGS 222  PSYC 222  PHIL 222

Secondary Cross-listing
This course will emphasize interdisciplinary approaches to the study of intelligent systems, both natural and artificial. Cognitive science synthesizes research from cognitive psychology, computer science, linguistics, neuroscience, and contemporary philosophy. Special attention will be given to the philosophical foundations of cognitive science, representation and computation in symbolic and connectionist architectures, concept acquisition, problem solving, perception, language, semantics, reasoning, and artificial intelligence.
Requirements/Evaluation:  midterm and final exams, and weekly exercises
Prerequisites:  PSYC 101 or any PHIL course or CSCI 134 or permission of instructor; background in more than one of these is recommended.
Enrollment Limit:  20
Enrollment Preferences:  sophomore and first-year students, with additional preference given to students who satisfy more of the prerequisites. Do not contact the instructor to plead for special enrollment consideration.
Expected Class Size:  20
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes:  Linguistics  PHIL Contemp Metaphysics + Epistemology Courses  PSYC 200-level Courses

Spring 2024
LEC Section:  01  TR 9:55 am - 11:10 am  Joseph L. Cruz

PSYC 232  (F)(S) Developmental Psychology
An introduction to the study of human growth and development from conception through emerging adulthood. Topics for discussion include prenatal and infant development, perceptual and motor development, language acquisition, cognitive development, and social and emotional development. These topics form the basis for a discussion of the major theories of human development, including those about early experience, neural plasticity, dynamic systems, information processing, social learning, attachment, parenting, and family systems.
Requirements/Evaluation:  attendance and active class participation, 3 exams (2 midterms and final), and regular writing assignments
Prerequisites:  PSYC 101
Enrollment Limit:  50
Enrollment Preferences:  Preference will be given to sophomores and junior psychology majors and senior psychology majors who still need to fulfill a 200-level requirement.
Expected Class Size:  50
PSYC 242 (F)(S) Social Psychology
A survey of theory and research in social psychology. Topics include conformity, group dynamics, stereotyping and prejudice, aggression, altruism, attraction and love, the self, social perception, attitudes and attitude change, and cultural psychology. Applications in areas such as advertising, law, economics and business, and politics will also be discussed.

Requirements/Evaluation: two in-class exams, one paper (5 - 10 pages), and a final exam
Prerequisites: none
Enrollment Limit: 90
Enrollment Preferences: Psychology majors; then sophomores and first-years.
Expected Class Size: 90
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)
Attributes: PSYC 200-level Courses, TEAC Teaching Sequence Courses

Spring 2024
LEC Section: 01 TF 2:35 pm - 3:50 pm Kenneth K. Savitsky
PSYC 272 (S) Psychology of Education

This course introduces students to a broad range of theories and research on education. What can developmental research tell us about how children learn? What models of teaching work best, and for what purposes? How do we measure the success of various education practices? What is the best way to describe the psychological processes by which children gain information and expertise? What accounts for individual differences in learning, and how do teachers (and schools) address these individual needs? How do social and economic factors shape teaching practices and the educational experiences of individual students? The course will draw from a wide range of literature (research, theory, and first-hand accounts) to consider key questions in the psychology of education. Upon completion of the course, students should be familiar with central issues in pre-college education and know how educational research and the practice of teaching affect one another.

Class Format: discussion

Requirements/Evaluation: two exams and a final project

Prerequisites: PSYC 101

Enrollment Limit: 50

Enrollment Preferences: Psychology majors and those who plan to become teachers

Expected Class Size: 50

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Attributes: PSYC 200-level Courses TEAC Teaching Sequence Courses

Not offered current academic year

PSYC 312 (F) From Order to Disorder(s): The Role of Genes & the Environment in Psychopathology

Cross-listings: NSCI 322 PSYC 312

Primary Cross-listing

This course examines how experimental methods in neuroscience can be used to understand the role of nature (genes) and nurture (the environment) in shaping the brain and behavior. In particular, we will explore how neuroscience informs our understanding of psychiatric disorders such as anxiety, depression, and schizophrenia. We will investigate the biological underpinning of these disorders as well as their treatments. Readings will include human studies as well as work based on animal models. Topics will include: the ways in which environmental and genetic factors shape risk and resiliency in the context of psychiatric disease, the neural circuits and peripheral systems that contribute to psychopathology, and the mechanisms through which interventions may act. In the laboratory component of the course, students will gain hands-on experience in using animal models to study complex behavior and their associated neural mechanisms.

Requirements/Evaluation: class presentations, participation in discussions, two article previews (1-2 pages each), literature review (5 pages), research project proposal (5 pages), oral presentation of project proposal.

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)

Enrollment Limit: 19

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

PSYC 313 (S) Opioids and the Opioid Crisis: The Neuroscience Behind an Epidemic

Cross-listings: NSCI 313 PSYC 313

Primary Cross-listing
Opioid misuse, including addiction, has emerged as a major health epidemic in the United States. This course will explore the science of opioids as well as the historical and societal context surrounding their use and abuse. We will examine the neurobiological mechanisms through which opioids interact with pain pathways and reward circuits within the brain and we will explore how changes in these systems contribute to opioid tolerance, dependence, and addiction. We will consider how genetic, environmental and behavioral factors can powerfully influence these processes. Finally, we will consider alternative approaches to pain management as well as interventions for the treatment of opioid abuse. Students will be expected to design and conduct an empirical project related to the course material. Critical evaluation of peer-reviewed primary literature from animal and human studies will serve as a foundation for class discussions. Evaluation will be based on class presentations, participation in discussions and empirical projects, written assignments, and a poster presentation of the empirical project.

Requirements/Evaluation: class presentations, participation in discussions and empirical projects, five short position papers (approximately 2 pages double-spaced), an APA style empirical paper (approximately 20 pages double-spaced) and poster presentation of the empirical project.

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201)

Enrollment Limit: 16

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

PSYC 314 (S) Learning and Memory in Health and Disease

Cross-listings: NSCI 314 PSYC 314

Primary Cross-listing

This class will examine the neuroscientific basis of different types of learning and memory (such as declarative memory, motor memory, and associative memory), including the brain circuits, cellular mechanisms, and signaling pathways that mediate these different processes. In addition, we will explore how these processes can be disrupted in different diseases and disorders (such as Alzheimer's disease or post-traumatic stress disorder) and we will discuss the strategies and targets for therapeutic intervention. Class meetings will include a mix of lectures, discussions, and student presentations. Critical evaluation of peer-reviewed studies involving both human and animal models will serve as a foundation for class discussions. Working in small teams, students will also design and conduct an empirical project related to the course material.

Requirements/Evaluation: In-class presentations and participation in discussions, completion of an empirical research project which will include a project proposal (3-5 pages), data collection and analysis, and a final report (10-20 pages) along with a poster presentation.

Prerequisites: PSYC 212/NSCI 201/BIOL 212

Enrollment Limit: 16

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Humans are constantly making decisions: big and small, conscious and unconscious. This seminar will explore different aspects of the decision-making process, including (1) the algorithms for decision-making, (2) the neurological basis of decision-making and (3) the psychological, social, and physiological factors that influence our decision-making. We will examine how scientific approaches can help us understand complex social issues related to decision making. For example: how can stereotypes be understood as a failure in belief updating; how does confirmation bias lead to partisanship; and how to think of xenophobia from the "explore-exploit trade-off" perspective? In this course, we will explore how the brain and its neural networks contribute to these phenomena. The laboratory component of the course will introduce the research tools for studying different aspects of decision-making, including experimental paradigms, computational models and methods of analysis. Students will apply these tools to collaboratively design and conduct behavioral experiments and will analyze neural recording data to understand the relationship between neural activity and decision-making behaviors. Over the course of the semester, students will have the opportunity to develop skills in computer programming to better understand computational models and data analysis.

Requirements/Evaluation: Class presentations, participation in discussions, keeping a decision journal, short response papers and laboratory assignments, participation and presentation of empirical laboratory studies.

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201) or permission of instructor.

Enrollment Limit: 16

Enrollment Preferences: Psychology majors, Neuroscience concentrators, and Cognitive Science concentrators

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

PSYC 319 (F) Neuroethics (WS)

Neuroscience studies the brain and mind, and thereby some of the most profound aspects of human existence. In the last decade, advances in our understanding of brain function and in our ability to manipulate brain function have raised significant ethical challenges. This tutorial will explore a variety of important neuroethical questions. Potential topics will include pharmacological manipulation of "abnormal" personality; the use of "cosmetic pharmacology" to enhance cognition; the use of brain imaging to detect deception or to understand the ability, personality or vulnerability of an individual; the relationship between brain activity and consciousness; manipulation of memories; the neuroscience of morality and decision making. In addition to exploring these and other ethical issues, we will explore the basic science underlying them.

Requirements/Evaluation: six 5-page position papers and five 2-page response papers as well as participation in discussions

Prerequisites: PSYC 212 (same as BIOL 212 or NSCI 201); or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Psychology majors and Neuroscience concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
STS 319(D3) PSYC 319(D3) NSCI 319(D3)

Writing Skills Notes: In alternating weeks, each student in a tutorial pair will write a 5-page essay based on the assigned readings. Essays will be discussed during tutorial meetings and written feedback from the professor will be provided for each essay. At the end of the semester, students will choose one of their prior essays to revise as their final submission. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: NSCI Group B Electives PSYC Area 1 - Behavioral Neuroscience
Not offered current academic year

PSYC 323  (F) Visual Consciousness  (WS)
Cross-listings: COGS 323 PSYC 323

Secondary Cross-listing

Consciousness is considered as the 'last great mystery of science.' In this course we are going to delve into one of the most well-studied areas of this mystery, that is visual consciousness. Do you really perceive everything you look at? Are you aware of everything you see? Is our visual experience a grand illusion? We will start our investigation of such questions by reading about various approaches in understanding human consciousness. Then, we are going to apply these approaches to perception, and discuss theoretical and empirical controversies in visual consciousness. Finally, we are going to focus on evaluating empirical studies that attempt to resolve such controversies. The goal of this course is to build a bridge between theory and experimentation by learning how to interpret the results of scientific studies to shed light on theoretical and philosophical debates in the literature.

Requirements/Evaluation: 5 - 7 page essays every other week, and 2-page response papers to their partner's essays in alternate weeks
Prerequisites: COGS 222 (same as PHIL 222 or PSYC 222); or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Cognitive Science concentrators and Psychology majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
COGS 323(D2) PSYC 323(D2)

Writing Skills Notes: In a tutorial format, students will receive detailed feedback on their writing each week from the professor, as well as from their partner. Students will receive timely comments on their writing skills, with suggestions for improvement. The written essays will be discussed during tutorial meetings.

Attributes: COGS Interdepartmental Electives PSYC Area 2 - Cognitive Psychology
Not offered current academic year

PSYC 326  (F) Choice and Decision Making

Being human means that we sometimes make choices that we know are bad for us. In this course we survey theoretical and experimental approaches to understanding our strengths and weaknesses as decision makers. Topics include rationality, the debate over cognitive biases, fast and frugal heuristics, impulsivity and self-control, addictions and bad habits, paternalism, and moral decision making.

Requirements/Evaluation: problem sets, essay papers, class and lab participation, and a research report
Prerequisites: PSYC 221 or 222 or permission of instructor; permission is typically given to students who have successfully completed ECON 110
Enrollment Limit: 12
Enrollment Preferences: senior Psychology majors who need the course to fulfill the major
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)
Attributes: COGS Interdepartmental Electives PHLH Decision-Making by Institutions + Individuals PSYC Area 2 - Cognitive Psychology PSYC
Empirical Lab Course

SEM Section: 01 TF 2:35 pm - 3:50 pm Nate Kornell

PSYC 328 (S) Cognitive Approaches to Visual Perception
Cross-listings: COGS 328 PSYC 328
Secondary Cross-listing
When you open your eyes, you immediately perceive your environment in great detail. Seeing is so quick and effortless that people mistakenly think that vision works like a camera. However, the reason it feels effortless is due to the tremendous amount of complex processes and computations that take place in your brain whenever you open your eyes. In this course, we will explore such processes from a computational perspective and examine the concept of "visual illusion". We will focus on research methodologies used in vision science and look into how we can use such methodologies to explain visual illusions. We will learn about how our visual system processes certain visual features in our environment, such as motion, color, depth and shape. Learning about these processes will make us appreciate how everything we see around us can be a visual illusion.

Requirements/Evaluation: Class participation, weekly take-home quizzes, weekly short commentaries on readings, class presentation, individual 10-page final paper
Prerequisites: PSYC 221, COGS/PHIL/PSYC 222, or permission of instructor
Enrollment Limit: 19
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)

PSYC 332 (S) Children’s Mathematical Thinking and Learning
Are babies statistical experts? Will I ever be good at calculus? What are we born with and what do we learn? Before children are ever taught formal mathematics in a classroom, they are confronted with situations where they must use their informal understanding of geometry, space, and number to successfully navigate their environments. In this course we read and discuss both foundational and cutting-edge articles from neuroscience, cognitive science, education, and psychology to understand how humans bridge this gap between the informal and formal mathematical worlds. We will also
tackle questions such as: How do culture and language affect numerical understanding? What are the sources of children's mathematical misconceptions? What are the effects of early environmental input or input deprivation on mathematical development? What do we know about gender differences in math achievement? How do stereotypes, prejudice, and math anxiety affect math performance? For your laboratory component, you will work with a small group of other students to develop an original research project that tests a specific hypothesis about children's mathematical thinking and learning. Data will be collected either online or in community schools, with the permission of parents, teachers, and children. Your results will be written-up in for your final paper, which will be in the style of an empirical journal article.

Class Format: community-based data collection in local schools

Requirements/Evaluation: class participation, discussion leader, weekly open-notes reading quizzes, individual 12- to 15-page final paper based on empirical group research project

Prerequisites: PSYC 201 and PSYC 232 or permission of the instructor

Enrollment Limit: 16

Enrollment Preferences: Psychology majors, upperclassmen, students with a demonstrated interest in the course material

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

LAB Section: 02  F 1:00 pm - 4:00 pm  Eliza L Congdon

PSYC 333  (S)  Children's Minds  (WS)

Humans stand out in the animal world for their capacity to develop ideas and consider those of other people. Where does this capacity come from, and how does it develop? Why do some people seem more inclined to consider ideas than others? What can schools do to foster the pursuit of ideas? Young children ask questions, tell stories, speculate, invent, and predict. By middle childhood, they are capable of constructing ideas about any number of complex topics: death, justice, infinity, and the nature of time, to name four. Yet by adolescence only some people are disposed to pursue ideas. We will examine data on children who collect objects (such as bugs or rocks) and information (about things like dinosaurs, contagion, and death), and examine the role such collections play in the capacity to construct ideas. We will consider research on how and when children puzzle over philosophical problems (for example, identity and fairness), how they learn to plan, their ability to learn from thought experiments, their emerging conception of what an idea is, and what they know about knowledge and its role in shaping beliefs and making decisions. We will also spend time looking at individual and cultural variation, as well as the influence of adults. We will read work in developmental, educational and cognitive psychology, as well as anthropology.

Requirements/Evaluation: Each week one member of the tutorial pair will write a 5-7 page essay answering a specific question, and the other member of the pair will write a response. The goal is for each student to write 5-6 papers, and 5-6 responses during the term.

Prerequisites: PSYC 232 or PSYC 272

Enrollment Limit: 10

Enrollment Preferences: Psychology majors and those involved in the Program in Teaching

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)  (WS)

Writing Skills Notes: Students will receive extensive feedback on their writing each week, both from the professor and their partner. Further, students will have the opportunity to rewrite two of their papers in light of the feedback that they receive during the semester.

PSYC 335  (F)  Early Experience and the Developing Infant

The period from conception to age three is marked by impressive rapidity in development and the plasticity of the developing brain affords both fetus
and infant an exquisite sensitivity to context. This course delves into the literature that highlights the dynamic interactions between the developing fetus/infant and the environment. The course readings span a range of disciplines and cover a diversity of hot topics in the study of prenatal and infant development, including empirical research drawn from the developmental, neuroscience, psychopathology, and pediatric literatures.

**Requirements/Evaluation:** active class participation, weekly three-page papers, two oral presentations (20 minutes each and using PowerPoint), and one final 12-15 page final lab report

**Prerequisites:** PSYC 201, PSYC 212, and PSYC 232 or permission of instructor

**PSYC 338  (S) Inquiry, Invention and Ideas**

Children tinker, explore and create, but some more than others, and under some conditions more than others. What leads children to investigate, invent and build their own ideas? We will examine the development of curiosity, invention, and the ability to have or construct an idea. We will also look at what accounts for individual differences between children, including the role of intelligence, creativity, social cues, and opportunity. We will look at how these processes unfold at home and in school, and discuss the educational implications of the research we read, and the research we conduct.

**Requirements/Evaluation:** three 3- to 5-page essays, two child observations and a 7- to 10-page final paper

**Prerequisites:** PSYC 101, and PSYC 232 or PSYC 272, or permission of instructor

**Enrollment Limit:** 16

**PSYC 342  (S) Social Judgment**

This course focuses on how people make judgments and decisions in their social lives and why they are sometimes biased and irrational in their choices. We will place a strong emphasis on exploring how ideas from the judgment and decision-making literature can aid in our understanding of social psychological phenomena, including planning for the future, understanding other people, and resolving interpersonal conflicts. We will also place an emphasis on people's judgments and decisions as they pertain to their happiness and well-being, exploring how concepts in the judgment and decision-making literature can help us to understand why certain types of outcomes are more satisfying than others and why people sometimes choose in ways that fail to maximize their well-being. As we explore these questions, we will survey a variety of methods and perspectives, ranging from classic social psychological experiments to techniques imported from behavioral economics and cognitive psychology.

**Requirements/Evaluation:** a series of short papers; two essay exams; written and oral report of a research proposal

**Prerequisites:** PSYC 242 and PSYC 201, or permission of instructor
PSYC 344  (F)  Contemporary Social Psychology
This is a course about current research in social psychology--research that builds on the old classics, and research that opens up new areas of study. We'll consider topics of current interest, such as implicit bias, political polarization, moral judgment, emotion, social media, cultural influences on cognition, and more. Throughout the course, we'll think about how new studies verify, refute, or qualify older studies, and how psychological science progresses. This course is meant as a follow-up to PSYC 242 and assumes knowledge of social psychology.

Requirements/Evaluation:  a series of papers, two essay exams, written and oral reports of research
Prerequisites:  PSYC 242
Enrollment Limit:  16
Enrollment Preferences:  Psychology majors
Expected Class Size:  16
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D3)
Attributes:  PSYC Area 4 - Social Psychology  PSYC Empirical Lab Course

PSYC 345  (S)  Psychology and Politics
This course will explore the field of political psychology primarily from a social psychological perspective, though also from a political science perspective. The goal of this course is to develop an understanding of how people's personalities, identities, and social contexts shape their political attitudes and behavior. Topics will include polarization, partisanship, political engagement, authoritarianism and belief in conspiracy theories, stereotyping and prejudice, media effects, and emotion. Throughout the course, we will consider the relationship between psychology and our political institutions. We will evaluate how psychology can be used to help our institutions better embody democratic values and, conversely, how it has been used to further anti-democratic actions as well.

Requirements/Evaluation:  Class participation, weekly reaction papers on course readings (1-2 pages), constructive participation in the empirical research project, independent write-up of the research project (10-20 pages), poster/oral presentation of the project.
Prerequisites:  PSYC 201 and PSYC 242 or permission of instructor
Enrollment Limit:  16
Enrollment Preferences:  Psychology majors
Expected Class Size:  16
Grading:  no pass/fail option,  yes fifth course option
Distributions:  (D3)
Attributes:  PSYC Area 4 - Social Psychology  PSYC Empirical Lab Course
PSYC 346 (F) Environmental Psychology

Cross-listings: PSYC 346 ENVI 346

Primary Cross-listing
This is a course on contemporary social psychology as it pertains to the natural environment. Our two primary questions in this course are: (1) how can research and theory in social psychology help us understand the ways in which people engage with threats to the natural environment?, and (2) how can social psychology help us encourage environmentally responsible behavior and sustainable practices? Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of environmental solutions.

Requirements/Evaluation: a series of papers, two essay exams, written and oral reports of research

Prerequisites: PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.

Enrollment Limit: 19

Enrollment Preferences: Psychology majors, Environmental Studies majors, and Environmental Studies concentrators

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

PSYC 349 (S) Psychology and Law (DPE)

This course focuses on applications of psychology to the administration of justice. Drawing from the areas of social, personality, cognitive, and developmental psychology, we will look critically at the processes of criminal justice. We will compare the law's informal theories of human behavior with what psychologists know on the basis of empirical studies. We will cover a number of contemporary topics including police-civilian interactions, custodial interrogations, false confessions and guilty pleas, forensic evidence, deception detection, eyewitness identifications, alibi generation and corroboration, repressed and recovered memories, and jury selection and decision-making. We will also discuss methodological issues associated with conducting research in psychology and law. In the laboratory component of the course, students will design and conduct their own empirical research projects based on course readings and topics. These semester-long projects will be conducted collaboratively in pairs or teams.

Class Format: empirical lab course

Requirements/Evaluation: attendance and active class participation, several brief (1-2 page) reading response papers, (2-3) class presentations, written/oral project proposal (4-5 pages), participation empirical project (experiment design, data collection, data visualization, data analysis, interpretation), final APA-style research paper (15-20 pages), oral presentation of the research project

Prerequisites: PSYC 201 and either PSYC 242 or PSYC 221

Enrollment Limit: 16

Enrollment Preferences: Psychology majors

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (DPE)

Difference, Power, and Equity Notes: We will explore the differing dynamics of power between legal actors and consider the psychological and structural factors that contribute to vulnerability, coercion, and inequality in the justice system. Through discussions of race, age, body, gender, disability, and stigmatized identities, this course will encourage students to challenge assumptions of objectivity and fairness in our legal system.

Not offered current academic year
PSYC 351 (F) Clinical Neuropsychology

Clinical neuropsychology is a fascinating interdisciplinary subfield within clinical psychology that investigates the relationship between brain functions and behavior, including emotions and cognition. In this course, we will consider different cognitive functions, as well as an array of pediatric and adult neurological disorders, such as epilepsy, Parkinson's disease, stroke, and traumatic brain injury. Course goals include understanding the behavioral and cognitive characteristics associated with disorders and their underlying biology, how assessment tools are used in the diagnostic process, and how interventions may be implemented to improve function. To achieve these goals, we will discuss case studies and research articles, and we will take a hands-on approach by learning how to administer and interpret neuropsychological tests, paying particular attention to their strengths, limitations, and generalizability. We will also explore how neuropsychological test results can inform clinical interventions. Throughout these discussions, we will consider the ethical issues associated with neuropsychological testing and intervention.

Class Format: Class will only meet 2 of the 3 possible days each week, determined by the instructor.

Requirements/Evaluation: Attendance and active participation in class and online discussions, three 2-page papers with peer review, one group project/presentation, one final case report (5-7 pages)

Prerequisites: PSYC 201 and PSYC 252 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Psychology majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

PSYC 354 (F) Health Psychology

In this course, students will contrast the traditional biomedical model of health with the biopsychosocial model of health with a goal of understanding how biological, psychological, and sociocultural factors influence health and well-being. We will explore psychological theory and research that targets health promotion, disease prevention, and management of chronic illness. Course readings will include empirical articles, excerpts from popular science books, and news/media articles on public health issues. Discussions will center on using the biopsychosocial model to better understand health processes (e.g., stress, substance use, physical inactivity) and outcomes (e.g., insomnia, diabetes, heart disease), with a special focus on health disparities among historically disadvantaged groups in the United States. Students also will learn about cognitive, behavioral, and mindfulness-based treatments ("behavioral medicine") that promote healthy behavior and the management of chronic illness/disease (e.g., pain, HIV/AIDS, cancer). All students will design and conduct an empirical research project based on the course material.

Requirements/Evaluation: class presentations, reading responses, participation in class discussions, completion of an empirical project, APA-style empirical paper (10-20 pages double-spaced) and poster/oral presentation of the empirical project.

Prerequisites: PSYC 201 and PSYC 252, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Psychology majors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

PSYC 356  (S)  Asylum: Understanding the Psychological Effects of Persecution, Trauma, and the Migration Experience

Asylum is a specific form of humanitarian relief granted to an individual who can legally establish a history of previous persecution, or fear of future persecution, on account of their race, religion, nationality, political opinion, or membership in a particular social group. What are the psychological effects of being physically and emotionally persecuted because of who you are, what you believe, and/or your identity? Using the framework of asylum, we will study the effects of persecution, loss, and displacement on mental health and well-being, and the psychological impacts of traumatic stress and of seeking asylum in the United States. Through close reading of empirical studies, case studies, narratives, and legal writing, we will consider the psychological outcomes most frequently reported by asylum seekers, as well as the effects of traumatic stress on attachment and interpersonal relationships, family functioning and the capacity for recovery and post-traumatic growth. We will explore various types of persecution (e.g., gender-based violence, gang-violence, political persecution, and family separation) and their global health context. Finally, we will examine the social determinants, legal frameworks, and social justice implications of therapeutic interventions and resettlement. Students will also explore the clinical literature on psychological outcomes and how this research is informing both psychotherapy and social service interventions in the US and humanitarian settings across the globe. Guest speakers will punctuate our time over the semester, so that students can understand the role of lawyers, clinicians (medical and psychological) and global mental health researchers in addressing issues of forced displacement.

Requirements/Evaluation: Attendance and active participation, weekly reaction exercises (brief papers and presentations), and a final paper on an asylum-related topic of particular interest to the student.

Prerequisites: PSYC 252 is encouraged but not required. Students who have not taken PSYC 252 are encouraged to contact the instructor.

Enrollment Limit: 19

Enrollment Preferences: Psychology majors will have priority, but non-majors with interests in issues of asylum are encouraged to register.

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

PSYC 357  (F)  Depression

This course will provide students with a comprehensive understanding of depression. Topics will include assessment, models of etiology and course, effective approaches to prevention and intervention, and depression in specific populations. Readings will expose students to seminal works in the field as well as current methods and research findings. Throughout the course, students will evaluate current research based on theory, methodological rigor, and potential impact on prevention and intervention efforts.

Requirements/Evaluation: class participation, five 2-page (double spaced) response papers, 2 class presentations, final paper (study proposal)

Prerequisites: PSYC 201; PSYC 252 recommended

Enrollment Limit: 19

Enrollment Preferences: Psychology majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Attributes: PSYC Area 5 - Clinical Psychology

Not offered current academic year

PSYC 358  (S)  Developmental Psychopathology: Trajectories of Risk and Resilience

Why do some youth develop psychopathology in the face of adversity whereas others do not? How do we define psychological disorders in youth? Is resilience a static trait, or can it be promoted? How do we prevent youth from developing psychopathology? In this course, students will address these and other questions using a risk and resilience framework that examines the interactions among multiple risk and protective factors in the pathway to psychopathology. Specifically, students will examine the interactions between individual characteristics (e.g., neurobiological, interpersonal, cognitive, and emotional factors) and environmental contexts (e.g., family, school, peer, early adversity, poverty) in the development of risk and resiliency.
Application of etiological models and empirical findings to prevention and intervention approaches will be explored. Throughout the course, students will evaluate current research based upon theory, methodological rigor, and clinical impact.

**Requirements/Evaluation:** Evaluation will be based on oral participation, daily assignments, 1 presentation, and four 5-page position papers.

**Prerequisites:** PSYC 252; PSYC 201 recommended

**Enrollment Limit:** 19

**Enrollment Preferences:** Psychology majors and Public Health concentrators

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

**Attributes:** PHLH Reproductive, Maternal and Child Health PSYC Area 5 - Clinical Psychology

*Not offered current academic year*

**PSYC 359  (S)  Anxiety: Responses to Danger, Both Real and Imagined**

This is an advanced course on anxiety that takes an in depth look at the theory and research on the normative psychological processes that influence responses to danger, both real and imagined. Specifically, it examines the empirical research on psychological responses to traumatic experiences, such as combat, sexual assault, and natural and community disasters. Responses to perceived or imagined threats are also discussed as the underpinnings of such anxiety disorders as Panic Disorder, Generalized Anxiety Disorder, Social Phobia, Specific Phobia and OCD. Discussions focus on commonalities and differences in empirically supported treatments for anxiety disorders as well as controversies in the field.

**Requirements/Evaluation:** Regular attendance and active class participation - students will be randomly quizzed and/or asked to summarize or discuss material from the assigned readings and graded for their preparedness; midterm examination; one final 8-10 page literature review paper based on course content; one group presentation with discussion.

**Prerequisites:** PSYC 252

**Enrollment Limit:** 16

**Enrollment Preferences:** Psychology Majors; preference given to those with outstanding major requirements

**Expected Class Size:** 16

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**Attributes:** PSYC Area 5 - Clinical Psychology

*Not offered current academic year*

**PSYC 361  (F)  Nonviolence and Positive Psychology**

In this course we will explore the theory and practice of nonviolence in the context of empirical research in Positive Psychology. Nonviolence refers to choosing not to threaten or injure others, and its practice requires cultivating personal qualities that enable such a choice. Positive Psychology refers to the scientific study of those personal qualities that enable people to live happy and fulfilling lives. We will begin by studying the history and moral theories of nonviolence. Using research from across the subdisciplines of psychology, we will then evaluate the empirical claims of those theories regarding psychological benefits of nonviolence to the practitioner, attitude change in the adversary, and effects on the larger community. An important focus of the course will be to critically assess the research methods and data analyses used in these studies. Topics will include self-control, gratitude, empathy, forgiveness, tolerance, courage, aggression, resisting violent assault, and civil disobedience.

**Class Format:** Class meetings will be primarily discussion-based

**Requirements/Evaluation:** Class attendance and participation, discussion leadership, literature searches for relevant empirical research papers, short papers in the form of research summaries, and a final paper in the form of an empirical research proposal.

**Prerequisites:** Any 200-level course in PSYC or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Psychology majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option
PSYC 362 (F) Cultural Psychology
What is culture? How does culture influence the way we think and behave? How does it affect the neuro underpinnings in our brain? How is culture represented, impacted, and transformed in the digital age? This course will introduce you to the field of cultural psychology, and explore the role of cultural meanings, practices, and institutions on human psychology. We will discuss how culture emerges through evolution and examine how the same psychological processes that give rise to rich cultural practices also bear negative consequences on our society, such as stereotype and prejudice. We will also examine how human culture is transformed through digitalization, immigration, and globalization, and how it is represented on mass media and social media. Through the course, you will learn to critically examine human behaviors in the contexts of diverse cultural beliefs, to reflect on your own upbringings through a cultural lens, and to gain an appreciation for cultures other than your own.

Requirements/Evaluation: Students are expected to participate in and periodically lead class discussions. As part of this, students must complete assigned readings prior to class meetings. Finally, students will participate in an individual or small-group project culminating in a written and oral presentation.

Prerequisites: PSYC 201 and at least one other 200-level psychology course
Enrollment Limit: 16
Enrollment Preferences: Psychology majors
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
Attributes: PSYC Area 6 - Other/Interdisciplinary Psychology

PSYC 363 (S) Media, Race, and U.S. Black Families
Cross-listings: AFR 384 PSYC 363

Secondary Cross-listing
In this course, we will work to synthesize what we know about some of the key socializing forces for U.S. Black youth today. We will focus on how families, entertainment media, and the news can socialize Black children. Drawing on a range of theories and data we will examine how family members communicate about issues of identity and how media can come into play. What do we know about how U.S. Black families communicate about identity? What gaps remain in our knowledge, and how can we find the answers? What can we learn about today's media content when we apply research-informed lenses? What predictions can we make about its potential uses and effects among Black families? We will identify central research areas that warrant further attention and consider which methodologies would best work to fill those gaps. We will prioritize approaches that highlight the agency and strength of U.S. Black families and of youth themselves.

Requirements/Evaluation: 1 in-class presentation, two 2-5 page papers, and one 7-10 page final research proposal (that builds on the two shorter papers)

Prerequisites: None
Enrollment Limit: 18
Enrollment Preferences: Africana Studies Concentrators and Psychology Majors
Expected Class Size: 18
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)

PSYC 372  (F)  Advanced Seminar in Teaching and Learning
This advanced seminar will give students an opportunity to connect theory to practice. Each student will have a teaching placement in a local school, and participate in both peer and individual supervision. In addition, we will read a range of texts that examine different approaches to teaching, as well as theory and research on the process of education. What is the best way to teach? How do various theories of child development and teaching translate into everyday practices with students? Students will be encouraged to reflect on and modify their own teaching practices as a result of what we read as well as their supervision. Questions we will discuss include: What is the relationship between educational goals and curriculum development? What is the relation between substance (knowledge, skills, content) and the interpersonal dynamic inherent in a classroom setting? How do we assess teaching practices and the students' learning? What does it take to be an educated person?

Requirements/Evaluation: this course involves a field placement, weekly readings, as well as seminar discussion, supervision, and a graded journal

Prerequisites: PSYC 232 or PSYC 272 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Psychology majors and those who plan to become teachers

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Fall 2023

SEM Section: 01  W 1:10 pm - 3:50 pm  Susan L. Engel

PSYC 373  (F)  Critical Issues in Learning and Teaching
In this seminar we will take a deep dive into several key topics in education. We will examine psychological research as well as a range of other materials (essays, film, recordings of children and personal experiences) to help answer a series of questions, including: Does the kind or quality of schooling have a measurable impact on children? How do you create curriculum? How does one conduct high quality classroom observations? What do good teachers have in common? What is the best way to help teachers get better at what they do? Can remote learning work well in K-12 settings?

Class Format: Students will meet in small groups with the professor. Each group will meet for a tutorial-like session once a week. We will use students' papers as a jumping off point for our discussions.

Requirements/Evaluation: Regular class attendance and full participation, five 5-page papers, and regular written responses to other students' papers. We will also do a variety of in-class activities that may require some independent preparation (gathering materials, or doing brief interviews) and some coordination with one another outside of class time.

Prerequisites: PSYC 232 or PSYC 272 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Psychology majors and those involved in the Program in Teaching

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Not offered current academic year

PSYC 377  (F)  Mapping Anti-Bias Education
Cross-listings: PSYC 377 AFR 358

Secondary Cross-listing

In this course, we will use theories and data to define anti-bias education in childhood contexts and examine its application across U.S. schools and childcare centers, families, and the media environment. We will ask ourselves: What do we know about the need for anti-bias education among non-marginalized and marginalized children, including those who are minoritized for their ethnic-racial, gender, and/or sexual identities? How are various biases and identities shaped in childhood? Which media-based and interpersonal interventions can be effective with anti-bias education and why? What are some of the contemporary hesitations and challenges around implementing anti-bias education for educators, families, and children? What are some of the practices that marginalized families are already implementing? As we explore approaches and possibilities for anti-bias education across children's ecosystems, we will propose innovative recommendations for research and practice that have the potential to yield positive outcomes for today's children.

Requirements/Evaluation: Weekly 1-page reflection papers (graded on a pass/fail basis), one 3-5 page mid-term paper, one final 7-10 page paper or approved project

Prerequisites: None

Enrollment Limit: 18

Enrollment Preferences: Africana Studies Concentrators and Psychology Majors

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

PSYC 402  (F) Blessings and Blunders of Human Memory
Nietzsche wrote that the forgetful are "blessed" because "they get the better even of their blunders." In what ways does forgetfulness serve us well? Is it possible, or even desirable, to have perfect memory? Can traumatic memories be repressed? Can false memories of committing a crime be implanted? Are "collective" memories subject to the same processes as individual memories? How do museums, monuments and sites (re)construct and tell a version of the past based on changing cultural identities? In this student-led seminar, we will attempt to answer these questions and more in the context of a broad exploration of the foundational concepts of human memory. We will examine the theories and methods researchers use to study individual and collective memories across varied domains, including clinical practice, romantic relationships, the justice system, and education. In this course, you will gain an evidence-based understanding of the nature of human memory through critical examinations of popular press literature, films, books, podcasts, and cutting-edge scientific studies.

Requirements/Evaluation: participate in and lead class discussions, three papers (approximately 5-7 pages double-spaced; including at least one publication-ready science communication piece)
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: senior Psychology majors
Expected Class Size: 14
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
Not offered current academic year

PSYC 403  (F) The Psychology of Love
This seminar will examine psychological approaches to the study of attraction, affiliative bonds, attachment, and relationship health across the lifespan. These topics will be introduced via review articles, books, and films. Students will analyze these topics more deeply with presentations and student-led discussions of original research articles from across multiple perspectives and subdisciplines of psychology.

Requirements/Evaluation: participation in class discussion, selection and presentation of relevant empirical papers, three position papers
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: senior Psychology majors
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option
Distributions: (D3)

SEM Section: 01  MR 1:10 pm - 2:25 pm  Amie A. Hane

PSYC 404  (F) Bias and Discrimination: Sources and Consequences
We often assume that our experiences reflect an objective reality, that the way we see the world is the way it really is. Yet research contradicts this notion, showing that our perceptual experiences are malleable and subjective. They are shaped by higher-order, top-down influences such as our cognitions, social groups, surroundings, motivations, emotions, and prior experiences. In this class, we will explore how subjective experiences and
idiosyncratic categorizations of people into social groups directly influence social justice outcomes across varied domains. For example, how do these differences in our subjective experience influence the ways in which people relate to one another? What are the implications for fair treatment across multiple factions of society, including education, employment, health care, and criminal justice? Are there effective interventions and policies for reducing gender, racial, and ethnic bias? For promoting inclusivity? If so, why are they effective? To develop an evidence-based understanding of bias and discrimination, we will critically analyze source materials from popular press literature, films, books, and podcasts, as well as empirical research from across multiple approaches and sub-disciplines of psychology. The class format will be primarily discussion based and student-led.

Class Format: student-led discussions

Requirements/Evaluation: weekly brief thought questions, lead two class discussions, select and present relevant empirical papers, three papers (5-7 pages)

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: senior Psychology majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Not offered current academic year

PSYC 405 (F) Why We Believe What We Believe

As scientists, we aspire to hold beliefs that are based in evidence. As humans, however, we are likely to embrace beliefs influenced by a variety of social, historical, cultural, political, racial and religious factors. In this class, we will explore the question of why we cling to certain beliefs, even in the face of significant contradictory evidence. For example, what assumptions do we make about strangers and why are we so convinced these assumptions are correct? How does our culture affect our parenting choices and why do we hold on to them so fiercely? What assumptions do we make about the nature of memory, emotions and cognitions and are these assumptions valid? Are there “defensive moves” that we make when we are challenged racially, even when we are committedly antiracist? And, if so, why? In class, we will explore source material from popular culture: books, films, podcasts and popular press articles, and we will examine claims made about different belief systems. We will then critically evaluate these claims by exploring the available empirical psychological evidence. The format of this class is student-led discussions.

Requirements/Evaluation: Students will be required to develop and lead rigorous generative discussions with their classmates several times during the semester. In addition, students will be expected to actively participate in discussions and to write three 5-7 page position papers.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: senior Psychology majors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Fall 2023

SEM Section: 01 MR 2:35 pm - 3:50 pm Nicole T. Harrington

PSYC 406 (F) Are there any universal psychological phenomena? (DPE)

In this course, we will critically examine the ways culture, identities, power, systems, and privilege have shaped our understanding of human behavior as well as the consequences for policy, education, intervention, and prevention. Students will: a) evaluate the ways in which unmeasured cultural variables may have influenced the findings of seminal research articles and psychological theories; b) identify new methodological approaches, concepts, and processes that are revealed when we centralize people and topics that have been excluded from the research literature; c) examine ways the field has contributed to structural oppression and inequities; and d) design studies that provide robust tests of universality, elucidate the limits of universality, and have implications for addressing inequities. This student-led course will allow students to identify topics of interest in multiple sub-disciplines of psychology, select empirical readings, and lead class discussion.

Requirements/Evaluation: Course requirements include reading empirical articles, participating in class discussions, selecting relevant topics and readings for class discussions, leading 2 class discussions, and writing three empirically-based papers (approximately 5 pages double-spaced).
Prerequisites: None
Enrollment Limit: 14
Enrollment Preferences: Senior psychology majors
Expected Class Size: 14
Grading: no pass/fail option, yes fifth course option
Distributions: (D3)

Difference, Power, and Equity Notes: Students will address the question of whether there any universal psychological phenomena. To do so, students will use scientific reasoning and quantitative skills to critically examine the ways culture, identities, power, systems, and privilege have shaped our understanding of human behavior as well as the consequences for policy, education, intervention, and prevention. Students will use an intersectional approach to understand the ways identity and systems shape psychological phenomena.

Fall 2023
SEM Section: 01  TF 1:10 pm - 2:25 pm  Catherine B. Stroud

PSYC 407 (F) Success and Failure
The theme of this psychology senior seminar will be success. We will discuss the path to personal success, including the relative importance of hard work, genetic talent, and luck; barriers to success like poverty and discrimination; the importance of parents, family, teachers, and friends; and what we really mean by success. For each topic we cover, we will read a book or watch a film, then delve deeper by reading and discussing scientific journal articles. Class meetings will be student-led discussions. You will write three or four 5-7 page papers. The larger goal will be to practice useful life skills such as how to lead and participate in a meeting (i.e., a class discussion), how to write engagingly and convincingly, and how to assess an argument skeptically and discuss it using evidence.

Class Format: student-led discussions
Requirements/Evaluation: participate in and lead class discussions, choose class reading assignments, and write essays
Prerequisites: senior Psychology majors or permission of instructor in rare cases
Enrollment Limit: 14
Enrollment Preferences: senior Psychology majors
Expected Class Size: 14
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

Not offered current academic year

PSYC 408 (F) The Psychology of College
What happens to people while they're in college? Does it have an impact on people's core identity, the way they think, form relationships, or participate in society? Most people's ideas about the impact of college come from personal experience, and the strongly held views of journalists, filmmakers, college spokespeople, relatives and public figures. Those beliefs are often misguided. Yet research can help us develop an accurate picture of just what it is that college does and doesn't do. Drawing on films, popular books and articles, as well as research from across the subdisciplines within psychology, we will examine some of the most common beliefs, and then delve into the psychological evidence that supports or refutes them. Our goal will be to develop a scientifically-based understanding of the psychological impact of college, and redesign various features of college to reflect our conclusions. Empirical work on this topic presents unique methodological challenges, so we will also spend some time designing studies that overcome those challenges.

Requirements/Evaluation: weekly readings, leading two class discussions, and writing three 5-7 page papers
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: senior Psychology majors
Expected Class Size: 14
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
PSYC 409  (F)  Growing Up

Growing up is a universal human experience, yet humans are shaped by distinct forces as they navigate infancy, childhood, adolescence, and adulthood. This seminar will zoom in on five key inflection points in the human lifespan (times when our environment or the choices we make may have an outsized impact on our life's trajectory): 1) birth/infancy, 2) school entry, 3) adolescence, 4) emerging adulthood, and 5) death/dying. We will discuss popular media depictions of humans in each of these transition points (such as the film Babies, and the book Being Mortal). We will then compare, contrast, and evaluate these popular depictions of "growing up" or "growing old" with accounts from empirical research from all sub-disciplines of psychology. The empirical evidence will take the form of journal articles that match the themes of the media depiction but use the scientific method to try to characterize the cultural and personal forces that most affect the human experience and shape a person's identity in key moments of the lifespan. The course will be guided by broad questions such as -- To what extent do humans shape their own destiny versus being shaped by cultural, environmental, or genetic forces beyond their control? Are there some types of experience that are stronger predictors of long-term outcomes than others? Are there any human experiences that are truly universal? What can psychology, as a field, tell us about "growing up" as a human on this planet, and where might it fall short?

Class Format: Class will only meet 2 of the 3 possible days each week, determined by the instructor.

Requirements/Evaluation: Students are expected to co-lead discussions several times during the semester, choose empirical readings, participate in discussions, and write a total of three 5-7-page evidence-based argument papers.

Prerequisites: None

Enrollment Limit: 14

Enrollment Preferences: Open only to senior psychology majors

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D3)

Fall 2023

SEM Section: 01    MWF 11:00 am - 12:15 pm     Eliza L Congdon

PSYC 411  (F)  How do we think?

In this seminar, we will seek to understand how the mind operates and how various factors shape our thinking. We will explore how emotion, values, and beliefs influence cognitive processes and consider the means by which rationality and heuristics influence decision-making. We will compare algorithms used by the brain with those used in artificial intelligence systems. We will also examine how the ways we think shape our interactions with society. Through student-facilitated discussions, we will explore how psychological research informs our understanding of cognition. We will examine how accurately (or inaccurately) popular media reflect research findings. Students will identify gaps in our knowledge and propose novel research to fill those gaps. Finally, we will apply findings from the literature to help develop interventions to combat cognitive blind spots, distortions, and biases, and to foster happiness, well-being, and deeper connections.

Requirements/Evaluation: Students will serve as discussion facilitators several times during the semester. Students will be expected to actively participate in discussions. Assignments will include three 5-7 page papers of different types.

Prerequisites: None

Enrollment Limit: 14

Enrollment Preferences: Senior Psychology majors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Fall 2023

SEM Section: 01    TR 9:55 am - 11:10 am     Yunshu Fan
PSYC 412  (F)  Feelings & Emotions: Shaping the Brain and Society
This course will explore what emotions are, the evolutionary origins of emotions, and the tools and techniques researchers use to study emotions both in humans and in animal models. We will examine how brain state(s) may underlie different emotions and challenge widely held notions about how an individual's emotion can influence behavior and social factors. Questions we will explore include: Is it better to be emotional or rational? What are 'gut feelings'? Are there gender differences in emotionality and, if so, what are their origins? Popular press literature and scientific studies will fuel student-led discussions as we seek to develop an evidence-based understanding of emotions and how they shape the world around us.

Requirements/Evaluation: Course requirements include weekly readings, leading at least two class discussions, and writing three papers: one literature review (5-7 pages), one claim- and empirically-driven paper (5-7 pages), and one op-ed (3 pages).

Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: Senior psychology majors
Expected Class Size: 14
Grading: no pass/fail option, yes fifth course option
Distributions: (D3)
Not offered current academic year

PSYC 413  (F)  The Resilient Mind
In this seminar, we will explore the psychological, environmental, and biological variables that shape an individual's response to stress and/or adversity. We will discuss how factors such as personality, coping style, social network/community, gender, brain mechanisms, and genes can influence one's ability to adapt and recover from a crisis. Students will critically examine depictions of resilience in popular literature and film, and employ empirical scientific articles from across multiple approaches and sub-disciplines of psychology to delve deeper into their analyses. Class meetings will be primarily discussion based and student-led, with the central goal of developing skills in forming and communicating evidence-based arguments.

Requirements/Evaluation: participating in and leading discussions, selection and presentation of relevant topics and readings, and three position papers (approximately 5-7 pages double-spaced)

Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: senior Psychology majors
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)
Not offered current academic year

PSYC 414  (F)  Minding the Mind: Evaluating the Theory and Practice of Mindfulness
While mindfulness, both in idea and practice, has been around for centuries, its popularity has dramatically increased in recent years. But what is "mindfulness" and how effective is it in addressing psychiatric and/or physical conditions such as anxiety, depression, post-traumatic stress disorder, or chronic pain? In this course, we will examine mindfulness through both its popular depictions as well as through the critical evaluation of the scientific literature. We will investigate how mindfulness practices affect biological, behavioral, and cognitive processes. We will consider the myriad ways that mindfulness has been applied in "real world" settings including mental health, education, and interpersonal relationships.

Requirements/Evaluation: Students are expected to participate in and periodically lead class discussions. Students will write three 5-7 page papers

Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: senior Psychology majors
Expected Class Size: 14
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
Not offered current academic year
PSYC 416  (F) Psychology of Nonviolence

In this course we will explore the theory and practice of nonviolence in the context of empirical research in Positive Psychology. Nonviolence refers to choosing not to threaten or injure others, and its practice requires cultivating personal qualities that enable such a choice. Positive Psychology refers to the scientific study of those personal qualities that enable people to live happy and fulfilling lives. We will begin by studying the history and moral theories of nonviolence. Using research from across the subdisciplines of psychology, we will then evaluate the empirical claims of those theories regarding psychological benefits of nonviolence to the practitioner, attitude change in the adversary, and effects on the larger community. An important focus of the course will be to critically assess the research methods and data analyses used in these studies. Topics will include self-control, empathy, forgiveness, tolerance, courage, aggression, resisting violent assault, and civil disobedience.

Class Format: class meetings will be primarily discussion-based and student-led

Requirements/Evaluation: Class attendance and participation, discussion leadership, literature searches for relevant empirical research papers, short papers in the form of research summaries, and a final paper in the form of an empirical research proposal.

Prerequisites: PSYC 201

Enrollment Limit: 14

Enrollment Preferences: Senior Psychology majors

PSYC 418  (F) Suckers and Scammers

Virtually all of us are familiar with at least one account of a truly impressive scam - an event, device, or scheme that attracts attention, trust, and money, and then turns out to be a fake, sometimes with devastating consequences for everyone. What are the psychological processes and mechanisms employed by the scammers, as well as those who fall for such schemes? In this course we will consider several books and films that depict well-publicized recent examples (for instance, Bad Blood, The Rachel Divide, and The Talented Mr. Madoff). We'll use research from scientific journals to understand the psychology of both the scammer and those who fell for their schemes. We'll consider, among other things, the developmental origins of deception, what motivates people to pull one over on others, the role of identity maintenance, how we decide who to trust, and what it takes to convince oneself of something implausible. We'll use psychological research from all of the subdisciplines of psychology to find out what these cases might have in common, and also look at studies that illuminate unique features of each situation. Most class meetings will be student-led discussions. You will write three or four 5-7-page papers. The larger goals include: learning how to use scientific data to answer a wide range of questions about everyday life; how to engage in fruitful evidence-based argument; and how to write to think, and to persuade.

Requirements/Evaluation: weekly readings, leading two class discussions, and writing three 5-7 page papers

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: senior Psychology majors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Spring 2024
HON Section: 01 TBA Noah J. Sandstrom

Winter Study -----------------------------------------------

PSYC 40 (W) Intensive: Social Psychology
A survey of theory and research in social psychology. Topics include conformity, group dynamics, stereotyping and prejudice, aggression, altruism, attraction and love, the self, social perception, attitudes and attitude change, and cultural psychology. Applications in areas such as advertising, law, economics and business, and politics will also be discussed.
Requirements/Evaluation: two in-class exams, one paper (5 pages), and a final exam
Prerequisites: permission of a dean
Enrollment Limit: 25
Enrollment Preferences: students who need to make up a deficiency
Expected Class Size: NA
Grading: pass/fail only
Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar’s Office will register students in PSYC 100 and PSYC 40.

Winter 2024
LEC Section: 01 TBA Jeremy D. Cone
Public health seeks to understand, and also to protect and improve, health at the level of a community or population. Communities make decisions and allocate resources that, intentionally or not, fundamentally shape human life. For example, great reductions in sickness and early death have come from social interventions with relatively low financial cost, such as physically separating drinking water from sewage, or distributing aspirin, condoms, mosquito nets, vaccines or soap, or sharing new ideas about life’s possibilities. The way a society is organized affects the way that social and scientific knowledge is distributed within it; access to that knowledge shapes health at the individual level. At its heart, the study of public health focuses on questions about relationships between science and society, and between reality and possibility: what effective public health policy is and how we can measure its effectiveness; what the relationship is, and ought to be, between research and policy; how we reconcile important moral and economic claims, or balance other values that compete with maximizing health; what counts as disease, over time and among cultures; how we think about cause and responsibility; what constitutes a healthy environment; how our fundamental beliefs determine our approaches to health decisions; and how such decisions ought to be made.

Requirements

Application to the concentration must be completed in the Spring of sophomore year. Applications are due during pre-registration. Application materials can be obtained on the public health website public-health.williams.edu by early April or by e-mailing the chair of the program. Due to excess demand for the concentration, applicants are not guaranteed admittance to the program. Depending on availability, a few students may be admitted in the Spring of Junior year with a mid-April deadline.

All students wishing to pursue the Area of Concentration should take this course early in their careers, preferably sophomore year. Students may petition the advisory committee to substitute a course taken in a study-abroad program focused on global health, providing that the course is equivalent in scope. However, students who plan to take advantage of this option should have taken at least two other courses from among the electives by the end of their sophomore year, and should recognize that those who lack a foundation in the core issues of the field may find it more challenging to prepare their proposal for admission to the concentration.

Statistics

Statistical analysis is at the heart of the quantitative tools necessary to study the health of populations. One course in statistics from the list below is required of all concentrators.

Elective Courses

Concentrators must take at least three electives, with at least two different prefixes, from the list below. Elective courses are grouped by category, but these clusters are not meant to constrain students to a single “track” within the program. Instead, each student is free to determine, with the guidance of an advisory committee member(s), a set of electives that provides an intellectually coherent exploration of their particular areas of interest within the field of public health. In choosing electives, students should consider the balance of breadth versus depth that will allow them to gain theoretical and methodological sophistication in one or more areas. Students may not substitute an independent study for any of these electives. Winter Study courses may not be counted towards the electives.

Experiential Component

Because many public health challenges cannot be fully appreciated until one has hands-on experience with real communities and actual populations, each concentrator must have at least one relevant field-based educational experience with a research component. This requirement may be met through participation in an approved study abroad program (see below), one of the Winter study courses marked with an asterisk, a WS99 project, or a not-for-credit summer or academic-year internship. In every case, the advisory committee must approve the project in advance. Please note that experiential component should address both the “public” and “health” in public health. Projects that center on clinical or lab or that do not have a meaningful health component will generally not satisfy the PH experiential requirement.

PHLH 402 (S) Senior Seminar in Public Health
The capstone seminar provides concentrators with the opportunity to reflect upon and synthesize their experiential learning in the context of understanding gained from a cohesive set of elective courses, and through the lens of a variety of intellectual and disciplinary frameworks. A second goal is to give concentrators experience working in a multi-disciplinary team to address a real-world, and in many cases very daunting, public health problem. Students will read, discuss, and compose written reflections on primary source empirical papers addressing a range of issues and disciplines in the field of public health. For example, topics may include the social determinants of health, environmental health risks, and access to health care. Students will also be divided into three or four research teams to investigate a contemporary real-life issue in public health by designing a study; collecting and analyzing data; and disseminating findings by written report and formal oral presentation to the public health advisory committee faculty. The capstone course is required of all concentrators, but may be opened to other students with relevant experience at the discretion of the instructor and the advisory committee, if space permits.

Written Proposal

To be considered for admission to the Area of Concentration in Public Health, students must submit a written statement describing the portfolio of courses, study abroad, and experiential learning component(s) they intend to pursue. In this proposal, candidates for the concentration should describe their intellectual goals, and if relevant, how these relate to their professional goals. A fundamental purpose of the proposal requirement is to encourage the student to consider concretely how s/he will engage with socio-cultural, behavioral, policy, and/or biomedical aspects of population health. To this end, students should address whether a methodological or disciplinary emphasis ties their chosen courses together, and how the intended experiential component will relate to this set of questions. This proposal is due by the end of course registration period in the spring of the sophomore year, and should be prepared in consultation with a member of the advisory committee. Concentrators are required to revisit and update their proposal prior to registration in the spring of the junior year, and to provide documentation of their internship experience both prospectively and retrospectively. Please note electives will not be offered every year. Students should check the course catalog as they considering possible electives.

STUDY ABROAD AND INTERNSHIPS

Although not a requirement for the PH concentration, study abroad and/or overseas internships provide a crucial opportunity to engage with global health issues through field-based coursework and independent research projects. The Public Health program in coordination with the Study Abroad Advisor and the Office of Career Counseling will advise students on opportunities in these areas. In particular, students may want to consider one of the several Global Health options offered through SIT. One or more courses completed on an approved study abroad program can be counted toward the three elective courses, with permission of the Chair. You can find general study away guidelines for Public Health at public-health.williams.edu.

PHLH 201 (S) Dimensions of Public Health (DPE)

Public health is concerned with protecting and improving health at the level of a community or population. Although individual behavior is an essential element of public health, collective, rather than individual, outcomes are the focus of public health study. In this course we will survey the field of public health, introducing students to core concepts and methods that highlight the interrelationship of individual choice and social institutions with environmental and biological factors in producing health outcomes at the population level. We will develop these concepts and methods within the context of signal cases and public health crises.

Requirements/Evaluation: two papers on a selected population or country and health issue, peer reviews and active contribution to class discussion

Prerequisites: none
Enrollment Limit: 14

Enrollment Preferences: sophomores, potential Public Health concentrators

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: No divisional credit (DPE)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement because of its central focus on the ways that difference and power shape health outcomes in the U.S. and internationally. It uses an interdisciplinary approach to explore issues including the historical relations between communities of color, healthcare providers, and public health practitioners; contestation over the role of markets and government in public health; and differing explanations for the patterns of race, class, etc., in health outcomes.

Attributes: PHLH Core Courses

Spring 2024

SEM Section: 01  M 7:00 pm - 9:40 pm  Marion Min-Barron
SEM Section: 02  W 1:10 pm - 3:50 pm  Marion Min-Barron

PHLH 220 (F) International Nutrition (DPE) (WS)

Global malnutrition continues to represent one of the most challenging issues of international development. Problems of both under- and overnutrition beginning as early as in utero can detrimentally influence the health, development and survival of resource-limited populations. This course introduces students to the most prevalent nutritional issues through a food policy perspective and exposes them to a wide variety of interventions, policies and current debates in the field of international nutrition. In addition to exploring the multi-level programmatic approaches for the prevention and treatment of the related nutritional problems, students will gain exposure and experience in program design and program proposal writing. Readings will involve both real-world programmatic documents/evaluations as well as peer-reviewed journal articles. Examples will be drawn from Africa, Asia and Latin America.

Requirements/Evaluation: six 1-page essays, one final term paper (10-15 pages), one oral presentation, and active class participation

Prerequisites: PHLH 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Public Health concentrators

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: As a writing skills course, students will write six 1-page essays (each with an optional rewrite) which will help build the specific writing skills necessary for the final 10- to 15 page paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course exposes the issues of difference, power and inequity by exploring the unequal distribution of resources and power at the global, national and intra-national level within the international nutrition context. We will also critically engage with issues of power, cultural difference and related ethics in the context of international development and nutrition programming.

Attributes: PHLH Nutrition, Food Security + Environmental Health

Not offered current academic year

PHLH 310 (F) Equity in Health

Equity in health has been defined as inequalities in health outcomes based on irrelevant social characteristics. The Sustainable Development Goals and Agenda 2030 highlight equity in health as a main focus and key to achieving social sustainability. This course will introduce students to the concept of equity in health, and discuss the theoretical underpinnings of the pathways to unequal health outcomes. The social determinants of health and how they translate to uneven outcomes will be explored and discussed. There will also be a special focus on gender and gender-based violence as a driver of ill health. How to reduce inequity in health will be discussed and debated. Readings will involve some of the classic texts on health equity as well as recent explorations of the area.

Requirements/Evaluation: weekly short reflection papers and one final paper (10-12 pages)
Prerequisites: PHLH 201 Dimensions of Public Health or Permission of Instructor

Enrollment Limit: 16

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: PHLH Reproductive, Maternal and Child Health PHLH Social Determinants of Health

Not offered current academic year

PHLH 351 (F) Racism in Public Health (DPE)

Cross-listings: PHLH 351 AAS 351

Primary Cross-listing

Across the nation, states, counties and communities have declared racism a public health crisis. This push to identify systemic racism as a high priority in public health action and policy is an important symbolic and political move. It names the faults of histories, systems and institutions but also brings to the spotlight the individual and community responsibility to dismantle racism in the US. In this tutorial, we will examine racism in public health policy, practice and research through an investigation of several mediums of evidence and information, ranging from peer reviewed literature to news editorials, podcasts and documentaries. We will explore specific pathways by which legacies of colonialism and racism function in various public health disciplines such as epidemiology, social & behavioral sciences, health policy and environmental health while also examining the dynamics of power and history in research and community practice. We will take deep dives into issues on how health can be impacted by redlining, racist medical algorithms, racial trauma and stress and police violence, to name a few. Students will also have two opportunities to select their own case studies, as a way for you to research and learn about particular racial health issues that are of personal interest. This course is also about self-reflection and exploration of the ways in which our identities and lived experiences impact our understanding and perspective. We will gain skills in speaking across differences and articulation of how our own perceptions and lived experiences of race and racism impact our study of public health. This tutorial requires an openness to self-reflection and the practice of listening and articulation.

Requirements/Evaluation: bi-weekly tutorial papers, weekly journaling, oral commentaries and tutorial discussion

Prerequisites: PHLH 201 or instructor approval.

Enrollment Limit: 10

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

PHLH 351(D2) AAS 351(D2)

Difference, Power, and Equity Notes: In this course students will examine and critically examine the inequities and race based social and health injustices, and the ways racism infiltrates public health action and policy, both historically and currently. They will also refine their self-reflection skills in understanding how their own positions of privilege and power, or lack thereof, inform their understanding of public health.

Fall 2023

TUT Section: T1 TBA Marion Min-Barron

PHLH 384 Comparative History of Science and Medicine in Asian/Pacific America, 1800-Present (DPE)

How have scientific knowledge and medicine been tools of exclusion, violence, and imperial control against Asian Americans, as well as indigenous peoples, Black, Latinx, and white migrants, and their descendants? How have these groups negotiated and resisted encounters with such knowledge from the 19th century to the present? This seminar explores these questions by examining a series of case studies--including American colonial medicine and science in the Philippines and Hawai‘i, Cold War migration of Chinese scientists and South Asian doctors to the U.S., and the politics of HIV/AIDS, psychiatry, and culturally competent care in Black, Asian, and Cuban migrant communities. Together, we will survey the literature in history,
English, Global Health, Sociology, and other fields and consider how the Asian/Pacific American experience in science and medicine has been integral to, as well as informed by, the experiences of other groups in the transpacific world. Students will leave this course with interdisciplinary tools for understanding present-day health inequities in underserved Asian/Pacific American communities and other marginalized groups.

**Requirements/Evaluation:** Attendance and active participation in discussion, three response papers (3-4 pages), and final research paper (12-15 pages), as well as topic proposal, annotated bibliography, outline, and draft of the final paper

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** Preference to History majors, Asian American Studies concentrators, and Public Health concentrators

**Expected Class Size:** 20-25

**Grading:**

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course explores how knowledge about science and medicine has been constituted and remade over time by various groups in the transpacific world to exert power over others on the structural, community and individual levels. We will also consider how individuals who experienced violence and inequities as a result of encounters with such knowledge challenged definitions and practices of science and medicine.

**PHLH 402 (S) Senior Seminar in Public Health**

The capstone seminar provides concentrators with the opportunity to reflect upon and synthesize their experiential learning in the context of understanding gained from a cohesive set of elective courses, and through the lens of a variety of intellectual and disciplinary frameworks. A second goal is to give concentrators experience working in a multi-disciplinary team to address a real-world, and in many cases very daunting, public health problem. Students will read, discuss, and compose written reflections on primary source empirical papers addressing a range of issues and disciplines in the field of public health. For example, topics may include the social determinants of health, environmental health risks, and access to health care. Students will also be divided into small research teams to interact with local organizations and investigate a contemporary real-life issue in public health. The capstone course is required of all concentrators, but may be opened to other students with relevant experience at the discretion of the instructor and the advisory committee, if space permits.

**Requirements/Evaluation:** active seminar participation, written reflections, contribution to the team research project, and a 12- to 15-page final paper

**Prerequisites:** completion of at least four courses counting towards the PHLH concentration

**Enrollment Limit:** 12

**Enrollment Preferences:** senior Public Health concentrators; students who are not senior Public Health concentrators should contact the instructor

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** No divisional credit

SEM Section: 02  TR 11:20 am - 12:35 pm   Kiaran Honderich
The Quantitative/Formal Reasoning (QFR) requirement is intended to help students become adept at reasoning mathematically and abstractly. The ability to apply a formal method to reach conclusions, use numbers comfortably, and employ the research tools necessary to analyze data lessens barriers to carrying out professional and economic roles. The hallmarks of a QFR course are the representation of facts in a language of mathematical symbols and the use of formal rules to obtain a determinate answer. Primary evaluation in these courses is based on multistep mathematical, statistical, or logical inference (as opposed to descriptive answers).

Prior to senior year, all students must satisfactorily complete ONE QFR course. Students requiring extra assistance (as assessed during First Days) are normally placed into Mathematics 100/101/102, which is to be taken before fulfilling the QFR requirement.

ASTR 111  (F)  Introduction to Astrophysics  (QFR)

The science of astronomy spans vast scales of space and time, from individual atoms to entire galaxies and from the universe's beginning to the future fate of our Sun. In this course, we will survey some of the main ideas in modern astrophysics, with an emphasis on the physics of stars and galaxies. ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the other sciences or mathematics and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include gravity and orbits, radiation laws and stellar spectra, physical characteristics of the Sun and other stars, star formation and evolution, black holes, galaxies, the expanding universe, and the Big Bang. Students will also use telescopes to observe stars, nebulae, planets, and galaxies and to make daytime observations of the Sun.

Class Format: The class has 6 afternoon labs. Nighttime observing sessions will occur throughout the semester.

Requirements/Evaluation: weekly problem sets, two hour-long tests, a final exam, lab reports, and an observing portfolio

Prerequisites: a year of high school Physics, concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

Enrollment Limit: 28

Enrollment Preferences: potential Astronomy majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course requires regular problem sets and quantitative assignments. The course will emphasize how physical equations explain the observed properties of the universe.

Fall 2023

LAB Section: 03  R 1:10 pm - 4:00 pm  Kevin Flaherty

ASTR 211  (S)  Astronomical Observing and Data Analysis  (QFR)

How do astronomers make scientific measurements for objects that are light-years away from Earth? This course will introduce the basics of telescopes and observations and will give students hands-on training in the techniques astronomers use to obtain, process, and analyze scientific data. We will discuss observation planning, CCD detectors, signal statistics, image processing, and photometric and spectroscopic observations. We will begin by focusing on ground-based optical observations and will move on to non-optical observations, both electromagnetic (e.g., radio waves, X-rays) and non-electromagnetic (e.g., gravitational waves, neutrinos). Throughout the course, students will use computational techniques to work with real astronomical data, taken with our 24" telescope and from data archives.

Class Format: discussion, computer lab work, and observing

Requirements/Evaluation: weekly problem sets, lab work, and observing projects

Prerequisites: MATH 150 or 151; prior experience with Unix and computer programming is helpful, but not required

Enrollment Limit: 14
Enrollment Preferences: Astronomy or Astrophysics majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course requires regular problem sets. Labs require computer programming and statistical and graphical analyses of data.

Spring 2024

LAB Section: 02  W 1:10 pm - 3:50 pm  Kevin Flaherty

ASTR 402 (F) Between the Stars: The Interstellar Medium (QFR)
The matter between the stars—the interstellar medium—tells the story of the evolution of galaxies and the stars within them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject as they evolve, and to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars’ nuclear fusion. Interpreting the emission from this interstellar gas is one of astronomers’ most powerful tools to measure the physical conditions, motions, and composition of our own galaxy and others. In this course we will study the interstellar medium in its various forms, from cold, dense, star-forming molecular clouds to X-ray-emitting bubbles formed by supernovae. We will learn about the physical mechanisms that produce the radiation we observe, including radiative ionization and recombination, collisional excitation of “forbidden” lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. Finally, we will discuss the evolution of interstellar material in galaxies across cosmic time. This course is observing-intensive. Throughout the semester, students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium taken using the rooftop telescope.

Class Format: Tutorial meetings will be scheduled with the professor. Students will also complete observing projects using the rooftop telescope.

Requirements/Evaluation: weekly problem sets, 10-page final paper, and observing projects

Prerequisites: ASTR 111 and PHYS 201 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: juniors and seniors

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: In this course, students will derive quantitative physical formulas, use these equations to calculate and compare physical properties, and generate and analyze graphical representations of data. They will also make and analyze measurements of astronomical data through observing projects.

Fall 2023

Astronomy/Astrophysics independent study, directed by one of the Astronomy faculty: Pasachoff/Jaskot/Flaherty

Requirements/Evaluation: Regular work with the instructor; submitted presentations and papers as agreed upon

Prerequisites: suitable Astronomy/Astrophysics/Physics/Math-Stats-Geosciences/Chemistry courses

Enrollment Limit: 10

Enrollment Preferences: research topic

Expected Class Size: 5

Grading: no pass/fail option, no fifth course option
BIMO 321 (F) Biochemistry I: Structure and Function of Biological Molecules (QFR)

Cross-listings: BIMO 321 BIOL 321 CHEM 321

Primary Cross-listing

This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Prerequisites: BIOL 101, CHEM 200 and CHEM 201; or either CHEM 155 or 256 and CHEM 251

Enrollment Limit: 16/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 48

Grading: no pass/fail option, no fifth course option

Unit Notes: Cannot be counted towards the Biology major in addition to BIOL 222

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
BIMO 321(D3) BIOL 321(D3) CHEM 321(D3)

Quantative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular problem sets in which quantitative/formal reasoning skills are practiced.

BIMO 322 (S) Biochemistry II: Metabolism (QFR)

Cross-listings: BIOL 322 BIMO 322 CHEM 322

Primary Cross-listing

This lecture course provides an in-depth presentation of the complex metabolic reactions that are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.
**Class Format:** Lecture three hours per week and laboratory three hours per week.

**Requirements/Evaluation:** several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of data

**Prerequisites:** BIOL 101, plus either: CHEM 156 and CHEM 256, or CHEM 155 and CHEM 156, or CHEM 200 and CHEM 201, or permission of instructor

**Enrollment Limit:** 48

**Enrollment Preferences:** junior and senior Biology and Chemistry majors and BIMO concentrators

**Expected Class Size:** 48

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** cannot be counted towards the Biology major in addition to BIOL 222

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
BIOL 322(D3) BIMO 322(D3) CHEM 322(D3)

**Quantitative/Formal Reasoning Notes:** The laboratory program is quantitative covering data analyses, numerical transformations, graphical displays.

**Attributes:** BIGP Courses BIMO Required Courses

**BIOL 202 (F) Genetics (QFR)**

Genetics, classically defined as the study of heredity, is today a multidisciplinary field whose principles provide critical insight and tools to most areas of biology and medicine. This course covers the experimental basis for our current understanding of the inheritance, structures, and functions of genes. It introduces approaches used by contemporary geneticists and molecular biologists to explore questions in areas of biology ranging from evolution to medicine. A primary focus of the course is on students developing familiarity with problem solving, the logic and quantitative reasoning required to understand how genetic mechanisms lead to biological patterns. The laboratory part of the course provides an experimental introduction to modern genetic analysis as well as introductions to interpreting genetic reasoning in the primary research literature. Laboratory experiments include investigating chromosome structure using microscopy, mapping a mutation to the genome by integrating multiple streams of evidence, and determining the structure of a DNA plasmid using molecular tools.

**Class Format:** Lecture: three hours per week, Lab: three hours per week.

**Requirements/Evaluation:** bi-weekly problem sets; weekly laboratory exercises and laboratory reports; three exams

**Prerequisites:** BIOL 101 and 102

**Enrollment Limit:** 120

**Enrollment Preferences:** students interested in the Biology major

**Expected Class Size:** 60

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course develops quantitative skills through solving problems. Students learn to apply basic calculations and logic to predict the outcomes of biological systems, for example, describing the likelihood that an individual will be affected by an inherited disease. Application of quantitative and logical analysis contributes to a large component of the in-class work and the graded material for the class, in the form of problem sets, exams, and data analysis for lab reports.

**Attributes:** BIGP Courses BIMO Required Courses

Fall 2023
BIOL 203  (F) Ecology  (QFR)

Cross-listings: ENVI 203 BIOL 203

Primary Cross-listing

This course combines lectures & discussion with field and indoor laboratory activities to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to engage students in the natural history of the region and build skills in data analysis and scientific writing.

Requirements/Evaluation: pre-class quizzes, lab reports, two mid-term exams, and a final exam

Prerequisites: BIOL 102, or ENVI 102, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: students planning to pursue Biology and/or ENVI

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 203(D3) BIOL 203(D3)

Quantitative/Formal Reasoning Notes: Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component (based in R). Students are introduced to t-tests, chi-square analysis, and regression.

BIOL 305  (F) Evolution  (QFR)

This course offers a critical analysis of contemporary concepts in biological evolution. We focus on the relation of evolutionary mechanisms (e.g., selection, drift, and migration) to long term evolutionary patterns (e.g., evolutionary innovations, origin of major groups, and adaptation). Topics include micro-evolutionary models, natural and sexual selection, speciation, the inference of evolutionary history, evolutionary medicine among others.

Requirements/Evaluation: independent research project, problem sets, participation in discussions and exams

Prerequisites: BIOL 102 and one 200 level BIOL course

Enrollment Limit: 24

Enrollment Preferences: Seniors and biology majors

Expected Class Size: 24

Grading: yes pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: We will use mathematical models to study population genetics.

CHEM 100 (F) Chemistry Matters (QFR)

Chemistry matters! From fueling the world's economy to preventing the next pandemic to forecasting future climate change, chemistry touches all aspects of daily life. This course provides an introduction to chemical principles and applications for students with little or no high school chemistry background. Through the lens of contemporary issues and applications (e.g. energy, environment, materials, medicine, etc.), students will be introduced to concepts fundamental to studying matter at the molecular level. Particular emphasis will be placed on skills essential for students to understand chemistry in these contexts, including quantitative reasoning and the development of chemical literacy and intuition. Laboratory meetings will be used to reinforce lecture material through experimentation at the bench and active learning exercises.

Class Format: lecture, three times per week and laboratory, three hours per week

Requirements/Evaluation: problem set assignments, laboratory work and analysis, quizzes/exams and a final assessment

Prerequisites: Students are required to take the online Chemistry Placement Survey prior to registering for the course (chemistry.williams.edu/placement).

Enrollment Limit: 32; 16/lab

Enrollment Preferences: First-year students with little or no high school chemistry experience.

Expected Class Size: 32

Grading: yes pass/fail option, no fifth course option

Unit Notes: CHEM 100 may be taken concurrently with MATH 102--see under Mathematics; CHEM 100 or its equivalent is a prerequisite to CHEM 101.

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular problem sets and in class activities in which quantitative/formal reasoning skills are practiced.
CHEM 101  (F)(S)  Concepts of Chemistry  (QFR)
This course broadens and deepens the foundation in chemistry of students who have had one or more years of chemistry at the high school level. Most students begin study of chemistry at Williams with this course. Familiarity with stoichiometry, basic concepts of equilibria, the model of an atom, Lewis structures and VSEPR, and gas laws is expected. Principal topics for this course include modern atomic theory, molecular structure and bonding, states of matter, chemical equilibrium (acid-base and solubility), and an introduction to atomic and molecular spectroscopies. Laboratory periods will largely focus on experiment design, data analysis, literature, scientific writing, ethics, and other skills critical to students’ development as scientists. The course is of interest to students who anticipate professional study in chemistry, related sciences, or one of the health professions, as well as to those who want to explore the fundamentals of chemistry as part of their general education. This course may be taken pass/fail; however, students who are considering graduate study in science or in the health professions should elect to take this course for a grade.

Class Format: lecture, three times per week and laboratory, four hours per week
Requirements/Evaluation: problem sets and/or quizzes, laboratory work, and exams
Prerequisites: Students are required to take the online Chemistry Placement Survey prior to registering for the course (chemistry.williams.edu/placement).
Enrollment Limit: 45; 16/lab
Enrollment Preferences: first-year students
Expected Class Size: 45/lecture
Grading: yes pass/fail option, no fifth course option
Unit Notes: CHEM 101 or its equivalent is a prerequisite for both CHEM 200 and Chem 201 and is required for the BIMO concentration.
Distributions: (D3)  (QFR)
Quantative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.
Attributes: BIMO Required Courses
CHEM 200 (S) Advanced Chemical Concepts  (QFR)

Class of 2027 ONLY (Class of 2024, 2025, 2026 see CHEM 256). This course treats an array of topics in modern chemistry, emphasizing broad concepts that connect and weave through the various subdisciplines of the field—biochemistry, inorganic chemistry, organic chemistry, and physical chemistry. It provides the necessary background in chemical science for students who are planning advanced study or a career in chemistry, biological science, geoscience, environmental science, or a health profession. Topics include coordination complexes, thermodynamics, electrochemistry, and kinetics. Laboratory sections will give students hands-on experience involving synthesis, characterization, and reactivity studies of coordination and organic complexes; spectroscopic analyses; thermodynamics; electrochemistry; and kinetics. Students will hone their skills in the presentation of results through written reports and worksheets.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: homework assignments, laboratory work, quizzes, midterm exam, and a final exam

Prerequisites: CHEM 101

Enrollment Limit: 45; 16/lab

Enrollment Preferences: first-year students, then sophomores

Expected Class Size: 45/lecture

Grading: no pass/fail option, no fifth course option

Unit Notes: Chem 200 is required for the BIMO concentration

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

CHEM 368 (S) Computational Chemistry and Molecular Spectroscopy (QFR)

This tutorial provides an introduction to the principles of computational quantum mechanics and their application to problems of chemical interest such as chemical bonding, chemical reactivity, and molecular spectroscopy. Emphasis is placed upon modern electronic structure calculations, their fundamentals, practical considerations, interpretation, and applications to current research questions. Under guidance in sessions and through independent work, students will use computational methods to explore assigned weekly research problems. The research results will be presented to and discussed with the tutorial partner at the end of each week.

Requirements/Evaluation: tutorial participation, presentations, and submitted papers

Prerequisites: CHEM 361 or equivalent background in Physics

Enrollment Limit: 10

Enrollment Preferences: Chemistry majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course fulfills the QFC requirement with problem sets for assignments in which quantitative/formal reasoning skills are practiced.

Spring 2024

COGS 224 (F) Introduction to Formal Linguistics (QFR)

Cross-listings: PHIL 221 COGS 224

Primary Cross-listing

The sentence "Every cookie is chocolate chip and three of them are oatmeal raisin" is a perfectly grammatical sentence of English, but it's self-contradictory. What does it take to realize this fact? One must grasp the meanings of the various parts of the sentence. In particular, one must grasp that "three of them" picks out a subset of the group picked out by "every cookie", and that there's no such thing as a cookie that is both chocolate chip and oatmeal raisin. There two ways to understand "Many students took every class". According to one, there is a single group of students that had their hands extremely full this semester. According to the other, every class was well-populated, potentially by different groups. The reason for this is that there are two underlying structures that the original sentence can realize. This course serves as an introduction to formal methods in the scientific study of language. Our goal will be to characterize phenomena like those above with logical and mathematical precision. The focus will be on model-theoretic semantics, the sub-field of linguistics that studies meanings. Along the way we will discuss principles of syntax, the sub-field that studies sentence structures, and pragmatics, the sub-field that studies inferences of non-literal content. This is a formal course, but no prior logical or mathematical background will be expected. Starting from scratch, students will learn the building blocks of current-day linguistic research. This introduction will be of use to students interested in language from a variety of perspectives, including philosophy, cognitive science, and computer science.

Requirements/Evaluation: Weekly problem sets, plus a final project (paper/presentation/other type, to be discussed with instructor)

Prerequisites: No prerequisites

Enrollment Limit: 20

Enrollment Preferences: Preference given to seniors and philosophy/cognitive science majors.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 221(D2) COGS 224(D2)

Attributes: COGS Interdepartmental Electives COGS Related Courses Linguistics PHIL Contemp Metaphysics + Epistemology Courses
CSCI 104 (F) Data Science and Computing for All (QFR)

Many of the world's greatest discoveries and most consequential decisions are enabled or informed by the analysis of data from a myriad of sources. Indeed, the ability to wrangle, visualize, and draw conclusions from data is now a critical tool in the sciences, business, medicine, politics, other academic disciplines, and society as a whole. This course lays the foundations for quantifying relationships in data by exploring complementary computational, statistical, and visualization concepts. These concepts will be reinforced by lab experiences designed to teach programming and statistics skills while analyzing real-world data sets. This course will also examine the broader context and social issues surrounding data analysis, including privacy and ethics.

Requirements/Evaluation: Weekly lab assignments involving programming, a project, and examinations.

Prerequisites: None; previous programming experience or statistics is not required.

Enrollment Limit: 30;15/lab

Enrollment Preferences: Not open to those who have completed or are currently enrolled in a Computer Science course numbered 136 or higher. Preference given to those who have not previously taken a computer science or statistics course.

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option

Unit Notes: Additional details about the class are available here: https://www.cs.williams.edu/~cs104. Please see the Computer Science Department website for more information on selecting an introductory computer science class: https://csci.williams.edu/

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course includes regular and substantial problem sets, labs, and/or projects in which quantitative/formal reasoning skills are practiced and evaluated.

CSCI 134 (F)(S) Introduction to Computer Science (QFR)

This course introduces students to the science of computation by exploring the representation and manipulation of data and algorithms. We organize and transform information in order to solve problems using algorithms written in a modern object-oriented language. Topics include organization of data using objects and classes, and the description of processes using conditional control, iteration, methods and classes. We also begin the study of abstraction, self-reference, reuse, and performance analysis. While the choice of programming language and application area will vary in different offerings, the skills students develop will transfer equally well to more advanced study in many areas. In particular, this course is designed to provide the programming skills needed for further study in computer science and is expected to satisfy introductory programming requirements in other departments.

Requirements/Evaluation: weekly programming projects, weekly written homeworks, and two examinations.

Prerequisites: none, except for the standard prerequisites for a (QFR) course; previous programming experience is not required

Enrollment Limit: 30;15/lab

Enrollment Preferences: if the course is over-enrolled, enrollment will be determined by lottery.

Expected Class Size: 30/sec

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Please see the Computer Science Department website for more information on selecting an introductory computer science class: https://csci.williams.edu/. Students with prior experience with object-oriented programming should discuss appropriate course placement with...
CSCI 136  (F)(S)  Data Structures and Advanced Programming  (QFR)
This course builds on the programming skills acquired in Computer Science 134. It couples work on program design, analysis, and verification with an introduction to the study of data structures. Data structures capture common ways in which to store and manipulate data, and they are important in the construction of sophisticated computer programs. Students are introduced to some of the most important and frequently used data structures: lists, stacks, queues, trees, hash tables, graphs, and files. Students will be expected to write several programs, ranging from very short programs to more elaborate systems. Emphasis will be placed on the development of clear, modular programs that are easy to read, debug, verify, analyze, and modify.

Requirements/Evaluation:  programming and written assignments, quizzes, examinations

Prerequisites:  CSCI 134 or equivalent; fulfilling the Discrete Mathematics Proficiency requirement is recommended, but not required

Enrollment Limit:  30;15/lab

Enrollment Preferences:  if the course is over-enrolled, enrollment will be determined by lottery.

Expected Class Size:  30/lec

Grading:  yes pass/fail option,  no fifth course option

Unit Notes:  Please see the Computer Science Department website for more information on selecting an introductory computer science class:  https://csci.williams.edu/

Distributions:  (D3)  (QFR)

Quantative/Formal Reasoning Notes:  This course include regular and substantial problem sets, labs, and/or projects in which quantitative/formal reasoning skills are practiced and evaluated.
CSCI 237  (F)(S)  Computer Organization  (QFR)

This course studies the basic instruction set architecture and organization of a modern computer. It provides a programmer's view of how computer systems execute programs, store information, and communicate. Over the semester the student learns the fundamentals of translating higher level languages into assembly language, and the interpretation of machine languages by hardware. At the same time, a model of computer hardware organization is developed from the gate level upward.

Requirements/Evaluation: weekly programming assignments and/or problem sets, quizzes, midterm and final exams

Prerequisites: CSCI 136

Enrollment Limit: 24;12/lab

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3)  (QFR)

Quantitative/Formal Reasoning Notes: The course will consist of programming assignments and problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

CSCI 256  (F)(S)  Algorithm Design and Analysis  (QFR)
This course investigates methods for designing efficient and reliable algorithms. By carefully analyzing the structure of a problem within a mathematical framework, it is often possible to dramatically decrease the computational resources needed to find a solution. In addition, analysis provides a method for verifying the correctness of an algorithm and accurately estimating its running time and space requirements. We will study several algorithm design strategies that build on data structures and programming techniques introduced in Computer Science 136. These include greedy, divide-and-conquer, dynamic programming, and network flow algorithms. Additional topics of study include algorithms on graphs and strategies for handling potentially intractable problems.

Requirements/Evaluation: Problem sets, midterm and final examinations
Prerequisites: CSCI 136 and fulfillment of the Discrete Mathematics Proficiency requirement
Enrollment Limit: 24
Enrollment Preferences: Preference will be given to students who need the class in order to complete the major. Ties will be broken by seniority (seniors first, then juniors, etc.).
Expected Class Size: 24
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This course will have weekly problem sets in which students will formally prove statements about the behavior and performance of algorithms. In short, the course is about applying abstract and mathematical reasoning to the study of algorithms and computation.

Fall 2023
LEC Section: 01 MWF 12:00 pm - 12:50 pm Aaron M. Williams

Spring 2024
LEC Section: 01 MR 1:10 pm - 2:25 pm Samuel McCauley
LEC Section: 02 MR 2:35 pm - 3:50 pm Samuel McCauley

CSCI 331 (F) Introduction to Computer Security (QFR)
This class explores common vulnerabilities in computer systems, how attackers exploit them, and how systems engineers design defenses to mitigate them. The goal is to be able to recognize potential vulnerabilities in one's own software and to practice defensive design. Hands-on experience writing assembly language and C code to inspect and modify the low-level operation of running programs is emphasized. Finally, regular reading and writing assignments round out the course to help students understand the cultural and historical background of the computer security "arms race."

Class Format: This course has twice-weekly lecture meetings as well as a weekly lab meeting.
Requirements/Evaluation: weekly reading responses, lab assignments, midterm exam, and final project
Prerequisites: CSCI 237
Enrollment Limit: 24(12/lab)
Enrollment Preferences: upper-level students
Expected Class Size: 24
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: A fee of $75-$100 will be added to the term bill to cover the purchase of a Raspberry Pi computer and accessories.
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This course include regular and substantial problem sets and labs in which quantitative/formal reasoning skills are practiced and evaluated.

Fall 2023
LEC Section: 01 MR 2:35 pm - 3:50 pm Daniel W. Barowy
LAB Section: 02 T 1:00 pm - 2:30 pm Daniel W. Barowy
LAB Section: 03 T 2:30 pm - 4:00 pm Daniel W. Barowy
CSCI 334 (F)(S) Principles of Programming Languages (QFR)

This course examines the concepts and structures governing the design and implementation of programming languages. It presents an introduction to the concepts behind compilers and run-time representations of programming languages; features of programming languages supporting abstraction and polymorphism; and the procedural, functional, object-oriented, and concurrent programming paradigms. Programs will be required in languages illustrating each of these paradigms.

Requirements/Evaluation: weekly problem sets and programming assignments, a midterm examination, and a final examination
Prerequisites: CSCI 136
Enrollment Limit: 30
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 30
Grading: yes pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course include regular and substantial problem sets and labs in which quantitative/formal reasoning skills are practiced and evaluated.

Fall 2023
LEC Section: 01 MR 1:10 pm - 2:25 pm Daniel W. Barowy

Spring 2024
LEC Section: 01 TR 9:55 am - 11:10 am Daniel W. Barowy

CSCI 345 (S) Robotics and Digital Fabrication (QFR)

This course is a hands-on exploration of topics in robotics and digital fabrication. We will experience firsthand how ideas and methods from computer science can be applied to make physical objects, including robots and other machines. The emphasis will be on creative, hands-on experimentation.
Along the way, students will learn the basics of embedded systems programming (Arduino), breadboarding, soldering, printed circuit board (PCB) design, mechanical computer-aided design (CAD)--both conventional (OnShape) and programmatic (OpenSCAD)--as well digital fabrication (3D-printing, laser cutting). Students will learn both how to build their own prototypes and how to send out designs to have parts machined professionally. Students will work in teams throughout. The course will culminate in a team robotic design competition testing both functionality and creativity.

Requirements/Evaluation: Evaluation based on assignments, projects, and exams.
Prerequisites: CSCI 237
Enrollment Limit: 18; 9/lab
Enrollment Preferences: Current or expected Computer Science majors
Expected Class Size: 18
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: A fee of $150-$200 will be added to the term bill to cover the purchase of consumable electronics, motors, 3D-printing filament, and stock used in the assignments and final project.
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: The course will include programming assignments and problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

CSCI 361 (S) Theory of Computation (QFR)
Cross-listings: CSCI 361 MATH 361

Primary Cross-listing

This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory—the examination of what problems can be solved and what problems cannot be solved—and the study of complexity theory—the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

Class Format: Students should sign up for lecture and one conference section.

Requirements/Evaluation: online multiple choice and short answer questions, weekly problem sets in groups, a research project, and a final examination

Prerequisites: CSCI 256 or both a 300-level MATH course and permission of instructor

Enrollment Limit: 60; 12/con

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

CSCI 361(D3) MATH 361(D3)

Quantitative/Formal Reasoning Notes: This course include regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Attributes: COGS Interdepartmental Electives

CON Section: 06 W 3:00 pm - 4:00 pm Aaron M. Williams

CSCI 374 (F) Machine Learning (QFR)

Machine learning is a field that derives from artificial intelligence and statistics, and is concerned with the design and analysis of computer algorithms that "learn" automatically through the use of data. Computer algorithms are capable of discerning subtle patterns and structure in the data that would be practically impossible for a human to find. As a result, real-world decisions, such as treatment options and loan approvals, are being increasingly automated based on predictions or factual knowledge derived from such algorithms. This course explores topics in supervised learning (e.g., random forests and neural networks), unsupervised learning (e.g., k-means clustering and expectation maximization), and possibly reinforcement learning (e.g., Q-learning and temporal difference learning.) It will also introduce methods for the evaluation of learning algorithms (with an emphasis on analysis of generalizability and robustness of the algorithms to distribution/environmental shift), as well as topics in computational learning theory and ethics.

Requirements/Evaluation: Presentations, problem sets, programming exercises, empirical analyses of algorithms, critical analysis of current literature; the final two weeks are focused on a project of the student's design.

Prerequisites: CSCI 136 and CSCI 256 or permission of instructor

Enrollment Limit: 24

Enrollment Preferences: Current or expected Computer Science majors.

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course heavily relies on discrete mathematics, calculus, and elementary statistics. Students will be proving theorems, among many other mathematically oriented assignments. Additionally, they will be programming, which involves analytical and logical thinking.

Attributes: COGS Interdepartmental Electives

Fall 2023

LEC Section: 02  MR 2:35 pm - 3:50 pm  Rohit Bhattacharya

CSCI 379  (S)  Causal Inference  (QFR)

Does X cause Y? If so, how? And what is the strength of this causal relation? Seeking answers to such causal (as opposed to associational) questions is a fundamental human endeavor; the answers we find can be used to support decision-making in various settings such as healthcare and public policy. But how does one tease apart causation from association--early in our statistical education we are taught that “correlation does not imply causation.” In this course, we will re-examine this phrase and learn how to reason with confidence about the validity of causal conclusions drawn from messy real-world data. We will cover core topics in causal inference including causal graphical models, unsupervised learning of the structure of these models, expression of causal quantities as functions of observed data, and robust/efficient estimation of these quantities using statistical and machine learning methods. Concepts in the course will be contextualized via regular case studies.

Requirements/Evaluation: Problem sets, programming exercises, empirical analyses, case studies, and a final project.
Prerequisites: CSCI 136, and either CSCI 256 or STAT 201/202.
Enrollment Limit: 24
Enrollment Preferences: Computer science majors and prospective majors.
Expected Class Size: 24
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course heavily relies on discrete mathematics, algorithms, and elementary statistics. There will be regular assignments requiring rigorous quantitative or formal reasoning.
Attributes: COGS Interdepartmental Electives

Spring 2024

LEC Section: 01  MR 1:10 pm - 2:25 pm  Rohit Bhattacharya

CSCI 381  (S)  Deep Learning  (QFR)

This course is an introduction to deep neural networks and how to train them. Beginning with the fundamentals of regression and optimization, the course then surveys a variety of neural network architectures, which may include multilayer feedforward neural networks, convolutional neural networks, recurrent neural networks, and transformer networks. Students will also learn how to use deep learning software such as PyTorch or Tensorflow.

Requirements/Evaluation: Evaluation based on assignments, projects, and exams.
Prerequisites: CSCI 136 and fulfillment of the Discrete Mathematics Proficiency requirement
Enrollment Limit: 24
Enrollment Preferences: Current or expected Computer Science majors
Expected Class Size: 24
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course will consist of programming assignments and problem sets in which quantitative/formal reasoning skills are practiced and evaluated.
CSCI 432  (F) Operating Systems  (QFR)
This course explores the design and implementation of computer operating systems. Topics include historical aspects of operating systems development, systems programming, process scheduling, synchronization of concurrent processes, virtual machines, memory management and virtual memory, I/O and file systems, system security, os/architecture interaction, and distributed operating systems.

Requirements/Evaluation: several implementation projects that will include significant programming, as well as written homework, and up to two exams

Prerequisites: CSCI 237 and either CSCI 256 or 334

Enrollment Limit: 24

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: The course will consist of substantial problem sets and/or programming assignments in which quantitative/formal reasoning skills are practiced and evaluated.

Fall 2023
LEC Section: 01  TR 9:55 am - 11:10 am  Jeannie R Albrecht

ECON 110  (F)(S) Principles of Microeconomics  (QFR)
This course is an introduction to the study of the forces of supply and demand that determine prices and the allocation of resources in markets for goods and services, markets for labor, and markets for natural resources. The focus is on how and why markets work, why they may fail to work, and the policy implications of both their successes and failures. The course focuses on developing the basic tools of microeconomic analysis and then applying those tools to topics of popular or policy interest such as minimum wage legislation, pollution control, competition policy, international trade policy, discrimination, tax policy, and the role of government in a market economy.

Requirements/Evaluation: problem sets, quizzes, short essays, two midterms, final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: This course is required of Economics and Political Economy majors and highly recommended for those non-majors interested in Environmental Studies and Women's, Gender and Sexuality Studies.

Expected Class Size: 40

Grading: yes pass/fail option, no fifth course option

Unit Notes: The department recommends students follow this course with ECON 120 or with a lower-level elective that has ECON 110 as its prerequisite; students may alternatively proceed directly to ECON 251 after taking this introductory course.

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

Attributes: POEC Required Courses
**ECON 120  (F)(S) Principles of Macroeconomics  (QFR)**

This course provides an introduction to the study of the aggregate national economy. It develops the basic theories of macroeconomics and applies them to topics of current interest. Issues to be explored include: the causes of inflation, unemployment, recessions, and depressions; the role of government fiscal and monetary policy in stabilizing the economy; the determinants of long-run economic growth; the long- and short-run effects of taxes, budget deficits, and other government policies on the national economy; the role of financial frictions in amplifying recessions; and the workings of exchange rates and international finance.

**Requirements/Evaluation:** Depending on instructor, may include: problem sets, short essays, quizzes, reading assignments, either one or two midterms, and a final exam.

**Prerequisites:** ECON 110

**Enrollment Limit:** 40

**Enrollment Preferences:** First-year students and sophomores.

**Expected Class Size:** 40

**Grading:** yes pass/fail option,  yes fifth course option

**Distributions:** (D2)  (QFR)

**Quantative/Formal Reasoning Notes:** Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

**Attributes:** POEC Required Courses

---

**ECON 213  (S) Introduction to Environmental and Natural Resource Economics  (QFR)**

**Cross-listings:** ECON 213 ENVI 213

**Primary Cross-listing**

We'll use economics to examine why we harm the environment and overuse natural resources, and what we can do about it. We'll study cost benefit analysis, pollution in general, climate change, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We'll talk about how economists put a dollar value on nature and ecosystem services (as well as human health and life!), and the concerns involved in doing so. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth. Consideration of justice and equity will be woven throughout the whole semester.

**Requirements/Evaluation:** problem sets, short essays, final paper; intermediate assignments may include a poster, one or more short presentation(s), other brief writing assignment(s)

**Prerequisites:** ECON 110 or equivalent
Enrollment Limit: 30
Enrollment Preferences: first-year and sophomore students
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Unit Notes: this course will count toward both the Environmental Studies major and concentration
Distributions: (D2) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
ECON 213(D2) ENVI 213(D2)

Spring 2024
LEC Section: 01 MWF 8:30 am - 9:20 am Sarah A. Jacobson

ECON 232 (F) Financial Markets, Institutions and Policies (QFR)
The focus of the course will be on how firms, financial markets, and central banks interact in the economy. Key questions addressed in the course include: How do firms allocate their resources to enhance their value? How are firms evaluated by the financial markets? How are asset prices determined, and how are these prices related to interest rates? Are financial markets efficient, and what are the implications of their efficiency or lack thereof? How does the financial system help with the management of risks faced by society? We will also study the role of the central bank (the Federal Reserve in the US), monetary policy, and government regulation and their impacts on financial decision making. Key questions include: How do central banks set monetary policy and how do those policies affect the economy and the financial decision-making process? How does monetary policy change when interest rates are (virtually) zero?
Class Format: There will be a mix of lecture and discussion.
Requirements/Evaluation: 5-7 Problem Sets, Quantitative Exercises, Group Paper, and Final Exam
Prerequisites: ECON 110 and ECON 120
Enrollment Limit: 25
Enrollment Preferences: Sophomore and Junior Economics majors
Expected Class Size: 25
Grading: yes pass/fail option, no fifth course option
Distributions: (D2) (QFR)
Quantitative/Formal Reasoning Notes: We will use mathematical models, graphs, and data analysis to understand financial decisions at the firm and economy-wide levels.
Attributes: POEC Depth

Fall 2023
LEC Section: 01 TR 8:30 am - 9:45 am Neal J. Rappaport

ECON 251 (F)(S) Price and Allocation Theory (QFR)
A study of the determination of relative prices and their importance in shaping the allocation of resources and the distribution of income. Subjects include: behavior of households in a variety of settings, such as buying goods and services, saving, and labor supply; behavior of firms in various kinds of markets; results of competitive and noncompetitive markets in goods, labor, land, and capital; market failure; government policies as sources of and responses to market failure; welfare criteria; limitations of mainstream analysis.
Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets and multiple exams, including a final exam. They may also include one or more quizzes, short essays, collaborative projects, or presentations.
Prerequisites: ECON 110 and MATH 130 or its equivalent
Enrollment Limit: 30
Enrollment Preferences: Current or prospective Economics majors.

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course involves developing and analyzing mathematical models of real-world phenomena, grounded in tools like calculus and game theory. Students are assumed to be comfortable with topics from introductory calculus, including differentiation and integration.

LEC Section: 02 TF 2:35 pm - 3:50 pm Ashok S. Rai

ECON 252 (F)(S) Macroeconomics (QFR)
A study of aggregate economic activity: output, employment, inflation, and interest rates. The class will develop a theoretical framework for analyzing economic growth and business cycles. The theory will be used to evaluate policies designed to promote growth and stability, and to understand economic developments in the U.S. and abroad. Instructors may use elementary calculus in assigned readings, exams and lectures.

Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets and/or written assignments, midterm(s), and a final exam.

Prerequisites: ECON 110 and 120 and MATH 130 or its equivalent

Enrollment Limit: 30

Enrollment Preferences: Current or prospective Economics majors.

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

Fall 2023

LEC Section: 02 MWF 11:00 am - 12:15 pm Gregory P. Casey
LEC Section: 03 TR 11:20 am - 12:35 pm Kenneth N. Kuttner

ECON 255 (F)(S) Econometrics (QFR)
An introduction to the theory and practice of applied quantitative economic analysis. This course familiarizes students with the strengths and weaknesses of the basic empirical methods used by economists to evaluate economic theory against economic data. Emphasizes both the statistical foundations of regression techniques and the practical application of those techniques in empirical research, with a focus on understanding when a causal interpretation is warranted. Computer exercises will provide experience in using the empirical methods, but no previous computer experience is expected. Highly recommended for students considering graduate training in economics or public policy.

Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets, multiple exams, a group project, and
possible additional assignments or quizzes.

**Prerequisites:** MATH 130, plus STAT 161, 201 or 202 (or equivalent, including a score of 5 on the AP Statistics Exam), plus one course in ECON; STAT 101 will also serve as a prerequisite, but only if taken prior to the fall of 2018

**Enrollment Limit:** 30

**Enrollment Preferences:** Current or prospective Economics and Political Economy majors.

**Expected Class Size:** 30

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Students may substitute the combination of STAT 201 and 346 for ECON 255

**Distributions:** (D2) (QFR)

**Quantative/Formal Reasoning Notes:** Course teaches research tools necessary to analyze data.

**Attributes:** PHLH Statistics Courses POEC Required Courses

**ECON 360 (F) Monetary Economics** (QFR)

This course covers a range of theoretical and applied issues bearing on monetary policy as conducted in the U.S. and abroad. Topics to be covered include: the causes of inflation, how central banks manage interest rates, the channels through which monetary policy affects the economy, and the costs and benefits of imposing rules on the conduct of policy. The class will also touch on a number of current issues facing central banks, such as unconventional monetary policy and cryptocurrencies.

**Requirements/Evaluation:** Two exams, a research paper and/or class presentation

**Prerequisites:** ECON 252 and 255. Multivariate calculus (MATH 150 or 151) is recommended but not required

**Enrollment Limit:** 20

**Enrollment Preferences:** junior and senior Economics majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (QFR)

**Quantative/Formal Reasoning Notes:** The course entails the use of mathematical economic models, the presentation of quantitative information, and the interpretation of statistical analysis.

**ECON 367 (S) The Political Economy of Social Insurance** (QFR)

The Great Society policies of the 1960s dramatically changed the ways people living in poverty interacted with the federal government, but the benefits associated with these policies seem to have stagnated. Since 1965, the annual poverty rate in the United States has hovered between 10% and 15%, though far more than 15% of Americans experience poverty at some point in their lives. In this course, we will study public policies that, explicitly or implicitly, have as a goal improving the well-being of the poor in the United States. These policies include social insurance programs such as Unemployment Insurance; safety net programs such as Temporary Assistance to Needy Families, Supplemental Nutrition Assistance Program,
Medicaid, and housing assistance; education programs such as Head Start and public education; and parts of the tax code, including the Earned Income Tax Credit and Child Tax Credit. We will explore the design and function of these programs, with a particular focus on the context in which they were developed. What political incentives and constraints have strung up our social safety net? How do these factors affect the goals of policy, the trade-offs inherent to the policy's design, and why poverty has not sustained a downward trend in the United States? Through careful consideration, students will learn how to communicate a path forward for public policy which accounts for theoretical economic expectations and the reality of political constraints in policy design.

Class Format: Lecture with substantial class discussion.

Requirements/Evaluation: Several short policy memos, participation in class discussion, and a final analytical essay.

Prerequisites: ECON 253 or 255

Enrollment Limit: 25

Enrollment Preferences: Students majoring in economics or political economy.

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: This course will use quantitative tools of economics. Focus on building data visualization & science communication skills after ECON 255.

Attributes: POEC Skills

Spring 2024

LEC Section: 01 TR 11:20 am - 12:35 pm Shyam Raman

ECON 371 (F) Time Series Econometrics and Empirical Methods for Macro (QFR)

Econometric methods in many fields including macro and monetary economics, finance and international growth and development, as well as numerous fields beyond economics, have evolved a distinct set of techniques which are designed to meet the practical challenges posed by the typical empirical questions and available time series data of these fields. The course will begin with an introductory review of concepts of estimation and inference for large data samples in the context of the challenges of multivariate endogeneous systems, and will then focus on associated methods for analysis of short dynamics such as vector autoregressive techniques and methods for analysis of long run dynamics such as cointegration techniques. Students will be introduced to concepts and techniques analytically, but also by intuition, learning by doing, and by computer simulation and illustration. The course is particularly well suited for economics majors wishing to explore advanced empirical methods, or for statistics, mathematics or computer science majors wishing to learn more about the ways in which the subject of their majors interacts with the fields of economics. The method of evaluation will include a term paper. ECON 252 and either STATS 346 or ECON 255 are formal prerequisites, although for students with exceptionally strong math/stats backgrounds these can be waived subject to instructor permission. Credit may not be earned for both ECON 371 and ECON 356.

Requirements/Evaluation: term paper and regular homework assignments

Prerequisites: ECON 252 and either ECON 255 or STATS 346

Enrollment Limit: 19

Enrollment Preferences: students wishing to write an honors thesis, and students with strong MATH/STAT/CSCI backgrounds

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: Uses quantitative/formal reasoning intensively in the form of mathematical and statistical arguments, as well as computer programming.

Fall 2023

SEM Section: 01 W 7:00 pm - 9:40 pm Peter L. Pedroni

ECON 384 (S) Corporate Finance (QFR)
This course analyzes the major financial decisions facing firms. While the course takes the perspective of a manager making decisions about both what investments to undertake and how to finance these projects, it will emphasize the underlying economic models that are relevant for these decisions. Topics include capital budgeting, links between real and financial investments, capital structure choices, dividend policy, and firm valuation. Additional topics may include issues in corporate risk management, corporate governance and corporate restructuring, such as mergers and acquisitions.

**Class Format:** Lecture / discussion

**Requirements/Evaluation:** Class participation, short assignments, and exams

**Prerequisites:** ECON 251, 252, and some familiarity with statistics (e.g., ECON 255)

**Enrollment Limit:** 28

**Enrollment Preferences:** Economics majors; seniority

**Expected Class Size:** 28

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

**Quantitative/Formal Reasoning Notes:** The course uses quantitative models to evaluate decisions.

Spring 2024

LEC Section: 01 MWF 8:30 am - 9:20 am Caitlin E. Hegarty

**ECON 385 (F) Games and Information** (QFR)

This course is a mathematical introduction to strategic thinking and its applications. Ideas from game theory, including Nash equilibrium and its refinements, commitment and credibility, repeated games, and information asymmetries, incentive contracts, and signaling, will be introduced. Applications will be drawn from economics, history, and politics around the globe, and include topics such as: trust between strangers, corruption and fraud, racial bias, violence and deterrence. And we will explore how to write and recognize game-theory models to help make sense of strategic interactions in the world around us.

**Requirements/Evaluation:** Two exams, regular problem sets and assignments in which students create game-theoretic models.

**Prerequisites:** ECON 251 or permission of instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** juniors

**Expected Class Size:** 25

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** students who have taken MATH 335 or CSCI 357 cannot receive credit for this class

**Distributions:** (D2) (QFR)

**Quantitative/Formal Reasoning Notes:** Mathematical analysis of strategic interaction is emphasized throughout,

Fall 2023

LEC Section: 01 Cancelled

**ECON 389 (S) Tax Policy in Global Perspective** (QFR)

**Cross-listings:** ECON 514 ECON 389

**Secondary Cross-listing**

Government policy is important for economic development. To finance their policies, governments must build the fiscal capacity to implement a tax system. In turn, fiscal capacity—the ability for the government to raise revenue—depends on economic development. This endogeneity between fiscal capacity and economic development creates challenges for tax policy in developing countries. Given these challenges, what types of taxes should countries use to raise revenues? How can governments build the fiscal capacity to generate revenue to finance critical services? This class explores tax policy from a global and comparative perspective. Because most students will be CDE fellows, we will emphasize tax policy issues, examples, and evidence that are pertinent to developing countries. However, many tax policy lessons are universal so we will also learn about tax policies in
developed countries, especially issues relevant for transnational transactions. Topics addressed include: how economic principles can be applied to the efficiency and equity consequences of tax policies; how personal income taxes, corporate income taxes, and value-added taxes are designed and administered and how they influence the economy; ideas for fundamental tax reforms; the debate over progressive taxes versus "flat" taxes; how taxes affect incentives to save and invest; how market failures and administrative problems may influence the optimality of tax policy; the implications of global capital flows and corporate tax avoidance for tax policy; tax holidays and other special tax incentives for investment; empirical evidence on the influence of taxes on foreign direct investment, labor supply, and tax evasion; tax policy towards natural resources such as minerals and oil; case studies of efforts to reform tax administration and reduce tax evasion and corruption; taxes on land and property; taxes on imports and exports; presumptive taxation; and the informal economy and its implications for tax policy.

Requirements/Evaluation: midterm exam, several problem sets, two 10-page essays
Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503); students who have previously taken ECON 351 will not be enrolled
Enrollment Limit: 19
Enrollment Preferences: CDE students, but undergraduates with the prerequisites are welcome
Expected Class Size: 15-19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
ECON 514(D2) ECON 389(D2)
Quantitative/Formal Reasoning Notes: The course builds on other QFR Reasoning econ classes.
Attributes: POEC Depth POEC Skills

Spring 2024
SEM Section: 01 MR 2:35 pm - 3:50 pm Jon M. Bakija

ECON 475 (S) Advanced Economic Theory (QFR)
This course studies advanced topics in micro and macro economic theory. A major focus is on the mathematical underpinnings of advanced modern economics, with a particular emphasis on proofs. Topics may include existence of Nash equilibria, games of incomplete information, equilibrium refinement and selection, global games, Bayesian persuasion, Mirrless taxation, dynamic programming, existence of general equilibrium, recursive equilibria, stochastic models in continuous time, and others. The focus of this class is primarily on mathematical formalism, rigor, and proofs. These tools are essential components of any graduate program in economics. Students who wish to see pure math theorems applied to other fields may also be interested.

Requirements/Evaluation: May include problem sets, exams, participation, term paper
Prerequisites: MATH 150 or equivalent, ECON 251, or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Senior Economics Majors
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (QFR)
Quantitative/Formal Reasoning Notes: Mathematical modeling and proofs

ECON 514 (S) Tax Policy in Global Perspective (QFR)
Cross-listings: ECON 514 ECON 389
Primary Cross-listing
Government policy is important for economic development. To finance their policies, governments must build the fiscal capacity to implement a tax system. In turn, fiscal capacity—the ability for the government to raise revenue—depends on economic development. This endogeneity between fiscal capacity and economic development creates challenges for tax policy in developing countries. Given these challenges, what types of taxes should countries use to raise revenues? How can governments build the fiscal capacity to generate revenue to finance critical services? This class explores tax policy from a global and comparative perspective. Because most students will be CDE fellows, we will emphasize tax policy issues, examples, and evidence that are pertinent to developing countries. However, many tax policy lessons are universal so we will also learn about tax policies in developed countries, especially issues relevant for transnational transactions. Topics addressed include: how economic principles can be applied to the efficiency and equity consequences of tax policies; how personal income taxes, corporate income taxes, and value-added taxes are designed and administered and how they influence the economy; ideas for fundamental tax reforms; the debate over progressive taxes versus "flat" taxes; how taxes affect incentives to save and invest; how market failures and administrative problems may influence the optimality of tax policy; the implications of global capital flows and corporate tax avoidance for tax policy; tax holidays and other special tax incentives for investment; empirical evidence on the influence of taxes on foreign direct investment, labor supply, and tax evasion; tax policy towards natural resources such as minerals and oil; case studies of efforts to reform tax administration and reduce tax evasion and corruption; taxes on land and property; taxes on imports and exports; presumptive taxation; and the informal economy and its implications for tax policy.

**Requirements/Evaluation:** midterm exam, several problem sets, two 10-page essays

**Prerequisites:** one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503); students who have previously taken ECON 351 will not be enrolled

**Enrollment Limit:** 19

**Enrollment Preferences:** CDE students, but undergraduates with the prerequisites are welcome

**Expected Class Size:** 15-19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ECON 514(D2) ECON 389(D2)

**Quantitative/Formal Reasoning Notes:** The course builds on other QFR Reasoning econ classes.

**ENVI 100 (S) Introduction to Weather and Climate (QFR)**

**Cross-listings:** GEOS 100 ENVI 100

**Secondary Cross-listing**

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore how fundamental laws of physics determine why air moves and changes, creating the wind, clouds, precipitation, and extreme events that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop an understanding of earth's climate system, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will use weather and climate models to learn how scientists and meteorologists predict future conditions. Labs include benchtop experiments, data analysis projects, and self-scheduled meteorological observations. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** weekly problem sets, lab assignments, midterm exam, and final exam

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** first year and second year students, Geosciences majors

**Expected Class Size:** 60

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**
Quantitative/Formal Reasoning Notes: This course will have regular problem sets which require substantial quantitative reasoning. Labs will require analysis, presentation, and explanation of quantitative data, and exams will require some quantitative problem solving.

Cross-listings: ENVI 203 BIOL 203

Secondary Cross-listing

This course combines lectures & discussion with field and indoor laboratory activities to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to engage students in the natural history of the region and build skills in data analysis and scientific writing.

Requirements/Evaluation: pre-class quizzes, lab reports, two mid-term exams, and a final exam

Prerequisites: BIOL 102, or ENVI 102, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: students planning to pursue Biology and/or ENVI

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 203(D3) BIOL 203(D3)

Quantitative/Formal Reasoning Notes: Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component (based in R). Students are introduced to t-tests, chi-square analysis, and regression.

ENVI 209  (F)  Modern Climate  (QFR)

Cross-listings: ENVI 209 GEOS 309

Secondary Cross-listing

What will happen to the Earth's climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We
will also focus on climate feedback effects--like the albedo feedback associated with sea ice and glacier loss--and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: 4 multi-week lab projects and several short quizzes

Prerequisites: Any of GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: GEOS and ENVI majors

ENVI 213 (S) Introduction to Environmental and Natural Resource Economics (QFR)

Cross-listings: ECON 213 ENVI 213

Secondary Cross-listing

We'll use economics to examine why we harm the environment and overuse natural resources, and what we can do about it. We'll study cost benefit analysis, pollution in general, climate change, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We'll talk about how economists put a dollar value on nature and ecosystem services (as well as human health and life!), and the concerns involved in doing so. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth. Consideration of justice and equity will be woven throughout the whole semester.

Requirements/Evaluation: problem sets, short essays, final paper; intermediate assignments may include a poster, one or more short presentation(s), other brief writing assignment(s)

Prerequisites: ECON 110 or equivalent

Enrollment Limit: 30

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course will count toward both the Environmental Studies major and concentration

Distributions: (D2) (QFR)

MATH 130 (F)(S) Calculus I (QFR)
Calculus permits the computation of velocities and other instantaneous rates of change by a limiting process called differentiation. The same process also solves "max-min" problems: how to maximize profit or minimize pollution. A second limiting process, called integration, permits the computation of areas and accumulations of income or medicines. The Fundamental Theorem of Calculus provides a useful and surprising link between the two processes. Subtopics include trigonometry, exponential growth, and logarithms.

Requirements/Evaluation: Weekly homework and quizzes, 2 exams during the semester, and one final
Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test); this is an introductory course for students who have not seen calculus before
Enrollment Limit: 50
Enrollment Preferences: first-year students
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Unit Notes: students who have previously taken a calculus course may not enroll in MATH 130 without the permission of instructor
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This a calculus course.

Fall 2023

Spring 2024
LEC Section: 01  MWF 9:00 am - 9:50 am  Lori A. Pedersen

MATH 140 (F)(S) Calculus II (QFR)
Calculus answers two basic questions: how fast is something changing (the derivative) and how much is there (the integral). This course is about integration. and the miracle that unites the derivative and the integral (the Fundamental Theorem of Calculus.) Understanding calculus requires in part the understanding of methods of integration. This course will also solve equations involving derivatives ("differential equations") for population growth or pollution levels. Exponential and logarithmic functions and trigonometric and inverse functions will also play an important role. This course is the right starting point for students who have seen derivatives, but not necessarily integrals, before.

Requirements/Evaluation: homework, quizzes, and/or exams
Prerequisites: MATH 130 or equivalent; students who have received the equivalent of advanced placement of AB 4, BC 3 or higher may not enroll in MATH 140 without the permission of instructor
Enrollment Limit: 50
Enrollment Preferences: based on who needs calculus the soonest
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Unit Notes: students who have higher advanced placement must enroll in MATH 150 or above
Distributions: (D3) (QFR)
**Quantitative/Formal Reasoning Notes**: This is a math class

Fall 2023
LEC Section: 01    MWF 8:00 am - 8:50 am     Bhagya Athukorallage
LEC Section: 02    MWF 9:00 am - 9:50 am     Bhagya Athukorallage

Spring 2024
LEC Section: 01    MWF 10:00 am - 10:50 am     Lori A. Pedersen

**MATH 150 (F)(S) Multivariable Calculus**  (QFR)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives, multiple integrals. There is also a unit on infinite series, sometimes with applications to differential equations.

**Requirements/Evaluation**: Problem sets and exams

**Prerequisites**: MATH 140 or equivalent, such as satisfactory performance on an Advanced Placement Examination

**Enrollment Limit**: 50

**Enrollment Preferences**: Preference will be given to prospective math and stats majors, or students who need this as a course to serve as a prerequisite for other courses.

**Expected Class Size**: 40

**Grading**: yes pass/fail option,     yes fifth course option

**Unit Notes**: Students with the equivalent of advanced placement of AB 4 or above should enroll in MATH 150, students with a BC 3 or higher should enroll in Math 151 when it is being offered, and Math 150 otherwise.

**Distributions**: (D3)  (QFR)

**Quantative/Formal Reasoning Notes**: mathematics

Spring 2024
LEC Section: 01    MWF 10:00 am - 10:50 am     Mihai Stoiciu

**MATH 151 (F) Multivariable Calculus**  (QFR)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives and multiple integrals. The goal of the course is Stokes Theorem, a deep and profound generalization of the Fundamental Theorem of Calculus. The difference between this course and MATH 150 is that MATH 150 covers infinite series instead of the theorems of vector calculus. Students with the equivalent of BC 3 or higher should enroll in MATH 151, as well as students who have taken the equivalent of an integral calculus and who have already been exposed to infinite series. For further clarification as to whether MATH 150 or MATH 151 is appropriate, please consult a member of the math/stat department.

**Requirements/Evaluation**: problem sets and exams

**Prerequisites**: AP BC 3 or higher or integral calculus with infinite series

**Enrollment Limit**: 50

**Enrollment Preferences**: First-years, sophomores, and juniors

**Expected Class Size**: 40

**Grading**: yes pass/fail option,     yes fifth course option

**Unit Notes**: MATH 151 satisfies any MATH 150 prerequisite; credit will not be given for both MATH 150 and MATH 151
MATH 200  (F)(S)  Discrete Mathematics  (QFR)
In contrast to calculus, which is the study of continuous processes, this course examines the structure and properties of finite sets. Topics to be covered include mathematical logic, elementary number theory, mathematical induction, set theory, functions, relations, elementary combinatorics and probability, and graphs. Emphasis will be given on the methods and styles of mathematical proofs, in order to prepare the students for more advanced math courses.

Requirements/Evaluation: Fall: Homework, proof portfolio, group work, presentations, quizzes/exams, reflections. Spring: The grade will be based on homework and 4 exams.

Prerequisites: Calculus at the level of an AP course or Williams College Math 130 or 140. Students who have taken a 300-level or 400-level math course should obtain permission of the instructor before enrolling.

Enrollment Limit: 40

Enrollment Preferences: Preference given to first and second year students intending to major in mathematics or computer science.

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Distributions:  (D3)  (QFR)

Quantative/Formal Reasoning Notes: This course involves developing the formal mathematical language of logic and set theory. It also involves using quantitative tools to solve problems relating to combinatorics, probability, and other fields of discrete mathematics.

MATH 210  (S)  Mathematical Methods for Scientists  (QFR)
This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. An optional session in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: three hours per week

Requirements/Evaluation: several exams and weekly problem sets, all of which have a substantial quantitative component

Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

Enrollment Limit: 50

Enrollment Preferences: sophomores and juniors

Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
PHYS 210(D3) MATH 210(D3)

Quantitative/Formal Reasoning Notes: This course will have weekly problem sets using advanced calculus methods

Spring 2024
LEC Section: 01  TR 9:55 am - 11:10 am  Frederick W. Strauch

MATH 250 (F)(S) Linear Algebra (QFR)
Many social, political, economic, biological, and physical phenomena can be described, at least approximately, by linear relations. In the study of systems of linear equations one may ask: When does a solution exist? When is it unique? How does one find it? How can one interpret it geometrically? This course develops the theoretical structure underlying answers to these and other questions and includes the study of matrices, vector spaces, linear independence and bases, linear transformations, determinants and inner products. Course work is balanced between theoretical and computational, with attention to improving mathematical style and sophistication.

Requirements/Evaluation: homework and exams
Prerequisites: MATH 150/151 or MATH 200
Enrollment Limit: 60
Enrollment Preferences: Students who have officially declared a major that requires Math 250.
Expected Class Size: 40
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: In this course, students will engage in both quantitative and formal reasoning.
Attributes: COGS Related Courses

MATH 309 (F)(S) Differential Equations (QFR)
Ordinary differential equations (ODEs) frequently arise as models of phenomena in the natural and social sciences. This course presents core ideas of ODEs from an applied standpoint. Topics covered early in the course may include numerical solutions, separation of variables, integrating factors, and constant coefficient linear equations. Later, we will focus on nonlinear ODEs, for which it is usually impossible to find analytical solutions. Tools from dynamical systems will be introduced to allow us to obtain information about the behavior of the ODEs without explicitly knowing the solution.

Requirements/Evaluation: quizzes/exams, problem sets, participation
Prerequisites: MATH 150/151 and MATH 250
Enrollment Limit: 40
Enrollment Preferences: discretion of the instructor
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: 300-level mathematics course
MATH 314 (F) Cryptography (QFR)
We will discuss some classical ciphers, current assymmetric cryptosystems (DES, AES, Rijndael), public key cryptosystems (RSA, Diffie-Hellman key exchange, ElGamal), and Error Correcting Codes. We will devote a substantial part of the semester covering the necessary mathematical background from number theory and asymptotic analysis. Time permitting, we may also discuss some special topics, such as primality testing (including the polynomial-time AKS algorithm), quantum computers, hash functions, digital signatures, zero-knowledge proofs, information theory, and elliptic curve cryptography.

Requirements/Evaluation: exams, problem sets, quizzes
Prerequisites: MATH 250 or permission of instructor.
Enrollment Limit: 30
Enrollment Preferences: Juniors and seniors.
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: The course will contain mathematical proofs.

MATH 321 (S) Knot Theory (QFR)
Take a piece of string, tie a knot in it, and glue the ends together. The result is a knotted circle, known as a knot. For the last 100 years, mathematicians have studied knots, asking such questions as, "Given a nasty tangled knot, how do you tell if it can be untangled without cutting it open?" Some of the most interesting advances in knot theory have occurred in the last ten years. This course is an introduction to the theory of knots. Among other topics, we will cover methods of knot tabulation, surfaces applied to knots, polynomials associated to knots, and relationships between knot theory and chemistry and physics. In addition to learning the theory, we will look at open problems in the field.

Requirements/Evaluation: problem sets, midterms, a paper and a final exam
Prerequisites: MATH 250 or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: seniors, junior, sophomores, first year
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This is a quantitative course.

MATH 328 (S) Combinatorics (QFR)
Combinatorics is a branch of mathematics that focuses on enumerating, examining, and investigating the existence of discrete mathematical structures with certain properties. This course provides an introduction to the fundamental structures and techniques in combinatorics including enumerative methods, generating functions, partition theory, the principle of inclusion and exclusion, and partially ordered sets.
Class Format: interactive activities and discussion
**Requirements/Evaluation:** quizzes/exams, homework, activities  
**Prerequisites:** “MATH 250, and MATH 200 or permission of instructor”  
**Enrollment Limit:** 30  
**Enrollment Preferences:** discretion of the instructor  
**Expected Class Size:** 25  
**Grading:** no pass/fail option, no fifth course option  
**Distributions:** (D3) (QFR)  
**Quantitative/Formal Reasoning Notes:** This is an upper level course in mathematics

Spring 2024  
LEC Section: 01   TR 8:30 am - 9:45 am   Daniel Condon

**MATH 332 (F) Topics in Applied Linear Algebra (QFR)**  
This course focuses on applications of Linear Algebra. We will start with a review of the material covered in Math 250, then move on to more advanced topics and applications. We will cover Singular Value Decomposition (SVD), QR factorization, Cholesky factorization, Least Squares problems, the Taylor approximation, the Regression model, Clustering techniques, as well as Linear Dynamical Systems and some of their applications.

**Requirements/Evaluation:** Homework assignments and exams.  
**Prerequisites:** Math 250  
**Enrollment Limit:** 30  
**Enrollment Preferences:** Mathematics Majors, Seniors  
**Expected Class Size:** 15  
**Grading:** yes pass/fail option, yes fifth course option  
**Distributions:** (D3) (QFR)  
**Quantative/Formal Reasoning Notes:** This is an advanced mathematics course, building upon the core course Math 250 - Linear Algebra.

**MATH 341 (F)(S) Probability (QFR)**  
**Cross-listings:** MATH 341 STAT 341  
**Primary Cross-listing**

The historical roots of probability lie in the study of games of chance. Modern probability, however, is a mathematical discipline that has wide applications in a myriad of other mathematical and physical sciences. Drawing on classical gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables (both discrete and continuous), distribution and expectation, independence, laws of large numbers, and the well-known Central Limit Theorem. Many interesting and important applications will also be presented, including some from classical Poisson processes, random walks and Markov Chains.

**Requirements/Evaluation:** homework, classwork, and exams  
**Prerequisites:** MATH 150 and MATH 250 or permission of the instructor  
**Enrollment Limit:** 50  
**Enrollment Preferences:** Priority will be given to Mathematics majors and to Statistics Majors.  
**Expected Class Size:** 20  
**Grading:** yes pass/fail option, yes fifth course option  
**Distributions:** (D3) (QFR)  
**This course is cross-listed and the prefixes carry the following divisional credit:**  
MATH 341(D3) STAT 341(D3)
Quantitative/Formal Reasoning Notes: This is a 300-level Math/Stat course.

Fall 2023

Spring 2024
LEC Section: 01    TR 11:20 am - 12:35 pm    Thomas A. Garrity

MATH 349  (F)  Operations of Order  (WS) (QFR)
One of the greatest challenges in mathematics is justifying interchanging orders of operations. Most of the time you cannot switch orders. Frequently this is obvious: the square root of a sum is typically not the sum of the square roots; however, there are many important situations where orders can be reversed. The purpose of this class is to highlight some of the difficulties and dangers in such attempts. This will be a writing intensive course, where we work on content for a book that collects counter-examples and theorems in one convenient place while also showcasing the utility of switching orders. We will discuss at great lengths how to do engaging, technical writing, keeping in mind the content and the audience. Students will receive feedback from the professor and probably other professional mathematicians and editors.

Requirements/Evaluation: Mix of homework, exams, and writing, including at least one chapter (consisting of theory, examples, images, homework problem creation and solutions).

Prerequisites: Math 250 or permission of the instructor.

Enrollment Limit: 19

Enrollment Preferences: If over-enrolled, students will be chosen uniformly at random.

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)  (WS) (QFR)

Writing Skills Notes: Students will be working closely with me and colleagues, receiving feedback on their writing from numerous sources (myself, editors, experts in the field), and their work will be part of the final, published manuscript. We will have numerous discussions about how to write, taking into account the audience and the content.

Quantitative/Formal Reasoning Notes: This is a 300 level math course.

Fall 2023
LEC Section: 01    MWF 10:00 am - 10:50 am    Steven J. Miller

MATH 350  (F)(S)  Real Analysis  (QFR)
Why is the product of two negative numbers positive? Why do we depict the real numbers as a line? Why is this line continuous, and what do we mean when we say that? Perhaps most fundamentally, what is a real number? Real analysis addresses such questions, delving into the structure of real numbers and functions of them. Along the way we'll discuss sequences and limits, series, completeness, compactness, derivatives and integrals, and metric spaces. Results covered will include the Cantor-Schroeder-Bernstein theorem, the monotone convergence theorem, the Bolzano-Weierstrass theorem, the Cauchy criterion, Dirichlet's and Riemann's rearrangement theorem, the Heine-Borel theorem, the intermediate value theorem, and many others. This course is excellent preparation for graduate studies in mathematics, statistics, and economics.

Requirements/Evaluation: Problem sets, oral exams, and possibly a take-home exam and/or an expository essay.

Prerequisites: MATH 250 or permission of instructor.

Enrollment Limit: 40

Enrollment Preferences: Juniors and Seniors.

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: It's math.
MATH 351 (S) Applied Real Analysis (QFR)
This course is designed to introduce students to the underpinnings of real analysis, primarily in the context of Fourier series. By the end of the semester people will be comfortable making epsilon and delta type arguments. These types of arguments are one of the main pillars of modern mathematics. In a similar way, Fourier series and their generalizations are one of the pillars of the modern digital world.

Requirements/Evaluation: homework, classwork, and exams
Prerequisites: MATH 150 and MATH 250 or permission of the instructor.
Enrollment Limit: 50
Enrollment Preferences: Seniors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: Math

Spring 2024
LEC Section: 01 TR 9:55 am - 11:10 am Thomas A. Garrity

MATH 355 (F)(S) Abstract Algebra (QFR)
Algebra gives us tools to solve equations. The integers, the rationals, and the real numbers have special properties which make algebra work according to the circumstances. In this course, we generalize algebraic processes and the sets upon which they operate in order to better understand, theoretically, when equations can and cannot be solved. We define and study abstract algebraic structures such as groups, rings, and fields, as well as the concepts of factor group, quotient ring, homomorphism, isomorphism, and various types of field extensions. This course introduces students to abstract rigorous mathematics.

Requirements/Evaluation: Problem sets and exams
Prerequisites: MATH 250 or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: Students who have officially declared a major that requires Math 355.
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option

LEC Section: 02 TR 9:55 am - 11:10 am Steven J. Miller

MATH 361 (S) Theory of Computation (QFR)
Cross-listings: CSCI 361 MATH 361
This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory—the examination of what problems can be solved and what problems cannot be solved—and the study of complexity theory—the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

Class Format: Students should sign up for lecture and one conference section.

Requirements/Evaluation: online multiple choice and short answer questions, weekly problem sets in groups, a research project, and a final examination

Prerequisites: CSCI 256 or both a 300-level MATH course and permission of instructor

Enrollment Limit: 60; 12/con

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

CSCI 361(D3) MATH 361(D3)

Quantitative/Formal Reasoning Notes: This course include regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

CON Section: 06 W 3:00 pm - 4:00 pm Aaron M. Williams

MATH 382 (S) Fourier Analysis (QFR)

Fourier analysis is the study of waves and frequencies. More precisely, the goal of Fourier analysis is to decompose a complicated function into a simple combination of pure waves, thereby gleaning insight into the behavior of the function itself. It's difficult to overstate the impact of this branch of mathematics; it is foundational throughout theoretical mathematics (e.g., to study the distribution of prime numbers), applied mathematics (e.g., to solve differential equations), physics (e.g., to study properties of light and sound), computer science (e.g., to compute with large integers and matrices), audio engineering (e.g., to pitch-correcting algorithms), medical science (e.g., throughout radiology), etc. The goal of this course is to cover the basic theory (fourier series, the fourier transform, the fast fourier transform) and explore a number of applications, including Dirichlet's theorem on primes in arithmetic progressions, the isoperimetric inequality, the heat equation, and Heisenberg's uncertainty principle.

Class Format: Every week, each student will either give a lecture (based on provided readings) or explain solutions to selected problems.

Requirements/Evaluation: Evaluation will be based on lectures and presentation of problem solutions.

Prerequisites: MATH 350 or MATH 351 or permission of instructor.

Enrollment Limit: 10

Enrollment Preferences: By lottery.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: It's math!

Spring 2024
MATH 383 (F) Complex Analysis (QFR)
The calculus of complex-valued functions turns out to have unexpected simplicity and power. As an example of simplicity, every complex-differentiable function is automatically infinitely differentiable. As examples of power, the so-called "residue calculus" permits the computation of "impossible" integrals, and "conformal mapping" reduces physical problems on very general domains to problems on the round disc. The easiest proof of the Fundamental Theorem of Algebra, not to mention the first proof of the Prime Number Theorem, used complex analysis.

Requirements/Evaluation: homework, classwork, and exams
Prerequisites: MATH 350 or MATH 351 or permission of instructor
Enrollment Limit: 40
Enrollment Preferences: 40
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Unit Notes: this course is not a senior seminar, so it does not fulfill the senior seminar requirement for the Math major
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: Advanced mathematics course with weekly or daily problem sets.

Fall 2023
LEC Section: 01 MWF 11:00 am - 11:50 am Steven J. Miller

MATH 394 (S) Galois Theory (QFR)
Some equations--such as $x^5-1=0$--are easy to solve. Others--such as $x^5-x-1=0$--are very hard, if not impossible (using finite combinations of standard mathematical operations). Galois discovered a deep connection between field theory and group theory that led to a criterion for checking whether or not a given polynomial can be easily solved. His discovery also led to many other breakthroughs, for example proving the impossibility of squaring the circle or trisecting a typical angle using compass and straightedge. From these not-so-humble beginnings, Galois theory has become a fundamental concept in modern mathematics, from topology to number theory. In this course we will develop the theory and explore its applications to other areas of math.

Requirements/Evaluation: problem sets and oral exams
Prerequisites: MATH 355
Enrollment Limit: 30
Enrollment Preferences: Juniors and seniors
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This is a math class

Spring 2024
LEC Section: 01 MR 2:35 pm - 3:50 pm Leo Goldmakher

MATH 407 (F) Dance of the Primes (QFR)
Prime numbers are the building blocks for all numbers and hence for most of mathematics. Though there are an infinite number of them, how they are spread out among the integers is still quite a mystery. Even more mysterious and surprising is that the current tools for investigating prime numbers involve the study of infinite series. Function theory tells us about the primes. We will be studying one of the most amazing functions known: the Riemann Zeta Function. Finding where this function is equal to zero is the Riemann Hypothesis and is one of the great, if not greatest, open problems in mathematics. Somehow where these zeros occur is linked to the distribution of primes. We will be concerned with why anyone would care about this conjecture. More crassly, why should solving the Riemann Hypothesis be worth one million dollars? (Which is what you will get if you solve it, beyond
MATH 415 (F) Advanced Matrix Analysis (QFR)
This course will start with a review of various attributes of matrices (determinants, rank, etc), as well as eigenvalues, eigenvectors, and their properties. Then we will move on to study special matrices and their decompositions, along with similarities, and Jordan canonical forms. In the third segment, we will define norms on vectors and matrices and study their analytic properties. Finally, we will discuss another important class of matrices - positive definite and semidefinite matrices. If time permits, we will also cover positive and negative matrices and their properties.

Requirements/Evaluation: homework assignments and exams.
Prerequisites: Math 350/351 or permission of instructor
Enrollment Limit: 25
Enrollment Preferences: Mathematics and Statistics Majors, Seniors
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This is an advanced mathematics class that covers complex properties of matrices and some of their applications.

Fall 2023
LEC Section: 01 TR 9:55 am - 11:10 am Palak Arora

MATH 419 (F) Algebraic Number Theory (QFR)
We all know that integers can be factored into prime numbers and that this factorization is essentially unique. In more general settings, it often still makes sense to factor numbers into "primes," but the factorization is not necessarily unique! This surprising fact was the downfall of Lamé's attempted proof of Fermat's Last Theorem in 1847. Although a valid proof was not discovered until over 150 years later, this error gave rise to a new branch of mathematics: algebraic number theory. In this course, we will study factorization and other number-theoretic notions in more abstract algebraic settings, and we will see a beautiful interplay between groups, rings, and fields.

Requirements/Evaluation: homework assignments and exams
Prerequisites: MATH 355, or permission of instructor
Enrollment Limit: 25
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Fall 2023
MATH 434 (S) Applied Dynamics and Optimal Control  (QFR)
We seek to understand how dynamical systems evolve, how that evolution depends on the various parameters of the system, and how we might manipulate those parameters to optimize an overall outcome. The primary focus of this course will be optimal control using Pontryagin's maximum principle and Hamilton-Jacobi-Bellman equations. These tools have broad application in ecology, economics, finance, and engineering, and we will draw on basic models from these fields to motivate our study. The course will begin with a solid review of modeling with dynamical systems, and deepening our understanding of differential and difference equations, parameter dependence, and bifurcations.

Requirements/Evaluation: exams, homework assignments, and projects
Prerequisites: MATH 309 or PHYS 210, and MATH 350 or 351, or permission of the instructor
Enrollment Limit: 25
Enrollment Preferences: Preference will be given to senior math majors.
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This is a 400 level math course.

Spring 2024

Spring 2024
LEC Section: 01    TR 11:20 am - 12:35 pm     Daniel Condon

PHIL 203 (F) Logic and Language (QFR)
Logic is the study of reasoning and argument. More particularly, it concerns itself with the differences between good and bad reasoning, between strong and weak arguments. We will examine the virtues and vices of good arguments in both informal and formal systems. The goals of this course are to improve the critical thinking of the students, to introduce them to sentential and predicate logic, to familiarize them with enough formal logic to enable them to read some of the great works of philosophy that use formal logic (such as Wittgenstein's *Tractatus*), and to examine some of the connections between logic and philosophy.

Class Format: discussion

Requirements/Evaluation: a midterm, a final, frequent homework and problem sets

Prerequisites: none

Enrollment Limit: 40/sect

Enrollment Preferences: Philosophy majors, seniors, juniors, sophomores, first-years in that order.

Expected Class Size: 40/sect

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: The main part of the course is learning two formal languages of logic: sentential logic and predicate logic

Attributes: Linguistics  PHIL Contemp Metaphysics + Epistemology Courses

Fall 2023

PHIL 221 (F) Introduction to Formal Linguistics (QFR)

Cross-listings: PHIL 221 COGS 224

Secondary Cross-listing

The sentence "Every cookie is chocolate chip and three of them are oatmeal raisin" is a perfectly grammatical sentence of English, but it's self-contradictory. What does it take to realize this fact? One must grasp the meanings of the various parts of the sentence. In particular, one must grasp that "three of them" picks out a subset of the group picked out by "every cookie", and that there's no such thing as a cookie that is both chocolate chip and oatmeal raisin. There two ways to understand "Many students took every class". According to one, there is a single group of students that had their hands extremely full this semester. According to the other, every class was well-populated, potentially by different groups. The reason for this is that there are two underlying structures that the original sentence can realize. This course serves as an introduction to formal methods in the scientific study of language. Our goal will be to characterize phenomena like those above with logical and mathematical precision. The focus will be on model-theoretic semantics, the sub-field of linguistics that studies meanings. Along the way we will discuss principles of syntax, the sub-field that studies sentence structures, and pragmatics, the sub-field that studies inferences of non-literal content. This is a formal course, but no prior logical or mathematical background will be expected. Starting from scratch, students will learn the building blocks of current-day linguistic research. This introduction will be of use to students interested in language from a variety of perspectives, including philosophy, cognitive science, and computer science.

Requirements/Evaluation: Weekly problem sets, plus a final project (paper/presentation/other type, to be discussed with instructor)

Prerequisites: No prerequisites

Enrollment Limit: 20

Enrollment Preferences: Preference given to seniors and philosophy/cognitive science majors.
**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**PHYS 109 (S) Sound, Light, and Perception (QFR)**

Light and sound allow us to perceive the world around us, from appreciating music and art to learning the details of atomic structure. Because of their importance in human experience, light and sound have long been the subject of scientific inquiry. How are sound and light related? How do physiology and neural processing allow us to hear and see the world around us? What are the origins of color and musical pitch? This course introduces the science and technology of light and sound to students not majoring in physics. We will start with the origins of sound and light as wave phenomena, and go on to topics including color, the optics of vision, the meaning of musical pitch and tone, and the physical basis of hearing. We will also discuss some recent technological applications of light, such as lasers and optical communications. The class will meet for two 75-minute periods each week for a variable mixture of lecture, discussion, and hands-on, interactive experiments.

**Class Format:** The two weekly class sections will be located in a space suitable for both lecture and hands-on laboratory-style work

**Requirements/Evaluation:** class participation, problem sets, in-class midterm, oral presentations, and a final exam, all with a quantitative component

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** non-science majors

**Expected Class Size:** 20
Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This class will have frequent problem sets requiring substantial quantitative reasoning

Spring 2024

LEC Section: 01 TR 11:20 am - 12:35 pm Catherine Kealhofer

**PHYS 131 (F) Introduction to Mechanics** (QFR)

We focus first on the Newtonian mechanics of point particles: the relationship between velocity, acceleration, and position; the puzzle of circular motion; forces, Newton's laws, and gravitation; energy and momentum; and the physics of vibrations. Then we turn to the basic properties of waves, such as interference and refraction, as exemplified by sound and light waves. We also study the optics of lenses, mirrors and the human eye. This course is not intended for students who have successfully completed an AP physics course in high school.

**Requirements/Evaluation:** exams, labs, and weekly problem sets, all of which have a substantial quantitative component

**Prerequisites:** MATH 130; students who scored 4 or 5 on an AP physics exam, or 6 or 7 on the IB Physics HL exam may not take this course and are encouraged to take PHYS 141 instead

**Enrollment Limit:** 30

**Enrollment Preferences:** seniority

**Expected Class Size:** 60

Grading: yes pass/fail option, yes fifth course option

**Unit Notes:** PHYS 131 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This class will have weekly problem sets requiring substantial quantitative reasoning

Fall 2023

LEC Section: 01 MWF 11:00 am - 11:50 am John H. Lacy

LAB Section: 02 M 1:00 pm - 4:00 pm Brough Morris

LAB Section: 03 T 1:00 pm - 4:00 pm Brough Morris

**PHYS 132 (S) Electromagnetism and the Physics of Matter** (QFR)

This course is intended as the second half of a one-year survey of physics with some emphasis on applications to medicine. In the first part of the semester we will focus on electromagnetic phenomena. We will introduce the concept of electric and magnetic fields and study in detail the way in which electrical circuits and circuit elements work. The deep connection between electric and magnetic phenomena is highlighted with a discussion of Faraday's Law of Induction. Following our introduction to electromagnetism we will discuss some of the most central topics in twentieth-century physics, including Einstein's theory of special relativity and some aspects of quantum theory. We will end with a treatment of nuclear physics, radioactivity, and uses of radiation.

**Class Format:** lecture three hours per week, laboratory three hours approximately every other week, and conference section 1 hour approximately every other week

**Requirements/Evaluation:** weekly problem sets, labs, quizzes and exams

**Prerequisites:** PHYS 131 or 141 or permission of instructor, and MATH 130 (formerly 103)

**Enrollment Limit:** 22 per lab

**Enrollment Preferences:** sophomores

**Expected Class Size:** 60

Grading: yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** Significant homework, exams, quizzes requiring mathematical and physical reasoning.
PHYS 141 (F) Mechanics and Waves (QFR)

This is the typical first course for a prospective physics major. It covers most of the same topics as PHYS 131, but with a higher level of mathematical sophistication. It is intended for students with solid backgrounds in the sciences, either from high school or college, who are comfortable with basic calculus.

Class Format: lecture, three hours per week; laboratory, three hours approximately every other week; conference section, 1.5 hours approximately every other week

Requirements/Evaluation: weekly problem sets, labs, two 1-hour exams, and a final exam, all of which have a substantial quantitative component

Prerequisites: High school physics (strongly recommended) and MATH 130 or equivalent placement, or permission of the instructor. High school physics at the AP, IB, or equivalent level is neither required nor expected.

Enrollment Limit: 24 per lab

Enrollment Preferences: first-year students and science majors

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Unit Notes: PHYS 141 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course consists of lectures, problem-solving conferences, lab exercises, problem sets and exams, all of which have a substantial quantitative component.

Fall 2023

PHYS 142 (S) Foundations of Modern Physics (QFR)

Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity, which extends physics into the realm of high speeds and high energies, requires we rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our expectation of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system.

This course will survey ideas from each of these three arenas, and can serve either as a terminal course for those seeking to complete a year of physics or as the basis for future advanced study of these topics.

Class Format: lecture, three hours weekly; laboratory, 2-3 hours most weeks, alternating between ‘hands-on’ sessions and problem-solving/discussion sessions

Requirements/Evaluation: weekly homework, labs, two hour tests, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 141 and MATH 130, or equivalent; PHYS 131 may substitute for PHYS 141 with the permission of instructor; students may not take both PHYS 142 and PHYS 151

Enrollment Limit: 14/L

Enrollment Preferences: first-year students

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: Heavily problem-solving focused, involving algebraic manipulations, single-variable calculus, generating and reading graphs, etc.

PHYS 151 (F) Seminar in Modern Physics (QFR)
Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity has extended physics into the realm of high speeds and high energies and requires us to rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our notions of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system. This course covers the same core material as PHYS 142 but in a small seminar format for students with strong prior preparation in physics.

Class Format: lecture/discussions plus one 3-hour lab per week
Requirements/Evaluation: class participation, weekly lab assignments, weekly problem sets, exams
Prerequisites: placement by the department (see "advanced placement" section in the description about the department). Students may take either PHYS 142 or PHYS 151 but not both
Enrollment Limit: 18
Enrollment Preferences: first-years
Expected Class Size: 16
Grading: yes pass/fail option, yes fifth course option
Unit Notes: this is a small seminar designed for first-year students who have placed out of PHYS 141
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: all assignments in the course have a substantial quantitative component

Fall 2023
LEC Section: 01  MWF 11:00 am - 12:15 pm  Daniel P. Aalberts
LAB Section: 02  W 1:10 pm - 3:50 pm  Daniel P. Aalberts

PHYS 201 (F) Electricity and Magnetism (QFR)
The classical theory of electricity and magnetism is very rich yet it can be written in a remarkably succinct form using Maxwell's equations. This course is an introduction to electric and magnetism and their mathematical description, connecting electric and magnetic phenomena via the special theory of relativity. Topics include electrostatics, magnetic fields, electromagnetic induction, DC and AC circuits, and the electromagnetic properties of matter. The laboratory component of the course is an introduction to electronics where students will develop skills in building and debugging electrical circuits.

Class Format: lecture, three hours per week; laboratory, three hours per week
Requirements/Evaluation: problem sets, labs/conference section assignments, two take-home midterms, and a final exam, all of which have a substantial quantitative component
Prerequisites: PHYS 142 OR 151; MATH 150 or 151; with a preference for MATH 151
Enrollment Limit: 10 per lab
Enrollment Preferences: prospective physics majors, then by seniority
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course involves significant problem-solving and mathematical analysis of phenomena using calculus,
numerical methods, and other quantitative tools.

LAB Section: 03   R 1:00 pm - 4:00 pm   David R. Tucker-Smith

PHYS 202  (S) Vibrations, Waves and Optics  (QFR)
Waves and oscillations characterize many different physical systems, including vibrating strings, springs, water waves, sound waves, electromagnetic waves, and gravitational waves. Quantum mechanics even describes particles with wave functions. Despite these diverse settings waves exhibit several common characteristics, so that the understanding of a few simple systems can provide insight into a wide array of phenomena. In this course we begin with the study of oscillations of simple systems with only a few degrees of freedom. We then move on to study transverse and longitudinal waves in continuous media in order to gain a general description of wave behavior. The rest of the course focuses on electromagnetic waves and in particular on optical examples of wave phenomena. In addition to well known optical effects such as interference and diffraction, we will study a number of modern applications of optics such as short pulse lasers and optical communications. Throughout the course mathematical methods useful for higher-level physics will be introduced.

Class Format: lecture, three hours per week; laboratory, three hours per week
Requirements/Evaluation: problem sets, labs, midterm examinations, and a final exam, all of which have a substantial quantitative component
Prerequisites: PHYS 201; co-requisite: PHYS/MATH 210 or MATH 209 or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: sophomores
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course has substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

PHYS 210  (S) Mathematical Methods for Scientists  (QFR)
Cross-listings: PHYS 210 MATH 210

Primary Cross-listing
This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. An optional session in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: three hours per week
Requirements/Evaluation: several exams and weekly problem sets, all of which have a substantial quantitative component
Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131
Enrollment Limit: 50
Enrollment Preferences: sophomores and juniors
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

PHYS 210(D3) MATH 210(D3)

Quantative/Formal Reasoning Notes: This course will have weekly problem sets using advanced calculus methods

Spring 2024

LEC Section: 01 TR 9:55 am - 11:10 am Frederick W. Strauch

PHYS 301 (F) Quantum Physics (QFR)

This course serves as a one-semester introduction to the formalism, and phenomenology of quantum mechanics. After a brief discussion of historical origins of the quantum theory, we introduce the Schrödinger wave equation, the concept of matter waves, and wave-packets. With this introduction as background, we will continue our discussion with a variety of one-dimensional problems such as the particle-in-a-box and the harmonic oscillator. We then extend this work to systems in two and three dimensions, including a detailed discussion of the structure of the hydrogen atom. Along the way we will develop connections between mathematical formalism and physical predictions of the theory. Finally, we conclude the course with a discussion of angular momentum and spins, with applications to atomic physics, entanglement, and quantum information.

Class Format: lecture, three hours per week; laboratory, three hours per week

Requirements/Evaluation: weekly problem sets, laboratory reports / write-ups, a midterm exam, and final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 309

Enrollment Limit: 20

Enrollment Preferences: physics majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: Phys 301 relies heavily upon mathematics and quantitative reasoning in all elements, including problem sets, examinations, and laboratories.

LAB Section: 03 T 1:00 pm - 4:00 pm John H. Lacy

PHYS 302 (S) Statistical Mechanics & Thermodynamics (QFR)

Macroscopic objects are made up of huge numbers of fundamental particles interacting in simple ways--obeying the Schrödinger equation, Newton's and Coulomb's Laws--and these objects can be described by macroscopic properties like temperature, pressure, magnetization, heat capacity, conductivity, etc. In this course we will develop the tools of statistical physics, which will allow us to predict the cooperative phenomena that emerge in large ensembles of interacting particles. We will apply those tools to a wide variety of physical questions, including the behavior of gases, polymers, heat engines, biological and astrophysical systems, magnets, and electrons in solids.

Class Format: lecture/discussion three hours per week and weekly laboratory work

Requirements/Evaluation: weekly problem sets, midterm exam, final exam, and labs, all of which have a substantial quantitative component

Prerequisites: required: PHYS 201, PHYS/MATH 210 or MATH 309; recommended: PHYS 202, PHYS 301

Enrollment Limit: 14 per lab

Enrollment Preferences: physics majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: weekly problem sets, exams, and labs, all of which have a substantial quantitative component

PHYS 312  (F) Philosophical Implications of Modern Physics  (QFR)
Primary Cross-listing
Some of the discoveries made by physicists over the last century seem to show that our common sense views are deeply at odds with our most sophisticated and best confirmed scientific theories. The course will present the essential ideas of relativity theory and quantum theory and explore their implications for philosophy. We will ask, for example, what these theories tell us about the nature of space, time, probability and causality.

Requirements/Evaluation: attendance, participation, problem sets, exams, six 1- to 2-page papers and a 12- to 15-page term paper
Prerequisites: MATH 140, high-school physics, and either a 200-level course in PHIL or a 100-level course in PHYS
Enrollment Limit: 20
Enrollment Preferences: Philosophy majors and Physics majors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:

PHYS 314  (S) Controlling Quanta  (QFR)
This course will explore modern developments in the control of individual quantum systems. Topics covered will include basic physical theories of atoms coupled to photons, underlying mathematical tools (including Lie algebras and groups), and computational methods to simulate and analyze quantum systems. Applications to quantum computing, teleportation, and experimental metaphysics (Bell's inequality) will also be discussed.

Requirements/Evaluation: tutorial preparation and participation, weekly problem sets/papers, and a final project
Prerequisites: PHYS/MATH 210 or MATH 209 or MATH 250
Enrollment Limit: 10
Enrollment Preferences: sophomores and junior Physics majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Spring 2024

TUT Section: T1  TBA   Frederick W. Strauch

PHYS 405  (F) Electromagnetic Theory  (QFR)
This course builds on the material of Physics 201, and explores the application of Maxwell's Equations to understand a range of topics including
electric fields and matter, magnetic materials, light, and radiation. As we explore diverse phenomena, we will learn useful approximation techniques and beautiful mathematical tools. In addition to weekly tutorial meetings, the class will meet once a week as a whole to introduce new material.

Class Format: Class will meet once as a whole to introduce new material and for informal discussion.

Requirements/Evaluation: weekly problem sets, tutorial participation, presentations, and a final exam or final project, all of which have a substantial quantitative component

Prerequisites: PHYS 202 and PHYS/MATH 210 or MATH 209 or MATH 309

Enrollment Limit: 30

Enrollment Preferences: Preference will be given to physics and astrophysics majors.

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Physics courses are all heavily dependent on QFR skills. Phys 405 will feature extensive use of vector calculus and differential equations while also asking students to develop facility with approximation techniques in solving complex problems throughout the semester.

Fall 2023

TUT Section: T1    F 1:10 pm - 2:25 pm    Charlie Doret

PHYS 418 (S) Gravity (QFR)

This course is an introduction Einstein's theory of general relativity. We begin with a review of special relativity, emphasizing geometrical aspects of Minkowski spacetime. Working from the equivalence principle, we then motivate gravity as spacetime curvature, and study in detail the Schwarzschild geometry around a spherically symmetric mass. After this application, we use tensors to develop Einstein's equation, which describes how energy density curves spacetime. With this equation in hand we study the Friedmann-Robertson-Walker geometries for an expanding universe, and finally, we linearize Einstein's equation to develop the theory of gravitational waves.

Requirements/Evaluation: weekly problem sets, a midterm exam, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 301 or PHYS 405 or PHYS 411, or permission of instructor

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: All problem sets and exams will have a substantial quantitative component.

Spring 2024

LEC Section: 01    TR 8:30 am - 9:45 am    David R. Tucker-Smith

POEC 253 (F) Empirical Methods in Political Economy (QFR)

This course introduces students to common empirical tools used in policy analysis and implementation. The broad aim is to train students to be discriminating consumers of public policy-relevant research. The emphasis in the course is on intuitive understanding of the central concepts. Through hands-on work with data and critical assessment of existing empirical social scientific research, students will develop the ability to choose and employ the appropriate tool for a particular research problem, and to understand the limitations of the techniques. Topics to be covered include basic principles of probability; random variables and distributions; statistical estimation, inference and hypothesis testing; and modeling using multiple regression, with a particular focus on understanding whether and how relationships between variables can be determined to be causal—an essential requirement for effective policy formation. Throughout the course, the focus will be on public policy applications relevant to the fields of political science, sociology, and public health, as well as to economics.

Requirements/Evaluation: Problem sets, group project, midterm exam, final exam

Prerequisites: MATH 130 or its equivalent; one course in ECON; not open to students who have taken ECON 255
Enrollment Limit: 20
Enrollment Preferences: Political Economy majors, Environmental Policy majors and sophomores
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Unit Notes: does not satisfy the econometrics requirement for the Economics major; POEC 253 cannot be substituted for ECON 255, or count as an elective towards the Economics major
Distributions: (D2) (QFR)
Quantitative/Formal Reasoning Notes: The course teaches econometrics, i.e. statistics as economists use it, with applications in economics, political science, and other fields.
Attributes: PHLH Statistics Courses POEC Required Courses

Fall 2023

PSYC 201 (F)(S) Experimentation and Statistics (QFR)
An introduction to the basic principles of research in psychology. We focus on how to design and execute experiments, analyze and interpret results, and write research reports. Students conduct a series of research studies in different areas of psychology that illustrate basic designs and methods of analysis. You must register for lab and lecture with the same instructor.
Requirements/Evaluation: research reports, exams, and problem sets
Prerequisites: PSYC 101; not open to first-year students except with permission of instructor
Enrollment Limit: 16
Enrollment Preferences: Psychology majors
Expected Class Size: 16
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course has problem sets focused on experimental design and quantitative data analysis. Students will help design and conduct experiments, analyze the data, and report their findings.

STAT 101 (F)(S) Elementary Statistics and Data Analysis (QFR)
It is impossible to be an informed citizen in today's world without an understanding of data. Whether it is opinion polls, unemployment rates, salary differences between men and women, the efficacy of vaccines, etc, we need to be able to interpret and gain information from statistics. This course will
introduce the common methods used to analyze and present data with an emphasis on interpretation and informed decision making.

Requirements/Evaluation: weekly homework, quizzes, exams, and a project
Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test)
Enrollment Limit: 50
Enrollment Preferences: juniors and seniors
Expected Class Size: 35
Grading: yes pass/fail option, yes fifth course option
Unit Notes: Students with MATH150 but no statistics should enroll in STAT201. Students with AP Stat 4/5 or STAT 101/161 should enroll in STAT 202.
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: It is a quantitative course.

STAT 161 (F)(S) Introductory Statistics for Social Science (QFR)
This course will cover the basics of modern statistical analysis with a view toward applications in the social sciences. Topics include exploratory data analysis, linear regression, basic statistical inference, and elements of probability theory. The course focuses on the application of statistical tools to solve problems, to make decisions, and the use of statistical thinking to understand the world.
Requirements/Evaluation: Weekly homework, quizzes, two midterms and a final exam (midterms include take-home components), and a data analysis project. Students will need to become familiar with the statistical software STATA.
Prerequisites: MATH 130 (or equivalent); not open to students who have completed STAT 101 or equivalent
Enrollment Limit: 40
Enrollment Preferences: Economics majors, sophomores
Expected Class Size: 40
Grading: yes pass/fail option, no fifth course option
Unit Notes: Students with calculus background should consider STAT 201. Students without any calculus background should consider STAT 101. Students with AP Stat 4 or 5 should consider Stat 202. Please refer to the placement chart on the Math&Stat department website for more information.

STAT 201 (F)(S) Statistics and Data Analysis (QFR)
Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science, is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped
back, "Data, data, data! I can't make bricks without clay." In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves computational programming and incorporates modern statistical techniques.

Requirements/Evaluation: weekly homework and projects, midterm exams, and a final exam.

Prerequisites: MATH 150 or equivalent; not open to students who have completed STAT 101 or STAT 161 or equivalent

Enrollment Limit: 40

Enrollment Preferences: Prospective Statistics majors, students for whom the course is a major prerequisite, and seniors

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Students with AP Stat 4/5 or STAT 101/161 should enroll in STAT 202. Students with no calc or stats background should enroll in STAT 101. Students with MATH 140 but no statistics should enroll in STAT 161.

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Students will learn to choose, carry out, interpret, and communicate analyses of data.

Attributes: COGS Related Courses PHLH Statistics Courses

STAT 202 (F)(S) Introduction to Statistical Modeling (QFR)

Data come from a variety of sources: sometimes from planned experiments or designed surveys, sometimes by less organized means. In this course we'll explore the kinds of models and predictions that we can make from both kinds of data, as well as design aspects of collecting data. We'll focus on model building, especially multiple regression, and talk about its potential to answer questions about the world -- and about its limitations. We'll emphasize applications over theory and analyze real data sets throughout the course.

Requirements/Evaluation: Homework problems; quizzes; exams; a final project (on a topic that interests you!). Participation matters! Engagement with your peers is an important part of learning, of being a statistician in the Real World...and of your evaluation in this course. While your assignments will be submitted (and graded) individually, you'll be responsible for giving and receiving peer feedback, contributing to class discussions, and working together with classmates on practice problems.

Prerequisites: MATH 140 and STAT 101/161/201/AP Statistics 4/5, or permission of instructor.

Enrollment Limit: 40

Enrollment Preferences: Prospective Statistics majors and more senior students

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Students with a 4 on the AP Stats exam should contact the department for proper placement. Students with STAT 201 are strongly encouraged to take STAT 346 or other 300-level statistics electives.

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course uses mathematical tools and computing programs to create models, make predictions, assess uncertainty, and describe data. We'll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.

Attributes: PHLH Statistics Courses

LEC Section: 02 TF 1:10 pm - 2:25 pm Xizhen Cai

Spring 2024

STAT 335  (S)  Introduction to Biostatistics and Epidemiology  (QFR)
Epidemiology is the study of disease and disability in human populations, while biostatistics focuses on the development and application of statistical methods to address questions that arise in medicine, public health, or biology. This course will begin with epidemiological study designs and core concepts in epidemiology, followed by key statistical methods in public health research. Topics will include multiple regression, analysis of categorical data (two sample methods, sets of 2x2 tables, RxC tables, and logistic regression), survival analysis (Cox proportional hazards model), and if time permits, a brief introduction to regression with correlated data.

Requirements/Evaluation:  Evaluation will be primarily based on weekly assignments (regular homework or mini-projects), two midterm exams, and a final exam.

Prerequisites: Stat 201 or Stat 202, or permission of instructor (prior experience should include a working understanding of multiple linear regression, the basics of statistical inference, and R).

Enrollment Limit:  20

Enrollment Preferences:  Statistics majors and prospective majors who have not yet taken Stat 346; public health concentrators

Expected Class Size:  15

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D3)  (QFR)

Quantative/Formal Reasoning Notes:  Students will learn how to choose, implement, and interpret statistical analyses relevant to public health studies.

STAT 341  (F)(S)  Probability  (QFR)

Cross-listings:  MATH 341 STAT 341

Secondary Cross-listing
The historical roots of probability lie in the study of games of chance. Modern probability, however, is a mathematical discipline that has wide applications in a myriad of other mathematical and physical sciences. Drawing on classical gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables (both discrete and continuous), distribution and expectation, independence, laws of large numbers, and the well-known Central Limit Theorem. Many interesting and important applications will also be presented, including some from classical Poisson processes, random walks and Markov Chains.

Requirements/Evaluation:  homework, classwork, and exams

Prerequisites:  MATH 150 and MATH 250 or permission of the instructor

Enrollment Limit:  50

Enrollment Preferences:  Priority will be given to Mathematics majors and to Statistics Majors.

Expected Class Size:  20

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D3)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

Spring 2024
**STAT 346 (F)(S) Regression Theory and Applications** (QFR)

This course focuses on the building of empirical models through data in order to predict, explain, and interpret scientific phenomena. Regression modeling is the most widely used method for analyzing and predicting a response data and for understand the relationship with explanatory variables. This course provides both theoretical and practical training in statistical modeling with particular emphasis on simple linear and multiple regression, using R to develop and diagnose models. The course covers the theory of multiple regression and diagnostics from a linear algebra perspective with emphasis on the practical application of the methods to real data sets. The data sets will be taken from a wide variety of disciplines.

**Requirements/Evaluation:** Weekly homework, theory and data analysis exams, final course project.

**Prerequisites:** MATH/STAT 341, MATH 250, and at least one of STAT 201 or 202. Or permission of the instructor.

**Enrollment Limit:** 30

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course prepares students in the use of quantitative methods for the modeling, prediction and understanding of scientific phenomena.

LEC Section: 01 TR 9:55 am - 11:10 am Xizhen Cai

---

**STAT 355 (F) Multivariate Statistical Analysis** (QFR)

To better understand complex processes, we study how variables are related to one another, and how they work in combination. In addition, we want to make inferences about more than one variable at a time. Elementary statistical methods might not apply. In this course, we study the tools and the intuition that is necessary to analyze and describe such datasets with more than multiple variables. Topics covered will include data visualization techniques for high dimensional data sets, parametric and non-parametric techniques to estimate joint distributions, techniques for combining variables and making inferences, and several classification and clustering algorithms.

**Requirements/Evaluation:** Homework, projects, quizzes, and exams.

**Prerequisites:** MATH 250, and STAT 346 or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Juniors/seniors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** It is an advanced statistics class with prerequisites that are QFR courses

---

**Fall 2023**

LEC Section: 01 TR 9:55 am - 11:10 am Xizhen Cai

---

**STAT 360 (F) Statistical Inference** (QFR)

How do we estimate unknown parameters and express the uncertainty we have in our estimate? Is there an estimator that works best? Many topics from introductory statistics such as random variables, the central limit theorem, point and interval estimation and hypotheses testing will be revisited and put on a more rigorous mathematical footing. The focus is on maximum likelihood estimators and their properties. Bayesian and computer intensive resampling techniques (e.g., the bootstrap) will also be considered.
**Fall 2023**

**LEC Section: 01**  MWF 11:00 am - 12:15 pm  Bernhard Klingenberg

**STAT 365 (S) Bayesian Statistics (QFR)**

Prior knowledge being constantly updated by empirical observations -- the essence of Bayesian thinking provides a natural, intuitive, and more importantly, mathematically sounded, probabilistically principled way to characterize the process of learning. With some of its key ideas formulated based on Bayes' Theorem dating back to 18th century, Bayesian inference is one of oldest schools of statistics (more than a century earlier than the Frequentist!). Yet it was not until the recent developments in sampling algorithms and computational powers that Bayesian inference gained its revival. Bayesian, and Bayesian-based methods, with their flexibilities in modeling (generative) process of data, interpretability with posterior probability statements, and coherent principles to incorporate empirical evidence *a priori*, have played key roles in modern data analysis, especially for those "big data" with enhanced complexity and connectivity. This course is designed to provide students a comprehensive understanding to what is Bayesian and the how's and why's. Students will be introduced to classic Bayesian models, basic computational algorithms/methods for Bayesian inference, as well as their applications in various fields, and comparisons with classic Frequentist methods. As Bayesian inference finds its roots and merits particularly in application, this course puts great emphasis on enhancing students' skills in statistical computation (mostly with R) and data analysis.

**Requirements/Evaluation:** weekly homework and exams  
**Prerequisites:** MATH/STAT 341 and STAT 346, or permission of instructor

---

**Spring 2024**

**LEC Section: 01**  TR 11:20 am - 12:35 pm  Shaoyang Ning

**STAT 440 (S) Categorical Data Analysis (QFR)**

This course focuses on methods for analyzing categorical response data. Traditional tools of statistical data analysis for continuous response data are not designed to handle such data and pose inappropriate assumptions. We will develop methods specifically designed to address the discrete nature of the observations and consider many applications in the social and biological sciences as well as in medicine, engineering and economics. The first part of the course will discuss statistical inference for parameters of categorical distributions and arising in contingency tables. The longer second part will focus on statistical modeling via generalized linear models for binary, multinomial, ordinal and count response variables, using maximum likelihood.

**Requirements/Evaluation:** Class participation and performance on exams, homework, and a project.

**Prerequisites:** STAT 346 and STAT 360

**Enrollment Limit:** 15

**Enrollment Preferences:** seniors and statistics majors
### STAT 442 (F) Statistical Learning and Data Mining (QFR)

In both science and industry today, the ability to collect and store data can outpace our ability to analyze it. Traditional techniques in statistics are often unable to cope with the size and complexity of today’s data bases and data warehouses. New methodologies in Statistics have recently been developed, designed to address these inadequacies, emphasizing visualization, exploration and empirical model building at the expense of traditional hypothesis testing. In this course we will examine these new techniques and apply them to a variety of real data sets.

**Class Format:** Students cannot take both STAT 315 and STAT 442. Only one of the two can be taken for credit.

**Requirements/Evaluation:** class participation, weekly homework, exams and an end-of-term project

**Prerequisites:** MATH/STAT 341 and STAT 346, or permission of instructor

**Enrollment Limit:** 20

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This is an advanced statistics class involving theory and application of statistical methods to data.

---

### STS 312 (F) Philosophical Implications of Modern Physics (QFR)

**Cross-listings:** STS 312 PHIL 312 PHYS 312

**Secondary Cross-listing**

Some of the discoveries made by physicists over the last century seem to show that our common sense views are deeply at odds with our most sophisticated and best confirmed scientific theories. The course will present the essential ideas of relativity theory and quantum theory and explore their implications for philosophy. We will ask, for example, what these theories tell us about the nature of space, time, probability and causality.

**Requirements/Evaluation:** attendance, participation, problem sets, exams, six 1- to 2-page papers and a 12- to 15-page term paper

**Prerequisites:** MATH 140, high-school physics, and either a 200-level course in PHIL or a 100-level course in PHYS

**Enrollment Limit:** 20

**Enrollment Preferences:** Philosophy majors and Physics majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

STS 312(D2) PHIL 312(D2) PHYS 312(D3)

**Attributes:** PHIL Contemp Metaphysics + Epistemology Courses
Quantitative and Formal Reasoning

ASTR 111 (F) Introduction to Astrophysics (QFR)

The science of astronomy spans vast scales of space and time, from individual atoms to entire galaxies and from the universe's beginning to the future fate of our Sun. In this course, we will survey some of the main ideas in modern astrophysics, with an emphasis on the physics of stars and galaxies. ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the other sciences or mathematics and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include gravity and orbits, radiation laws and stellar spectra, physical characteristics of the Sun and other stars, star formation and evolution, black holes, galaxies, the expanding universe, and the Big Bang. Students will also use telescopes to observe stars, nebulae, planets, and galaxies and to make daytime observations of the Sun.

Class Format: The class has 6 afternoon labs. Nighttime observing sessions will occur throughout the semester.

Requirements/Evaluation: weekly problem sets, two hour-long tests, a final exam, lab reports, and an observing portfolio

Prerequisites: a year of high school Physics, concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

Enrollment Limit: 28

Enrollment Preferences: potential Astronomy majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course requires regular problem sets and quantitative assignments. The course will emphasize how physical equations explain the observed properties of the universe.

ASTR 211 (S) Astronomical Observing and Data Analysis (QFR)

How do astronomers make scientific measurements for objects that are light-years away from Earth? This course will introduce the basics of telescopes and observations and will give students hands-on training in the techniques astronomers use to obtain, process, and analyze scientific data. We will discuss observation planning, CCD detectors, signal statistics, image processing, and photometric and spectroscopic observations. We will begin by focusing on ground-based optical observations and will move on to non-optical observations, both electromagnetic (e.g., radio waves, X-rays) and non-electromagnetic (e.g., gravitational waves, neutrinos). Throughout the course, students will use computational techniques to work with real astronomical data, taken with our 24" telescope and from data archives.

Class Format: discussion, computer lab work, and observing

Requirements/Evaluation: weekly problem sets, lab work, and observing projects

Prerequisites: MATH 150 or 151; prior experience with Unix and computer programming is helpful, but not required

Enrollment Limit: 14

Enrollment Preferences: Astronomy or Astrophysics majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course requires regular problem sets. Labs require computer programming and statistical and graphical analyses of data.
ASTR 402  (F) Between the Stars: The Interstellar Medium (QFR)
The matter between the stars—the interstellar medium—tells the story of the evolution of galaxies and the stars within them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject as they evolve, and to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars’ nuclear fusion. Interpreting the emission from this interstellar gas is one of astronomers’ most powerful tools to measure the physical conditions, motions, and composition of our own galaxy and others. In this course we will study the interstellar medium in its various forms, from cold, dense, star-forming molecular clouds to X-ray-emitting bubbles formed by supernovae. We will learn about the physical mechanisms that produce the radiation we observe, including radiative ionization and recombination, collisional excitation of “forbidden” lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. Finally, we will discuss the evolution of interstellar material in galaxies across cosmic time. This course is observing-intensive. Throughout the semester, students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium taken using the rooftop telescope.

Class Format: Tutorial meetings will be scheduled with the professor. Students will also complete observing projects using the rooftop telescope.

Requirements/Evaluation: weekly problem sets, 10-page final paper, and observing projects
Prerequisites: ASTR 111 and PHYS 201 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: juniors and seniors
Expected Class Size: 6
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: In this course, students will derive quantitative physical formulas, use these equations to calculate and compare physical properties, and generate and analyze graphical representations of data. They will also make and analyze measurements of astronomical data through observing projects.

ASTR 498  (S) Independent Study: Astronomy or Astrophysics (QFR)
Astronomy/Astrophysics independent study, directed by one of the Astronomy faculty: Pasachoff/Jaskot/Flaherty
Requirements/Evaluation: Regular work with the instructor; submitted presentations and papers as agreed upon
Prerequisites: suitable Astronomy/Astrophysics/Physics/Math-Stats-Geosciences/Chemistry courses
Enrollment Limit: 10
Enrollment Preferences: research topic
Expected Class Size: 5
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: Substantial quantitative and formal reasoning are involved

Spring 2024
IND Section: 01 TBA Protik K. Majumder

BIMO 321  (F) Biochemistry I: Structure and Function of Biological Molecules (QFR)
Cross-listings: BIMO 321 BIOL 321 CHEM 321

Primary Cross-listing

This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Prerequisites: BIOL 101, CHEM 200 and CHEM 201; or either CHEM 155 or 256 and CHEM 251

Enrollment Limit: 16/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 48

Grading: no pass/fail option, no fifth course option

Unit Notes: Cannot be counted towards the Biology major in addition to BIOL 222

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
BIMO 321(D3) BIOL 321(D3) CHEM 321(D3)

Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular problem sets in which quantitative/formal reasoning skills are practiced.

LAB Section: 02 T 1:00 pm - 5:00 pm

BIMO 322 (S) Biochemistry II: Metabolism (QFR)

Cross-listings: BIOL 322 BIMO 322 CHEM 322

Primary Cross-listing

This lecture course provides an in-depth presentation of the complex metabolic reactions that are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

Class Format: Lecture three hours per week and laboratory three hours per week.

Requirements/Evaluation: several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of data

Prerequisites: BIOL 101, plus either: CHEM 156 and CHEM 256, or CHEM 155 and CHEM 156, or CHEM 200 and CHEM 201, or permission of instructor

Enrollment Limit: 48

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators
BIOL 202  (F)  Genetics  (QFR)

Genetics, classically defined as the study of heredity, is today a multidisciplinary field whose principles provide critical insight and tools to most areas of biology and medicine. This course covers the experimental basis for our current understanding of the inheritance, structures, and functions of genes. It introduces approaches used by contemporary geneticists and molecular biologists to explore questions in areas of biology ranging from evolution to medicine. A primary focus of the course is on students developing familiarity with problem solving, the logic and quantitative reasoning required to understand how genetic mechanisms lead to biological patterns. The laboratory part of the course provides an experimental introduction to modern genetic analysis as well as introductions to interpreting genetic reasoning in the primary research literature. Laboratory experiments include investigating chromosome structure using microscopy, mapping a mutation to the genome by integrating multiple streams of evidence, and determining the structure of a DNA plasmid using molecular tools.

Class Format: Lecture: three hours per week, Lab: three hours per week.

Requirements/Evaluation: bi-weekly problem sets; weekly laboratory exercises and laboratory reports; three exams

Prerequisites: BIOL 101 and 102

Enrollment Limit: 120

Enrollment Preferences: students interested in the Biology major

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course develops quantitative skills through solving problems. Students learn to apply basic calculations and logic to predict the outcomes of biological systems, for example, describing the likelihood that an individual will be affected by an inherited disease. Application of quantitative and logical analysis contributes to a large component of the in-class work and the graded material for the class, in the form of problem sets, exams, and data analysis for lab reports.

BIOL 203  (F)  Ecology  (QFR)
Cross-listings: ENVI 203 BIOL 203

Primary Cross-listing

This course combines lectures & discussion with field and indoor laboratory activities to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to engage students in the natural history of the region and build skills in data analysis and scientific writing.

Requirements/Evaluation: pre-class quizzes, lab reports, two mid-term exams, and a final exam
Prerequisites: BIOL 102, or ENVI 102, or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: students planning to pursue Biology and/or ENVI
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Unit Notes: satisfies the distribution requirement for the Biology major

BIOL 305 (F) Evolution (QFR)

This course offers a critical analysis of contemporary concepts in biological evolution. We focus on the relation of evolutionary mechanisms (e.g., selection, drift, and migration) to long term evolutionary patterns (e.g., evolutionary innovations, origin of major groups, and adaptation). Topics include micro-evolutionary models, natural and sexual selection, speciation, the inference of evolutionary history, evolutionary medicine among others.

Requirements/Evaluation: independent research project, problem sets, participation in discussions and exams
Prerequisites: BIOL 102 and one 200 level BIOL course
Enrollment Limit: 24
Enrollment Preferences: Seniors and biology majors
Expected Class Size: 24
Grading: yes pass/fail option, yes fifth course option
Unit Notes: satisfies the distribution requirement for the Biology major
Distributions: (D3) (QFR)

**CHEM 100 (F) Chemistry Matters (QFR)**

Chemistry matters! From fueling the world's economy to preventing the next pandemic to forecasting future climate change, chemistry touches all aspects of daily life. This course provides an introduction to chemical principles and applications for students with little or no high school chemistry background. Through the lens of contemporary issues and applications (e.g. energy, environment, materials, medicine, etc.), students will be introduced to concepts fundamental to studying matter at the molecular level. Particular emphasis will be placed on skills essential for students to understand chemistry in these contexts, including quantitative reasoning and the development of chemical literacy and intuition. Laboratory meetings will be used to reinforce lecture material through experimentation at the bench and active learning exercises.

**Class Format:** lecture, three times per week and laboratory, three hours per week

**Requirements/Evaluation:** problem set assignments, laboratory work and analysis, quizzes/exams and a final assessment

**Prerequisites:** Students are required to take the online Chemistry Placement Survey prior to registering for the course (chemistry.williams.edu/placement).

**Enrollment Limit:** 32; 16/lab

**Enrollment Preferences:** First-year students with little or no high school chemistry experience.

**Expected Class Size:** 32

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** CHEM 100 may be taken concurrently with MATH 102–see under Mathematics; CHEM 100 or its equivalent is a prerequisite to CHEM 101.

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course fulfills the QFR requirement with regular problem sets and in class activities in which quantitative/formal reasoning skills are practiced.

This course broadens and deepens the foundation in chemistry of students who have had one or more years of chemistry at the high school level. Most students begin study of chemistry at Williams with this course. Familiarity with stoichiometry, basic concepts of equilibria, the model of an atom, Lewis structures and VSEPR, and gas laws is expected. Principal topics for this course include modern atomic theory, molecular structure and bonding, states of matter, chemical equilibrium (acid-base and solubility), and an introduction to atomic and molecular spectroscopies. Laboratory periods will largely focus on experiment design, data analysis, literature, scientific writing, ethics, and other skills critical to students' development as scientists. The course is of interest to students who anticipate professional study in chemistry, related sciences, or one of the health professions, as well as to those who want to explore the fundamentals of chemistry as part of their general education. This course may be taken pass/fail; however, students who are considering graduate study in science or in the health professions should elect to take this course for a grade.

**Class Format:** lecture, three times per week and laboratory, four hours per week

**Requirements/Evaluation:** problem sets and/or quizzes, laboratory work, and exams

**Prerequisites:** Students are required to take the online Chemistry Placement Survey prior to registering for the course (chemistry.williams.edu/placement).

**Enrollment Limit:** 45; 16/lab

**Enrollment Preferences:** first-year students

**Expected Class Size:** 45/lecture

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** CHEM 101 or its equivalent is a prerequisite for both CHEM 200 and Chem 201 and is required for the BIMO concentration.

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course fulfills the QFR requirement with regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

**Attributes:** BIMO Required Courses

**Class of 2027 ONLY (Class of 2024, 2025, 2026 see CHEM 256).** This course treats an array of topics in modern chemistry, emphasizing broad concepts that connect and weave through the various subdisciplines of the field—biochemistry, inorganic chemistry, organic chemistry, and physical chemistry. It provides the necessary background in chemical science for students who are planning advanced study or a career in chemistry, biological science, geoscience, environmental science, or a health profession. Topics include coordination complexes, thermodynamics, electrochemistry, and
kinetics. Laboratory sections will give students hands-on experience involving synthesis, characterization, and reactivity studies of coordination and organic complexes; spectroscopic analyses; thermodynamics; electrochemistry; and kinetics. Students will hone their skills in the presentation of results through written reports and worksheets.

Class Format: lecture, three times per week and laboratory, four hours per week

CHEM 322  (S)  Biochemistry II: Metabolism  (QFR)
Cross-listings:  BIOL 322 BIMO 322 CHEM 322
Secondary Cross-listing
This lecture course provides an in-depth presentation of the complex metabolic reactions that are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

Class Format: Lecture three hours per week and laboratory three hours per week.
Requirements/Evaluation:  several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of data
Prerequisites:  BIOL 101, plus either: CHEM 156 and CHEM 256, or CHEM 155 and CHEM 156, or CHEM 200 and CHEM 201, or permission of instructor
Enrollment Limit:  48
Enrollment Preferences:  junior and senior Biology and Chemistry majors and BIMO concentrators
Expected Class Size:  48
Grading:  no pass/fail option,   no fifth course option
Unit Notes:  cannot be counted towards the Biology major in addition to BIOL 222
Distributions:  (D3)  (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
BIOL 322(D3) BIMO 322(D3) CHEM 322(D3)
Quantative/Formal Reasoning Notes:  The laboratory program is quantitative covering data analyses, numerical transformations, graphical displays.

CHEM 368  (S)  Computational Chemistry and Molecular Spectroscopy  (QFR)
This tutorial provides an introduction to the principles of computational quantum mechanics and their application to problems of chemical interest such as chemical bonding, chemical reactivity, and molecular spectroscopy. Emphasis is placed upon modern electronic structure calculations, their fundamentals, practical considerations, interpretation, and applications to current research questions. Under guidance in sessions and through independent work, students will use computational methods to explore assigned weekly research problems. The research results will be presented to and discussed with the tutorial partner at the end of each week.
**Requirements/Evaluation:** tutorial participation, presentations, and submitted papers

**Prerequisites:** CHEM 361 or equivalent background in Physics

**Enrollment Limit:** 10

**Enrollment Preferences:** Chemistry majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course fulfills the QFC requirement with problem sets for assignments in which quantitative/formal reasoning skills are practiced.

**COGS 224 (F) Introduction to Formal Linguistics** (QFR)

**Cross-listings:** PHIL 221 COGS 224

**Primary Cross-listing**

The sentence "Every cookie is chocolate chip and three of them are oatmeal raisin" is a perfectly grammatical sentence of English, but it's self-contradictory. What does it take to realize this fact? One must grasp the meanings of the various parts of the sentence. In particular, one must grasp that "three of them" picks out a subset of the group picked out by "every cookie", and that there's no such thing as a cookie that is both chocolate chip and oatmeal raisin. There two ways to understand "Many students took every class". According to one, there is a single group of students that had their hands extremely full this semester. According to the other, every class was well-populated, potentially by different groups. The reason for this is that there are two underlying structures that the original sentence can realize. This course serves as an introduction to formal methods in the scientific study of language. Our goal will be to characterize phenomena like those above with logical and mathematical precision. The focus will be on model-theoretic semantics, the sub-field of linguistics that studies meanings. Along the way we will discuss principles of syntax, the sub-field that studies sentence structures, and pragmatics, the sub-field that studies inferences of non-literal content. This is a formal course, but no prior logical or mathematical background will be expected. Starting from scratch, students will learn the building blocks of current-day linguistic research. This introduction will be of use to students interested in language from a variety of perspectives, including philosophy, cognitive science, and computer science.

**Requirements/Evaluation:** Weekly problem sets, plus a final project (paper/presentation/other type, to be discussed with instructor)

**Prerequisites:** No prerequisites

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference given to seniors and philosophy/cognitive science majors.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

PHIL 221(D2) COGS 224(D2)

**Quantitative/Formal Reasoning Notes:** This course teaches the fundamentals of the formal analysis of language. Students will learn to provide translation schemes from English to a logical language (typed lambda calculus).

**Attributes:** COGS Interdepartmental Electives COGS Related Courses Linguistics PHIL Contemp Metaphysics + Epistemology Courses

Fall 2023

LEC Section: 01    MR 2:35 pm - 3:50 pm    Christian De Leon

**CSCI 104 (F) Data Science and Computing for All** (QFR)

Many of the world's greatest discoveries and most consequential decisions are enabled or informed by the analysis of data from a myriad of sources.
Indeed, the ability to wrangle, visualize, and draw conclusions from data is now a critical tool in the sciences, business, medicine, politics, other academic disciplines, and society as a whole. This course lays the foundations for quantifying relationships in data by exploring complementary computational, statistical, and visualization concepts. These concepts will be reinforced by lab experiences designed to teach programming and statistics skills while analyzing real-world data sets. This course will also examine the broader context and social issues surrounding data analysis, including privacy and ethics.

**Requirements/Evaluation:** Weekly lab assignments involving programming, a project, and examinations.

**Prerequisites:** None; previous programming experience or statistics is not required.

**Enrollment Limit:** 30;15/lab

**Enrollment Preferences:** Not open to those who have completed or are currently enrolled in a Computer Science course numbered 136 or higher. Preference given to those who have not previously taken a computer science or statistics course.

**Expected Class Size:** 30

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** Additional details about the class are available here: https://www.cs.williams.edu/~cs104. Please see the Computer Science Department website for more information on selecting an introductory computer science class: https://csci.williams.edu/

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This course includes regular and substantial problem sets, labs, and/or projects in which quantitative/formal reasoning skills are practiced and evaluated.

---

**CSCI 134 (F)(S) Introduction to Computer Science (QFR)**

This course introduces students to the science of computation by exploring the representation and manipulation of data and algorithms. We organize and transform information in order to solve problems using algorithms written in a modern object-oriented language. Topics include organization of data using objects and classes, and the description of processes using conditional control, iteration, methods and classes. We also begin the study of abstraction, self-reference, reuse, and performance analysis. While the choice of programming language and application area will vary in different offerings, the skills students develop will transfer equally well to more advanced study in many areas. In particular, this course is designed to provide the programming skills needed for further study in computer science and is expected to satisfy introductory programming requirements in other departments.

**Requirements/Evaluation:** weekly programming projects, weekly written homeworks, and two examinations.

**Prerequisites:** none, except for the standard prerequisites for a (QFR) course; previous programming experience is not required

**Enrollment Limit:** 30;15/lab

**Enrollment Preferences:** if the course is over-enrolled, enrollment will be determined by lottery.

**Expected Class Size:** 30/lec

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** Please see the Computer Science Department website for more information on selecting an introductory computer science class: https://csci.williams.edu/. Students with prior experience with object-oriented programming should discuss appropriate course placement with members of the department.

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This course includes regular and substantial problem sets, labs, and/or projects in which quantitative/formal reasoning skills are practiced and evaluated.

**Attributes:** COGS Interdepartmental Electives

CSCI 136  (F)(S)  Data Structures and Advanced Programming  (QFR)

This course builds on the programming skills acquired in Computer Science 134. It couples work on program design, analysis, and verification with an introduction to the study of data structures. Data structures capture common ways in which to store and manipulate data, and they are important in the construction of sophisticated computer programs. Students are introduced to some of the most important and frequently used data structures: lists, stacks, queues, trees, hash tables, graphs, and files. Students will be expected to write several programs, ranging from very short programs to more elaborate systems. Emphasis will be placed on the development of clear, modular programs that are easy to read, debug, verify, analyze, and modify.

Requirements/Evaluation: programming and written assignments, quizzes, examinations
Prerequisites: CSCI 134 or equivalent; fulfilling the Discrete Mathematics Proficiency requirement is recommended, but not required
Enrollment Limit: 30;15/lab
Enrollment Preferences: if the course is over-enrolled, enrollment will be determined by lottery.
Expected Class Size: 30/sec
Grading: yes pass/fail option, no fifth course option
Unit Notes: Please see the Computer Science Department website for more information on selecting an introductory computer science class: https://csci.williams.edu/
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This course include regular and substantial problem sets, labs, and/or projects in which quantitative/formal reasoning skills are practiced and evaluated.
Attributes: BIGP Courses

Fall 2023

LAB Section: 05  R 1:00 pm - 2:30 pm  James M. Bern
LEC Section: 01  MWF 9:00 am - 9:50 am  James M. Bern
CSCI 237  (F)(S)  Computer Organization  (QFR)
This course studies the basic instruction set architecture and organization of a modern computer. It provides a programmer's view of how computer systems execute programs, store information, and communicate. Over the semester the student learns the fundamentals of translating higher level languages into assembly language, and the interpretation of machine languages by hardware. At the same time, a model of computer hardware organization is developed from the gate level upward.

Requirements/Evaluation: weekly programming assignments and/or problem sets, quizzes, midterm and final exams
Prerequisites: CSCI 136
Enrollment Limit: 24;12/lab
Enrollment Preferences: current or expected Computer Science majors
Expected Class Size: 24
Grading: no pass/fail option, no fifth course option
Distributions: (D3)  (QFR)
Quantative/Formal Reasoning Notes: The course will consist of programming assignments and problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

CSCI 256  (F)(S)  Algorithm Design and Analysis  (QFR)
This course investigates methods for designing efficient and reliable algorithms. By carefully analyzing the structure of a problem within a mathematical framework, it is often possible to dramatically decrease the computational resources needed to find a solution. In addition, analysis provides a method for verifying the correctness of an algorithm and accurately estimating its running time and space requirements. We will study several algorithm design strategies that build on data structures and programming techniques introduced in Computer Science 136. These include greedy, divide-and-conquer, dynamic programming, and network flow algorithms. Additional topics of study include algorithms on graphs and
strategies for handling potentially intractable problems.

Requirements/Evaluation: Problem sets, midterm and final examinations

Prerequisites: CSCI 136 and fulfillment of the Discrete Mathematics Proficiency requirement

Enrollment Limit: 24

Enrollment Preferences: Preference will be given to students who need the class in order to complete the major. Ties will be broken by seniority (seniors first, then juniors, etc.).

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course will have weekly problem sets in which students will formally prove statements about the behavior and performance of algorithms. In short, the course is about applying abstract and mathematical reasoning to the study of algorithms and computation.

LEC Section: 02  MR 2:35 pm - 3:50 pm  Samuel McCauley
LEC Section: 01  MR 1:10 pm - 2:25 pm  Samuel McCauley

CSCI 331  (F)  Introduction to Computer Security  (QFR)
This class explores common vulnerabilities in computer systems, how attackers exploit them, and how systems engineers design defenses to mitigate them. The goal is to be able to recognize potential vulnerabilities in one's own software and to practice defensive design. Hands-on experience writing assembly language and C code to inspect and modify the low-level operation of running programs is emphasized. Finally, regular reading and writing assignments round out the course to help students understand the cultural and historical background of the computer security “arms race.”

Class Format: This course has twice-weekly lecture meetings as well as a weekly lab meeting.

Requirements/Evaluation: weekly reading responses, lab assignments, midterm exam, and final project

Prerequisites: CSCI 237

Enrollment Limit: 24(12/lab)

Enrollment Preferences: upper-level students

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: A fee of $75-$100 will be added to the term bill to cover the purchase of a Raspberry Pi computer and accessories.

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course include regular and substantial problem sets and labs in which quantitative/formal reasoning skills are practiced and evaluated.

Fall 2023
LAB Section: 02  T 1:00 pm - 2:30 pm  Daniel W. Barowy
LEC Section: 01  MR 2:35 pm - 3:50 pm  Daniel W. Barowy
LAB Section: 03  T 2:30 pm - 4:00 pm  Daniel W. Barowy

CSCI 334  (F)(S)  Principles of Programming Languages  (QFR)
This course examines the concepts and structures governing the design and implementation of programming languages. It presents an introduction to the concepts behind compilers and run-time representations of programming languages; features of programming languages supporting abstraction and polymorphism; and the procedural, functional, object-oriented, and concurrent programming paradigms. Programs will be required in languages illustrating each of these paradigms.
CSCI 345  (S)  Robotics and Digital Fabrication  (QFR)
This course is a hands-on exploration of topics in robotics and digital fabrication. We will experience firsthand how ideas and methods from computer science can be applied to make physical objects, including robots and other machines. The emphasis will be on creative, hands-on experimentation. Along the way, students will learn the basics of embedded systems programming (Arduino), breadboarding, soldering, printed circuit board (PCB) design, mechanical computer-aided design (CAD)—both conventional (OnShape) and programmatic (OpenSCAD)—as well digital fabrication (3D-printing, laser cutting). Students will learn both how to build their own prototypes and how to send out designs to have parts machined professionally. Students will work in teams throughout. The course will culminate in a team robotic design competition testing both functionality and creativity.

Requirements/Evaluation: Evaluation based on assignments, projects, and exams.
Prerequisites: CSCI 237
Enrollment Limit: 18; 9/lab
Enrollment Preferences: Current or expected Computer Science majors
Expected Class Size: 18
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: A fee of $150-$200 will be added to the term bill to cover the purchase of consumable electronics, motors, 3D-printing filament, and stock used in the assignments and final project.
Distributions: (D3)  (QFR)
Quantitative/Formal Reasoning Notes: The course will include programming assignments and problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Spring 2024
LAB Section: 02  T 1:00 pm - 2:30 pm   James M. Bern
LEC Section: 01  TR 9:55 am - 11:10 am   James M. Bern
LAB Section: 03  T 2:30 pm - 4:00 pm   James M. Bern
for the study of computability theory--the examination of what problems can be solved and what problems cannot be solved--and the study of complexity theory--the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.

**Class Format:** Students should sign up for lecture and one conference section.

**Requirements/Evaluation:** online multiple choice and short answer questions, weekly problem sets in groups, a research project, and a final examination

**Prerequisites:** CSCI 256 or both a 300-level MATH course and permission of instructor

**Enrollment Limit:** 60; 12/con

**Enrollment Preferences:** current or expected Computer Science majors

**Expected Class Size:** 60

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

CSCI 361(D3) MATH 361(D3)

**Quantitative/Formal Reasoning Notes:** This course include regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

**Attributes:** COGS Interdepartmental Electives

---

**CSCI 374 (F) Machine Learning (QFR)**

Machine learning is a field that derives from artificial intelligence and statistics, and is concerned with the design and analysis of computer algorithms that "learn" automatically through the use of data. Computer algorithms are capable of discerning subtle patterns and structure in the data that would be practically impossible for a human to find. As a result, real-world decisions, such as treatment options and loan approvals, are being increasingly automated based on predictions or factual knowledge derived from such algorithms. This course explores topics in supervised learning (e.g., random forests and neural networks), unsupervised learning (e.g., k-means clustering and expectation maximization), and possibly reinforcement learning (e.g., Q-learning and temporal difference learning.) It will also introduce methods for the evaluation of learning algorithms (with an emphasis on analysis of generalizability and robustness of the algorithms to distribution/environmental shift), as well as topics in computational learning theory and ethics.

**Requirements/Evaluation:** Presentations, problem sets, programming exercises, empirical analyses of algorithms, critical analysis of current literature; the final two weeks are focused on a project of the student's design.

**Prerequisites:** CSCI 136 and CSCI 256 or permission of instructor

**Enrollment Limit:** 24

**Enrollment Preferences:** Current or expected Computer Science majors.

**Expected Class Size:** 24

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course heavily relies on discrete mathematics, calculus, and elementary statistics. Students will be proving theorems, among many other mathematically oriented assignments. Additionally, they will be programming, which involves analytical and logical thinking.

**Attributes:** COGS Interdepartmental Electives
CSCI 379 (S) Causal Inference (QFR)
Does X cause Y? If so, how? And what is the strength of this causal relation? Seeking answers to such causal (as opposed to associational) questions is a fundamental human endeavor; the answers we find can be used to support decision-making in various settings such as healthcare and public policy. But how does one tease apart causation from association—early in our statistical education we are taught that “correlation does not imply causation.” In this course, we will re-examine this phrase and learn how to reason with confidence about the validity of causal conclusions drawn from messy real-world data. We will cover core topics in causal inference including causal graphical models, unsupervised learning of the structure of these models, expression of causal quantities as functions of observed data, and robust/efficient estimation of these quantities using statistical and machine learning methods. Concepts in the course will be contextualized via regular case studies.

Requirements/Evaluation: Problem sets, programming exercises, empirical analyses, case studies, and a final project.

Prerequisites: CSCI 136, and either CSCI 256 or STAT 201/202.

Enrollment Limit: 24

Enrollment Preferences: Computer science majors and prospective majors.

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course heavily relies on discrete mathematics, algorithms, and elementary statistics. There will be regular assignments requiring rigorous quantitative or formal reasoning.

Attributes: COGS Interdepartmental Electives

Spring 2024

LEC Section: 02 MR 2:35 pm - 3:50 pm Rohit Bhattacharya

CSCI 381 (S) Deep Learning (QFR)
This course is an introduction to deep neural networks and how to train them. Beginning with the fundamentals of regression and optimization, the course then surveys a variety of neural network architectures, which may include multilayer feedforward neural networks, convolutional neural networks, recurrent neural networks, and transformer networks. Students will also learn how to use deep learning software such as PyTorch or Tensorflow.

Requirements/Evaluation: Evaluation based on assignments, projects, and exams.

Prerequisites: CSCI 136 and fulfillment of the Discrete Mathematics Proficiency requirement

Enrollment Limit: 24

Enrollment Preferences: Current or expected Computer Science majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course will consist of programming assignments and problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

LEC Section: 02 MWF 12:00 pm - 12:50 pm Mark Hopkins

CSCI 432 (F) Operating Systems (QFR)
This course explores the design and implementation of computer operating systems. Topics include historical aspects of operating systems development, systems programming, process scheduling, synchronization of concurrent processes, virtual machines, memory management and virtual memory, I/O and file systems, system security, os/architecture interaction, and distributed operating systems.

Requirements/Evaluation: several implementation projects that will include significant programming, as well as written homework, and up to two exams

Prerequisites: CSCI 237 and either CSCI 256 or 334

Enrollment Limit: 24

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course will consist of substantial problem sets and/or programming assignments in which quantitative/formal reasoning skills are practiced and evaluated.

Fall 2023
LEC Section: 01 TR 9:55 am - 11:10 am Jeannie R Albrecht

ECON 110 (F)(S) Principles of Microeconomics (QFR)

This course is an introduction to the study of the forces of supply and demand that determine prices and the allocation of resources in markets for goods and services, markets for labor, and markets for natural resources. The focus is on how and why markets work, why they may fail to work, and the policy implications of both their successes and failures. The course focuses on developing the basic tools of microeconomic analysis and then applying those tools to topics of popular or policy interest such as minimum wage legislation, pollution control, competition policy, international trade policy, discrimination, tax policy, and the role of government in a market economy.

Requirements/Evaluation: problem sets, quizzes, short essays, two midterms, final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: This course is required of Economics and Political Economy majors and highly recommended for those non-majors interested in Environmental Studies and Women's, Gender and Sexuality Studies.

Expected Class Size: 40

Grading: yes pass/fail option, no fifth course option

Unit Notes: The department recommends students follow this course with ECON 120 or with a lower-level elective that has ECON 110 as its prerequisite; students may alternatively proceed directly to ECON 251 after taking this introductory course.

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

Attributes: POEC Required Courses

ECON 120  (F)(S)  Principles of Macroeconomics  (QFR)
This course provides an introduction to the study of the aggregate national economy. It develops the basic theories of macroeconomics and applies them to topics of current interest. Issues to be explored include: the causes of inflation, unemployment, recessions, and depressions; the role of government fiscal and monetary policy in stabilizing the economy; the determinants of long-run economic growth; the long- and short-run effects of taxes, budget deficits, and other government policies on the national economy; the role of financial frictions in amplifying recessions; and the workings of exchange rates and international finance.

Requirements/Evaluation:  Depending on instructor, may include: problem sets, short essays, quizzes, reading assignments, either one or two midterms, and a final exam.
Prerequisites:  ECON 110
Enrollment Limit:  40
Enrollment Preferences:  First-year students and sophomores.
Expected Class Size:  40
Grading:  yes pass/fail option,  yes fifth course option

ECON 213  (S)  Introduction to Environmental and Natural Resource Economics  (QFR)
Cross-listings:  ECON 213 ENVI 213
Primary Cross-listing
We'll use economics to examine why we harm the environment and overuse natural resources, and what we can do about it. We'll study cost benefit analysis, pollution in general, climate change, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We'll talk about how economists put a dollar value on nature and ecosystem services (as well as human health and life!), and the concerns involved in doing so. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth. Consideration of justice and equity will be woven throughout the whole semester.

Requirements/Evaluation:  problem sets, short essays, final paper; intermediate assignments may include a poster, one or more short presentation(s), other brief writing assignment(s)
Prerequisites:  ECON 110 or equivalent
Enrollment Limit:  30
Enrollment Preferences:  first-year and sophomore students
Expected Class Size:  30
Grading:  yes pass/fail option,  yes fifth course option
Unit Notes:  this course will count toward both the Environmental Studies major and concentration
Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 232 (F) Financial Markets, Institutions and Policies (QFR)
The focus of the course will be on how firms, financial markets, and central banks interact in the economy. Key questions addressed in the course include: How do firms allocate their resources to enhance their value? How are firms evaluated by the financial markets? How are asset prices determined, and how are these prices related to interest rates? Are financial markets efficient, and what are the implications of their efficiency or lack thereof? How does the financial system help with the management of risks faced by society? We will also study the role of the central bank (the Federal Reserve in the US), monetary policy, and government regulation and their impacts on financial decision making. Key questions include: How do central banks set monetary policy and how do those policies affect the economy and the financial decision-making process? How does monetary policy change when interest rates are (virtually) zero?

Class Format: There will be a mix of lecture and discussion.

Requirements/Evaluation: 5-7 Problem Sets, Quantitative Exercises, Group Paper, and Final Exam

Prerequisites: ECON 110 and ECON 120

Enrollment Limit: 25

Enrollment Preferences: Sophomore and Junior Economics majors

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: We will use mathematical models, graphs, and data analysis to understand financial decisions at the firm and economy-wide levels.

Attributes: POEC Depth

Fall 2023
LEC Section: 01 TR 8:30 am - 9:45 am Neal J. Rappaport

ECON 251 (F)(S) Price and Allocation Theory (QFR)
A study of the determination of relative prices and their importance in shaping the allocation of resources and the distribution of income. Subjects include: behavior of households in a variety of settings, such as buying goods and services, saving, and labor supply; behavior of firms in various kinds of markets; results of competitive and noncompetitive markets in goods, labor, land, and capital; market failure; government policies as sources of and responses to market failure; welfare criteria; limitations of mainstream analysis.

Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets and multiple exams, including a final exam. They may also include one or more quizzes, short essays, collaborative projects, or presentations.

Prerequisites: ECON 110 and MATH 130 or its equivalent

Enrollment Limit: 30

Enrollment Preferences: Current or prospective Economics majors.

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course involves developing and analyzing mathematical models of real-world phenomena, grounded in tools
like calculus and game theory. Students are assumed to be comfortable with topics from introductory calculus, including differentiation and integration.

LEC Section: 01  TF 1:10 pm - 2:25 pm    Greg Phelan

ECON 252  (F)(S)  Macroeconomics  (QFR)
A study of aggregate economic activity: output, employment, inflation, and interest rates. The class will develop a theoretical framework for analyzing economic growth and business cycles. The theory will be used to evaluate policies designed to promote growth and stability, and to understand economic developments in the U.S. and abroad. Instructors may use elementary calculus in assigned readings, exams and lectures.
Requirements/Evaluation:  Requirements vary by professor, but typically include frequent problem sets and/or written assignments, midterm(s), and a final exam.
Prerequisites:  ECON 110 and 120 and MATH 130 or its equivalent
Enrollment Limit:  30
Enrollment Preferences:  Current or prospective Economics majors.
Expected Class Size:  30
Grading:  yes pass/fail option,  no fifth course option
Distributions:  (D2)  (QFR)
Quantative/Formal Reasoning Notes:  Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

Fall 2023

LEC Section: 03  TR 11:20 am - 12:35 pm    Kenneth N. Kuttner
LEC Section: 02  MWF 11:00 am - 12:15 pm    Gregory P. Casey

ECON 255  (F)(S)  Econometrics  (QFR)
An introduction to the theory and practice of applied quantitative economic analysis. This course familiarizes students with the strengths and weaknesses of the basic empirical methods used by economists to evaluate economic theory against economic data. Emphasizes both the statistical foundations of regression techniques and the practical application of those techniques in empirical research, with a focus on understanding when a causal interpretation is warranted. Computer exercises will provide experience in using the empirical methods, but no previous computer experience is expected. Highly recommended for students considering graduate training in economics or public policy.
Requirements/Evaluation:  Requirements vary by professor, but typically include frequent problem sets, multiple exams, a group project, and possible additional assignments or quizzes.
Prerequisites:  MATH 130, plus STAT 161, 201 or 202 (or equivalent, including a score of 5 on the AP Statistics Exam), plus one course in ECON; STAT 101 will also serve as a prerequisite, but only if taken prior to the fall of 2018
Enrollment Limit:  30
Enrollment Preferences:  Current or prospective Economics and Political Economy majors.
Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Unit Notes: Students may substitute the combination of STAT 201 and 346 for ECON 255

Distributions: (D2) (QFR)

Quantitative/ Formal Reasoning Notes: Course teaches research tools necessary to analyze data.

ECON 360 (F) Monetary Economics (QFR)
This course covers a range of theoretical and applied issues bearing on monetary policy as conducted in the U.S. and abroad. Topics to be covered include: the causes of inflation, how central banks manage interest rates, the channels through which monetary policy affects the economy, and the costs and benefits of imposing rules on the conduct of policy. The class will also touch on a number of current issues facing central banks, such as unconventional monetary policy and cryptocurrencies.

Requirements/Evaluation: Two exams, a research paper and/or class presentation

Prerequisites: ECON 252 and 255. Multivariate calculus (MATH 150 or 151) is recommended but not required

Enrollment Limit: 20

Enrollment Preferences: junior and senior Economics majors

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (QFR)

Quantitative/ Formal Reasoning Notes: The course entails the use of mathematical economic models, the presentation of quantitative information, and the interpretation of statistical analysis.

Fall 2023
LEC Section: 01 MWF 11:00 am - 12:15 pm Kenneth N. Kuttner

ECON 367 (S) The Political Economy of Social Insurance (QFR)
The Great Society policies of the 1960s dramatically changed the ways people living in poverty interacted with the federal government, but the benefits associated with these policies seem to have stagnated. Since 1965, the annual poverty rate in the United States has hovered between 10% and 15%, though far more than 15% of Americans experience poverty at some point in their lives. In this course, we will study public policies that, explicitly or implicitly, have as a goal improving the well-being of the poor in the United States. These policies include social insurance programs such as Unemployment Insurance; safety net programs such as Temporary Assistance to Needy Families, Supplemental Nutrition Assistance Program, Medicaid, and housing assistance; education programs such as Head Start and public education; and parts of the tax code, including the Earned Income Tax Credit and Child Tax Credit. We will explore the design and function of these programs, with a particular focus on the context in which they were developed. What political incentives and constraints have strung up our social safety net? How do these factors affect the goals of policy, the trade-offs inherent to the policy's design, and why poverty has not sustained a downward trend in the United States? Through careful consideration, students will learn how to communicate a path forward for public policy which accounts for theoretical economic expectations and the
reality of political constraints in policy design.

**Class Format:** Lecture with substantial class discussion.

**Requirements/Evaluation:** Several short policy memos, participation in class discussion, and a final analytical essay.

**Prerequisites:** ECON 253 or 255

**Enrollment Limit:** 25

**Enrollment Preferences:** Students majoring in economics or political economy.

**Expected Class Size:** 25

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

**Quantitative/ Formal Reasoning Notes:** This course will use quantitative tools of economics. Focus on building data visualization & science communication skills after ECON 255.

**Attributes:** POEC Skills

Spring 2024

LEC Section: 01 TR 11:20 am - 12:35 pm Shyam Raman

**ECON 371 (F) Time Series Econometrics and Empirical Methods for Macro** (QFR)

Econometric methods in many fields including macro and monetary economics, finance and international growth and development, as well as numerous fields beyond economics, have evolved a distinct set of techniques which are designed to meet the practical challenges posed by the typical empirical questions and available time series data of these fields. The course will begin with an introductory review of concepts of estimation and inference for large data samples in the context of the challenges of multivariate endogeneous systems, and will then focus on associated methods for analysis of short dynamics such as vector autoregressive techniques and methods for analysis of long run dynamics such as cointegration techniques. Students will be introduced to concepts and techniques analytically, but also by intuition, learning by doing, and by computer simulation and illustration. The course is particularly well suited for economics majors wishing to explore advanced empirical methods, or for statistics, mathematics or computer science majors wishing to learn more about the ways in which the subject of their majors interacts with the fields of economics. The method of evaluation will include a term paper. ECON 252 and either STATS 346 or ECON 255 are formal prerequisites, although for students with exceptionally strong math/stats backgrounds these can be waived subject to instructor permission. Credit may not be earned for both ECON 371 and ECON 356.

**Requirements/Evaluation:** term paper and regular homework assignments

**Prerequisites:** ECON 252 and either ECON 255 or STATS 346

**Enrollment Limit:** 19

**Enrollment Preferences:** students wishing to write an honors thesis, and students with strong MATH/STAT/CSCI backgrounds

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

**Quantitative/ Formal Reasoning Notes:** Uses quantitative/formal reasoning intensively in the form of mathematical and statistical arguments, as well as computer programming.

Fall 2023

SEM Section: 01 W 7:00 pm - 9:40 pm Peter L. Pedroni

**ECON 384 (S) Corporate Finance** (QFR)

This course analyzes the major financial decisions facing firms. While the course takes the perspective of a manager making decisions about both what investments to undertake and how to finance these projects, it will emphasize the underlying economic models that are relevant for these decisions. Topics include capital budgeting, links between real and financial investments, capital structure choices, dividend policy, and firm valuation. Additional topics may include issues in corporate risk management, corporate governance and corporate restructuring, such as mergers and acquisitions.
Class Format: Lecture / discussion

Requirements/Evaluation: Class participation, short assignments, and exams

Prerequisites: ECON 251, 252, and some familiarity with statistics (e.g., ECON 255)

Enrollment Limit: 28

Enrollment Preferences: Economics majors; seniority

Expected Class Size: 28

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: The course uses quantitative models to evaluate decisions.

Spring 2024
LEC Section: 01   MWF 8:30 am - 9:20 am   Caitlin E. Hegarty

ECON 385  (F) Games and Information  (QFR)

This course is a mathematical introduction to strategic thinking and its applications. Ideas from game theory, including Nash equilibrium and its refinements, commitment and credibility, repeated games, and information asymmetries, incentive contracts, and signaling, will be introduced. Applications will be drawn from economics, history, and politics around the globe, and include topics such as: trust between strangers, corruption and fraud, racial bias, violence and deterrence. And we will explore how to write and recognize game-theory models to help make sense of strategic interactions in the world around us.

Requirements/Evaluation: Two exams, regular problem sets and assignments in which students create game-theoretic models.

Prerequisites: ECON 251 or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: juniors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Unit Notes: students who have taken MATH 335 or CSCI 357 cannot receive credit for this class

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: Mathematical analysis of strategic interaction is emphasized throughout,

ECON 389  (S) Tax Policy in Global Perspective  (QFR)

Cross-listings: ECON 514 ECON 389

Secondary Cross-listing

Government policy is important for economic development. To finance their policies, governments must build the fiscal capacity to implement a tax system. In turn, fiscal capacity—the ability for the government to raise revenue—depends on economic development. This endogeneity between fiscal capacity and economic development creates challenges for tax policy in developing countries. Given these challenges, what types of taxes should countries use to raise revenues? How can governments build the fiscal capacity to generate revenue to finance critical services? This class explores tax policy from a global and comparative perspective. Because most students will be CDE fellows, we will emphasize tax policy issues, examples, and evidence that are pertinent to developing countries. However, many tax policy lessons are universal so we will also learn about tax policies in developed countries, especially issues relevant for transnational transactions. Topics addressed include: how economic principles can be applied to the efficiency and equity consequences of tax policies; how personal income taxes, corporate income taxes, and value-added taxes are designed and administered and how they influence the economy; ideas for fundamental tax reforms; the debate over progressive taxes versus "flat" taxes; how taxes affect incentives to save and invest; how market failures and administrative problems may influence the optimality of tax policy; the implications of global capital flows and corporate tax avoidance for tax policy; tax holidays and other special tax incentives for investment; empirical evidence on the
influence of taxes on foreign direct investment, labor supply, and tax evasion; tax policy towards natural resources such as minerals and oil; case studies of efforts to reform tax administration and reduce tax evasion and corruption; taxes on land and property; taxes on imports and exports; presumptive taxation; and the informal economy and its implications for tax policy.

Requirements/Evaluation: midterm exam, several problem sets, two 10-page essays

Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503); students who have previously taken ECON 351 will not be enrolled

Enrollment Limit: 19

Enrollment Preferences: CDE students, but undergraduates with the prerequisites are welcome

Expected Class Size: 15-19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 475 (S) Advanced Economic Theory (QFR)

This course studies advanced topics in micro and macro economic theory. A major focus is on the mathematical underpinnings of advanced modern economics, with a particular emphasis on proofs. Topics may include existence of Nash equilibria, games of incomplete information, equilibrium refinement and selection, global games, Bayesian persuasion, Mirrless taxation, dynamic programming, existence of general equilibrium, recursive equilibria, stochastic models in continuous time, and others. The focus of this class is primarily on mathematical formalism, rigor, and proofs. These tools are essential components of any graduate program in economics. Students who wish to see pure math theorems applied to other fields may also be interested.

Requirements/Evaluation: May include problem sets, exams, participation, term paper

Prerequisites: MATH 150 or equivalent, ECON 251, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Senior Economics Majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: Mathematical modeling and proofs

ENVI 100 (S) Introduction to Weather and Climate (QFR)
Cross-listings: GEOS 100 ENVI 100
Secondary Cross-listing
How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore how fundamental laws of physics determine why air moves and changes, creating the wind, clouds, precipitation, and extreme events that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop an understanding of earth's climate system, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will use weather and climate models to learn how scientists and meteorologists predict future conditions. Labs include benchtop experiments, data analysis projects, and self-scheduled meteorological observations. This course is in the Oceans and Climate group for the Geosciences major.
Requirements/Evaluation: weekly problem sets, lab assignments, midterm exam, and final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: first year and second year students, Geosciences majors
Expected Class Size: 60
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:

Cross-listings:  ENVI 203 BIOL 203

Secondary Cross-listing

This course combines lectures & discussion with field and indoor laboratory activities to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to engage students in the natural history of the region and build skills in data analysis and scientific writing.

Requirements/Evaluation:  pre-class quizzes, lab reports, two mid-term exams, and a final exam

Prerequisites:  BIOL 102, or ENVI 102, or permission of instructor

Enrollment Limit:  30

Enrollment Preferences:  students planning to pursue Biology and/or ENVI

Expected Class Size:  30

MATH 130  (F)(S)  Calculus I  (QFR)

Calculus permits the computation of velocities and other instantaneous rates of change by a limiting process called differentiation. The same process also solves "max-min" problems: how to maximize profit or minimize pollution. A second limiting process, called integration, permits the computation of areas and accumulations of income or medicines. The Fundamental Theorem of Calculus provides a useful and surprising link between the two processes. Subtopics include trigonometry, exponential growth, and logarithms.

Requirements/Evaluation:  Weekly homework and quizzes, 2 exams during the semester, and one final

Prerequisites:  MATH 102 (or demonstrated proficiency on a diagnostic test); this is an introductory course for students who have not seen calculus before

Enrollment Limit:  50

Expected Class Size:  20

Grading:  yes pass/fail option,  yes fifth course option

Unit Notes:  students who have previously taken a calculus course may not enroll in MATH 130 without the permission of instructor

Distributions:  (D3)  (QFR)

Quantative/Formal Reasoning Notes:  This a calculus course.

Fall 2023
LEC Section: 01  TR 11:20 am - 12:35 pm  Alice C. Bradley
LAB Section: 02  TBA  Alice C. Bradley

LEC Section: 02  MWF 9:00 am - 9:50 am  Bhagya Athukorallage
LEC Section: 01  MWF 8:00 am - 8:50 am  Bhagya Athukorallage

Spring 2024
LEC Section: 01  MWF 9:00 am - 9:50 am  Lori A. Pedersen

MATH 140  (F)(S)  Calculus II  (QFR)

Calculus answers two basic questions: how fast is something changing (the derivative) and how much is there (the integral). This course is about integration, and the miracle that unites the derivative and the integral (the Fundamental Theorem of Calculus.) Understanding calculus requires in part the understanding of methods of integration. This course will also solve equations involving derivatives ("differential equations") for population growth or pollution levels. Exponential and logarithmic functions and trigonometric and inverse functions will also play an important role. This course is the right starting point for students who have seen derivatives, but not necessarily integrals, before.

Requirements/Evaluation:  homework, quizzes, and/or exams

Prerequisites:  MATH 130 or equivalent; students who have received the equivalent of advanced placement of AB 4, BC 3 or higher may not enroll in MATH 140 without the permission of instructor

Enrollment Limit:  50

Expected Class Size:  30

Grading:  yes pass/fail option,  yes fifth course option

Unit Notes:  students who have higher advanced placement must enroll in MATH 150 or above

Distributions:  (D3)  (QFR)

Quantative/Formal Reasoning Notes:  This is a math class
Spring 2024

LEC Section: 01    MWF 10:00 am - 10:50 am    Lori A. Pedersen

MATH 150  (F)(S) Multivariable Calculus  (QFR)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives, multiple integrals. There is also a unit on infinite series, sometimes with applications to differential equations.

Requirements/Evaluation:  Problem sets and exams
Prerequisites:  MATH 140 or equivalent, such as satisfactory performance on an Advanced Placement Examination
Enrollment Limit:  50
Enrollment Preferences:  Preference will be given to prospective math and stats majors, or students who need this as a course to serve as a prerequisite for other courses.
Expected Class Size:  40
Grading:  yes pass/fail option,    yes fifth course option
Unit Notes:  Students with the equivalent of advanced placement of AB 4 or above should enroll in MATH 150, students with a BC 3 or higher should enroll in Math 151 when it is being offered, and Math 150 otherwise.
Distributions:  (D3)  (QFR)
Quantative/Formal Reasoning Notes:  mathematics

Fall 2023
LEC Section: 02    MWF 10:00 am - 10:50 am    Colin C. Adams

Spring 2024
LEC Section: 01    MWF 10:00 am - 10:50 am    Lori A. Pedersen

MATH 151 (F) Multivariable Calculus  (QFR)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives and multiple integrals. The goal of the course is Stokes Theorem, a deep and profound generalization of the Fundamental Theorem of Calculus. The difference between this course and MATH 150 is that MATH 150 covers infinite series instead of the theorems of vector calculus. Students with the equivalent of BC 3 or higher should enroll in MATH 151, as well as students who have taken the equivalent of an integral calculus and who have already been exposed to infinite series. For further clarification as to whether MATH 150 or MATH 151 is appropriate, please consult a member of the math/stat department.

Requirements/Evaluation:  problem sets and exams
Prerequisites:  AP BC 3 or higher or integral calculus with infinite series
Enrollment Limit:  50
Enrollment Preferences:  First-years, sophomores, and juniors
Expected Class Size:  40
Grading:  yes pass/fail option,    yes fifth course option
Unit Notes:  MATH 151 satisfies any MATH 150 prerequisite; credit will not be given for both MATH 150 and MATH 151
Distributions:  (D3)  (QFR)
Quantative/Formal Reasoning Notes:  This course builds quantitative skills

Fall 2023
LEC Section: 02    MWF 10:00 am - 10:50 am    Colin C. Adams
MATH 200  (F)(S)  Discrete Mathematics  (QFR)
In contrast to calculus, which is the study of continuous processes, this course examines the structure and properties of finite sets. Topics to be covered include mathematical logic, elementary number theory, mathematical induction, set theory, functions, relations, elementary combinatorics and probability, and graphs. Emphasis will be given on the methods and styles of mathematical proofs, in order to prepare the students for more advanced math courses.

Requirements/Evaluation:  Fall:  Homework, proof portfolio, group work, presentations, quizzes/exams, reflections. Spring:  The grade will be based on homework and 4 exams.

Prerequisites:  Calculus at the level of an AP course or Williams College Math 130 or 140. Students who have taken a 300-level or 400-level math course should obtain permission of the instructor before enrolling.

Enrollment Limit:  40

Enrollment Preferences:  Preference given to first and second year students intending to major in mathematics or computer science.

Expected Class Size:  40

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D3)  (QFR)

Quantative/Formal Reasoning Notes:  This course involves developing the formal mathematical language of logic and set theory. It also involves using quantitative tools to solve problems relating to combinatorics, probability, and other fields of discrete mathematics.

LEC Section: 01   TR 8:30 am - 9:45 am   Allison Pacelli

MATH 210  (S)  Mathematical Methods for Scientists  (QFR)
Cross-listings:  PHYS 210 MATH 210

Secondary Cross-listing
This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. An optional session in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format:  three hours per week

Requirements/Evaluation:  several exams and weekly problem sets, all of which have a substantial quantitative component

Prerequisites:  MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

Enrollment Limit:  50

Enrollment Preferences:  sophomores and juniors

Expected Class Size:  30

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D3)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
PHYS 210(D3) MATH 210(D3)

Quantative/Formal Reasoning Notes:  This course will have weekly problem sets using advanced calculus methods
Many social, political, economic, biological, and physical phenomena can be described, at least approximately, by linear relations. In the study of systems of linear equations one may ask: When does a solution exist? When is it unique? How does one find it? How can one interpret it geometrically? This course develops the theoretical structure underlying answers to these and other questions and includes the study of matrices, vector spaces, linear independence and bases, linear transformations, determinants and inner products. Course work is balanced between theoretical and computational, with attention to improving mathematical style and sophistication.

**Requirements/Evaluation:** homework and exams

**Prerequisites:** MATH 150/151 or MATH 200

**Enrollment Limit:** 60

**Enrollment Preferences:** Students who have officially declared a major that requires Math 250.

**Expected Class Size:** 40

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** In this course, students will engage in both quantitative and formal reasoning.

**Attributes:** COGS Related Courses

---

**MATH 309 (F)(S) Differential Equations (QFR)**

Ordinary differential equations (ODEs) frequently arise as models of phenomena in the natural and social sciences. This course presents core ideas of ODEs from an applied standpoint. Topics covered early in the course may include numerical solutions, separation of variables, integrating factors, and constant coefficient linear equations. Later, we will focus on nonlinear ODEs, for which it is usually impossible to find analytical solutions. Tools from dynamical systems will be introduced to allow us to obtain information about the behavior of the ODEs without explicitly knowing the solution.

**Requirements/Evaluation:** quizzes/exams, problem sets, participation

**Prerequisites:** MATH 150/151 and MATH 250

**Enrollment Limit:** 40

**Enrollment Preferences:** discretion of the instructor

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** 300-level mathematics course
MATH 314 (F) Cryptography (QFR)
We will discuss some classical ciphers, current asymmetric cryptosystems (DES, AES, Rijndael), public key cryptosystems (RSA, Diffie-Hellman key exchange, ElGamal), and Error Correcting Codes. We will devote a substantial part of the semester covering the necessary mathematical background from number theory and asymptotic analysis. Time permitting, we may also discuss some special topics, such as primality testing (including the polynomial-time AKS algorithm), quantum computers, hash functions, digital signatures, zero-knowledge proofs, information theory, and elliptic curve cryptography.

Requirements/Evaluation: exams, problem sets, quizzes
Prerequisites: MATH 250 or permission of instructor.
Enrollment Limit: 30
Enrollment Preferences: Juniors and seniors.
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: The course will contain mathematical proofs.

Fall 2023
LEC Section: 01 TF 2:35 pm - 3:50 pm Leo Goldmakher

MATH 321 (S) Knot Theory (QFR)
Take a piece of string, tie a knot in it, and glue the ends together. The result is a knotted circle, known as a knot. For the last 100 years, mathematicians have studied knots, asking such questions as, "Given a nasty tangled knot, how do you tell if it can be untangled without cutting it open?" Some of the most interesting advances in knot theory have occurred in the last ten years. This course is an introduction to the theory of knots. Among other topics, we will cover methods of knot tabulation, surfaces applied to knots, polynomials associated to knots, and relationships between knot theory and chemistry and physics. In addition to learning the theory, we will look at open problems in the field.

Requirements/Evaluation: problem sets, midterms, a paper and a final exam
Prerequisites: MATH 250 or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: seniors, junior, sophomores, first year
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This is a quantitative course.

Spring 2024
LEC Section: 01 TR 11:20 am - 12:35 pm Colin C. Adams

MATH 328 (S) Combinatorics (QFR)
Combinatorics is a branch of mathematics that focuses on enumerating, examining, and investigating the existence of discrete mathematical structures with certain properties. This course provides an introduction to the fundamental structures and techniques in combinatorics including enumerative methods, generating functions, partition theory, the principle of inclusion and exclusion, and partially ordered sets.

Class Format: interactive activities and discussion
Requirements/Evaluation: quizzes/exams, homework, activities
Prerequisites: "MATH 250, and MATH 200 or permission of instructor"
Enrollment Limit: 30
**Enrollment Preferences:** discretion of the instructor

**Expected Class Size:** 25

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This is an upper level course in mathematics

---

Spring 2024

LEC Section: 01    TR 8:30 am - 9:45 am    Daniel Condon

**MATH 332 (F) Topics in Applied Linear Algebra** (QFR)

This course focuses on applications of Linear Algebra. We will start with a review of the material covered in Math 250, then move on to more advanced topics and applications. We will cover Singular Value Decomposition (SVD), QR factorization, Cholesky factorization, Least Squares problems, the Taylor approximation, the Regression model, Clustering techniques, as well as Linear Dynamical Systems and some of their applications.

**Requirements/Evaluation:** Homework assignments and exams.

**Prerequisites:** Math 250

**Enrollment Limit:** 30

**Enrollment Preferences:** Mathematics Majors, Seniors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantative/Formal Reasoning Notes:** This is an advanced mathematics course, building upon the core course Math 250 - Linear Algebra.

---

Fall 2023

LEC Section: 01    TR 11:20 am - 12:35 pm    Palak Arora

**MATH 341 (F)(S) Probability** (QFR)

**Cross-listings:** MATH 341 STAT 341

**Primary Cross-listing**

The historical roots of probability lie in the study of games of chance. Modern probability, however, is a mathematical discipline that has wide applications in a myriad of other mathematical and physical sciences. Drawing on classical gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables (both discrete and continuous), distribution and expectation, independence, laws of large numbers, and the well-known Central Limit Theorem. Many interesting and important applications will also be presented, including some from classical Poisson processes, random walks and Markov Chains.

**Requirements/Evaluation:** homework, classwork, and exams

**Prerequisites:** MATH 150 and MATH 250 or permission of the instructor

**Enrollment Limit:** 50

**Enrollment Preferences:** Priority will be given to Mathematics majors and to Statistics Majors.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**

MATH 341(D3) STAT 341(D3)

**Quantative/Formal Reasoning Notes:** This is a 300-level Math/Stat course.

---

Fall 2023
MATH 349  (F)  Operations of Order  (WS) (QFR)
One of the greatest challenges in mathematics is justifying interchanging orders of operations. Most of the time you cannot switch orders. Frequently this is obvious: the square root of a sum is typically not the sum of the square roots; however, there are many important situations where orders can be reversed. The purpose of this class is to highlight some of the difficulties and dangers in such attempts. This will be a writing intensive course, where we work on content for a book that collects counter-examples and theorems in one convenient place while also showcasing the utility of switching orders. We will discuss at great lengths how to do engaging, technical writing, keeping in mind the content and the audience. Students will receive feedback from the professor and probably other professional mathematicians and editors.

Requirements/Evaluation: Mix of homework, exams, and writing, including at least one chapter (consisting of theory, examples, images, homework problem creation and solutions).
Prerequisites: Math 250 or permission of the instructor.
Enrollment Limit: 19
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (WS) (QFR)

Writing Skills Notes: Students will be working closely with me and colleagues, receiving feedback on their writing from numerous sources (myself, editors, experts in the field), and their work will be part of the final, published manuscript. We will have numerous discussions about how to write, taking into account the audience and the content.
Quantative/Formal Reasoning Notes: This is a 300 level math course.

Fall 2023
LEC Section: 01    MWF 10:00 am - 10:50 am    Steven J. Miller

MATH 350  (F)(S)  Real Analysis  (QFR)
Why is the product of two negative numbers positive? Why do we depict the real numbers as a line? Why is this line continuous, and what do we mean when we say that? Perhaps most fundamentally, what is a real number? Real analysis addresses such questions, delving into the structure of real numbers and functions of them. Along the way we'll discuss sequences and limits, series, completeness, compactness, derivatives and integrals, and metric spaces. Results covered will include the Cantor-Schroeder-Bernstein theorem, the monotone convergence theorem, the Bolzano-Weierstrass theorem, the Cauchy criterion, Dirichlet's and Riemann's rearrangement theorem, the Heine-Borel theorem, the intermediate value theorem, and many others. This course is excellent preparation for graduate studies in mathematics, statistics, and economics.

Requirements/Evaluation: Problem sets, oral exams, and possibly a take-home exam and/or an expository essay.
Prerequisites: MATH 250 or permission of instructor.
Enrollment Limit: 40
Expected Class Size: 25
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: It's math.
MATH 351 (S) Applied Real Analysis (QFR)
This course is designed to introduce students to the underpinnings of real analysis, primarily in the context of Fourier series. By the end of the semester people will be comfortable making epsilon and delta type arguments. These types of arguments are one of the main pillars of modern mathematics. In a similar way, Fourier series and their generalizations are one of the pillars of the modern digital world.

Requirements/Evaluation: homework, classwork, and exams
Prerequisites: MATH 150 and MATH 250 or permission of the instructor.
Enrollment Limit: 50
Enrollment Preferences: Seniors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: Math

Spring 2024
LEC Section: 01 TR 9:55 am - 11:10 am Thomas A. Garrity

MATH 355 (F)(S) Abstract Algebra (QFR)
Algebra gives us tools to solve equations. The integers, the rationals, and the real numbers have special properties which make algebra work according to the circumstances. In this course, we generalize algebraic processes and the sets upon which they operate in order to better understand, theoretically, when equations can and cannot be solved. We define and study abstract algebraic structures such as groups, rings, and fields, as well as the concepts of factor group, quotient ring, homomorphism, isomorphism, and various types of field extensions. This course introduces students to abstract rigorous mathematics.

Requirements/Evaluation: Problem sets and exams
Prerequisites: MATH 250 or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: Students who have officially declared a major that requires Math 355.
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: 300-level math course

Fall 2023

LEC Section: 02 TR 9:55 am - 11:10 am Steven J. Miller
LEC Section: 01 TR 8:30 am - 9:45 am Steven J. Miller

MATH 361 (S) Theory of Computation (QFR)
Cross-listings: CSCI 361 MATH 361
Secondary Cross-listing
This course introduces a formal framework for investigating both the computability and complexity of problems. We study several models of computation including finite automata, regular languages, context-free grammars, and Turing machines. These models provide a mathematical basis for the study of computability theory—the examination of what problems can be solved and what problems cannot be solved—and the study of complexity theory—the examination of how efficiently problems can be solved. Topics include the halting problem and the P versus NP problem.
Class Format: Students should sign up for lecture and one conference section.

Requirements/Evaluation: online multiple choice and short answer questions, weekly problem sets in groups, a research project, and a final examination

Prerequisites: CSCI 256 or both a 300-level MATH course and permission of instructor

Enrollment Limit: 60; 12/con

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

CSCI 361(D3) MATH 361(D3)

Quantitative/Formal Reasoning Notes: This course include regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Attributes: COGS Interdepartmental Electives

CON Section: 05 W 2:00 pm - 3:00 pm Aaron M. Williams

MATH 382 (S) Fourier Analysis (QFR)

Fourier analysis is the study of waves and frequencies. More precisely, the goal of Fourier analysis is to decompose a complicated function into a simple combination of pure waves, thereby gleaning insight into the behavior of the function itself. It's difficult to overstated the impact of this branch of mathematics; it is foundational throughout theoretical mathematics (e.g., to study the distribution of prime numbers), applied mathematics (e.g., to solve differential equations), physics (e.g., to study properties of light and sound), computer science (e.g., to compute with large integers and matrices), audio engineering (e.g., to pitch-correcting algorithms), medical science (e.g., throughout radiology), etc. The goal of this course is to cover the basic theory (fourier series, the fourier transform, the fast fourier transform) and explore a number of applications, including Dirichlet's theorem on primes in arithmetic progressions, the isoperimetric inequality, the heat equation, and Heisenberg's uncertainty principle.

Class Format: Every week, each student will either give a lecture (based on provided readings) or explain solutions to selected problems.

Requirements/Evaluation: Evaluation will be based on lectures and presentation of problem solutions.

Prerequisites: MATH 350 or MATH 351 or permission of instructor.

Enrollment Limit: 10

Enrollment Preferences: By lottery.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: It's math!

Spring 2024

TUT Section: T1 TBA Leo Goldmakher

MATH 383 (F) Complex Analysis (QFR)
The calculus of complex-valued functions turns out to have unexpected simplicity and power. As an example of simplicity, every complex-differentiable function is automatically infinitely differentiable. As examples of power, the so-called "residue calculus" permits the computation of "impossible" integrals, and "conformal mapping" reduces physical problems on very general domains to problems on the round disc. The easiest proof of the Fundamental Theorem of Algebra, not to mention the first proof of the Prime Number Theorem, used complex analysis.

Requirements/Evaluation: homework, classwork, and exams
Prerequisites: MATH 350 or MATH 351 or permission of instructor
Enrollment Limit: 40
Enrollment Preferences: 40
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Unit Notes: this course is not a senior seminar, so it does not fulfill the senior seminar requirement for the Math major
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: Advanced mathematics course with weekly or daily problem sets.

Fall 2023
LEC Section: 01 MWF 11:00 am - 11:50 am Steven J. Miller

MATH 394 (S) Galois Theory (QFR)
Some equations--such as x^5-1=0--are easy to solve. Others--such as x^5-x-1=0--are very hard, if not impossible (using finite combinations of standard mathematical operations). Galois discovered a deep connection between field theory and group theory that led to a criterion for checking whether or not a given polynomial can be easily solved. His discovery also led to many other breakthroughs, for example proving the impossibility of squaring the circle or trisecting a typical angle using compass and straightedge. From these not-so-humble beginnings, Galois theory has become a fundamental concept in modern mathematics, from topology to number theory. In this course we will develop the theory and explore its applications to other areas of math.

Requirements/Evaluation: problem sets and oral exams
Prerequisites: MATH 355
Enrollment Limit: 30
Enrollment Preferences: Juniors and seniors
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This is a math class

Spring 2024
LEC Section: 01 MR 2:35 pm - 3:50 pm Leo Goldmakher

MATH 407 (F) Dance of the Primes (QFR)
Prime numbers are the building blocks for all numbers and hence for most of mathematics. Though there are an infinite number of them, how they are spread out among the integers is still quite a mystery. Even more mysterious and surprising is that the current tools for investigating prime numbers involve the study of infinite series. Function theory tells us about the primes. We will be studying one of the most amazing functions known: the Riemann Zeta Function. Finding where this function is equal to zero is the Riemann Hypothesis and is one of the great, if not greatest, open problems in mathematics. Somehow where these zeros occur is linked to the distribution of primes. We will be concerned with why anyone would care about this conjecture. More crassly, why should solving the Riemann Hypothesis be worth one million dollars? (Which is what you will get if you solve it, beyond the eternal fame and glory.)

Requirements/Evaluation: exams and weekly homework assignments
Prerequisites: MATH 350 or MATH 351, and MATH 355
Enrollment Limit: 30
Enrollment Preferences: seniors
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option

Quantitative/Formal Reasoning Notes: It is a math course.

Fall 2023
LEC Section: 01    TR 11:20 am - 12:35 pm     Thomas A. Garrity

MATH 415  (F)  Advanced Matrix Analysis  (QFR)
This course will start with a review of various attributes of matrices (determinants, rank, etc), as well as eigenvalues, eigenvectors, and their properties. Then we will move on to study special matrices and their decompositions, along with similarities, and Jordan canonical forms. In the third segment, we will define norms on vectors and matrices and study their analytic properties. Finally, we will discuss another important class of matrices - positive definite and semidefinite matrices. If time permits, we will also cover positive and negative matrices and their properties.

Requirements/Evaluation: Homework assignments and exams.
Prerequisites: Math 350/351 or permission of instructor
Enrollment Limit: 25
Enrollment Preferences: Mathematics and Statistics Majors, Seniors
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This is an advanced mathematics class that covers complex properties of matrices and some of their applications.

Fall 2023
LEC Section: 01    TR 9:55 am - 11:10 am     Palak  Arora

MATH 419  (F)  Algebraic Number Theory  (QFR)
We all know that integers can be factored into prime numbers and that this factorization is essentially unique. In more general settings, it often still makes sense to factor numbers into "primes," but the factorization is not necessarily unique! This surprising fact was the downfall of Lamé's attempted proof of Fermat's Last Theorem in 1847. Although a valid proof was not discovered until over 150 years later, this error gave rise to a new branch of mathematics: algebraic number theory. In this course, we will study factorization and other number-theoretic notions in more abstract algebraic settings, and we will see a beautiful interplay between groups, rings, and fields.

Requirements/Evaluation: homework assignments and exams
Prerequisites: MATH 355, or permission of instructor
Enrollment Limit: 25
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Fall 2023
LEC Section: 01    TR 9:55 am - 11:10 am     Allison  Pacelli

MATH 434  (S)  Applied Dynamics and Optimal Control  (QFR)
We seek to understand how dynamical systems evolve, how that evolution depends on the various parameters of the system, and how we might manipulate those parameters to optimize an overall outcome. The primary focus of this course will be optimal control using Pontryagin’s maximum principle and Hamilton-Jacobi-Bellman equations. These tools have broad application in ecology, economics, finance, and engineering, and we will draw on basic models from these fields to motivate our study. The course will begin with a solid review of modeling with dynamical systems, and deepening our understanding of differential and difference equations, parameter dependence, and bifurcations.

Requirements/Evaluation: exams, homework assignments, and projects
Prerequisites: MATH 309 or PHYS 210, and MATH 350 or 351, or permission of the instructor
Enrollment Limit: 25
Enrollment Preferences: Preference will be given to senior math majors.
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This is a 400 level math course.

Spring 2024
LEC Section: 01  TR 8:30 am - 9:45 am  Stewart D. Johnson

MATH 445 (S) Topics in Numerical Analysis (QFR)
Numerical analysis is a field of mathematics that focuses on developing algorithms and computational methods to solve problems that cannot be solved exactly. In this senior seminar course on numerical analysis we will cover advanced topics such as numerical solutions of Partial Differential Equations, Random Numbers and Monte Carlo simulation, Fast Fourier Transform and signal processing, as well as applications or the Singular Value Decomposition for matrices. The course will start with a review of basic concepts from calculus, linear algebra, and differential equations. Students who have taken Introduction to Numerical Analysis (Math 345) are welcome to take this course.

Requirements/Evaluation: exams and homework assignments
Prerequisites: Math 309 or Math 345 or permission of instructor
Enrollment Limit: 25
Enrollment Preferences: Mathematics Majors, Seniors
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This is a senior seminar course in mathematics.

Spring 2024
LEC Section: 01  MWF 9:00 am - 9:50 am  Bhagya Athukorallage

MATH 457 (S) Partition Theory (QFR)
We discuss partition theory, a rich area within combinatorics with applications to algebra and mathematical physics.

Requirements/Evaluation: Written homework; Written/Oral Exams
Prerequisites: A course in abstract algebra such as MATH 355, or permission of instructor.
Enrollment Limit: 25
Enrollment Preferences: Priority given to Junior and Seniors, and according to previous experience with subject.
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This is an advanced course in mathematics.
PHIL 203 (F) Logic and Language (QFR)
Logic is the study of reasoning and argument. More particularly, it concerns itself with the differences between good and bad reasoning, between strong and weak arguments. We will examine the virtues and vices of good arguments in both informal and formal systems. The goals of this course are to improve the critical thinking of the students, to introduce them to sentential and predicate logic, to familiarize them with enough formal logic to enable them to read some of the great works of philosophy that use formal logic (such as Wittgenstein's *Tractatus*), and to examine some of the connections between logic and philosophy.

Class Format: discussion

Requirements/Evaluation: a midterm, a final, frequent homework and problem sets

Prerequisites: none

Enrollment Limit: 40/sect

Enrollment Preferences: Philosophy majors, seniors, juniors, sophomores, first-years in that order.

Expected Class Size: 40/sect

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: The main part of the course is learning two formal languages of logic: sentential logic and predicate logic

Attributes: Linguistics PHIL Contemp Metaphysics + Epistemology Courses

PHIL 221 (F) Introduction to Formal Linguistics (QFR)

Cross-listings: PHIL 221 COGS 224

Secondary Cross-listing

The sentence "Every cookie is chocolate chip and three of them are oatmeal raisin" is a perfectly grammatical sentence of English, but it's self-contradictory. What does it take to realize this fact? One must grasp the meanings of the various parts of the sentence. In particular, one must grasp that "three of them" picks out a subset of the group picked out by "every cookie", and that there's no such thing as a cookie that is both chocolate chip and oatmeal raisin. There two ways to understand "Many students took every class". According to one, there is a single group of students that had their hands extremely full this semester. According to the other, every class was well-populated, potentially by different groups. The reason for this is that there are two underlying structures that the original sentence can realize. This course serves as an introduction to formal methods in the scientific study of language. Our goal will be to characterize phenomena like those above with logical and mathematical precision. The focus will be on model-theoretic semantics, the sub-field of linguistics that studies meanings. Along the way we will discuss principles of syntax, the sub-field that studies sentence structures, and pragmatics, the sub-field that studies inferences of non-literal content. This is a formal course, but no prior logical or mathematical background will be expected. Starting from scratch, students will learn the building blocks of current-day linguistic research. This introduction will be of use to students interested in language from a variety of perspectives, including philosophy, cognitive science, and computer science.

Requirements/Evaluation: Weekly problem sets, plus a final project (paper/presentation/other type, to be discussed with instructor)

Prerequisites: No prerequisites

Enrollment Limit: 20

Enrollment Preferences: Preference given to seniors and philosophy/cognitive science majors.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
PHIL 221(D2) COGS 224(D2)

Quantative/Formal Reasoning Notes: This course teaches the fundamentals of the formal analysis of language. Students will learn to provide translation schemes from English to a logical language (typed lambda calculus).

PHYS 109 (S) Sound, Light, and Perception (QFR)

Light and sound allow us to perceive the world around us, from appreciating music and art to learning the details of atomic structure. Because of their importance in human experience, light and sound have long been the subject of scientific inquiry. How are sound and light related? How do physiology and neural processing allow us to hear and see the world around us? What are the origins of color and musical pitch? This course introduces the science and technology of light and sound to students not majoring in physics. We will start with the origins of sound and light as wave phenomena, and go on to topics including color, the optics of vision, the meaning of musical pitch and tone, and the physical basis of hearing. We will also discuss some recent technological applications of light, such as lasers and optical communications. The class will meet for two 75-minute periods each week for a variable mixture of lecture, discussion, and hands-on, interactive experiments.

Class Format: The two weekly class sections will be located in a space suitable for both lecture and hands-on laboratory-style work
Requirements/Evaluation: class participation, problem sets, in-class midterm, oral presentations, and a final exam, all with a quantitative component
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: non-science majors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This class will have frequent problem sets requiring substantial quantitative reasoning
PHYS 131 (F) Introduction to Mechanics (QFR)

We focus first on the Newtonian mechanics of point particles: the relationship between velocity, acceleration, and position; the puzzle of circular motion; forces, Newton's laws, and gravitation; energy and momentum; and the physics of vibrations. Then we turn to the basic properties of waves, such as interference and refraction, as exemplified by sound and light waves. We also study the optics of lenses, mirrors and the human eye. This course is not intended for students who have successfully completed an AP physics course in high school.

Requirements/Evaluation: exams, labs, and weekly problem sets, all of which have a substantial quantitative component

Prerequisites: MATH 130; students who scored 4 or 5 on an AP physics exam, or 6 or 7 on the IB Physics HL exam may not take this course and are encouraged to take PHYS 141 instead

Enrollment Limit: 30

Enrollment Preferences: seniority

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

Unit Notes: PHYS 131 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This class will have weekly problem sets requiring substantial quantitative reasoning

Fall 2023

PHYS 132 (S) Electromagnetism and the Physics of Matter (QFR)

This course is intended as the second half of a one-year survey of physics with some emphasis on applications to medicine. In the first part of the semester we will focus on electromagnetic phenomena. We will introduce the concept of electric and magnetic fields and study in detail the way in which electrical circuits and circuit elements work. The deep connection between electric and magnetic phenomena is highlighted with a discussion of Faraday's Law of Induction. Following our introduction to electromagnetism we will discuss some of the most central topics in twentieth-century physics, including Einstein's theory of special relativity and some aspects of quantum theory. We will end with a treatment of nuclear physics, radioactivity, and uses of radiation.

Class Format: lecture three hours per week, laboratory three hours approximately every other week, and conference section 1 hour approximately every other week

Requirements/Evaluation: weekly problem sets, labs, quizzes and exams

Prerequisites: PHYS 131 or 141 or permission of instructor, and MATH 130 (formerly 103)

Enrollment Limit: 22 per lab

Enrollment Preferences: sophomores

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Significant homework, exams, quizzes requiring mathematical and physical reasoning.

Spring 2024

LAB Section: 03 T 1:00 pm - 4:00 pm Catherine Kealhofer
LEC Section: 01 MWF 11:00 am - 11:50 am Protik K. Majumder
**PHYS 141 (F) Mechanics and Waves** (QFR)
This is the typical first course for a prospective physics major. It covers most of the same topics as PHYS 131, but with a higher level of mathematical sophistication. It is intended for students with solid backgrounds in the sciences, either from high school or college, who are comfortable with basic calculus.

**Class Format:** lecture, three hours per week; laboratory, three hours approximately every other week; conference section, 1.5 hours approximately every other week

**Requirements/Evaluation:** weekly problem sets, labs, two 1-hour exams, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** High school physics (strongly recommended) and MATH 130 or equivalent placement, or permission of the instructor. High school physics at the AP, IB, or equivalent level is neither required nor expected.

**Enrollment Limit:** 24 per lab

**Enrollment Preferences:** first-year students and science majors

**Expected Class Size:** 40

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** PHYS 141 can lead to either PHYS 132 (for students wanting a one-year survey of physics) or PHYS 142 (for students considering a Physics or Astrophysics major)

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course consists of lectures, problem-solving conferences, lab exercises, problem sets and exams, all of which have a substantial quantitative component.

---

**PHYS 142 (S) Foundations of Modern Physics** (QFR)
Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity, which extends physics into the realm of high speeds and high energies, requires we rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our expectation of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system.

This course will survey ideas from each of these three arenas, and can serve either as a terminal course for those seeking to complete a year of physics or as the basis for future advanced study of these topics.

**Class Format:** lecture, three hours weekly; laboratory, 2-3 hours most weeks, alternating between 'hands-on' sessions and problem-solving/discussion sessions

**Requirements/Evaluation:** weekly homework, labs, two hour tests, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 141 and MATH 130, or equivalent; PHYS 131 may substitute for PHYS 141 with the permission of instructor; students may not take both PHYS 142 and PHYS 151

**Enrollment Limit:** 14/L

**Enrollment Preferences:** first-year students

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** Heavily problem-solving focused, involving algebraic manipulations, single-variable calculus, generating and reading graphs, etc.
Phys 151 (F) Seminar in Modern Physics  (QFR)
Newtonian Mechanics, spectacular as it is in describing planetary motion and a wide range of other phenomena, only hints at the richness of behaviors seen in the universe. Special relativity has extended physics into the realm of high speeds and high energies and requires us to rethink our basic notions of space and time. Quantum mechanics successfully describes atoms, molecules, and solids while at the same time calling into question our notions of what can be predicted by a physical theory. Statistical physics reveals new behaviors that emerge when many particles are present in a system. This course covers the same core material as PHYS 142 but in a small seminar format for students with strong prior preparation in physics.

Class Format: lecture/discussions plus one 3-hour lab per week

Requirements/Evaluation: class participation, weekly lab assignments, weekly problem sets, exams

Prerequisites: placement by the department (see "advanced placement" section in the description about the department). Students may take either PHYS 142 or PHYS 151 but not both

Enrollment Limit: 18
Enrollment Preferences: first-years

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this is a small seminar designed for first-year students who have placed out of PHYS 141

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: all assignments in the course have a substantial quantitative component

Fall 2023

Phys 201 (F) Electricity and Magnetism  (QFR)
The classical theory of electricity and magnetism is very rich yet it can be written in a remarkably succinct form using Maxwell's equations. This course is an introduction to electricity and magnetism and their mathematical description, connecting electric and magnetic phenomena via the special theory of relativity. Topics include electrostatics, magnetic fields, electromagnetic induction, DC and AC circuits, and the electromagnetic properties of matter. The laboratory component of the course is an introduction to electronics where students will develop skills in building and debugging electrical circuits.

Class Format: lecture, three hours per week; laboratory, three hours per week

Requirements/Evaluation: problem sets, labs/conference section assignments, two take-home midterms, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 142 OR 151; MATH 150 or 151; with a preference for MATH 151

Enrollment Limit: 10 per lab

Enrollment Preferences: prospective physics majors, then by seniority

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course involves significant problem-solving and mathematical analysis of phenomena using calculus, numerical methods, and other quantitative tools.

Fall 2023
Waves and oscillations characterize many different physical systems, including vibrating strings, springs, water waves, sound waves, electromagnetic waves, and gravitational waves. Quantum mechanics even describes particles with wave functions. Despite these diverse settings, waves exhibit several common characteristics, so that the understanding of a few simple systems can provide insight into a wide array of phenomena. In this course, we begin with the study of oscillations of simple systems with only a few degrees of freedom. We then move on to study transverse and longitudinal waves in continuous media in order to gain a general description of wave behavior. The rest of the course focuses on electromagnetic waves and in particular on optical examples of wave phenomena. In addition to well-known optical effects such as interference and diffraction, we will study a number of modern applications of optics such as short pulse lasers and optical communications. Throughout the course, mathematical methods useful for higher-level physics will be introduced.

**Class Format:** lecture, three hours per week; laboratory, three hours per week

**Requirements/Evaluation:** problem sets, labs, midterm examinations, and a final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 201; co-requisite: PHYS/MATH 210 or MATH 209 or permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** sophomores

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course has substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

---

**PHYS 210 (S) Mathematical Methods for Scientists** (QFR)

**Cross-listings:** PHYS 210 MATH 210

**Primary Cross-listing**

This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. An optional session in Mathematica will be offered for students who are not already familiar with this computational tool.

**Class Format:** three hours per week

**Requirements/Evaluation:** several exams and weekly problem sets, all of which have a substantial quantitative component

**Prerequisites:** MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

**Enrollment Limit:** 50

**Enrollment Preferences:** sophomores and juniors

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
Quantitative/Formal Reasoning Notes: This course will have weekly problem sets using advanced calculus methods.

Spring 2024

LEC Section: 01  TR 9:55 am - 11:10 am  Frederick W. Strauch

**PHYS 301 (F) Quantum Physics (QFR)**

This course serves as a one-semester introduction to the formalism, and phenomenology of quantum mechanics. After a brief discussion of historical origins of the quantum theory, we introduce the Schrodinger wave equation, the concept of matter waves, and wave-packets. With this introduction as background, we will continue our discussion with a variety of one-dimensional problems such as the particle-in-a-box and the harmonic oscillator. We then extend this work to systems in two and three dimensions, including a detailed discussion of the structure of the hydrogen atom. Along the way we will develop connections between mathematical formalism and physical predictions of the theory. Finally, we conclude the course with a discussion of angular momentum and spins, with applications to atomic physics, entanglement, and quantum information.

**Class Format:** lecture, three hours per week; laboratory, three hours per week

**Requirements/Evaluation:** weekly problem sets, laboratory reports / write-ups, a midterm exam, and final exam, all of which have a substantial quantitative component

**Prerequisites:** PHYS 202 and PHYS/MATH 210 or MATH 309

**Enrollment Limit:** 20

**Enrollment Preferences:** physics majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** Phys 301 relies heavily upon mathematics and quantitative reasoning in all elements, including problem sets, examinations, and laboratories.

Fall 2023

LAB Section: 03  T 1:00 pm - 4:00 pm  John H. Lacy

LAB Section: 02  M 1:00 pm - 4:00 pm  John H. Lacy

LEC Section: 01  MWF 9:00 am - 9:50 am  Protik K. Majumder

**PHYS 302 (S) Statistical Mechanics & Thermodynamics (QFR)**

Macroscopic objects are made up of huge numbers of fundamental particles interacting in simple ways--obeying the Schrödinger equation, Newton's and Coulomb's Laws--and these objects can be described by macroscopic properties like temperature, pressure, magnetization, heat capacity, conductivity, etc. In this course we will develop the tools of statistical physics, which will allow us to predict the cooperative phenomena that emerge in large ensembles of interacting particles. We will apply those tools to a wide variety of physical questions, including the behavior of gases, polymers, heat engines, biological and astrophysical systems, magnets, and electrons in solids.

**Class Format:** lecture/discussion three hours per week and weekly laboratory work

**Requirements/Evaluation:** weekly problem sets, midterm exam, final exam, and labs, all of which have a substantial quantitative component

**Prerequisites:** required: PHYS 201, PHYS/MATH 210 or MATH 309; recommended: PHYS 202, PHYS 301

**Enrollment Limit:** 14 per lab

**Enrollment Preferences:** physics majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** weekly problem sets, exams, and labs, all of which have a substantial quantitative component
PHYS 312 (F) Philosophical Implications of Modern Physics (QFR)

Cross-listings: STS 312 PHIL 312 PHYS 312

Primary Cross-listing

Some of the discoveries made by physicists over the last century seem to show that our common sense views are deeply at odds with our most sophisticated and best confirmed scientific theories. The course will present the essential ideas of relativity theory and quantum theory and explore their implications for philosophy. We will ask, for example, what these theories tell us about the nature of space, time, probability and causality.

Requirements/Evaluation: attendance, participation, problem sets, exams, six 1- to 2-page papers and a 12- to 15-page term paper

Prerequisites: MATH 140, high-school physics, and either a 200-level course in PHIL or a 100-level course in PHYS

PHYS 418  (S) Gravity  (QFR)
This course is an introduction Einstein's theory of general relativity. We begin with a review of special relativity, emphasizing geometrical aspects of Minkowski spacetime. Working from the equivalence principle, we then motivate gravity as spacetime curvature, and study in detail the Schwarzschild geometry around a spherically symmetric mass. After this application, we use tensors to develop Einstein's equation, which describes how energy density curves spacetime. With this equation in hand we study the Friedmann-Robertson-Walker geometries for an expanding universe, and finally, we linearize Einstein's equation to develop the theory of gravitational waves.

Requirements/Evaluation: weekly problem sets, a midterm exam, and a final exam, all of which have a substantial quantitative component

Prerequisites: PHYS 301 or PHYS 405 or PHYS 411, or permission of instructor

Enrollment Limit: none

Enrollment Preferences: none

POEC 253  (F) Empirical Methods in Political Economy  (QFR)
This course introduces students to common empirical tools used in policy analysis and implementation. The broad aim is to train students to be discriminating consumers of public policy-relevant research. The emphasis in the course is on intuitive understanding of the central concepts. Through hands-on work with data and critical assessment of existing empirical social scientific research, students will develop the ability to choose and employ the appropriate tool for a particular research problem, and to understand the limitations of the techniques. Topics to be covered include basic principles of probability; random variables and distributions; statistical estimation, inference and hypothesis testing; and modeling using multiple regression, with a particular focus on understanding whether and how relationships between variables can be determined to be causal— an essential requirement for effective policy formation. Throughout the course, the focus will be on public policy applications relevant to the fields of political science, sociology, and public health, as well as to economics.

Requirements/Evaluation: Problem sets, group project, midterm exam, final exam

Prerequisites: MATH 130 or its equivalent; one course in ECON; not open to students who have taken ECON 255

Enrollment Limit: 20

Enrollment Preferences: Political Economy majors, Environmental Policy majors and sophomores
Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: does not satisfy the econometrics requirement for the Economics major; POEC 253 cannot be substituted for ECON 255, or count as an elective towards the Economics major

Distributions: (D2) (QFR)

Quantative/Formal Reasoning Notes: The course teaches econometrics, i.e. statistics as economists use it, with applications in economics, political science, and other fields.

STAT 101  (F)(S)  Elementary Statistics and Data Analysis  (QFR)
It is impossible to be an informed citizen in today's world without an understanding of data. Whether it is opinion polls, unemployment rates, salary differences between men and women, the efficacy of vaccines, etc, we need to be able to interpret and gain information from statistics. This course will introduce the common methods used to analyze and present data with an emphasis on interpretation and informed decision making.

Requirements/Evaluation: weekly homework, quizzes, exams, and a project
Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test)

Enrollment Limit: 50

Enrollment Preferences: juniors and seniors

Expected Class Size: 35

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Students with MATH150 but no statistics should enroll in STAT201. Students with AP Stat 4/5 or STAT 101/161 should enroll in STAT 202.

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: It is a quantitative course.

STAT 161 (F)(S) Introductory Statistics for Social Science (QFR)

This course will cover the basics of modern statistical analysis with a view toward applications in the social sciences. Topics include exploratory data analysis, linear regression, basic statistical inference, and elements of probability theory. The course focuses on the application of statistical tools to solve problems, to make decisions, and the use of statistical thinking to understand the world.

Requirements/Evaluation: Weekly homework, quizzes, two midterms and a final exam (midterms include take-home components), and a data analysis project. Students will need to become familiar with the statistical software STATA.

Prerequisites: MATH 130 (or equivalent); not open to students who have completed STAT 101 or equivalent

Enrollment Limit: 40

Enrollment Preferences: Economics majors, sophomores

Expected Class Size: 40

Grading: yes pass/fail option, no fifth course option

Unit Notes: Students with calculus background should consider STAT 201. Students without any calculus background should consider STAT 101. Students with AP Stat 4 or 5 should consider Stat 202. Please refer to the placement chart on the Math&Stat department website for more information.

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Reasoning with data

---

STAT 201 (F)(S) Statistics and Data Analysis (QFR)

Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science, is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped back, “Data, data, data! I can't make bricks without clay.” In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves
computational programming and incorporates modern statistical techniques.

**Requirements/Evaluation:** weekly homework and projects, midterm exams, and a final exam.

**Prerequisites:** MATH 150 or equivalent; not open to students who have completed STAT 101 or STAT 161 or equivalent

**Enrollment Limit:** 40

**Enrollment Preferences:** Prospective Statistics majors, students for whom the course is a major prerequisite, and seniors

**Expected Class Size:** 40

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** Students with AP Stat 4/5 or STAT 101/161 should enroll in STAT 202. Students with no calc or stats background should enroll in STAT 101. Students with MATH 140 but no statistics should enroll in STAT 161.

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** Students will learn to choose, carry out, interpret, and communicate analyses of data.

**Attributes:** COGS Related Courses PHLH Statistics Courses

**STAT 202 (F)(S) Introduction to Statistical Modeling (QFR)**

Data come from a variety of sources: sometimes from planned experiments or designed surveys, sometimes by less organized means. In this course we'll explore the kinds of models and predictions that we can make from both kinds of data, as well as design aspects of collecting data. We'll focus on model building, especially multiple regression, and talk about its potential to answer questions about the world -- and about its limitations. We'll emphasize applications over theory and analyze real data sets throughout the course.

**Requirements/Evaluation:** Homework problems; quizzes; exams; a final project (on a topic that interests you!). Participation matters! Engagement with your peers is an important part of learning, of being a statistician in the Real World...and of your evaluation in this course. While your assignments will be submitted (and graded) individually, you'll be responsible for giving and receiving peer feedback, contributing to class discussions, and working together with classmates on practice problems.

**Prerequisites:** MATH 140 and STAT 101/161/201/AP Statistics 4/5, or permission of instructor.

**Enrollment Limit:** 40

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** Students with a 4 on the AP Stats exam should contact the department for proper placement. Students with STAT 201 are strongly encouraged to take STAT 346 or other 300-level statistics electives.

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course uses mathematical tools and computing programs to create models, make predictions, assess uncertainty, and describe data. We'll also emphasize choosing appropriate mathematical tools and interpreting their results in a real-world context.

**Attributes:** PHLH Statistics Courses

**STAT 335 (S) Introduction to Biostatistics and Epidemiology (QFR)**
Epidemiology is the study of disease and disability in human populations, while biostatistics focuses on the development and application of statistical methods to address questions that arise in medicine, public health, or biology. This course will begin with epidemiological study designs and core concepts in epidemiology, followed by key statistical methods in public health research. Topics will include multiple regression, analysis of categorical data (two sample methods, sets of 2x2 tables, RxC tables, and logistic regression), survival analysis (Cox proportional hazards model), and if time permits, a brief introduction to regression with correlated data.

Requirements/Evaluation: Evaluation will be primarily based on weekly assignments (regular homework or mini-projects), two midterm exams, and a final exam.

Prerequisites: Stat 201 or Stat 202, or permission of instructor (prior experience should include a working understanding of multiple linear regression, the basics of statistical inference, and R).

Enrollment Limit: 20

Enrollment Preferences: Statistics majors and prospective majors who have not yet taken Stat 346; public health concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Students will learn how to choose, implement, and interpret statistical analyses relevant to public health studies.

Attributes: PHLH Statistics Courses

STAT 341 (F)(S) Probability  (QFR)

Cross-listings: MATH 341 STAT 341

Secondary Cross-listing

The historical roots of probability lie in the study of games of chance. Modern probability, however, is a mathematical discipline that has wide applications in a myriad of other mathematical and physical sciences. Drawing on classical gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables (both discrete and continuous), distribution and expectation, independence, laws of large numbers, and the well-known Central Limit Theorem. Many interesting and important applications will also be presented, including some from classical Poisson processes, random walks and Markov Chains.

Requirements/Evaluation: homework, classwork, and exams

Prerequisites: MATH 150 and MATH 250 or permission of the instructor

Enrollment Limit: 50

Enrollment Preferences: Priority will be given to Mathematics majors and to Statistics Majors.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 341(D3) STAT 341(D3)

Spring 2024
LEC Section: 01  TR 11:20 am - 12:35 pm  Thomas A. Garrity
STAT 346 (F)(S) Regression Theory and Applications (QFR)

This course focuses on the building of empirical models through data in order to predict, explain, and interpret scientific phenomena. Regression modeling is the most widely used method for analyzing and predicting a response data and for understand the relationship with explanatory variables. This course provides both theoretical and practical training in statistical modeling with particular emphasis on simple linear and multiple regression, using R to develop and diagnose models. The course covers the theory of multiple regression and diagnostics from a linear algebra perspective with emphasis on the practical application of the methods to real data sets. The data sets will be taken from a wide variety of disciplines.

Requirements/Evaluation: Weekly homework, theory and data analysis exams, final course project.
Prerequisites: MATH/STAT 341, MATH 250, and at least one of STAT 201 or 202. Or permission of the instructor.
Enrollment Limit: 30
Enrollment Preferences: Statistics Majors
Expected Class Size: 20
Grading: yes pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: This course prepares students in the use of quantitative methods for the modeling, prediction and understanding of scientific phenomena.

Spring 2024
LEC Section: 01 TR 9:55 am - 11:10 am Xizhen Cai

STAT 355 (F) Multivariate Statistical Analysis (QFR)

To better understand complex processes, we study how variables are related to one another, and how they work in combination. In addition, we want to make inferences about more than one variable at a time. Elementary statistical methods might not apply. In this course, we study the tools and the intuition that is necessary to analyze and describe such datasets with more than multiple variables. Topics covered will include data visualization techniques for high dimensional data sets, parametric and non-parametric techniques to estimate joint distributions, techniques for combining variables and making inferences, and several classification and clustering algorithms.

Requirements/Evaluation: Homework, projects, quizzes, and exams.
Prerequisites: MATH 250, and STAT 346 or permission of instructor
Enrollment Limit: 15
Enrollment Preferences: Juniors/seniors
Expected Class Size: 10
Grading: yes pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantative/Formal Reasoning Notes: It is an advanced statistics class with prerequisites that are QFR courses

Fall 2023
LEC Section: 01 TR 9:55 am - 11:10 am Xizhen Cai

STAT 360 (F) Statistical Inference (QFR)

How do we estimate unknown parameters and express the uncertainty we have in our estimate? Is there an estimator that works best? Many topics from introductory statistics such as random variables, the central limit theorem, point and interval estimation and hypotheses testing will be revisited and put on a more rigorous mathematical footing. The focus is on maximum likelihood estimators and their properties. Bayesian and computer intensive resampling techniques (e.g., the bootstrap) will also be considered.

Requirements/Evaluation: Homework, Quizzes, Exams
Prerequisites: MATH 250, STAT 201 or 202, STAT 341
Fall 2023
LEC Section: 01  MWF 11:00 am - 12:15 pm  Bernhard Klingenberg

STAT 365  (S)  Bayesian Statistics  (QFR)
Prior knowledge being constantly updated by empirical observations -- the essence of Bayesian thinking provides a natural, intuitive, and more importantly, mathematically sounded, probabilistically principled way to characterize the process of learning. With some of its key ideas formulated based on Bayes' Theorem dating back to 18th century, Bayesian inference is one of oldest schools of statistics (more than a century earlier than the Frequentist!). Yet it was not until the recent developments in sampling algorithms and computational powers that Bayesian inference gained its revival. Bayesian, and Bayesian-based methods, with their flexibilities in modeling (generative) process of data, interpretability with posterior probability statements, and coherent principles to incorporate empirical evidence a priori, have played key roles in modern data analysis, especially for those "big data" with enhanced complexity and connectivity. This course is designed to provide students a comprehensive understanding to what is Bayesian and the how's and why's. Students will be introduced to classic Bayesian models, basic computational algorithms/methods for Bayesian inference, as well as their applications in various fields, and comparisons with classic Frequentist methods. As Bayesian inference finds its roots and merits particularly in application, this course puts great emphasis on enhancing students' skills in statistical computation (mostly with R) and data analysis.

Requirements/Evaluation:  weekly homework and exams
Prerequisites:  MATH/STAT 341 and STAT 346, or permission of instructor
Enrollment Limit:  20
Enrollment Preferences:  juniors and seniors, Statistics majors, students who have taken STAT 360
Expected Class Size:  15
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D3)  (QFR)
Quantative/Formal Reasoning Notes:  This course utilizes mathematics and computer-based tools for the Bayesian approach for analyzing data and making statistical inferences.

Spring 2024
LEC Section: 01  TR 11:20 am - 12:35 pm  Shaoyang Ning

STAT 440  (S)  Categorical Data Analysis  (QFR)
This course focuses on methods for analyzing categorical response data. Traditional tools of statistical data analysis for continuous response data are not designed to handle such data and pose inappropriate assumptions. We will develop methods specifically designed to address the discrete nature of the observations and consider many applications in the social and biological sciences as well as in medicine, engineering and economics. The first part of the course will discuss statistical inference for parameters of categorical distributions and arising in contingency tables. The longer second part will focus on statistical modeling via generalized linear models for binary, multinomial, ordinal and count response variables, using maximum likelihood.

Requirements/Evaluation:  Class participation and performance on exams, homework, and a project.
Prerequisites:  STAT 346 and STAT 360
Enrollment Limit:  15
Enrollment Preferences:  seniors and statistics majors
Expected Class Size:  12
Grading:  yes pass/fail option,  yes fifth course option
In both science and industry today, the ability to collect and store data can outpace our ability to analyze it. Traditional techniques in statistics are often unable to cope with the size and complexity of today’s data bases and data warehouses. New methodologies in Statistics have recently been developed, designed to address these inadequacies, emphasizing visualization, exploration and empirical model building at the expense of traditional hypothesis testing. In this course we will examine these new techniques and apply them to a variety of real data sets.

Class Format: Students cannot take both STAT 315 and STAT 442. Only one of the two can be taken for credit.

Requirements/Evaluation: class participation, weekly homework, exams and an end-of-term project

Prerequisites: MATH/STAT 341 and STAT 346, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Statistics majors, juniors and seniors. Students cannot take both STAT 315 and STAT 442. Only one of the two can be taken for credit.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)  (QFR)

Quantative/Formal Reasoning Notes: This is an advanced statistics class involving theory and application of statistical methods to data.
MAJOR

The major in Religion is designed to perform two related functions: to expose the student to the methods and issues involved in the study of religion as a phenomenon of psychological, sociological, and cultural/historical dimensions; and to confront students with the beliefs, practices, and values of specific religions through a study of particular religious traditions. It is a program that affords each student an opportunity to fashion their own sequence of study within a prescribed basic pattern constructed to ensure both coherence and variety. Beginning with the class of 2016, the major in Religion will consist of at least nine semester courses as follows:

Required Sequence Courses

REL 200 Theories and Methods in the Study of Religion

One 300-level seminar or tutorial

REL 401 Senior seminar

Elective Courses

Six electives at the 100-, 200-, or 300-level (with a maximum of one 100-level class to count towards major).

In addition, each major will select a specialization route in the major in conversation with and with the approval of the department. The specialization will consist of at least four courses. There are two ways to meet this requirement. A major could fulfill the requirement by concentration in one of the College's coordinate programs or by designating four specialization courses that can be supported by the resources of the Religion department faculty and the College. In other words, these four courses might be from among the six electives and one 300-level seminar or tutorial or might include additional coursework from other programs and departments (whether cross-listed or not).

The major will culminate in a year-long senior project. The first semester will remain a seminar (REL 401) on a topic in the study of religion set by the faculty member in consultation with incoming seniors. The spring semester will consist of participation in a research colloquium (not a course taken for credit). In this colloquium, each senior major will present their individual research projects, begun in the senior seminar, drawing on their specializations and advised by members of the faculty.

For those who wish to go beyond the formally-listed courses into a more intensive study of a particular religious tradition, methodological trend, or
religious phenomenon (e.g., ritual, symbol-formation, mysticism, theology, etc.), there is the opportunity to undertake independent study or, with the approval of the department, to pursue a thesis project.

The value of the major in Religion derives from its fostering of a critical appreciation of the complex role religion plays in every society, even those that consider themselves non-religious. The major makes one sensitive to the role religion plays in shaping the terms of cultural discourse, of social attitudes and behavior, and of moral reflection. But it also discloses the ways in which religion and its social effects represent the experience of individual persons and communities. In doing these things, the major further provides one with interdisciplinary analytical tools and cross-cultural experience and opens up new avenues for dealing with both the history of a society and culture and the relationships between different societies and cultures. What one learns as a Religion major is therefore remarkably applicable to a wide range of other fields of study or professions.

Students declaring Religion as a major will identify an area of specialization and link it to their senior seminar final paper and be expected to present it in a spring colloquium during their senior year.

THE DEGREE WITH HONORS IN RELIGION
The degree with honors in Religion requires the above-mentioned nine courses and the preparation of a thesis of 75+ pages with a grade of B+ or better. A thesis may combine revised work done in other courses with new material prepared while enrolled either in Religion 493-W31 or Religion W31-494. Up to two-thirds of the work in the thesis may be such revised work, but at least one-third must represent new work. The thesis must constitute a coherent whole either by its organizing theme or by a focus on a particular religious tradition. Candidates will also be expected to present the results of their thesis orally in a public presentation. Students who wish to be candidates for honors in Religion will submit proposals and at least one paper that may be included in the thesis to the department in the spring of their junior year. Students must normally have at least a 3.5 GPA in Religion to be considered for the honors program.

The chair will serve as advisor to non-majors.

STUDY ABROAD
The Williams College Religion Department encourages potential majors to study abroad in order to enhance their education and gain international perspectives on religious studies. There are many excellent study abroad opportunities offering students a variety of possible experiences: among them cultural immersion, field work, intensive language learning, independent study, participation in another educational system. Many of our majors study in the Williams College Oxford Program, but our majors also regularly pursue a semester or year-long study in other programs.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description. Sometimes a course title is sufficient, but for many courses we also need to see a description of some sort because the title is unclear.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes. 3 courses: Religion 200, one 300-level Religion seminar or tutorial, and Religion 401 Senior Seminar.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Yes. Make sure that they have or will be able to take REL 200, because it is offered only once a year.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.
REL 102 (F) The Meaning of Life

As Henry David Thoreau put it, "The mass of men lead lives of quiet desperation," attempting to fill the void of their existence with sex, money, ephemeral amusements, and the steady accumulation of unnecessary possessions - basically killing time until the day they die. For some people this might seem to be enough, but this course is for those of us who lie awake at night wondering things like: "Why are we here?" "What does it mean to live a good life?" "How can I be happy?" "What is our duty to others?" "What really matters?" and the biggest question of them all: "What is the Meaning of Life?" This course will trace the diverse responses to these important questions offered by philosophers and religious thinkers in different cultures and time periods. We will read their texts critically and discuss how they can be directly relevant to our lives. Students will also be introduced to abstract theorizing in Religious Studies about how different cultures and traditions have historically come to live meaningfully. Authors and texts to be read may include Aristotle, Hannah Arendt, Marcus Aurelius, the Bhagavad Gita, H. H. Dalai Lama, the Dhammapada, Viktor Frankl, Søren Kierkegaard, Martin Luther King Jr, Shantideva, Peter Singer, Leo Tolstoy, Ibn Tufayl, Max Weber, and Slavoj Zizek.

Requirements/Evaluation: attendance and participation, journal and short writing assignments, midterm and final exams

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: potential religion majors

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Not offered current academic year

REL 105 (F) Introduction to European Art Before 1700

Cross-listings: ARTH 101 REL 105

Secondary Cross-listing

A team-taught introduction to the art and architecture of Europe from the ancient Mediterranean to Baroque Italy. This course celebrates the glory of works of art as physical objects, to be viewed and contemplated, to be sure, but also often to be worshiped, worn, touched (even licked), held, exhibited, bought and sold, passed through or around, and lived in. To help students begin to appreciate how these works of art might have been understood by those who originally made and used them, the course sets its objects of study within a number of revealing historical contexts, from the social and the political to the philosophical and the art historical. To give students time with original works of art, our discussion-centered conferences use the wealth of art resources in Williamstown: the Clark Art Institute, the buildings and sculpture of the Williams College Campus, and the Williams College Museum of Art.

Class Format: This course has 2 components: lectures and conferences. The lectures will be twice or three times weekly, the conferences once per week. Both lectures and conferences will be held in person.

Requirements/Evaluation: Three shorter essays (one of which may be in the form of a take-home final exam), several quizzes, and engaged participation in conference sections

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: Preference will be based on a short questionnaire, which students will be asked to complete if the course is over-enrolled.

Expected Class Size: 60

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 101(D1) REL 105(D1)

Attributes: ARTH pre-1800 Courses

Not offered current academic year

REL 107 (F) Islamophobia: A Global Perspective (DPE)

Cross-listings: PSCI 173 GBST 105 REL 107

Secondary Cross-listing
This course's goal is to show how the racialization of Islam and Muslims has been constitutive to the latter's imagination. It looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. The course goes back to the founding moments of an imagined white-Christian Europe and how the racialization of Muslim bodies was central to this project and how anti-Muslim racism continues to be relevant in our world today. The course will give a global perspective on Islamophobia and how it is structuring and used by political actors in various territories. The course will show how Muslims were constructed as subjects in history, politics, and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. The course is based on the literature of multidisciplinary studies by leading scholars in the field, drawing from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology.

Requirements/Evaluation: Class participation and two papers, in these proportions: 10% attendance; 20% participation; 35% first paper (7 pages); 35% second paper (7 pages). No final exam.

Prerequisites: no

Enrollment Limit: 35

Enrollment Preferences: freshmen and concentrations

Expected Class Size: 30

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 173(D2) GBST 105(D2) REL 107(D2)

Difference, Power, and Equity Notes: The course critically examines difference, power, and equity. Thematically, it looks at the racialization of Islam and the intersection of race, religion, class, and gender in the construction of the 'Muslim problem' from a historical as well as a global contemporary perspective. On one side, the course content explores forms of difference and power. On the other side, the course attempts to help students to engage in alternative forms of action to address these inequalities.

Attributes: GBST Borders, Exiles + Diaspora Studies Electives

Fall 2023

LEC Section: 01  M 7:00 pm - 9:40 pm  Farid Hafez

REL 109  Apocalypse (WS)

An end of days. A utopia to come. A great cosmic reversal of fortune. A revelation of truth that leads to radical transformation. Each of these themes and many more fall under the genre of imagination that we associate with the apocalypse. In order to understand the persistence and prevalence of apocalyptic imaginations, we will move back and forth through time. On the one hand, we will read the Book of Revelation in relationship to a selection of ancient Zoroastrian, Jewish, Greek, Christian, and Muslim texts identified with apocalyptic traditions. On the other hand, we will read these texts in relationship to and alongside select literature and movements of apocalypse in the U.S.A. We will pay particular attention to how apocalyptic imaginations reflect upon and interact with social structures of class, colonization, ethnicity, gender, race, and sexuality.

Requirements/Evaluation: grading will be based on participation, short P/F papers, a graded 3-page essay that will be revised, a 5-page second essay, and a final 7- to 10-page paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores preferred or Religion majors

Expected Class Size: 15
Grading: 

Distributions: (D2) (WS)

Writing Skills Notes: As a WS course, grading will be based on short, weekly P/F papers, a graded 3-page essay that will be revised for credit, a 5-page second essay, and a final 7- to 10-page paper for which a draft will be peer reviewed. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Not offered current academic year

REL 110  (S)  Religion in Everyday Life  (WS)
When studying religions, people generally turn to studying scriptures, the life and teachings of the religion’s founder, and the fundamental doctrines of the religion. What this approach does not allow us to understand, however, is the way that such religious traditions actually manifest themselves in the world. This course introduces students to an alternative approach to studying religion, by exploring the way these religions are lived and experienced by individuals and communities in a variety of contexts. We will see how religion intersects with people’s lived experiences of gender, race, class, sexuality, and broader socio-cultural and political contexts. We will explore this approach to religion through an engagement with ethnography (the qualitative research method in the social-sciences generally described as “participant-observation”). Students will not only learn about the theory and practice of this methodology, but will also conduct their own ethnographic research project over the course of the semester. This will involve: designing a feasible project and research question, selecting local research sites and subjects, taking field-notes and conducting interviews, and finally analyzing data and writing an ethnographic essay.

Class Format: Semester-long community-based field research. Regular in-class peer-review exercises.

Requirements/Evaluation: regular reading responses, semester-long research project with frequent small assignments building up to the final product (class presentation and approximately 10-page paper)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: first-year students and sophomores; students interested in Religious Studies

Expected Class Size: 10-12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will learn a specific mode of qualitative/ethnographic writing through a semester-long field-based project. This involves many scaffolded assignments of field-based research and writing, for which they receive very regular feedback from the instructor, as well as extensive peer-review exercises. There will be a number of readings on writing style and technique, as well as class discussion and workshopping activities. The final essay will itself be developed in multiple steps.

Attributes: EXPE Experiential Education Courses

Not offered current academic year

REL 112  (F)  Sex, Gender, Religion

Cross-listings: REL 112 WGSS 112

Primary Cross-listing

The relationship between sex, gender, and religion is one that is hotly debated in our current political context. Many contemporary issues such as abortion, sexual identity, transgender rights are all informed by religious traditions. While religion is most often critiqued for its misogyny and homophobia, it also opens up unexpected possibilities for gender and sexual diversity. This course will consider both these paradoxes and contradictions in religious traditions and their engagement with gender and sexuality. The course will consider how religious traditions have shaped our current discourses on sexual and gender diversity, how religious tradition understand and interact with modern constructions of sexual and gender identity, and how religious queer communities imagine queer possibilities in conversation with their religious traditions. In exploring these topics, the course will cover global religious traditions both historically and in the contemporary.

Requirements/Evaluation: weekly responses, midterm essay, final project.

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first years
REL 115 (F) Latina Feminist Spiritualities  (DPE) (WS)
Cross-listings: WGSS 115 REL 115 LATS 115
Secondary Cross-listing
Self-proclaimed feminist activists, who hail from a variety of ethnic Latina/o/x/e (Latine) backgrounds, have often appealed to "ancestral" and "spiritual traditions" as integral to their activism and commitments. Some Latine feminists turned to "spiritual" traditions including brujería/witchcraft; curanderismo and Indigenous healing traditions; Santería/Lukumí and other AfroDiasporic traditions; astrology; home altars; various "mystical" traditions such as Kabbalah and Sufism, as well as Christian mystics like Teresa of Avila or Sor Juana Inés de la Cruz. Others have turned to the appropriation of "Eastern" traditions such as yoga, Tibetan Buddhism, and Zen Buddhism. This course engages students in an intensive introduction to some of the varieties of Latina feminist thought and contexts, including how activists, writers, and artists think about women, gender, sexuality, race, class, colonialism, the earth, healing, and a better world. How do these feminists of different Latine backgrounds and contexts imagine a better world? How and why do they appeal to spiritual traditions as a source of wisdom, healing, and lived practice for a better world? In this course, we seek to understand both particular Latine feminist spiritual practices on their own terms, as well as why such writers and activists appeal to "the spiritual" in Latine contexts. We will also consider how they frame notions of "the spiritual" in relationship to notions of "the religious" and "the secular."

Requirements/Evaluation: Grading is based on 5-6 page papers written on alternating weeks and brief 1-2 page response papers shared on alternating weeks as well as participation and two paper revisions.

Prerequisites: None
Enrollment Limit: 10
Enrollment Preferences: Latina/o Studies concentrators, religion majors, first-year students interested in Latina/o Studies and/or religion
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 115(D2) REL 115(D2) LATS 115(D2)
Writing Skills Notes: Grading is based on alternating weeks writing a lead paper and other weeks writing a brief response paper. This course will require students to write regularly and revise two of their lead papers for grades.
Difference, Power, and Equity Notes: This course examines how Latine feminists have responded to a variety of differential power inequities, especially in terms of gender, sexuality, race, ethnicity, language, and class. It also considers the ways they have imagined better and more equitable worlds, and with what consequences they have done so.

REL 121 (S) Getting Spiritual With Rumi: From Sufism to Self-Help
Although he lived about 800 years ago, Rumi is often described as the "best-selling poet in the United States." His poetry and sayings are shared endlessly on the internet and social media, celebrating above all his inspiring words on love and beauty. Rumi's spiritual wisdom is seen as transcending the confines of organized religion, with its divisive dogmas and restrictive rules. What is much less well-known is that Rumi was a devout Muslim mystic, a practitioner of the Islamic spiritual tradition of Sufism. This course will take the poetry and teachings of Rumi as a lens to reflect on
spirituality, both in a practical and introspective way, as well as a matter of historical and cultural analysis. We will read two types of translations of Rumi: those that adapt Rumi's work for a modern Western audience, and those that are more direct translations of Rumi's work in its original Islamic idiom. We will also do some broader readings to contextualize the medieval Sufi background that Rumi functioned within, as well as the contemporary scene of popular spirituality and self-help in the US. Through these comparative readings, we will consider the following: What does spirituality and self-cultivation mean to you personally? How does the experience and significance of spirituality change, from the context of traditional Sufism, to 21st century self-help and popular spirituality? What does this tell us about broader trends and conditions in our society? What do these intersecting traditions have to offer us in our world today?

**Class Format:** This course is part of a joint program between Williams' Center for Learning in Action and the Berkshire County Jail in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates and will be held at the jail. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Transportation will be provided by the college. *Please note the atypical class hours, Th. 4:45-8:30 pm

**Requirements/Evaluation:** Personal journaling; Short response papers; Creative final project

**Prerequisites:** None

**Enrollment Limit:** 9

**Expected Class Size:** 9

**Grading:** yes pass/fail option, yes fifth course option

**REL 126 (F) Religion, Politics, and Society: A Global Perspective** (DPE)

**Cross-listings:** GBST 101 REL 126 PSCI 181

**Secondary Cross-listing**

In spite of predictions that religion would wither away in the face of modernization, even casual observation indicates that it remains a powerful force in contemporary political life. Our goal is to obtain an enhanced understanding and appreciation of the salience of religion in public life. The course will be divided into three parts. The first part focuses on different theoretical approaches to making sense of the relation between religion, politics, and society, discussing especially the concept of the 'secular' in Western thought and decolonial critique thereof. The second part will take a global perspective on the relation between religion and politics. We will discuss cases of Buddhism, Christianity (Catholicism and Protestantism), Confucianism, Hinduism, Islam (Sunni and Shi’ā), and Judaism. The third part focuses on religion in the USA. Here, we will discuss the role of religion in American political culture, the relation of religion to the state, the relevance of religious interests and their political mobilization, religious minorities in the United States, and many other aspects of religion in the US society. Although the study of religion and politics raises a host of deep philosophical questions, the principal aim of the course is to understand how religion affects politics (and vice versa), rather than to explore the normative dimensions of questions raised by the interaction of these two forces.

**Requirements/Evaluation:** Class participation and three papers, in these proportions: 10% attendance; 20% participation; 20% first paper (7 pages); 30% second paper (8-10 pages); and 20% third paper (7 pages). No final exam.

**Prerequisites:** none

**Enrollment Limit:** 35

**Enrollment Preferences:** Global Studies concentrators and intended concentrators; Religion majors and intended majors

**REL 149  (S) The Sacred in South Asia**

**Cross-listings:** REL 149 ANTH 249 ASIA 242

**Secondary Cross-listing**

Is religious identity necessarily singular and unambiguous? The jinn - Islamic spirits born of fire - are sought out for their healing and other powers not only by Muslims in India, but by Hindus, Christians and Sikhs, as well. In parts of Bengal statues of the Hindu goddess Durga are traditionally sculpted by Muslim artisans. Buddhist pilgrimage sites in Sri Lanka contain tombs of Muslim Sufi saints and shrines of Hindu deities. South Asia - where a fifth of humanity lives - provides some of the most striking examples of pluralism and religiously composite culture in our contemporary world. Yet at the same time, strident religious majoritarianism has been a defining feature of the politics of India, Pakistan and Sri Lanka for decades, and haunts Nepal and Bangladesh as well. Are these two modes of religious being - pluralistic and composite on the one hand, singular and majoritarian on the other - reflective of two different conceptions of selfhood? What if we turn from questions of community and identity to questions of unseen power and the sacred? This course is an exploration of lived religion in South Asia. It is simultaneously a study of popular Hinduism, Buddhism and Islam and an introduction to the anthropology of religion. Centered on in-depth studies of popular sites of 'syncretic' ritual practice (shared across religious difference) as well as studies of mass mobilizations that seek to align the religious community with the nation, we approach from multiple angles what the sacred might mean in modernity.

**Requirements/Evaluation:** weekly (1 page) posts on readings, two short (5 page) papers, and one (12-14 page) final research paper.

**Prerequisites:** Interest in the topic!

**Enrollment Limit:** 20

**Enrollment Preferences:** Students in all fields of study are most welcome; if overenrolled, priority will be given to majors in Anthropology, Sociology, Religion and Asian Studies.

Islam and Muslims in the United States are the subject of extensive public scrutiny and media coverage in broader public discourses. It is less common, however, to hear Muslims' own voices speak about their lives, experiences, beliefs, and commitments. This course will take a literary approach to exploring American Muslims' own narratives about themselves, which will serve as an introduction to religion in contemporary U.S. culture. We will address questions such as: How do American Muslims attempt to fashion their identity in the wake of 9/11? What are the pressures and demands of American national belonging and cultural citizenship that Muslims must navigate? How are race, gender, ethnic heritage, and immigration definitive of Muslim experiences and self-understandings? How are Muslims approaching the tensions between communal belonging and individuality? What are the competing claims and contestations about authentic expressions of Islam? We will be engaging such themes through an analysis of popular memoirs, autobiographies, novels, short stories, poetry, films, and comedy.

**Requirements/Evaluation:** regular reading responses, short midterm essays, and final paper

REL 200 (S) What is Religion? Theories and Methods in the Study of Religion

To explore the meaning of religion, this course will introduce the debates around which the discipline of religious studies has been constituted. At stake are questions such as: How does one go about studying religion? Is "religion" a cultural universal? What is religion's relationship to the "European Enlightenment"? to race? to science? to society? to secularism? to colonialism? to ethnicity? to politics? to violence? to sex? to freedom? Has religion changed fundamentally in modernity? And if so, what is its future?

Requirements/Evaluation: class participation, weekly short (max 2 page) writing assignments, a 5-page midterm paper, and a 10-page final paper

Prerequisites: none, although a previous course on religion is recommended

Enrollment Limit: 15

Enrollment Preferences: Religion majors and prospective majors

Expected Class Size: 15

REL 203 (F) Judaism: Before The Law

Cross-listings: JWST 101 REL 203

Primary Cross-listing

This course introduces the academic study of Judaism through a humanistic exploration of "the Law" as a concept in Jewish thought and practice. Coverage will include the Law of Moses in the Hebrew Bible, the rabbinic distinction between "Oral Law" and "Written Law," medieval philosophical justifications for the Law, modern interpretations of the Law as Moral Law, Hasidic challenges to the centrality of the Law, and twentieth-century Jewish fiction that is haunted by a felt absence of the Law. Topics may also include the nature of rabbinic authority, methods of Jewish legal interpretation and innovation, and Jewish law as it pertains specifically to women, gentiles, idolaters, food consumption, and the Land of Israel. Course materials will include classical sources such as the Talmud and Midrash, modern philosophical texts, Franz Kafka's The Trial with his parable "Before The Law," ethnographic accounts of contemporary Jewish observance, and much else. All readings will be in translation.

Requirements/Evaluation: class participation, three short papers, and a final longer paper

Prerequisites: none

REL 204  (S)  What is Islamic Art?  (DPE) (WS)

Cross-listings:  REL 204 ARTH 206

Secondary Cross-listing

Through a deep engagement with primary sources--visual, performative and textual--this tutorial introduces students to global cultures that have participated in the production of Islamic art and culture through the centuries. Through a diverse set of readings, we will discuss how Islamic art is viewed today. How did, for instance, Colonialism and Orientalism from the 18th to the 20th centuries create an entrenched narrative for the study of the field, that continues to hold sway to this day? How have Muslim cultures defined their own artistic production? In particular, how can specific artworks, such as figural painting or palace architecture, be understood as "Islamic"? What are some key scholarly debates around the term "Islamic Art"? The tutorial is specifically designed keeping in mind the period of soul-searching the field is currently going through, even to the point of questioning the very term "Islamic art" and its epistemological parameters. By familiarizing students to an important discipline in art history, the aim of the tutorial is to provide alternate methodologies as well as epistemologies that run parallel to more mainstream or familiar avenues of study.

Requirements/Evaluation:  focused bi-monthly writing assignments, 5-7 pages in length, and bi-monthly peer response papers, 2 pages in length.

Prerequisites:  none

Enrollment Limit:  10

Enrollment Preferences:  Art History majors and seniors, Religion majors

Expected Class Size:  8

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D1)  (DPE) (WS)

REL 205  (S)  Ancient Wisdom Literature

Cross-listings:  COMP 217 JWST 205 REL 205 CLAS 205

Primary Cross-listing

The Biblical books of Proverbs, Ecclesiastes, and Job are often grouped together under the Hebrew category of hokhmah, 'wisdom.' Although these books are very different in content, they can all be interpreted as meditations on ethical and practical philosophy. In this way, they represent the Hebrew Bible's canonical embrace of a widespread Near Eastern literary phenomenon. From the instructional literature of Egypt and Mesopotamia to Greek didactic poetry and fables, ancient Mediterranean cultures offer a wide range of texts that engage the issues of personal behavior, leadership, and justice. Starting with the central wisdom books of the Hebrew Bible and moving through relevant material from the Apocrypha, New Testament, and the Egyptian and Babylonian traditions, this course will examine the literature of wisdom throughout the ancient world with an eye toward understanding its various social, political, and philosophical contexts. We will then consider the Greek wisdom tradition in such texts as Hesiod's Works and Days, Aesop's fables, and fragments from the pre-Socratic philosophers. Finally, we will explore the influence of these ancient sources on later expressions of wisdom in medieval European literature, as well as more recent examples such as Benjamin Franklin's Poor Richard's Almanack. All readings are in translation.

Requirements/Evaluation:  class participation, short written assignments, and two longer papers

Prerequisites:  none

Enrollment Limit:  19

Expected Class Size:  19
REL 206 (S) The Book of Job and Joban Literature

Cross-listings: REL 206 COMP 206 JWST 206

Primary Cross-listing

The Book of Job has often been described as the most philosophical book of the Hebrew Bible. The story of one man's struggle to understand the cause of his suffering and his relationship to God represents the finest flowering of the Near Eastern wisdom literature tradition. Through its exploration of fundamental issues concerning human suffering, fate and divinity, and the nature of philosophical self-examination, Job has served as a touchstone for the entire history of existential literature. At the same time, the sheer poetic force of the story has inspired some of the greatest artistic and literary meditations in the Western tradition. This course will engage in a close reading of the Book of Job in its full cultural, religious, and historical context with special attention to its literary, philosophical, and psychological dimensions. We will then proceed to investigate key modern works in several genres that involve Joban motifs, themes, and text both explicitly and implicitly. These texts will include Franz Kafka's *The Trial*, Archibald MacLeish's *J.B.*, Robert Frost's "Masque of Reason," Carl Jung's *Answer to Job*, and William Blake's *Illustrations to the Book of Job*. All readings are in translation.

Class Format: For the spring of 2021, this course will be taught online. The seminar will meet at the regularly scheduled time twice a week.

Requirements/Evaluation: Evaluation will be based on class participation, weekly short written assignments, and two longer papers.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: If the course is overenrolled, preference will be given to students who have already taken a course in biblical literature.

REL 207 (F) From Adam to Noah: Literary Imagination and the Primeval History in Genesis

Cross-listings: CLASS 207 REL 207 JWST 207 COMP 250

Primary Cross-listing

How long did Adam and Eve live in the Garden of Eden? What was the mark of Cain? Why did Enoch not die? Who was Noah's wife? How did Giants survive the Flood? These are only a few of the fascinating questions that ancient readers and interpreters of the Book of Genesis asked and attempted to answer. The first ten chapters of Genesis present a tantalizingly brief narrative account of the earliest history of humankind. The text moves swiftly from the Creation to the Flood and its immediate aftermath, but this masterful economy of style leaves many details unexplained. This course will explore the rich and varied literary traditions associated with the primeval history in the Genesis. Through a close reading of ancient noncanonical sources such as the Book of Enoch, Jubilees, and the Life of Adam and Eve, as well as Jewish traditions represented in Josephus, Philo, and Rabbinic literature and other accounts presented in early Christian and Gnostic texts, we will investigate the ways in which the elliptical style of Genesis generated a massive body of ancient folklore, creative exegesis, and explicit literary re-imagining of the early history of humankind. We will then turn to some continuations of these variant traditions in medieval literature, with particular attention to the material on the figures of Cain and Noah. All readings are in translation.

Class Format: For the fall of 2020, this course will taught online. The seminar will meet at the regularly scheduled time twice a week.

Requirements/Evaluation: Class participation and several writing assignments.
Prerequisites: None.

REL 209 (S) Jewish America

Cross-listings: JWST 209 REL 209

Primary Cross-listing

Who and what counts as "Jewish" in America? Does stand-up comedy have a distinctly Jewish pedigree? What about neoconservatism? How is it possible to answer such questions without falling into what David Hollinger has called the "booster-bigot trap"? How is it possible, that is, to avoid answers that uncritically celebrate "Jewish contributions" or perniciously suggest "Jewish influence"? This course will explore the various meanings of Jewishness in American culture as expressed by artists, rabbis, activists, intellectuals, boosters, bigots and others. We will seek to avoid the booster-bigot trap by focusing vigilantly on what is at stake wherever Jewishness is invoked, defined or ascribed. We will draw methodological support from scholars like Hollinger, Jonathan Freedman, Laura Levitt, Yuri Slezkine, Shaul Magid, Andrea Most and others. Particular attention will be given to the appearance of Jewish themes and involvement in popular culture and political action, as well as to Jewish American communal institutions, the everyday lives of Jewish Americans, and Jewish variations on American religion. Coursework will involve some historical, sociological and ethnographic readings, but will focus primarily on close analysis of films, literary fiction, stand-up comedy, political magazines, theological texts, and television shows. We may, for instance, watch films like *The Jazz Singer* (1927 and 1980), *Exodus* and *Annie Hall*; read John Updike's *Bech: A Book*, Philip Roth's *Operation Shylock* or Cynthia Ozick's *The Puttermesser Papers*; listen to the comedy of Mort Sahl, Lenny Bruce and Sarah Silverman; read from Henry Ford's *Dearborn Independent*, the *Menorah Journal* or *Commentary*; study works by Rabbis Stephen Wise, Abraham Joshua Heschel and Meir Kahane; and watch episodes of *Bridget Loves Bernie*, *Northern Exposure* and *Curb Your Enthusiasm*. We will also study arguments about the role and meaning of Jewishness in American secularization, "therapeutic culture," the civil rights movement, the sexual revolution, and feminism.

Requirements/Evaluation: class participation, two short papers, a midterm take-home exam, and a final paper interpreting an example of Jewishness in America chosen by the student

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Religion majors, Jewish Studies concentrators, and students who are interested in either of these options.

REL 210 (F) Distant Encounters: East Meets West in the Art of the European Middle Ages (WS)

Cross-listings: ARTH 212 REL 210 ARAB 212

Secondary Cross-listing

In this tutorial, students will investigate the rich artistic consequences -- in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts -- of European contact with the Eastern Mediterranean between approximately 300 and 1450 CE. From the beginnings of Christianity, pilgrims from Europe made the long journey to sacred sites in what they called the Holy Land (extending across parts of
present-day Egypt, Israel, Syria, and Turkey), the place of Christ's life, death, and believed resurrection. Large numbers of pilgrims even made the
long journey to the Holy Land, and especially to Jerusalem, to visit a range of sacred sites related to Christ and his saints. When these sites became
less accessible with the spread of Islam in the seventh century -- and even before this time -- Europeans sought to recreate many of them at home.
Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series ofive major and several lesser "crusades." Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of
the Eastern Mediterranean also came through trade and through the travel and settlement of non-Europeans in Europe itself, particularly in Spain,
Sicily, and Venice. Through all of these centuries, moreover, the Christian, Greek-speaking empire of Byzantium, focused on its great capital of
Constantinople (present-day Istanbul), interacted in myriad ways, both friendly and hostile, with the Latin-speaking polities of Western Europe, focused
at least symbolically on their ancient capital of Rome. Together, by way of open discussion, we will explore artistic production within each of these
different cross-cultural contexts of East-West encounter. In the process, we will reflect on how art could function as a conduit for the exchange of ideas
in the Middle Ages, and how it could be used both to negotiate and to intensify cultural difference.

Requirements/Evaluation:

REL 213 (F) Patrons, Rituals, and Living Images in Japanese Buddhism

Cross-listings: ASIA 205 REL 213 ARTH 205

Secondary Cross-listing

This course introduces students to Buddhist art and architecture in Japan from its introduction in the sixth century through the present. We focus on
the ways different communities--the imperial court, immigrant artists, monks, women, and commoners--employed and venerated Buddhist images for political legitimacy, personal salvation, and worldly benefit. This course also examines how Japanese Buddhist imagery became aestheticized in the early twentieth century and appropriated later in modern and contemporary visual cultures. Some of the topics to be discussed include the reception of Continental styles of Buddhist sculpture, the relationship between mandalas and rituals, the role of women in developing Buddhist embroideries, and the Western reappraisal of Zen arts. Students will develop familiarity with the concepts and ideas underlying the production of Buddhist images and will gain foundational skills in analyzing the visual, material, and iconographic qualities of Japanese Buddhist art. For the final project, students will design a digital exhibition focused around one of the topics of the course.

Requirements/Evaluation: attendance, class participation, 4 reading and object response papers (2-3 pages), midterm, non-cumulative final exam, and digital exhibition project with an 8-10 minute presentation

Prerequisites: none

In this course, students will explore the history of religion and American politics, from the colonial era to the present. In the process, they will tackle such questions as: Were Anglo-American colonies 'cities on a hill' or bastions of intolerance? Was the First Amendment designed to protect the state from religion, or religion from the state? Has American religion primarily served to justify the status quo or inspire revolutionary change? How have religious ethics shaped responses to racial, gender, and class inequality? How has religious conflict impacted civic unity and political polarization? What role should religion play in American political life? The course will cover such topics as: Anglo-colonial treatment of heretics and blasphemers; the meaning of the First Amendment; religious conflict over slavery; state regulation of sexuality and polygamy; state treatment of religious minorities; the Scopes Trial and scientific modernity; Christian responses to industrial capitalism; theologies of civil disobedience and nonviolence; and 20th-century religious battles over school prayer, civil rights, the military draft, abortion, and democracy itself.

Requirements/Evaluation: Class participation; five informal response papers (350-450 words); two unit papers (4-6 pages); final paper (8-10 pages).

Prerequisites: None; open to all students.

Enrollment Limit: 20

Enrollment Preferences: Religion and History majors, in order of descending seniority.

REL 218 (F) Foundations of China

Cross-listings: HIST 214 GBST 212 REL 218 CHIN 214 ASIA 211 ANTH 212

Secondary Cross-listing

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

Requirements/Evaluation: short writing assignments (approximately 750-1000 words each), quizzes, a mid-term, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: Chinese majors, History majors, Religion majors, and Anthropology majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

REL 219  (F)  Realizing Utopias

Cross-listings:  REL 219 STS 219

Primary Cross-listing

**Our world can be better.** We are faced with unfolding global catastrophes, such as the pandemic, anthropogenic climate change, economic crises, racialized injustice, and political polarization, and many people seem to have lost their capacity to imagine better futures. Perhaps that is why we as a society have no problem picturing the end of the world—fictional dystopias and apocalypses are abundant while (e)utopias are scarce. This a problem because, as numerous political theorists have observed, it is hard to organize meaningful change around cynicism and nihilism. But our dystopian present makes it even more important to imagine and even realize utopias. This course will help us do so. Our core collective goal will be to explore pragmatic realizations of radical hope. Complementing urgent efforts to resist or mitigate intense injustice in the present, we will aspire to articulate bold visions for emancipatory communities of the future. Rather than primarily focusing on the limitations of existing institutions, we will treat these as problems to be solved rather than as reasons to accept the status quo, and we will embrace affirmative projects of designing the frameworks for better worlds. But we also don't want to blind ourselves to the challenges of being visionary. In brief, we will engage in serious explorations of the underlying principles and rationales for various emancipatory political communities while also pragmatically assessing their potential difficulties. We will spend the first part of the course reading political theory (on issues such as resource allocation, collective decision making, and social justice) alongside various artistic and political manifestos. We will spend one week reading utopian novels (including as possibilities socialist, anarchist, techno-futurist, ecotopias, Afrofuturist, queer utopias, and many more). But the majority of the course will be project-based. Students will form small teams to engage in radical thought experiments and then construct and refine their ideas of better possible societies/political communities. These teams will produce 1) policy papers to address how their utopian societies would deal with real world issues, and 2) artifacts (such as art, manifestos, pamphlets, short stories, videos, or the like) that might appear in the futures they envision, exploring both their ideals and their limits. The semester will culminate in a public exhibition of these works. Thinkers to be considered may include: Marx & Engels, José Esteban Muñoz, Boaventura de Sousa Santos, Lucy Sarginson, David Schweickart, Colin Ward, Erik Olin Wright, and others.

Requirements/Evaluation:  attendance and participation, short writing assignments, group policy papers, and artifacts (e.g., art, manifestos, pamphlets, short stories, or videos) for end of semester exhibit.

Prerequisites:  none.

Enrollment Limit:  20

Enrollment Preferences:  If overenrolled students will be asked for a statement of interest and utopian project idea.

Expected Class Size:  15

Grading:  yes pass/fail option,  yes fifth course option

REL 222 (F) The Jewish Art of Interpretation

Cross-listings: REL 222 JWST 222

Primary Cross-listing

Turn it and turn it, for everything is in it. This famous rabbinic dictum offers an enigmatic yet comprehensive account of the principles that have defined the Jewish practice of interpretation for over two millennia. The imperative to keep a text, word, image, or concept in constant motion, in order to generate as many meanings and cross-meanings as possible, challenges us to transform the act of interpretation itself into a virtuosic craft or art that can engage the human imagination as diversely and powerfully as the creation of the works being interpreted. At the same time, emphasis on the dynamism between text and interpreter should dispel the notion that only expansive works have expansive meanings. If interpretation itself is an art, then even the shortest text can contain "everything" within it when it participates in that art. This course will engage students in a radical experiment in the art of interpretation. Through a deep encounter with a selection of miniature texts, ranging from ancient rabbinic proverbs and medieval fables to the modern parables and fragments of Franz Kafka, as well as folklore and jokelore from every period in Jewish history up to the present, we will develop an interpretive practice that combines analytic, critical, and creative principles in both written and oral contexts. The goal throughout is to explore interactively how the making of meaning is an integral part of the human experience.

Requirements/Evaluation: class participation, regular short written and oral assignments, and a final project

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: If the class is overenrolled, preference will be given to Jewish Studies concentrators and Religion majors.

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

REL 224 (S) U.S. Latinx Religions

Cross-listings: REL 224 LATS 224 AMST 224

Secondary Cross-listing

In this course, we will engage aspects of Latinx religious experiences, practices, and expressions in the United States of America. Given the plurality of Latinx communities and religious lives in the U.S.A., we can only consider select contexts that help us understand the challenges of studying and defining the "religious" and "hybridity" in Latinx contexts. We will survey certain selected religious traditions and practices—such as popular Catholic devotions to Guadalupe, crypto-Judaism, curanderismo, Latinx Pentecostalism, Latinx Muslims, and Santeria, as well as Latinx approaches to traditional US religious expressions of Roman Catholicism and Protestantism. We will do so by focusing on particular moments of religious expression as elucidated in specific historiographies, ethnographies, art, literature, and film.

Class Format: discussion

Requirements/Evaluation: class participation, discussion forum posts, a 3-4 short essay on the nature of Latinx spirituality; a 5-page essay on a religious tradition previously unfamiliar to the student, and an 8-10-page final research paper doing comparative religious study.

Prerequisites: none

REL 232  (S) Islam in Africa  (DPE)
Cross-listings: GBST 232 REL 232 AFR 232 ARAB 232 HIST 202

Primary Cross-listing
Islam in Africa is often relegated to the peripheries in the study of Islam, a religion most associated with Arabs and the Middle East. On the flip side, Islam is also portrayed as foreign to African belief systems and institutions. The relationship between Islam and Africa, however, begins with the very advent of Islam when early Arab Muslim communities took refuge in the Abyssinian empire in East Africa. This course explores the history of Islam and Muslim societies on the African continent by focusing on the localized practices of Islam while also connecting it to Islam as a global phenomenon. The course will begin with a historical focus on the spread of Islam in Africa from East Africa and North Africa in the seventh century all the way to the spread of Islam through Sufi brotherhoods in the eighteenth and nineteenth centuries. The course will also take an anthropological approach, exploring the diverse practices of Islam in African Muslim communities and the social and cultural impact of Islam on African societies. Among the topics the course will cover include African Muslim intellectual traditions, local healing practices, religious festivals, early modern African Muslim abolitionist movements, and the historical interactions between African and Asian Muslim communities in the Indian ocean world.

Requirements/Evaluation: Two essays during the semester and final project.
Prerequisites: None
Enrollment Limit: 25
Enrollment Preferences: REL, HIST, ARAB, AFR, GBST majors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 235  (S) The Garden in the Ancient World
Cross-listings: REL 235 CLAS 235 COMP 235 ENVI 232

Secondary Cross-listing
Drawing on the literature, art, and archaeology of ancient gardens and on real gardens of the present day, this course examines the very nature and experience of the garden and the art of gardening. Using a multi-disciplinary approach, we will explore the garden as a paradise; as a locus for philosophical discussion and religious encounter; as a site of labor, conquest, and resistance; and as a place for solace, inspiration, and desire. This course will be grounded in crucial readings from antiquity, such as the Hebrew Bible, Homer, Sappho, Cicero, Lucretius, Vergil, Horace, Columella, and Augustine, and in the perspectives of more modern writers, from Jane Austen and Tom Stoppard to contemporary cultural historian George McKay. Ultimately, our goal is to analyze conceptions and expressions of beauty, power, and love-in the garden. All readings are in translation.
Requirements/Evaluation: class participation, short written assignments, and a final project
REL 236 (S) Reading the Qur’an

Cross-listings: GBST 236 REL 236 COMP 213 ARAB 236

Primary Cross-listing

In the nearly 1500 years of Islamic history, the Qur’an has been a central source of spiritual insight, ethical and legal guidance, sacred stories, and theological principles. Considered the divine word of God, the Qur’an is central to devotional life. This course will explore the Qur’an as a text that is always in a state of production. We will focus significantly on close readings of the text of the Qur’an, in addition to pre-modern and modern Qur’anic exegesis. The course will begin with a historical account of the revelation and collection of the Qur’an, placing the form and content of the text in the context of 7th century Arab society and the life of the Prophet. We will then study Qur’anic commentaries to discuss how Muslims have drawn theological, legal, philosophical, and mystical meaning from the Qur’an. We will pose some of the following questions: What do the different exegetical methods tell us about the intertextual nature of the Qur’an? How have these shifting notions affected the meaning made from Qur’anic verses and passages? What role do interpretive communities play in determining what the Qur'an says? Lastly, through an exploration of the art of Qur’an recitation, calligraphy, and Qur’an manuscripts, we will explore the ways in which the Qur’an is also an object of devotion in Muslim life.

Requirements/Evaluation: class participation, weekly reading responses, 3- to 4-page midterm paper, and a final project with a media component and a 4- to 6-page analytical essay

REL 237 (F) Islam in the United States: Race, Religion, Politics (DPE)

Cross-listings: AMST 237 REL 237 AAS 237 AFR 237

Primary Cross-listing

Malcolm X is one of the most iconic yet controversial figures in the black freedom struggle in the United States. He is also arguably the most prominent and influential Muslim in the history of the United States. His story and legacy powerfully illustrate the complex intersections of Muslim identity, political resistance, and national belonging. From the early period of “Black Muslim” movements represented by Malcolm X, to the current “War on Terror” era, American Muslims have faced a complex intersection of exclusions and marginalization, in relation to national belonging, race, and religion. Taking Malcolm X as our point of departure, this course examines how American Muslims have navigated these multiple layers of marginalization. We will therefore consider how the broader socio-political contexts that Muslims are a part of shape their visions of Islam, and how they contest these competing visions among themselves. In so doing, we will examine the complex relation between religion, race, and politics in the United States. Throughout the course, we will be engaging with historical and anthropological material, autobiographies, documentaries, films, historical primary-source documents, music, and social media materials. The course fosters critical thinking about diversity by challenging assumptions of who
Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to ideology, race, nationality, ethnicity, culture, gender, and language.

**Requirements/Evaluation:** regular reading responses, 2 midterm essays, final exam

**REL 238 (F) Islam and Reason** (DPE)

In an essay on the “reality of Islam,” the popular New Atheist writer, Sam Harris, concludes: “All civilized nations must unite in condemnation of a theology that now threatens to destabilize much of the Earth... It is time we realized that the endgame for civilization is not political correctness. It is not respect for the abject religious certainties of the mob. It is reason.” These words forcefully express the common sentiment that the fanatical blind faith demanded by “mainstream Islam” poses a major threat to the so-called civilized world. Islam is thus seen as exemplifying the irrational dogmatism of religion par excellence. This course will critically examine such assumptions, by exploring how Muslim philosophers and theologians throughout the history of Islam have addressed a variety of questions, such as: Is faith compatible with reason and rationality? What is the relation between reason and scripture? What modes of perception, reasoning, and knowledge are involved in religious belief? What room is there for doubt, skepticism, and critique in Islam? We will explore these questions through an array of primary and secondary readings in Islamic theology, philosophy, mysticism, and ethics, as well as anthropological engagements with lived Islam. Through these explorations, we will also critically reflect on our own cultural assumptions about religious belief, the nature of reason and knowledge, and the politics and power-dynamics of reason and rationality.

**Requirements/Evaluation:** Regular discussion posts; Midterm essay; Final essay

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Religion majors

**Expected Class Size:** 5-10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course requires students to engage deeply with a very different philosophical universe than that of the modern West. This is also meant to prompt a critical engagement with our own cultural and philosophical assumptions about reason, knowledge, and religious belief. Finally, we will also reflect on the politics and power-dynamics of reason and rationality, considering how dominant modes of thinking are designated as "reason" and others are relegated to being objects of critique.

REL 241 (F) History of Sexuality

Cross-listings: REL 241 GBST 241 HIST 292 WGSS 239

Primary Cross-listing

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

Requirements/Evaluation: reading responses, two essays, and final research paper

Prerequisites: none

Cross-listings: ARAB 242 REL 242 WGSS 242

Primary Cross-listing

The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media and ask the crucial question: do Muslim women need saving? We will then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism—the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam around women, gender, and sexuality and on Muslim women's own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.

Requirements/Evaluation: weekly discussion post, midterm essay, and final paper (6-8 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Religion, Women's, Gender and Sexuality Studies and Arabic majors

Expected Class Size: 14

REL 243  (F)  Islamic Law: Past and Present

Cross-listings: HIST 302 REL 243 WGSS 243 ARAB 243

Primary Cross-listing

From fear of the Shari'a to its implementation in so called "Islamic countries," Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari'a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

Requirements/Evaluation: weekly responses, midterm essay, final essay

REL 244  (F)  Mind and Persons in Indian Thought

Cross-listings: ASIA 244 PHIL 245 REL 244

Primary Cross-listing

In this course, we follow the Indian philosophical conversation concerning the self and the nature of consciousness, particularly as they are found in its various Yogic traditions. We start with some of the Hindu views about the self and the mind and consider their ethical implications. We then consider a range of Buddhist critiques of these views, focusing more particularly on the Madhyamaka, which radicalizes the critique of the self into a global anti-realist and skeptical stance. We also examine the Yogacara school, which offers a process view of reality focusing on the analysis of experience. We conclude by considering some of the later Hindu holistic views of the self as responses to the Buddhist critique. In this way we come to realize that far from being the irrational foil of "the West," Indian tradition is a rich resource for thinking through some of the central questions that have challenged philosophers in both traditions.

REL 247  (S)  Anti-Muslim Racism: A Global Perspective  (DPE)

Cross-listings: GBST 243 PSCI 244 REL 247

Secondary Cross-listing

The racialization of Islam and Muslims has been constitutive to how they have been imagined in Europe and elsewhere. This course looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. It goes back to the founding moments of an imagined white (at the beginning Christian) Europe and how the racialization of Muslim and Jewish bodies was central to this project, and how anti-Muslim racism continues to be relevant in our world today. The course will not only show how Muslims were constructed as subjects in history, politics and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. Rather, it also looks at how Muslims live through Islamophobia. It looks at processes of racialization of Muslims within the Muslim community and between Muslim communities, while also considering which agencies Muslims take to determine their own future. The course draws from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology.

Requirements/Evaluation: Active class participation, two response papers, and a comprehensive, open-book and open-note final exam.
**Prerequisites:** none  
**Enrollment Limit:** 25  
**Enrollment Preferences:** Global Studies concentrators and Religion majors  
**Expected Class Size:** 20  
**Grading:** no pass/fail option, yes fifth course option  
**Unit Notes:** Also qualifies for the GBST Urbanizing World track  
**Distributions:** (D2) (DPE)  

This course is cross-listed and the prefixes carry the following divisional credit:

**REL 249 (S) Anti-Semitism** (DPE)  
**Cross-listings:** REL 249 JWST 249  
**Primary Cross-listing**  
This course will investigate intellectual traditions, political movements, and cultural objects that portray Jews, Jewishness, or Judaism as essentially pernicious. We will analyze materials from a variety of times and places, including the ancient world, the medieval period, and the present day. We will assess the impact of anti-Semitism on the lives of Jews and non-Jews. But we will also read theoretical approaches to the study of anti-Semitism that raise key questions for our investigation. Where does the term "anti-Semitism" come from and how exactly should it be defined? Is anti-Semitism a continuous phenomenon that connects every claim of Jewish perniciousness, wherever it is alleged, for over two thousand years of human history? Or should every context be treated as fundamentally distinct, so that the claim of Jewish perniciousness is presumed to have a distinct meaning, origin, and purpose in each case? What motivates charges of Jewish perniciousness? What are the particular threats typically alleged to be posed by Jews, Jewishness, and Judaism? How do constructions of Jewish perniciousness fit with constructions of race, gender, ethnicity, religion, class, sexuality, and nationality in different times and places?  

**Requirements/Evaluation:** Three 5-7 page papers, class participation  
**Prerequisites:** none  
**Enrollment Limit:** 15  
**Enrollment Preferences:** Jewish Studies concentrators, Religion majors, and students who have taken JWST 203  
**Expected Class Size:** 15  
**Grading:** no pass/fail option, no fifth course option  
**Distributions:** (D2) (DPE)  

This course is cross-listed and the prefixes carry the following divisional credit:  
REL 249(D2) JWST 249(D2)  

**Difference, Power, and Equity Notes:** This course will introduce students to discursive, institutional, and social structures that have organized the stigmatization, domination, and persecution of Jews in various geographic locations for over two thousand years. An understanding of these structures is crucial to understanding contemporary dynamics of difference and power. Students will also learn how anti-Semitism intersects with constructions of race, gender, class, religion, ethnicity, and nation.

---
In East Asian cultures, as in the United States, popular conceptions of morality typically take their shape, not from explicit rules, but from moral paragons—stylized figures that are said to embody a distinctive cluster of virtues. For example, American Christians invoke not only Jesus, but also a pantheon of "secular saints" as diverse as Martin Luther King Jr. and General Patton, George Washington and Cesar Chavez. This course will explore the cultural functions of moral paragons and philosophies of virtue in East Asia by introducing students to examples from Chinese and Japanese history, ranging from Confucian articulations of the ideal scholar-bureaucrat to Buddhist conceptions of the Bodhisattva to Taoist immortals. It will also address the history of ethical thought in East Asia, focusing particular attention on conceptions of "Virtue Ethics." This approach has come to be seen by some contemporary analytic philosophers as a way out of the impasse produced by ethical relativism and the loss of theological rationales for moral action. Readings will include Euro-American philosophers such as Nietzsche and MacIntyre as well as primary texts in translation by Chuang-tzu, Confucius, Shantideva and others. The fall 2021 iteration of the course will have a special focus with a few additional readings on idealized communities and political "utopias."

Class Format: discussion

Requirements/Evaluation: active participation, short writing assignments, midterm, and a self-scheduled final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Religion and Asian Studies majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course invites students to examine theoretically and experientially meditation. Throughout the course, we examine meditations belonging to various Buddhist traditions through our own practice. We study some of the manuals where these meditations are taught and connect these practices to some of the more important ideas of the tradition. In studying and practicing meditation, we follow a gradual approach, starting from the most basic practices to more advanced ones. We also connect the practices and ideas we consider with modern scientific approaches, examining practices such as mindfulness therapy and the practice of positive emotions from a psychological perspective. In the process, we re-contextualize Buddhist ideas by connecting them with modern approaches, particularly those inspired by biology, psychology and ecology. Throughout the course, students will keep a daily practice of meditation and record their experiences in a journal so as to be able to come to an informed understanding combining a theoretical grasp of the issues raised by meditation and their own personal appreciation.

Class Format: mixture of lecture, discussion, and practice of meditation

Requirements/Evaluation: full attendance and participation, regular practice of meditation, two middle-length essays, and a meditation journal

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Religion majors, students who have taken REL 288

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

REL 255  (F)  Buddhism: Ideas and Practices  
Cross-listings:  ANTH 255 ASIA 255 REL 255  
Primary Cross-listing  
This course introduces students to Buddhism by examining its ideas and practices as they have taken place in actual social contexts rather than as disembodied textual objects. After examining the main ideas and narratives of the tradition, we turn our attention to Thailand where we examine how these ideas and narratives have shaped a whole range of practices, from meditation to shamanistic rituals. We then consider the transformations that Buddhism is undergoing in contemporary society, examining the rise of meditation movement, the changing role of monks and laity, the resurgence of the nun order, the rise of Buddhist social activism and the development of new Buddhist social philosophies. We ask questions such as: How can Buddhism adapt to a modern global consumerist society? What are the transformations involved in this process and the role that Buddhism can play in such a global society? Should Buddhists take advantage of the opportunities of this new global culture or should they adopt a critical stance toward its consumerist values?  
Class Format: discussion  
Requirements/Evaluation: full attendance and active participation; two essays  
Prerequisites: none

REL 258  (F)  Buddhism, Social Change, & Reproductive Justice in the Anthropocene  (DPE) (WS)  
Cross-listings:  WGSS 225 ASIA 258 ANTH 258 REL 258  
Secondary Cross-listing  
This course considers how three women profoundly shaped the Buddha's life and legacy in terms of social change & reproductive justice. Our central characters are Maya--the Buddha's mother, who died shortly after delivering him; Pajapati--the Buddha's stepmother & aunt who raised him; and Yasodhara--his wife, whom he abandoned when he left home to seek enlightenment. We explore the classical Buddhist discourses and modern biographies to explore how these three women impacted what the Buddha taught and practiced in terms of social and gender justice. These women helped shape the Buddha's radical decision to found the first renunciate order for women in Asian history and helped shape Buddhist attitudes towards female empowerment, bodily autonomy, and reproductive justice for that past 2500 years. Our historical genealogy will explore how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice. Along the way we consider: How did these three women reject existing social hierarchies in the Buddha's day and with what impacts for modern Buddhist practices and institutions? How do the social transformations of the Buddha's day still impact modern struggles for gender justice & reproductive justice in the Anthropocene?  
Requirements/Evaluation: Attendance, writing weekly essays or written feedback. There are no grades first half of the semester but weekly feedback on writing.  
Prerequisites: none, but a course in ANTH or REL is preferred  
Enrollment Limit: 10  
Enrollment Preferences:  ANTH, REL, WGSS majors and ASIA concentrators  
Expected Class Size: 10  
Grading: no pass/fail option, no fifth course option

REL 262 (S) Time and Blackness

Cross-listings: AFR 208 AMST 208 REL 262

Secondary Cross-listing
The concept of time has been one of the most examined, yet least explicitly theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory—which involves thinking about time—time itself has rarely the subject of sustained inquiry. This may be due to its abstractness as an idea, and the level of analysis its conceptualization demands, or because time in the Black experience cannot be understood outside of the meaning of race, which itself is not completely tangible. In this tutorial, “Time and Blackness,” we will explore how Black writers across a number of genres—spiritual autobiography, fiction, memoir, literary criticism, and cultural theory—understand time, and create paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in Black writings? How does race shape the ways Black writers conceive the experience of time? And, finally, to what can we attribute the recent surge in explicit, theoretical examinations of “time and blackness”?

Requirements/Evaluation: assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: concentrators in Africana Studies, majors in Religious Studies, and majors in American Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

REL 263 (S) Giving God a Backbeat: Rap Music, Religion & Spirituality

Cross-listings: AFR 221 REL 263

Secondary Cross-listing
On the surface, religion and rap music may seem as if they have little in common. Yet, like other Black musical traditions such as spirituals and the blues, rap is rooted in African American religious traditions. In this course, we will explore the ways in which rap music intersects with the sacred and secular worlds. Through an examination of black religious traditions, lyrics, music videos, and digital media, we will unearth what Anthony Pinn calls the "spiritual and religious sensibilities" of rap music. Grounded in culture-centered criticism, we will investigate the rhetoric of rap and religion through the theoretical ideas of Black Liberation Theology and hip-hop feminism.

Requirements/Evaluation: students will be evaluated on their class participation, Twitter threads, response papers, quizzes, and a final class group project

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: First year, sophomore, and juniors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)
This course will examine issues related to the intersection of "slavery" and "Bible." We will consider topics as varied as the story of Israel's deliverance from Egyptian bondage, the laws surrounding slavery in the Torah, the continuation of slavery into early Christianity, and the arguments surrounding slavery in the United States in the antebellum period. Our conversation will tackle a series of questions including the following ones: What role did these themes play in later Jewish communities? What role did the enslaved play in the development of the Christ-following communities? What were the key passages (and, arguments) supporting the racialized version of U.S. slavery? What are the legacies of the history of slavery that continue to haunt us?

**Requirements/Evaluation:** class participation, short (2-3 page) writing assignments, one (mid-term) examination, and a final 8-10 page paper

**Prerequisites:** none, although a previous course on religion is recommended

**Enrollment Limit:** 15

**Enrollment Preferences:** Religion majors or at least one course in Religion

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course will address discursive and institutional bases of oppression that remain potent in the United States and beyond. An understanding of slavery as a thematic element in Biblical texts (and their ongoing reception) is indispensable to the critical analysis of racial injustice and human freedom.

Not offered current academic year

**REL 268 (S) Where are all the Jews?** (DPE) (WS)

**Cross-listings:** ARAB 363 REL 268 COMP 363 JWST 268

**Secondary Cross-listing**

Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance Israelite Universelle's schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews' departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, ethnographies, historiographical works, and anthropological texts alongside documentaries films, the students will understand how literature and film have become a locus in which amnesia about Arab/Berber Jews is actively contested by recreating a bygone world. Resisting both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

**Requirements/Evaluation:** 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation.
**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** students interested in critical and comparative literary, religious or historical studies.

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 363(D1) REL 268(D2) COMP 363(D1) JWST 268(D2)

**Writing Skills Notes:** Students are required to present an outline of their papers before submitting a draft paper. The professor will give feedback on each written work to improve students' writing skills. Students are required to incorporate the feedback to improve their drafts before they become final. Students will receive detailed and consistent feedback about their writing in Arabic language. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** Students in this course will understand the historical process that lead to the disappearance of Arab/Berber Jews. Students also will work out alternative ways to grasp Jewish-Muslim relations beyond nostalgia and conflict. Finally, students enrolled in the course will grapple with and try to disentangle the complexity of Jewish-Muslim citizenship in both pre-colonial and postcolonial contexts.

**Attributes:** JWST Core Electives
REL 270 (S) Reading Jesus, Writing Gospels: Christian Origins in Context (WS)

Cross-listings: COMP 263 REL 270 CLAS 270

Primary Cross-listing

What were the religious and cultural landscapes in which Christianity emerged? How did inhabitants of the ancient Mediterranean world speak about the concept and significance of religion? How have scholars of early Christianity answered these questions? What are the implications of their reconstructions of early Christian history? The course is divided into four parts. The first part establishes the course's interpretive approach. The second part of this course explores aspects of the formation of Christianity from its origins as a Jewish movement until its legalization. The third part of the course focuses on the earliest literature produced to memorialize Jesus. The final part of the course emphasizes modern interpretations of Jesus and the movement of which he was a part; here we shall be examining how scholars make use of ancient materials to frame their arguments and the modern contexts and legacies of making meaning out of biblical and other ancient materials.

Class Format: lecture/discussion

Requirements/Evaluation: three 3-page papers (with revisions), one 5- to 7-page paper (that builds on one of the earlier 3 page papers), and a final paper (7-10 pages, that draws on some of the earlier writing in addition to new writing)

Prerequisites: none; open to all

Enrollment Limit: 19

Enrollment Preferences: sophomores, especially potential majors in Religion, Classics, and Comparative Literature

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 263(D1) REL 270(D2) CLAS 270(D1)

Writing Skills Notes: Students will write a series of short essays, with required revisions, to develop their skills in close reading of ancient texts and interpretive analysis of modern scholarship about Christian origins. In each successive section of the course, writing from the prior unit will inform the subsequent papers.

REL 272 (F) Art of the Noble Path: Buddhist Material Culture Across Asia

Cross-listings: ARTH 272 REL 272 ASIA 272

Secondary Cross-listing

Buddhism has spread throughout Asia and beyond since its emergence in India in the 5th century BCE, providing a shared philosophical and cosmological framework for diverse cultures. Artistic expression, regional politics and cultural landscapes have been shaped by its remarkable influence. With patrons ranging from powerful monarchs and monks to merchants and tradespeople, Buddhist art has historically reflected the religion's social inclusivity. This course will survey the architecture, painting and material culture of Buddhism in Asia, tracing its influence in diverse media, from rock-cut architecture to Zen painting. A close reading of primary texts, such as architectural inscriptions in India, manuscripts from Tibet, and travelogues of Chinese pilgrims, will provide greater context for the artworks.

Requirements/Evaluation: 3 ten-minute quizzes, weekly Glow responses, a midterm, and a final exam

REL 274 (F) Ritual, Power and Transgression

Cross-listings: REL 274 ANTH 299

Secondary Cross-listing

The focus of this course is on the role of ritual in harnessing political power. In the first part of the semester, we examine some of the ways in which different cultures manufacture social order and political power through categories of inclusion and exclusion, clean and dirty, proper and improper, licit and illicit. We will be particularly attuned to the ways in which these categories are performed through and maintained by rituals and how bodies are deployed in ritual spaces as instruments of persuasion and control. We will also look in depth at a variety of ritual forms, including scapegoating and sacrifice, and how they serve as engines of political control and protest, and we will examine the uses of dead bodies and memorials as vehicles for gaining and maintaining political power and the destruction and desecration of bodies and memorials as a form of political protest and dissent. Throughout the semester, we will be relating theoretical texts and historical cases to current political struggles in this country and abroad.

Requirements/Evaluation: class participation, biweekly responses to instructor prompts, two short (500 words) response papers, and one 12-page (2400 words) research paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: ANSO and REL majors, open to first-years

Not offered current academic year

REL 275 (F) Martyrdom Then and Now: Christianity, Violence, and Identity

This course explores the complex legacy of Christian traditions of martyrdom. The idea of suffering or death as a subversive "witness" was not a uniquely Christian phenomenon in the Mediterranean cultures of late antiquity in which Christianity emerged, as texts such as Socrates' Apology or the Jewish 4 Maccabees demonstrate. In what senses might martyrdom nonetheless be considered a distinctly Christian invention? What is the particular political context within which ideals and practices of martyrdom emerge and flourish? To what or whom are martyrs said to give witness? What is the distinctive relationship of martyrdom to identity? Finally, is the fateful linking of truth, faithfulness, and creativity with violence, testing, and suffering a holy or an unholy heritage for Christians and others who are called to give witness in current contexts? While most of the course will address these questions through close readings of texts deriving from the formative period of martyrdom's history, we shall also keep contemporary contexts in our sights. The last segment of the course will turn to consider the role of martyrdom in resistance to violence against BIPOC and LGBTQIA people, with special focus on the critique of martyrdom generated within the Black Lives Matter movement, as it also potentially applies more broadly.

Requirements/Evaluation: The requirements for this course include participation in discussion (10%), weekly reflection papers (ca. 300 words each) (20%), three essays (ca. 1500 each) (20% each, or 60% total), one oral report (5%), and one art report posted online (5%).

REL 276(D2) COMP 258(D2)

Difference, Power, and Equity Notes: This course situates “gnosis” as a practical epistemological orientation used both to disrupt and challenge power arrangements deemed unjust and to empower those who are marginalized within dominant power structures. At the same time, the course interrogates “gnostic” epistemological claims as capable of being used to reinstall hierarchical power structures. Attention to power and equity and how difference is produced is at the center of the course.

Not offered current academic year

REL 279 (S) Islam on the Indian Ocean
Cross-listings: ASIA 279 REL 279 GBST 279 ARAB 279

Primary Cross-listing

While colonial and Eurocentric geographies speak in terms of continental separation, historically the continents of Africa and Asia have been connected to one another through a dual link: Islam and the Indian Ocean. Indian Ocean trade and travel have historically connected East Africa, the Arabian Peninsula, South Asia, and South East Asia, shaping the lives of people and communities who lived not only along the coasts but also inland.

This course focuses on these transregional connections, looking at the Indian ocean as a connective space that binds people and regions together rather than separating them. The course will also examine the role of Islam as a religious, economic, social and political force that brought together Muslim communities throughout the regions along the Indian ocean. In exploring these connections, the course will cover a broad historical period, from the 7th century with the rise of Islam to European colonialism and the emergence of a global economy in the nineteenth century.

REL 281 (S) Religion and Science

Cross-listings: REL 281 STS 281

Primary Cross-listing

In the last few years the deniers of religion such as Dennett and Dawkins have forcefully argued that recent scientific developments show the degree to which religion is irrelevant to a modern understanding of what it means to be human. Atran and Boyer have made a similar case, arguing that recent progresses in our understanding of human cognition demonstrate that religion is a purely natural phenomenon that has little if any value for human development. Theologians such as Haught and Polkinghorne have rejected these views, arguing that a proper understanding of scientific developments such as evolution and quantum mechanics suggests religiously relevant views of the universe and our place therein. This course considers these competing perspectives while offering critical reflections on the views and categories involved in these controversies. We also examine the works of reflective naturalists such as Bellah and Herrstein, who argue that far from showing the irrelevance of religious ideas and practices, the new mind and life sciences suggest a much more nuanced view according to which religion is both grounded in the natural world and central to the development of human culture. Hence, it cannot be easily discounted as irrelevant to a scientifically informed understanding of what it means to be human.

REL 284 (S) From the Battlefield to the Hermit’s Cell: Art and Experience in Norman Europe (WS)

Cross-listings: REL 284 WGSS 284 ARTH 218

Secondary Cross-listing

This tutorial provides students with the chance to investigate in-depth three of the most astonishing works of art created during the entire Middle Ages: the Bayeux Tapestry (c.1077-1082), the Cappella Palatina (c.1130s-1166), and the Psalter of Christina of Markyate (1120s-1160s). Created within a hundred years of each other all within territories controlled by the Normans—a warrior dynasty that settled in northern France in the 10th century and then expanded north into England and south into Italy in the 11th and 12th centuries—each of these works is unprecedentedly ambitious in scale, dazzling in its material properties, and survives in its original wholeness, a rarity in the medieval world. Despite these similarities, however, each work is very different from the other two and so sheds light on very different aspects of Norman experience, across Europe. The Bayeux Tapestry, likely made by female embroiderers for a baronial hall, is a giant textile (over 70 meters long) that in gruesome and fascinating detail tells the story of the Norman invasion of England by William the Conqueror in 1066. The Cappella Palatina in Palermo, in turn, commissioned by King Roger II, is a royal chapel covered in sumptuous mosaics that reveals through its decoration and ritual the dynamic interaction of Islamic, Byzantine, and Latin Christian traditions in the multicultural Norman kingdom of Sicily in the 12th century. And the Psalter of Christina of Markyate, a large prayerbook made for the use of a female recluse in southern England, contains 40 full-page paintings and 215 decorated initials, a vast and inventive program of imagery that through its creative profundity helped reshape private devotional art and culture for centuries to come. Through their variety, then, these three objects—an embroidery, a building, and a book—give students insight into the rich array of concerns and aspirations, from the political to the spiritual and from the public to the private, that gave substance and meaning to 11th- and 12th-century European life, for women as well as men. What is more, these three remarkable works of art have been the focus of much interesting scholarship in recent years, so an exploration of some of that literature provides a compelling introduction to the discipline of art history itself, past and present.

Requirements/Evaluation: Participation in discussion; five 5-7-page tutorial papers; five 1-2-page response papers.

Prerequisites: None

Enrollment Limit: 10

REL 285 (S) Haunted: Ghosts in the Study of Religion

Haunted offers a powerful way to speak about forces that affect us profoundly while remaining invisible or elusive. "What is it that holds sway over us like an unconditional prescription? The distance between us and that which commands our moves—or their opposite, our immobility—approaches us: it is a distance that closes in on you at times, it announces a proximity closer than any intimacy or familiarity you have ever known" (Avital Ronell, Dictations: On Haunted Writing [1986] xvi-xvii). The figure of the ghost has been developed by those seeking to grapple with the ongoing effects of modern slavery, colonialism, state-sponsored terrorism, the holocaust, and personal trauma and loss. Building upon the insights about memory, history, and identity that haunting has been used to address, this course will challenge you to explore the study of religion by way of its "seething absences." We shall ask how the study of religion has endeavored to address loss, trauma, and its persistent effects, what "holds sway" over various approaches to the study of religion, as well as how "religion" constitutes its own ghostly presence, haunting other domains.

Class Format: tutorial; meeting in pairs, each student will either write and present a paper or respond to their partner’s paper

Requirements/Evaluation: two 1-page papers (written and presented), five 5-page papers, and five oral critiques (based on written notes) of their partner’s paper; students will revise two papers

Not offered current academic year
REL 286 (F) The Bible and Migration: Latinx Perspectives

This course seeks to understand migration in the current historical moment, around the globe but especially on the US border. The lenses through which we will explore migration include Religion, with special focus on the Christian Bible. We will explore instances of and reflections on migration in the Bible, as well as various interpretations of the Bible emerging today in debates over migration. The course will approach US migration from the perspective of Latinx communities in the US - historically, culturally, politically, and religiously. Readings will include: The Bible, monographs and essays on the Bible and Migration, especially from the perspectives of Latinx authors and thinkers.

Requirements/Evaluation: Participation in class discussions; two to three short essays (3-5 pages each) analyzing selected readings; a longer final research paper (7-10 pages) on an aspect of Bible and Migration of interest to the student defined in consultation with the professor.

REL 288 (F) Embodiment and Consciousness: A Cross-Cultural Exploration

This course examines some of the central questions raised by the study of the consciousness: the place of intentionality, the role of emotions, the relation with the body, the nature of subjectivity, the scope of reflexivity, the nature of perceptual presence, etc. In confronting these difficult questions, we do not proceed purely theoretically but consider the contributions of various observation-based traditions, from Buddhist psychology and meditative practices to phenomenology to neurosciences. We begin by examining some of the central concepts of Buddhist psychology, its treatment of the mind as a selfless stream of consciousness, its examination of the variety of mental factors and its accounts of the relation between cognition and affects. We also introduce the practice of meditation as a way to observe the mind and raise questions concerning the place of its study in the mind-sciences. We pursue this reflection by examining the views of James, Husserl, Sartre and Merleau-Ponty, particularly as they concern the methods for the study of the mind and the relation between consciousness, reflexivity and the body. In this way, we develop a rich array of analytical tools and observational practices to further our understanding of the mind. But we also question the value of these tools based on first person approaches by relating them to the third person studies of the mind. In this way, we come to appreciate the importance of considering the biology on which mental processes are based and the light that this approach throws on the nature of consciousness. We conclude by considering the relation between first and third person studies of the mind, focusing on the concept of the embodied mind as a fruitful bridge between these different traditions.

Requirements/Evaluation: regular practice of meditation, a class presentation, a short essay (6-pages); a long final research paper (15 pages)
Prerequisites: any introduction to philosophy and at least two upper level courses in PHIL, at least one of which meets the Contemporary Metaphysics or Epistemology distribution requirement for the major, no exceptions.

Enrollment Limit: 18

Enrollment Preferences: Religion and Philosophy majors

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

REL 291  (S)  Religion and Ecology in America  (WS)

Cross-listings: REL 291 ENVI 291 SOC 291

Secondary Cross-listing

This course examines the relationship between religious and environmental thought in America. Exploring a broad range of practices, symbols, and beliefs, we will examine the religious roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have writers, thinkers, and artists from different religious and cultural backgrounds shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? How have they influenced each other to produce distinctively American forms of eco-spirituality? In pursuit of these questions, we will consider a diverse array of topics and cases, including struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoorsmanship, Catholic climate activism, Jewish eco-mysticism, atheist biology, Buddhist therapy, and more.

Requirements/Evaluation: Each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper.

Prerequisites: ENVI 101 or instructor permission

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 292  (F)  Religion and Politics in the Caribbean and the Diaspora

Cross-listings: REL 292 LATS 253

Secondary Cross-listing

This course analyzes the role of religion in Caribbean history and politics, with a focus on Puerto Rico and Cuba. These Caribbean Islands have lived
out contested colonized histories and experiences, as well as diasporic realities in several key US communities, such as New York City and Miami. The US government and military have played a significant role in both since the turn of the last century, forcibly shaping their economies and politics. Religion, particularly the Protestant missionary enterprise since the US invasions in 1898, has also shaped histories and politics on the islands and throughout their diasporas. We will explicate the role and impact of Protestant religion in these historically indigenous, African descendent, and Roman Catholic religious spaces, as well as how these religious engagements and theologies impacted migration and the creation of diasporic communities in the US. Both the role of religion in the imperialist endeavor and the solidarity movements that responded will occupy our time in this course, with special attention to key figures in both sides of such efforts. With some enhanced understanding of the intertwining of religion and politics in Puerto Rico, Cuba and their diasporic communities, participants in this class will also consider implications for other Caribbean nations, such as the Dominican Republic, as well as Latin American countries that have experienced US interventions and the creation of diasporic communities.

Class Format: This course will follow a lecture-discussion format, in which students are expected to come to class prepared to address the assigned readings, to have completed short assignments in preparation for discussions, to make presentations to the class, and/or to lead discussions.

Requirements/Evaluation: Evaluation in this course will be based on class participation, online discussion forum posts based on readings, two short 5-page essays on an aspect of Puerto Rican or Cuban political/religious reality discussed in class, and a final 8-10 page research essay on a theme in the course agreed upon by student and professor.

REL 294 (S) Paul and Early Christianity: Race, Ethnicity, Empire, and the New Testament

In the Christian New Testament, 13 letters are attributed to “Paul” (out of a total of 27 documents that comprise the New Testament). These letters have been a rich source for a host of political and theological debates over the last two millennia, but in this course, we will examine them as expressions of earliest Christianity's encounter with race, ethnicity, gender, and the ethics of a new religious movement, established in the midst of the oppressive Roman imperial order. Seven of these letters were almost certainly written by someone known to us as Paul of Tarsus. How Paul, a devout Jew, addressed controversial issues in his newfound communities, often in equally controversial ways, will guide our discussions of the role of religion and politics in his world as well as our own. Reading the letters of Paul and related documents in the New Testament, and interpretations of Paul over the centuries, including in modern scholarship, especially by African American, Asian American, and Latinx biblical scholars, theologians, artists, and thinkers will focus our study of religion and politics, ancient and modern.

Requirements/Evaluation: Students will prepare oral and written summaries of the letters (at least one per student) from their own perspectives in conversation with scholarly interpretation, as well as write short papers (two for the semester, 3-4 pages each) on relevant themes for today inherent in these ancient documents. There will also be a final, research paper (8-10 pages) examining race, ethnicity, gender, and/or politics -- then and now -- using several of the letters as sources for the written exploration.

Prerequisites: None

REL 295 (S) Foundations of Confucian Thought (DPE) (WS)
Cross-listings: REL 295 ASIA 215 CHIN 215

Secondary Cross-listing
How should people treat each other? What constitutes human nature and does it tend towards good or evil? How should we organize society, by focusing on laws and regulations, or on ritual and moral guidance? What is the nature of moral rulership? What is the proper relationship between the individual and larger units of society, from the family to the state? These are some of the key questions that the school of thought that has come to be known as "Confucianism" addresses. As the dominant moral and political philosophy for thousands of years in much of East Asia, Confucianism has shaped our world, past and present, in innumerable ways. In this class we will focus on the foundational texts of the Confucian tradition: the Analects (purported to record the words of Confucius himself), Mengzi (often romanized as "Mencius"), and Xunzi. Beyond those questions noted above, we will further examine how these texts construct their arguments; how they were first composed, compiled, and circulated; how they employ such key concepts as "humaneness" (ren), "moral power" (de), and "ritual propriety" (li); and how they functioned as part of the larger philosophical, linguistic, political, and historical context that we now think of as "early China."

Requirements/Evaluation: Evaluation is based on writing assignments (3-4 pages, 5-6 pages, and 10-12 pages) and participation in class discussions.

Prerequisites: None.
Enrollment Limit: 19
Enrollment Preferences: Enrollment priority goes to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; current or prospective Asian Studies concentrators; and Religion majors.
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
REL 295(D2) ASIA 215(D1) CHIN 215(D1)

Writing Skills Notes: Writing will include short writing assignments (1 paragraph, 3-4 pages, and 5-6 pages) that will involve drafts, feedback and revision, and one longer final paper of 10-12 pages that will involve close consultation with the instructor during the writing process.

Difference, Power, and Equity Notes: Throughout the course we will examine how these texts deal with issues of differentials of power, both political and social, in a range of contexts. In particular, we will discuss how these texts conceptualize political and social power and how they see hierarchy and difference functioning in both beneficial and deleterious ways in society.

REL 299 (S) Shakespeare's Torah
Cross-listings: JWST 299 REL 299

Primary Cross-listing
For readers and speakers of the English language over the past five centuries, no literary body of work has been more central than the writings of William Shakespeare. His plays and poems have shaped the linguistic, philosophical, and artistic representation of human experience in ways that permeate every aspect of our lives. Shakespeare's capacious work and its central preoccupation with the essential questions of humanity have also inspired an extensive tradition of commentary, interpretation, and performance. In this regard, his work occupies a position similar to the one held by the collection of writings known in the Jewish tradition as Torah. This term refers both to the set of books contained in the Hebrew Bible and to the rabbinic tradition that emerged from reading those books, which in turn has provided the core principles for over two millennia of Jewish interpretive practice. This course invites students to read Shakespeare as Torah by applying the essential features of that practice to his extraordinary work.

Through a deep and sustained encounter with four plays in four different genres (Hamlet, Henry IV, Twelfth Night, and The Tempest), we will combine analytic, critical, and creative principles to make meaning in and out of these texts. The goal throughout is to explore how the Jewish art of interpretation can illuminate our experience of Shakespeare's humanity.

Requirements/Evaluation: class participation, regular short written and oral assignments, and a final project
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: If the class is overenrolled, preference will be given to Jewish Studies concentrators, Religion majors, and students who have taken REL/JWST 222.

REL 303 (F) Augustine’s Confessions

Cross-listings: PHIL 307 CLAS 307 REL 303

Secondary Cross-listing

No thinker has done more to shape the Western intellectual tradition than Augustine (354-430 CE), and no book displays Augustine’s dynamic vision of reality more compellingly than the Confessions. Its probing and intimate reflections on the meaning of human life, the nature of God and mind, time and eternity, will and world, good and evil, love and sexuality have challenged every generation since Augustine’s own. The seminar will be structured around a close, critically engaged reading of the Confessions (in English translation) and will give attention to its historical context and significance as well as to its philosophical and theological ideas. (There will be optional, supplementary opportunity to engage with the Latin text for interested students with some facility with Latin.)

Class Format: Class meetings will consist primarily in student presentations and open, directed discussion of assigned readings.

Requirements/Evaluation: Regular reading assignments from the Confessions and related secondary literature. Weekly participation in online discussion on Glow (15% of final grade); 3 class presentations (of various lengths and kinds) (20%); a short paper (maximum 1500 words) due around the middle of the semester (20%); a term paper in two drafts (maximum 3000 words) due near the end of the semester (40%); preparation for and participation in class that shows thoughtful engagement with the assigned readings (5%).

REL 306 (F) Feminist Approaches to Religion (WS)

Cross-listings: REL 306 WGSS 307

Primary Cross-listing

What does feminist theory have to offer the study and practice of religion? How have participants in various religious traditions helped to produce and enact different kinds of feminist approaches to critique and transform religions? Feminisms and religions have a long though often troubled history of interconnection. In this course, we shall explore a range of feminist analyses that have either emerged out of particular religious contexts or have been applied to the study of religious traditions and practices. The course prioritizes attention to the intersections and interactions of gender, race, ethnicity, sexuality, and nationality (among other factors) with religion.

Requirements/Evaluation: weekly GLOW posts before class, one “position paper” for class discussion (3 pages), a research question with rationale
for interest and potential action plan (1 page), exploratory research statement (2 pages), essay on interpretive approach to research project (3 pages), participation in writing workshop on 7-page early drafts of final papers, one 15-page final paper.

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: Religion and Women's, Gender and Sexuality Studies majors have priority, and then students who have taken either REL 200 or WGSS 101.

REL 308 (S) What is Power?

Cross-listings: SOC 308 REL 308 PSCI 306 STS 308

Primary Cross-listing

What is power? Despite the importance of notions of power across the social sciences, there is a broad lack of consensus. Is power essentially domination or resistance? Is it freedom, empowerment, privilege, or oppression? Are there forms of unequal social power which are morally neutral or even good? Is power the kind of thing held by individuals, races, genders, classes, discourses, causal mechanisms, institutions, or social structures? What is the connection between social and physical power? Does power obey laws? How does power relate to technology? Or knowledge? Or agency? Or ideology? This course begins with the observation that power is often described as a causal relation--an individual's power is supposed to equal their capacity to produce a change in someone else's behavior. This suggests that the better we can understand the nature of cause and effect, the better we can understand power. Fortunately, in recent decades philosophers have made significant progress in theorizing causation. Hence, this seminar will put two very different bodies of theory in conversation: critical theory about power and philosophy of science about cause and effect. We will touch on classic philosophical accounts of power and causation, but focus our attention on more recent developments in philosophy of science, political theory, and other fields. The insights we gain in this course from analyzing the nature of power should empower us to more effectively transform society. It will help students in the social sciences to understand the nature of causation in the social world, and it will help students interested in political action to better understand the nature of power. Thinkers to be considered may include: Aristotle, Amy Allen, Hannah Arendt, Bourdieau, Judith Butler, Nancy Cartwright, Foucault, Gramsci, Byung-Chul Han, Han Feizi, Giddens, Steven Lukes, Machiavelli, J.L. Mackie, Marx, Nietzsche, and Max Weber. (Note that in 2023 this course will also fulfill the senior seminar requirement for STS)

REL 312 (S) The Mughal Empire: Power, Art, and Religion in India
Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith--much larger than any European empire in the early modern world--the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor's memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

Requirements/Evaluation: participation, several short essays, one final paper

Prerequisites: none, open to first-year students with instructor permission

REL 316 (F) Social Ontology

Cross-listings: REL 316 STS 316

Primary Cross-listing

What is society? What is the social world made of? The obvious answer--individual people--was for a long time dominant in the social sciences. Indeed, many theorists argued that there was no such thing as society distinct from individual humans and their intentional actions. While this mode of theorizing had some advantages, it has recently fallen out of vogue because of its inability to explain group norms, institutions, corporations, and other collectives. Explanations at the individual level are not necessarily incorrect, but rather philosophers have increasingly come to see them as incomplete. Society seems to more than an aggregate of individuals. Hence, philosophers have increasing turned to questions of social ontology and produced fresh theories about the nature of the fundamental constituents of the social world. We will explore this research, but with the added intuition that looking beyond humans to other social animals can provide a fresh theoretical vantage. We will set out from the idea that the social world is composed not just out of humans, but also out of materialized signs produced by social animals (e.g., a no-smoking sign or an ant's chemical trail). This seminar will offer an advanced survey of current debates about the ontology, methodology, and aims of the humanities and social sciences. We will address questions such as: Is there a difference between explaining and understanding social actions? Should explanation in the humanities and social sciences follow the model of explanation in the natural sciences, or are there peculiarities about social phenomena that demand a different approach? What are social structures, practices, norms, institutions? How might social structures exist over and above individuals? Do social groups have agency in their own right? What are social kinds and what is their relationship to natural kinds? How do debates in the social sciences look different if we attend to other social animals and their materialized signs? Course readings will come from a variety of areas including: sociology, semiotics, feminist theory, philosophy of science, and philosophy of mind. When possible, we will supplement these with readings on research into animal behavior.
REL 318 (S) Myths and the Making of Latine California (WS)

Cross-listings: REL 318 COMP 328 AMST 318 LATS 318 ENVI 318

Secondary Cross-listing
California is home not only to the largest ethnic Mexican population in the USA but also to the largest Central American population, while also being home to long-standing Latine communities hailing from Chile to Cuba. Since the era of Spanish colonization, especially starting in 1769, California has been woven into fantastic imaginations among many peoples in the Americas. Whether imagined as Paradise or Hell, as environmental disaster or agricultural wonderland, as a land of all nations or a land of multiracial enmity, many myths have been inscribed onto and pursued within the space we call California. In a state whose name comes from an early modern Spanish novel, how did certain narratives of California come to be, who has imagined California in certain ways, and why? What impact have these myths had on different Latine populations in the history of California, and how have different Latines shaped, contested, and remade these myths as well as the California landscape that they share with other peoples? In this course, we consider “myth” as a category of socially powerful narratives and not just a simple term that refers to an “untrue story.” We examine myths by focusing on a few specific moments of interaction between the Latine peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest are select creation stories (found in Jewish, Christian, and Indigenous traditions), imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as part of Greater México, California as “sprawling, multicultural dystopia,” and California as “west of the west,” including its imagination as a technological and spiritual “frontier.”

Requirements/Evaluation: this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Latina/o Studies concentrators, Religion majors, American Studies majors, Environmental Studies majors and concentrators, Comparative Literature majors

REL 319 (S) Milton’s Paradise Lost
Cross-listings: REL 319 ENGL 315

Secondary Cross-listing

If you know anything about John Milton, you probably think of him as some blind guy who wrote a really long poem about the Bible. It’s hard to shake the feeling that Milton is the fustiest of English poets—dull, pious, brilliant and all, and not someone you would read if you didn’t have to. But then what are we to make of the following? The first piece that Milton wrote that was read widely throughout Europe was a boisterous defense of the English Revolution. Milton was most famous in his lifetime as the poet who went to bat for the Puritan insurgents—the poet who came right out and said that the king looked better without his head. Of all the major English poets, Milton is the revolutionary. So a course on Milton is by necessity a course on literature and revolution. We will read Paradise Lost, widely regarded as the greatest non-dramatic poem in English, and a few other books to help us prepare for that big one. Some questions: How did the mid-seventeenth century, probably the most tumultuous decades in the history of modern Britain, transform the culture of the English-speaking world? What is the relationship between literature and the state or between literature and radical politics? Is there a poetics of revolution? How can a poet who seems to be writing for Sunday school—about God and Adam and Eve and the serpent—really have been writing about rebellion all along?

Requirements/Evaluation: one 6- to 8-page paper, one 10- to 12-page paper, informal weekly writing assignments, and active seminar participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam. If you are interested in taking the course without the prereq, do contact Prof. Thorne.

Spring 2024

REL 320 (F) “You Do You!” The Ethics and Politics of Personal Authenticity

From the breathtaking expansion of the “self-help” industry to corporate advertisement, from the fashion and entertainment industries to cultural politics around sexuality and race, the rhetoric and ideal of personal authenticity pervades our daily existence. From every corner we are told: “To thine own self be true!” This powerful moral ideal has arguably become an inescapable and hegemonic frame of U.S. cultural life in the 21st century (and more broadly middle-class life around the globe). The imperative of authentic self-realization -- to discover and become your “true self,” in opposition to mere conformity to social conventions and independent of external expectations -- is seen as essential if we are to live a healthy and fulfilling life, and to fully realize what it means to be human in the deepest sense. This course will interrogate this ideal and imperative of personal authenticity from several angles. We will begin by examining some contemporary manifestations of this ethos. We will then explore the historical roots and evolution of the emphasis on authentic selfhood in the modern West, as well as comparable notions of sincerity, selfhood, interiority, and introspection in other (non-liberal, non-Christian) cultural contexts and religious traditions. We will also consider the ideal of authenticity in light of contemporary social theory, as well as engage a variety of ethical-political critiques of authenticity. Through this, we will investigate a number of important questions: Is there such a thing as the “true self” that is autonomous and free of social influences and norms, and how does one discover this true self? What are the limits and social consequences of this aspiration towards authentic selfhood? What are the effects of the widespread commodification of authenticity, and how should we understand the relation between personal authenticity and the conditions of late-stage capitalism? Is the rhetoric of personal authenticity simply an expression of narcissistic individualism, or is there a higher moral value and ideal that it speaks to? Can community cohesion and shared collective purpose be sustained alongside the imperative of authenticity? How does the ideal of authentic selfhood interact with collective or socially-conferred identities (like race, heritage, or religion)? Is personal authenticity ultimately just a white secular value, or is it an available and achievable ideal for those who do not fit this hegemonic mold?

Requirements/Evaluation: In-class participation; Personal journaling; Semester-long research project with multiple stages and steps, culminating in a final 12-15 page paper; 3 reading response papers (that serve as steps towards research project)

Cross-listings: REL 325 HIST 325  
Secondary Cross-listing

In many historical societies, there have been tensions between the demands of economic and religious life. What can I sell, what should I do with money, and how shall I interact with strangers? What is the relationship between religious ideals and the habits of everyday life? These questions can become especially acute when representatives of two or more competing belief systems interact with each other. The medieval Mediterranean provides numerous rich examples of societies and individuals facing these questions. In this class, we will look at how medieval Jews, Christians, and Muslims resolved these and other dilemmas in the market societies surrounding the Mediterranean basin, as they created their own forms of religious law and economic philosophy. In the process, we will gain a more profound understanding of the roots of modern debates about capitalism, property, and economic justice.

Requirements/Evaluation: Attendance and participation, two short papers, one final 12-15-page research paper
Prerequisites: None
Enrollment Limit: 25
Enrollment Preferences: Junior and senior History majors
Expected Class Size: 15-20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)

REL 330 (S)  Modern Jewish Political Theory  
Cross-listings: JWST 492 PSCI 375 REL 330
Primary Cross-listing

By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst bourgeoning national self-consciousness throughout the continent, despite the liberatory promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re-constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of "Jews" and "Judaism" in these arguments. And we will ask persistently: what constitutes a "Jewish justification" for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.
Requirements/Evaluation: six short (1-2 pages) response papers; two 6- to 8-page papers, each analyzing a different view in depth; a final 18- to 20-page paper that incorporates the two previously submitted 6-8 page papers, but also compares the two views and adjudicates between them

Prerequisites: none

Enrollment Limit: 19

REL 332 (S) Islam and Feminism

Cross-listings: REL 332 WGSS 334 ARAB 332

Primary Cross-listing

This course examines the relationship between feminism and Islam, focusing particularly on Islamic feminist scholarship. We will take a genealogical approach to our study of Islamic feminism tracing the different discourses that have informed and shaped the field. The first part of the course will begin with a critical examination of orientalist and colonial representations of Muslim women as oppressed and in need of liberation. We will then explore Muslim responses so such critiques that were entwined with nationalist and independence movements. This historical backdrop is critical to understanding why the question of women and their rights and roles become crucial to Muslim self-understanding and Islamic reform. The second part of the course will focus on major intellectuals and thinkers who have influenced Islamic feminism. Finally, the last part of our course will explore the breadth of Islamic feminist literature, covering the following themes: 1) feminist readings of scripture; 2) feminist critiques of Islamic law; and 3) feminist theology.

Requirements/Evaluation: weekly responses, midterm essay, final research paper

REL 333 (S) The Politics of Myth

Myths animate ethical and political life. Shared stories that function as sources of justification and motivation are reflected in our anxieties and aspirations, in how we talk, and in how we perform our identities. These are stories about the origins of our world, the founding of the political order, the forging of groups, the menace of enemies, the triumph of heroes, the ultimate destiny of humankind. In this course, we will explore the meaning of "myth" in our ethical and political lives. We will read and discuss a wide range of approaches to myth. For instance, readings may include works by Plato, medieval Jewish and Islamic philosophers, Friedrich Nietzsche, Georges Sorel, Ernst Cassirer, and Walter Benjamin. Particular attention will be given to a set of mid-twentieth century theorists of myth who have had an especially strong impact on the meaning of myth in American popular culture: Carl Jung, Mircea Eliade, and Joseph Campbell. We will assess the enduring resonance of their ideas and explore new opportunities to think critically and imaginatively about myth in this tradition, reading works by Wendy Doniger, Jeffrey Kripal, and other contemporary scholars in religious
studies. These theoretical explorations will serve to enrich our efforts, throughout the course, to uncover the myths that animate our own lives. We will explore our myths through sustained introspection, interpretations of popular culture, and opportunities for myth-criticism and myth-making. Thus, in addition to the critical analysis of myths and myth theories, students will have the opportunity to play creatively with the possibilities of myth. The course will culminate in a final creative project engaging with the idea of myth.

Requirements/Evaluation: Two 5-7 page papers and either a final annotated creative project or a final 7-10 page paper.

Prerequisites: None

Enrollment Limit: 18

Enrollment Preferences: Religion majors and students who have taken a course in the Religion department.

REL 334  (S)  Imagining Joseph

Cross-listings: ANTH 334 REL 334 JWST 334 COMP 334

Secondary Cross-listing

Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur'an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar's wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur'an, as well as the more expansive pleasures of linking post-scriptural expressions together.

Requirements/Evaluation: occasional response papers; substantial final project and paper; class participation

REL 338  (F)  Transhumanism: Religion, Technoscience, Obsolescence

Cross-listings: STS 338 SOC 338 REL 338

Secondary Cross-listing

This interdisciplinary seminar invites students to pursue sociohistorical analysis and sustained critical discussion of the transhumanist movement and its overriding aims: the augmentation, transformation, and eventual transcendence of human biological constitution; the realization, through speculative technoscientific means, of an enhanced or even "postbiological existence"–a "posthuman condition," "Humanity 2.0." Through close readings of primary historical documents, transhumanist texts, scholarship on transhumanism, works of science-fiction film, literature, and popular...
culture, we will position the movement as an empirical conduit through which to explore the sociohistorical conditions under which transhumanist ideas and practices have emerged, circulated, and taken up residence. To that end, we will consider the ties of transhumanism to eugenics and massive investments in pharmaceuticals, anti-aging medicine, and so-called "GNR" technologies (i.e. genetics, nanotechnology, and artificial intelligence and robotics); the movement's affinities with neoliberalism and what some have pointed to as transhumanism's racialized subtext of whiteness. We will furthermore devote considerable attention to the technological singularity, the figure of the cyborg, mind-uploading, space colonization, and cryonic suspension, all of which, like transhumanism broadly, suggest that science and technology have in some sense come to operate as powerful channeling agents for the very sorts of beliefs, practices, and forms of association that theorists of secularization expected modernity to displace. Lastly, throughout the course of the seminar we will take transhumanism as a provocation to think broadly and seriously about religion, technology, embodiment, and ways of being human.

Requirements/Evaluation: informal weekly writing, two short review essays, and one 15-page seminar paper

Prerequisites: Prior coursework in sociology-anthropology, history, religion, or science and technology studies.

Enrollment Limit: 14

REL 340  Science, Religion, and the (post)colony: Critical approaches to the global history of knowledge  (DPE)

Histories of science and religion have been deeply intertwined with colonial and postcolonial history. Colonial claims to legitimacy were often rooted in perceptions of scientific and technological superiority, and colonial expansion often marched in lockstep with missionary activity and forced conversions. In the process, race and human difference emerged as concepts at the intersection of scientific and religious discourses and was forged within the colonial framework. This colonial history of science and religion impacted how scientific and religious thought, practices and institutions developed through the period of decolonization and into today. Similarly, the attendant history of race and human difference continues to influence postcolonial and contemporary discourses around race, ethnicity, identity and migration. In this course, we will trace key moments in the history of science and religion and their relation to coloniality. We will start in the sixteenth century with the rise of modern European empires, move into the height of modern colonialism, indigenous genocides and chattel slavery, and trace decolonization from the middle of the nineteenth into today. Throughout, we will investigate how science and religion emerged as concepts, practices and institutions, and how these narratives impacted, and were impacted by colonial expansion and history. We will pay particular attention to questions of race, gender, sexuality and human difference as key concepts and practices that emerged at the intersections of science, religion and (post)colonialism

Requirements/Evaluation: 2 response papers (3-5pages each) + final project (could be a 10-15p paper or creative project of any kind)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Concentrators, followed by seniors and juniors

Expected Class Size: 15

Grading:

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: The course addresses questions of race, gender, sexuality and human difference as seen through the history of science, technology and medicine. Students will creatively engage with critical race theory, postcolonial theory and queer theory. They will also investigate human suffering as a category that provides a deeper understanding of difference, diversity and equality.

REL 355  (S)  Foucault: Confessions of the Flesh

Cross-listings: REL 355 COMP 359 STS 355

Primary Cross-listing
The French philosopher, historian, and social critic, **Michel Foucault** (1926-1984) has had a massive influence across a range of disciplines. Indeed, in 2019, Google Scholar ranked Foucault as the number one most highly cited scholar in the Humanities and Social Sciences. While many of his contemporaries have faded in importance, Foucault's writings on power, madness, the history of sexuality, and the structures of domination and governmentality have become central to the theoretical canon of a range of academic disciplines. To be a scholar in the humanities today is often to be in Foucault's shadow. But despite the many references to his work, Foucault is frequently misunderstood and subsequent scholars often attribute to him positions he would have repudiated. Now almost forty years after his death, his work is also long overdue for a reappraisal as we come to understand Foucault better as a person and especially as the final, and posthumous, volume of his History of Sexuality, *Confessions of the Flesh*, has only just appeared and been translated into English. In this course we will mainly read Foucault supplemented with occasional contextual readings. Although we will touch on his earlier writings, this seminar will emphasize his middle-to-late period (beginning with *The Archaeology of Knowledge*) and including selections from his later monographs, lectures, interviews, and short writings. It will culminate in the unfinished intellectual and political project that occupied Foucault in his last days. We will think with and often against Foucault, focusing primarily on questions of power, knowledge, truth, and addressing his later emancipatory gesture toward "technologies of the self." We will also appraise the methodologies that Foucault described as "archaeology" and "genealogy." We will historicize Foucault in his life and cultural context and ask how much of his arguments still apply today. What blind-spots did he have? Which of his ideas are worth consolidating and which need repudiating? How might we go beyond Foucault?

**REL 358 (F) Religion and Law** (DPE)

**Cross-listings:** REL 358 GBST 358

**Primary Cross-listing**

This course explores the concept of "law" through an investigation of the complex relationship between law, ethics, and religion. In doing so, we will look at legal theoretical texts as well as legal anthropological studies to pose critical questions about the nature of law, the functioning logic of law, the relationship between law and lived experience, and the legal construction of categories and facts. In the course, we will consider two intersections of religion and law: the particularities of religious legal traditions and the relationship between religion and secular law. Topics will include the secular legal construction of religion, the relationship between law and ethics, the nature of legal hermeneutics, and the racial, gender, and sexual politics of legal interpretation.

**Requirements/Evaluation:** reading response, two essays, final research paper

**Prerequisites:** none

REL 360  (F)  The Gothic Cathedral: An Art History

Cross-listings:  ARTH 360 REL 360

Secondary Cross-listing
Through their enormous scale, through the gravity-defying complexity of their construction, and through the sumptuousness of their materials and decoration, Gothic cathedrals -- the medieval equivalent of the blockbuster movie, and then some -- have amazed visitors for centuries. The widespread social media reaction of shock and dismay to the fire at Notre Dame Cathedral in Paris four years ago, moreover, indicates that this power of the cathedral to dazzle and to capture hearts remains very much alive. But how have art historians, specifically, made sense of these extraordinary, and extraordinarily complex, monuments? And how have the questions they have asked about the cathedral changed over time? Through a close examination of a number of influential books, in particular -- each one of them a kind of miniature cathedral in its own right -- this 300-level seminar will investigate the shifting interpretation of the Gothic Cathedral over the past 150 years. In so doing, the seminar aims to shed light not only on the fascinating multiplicity of realities that make up the Gothic cathedral but also on the changing shape of the discipline of art history itself, from its beginnings to the early 2020s.

REL 412  (F)  Gandhi: History, Ideas and Legacy  (WS)

Cross-listings: LEAD 322 ASIA 412 REL 412 HIST 496 GBST 412

Secondary Cross-listing

This course studies the life, work, and ideas of M.K. Gandhi (1869-1948), one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. This tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the context and nature of Gandhian nationalism? Did it help to integrate the Indian nation? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Requirements/Evaluation: 5-7-page essays or 2-page critique due each week and a final report (3-4 pages) at the end of the semester.

Prerequisites: None, except students who have taken HIST488T will not be permitted to take this class.

Enrollment Limit: 10

Enrollment Preferences: Senior history majors and students who have previously taken HIST221. Students who have previously taken HIST488T will not be permitted to take this class.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

REL 420  (F)  Islam and the Image  (DPE) (WS)
Cross-listings: ARTH 521 REL 420

Secondary Cross-listing

This seminar responds to a recent incident at a US liberal arts university where a professor was sacked for showing images of Prophet Muhammad as part of her section on Islamic art. Why is image-making so hotly contested in Islam? What is the history of figural depictions in this tradition? The seminar explores artworks made for Muslim patrons from the medieval period to the modern era, considering how paintings produced for Muslim audiences can be situated within the frameworks of "Islamic art," a loaded historiographical term that has been questioned in recent times. The seminar also addresses some of the major problems that continue to haunt art scholarship in the field. For most of its history, the academic study of Islamic art has seldom considered contemporaneous literary voices that shed light on the motivations behind artworks. Furthermore, the historiography, deeply entrenched in its colonial and orientalist roots, has largely isolated images from their supporting texts--a curious oversight in light of the fact that painting in Muslim lands has historically been primarily an art of the book. These biases have affected the way museums have collected, displayed and interpreted paintings. For example, Western museums continue to place figural depictions made for books and albums in "South Asian" collections while textual manuscripts and calligraphic specimens made for the same Muslim audiences--even at times bound in the same albums--are categorized as "Islamic art." What does this isolation of text from image imply about prevailing views of Islamic art? To better understand the cultural, historical and religious context surrounding artworks students will read primary literature ranging from autobiography to devotional poetry, often written by the very patrons and subjects of the paintings to be discussed.

Requirements/Evaluation: class participation, short weekly writing assignments, final essay project

Prerequisites: Undergraduates wishing to enroll must have taken at least one art history course or one religious studies course. Undergraduates must email indicating their interest in the course prior to enrolling.

Enrollment Limit: 19

Enrollment Preferences: MA students, then advanced undergraduates

REL 421 (S) Picturing God in the Middle Ages

Cross-listings: REL 421 ARTH 421

Secondary Cross-listing

How did medieval Europeans imagine their God and how did they give what they imagined pictorial form? How were these pictures used, both in public and in private life, and why? Paying particular attention to the function and experience of medieval works of art, this seminar will examine the evolution of images of God, in both the Eastern and Western halves of Europe, and the problems these images often generated. Through readings and class discussion, the course will investigate, among other specific topics: the varied attitudes toward the representability of God in Judaism, Islam, and Christianity; the impact of the Roman cult of the emperor and of images of the dead on the earliest portraits of Christ; the cult of the icon, concerns over idolatry, and the destruction of images; ideas about spiritual versus physical vision and their influence on the making and viewing of pictures; the relationship of sacred images to relics, the Eucharist, and other aspects of Christian ritual; and the pictorial exploration of both the torture and sexuality of Christ. Students will also pursue an individual research project, in which they will examine in greater depth a specific depiction of divinity of their choosing, in light of what we have considered together in the seminar.

Class Format: Class will meet online at first but may shift to in-person if circumstances allow
**REL 425 (S) Fragment and Healing: Disability Studies and Late Antique Art**

**Cross-listings:** ARTH 425 REL 425 ARTH 584

**Secondary Cross-listing**

This seminar will investigate some of the ways that contemporary Disability Studies can help us see and think about the complexities of differently abled bodies in Late Antiquity (broadly, from ca. 200 until ca. 750), the formative period for Christian art (and consequently for much of Western art). Disability Studies is an extremely active and rich body of literature and art that has not often been brought into conversation with historical periods of art, and so this seminar seeks to open up discussion of the insights possible from that conversation, not only how Late Antique art can be re-interpreted, but also how that period of art can reveal under-explored areas in the field of Disability Studies. The seminar will undertake a mutual interrogation of accepted notions in both fields and, in this way, to explore some new understandings of Disability Studies’ capacities for allowing us to think with our art, culture, and bodies. The means at our disposal for this seminar are art of Late Antiquity and of the contemporary world, and that idea of mutual interrogation also operates in our study and display of that art. The seminar will look at art of healing and recuperation, art produced by and directed at diversely-abled bodies, and at fragments and restoration, and think about art as documents, reflections, and determinants of those bodies, now and in the past. It will, for this reason, work around the collection of WCMA, with exhibition and collection research, and the historical archives of the Library holdings, so that the widest possible study of bodies and difference is opened for our thinking and dialogue.

**Requirements/Evaluation:** participation in discussion; three 1-2-page reading reports; one 3-5-page exhibition response; one 15-20-page final essay

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** senior art-history majors and graduate students; other students will need instructor consent

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** In this seminar, students will develop skills of crafting clear and persuasive arguments through an iterative writing process. Further, to help them achieve these goals, they will receive timely comments on their written work.

MAJOR—French Language and Literature

The French major seeks to provide training in literary and cultural analysis and linguistic expression through the study of selected texts from the French-speaking world. Emphasis is placed on the changes in form and subject matter from the early modern period to the contemporary era.

The major consists of nine courses. One of these courses must be the 400-level senior seminar during the student’s final year at the College.

Students entering the major program at the 200-level may, with the permission of the Department, choose as part of their major program, one course in Art History, History, Philosophy, Comparative Literature or other subjects that relate to and broaden their study of French. Students entering the major program at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program.

Working with the major advisor, the student will formulate a curricular plan that will ensure balance and coherence in courses taken. Such balance and coherence will be based on the above areas of literary and cultural investigation. Prospective majors should discuss their program with the major advisor by the end of their sophomore year. This is especially imperative for students who are planning to spend a part or all of their junior year in France.

Inasmuch as all courses in French assume the active participation of each student in discussions conducted in the foreign language, regular attendance at class meetings is expected.

MAJOR—French Studies

The major in French Studies is an interdisciplinary program that provides students with the opportunity to acquire skills and knowledge embracing the cultural, historical, social, and political heritage of France and the Francophone world. The program allows for an individualized course of study involving work in several departments and the opportunity to study abroad.

Students electing the French Studies major should register with the French Studies faculty advisor during their sophomore year. At that time, they should submit a feasibility plan that articulates their projected program.

The French Studies major consists of ten courses satisfying the following requirements:

- at least five RLFR courses in French language, literature, film, or culture;
- the RLFR senior seminar during the student’s final year at the College;
- Electives: The remaining courses needed to complete the major must be drawn from at least three different departments and relate primarily to an aspect of the cultures, histories, societies, and politics of France and the Francophone world. These courses will be selected in consultation with members of the Department of Romance Languages. Appropriate electives might include:
  - AFR 360 Political Thought Frantz Fanon
  - ARTH 254 Manet to Matisse
  - HIST 390 Haitian and French Revolutions
  - RLFR 101-450 All courses in French and Francophone language, literature, film, and culture

THE DEGREE WITH HONORS IN FRENCH

Students majoring in French may apply to be admitted to the Honors Program in French upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional
reader). This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether they can proceed with the thesis, and if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent reading, researching (in relevant archives or with field work), and compiling a more detailed bibliography.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493-W31-494). The thesis will be written in French and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in French. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

THE CERTIFICATE IN FRENCH

The Certificate in French Language and Cultures consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher.

For students with no prior study of French, the course sequence will consist of RLFR 101-102, RLFR 103, RLFR 104, and three additional courses, with at least one of these at the 200-level or higher taken at Williams. For students starting the sequence at RLFR 103 or higher, six additional courses must be taken, including at least three French courses at the 200-level or higher. For these students starting at French 103 or higher, two electives may be taken in other departments: one elective should be in French or Francophone culture (art, literature, theatre, music) and the other in French or Francophone civilization (history, political science, philosophy).

PLACEMENT

A placement test in French is administered at Williams at the opening of the fall semester. Incoming first-year students who register for any French course above the 101 level must take this test, regardless of their previous preparation.

STUDY ABROAD

We encourage all students of French to complement their courses at Williams with the life-changing experience of studying abroad in a Francophone country. In particular, French majors and certificate students are strongly advised to complete part of the requirements for the major or certificate by studying abroad, for either a semester or a year. Most study abroad programs require applicants to have completed a fifth-semester French course in college (French 105) or higher before they go abroad. Credit for up to a total of 4 courses towards the major or certificate can be granted for either a semester or a full year abroad, at the discretion of the Romance Languages Department. Students who are planning to get credit for their study abroad courses should meet with a French faculty member in advance, to review the courses they intend to take abroad. Normally, only courses that focus on French language or Francophone literature, history, politics, art, and culture may be counted towards the major or certificate.

The final assignment of course credit will be authorized in consultation with the student’s French advisor, once the student has returned to Williams.

Such credits can only be determined by review of course format, course materials, and evidence of satisfactory academic performance; students should thus provide not only their study abroad transcript, but retain course materials (including syllabi, papers, exams, and other projects) for potential review back at Williams. While students can gain credit for 100-, 200-, and 300-level courses during their time abroad, the 400-level senior seminar must be taken during the senior year at Williams.

A placement test in French is administered at Williams at the opening of the fall semester. Incoming first-year students who register for any French course above the 101 level must take this test, regardless of their previous preparation.

STUDY ABROAD

We encourage all students of French to complement their courses at Williams with the life-changing experience of studying abroad in a Francophone country. In particular, French majors and certificate students are strongly advised to complete part of the requirements for the major or certificate by studying abroad, for either a semester or a year. Most study abroad programs require applicants to have completed a fifth-semester French course in college (French 105) or higher before they go abroad. Credit for up to a total of 4 courses towards the major or certificate can be granted for either a semester or a full year abroad, at the discretion of the Romance Languages Department. Students who are planning to get credit for their study abroad courses should meet with a French faculty member in advance, to review the courses they intend to take abroad. Normally, only courses that focus on French language or Francophone literature, history, politics, art, and culture may be counted towards the major or certificate.

The final assignment of course credit will be authorized in consultation with the student’s French advisor, once the student has returned to Williams.

Such credits can only be determined by review of course format, course materials, and evidence of satisfactory academic performance; students should thus provide not only their study abroad transcript, but retain course materials (including syllabi, papers, exams, and other projects) for potential review back at Williams. While students can gain credit for 100-, 200-, and 300-level courses during their time abroad, the 400-level senior seminar must be taken during the senior year at Williams. Early planning is essential: Students interested in studying abroad are strongly urged to attend the yearly Francophone Study Away Information Session (held each October) during their first year or sophomore year. Students will receive credit for only those study abroad programs recommended and approved by the Dean of Study Away and the Romance Languages Department. Williams has long-term affiliations with the following programs: Hamilton College (Paris), Sweet Briar College (Paris), CUPA (Paris), Middlebury College (Paris), Wellesley College (Aix-en-Provence), Boston University (Grenoble), and both SIT and CIEE (in Morocco, Senegal, and Madagascar). For more on all approved study-abroad programs, see the webpages for the French program (french.williams.edu) and Study Away (study-away.williams.edu/programs). Finally, the Department does not administer proficiency exams (for study abroad, fellowships, or job applications) to students who have not completed a French course at Williams; and most study abroad programs will not accept students who have not taken any college courses in French (at Williams) prior to their application. Students should thus plan well ahead (as early as their first year and sophomore year) to take appropriate courses at Williams, before applying for and taking part in study abroad programs in the Francophone world.
RLFR 101  (F)  Introduction to French Language and Francophone Cultures  (DPE)

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, and active engagement with music, video, and film, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. Conducted in French.

Requirements/Evaluation:  Active class participation, workbook exercises and compositions, chapter tests, midterm, and final exam.

Prerequisites:  None. For students who've never formally studied French. Students who've previously studied French (in any formal course, at any level) must take the French Placement Test in the summer or during First Days. For more info: https://french.williams.edu

Enrollment Limit:  18

Enrollment Preferences:  All are welcome, but if over-enrolled, preference will be given to first-year and second-year students and those with compelling justification for admission.

Expected Class Size:  18

Grading:  yes pass/fail option,  no fifth course option

Unit Notes:  RLFR 101-102 is a year-long course. Credit is granted only if both semesters (RLFR 101 and 102) are taken. RLFR 101-102 students must also take the French Winter Study Course.

Distributions:  (D1)  (DPE)

Difference, Power, and Equity Notes:  Through its focus on French and Francophone cultures around the world, this course enables students to gain both linguistic and cultural proficiency, and to engage with the great diversity of colonial and post-colonial cultures, histories, and identities in France and Belgium, Québec and Martinique, Sénégal and Morocco.

Enrollment Limit:  20

Enrollment Preferences:  Preference will go to first- and second-year students and those with compelling justification for admission. Statement of interest solicited if overenrolled.

Expected Class Size:  18

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D1)

Spring 2024

LEC Section:  01  M-F 9:00 am - 9:50 am  Eric J. Disbro

RLFR 103  (F)  Intermediate Studies in French Language and Francophone Cultures

As a continuation of French 101-102, this dynamic first-semester intermediate course is designed to help you improve your French, while at the same
time learning more about French and Francophone cultures, politics, literature, and film. Through the active study and daily practice of listening, speaking, reading, and writing in French, you will: continue developing your communication skills and learn to express your opinions and ideas; improve your command of spoken and written French through a revision of important grammatical structures; strengthen your reading and writing skills in order to prepare you for further study of literary texts; and develop an increased vocabulary and cultural appreciation of French-speaking cultures around the world.

Class Format: This class is scheduled to meet 5 times a week. Students will meet with the instructor 3 times a week, with the French TA once a week, and will do guided group work once a week.

Requirements/Evaluation: Class participation, Homework, Regular tests, Short Writing Assignments and Final Exam.

Prerequisites: RLFR 101-102, or by Placement Test, or Permission of Instructor

Enrollment Limit: 18

Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to first-year and second-year students and those with compelling justification for admission.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Fall 2023

SEM Section: 01 M-F 10:00 am - 10:50 am Preea Leelah
SEM Section: 02 M-F 9:00 am - 9:50 am Chase Cormier

RLFR 104 (S) Intermediate French II: Advanced Intermediate Studies in French

As a continuation of French 103, this course will help students gain greater fluency in French, through an exploration of French and Francophone literature, film, media, politics, and culture. With a focus on listening, speaking, reading, and writing, students will review advanced grammar expand their vocabulary, gain greater confidence, and both discuss and debate central questions in the social, political, and cultural landscape of French-speaking communities in Europe, Africa, and the Caribbean.

Requirements/Evaluation: Participation, Homework, Writing Assignments, Quizzes, Final Project.

Prerequisites: RLFR 103, or by Placement Test, or Permission of Instructor.

Enrollment Limit: 18

Enrollment Preferences: Enrollment preference for students who completed RLFR 103 in Fall 2023, or those who have placed into RLFR 104 on the French Placement Test.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

SEM Section: 02 MWF 9:00 am - 9:50 am Chase Cormier

RLFR 105 (F) Advanced French: Advanced Studies in French Language and Francophone Culture (DPE) (WS)

In this French course, we will read and examine literary texts from the twelfth to the 19th centuries, and films from the twentieth and twenty-first centuries. In order to analyze them, we will briefly situate them in their social and historical contexts. These works will help us better understand contemporary France and explore France's colonial past. We will also learn how to write two short research paper in French in the form of an explication de texte. While the themes, authors, time periods will vary, our approach will remain the same. Three themes, love, fear, and France's colonial past, will serve as the course's organizing principles. A small section of the course will be devoted to grammar revisions in order to continue to improve our reading and language skills. Throughout the semester we will develop our writing skills in French. Conducted in French

Requirements/Evaluation: class participation, online grammar exercises, 2 four-page papers, 1 class introduction, 2 low-stakes one-page response papers
Prerequisites: RLFR 104, placement exam, or by permission of instructor

Enrollment Limit: 15

Enrollment Preferences: All are welcome, but if overenrolled, preference will be given to first- and second-year students and French major and certificate students. If necessary, a statement of interest will be solicited.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: In this course students will practice writing two short structured papers in French where there will present their interpretation of literary or visual text. Students will write two response papers.

Difference, Power, and Equity Notes: In this course student will examine visual and literary texts that reframe difference, power and equity in relation to race, class, gender, ethnicity, sexuality, and religion.

RLFR 106  (S)  Advanced French: Danger and Desire in French Film and Fiction  (DPE)

Cross-listings: RLFR 106 COMP 107

Primary Cross-listing
This is an advanced course in French language designed to help you improve your speaking, comprehension, reading, and writing, through the dynamic study of short literary texts and films focusing on danger and desire in nineteenth-, twentieth-, and twenty-first-century France. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French literature and cinema. As a focus for improving your French, we will examine a broad range of texts and films on danger and desire in France from 1820 to 2024, with an emphasis on passion and ambition, infatuation and seduction, betrayal and vengeance, courage and cruelty, warfare and resistance. Works to include nineteenth-century texts by Chateaubriand, Duras, Balzac, Mérimée, Flaubert, Maupassant, Zola; twentieth-century texts by Colette, Camus, Sartre, Beauvoir, Duras, Ernaux, Guibert, Quint, Lindon, Vilrouge; and twenty-first-century films by Caron, Ozon, Ducastel, Martineau, Dercourt, and Becker. Conducted in French.

Requirements/Evaluation: Active class participation, grammar exercises, two short papers, midterm, and final paper.

Prerequisites: Exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor.

Enrollment Limit: 16

Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission.

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 106(D1) COMP 107(D1)

Difference, Power, and Equity Notes: This course centers on a critical examination of difference, power, and equity in French film and fiction. The content examines the effects of class, ethnicity, gender, and sexuality on social inequalities among rich and poor, soldiers and civilians, nations and colonies, men and women. The course employs critical tools to teach students how to articulate and interrogate social injustice, through reading, viewing, discussion, writing, and revision.

Spring 2024

SEM Section: 01    TR 9:55 am - 11:10 am     Brian Martin
RLFR 107 (S) Advanced French: Formation and Transformation (DPE)
This advanced course is designed to help you refine your French speaking, comprehension, and writing skills in preparation for studying abroad or for more advanced French coursework. We will explore the themes of formation (the French term that means at once education and training) and personal transformation, through fictional and autobiographical texts and films. How do individuals find their place in societies and both define and redefine their own identities? Is it possible to reflect critically on one's own formation, or is it easier to do so through works of fiction? We will also reflect on our own educational experiences as we read works by authors such as Marguerite Duras, Maryse Condé, Annie Ernaux, and Pierre Bourdieu, and watch both recent and classic films from 1950s France to 2020s Québec.

Requirements/Evaluation: One close-reading presentation and essay, one discussion-leading presentation, two analytical essays, final project

Prerequisites: Successful performance in RLFR 105 or 106, or by placement test, or permission of the instructor.

Enrollment Limit: 20

Enrollment Preferences: Students from all majors welcome, but if over-enrolled, preference will be given to French majors and certificate students.

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course explores questions of difference, power, and equity through a critical analysis of educational systems in France and the Francophone World. Although education is assumed to create equity (in both France and in North America), the content of this course will help students nuance this view and articulate how different social identities are often excluded from the power and opportunity that education seems to promise.

Not offered current academic year

RLFR 202 (F) War and Resistance: Two Centuries of War Literature in France (1800-2015) (DPE)
Cross-listings: COMP 292 RLFR 202 WGSS 201

Primary Cross-listing
In 1883, Maupassant called on his fellow war veterans and writers to join him in speaking out against warfare and violence, crying “Let us dishonor war!” From the Gallic Wars against Caesar (during the first century BC) to recent terrorist attacks in France (at the opening of the twenty-first century), the French literary tradition is rich in texts that bear witness to war and speak out against its monstrous inhumanity. While war literature in France can be traced back to ancient and medieval texts on Vercingétorix, Charlemagne, William the Conqueror, and Joan of Arc, this course will focus specifically on literary representations of war during the nineteenth- and twentieth-centuries, from the Napoleonic Wars, to the First and Second World Wars, to the Algerian and Cold Wars, and the “War on Terror.” Discussions will examine the impact of war on soldiers and civilians, patriotism and pacifism, history and memory; the implications of war as invasion and conquest, occupation and resistance, victory and defeat; the relationship of war to gender, sexuality, and ethnicity; and the role of war in colonialism and genocide. Readings to include novels, short stories, and poems by Balzac, Stendhal, Hugo, Rimbaud, Daudet, Maupassant, Zola, Cocteau, Wiesel, Duras, Camus, and Fanon. Films to include works by Resnais, Renoir, Carion, Jeunet, Malle, Angelo, Pontecorvo, and Duras. Conducted in French.

Requirements/Evaluation: active class participation, midterm exam, and two to three papers (of 3-5 pages each)

Prerequisites: exceptional performance in RLFR 105; successful performance in RLFR 106; or by French placement exam; or by permission of instructor

Enrollment Limit: 16

Enrollment Preferences: French majors and certificate students; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 292(D1) RLFR 202(D1) WGSS 201(D1)

Difference, Power, and Equity Notes: This course focuses on a critical examination of difference, power, and equity in French war literature and film. Through the study of war (as invasion and conquest, occupation and resistance, colonialism and genocide), the course thus challenges students to examine the effects of class, race, religion, ethnicity, gender, and sexuality in narratives on war and violence, and on survival and resistance.

Not offered current academic year
RLFR 213 (F) Francophone North America in the 21st Century: Revendications, réparations et retrouvailles

This course investigates post-2000 productions from Acadie, Haiti, Louisiana, and Quebec to examine the socio-literary changes and the current phenomenon of "L'Archipel linguistique." Looking at the concept of "Retrouvailles," or the gathering of Francophone regions through literary expression in a largely Anglophone continent, we will examine how literature depicts current affairs, as well as what it can do to produce change. In addition to novels and films, we will rely on radio shows, news pieces, and tv shows to get a broader picture of the present stakes. All course discussions will be in French. Topics will include socio-political and cultural issues, (neo)colonialism, activism, linguistic insecurity, and race relations as they are addressed in visual art, music, and literature. Some of the texts covered in this course are Kukum (2019) by Michel Jean, L'Enigme du retour (2009) by Dany Laferrière, Ô Malheureuse (2019) by Ashlee Michot, Suite des sens (2023) by Jean Arceneaux, Alma (2006) by Georgette LeBlanc. Conducted in French.

Requirements/Evaluation: Evaluation is based on active in-class engagement, two short written compositions, two short presentations, and a final project.

Prerequisites: French 105 or 106, or results of the Williams College French Placement Test, or permission of instructor.

Enrollment Limit: 20

Enrollment Preferences: Preference given to French majors or French certificate students and Comp Lit majors.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

SEM Section: 01 TF 1:10 pm - 2:25 pm Chase Cormier

RLFR 214 (S) Everything New is Old Again: Legacies of Medieval France

In the twelfth century, the French language shifted from a mostly ephemeral spoken language to a language that deserved to be written down. Authors began recording stories that had only been told aloud, and readers of Latin begin translating classical literature for French-speaking audiences. This huge burst of creative expression remade popular culture in ways that we can still recognize today--if we know what to look for. In this course, we will explore how our twenty-first-century passion for memes on TikTok and other social media has similar roots in twelfth-century tastes, and how the literature and culture of medieval France have shaped what we now think of as literature and pop culture. We will explore four major themes: the reinvention and adaptation of classical literature, the invention of modern romantic love, the introduction of King Arthur, and hilarious short fiction (also known as twelfth-century memes). Readings to include love poetry, short narratives both funny and serious, and longer texts about adventure and love. Conducted in French.

Requirements/Evaluation: active class participation, midterm paper, class presentation, and final project

Prerequisites: strong performance in RLFR 105; successful performance in RLFR 106; or by French placement exam; or by permission of instructor

Enrollment Limit: 16

Enrollment Preferences: French majors and certificate students; and those with compelling justification for admission

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

RLFR 216 (F) Women Behaving Badly: Deviant Women in Early Modern French Literature (DPE)

Cross-listings: RLFR 216 WGSS 216

Primary Cross-listing

Female deviance often implies resisting a dominant and oppressive patriarchal status quo embedded within cultural and historical backgrounds. This course explores female characters in early modern French literature who refuse to conform to established gender roles. Defying social constructs of femininity, through either judicious negotiations or more aggressive and violent behavior, is an important trope in the writings of both male and female authors of the seventeenth and eighteenth centuries. What constitutes deviant behavior, however, depends on social definitions of gender roles, which
evolve over time. In this course, we will first examine women's place within the historical and socio-cultural context of the Ancien Régime, which will lead to an examination of female behavior censured during the seventeenth and eighteenth centuries. We will then reflect on how we, as modern readers, perceive such deviancy at it relates to the past. Finally, we will discuss the relevance of studying deviant women in light of current events, such as the #MeToo movement, which has led to a new level of consciousness and empathy for the plight of marginalized groups. Potential readings to include Corneille's Médée, Madame de la Fayette's Princesse de Clèves, Laclos's Liaisons dangereuses, and Isabelle de Charrière's Lettre à Mistriss Henley.

Requirements/Evaluation: active class participation, one presentation (8-10 minutes), three to four papers (3-5 pages), and a longer final paper

Prerequisites: strong performance in RLFR 105; successful performance in RLFR 106; or by French placement exam; or by permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and certificate students; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 216(D1) WGSS 216(D1)

Difference, Power, and Equity Notes: This course focuses on a critical examination of difference, power, and equity in early modern France. Through the study of deviant women, the course thus challenges students to examine the effects of class, race, ethnicity, gender, and sexuality in narratives on women, misogyny, and criminality.

Not offered current academic year

RLFR 217 (F) Fierté, Sororité, Vitalité: Trans and Non-Binary Narratives of Francophone Expression

Ten years have passed since Time magazine announced to the world with its June 2014 cover story that the "Transgender Tipping Point" was upon us. The cover spoke to a nation confronting transgender equality as "America's Next Civil Rights Frontier." While this "tipping point" is perhaps salient in the United States, trans(gender), non-binary, and genderqueer identities have world histories with their own vocabularies, knowledge systems, and critiques of normativities. As an important branch of feminist, gender, and sexuality studies, transgender studies continue to revolutionize intersectional inquiry and activist initiatives. In this course, students will explore the genealogical roots of Francophone trans literatures, art, and media as they overlap with fields like critical race studies, Indigenous studies, medicine and technology, carceralty, care, sex work, and entertainment. This course provides an introduction trans studies and trans of color critique and focuses particularly on the contemporary period to gives students insight into the ongoing debates that structure the field and its near future. The course will also have a strong focus on genre and medium as students engage with visual art collections (Kehinde Wiley's Tahiti and Namsa Leuba's Illusions), documentary film (Véronique Kanor's Les femmes viennent aussi de Mars), serial web comics (Sophie Labelle's Assignée garçon), podcasts (Lauren Bastide's La Poudre with Paul Preciado), poetry and performance art (Kama La Mackerei's Zom-Fam), short stories (Chantal Spitz's "Joséphine" and Magali Nirina Marson's "Je me déserte..."), and novels (Ananda Devi's Le rire des déesses, Emmanuelle Bayamack-Tam's Arcadie, and Abdellah Taïa's Un pays pour mourir). Conducted in French.

Requirements/Evaluation: Evaluation will be based on active participation and preparation, one presentation, one short essay, one multimedia midterm project, and a final paper.

Prerequisites: French 105 or 106, or results of the College Placement Exam, or permission of instructor.

Enrollment Limit: 20

Enrollment Preferences: French majors and certificate students.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

SEM Section: 01 TF 2:35 pm - 3:50 pm Eric J. Disbro

RLFR 218 (S) Translating French: An Introduction to Theory and Practice
What decisions do translators make in order to render texts accurately (and even beautifully) into another language? What makes one translation "better" than another? Should we consider translation as a literary genre in its own right, and should we read translated texts differently from texts in their original language? This advanced course will invite you into the world of translation studies, bringing together aspects of translation theory and technical translation methodologies in order to develop your skills as translators, readers, and speakers of French. We will translate texts from a range of genres mostly from French into English and occasionally from English into French, paying particular attention to the formal and linguistic differences that can pose problems for translators. In addition to completing an independent translation project on your choice of text or media, you will also consider your own priorities as translators, formulating and revising two translation statements over the course of the semester. This course will be taught in French, and the class format will vary between lectures, seminar-style discussions, workshops, and student presentations.

Requirements/Evaluation: Active class participation, three written translations, and final translation project (including a written translation and class presentation).

Prerequisites: Strong performance in RLFR 106, successful performance in another 200-level French course, or by placement, or by permission of the instructor.

Enrollment Limit: 20

Enrollment Preferences: Preference will be given to French majors and certificate students, and to Comparative Literature majors.

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Cross-listings: RLFR 225 COMP 224

Secondary Cross-listing

From 1914 to 1918, the First World War ravaged Europe and slaughtered millions of soldiers and civilians from across the globe. Known as the "war to end (all) war(s)," World War I set the stage for an entire century of military conflict and carnage. New technologies led to unprecedented violence in the trenches, killing and wounding as many as 41 million soldiers and civilians. Beyond the slaughter at the front, the Great War also led to the global influenza pandemic that claimed up to 50 million lives, and the Armenian genocide that presaged the later atrocities of the Holocaust. The war also led to massive political transformation, from the Irish Rebellion and Russian Revolution, to the collapse of the German, Russian, Austro-Hungarian, and Ottoman Empires, and the redrawing of national borders across Europe and the Middle East. Even the end of the war with the Treaty of Versailles lay the groundwork for new animosities that would lead to the Second World War just two decades later. However, the First World War also inspired great social change, from the emergence of the United States as a global leader and the founding of the League of Nations, to growing discontent with colonial rule in Asia and Africa, and greater power for women whose wartime labor influenced the post-war passage of their right to vote in countries across Europe and North America. In our study of the Great War, we will examine texts and films that bear witness to the suffering and courage of soldiers and civilians, and consider the legacy of the war in the twentieth- and twenty-first centuries. Readings to include memoirs and novels by Barbusse, Barker, Brittain, Cocteau, Graves, Hemingway, Jünger, Remarque, Wharton, Woolf; poetry by Apollinaire, Brooke, Mackintosh, McCrae, Owen, Sassoon; films by Attenborough, Boyd, Carion, Chaplin, Jeunet, Ozon, Renoir, Trumbo, Walsh, Weir; and archival materials on the roles of Williams students and faculty during the First World War. Readings and Discussions in English.

Requirements/Evaluation: Active class participation, two shorter papers (4-5 pages), a midterm, and a longer final paper (5-7 pages).

Prerequisites: None.

Enrollment Limit: 16

Enrollment Preferences: All are welcome, but if the course is overenrolled, preference will be given to Comparative Literature majors and French majors and certificate students; if the course is over-enrolled, students will submit a form online.

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:

**Difference, Power, and Equity Notes:** As the course description explains, this course centers on a critical examination of difference, power, and equity during WWI. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequalities among soldiers & civilians, nations & colonies, men & women. The course also employs critical tools to teach students how to articulate and interrogate the social injustices of the Great War, from reading & discussion, to analytical essays & archival investigation.

SEM Section: 01    TR 8:30 am - 9:45 am     Brian  Martin

**RLFR 229  Black Outside the U.S.**
This course explores multiple ways Black identity evolves, adapts and is experienced differently depending on location. Students analyze Black experience in the U.S., France and Senegal through a range of texts from books and social media to music and film. One key aspect of the course is a study abroad trip to Senegal, which increases cultural awareness through experiential learning. This combination of textual learning with experiential knowledge exemplifies how language, religion, gender, geography, and performance shape one's racial identity. In the first section of the course, students investigate Black experience in the U.S., focusing on such topics as the one-drop rule, racial profiling and where mixed people fit within Black/White tensions. The second section highlights the politics of language in France. Students explore how words like "Black," "noir" and "race" have strong political connotations in France and spur both resistance to and alliance with Black American civil rights history. In the third part of the course, students visit Dakar, Senegal, and analyze Blackness through their own observations and encounters. Their trip insights jumpstart the final focus of the course on Senegal. Students investigate the influence of French colonialism on Black identity in Senegal, which makes the two geographical experiences of Blackness very different but still forever linked.

**Class Format:** seminar, the course includes a required spring break trip to Dakar, Senegal, which is no additional cost to students

**Requirements/Evaluation:** evaluation will be based on class participation, short weekly reading responses, two 4-5 page papers, a presentation based on the spring break trip, and a final presentation including a short 2-page report

**Prerequisites:** none

**Enrollment Limit:** 8

**Enrollment Preferences:** students who have taken other AFR courses, Francophone speakers and students

**Expected Class Size:** 8

**Grading:**

**Distributions:** (D2)

**RLFR 232  (S) Liberté, Egalité, Fraternité ? Race, Gender, and Political Power in Eighteenth-Century France** (DPE)

**Cross-listings:** RLFR 232 COMP 219

**Primary Cross-listing**
The French Revolution of 1789 was, to a large extent, inspired by Enlightenment thinkers such as Voltaire, Rousseau, and Diderot who promoted ideas on individual liberty, scientific progress, religious freedom, and secularism. The Revolution brought with it promises of a society freed from the abuses of an absolute monarchy. Yet as feminist thinker Olympe de Gouges would note, when France redefined its notion of citizenship after 1789, it did not include women and people of color. This course examines Enlightenment ideas that led to the French Revolution, while analyzing how those ideas failed to bring true equality. Voltaire, Buffon, and Montesquieu all advocated for the abolition of slavery, but they also held racist and sexist views, justified by pseudoscientific discourse. By further juxtaposing these thinkers with feminist and abolitionist authors such as Olympe de Gouges and Claire de Duras, we will examine how eighteenth-century female authors advocated for the rights of women. Finally, we will analyze artworks such as Marie-Guillemine Benoist's *Portrait d'une nègresse* (1800) and discuss how France is using such works today to reckon with its history of discrimination.

**Requirements/Evaluation:** active class participation, one presentation (8-10 minutes), three to four papers (3-5 pages), and a longer final paper

**Prerequisites:** excellent performance in RLFR 105; successful performance in RLFR 106; other RLFR 200-level courses; or by French placement exam; or by permission of instructor
Enrollment Limit: 20  
Enrollment Preferences: French majors and certificate students; Comparative Literature majors; and those with compelling justification for admission

Difference, Power, and Equity Notes: In its focus on Race, Gender, and Political Power, this course centers on a critical examination of difference, power, and equity in eighteenth-century France. Through the study of enlightenment and feminist thinkers and leaders, the course asks students to analyze the social, political, and discursive effects of class, race, ethnicity, gender, and sexuality in narratives on revolution, and to re-examine both past and present definitions of "liberty, equality, fraternity."

Not offered current academic year

RLFR 234  (S) Francophone Oceania: The Other Side of the Postcard  
Manava i Te Ao Ma'ohi Tongan-Fijian author Epeli Hau'ofa writes: "Centuries before Europeans entered the Pacific, in the days when boundaries were not imaginary lines in the ocean but points of entry that were constantly negotiated and even contested, the sea was open to anyone who could navigate a way through." Of critical importance to Oceanian communities and scholarship today is the project of remembering and re-membering the stories, knowledges, travel routes, and more-than-human ecologies that have crisscrossed the vast aqueous landscapes of this "other" side of the globe. This course is a comprehensive survey of the literature, modern history, and aesthetics that inform the field of contemporary Francophone Oceanian Studies. Major concepts in Indigenous Oceanian philosophy and genealogies of thought (from Ma'ohi, Kanak, and Ni-Vanuatu communities in particular), European imperialism and racial politics, gender and sexuality, maritime knowledges, the French nuclear agenda and climate fiction will be studied. Students will use multimedia formats and storytelling techniques to cross-examine narrative development, philosophy, and Oceanic history from a comparative perspective. Texts may include: Déwé Gorodé's Sous les cendres des conques (1985), Chantal T. Spitz's L'île des rêves écrasés (1991), Claudine Jacques' L'Âge du perroquet-banane, Parabole païenne (2002), Ari'irau's Matamimi ou la vie nous attend (2006), Nicholas Kurtovich's Dans le ciel splendide (2015), Titaue Peu's Pina (2016), and Titaue Porcher's Hina, Maui et compagnie (2018) among others. Conducted in French.

Requirements/Evaluation: Evaluation will be based on active participation and preparation, two short presentations, a guided journal, and a final project.
Prerequisites: RLFR 105 or 106; or results of the College Placement exam; or permission of Instructor.
Enrollment Limit: 20
Enrollment Preferences: French majors and certificate holders
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option

RLFR 260  (F) Francophone Graphic Novels (DPE)  
Cross-listings: RLFR 260 COMP 260  
Primary Cross-listing
In this class we will read contemporary graphic novels and bandes dessinées from Côte d'Ivoire, Morocco, Guadeloupe, Lebanon, France, and Québec to analyze how they approach subjects such as colonial history, migration and discrimination, gender and sexuality, and representations of disability and the racialized body. We will pay particular attention to the visual form and the critical theory of the graphic novel to further understand why this hybrid genre has become so popular and widespread, and how it is shaping conversations about difference and power in the Francophone world. Conducted in French.

Requirements/Evaluation: weekly 1-page response papers, two short 4-5-page papers, presentation and final 7-8-page research paper
Prerequisites: RLFR 105, 106, by placement or by permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and certificate students, Comparative Literature majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 260(D1) COMP 260(D1)

Difference, Power, and Equity Notes: The readings in this course focus on French colonial and Francophone postcolonial history, contemporary migration, and structures of discrimination built on race, religion, gender, and ableism in the French-speaking world. We will explore how graphic novels in their hybrid visual/verbal forms propose different ways of shaping the dynamics and the discourse of difference and power.

RLFR 262 (S) Lâche pas la patate: Francophone Culture in Louisiana

The expression "Lâche pas la patate," or "don't drop the potato" is a way of saying "don't ever stop speaking French in Louisiana." This begs the question: why preserve a language? In Louisiana, Francophone activists have been fighting to preserve their unique dialect of French--or what Professor Barry Jean Ancelet calls "the problem language"--for decades. By promoting the education and use of French in the state, what else are they preserving? From historical, thematic, and literary perspectives, this course is designed to provide an answer to such questions through the examination of Francophone Louisiana from its foundation as a French colony to today. In this course, we rely on contemporary publications and media in French to get a broader picture of the current stakes in Francophone Louisiana. Topics will include sociolinguistics, race relations, creolization, activism, and Americanization. Primary sources include rituals, cartoons, films, memes, music, literature, and cuisine. Texts and media (such as films and podcasts) included are Les Aventures de Boudini et ses amis, Tout bec doux, Œ Malheureuse, Film Quest, L'Habitation Saint-Ybars, Bayou zen, Finding Cajun, Mille misères La Veillée, Charrer-Veiller, Feux Follets, Istrouma : Manifeste Houma. Conducted in French.

Requirements/Evaluation: Evaluation is based on active in-class engagement, a mid-term exam, two short presentations, and a final research project.

Prerequisites: French 105 or 106; or results of the College Placement Test, or permission of instructor.

Enrollment Limit: 20

Enrollment Preferences: French majors/certificate students, comp lit majors.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

RLFR 300 (S) The Banlieue in Literature, Music, and Film (DPE) (WS)

Cross-listings: COMP 336 AFR 339 RLFR 300

Primary Cross-listing

The banlieue looms large in the French collective imagination. From its origins in medieval law, the term banlieue at the end of the 20th century has taken on multiple, at times overlapping, but almost exclusively negative meanings. It designates a peripheral geographical space often in contrast to its city center, social exclusion, "urban culture"--as in Hip Hop-produced within that space, and last but not least the symbolic bias through which its inhabitants are viewed (Vieillard-Baron). In this course, we will examine various constructions of the banlieue in French music, a manifesto, film, blogs, and literature to focus on the analytical, contestatory and affirmative dimensions of these narratives. Two decades after the film La haine, and ten years after the riots, how are filmmakers, artists, authors, and scholars of the banlieue reimagining and reframing the banlieue? What do current depictions of banlieues in the French media tell us about the State, French politics, and the state of French politics? What do "banlieue films" and "banlieue lit" tell us about the banlieue? In this course, conducted in French, we will read, watch, and listen to various constructions of the banlieue in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.
Requirements/Evaluation: 3 thesis five-page research papers, 2 start-of-the-class brief presentations, active participation to in-class discussions and mini-conference on the banlieue (class final project).

Prerequisites: RLFR 105 and above

Enrollment Limit: 14

Enrollment Preferences: French majors and certificate students, Africana and Comparative literature students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 307 (F) Building Francophone Cities: Literature, Art and History (DPE)

Cross-listings: COMP 308 RLFR 307

Primary Cross-listing
Through literature, visual art, and urban history, this class will engage with the remarkable histories, presents and imagined futures of five Francophone cities: Casablanca (Morocco), Algiers (Algeria), Kinshasa (Democratic Republic of the Congo), Fort-de-France (Martinique) and Port-au-Prince (Haiti). We will learn about their colonial foundations and postcolonial transformations while paying attention to how these urban spaces and their people and histories are represented and imagined by poetry, novels, and visual art. (Conducted in French)

Requirements/Evaluation: Active participation, weekly 1-page response papers, midterm 5-page paper, final project (oral presentation and 8-page paper).

Prerequisites: RLFR 105 or above, or by permission of instructor

Enrollment Limit: 18

Enrollment Preferences: French majors or certificate students, Comp. Lit. majors

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 308(D1) RLFR 307(D1)

Difference, Power, and Equity Notes: This course examines the French colonial history and postcolonial futures of five major Francophone cities and pays particular attention to questions of representation of class, race and gender in the historical, literary and visual record.

Not offered current academic year

RLFR 318 (F) Twentieth-Century French Novel: From Adversity to Modernity (DPE)

Cross-listings: RLFR 318 COMP 318

Primary Cross-listing
In his futurist novel Paris in the Twentieth Century (1863), Jules Verne envisions an era of technological superiority, complete with hydrogen cars and high-speed trains, televisions and skyscrapers, computers and the internet. But in Verne's vision of modernity, technological sophistication gives way to intellectual stagnation and social indifference, in a world where poetry and literature have been abandoned in favor of bureaucratic efficiency, mechanized surveillance, and the merciless pursuit of profit. To contest or confirm this dystopic vision, we will examine a broad range of
twentieth-century novels and their focus on adversity and modernity. In a century dominated by the devastation of two World Wars, the atrocities of colonial empire, and massive social and political transformation, the novel both documented and interrogated France's engagement with race and ethnicity, gender and sexuality, colonialism and immigration. Within this historical context, we will discuss the role of the novel in confronting war and disease, challenging poverty and greed, and exposing urban isolation and cultural alienation in twentieth-century France. Readings to include novels by Colette, Genet, Camus, Duras, Ernaux, Guibert, Begag. Lectures to include discussions of Gide, Proust, Sartre, Beauvoir, Cixous, Foucault, Jelloun, Djébar. Films to include works by Fassbinder, Annaud, Lioret, Ducastel, Martineau, Téchiné, Charet. Conducted in French.

Requirements/Evaluation: Active class participation, two shorter papers, a midterm, and a longer final paper.

Prerequisites: A 200-level course (at Williams or abroad), or by placement test, or permission of the instructor.

Enrollment Limit: 16

Enrollment Preferences: French majors and certificate students, Comparative Literature majors, and those with compelling justification for admission. Seniors returning from Study Abroad (in France or other Francophone countries) are particularly welcome.

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 318(D1) COMP 318(D1)

Difference, Power, and Equity Notes: As the course description explains, this course focuses on a critical examination of difference, power, and equity in twentieth-century France. The course also employs critical tools to teach students how to examine the roles of race and ethnicity, gender and sexuality, colonialism and immigration, in the French novel's critical representation of war and disease, poverty and greed, urban isolation and cultural alienation during the twentieth-century.

Fall 2023

RLFR 320 (F) Transcending Boundaries: The Creation and Evolution of Creole Cultures (DPE)

Cross-listings: GBST 306 RLFR 320 COMP 310 AFR 306

Primary Cross-listing

Born out of a history of resistance, Creole cultures transcend racial boundaries. This course provides a comprehensive framework for understanding the creation of Creole nations in various parts of the world. Beginning with an examination of the dark history of slavery and French colonialism, we will reflect upon the cultural transformation that took place when people speaking mutually unintelligible languages were brought together. We will then delve into the study of how deterritorialized peoples created their languages and cultures, distinct from the ones imposed by colonizing forces. As we journey from the past to the present, we will also explore how international events such as a worldwide pandemic, social justice, racism, and police brutality are currently affecting these islands. Potential readings will include prominent authors from different Creole-speaking islands, including Frantz Fanon and Aimé Césaire from Martinique, Maryse Condé from Guadeloupe, Ananda Devi from Mauritius and Jacques Roumain from Haiti. Conducted in French with introductions to different creoles.

Requirements/Evaluation: Active class participation, three papers (of 3-4 pages each), presentation, final research paper (7-8 pages)

Prerequisites: Any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: All are welcome. If overenrolled, preference will be given to French majors and certificate students; Comparative Literature majors; Africana Studies students; Global Studies students; and those with compelling justification for admission

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 306(D2) RLFR 320(D1) COMP 310(D1) AFR 306(D2)

Difference, Power, and Equity Notes: This course qualifies for a Difference, Power, and Equity requirement because it examines the history of slavery as related to French colonialism in different parts of the world. It also considers International issues of social justice, racism and police brutality.
RLFR 360 (S) Repairing a Broken World: Intro to North African Contemporary Art (DPE)

Cross-listings: ARTH 560 ARAB 360 RLFR 360 COMP 361 ARTH 460

Primary Cross-listing

How do artists respond to a world in crisis? How does visual art engage violent histories, injured bodies, social injustice and ecological disaster? In this course we will explore the political and ethical concept of repair as it emerges in the work of contemporary North African visual artists. Repair is both a material and symbolic transformational practice of putting together something that is torn or broken. It is never complete, nor does it redeem a history of harm or violence. Rather repair is an invitation: a bringing of people, histories, objects, buildings, feelings and geographies into relation with one another in order to link worlds that have been splintered and separated. It is also a call to imagine other futures. North African contemporary artists have deeply engaged in this type of repair work, attending to colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity and broken transmission of memory. We will dive into the work of individual artists as well as collectives while reading theoretical texts about broken-world thinking, reparative epistemology, alternative archives, and material reparations.

Class Format: Section 1 is conducted entirely in French. Section 2 is conducted in English (with the option of selected reading in French). Students are welcome to sign up for either section but students taking the course for RLFR credit must register for section 1.

Requirements/Evaluation: For undergrads: Active participation, weekly glow posts, 5-page mid-term paper, 10-12 page final paper and presentation.
For grad students: Active participation, weekly glow posts, 5-page mid-term paper, and 20-page final paper and presentation.

Prerequisites: For RLFR students, any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18/sec

Enrollment Preferences: If over-enrolled, preference will be given to RLFR, ARAB, ARTH and COMP majors, and only 4 spots will be offered to Grad Art students.

Expected Class Size: 15/sec

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Difference, Power, and Equity Notes: This course critically examines art work that engages colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity.

Not offered current academic year

RLFR 378 (S) Proust's "In Search of Lost Time"

Cross-listings: RLFR 378 COMP 378 ENGL 378

Secondary Cross-listing

In this seminar we will study Marcel Proust's novel-sequence In Search of Lost Time, widely regarded as one of the most transformative works of 20th-century fiction. The first-person narrative chronicling the life of a fictional figure bearing a close relationship to Proust himself spans several decades from the late 19th to the early 20th century, centering on French high society as it enters the modern world, shaped by historical events such as the Dreyfus Affair and the First World War. Proust's exploration of the consciousness of the protagonist, an aspiring writer, has led readers to see him as a philosopher of aesthetics, of the psyche, of time and memory, and of the nature of desire. His narrative ranges from meditations on such subjects to social satire to absorbing and sometimes soap opera-like plots exploring upward and downward social mobility and a wide array of sexual entanglements, straight and queer. Through his fluent prose, Proust renders the vicissitudes of desire, loss, and joy, of betrayal and emotional intransigence, and tests the power of memory and the imagination to recapture the past. Because of the length of In Search of Lost Time, the emphasis of the course will be more on reading (about 7 to 7½ hours per week) and less on writing (four or five 1½-page journal entries and a final paper of 8-10 pages) than the average 300-level course; and approximately one-third of the sequence will be bracketed as optional reading.

Requirements/Evaluation: Regular class participation, several 2-page journal entries, and a final paper of 8-10 pages

Prerequisites: a 100-level ENGL course, a score of 5 on the AP English Lit exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 22
Enrollment Preferences: English, French, and Comparative Literature majors
Expected Class Size: 16-18
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 378(D1) COMP 378(D1) ENGL 378(D1)
Attributes: ENGL Literary Histories C

Spring 2024
SEM Section: 01 MR 2:35 pm - 3:50 pm Stephen J. Tifft

RLFR 410  (F) Senior Seminar: Movement and Migration  (DPE)
How do movement and migration produce and disrupt constructions of identity, home, and the nation? In the context of movement and migration, how is place is imagined, experienced and remembered? What are the relationships between movement and containment, flight and freedom? Over the course of the semester, we will examine literary texts, film and visual art from French-speaking communities that focus on: the immigration experience in France, the construction of a Francophone Atlantic identity, internal migration between rural and urban spaces, clandestine migration between Africa and Europe, population displacement due to war, and the possibility of creating portable or nomadic places of memory. Works by Chamoiseau, Glissant, Diome, Condé, Maffre, Pineau, and Binebine among others. Conducted in French.

Requirements/Evaluation: Weekly 1-page response papers, 5-page mid-term paper and a final 10-page research paper and presentation.
Prerequisites: Any 200-level RLFR course, or by permission of instructor
Enrollment Limit: 15
Enrollment Preferences: Senior French majors and students completing the certificate in French, but open to advanced students of French.
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: Students will explore how literature, film and art narratives on migration and movement challenge (and also sometimes replicate) discourses of exclusion and structures of discrimination based on race and ethnic identity and gender. While the course focuses on French-speaking communities and people, we will think broadly about difference and power as they relate to movement, flight and freedom.
Not offered current academic year

RLFR 414  (S) Senior Seminar: Coming of Age: French and Francophone Childhood and Adolescent Film  (DPE)
Cross-listings: RLFR 414 COMP 414
Primary Cross-listing
Like the bildungsroman in literature, the coming of age story is a genre in itself in cinema. In this senior seminar, we will watch, discuss, and analyze French and Francophone childhood and adolescent narrative films whose protagonists bring into focus larger issues such as racial discrimination, class, gender, sexual identity, social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking. We will watch seminal films by Euzhan Palcy, the Dardennes brothers, Céline Sciamma, Férid Boughédir, François Truffaut, Faïza Ambah, and Raoul Peck.

Requirements/Evaluation: three three-page response papers; thesis statement, methodology, and works cited list on one page; 2 low-stakes presentations and one script of a video essay or academic journal "special issue" essay
Prerequisites: 200-level RLFR courses
Enrollment Limit: 19
Enrollment Preferences: French and Comparative Literature majors and certificate students
Expected Class Size: 10
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 414(D1) COMP 414(D1)

Difference, Power, and Equity Notes: This course qualifies for a Difference, Power, and Equity requirement because the films we focus on racial inequality, class, gender, sexual identity, post slavery society in the Caribbean, lack of social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking.

Not offered current academic year

RLFR 415  (S)  Breaking the Silence: Women Voices, Empowerment and Equality in the Francophone World  (DPE)

Cross-listings: COMP 415 WGSS 415 RLFR 415

Primary Cross-listing

How have Francophone women challenged the historical and current effects of colonialism and gendered racism in France and the Francophone world? How have Francophone women writers challenged the status quo of patriarchy and advocated for change? Beginning with political activist Olympe de Gouges, who published Le droit de la femme et de la citoyenne (1791) challenging gender inequality in France, we will then examine Claire de Duras' portrayal of the intersection between race and gender, Simone de Beauvoir's challenge to traditional femininity and gender roles, and Ananda Devi's intimate portrayal of violence against women in post-colonial societies. Throughout the course, we will use a feminist and intersectional lens to analyze how Francophone women writers have broken the silence then and now.

Requirements/Evaluation: Three 3-4-page response papers, a final 10-page research paper, presentation and active participation.

Prerequisites: Any 200-level RLFR course, or by permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Senior French majors and students completing the certificate in French, but open to advanced students of French; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 415(D1) WGSS 415(D2) RLFR 415(D1)

Difference, Power, and Equity Notes: In its focus on Race, Gender, and Political Power, this course centers on a critical examination of difference, power, and equity. This course uses a feminist and intersectional lens to analyze how French and Francophone women writers have challenged the historical and current effects of colonialism and gendered racism.

RLFR 511 (F) Intensive French Grammar and Translation
This course is designed to offer students a thorough and systematic review of sentence structures and grammar to develop a reading knowledge of French. Through this intensive study, students will learn to decipher the subtleties of the written language, and as they become more confident they will start translating a variety of short excerpts. Students are also expected to learn and develop a wide lexical range centered on art history and criticism, but not limited to it.
Class Format: classes meet twice weekly and are conducted in English
Requirements/Evaluation: class participation, papers, a midterm, and a final examination
Prerequisites: a strong interest and need to learn French
Enrollment Preferences: although this course is to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll by permission of the instructor
Grading: pass/fail option only
Distributions: (D1)

Not offered current academic year

RLFR 512 (S) Readings in French Art History and Criticism
This course is designed to provide Graduate Program students and interested others with knowledge of French acquired through translation and interpretation. The core of this course is based on the reading and translating of a variety of critical works covering different periods and genres in the field of art history. The material read will be analyzed in form and content, translated or summarized, in order to develop the skills and understand the techniques necessary for reading French accurately. Grammar will be reviewed in context.
Requirements/Evaluation: evaluation is based on class participation, papers, a midterm, and a final examination
Prerequisites: RLFR 511 or permission of instructor; undergraduates are welcome with permission of instructor
Grading: pass/fail option only
Distributions: (D1)

Not offered current academic year
Visiting Assistant Professor: M. Sassi

The study of Italian in the target language encourages students to gain a deep appreciation of the language, culture and literature through active participation and meaningful experience with the culture on its own terms. Italian courses at Williams are therefore conducted exclusively in Italian in order to enhance and reinforce the emotive and cognitive involvement of the students as they are introduced to the Italian world-view in a lively and natural manner. Students desirous of more contact with Italian are encouraged to attend the weekly Italian Table in the designated college dining hall. More information can be found at cfllc.williams.edu/italian.

---

RLIT 101  (F)  Elementary Italian
This course is designed for beginners. Its goal is to allow students to develop basic oral/listening and reading/writing proficiency in Italian. During the semester, students will be trained in grammar, pronunciation, listening-oral skills, reading, and writing in Italian by studying various communication settings and real-life situations. The class is conducted entirely in Italian.

Class Format: five hours a week with the professor

Requirements/Evaluation: participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams

Prerequisites: none; not open to those who have had one year or more of high school Italian

Enrollment Limit: 20

Enrollment Preferences: instructor will prioritize on the basis of study abroad plans and year at Williams

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Unit Notes: students registered for RLIT 101-102 are required to attend and pass the sustaining program during Winter Study; credit granted only if both semesters (RLIT 101 and 102) are taken

Distributions: (D1)

Fall 2023

SEM Section: 01    M-F 9:00 am - 9:50 am     Mario  Sassi

RLIT 102  (S)  Elementary Italian
This course is designed for beginners who already have some basic knowledge of Italian. Its goal is for students to review and expand their oral/listening and reading/writing proficiency in Italian. During the semester, students will continue to learn Italian grammar, vocabulary, and pronunciation while improving listening-oral skills, reading, and writing in Italian. The class is conducted entirely in Italian.

Requirements/Evaluation: participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams

Prerequisites: RLIT 101 and the Winter Study sustaining program; not open to those who have had one year or more of high school Italian

Enrollment Limit: 20

Enrollment Preferences: instructor will prioritize on the basis of study abroad plans and year at Williams

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: students registered for RLIT 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLIT 101 and 102) are taken

Distributions: (D1)

Spring 2024
RLIT 105 (F) Pathway to Proficiency

The course aims primarily to enhance the student's speaking, reading, and writing ability while introducing the formal study of Italian culture and society by analyzing short literary texts, articles, films, shows, and podcasts. In addition, students will review and expand the previous semesters' grammar structures to achieve a higher level of fluency and sophistication in language production. Italian 105 is intended for study-abroad returnees and other advanced speakers; students who have been particularly successful in Italian 101-102 are also encouraged to enroll. The class is conducted entirely in Italian.

Requirements/Evaluation: oral presentations, midterm and final exams, tests, compositions, participation

Prerequisites: RLIT 101/102 or by permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Students from 101/102 classes, as well as study-abroad returnees.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2023
THE MAJOR IN SPANISH

Students who major in Spanish can expect to acquire linguistic fluency along with in-depth knowledge of the cultures of Spain and Latin America. Through the study of the major writers and historical events of the Spanish-speaking world, our program offers training in literary analysis and linguistic expression, as well as a deep appreciation of Hispanic civilizations.

The major consists of nine courses above the 102 level. In exceptional circumstances, the Department may decide to accept RLSP 101-102 for the Spanish major. One of the nine courses must be the 400-level senior seminar taken during the student's final year at the College; another must be a course that substantially focuses on literature or cultural texts produced before 1800. Students entering at the 200-level may, with the permission of the Department, enter at this level; they must complete the other required courses by the end of their junior year.

Students entering at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program. Working with a member of the Spanish faculty, the student will formulate a curricular plan that will ensure balance and coherence in courses taken prior to declaring a major in Spanish. This is especially imperative for students who are planning to spend a part or all of their junior year in Latin America or Spain.

THE DEGREE WITH HONORS IN SPANISH

Students majoring in Spanish may apply to be admitted to the Honors Program in Spanish upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal. Two routes are available to those who wish to apply for the degree with honors.

The first of these involves the writing of a senior thesis.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader).

This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether they can proceed with the thesis, and if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent compiling a more detailed bibliography and reading.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493-W31-494). The thesis will be written in Spanish and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in Spanish. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

The second route is a group of three clearly related courses (offered by the Department of Romance Languages or by other departments, such as History, Art, Philosophy, English, etc.), only one of which may be counted in the nine courses comprising the major. One of the courses will be an Independent Study (plus senior year WSP 30) in the spring of the senior year, at the end of which the student will write an essay that synthesizes the
content of the three related courses. Students may apply for this route by November 2 of the senior year.

In the case of both routes to the degree with honors, the department’s recommendation for graduation with honors will be based on the originality and thoroughness of the finished project.

THE CERTIFICATE IN SPANISH

The Certificate in Spanish Language and Culture consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher. Those so interested should express their intent to the chair of the department by March 1 or earlier.

For students with no prior Spanish background, the course sequence will consist of Spanish 101-102, Spanish 103 and 104, and three courses in Spanish above the 104 level, with at least one of these courses at the 200-level or higher taken at Williams. If the student starts out the sequence at Spanish 103, in addition to the three courses in Spanish beyond the 104 level (including a 200-level course or higher), two electives may be taken in other departments. One elective should be in Spanish or Latin-American cultural history (art, literature, drama, music) and the other in Spanish or Latin-American intellectual, political, or social history. Spanish 200, 201, or 208 can be counted for the elective requirement.

Electives may be considered from a variety of departments and programs. However, students should consult with the chair of Romance Languages before making any enrollment decisions.

PLACEMENT

Students come to study Spanish at Williams with a wide range of backgrounds and prior experiences. Some will have studied Spanish for many years in high school and earlier. Others will have grown up speaking Spanish with family and friends but had little opportunity to study the language at school. Others have lived in Spanish-speaking countries or otherwise studied in immersive contexts. And for others, Spanish is a brand-new language that they are eager to begin learning.

Whatever your previous experience with Spanish, ¡Bienvenida! ¡Bienvenido! We are glad to have you with us. In order to figure out the most appropriate point of entry, we ask that all students who wish to begin their study of Spanish in the new academic year take the department's placement exam when it is offered during First Days. The only students who don't need to take the placement exam are those who qualify as “true beginners,” those with no previous experience of Spanish and for whom 101-102 is obviously the right choice. Everyone else should take the placement test. After you do, the Registrar's Office will notify you of the level and/or course the Spanish faculty have recommended for you. You should free to reach out to the department chair, your recommended instructor, or any other faculty member if you have questions or concerns about your placement.

STUDY ABROAD

Spanish majors, as well as non-majors interested in further exposure to the language and the culture, are strongly encouraged to study in Spain or Latin America for either a semester or a full year. We recommend that you start planning for study abroad as early as possible, and that you speak to our faculty early on to go over the many possible destinations and programs available to you. In recent years, Williams students have studied in such varied and far-flung locations as Buenos Aires, Havana, Lima, Barcelona, and Madrid. Those who are interested in Madrid may wish to consider the Hamilton College program, with which we maintain consortial ties. Credit for up to four courses can be granted at the discretion of the Department for study overseas. Those four courses count towards the certificate or the major in Spanish. Students interested in study abroad should consult with a member of the department at their earliest convenience.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, provisional approval can be granted (students should be sure to contact the department for details).

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus, including readings/assignments. If it is a program we are familiar with, the course title and description are enough. If it is a new program/new type of course we need all the available materials (syllabus, assignments, etc.).

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. Four maximum.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. They have to be courses that focus on language, culture, history, or politics of the target language/culture.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Our Senior Seminars are required for the major.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study
away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

This hardly ever happens but could happen if a student doesn't seek out pre-approval from a faculty member.

**RLSP 101 (F)  Elementary Spanish**

This course focuses on grammar, elementary composition, practice in conversation, and reading of short, easy prose. It is taught by the intensive oral method.

**Requirements/Evaluation:** participation, regular homework exercises, quizzes, a midterm, and a final exam. All students must take the Winter Study Sustaining program to continue to RLSP 102.

**Prerequisites:** This course is for students who have no previous background in Spanish.

**Enrollment Limit:** 20

**Enrollment Preferences:** Students with two or more years of High School Spanish are normally not eligible. Preference given to those with potential interest in certificate or major.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Fall 2023

SEM Section: 01  M-F 10:00 am - 10:50 am  Isaac C. Veysey-White

**RLSP 102 (S)  Elementary Spanish**

This course is a continuation of RLSP 101. It focuses on grammar, elementary composition, practice in conversation, and reading of easy texts. It is taught by the intensive oral method.

**Class Format:** The class meets five hours a week; students will complete workbook and lab exercises weekly.

**Requirements/Evaluation:** Daily preparation and participation, regular assignments, frequent tests, a midterm and a final. At least two cultural activities per semester must be attended.

**Prerequisites:** RLSP 101; this course is for students who have studied less than two years of Spanish in secondary school. Students must complete RLSP 101 as well as the Winter Study sustaining program to be eligible to enroll.

**Enrollment Limit:** 20

**Enrollment Preferences:** Students enrolled in RLSP 101.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Students in RLSP 101-102 are required to attend and pass the sustaining program during the winter study period.

**Distributions:** (D1)

Spring 2024

SEM Section: 01  M-F 10:00 am - 10:50 am  Leyla Rouhi

**RLSP 103 (F)  Intensive Intermediate Spanish**

**RLSP 103 (F) Intensive Intermediate Spanish.** This course is a continuation of Spanish 101-102. It is designed to help students improve their proficiency in each of the major skill-groups (listening, speaking, reading and writing) while providing an introduction to the cultures of the Spanish-speaking world. Classroom activities and homework are designed to increase vocabulary and improve your ability to handle daily life in a
Spanish-speaking country, to express your views on complex subjects such as art and politics, and to increase your knowledge of the cultural traditions of Latin America and Spain. Film screenings and readings in Hispanic literature, culture and politics will provide material for in-class discussion and some writing assignments. This course provides the linguistic and cultural training that is necessary to engage the diverse Spanish-speaking communities of Latin America, Spain and the US; it will help to prepare students for further literary and cultural studies as well as provide skills that are increasingly essential in fields such as medicine, law, and education. **Conducted in Spanish.**

**Class Format:** Class meets four hours a week: three times with the professor (either in the morning or at noon) and one time in the afternoon with the TA.

**Requirements/Evaluation:** Regular attendance and active in-class participation, workbook exercises and weekly compositions, quizzes, midterm and final exams.

**Prerequisites:** RLSP 101-102 or by Spanish placement exam

**Enrollment Limit:** 20

**Enrollment Preferences:** If the course is over-subscribed, priority will be given to first-year students and others with a demonstrable commitment to study of Spanish.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

---

**RLSP 104 (S) Intensive Intermediate Spanish, Upper Level**

This course is a continuation of Spanish 103. During the spring semester we resume our work to expand your proficiency in each of the major skill-groups (listening, speaking, reading and writing) while increasing familiarity with the vibrant cultures of the Spanish-speaking world. Students in both sections of RLSP 104 can once again expect to sample a variety of written and audiovisual media--poems and short fiction, essays, journalism, blogs and film--to deepen their understanding of Hispanic cultures. Students in Spanish 104 can expect to write regularly and to meet with their professor, teaching associate and classmates in varying combinations for four hours each week. This course is designed to prepare students for further literary and cultural studies in Spanish--including the challenges of study abroad--and to hone communication skills that are increasingly essential in professional fields such as medicine, law, and education. Conducted in Spanish. For students who have not taken Spanish 103 at Williams, the departmental placement exam is required for enrollment in 104.

**Class Format:** Seminar. Students will spend 4 hours per week in class in engagement with their Professor, Teaching Associate (TA), and classmates. In addition to the regular MWF classes with their Professor, students will meet for one additional hour per week with the TA. As will be explained in the course syllabus and at the first class meeting, this additional hour with the TA will take place at a time (to be decided during the first weeks of class) that is mutually beneficial for the TA and students.

**Requirements/Evaluation:** Weekly 1- to 2-page compositions, daily homework and class participation, oral reports, unit exams and a final exam.

**Prerequisites:** RLSP 103 or by Spanish placement exam or permission of instructor.

**Enrollment Limit:** 20

**Enrollment Preferences:** If the course is over-subscribed, priority will be given to first-year students and others with a demonstrable commitment to study of Spanish.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)
RLSP 105 (F) Advanced Grammar, Composition, Conversation

In this course students will refine their knowledge of Spanish grammar and vocabulary towards further fluency in speaking and writing. The focus of the class is grammar through active engagement with relevant cultural, literary, and political materials drawn from Latin America and the Caribbean for the section that meets at 9 a.m., and from Spain in the section that meets at noon. Students will produce regular grammar and composition exercises as well as oral reports. They will also meet with the Teaching Associate, in smaller groups, weekly.

Class Format: students must participate in TA sessions once a week.

Requirements/Evaluation: regular grammar and composition assignments, a mid-term, occasional quizzes, oral reports; active participation and regular attendance required.

Prerequisites: RLSP 104, or results of the Williams College Placement Test, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: first-year students, potential majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2023

SEM Section: 02  MWF 9:00 am - 9:50 am  Sahai Couso Diaz

RLSP 106 (S) Advanced Grammar and Composition through Literature (WS)

This course is designed for advanced students who wish to further polish and refine their grammatical, lexical, and writing skills in Spanish. The course may be taken immediately after 104, by placement exam results, or even after students have begun to sample the Department's literature and culture offerings at the 200- and 300-level. Classic works of short fiction by celebrated Latin American authors such as Gabriel García Márquez and Julio Cortázar will be discussed; selected Latin American films will be viewed as well. For written and oral assignments: weekly essays, in-class presentations, and language-laboratory activities. Conducted in Spanish.

Requirements/Evaluation: A weekly essay based on the stories read in class. Written lab exercises. Participation in the grammatical and literary discussions. Oral presentations, quizzes, a mid-term exam, and a final exam

Prerequisites: RLSP 104, any course 201+, placement exam or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: In the event of over-enrollment, preference will be given to sophomores.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Weekly essays, corrected for both language and content. Constant feedback from instructor. Students will be required to revise and rewrite their graded essays.

Spring 2024

CON Section: 02  W 2:10 pm - 3:00 pm  Gene H. Bell-Villada

RLSP 107 (F) Advanced Grammar and Conversation

How is Spanish language relevant to my academic field? What linguistic and cultural resources should I acquire to effectively communicate my academic interests in this language? How do I prepare for a professional presentation in Spanish? What are the limitations of the academic language
at the moment of interacting with people in the community? The Advanced Grammar course 107 will provide cultural and linguistic resources to address the questions above and other common concerns that students have around their proficiency and skills to communicate effectively. This course focuses on helping students to advance their cultural and communicative skills in Spanish, as they share their professional interests with other students. The class will discuss four general topics - medicine, history and human rights, art, and environmental issues -, which will create the context for students to conduct oral presentations and activities around their own academic fields. Another important emphasis of the course will be to connect students' professional interests to current issues of social justice in USA, Latino America and other world countries. To expand their cultural and linguistic knowledge, participants will prepare two different types of oral activities for the class: formal-academic presentations and non-formal activities that use colloquial registers. The RLS 107 course will require a constant and committed collaboration between participants.

**Class Format:** Students should expect to meet with the professor three times per week during the scheduled class hours. One hour of practice with the TA will be added at agreed-upon times once the enrollment is fully established.

**Requirements/Evaluation:** Regular grammar and composition assignments, a mid-term exam and a final project; intense reading, active participation and regular attendance required.

**Prerequisites:** RLS 104, placement exam results, permission of instructor or Department Chair

**Enrollment Limit:** 20

**Enrollment Preferences:** Spanish majors and certificate students, current and potential.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**Not offered current academic year**

---

**RLSP 201  (F)  The Spanish Labyrinth**

The goal of this course is to explore the history and cultural production of Spain and the Iberian Peninsula throughout history, from the time of Al-Andalus up to contemporary Spain. Over the course of 12 weeks, we will study a variety of mediums, including the novel, the short story, comics, and film. Such readings may include Miguel de Cervantes' *La gitanilla*, José Zorrilla's *Don Juan Tenorio*, and Benito Zambrano's film *La voz dormida*, among others. This class serves as a panorama of Spanish peninsular literature and culture and seeks to expand students' mastery of the Spanish language.

**Requirements/Evaluation:** Conducted entirely in Spanish. Evaluation will be based on active participation and attendance, one group presentation, three short reaction papers (2-3 pages), and one final project (10-12 pages)

**Prerequisites:** RLS 105, or RLS 200, or results of Williams College Placement Exam, or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** Spanish majors and certificate candidates

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

---

**Fall 2023**

**SEM Section:** 01   MR 1:10 pm - 2:25 pm    Isaac C. Veysey-White

**RLSP 202  (S)  Introduction to the Analysis of Literature in Spanish  (WS)**

This course is intended for students who are considering a major in Spanish, including those who have recently completed RLS 105, 107, 200, 201 or 209. Using a textbook, *Aproximaciones al estudio de la literatura hispánica*, we will study the fundamentals of genre analysis while reading selected works of prose, poetry, and drama from Latin America and Spain. In addition to studying the principles and techniques of literary analysis, this course will continue to develop your speaking, writing, and reading comprehension skills. *Conducted in Spanish.*

**Class Format:** Students are expected to be active participants at all scheduled class meetings, which will be used for discussion and collaborative analysis of literary texts as well as working student writing.

**Requirements/Evaluation:** Graded assignments will include three essays of five pages each as well as consistent preparation and class participation.
Prerequisites: RLSP 105, 107, 200, 209, or placement exam results indicating readiness for a 200-level course

Enrollment Limit: 20

Enrollment Preferences: first- and second-year students who are considering the major in Spanish

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Each student will write and revise three essays of roughly five pages each. Feedback will be provided regarding grammar, style, and argument. On Fridays we will workshop student papers.

Spring 2024

SEM Section: 01 Cancelled

RLSP 203 (F) From Modernismo to El Boom de la Novela

A survey of some of the leading imaginative writers of Ibero America. Readings will begin with the modernista poets and go on to include fiction of Mexico by Rulfo, a wide sampling of verse by Pablo Neruda, and narratives of the "Boom" period by authors such as Borges, Cortázar, Lispector, and García Márquez. Conducted in Spanish.

Class Format: In-person.

Requirements/Evaluation: Response journals, three 6- to 8-page papers, a mid-term and final exam, and class participation.

Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Seniors, juniors, and then sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: GBST Latin American Studies Electives

Not offered current academic year

RLSP 204 (S) Hispanic/Bilingual Communities in USA: language and identity

"Hispanic/Bilingual Communities in USA: language and identity" is a course for Heritage Learners with two different profiles: those who have acquired Spanish at home and those who have been learning the language at school. Students' own sense of affective connection with the language through their families will guide our reflection on Spanish as a social component that unifies multiple Hispanic communities in the USA. We will also discuss the dialectal, sociolectal and generational differences between the members of those speaking communities, and the implications of considering these groups as homogenous. The course will address the role that media, institutions and cultural products play in preserving and (re)defining Spanish in the USA. We will review the language and its variation through TV programs, music, magazines, and literature. Heritage Learners already have an important foundation of linguistic knowledge that prepares them for interaction in Spanish. In this course they will be asked to further extend their resources through constant grammar and vocabulary practice. The course requires writing reports and larger texts, and the reading of an important amount of specialized texts in Spanish. Many of the daily activities will require teamwork. The course will meet 2 times per week: M, W, 1 hour 15 minutes per session. Students who have taken Spanish 209 can also register for this course.

Requirements/Evaluation: Evaluation will be based on class participation, daily assignments, essays, projects and one parcial exam.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: sophomores, juniors, majors, or concentrators.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year
RLSP 206 (S) Latin-American Civilizations

An introduction to the multiple elements constituting Latin-American culture. Class assignments include readings from selected Latin-American essayists and screenings of classic films. Particular focus on the conflict between local and foreign cultural traditions. Areas to be considered: Spanish Catholicism, the influence of European liberalism and U.S. expansion, the Indian and African contribution, and the cultural impact of social revolution in Mexico and Cuba. Conducted in Spanish.

Requirements/Evaluation: two essays on assigned topics, response journals, one oral presentation, active discussion of the ideas and the facts presented in class, a midterm, and a final

Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Juniors, sophomores, first-years.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

RLSP 209 (F) Spanish for Heritage Speakers

Cross-listings: LATS 209 RLSP 209

Primary Cross-listing

This course is intended for students of Latino/a heritage. It will address the unique needs of students whose knowledge of Spanish comes primarily from informal and family situations rather than a conventional classroom experience. The goal of the course is to build on and expand students’ existing knowledge of Spanish while developing skills for using the language in more formal/academic contexts. Conducted in Spanish.

Requirements/Evaluation: homework, class participation, and a series of communicative projects

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Potential Spanish majors/certificate students and LATS concentrators

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

RLSP 210 (S) Graphic Novels, Spain, and Economic Crisis

The massive economic crisis that began in 2007 affected all areas of life in Spain, among other things, led to the rise of several social movements and critiques of neoliberalism. In this class we will study graphic novels -- a booming medium in contemporary Spain -- to see how they reflect this key moment in Spanish society. We will consider the ways in which these novels represent new social movements as well as effects of the crisis that continue to this day. In the process, we will not only gain a better understanding of contemporary Spain, but also unpack the characteristics of visual storytelling. Readings may include Miguel Brieva’s Lo que me está pasando, Manel Fontdevila’s ¡No os indignéis tanto!, and Isaac Rosa’s & Cristina Bueno’s Aquí vivió: Historia de un desahucio
Requirements/Evaluation: Conducted entirely in Spanish. Evaluation will be based on active participation and attendance, four take-home essay quizzes, and one final project (12-15 pages).

Prerequisites: Spanish 105 or 106, or results of the College Placement Exam, or permission of instructor.

Enrollment Limit: 20

Enrollment Preferences: Spanish majors and certificate students.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Spring 2024

SEM Section: 01  MR 1:10 pm - 2:25 pm  Isaac C. Veysey-White

RLSP 216 (S) Latin American Environmental Literature and Cultural Production (DPE)

Cross-listings: RLSP 216 ENVI 233

Primary Cross-listing

This foundational course explores a wide array of ecocultural texts from Latin America, ranging from accounts of Europeans' first arrival to the crisis of mass extinction and anthropogenic climate change today. In between we consider an eclectic mix of styles and genres, including poetry, essays, prose fiction and speeches produced by a varied group of cultural agents. We read classic texts by canonical figures (José Martí's "Our América," the Popol Vuh), which take on new meaning in the current context, as well as some little-known gems of ecological consciousness. Readings and discussion trace connections between environmental thought and the region's long and multi-layered history of colonialism, and students are encouraged to develop their own positions by responding to some of the leading theoretical discourses that animate the field of Latin American ecocriticism: decolonial and creole ecologies, ecofeminism, transcultural materialism, and postdevelopment. Conducted in English.

Requirements/Evaluation: Students will write and revise three formal essays over the course of the semester. There will also be shorter written assignments and intermittent discussion-leading.

Prerequisites: None.

Enrollment Limit: 15

Enrollment Preferences: Preference given to students majoring in Spanish or Environmental Studies.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLSP 216(D1) ENVI 233(D1)

Difference, Power, and Equity Notes: This course meets the goals of the DPE requirement in that it focalizes the current environmental crisis through the long history of political, economic and cultural struggles in Latin America. We examine the genealogies of environmental culture, tracing the emergence of ecofeminism, for example, through generations of writers. We also examine the phenomenon of creolization and its relationship to the environmental cultures of Latin America's originary peoples.

RLSP 217 (S) Love and marriage in Medieval and Early Modern Spain

We are often told that love is a natural human feeling and marriage its happiest consequence. But these two conditions are constructed and depend on society's dominant values. In this class we focus on pre-modern Spain to study the principles and fears that create definitions of love and marriage, also with a view to how some of these have survived to this day in our own communities. Our theoretical frames will come from the medieval and early modern periods, but also from contemporary definitions and critiques. Primary sources will include lyrical traditions, the writings of King Alfonso X, the works of Santa Teresa de Ávila, San Juan de la Cruz, Lope de Vega, Tirso de Molina, Pedro Calderón de la Barca, Miguel de Cervantes, among others.
requirements/evaluation: active and meaningful participation, short assignments, one final project.

prerequisites: rlsp 105 or 200, or results of williams college placement exam, or permission of instructor

enrollment limit: 22

rlsp 220 (s) women on the verge

cross-listings: wgss 222 rlsp 220

primary cross-listing

from the early twentieth century to the present day, the radical changes in the lives of spanish women have clearly reflected the tug of war between progress and tradition in recent spanish history. the dramatic upheavals in spanish politics have marked and transformed the lives of women to such a great extent that one can often gauge the political and social climate of any given historical moment by considering how the role of women was defined by the law, the catholic church, education, and other social and political institutions. using literary and historical texts as well as films, newspapers and other media, this course will look at the transformations in the public and private lives of spanish women during the following periods: the turn of the century, the second republic, the spanish civil war, theFranco years, the transition to democracy, and the present day.

requirements/evaluation: this course is conducted entirely in spanish.

rlsp 228 (s) velázquez, goya, and picasso

cross-listings: arth 228 rlsp 228

primary cross-listing

this course will provide an introduction to three major spanish painters--velázquez, goya, and picasso--who lived and worked, respectively, in the 17th, 18th, 19th and 20th centuries. though these painters are world famous, they are rarely studied comparatively, and in the context of their spanish artistic roots. the syllabus will cover the historical and social contexts in which they started working, and how they followed, and departed from, artistic conventions of the time. through specific paintings, we will consider the historical evolution of the artists' relationship to their patrons and subjects, from the elite status of velázquez within the royal court, to goya's dramatic rise with the reigns of charles iii, and charles iv, and his subsequent exile to france. picasso was free of royal patronage and also lived in france, yet despite this freedom he remained deeply connected to the themes and concerns of his spanish artistic predecessors. in addition to key paintings including velázquez's "las meninas" and other royal portraits, goya's "maja desnuda" and his series "the disasters of war," picasso's "guernica," and his own 20th century reinterpretation of "las meninas," we will focus on the artists' shared subjects of portraits and war, and consider the following issues: how does the role of the spanish artist change over the periods covered? how did the artist exercise his freedom whilst under the scrutiny of the court and the catholic church? how were these painters' lives and work shaped by key historical events such as the inquisition, napoleon's invasion of spain, or the spanish civil war? how does the work of art evolve in its role from private royal commission to public display in museums open to all? we will read short literary pieces from each period, primary materials such as letters and other documents, and historical and critical works. all readings will be in english. knowledge of spanish is encouraged,
Requirements/Evaluation: 3- to 5-page weekly assignment

Prerequisites: none

RLSP 230  (F)  Mexican Literature and Cultural Production  (DPE) (WS)

This course will offer a survey of the rich and varied cultural production of Mexico, from the pre-Hispanic past to the present. Students will explore a variety of literary genres (pre-Hispanic poetry, creation stories and songs; chronicles of conquest; short works of prose fiction and novels; and modern poetry and essays) as well as other kinds of cultural production within a framework of historical contextualization and formal analysis. The course meets twice per week. Conducted in Spanish.

Requirements/Evaluation: Each student will write three 4- to 5-page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide three 2-page critiques of their partner's papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise each of the papers and submit a final version. Excellent preparation, active and engaged participation in class discussions.

Prerequisites: RLSP 105, placement exam results, permission of instructor.

Enrollment Limit: 19

Enrollment Preferences: Spanish majors and certificate students, current and potential; LATS concentrators

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Each student will write three 4- to 5-page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide three 2-page critiques of their partner's papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise each of the papers and submit a final version.

Difference, Power, and Equity Notes: This course will introduce students to the rich and varied cultural production of Mexico across time and space. It will highlight the often marginalized and neglected intellectual histories of indigenous peoples and other minoritized sectors of Mexican society. As such, students will acquire critical tools to examine and understand the rich and varied cultural production of Mexico.

RLSP 231  (F)  Indigenous Writers of Colonial Mexico and Peru  (DPE) (WS)

This course examines the writings of 16th and 17th Century Indigenous authors of New Spain and colonial Peru. We will study the works of well-known Indigenous writers such as Hernando de Alvarado Tezozomoc, Fernando de Alva Ixtlilxochitl, El "Inca" Garcilaso de la Vega, and Guaman Poma de Ayala, as well as writings by lesser-known and anonymous Indigenous authors. Our focus on the historical contexts and formal aspects of their works will be supplemented and enhanced by a study of the critical methods of textual analysis that are particularly relevant to Indigenous texts, as facilitated by a set of selected critical readings. The course, in short, will aim to interrogate the idea of a "Spanish lettered city" (a colonial city dominated by Spanish men of letters) and will explore the possibilities of an "alter-native" lettered city, one in which Indigenous writing flourishes during times of crisis. Conducted in Spanish.

Requirements/Evaluation: Each student will write four 4- to 5-page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide three 2-page critiques of their partner's papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise the first three papers and submit a final version. Excellent preparation and active, engaged
participation in class discussions is required.

**Prerequisites:** RLSP 105, 107, 200, or 202, placement exam results, or permission of instructor.

**Enrollment Limit:** 19

**Enrollment Preferences:** Spanish majors and certificate students, current and potential; LATS concentrators

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**RLSP 259 Violent States, Violent Subjects: Nation-Building and War in 19th Century Latin America** (DPE) (WS)

Although the massive, mechanized wars of the 20th century often overshadow earlier conflicts, the 19th century was also a period of widespread bloodshed in Latin America. First, of course, came the carnage of the Independence Wars, which was followed by decades of civil war (Mexico, Argentina, Peru, Uruguay, Colombia, Venezuela) and two bitter international wars—the Paraguayan War (1864-1870) and the Pacific War (1879-1883)—each of which would have a lasting impact on the countries involved. The restoration of peace brought economic development and new opportunities for dominant groups, but also the return of some of the most violent practices of the colonial period: indigenous peoples were conquered, their lands settled by whites or used for grazing cattle, and blacks (often despite the official abolition of slavery) met with new forms of exclusion, exploitation, and physical violence. In this tutorial we will explore the literary links between some of the violent conflicts listed above and the foundation of national identities in Latin America, reading texts that probe the social and ethical implications of State-sponsored violence. Issues to be explored include militarism and the development of nationalism; genocide and the national community; torture, truth and testimony; and the notion of ‘civilization.’ We will read one or two key precursors and a variety of 19th century texts that may include works by Juan Francisco Manzano, Esteban Echeverría, Ricardo Palma, Rosa Guerra, Dorotea Duprat de Lassere and Juan Crisóstomo Centurión, and Lucio V. Mansilla. In addition, we will read a few contemporary texts, written in the aftermath of the late-20th century dictatorships in the Southern Cone, that actively reflect on the long history of State-sponsored violence in Latin America (Ricardo Piglia, Diamel Elit, Augusto Roa Bastos). Students will work in trios throughout the semester, each group meeting with the instructor once a week. Each week one of the students will present a 5-page paper on the assigned reading and one will be designated the official respondent, whose job is to lead a discussion of the paper. The third member of the group will turn in a revision of the previous week's paper. Prerequisites: one 200-level RLSP course or permission of instructor. Heritage learners, international students and second-language learners are all heartily welcome. Conducted in Spanish.

**Class Format:** Conducted in Spanish.

**Requirements/Evaluation:** Each student will write and revise a minimum of three five-page papers during the course of the semester. Students will be evaluated on the basis of their preparation for each tutorial meeting as evidenced by the quality and frequency of their engagement with the material, including their classmates' written work. Essays will be graded after they have been revised and submitted to the professor.

**Prerequisites:** Any 200-level Spanish course.

**Enrollment Limit:** 12

**Enrollment Preferences:** Priority given to Spanish majors.

**Expected Class Size:** 12

**Grading:**

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** Students will practice writing throughout the semester, and will receive abundant feedback on their written work from their tutorial partners and the instructor. We are altering the tutorial format from the standard duos to trios of students, so that students will have ample opportunity to revise their written work.
**Difference, Power, and Equity Notes:** This course focuses on issues of diversity, power and privilege within the internal and regional constitution of Latin American countries. We will read with an awareness of some of the ways that differences of race, class, nationality and gender may be mobilized in times of conflict, and consider how the collective narratives that are constructed and imposed in the aftermath tend deal with those conflicts.

**Attributes:** GBST Latin American Studies Electives

**Not offered current academic year**

**RLSP 264 (S) Outcasts of the Lettered City: Nation-Building and the Margins in 19th Century Latin America**  
(DPE) (WS)

**Requirements/Evaluation:** Students will write and revise approximately 20 double-spaced pages, in Spanish, over the course of the semester. Students will also prepare 10-15 minutes responses to their classmates' work. We will read 100-150 pages of Spanish prose each week and well as critical essays, which will often be in English.

**Prerequisites:** Any 200-level course with an RLSP prefix or permission of instructor.

**Enrollment Limit:** 12

**Enrollment Preferences:** Spanish majors and potential Spanish majors.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** This course is conducted as a tutorial. The number of students in each unit (pairs or triplets) depends on how many students enroll, but whatever our structure turns out to be, each student can anticipate multiple opportunities to write and revise their individual essays in response to feedback from their classmate and professor, as well as to serve as the respondent offering feedback other students' work. Thus we emphasize editing and revision as essential parts of the writing process.

**Difference, Power, and Equity Notes:** This course examines structures of exclusion in 19th century Latin America -- the reproduction and perpetuation of socio-economic and institutional structures based on racial, gendered and class-based hierarchies established during the colonial era -- and the spaces that historical individuals have been able to occupy within and around them.

**Not offered current academic year**

**RLSP 301 (S) Cervantes' "Don Quijote"**

We will devote the semester to the study of one novel: Miguel de Cervantes' *Don Quijote*, published in the early part of the 17th century. We will try to understand the reasons for the novel's immense and ongoing influence. We will study Cervantes' handling of issues that continue to have relevance to our lives today: relationships, the role of fiction in life, the shapes of mental illness, how we show people who we think we are, how our governments, families and friends decide who we are, the fun and annoyance of going on a road trip with someone, the meaning of justice, and the meaning of storytelling, to name a few. In the process, we will set things in context to understand what was going on in Cervantes' world. Finally, we will find that even an entire semester was not enough to engage fully with this extraordinary work. *Conducted in English using a contemporary translation*.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** active class participation; two to three short projects and one final research project

**Prerequisites:** any 200-level RLSP or Comp lit or English course at Williams

**Enrollment Limit:** 20

**Enrollment Preferences:** Spanish majors and Comp Lit majors and Engl majors.

**Expected Class Size:** 15
RLSP 304 (S) Environmental Literature and Film in Latin America (DPE) (WS)

Cross-listings: RLSP 304 COMP 311 ENVI 311

Primary Cross-listing

What use are aesthetics when the world is (literally) on fire? We will take up this question and others in a critical engagement with Latin American cultural production of the twentieth and twentieth centuries, especially works of literature and film that directly or indirectly engage with environmental crisis. Students can expect to explore a variety of media, forms and genres, including works that range from (more or less) mainstream to cutting edge. Our examinations of literature and film will be supported by theoretical writings produced in the Americas and other places. Writers and directors whose work may be considered include, but are not limited to: Lucrecia Martel, Ciro Guerra, Rafael Barrett, Samanta Schweblin, Ernesto Cardenal, Juan Rulfo, María Luisa Bombal, Eduardo Gudynas, Silvia Rivera Cusicanqui, Eduardo Viveiros de Castro, Isabelle Stengers.

Requirements/Evaluation: This course will be conducted seminar-style. Students will be expected to prepare thoroughly and be active, engaged participants in class discussions. In addition to day to day preparation and participation, other graded assignments will include discussion-leading, one short (5-7 page) essay and a longer (15-20 page) paper combining research and original analysis.

Prerequisites: One college literature of film course at the 200-level or above.

Enrollment Limit: 19

Enrollment Preferences: Envi majors and concentrators, Comp Lit majors, Spanish majors and those working towards the Spanish certificate.

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

RLSP 304(D1) COMP 311(D1) ENVI 311(D1)

Writing Skills Notes: All students in the course will write (and rewrite) no less than 20 pages. Major writing assignments will be scaffolded, with explicit discussion of the writing process (pre-writing, drafting, revision) and consultation.

Difference, Power, and Equity Notes: The works of literature and film that we will be examining challenge North American conceptions of climate change (and environmental crisis more broadly) by making visible (often uncomfortably so) the colonial and neocolonial history of extractivism.

Attributes: ENVI Humanities, Arts + Social Science Electives

Spring 2024

SEM Section: 01 Cancelled

RLSP 307 (F) The Short Stories of Miguel de Cervantes

We will conduct a close study of the collection of short stories known as Las novelas ejemplares written by Miguel de Cervantes (1547-1616 CE). The stories, though not as famous as Don Quijote, are as innovative and dynamic as the author's best-known novel. We will set them in the context of the political and artistic landscape of Spain in the early part of the 17th century to better understand their nature and function. In particular, we will pay attention to how social and individual identities are shaped in the stories, and the ways in which our own assumptions about identity work alongside those of these texts.

Class Format: Conducted in Spanish.

Requirements/Evaluation: Regular attendance and active participation; two short essays or four reaction papers; one final project of 8-10 pages or the equivalent in close consultation with the instructor.

Prerequisites: Any RLSP 200-level class taken at Williams, or results of the placement test, or permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: Preference given to Spanish and COMP majors.

Expected Class Size: 15
RLSP 308 (S) Survey of Colonial Latin American Literature from 1492 to the Early 19th Century (DPE) (WS)

This course will focus on major works of Spanish American literature from 1492 through the first part of the 19th century. Readings will include narrative texts such as Cartas de relación, chronicles of conquest, religious texts, and indigenous annals, as well as poetry and drama. While many of the texts will focus on colonial Mexico, we will also study texts from Central and South America. We will focus on the historical contexts and formal aspects of these works, and study methods of textual analysis that are particularly relevant to these texts via selected critical readings. Special attention will be given to colonial encounters and the clash of cultures that produced new identities and textualities under Spanish colonial rule. The course meets twice per week. Conducted in Spanish.

Requirements/Evaluation: Each student will write three 4-6 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide three 2-page critiques of their partner’s papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise each of the papers and submit a final version. Excellent preparation and class participation.

Prerequisites: One RLSP course at the 200-level or above or permission of instructor

Enrollment Limit: 19
Enrollment Preferences: Spanish majors
Expected Class Size: 19

RLSP 311 (F) The Politics of Love in Latin American Literature (DPE) (WS)

Cynical, sincere, confused and confusing, love and politics have a lot of complicated history together in Latin America. This course considers works of literature and other cultural texts in which love and politics are explicitly intertwined: the authors, artists and activists we consider profess love for their followers and would-be converts, represent love as a (revolutionary) political force, contest the legitimacy of patriarchal heteronormativity, and sometimes all three. We will consider writings by 20th and 21st century political leaders whose speeches and other writings convey the melodrama of radionovelas (Eva Perón) as well as the sacrificial love of the guerrillero (José Martí, Che Guevara) and the anarchist (Rafael Barrett). We may also consider the love professed by historical figures including Catholic missionaries (Antonio Ruiz de Rivera) and 19th century abolitionists (Juan Francisco Manzano, Gertrudis Gómez de Avellaneda) and/or nation-builders (Mármol, Sarmiento). We may examine tensions around the domestication of love in writings in translation by Brazil’s Clarice Lispector and the torment of eros in Elena Garro’s political novel Memories of the Future. We will likely read poems of grief and love for those murdered in the secret detention centers of the Southern Cone dictatorships (Raúl Zurita, Juan Gelman). We will delve into the politics of queer love, solidarity and mourning with authors such as Mario Puig, Reinaldo Arenas, and Cristina Peri Rossi, and in Sebastián Lelio’s 2017 film, A Fantastic Woman. We will conclude by considering the politics of love as articulated by Black Lives Matter, particularly as the movement has taken shape in Latin American countries, and its impact in Colombia and elsewhere. Conducted in Spanish.

Requirements/Evaluation: Regular preparation for class is required, as is thoughtful participation in class discussions. Students will be evaluated for both. Students will also be evaluated for discussion-leading and making presentations on their original research in progress. There will be two graded essays, one of 5-7 pages and the other 15-20.

Prerequisites: One RLSP course at the 200 level.
Enrollment Limit: 19
Enrollment Preferences: Students majoring or completing a certificate in Spanish.
Expected Class Size: 10
Grading: no pass/fail option, yes fifth course option
Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will be writing and rewriting roughly twenty pages. Longer assignments will be broken down into stages (proposal, bibliography, research, analysis, draft, revision) with feedback from the instructor at every stage.

Difference, Power, and Equity Notes: Using literary texts, we will delve into the ways a wide variety of political actors -- from the mainstream to the radical fringe -- talk about love in Latin American contexts. Some of them will seem comparatively cynical, but in other cases we will be looking at how people contest the hegemony of patriarchal, capitalistic and heteronormative definitions of what "counts" as true love.

Fall 2023
SEM Section: 01    TF 1:10 pm - 2:25 pm    Jennifer L. French

RLSP 319 (F) Dictatorship and the Latin-American Novel (DPE)
Military dictatorship is among the most crucial factors in Latin-American society and history, and some of the continent's leading novelists have taken it upon themselves to depict the experience in their work. In this course we will examine both the fact of dictatorship itself and the diverse representation thereof in Spanish-American fiction. Novels by García Márquez, Vargas Llosa, Poniatowska, and Tomas Eloy Martínez will be closely studied. Students will also read Absalom! Absalom! by Faulkner, whose influence on Latin-American authors' techniques of representation has been decisive and profound.

Class Format: In-person.
Requirements/Evaluation: three 8-page papers, response journals, an oral report, a final 3-page paper, and class participation
Prerequisites: RLSP 105, or RLSP 200, or results of Williams College Placement Exam, or permission of instructor

Enrollment Limit: 12
Enrollment Preferences: Spanish majors, Latina/o Studies concentrators
Expected Class Size: 5-10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course focuses on the ultimate sort of power--namely, military dictatorship. And it focuses on the historical fact of such a phenomenon within the U.S. political sphere of influence--Latin America. To study dictatorship and its depiction in literature is a means of understanding the nature of that power imbalance and of taking a first step toward some sense of equity.

RLSP 342 (S) Reading Sor Juana: "única poetisa americana, musa décima," (DPE) (WS)
This course focuses on the writings of one of the most revered women writers in Hispanic Letters, Sor Juana Inés de la Cruz, who was regarded by her contemporaries as the Tenth Muse. Our exploration and study of Sor Juana's writings will focus on the different genres in which she wrote--prose, poetry, and drama--and it will include a survey and analysis of the historical context in which she wrote, the formal aspects of her writings, and critical essays about her work written by leading scholars in the field of Latin American literature. Near the end of the semester, the course will conclude by expanding its focus to examine the ways in which Sor Juana's work has influenced contemporary Latin American and U.S. Latina authors. Conducted in Spanish.

Requirements/Evaluation: Each student will write three 5-7 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide two 2-page critiques of their partner's papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise each of the papers and submit a final version. Excellent preparation and class participation is required.
Prerequisites: One RLSP course at the 200-level or above or permission of instructor
Enrollment Limit: 19

Enrollment Preferences: Spanish majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Each student will write three 5-7 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will also provide two 2-page critiques of their partner’s papers as a form of feedback. After receiving my feedback and the feedback of their peers, each student will revise each of the papers and submit a final version.

Difference, Power, and Equity Notes: This course will highlight the intellectual production of one of the most revered women writers in Hispanic Letters. It will explore the challenges women writers faced as well as the social critiques Sor Juana makes in her writings about the exclusion of women and other racial minorities in Spanish colonial society. As such, students will gain critical skills to analyze and understand the diversity of Spanish-American society through Sor Juana’s texts.

RLSP 388 (S) La Regenta: Masculinity in Crisis in Nineteenth-Century Spain

This seminar is an in-depth study of arguably the most remarkable Spanish novel of the nineteenth century: La Regenta (1885) by Leopoldo Alas (alias Clarín, 1852-1901). We will spend the semester living with the most eccentric, repressed, confused, sometimes arrogant, and sometimes humble inhabitants of the fictional city of Vetusta (based on the real city of Oviedo) and immerse ourselves in Spanish history and culture through a story of adultery. In the grand tradition of nineteenth-century novels about fallen women, La Regenta in fact reveals the seamy underside of society, the profound anxieties of masculinity and identity formation, as well as where our biases and assumptions about both successful and failed relationships come from today.

Requirements/Evaluation: Active and meaningful participation, short assignments, one final project.

Prerequisites: Any Spanish 200-level class taken at Williams, or results of the Williams Placement Test, or permission of Instructor.

Enrollment Limit: 20

Enrollment Preferences: Spanish and Comparative Literature Majors

RLSP 404 (F) Spain’s Tale of Two Cities: Madrid and Barcelona (DPE)

The ancient rivalries between Madrid and Barcelona may be best known because of their internationally watched soccer teams, but there's much more to the story than meets the eye in a stadium. Barcelona, immortalized for world audiences in George Orwell's classic Homage to Catalonia (1938), has a complicated political and cultural history. Catalans have a fascinating and unique culture and language. Their identity has often been cause for political unrest in their relationship with the rest of Spain, and even amongst Catalans themselves. In recent years, tensions with Spain's capital, Madrid, home to the central government and the Royal family, have filled headlines and divided politicians and even families. In this senior seminar we will focus on these two cities in their own right, and explore the counterpoints between them. We will consider the historical roots of lesser known aspects of Catalan culture and identity in order to tease out some of the myriad perspectives that are at play in Spain today. Materials will come from many different media: historical pieces, music, art and architecture, classic novels and films, recent fiction and essays by second generation authors who have been raised by immigrant parents in both cities, and media pieces. We will also invite cultural observers and players to be guest speakers and help us stay up to date as we follow this ever evolving relationship that keeps journalists and politicians on tenterhooks.

Requirements/Evaluation: This course will be conducted entirely in Spanish. Students will be expected to participate actively in weekly online classes. There will be two short writing assignments of 3-5 pp. Each student will prepare a presentation for one of our class meetings, and be a discussion leader for part of another meeting. Students will be expected to schedule office hours with me individually, and to work on an independent research project towards the end of the semester which will culminate in a final paper of 10-15 pp.

Prerequisites: Students should be seniors on the road to fulfilling their degree requirements for the Spanish major.

Enrollment Limit: 11
Enrollment Preferences: Senior Spanish Majors. This is the 20-21 Senior Seminar for the Spanish Major.

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement because it compares two rival cities and the struggles for power between a majority (Spanish) and minority (Catalan) culture and language. We will also read texts by first generation authors for whom Spanish and Catalan are dominant but secondary languages and cultures. The syllabus seeks to offer a multiplicity of perspectives in order to help students critically engage with centuries-old patterns of difference and exclusion.

RLSP 405  (S)  Racialized Bodies on Display

Across the Americas, the bodies of contemporary Indigenous people were displayed next to bones, fossils, and ruins to separate them from their lands and natural resources; while the bodies and bones of enslaved people were collected, dissected, and displayed to support racist theories of stratification and discourses of difference. This course examines the persistent role that collections have played in the construction of pseudo-scientific racial knowledge in the Americas. It traces the display of Black and Indigenous bodies as objects in museums, literature, paintings, engravings, photographic albums, and other media, as well as contemporary interventions and critiques of the deceiving nature of scientific racism. We will study visual and material culture alongside fiction and non-fiction texts to explore how collections become a narrative device for a racialized representation of reality. One of the main questions of this course is how do images, literature, and objects shape our understanding of scientific ideas and culture? We will also engage in critique from an intersectional perspective to consider how media are shaped by logics of race, gender, and ability. This course gives students the tools to discuss the ethics of material and visual display as well as the general notion of archives as sources of historical preservation. We will explore chronicles, the work of eighteenth-century authors such as Lorenzo Boturini and Francisco Javier Clavigero, as well as casta paintings, Julio Popper's photographic album and Israel Castellanos' La delincuencia femenina, museum collections, and contemporary interventions and critiques such as Ana Mendieta's Glass on Body Imprints or the performance The Couple in the Cage by Coco Fusco and Guillermo Gomez Pena. We will also read a number of critical essays by leading scholars in the fields of decolonial theory and museum studies such as Silvia Rivera Cusicanqui, J. Kehaulani Kauanui, Walter Mignolo, and Silvia Spitta, among others.

Requirements/Evaluation: In addition to active and informed class participation, requirements include one presentation, two short papers, and a final project.

Prerequisites: any 300-level RLSP course or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Senior Spanish Majors.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

RLSP 407  (F)  Gender, Race and Nature: Ecocritical Examinations of Latin American Culture  (DPE)

This senior seminar brings an ecocritical focus to the study of Latin American cultural production. We are particularly interested in works of literature and other kinds of cultural texts that critique, subvert, or transcend conventionally Eurocentric and patriarchal conceptualizations of the human and its relation to non-human being. Rhetorical tropes linked to extractivist economic practices and their alternatives will be identified and analyzed over the course of the semester as we sample a wide range of literary and non-literary texts (poetry, narrative prose, essay, film, painting, woodcuts, music, digital media) produced throughout the 20th and 21st centuries. We will also read and discuss writings by leading ecocritics and decolonial theorists including Silvia Rivera Cusicanqui, Eduardo Gudynas, Mary Louise Pratt, Walter Mignolo, and more.

Requirements/Evaluation: Thorough preparation and active class participation, discussion-leading, one 5-7 page paper and one 15-20 page paper as well as a paper proposal, abstract, bibliography, and draft.

Prerequisites: Study abroad, one or more RLSP courses at the 200+ level, or permission of instructor.

Enrollment Limit: 19
Enrollment Preferences: Senior Spanish majors, then other interested students.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course brings decolonial theory and ecocriticism together in an approach to Latin American cultural production.
