AFRICANA STUDIES (Div II)
Chair: Professor Rhon Manigault-Bryant

- Messias Basques, Mellon Postdoctoral Fellow in Africana Studies
- Rashida K. Braggs, Professor of Africana Studies and Faculty Affiliate in Comparative Literature; on leave Spring 2024
- VaNatta S. Ford, Assistant Professor of Africana Studies
- Allison M Guess, Assistant Professor of Africana Studies
- James A. Manigault-Bryant, Chair and Professor of Africana Studies and Faculty Affiliate in Anthropology and Sociology and Religion; affiliated with: Africana Studies, Religion, Anthropology & Sociology
- Rhon S. Manigault-Bryant, Professor of Africana Studies and Faculty Affiliate in Religion; on leave 2023-2024
- Christopher O. Ndubuizu, Mellon Postdoctoral Fellow in Africana Studies
- Keston K. Perry, Assistant Professor of Africana Studies
- Neil Roberts, Associate Dean of the Faculty, John B. McCoy and John T. McCoy Professor of Africana Studies and Faculty Affiliate in Political Science and Religion; affiliated with: Dean of the Faculty’s Office, Africana Studies, Political Science

GENERAL DEPARTMENT DESCRIPTION

Africana Studies is an interdisciplinary field of study that emerged from the freedom movements of the 1960s. At its core, Africana Studies seeks to expand knowledge of Black experiences in the broadest sense. It also intervenes in discourses that omit Black experiences or seek to ignore, suppress, and de-center the long history of global, anti-Black oppression. Our introductory course is open to non-majors including first-year students, who are especially encouraged to enroll. Our elective courses are open to students who meet the requirements or prerequisites specified in the course description. The senior level seminar may be open to nonmajors with permission of the instructor.

The Africana Studies Department builds knowledge about communities throughout the African Diaspora by way of interdisciplinary analyses of Black experience—which may take the form of cultural expressions in theater, literature, music, and religion; political strivings and imaginations; displacement and annihilation under environmental distress; and representations in, and creations of, new technologies. Several learning objectives unify our teaching in Africana Studies:

- to introduce students to the content and contours of Africana Studies as a long-standing and vibrant field of knowledge;
- to disrupt the peripheral placement of peoples of African descent in traditional disciplines by using interdisciplinary methods to center their histories, experiences, and perspectives;
- to illuminate the vast range, power, and influence of Black cultural productions;
- to parse out the deep roots of grassroots activism that dismantles innumerable manifestations of anti-Black racism both within and beyond communities of African descent;
- to understand rich intersections of race, gender, class, and sexuality, both historically and in contemporary societies.

THE CONCENTRATION IN AFRICANA STUDIES

***NOTE: only eligible for students who matriculated prior to fall 2023

Candidates for a concentration in Africana Studies must complete at least five courses listed as Africana courses [note: many Africana courses are cross-listed with departmental offerings; all these are considered Africana Studies courses and can be used to count both for the concentration and for the departmental major of which they are a part]. Two of these five courses are required courses that every concentrator takes. They are the introductory course, AFR 200, normally taken in the first and second years, but open to all students; and an Africana capstone Senior seminar, normally taken in the senior year, but also open to others at the Professor's discretion. Additional courses may be taken either with faculty in Africana Studies or with faculty and visiting professors affiliated with the department. However, at least one of these three additional courses must be listed as a “Core Elective;” all “Core Electives” are designated below. We also encourage students to take at least one course in an academic unit other than Africana Studies and consider an experiential learning winter study session. Concentrators are expected to meet with the Chair and/or an Africana Studies faculty member to plan their concentration.

REQUIREMENTS

Africana Studies courses required for the concentration:

AFR 200 Introduction to Africana Studies
and one of the following two AFR 400-level Senior Seminar capstone courses (not all 400-level courses meet the requirement for the concentration):

AFR 440(F) CAPSTONE: Performing Blackness

AFR 405(S) CAPSTONE: Africana Studies and the Disciplines

One core elective: Listed as “Core Elective” below

AFR 110 / WGSS 111(F) SEM Television, Social Media, and Black Women 'Unscripted'
  Taught by: TBA
Catalog details
AFR 128 / COMP 129 / MUS 179 TUT James Baldwin's Song
  Taught by: Rashida Braggs
Catalog details
AFR 132 / AMST 132 / PSCI 171 SEM Contemporary Africana Social and Political Philosophy
  Taught by: Neil Roberts
Catalog details
AFR 133 / COMP 133 / ECON 133 / GBST 133 SEM Plantation and the Plot: the Poetics of Caribbean Economic Thought and Struggle
  Taught by: Keston Perry
Catalog details
AFR 135 / AMST 135(F) SEM Queen Sugar and Black Study
  Taught by: James Manigault-Bryant
Catalog details
AFR 200(F, S) LEC Introduction to Africana Studies
  Taught by: VaNatta Ford
Catalog details
AFR 202 / WGSS 206 / COMP 236 TUT Narrating Color: Black Women Sing and Write About Complexion
  Taught by: VaNatta Ford
Catalog details
AFR 205 / WGSS 207(F) TUT She Speaks in Color: Examining the 'Color Complex' in Toni Morrison's Writings
  Taught by: VaNatta Ford
Catalog details
AFR 208 / AMST 208 / REL 262 TUT Time and Blackness
  Taught by: TBA
Catalog details
AFR 211 / AMST 211 / ENVI 211 / SOC 211 LEC Race, Environment, and the Body
  Taught by: TBA
Catalog details
AFR 213 / STS 213 / WGSS 213 TUT Race, Gender, and the Alien Body: Octavia Butler's Science Fiction
  Taught by: TBA
Catalog details
AFR 216 / AMST 212 / COMP 212 / DANC 217 SEM Moving While Black
  Taught by: Rashida Braggs
Catalog details
AFR 221 / REL 263(S) SEM Giving God a Backbeat: Rap Music, Religion & Spirituality
  Taught by: VaNatta Ford
Catalog details
AFR 233 / ENVI 204 / GBST 233(F) LEC Colonialism, Capitalism and Climate Crisis
  Taught by: Keston Perry
Catalog details
AFR 302 SEM Complexion Complexities: Colorism in Literature, Lyrics & Everyday Life
  Taught by: TBA
Catalog details
AFR 317 / AMST 317 / DANC 317 / ENGL 317 / THEA 317 / COMP 319(F) SEM Black Migrations: African American Performance at Home and Abroad
  Taught by: Rashida Braggs
Catalog details
AFR 320 / AMST 320 / WGSS 320 SEM Dangerous Bodies: Black Womanhood, Sexuality & Popular Culture
  Taught by: TBA
Catalog details
AFR 321 SEM Trending Black: Race & Social Media in the 21st Century
  Taught by: VaNatta Ford
Catalog details
AFR 323 / ARTH 223 / COMP 322 / AMST 323 / ENGL 356 SEM Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora
  Taught by: Rashida Braggs
Catalog details
AFR 358 / PSYC 377 SEM Mapping Anti-Bias Education
  Taught by: AnneMarie McClain
Catalog details
AFR 384 / PSYC 363 SEM Media, Race, and U.S. Black Families
  Taught by: AnneMarie McClain
Catalog details
AFR 395 / ENVI 395 / GBST 395 / WGSS 395 SEM Black Reparations Within/Beyond Borders
  Taught by: Keston Perry
Catalog details
AFR 405(S) SEM CAPSTONE: Africana Studies and the Disciplines
  Taught by: James Manigault-Bryant
Catalog details
AFR 440(F) SEM CAPSTONE: Performing Blackness
  Taught by: Rashida Braggs
Catalog details
AFR 430 / PSCI 372 SEM CAPSTONE: Sylvia Wynter, Black Lives, and Struggle for the Human
  Taught by: Neil Roberts
Catalog details
AFR 460 SEM Capstone: Documenting Black
  Taught by: TBA
Catalog details
AFR 497(F) IND Independent Study: Africana Studies
  Taught by: James Manigault-Bryant
Catalog details
AFR 498(S) IND Independent Study: Africana Studies
  Taught by: James Manigault-Bryant
Catalog details
HIST 104 / AFR 104 / GBST 104 SEM Race and a Global War: Africa during World War II
  Taught by: Benjamin Twagira
Catalog details
HIST 205 / AFR 203 LEC The Making of Modern Africa
  Taught by: Benjamin Twagira
Catalog details
HIST 305 / AFR 304 / GBST 305 SEM A History of Health and Healing in Africa
  Taught by: Benjamin Twagira
Catalog details
INTR 320 / AMST 308 / LEAD 319 / PSCI 376 SEM The Impact of Black Panther Party Intellectuals on Political Theory
  Taught by: Joy James
Catalog details
PSCI 361 / AFR 364(S) SEM Black Political Thought
  Taught by: Da Von Boyd
Catalog details
RLFR 229. Black Outside the U.S.
  Taught by: TBA
Catalog details
WGSS 392 / AFR 355(F) SEM Matter & Meaning in Black Queer Art & Performing Non-Human Potentials
  Taught by: Iyanna Hamby

Two additional electives (a total of three required for the concentration):
Most electives are included below as Electives. However, students should check with the department chair to see if other courses not listed here might count as electives toward the concentration.

THE MAJOR IN AFRICANA STUDIES
The major in Africana Studies is designed to accommodate breadth and depth of study. The breadth of one's journey is achieved by way of a shared general study through three "routes" that every major travels through—1) theories, methods, and poetics; 2) culture, performance, and popular technologies; and 3) Black landscapes. The depth of one's journey is accomplished by way of self-initiated learning within or among any of the routes.
Candidates for a major in Africana Studies must complete a minimum of nine courses as outlined below:

(1) Core Courses. Majors are expected to take a preferred sequence of three (3) courses:
  a. AFR 200: Introduction to Africana Studies, usually taken no later than the fall of the sophomore year;
  b. One 300-level seminar or tutorial designated as a “Core Elective,” usually taken during the junior year;
c. One 400-level seminar designated as the “Capstone” and usually taken during the senior year.

(2) Electives: Majors are expected to take six (6) additional electives to support their grounding in Africana Studies.

a. Three (3) of the six electives must be “Core Electives” and must be equally distributed among the three routes so that all majors will take a minimum of one course in each area. No more than two of these three Core Electives can be at the same course level.

b. The remaining three electives can be “Core Electives” and/or “Electives” in any combination, ideally driven by the student’s area(s) of interest.

The three routes are as follows:

1. Theories, Methods, and Poetics: courses within this route will engage theoretical and philosophical concerns within the field, the methodologies that inform our understanding of Africana experiences, and the discourses that have shaped them. Core Elective Courses include:

   AFR 145 / STS 145(S) SEM Black Mathematics: The Power of Revolutionary Numbers
   Taught by: Keston Perry
   Catalog details

   AFR 205 / WGSS 207(F) TUT She Speaks in Color: Examining the ‘Color Complex’ in Toni Morrison’s Writings
   Taught by: VaNatta Ford
   Catalog details

   AFR 405(S) SEM CAPSTONE: Africana Studies and the Disciplines
   Taught by: James Manigault-Bryant
   Catalog details

   AMST 372 / STS 373 / AFR 374(F) SEM Technologies of Race
   Taught by: Brian Murphy
   Catalog details

   HIST 305 / AFR 304 / GBST 305 SEM A History of Health and Healing in Africa
   Taught by: Benjamin Twagira
   Catalog details

   PSCI 361 / AFR 364(S) SEM Black Political Thought
   Taught by: Da’Von Boyd
   Catalog details

2. Culture, Performance, and Popular Technologies: courses within this route explore music, the arts, and performance, and many will examine future directions of the field and the technologies that inform those directions. Core Elective Courses include:

   AFR 110 / WGSS 111(F) SEM Television, Social Media, and Black Women ‘Unscripted’
   Taught by: TBA
   Catalog details

   AFR 135 / AMST 135(F) SEM Queen Sugar and Black Study
   Taught by: James Manigault-Bryant
   Catalog details

   AFR 221 / REL 263(S) SEM Giving God a Backbeat: Rap Music, Religion & Spirituality
   Taught by: VaNatta Ford
   Catalog details

   AFR 249 / AMST 250(F, S) SEM Penning the Path: Writing and Publishing Black Studies
   Taught by: Messias Basques
   Catalog details

   AFR 302 SEM Complexion Complexities: Colorism in Literature, Lyrics & Everyday Life
   Taught by: TBA
   Catalog details

   AFR 317 / AMST 317 / DAN 317 / ENGL 317 / THEA 317 / COMP 319(F) SEM Black Migrations: African American Performance at Home and Abroad
   Taught by: Rashida Braggs
   Catalog details

   AMST 222 / MUS 217 / ENGL 221 / AFR 222(F) SEM Hip Hop Culture
   Taught by: Brian Murphy
   Catalog details

   DAN 111 / AFR 111(F) SEM Afro-Modern Dance I: Theory & Practice (Dunham Technique)
   Taught by: Saroya Corbett
   Catalog details

   DAN 201 / AFR 201 / MUS 220(F) STU African Dance and Percussion
   Taught by: Sandra Burton, Tendai Muparutsa
   Catalog details

   DAN 202 / AFR 206 / MUS 221(S) STU African Dance and Percussion
3. **Black Landscapes**: these courses critically examine the ways that race, belief, identity, subjectivity, power, and/or embodiment are informed by conceptualizations of space, geography, literature, and/or/ history. Core Elective Courses include:

- **AFR 233 / ENVI 204 / GBST 233(F) LEC Colonialism, Capitalism and Climate Crisis**
  Taught by: Keston Perry
  Catalog details
- **AFR 234 / AMST 234 / ENVI 247 / HIST 274 STU Race, Land and Settler (Racial) Capitalism: Ongoing Topics in (Dis)/(Re)possession**
  Taught by: Allison Guess
  Catalog details
- **AFR 235 / AMST 235 / GBST 235 / ENVI 253 / HIST 275 SEM Race, Land, Dis/Re-possession: Critical Topics in Environmental Injustice and Subaltern Geographies**
  Taught by: Allison Guess
  Catalog details
- **AFR 238 / ANTH 238(F, S) SEM Black Voices in Anthropology**
  Taught by: Messias Basques
  Catalog details
- **AFR 345 / GBST 346(S) SEM Dark Debts: Race, Money and Finance in the Modern World Economy**
  Taught by: Keston Perry
  Catalog details
- **AFR 440(F) SEM CAPSTONE: Performing Blackness**
  Taught by: Rashida Braggs
  Catalog details
- **AMST 412 / AFR 394 / STS 412(S) SEM Cold War Archaeology**
  Taught by: Brian Murphy
  Catalog details
- **ENVI 231 / AFR 231 / STS 231(S) SEM Africa and the Anthropocene**
  Taught by: Brittany Meché
  Catalog details

**ADVISING**

All majors will be assigned a faculty advisor, typically the department chair. Majors must meet with their advisor during the first week of classes during the fall semester and at the time of the spring semester registration period in order to plan their journey through the major. Concentrators are expected to meet with the chair and/or an Africana Studies faculty member to plan their concentration. Students are encouraged to talk at any time with the department chair or other Africana Studies faculty about the major/concentration.

**THE DEGREE WITH HONORS IN AFRICANA STUDIES**

The Honors trajectory is reserved for students who wish to conduct advanced research and study. A student wishing to earn honors must complete an “Honors Dossier” during the Winter Study term and Spring semester of their Senior Year. This Dossier is comprised of three linked essays. Students may begin the project with two essays written for Africana Studies courses and, under their advisor’s guidance complete additional research, incorporate instructor feedback, and substantially re-write and expand these two papers. The third essay must be a new work, written specifically for the Honors project. Students must also write a substantive introduction that explains the theme (theoretical, geographic, chronological etc.) that connects the three essays. The introduction should address the significance of the theme to the interdisciplinary study of the peoples and cultures of the African diaspora. It should also explain the logic of the three papers and how they work together. Dossiers will be due in mid-April (after Spring Break). Under some circumstances, a student may want to include a record of a performance or piece of visual art in the Dossier. In this case, a written analysis and explanation should accompany that piece. The total Honors Dossier should consist of no less than 45 pages of written work.

Students should submit a proposal for an Honors Dossier in the fall semester of their Senior year, no later than mid-October. They may draw on papers written in Africana courses during any semester including the fall semester of their Senior Year. Students may petition to include a paper written for a course outside of the Africana curriculum. Africana faculty will meet late in the fall semester to approve or decline Honors Dossier
proposals. Students whose proposals are approved will be assigned an advisor and should register for W31-AFR 494 in the winter study/spring of the Senior Year.

At the Honors presentation night in the spring, each Honors student will prepare and give an oral defense of their dossier. During the defense, students will present the key points their overarching project and field questions from select faculty and student critics, all of whom will have read the dossier.

**Study Away from Williams**

We encourage students to pursue cross-cultural comparative studies. A major/concentration in Africana Studies can be combined with study away from Williams for a semester or a year if plans are made carefully. Many courses that will be approved for college credit may also count toward the major/concentration if their subject matter is explicitly connected to Africana culture. Students planning to be away in the junior year should ideally have taken AFR 200: Introduction to Africana Studies before they leave. Students should consult as early as possible with the chair or their advisor about their plans for fulfilling the requirements of the major.

**Electives**

AFR 104  (S)  Race and a Global War: Africa during World War II  (DPE) (WS)

**Cross-listings:** HIST 104 GBST 104 AFR 104

**Secondary Cross-listing**

This course highlights African experiences of World War II. Although most histories have excluded Africa's role in the war, the continent and its people were at the center of major developments during in this global conflict. In fact, many Africans remember the Italian invasion of Ethiopia in 1935 as the start of the war. African servicemen fought alongside the Allied and Axis forces on major warfronts in Europe, Africa and Asia. African communities and individuals also established war charity campaigns to collect funds, which they sent to war ravaged societies in Europe. Indeed, African economies, despite their colonial statuses, kept European imperial nations afloat in their most hour of need. At the same time, African colonial subjects faced severe food shortages, the loss of working-age men to labor and military recruiters, and dramatically increased taxes. We will examine the impact of these and other wartime pressures on different African communities. How did African societies meet such challenges and how did they view the war? In this course we will examine the roles that women played during the war, and the various other ways that African communities met wartime demands. Other topics we will explore include the role of African women; colonial propaganda; political protest against the war; race and racial thought in the wartime era; war crimes; African American support for the liberation of Ethiopia; and the war's impact on decolonization across the continent. We will further study how Africans and outsiders have differently conceptualized the continent's role in the war by analyzing a variety of sources, including scholarly writings, archival materials, films, former soldiers' biographies, and propaganda posters.

**Requirements/Evaluation:** active participation in discussion, map quiz, 2 reading responses, and 3 essays (of about 5 pages)

**Prerequisites:** first-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** first-year students and then sophomores who have not previously taken a 100-level seminar

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 104(D2) GBST 104(D2) AFR 104(D2)

**Writing Skills Notes:** Students will write two 3-5-page essays each written in two drafts with instructor comments. They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course explores the colonial relationship during a major global crisis. Students will examine existing narratives of African contributions to the war and to come up with their own interpretations, and will be called to critically engage the question of why and how colonies made significant contributions to the Allied cause by producing needed materials and resources or by joining the fight. Africans made these contributions spite of various and complex inequities.

**Attributes:** AFR Core Electives GBST African Studies Electives HIST Group A Electives - Africa
AFR 110  (F)  Television, Social Media, and Black Women 'Unscripted'

Cross-listings: AFR 110 WGSS 111

Primary Cross-listing
Nene Leaks, Issa Rae, Zendaya, Oprah Winfrey, Lavern Cox and Joy Reid have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed—these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

Requirements/Evaluation: class participation, podcast, vlogs, 10-page paper, and a formal class presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: First year Students

Expected Class Size: 13

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Fall 2023

AFR 111  (F)  Afro-Modern Dance I: Theory & Practice (Dunham Technique)

Cross-listings: AFR 111 DANC 111

Secondary Cross-listing
Modern African diasporic dance creates a conversation between the past and the present; it brings forth memories of the African "homeland" and of the dispersal of African bodies around the world, while simultaneously engaging the current joys, pains, challenges, and cultural growth of Black people. Through movement and rhythm, dancers experience the embodied knowledge of previous generations, while connecting to contemporary cultural, political, and economic realities. Katherine Dunham devoted her life to exploring and exposing the multiple layers and complexities of the African diasporic experience through her ethnographic dance choreographies, her dance technique, her schools, her music, and her writing. Dunham's work as a dance anthropologist, artist, educator, and humanitarian is manifested in Dunham Technique; the technique is a fusion of African diasporic dance, ballet and modern dance, and functions as an embodied medium for cultural communication. The technique is considered "a way of life" as it uses theory and philosophy to engage participants in a holistic experience that is not only physical, but also intellectual, emotional, and spiritual.

Through this combination of physicality, history, theory, and philosophy, Dunham Technique is a tool to understand one's inner self and place oneself within a historical and cultural framework. In this course, students will explore the history, theory, and philosophies of Dunham Technique and Katherine Dunham, while actively participating with the technique's movement concepts and vocabulary. Students will engage in the fundamentals of a Dunham Technique movement class through center floor work, barre exercises, progressions, and choreography. The course will combine the studio experience of the physical technique with lectures and discussions. Students will learn about the three theories of Dunham Technique (Form and Function, Intercultural Communication, and Socialization through the Arts) and its three philosophies (Self-Examination, Detachment, and Discrimination) while also learning the history and historical context of the technique and its creator.

Class Format: The course meets in person, twice per week for the full semester. The course includes two main integrated components: physical dance training and lecture/discussion.

Requirements/Evaluation: Students will be evaluated on the completion of journals, the quality of the final movement assignment, the completion of weekly reading assignments, and their participation during class activities/discussions.
Prerequisites: None
Enrollment Limit: 15

Enrollment Preferences: Students interested in expanding their knowledge of African diasporic dance and Dunham Technique.

Expected Class Size: 12-15

AFR 113 (F) Musics of Africa

Cross-listings: AFR 113 MUS 120

Secondary Cross-listing

This course introduces musical traditions spanning the geographical breadth of continental Africa. We will prioritize hands-on experience and musical practice, critical listening, and deep social and political contextualization as strategies of musical engagement. Following an introductory exploration of overarching aesthetic and social trends in African musical practice, the course will then focus on 3-4 geographically rooted case studies, allowing us to discuss how different musical practices and subcultures (featuring traditional, contemporary, and popular forms) interrelate in a musical soundscape. The geographical focus of the case studies may vary but previous case studies have included: Ghana, Zimbabwe, Ethiopia, Egypt, Mali and the Democratic Republic of Congo.

Class Format: discussion

Requirements/Evaluation: grade based on attendance and participation, one synthesizing assignment at the end of each unit (for instance a 5-7 pg. paper, a podcast or performance-oriented assignment, an album review or curated listening list) and an 8-10pg final paper.

Prerequisites: no prerequisites: prior musical background is not essential for this class

Enrollment Limit: 20

Enrollment Preferences: current or prospective majors in Music and Africana Studies, seniors.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

AFR 115 (F) The Literature of Sports (DPE) (WS)

Cross-listings: AFR 115 ENGL 115

Secondary Cross-listing

The ubiquity of the sporting event, the athlete as hero, the athlete as failure, the crowd, the fan, the stadium, and all of the complex conflicts therein have long been the subjects of some of the finest writing in America and throughout the world. Writers have used sport as a context through which to explore and examine ideas such as beauty, the sublime, tragedy, politics, race, class, sexuality, and gender. This course will focus on poetry, fiction, and non-fiction invested in the public spectacles and private revelations of sport ranging from the poetics of praise to issues of urbanism, colonialism, globalization with readings by Pindar, Rankine, CLR James, Baldwin, Hemingway, Oates, DeLillo, and many others.
Requirements/Evaluation: Students will be expected to complete a number of short (5 pages or less) papers during the semester and one longer paper (8-10 pages) at the end of the semester.

Prerequisites: None.

Enrollment Limit: 14

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course.

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 115(D1) ENGL 115(D1)

Writing Skills Notes: Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course will focus on literature about sports that addresses, among other topics, civil rights activism, gentrification, race dynamics and race relations both inside and outside of the USA, American exceptionalism, sociocultural construction of emotional displays, mental health, religious conflict, and anti-blackness.

Not offered current academic year

AFR 128 (F) James Baldwin's Song

Cross-listings: COMP 129 MUS 179 AFR 128

Primary Cross-listing

"It is only in his music [. . .] that the Negro in America has been able to tell his story. It is a story which otherwise has yet to be told and which no American is prepared to hear," wrote James Baldwin in Notes of a Native Son in 1955. In this course, we strive to listen more closely to racialized experience through James Baldwin's musical literature. Through analysis and creation of music, we hope to better understand cultural difference and collective humanity. In this course, we closely analyze James Baldwin's use of song names, creation of musician characters, and replication of musical elements in his writing. Baldwin's musical word play crosses historical and genre boundaries. So we will explore texts from his early to late career, such as the gospel music of his youth in the semi-autobiographical novel Go Tell It on the Mountain, the metaphor of the blues in the play written during the civil-rights movement Blues for Mr. Charlie, the jazz musician protagonist in "Sonny's Blues" written after World War II in Paris, and his only musical recording in A Lover's Question set down near the end of his life. In addition to closely analyzing James Baldwin's attention to music throughout his literature, students will learn basic music writing and production skills. The tutorial will draw on a range of musical resources, including playlists, music workshops, guest lectures and performances. All of these resources will guide students to a more attuned hearing not only of music but also of the African American experience it reflects. By the end of the course, students will have written several short 1-2 page close analysis essays and song lyrics. For their final project, students will produce an original song based on key insights from the course. No musical experience is required, though an openness to learn and practice songwriting is expected.

Requirements/Evaluation: Several short 1-2 page close analysis essays of Baldwin's work, oral peer feedback presentations, song lyrics, and an original song composition for the final project

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: This course is specifically for first-year students and they will receive preference in this class; a statement of interest will be solicited from pre-registrants.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

AFR 132  (S)  Contemporary Africana Social and Political Philosophy

Cross-listings:  AFR 132 AMST 132 PSCI 171

Primary Cross-listing

This introductory seminar investigates the relationship between three major schools of thought in contemporary Africana social and political philosophy: the African, Afro-North American, and Afro-Caribbean intellectual traditions. We will discuss a range of thinkers including Dionne Brand, Aimé Césaire, Angela Davis, Édouard Glissant, Kwame Gyekye, Paget Henry, bell hooks, Katherine McKittrick, Charles Mills, Nkiru Nzegwu, Oyèrónke Oyewùmí, Ngugi wa Thiong'o, Cornel West, and Sylvia Wynter. A primary goal of the course is to provide students with the intellectual resources to decipher problems central to philosophical discourse and to allow students an opportunity to apply what they learn to critical issues in current geopolitics.

Requirements/Evaluation: attendance and participation, two 5- to 7-page essays, and one 10-page final paper

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: first- and second-year students

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

AFR 133  (S)  Plantation and the Plot: the Poetics of Caribbean Economic Thought and Struggle

Cross-listings:  AFR 133 COMP 133 ECON 133 GBST 133

Primary Cross-listing

This introductory course to Caribbean Economic Thought contextualizes the poetics of economic ideas, struggle and knowledge alongside popular literary works connected to contemporary challenges of Caribbean Economic Development. Using the 'plantation' and the 'plot' as sites of continuing exploitation and struggle, this course delves into Caribbean postcolonial development thinking. We will explore the present-day relevance of these sites to racial justice and environmental crises and their historical roots in colonial surplus extraction. By examining literary and economic writings of Caribbeanists and Caribbean connected contributors side by side, we seek to uncover these links to how the Caribbean economy, its seascape and society are framed, conceptualized and traversed as transplanted spaces, economic zones, and extractive geographies today. Unorthodox perspectives on economic and social thought that emerged to explain the region's integral role in merchant and industrial capitalism, New World social formations and contemporary globalization will also be discussed. We will closely analyze critical texts of contributors to the New World Group that centers the Caribbean within global economic transformations. Some events this course covers are indigenous genocide, labor regimes, agrarian change, structural adjustment, economic and ecological crises, postcolonial debt, technology, current fragmentation of global neoliberalism. These events will help shape an appreciation for the material and socio-cultural understandings of economic phenomena starting from the plantation to the plot within cultural and literary works in pluralistic, productive, and powerful ways.

Requirements/Evaluation: Oral or poster presentation analyzing a literary and Caribbean economist's work side-by-side (15 minutes or full-length/ multi-page poster); critical analysis of a Caribbean economic sector or major regional report—choice made after discussion with instructor (10 pages); final project: review of a specific Caribbean community defined by group, geography or economic status drawing upon class, race, gendered axes of analysis (15 pages); participation (creative presentation of a reading drawing upon Caribbean cultural traditions that raise questions for class discussion)

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Preference also for 1st and 2nd year students. If over-enrolled preference to AFR and Political Economy students.

AFR 135 (F) Queen Sugar and Black Study

Cross-listings: AFR 135 AMST 135

Primary Cross-listing

The critically acclaimed and award winning television series, Queen Sugar, follows the Bordelon family through its struggles to sustain hold of its ancestral land. An adaptation of the eponymously named 2014 novel by Natalie Baszile, the series will soon enter its seventh and final season. This gateway course to Africana Studies will explore the historical, political, and economic contexts of the making of the series before considering its representations and dramatizations of key topics of Black study: the afterlives of enslavement, plantation regimes, global sugar production, land dispossession, the carceral state, gender and sexualities, kinship, activism, and African-diasporic spiritualities.

Class Format: Over the course of the semester, students will be required to watch the entirety of the television series.

Requirements/Evaluation: weekly journal entries on episodes (300-500 words); in-class writing reflections; class presentation; final project that expands on a course topic

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: This seminar is designed for first-year students. Should the course be overenrolled, students will be selected after an interview with the instructor.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

AFR 145 (S) Black Mathematics: The Power of Revolutionary Numbers (DPE)

Cross-listings: STS 145 AFR 145

Primary Cross-listing

The power of numbers is undeniable. Numbers can be used to illuminate, obscure or oppress. Numbers are not only symbols in the strictest sense, but are powerful representations that have considerable impact on institutions, policy, the real world and our lives. Data are said to be the “Black gold” of the 21st century. By use of human, economic, political and social indicators and metrics Western scientists, statisticians, governments and powerful actors have promoted liberalism, militarism and capitalism, which often dehumanized the racialized ‘Other’. Various techniques in social sciences like forecasting, statistics, quantification, predicting, modeling all rely heavily on numbers or their manipulation/interpretation. But what social and economic goals and who do statistics serve? What ideologies underpin these numbers about Black people/communities? What is the significance of numbers to Black life? To what purpose have numbers been put in the furtherance of Black liberation? This course addresses these questions and the different uses to which numbers have been put by Black revolutionaries and communities. Black activists, scholars and communities have questioned how statistics are formulated, used and their Eurocentric basis as well as their limited ability to accurately reflect the Black world. We delve an alternative Black philosophy, specifically how Black people have historically used/defied/circumvented the numbers game. We will study and historically trace the invention of statistics, and how Black people, organizations and communities have utilized numbers to resist oppression, shape movements and direct emancipatory efforts. From Ida B Wells, to W. E. B. du Bois, Claudia Jones and Eric Williams, using numbers differently, has pushed back against oppression, reinterpreted history and spurred social and political change.
Requirements/Evaluation: Attendance and Participation (20%); Themed visual infographic/design (25%); Critical numbers/data analysis paper (30%); Case study/peer review exercise (25%)

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: If over-enrolled, preference to AFR majors/concentrators.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 145(D2) AFR 145(D2)

Difference, Power, and Equity Notes: Students will be guided through the history and alternative use of numbers to understand how they came to constitute powerful tools that have brought about systemic inequality and liberation. They will gain an appreciation of how these tools have been used and manipulated both by powerful historical actors, and oppressed groups and emerging figures acting towards emancipatory purposes.

AFR 158  (S)  North of Jim Crow, South of Freedom  (DPE) (WS)

Cross-listings: AFR 158 HIST 158

Secondary Cross-listing

This course analyzes the freedom struggle in the North during the twentieth century. Whereas black northerners drew from broader campaigns and traditions of black resistance, we will explore territorial distinctions in the region that otherwise have been flattened within the long history of civil rights discourse. To accomplish this aim, we will engage the following themes: black culture and radicalism; community formation and residential segregation; demographic and migratory transitions; deindustrialization and the war; gender and respectability politics; labor tensions and civil rights unionism; northern racial liberalism; and the influence of world affairs—all with an eye toward scrutinizing the freedom struggle in its northern variety.

Requirements/Evaluation: Students are expected to participate actively and will write three short essays (3-4 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (8-10 pages) in consultation with the instructor and will be required to submit a topic proposal.

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first-year students and then sophomores who have not previously taken a 100-level seminar. If the course is overenrolled, students with junior and/or senior status will be removed automatically. Other students will complete a questionnaire.

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 158(D2) HIST 158(D2)

Writing Skills Notes: Students will write three short essays (3-4 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages) in consultation with the instructor and will be required to submit a topic proposal and outline, an annotated bibliography, and a peer-reviewed draft of the final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course analyzes the long black freedom struggle in the North during the twentieth century. It examines black northerners’ efforts to achieve citizenship and equality as well as their challenges and involvements with northern racial liberalism. It offers students the opportunity to think critically about how black resistance campaigns emerged and evolved as discriminatory racial practices persisted in spite of legal and legislative remedies.

AFR 159  (F)  Crossing the Color Line: A History of Passing  (DPE) (WS)

Cross-listings:  HIST 159 AFR 159

Secondary Cross-listing

In June 2015, Rachel Dolezal emerged as a media spectacle and the subject of national scrutiny after her white parents stated publicly that Dolezal is a white woman passing as black. Their insistence that Dolezal is white came in the wake of her reports to local news media and police that she had been the victim of several hate crimes. To critics, Dolezal is a fraud who has committed cultural appropriation. Yet, for her supporters, Dolezal’s racial identification as a black woman is authentic and indisputable, since race is not based on biology but rather is a social construction. For both groups as well as impartial observers, many wondered curiously why a white woman had chosen to pass as black, especially given that historically it has been African Americans who opted to become white. Inspired by the controversy surrounding Dolezal, this tutorial will explore the history of passing in the United States. Whereas our attention will primarily be focused on black-to-white passing, we will expand our understandings of passing by emphasizing the variety of ways that identities have been shaped through the crossing of boundaries—class, ethnic, gender, intellectual, political, religious, and sexual. To accomplish our goals, we will read and cross-examine fictional and nonfictional as well as primary and secondary historical accounts of boundary-crossers. We will also screen several films that engage the theme of passing.

Requirements/Evaluation:  Weekly formal response papers and written critiques.

Prerequisites:  None.

Enrollment Limit: 10

Enrollment Preferences:  First and second-year students will be prioritized, followed by history majors. Should the course be overenrolled, students will be asked to complete an enrollment questionnaire.

Expected Class Size: 10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 159(D2)  AFR 159(D2)

Writing Skills Notes:  Students will be required to complete formal writing assignments each week, alternating between response papers (4 pages) and written critiques (2-pages) of their peers’ work. Students will receive substantial feedback on their writing skills, with verbal and written suggestions for improvement. Students also will receive feedback from their tutorial partners.

Difference, Power, and Equity Notes:  Narratives of racial passing provocatively raise questions about the construction, logics, reinforcement, and subversion of racial categories and identities. Tutorial students will have the opportunity to deconstruct the meanings of race and identity in addition to thinking culturally, historically, and ontologically about the implications and value of these constructs. In essence, we will theorize racial identity, reconsidering, if not challenging, its stable notions of racial intelligibility.

AFR 167  (S)  Let Freedom Ring? African Americans and Emancipation  (WS)

Cross-listings:  AMST 167 AFR 167 HIST 167

Secondary Cross-listing

This course will examine African Americans’ transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

**AFR 200 (F)(S) Introduction to Africana Studies**

This course introduces students to the content and contours of Africana Studies as a vibrant field of knowledge. Through exploration of the genealogy, disciplinary diversity, and evolution of the field, we will examine the depth and range of experiences of African-descended peoples throughout the Americas, the Caribbean, Europe, and Africa. We will also give some attention to how members of the Diaspora remember and encounter Africa, as well as their diverse responses to the history of enslavement, colonialism, apartheid, racism, and globalization. Through materials that embrace both historical and contemporary perspectives, we seek to help students develop critical frameworks for understanding African diasporic experience while simultaneously illuminating disjunctures and challenges for the field. This course features two pedagogical strategies: 1) a rotational, interdisciplinary approach that includes the expertise, methods, and specializations of Africana faculty; and 2) the incorporation of aesthetic materials--film, photography, music, dance, performance, and artwork--to enhance student ability to draw ongoing connections between visual and textual sources covered in the course. Close textual analysis, vibrant debate, and engaging discourse are expected.

**Requirements/Evaluation:** class participation, weekly e-reading response papers, two short essays, and a final research project

AFR 202 (S) Narrating Color: Black Women Sing and Write About Complexion

Cross-listings: WGSS 206 COMP 236 AFR 202

Primary Cross-listing

Colorism, skin color discrimination where light skin is privileged over dark skin, is not a new phenomenon, but globally entrenched in our society and one of the many vestiges of white supremacy. For Black Americans of all backgrounds, colorism is a familiar and a living legacy concretized by the institution of slavery in the Americas. Although some believe that we are "post-color," similarly to those that naively believe we are "post-race," one can look to the recent example of misogynoir (misogyny directed at Black women) and skin color politics that Meghan Markle, the Duchess of Sussex, has faced at the hands of the British Monarchy, that her light-skinned color, biraciality, and class privileges couldn’t protect her from. Alternatively, we can look at the numerous examples of colorism and anti-Black racism that tennis icon Serena Williams is subjected to because of her dark-brown skin complexion and body shape. One cannot fully understand the issue of colorism without understanding that it is an outgrowth or an extension of anti-Black racism firmly rooted in white supremacy, and so insidious that it impacts all aspects of Black life. Examining colorism through literary texts and music, provides a depth of understanding that both compliments and expands these empirical studies. Literature and music provide the narratives and rhythm that paint a vivid picture of the many ways that colorism impacts the lives of Black people. Through the methods of literary and rhetorical criticism we will examine the works of five Black women authors and music artists that take up issues around colorism and passing. We will explore, Toni Morrison's, The Origins of Others (2017), Brit Bennett's, The Vanishing Half (2020), Tressie McMillian Cottom's, Thick (2019), Marita Golden's, Don't Play in the Sun (2004), Yaba Blay's, One Drop: Shifting the Lens on Race (2021), Nina Simone's, "Four Women" (1966) and "Young, Gifted and Black" (1958), Sara Martin's, "Mean Tight Mama" (1927), India.Arie's, "Brown Skin" (2001), Azealia Banks' "Liquorice" (2012), and Beyoncé's "Creole" (2012), "Formation" (2016) and "Brown Skin Girl" (2020). By examining colorism in both literature and music, it will give first year students a foundational and nuanced understanding of skin tone bias and equip them with the tools to critically engage literary and music texts.

Requirements/Evaluation: Three, short papers (4-5 pages) discussing aspects of the readings and songs; three response papers to tutorial partner's papers (2 pages long); two, video essays; two, Twitter threads explaining aspects of one of the books and one of the songs; and a curated playlist of songs that would serve as accompaniment to one of the texts from the class.

Prerequisites: N/A

Enrollment Limit: 10

Enrollment Preferences: This class is specifically designed for first year students. Sophomores can register only with advanced permission.

AFR 203  (F)  The Making of Modern Africa  (DPE)
Cross-listings: AFR 203 HIST 205

Secondary Cross-listing
This course traces the incorporation of Africa into an expanding global world from the middle of the 19th century to the present and examines the impact of this integration on the history of African cultures and modern nation states. It is designed to provide you with an introductory understanding of the economic, social, and political forces that have shaped Africa in recent times and continue to affect the lives of individual people across the continent. Over the course of the semester you will be introduced to major historical themes in African History from the past 150 years, including the abolition of the slave trade and its effects, African states in the 19th century, the growing integration of different regions into shifting global and economic systems, European colonization, and African resistance to imperial conquest. We will also explore the emergence of the nationalist and anti-colonial movements, and Africa’s post-colonial experiences of self-governance. Within these broad historical processes, the class will cover additional key themes such as religious change and the role of Western missionaries; changing gender roles; environmental exploitation and change; the emergence of the developmental state; urbanization; military dictatorships, and war and violence in the late 20th century. We will also cover some of the issues surrounding the study of African History as a discipline. This is a challenging task as no single course can cover more than a silver of the complexity and variety of the continent. This is why we approach the study of Modern African History through a comparative prism.

Requirements/Evaluation: active participation in discussion, map quiz, response papers, midterm and final exams, and a case study paper (7-10 pages)

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

Expected Class Size: 30

Grading: no pass/fail option, yes fifth course option

AFR 205  (F)  She Speaks in Color: Examining the 'Color Complex' in Toni Morrison's Writings
Cross-listings: AFR 205 WGSS 207

Primary Cross-listing
The practice of colorism, or skin color discrimination, is very familiar to people of color globally. Often described as intra-racial racism, colorism within the Black American context is part of the colonial legacy of institutionalized slavery where the vestiges of white supremacy have created color castes among Blacks that still, to this day, have serious consequences for those on the darkest end of the color spectrum. The impact of this practice is far-reaching, influencing everything from romantic partnering, economic and educational attainment, and perceptions of beauty, attractiveness, and criminality. Although the vast majority of colorism scholarship is empirically based, there is much that we can glean from a literary investigation of this practice by analyzing the works of renowned writer, theorist, and folklorist Toni Morrison. Her work is particularly useful in examining issues of skin color, as this topic has been persistent yet underexplored in Morrison's writings. Employing the methods of literary and rhetorical criticism, this tutorial will investigate five Morrison novels, *The Bluest Eye* (1970), *Sula* (1973), *Song of Solomon* (1977), *Love* (2003) and *God Help the Child* (2015), and...
some of her non-fiction writings. In our discussions of each text, we will examine the problem of the "color complex" at the intersections of race, gender, sexuality, class and sexual violence, and how the characters manage these overlapping issues. We will bring the novels into conversation with social science articles on the practices of colorism in daily life. Because the tutorial blends different kinds of investigations into colorism, it will equip first year students with tools to critically engage and interrogate fictional literature; help them identify the real and nuanced ways that color discrimination affects Black communities; and consider how Morrison, one of our foremost writers, bridges literary creativity with ethnographic observation.

Secondary Cross-listing

Before the 20th century, the African continent was the source of dance and music that influenced new forms rooted on and off the continent. These forms are shaped by the impact of religion, colonialism, national political movements, travel, immigration, and the continuing emergence of technology. In South Africa, the labor conditions of miners instigated the creation of Isicathulo, Gum boots, and in Brazil the history of colonialism is a factor that anchors Samba as a sustaining cultural and socioeconomic force. The birth of Hip Hop in the 20th century finds populations across the globe using its music, dance, lyrics, and swagger as a vehicle for individual and group voice. Hip Hop thrives as a cultural presence in most countries of the African continent and in the Americas. We will examine the factors that moved this form from the Bronx, New York, to Johannesburg, South Africa, and Rio, Brazil. We will examine at least two of these forms learning dance and music technique and composition material that will inform their practice. Each of these genres generated new physical practices, new and enduring communities while continuing to embody specific histories that have moved beyond their place of origin. What is their status in this century?

Class Format: Class hours will be used to learn and use the dance and music of at least two forms including historical context, and individual or group performance project. When possible, our process will include guest artists and field trips to see live performances. As well as use of the archives at Jacob’s Pillow Dance Festival, Sawyer Library and the art collection at Williams College Museum of Art.

Cross-listings: AFR 207 ARTH 207

Secondary Cross-listing

This tutorial provides a focused study of the politics / poetics of visualization and identification associated with film and cinema about Africa from past to present. From colonial-era propaganda newsreels about Africa's "fighting men" to contemporary white-savior narratives that exploit current socio-political ruptures on the continent for epic effect, films about Africa produced by a primarily Western cinematic regime have proven themselves to be highly effective apparatuses for framing "Africa" as a concept to be summoned time and time again to tell different stories for different audiences, and in doing so privilege particular viewpoints and imaginaries. This tutorial will provide a space for robust discussion and debate about the various representative tropes, conceptualizations, and visualizations that have been used to shape the contours of "Africa" as understood by a primarily Western audience from past to present, and how these same tropes in many ways have come to define the nature of the relationship between film / cinema and the continent over the history of their engagement. In doing so, it will also address how strategic displays and narratives deployed by cinematic productions often support specific power dynamics that locate an idea of "Africa" within paradigms of specific cultural and political understanding. In zeroing in on how such films promote targeted realities for people and places within the continent, this tutorial will address how "Africa" in Western film and cinematic traditions is positioned within a particular framework of understanding that is more often than not irrevocably tethered to a Western imaginary.

Requirements/Evaluation: targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length)

Prerequisites: none

Enrollment Limit: 10

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 207(D1) ARTH 207(D1)

Writing Skills Notes: This course fulfills Writing Skills requirements through its focus on the development of writing proficiency in terms of writing mechanics, syntax, and organization. It is also designed to help students craft a general approach to formulating a well-articulated, compelling argument. Students will receive extensive feedback on bi-monthly writing assignments from both the instructor and their peers as well as a comprehensive mid-semester critique from the instructor.

Difference, Power, and Equity Notes: This course fulfills DPE requirements through its exploration of issues of 'authentic' representation as they have been applied to representations of "Africa" displayed within the contexts of Western film and cinema. Through discussions of cultural capital and the politics of representation, students analyze how a general African 'identity' has been dictated by Western film culture and how this hegemony is currently being disrupted by an emergent generation of African artists and filmmakers.

AFR 208 (S) Time and Blackness

Cross-listings: AMST 208 REL 262 AFR 208

Primary Cross-listing

The concept of time has been one of the most examined, yet least explicitly theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory—which involves thinking about time—time itself has rarely the subject of sustained inquiry. This may be due to its abstractness as an idea, and the level of analysis its conceptualization demands, or because time in the Black experience cannot be understood outside of the meaning of race, which itself is not completely tangible. In this tutorial, "Time and Blackness," we will explore how Black writers across a number of genres—spiritual autobiography, fiction, memoir, literary criticism, and cultural theory—understand time, and create paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in Black writings? How does race shape the ways Black writers conceive the experience of time? And, finally, to what can we attribute the recent
surge in explicit, theoretical examinations of "time and blackness"?

**Requirements/Evaluation:** assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** concentrators in Africana Studies, majors in Religious Studies, and majors in American Studies

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

AFR 209  (S)  Introduction to Racial Capitalism  (DPE) (WS)

**Cross-listings:** AFR 209 AMST 202

**Secondary Cross-listing**

The historical relationship between race and capitalism is one of the most enduring debates in U.S. historiography, shaping modes of inquiry and analysis across history, law, economics, sociology, anthropology, and other fields. This course seeks to introduce students to the concept of "racial capitalism"—which rejects treatments of race (and racism) as external to the so-called real workings of capitalism—as a way to understand this relationship and as an activist hermeneutic through which to identify and respond to the conditions that American Studies must reckon with. Students will gain familiarity with the global history of racial capitalism and the power of the concept itself through secondary sources and a wide range of primary sources, and through engaged discussion and short essays. Throughout the course, we will pay special attention to the cultural politics, political geographies, and historical development of racial capitalism, thus attending to how the social relations of racial capitalism have been known, lived, and resisted across time and space. The course is organized around three key themes: the land question; race, capitalism, and nation; and the banalities of racial capitalism. Across these themes, the course will address such issues and topics as North American settler colonialism, circum-Caribbean plantation slave and "Coolie" labor, mass incarceration, the subprime mortgage crisis, and the War on Terror. The course will do so through and against a history of racial capitalism that privileges the U.S. nation-state in particular. By the end of this course, students should be able to: detail and analyze the historical development of and resistance to racial capitalism, doing so in relation to the global itineraries of racial slavery, settler colonialism, imperialism, and white supremacy; trace the history of the concept of racial capitalism itself; and identify how the concept continues to shape the field of American Studies.

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** American Studies majors, students specializing in Native American and Indigenous Studies, Africana majors, History majors

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 209(D2) AMST 202(D2)

**Writing Skills Notes:** Emphasis on writing process and revision: Three thesis papers at 5 pages each (each receiving critical feedback from professor and peers); one keyword glossary where students develop rigorous definitions of course key terms; one roundtable discussion based on the final paper.

**Difference, Power, and Equity Notes:** Throughout, the course addresses the issues of difference, power, and equity amongst groups and the nature of the theoretical tools or perspectives used to understand these issues. It does so familiarizing students with "racial capitalism" as both a way of
understanding the historical relationship between race and capitalism, and as an activist hermeneutic to respond to the conditions that American Studies and other fields must reckon with in the present.

AFR 211  (S)  Race, Environment, and the Body

Cross-listings: SOC 211 AFR 211 ENVI 211 AMST 211

Primary Cross-listing

This course is organized around three distinct, but overlapping, concerns. The first concern is how polluting facilities like landfills, industrial sites, and sewage treatment plants are disproportionately located in communities of color. The second concern is the underlying, racist rationales for how corporations, in collaboration with state agencies, plot manufacturers of pollution. The final concern is how the environmental crises outlined in the first two sections of the course are experienced in the body. In reviewing a range of Black cultural productions—like literature, scholarship, music, and film—we will not only consider how environmental disparities physically affect human bodies, but also how embodiments of eco-crisis lend to imaginaries of the relationship between the self and the natural world.

Class Format: discussion

Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

AFR 212  (S)  Jazz Theory and Improvisation I

Cross-listings: MUS 104 AFR 212

Secondary Cross-listing

The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based composition etc. Appropriate for students with basic skill on their instrument and some theoretical knowledge including all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. This is a performance practice course and instrumental competence is essential. Vocalists and drummers will be encouraged to study the piano; pianists guitarists and bassists should be able to sight read chords on a jazz lead sheet.

Class Format: alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire

Requirements/Evaluation: weekly assignments, (e.g., harmonic analysis and exercises in transposition and transcription), a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance

Prerequisites: MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged

Enrollment Limit: 15

Enrollment Preferences: prospective Music majors, then Jazz Ensemble members, then Music majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option
AFR 213 (S) Race, Gender, and the Alien Body: Octavia Butler's Science Fiction

Primary Cross-listing
Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947-2006) is among the most highly regarded science fiction writers. Butler's uncanny ability to imagine the future anew and to merge those ruminations with her experiences as an African American woman provide powerful commentary on--and often disrupt--modern understandings of race, gender, and human embodiment. We will explore questions such as: What role does 'gender' play in Butler's fiction? How does Butler's treatment of the 'alien' cause us to reconsider what it means to be human? How does Butler incorporate 'race' and the concept of 'other' into her fiction, and how do these techniques help us situate contemporary discussions of a post-race society? We will examine the relationship between Butler's visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best-selling text *Kindred* (1979), the haunting dystopian novel *Parable of the Sower* (1994), the popular vampire text *Fledgling* (2005), and the collection *Bloodchild and Other Stories* (1996). We will also explore contemporary engagement with Butler's work including the relationship between the main character from her book *Dawn* (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler's work broadly, and with particular attention to how the concepts 'race,' 'gender', 'alien' and 'body' are interrogated in her writings.

Requirements/Evaluation: attendance, paired weekly reflection/response papers, a 5- to 7-page creative writing assignment, and a final essay of 10 pages

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students with interests and/or prior coursework in Africana Studies and Women's, Gender, and Sexuality Studies

AFR 216 (S) Moving While Black

Cross-listings: AFR 216 COMP 212 AMST 212 DANC 217

Primary Cross-listing

Opening your apartment door, driving down the highway, taking a knee, raising a fist, sitting at the lunch counter then or sitting in a café now, these movements have historically and presently prompted fear at a minimum and in the most grave cases death for black people. Whether in the U.S. or globally, moving in the world as a black person often means being perceived as different, foreign and threatening. Crawling, dancing, running and boxing, these movements have countered fear and articulated the beauty, pride, creativity and political resistance of black people. In both cases, black movement matters and means much. While many consider movement to be just organized dance moves, this course expands students' definitions of black movement and teaches them to analyze multiple perceptions, uses, and reactions to it. "Moving while Black" offers examples of physical movement in improvised and practiced performance, quotidian movement, geographical movement across national borders and symbolic, politicized gestures. Students will investigate black movement via interdisciplinary sources that reflect various time periods and locations. Students may analyze such texts as Jacob Lawrence's visual art in The Migration Series, the movement of the rumba dance form between Cuba and the Democratic Republic of Congo, the Alvin Ailey American Dance Theater's "Revelations," William Pope.L's choreographed crawls, the 1995 World Rugby Cup in South Africa, and the 2018 case of a Kansas resident arrested while moving into his own home. Additionally, this course features an important practice element, in which students experiment with in-class movement exercises and workshops, engage with dance archives at Jacob's Pillow, interview participants of Kusika, and create and perform their own choreographies. While no previous experience in performance is required, curiosity and openness to learning through one's own body movement is expected.

Class Format: classes will rotate throughout the semester between seminar discussions in the classroom and performance exercises in the studio

Requirements/Evaluation: multiple reading/viewing responses in a movement journal, an essay closely analyzing movement; a presentation, and multiple movement-based performances including a final project with outside research and a proposal

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Africana Studies concentrators

AFR 218 (F) ReReading/Righting Ballet's History: Celebrating BIPOC Figures in Ballet (w/ Ballet Technique)
Cross-listings: DANC 207 AFR 218

Secondary Cross-listing

"What does dance give you?" asked the great African American dancer, teacher, and director Arthur Mitchell: "The freedom to be who you are and do what you want to do." In the ballet world, however, Black, Indigenous, and People of Color have struggled to achieve that "freedom" their white counterparts have enjoyed. In this course students continue their technical/artistic training in ballet while also exploring different topics in past and current ballet history; in Fall 2022, our main focus will be on some of the notable BIPOC figures in the world of ballet, with the history of ballet providing both a timeline and a sociopolitical backdrop against which we can trace and discover the intersectionality that has helped shape the aesthetics of ballet as well as other genres we know today. Though this is primarily a studio course (with twice-weekly ballet technique classes) readings and viewings relevant to our coursework will be assigned; a third weekly meeting will be held for group discussions on those assignments. Alongside broader ballet history texts, the essays and articles by authors such as Brenda Dixon Gottschild and Theresa Ruth Howard will offer keen insights into some of the more specific issues and topics regarding race and diversity in the field of ballet. In addition to informal, written responses to the readings and viewings, Howard's website "Memoirs of Blacks in Ballet" will be an important anchor/springboard for course projects. Howard will be a guest collaborator in this course for Fall '22; in addition to joining us (remotely) for discussions, she will guide us in those projects.

Class Format: Students will be placed in either Beginning Ballet, or Intermediate/Advanced Ballet (see prerequisites for more information): ALL students will meet together for a third class meeting/seminar.
Requirements/Evaluation: Robust engagement in technique classes and meeting sessions; timely and thoughtful written (informal) responses to assigned readings and viewings; development and presentation of course projects.
Prerequisites: Technique for the two levels will be separate. For the beginner level NO prior experience is required. For the int/adv level, students must have at least three yrs of prior ballet training, and instructor's permission.
Enrollment Limit: 12
Enrollment Preferences: Students who are invested in learning both the physical aspect of ballet technique, as well as its broader history and the specific areas this course is investigating.
Expected Class Size: 8
Grading: yes pass/fail option, yes fifth course option
Materials/Lab Fee: Ballet class attire (i.e., leotards, tights/leggings, slippers)--students are responsible for acquiring personal clothing and shoes. Est. cost $75-150.
Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 219  (S)  Afro-Modern Dance II: Theory & Practice (Dunham Technique)

Cross-listings:  AFR 219 DANC 211

Secondary Cross-listing

Modern African diasporic dance creates a conversation between the past and the present; it brings forth memories of the African "homeland" and of the dispersal of African bodies around the world, while simultaneously engaging the current joys, pains, challenges, and cultural growth of Black people. Through movement and rhythm, dancers experience the embodied knowledge of previous generations, while connecting to contemporary cultural, political, and economic realities. Katherine Dunham devoted her life to exploring and exposing the multiple layers and complexities of the African diasporic experience through her ethnographic dance choreographies, her dance technique, her schools, her music, and her writing. Dunham's work as a dance anthropologist, artist, educator, and humanitarian is manifested in Dunham Technique; the technique is a fusion of African diasporic dance, ballet and modern dance, and functions as an embodied medium for cultural communication. The technique is considered "a way of life" as it uses theory and philosophy to engage participants in a holistic experience that is not only physical, but also intellectual, emotional, and spiritual. Through this combination of physically, history, theory, and philosophy, Dunham Technique is a tool to understand one's inner self and place oneself within a historical and cultural framework. In this course, students will explore the history, theory, and philosophies of Dunham Technique and Katherine Dunham, while actively participating with the technique's movement concepts and vocabulary. Students will engage in the fundamentals of a Dunham Technique movement class through center floor work, barre exercises, progressions, and choreography. The course will combine the studio experience of the physical technique with lectures and discussions. Students will learn about the three theories of Dunham Technique (Form and Function, Intercultural Communication, and Socialization through the Arts) and its three philosophies (Self-Examination, Detachment, and Discrimination) while also learning the history and historical context of the technique and its creator. Students are expected to have taken DANC 111, DANC 204, DANC 206, or had some prior significant training in Dunham Technique.

Class Format: The course meets in person, twice per week for the full semester. The course includes two main integrated components: physical dance training and lecture/discussion. Students will experience guest artists certified in Dunham Technique.

Requirements/Evaluation: Students will be evaluated on the completion of (3) journals, the quality of the final movement assignment, the completion of weekly reading assignments, and their participation during class activities/discussions.

Prerequisites: Students are expected to have taken DANC 111, DANC 204, DANC 206, or had some prior significant training in Dunham Technique.

Enrollment Limit: 10

Enrollment Preferences: Students interested in expanding their knowledge of African diasporic dance and Dunham Technique.

AFR 221 (S) Giving God a Backbeat: Rap Music, Religion & Spirituality

Cross-listings: AFR 221 REL 263

Primary Cross-listing

On the surface, religion and rap music may seem as if they have little in common. Yet, like other Black musical traditions such as spirituals and the blues, rap is rooted in African American religious traditions. In this course, we will explore the ways in which rap music intersects with the sacred and secular worlds. Through an examination of black religious traditions, lyrics, music videos, and digital media, we will unearth what Anthony Pinn calls the "spiritual and religious sensibilities" of rap music. Grounded in culture-centered criticism, we will investigate the rhetoric of rap and religion through the theoretical ideas of Black Liberation Theology and hip-hop feminism.

Requirements/Evaluation: students will be evaluated on their class participation, Twitter threads, response papers, quizzes, and a final class group project

Prerequisites: none

AFR 222 (F) Hip Hop Culture (DPE) (WS)

Cross-listings: ENGL 221 AFR 222 MUS 217 AMST 222

Secondary Cross-listing

The course examines how young people of color created hip hop culture in the postindustrial ruins of New York City, a movement that would eventually grow into a global cultural industry. Hip hop music producers have long practiced "diggin' in the crates"--a phrase that denotes searching through record collections to find material to sample. In this course, we will examine the material and technological history of hip hop culture, with particular attention to hip hop's tendency to sample, remix, mash-up, and repurpose existing media artifacts to create new works or art. We will use a media archaeological approach to examine the precise material conditions that first gave rise to graffiti art, deejaying, rapping, and breakdancing, and to analyze hip hop songs, videos, and films. Media archaeology is a critical and artistic practice that seeks to interpret the layers of significance embedded in cultural artifacts. How does hip hop archaeology remix the past, the present, and the future? How do the historical, political, and cultural coding of hip hop artifacts change as they increasingly become part of institutional collections, from newly established hip hop archives at Cornell and Harvard to the Smithsonian National Museum of African American History and Culture?
Requirements/Evaluation: Four papers, project with presentation, and a final exam.
Prerequisites: None
Enrollment Limit: 19
Enrollment Preferences: AMST majors or prospective majors
Expected Class Size: 19

AFR 227 (F) Colonial Rule and Its Aftermaths in Africa (DPE)

Cross-listings: GBST 203 AFR 227 HIST 204

Secondary Cross-listing
This course focuses on the history of Africa during the colonial and post-colonial periods, especially focusing on the period between 1885 and 2000. The first part of the course will explore the imposition of colonial rule and its attendant impacts on African societies. During this section, we will especially examine how Africans responded to colonialism, including the various resistance movements that arose at different moments to contest colonial rule. We will also explore the various transformations wrought by colonialism. The second part of the course will explore the African struggle to decolonize their societies and to fashion viable political systems. In addition to historical texts, the course will make use of cultural materials such as novels and films.

Class Format: Mixed format of lecture and discussion seminar

Requirements/Evaluation: active participation in discussion, map quiz, response papers, midterm and final exams, and case study paper (7-10 pages)

Prerequisites: None

Enrollment Limit: 30

Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

AFR 229 Black Outside the U.S.

This course explores multiple ways Black identity evolves, adapts and is experienced differently depending on location. Students analyze Black experience in the U.S., France and Senegal through a range of texts from books and social media to music and film. One key aspect of the course is a study abroad trip to Senegal, which increases cultural awareness through experiential learning. This combination of textual learning with experiential knowledge exemplifies how language, religion, gender, geography, and performance shape one’s racial identity. In the first section of the course, students investigate Black experience in the U.S., focusing on such topics as the one-drop rule, racial profiling and where mixed people fit within Black/White tensions. The second section highlights the politics of language in France. Students explore how words like “Black,” “noir” and “race” have strong political connotations in France and spur both resistance to and alliance with Black American civil rights history. In the third part of the course, students visit Dakar, Senegal, and analyze Blackness through their own observations and encounters. Their trip insights jumpstart the final focus of the course on Senegal. Students investigate the influence of French colonialism on Black identity in Senegal, which makes the two geographical experiences of Blackness very different but still forever linked.

Class Format: seminar, the course includes a required spring break trip to Dakar, Senegal, which is no additional cost to students

Requirements/Evaluation: evaluation will be based on class participation, short weekly reading responses, two 4-5 page papers, a presentation based on the spring break trip, and a final presentation including a short 2-page report

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: students who have taken other AFR courses, Francophone speakers and students

Despite its low contributions to global carbon emissions, the continent of Africa is predicted to experience some of the worst effects of climate change. This interdisciplinary course investigates the causes and consequences of this troubling contradiction. It positions the African continent as an important site for understanding how legacies of empire, racial and gendered inequality, resource extraction, and capital accumulation impact contemporary global environmental politics. Students will engage theoretical texts, reports from international organizations, films, novels, and web-based content. Topics include: humanism/post-humanism; migration and displacement; representations of conflict; and sustainable development.  

Requirements/Evaluation: Assignments include: 2 short written commentaries (2-3 pages each), mid-term current event analysis (5-7 pages), final analytical essay (10-12 pages) and class presentation  
Prerequisites: none  
Enrollment Limit: 19  
Enrollment Preferences: Environmental Studies majors and concentrators  
Expected Class Size: 19  
Grading: no pass/fail option, yes fifth course option  
Distributions: (D2) (DPE)

AFR 232  (S)  Islam in Africa  (DPE)  
Cross-listings:  REL 232 GBST 232 AFR 232 ARAB 232 HIST 202  

Secondary Cross-listing  
Islam in Africa is often relegated to the peripheries in the study of Islam, a religion most associated with Arabs and the Middle East. On the flip side, Islam is also portrayed as foreign to African belief systems and institutions. The relationship between Islam and Africa, however, begins with the very advent of Islam when early Arab Muslim communities took refuge in the Abyssinian empire in East Africa. This course explores the history of Islam and Muslim societies on the African continent by focusing on the localized practices of Islam while also connecting it to Islam as a global phenomenon. The course will begin with a historical focus on the spread of Islam in Africa from East Africa and North Africa in the seventh century all the way to the spread of Islam through Sufi brotherhoods in the eighteenth and nineteenth centuries. The course will also take an anthropological approach, exploring the diverse practices of Islam in African Muslim communities and the social and cultural impact of Islam on African societies. Among the topics the course will cover include African Muslim intellectual traditions, local healing practices, religious festivals, early modern African Muslim abolitionist movements, and the historical interactions between African and Asian Muslim communities in the Indian ocean world.  

Requirements/Evaluation: Two essays during the semester and final project.  
Prerequisites: None  
Enrollment Limit: 25

AFR 233 (F) Colonialism, Capitalism and Climate Crisis (DPE)

Cross-listings: ENVI 204 GBST 233 AFR 233

Primary Cross-listing

Evolutions are part of human existence. These changes are not necessarily natural, uniform or linear across space and time. As colonial conquests sought to capture, dominate and exploit vast swathes of land, nature and people, supported by economic theories, violent, wide-ranging and long-term changes profoundly altered the environment and human-nature relationships. This course examines these transformations, specifically attending to the relationship between colonized/colonial (hu)man, nature and non-human species, drawing in perceptions of nature and the economy. Our starting point for this intellectual journey is the colonial imprint on human-ecological relations i.e. economic man, or Sylvia Wynter's conception of "ethno-class man" and "homo-economicus". We will consider social difference especially race as a central conjuncture of the changing relationship of capitalism and social organization relative to natural resource extraction, techno-scientific knowledge, industrial development and resulting accumulation of greenhouse gases that induce climate and ecological crises. We will also examine economic perspectives of climate change as a market failure, loss of economic value or a financial risk to stock portfolios that may be at odds with humane ways of organizing our collective planet. This course exposes the hierarchies of social difference and resulting inequalities (class, race, gender, species) under climate crisis to advance reparative and decolonial understandings. Drawing upon experiences from social, labor and environmental movements for climate justice, students will be able evaluate situated political economic responses to the climate crisis.

Requirements/Evaluation: 'Colonialism and my community' writing/poster assignment (5 pages) 20%; Either a video essay on a 'green' technology (10 minutes), recorded interview with an environmental justice movement/activist/practitioner (20 minutes) or critical in-class presentation on an emerging 'green' technology (10 minutes) 25%; Creative activist project that reflects on histories and axes of power - gender, race, class, species (6-8 pages); Participation and attendance (leading a discussion/presentation) 20%

AFR 234 (F) Race, Land and Settler (Racial) Capitalism: Ongoing Topics in (Dis)/(Re)possession

Cross-listings: AMST 234 AFR 234 ENVI 247 HIST 274

Primary Cross-listing
This sequential studio course serves as an introduction to ongoing topics in colonialism, racial thinking, African Diaspora studies, Global, Caribbean, and local studies. We will examine how race, gender and class operate under racial capitalism and settler colonialism. The readings in this class will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, Indigenous theorists, among other critical, anti-capitalist or decolonial scholars. Reading in this course will take up the question(s) of land and land-making; race, racialization, and racial thinking; alongside questions of space and place as they all relate to the various processes, projects and methods of (dis)(re)possession. This course is the first part of a complementary course, which will be offered in the Spring, titled, "Race, Land, Space and (Dis)(Re)possession: Critical Topics in Environmental Injustice and Subaltern Geographies," which tracks both the "historical breaks" and ongoing processes of (dis)(re)possession to more contemporary materializations. Weekly in-class discussion will be combined with guest lectures in order to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to also explain how a range of these territorializing processes operate in the transnational and local contexts. Those who take this studio course can expect to be actively engaged in directing their learning experience through research/final creative projects of their own selection. Sound, music and other audio engagements will also complement discussions in this course. Therefore, the capacity of deep listening, in-and-out of class, is mandatory. Sample topics covered in the course include: indigeneity and Blackness; dispossession and accumulation; environmental imperialism, war and colonial resistance. You are strongly encouraged to participate in both courses in this complementary sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%

AFR 235  (S)  Race, Land, Dis/Re-possession: Critical Topics in Environmental Injustice and Subaltern Geographies

Cross-listings: AFR 235 HIST 275 ENVI 253 AMST 235 GBST 235

Primary Cross-listing

This course is an introduction to ongoing and contemporary topics in colonialism, racial thinking, African Diaspora and, Global and Caribbean studies, studies of 'the environment,' and dispossession. We will examine how race, gender and class operate under racial capitalism and settler colonialism as ongoing, sometimes continuous and discontinuous processes. The readings will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, and other critical, anti-capitalist or decolonial scholars. Readings, as in AFR 234, will take up the question(s) of land and land-making; race, racialization, and racial thinking; of space and place as they all relate to the various processes, projects and methods of (dis)(re)possession, both "past" and "contemporary." We will interrogate temporal binaries, settler time, notions of (the) "progress(ives)" and other bifurcated understandings of the world. This course is the second part of a complementary course, titled, "Race, Land and Settler (Racial) Capitalism," which focuses on the historical geography of processes of (dis)(re)possession from a Black and Indigenous Atlantic perspective. In this iteration, weekly in-class discussion will be combined with guest lectures to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to explain how a range of these territorializing processes operate. Sound, music and other audio will complement discussions. Therefore, the capacity of deep listening, in-and-out of class, is a grounding. Sample topics covered in the course include: indigeneity and Blackness; (dis)possession and accumulation; plantation geographies and economies; housing and houselessness; the problem of parks and conservation; prisons and carceral geographies; Black geographies; environmental racism and colonial resistance. You are strongly encouraged to participate in both courses in this sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms,

AFR 236  (F)  Europe and the Black Diaspora  (DPE) (WS)

Cross-listings:  GERM 234 COMP 238 AFR 236

Secondary Cross-listing

This course provides an overview of the relationships and interactions between the Black diaspora and the European continent in the nineteenth and twentieth centuries. Drawing from biographies, autobiographies, reports, literature, creative arts and academic articles, we will consider the different relationships that have evolved between Black people and Europe over the course of time. Focusing on Central Europe, we will discuss the relationships established between Europe and the Black diaspora, such as Africans, African-Americans, Afro-Latinx and Afro-Caribbeans. Some of the themes we will address include the influence of cultural contact on intellectuals, writers, artists, soldiers, politicians and asylum seekers and their works, factors that established and influenced their relationship with Europe, as well the ways in which these selected people did or did not exert influence on European cultures. We will conclude by looking at some of the current discussions that still revolve around the relationship between the Black diaspora and Europe. Reading and Discussion in English.

Requirements/Evaluation: Active class participation, written homework, short papers and final research paper.

Prerequisites: None.
Enrollment Limit: 19
Enrollment Preferences: If course overenrolls (beyond cap), preference given to first-years, sophomores, and juniors.

Expected Class Size: 15
Grading: yes pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
GERM 234(D1) COMP 238(D1) AFR 236(D2)

Writing Skills Notes: Students will write two 3-5-page essays each written in two drafts with instructor comments. They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: We will discuss how minorities and minoritized individuals and the identities they hold can be affected by the dominant cultures around them. While we will focus on Europe, we will approach discussions with a comparative view, so as to encourage the students to reflect on how difference, power and equity interact and impact minorities in the context of the United States or wherever they come from.

AFR 237  (F)  Islam in the United States: Race, Religion, Politics  (DPE)

Cross-listings: AMST 237 REL 237 AFR 237 AAS 237
Malcolm X is one of the most iconic yet controversial figures in the black freedom struggle in the United States. He is also arguably the most prominent and influential Muslim in the history of the United States. His story and legacy powerfully illustrate the complex intersections of Muslim identity, political resistance, and national belonging. From the early period of “Black Muslim” movements represented by Malcolm X, to the current “War on Terror” era, American Muslims have faced a complex intersection of exclusions and marginalization, in relation to national belonging, race, and religion. Taking Malcolm X as our point of departure, this course examines how American Muslims have navigated these multiple layers of marginalization. We will therefore consider how the broader socio-political contexts that Muslims are a part of shape their visions of Islam, and how they contest these competing visions among themselves. In so doing, we will examine the complex relation between religion, race, and politics in the United States. Throughout the course, we will be engaging with historical and anthropological material, autobiographies, documentaries, films, historical primary-source documents, music, and social media materials. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to ideology, race, nationality, ethnicity, culture, gender, and language.

**Requirements/Evaluation:** regular reading responses, 2 midterm essays, final exam

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Majors and concentrators in REL, AFR, and AMST

**AFR 238 (F)(S) Black Voices in Anthropology**

**Cross-listings:** AFR 238 ANTH 238

**Primary Cross-listing**

What names and faces come to your mind when you think about Anthropology? The course introduces students to the lives and work of pioneering Black anthropologists whose contributions are still unknown or overlooked. Through different styles, methods, and theoretical approaches, each of these intellectuals has developed antiracist perspectives on foundational topics in the Social Sciences and the Humanities, contributing to advancing the study of the African continent and the Black Diaspora. Throughout the classes, students will learn about each author’s journeys, which can spark significant changes in how we think about our roles as social scientists within and outside academic boundaries.

**Class Format:** Students will be required to develop and give a class presentation focused on contemporary Black anthropologists from Africa and the Diaspora.

**Requirements/Evaluation:** Class participation and attendance (asking questions and leading discussions); weekly e-reading response papers (300-500 words); formal class presentation (individually or in groups); and a final essay or research paper (5-10 pages).

**Prerequisites:** None

**Enrollment Limit:** 20

**Enrollment Preferences:** Should the course be overenrolled, preference will be given to majors and concentrators in Africana Studies, Sociology, and Anthropology.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option
AFR 242 (F) Introduction to the Music of John Coltrane

Cross-listings: MUS 252 AFR 242

Secondary Cross-listing
This course offers the serious music student an opportunity to study the unique body of work produced by saxophonist and composer John Coltrane (1926-1967). The course traces the evolution of Coltrane's compositional and performance styles in the context of the musical and cultural environment in which they developed. Emphasis placed on Coltrane's musical style, representing a unique synthesis of influences, including jazz, world, and European Classical music and spirituality. Substantial listening and reading assignments, including a biography and related criticism, as well as detailed score analysis and study, are required.

Requirements/Evaluation: in-class participation including small quizzes, midterm, class presentation, and final paper

Prerequisites: MUS 103 and/or 203 strongly recommended; musical literacy sufficient to deal with the material and/or permission of instructor

AFR 245 (S) Dancing with the Hips, Butt, and Pelvis: Dangerous Bodies and Community Traditions

Cross-listings: AFR 245 DANC 220

Secondary Cross-listing

Within the historical context of the U.S., dance that emphasizes hip, butt, and pelvic movement has been racialized and associated with the Black body. While the popularity of these dance styles has expanded and now different groups of people now embrace these movement vocabularies, the practices remain deeply connected to the history and culture of Black folk. Despite the increased popularity of these dances, within Eurocentric aesthetics, the Black dancing body carries the mark of vulgarity and should either be controlled, exploited, and/or exoticized. These dangerous bodies are considered sexually deviant and in need of influence and control through colonialism, imperialism, and religion. Yet, the dancing pelvis, hips, and butt write and document the Black experience. The dancing Black body carries the memories of the diaspora and provides space for the body to experience autonomy. This embodied knowledge, carried by Black bodies, is intertwined with the everyday lives of Black folk. Furthermore, through these practices, Black communities commune, resist dominant narratives, and embrace their humanity. Nevertheless, the pelvis/hips/butt dancing body is not embraced equally among Black people. In the practice of these movement genres, Black communities negotiate matters of respectability, pleasure, and self-actualization. This course is an exploration into the use of the hips, butt, and pelvis in three movement genres: bounce, a genre of hip-hop from New Orleans and origin culture of the term "twerking" Black majorette/dance team performance, a jazz and Black social dance infused form that originated from the marching band culture at Historically Black Colleges and Universities; and Caribbean wining, a hip rolling movement performed throughout the Caribbean. Students will engage with scholarship and participate in discussions focused on the individual and communal practice of these traditions. The class community will investigate themes such as respectability politics, the politics of pleasure, and communal organizing to gain a better understanding of these practices. Additionally, students will physically explore these dance traditions and work with guest artists who specialize in these practices. The course will culminate in a public dance party that will be curated and facilitated by the class community.

Class Format: The course meets in person, twice per week for the full semester. The course includes two main integrated components: lecture/discussion and physical movement exploration.

Requirements/Evaluation: Students will be evaluated on the completion of assignments, participation during class activities/discussions, and their contribution towards the dance party event.

Prerequisites: None

AFR 249 (F)(S) Penning the Path: Writing and Publishing Black Studies

Since the mid-20th century, Black intellectuals from Africa and the Diaspora have founded seminal journals within and beyond academic boundaries. Despite being separated by global distances and different contexts, these initiatives have decisively contributed to the emergence and consolidation of
Black and Pan-African studies. *Presence Africaine*, founded in Paris in 1947 by Senegalese intellectual Alioune Diop; *Quilombo*, first published in 1948 by the Afro-Brazilian intellectual Abdias do Nascimento; and *The Black Scholar*, founded in California in 1969 by Robert Chrisman, Nathan Hare, and Allan Ross are just a few groundbreaking examples. From this global perspective, students will explore these and other cornerstone journals which paved the way for the emergence of Black and Pan-African Studies in the US and abroad. Additionally, the course aims to encourage students to be part of a collective effort to relaunch Kaleido[scopes]: Diaspora Re-imagined, a student led-journal created in 2014 in the Africana Studies Department by Sevonna Brown (’15), Ahmad Greene-Hayes (’16), and Nneka Dennie (’13). Students will receive guidance and mentoring to conceive and write articles, essays, audiovisual creations, and interviews with students and intellectuals from the African continent and the Diaspora in the Americas and the Caribbean.

**Class Format:** Students will be required to develop and give a class presentation focused on pioneering Black Studies journals.

**Requirements/Evaluation:** Class participation and attendance (asking questions and leading discussions); weekly e-reading response papers (300-500 words); formal class presentation (individually or in groups); final projects (such as essays, papers, interviews, and audiovisual creations) aimed to be published in the new edition of Kaleido[scopes]: Diaspora Re-imagined (Spring 2024).

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** Students interested in expanding their knowledge and skills in writing and publishing, focusing on Black Studies/Africana journals. Should the course be overenrolled, preference will be given to Africana Studies students.

**Expected Class Size:** 10-15

---

**AFR 254 (S) Bebop: The (R)evolution of Modern Jazz**

**Cross-listings:** MUS 254 AFR 254

**Secondary Cross-listing**

In the 1940s, Jazz turned a corner, transitioning from the functional and popular music of the swing era to the increasingly complex art music known as bebop. The practitioners of this new sub-genre were seen not as showmen or entertainers, but (in the words of poet Ralph Ellison) as “frozen faced introverts, dedicated to chaos.” This music was simultaneously old and new, a musical evolution interpreted through the lens of cultural revolution. This class will survey the lives, music and continuing impact of bebop's most pivotal figures: Charlie Parker, Thelonious Monk, Dizzy Gillespie, Bud Powell and Kenny Clarke among many others. Through score study, guided listening and performance, the class will examine the melodic, harmonic and rhythmic innovations associated with this pivotal era in jazz history. We will evaluate, compare and contrast examples of contemporary theoretical scholarship concerning this musical vocabulary and it's evolution. Intersections between the music and parallel artistic, social and political movements will also be addressed.

**Requirements/Evaluation:** weekly reading, listening, musical memorization and performance. Short written responses to discussion prompts and participation in class discussion; quizzes on assigned readings and listening, and final exam

**Prerequisites:** MUS 104b or permission of instructor, instrumental or vocal proficiency.

**Enrollment Limit:** 12

**Enrollment Preferences:** Music majors, Jazz Ensemble members, Africana Studies concentrators

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

This course is cross-listed and the prefixes carry the following divisional credit:

MUS 254(D1) AFR 254(D1)
AFR 264  (F)  The Bible and Slavery  (DPE)

Cross-listings:  AFR 264 REL 264

Secondary Cross-listing

This course will examine issues related to the intersection of "slavery" and "Bible." We will consider topics as varied as the story of Israel's deliverance from Egyptian bondage, the laws surrounding slavery in the Torah, the continuation of slavery into early Christianity, and the arguments surrounding slavery in the United States in the antebellum period. Our conversation will tackle a series of questions including the following ones: What role did these themes play in later Jewish communities? What role did the enslaved play in the development of the Christ-following communities? What were the key passages (and, arguments) supporting the racialized version of U.S. slavery? What are the legacies of the history of slavery that continue to haunt us?

Requirements/Evaluation:  class participation, short (2-3 page) writing assignments, one (mid-term) examination, and a final 8-10 page paper

Prerequisites:  none, although a previous course on religion is recommended

Enrollment Limit:  15

Enrollment Preferences:  Religion majors or at least one course in Religion

Expected Class Size:  15

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 264(D2) REL 264(D2)

Difference, Power, and Equity Notes:  This course will address discursive and institutional bases of oppression that remain potent in the United States and beyond. An understanding of slavery as a thematic element in Biblical texts (and their ongoing reception) is indispensable to the critical analysis of racial injustice and human freedom.

Not offered current academic year

AFR 270  (F)  Sport and the Global Color Line  (DPE)

Cross-listings:  AFR 270 LEAD 270 HIST 270

Secondary Cross-listing

Throughout the twentieth century, African Americans have broken racial barriers, confronted racial stereotypes, and garnered unprecedented success within popular culture, most notably sport. In this course, students will explore the relationship of the black athlete to the color line. We will complicate the historical view of sport as a site of professional advancement and race reform by demonstrating how societal racial practices were reconstructed within athletics. In essence, this course will emphasize the role sport performed in structuring racial exclusion as athletic arenas--like movie theaters, railroads, schools, and other public sites--shaped what Historian Grace Elizabeth Hale has termed the "culture of segregation." Though our primary focus will be on the experiences African Americans encountered, we will also probe the color line beyond its typical black-white binary. Thus, we will examine the achievements and altercations that other ethnic and racial groups realized in their transnational push for equality and inclusion.

Class Format:  Lecture and discussion.

Requirements/Evaluation:  Students will be graded on class participation and will have two take-home midterm essay examination (4-6 pages). In addition, students will write two or three response papers (2-3 pages) and a final research paper.

Prerequisites:  None.

Enrollment Limit:  40

Enrollment Preferences:  Open to all students with completion of course admission survey if overenrolled.

Expected Class Size:  25

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

**AFR 279  African American History Since 1865**

This course provides an introduction to the history of African Americans from the post-emancipation era to the present day. Focusing on the collective and individual life experiences of African Americans, it will highlight the actors, organizations, and ideas that have been central to the African American experience. We will examine struggles for equality, justice, citizenship, and self-determination and the various ways African Americans have sought to achieve these ends. By the end of the semester students will have a basic understanding of core topics in African American history such as Reconstruction and Redemption; the rise of Jim Crow segregation; urban migrations and the "New Negro"; the Civil Rights Movement, in its Northern and Southern manifestations; the movement for Black Power and its antecedents; the rise of mass incarceration in the post-Civil Rights Era. The course will conclude with a discussion of the Presidency of Barack Obama and the Black Lives Matter Movement.

**Requirements/Evaluation**: Students will be graded on class participation, a midterm and a final exam, and two formal papers (5-7 pages each)

**Prerequisites**: None

**Enrollment Limit**: 40

**Expected Class Size**: 18-20

**AFR 280  (S)  Emancipation to BlackLivesMatter**

**Cross-listings**: AFR 280  HIST 280  LEAD 280

**Secondary Cross-listing**

This introductory course surveys the cultural, political, and social history of African Americans from Reconstruction to the present. It offers a balance between a "top-down" and "bottom-up" approach and focuses primarily on African Americans' quest for citizenship, equality, justice, and opportunity. In addition to examining major historical developments and popular figures within the modern black past, we will explore the lesser-known histories of everyday people who helped shaped the black freedom struggle. In so doing, we will interrogate conventional narratives of progressive movements since emancipation. Some of the main topics include: the transition from slavery to freedom; the rise of Jim Crow and the politics of racial uplift; the Great Migration and the emergence of the New Negro; the Great Depression and the New Deal; World War II and the struggle for economic and racial inclusion; the postwar period and the intersecting movements of Civil Rights and Black Power; and the impacts of deindustrialization and mass incarceration on the black community. We will end with a discussion of the Obama years and Black Lives Matter.

**Class Format**: Class will be a mix of lecture/seminar

**Requirements/Evaluation**: Students will be graded on class participation and will have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two response papers (2-3 pages) and will complete a mapping project based on The Negro Motorist Green Handbook.

**Prerequisites**: none

**Enrollment Limit**: 25

**Expected Class Size**: 25

**Grading**: yes pass/fail option, no fifth course option

**Distributions**: (D2)
AFR 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: AMST 283 AFR 283 WGSS 283 ENGL 286

Secondary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrios and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

AFR 290 (F) Perversity & Play: Embodying Black Feminist Methods in Contemporary Visual Art & Performance

Cross-listings: AFR 290 WGSS 290 THEA 281

Secondary Cross-listing

What critical interpretations can we conceive in examination of emerging Black femme artists who reclaim their bodily autonomies as "mother f** monsters," reassert their "WAP(s)" as new materialist methods, reembody Harriet Tubman as she leads an army of "Bad b**," and subvert derogatory archetypes i.e., "mammy," "sapphire" or "venus." In this class we will survey an introduction to the field of Black Feminist studies through this lens of perversity and play. The subject of perversity points to a violent history of misrepresentation where stereotypes anchored and mobilized perceptions of Black womanhood while the notion of play offers an analysis that shows how contemporary Black women employ/perform diversions to these limiting categories of race, gender and sexuality. Students will examine the foundational scholarship from the works of Audre Lorde, Saidiya Hartman, Hortense Spillers, and Katherine McKittrick (just to name a few). Moreover, an engagement of Black feminist studies will enable students to examine the social and geographic organizations of Black femme bodies on a global scale. By centering Black feminist methods with decolonial praxis, we will disassemble a limiting American grammar that imposes Black women to positions of hyper-visibility and absence.

Requirements/Evaluation: 20% Free Writes/ Weekly Reflections; 25% Short Presentation: Discussion Leader; 20% Paper 1; 25% Paper 2; 10% Participation

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Enrollment preference to WGSS majors as well as those cross listed in Africana Studies and Theatre Departments. These enrollment preferences are made to consider students who have specialized interests in these disciplines given the course being advanced
Expected Class Size: 20
Grading: yes pass/fail option, no fifth course option

AFR 300 (S) "Rebel Ecologies': Black and Indigenous Struggles for Land and Life"
Cross-listings: WGSS 362 AFR 300 ENVI 300 AMST 362

Primary Cross-listing
This course will ask, what other socioecological models exist? We will weave together a study of differing, yet often converging or synergistic traditions of Black/Womanist eco-feminism that often confronts the social constructions of race, gender and sexuality, dominant religion as a means of social control, imperialism, capitalism, and colonialism; Ecocosmology which often frames ecology in terms of a mode of production beyond or outside of capitalism; and Indigenous perspectives on resistance to capitalist extraction, imperialism, and colonialism. Given ongoing struggles against the extraction of land and labor, the urgent calls raised in the present-day "climate strike," the COVID-19 Pandemic, Black-led pandemic rebellions, along with long(er) histories of land-based peoples around the planet opposing racial capitalism, settler colonialism, and imperialism, this class will explore not only what those in opposition to both extractivism and expropriation resist, but also what we want. We will critique binaries, settler notions of time and explore theories of change. Additionally, this class will look to an array of literature, film, sound, and other forms of cultural production in order to not just "locate," but describe and reveal rebel ecological visions emerging "from below." Ultimately this class will consider how the above ecological praxis can work simultaneously and within a sense of plurality, examining what we can learn from the work of activists, intellectuals, and defenders on the frontline. This course is an extension of Dr. Guess' concept of a "rebel ecology."
Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader at least twice 20%; Weekly 500-word Literature Review 20%; One Final Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More projects might include, an annotated bibliography of 7 texts, film analysis, syllabus, book review, a written play, an op-ed, etc. We will discuss further possibilities in class.
Prerequisites: None
Enrollment Limit: 10
Enrollment Preferences: If the course is overenrolled, preference will be given to Africana studies concentrators.
Expected Class Size: 7
Grading: no pass/fail option, no fifth course option

AFR 302 (S) Complexion Complexities: Colorism in Literature, Lyrics & Everyday Life
Often viewed as the "dirty laundry" of the Black American past, colorism, or skin color bias, is a pervasive force within modern global society. Although it is not a new issue, its impact is far reaching and continues to have damaging effects on people of color-especially members within the African Diaspora. From skin bleaching creams like "Whitenicious" to rap music's fetishization of light-skinned women, colorism is a very real and present issue affecting Black life. From the literary works of Wallace Thurman and Toni Morrison, to the lyrics of blues crooner Big Bill Broonzy and rapper Lil Wayne, we will analyze the many ways that the politics of color influence standards of beauty and attractiveness, perceptions of behavior and criminality, and economic attainment and stability.
AFR 303 (F) The 19th Century and Its Shadow

Cross-listings: AFR 303 ENGL 417

Secondary Cross-listing

This course explores canonical American literature from the nineteenth century alongside a selection of contemporary literary and cinematic texts that call on and intervene with this body of work. Following Toni Morrison's charge that the contemplation of a black presence "is central to any understanding of our national literature and should not be permitted to hover at the margins of the literary imagination," this course focuses on how ideas of race are explored throughout the canon and how they have been carried forward. Works considered throughout the term come from, among others, Julie Dash, Frederick Douglass, Saidiya Hartman, Harriet Jacobs, Mat Johnson, Herman Melville, Toni Morrison, Nate Parker, Edgar Allen Poe, Quentin Tarantino, Mark Twain, and Colson Whitehead.

Requirements/Evaluation: weekly reading responses, active class participation, three close readings (500 words each), annotated bibliography, class presentation, final paper (13-15 pages)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 15

Enrollment Preferences: English majors, then sophomores considering the major

AFR 304 (S) A History of Health and Healing in Africa (DPE)

Cross-listings: AFR 304 HIST 305 GBST 305

Secondary Cross-listing

This class will explore the history of health and healing in Africa, with emphasis on the colonial and post-colonial eras. During the semester we will explore diverse medical and social interventions in African health over the past 150 years. How have African societies understood healthy communities and public health? We will examine this question through the study of spirit possession and other African healing practices but also how they have intersected with different biomedical practices and public health programs. We will also study the patterns and social impacts of new diseases in the twentieth century, as well as transformations in the understanding and treatment of diseases long present on the continent. In particular we will explore shifting understandings of the causes, treatment, and social implications of sleeping sickness, malaria, and HIV/AIDS. The development of colonial rule, shifting environmental conditions, changing diets, and urbanization all impacted the disease landscape, as well as the way African societies have understood public health. Indeed, the themes of health, medicine and disease provide a useful lens for understanding important social transformations across the continent.

Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, a primary source analysis paper (3-5 pages), presentation, and one research paper (8-12 pages).
**AFR 305 (S) Race and the Zombie Apocalypse**

**Cross-listings:** ENGL 308 AFR 305

**Secondary Cross-listing**
This course takes a critical approach to our contemporary understanding of the figure of the zombie and its inextricable link to discourses on race and blackness in the Americas. An introductory grounding in theories of social death allows an opportunity to explore the racial anxiety that gave birth to the genre and trace its development throughout the hemisphere. The course considers the novels, films, and critical texts that frame the genre in order to pose the following questions: What can the figure of the zombie teach us about our evolving relationship to race? What roles do gender and sexuality play in the construction of the genre? And, finally, how does the recent proliferation of zombie-related television shows, movies, books, and video games reflect our present-day concerns?

**Requirements/Evaluation:** weekly reading responses, active class participation, three close readings (500 words each), annotated bibliography, class presentation, final paper (13-15 pages)

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**AFR 306 (F) Transcending Boundaries: The Creation and Evolution of Creole Cultures** (DPE)

**Cross-listings:** GBST 306 RLFR 320 COMP 310 AFR 306

**Secondary Cross-listing**
Born out of a history of resistance, Creole cultures transcend racial boundaries. This course provides a comprehensive framework for understanding the creation of Creole nations in various parts of the world. Beginning with an examination of the dark history of slavery and French colonialism, we will reflect upon the cultural transformation that took place when people speaking mutually unintelligible languages were brought together. We will then delve into the study of how deterritorialized peoples created their languages and cultures, distinct from the ones imposed by colonizing forces. As we journey from the past to the present, we will also explore how international events such as a worldwide pandemic, social justice, racism, and police brutality are currently affecting these islands. Potential readings will include prominent authors from different Creole-speaking islands, including Frantz...
Fanon and Aimé Césaire from Martinique, Maryse Condé from Guadeloupe, Ananda Devi from Mauritius and Jacques Roumain from Haiti. Conducted in French with introductions to different creoles.

Requirements/Evaluation: Active class participation, three papers (of 3-4 pages each), presentation, final research paper (7-8 pages)

Prerequisites: Any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: All are welcome. If overenrolled, preference will be given to French majors and certificate students; Comparative Literature majors; Africana Studies students; Global Studies students; and those with compelling justification for admission

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

GBST 306(D2) RLFR 320(D1) COMP 310(D1) AFR 306(D2)

Difference, Power, and Equity Notes: This course qualifies for a Difference, Power, and Equity requirement because it examines the history of slavery as related to French colonialism in different parts of the world. It also considers International issues of social justice, racism and police brutality.

Fall 2023

SEM Section: 01    MW 11:00 am - 12:15 pm     Preea Leelah

AFR 308    Four Poets: Gwendolyn Brooks, Frank O'Hara, Sylvia Plath, and Amiri Baraka

The study of literature often relies on seemingly "objective" labels to sort and group writers. These four major American poets from the last century were often segregated into different categories: Gwendolyn Brooks (1917-2000) and Amiri Baraka (1934-2014) clumped together as black poets; Sylvia Plath (1932-1963) labelled a "Confessional Poet" and/or taught as a female poet but not a "white poet"; Frank O'Hara (1926-1966), designated a "New York School" poet but not a "white poet" or "male poet." In looking closely at the poetry of these four writers, whose work is usually not taught side by side, we will ask questions about the assumptions implicit in the concepts and categories of American (and English-language) poetics and how literary history usually gets written. For example, who is the presumed "universal" poetic speaker? Who is the assumed reader? Do our attitudes about raced and gendered bodies influence how we read raced and gendered poets? Is a queer poet read with the same particularity as a black poet?

Requirements/Evaluation: Two short papers (4-5 pp.) = 25%; One final paper (8-10 pp.) = 50%; Two short response papers = 15%; Participation = 10%

AFR 311    Women Warriors, Colonial Soldiers, and Slave Armies: Soldiering and Warfare in African History  (DPE)

Soldiering is one of the oldest professions in African history. Throughout the continent's long history, ordinary soldiers have risen to become kings, queens, presidents, and held other positions of significance. Soldiers in African history have hailed from diverse backgrounds, ranging from the enslaved to those from the nobility. Notable soldiers in African history have been both men and women. Certainly, in Africa as in other world regions there is a tendency to associate the military profession with men. Yet, there have been famous female military warriors in African history, some of the most famous ones being Queen Nzinga in the seventeenth century; the all-female military units in the kingdom of Dahomey, known for their rigor and being effective fighters; and, more recently, Alice Lakwena who commanded a rebellion that nearly brought down the Ugandan government in the late twentieth century. Some of the other themes which we will explore include how warfare was organized from the precolonial era to more recent times; the impact of changing technologies on warfare and the everyday life of armed soldiers; colonial conquest and the soldiers who fought for Europeans and those who resisted; recruitment criteria during the colonial period, and colonial military identities; service in the military as labor and rebellions and mutinies over pay and work conditions; the army and nationalism. Throughout the course we will challenge the enduring Western image and
stereotype of Africa as a violent place by focusing on a) the changing conditions that have pushed individuals and communities to go to war, and b) by examining how Africans have initiated and resolved conflict. Students will analyze a variety of resources including soldiers' biographies, films, oral traditions, and archival sources that will help them to come up with their own arguments about the role of the soldiers and the military in Africa.

**Requirements/Evaluation:** active participation in discussion, map quiz, response papers, a short analytic paper (3-5 pages), presentation, and one research paper (8-12 pages).

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

**Expected Class Size:** 20

**Grading:**

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course examines the critical questions of how and why Africans have waged military campaigns, and how they have inspired others to join them. From the pre-colonial era to the present, all forms of military action in Africa were in many respects expressions of societal imbalances based on ethnicity, race, gender, generation, and class.

**AFR 317 (F) Black Migrations: African American Performance at Home and Abroad**

**Cross-listings:** THEA 317 COMP 319 AMST 317 DANC 317 ENGL 317 AFR 317

**Primary Cross-listing**

In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

**Class Format:** discussion

**Requirements/Evaluation:** class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report

Fall 2023

SEM Section: 01    W 7:00 pm - 9:40 pm     Rashida K. Braggs
AFR 320 (S) Dangerous Bodies: Black Womanhood, Sexuality & Popular Culture

Cross-listings: WGSS 320 AFR 320 AMST 320

Primary Cross-listing

Whether presented as maternal saints, divas, video vixens, or bitches, black female celebrities navigate a tumultuous terrain in popular culture. This course considers the ways that black female celebrities such as Oprah, Rihanna, Nicki Minaj, Beyoncé, Janet Jackson, and Michelle Obama negotiate womanhood and sexuality, and the popular landscapes through which we witness that negotiation. It also engages contemporary black feminist scholarship, which most frequently presents the presentation of black female bodies in popular media forms as exploitive. We will review historical stereotypes of black women in popular media forms, discuss the history of the “politics of respectability” within black culture, engage black feminist responses to these types, and examine theoretical approaches to assess social constructions of womanhood and sexuality. We will also consider provocative questions relevant to discussions of contemporary black sexual politics: Should we view these women as feminists? Are they merely representatives of cultural commodification and control of black women's bodies? Do these women best exemplify the reiteration of problematic characterizations? Are they positive models for demonstrating female empowerment, agency, or “fierceness?” This course explores the histories of representation of black female figures in popular culture, and in so doing, troubles contemporary considerations of black womanhood and sexuality.

Requirements/Evaluation: evaluation will be based on attendance/participation, short response papers, and a midterm and final portfolio

Prerequisites: none

AFR 321 (F) Trending Black: Race & Social Media in the 21st Century

The 21st Century ushered in new and exciting ways for people to communicate digitally. With the creation of social media outlets like Facebook, Twitter, Instagram, and more recently TikTok, connecting with the world is literally one click, or selfie away. Though much of the attention around social media is focused on people with race and educational privilege, people of color have created their own spaces to curate, articulate, and produce culture. Through the methods of rhetorical criticism, critical discourse analysis, cultural criticism and ethnography, we will investigate the ways Africana cultures, specifically in the United States, utilize social media to shape community and influence popular culture. This course will give students hands-on experience analyzing various texts, and a deeper understanding of rhetorical methodologies.

Requirements/Evaluation: class participation, response papers, and a final research project

AFR 323 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Cross-listings: COMP 322 AFR 323 ENGL 356 AMST 323 ARTH 223

Primary Cross-listing

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as the late Congressman John Lewis’ March and Ebony Flowers’ Hot Comb, this course illustrates and critiques
multiple ways the graphic novel commingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in
critical moments of resistance throughout history. Students will practice analyzing graphic novels with the help of critical essays, reviews and film; the
chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for
marginalized peoples. During the course, students will build comic creation and analysis skills through short exercises, eventually building up to the
final project of a graphic short story that illustrates historical and/or autobiographical narratives. No art experience is required, only an openness to
expanding one’s visual awareness and composition skills. This course is often taught in collaboration with the Williams College Museum of Art's Object
Lab program, which allows the class to have its own space and art objects that are directly related to the course topic. This class may feature Object
Lab participation, film screenings, and collaborations with guest speakers.

Requirements/Evaluation: class participation, written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a
final project (producing a graphic short story)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: If the enrollment limit is exceeded, preference will be given to Africana Studies concentrators or students who have taken

AFR 326  (S)  Gender, Race, and the Power of Personal Aesthetics

Cross-listings: AFR 326 AAS 313 WGSS 313 AMST 313 LATS 313

Secondary Cross-listing

This course focuses on the politics of personal style among women of color in the digital era. With a comparative, transnational emphasis on the ways
in which gender, sexuality, ethno-racial identity, neoliberal capitalism and class inform standards of beauty and ideas about the body, we will examine
a variety of materials including commercial websites, podcasts, histories, personal narratives, ethnographies, and sociological case studies. Departing
from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions among others:
What are some of the everyday functions of personal style among women of color in the US and globally? How do Latina/x, Black, Arab American and
Asian American female aesthetics reflect the specific circumstances of their creation? What role do transnational media and popular culture play in the
development and circulation of gendered and raced aesthetic forms? How might the belief in personal style as activist strategy complicate traditional
understandings of feminist political activity?

Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-7 pages, final written reflection.

Prerequisites: LATS 105, AMST 201, AFR 200, WGSS 101 or permission of instructor; first year students are not permitted to take this course.

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, Africana Studies majors, and Women's, Gender and Sexuality
Studies majors by seniority. If the class is overenrolled students may be asked to submit a brief writing sample.

AFR 327 (F) Topics in Philosophy of Race: Hegel and Africana Philosophy (DPE)

Cross-listings: AFR 327 PHIL 319

Secondary Cross-listing

How are individual and social subjects formed, and how do they connect to questions of race? What is the nature of consciousness and how can it be unhappy, false or double? What do we mean when we talk about racial capitalism? This course introduces philosophy students to these and related questions through a parallel reading that brings together 19th century German philosopher Hegel and a tradition of Africana philosophy running through Douglas, Du Bois, Fanon, Gilroy, Hartman and Wynter. While Hegel studies tends to occur in isolation from philosophers in the Africana tradition, many of the above explicitly refer to and take up questions in Hegel. This course argues that by reference to the historically specific modes of subjectivity and sociality that resulted from the Transatlantic Slave Trade and the Haitian Revolution, for instance, we can better understand and address long-standing questions in European Social Philosophy. Topics to be considered include the nature of freedom (both individual and social), the master/slave dialectic and subject constitution, self-consciousness and double consciousness, the stages of history, and racial capitalism

Requirements/Evaluation: Progressive writing assignments including 4 exegetical commentaries, one 5 page paper and one 10-12 page final paper.

Prerequisites: One prior 100 level philosophy course or permission of instructor.

Enrollment Limit: 15

Enrollment Preferences: Preference given to philosophy majors and Africana studies concentrators.

Expected Class Size: 10-15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 327(D2) PHIL 319(D2)

Difference, Power, and Equity Notes: Course material involves self-conscious and critical engagement with the history of racial subject formation as well as Africana philosophy, and thinking about how power's distribution connects to questions of race.

Not offered current academic year

AFR 329 (S) Marxist Feminisms: Race, Performance, and Labor (DPE) (WS)

Cross-listings: THEA 402 AMST 402 AFR 329 WGSS 402

Secondary Cross-listing

This seminar provides an overview of queer, black and women of color feminist, decolonial, and critical ethnic studies critiques of orthodox Marxism. Beginning with core texts from the tradition, including Capital Volume I, we will examine a range of social positions and modes of extraction that complicate Marx's emphasis on the white male industrial factory worker. Every week, we will focus on texts that foreground conditions of reproduction, racial slavery, care and domestic work, indentured servitude, immigrant labor, land expropriation, and sex work among others. Throughout the seminar and particularly at the close of it, we will turn to critical perspectives and aesthetic practices that not only respond to these conditions but also incite new social relations and ways of being in the world. As such, this seminar will equip students with critical understandings of how racial capitalism has fundamentally relied on the mass elimination, capture, recruitment, and displacement of different racialized, gendered, and abled bodies in and beyond the U.S. as well as how the capitalist system of value and life under these conditions can and must be undone and reimagined.

Requirements/Evaluation: in-class discussion, short weekly posts, class presentation, final project

Prerequisites: previous coursework in AMST, WGSS, AFR, THEA, or LATS

Enrollment Limit: 12

Enrollment Preferences: senior AMST majors; juniors or seniors with previous experience in AMST, WGSS, AFR, and THEA

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
Writing Skills Notes: Students will present on and submit a 5-8 pg paper that rigorously analyzes and expands on a keyword. They will receive detailed feedback from me and one other student regarding grammar, structure, style, and argument. Using written and classroom feedback, students will then revise and resubmit their keyword papers to add to our final classroom keyword toolbox. For the final assignment, students will have the option to write a 8-10 page final research paper or manifesto.

Difference, Power, and Equity Notes: This course satisfies the DPE requirement as it explores difference, power, and equity by asking how racial, gendered, sexual, and class differences are produced, whose voices are centered and whose are excluded, and what forms of labor is valued over other forms.

AFR 331 (F) Black Masculinities (DPE)

Cross-listings: AFR 331 ENGL 375 WGSS 318 AMST 350

Secondary Cross-listing

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 20th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. By examining representations and presentations of Black masculinities, we will pursue questions such as: How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men¿s sexuality inform representations of Black masculinities? What is the future of Black Gender? We will trouble the relationship between manhood and masculinity by examining the ways in which masculinity can move across various kinds of bodies. In addition to reading critical and creative texts, we will view films and engage other kinds of media. Students will be responsible for 2 short papers and a final project.

Requirements/Evaluation: students will be responsible for 2 short papers and a final project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: WGSS Majors will get preference, then Juniors and Seniors

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 331(D2) ENGL 375(D2) WGSS 318(D2) AMST 350(D2)

Difference, Power, and Equity Notes: This course engages content and materials that explore various forms of difference, power, and equity, along with facilitating the development of skills that will help students address the implications of said forms. This course considers current examples and historical examples of Black masculinity. This course fosters difficult conversations about how difference works and has worked, how identities and power relationships have been grounded in lived experience.

AFR 332 (Anti-)Imperialism, Race, and the Archive (DPE) (WS)

What is U.S. imperialism? How are the social relations of racial capitalism important to U.S. imperialism? How have anti-imperial, anti-racist, and anti-capitalist struggles taken shape within, against, and beyond the U.S. nation-state, and how have these struggles shaped the U.S. nation-state itself? Finally, what kind of anti-imperial activist hermeneutics does American Studies offer and how can they be strengthened to reckon with the specific conditions of the U.S. imperial present? Anchored in these questions, this course seeks to introduce students to the history of U.S. imperialism. It does so beyond the traditional understanding of empire as a one-way agglomerating imposition of power in distant areas, and instead accounts for the co-constitution of reigning state-capitalist orders and global processes of spatial and social differentiation. Following such an approach to the history of U.S. imperialism, this course is organized around four time periods: 1770s to 1890s; 1890s to 1930s; 1930s to 1980s; and
1980s to the present. Across each period, we will attend to processes of U.S. imperial expansion, capital accumulation, and racial domination, and resistance to these processes. We will do so using secondary sources and a wide range of primary sources, including published fiction, legal documents, newspaper articles, speeches, films, and photos. By the end of this course, students should be able to detail a genealogy of the U.S. imperial present that accounts for: the significance of imperial and inter-imperial relations in the formation of U.S. national culture, institutions, and public areas such as law and public policy; how U.S. territorial colonialization has underpinned the development of U.S. imperial infrastructure, the imperial state form, and imperial culture; and how U.S. territorial and extraterritorial sovereignty exist in perpetual reaction to the primary claims of Indigenous peoples and other threats to reigning state-capitalist orders.

Requirements/Evaluation: Evaluation will be based on the following assessments: Class Participation: 25%; Weekly Response (350-500 words): 25%; Essay 1–First submission (5 pgs.): 10%; Essay 1–Revision (5 pgs.): 10%; Essay 2 (5 pgs.): 15%; Essay 3 (5 pgs.): 15%

Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: American Studies majors, students specializing in Native American and Indigenous Studies, Africana majors, History majors,
Expected Class Size: 15
Grading:
Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Emphasis on writing process and revision: Three thesis papers at 5 pages each (each receiving critical feedback from professor and peers); one keyword glossary where students develop rigorous definitions of course key terms; one roundtable discussion based on the final paper.

Difference, Power, and Equity Notes: Throughout, the course addresses the issues of difference, power, and equity amongst groups and the nature of the theoretical tools or perspectives used to understand these issues. It does so familiarizing students with "racial capitalism" as both a way of understanding the historical relationship between race and capitalism, and as an activist hermeneutic to respond to the conditions that American Studies and other fields must reckon with in the present.

AFR 335 (S) Sacred Custodians: Environmental Conservation in Africa (DPE)
Cross-listings: GBST 304 HIST 304 ENVI 304 AFR 335

Secondary Cross-listing
In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of deforestation. Ken Saro-Wiwai was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental crisis that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction, game parks, desertification, wildlife and hunting, traditional practices, and climate change.

Requirements/Evaluation: Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and one exam.

Prerequisites: None
Enrollment Limit: 25
Enrollment Preferences: If course is over-enrolled, preference to History Majors and students with a demonstrated interest in African studies.
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
GBST 304(D2) HIST 304(D2) ENVI 304(D2) AFR 335(D2)
Difference, Power, and Equity Notes: This course will intensively explore the question of how various global and local actors have defined environmental degradation and promoted approaches to conservation in Africa. It guides students through an examination of the different power dynamics that have shaped environmental conservation thought and practices on the continent. This course, therefore, provides a critical lens through which to examine the inequalities rooted in race, gender, and other forms of difference.

AFR 339 (S) The Banlieue in Literature, Music, and Film  (DPE) (WS)

Secondary Cross-listing

The banlieue looms large in the French collective imagination. From its origins in medieval law, the term banlieue at the end of the 20th century has taken on multiple, at times overlapping, but almost exclusively negative meanings. It designates a peripheral geographical space often in contrast to its city center, social exclusion, "urban culture"—as in Hip Hop-produced within that space, and last but not least the symbolic bias through which its inhabitants are viewed (Vieillard-Baron). In this course, we will examine various constructions of the banlieue in French music, a manifesto, film, blogs, and literature to focus on the analytical, contestatory and affirmative dimensions of these narratives. Two decades after the film La haine, and ten years after the riots, how are filmmakers, artists, authors, and scholars of the banlieue reimagining and reframing the banlieue? What do current depictions of banlieues in the French media tell us about the State, French politics, and the state of French politics? What do "banlieue films" and "banlieue lit" tell us about the banlieue? In this course, conducted in French, we will read, watch, and listen to various constructions of the banlieue in French music, film, and literature to focus on the contestatory and affirmative dimensions of these narratives.

Requirements/Evaluation: 3 thesis five-page research papers, 2 start-of-the-class brief presentations, active participation to in-class discussions and mini-conference on the banlieue (class final project).

Prerequisites: RLFR 105 and above

Enrollment Limit: 14

Enrollment Preferences: French majors and certificate students, Africana and Comparative literature students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 336(D1) AFR 339(D1) RLFR 300(D1)

Writing Skills Notes: To hone their research and writing skills (and prepare for their conference on the banlieue), students will write three research papers (with thesis statement and subheadings) from which they will receive professor feedback.

Difference, Power, and Equity Notes: This course, Banlieue in Lit, Music, Film fosters difficult but carefully framed conversations about race, class, gender, citizenship, housing segregation, discursive practices, immigration and belonging in contemporary France and how identities and power relationships are expressed in banlieue film, literature and French hip hop music.

AFR 344 (F) Asian/African American Cultural and Political Theory

Cross-listings: PSCI 333 AMST 325 AFR 344

Secondary Cross-listing

Contrasted as "model minorities" or "incorrigible minorities" Asian Americans and African Americans have been pitted against one another in social standing and political objectives. However, throughout the twentieth century, African/Asian solidarity and alliances existed in political movements and literary and cultural productions. From Ho Chi Minh’s anti-lynching writing, the founding conference of the WIDF (Women’s International Democratic Federation) in China in 1945, through the Bandung Conference, coalitions against U.S. wars in Southeast Asia, and alignments with Chinese anti-imperialist endeavors, black and Asian peoples have joined in international political formations. Contributions to theory include the writings and activism of Langston Hughes, W.E.B. Du Bois, Richard Wright, Robert Williams, Yuri Kochiyama, Grace Lee and Jimmy Bogg’s, Ishmael Reed, and Amiri Baraka; films of Bruce Lee; music of Fred Ho; revolutionary praxis of Mao Tse Tung’s *Little Red Book* and his writings on art and society; the Marxism of the Black Panther Party; the Afro-futurism of Sun Ra and Samuel Delany; and contemporary “Afro-pessimism.” Such cultural works depict futurities and possibilities for Black and Asian diasporas. This seminar examines theory, politics, literature, film, and music produced from and linked to
twentieth-century movements against capitalism, racism, colonialism, and imperial wars to think through how Black and Yellow Power have shaped 
solidarity to challenge white supremacy and racial capitalism. **Requirements:** One midterm paper (5-6 pp.) = 30%; final paper/project (10-12 pp.) with 
a creative option = 50%; short response paper and GLOW posts = 10%; participation (attendance and class discussion) = 10%

AFR 345 (S) Dark Debts: Race, Money and Finance in the Modern World Economy

**Cross-listings:** AFR 345 GBST 346

**Primary Cross-listing**

What does the history of capitalism tell us about the interrelationships of people reduced to 'commodities', the accumulation/dispossession of wealth 
and financial crises? In this course, students engage the relationship between, finance and money and the 'global color line'. Starting with the timeless 
work of Eric Williams' 'Capitalism and Slavery' and W.E.B. Du Bois' 'The Souls of Black Folk', we explore how the modern construction of finance has 
evolved across various periods from chattel slavery, to Jim Crow, colonialism, the post-war era, decolonization, neoliberal financialization to the 
present. We will also engage contemporary topics like global financial crises, financialization, development finance, reparations, housing, 'green' 
finance in the context of climate change, and the effects of the COVID-19 pandemic for Black and racialized communities. These concerns show the 
(trans)formations and relevance of finance for social reproduction which have created unprecedented racialized inequality and injustices. This seminar 
also explains how Black communities have organized and responded to finance capitalism over time and across space. Students will engage with 
fictional and non-fictional writings, documentaries, scholarly works and popular media.

**Requirements/Evaluation:** Attendance and Participation including serving as a class discussion leader (25%); 3 themed short response papers 
(15% each); Produce a podcast episode (30%)

AFR 346 (F) Modern Brazil (DPE)

**Cross-listings:** AFR 346 HIST 346
Brazil has been the "country of the future" longer than it has been an independent nation. Soon after Europeans descended on its shores, Brazil was hailed as a land of resources so rich and diverse that they would inevitably produce great wealth and global power for its inhabitants. Although this has often contributed to an exaggerated patriotism, it has also fostered ambiguity—for if the label suggests Brazil's potential, it also underlines the country's failure to live up to that promise. This course will examine Brazil's modern history by taking up major themes from Independence to the present. Beginning with a "bloodless" independence that sparked massive civil wars, we will analyze the hierarchies that have characterized Brazilian society. The course will give particular attention to themes of race, gender, sexuality, and citizenship; national culture and modernity; and democracy and authoritarianism in social and political relations.

Class Format: discussion

Requirements/Evaluation: class participation will count for 20% of final grade; each of two 5-page papers will count for 25%; and a final 8- to 10-page paper will count for 30%

Prerequisites: none; open to first-year students with instructors permission

Enrollment Limit: 25

Enrollment Preferences: History majors, Latino/a Studies concentrators

Expected Class Size: 20-25

What does it mean to "settle" land? What racial encounters and acts of survival took place around the plantation? How have farmworkers and landowners faced off against government policies and "agribusiness" corporations? What was the "Green Revolution" and why did it happen? Agriculture as a relation to land based on domestication, enclosure, and commerce has long been a means of and justification for racial and colonial dispossession and exploitation across the Americas, including what is now the United States. At the same time, an array of embodied practices in relation to the land and one another complicate and contest these histories of racial and colonial dispossession. Broadly, this course aims to familiarize students with the historical and present-day entwining of colonial and racial dispossession, exploitation, and resistance at the heart of U.S. economies of agriculture. By the end of this course, students should be able to analyze how the historical foundations of U.S. agriculture have entailed and intertwined the taking of lands and removal of Indigenous peoples, the enslavement of African peoples, mass migration, and various forms of exploitative labor. Students should also be able to assess how these historical foundations continued to serve as the material conditions reproduced throughout the course of the 19th and 20th centuries under discriminatory government policies and powerful "agribusiness" corporations, as well as the possibilities and limits of redress and reform through state and corporate action. Finally, students should be able to interpret how embodied practices in relation to the land and one another precede, exceed, and push against the logics and histories of racial and colonial dispossession. The course is organized around three units that interrogate economies of agriculture within and beyond the U.S. nation-state. Each unit interrogates a key period of time from the founding of the United States, through 20th-century Pax Americana, and on into the present. Finally, each unit does so while attending to the emergence and enactment of "food sovereignty" movements--efforts to foster a new international trade regime, agrarian reform, a shift to agroecological production practices, attention to gender relations and equity, and the protection of intellectual and indigenous property rights.

AFR 350  (F)  The Nile  (DPE)

Cross-listings: GBST 320 ENVI 335 ARAB 308 AFR 350 HIST 308

Secondary Cross-listing

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It was on the banks of this river that the great Egyptian empires were founded that led to the building of some of humanity’s most astounding structures and artworks. While the Nile seems eternal and almost beyond time and place, now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This alarming nexus of demography, climate change, and economic development has led to increasingly urgent questions of the Nile’s future. Is the Nile dying? How has the river, and people’s relationship with it, changed over the last century? This course will consider the history of the Nile and its built and natural environment. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. By following an imaginary droplet flowing from tributaries until it makes its way into the Mediterranean Sea, we will learn about the diverse peoples and cultures along the way. We will evaluate the numerous attempts to manage and control the Nile, including the building of big dams, and the continuous efforts to utilize the river for economic development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the major urban centers with the Nile and whether the tensions among Nile riparian states will lead to “water wars” in East Africa and the Middle East.

Requirements/Evaluation: short papers and final project/paper

Prerequisites: none, though background in Middle East history is preferable

Enrollment Limit: 19

Enrollment Preferences: History and Arabic Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

AFR 353  (F)  Capitalism and Racism in the American Context and Beyond: A Global Approach  (DPE)

Cross-listings: AMST 345 GBST 344 AFR 353

Secondary Cross-listing

American Studies emerged with the idea that transdisciplinarity is crucial for comprehending the concept of America. Building on this framework, this course foregrounds transepistemology as an equally important method for understanding the dynamics of America, both locally and globally, at the level of the world-system. In addition to tracing the consubstantial genealogy of racism and capitalism, we will examine their local manifestations, mainly in Asia, Europe, Africa and America, as well as their current geopolitical, social and economic outcomes, especially the reproduction of systemic inequalities and domination. Through an interdisciplinary approach and engagement with a variety of resources from economics, anthropology, sociology, critical race theory, comparative ethnic studies and decolonial thinking, this course will address the following: i) review the different forms of economic organization of human societies throughout history (with special focus on the work of Karl Polanyi); ii) trace the epistemological origins of capitalism and investigate what makes capitalism and its crises unique; iii) trace the genealogy of the concepts of race, racism and discrimination; iv) interrogate the intersection of racism and capitalism in different traditions of thought and epistemologies in Asia, Europe,
Africa, and the Americas. For example, we will read key texts from "French theory", (Deleuze, Foucault, etc.), US Black tradition, (W. E. B. Du Bois and Cedric Robison, etc.), Chinese social sciences (Li Sheming, Cheng Enfu, etc.) and African economy and anthropology (Mahdi Elmandjra, Cheikh Anta Diop, etc.) and Latin American decolonial philosophy (Quijano, Dussel, Mignolo, etc.). By doing this, we will situate the rupture that capitalism and racism introduced at the level of global history, which is the first step to conceptualizing racism and capitalism. After showing that the development of capitalism and racism are historically linked, we will proceed to examine the manifestations of their interaction at local and global levels. Locally, we will focus on the effects of racism on the labor market: discrimination in hiring, wage discrimination, segregation, duality and stratification of the labor market, etc. We will also analyze how sexism and racism play out in the labor market in racialized communities. We will also reflect on the links between racism and politics and their effects on economic policies. From a more global perspective, we will analyze the roots of the global economic crisis and the resulting geopolitical issues at the international level and the racist dynamics they generate. Overall, as we will move through readings, we will situate the United States in a cross-regional perspective that would enable us to develop critical insights concerning links and convergences between capitalism and racism.

Requirements/Evaluation: Requirements: An active participation is required of students in terms of engaging in the in-class debates and weekly response paper as a feedback on the lectures as well as a final paper. Evaluation: Participation 25%; Weekly Response (350-500 words) 30%; Final Research Paper (12-15 pages) 45%

Prerequisites: None

Enrollment Limit: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

AFR 355 (F) Matter & Meaning in Black Queer Art & Performing Non-Human Potentials (DPE)

Cross-listings: AFR 355 WGSS 392

Secondary Cross-listing

In "Black Birds, Black Lives & The Unfinished Work of Queer Ecologies," Nicole Seymour recounts the incident of avid bird watcher, Christian Cooper, who became a target of racial profiling in Central Park. Seymour asks "are only certain people allowed to nature and its benefits?" Furthermore Seymour centers Black Queerness with non-human arrangements, thus begetting the question--what subversive potentials lie within alignments of "animality" "un-becoming" or within these natural landscapes that are often exclusionary of Black Queer mobility? In this class we will discuss the resilience of Black queer survival under the duress of racial capitalism and explore critical frameworks within the emerging field of new materialism. In so doing we will produce a comparative analysis implementing a study of non-human systems while simultaneously creating and viewing performances that integrate interspecies and inorganic meditative mediums. We will assess the question, how might non-human engagements radically shift ideological formations of "Man" and convey ecologies of thinking that complicate issues of "thingification?" To answer this question, we will study emerging scholarship in the field of Black Queer Studies such as neologisms like Yanique Norman's Black "fungi-ability" which puts into consideration posthumanist approaches alongside race and gender studies where the analytic of the mushroom points to a relational engagement of a Black & Queer diasporic poetics. Riley Snorton's concept on fungibility as "Trans capability" enables students to also discuss re-empowered embodiments of "flesh" as both a queer and decolonial praxis. Zakiyah Iman Jackson's articulations "on becoming human" also prove foundational as we will mutually explore Black Queer possibility amid the perceived burden of abjection.

AFR 358  (F)  Mapping Anti-Bias Education

Cross-listings:  PSYC 377 AFR 358

Primary Cross-listing
In this course, we will use theories and data to define anti-bias education in childhood contexts and examine its application across U.S. schools and childcare centers, families, and the media environment. We will ask ourselves: What do we know about the need for anti-bias education among non-marginalized and marginalized children, including those who are minoritized for their ethnic-racial, gender, and/or sexual identities? How are various biases and identities shaped in childhood? Which media-based and interpersonal interventions can be effective with anti-bias education and why? What are some of the contemporary hesitations and challenges around implementing anti-bias education for educators, families, and children? What are some of the practices that marginalized families are already implementing? As we explore approaches and possibilities for anti-bias education across children's ecosystems, we will propose innovative recommendations for research and practice that have the potential to yield positive outcomes for today's children.

Requirements/Evaluation:  Weekly 1-page reflection papers (graded on a pass/fail basis), one 3-5 page mid-term paper, one final 7-10 page paper or approved project

Prerequisites:  None

AFR 361  (F)  James Baldwin and His Interlocutors

Cross-listings:  ENGL 334 AFR 361

Secondary Cross-listing
This seminar explores the life and writing of James Baldwin. Through an examination of both his fiction and nonfiction, we chart his interrogation and development of ideas surrounding, among other topics, race, courage, love, nation, revolution, and belonging. We also trace his impact on our national consciousness by engaging with authors whose own bodies of work intersect with his. This list includes, among others, Amiri Baraka, Nikki Giovanni, Lorraine Hansberry, Barry Jenkins, Audre Lorde, Norman Mailer, Richard Wright, and Malcolm X.
Requirements/Evaluation:  weekly reading responses, active class participation, three close readings (500 words each), annotated bibliography, class presentation, final paper (13-15 pages)

Prerequisites:  a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit:  25

Enrollment Preferences:  English majors, then sophomores considering the major

AFR 363  (F) Framing American Slavery  (DPE)

Cross-listings:  AMST 368 AFR 363 HIST 368

Secondary Cross-listing

Readings in American Slavery  This course will delve into how and what historians have written about US slavery for the last century or so. Rather than marching through time, like we might in a survey course, we'll explore the nooks and crannies of slavery's history. We'll consider gender and sexuality, labor and capitalism, regional difference, maritime culture, and every day life. We'll compare histories produced well before the Civil Rights Movement to books written afterward. We'll consider the obstacles and challenges Black scholars faced in the academy and consider the significance of their work. Finally, we'll examine slavery's role in today's world, beginning with the institution's relationship with American universities and continuing on to the recent protests against monuments and statues.

Requirements/Evaluation:  Four written essays/reviews, final paper. Students must also complete reading and contribute to class discussions.

Prerequisites:  None

Enrollment Limit:  12

Enrollment Preferences:  Priority given to History, American Studies, and Africana Studies concentrators/ majors.

Expected Class Size:  10

Grading:  yes pass/fail option, yes fifth course option

Distributions:  (D2)  (DPE)

Difference, Power, and Equity Notes:  This course will explicitly examine how power worked and changed during the centuries of legal slavery in the United States. Since lawmakers joined power and violence to definitions of whiteness and blackness, we will study how these definitions emerged and changed over time. Students will address issues of violence, legal and extra legal means of continuing slavery through changing political and economic conditions. Additionally, the course will consider the racial barriers in the academy.

Attributes:  HIST Group F Electives - U.S. + Canada

Not offered current academic year

AFR 364  (S) Black Political Thought

Cross-listings:  AFR 364 PSCI 361

Secondary Cross-listing

This seminar will introduce students to the study of Black Political Thought as a set of critical normative and diagnostic gestures that help theorize the Black experience. By thrusting students into the "problem space" of Black Political Thought, students will examine the historical and structural conditions, normative arguments, theories of action, ideological conflicts, and conceptual evolutions that help define African American political imagination. Students will take up the central philosophical questions that shaped the tradition from the early nineteenth century to the present by engaging historical thinkers like Anna Julia Cooper, W.E.B. DuBois, Frantz Fanon, Ida B. Wells-Barnett, and Ella Baker and contemporary theorists
like Saidiya Hartman, Charles Mills, bell hooks, and Frank Wilderson--among others. Guided by a Black diasporic consciousness, students will explore the canon's structural and ideological accounts of slavery, colonialism, patriarchy, racial capitalism, Jim Crow, and state violence and, subsequently, critique and imagine visions of Black liberation. With a theoretical grounding in the "Black radical tradition," students will leave this course with the conceptual resources and philosophical tools needed to realize political theory's potential as an instrument they can employ in their daily lives to normatively and diagnostically evaluate political, economic, cultural, and social institutions.

**Requirements/Evaluation:**
- Weekly discussion questions; two (1-2 pages) short reading responses; and three essay-style writing assignments, including one short (3-4 pages), one medium (5-6 pages), and one longer (10-12 pages)

**Prerequisites:**
- at least one prior course in political theory or permission of the instructor

**Enrollment Limit:** 16

**Enrollment Preferences:**
- political theory concentrators, Political Science majors, Africana majors

**Expected Class Size:** 16

**Grading:**
- no pass/fail option, no fifth course option

**Cross-listings:**
- AMST 365
- GBST 365
- ENGL 320
- AFR 365

**Secondary Cross-listing**

This course explores slavery and the psyche through a constellation of Black diasporic literary, visual, and theoretical texts from the US, Caribbean, and Africa. Unwieldy and generative, the opacity of race within the field (and practice) of psychoanalysis shares a fraught intimacy with the co-constitutive terrains of violence and race that form the unconscious. Querying what escapes the hermeneutics of psychoanalysis and aesthetics in the fantasies race engenders, we will examine modernity's articulation of racialization through conceptualizations--both fantasmatic and real--of self, world, knowledge, and possibility. Course texts may include: Edwidge Danticat's *The Farming of Bones*, Adrienne Kennedy's *Funnyhouse of a Negro*, Bessie Head's *A Question of Power*, Arthur Jafa's *APEX* and *Love is the Message and the Message is Death*, Conceição Evaristo's *Ponciá Vicêncio*, Lars von Trier's *Manderlay*, Charles Burnett's *Killer of Sheep*, Derek Walcott's "Laventille"; and, selections from Sigmund Freud, Jacques Lacan, David Marriott, Kathleen Pogue White, Franz Fanon, Hortense Spillers, Nathan Gorelick, Jaqueline Rose, Jared Sexton, Melanie Klein, Jacques-Alain Miller, Melanie Suchet, and Jean Laplanche. Note: This course will reflect the Continental tradition in philosophy. Student should be familiar with the basic interventions of psychoanalysis.

**Requirements/Evaluation:**
- Weekly discussion posts and questions, 2 Papers, 10-12 pages, Research presentation

**Prerequisites:**
- One Writing Skills or writing intensive course; one intro course in one of following: American Studies, Africana Studies, Comparative Literature, English, Global Studies, Philosophy, Psychology, Women, Gender, and Sexuality Studies

**Enrollment Limit:** 15

**Enrollment Preferences:**
- Juniors or Seniors with majors or concentrations in any of the areas: American Studies, Africana Studies, Comparative Literature, English, Global Studies, Philosophy, Psychology, and Women's, Gender, and Sexuality Studies

**Expected Class Size:** 15

**Grading:**
- no pass/fail option, no fifth course option

**Distributions:** (D2)  (DPE)

- AMST 365(D2) GBST 365(D2) ENGL 320(D2) AFR 365(D2)

**Difference, Power, and Equity Notes:** This course examines racialization as it relates to the racial violence of slavery on the psyche. Racialization as a process will be connected to concepts of self, world, and knowledge. Black diasporic literary, visual, and theoretical texts from the US, Caribbean, and Africa will be at the forefront of the course.
AFR 366 (S) #OutofHaiti: Haiti, Black Sovereignty and the Global Political Economy

Cross-listings: GBST 366 AFR 366

Primary Cross-listing

In the Western hemisphere, Haiti (Ayiti kreyòl) is a symbol of many extremes related to revolution, impoverishment, governance and institutional sabotage, Black liberation, artistic and cultural achievement, and underdevelopment. This course places Haiti at the center of broad global political economic transformations. Starting from the Haitian Revolution and its reverberations throughout colonial empires to the present, this course will critically interrogate these superlatives and depictions of Haiti. Recent media portrayals of a ‘Haitian migrant crisis’ at the United States border defy empirical facts, and whitewash imperial misadventures and harm, further exposing a narrative of Haitian anti-blackness that has been pervasive throughout US history. We will unpick these imaginaries and material realities to consider broader perspectives within historical and contemporary significance of struggles for Black sovereignty and liberation. Taking economic and political history as data sources, documentary films and recent academic, artistic and popular works as starting points for discussion, the course will stir debate and a broader appreciation of the political contributions of civic movements and figures within Haiti and the Haitian diaspora. From the perspective of ‘connected Blackness’, the course explores how Black peoples’ links through global struggles for liberation and freedom and against imperialism emerge today.

Requirements/Evaluation: Journal entries (250 words each); individual essay on documentary film or media (10 pages); research report on a major contemporary social/economic/environmental issue in Haiti (10 pages); “Haiti Black Liberation Space” group public education project on the contemporary importance of Haiti to global Black liberation/ racial justice and a summative reflection on a meaningful aspect of this project (5 pages); class participation (discussion and readings)

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: If over-enrolled, preference to AFR and Global Studies concentrators

AFR 367 (F) Black History is Labor History (DPE) (WS)

Cross-listings: AFR 367 HIST 367

Secondary Cross-listing

This seminar explores labor history in relation to black people, spanning the colonial period to the early twenty-first century. It racializes the history of work by tracing the long story of black labor in the U.S. from the plantation to the plant. Whereas the bulk of the course will analyze black labor and labor movements in the twentieth century, specifically focusing on the push for economic inclusion and mobility amid employment, societal and union-related racial discrimination, we will examine what involuntary black labor meant in the context of slavery and the construction of a capitalist economy. Likewise, we will devote attention to black workers with regard to such topics as antiunionism, deindustrialization, economic inequality, Fordism, informal economies, Jim and Jane Crow, labor radicalism and violence, New Deal and welfare, the rise of civil rights unionism, and slavery and capitalism, among other themes.

Requirements/Evaluation: Students are expected to participate actively and will write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages) in consultation with the instructor and will be required to submit a topic proposal and outline, an annotated bibliography, and a peer-reviewed draft of the final paper.

Prerequisites: Recommended for students with sophomore standing or above and first-year students who both have taken a 200-level history course and have received instructor permission to enroll into the course.

Enrollment Limit: 25
Enrollment Preferences: HIST and AFR majors followed by students with sophomore, junior, or senior standing. If the course is overenrolled, students will be given a questionnaire and only first-year students who have completed a 200-level history course will be enrolled.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 367(D2) HIST 367(D2)

Writing Skills Notes: Students will be required to write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages). Throughout the semester, these writing assignments will total roughly 22-30 pages. Students can expect to have line-edited feedback on their papers with substantial and timely, writing-related suggestions for improvement.

Difference, Power, and Equity Notes: This course racializes the study of labor history, focusing on black people and their experiences in the United States from the plantation to the plant. It challenges students to confront and to redefine what it means to labor, grasping how slavery, segregation, and systemic inequalities amid black people’s pursuit of citizenship, equality, and freedom have shaped their economic, political, and social conditions and identities.

AFR 369 (S) African Art and the Western Museum (DPE) (WS)

Cross-listings: AFR 369 ARTH 308

Secondary Cross-listing

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the current digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. Further, students will explore how the dialogues created between objects, individuals, and space often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

Requirements/Evaluation: Targeted bi-monthly writing assignments (3-5 pages in length) and bi-monthly peer response paper (1 page in length)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History and African Studies Majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 369(D1) ARTH 308(D1)

Writing Skills Notes: Targeted bi-monthly writing assignments (3-5 pages in length) and bi-monthly peer response paper (1 page in length). Students can expect to receive timely comments on their writing skills, with suggestions for improvement from the instructor.

Difference, Power, and Equity Notes: This course explores issues of agency, authenticity, and appropriation as it applies to African artifacts displayed within the contexts of Western art museums. Through discussions of cultural capital, rights of seeing, and the politics of representation, students will analyze how the meaning of “African art” has been largely dictated by a Western museum culture and how this hegemony is currently being disrupted through strategic exhibition and display practices and narratives.

Not offered current academic year

Cross-listings: INTR 400 GBST 400 AFR 372 AMST 400 PSCI 379

Secondary Cross-listing

This seminar focuses on the entwined histories of liberation movements against racism, enslavement, and imperialism in the US, Cuba and Africa. Readings include: Hugh Thomas, *Cuba: A History*; Che Guevara, *The Motorcycle Diaries*; Walter Rodney, *How Europe Underdeveloped Africa*; Laird Bergad, *The Comparative Histories of Slavery in Brazil, Cuba, and the United States*; Thomas Sankara, *Women's Liberation and the African Freedom Struggle*; Nelson Mandela and Fidel Castro, *How Far We Slaves Have Come!* Students will read and analyze texts, screen documentaries, collectively compile a comprehensive bibliography, and present group analyses. The seminar is open to all students; however, priority is given to seniors majoring in American Studies.

**Requirements/Evaluation:** Reading and analysis of texts, collective compilation of a comprehensive bibliography, presentation of group analyses; two brief papers due at midterm and the end of the semester

**Prerequisites:** None

**Enrollment Limit:** 12

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

AFR 374 (F) Technologies of Race (DPE) (WS)

Cross-listings: AFR 374 STS 373 AMST 372

Secondary Cross-listing

This course is an introduction to theories, methods, sources, and approaches for interdisciplinary research and creativity in and through the interdisciplinary field of American Studies. We will focus on the intersection of race, gender, sexuality, and disability with modern media technologies, from early photography in the mid-19th century to contemporary trends in machine learning and artificial intelligence. Through a process of shared inquiry, course participants will investigate the ways that historical legacies of oppression and futuristic speculation combine to shape human lives in the present under racial capitalism. Whether analyses of the automation of militarized border control in Texas, or of the ways that obsolete, racist concepts are embedded in machine vision and surveillance systems, the readings in the course will chart out the key moments in the co-evolution of race and technology in the Americas. Students will gain a working competence in all four tracks of the American Studies major (Space and Place; Comparative Studies in Race, Ethnicity, and Diaspora; Arts in Context; and Critical and Cultural Theory). Finally, we will also explore alternative paths toward a future where technology might help to effect the abolition of oppressive structures and systems, rather than continue to perpetuate them.

**Requirements/Evaluation:** Four papers, in-class writing/reflective work, and a final exam.

**Prerequisites:** none

**Enrollment Limit:** 16

**Expected Class Size:** 16

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 374(D2) STS 373(D2) AMST 372(D2)

**Writing Skills Notes:** Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will
receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

**Difference, Power, and Equity Notes:** This course requires students to contextualize technologies historically and in relation to one another, with attention to their entanglements with racial discourses and racism. Students gain critical skills that equip them to imagine possible futures where technologies serve increasingly as abolitionist tools.

**AFR 376 (S) Black Critical Theory, Black Avant-Garde** (DPE)

**Cross-listings:** AMST 374 ENGL 311 AFR 376

**Secondary Cross-listing**

What is the relationship between violence and what constitutes the Black avant-garde and Black critical theory? Is it possible to conceptualize the latter two without an investigation of Black rebellion and its relationship between Black artistic and intellectual production? Can one argue that Black critique is none other than Black experimentation in form, or that Black abstraction is the requisite effector for all modes of Black praxis and thought? This course will explore these questions through a study of Black continental and diasporic avant-garde texts in multiple mediums. Alongside, we will also consider the emergence of contemporary Black critical theory, chronicling its development as both experimental and critical. Through the works of historical subjects of experimentation also considered to be objects critiquing in experimental form, the course will approach Black avant-gardism and Black critical theory as a productive opportunity to think about Blackness as critique, as experimentation, and as theoria. This pairing of Black avant-gardes and Black critical theory takes "avant" at its root--indicating what precedes or takes precedent--and "garde" as what is preeminent, or what protects. As such, we will start with the question of whether blackness, as an ideological fiction produced through violent historical ideologies and practices, could ever, or ever not, be anything but avant-garde?

**Requirements/Evaluation:** Weekly discussion posts and questions, a research presentation, and two 10-12 page papers

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** Preference will be given to AMST majors and prospective majors, as well as ENGL and AFR majors or prospective majors.

**Expected Class Size:** 15

Spring 2024

SEM Section: 01    W 7:00 pm - 9:40 pm

**AFR 377 Policing, Punishment, and Protest in African American History**

This seminar will examine the development of the criminal legal system in the United States from the early republic to the present. Topics of study will include legacies of racial slavery; convict leasing; dynamics of gendered state violence; police tactics and technologies; the Great Migration and its impact on policing in the urban North; prisoner rights movements; urban rebellions; law and order politics; the Wars on Crime and Drugs and the rise of mass incarceration. This course will pay particular attention to the distinct relationships between domestic regimes of policing and imprisonment and various Black political struggles. By placing these topics in conversation with the history of African American life and politics, this course seeks to
highlight the ways in which the criminalization of Black people has circumscribed Black citizenship and inspired successive insurgent movements for reform of the American carceral system.

Requirements/Evaluation: Students will be graded on class participation, reading responses, an Op-Ed paper (1200-1500 words), a book review (5-7 pages). In addition, students will work in groups to develop a podcast related to course themes.

AFR 381  (F) Media and Society in Africa  (DPE) (WS)

Cross-listings: HIST 480 GBST 480 AFR 381

Secondary Cross-listing
The Media have long played important roles in African societies. As early as the second half of the 19th century, African intellectuals were using print technology to address the people. As radio technology was in its infancy during the first half of the twentieth century, Africans were gathering around re-diffusion stations and later around single receivers to listen to news and entertainment programing. In this tutorial, we will examine these histories of media and media technologies on the continent. Ultimately, we will explore the roles that media played in serving particular community needs and how communities also adapted new media technologies to fit local conditions. Media content has historically been determined based on standards beyond viewers', readers' and listeners' control. We will examine the influences that editors and political leaders on the continent have exerted on content as well as what forces they responded to. We will also further explore the media's role in major events on the continent, from governmental changes to the ending of apartheid in South Africa and the role that media have played in areas of conflict.

Requirements/Evaluation: Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

Prerequisites: This course open to all students

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to history majors and students with prior experience with African history. If the course is over-enrolled, students may be asked to complete a questionnaire to determine enrollment

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 480 GBST 480 AFR 381

Writing Skills Notes: Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular feedback and critiques - both oral and written - from the professor, as well as oral critiques from tutorial partners.

Difference, Power, and Equity Notes: Modern media developed in Africa as means of control and cultivating dutiful colonial subjects. However, media then emerged as sites of contestation and even tools with which colonial subjects challenged colonial rule. They have continued to be revealing sites for issues of gender, race, class, and ethnicity. As such, this course immensely explores diversity, power and equity and how these all-important societal concerns are expressed through the media in Africa.

AFR 384  (S) Media, Race, and U.S. Black Families

Cross-listings: AFR 384 PSYC 363
In this course, we will work to synthesize what we know about some of the key socializing forces for U.S. Black youth today. We will focus on how families, entertainment media, and the news can socialize Black children. Drawing on a range of theories and data we will examine how family members communicate about issues of identity and how media can come into play. What do we know about how U.S. Black families communicate about identity? What gaps remain in our knowledge, and how can we find the answers? What can we learn about today's media content when we apply research-informed lenses? What predictions can we make about its potential uses and effects among Black families? We will identify central research areas that warrant further attention and consider which methodologies would best work to fill those gaps. We will prioritize approaches that highlight the agency and strength of U.S. Black families and of youth themselves.

**Requirements/Evaluation:** 1 in-class presentation, two 2-5 page papers, and one 7-10 page final research proposal (that builds on the two shorter papers)

**Prerequisites:** None

**Enrollment Limit:** 18

**Enrollment Preferences:** Africana Studies Concentrators and Psychology Majors

**Expected Class Size:** 18

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**Secondary Cross-listing**

From 18th-century claims that climate determined character to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, race, colonialism, identity, and "nature" operate as interconnected terrains of power. Anchored in the contexts of U.S. colonialisms, racialization, and accumulation, this course aims to expose students to the cultural politics of "nature" as a way of "doing" American Studies. Specifically, this course investigates formations of and struggles against U.S. colonialisms, racialization, and accumulation via the many symbolic and material iterations, negotiations, and contestations of the contingent relations between and among human and non-human natures. Organized around a significant research paper and weekly written responses, this course ultimately aims to foster students' critical writing, reading, analytical thinking, and comparative inquiry skills across such contexts and sites of contestation, and across texts of different genres and media. We will work with a wide range of primary sources, including published fiction and poetry, legal documents, newspaper articles, speeches, recorded songs, and films, photos, paintings and other visual culture. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward non-human natures, as well as analyze how ideas of "nature" mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

**Requirements/Evaluation:** Evaluation will be based upon the following: Class Participation: 25%; Weekly Responses (350-500 words): 25%; Final Research Essay: 50%, broken down by Research Proposal (2-3 pgs, 10%), Peer Review and Feedback (2 pgs, 10%), Presentation (10%); Essay (15 pgs): 20%.

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** American Studies majors will be given preference; secondary preference given to students specializing in Native American and Indigenous Studies, as well as Africana and Environmental Studies majors.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

AFR 394 (S) Cold War Archaeology  (DPE) (WS)  
Cross-listings:  AMST 412 STS 412 AFR 394

Secondary Cross-listing
In this advanced American Studies course, we will examine Cold War history and culture with attention to the intersection of racialization and nuclear paranoia. The concurrent unfolding of the struggle for Civil Rights and the national strategy of Civil Defense played out against the backdrop of a global ideological battle, as the United States and the Soviet Union fought each other for planetary domination. From the scientific fantasy of bombproofing and "safety in space," to the fears of both racial and radioactive contamination that drove the creation of the American suburbs, the affective and material dimensions of nuclear weaponry have, from the beginning, been entangled with race. Drawing on the critical and analytical toolkits of American Studies and media archaeology, students will dig beneath the surface of received narratives about the arms race, the space race, and race itself. Students will uncover generative connections between mineral extraction, the oppression of Indigenous populations, the destructive legacies of "urban renewal," and the figure of the "typical American family" huddled in their backyard bunker. Finally, this course will examine the ways in which the Cold War exceeds its historical boundaries, entangles with the ideology and military violence of the Global War on Terror, and persistently shapes the present through its architectural, affective, and cultural afterlives.

Requirements/Evaluation:  Three short papers, in-class writing/reflective work, and a final paper.
Prerequisites:  none
Enrollment Limit:  12
Enrollment Preferences:  AMST majors or prospective majors.
Expected Class Size:  12
Grading:  no pass/fail option, yes fifth course option
Distributions:  (D2)  (DPE) (WS)  
This course is cross-listed and the prefixes carry the following divisional credit:
AMST 412(D2) STS 412(D2) AFR 394(D2)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to contextualize historical events during the Cold War in relation to racialization, inequitable distributions of resources, and the stratification of national space in relation to risk and radioactivity. Students gain critical skills that equip them to see the ways in which the Cold War continues to shape processes of racialization, oppression, and imperial extraction, and spatial arrangements.

AFR 395 (F) Black Reparations Within/Beyond Borders (DPE)

Cross-listings: AFR 395 WGSS 395 ENVI 395 GBST 395

Primary Cross-listing

Generations of Black people around the world have demanded restitution for the harms and legacies of enslavement, indigenous genocide and colonialism in order to advance social justice, new ways of living and freedom. In this way, freedom fighters, Black Power leaders, abolitionist movements, Pan-Africanists, maroons, Rastafarians, Black politicians, climate justice leaders, and revolutionary anti-capitalists have all put forward ideas on and approaches to reparations and reparatory justice. This course will analyze ‘geographies of Black struggle’, the differences and commonalities among these approaches, the political strategies and movements, including responses to global climate change and socio-environmental disasters that advance reparations as a just remedy *within and beyond* borders. We give particular attention to Pan-Africanist and Black feminist perspectives, as well as liberal and popular struggles for reparations within the African diaspora across space and time. Do Pan-Africanism and Black feminism offer new visions for reparations movements in the 21st century? Employing speeches, writings, audio-visual content and documentary film from and about these earlier and emerging movements and their leaders, we will draw long lines between historical circumstances and drivers, and examine Black (un)freedoms within the context of calls for reparation today.

Requirements/Evaluation: Attendance and Participation including serving as a class discussion leader (20%); Written double-spaced essay about and the legacies and role that Pan-Africanism or Black Feminist perspectives play in contemporary global reparations movement (8 pages plus bibliography) (25%); Research and creatively present using written text, flyer, video, audio-visuals or poster a profile of Pan-African feminist leader focusing on her ideas, movement activities, and role in the reparations movement including innovative ideas (max. 5 pages or 10 minutes) (25%); Final project: simulation activity of a Pan-African Congress on Reparations (30%)

AFR 405 (S) CAPSTONE: Africana Studies and the Disciplines

Of the many things that distinguish Africana Studies from other fields of knowledge, most remarkable are its creative uses and critiques of disciplinary perspectives. In some instances, a scholar in the field might move between disciplines; in others, a scholar might integrate two or more disciplines into one point of view. Disciplinary creativity accommodates the array of information--written texts, music, visual art, film--that contributes to our understanding of the African Diaspora. This seminar will illuminate the disciplinary nuances and challenges of studying people of African descent. After outlining genealogies of Africana Studies and the field's complicated relationships to social science disciplines, students will closely read classic texts by some of the pioneers in the field and explore their uses of disciplinary perspectives. In the latter half of the course, students will have the opportunity to design and conduct their own research projects with the aforementioned disciplinary concerns in mind.

Requirements/Evaluation: class participation, a couple of short papers and the completion of a final research paper or project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Africana Studies majors and concentrators

Expected Class Size: 10
AFR 440  (F)  CAPSTONE: Performing Blackness

In modern parlance and scholarship, blackness is understood not as a biological but rather a socially constructed phenomenon. This course extends common perceptions by working from the foundational concept that blackness is not only social construction but also performance and lived experience. Using the lens of performance on racial identity foregrounds the active and shifting nature of race in contrast to the potentially passive, static connotation of construction. But what is this term performance that is now so widely used as to be an anathema? In this course, we explore performance broadly as entertainment, representation, social function, and lived experience. By the end of the course, students will analyze multiple performance types from theatrical and dance performance to performance of race in everyday life. They will also study and practice at least four core black performance studies methodologies: oral interpretation of literature, ethnography, written performance analysis, and embodied performance (i.e. movement, music and/or theatre). In this way, students will begin to understand performance as both subject matter and method. The course will be structured around discussions, written responses, and performance exercises that help students analyze and practice each methodology. At the end of the semester, students will create final creative research projects that articulate key theories of black performance studies and draw on at least one of the featured performance methodologies. While preference is given to Africana Studies concentrators, students are not required to have prior performance experience.

Requirements/Evaluation: class participation, performance exercises, response papers, and a final creative research project

Prerequisites: none

Enrollment Limit: 15

Cross-listings: AFR 450 PSCI 372

Primary Cross-listing

How do we judge the value of life? What is the significance of death and arbitrary threats to our existence? Why probe modern notions of black and blackness? What defines optimism, pessimism, enslavement, freedom, creativity, and being human? Do black lives matter? This capstone seminar will explore these and related questions through an examination of the life and work of Jamaican novelist, playwright, cultural critic, and philosopher Sylvia Wynter. Methodologically interdisciplinary, the course shall examine written and audiovisual texts that explore Wynter's inquiries into the central seminar queries. We will study figures and movements for black lives whose geopolitics frame the milieu of Wynter's work. Our examination of intellectuals and activists, with their explicit and implicit engagements with Wynter, shall facilitate assessing the possibilities, challenges, and visions of black living. We will also explore the current implications of Wynter's thought for Africana political theory, Afro-futurism, social justice, human rights, and critiques of liberal humanism. In the latter half of the course, students will have the opportunity to design, conduct, and present their own final research projects.

Requirements/Evaluation: attendance and participation; a 7-page midterm essay; class presentation; and a final research project

Prerequisites: none

AFR 460  (S)  Capstone: Documenting Black

Documenting Black begins with a shared understanding that depicting the stories and lives of Black folks is its own important and necessary creative form. In this Africana Studies capstone seminar we will focus on the art of documentary production as a means through which Black lives are illustrated. We will also explore the historical and conceptual framing of Black experience in the field of documentary studies, consider documentary techniques and methodologies, and discover how artists and creatives have used the medium of documentary to interpret Black diasporic life. This course is a practicum that will culminate with students writing, designing, editing, and producing a documentary short of 3-5 minutes.

Requirements/Evaluation: In addition to weekly course sessions, for the final project students will submit a documentary short of 3-5 minutes, which students will write, design, edit, and produce.

Prerequisites: Must be an Africana Studies concentrator

Enrollment Limit: 12

Enrollment Preferences: As this is a capstone designed for Africana Studies concentrators, priority will be given to third and fourth year students who have declared the concentration.

To be taken by students registered for Africana Studies 491 who are candidates for honors.
Class Format: independent study
Grading: pass/fail only
Not offered current academic year

AFR 99 (W)  Ind Study: Africana Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only
Not offered current academic year
GENERAL PROGRAM DESCRIPTION

The American Studies Program, a ten-course major, uses interdisciplinary approaches to develop students’ understanding of the complexity of the culture(s) usually labeled “American.” Examining history, literature, visual media, performance, and other forms of expression, we explore the processes of cultural definition as contested by diverse individuals and groups. We ask new questions about aspects of American life long taken for granted; we also use American culture as a laboratory for testing classic and contemporary theories about how cultures work.

NON-MAJORS, FIRST-YEAR STUDENTS, AND SOPHOMORES

America: The Nation and Its Discontents, our introductory course, is open to non-majors including first-year students, who are especially encouraged to take the class. All elective courses are open to students who meet the requirements or prerequisites specified in the course description. American Studies 301, the junior seminar required of majors, is open to non-majors with permission of the instructor.

COURSES AND COURSE NUMBERING

American Studies offers courses at all levels. Our 100-level electives, which give preference to first-year students, explore a substantive topic in-depth without seeking to introduce the field as a whole. Our introductory course, AMST 101, explores broad patterns of power and imagination, struggle and social change in American culture but also introduces the interdisciplinary approach and diverse cultural artifacts, genres, and media that distinguish American Studies as a form of inquiry. Both this course and our occasional 200-level electives are appropriate for students at all levels, including first-years. The intermediate electives at the 300-level are offered primarily for juniors and seniors, although, when space and instructor policy permits, they are open to sophomores. All majors are required to take AMST 301, the junior seminar, which teaches students how to employ theories and methods central to the field. The 400-level courses designated as senior seminars are designed for senior majors, though other students (majors and non-majors) with appropriate preparation are typically welcome in these courses as well.

THE MAJOR

Required Courses

- American Studies 101, America: the Nation and Its Discontents
- American Studies 301, Junior Seminar
- One 400-level course designated Senior Seminar

Elective Courses

Seven courses: four should be chosen from your primary specialization field; the remaining three electives must represent each of the remaining three fields, to ensure breadth of your study. At least one of your seven electives should cover pre-1900 American history or culture.

THE DEGREE WITH HONORS IN AMERICAN STUDIES
ELIGIBILITY AND APPLICATION FOR HONORS

Candidates for honors in American Studies will undertake a substantial, year-long, independent project during their senior year. Applicants should have a consistent record of high achievement in courses taken for the major, and normally will have done work in the field of study of their proposed thesis. Students who wish to write or produce an honors project should consult with both the chair and a prospective faculty adviser in the fall or winter of their junior year. Students who wish to pursue honors must submit a brief proposal describing their project to the Chair of the American Studies Program by the time of spring registration of their junior year. Final admission to the honors thesis program will depend on the AMST advisory committee’s assessment of the qualifications of the student and the merits and feasibility of the project (including the availability of relevant faculty advisers). If your thesis is approved, you will enroll in AMST 491/Winter Study/AMST 492. These courses, taken together, count as one of your required electives.

TIMELINE FOR AMERICAN STUDIES HONORS THESIS STUDENTS

The fall and winter study deadlines vary widely, depending on your own rhythms, the timing of your meetings with your adviser, etc. The first part of the fall is typically devoted to refining the questions at the heart of your project, and the scope of your argument (including literature review, archival research, etc.) Most students begin this work over the summer. We encourage our students to start writing as soon as possible. Typically, we aim to have students write a draft of one substantive chapter and the introduction by the end of finals week in fall semester, though some have produced two substantive chapter drafts instead.

January is very important. Many pages of new writing and editing of previous work will can be done in this period. Occasionally, seniors will meet together in an informal thesis colloquium. The goal for Winter Study, generally speaking, is to know by the end of it what you will need to write in the last push as Spring semester begins. Your biggest push will come in February and March. All writing and revisions should be done by the end of spring break. Here are the approximate deadlines:

- Immediate after Spring Break: draft of entire thesis is due to your adviser and your two readers;
- Two – three weeks later: deadline for readers to respond to you with comments/suggestions;
- Wednesday of the last week of classes: final version of thesis due to readers.

Senior thesis writers will share their work with interested faculty and students in a public presentation in the last weeks of the spring semester. Designation of Honors or Highest Honors will be decided by the faculty at the end of the semester.

ADVISING

All majors will be assigned a faculty adviser. Majors must meet with their adviser during the first week of classes during the fall semester and at the time of the spring semester registration period in order to have their courses and plans for the American Studies major approved. Both majors and non-majors are encouraged to talk at any time with the program chair or other affiliated faculty about the major.

AMERICAN STUDIES AND OTHER PROGRAMS

Students majoring in American Studies are encouraged to consider pursuing concentrations in Africana Studies, Environmental Studies, Latina/o Studies, Performance Studies, and Women’s, Gender and Sexuality Studies. Many of the courses counted for those concentrations may also earn credit toward the American Studies major.

STUDY AWAY FROM WILLIAMS

We encourage students to pursue cross-cultural comparative studies. A major in American Studies can be combined with study away from Williams for a semester or a year if plans are made carefully. Many courses that will be approved for College credit may also count toward the American Studies major. Many of the courses offered by Williams at Mystic Program also count toward the major. Please see the chair if you have questions about how your study abroad may enhance your American Studies experience.

Students planning to be away in the junior year should have taken American Studies 101 before they leave; those who can take the Junior Seminar before they go away are strongly encouraged to do so. Students should consult as early as possible with the chair or their adviser about their plans for fulfilling the requirements of the major.

SPECIALIZATION FIELDS

To provide focus for work in the major, each student will choose one of the specialization fields listed below and record this choice when registering for the major. (This commitment can be revised, in consultation with the chair.) At least four electives should be taken from this primary field.

ARTS IN CONTEXT

This specialization is for students interested in American arts, literature and media. Its approaches are interdisciplinary: it trains students to examine cultural artifacts with attention to aesthetic form and to the contexts—historical, social, political—that determine and situate those forms. Broadly, it asks how history has shaped the arts and media and how the arts and media have shaped how we think and who we are. Students in this
specialization take courses across a range of genres and media: poetry, fiction, music, film and video, pop culture, visual culture, performance, experimental and activist art.

Elective Courses

Students may check with the program chair to see if other courses not listed here might count as electives.

COMPARATIVE STUDIES IN RACE, ETHNICITY, AND DIASPORA

This interdisciplinary specialization examines the role of race, ethnicity, and diasporic movements in the construction of American identities. Students explore how experiences and concepts of race and ethnicity are transformed through the processes of diaspora and immigration. These courses may encompass a broad spectrum of fields such as history, literature, religion, politics, anthropology, gender studies, media and the performing arts, among others. NOTE: Concentrators in this area are required to take a combination of courses that will allow them to comparatively assess the experiences of at least two ethno-racial groups in the Americas.

CRITICAL AND CULTURAL THEORY

Critical and cultural theory is for students who want their American Studies work to combine philosophy, aesthetics, and social thought. Its approach is methodological, conceptual, and problem-driven. Students combine courses in feminist theory, anti-imperial and postcolonial theory, literary theory, critical race theory, queer theory, psychoanalysis, Marxism, and other counter-traditions in political theory and philosophy.

AMST 101  (F)(S) America: The Nation and Its Discontents  (DPE)

This course introduces students to the capacious and extraordinarily varied interdisciplinary field of American Studies. First institutionalized in the mid-twentieth century, American Studies once bridged literature and history in an attempt to discover a singular American identity. Over 80 years later, many American Studies scholars reject this exceptionalizing rhetoric, working instead to understand how genocide, enslavement, colonization, and militarism/war are foundational to the formation of the U.S. nation-state, and how marginalized and minoritized peoples have survived through, rebelled against, and created new visions for collectivity, relationality, and community. In this course, students will be introduced to the dynamic ways American Studies work links to ethnic studies; women, gender, and sexuality studies; literary studies, political science; critical geography; critical media studies; disability studies; history; anthropology; sociology; art; and more. We will anchor this array of approaches by examining beliefs, practices, places, and migrations that have shaped and been shaped by the U.S., and we will pay particular attention to the people who labor for, have been racialized by, and who think critically about “America.” Through close reading; discussions; and analyses of music, art, and film, we will collectively reckon with the questions of who and what makes “America” -- hemispherically, transnationally, globally. In the process, students will be encouraged to co-create a learning experience rooted in praxis, political consciousness, intersectionality, and mutual support.

Requirements/Evaluation: Four papers, project with presentation, and a final exam.

Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: first- and second-year students
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (DPE)
Difference, Power, and Equity Notes: This course requires students to think critically about the meanings of "America" and about the consequences and costs of racialization and other processes for making social differences. Students learn to discern the ways in which historical legacies of oppression continue in the present, and consider the mutual interrelation of local, national, and global contexts and events.

AMST 113  (F) The Feminist Poetry Movement (DPE) (WS)
Cross-listings: AMST 113 WGSS 113 ENGL 113

Secondary Cross-listing
Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery
Requirements/Evaluation: two-three short analysis papers, creative (1-2 pages), Perusall, curated final project (archival exhibit and digital project), presentations
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: first years
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
AMST 113(D2) WGSS 113(D2) ENGL 113(D1)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: Perusall annotation, three four-to-five-page graded papers, one creative assignment, and a final digital research project (8-10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.
**AMST 125 (F) Introduction to Asian American Studies** (DPE)

Cross-listings: AMST 125 AAS 125

**Primary Cross-listing**

Who or what constitutes the term "Asian American"? Leading with this provocation, this course offers an introductory survey of the interdisciplinary field of Asian American Studies, tracing its formation and evolution from the 1960s onward. Focusing on an array of foundational texts, cultural production, and primary sources central to the discipline, we will ask who has been included/excluded from this category and analyze the shifting constructions of Asian Americans from the nineteenth century to the present in tandem with other markers of difference. Over the course, we will study how these constructions have been shaped not only relationally through other racial formations but also by overlapping systems of power, including settler colonialism, U.S. war and empire, capitalism, and globalization within and beyond the U.S. Additionally, we will examine how this term has been undone and remade via political activism, visual and performance art, media, and contingent spaces.

**Requirements/Evaluation:** weekly readings, class discussions, weekly discussion posts, in-class presentation, midterm paper, and a final paper or creative project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** If over enrolled: first-year students, AAS concentrators or prospective concentrators, AMST majors or prospective majors

**Expected Class Size:** 18

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 125(D2) AAS 125(D2)

**Difference, Power, and Equity Notes:** This course examines "Asian" and Asian American" as categories of racial difference constructed through various structures of power. Students in the course are asked to unpack how constructions of this difference have changed over time and produced uneven power relations and access to resources.

**AMST 132 (S) Contemporary Africana Social and Political Philosophy**

Cross-listings: AFR 132 AMST 132 PSCI 171

**Secondary Cross-listing**

This introductory seminar investigates the relationship between three major schools of thought in contemporary Africana social and political philosophy: the African, Afro-North American, and Afro-Caribbean intellectual traditions. We will discuss a range of thinkers including Dionne Brand, Aimé Césaire, Angela Davis, Edouard Glissant, Kwame Gyekye, Paget Henry, bell hooks, Katherine McKittrick, Charles Mills, Nkiru Nzegwu, Oyèrónke Oyewùmí, Ngugi wa Thiong'o, Cornel West, and Sylvia Wynter. A primary goal of the course is to provide students with the intellectual resources to decipher problems central to philosophical discourse and to allow students an opportunity to apply what they learn to critical issues in current geopolitics.

**Requirements/Evaluation:** attendance and participation, two 5- to 7-page essays, and one 10-page final paper

**Prerequisites:** none; open to all

**Enrollment Limit:** 15

**Enrollment Preferences:** first- and second-year students

AMST 135 (F) Queen Sugar and Black Study

Cross-listings: AFR 135 AMST 135

Secondary Cross-listing

The critically acclaimed and award winning television series, Queen Sugar, follows the Bordelon family through its struggles to sustain hold of its ancestral land. An adaptation of the eponymously named 2014 novel by Natalie Baszile, the series will soon enter its seventh and final season. This gateway course to Africana Studies will explore the historical, political, and economic contexts of the making of the series before considering its representations and dramatizations of key topics of Black study: the afterlives of enslavement, plantation regimes, global sugar production, land dispossession, the carceral state, gender and sexualities, kinship, activism, and African-diasporic spiritualities.

Class Format: Over the course of the semester, students will be required to watch the entirety of the television series.

Requirements/Evaluation: weekly journal entries on episodes (300-500 words); in-class writing reflections; class presentation; final project that expands on a course topic

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: This seminar is designed for first-year students. Should the course be overenrolled, students will be selected after an interview with the instructor.

AMST 142 (S) AlterNatives: Indigenous Futurism and Science Fiction (DPE)

Cross-listings: STS 142 AMST 142

Primary Cross-listing

Indigenous people occupy a paradoxical position in time. As survivors of genocide, they are already post-apocalyptic, occupying what could be called "their ancestors' dystopia." But Indigenous people are also imagined to exist frozen in history, merely one step in the ceaseless march of civilization that brought us to the present. This tutorial explores how contemporary Native science and speculative fiction imagines and enacts futurity from this dynamic temporal position. Looking across numerous national and transnational Indigenous contexts, we will survey a diverse range of media, including short stories, novels, visual art, video games, films, and online platforms like Second Life. Pairing these with works in Science and Technology Studies (STS) and Native American and Indigenous Studies (NAIS), we will explore concepts like the Native "slipstream," eco-erotics, post-post-apocalyptic stress, Native pessimism, biomedical speculative horror, and what it would be like to fly a canoe through outer space.

Requirements/Evaluation: participation, weekly 2- to 4-page written responses to class readings, short fiction prompts, and/or your partner's writing

Prerequisites: permission of instructor
Enrollment Limit: 10
Enrollment Preferences: first and second year students, American Studies majors, Science and Technology Studies concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
STS 142(D2) AMST 142(D2)
Difference, Power, and Equity Notes: Students in this course will explore the relationship between political violence, resistance, and speculation. We will develop close reading practices, analytical methods, and careful discussion dynamics to enable students to make sense and use of concepts like futurity, race, settler colonialism, gender, and technological determinism.

Spring 2024
TUT Section: T1 Cancelled

AMST 146 (F) Introduction to Native American and Indigenous Studies (DPE)
Consider just the last few years... during the 2016 presidential campaign then-candidate Donald Trump called Senator Elizabeth Warren "Pocahontas," a disparaging reference to Warren's claim to Native American heritage. In 2017, Los Angeles became the largest US city to rename "Columbus Day" to "Indigenous Peoples Day." Indigenous-led resistance to oil pipelines continues in multiple locations, and in 2022 Washington DC's professional football team abandoned their old name, a racial slur for Native Americans, rebranding as the Washington Commanders. Struggles in Indian Country over politics, natural resources, and representation have become increasingly visible. This course will prepare students to better understand contemporary indigenous issues. Course content will actively work against the myth that Native American history ended in 1890 with the end of militant Native resistance to US expansion. Instead, we will ask: Who are indigenous peoples? How is their status and identity determined? How do Indian nations sit within and in relation to state and federal governments? What are the pressing issues of the present moment? What are the histories that make sense of those issues? How do we explain that curious American urge to claim "Indian blood" and to create novels and films about Indians? Course topics will include colonialism, tribal sovereignty, Native American art, literature, and culture, activism and "Red Power," struggles over natural resources, gender and sexuality, representations of indigenous people in popular culture, and more. This course offers a broad introductory survey of these and other issues as it explores the development and current state of the interdisciplinary field known as Native and Indigenous Studies.

Requirements/Evaluation: Assignments will include weekly discussion, responses to assigned readings, short papers, and essay exams for the midterm and final.
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: American Studies majors or first- and second-year students

AMST 164 (S) Communications in Early America (DPE) (WS)
Cross-listings: HIST 163 AMST 164
How did the multiplicity of people who shaped "early" North America communicate with each other, across profound linguistic, cultural, social, political, and spiritual differences? What strategies did they use to forge meaning and connections in times of tremendous transformation, while maintaining vital continuities with what came before? This course examines histories of communication in North America and the technologies that communities developed to record, remember, advocate, persuade, resist, and express their expectations for the future. Using a continental and transoceanic lens of "Vast Early America," we will take up Indigenous oral traditions, Traditional Ecological Knowledge, wampum belts, and winter counts as expressions of ethics, identity, relationality, and diplomacy among sovereign Native/Indigenous nations; artistic and natural science paintings, engravings, and visual culture that circulated through the Atlantic World; diaries and journals as forms of personal as well as collective memory. In the latter part, we will work with political orations, newspapers, pamphlets, and other forms of print culture that galvanized public opinion in the Age of Atlantic Revolutions; memorials and monuments that communities created to honor ancestors and significant events; material culture such as baskets and weavings that signified through their imagery and physical forms; and social critique and visions of justice in the verse and prose of Phillis Wheatley Peters and William Apess. These materials take us into the complexities of individuals' and communities' interactions and relations of power, and spaces of potential or realized solidarity, alliance, and co-building of new worlds. Throughout we will work together to understand different methodologies, theories, practices, and ethics involved in approaching the past. We will at every turn be attuned to the ongoing significances of these experiences among communities in the twenty-first century. This course provides an opportunity to engage with original materials pertaining to early American histories in the Williams College Archives/Special Collections and Art Museum as well as digital spaces.

Requirements/Evaluation: active participation in class discussions, several short essays based on readings and discussion topics, museum/archives exercise, final essay

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: limited to first- and second-year students who have not yet taken a 100-level course in History or American Studies; juniors and seniors only with the permission of the instructor

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 163(D2) AMST 164(D2)

Writing Skills Notes: Short essays (3-5 pages) spaced throughout the semester with instructor feedback on writing skills as well as historical content; written reflection and analysis related to museum/archives visit with original materials; final essay (8-10 pages) due at end of semester that synthesizes findings from across the whole semester and allows students to closely examine primary/secondary sources; regular opportunities to conference with instructor about writing ideas and drafts.

Difference, Power, and Equity Notes: This course centers experiences of diverse people in early America including substantial focus on Native American/Indigenous and African American communities. It introduces foundational methods for historical study, including decolonizing methodologies from Native American and Indigenous Studies (NAIS) and African American histories; critical vantages on Euro-American settler colonialism; and scholarship on complex entanglements in multiracial and multiethnic communities

AMST 166 (F) Being Muslim, Being American: American Muslim Literature in the 21st century (DPE)

Cross-listings: REL 166 AMST 166 ENGL 268 COMP 166

Secondary Cross-listing

Islam and Muslims in the United States are the subject of extensive public scrutiny and media coverage in broader public discourses. It is less common, however, to hear Muslims' own voices speak about their lives, experiences, beliefs, and commitments. This course will take a literary approach to exploring American Muslims' own narratives about themselves, which will serve as an introduction to religion in contemporary U.S. culture. We will address questions such as: How do American Muslims attempt to fashion their identity in the wake of 9/11? What are the pressures and demands of American national belonging and cultural citizenship that Muslims must navigate? How are race, gender, ethnic heritage, and immigration definitive of Muslim experiences and self-understandings? How are Muslims approaching the tensions between communal belonging and
individuality? What are the competing claims and contestations about authentic expressions of Islam? We will be engaging such themes through an analysis of popular memoirs, autobiographies, novels, short stories, poetry, films, and comedy.

Requirements/Evaluation: regular reading responses, short midterm essays, and final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: First-year students and sophomores

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 167 (S) Let Freedom Ring? African Americans and Emancipation (WS)

Cross-listings: AMST 167 AFR 167 HIST 167

Secondary Cross-listing

This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

Requirements/Evaluation: research paper, short writing assignments, class participation

Prerequisites: first-years and sophomores

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 167(D2) AFR 167(D2) HIST 167(D2)

Writing Skills Notes: Students will work throughout the semester on research paper that concerns Emancipation in the US. Students will turn in segments of this paper in separate assignments. During the final weeks of the course students will stitch these components together. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement."

AMST 200 (S) Ethnographic Directions in American Studies (DPE)

This course introduces students to the practice and politics of ethnography, broadly defined as the study and representation of people, culture, and society. Our approach will be post-positive and interpretive, with attention to the social stakes of ethnographic research and methodology writ large. We begin the semester by looking at the history of ethnographic methodologies in anthropology and sociology, and then examine efforts to decolonize
ethnography. We then read several examples of decolonial, feminist, or otherwise critical ethnographic research related to marginalized or minoritized groups in the U.S. -- such as undocumented migrants from Latin America, formerly unhoused Black girls, Diné fighting resource extraction on the reservation, and Cambodian refugees in the Bronx -- along with articles that illuminate issues of power, observation, consent, and representation in ethnographic research. Through readings, discussion, and engagement in ethnographic exercises, students will gain familiarity with the different phases or components of conducting ethnographic research, while also considering different styles of ethnographic production, including creative work. While this course is designed to look specifically at ethnographic directions that intersect with the interdisciplinary field of American Studies, it is open to any student interested in the study of pressing social issues (such as the prison-industrial complex, refugee resettlement, and drug addiction) and creating communities of mutual care and solidarity for surviving, fighting, and quite possibly, solving them.

**Requirements/Evaluation:** Weekly: Average 75 pages of reading; participation in class discussions. Every 3-4 weeks: research assignments. Once per semester: group presentation. End of semester: one 5-page paper.

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** Enrollment preferences if over enrolled: AMST majors, students seeking methods courses

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course covers ethnographic approaches to understanding social relations and cultural processes, with particular attention to scholarship in which power relations; structural analysis; and race and gender are central.

**AMST 201 (F) Cold War Intellectuals: Civil Rights, Writers and the CIA** (DPE)

**Cross-listings:** PSCI 221 AFR 224 LEAD 220 AMST 201 INTR 220

**Secondary Cross-listing**

This weekly tutorial has alternating primary and secondary writers (5pages/2pages). In weekly one-hour sessions, students read their work aloud followed by dialogue and critique. Primary papers are due to respondent/professor 48hrs before the tutorial meets; response papers are emailed to the professor 2hours before the weekly tutorial meets. Readings include: *We Charge Genocide*; *Williams J. Maxwell, F. B. Eyes: How J. Edgar Hoover's Ghostreaders Framed African American Literature*; *Chalmers Johnson, Blowback: The Costs and Consequences of American Empire*; *Hugh Wilford, The Mighty Wurlitzer: How the CIA Played America*; "Part III Supervision and Control of the CIA," *Rockefeller Commission Report; Malcolm X Speaks*; *Sam Greenlee, The Spook Who Sat By the Door*; and, *The Murder of Fred Hampton*. The tutorial is open to all students.

**Requirements/Evaluation:** Attend all classes; submit completed papers 24hours before seminar meets.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** Juniors and Seniors.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 221(D2) AFR 224(D2) LEAD 220(D2) AMST 201(D2) INTR 220(D2)

**Difference, Power, and Equity Notes:** This tutorial examines the Cold War between the US and the USSR and attempts to use intellectuals to shape and promote the objectives of powerful state entities. The power struggle between the two "superpowers" impacted cultural production and authors. Some of those authors influenced or enlisted into the Cold War sought equity and equality for their communities and eventually fought against the very political powers that employed them.

**AMST 202 (S) Introduction to Racial Capitalism** (DPE) (WS)

**Cross-listings:** AFR 209 AMST 202
The historical relationship between race and capitalism is one of the most enduring debates in U.S. historiography, shaping modes of inquiry and analysis across history, law, economics, sociology, anthropology, and other fields. This course seeks to introduce students to the concept of “racial capitalism” – which rejects treatments of race (and racism) as external to the so-called real workings of capitalism -- as a way to understand this relationship and as an activist hermeneutic through which to identify and respond to the conditions that American Studies must reckon with. Students will gain familiarity with the global history of racial capitalism and the power of the concept itself through secondary sources and a wide range of primary sources, and through engaged discussion and short essays. Throughout the course, we will pay special attention to the cultural politics, political geographies, and historical development of racial capitalism, thus attending to how the social relations of racial capitalism have been known, lived, and resisted across time and space. The course is organized around three key themes: the land question; race, capitalism, and nation; and the banalities of racial capitalism. Across these themes, the course will address such issues and topics as North American settler colonialism, circum-Caribbean plantation slave and “Coolie” labor, mass incarceration, the subprime mortgage crisis, and the War on Terror. The course will do so through and against a history of racial capitalism that privileges the U.S. nation-state in particular. By the end of this course, students should be able to: detail and analyze the historical development of and resistance to racial capitalism, doing so in relation to the global itineraries of racial slavery, settler colonialism, imperialism, and white supremacy; trace the history of the concept of racial capitalism itself; and identify how the concept continues to shape the field of American Studies.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: American Studies majors, students specializing in Native American and Indigenous Studies, Africana majors, History majors

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 209(D2) AMST 202(D2)

Writing Skills Notes: Emphasis on writing process and revision: Three thesis papers at 5 pages each (each receiving critical feedback from professor and peers); one keyword glossary where students develop rigorous definitions of course key terms; one roundtable discussion based on the final paper.

Difference, Power, and Equity Notes: Throughout, the course addresses the issues of difference, power, and equity amongst groups and the nature of the theoretical tools or perspectives used to understand these issues. It does so familiarizing students with “racial capitalism” as both a way of understanding the historical relationship between race and capitalism, and as an activist hermeneutic to respond to the conditions that American Studies and other fields must reckon with in the present.

AMST 203 (S) Militarism and American Culture (DPE)

This course examines the impact of warfare on the history of the United States. Considering a range of conflicts, from the violence of European colonialism to the ongoing War on Terror, the course pays particular attention to the ways in which military violence has shaped (and been shaped by) American culture. In particular, students will engage with texts that interrogate the relationship between race and violence in US history. Students will analyze shifting representations of war through engagement with cultural texts such as film, television, literature, and comics. The scope will be broad, with attention paid to larger conflicts such as the World Wars and the Cold War, as well the lesser-known wars and occupations that have continually occupied the US military.

Requirements/Evaluation: Assignments will include daily discussion, short papers, and essay exams for the midterm and final.

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: American Studies majors and students that have taken introductory AMST or History courses.

Expected Class Size: 20
Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Readings, assignments, and discussions in the course will focus on the relationship between race, class, gender, sexuality, and expansion of US power. In particular, students will engage with texts that interrogate the relationship between race and violence in US history, a relationship implicated in many of the topics we will focus on, including the *Indian Wars* of US continental expansion, the seizure of overseas territories such as the Philippines, and encounters with the Middle East.

AMST 206 (S) Designer Genes (DPE)

Cross-listings: ENGL 208 STS 208 AMST 206 WGSS 208

Secondary Cross-listing

In this course, we explore cultural texts that attempt to come to terms with—or exploit—the revolution in contemporary genetics with a particular focus on gender, race, class, and sexuality. The mapping of the human genome in 2001 opened incredible opportunities for medicine, law, and society, but it also, as Alice Wexler has written, "opened a vast arena for contests of power over what it means to be human, who has the power to define what is normal, [and] who has access to what resources and when." Wexler was writing before the final sequencing of the human genome. Now we have CRISPR technology, ushering in a new, more pressing set of ethical concerns. We are currently in the midst of a "global race to genetically modify humans," as the anthropologist Eben Kirksey has documented in his new book *The Mutant Project*. How will we come to define the human? Who gets to decide? Our writers and filmmakers make clear that genetic medicine cannot be thought apart from a profit-driven American health care system or family and gender dynamics. Joanna Rudnick's documentary *In the Family*, for instance, explores the personal and political issues associated with hereditary breast cancer and the patenting of genes. Octavia Butler's Afro-futurist novel *Dawn* explores black female sexuality, reproduction, and the survival of the species in her character's encounter with a genetically enhanced alien species. The film *Gattaca* shows us a fully realized dystopian society where genetically modified humans are the norm—a society that now "has discrimination down to a science." The transgender artist Tamara Pertamina, on the other hand, "hopes to decolonize the science of genetic engineering," as Kirksey has written, with her performance artist projects. Our texts come from a number of different genres, including the memoir, science fiction, film, documentary, art, and non-fiction writing at the intersections of science, medicine, philosophy, anthropology, and law.

Requirements/Evaluation: Personal essay, short analysis papers, Perusall annotations, final research group project

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Majors, concentrators, juniors and seniors

AMST 208 (S) Time and Blackness

Cross-listings: AMST 208 REL 262 AFR 208
The concept of time has been one of the most examined, yet least explicitly theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory—which involves thinking about time—time itself has rarely been the subject of sustained inquiry. This may be due to its abstractness as an idea, and the level of analysis its conceptualization demands, or because time in the Black experience cannot be understood outside of the meaning of race, which itself is not completely tangible. In this tutorial, "Time and Blackness," we will explore how Black writers across a number of genres—spiritual autobiography, fiction, memoir, literary criticism, and cultural theory—understand time, and create paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in Black writings? How does race shape the ways Black writers conceive the experience of time? And, finally, to what can we attribute the recent surge in explicit, theoretical examinations of "time and blackness"?

Requirements/Evaluation: assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: concentrators in Africana Studies, majors in Religious Studies, and majors in American Studies

**AMST 209 (F) Introduction to Black, Brown, and Queer Theory** (DPE)

Have you ever tried to relate your experiences, rooted in your own complex identities, history, and social networks, to those of others you perceive as different and perhaps allied, but found you lacked some fundamental vocabulary? This is a common problem, even for critical theorists who take as their object of study political, affective, and epistemological structures of difference and power. Critical race, postcolonial, Indigenous, and queer theories have often centered the relationship between the normative and non-normative, between straight and queer, colonizer and colonized, and white and black. Connections between the differently non-normative can sometimes be pushed to the periphery. But what if we were to center that periphery? What views of complex power structures and new avenues of thought and solidarity would arise if we took as our starting point the social and theoretical interconnectedness and overlap of black, brown, and queer folks? This course will serve as an introduction to critical race, postcolonial, Indigenous, and queer theories as conceptually and phenomenologically interlocking and allied fields. By reading with theorists in all these traditions and at their intersections, we will explore how blackness, indigeneity, and brownness are constructed and function in the context of colonialism and settler colonialism, how differently racialized bodies are sexed and sexualized, and how queerness as method can speak across these issues. No background in critical theory is required for this course. We will focus on how to read and discuss theory, and how to think holistically about the structures that work to keep us divided.

Requirements/Evaluation: attendance and class participation, two 4-page reflection papers, and a final creative project (TBD with instructor) or take-home exam

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: American Studies majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course introduces students to theories of difference and power, such as critical race, postcolonial, Indigenous, and queer theories. The aim of the course is to establish the skills and frameworks needed to think about how these categories and theories interact, overlap, and constitute one another.

AMST 211 (S) Race, Environment, and the Body

Cross-listings:  SOC 211 AFR 211 ENVI 211 AMST 211

Secondary Cross-listing

This course is organized around three distinct, but overlapping, concerns. The first concern is how polluting facilities like landfills, industrial sites, and sewage treatment plants are disproportionately located in communities of color. The second concern is the underlying, racist rationales for how corporations, in collaboration with state agencies, plot manufacturers of pollution. The final concern is how the environmental crises outlined in the first two sections of the course are experienced in the body. In reviewing a range of Black cultural productions—like literature, scholarship, music, and film—we will not only consider how environmental disparities physically affect human bodies, but also how embodiments of eco-crises lend to imaginaries of the relationship between the self and the natural world.

Class Format: discussion

Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

AMST 212 (S) Moving While Black

Cross-listings: AFR 216 COMP 212 AMST 212 DANC 217

Secondary Cross-listing

Opening your apartment door, driving down the highway, taking a knee, raising a fist, sitting at the lunch counter then or sitting in a café now, these movements have historically and presently prompted fear at a minimum and in the most grave cases death for black people. Whether in the U.S. or globally, moving in the world as a black person often means being perceived as different, foreign and threatening. Crawling, dancing, running and boxing, these movements have countered fear and articulated the beauty, pride, creativity and political resistance of black people. In both cases, black movement matters and means much. While many consider movement to be just organized dance moves, this course expands students' definitions of black movement and teaches them to analyze multiple perceptions, uses, and reactions to it. "Moving while Black" offers examples of physical movement in improvised and practiced performance, quotidian movement, geographical movement across national borders and symbolic, politicized gestures. Students will investigate black movement via interdisciplinary sources that reflect various time periods and locations. Students may analyze such texts as Jacob Lawrence's visual art in The Migration Series, the movement of the rumba dance form between Cuba and the Democratic Republic of Congo, the Alvin Ailey American Dance Theater's "Revelations," William Pope.L's choreographed crawls, the 1995 World Rugby Cup in South Africa, and the 2018 case of a Kansas resident arrested while moving into his own home. Additionally, this course features an important practice element, in which students experiment with in-class movement exercises and workshops, engage with dance archives at Jacob's Pillow, interview participants of Kusika, and create and perform their own choreographies. While no previous experience in performance is required, curiosity and openness to learning through one's own body movement is expected.

Class Format: classes will rotate throughout the semester between seminar discussions in the classroom and performance exercises in the studio

Requirements/Evaluation: multiple reading/viewing responses in a movement journal, an essay closely analyzing movement; a presentation, and multiple movement-based performances including a final project with outside research and a proposal

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Africana Studies concentrators
AMST 213  (F)  Asian/American Identities in Motion  (DPE)

Cross-listings:  ASIA 216  DANC 216  THEA 216  AMST 213  GBST 214  AAS 216

Secondary Cross-listing
The course aims to explore dance and movement-based performances as mediums through which identities in Asian and Asian-American (including South-Asian) communities are cultivated, expressed, and contested. Students will engage with how social and historical contexts influence the processes through which dance practices are invested with particular sets of meanings, and how artists use performance to reinforce or resist stereotypical representations. Core readings will be drawn from Dance, Performance, Asian, and Asian American Studies to engage with issues such as nation formation, racial and ethnic identity politics, appropriation, tradition and innovation among other topics. This is primarily a discussion-based seminar course, and might also include screenings, discussion with guest artists and scholars, and opportunities for creative projects. No previous dance experience is required.

Requirements/Evaluation: reading responses, in-class writing assignments, participation in discussions and presentations, essays, and a final cumulative essay assignment.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: first years and sophomores

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 216(D1)  DANC 216(D1)  THEA 216(D1)  AMST 213(D2)  GBST 214(D2)  AAS 216(D2)

Difference, Power, and Equity Notes: This course introduces students to the role of performance in nation formation in Asia and the history of Asian-Americans in the US through analysis of dance practices. Student will explore how race was central to the formation of Asian and the American nation, and how social and legal discriminatory practices against minorities influenced popular culture. The assigned material provide examples of how artists address these inequalities and differences in social power.

Difference, Power, and Equity Notes: This tutorial examines how girls and women confront capitalism, imperialism, climate devastation, patriarchy and poverty. The national and international movements that they participated in or led were based on shifting the balance of powers towards the impoverished, colonized, and imprisoned.

Not offered current academic year

AMST 218 (S) Black and Brown Jacobins (DPE) (WS)

Cross-listings: AMST 218 PSCI 249

Primary Cross-listing

What does it take to be free in the free world? In this class we explore the dark side of democracy. The title is inspired by C.L.R. James’ famous book, Black Jacobins, about the Haitian Revolution (1791-1804). This revolution was the most successful revolt of the enslaved in recorded history. But the irony is that their oppressors were the leaders of the French Revolution across the Atlantic. Those who proclaimed “liberty, equality, fraternity” for themselves violently denied them to others. There is a similar dismal irony to the American Revolution, as captured by the title of Frederick Douglass’ famous 1852 speech, “What to the Slave Is the Fourth of July?” Not even the Civil War could resolve this issue, as demonstrated by the failure of Reconstruction and the rise of Jim Crow. To revisit this history, we will read W.E.B. Du Bois’ great book, Black Reconstruction in America. Alongside a selection of readings by canonical postcolonial writers and current political theorists, James and Du Bois provoke us to ask what it would take for the democratic world to be truly free.

Requirements/Evaluation: Participation, weekly journal, two 5-page essays

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: AMST majors or prospective majors

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 218(D2) PSCI 249(D2)

Writing Skills Notes: “Black and Brown Jacobins” is a writing-intensive course that requires weekly journaling. Journal entries are a means for students to track the progress of their learning, reflect on the reading assignments, practice their writing skills, and receive written feedback. In addition, students will write two persuasive essays in response to a prompt.

Difference, Power, and Equity Notes: “Black and Brown Jacobins” calls into question the success of modern democracy from the perspective of minoritized groups, in particular Black Americans and Afro-Caribbeans. Students will grapple with the legacy of enslavement in the Americas, the Haitian Revolution (1791-1804), the American Civil War and Reconstruction (1861-1877), Jim Crow, and our current era of mass incarceration. The question driving this course is, what does it take to be free in the free world?

AMST 219 (S) Extreme Persuasions: The Far Right in the United States and Russia (DPE) (WS)

Cross-listings: AMST 219 RUSS 218 WGSS 217

Primary Cross-listing
The purpose of this course is to explore the unexpected recent confluence of the American and Russian far-right movements, among advocates for authoritarianism in both countries who have traditionally understood the ‘other’ superpower to be an implacable enemy. How have nationalist movements in the United States come to see the Russian Federation as a vanguard for ‘whiteness’ and traditional masculinity in European identity, overturning the perception of Russia as a racial Other that was prevalent among American conservatives during the Cold War? What are the affinities between the imperial and openly patriarchal aspirations of Putinism and the goals of American religious Reconstructionism, with its interpretation of the Confederacy as a God-given model for racial separatism and gender complementarianism? We will discuss repressive historical legacies and homophobia in both countries, devoting particular attention to debates about protest art and the removal of monuments, and to movements that situate themselves in opposition to neoliberal forms of ethno-nationalism.

**Requirements/Evaluation:** On average, there will be 100 pages of reading per week. Over the course of the semester, students will be required to view three films, which will be discussed in class. Class participation counts for 25% of the course grade; each of the first three response papers, 15%; the term paper, 25%; the in-class presentation of the term paper, 5%.

**Prerequisites:** None

**Enrollment Limit:** 19

**Enrollment Preferences:** Majors and concentrators in AMST, Russian, and Women's and Gender Studies.

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 219(D2) RUSS 218(D2) WGSS 217(D2)

**Writing Skills Notes:** The written work is comprised of three response papers (5-7 pages each), a rough draft of the term paper (8-10 pages) that will be ungraded but extensively commented upon, and the term paper itself (10-15 pages). Each student to discuss their writing strategies prior to the deadlines for the essay assignments. For the essays, students may choose from among a range of prompts, or design a topic of their own.

**Difference, Power, and Equity Notes:** Students will use the assigned readings as points of departure for analyzing and responding to traditionalist configurations of gender and ethno-nationalism in the United States and the Russian Federation. Particular attention will be devoted to the proliferation of different conceptions of power and privilege in both countries, and to ways in which a parsing of them may facilitate an engagement with the arguments of far right movements while retaining the concept of social justice.

AMST 222 (F) Hip Hop Culture (DPE) (WS)
Cross-listings: ENGL 221 AFR 222 MUS 217 AMST 222

Primary Cross-listing

The course examines how young people of color created hip hop culture in the postindustrial ruins of New York City, a movement that would eventually grow into a global cultural industry. Hip hop music producers have long practiced “diggin’ in the crates”—a phrase that denotes searching through record collections to find material to sample. In this course, we will examine the material and technological history of hip hop culture, with particular attention to hip hop’s tendency to sample, remix, mash-up, and repurpose existing media artifacts to create new works or art. We will use a media archaeological approach to examine the precise material conditions that first gave rise to graffiti art, deejaying, rapping, and breakdancing, and to analyze hip hop songs, videos, and films. Media archaeology is a critical and artistic practice that seeks to interpret the layers of significance embedded in cultural artifacts. How does hip hop archaeology remix the past, the present, and the future? How do the historical, political, and cultural coding of hip hop artifacts change as they increasingly become part of institutional collections, from newly established hip hop archives at Cornell and Harvard to the Smithsonian National Museum of African American History and Culture?

Requirements/Evaluation: Four papers, project with presentation, and a final exam.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: AMST majors or prospective majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 221(D1) AFR 222(D2) MUS 217(D1) AMST 222(D2)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one’s thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to use an effective descriptive and critical vocabulary to discuss and analyze artifacts of hip hop culture, with attention to race, gender, class, sexuality, and other categories of social difference. They must understand the material, technological, historical, and cultural contexts that gave rise to hip hop culture, and proficiently synthesize scholarly perspectives related to the formation and transformations of hip hop from the early 70s to the early 21st cent.

In this course, we will engage aspects of Latinx religious experiences, practices, and expressions in the United States of America. Given the plurality of Latinx communities and religious lives in the U.S.A., we can only consider select contexts that help us understand the challenges of studying and defining the "religious" and "hybridity" in Latinx contexts. We will survey certain selected religious traditions and practices—such as popular Catholic devotions to Guadalupe, crypto-Judaism, curanderismo, Latinx Pentecostalism, Latinx Muslims, and Santeria, as well as Latinx approaches to traditional US religious expressions of Roman Catholicism and Protestantism. We will do so by focusing on particular moments of religious expression as elucidated in specific historiographies, ethnographies, art, literature, and film.

Class Format: discussion

Requirements/Evaluation: class participation, discussion forum posts, a 3-4 short essay on the nature of Latinx spirituality; a 5-page essay on a religious tradition previously unfamiliar to the student, and an 8-10-page final research paper doing comparative religious study.
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: LATS concentrators and AMST and REL majors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:

Spring 2024
LEC Section: 01 TR 11:20 am - 12:35 pm Efrain Agosto

AMST 225 Black Outside the U.S.
This course explores multiple ways Black identity evolves, adapts and is experienced differently depending on location. Students analyze Black experience in the U.S., France and Senegal through a range of texts from books and social media to music and film. One key aspect of the course is a study abroad trip to Senegal, which increases cultural awareness through experiential learning. This combination of textual learning with experiential knowledge exemplifies how language, religion, gender, geography, and performance shape one's racial identity. In the first section of the course, students investigate Black experience in the U.S., focusing on such topics as the one-drop rule, racial profiling and where mixed people fit within Black/White tensions. The second section highlights the politics of language in France. Students explore how words like "Black," "noir" and "race" have strong political connotations in France and spur both resistance to and alliance with Black American civil rights history. In the third part of the course, students visit Dakar, Senegal, and analyze Blackness through their own observations and encounters. Their trip insights jumpstart the final focus of the course on Senegal. Students investigate the influence of French colonialism on Black identity in Senegal, which makes the two geographical experiences of Blackness very different but still forever linked.

Class Format: seminar, the course includes a required spring break trip to Dakar, Senegal, which is no additional cost to students
Requirements/Evaluation: evaluation will be based on class participation, short weekly reading responses, two 4-5 page papers, a presentation based on the spring break trip, and a final presentation including a short 2-page report
Prerequisites: none

AMST 226 (S) Gender and the Dancing Body (DPE)
Cross-listings: THEA 226 DANC 226 WGSS 226 AMST 226
Secondary Cross-listing
This course posits that the dancing body is a particularly rich site for examining the history of gender and sexuality in America and beyond. The aim of the course is to explore ideas related to gender and sexuality as prescribed by dominant cultural, social, and religious institutions, and how dance has been used to challenge those normative ideologies. We will examine a wide range of dance genres, from stage performances to popular forms to dance on television, with particular attention to the intersections of race and class with gender. This is primarily a discussion-based seminar course and may also include film screenings, discussions with guest artists, and opportunities for creative projects. No previous dance experience required.
Requirements/Evaluation: participation in discussions and presentations, reading responses, in-class writing assignments, essays, and a final cumulative essay.
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: first years and sophomores
Expected Class Size: 10-15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
THEA 226(D1) DANC 226(D1) WGSS 226(D2) AMST 226(D2)

Difference, Power, and Equity Notes: In the course, students will explore the concept of gender as a social construction and how the body's historical associations to markers of gender and sexuality lead to differences in socio-political power. The assigned texts and viewings provide examples of how bodies and their movements make meaning in a network of power relationships, and how artists use dance to address social inequalities such as sexism, racism, and transmisogyny, to imagine a more just world.

SEM Section: 01 WF 11:00 am - 12:15 pm Munjulika R. Tarah

AMST 232 Bewilderment: Contemporary U.S. Poetry and the Ethics of Unknowing (DPE) (WS)

"I perceive I have not really understood any thing, not a single object, and that no man ever can," wrote Walt Whitman in a great poem of 1860. "Tell all the truth, but tell it slant," answered Emily Dickinson a few years later, as if suggesting a strategy for how to write one's way into Whitman's radical uncertainty. These articulations of knowing and unknowing, of telling and untelling, continue to thread their way into U.S. poetry today. This course will explore bewilderment as both a poetic strategy and an ethical position. How do error, randomness, contradiction, obliquity, and dissociation serve the poem and the poet? How do such strategies counter ideas of literary mastery, heroism, virtuosity, privilege and celebrity? What are the political possibilities of such counter stances, especially as embodied and expressed by poets who speak from outside the stronghold of the white male establishment? We will primarily read from recently published work in the U.S., but will also be interested to track the literary traditions that have shaped how contemporary poets think and write. Authors read may include: Wanda Coleman, Eileen Myles, Anne Carson, Layli Long Soldier, Vanessa Angelica Villarreal, Fanny Howe, Terrance Hayes, Jennifer Chang, Tiana Clark, Brenda Hillman, Jane Wong, Tommy Pico, Paisley Rekdahl, Brian Teare, Diana Khoi Nguyen, and C. D. Wright.

Requirements/Evaluation: Classroom participation in discussion, several papers of graduated lengths and complexity (for a total of 20 pages of writing).
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 19
Enrollment Preferences: potential sophomore English majors have first choice, then prospective or current American Studies majors
Expected Class Size: 19
Grading:
Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Gateway courses in English traditionally emphasize writing skills, and this course is no exception. Attention will paid to drafts and revisions of essays.

Difference, Power, and Equity Notes: The vast majority of works read are authored by poets outside the white male straight cisgender establishment. More importantly, we will constantly engage the question of how poetry may serve the needs of equity and inclusion in the U.S. contemporary literary marketplace.

Attributes: ENGL 200-level Gateway Courses

Not offered current academic year

AMST 233 (S) Memory and Forgetting (DPE)
Cross-listings: SOC 230 AMST 233

On the surface, remembering generally confronts us as a deeply personal act. What is more private than nostalgic reverie or the secrets of a dark and painful past? Yet even "individual" memories take shape through social frameworks, and we also remember "collectively" through shared myths,
narratives, traditions, and the like. This course will explore the social dimensions of memory and remembering as well as their inevitable counterpart—forgetting. How do social frameworks inform our individual understandings of the past and shape our sense of selfhood? How and why are figures from the past cast as heroes or villains? How do collectivities celebrate past glories, and how do they deal with shameful or embarrassing episodes? How do economic and political power relations shape struggles over the past? In an increasingly global society, can we speak of "cosmopolitan" or "transcultural" forms of memory? Topics will include autobiographical memory and self-identity; memorials, museums, and monuments; reputations, commemorations, and collective trauma; silence, denial, and forgetting; and transitional justice, official apologies, and reparations.

Requirements/Evaluation: thoughtful and consistent class participation; an autobiographical essay (4-5 pages); four response papers (2 pages each); and a research paper (8-10 pages) with class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: if overenrolled, students will be asked to submit a short statement of interest

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 230(D2) AMST 233(D2)

Difference, Power, and Equity Notes: This course pays particular attention to how power and inequality shape narratives about the past. We will examine and compare several efforts to transform national memories, such as the Equal Justice Initiative memorial in the United States and the Truth and Reconciliation Commission in South Africa. In doing so, we will also consider the role of memory and memorialization in broader processes of social change.

AMST 234 (F) Race, Land and Settler (Racial) Capitalism: Ongoing Topics in (Dis)/(Re)possession

Cross-listings: AMST 234 AFR 234 ENVI 247 HIST 274

Secondary Cross-listing

This sequential studio course serves as an introduction to ongoing topics in colonialism, racial thinking, African Diaspora studies, Global, Caribbean, and local studies. We will examine how race, gender and class operate under racial capitalism and settler colonialism. The readings in this class will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, Indigenous theorists, among other critical, anti-capitalist or decolonial scholars. Reading in this course will take up the question(s) of land and land-making; race, racialization, and racial thinking; alongside questions of space and place as they all relate to the various processes, projects and methods of (dis)(re)possession. This course is the first part of a complementary course, which will be offered in the Spring, titled, "Race, Land, Space and (Dis)(Re)possession: Critical Topics in Environmental Injustice and Subaltern Geographies," which tracks both the "historical breaks" and ongoing processes of (dis)(re)possession to more contemporary materializations. Weekly in-class discussion will be combined with guest lectures in order to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to also explain how a range of these territorializing processes operate in the transnational and local contexts. Those who take this studio course can expect to be actively engaged in directing their learning experience through research/final creative projects of their own selection. Sound, music and other audio engagements will also complement discussions in this course. Therefore, the capacity of deep listening, in-and-out of class, is mandatory. Sample topics covered in the course include the following: indigeneity and Blackness; dispossession and accumulation; environmental imperialism, war and colonial resistance. You are strongly encouraged to participate in both courses in this complementary sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: If the course is overenrolled, preference will be given to Africana studies concentrators.

Expected Class Size: 7
AMST 235  (S)  Race, Land, Dis/Re-possession: Critical Topics in Environmental Injustice and Subaltern Geographies

Secondary Cross-listing

This course is an introduction to ongoing and contemporary topics in colonialism, racial thinking, African Diaspora and, Global and Caribbean studies, studies of 'the environment,' and dispossession. We will examine how race, gender and class operate under racial capitalism and settler colonialism as ongoing, sometimes continuous and discontinuous processes. The readings will center the works of critical geographers, caribbeanist, scholars of the African Diaspora, and other critical, anti-capitalist or decolonial scholars. Readings, as in AFR 234, will take up the question(s) of land and land-making; race, racialization, and racial thinking; of space and place as they all relate to the various processes, projects and methods of (dis)(re)possession, both "past" and "contemporary." We will interrogate temporal binaries, settler time, notions of the "progress(ives)" and other bifurcated understandings of the world. This course is the second part of a complementary course, titled, "Race, Land and Settler (Racial) Capitalism," which focuses on the historical geography of processes of (dis)(re)possession from a Black and Indigenous Atlantic perspective. In this iteration, weekly in-class discussion will be combined with guest lectures to provide the opportunity for exploring how race, space and (dis)(re)possession can be understood geographically, and to explain how a range of these territorializing processes operate. Sound, music and other audio will complement discussions. Therefore, the capacity of deep listening, in-and-out of class, is a grounding. Sample topics covered in the course include: indigeneity and Blackness; (dis)possession and accumulation; plantation geographies and economies; housing and houselessness; the problem of parks and conservation; prisons and carceral geographies; Black geographies; environmental racism and colonial resistance. You are strongly encouraged to participate in both courses in this sequence, but are not required to do so.

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader Once 20%; Weekly 300-500-word Critical Response Papers 20%; One Final Creative Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More creative projects might include, a pamphlet or zine, a written play or theatrical performance, or an op-ed. We will discuss further possibilities in class. 30%

AMST 237  (F)  Islam in the United States: Race, Religion, Politics  (DPE)

Secondary Cross-listing

Malcolm X is one of the most iconic yet controversial figures in the black freedom struggle in the United States. He is also arguably the most prominent and influential Muslim in the history of the United States. His story and legacy powerfully illustrate the complex intersections of Muslim identity, political resistance, and national belonging. From the early period of "Black Muslim" movements represented by Malcolm X, to the current "War on Terror" era, American Muslims have faced a complex intersection of exclusions and marginalization, in relation to national belonging, race, and religion. Taking
Malcolm X as our point of departure, this course examines how American Muslims have navigated these multiple layers of marginalization. We will therefore consider how the broader socio-political contexts that Muslims are a part of shape their visions of Islam, and how they contest these competing visions among themselves. In so doing, we will examine the complex relation between religion, race, and politics in the United States. Throughout the course, we will be engaging with historical and anthropological material, autobiographies, documentaries, films, historical primary-source documents, music, and social media materials. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to ideology, race, nationality, ethnicity, culture, gender, and language.

Requirements/Evaluation: regular reading responses, 2 midterm essays, final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Majors and concentrators in REL, AFR, and AMST

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

AMST 240 (S) Latina/o/x Language Politics: Hybrid Voices

Cross-listings: COMP 210 LATS 240 AMST 240

Secondary Cross-listing

In this interdisciplinary course we will focus on issues of language and identity in the contemporary cultural production and lived experience of various Latina/o/x communities. As such, how are cultural values and material conditions expressed through Latina/o/x language and literature? How does Latina/o/x identity challenge traditional notions of the relationship between language, culture, and nation? In what ways might Latina/o/x literary and linguistic practices serve as tools for social change? Departing from an overview of common linguistic ideologies, we will examine code-switching or Spanglish, bilingual education, linguistic public policy, the English Only movement, and Latina/o/x linguistic attitudes and creative responses. In addition to a consideration of language and identity grounded in sociolinguistics, anthropolitical linguistics, Latinx studies, and cultural studies, we will survey a variety of literary genres including memoir, novel, and poetry. Both directly and/or indirectly, these texts address Latina/o/x language politics, as well as the broader themes of power, community, ethno-racial identity, gender, sexuality, class, and hybridity.

Requirements/Evaluation: participation, two essays, final written reflection

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, Comparative Literature majors by seniority

AMST 242 (S) Americans Abroad (DPE)

Cross-listings: ENGL 250 GBST 242 AMST 242 COMP 242

Secondary Cross-listing

This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war, peace, and pandemic. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler's expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? How did recent lockdowns and border closings impact and/or interrupt these complex experiences? Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their (and our) concept of "home" into something that reflects individual identity, and not one imposed by any national culture--American or foreign.

Requirements/Evaluation: each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student's own experiences

Prerequisites: any literature course at Williams or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Comparative Literature, English or American Studies majors, and/or students who have studied away or plan on doing so.

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 250(D1) GBST 242(D1) AMST 242(D1) COMP 242(D1)

Difference, Power, and Equity Notes: We will read and analyze primary materials and literature that reflect on Americans who chose, or were forced to, reinvent themselves abroad to escape oppressive situations in the United States related to gender, class, race, or political views. The socio-historical context of each writer will be crucial to understanding their situations. Students will write critical papers, and their own narrative in which they reflect on a situation of personal dislocation, either while traveling, or at home.

AMST 244 (F) What They Saw in America

Cross-listings: HIST 366 AMST 244 SOC 244

Secondary Cross-listing

This course traces the travels and writings of four important observers of the United States: Alexis de Tocqueville, Max Weber, G.K. Chesterton, and Sayyid Qutb. The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider's view of America--one that sheds light on persistent qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors' respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race.

Requirements/Evaluation: A midterm examination, two short essays, and a final paper.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Priority given to Sociology, History, Anthropology, and American Studies majors.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Cross-listings: AMST 245 ENVI 246 HIST 265

Secondary Cross-listing
Have you ever wondered why Spam is so popular in Hawaii and why Thai food is available all across the United States? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging into the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of obesity discourse. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, health, and gender.

Requirements/Evaluation: two to three papers on assigned topics (4-6 pages); one longer final paper (8-10 pages); participation in discussion and online activities

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; American Studies majors; Public Health concentrators; history majors

AMST 247 (S) Cities, Suburbs, and Rural Places (DPE)

Cross-listings: ENVI 257 AMST 247 LATS 230

Secondary Cross-listing
Long associated with cities in the scholarly and popular imagination, immigrants have increasingly settled in U.S. suburbs. Through the lens of new destinations for im/migrants, this course introduces spatial methods, perspectives, and concepts to understand cities, suburbs, and rural places and the relationships between these various spaces. We ask how geographically specific forces and actors shape these trends, as well as the spatially uneven outcomes of complex processes like globalization. This interdisciplinary course highlights racial, legal, economic, political, environmental, social, and cultural dimensions of how transnational migrants become part of and create homes in new places. Through a range of textual materials (academic, technical, popular, visual), we explore why people migrate, the origin of the "illegal alien" figure, economic restructuring and local
immigration policies, environmental justice, place-making and community development. Rooted in critical race geographies, case studies are often comparative across different racial and ethnic groups in the U.S. West, South, Midwest, and Northeast. We analyze how documentation status and perceptions of illegality affect the lived experiences of Latines. This course will be mostly discussion-based, with grading based on participation, short writing exercises, three assignments, a midterm examination, and a final exam.

Class Format: This is also a discussion course. While I will spend some time at the beginning of the class lecturing, most of the time will be spent in class discussions.

Requirements/Evaluation: Class participation, weekly in-class writing, three 3-6 page essays, a midterm, and a final examination. All writing materials and exams are based on coursework.

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: LATS concentrators or those intending to become LATS concentrators

AMST 249 (F) Asian American Performance: Activism and Aesthetics (DPE)

Cross-listings: THEA 246 GBST 246 AMST 249

Secondary Cross-listing

This seminar will explore contemporary Asian American plays, stand-up comedy, performance art, and spoken word with an eye to how artists do politics through their cultural labor. We will begin with a brief survey of images from popular media to identify legacies of Orientalism. From here we will move towards examining the ways in which Asian American artists from various eras subvert stereotypes and pursue projects of social justice. In watching performances and reading scripts, essays, and interviews, we will attend to narratives, acting methods, theatrical design, spectatorship, and the political economy of cultural production that shapes how Asian American artists make and show work. In addition, we will explore how artists stake political claims in the public sphere through teaching and community organizing.

Requirements/Evaluation: two 5-page critical essays, reading responses, class presentations, and active discussion participation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: sophomores, juniors, and seniors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
THEA 246(D1) GBST 246(D1) AMST 249(D1)

Difference, Power, and Equity Notes: Course fosters critical engagement with artistic practices that seek to address the concerns of populations in the US who have historically had unequal access to resources and audiences for representing themselves and their political concerns. Students will ask questions about how Asian American artists address legacies of Orientalism, as well as how they facilitate community engagement and approach projects of social justice.
AMST 250  (S) Penning the Path: Writing and Publishing Black Studies

Cross-listings:  AFR 249 AMST 250

Secondary Cross-listing

Since the mid-20th century, Black intellectuals from Africa and the Diaspora have founded seminal journals within and beyond academic boundaries. Despite being separated by global distances and different contexts, these initiatives have decisively contributed to the emergence and consolidation of Black and Pan-African studies. Presence Africaine, founded in Paris in 1947 by Senegalese intellectual Alioune Diop; Quilombo, first published in 1948 by the Afro-Brazilian intellectual Abdias do Nascimento; and The Black Scholar, founded in California in 1969 by Robert Chrisman, Nathan Hare, and Allan Ross are just a few groundbreaking examples. From this global perspective, students will explore these and other cornerstone journals which paved the way for the emergence of Black and Pan-African Studies in the US and abroad. Additionally, the course aims to encourage students to be part of a collective effort to relaunch Kaleidoscopes: Diaspora Re-imagined, a student led-journal created in 2014 in the Africana Studies Department by Sevonna Brown ('15), Ahmad Greene-Hayes ('16), and Nneka Dennie ('13). Students will receive guidance and mentoring to conceive and write articles, essays, audiovisual creations, and interviews with students and intellectuals from the African continent and the Diaspora in the Americas and the Caribbean.

Class Format: Students will be required to develop and give a class presentation focused on pioneering Black Studies journals.

Requirements/Evaluation: Class participation and attendance (asking questions and leading discussions); weekly e-reading response papers (300-500 words); formal class presentation (individually or in groups); final projects (such as essays, papers, interviews, and audiovisual creations) aimed to be published in the new edition of Kaleidoscopes: Diaspora Re-imagined (Spring 2024).

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Students interested in expanding their knowledge and skills in writing and publishing, focusing on Black Studies/Africana journals. Should the course be overenrolled, preference will be given to Africana Studies students.

Expected Class Size: 10-15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

AMST 252  (S) Im/mobilities  (DPE)  (WS)

Cross-listings:  AMST 252 SOC 252

Secondary Cross-listing

We think of the freedom to move as a mark of privilege. In the United States, passing a driving test, owning a car, and getting a passport are milestones that signal modernity and freedom. Likewise, we think of restrictions on movement as the domain of the underprivileged, such as the current and formerly incarcerated. But as the Covid-19 pandemic reveals, there have always been two sides to immobility: privileged as well as involuntary immobility. There are correspondingly two sides to mobility: those who move because they want to and others because they have no choice. In this class, students will explore conceptions of mobility as adventurous, free, and modern (as with jet-setting international elites). They will compare and contrast when mobility can be threatening, exclusionary, and limited (as recognized by the Black Lives Matter movement). This class invites students to interpret their environment through the lens of mobility and inequality in the time of coronavirus. Drawing on sociology, anthropology, cultural studies, geography, and migration studies, this interdisciplinary course offers a beginning conversation on the causes and consequences of the freedom to move—or to stay still.

Requirements/Evaluation: Thoughtful and consistent class participation, several short reflection papers, two drafts of an opinion essay, class presentation
Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: Given to first-year students and sophomores
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 252(D2) SOC 252(D2)

Writing Skills Notes: Emphasis on the processes of writing and revising, several short papers on which students will receive close feedback, and drafts of a final paper

Difference, Power, and Equity Notes: This course explores a politics of im/mobilities: how we move through space through different bodies at the intersection of race, class, gender, ability, and citizenship. Students will use their own bodies as research sites for deepening their understanding of how we navigate the freedom to move or stay still.

Not offered current academic year

AMST 253  (F)  Embodied Knowledges: Latinx, Asian American, and Black American Writing on Invisible Disability  (DPE)

Cross-listings:  AAS 253 LATS 254 AMST 253

Secondary Cross-listing

This interdisciplinary course assumes an expansive approach towards disability, defining it not exclusively as a legible identity that one can lay claim to, but rather as an identity grounded in one’s relationship to power (Kim and Schalk, 2020). This course centers on the critical role of lived experience as a key site of everyday theorization for the multiply marginalized, and specifically on the ways in which invisibly disabled Latinx, Asian American, and Black American individuals write the self. As scholars in disability studies argue, self-representations of disabled individuals carry the potential for us as a society to move beyond the binary narratives of “tragedy or inspiration” so often associated with disability. Rather, the self-produced narratives of US disabled writers of color offer a much more nuanced portrayal of everyday life with disability/ies for the multiply marginalized. Much like invisible disability itself, these self-representations ultimately refute traditional depictions of disability, and underscore the ways in which the bodymind serves as a rich, albeit often overlooked, site of knowledge. Embodied Knowledges draws on the insights of disability studies, crip studies, anthropology, literary studies, medicine, psychology, education, cultural studies, ethnic studies, American studies, gender and sexuality studies, sociology, and trauma studies. We will examine the works of Latinx, Asian American, and Black American writers and scholars others in relationship to one another, and as points of departure for examining issues such as the relationship between immigration and disability; intergenerational trauma; the impacts of paradigms such as the Model Minority Myth and notions of cultural deficit; passing; the politics of disability disclosure, the paradoxes of invisible disability; invisible disability in academic spaces; the role of culture and categories of difference such as race, gender, class and immigration status in societal approaches to and understandings of invisible disability; and future visions in the realm of disability justice and care work.

Requirements/Evaluation: Two 5-6 page essays; One group question assignment; Final reflection document
Prerequisites: None.
Enrollment Limit: 12
Enrollment Preferences: Preference given to majors or concentrators in LATS, AMST, and AAST, in order of seniority.
Expected Class Size: 12
Grading: yes pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AAS 253(D2) LATS 254(D2) AMST 253(D2)

Difference, Power, and Equity Notes: This course takes up issues of difference and power in every one of its readings and materials. In particular, we examine the intersection of race, ethnicity, dis/ability, gender, sexuality and nation in our discussions of how disability helps to define our understanding of US identity and citizenship, particularly for US communities of color.

AMST 254 (F) Sovereignty, Resistance, and Resilience: Native American Histories to 1865  (DPE)

Cross-listings: LEAD 254 AMST 254 HIST 254

Secondary Cross-listing

This course surveys Native American/Indigenous North American histories from beginnings through the mid-nineteenth century, tracing the complex ways that sovereign tribal nations and communities have shaped Turtle Island/North America. Equally important, it reckons with the ongoing effects of these pasts in the twenty-first century, and communities' own forms of interpretation, critique, action, and pursuits of justice. It also introduces foundational methodologies in Native American and Indigenous Studies (NAIS) and strategies for pursuing decolonizing scholarship and action. Emphasis is on primary and secondary works produced by Indigenous authors/creators. Starting with the diversity of Indigenous societies that have inhabited and cared for lands and waters since "time out of mind," it foregrounds the complexity of Native peoples, nations, and worldviews situated in particular homelands, as well as accounts of origins and migrations. It addresses how societies confronted devastating epidemics resulting from the "Columbian Exchange," and contended with Euro-colonial processes of colonization, extraction, and enslavement. Indigenous nations' multifaceted efforts to maintain sovereignty and homelands through pervasive violence, attempted genocide, and dispossession are addressed, as well as forms of relations and kinship with African-American and Afro-Indigenous people. It concludes with how different communities negotiated the tumultuous eras of the American Revolution, forced removal in the 1830s, and Civil War, and created pathways for endurance, self-determination, and security in its aftermath. The course centers on Indigenous actors--intellectuals, diplomats, legal strategists, knowledge keepers, spiritual leaders, artists, and many others--and consistently connects historical events with present-day matters of land, historical memory, education, caretaking, and activism. Additionally, it provides an opportunity to engage with original materials in the Williams College Archives/Special Collections and Art Museum. While the scope of the course is continental and transoceanic, it devotes significant attention to the Native Northeast and the Stockbridge-Munsee Mohican homelands in which Williams College is located.

Class Format: Lecture with small- and whole-group discussions

Requirements/Evaluation: Attendance at lectures, active participation in class discussion, midterm exam, short essays based on readings and discussion topics, museum/archives exercise, final essay/project.

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History and American Studies majors, followed by first- and second-year students

Expected Class Size: 30-40

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
LEAD 254(D2) AMST 254(D2) HIST 254(D2)

Difference, Power, and Equity Notes: This course intensively explores Native American/Indigenous North American histories, experiences, and forms of critical and creative expression, as well as responses to and engagements with Euro-American settler colonialism. It guides students into methodologies central to Native American and Indigenous Studies (NAIS), and gives opportunities for oral and written reflections on NAIS approaches to historical themes and sources, as well as decolonizing methodologies more broadly.

Attributes: HIST Group F Electives - U.S. + Canada HIST Group P Electives - Premodern

AMST 260 (F) Indigenous Feminisms  (DPE)

Cross-listings: AMST 260 WGSS 262

Primary Cross-listing

Indigenous women, Two Spirit and trans people have always stood on the frontlines of decolonization struggles in the Americas, from treaty negotiations to self defense against settler invasion, to the Standing Rock Sioux struggle against the Dakota Access Pipeline, to creating independent databases and mutual support networks amongst the loved ones of Missing and Murdered Indigenous Women, Girls, Trans and Two Spirit people.
This course maps out some of the intellectual and political interventions of Indigenous feminists in analyzing and struggling against genocide, heteropatriarchy, conquest and racial capitalism in settler states like the US and Canada. This course will focus on how Indigenous women, Two Spirit and trans people have analyzed and struggled against the imposition of colonial constructs of gender and sexuality that mark Indigenous lives and lands as sites of extraction. It will examine how carceral regimes of control produced by the intertwined histories of conquest and Transatlantic slavery have been imposed upon Indigenous lives through the child protection system and the prison industrial complex. Students will be invited to consider how Indigenous feminist practices ‘make a future’ (Brant 1981) against and beyond the settler state. This course aims to familiarize students with historical and contemporary Indigenous feminist works, as well as provide an overview of Indigenous feminist political formations, poetry, fiction, and making practices. Pedagogically, this course will also facilitate the development and sharpening of skills in social analysis, writing and argumentation.

Requirements/Evaluation: Three one page reading responses, 30%; One two-page critical peer response 10%; One Final paper, 50%; Course participation and attendance 10%

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: American Studies majors or potential majors have first preference, WGSS majors have next priority.

AMST 267 (F) The Roaring Twenties and the Rough Thirties

Cross-listings: HIST 266 AMST 267
This course will probe the domestic history of the U.S. from 1919 to 1939 and the cultural, economic, political, and social changes accompanying America's evolution into a modern society. Themes include: developments in work, leisure, and consumption; impact of depression on the organization of the public and private sectors; persistence of traditional values such as individualism and the success ethos in shaping responses to change; and the evolving diversity of America and the American experience.

Requirements/Evaluation: Students will be graded on class participation and will have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two short response papers and will complete an interpretative essay (5-7 pages) focused on art from the WPA Federal Art Project.

Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: HIST and AMST majors as well as students with demonstrated interest in the material

AMST 275  (S)  American Drama: Hidden Knowledge  (WS)

The Buddha is said to have identified three things that cannot stay hidden: the sun, the moon, and the truth. What's the secret? Who is lying? Who is breaking the rules? American drama abounds with hidden knowledge and false representations. (This is not surprising: theatre is always on some level a deceptive practice, a place where one person pretends to be another, and where what is spoken is always open to skeptical scrutiny. We might say theatre is always lying as much as lying is always theatre.) This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty-first. Beginning with excerpted critical and historical writings on secrecy and lying (The Adventures of Pinocchio, Machiavelli's The Prince, Thomas Carlson's Lying and Deception: Theory and Practice, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Eugene O'Neill, Edward Albee, Sarah Ruhl, Arthur Miller, Amy Herzog, Susan Glaspell, Sophie Treadwell, Annie Baker, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what can we learn in particular from American drama about a national relationship to honesty and its opposites.

Requirements/Evaluation: weekly papers/response papers; weekly meeting with instructor and tutorial partner

Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Theatre and English majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)

Writing Skills Notes: Weekly papers will prompt extensive commentary. The amount of writing in the course will be substantial and well spaced, followed by timely evaluation and suggestions for improvement. The course requires multiple assignments, each returned with comments which address writing problems and strategies, as appropriate. Student will receive guidance on structure, style, argumentation, and other significant aspects of writing throughout the semester.

AMST 283  (F)  Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: AMST 283 AFR 283 WGSS 283 ENGL 286

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental,
documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as *Looking for Langston* (Isaac Julien, 1989), *The Watermelon Woman* (Cheryl Dunye, 1996), *U People* (Olive Demetrius and Hanifah Walidah, 2009), *Tongues Untied* (Marlon Riggs, 1989) and *Litany for Survival* (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

**Requirements/Evaluation:** facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** Women's, Gender and Sexuality Studies majors, then Africana Studies concentrators

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

**AMST 299 (F) Let the Record Show: U.S., Literature of Research and Witness**  (DPE) (WS)

**Cross-listings:** AMST 299 ENGL 299

**Primary Cross-listing**

This is a course on the literature of research and witness in the U.S., from 1853 to the present. We will train our attention on works of long form journalism that stand at the intersection of reportage, archival history, documentary nonfiction, narrative and activism. The writers we study present quantitative and qualitative data that document the existence and effects of systemic racism, xenophobia, sexism, homophobia and uneven economic development. How have American writers defied disciplinary boundaries to speak truth to power? What critical reading skills are mobilized by books of sweeping scope and unflinching detail? The course will be taught in reverse chronological order. Readings include: Sarah Schulman, *Let the Record Show;* Layli Long Soldier, *Whereas*; Nicholas Lemann, *The Promised Land;* Theresa Hak Kyung Cha, *Dictee;* James Agee, *Let Us Now Praise Famous Men;* Tillie Olsen, *Yonnondio;* Ida B. Wells, *A Red Record;* and Harriet Beecher Stowe, *Key to Uncle Tom's Cabin.*

**Requirements/Evaluation:** Evaluation will be based on class participation, writing and discussion. According to the tutorial format, you will be assigned a semester-long partner. You will be expected to write a critical paper every other week, alternating with the critical response to your partner's work.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** This is a tutorial for sophomores. Priority will be given to potential American Studies majors, especially those who have taken AMST101; potential English majors will be considered as space is available.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 299(D2) ENGL 299(D1)

**Writing Skills Notes:** As per traditional tutorial format, this course will be writing intensive. Every week, one student will write a 5-page paper responding to the readings of the week; the other student will craft a response (a combination of written notes and critical conversation). The total amount of writing for each student will thus be upwards of 30 pages. there will be considerable attention given to argument, use of evidence, etc. The option to revise a paper will always be available.

**Difference, Power, and Equity Notes:** This course shares the core mission of the DPE initiative: to teach students how to "analyze the shaping of
social differences, dynamics of unequal power, and processes of change." The course is built around U.S. texts that speak truth to power. Researching and exposing the quantitative and qualitative data that prove the existence and effects of systemic racism, xenophobia, sexism, homophobia and uneven economic development, the writers we will study merge research, writing and activism.

AMST 300 (F) Re/Generations I: Memory Against Forgetting and the Global American Empire (DPE)

Cross-listings: COMP 357 AMST 300 ENGL 300

Primary Cross-listing

This is a two-part junior seminar in which we take an expansive approach to memoir as a form, genre, and practice, with specific attention given to texts reckoning with the traumas, transgressions, and transformations of what we understand as "America" and its many discontents. In this first part, we focus on authors charting the lives and afterlives of chattel slavery, settler colonialism, genocide, war, and the expansion of the global American empire, from the 19th through 20th centuries. How do these authors remediate the critical (il)legibility of personhood and place, community and nation? What myths must be dispelled and/or rewritten? What structural elements are deployed to tackle the obstacles of hegemonic power and historical amnesia, and how do these authors re/generate "what remains of lost histories and histories of loss" (Eng and Kazanjian)? Texts to be considered may include: Narrative of the Life of Frederick Douglass, an American Slave; Hawaii's Story by Hawaii's Queen (Lili'oukalani); Notes of a Native Son (James Baldwin); Borderlands/La Frontera (Gloria Anzaldúa); Dictee (Theresa Hak Kyung Cha).

Requirements/Evaluation: weekly reading responses, midtern and final papers

Prerequisites: American Studies 101 and/or 301, previous coursework in race, ethnicity, and diaspora, junior or senior standing, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: American Studies majors

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 357(D2) AMST 300(D2) ENGL 300(D2)

Difference, Power, and Equity Notes: Analyzes the dynamics of power and privilege in the U.S. from a national and transnational context, examines the perspectives of socially marginalized groups, and fosters an understanding of the beliefs, experiences, and cultural productions of these groups.

Attributes: AMST Arts in Context Electives

Not offered current academic year

AMST 301 (S) Theories and Methods in American Studies (Junior Seminar)

This seminar serves as an introduction to theories, methods, sources, and approaches for interdisciplinary research and creativity in and through the interdisciplinary field of American Studies. We will study diverse ways of "doing" American Studies work (including but not limited to visual studies, ethnography, literary studies, theory, or museum studies) and how this work speaks to various intellectual and political priorities within the field. Through readings, discussions, and unit assignments, students will not only deepen their knowledge of American Studies but will also have concrete opportunities to research, explore, experiment, construct arguments, and play. In the process, students will gain a working competence in all four tracks of the major (Space and Place; Comparative Studies in Race, Ethnicity, and Diaspora; Arts in Context; and Critical and Cultural Theory). Topics in the course may include environmental justice, racial formation, social movements, the prison industrial complex, infrastructure, or the aesthetics and form of minority literature.

Requirements/Evaluation: Class participation; four unit assignments (media projects, 7-10-min oral presentations, or 3-5 page papers); a final project building on an earlier assignment

Prerequisites: AMST 101/201 Intro to American Studies, junior or senior standing, or permission of instructor

Enrollment Limit: 15
Enrollment Preferences: Juniors majoring in American Studies; Senior American Studies majors needing the course to graduate

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Required of junior majors in American Studies

Distributions: (D2)

AMST 303  (S)  Feminist Disability Studies: Bodyminds in Place and Space  (DPE)

Cross-listings: AMST 303 WGSS 309

Secondary Cross-listing

In this course we will engage anti-racist feminist theory, disability (or 'crip') theory, and human geography to think critically about disability. We will draw on critical geographies of disability to understand the built environment and institutional design; geographic scales of the body and the bodymind; spaces of the home and institutions; and im/mobility and spatial access. We will also consider how disability is shaped by (and shapes) practices of care and mutual aid; experiences of embodiment and impairment; and structures of vulnerability and agency. The course will trace, historically, how ableism has been produced through slavery, colonization, surveillance, and incarceration as well as through movements like eugenics and white liberal feminism. The course will also analyze disability's construction through medicalized notions of wellness, illness, pathology, and cure. Throughout the course, we will consider disability as intersecting with gender, race and ethnicity, queerness, trans*ness, fatness, class, nationality, and citizenship. Most centrally, we will ask: What is the spatiality of dis/ability, and how can space be occupied and reappropriated for radically inclusive uses? How can we understand both normality and deviance as socially constructed concepts that nonetheless have real, and uneven, implications for people's lives?

Class Format: This class will be taught online only.

Requirements/Evaluation: Student participation; two short (2-pg) reflection papers; two longer (4-5-pg) papers; and a final (12-15 pg) research paper

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: WGSS and AMST majors; permission of instructor

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 303(D2) WGSS 309(D2)

Difference, Power, and Equity Notes: This course satisfies the DPE requirement because it examines the political, social, and ideological constructions and theorizations of difference, power, and equity. The course explores the ways in which disability is mutually constructed with other axes of identity and difference, and how different groups of people have defined (and redefined) disability to meet various political aims.

AMST 305  (F)  The Gay Menagerie: Gay Male Subcultures  (DPE)

Cross-listings: THEA 304 ANTH 305 AMST 305 WGSS 305

Secondary Cross-listing

Bears. Cubs. Otters. Pups. Twinks. Radical Fairies. Leathermen. Mollies. Drag queens. Dandies. Sisters of Perpetual Indulgence. Gay men, including gay trans men, have organized themselves into various subcultures within their community for centuries. This seminar is devoted to exploring these subcultures in (a mostly US-context) in greater detail using ethnographic texts, anthropological studies, historical accounts (including oral histories), and media. Topics include cruising and flagging, the anthropological significance of gay bars, histories of bath house culture, rural vs urban queer experiences, the ball scene, drag, diva worship, the reclamation of "fabulousness and faggotry," the leadership roles of trans women and effeminate
gay men in activist movements, gay gentrification, the growth of gay consumerism/ gay tourism/homonationalism, hierarchies of masculinity in the gay community (i.e., masc for masc culture), HIV/AIDS and the politics of PrEP, chemsex, the role of racialized dating “preferences,” genealogies of BDSM and leather culture, sexual health and discourses of “risk,” the politics of barebacking and other sexual practices, queering consent, and the effects of hookup apps on gay culture. In addition to lectures, and discussions, there will also be some low-key performance-studies based exercises in queer praxis (e.g., drag workshops, mock debates, animal improvisation, role playing, etc.)

**Class Format:** There will be some minor performance elements such as workshops during class.

**Requirements/Evaluation:** Quizzes, journaling assignment, short diva report, 10 page research paper on a gay subcultural group

**Prerequisites:** None; WGSS 202 (Foundations in Sexuality Studies) will be helpful but is not required

**Enrollment Limit:** 12

**Enrollment Preferences:** WGSS majors; in the event of over-enrollment there statements of interest will be solicited

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)  
**This course is cross-listed and the prefixes carry the following divisional credit:**  
THEA 304(D2) ANTH 305(D2) AMST 305(D2) WGSS 305(D2)

**Difference, Power, and Equity Notes:** This course examines the how marginalized communities respond to their oppression through creative forms. It takes as central to its curriculum the role of sexual diversity and the relationship of the gay community to power through the central idiom of "difference.”

Not offered current academic year

**AMST 306 (S) Building Power: Race and American Architecture** (DPE)

**Cross-listings:** ARTH 306 AAS 306 AMST 306

**Primary Cross-listing**

This course explores the many ways race is constructed through American architecture. We will survey different methodologies for linking architecture and race, including uncovering the history of buildings in the nation's capital, analyzing public housing and "domestic war," and theorizing how racial difference and racialized power -- including white supremacy -- are implicated within modern architectural theory. Our readings will be drawn from Asian American, Latinx, and Black studies, as well as architectural history, art history, and urban studies. Together we will attempt to answer several questions about racialized architecture, such as why Asianness has often been associated with domestic interiors, how Blackness is coded in particular built forms, such as skyscrapers, and how architects and planners deploy the visual language of the Latinx barrio to mitigate anti-immigrant fear. We will also explore how BIPOC artists, architects, writers, and scholars engage architecture as a standpoint of critique, pushing back against the racialization of architecture and offer alternative or new ways of thinking about structures and space. While foregrounding race, the course will necessarily require intersectional thinking in relation (but not limited) to class, gender, citizenship, and ability.

**Requirements/Evaluation:** Students will be evaluated on response papers, discussion questions, and a final research project on an architectural object, theory, or style.

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** First- and second-year students

**Expected Class Size:** 10-15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)  
**This course is cross-listed and the prefixes carry the following divisional credit:**  
ARTH 306(D1) AAS 306(D2) AMST 306(D2)

**Difference, Power, and Equity Notes:** The course examines how the production of racial categories and the maintenance of racial hierarchy and difference works through built forms, architectural style, and architectural theory. Students will see how buildings maintain social power, as well as how writers, architects, artists, and scholars use the architectural imagination to grapple with questions of racialized exclusion, dispossession, and crisis.

AMST 310 (S) "A language to hear myself": Advanced Studies in Feminist Poetry and Poetics (DPE)

Cross-listings: ENGL 302 WGSS 330 AMST 310

Secondary Cross-listing

The title of this course comes from Adrienne Rich’s 1969 poem "Tear Gas," grounding our study in 1960s, 70s, and 80s feminist activist poetry but also in our current moment to answer a fundamental question: what can poetry do for us? In this period, feminist activist poets were at the center of a revolutionary social justice movement that changed the world. Feminist presses published much of the new poetry. This course focuses on the theory and practice of feminist poetry and print culture during this period, and how feminist experiments in language changed how we understand American poetry. We focus on the theoretical writings and poetry chapbooks of a diverse group of poets who powered the movement, including Audre Lorde, Mitsuye Yamada, Nelly Wong, Robin Morgan, June Jordan, Joy Harjo, Gloria Anzaldúa, Sonia Sanchez, Adrienne Rich, Judy Grahn, and Pat Parker. We also read the work of some later feminist theorists, such as Sara Ahmed. We spend time in the archives, analyzing documents from the period, including feminist magazines and original publications of poetry chapbooks often published by the period’s many feminist presses and consider how such attention allows us to construct alternative narratives for feminism and American poetry. Writing at the intersections of race, class, gender, and sexuality, and of multiple social justice movements (Civil Rights, anti-Vietnam War, LGBTQ activism, and Black Power), these poets gave us a new language to "hear," not only ourselves, but the experience and pain of others, and, in so doing, they moved personal experience into public discourse around issues of inequality and human flourishing in a democratic society.

Requirements/Evaluation: short analysis papers (4-5 pages), creative (1-2 pages), Perusall annotations, longer final researched paper (10-12 pages) or alternative digital project, curated exhibition of archival materials in Special Collections

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor
Enrollment Limit: 25
Enrollment Preferences: English, Women's, Gender, and Sexuality Studies, American Studies majors
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 302(D1) WGSS 330(D1) AMST 310(D1)

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the feminist movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the period.

AMST 311 Four Poets: Gwendolyn Brooks, Frank O'Hara, Sylvia Plath, and Amiri Baraka

The study of literature often relies on seemingly "objective" labels to sort and group writers. These four major American poets from the last century were often segregated into different categories: Gwendolyn Brooks (1917-2000) and Amiri Baraka (1934-2014) clumped together as black poets; Sylvia Plath (1932-1963) labelled a "Confessional Poet" and/or taught as a female poet but not a "white poet"; Frank O'Hara (1926-1966), designated a "New York School" poet but not a "white poet" or "male poet." In looking closely at the poetry of these four writers, whose work is usually not taught side by side, we will ask questions about the assumptions implicit in the concepts and categories of American (and English-language) poetics and how literary history usually gets written. For example, who is the presumed "universal" poetic speaker? Who is the assumed reader? Do our attitudes about raced and gendered bodies influence how we read raced and gendered poets? Is a queer poet read with the same particularity as a black poet?

Requirements/Evaluation: Two short papers (4-5 pp.) = 25%; One final paper (8-10 pp.) = 50%; Two short response papers = 15%; Participation = 10%

AMST 312 (S) Contemporary Immigration Landscapes: Producing Difference and Value in Migration

Cross-listings: WGSS 321 LATS 335 AMST 312

Secondary Cross-listing

What is the relationship between racial formations, transnational migrations, and power? How do geometries of power shape our relationship to place? This course examines geographies of transnational migration, bringing together insights from critical race theory, queer theory, Indigenous studies, and postcolonial theories to enrich our understanding of human geography. We will look at the use of ethnic and racial formations as a bridge between cultural and political geography in the contemporary US immigration landscape. Through an interdisciplinary exploration of 'migration,' we will examine the depth and range of migrants' experiences and how these communities' lives are structured through various axes of difference, such as race, gender, sexuality, class, and documentation status. We will consider how gender and sexuality structure racial formations and determine notions of value. We will give attention to the variegated landscape of immigration enforcement and its relationship to issues of labor, political economy, and environmental justice, among others. Through materials that embrace both historical and contemporary perspectives, this course will help students develop a critical understanding of how space matters when considering transnational processes of migration as well as migrant communities' cultural place-making practices throughout the US. This course asks students to compare and contrast the intellectual genealogies covered and apply these theories of transnational racial formations to case studies that focus on political interventions for social justice (such as UndocuQueers in the immigrant justice movement).
**Requirements/Evaluation:** Class Participation (20%): Preparation for, and active participation in, class discussions. Short writing assignments weekly around class readings. Pair share (10%): Two engage class with thoughts for one 30 minute class segment. Essays (20% each): Two 4-5 page essays. Final Paper (30%): An examination of the articulation of Latinx migrations and belonging in a case study that interrogates and builds on a major course theme, approximately 12 pages double-spaced, plus references / endnotes / images.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** LATS concentrators or those intending to concentrate

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Cross-listings:** AFR 326 AAS 313 WGSS 313 AMST 313 LATS 313

**Secondary Cross-listing**

This course focuses on the politics of personal style among women of color in the digital era. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno-racial identity, neoliberal capitalism and class inform standards of beauty and ideas about the body, we will examine a variety of materials including commercial websites, podcasts, histories, personal narratives, ethnographies, and sociological case studies. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions among others: What are some of the everyday functions of personal style among women of color in the US and globally? How do Latina/x, Black, Arab American and Asian American female aesthetics reflect the specific circumstances of their creation? What role do transnational media and popular culture play in the development and circulation of gendered and raced aesthetic forms? How might the belief in personal style as activist strategy complicate traditional understandings of feminist political activity?

**Requirements/Evaluation:** participation, one student-led discussion period, two written essays of 5-7 pages, final written reflection.

**Prerequisites:** LATS 105, AMST 201, AFR 200, WGSS 101 or permission of instructor; first year students are not permitted to take this course.

**Enrollment Limit:** 12

**Enrollment Preferences:** Latina/o Studies concentrators, American Studies majors, Africana Studies majors, and Women's, Gender and Sexuality Studies majors by seniority. If the class is overenrolled students may be asked to submit a brief writing sample.

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**AMST 317 (F) Black Migrations: African American Performance at Home and Abroad**
Cross-listings: THEA 317 COMP 319 AMST 317 DANC 317 ENGL 317 AFR 317

Secondary Cross-listing

In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

Class Format: discussion

Requirements/Evaluation: class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: Africana Studies majors and concentrators; Dance and Theatre majors; American Studies, Comparative Literature, and English majors

AMST 318 (S) Myths and the Making of Latine California (WS)

Cross-listings: REL 318 COMP 328 AMST 318 LATS 318 ENVI 318

Secondary Cross-listing

California is home not only to the largest ethnic Mexican population in the USA but also to the largest Central American population, while also being home to long-standing Latine communities hailing from Chile to Cuba. Since the era of Spanish colonization, especially starting in 1769, California has been woven into fantastic imaginations among many peoples in the Americas. Whether imagined as Paradise or Hell, as environmental disaster or agricultural wonderland, as a land of all nations or a land of multiracial enmity, many myths have been inscribed onto and pursued within the space we call California. In a state whose name comes from an early modern Spanish novel, how did certain narratives of California come to be, who has imagined California in certain ways, and why? What impact have these myths had on different Latine populations in the history of California, and how have different Latines shaped, contested, and remade these myths as well as the California landscape that they share with other peoples? In this course, we consider "myth" as a category of socially powerful narratives and not just a simple term that refers to an "untrue story." We examine myths by focusing on a few specific moments of interaction between the Latine peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest are select creation stories (found in Jewish, Christian, and Indigenous traditions), imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as part of Greater México, California as "sprawling, multicultural dystopia," and California as "west of the west," including its imagination as a technological and spiritual "frontier."

Requirements/Evaluation: this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

Prerequisites: none
Enrollment Limit: 19

Enrollment Preferences: Latina/o Studies concentrators, Religion majors, American Studies majors, Environmental Studies majors and concentrators, Comparative Literature majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

AMST 320 (S) Dangerous Bodies: Black Womanhood, Sexuality & Popular Culture

Cross-listings: WGSS 320 AFR 320 AMST 320

Secondary Cross-listing

Whether presented as maternal saints, divas, video vixens, or bitches, black female celebrities navigate a tumultuous terrain in popular culture. This course considers the ways that black female celebrities such as Oprah, Rihanna, Nicki Minaj, Beyoncé, Janet Jackson, and Michelle Obama negotiate womanhood and sexuality, and the popular landscapes through which we witness that negotiation. It also engages contemporary black feminist scholarship, which most frequently presents the presentation of black female bodies in popular media forms as exploitive. We will review historical stereotypes of black women in popular media forms, discuss the history of the "politics of respectability" within black culture, engage black feminist responses to these types, and examine theoretical approaches to assess social constructions of womanhood and sexuality. We will also consider provocative questions relevant to discussions of contemporary black sexual politics: Should we view these women as feminists? Are they merely representatives of cultural commodification and control of black women's bodies? Do these women best exemplify the reiteration of problematic characterizations? Are they positive models for demonstrating female empowerment, agency, or "fierceness?" This course explores the histories of representation of black female figures in popular culture, and in so doing, troubles contemporary considerations of black womanhood and sexuality.

Requirements/Evaluation: evaluation will be based on attendance/participation, short response papers, and a midterm and final portfolio

Prerequisites: none

AMST 321 (F) Unsettled Futures: Time, Crisis, and Science Fiction from the Margins (DPE)

Cross-listings: STS 321 AMST 321

Primary Cross-listing

Societies around the globe are now confronting a triple crisis that threatens not only political orders but also the very existence of certain forms of life:
(1) financial collapse(s) that have increased the awareness and severity of mass inequality, (2) climate change and mass extinctions, and (3) the rise of white supremacy and ethno-nationalisms that threaten BIPOC lives and representative democracies. These material and political challenges have depleted many of the cultural resources that enable imagining non-apocalyptic futures. Yet, these crises are not novel. Many groups in the periphery—geographic, economic, and cultural—were and are already living through the uneven distribution of the apocalypse. Science fiction (SF) has emerged as a privileged symbolic field for the expression of hopes and anxieties that drive both culture and tech industries. Whether seen as a form of productive pessimism or liberatory theory, SF from the margins is deployed as a political tool for enacting change in the present. In this course, we will survey the history of SF as a variable and theoretical orientation constituted through the unfolding of uneven global encounters. We will analyze SF in the Cold War, Anthropocene, decolonization movements, and postcolonial and Indigenous landscapes, reading major works in SF and science and technology studies (STS) that address the politics of crisis, apocalypse, and global futures. In addition to novels and short stories, this course will incorporate film, graphic novels, music videos, video games, and other science fiction subgenres.

Requirements/Evaluation: Class discussion, approximately 10 pages of creative writing, 5 page analysis paper of your classmate's creative writing, final paper or project (5-8 page paper or equivalent)

Enrollment Limit: 15

Enrollment Preferences: Students who have taken American Studies 101 and/or Science and Technology Studies 101

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
STS 321(D2) AMST 321(D2)

Difference, Power, and Equity Notes: This course examines the racial, ethnic, gendered, and sexed dimensions of science fiction and traces how marginalized people have imagined the future amidst an atemporal and unfolding apocalypse. Students will work with postcolonial, Indigenous, queer, and critical race media concerning the future, and will gain the skills needed to read political orders and crises through the lens of the margin.

AMST 323 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Cross-listings: COMP 322 AFR 323 ENGL 356 AMST 323 ARTH 223

Secondary Cross-listing

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as the late Congressman John Lewis’ March and Ebony Flowers’ Hot Comb, this course illustrates and critiques multiple ways the graphic novel commingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will build comic creation and analysis skills through short exercises, eventually building up to the final project of a graphic short story that illustrates historical and/or autobiographical narratives. No art experience is required, only an openness to expanding one’s visual awareness and composition skills. This course is often taught in collaboration with the Williams College Museum of Art's Object Lab program, which allows the class to have its own space and art objects that are directly related to the course topic. This class may feature Object Lab participation, film screenings, and collaborations with guest speakers.

Requirements/Evaluation: class participation, written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: If the enrollment limit is exceeded, preference will be given to Africana Studies concentrators or students who have taken AFR 200, the department's introductory course.

AMST 325  (F) Asian/African American Cultural and Political Theory

Cross-listings:  PSCI 333 AMST 325 AFR 344

Primary Cross-listing
Contrasted as "model minorities" or "incorrigible minorities" Asian Americans and African Americans have been pitted against one another in social standing and political objectives. However, throughout the twentieth century, African/Asian solidarity and alliances existed in political movements and literary and cultural productions. From Ho Chi Minh's anti-lynching writing, the founding conference of the WIDF (Women's International Democratic Federation) in China in 1945, through the Bandung Conference, coalitions against U.S. wars in Southeast Asia, and alignments with Chinese anti-imperialist endeavors, black and Asian peoples have joined in international political formations. Contributions to theory include the writings and activism of Langston Hughes, W.E.B. Du Bois, Richard Wright, Robert Williams, Yuri Kochiyama, Grace Lee and Jimmy Boggs, Ishmael Reed, and Amiri Baraka; films of Bruce Lee; music of Fred Ho; revolutionary praxis of Mao Tse Tung's Little Red Book and his writings on art and society; the Marxism of the Black Panther Party; the Afro-futurism of Sun Ra and Samuel Delany; and contemporary "Afro-pessimism." Such cultural works depict futurities and possibilities for Black and Asian diasporas. This seminar examines theory, politics, literature, film, and music produced from and linked to twentieth-century movements against capitalism, racism, colonialism, and imperial wars to think through how Black and Yellow Power have shaped solidarity to challenge white supremacy and racial capitalism. **Requirements:** One midterm paper (5-6 pp.) = 30%; final paper/project (10-12 pp.) with a creative option = 50%; short response paper and GLOW posts = 10%; participation (attendance and class discussion) = 10% Course cap: 19 Priority given to AMST majors, Africana concentrators

AMST 326  (F) Unfinishing America  (DPE) (WS)

Cross-listings:  ENGL 316 AMST 326

Primary Cross-listing
The Great American Novel is a moribund cliché. Few would argue that any one work of fiction could capture the essence of American life. In this class, we will flip the Great American Novel on its head by reading Ralph Ellison's unfinished second novel. After publishing the acclaimed Invisible Man in 1952, Ellison seemed poised to deliver the next Great American Novel. But he never did. When he died in 1994, 42 years later, he left behind thousands of pages of material, but no finished second novel. Why wasn't he able to finish it? Some of it was bad luck. Some of it was a struggle with genre and form. However, perhaps the real reason Ellison's novel proved impossible is what it was trying to say. This is a book about the historical trauma of racism. Therefore, the thesis of this class is that the Great American Novel cannot be written as long as American history remains whitewashed. Ellison's manuscript shows this in surprising ways, from its depiction of racial passing and the taboo of interracial sex to its extended exploration of Black and Indigenous cultures in the former Oklahoma Territory. In addition to Ellison, we will read the work of the Chicano author Tomás Rivera, whose fragmentary fictions provoke similar questions. This class culminates in a final project that asks students to "unfinish" an American cultural object.
Requirements/Evaluation: Class participation, Discussion facilitation, "Show and Tell" presentation of a cultural object, Reader's Guide, Final Project
Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: Sophomores, Juniors, and Seniors
Expected Class Size: 10-15
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 316(D1) AMST 326(D2)

Writing Skills Notes: Each student will be responsible for producing a reader's guide to Ellison's unfinished second novel. Students will write, rewrite, and revise their reader's guide throughout the semester. A quality reader's guide will highlight the book's main themes, profile the main characters, and retrace the book's development. Students will also complete one draft of a guide to Rivera's novella, due at the end of the semester.

Difference, Power, and Equity Notes: "Unfinishing America" satisfies the Difference, Power and Equity requirement because it calls into question mainstream American culture from Black, Chicano, and Indigenous perspectives. It interrogates the relations of power that have driven American history, from the Civil War and Westward expansion in the 19th century to the struggle for Civil Rights against Jim Crow in the 20th. Finally, it asks what it would mean to have true equity amidst great diversity in American culture.

Attributes: AMST Arts in Context Electives AMST Comp Studies in Race, Ethnicity, Diaspora

Fall 2023

SEM Section: 01 TF 2:35 pm - 3:50 pm William H. Stahl

AMST 330 (Anti-)Imperialism, Race, and the Archive (DPE) (WS)

What is U.S. imperialism? How are the social relations of racial capitalism important to U.S. imperialism? How have anti-imperial, anti-racist, and anti-capitalist struggles taken shape within, against, and beyond the U.S. nation-state, and how have these struggles shaped the U.S. nation-state itself? Finally, what kind of anti-imperial activist hermeneutics does American Studies offer and how can they be strengthened to reckon with the specific conditions of the U.S. imperial present? Anchored in these questions, this course seeks to introduce students to the history of U.S. imperialism. It does so beyond the traditional understanding of empire as a one-way agglomerating imposition of power in distant areas, and instead accounts for the co-constitution of reigning state-capitalist orders and global processes of spatial and social differentiation. Following such an approach to the history of U.S. imperialism, this course is organized around four time periods: 1770s to 1890s; 1890s to 1930s; 1930s to 1980s; and 1980s to the present. Across each period, we will attend to processes of U.S. imperial expansion, capital accumulation, and racial domination, and resistance to these processes. We will do so using secondary sources and a wide range of primary sources, including published fiction, legal documents, newspaper articles, speeches, films, and photos. By the end of this course, students should be able to detail a genealogy of the U.S. imperial present that accounts for: the significance of imperial and inter-imperial relations in the formation of U.S. national culture, institutions, and public areas such as law and public policy; how U.S. territorial colonialization has underpinned the development of U.S. imperial infrastructure, the imperial state form, and imperial culture; and how U.S. territorial and extraterritorial sovereignty exist in perpetual reaction to the primary claims of Indigenous peoples and other threats to reigning state-capitalist orders.

Requirements/Evaluation: Evaluation will be based on the following assessments: Class Participation: 25%; Weekly Response (350-500 words): 25%; Essay 1--First submission (5 pgs.): 10%; Essay 1--Revision (5 pgs.): 10%; Essay 2 (5 pgs.): 15%; Essay 3 (5 pgs.): 15%

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: American Studies majors, students specializing in Native American and Indigenous Studies, Africana majors, History majors,

Expected Class Size: 15

Grading:

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Emphasis on writing process and revision: Three thesis papers at 5 pages each (each receiving critical feedback from professor and peers); one keyword glossary where students develop rigorous definitions of course key terms; one roundtable discussion based on the final
Difference, Power, and Equity Notes: Throughout, the course addresses the issues of difference, power, and equity amongst groups and the nature of the theoretical tools or perspectives used to understand these issues. It does so familiarizing students with "racial capitalism" as both a way of understanding the historical relationship between race and capitalism, and as an activist hermeneutic to respond to the conditions that American Studies and other fields must reckon with in the present.

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora

Not offered current academic year

AMST 332 (F) (De)colonial Ecologies (DPE) (WS)

Cross-listings: ENVI 332 AMST 332 AFR 347

Primary Cross-listing

What is the relationship between race, colonialism, and capitalism? How do such structures organize nature, including human nature? How do ideas of "nature" and "the human" come to structure race, colonialism, and capitalism? From the "discovery" and plunder of the "New World," to 18th-century claims that climate determined racial character, to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, it is clear that race, colonialism, capitalism constitute asymmetric world ecologies, and give rise to interconnected liberation struggles. Anchored in the contexts of U.S. colonialism and racial capitalism, and drawing on environmentalist, Black Marxist, and feminist works, this course aims to expose students to a world history of colonial and decolonial ecologies. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward human and non-human natures. Students should also be able to analyze how such orientations toward human and non-human natures mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation constitute decolonial ecologies that contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 332(D2) AMST 332(D2) AFR 347(D2)

Writing Skills Notes: One thesis paper at 15 pages. The writing process is staggered, with each part graded, and with critical feedback from professor and peers. Specifically, one research proposal (including thesis outline and annotated bibliography of primary texts) with feedback from professor; one thesis paper draft with feedback from peers; one letter of revision explaining the student's revision process; one final draft with critical feedback from professor; and student presentation and discussion.

Difference, Power, and Equity Notes: The course addresses issues of difference, power, and equity, and offers theoretical tools and perspectives to understand these issues. Specifically, students learn how to interpret how racialized and colonized peoples' visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

AMST 333 (S) An American Family and "Reality" Television (WS)

Cross-listings: AMST 333 WGSS 312 ARTH 310

Secondary Cross-listing

An American Family was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on
PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the *An American Family* series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 14- to 18-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.

**Requirements/Evaluation:** class presentations, research assignments and annotated bibliographies, and final 14- to 18-page research paper.

**Prerequisites:** none

**Enrollment Limit:** 14

**Enrollment Preferences:** junior Art majors, followed by senior majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 333(D1) WGSS 312(D1) ARTH 310(D1)

**Writing Skills Notes:** There will be considerable focus on writing and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**AMST 334 (F) Sexual Economies** (DPE)

**Cross-listings:** WGSS 301 AMST 334 ANTH 301

**Secondary Cross-listing**

This course examines various forms of sexual labor around the world in order to better understand how gendered and sexual performances are used in a variety of cultures and contexts for material benefit. Our topics include "traditional" forms of sex work such as street prostitution, pornography, and escorting as well as other forms of sexualized performances for benefit such as stripping or camming. We also discuss current issues and debates about discourses of "sex trafficking." Course readings come from a range of fields, but focus most heavily on anthropology, sociology, American studies, and gender studies. The readings for this class will frequently foreground the lived experiences of sex workers from a variety of nations, races, classes, religions, and backgrounds in order to explore the broader social implications of our subject matter. The format is largely discussion-based, with short lectures supplementing the reading with summaries of current scholarly and activist debates. We have a variety of guest speakers to share their diverse lived experiences related to this topic.

**Requirements/Evaluation:** midterm essay exam, short quizzes, participation, Marco Polo video chat posts

**Prerequisites:** none, though WGSS 101 and/or 202 may be helpful, but not required

**Enrollment Limit:** 20

**Enrollment Preferences:** based on statement of interest

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 301(D2) AMST 334(D2) ANTH 301(D2)

**Difference, Power, and Equity Notes:** We pay particular attention to the intersecting questions of race, sexuality, gender, and class as we explore the political economy of commercial sex. The course teaches students to examine the underlying political and economic structures that create systems of privilege and power, thereby complicating questions and assumptions about sexual consent, coercion, agency, and empowerment with particular attention to race and gender in comparative transnational contexts.

AMST 335 (S) Uncovering Williams

Cross-listings: ARTH 335 AMST 335

Primary Cross-listing

Sparked by current controversies around visual representations at Williams, this course—a joint effort of the Williams College Museum of Art and the American Studies Program—interrogates the history of the college and its relationship to land, people, architecture, and artifacts. Students in this course will examine the visual and material culture of Williams and the land it occupies to uncover how the long and complex history of the college reverberates in the spaces and places students, faculty, and staff traverse daily. We take seriously that objects and environments are not neutral nor are the atmospheres that they reflect and produce. Our interdisciplinary approach draws from the methods and theories of American studies, art history, material culture studies, critical race theory, gender studies, and eco-criticism. Topics of discussion may include: the foundation of the college and displacement of native populations; buildings, objects, and monuments linked to Williams’ evangelical history and the role of missionaries in American imperialism; the symbolic meaning of the varied architectural styles at the college; and the visibility/invisibility of the college’s relationship to slavery and Abolitionism.

Requirements/Evaluation: participation (discussion, GLOW posts), 2-3 short papers, one 5- to 6-page midterm paper, and a 10- to 12-page final project (either a research paper or a substantial arts-type project) and bibliography

Prerequisites: sophomore standing or permission of the instructor

AMST 338 (S) Literature of the American Renaissance

Cross-listings: ENGL 338 AMST 338

Secondary Cross-listing

The term "American Renaissance" refers to a period of US writing, primarily a couple of decades before the Civil War but extending after it: the time of Poe, Emerson, Thoreau, Hawthorne, Melville, Dickinson, Whitman, Jacobs, and Douglass. At stake throughout was the soul of the nation in a time of exuberant political expansion, spiritual optimism, social experimentation, deadening social conventionality, spiritual constriction, labor exploitation, and slavery. The question repeatedly asked was what it means to be free. The question is personal, political, social, and spiritual, and always, for writers, literary: what are the limits or possibilities of writing freely?

Requirements/Evaluation: Three papers: 4 pp., 5 pp., 6-8 pp. Active class participation is expected and rewarded.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 25

Enrollment Preferences: English majors; prospective English majors; American Studies majors; Comparative Literature majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

AMST 342  (S)  Race, Development, and Food Sovereignty  (DPE) (WS)

Cross-listings:  AMST 342 AFR 349 ENVI 349

Primary Cross-listing

What does it mean to "settle" land? What racial encounters and acts of survival took place around the plantation? How have farmworkers and landowners faced off against government policies and "agribusiness" corporations? What was the "Green Revolution" and why did it happen? Agriculture as a relation to land based on domestication, enclosure, and commerce has long been a means of and justification for racial and colonial dispossession and exploitation across the Americas, including what is now the United States. At the same time, an array of embodied practices in relation to the land and one another complicate and contest these histories of racial and colonial dispossession. Broadly, this course aims to familiarize students with the historical and present-day entwining of colonial and racial dispossession, exploitation, and resistance at the heart of U.S. economies of agriculture. By the end of this course, students should be able to analyze how the historical foundations of U.S. agriculture have entailed and intertwined the taking of lands and removal of Indigenous peoples, the enslavement of African peoples, mass migration, and various forms of exploitative labor. Students should also be able to assess how these historical foundations continued to serve as the material conditions reproduced throughout the course of the 19th and 20th centuries under discriminatory government policies and powerful "agribusiness" corporations, as well as the possibilities and limits of redress and reform through state and corporate action. Finally, students should be able to interpret how embodied practices in relation to the land and one another precede, exceed, and push against the logics and histories of racial and colonial dispossession. The course is organized around three units that interrogate economies of agriculture within and beyond the U.S. nation-state. Each unit interrogates a key period of time from the founding of the United States, through 20th-century Pax Americana, and on into the present. Finally, each unit does so while attending to the emergence and enactment of "food sovereignty" movements--efforts to foster a new international trade regime, agrarian reform, a shift to agroecological production practices, attention to gender relations and equity, and the protection of intellectual and indigenous property rights.

AMST 343  (S)  Representations of Racial-Sexual Violence from Enslavement to Emancipation

Cross-listings:  WGSS 343 INTR 343 AMST 343 AFR 343

Secondary Cross-listing

This tutorial examines representations of and resistance to racial-sexual violence in American society, from colonial America to contemporary US culture. Interdisciplinary texts cover history, politics, literature, film, feminist studies, American studies, LGBTQ and ethnic/black studies. Books include Southern Horrors; Intimate Matters; Scenes of Subjection; Trauma and Recovery; The Delectable Negro: At the Dark End of the Street; films include Birth of a Nation; Bush Mama; To Kill a Mockingbird. The primary focus is on racial and sexual vulnerability to violence and mobilization for freedom from the 18th-21st centuries.
Class Format: students provide primary and response papers and discuss their analyses and theories of social and interpersonal violence

Requirements/Evaluation: weekly primary and response papers

AMST 345  (F)  Capitalism and Racism in the American Context and Beyond: A Global Approach  (DPE)

Cross-listings: AMST 345 GBST 344 AFR 353

Primary Cross-listing

American Studies emerged with the idea that transdisciplinarity is crucial for comprehending the concept of America. Building on this framework, this course foregrounds transepistemology as an equally important method for understanding the dynamics of America, both locally and globally, at the level of the world-system. In addition to tracing the consubstantial genealogy of racism and capitalism, we will examine their local manifestations, mainly in Asia, Europe, Africa and America, as well as their current geopolitical, social and economic outcomes, especially the reproduction of systemic inequalities and domination. Through an interdisciplinary approach and engagement with a variety of resources from economics, anthropology, sociology, critical race theory, comparative ethnic studies and decolonial thinking, this course will address the following: i) review the different forms of economic organization of human societies throughout history (with special focus on the work of Karl Polanyi); ii) trace the epistemological origins of capitalism and investigate what makes capitalism and its crises unique; iii) trace the genealogy of the concepts of race, racism and discrimination; iv) interrogate the intersection of racism and capitalism in different traditions of thought and epistemologies in Asia, Europe, Africa, and the Americas. For example, we will read key texts from "French theory", (Deleuze, Foucault, etc.), US Black tradition, (W. E. B. Du Bois and Cedric Robison, etc.), Chinese social sciences (Li Shenming, Cheng Enfu, etc.) and African economy and anthropology (Mahdi Elmandjra, Cheikh Anta Diop, etc.) and Latin American decolonial philosophy (Quijano, Dussel, Mignolo, etc.) By doing this, we will situate the rupture that capitalism and racism introduced at the level of global history, which is the first step to conceptualizing racism and capitalism. After showing that the development of capitalism and racism are historically linked, we will proceed to examine the manifestations of their interaction at local and global levels. Locally, we will focus on the effects of racism on the labor market: discrimination in hiring, wage discrimination, segregation, duality and stratification of the labor market, etc. We will also analyze how sexism and racism play out in the labor market in racialized communities. We will also reflect on the links between racism and politics and their effects on economic policies. From a more global perspective, we will analyze the roots of the global economic crisis and the resulting geopolitical issues at the international level and the racist dynamics they generate. Overall, as we will move through readings, we will situate the United States in a cross-regional perspective that would enable us to develop critical insights concerning links and convergences between capitalism and racism.

Requirements/Evaluation: Requirements: An active participation is required of students in terms of engaging in the in-class debates and weekly response paper as a feedback on the lectures as well as a final paper. Evaluation: Participation 25%; Weekly Response (350-500 words) 30%; Final Research Paper (12-15 pages) 45%

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: American Studies majors and seniors

AMST 349 (F) The Politics of Algorithms

Cross-listings: PSCI 331 AMST 349 STS 349

Secondary Cross-listing

Every day, you interact with or through computer algorithms. In ways often obscure to users, they structure communication or conduct in social media, education, healthcare, shopping, entertainment, dating, urban planning, policing, criminal sentencing, political campaigns, government regulation, and war. Moving from the emergence of cybernetics during World War II through such contemporary examples as facial recognition software, this seminar approaches algorithms as complex technological artifacts that have social histories and political effects. Asking how algorithms are political and what that tells us about politics today (particularly in the U.S.), we will consider how their design expresses forms of power and their deployment shapes ways of living. What behaviors do different algorithms solicit, reward, discourage, or stigmatize? What kinds of selfhood and relationships do they promote or thwart? How do various algorithms influence political partisanship and beliefs and intersect with existing hierarchies of race, class, gender, and sexuality? When inequities are built into a design, can that be addressed by rooting out “bias,” or do such efforts miss something more inherent in the kinds of artifacts algorithms are or what they can be in a capitalist economy? Might developments in artificial intelligence transform our sense of the human or even threaten the species? Many of the seminar’s themes, including democracy, power, inequality, judgment, deliberation, publicity, subjectivity, and agency, are central to political theory, but readings and course materials will also be drawn from such fields as media theory, surveillance studies, sociology, American studies, critical data science, film, and contemporary art. The course neither requires nor teaches any computer science skills.

Requirements/Evaluation: Class attendance and participation, regular short posts or exercises, and either three eight-page essays or one 8-page essay and one longer final paper.

Prerequisites: At least one course in political, cultural, or social theory or the critical study of science and technology, or permission of the instructor.

Not open to first-year students.

Enrollment Limit: 15

Enrollment Preferences: Political Science and American Studies majors and STS concentrators; then qualified students from all other majors welcome, space permitting.

AMST 350 (F) Black Masculinities (DPE)

Cross-listings: AFR 331 ENGL 375 WGSS 318 AMST 350

Secondary Cross-listing

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 20th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. By examining representations and presentations of Black masculinities, we will pursue questions such as: How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men¿s sexuality inform representations of Black masculinities? What is the future of Black Gender? We will trouble the relationship between manhood and masculinity by examining the ways in which masculinity can move across various kinds of bodies. In addition to reading critical and creative texts, we will view films and engage other kinds of media. Students will be responsible for 2 short papers and a final project.

Requirements/Evaluation: students will be responsible for 2 short papers and a final project

Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: WGSS Majors will get preference, then Juniors and Seniors
Expected Class Size: 14
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

AMST 351  (F)  Queer Tongues & Lavender Linguistics  (DPE)

Cross-listings: AMST 351 WGSS 350 ANTH 350

Secondary Cross-listing
This course in linguistics provides an introduction to linguistic anthropology, sociolinguistics, and folklore studies using topics and approaches related to gender and sexuality. It is a methods course based in empirical research principles, but a basic familiarity with the broad strokes of queer/feminist theory may be helpful. One goal of the class will be learning to read and write in IPA (International Phonetic Alphabet) and how to construct and use IPA "change charts." We then build on this as we turn to sociolinguistics as students will learn how to do Discourse Analysis and Conversation Analysis, using WGSS-oriented topics (e.g., upspeak, vocal fry, so-called "gay voice," the gendered nature of turn-taking and interrupting.) We then turn to an extended unit on queer folklore and folklife, learning how anthropologists and folklorists use motif type indexes (e.g., Propp Functions, Thompson Type Index, etc) to study oral narratives and how feminist/queer theorists can use these to analyze gender in folk/fairytales and other stories. We also read several linguistic anthropologists' ethnographies of queer communities' language practices in global context. The semester concludes with a unit on LGBT slang, argots, and profanity.

Requirements/Evaluation: IPA Quizzes (reading/writing), Conversation Analysis/Turntaking Transcription Assignment, Urban Legends Tale Type Analysis, Short Analytical Paper on Feminist/Queer Folk Figures
Prerequisites: None; prior coursework in WGSS may be helpful, but is not required
Enrollment Limit: 15
Enrollment Preferences: WGSS majors; short statements of interest will be solicited in the event of overenrollment
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 351(D2) WGSS 350(D2) ANTH 350(D2)

Difference, Power, and Equity Notes: This course examines the centrality of power in communication as broken down along axes such as sex, gender, and sexuality. It deliberately takes a canonical field (i.e., linguistic anthropology) that often neglected the gendered nature of communication and puts these questions at the center of the curriculum. Assignments are structured in such a way as to build awareness of the role of gender and sexuality within human interactions and how sociolinguistics reveal power imbalances.

AMST 352  (S)  Global Health in the Transpacific  (DPE)

Cross-listings: ASIA 352 AMST 352 STS 311

Secondary Cross-listing
East is East, and West is West, Rudyard Kipling famously wrote in 1889, but never has this been true. Just as war, imperialism, and transnational
flows of capital move people, cultures, and ideas across the Pacific, similar patterns of migration and mobility shape the transmission of illness and disease as well. This course explores global health and disease control as sites of domination and resistance in the Pacific Rim. Articulating the linkages between Asia/America, we will look at the racialization of people and pestilence during the third plague pandemic in Hong Kong and San Francisco, malaria control projects in colonial Southeast Asia, and the rise of modern genomics out of the ashes of Hiroshima and concern over radiation risk, and other cases, to understand how disregard for Asian bodies has shaped the development of modern medicine and public health. At the same time, Indonesia's claim of "viral sovereignty" to protect their biological specimens from Western intellectual property regimes and Hmong refugees' resistance to biomedical intervention in their struggles with mental illness offer counterpoints to Western hegemony. This course provides a critical examination of biosecurity as modern geopolitical struggle and puts Asia-Pacific and the Pacific Rim at the center of our exploration of global health.

Requirements/Evaluation: Reading responses, two short review essays, and one seminar paper

Prerequisites: Previous coursework in anthropology and sociology, some knowledge of the Asia-Pacific region.

Enrollment Limit: 12

Enrollment Preferences: Juniors and Seniors, STS concentrators. If overenrolled, students will submit a short paragraph explaining their interest in the course.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

AMST 353 (S) Is Science Native to Turtle Island? The History of Native Science in North America (DPE)

Cross-listings: AMST 353 STS 353

Primary Cross-listing

Settler sciences and technologies deployed by Europeans colonizing Turtle Island (what settlers called North America) were introduced as weapons of Indigenous termination. From medical violation, to anthropological theft, and industrial pollution, settler technoscience objectified and appropriated Indigenous people and lands, and attempted to displace Indigenous knowledge in the pursuit of settler supremacy. Indigenous bodies were cast as victims, objects and sometimes the tools of this project. And yet, as tools and objects, Indigenous peoples took up settler technoscience in a multitude of ways that failed (both purposefully and not) to adhere to the colonizing mission, incorporating Indigenous knowledges and orientations, subverting settler science as a source of authority, and positioning science as a site of Indigenous sovereignty. The practice of taking up science as a tool of decolonization has become explicit in recent decades as expressly Native sciences now shape tribal funding, college education, and negotiations with international governing bodies. This course will trace the history of Native science across different nations and disciplines from the antebellum period when settler sciences were taking shape in civilian institutions to the present when Native science is professionalizing and being codified. We will read primary sources and scientific treatises by Indigenous leaders, activists, and scientists alongside secondary sources in Indigenous science and technology studies (STS), history, and postcolonial and queer theory.

Requirements/Evaluation: attendance and class participation, two 4-page research papers, and a final creative project (TBD with instructor) or 8- to 10-page paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: American Studies majors and Science and Technology Studies concentrators

**AMST 357  (S) Re/Generations II: Contemporary Experiments in Memory, Trauma, and Self (DPE)**

This is a two-part junior seminar in which we take an expansive approach to memoir as a form, genre, and practice, with specific attention given to texts reckoning with the traumas, transgressions, and transformations of what we understand as "America" and its many discontents. In this second part, we convene on a selection from our historical present and explore how categories of identity and experience, memory and history are being constructed and deconstructed, reimagined and remade anew. We will ask: how do these authors narrate the overlapping cycles of loss, pain, grief, survival, resilience, and resistance in the face of historical violence? What possibilities for (individual and collective) healing can exist in and beyond the world as we know it? What does it even mean to have or to not have, to find, to lose, to have stolen, to dissolve, and/or to recover a self in a besieged American present-future tense? Texts to be considered may include: *How to Write an Autobiographical Novel* (Alexander Chee); *When They Call You A Terrorist: A Black Lives Matter Memoir* (Patrisse Khan-Cullors and asha bandele); *Heart Berries* (Terese Marie Mailhot); *Know My Name* (Chanel Miller); *On Earth We're Briefly Gorgeous* (Ocean Vuong).

**Requirements/Evaluation:** weekly reading responses, midterm and final papers

**Prerequisites:** American Studies 101 and/or 301, previous coursework in race, ethnicity, and diaspora, junior or senior standing, or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** American Studies Majors

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** Analyzes the dynamics of power and privilege in the U.S. from a national and transnational context, examines the perspectives of socially marginalized groups, and fosters an understanding of the beliefs, experiences, and cultural productions of these groups.

**Attributes:** AMST Arts in Context Electives  AMST Comp Studies in Race, Ethnicity, Diaspora

**Not offered current academic year**

**AMST 358  (F) Performing Masculinity in Global Popular Culture (DPE)**

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia, hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

**Requirements/Evaluation:** masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

**Prerequisites:** none; WGSS 202 would be helpful

**Enrollment Limit:** 15

**Enrollment Preferences:** a short statement of interest will be solicited; a subsection of applicants may be interviewed

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
SOC 340(D2) LATS 341(D2) THEA 341(D1) WGSS 347(D2) AMST 358(D2)

**Difference, Power, and Equity Notes:** This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

Fall 2023

**SEM Section:** 01  Cancelled

**AMST 360 (S) The Atlantic World: Connections, Crossings, and Confluences (DPE)**

**Cross-listings:** HIST 361 AMST 360

**Secondary Cross-listing**

This course considers the Atlantic World as both a real place and a concept: an ocean surrounded and shaped by diverse people and communities, and an imagined space of shared or competing affiliations. Moving from "time out of mind" to the early nineteenth century, it examines ecological, cultural, political, economic, intellectual, and spiritual transits as well as exchanges among Indigenous/Native American, African and African American, Asian and Asian American, and Euro-colonial people. It introduces conceptual dimensions of this Atlantic paradigm and case studies that illuminate its human subtleties, with the goal of examining "early American" history through a transnational and transoceanic lens. The course takes an interdisciplinary approach to these intertwined histories, and reckons with how the very construction of "history" has, at different turns, affected what is shared, known, valued, and commemorated—or overwritten, denied, or seemingly silenced. Attentive to the structures of power that inflect every part of Atlantic histories, it offers specific ethical frameworks for approaching these topics. Blending methods grounded in oral traditions and histories, place-based knowledge systems, documentary/written archives, songs, archaeology, material culture, and other forms of expression and representation, it traces pathways for recasting the nature and meanings of these connected spaces and histories. In addition, the course consistently connects historical experiences with the twenty-first century, and how communities today are grappling with the afterlives and ongoing effects of these Atlantic pasts through calls to action for reparations, repatriation and rematriation, Land Back, climate justice, and other forms of accountability. The course also provides an opportunity to engage with original materials pertaining to Atlantic World histories in the Williams College Archives/Special Collections and Art Museum.

**Requirements/Evaluation:** active participation in class discussion, several short essays based on readings and discussion topics, museum/archives exercise, final essay/project

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** sophomore, junior, and senior History majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 361(D2) AMST 360(D2)

**Difference, Power, and Equity Notes:** This course examines the formation and articulation of racial, ethnic, cultural, and other forms of difference across the Atlantic World, and ways that people from Indigenous, African/American, and Asian/American communities have engaged with and challenged European colonization. It devotes substantial time to critical methodologies that re-center voices oftentimes treated as "silenced" or "absent" in colonial literatures, and helps students build fluencies in recovering and interpreting them.

**SEM Section:** 01  W 1:10 pm - 3:50 pm  Christine DeLucia
AMST 361 (S) Marking Presence: Reading Disability in/to Latina/o/x Media  (DPE)

Secondary Cross-listing

This course spans Divisions I, II, and III in its exploration of the representation of disability and Latina/o/x identity in the contemporary US context. Employing Angharad Valdivia’s (2020) notion of "marking presence" to describe the intentional ways in which Latina/o/x subjects gain and hold on to mainstream media space, the class places the fields of Disability Studies, Latina/o/x Studies, Gender Studies and Media Studies into conversation. We address the following questions and others: What does media reveal to us about the place of disability and Latinidad in contemporary US life, particularly as these categories intersect with questions of gender, sexuality, national identity and citizenship? How might we read Latinidad and disability into media texts in which they are not otherwise centered? What are the advantages of deploying mainstream media presence as a claim to power for disabled Latina/o/x individuals, particularly those who are multiply marginalized? What are the limitations of such an approach? We will focus on these questions, as well as deploy various media examples (podcasts, social media, film, television and music) alongside scholarly texts to explore topics impacting the Latina/o/x communities such as the relationship between the relationship between immigration and disability, intergenerational trauma and migration, the gendered archetype of the Latina "Loca," disability in academia, the politics of self-care amongst Latinas/xs in the neoliberal context, and the very legal, cultural, and social category of "disabled" itself within dominant society as well as in Latina/o/x communities.

Requirements/Evaluation: Two short (5-6 page) essays; One media analysis exercise; One final reflection letter.

Prerequisites: None.

Enrollment Limit: 12

Enrollment Preferences: Preference given to LATS concentrators, AMST majors and WGSS majors by seniority.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

LATS 344(D2) WGSS 361(D2) AMST 361(D2)

Difference, Power, and Equity Notes: At its core, this course is about understanding difference and relationships of power through an intersectional lens and via the prism of everyday media. In each class we will be discussing issues directly revolving around questions of race, ethnicity, ability/disability, gender, sexuality, and nation. Students will be expected to incorporate an analysis of these issues in their written and oral work for the course.

AMST 362 (S) "'Rebel Ecologies': Black and Indigenous Struggles for Land and Life"

Cross-listings: WGSS 362 AFR 300 ENVI 300 AMST 362

Secondary Cross-listing

This course will ask, what other socioecological models exist? We will weave together a study of differing, yet often converging or synergistic traditions of Black/Womanist eco-feminism that often confronts the social constructions of race, gender, class and sexuality, dominant religion as a means of social control, imperialism, capitalism, and colonialism; Ecosocialism which often frames ecology in terms of a mode of production beyond or outside of capitalism; and Indigenous perspectives on resistance to capitalist extraction, imperialism, and colonialism. Given ongoing struggles against the extraction of land and labor, the urgent calls raised in the present-day "climate strike," the COVID-19 Pandemic, Black-led pandemic rebellions, along with long(er) histories of land-based peoples around the planet opposing racial capitalism, settler colonialism, and imperialism, this class will explore not only what those in opposition to both extractivism and expropriation resist, but also what we want. We will critique binaries, settler notions of time and explore theories of change. Additionally, this class will look to an array of literature, film, sound, and other forms of cultural production in order to not just "locate," but describe and reveal rebel ecological visions emerging "from below." Ultimately this class will consider how the above ecological praxis can work simultaneously and within a sense of plurality, examining what we can learn from the work of activists, intellectuals, and defenders on the frontline. This course is an extension of Dr. Guess' concept of a "rebel ecology."

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader at least twice 20%; Weekly 500-word Literature Review 20%; One Final Project, which can take any number of forms, including the
conventional research paper (8-12 double-spaced pages plus bibliography). More projects might include, an annotated bibliography of 7 texts, film analysis, syllabus, book review, a written play, an op-ed, etc. We will discuss further possibilities in class.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: If the course is overenrolled, preference will be given to Africana studies concentrators.

Expected Class Size: 7

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 363  (S) Mathematical and Computational Approaches to Social Justice  (DPE) (QFR)

Cross-listings: MATH 308 AMST 363 STS 363

Secondary Cross-listing

Civil rights activist, educator, and investigative journalist Ida B. Wells said that "the way to right wrongs is to shine the light of truth upon them." In this research-based tutorial, students will bring the vanguard of quantitative approaches to bear on issues of social justice. Each tutorial group will carry out a substantial project in an area such as criminal justice, education equity, environmental justice, health care equity, economic justice, or inclusion in arts/media. All students should expect to invest substantial effort in reading social justice literature and in acquiring new skills in data science.

Class Format: This is a research-based tutorial.

Requirements/Evaluation: To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor follows an "ungrading" methodology.

Prerequisites: Across each 3 - 5 person tutorial group: multivariable calculus (e.g., Math 150/151), linear algebra (e.g., Math 250), statistics (e.g., Stat 161/201), computer programming (e.g., Comp 134), some working knowledge of or interest in social justice issues.

Enrollment Limit: 20

Enrollment Preferences: Students will be admitted in groups based on a proposal submitted prior to preregistration. The instructor is happy to facilitate formation of groups and to give feedback on draft proposals. Contact the instructor early, prior to preregistration.

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 308(D3) AMST 363(D3) STS 363(D3)

Difference, Power, and Equity Notes: Students study issues of equity, diversity, and inclusion in areas such as criminal justice, arts/media, environmental justice, education, and health care, and along identity axes such as gender, race/ethnicity, disability status, and sexual orientation.

Quantitative/Formal Reasoning Notes: Students use multiple mathematical, statistical, and computational frameworks to acquire, model, and analyze real-world data.

Not offered current academic year

AMST 364  (F) Trans Film and Media  (DPE)

Cross-listings: WGSS 311 AMST 364

Secondary Cross-listing

This course provides an introduction to contemporary trans culture and politics via the lens of film and other (mostly visual) media. We'll focus mainly on media production in the U.S. since the early 1990s, as this moment is usually understood as inaugurating contemporary "transgender" politics; additionally, the 90s saw a profusion of diversity in popular representation generally. This class has two main priorities: first, to use visual media as a lens for surveying major developments in trans studies, politics, and representation over the last few decades; second, to develop a critical repertoire for thinking about our current conjuncture of "trans visibility" in particular. By tracking a longer history of both popular and alternative trans media
this course will question the vanguardism and celebratory progress narratives associated with "trans tipping point" visibility conditions. Drawing from perspectives in WGSS, American studies, and ethnic studies, we will especially situate trans representation in relation to the institutionalization of minority difference under neoliberal capitalism. In line with scholarship, we'll approach trans representation as interlocking with structures like race, heteropatriarchy, dis/ability, immigration, and nationality and empire.

Class Format: There will also be some lecturing.

Requirements/Evaluation: Students will have ongoing short discussion post assignments, one midterm essay of 5-6 pages, and a final group media-making project with min. 6 pages of analytic writing to accompany their creative work.

Prerequisites: WGSS 101 or 202 would be helpful but are not required. Other background in WGSS or the humanities is also helpful.

Enrollment Limit: 20

Enrollment Preferences: Enrollment preference can go to WGSS majors and 3rd & 4th years. Statements of interest are welcome.

Expected Class Size: 20

Grading:  yes pass/fail option,  yes fifth course option

Materials/Lab Fee: For some proprietary media content, students will need subscriptions to popular streaming services (eg Netflix, Amazon, HBO Max). See WGSS chair about financial aid waivers and alternatives if this feels cost prohibitive.

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 311(D2) AMST 364(D2)

Difference, Power, and Equity Notes: This course provides a survey of issues facing marginalized trans communities via the lens of visual media, with an emphasis on how structures of power shaping trans experience intersect with the politics of race, capital, disability, migration, and other axes of social difference.

Fall 2023

SEM Section: 01 M 7:00 pm - 9:40 pm  Abram J. Lewis

AMST 365  (F) Race and Psychoanalysis: Slavery and the Psyche  (DPE)

Cross-listings: AMST 365 GBST 365 ENGL 320 AFR 365

Primary Cross-listing

This course explores slavery and the psyche through a constellation of Black diasporic literary, visual, and theoretical texts from the US, Caribbean, and Africa. Unwieldy and generative, the opacity of race within the field (and practice) of psychoanalysis shares a fraught intimacy with the co-constitutive terrains of violence and race that form the unconscious. Querying what escapes the hermeneutics of psychoanalysis and aesthetics in the fantasies race engenders, we will examine modernity's articulation of racialization through conceptualizations--both fantasmatic and real--of self, world, knowledge, and possibility. Course texts may include: Edwidge Danticat's The Farming of Bones, Adrienne Kennedy's Funnyhouse of a Negro, Bessie Head's A Question of Power, Arthur Jafa's APEX and Love is the Message and the Message is Death, Conceição Evaristo's Poncíá Vicêncio, Lars von Trier's Manderlay, Charles Burnett's Killer of Sheep, Derek Walcott's "Laventille"; and, selections from Sigmund Freud, Jacques Lacan, David Marriott, Kathleen Pogue White, Franz Fanon, Hortense Spillers, Nathan Gorelick, Jaqueline Rose, Jared Sexton, Melanie Klein, Jacques-Alain Miller, Melanie Suchet, and Jean Laplanche. Note: This course will reflect the Continental tradition in philosophy. Student should be familiar with the basic interventions of psychoanalysis.

Requirements/Evaluation: Weekly discussion posts and questions, 2 Papers, 10-12 pages, Research presentation

Prerequisites: One Writing Skills or writing intensive course; one intro course in one of following: American Studies, Africana Studies, Comparative Literature, English, Global Studies, Philosophy, Psychology, Women, Gender, and Sexuality Studies

Enrollment Limit: 15

Enrollment Preferences: Juniors or Seniors with majors or concentrations in any of the areas: American Studies, Africana Studies, Comparative Literature, English, Global Studies, Philosophy, Psychology, and Women's, Gender, and Sexuality Studies

Expected Class Size: 15

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
Difference, Power, and Equity Notes: This course examines racialization as it relates to the racial violence of slavery on the psyche. Racialization as a process will be connected to concepts of self, world, and knowledge. Black diasporic literary, visual, and theoretical texts from the US, Caribbean, and Africa will be at the forefront of the course.

Attributes: AMST Critical and Cultural Theory Electives

Not offered current academic year

AMST 366 (F) Music in Asian American History (DPE) (WS)

Cross-listings: AMST 366 MUS 316

Secondary Cross-listing

Is "Asian American music" all music made by Asian Americans, music by Asian Americans specifically drawing on Asian heritage, or music engaging with Asian American issues? This course embraces all three definitions and the full diversity of Asian American musical experience. We will study the historical soundscapes of immigrant communities (Chinese opera in North America; Southeast Asian war refugees) and how specific traumatic political events shaped musical life (Japanese American internment camps). We will encounter works by major classical composers (Chou Wen-Chung; Chen Yi; Tan Dun; Bright Sheng) and will investigate the careers and reception of prominent classical musicians (Midori; Seiji Ozawa; Yo-Yo Ma). Afro-Asian fusions, inspired by civil rights protest movements, manifested in jazz (Jon Jang; Fred Ho; Anthony Brown; Hiroshima; Vijay Iyer) and hip hop (MC Jin; Awkwafina; Desi rappers). Asian Americans have been active in popular music at home and abroad (Don Ho; Yoko Ono; Wang Leehom; Mitski). Finally, we will investigate communal forms of Asian American music making that have crossed racialized and gendered boundaries (taiko drumming; Indonesian gamelan; belly dance; Suzuki method). This seminar is designed to develop research skills, as we pursue original fieldwork, archival research, and oral history interviews.

Requirements/Evaluation: Active class participation; two short papers (5-6 pp.) and a research term paper (12-15 pp.).

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Students with curricular experience in Asian American history or music studies.

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 366(D1) MUS 316(D1)

Writing Skills Notes: Students will write three papers during the semester: two 5-6 page papers and a 12-15 page research paper, written in stages. Students will receive detailed comments on each paper and at each stage of the research paper process, allowing them to build upon those comments in subsequent writing assignments.

Difference, Power, and Equity Notes: Political and cultural forces of exclusion not only determined Asian American musical participation in American music history but have shaped Asian American styles of music. We will study the history of Asian American political struggles as they have intersected with music and how Asian Americans have at certain points sought allegiance through music with other marginalized groups. We will explore as well popular media representations of Asian American musicians revealing race-based assumptions.

Not offered current academic year

AMST 367 (F) Colonialism and the Environment (DPE)

In this course students will explore the intersections of environmental history and the history of colonialism in the United States. We will examine how scholars have crafted narratives that focus on "nature"--both as a cultural concept and as a set of biological processes and systems. Readings and assignments will analyze the ways in which these different "natures" have acted as both agents and objects of historical change. We will pay particular attention to how different environments were impacted by the Euro-American conquest of indigenous homelands. Course topics will include (but are not limited to) European settlement in New England, the North American fur trade, US continental expansion and the destruction of the bison, the transcontinental railroad, the creation of the National Park system, Native American environmental activism, and paramilitary responses to struggles over natural resources (such as the Dakota Access Pipeline protests).

Requirements/Evaluation: Assignments will include participatory discussion, weekly responses to assigned readings, short papers, and a semester-long research project.
**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** preference for upper-level (Junior/Senior) students

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course focuses on race, colonialism, and the inequalities that can result from ecological changes that impact how communities live and interact with the natural world. Students in the course are asked to explore how difference, power, and inequality have shaped the environmental history of the United States.

**Attributes:** AMST Space and Place Electives

Not offered current academic year

**AMST 368 (F) Framing American Slavery** (DPE)

**Cross-listings:** AMST 368 AFR 363 HIST 368

**Secondary Cross-listing**

Readings in American Slavery This course will delve into how and what historians have written about US slavery for the last century or so. Rather than marching through time, like we might in a survey course, we'll explore the nooks and crannies of slavery's history. We'll consider gender and sexuality, labor and capitalism, regional difference, maritime culture, and every day life. We'll compare histories produced well before the Civil Rights Movement to books written afterward. We'll consider the obstacles and challenges Black scholars faced in the academy and consider the significance of their work. Finally, we'll examine slavery's role in today's world, beginning with the institution's relationship with American universities and continuing on to the recent protests against monuments and statues.

**Requirements/Evaluation:** Four written essays/reviews, final paper. Students must also complete reading and contribute to class discussions.

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** Priority given to History, American Studies, and Africana Studies concentrators/ majors.

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 368(D2) AFR 363(D2) HIST 368(D2)

**Difference, Power, and Equity Notes:** This course will explicitly examine how power worked and changed during the centuries of legal slavery in the United States. Since lawmakers joined power and violence to definitions of whiteness and blackness, we will study how these definitions emerged and changed over time. Students will address issues of violence, legal and extra legal means of continuing slavery through changing political and economic conditions. Additionally, the course will consider the racial barriers in the academy.

**Attributes:** HIST Group F Electives - U.S. + Canada

Not offered current academic year

**AMST 369 (S) Gender, Sexuality & Disability** (DPE)

**Cross-listings:** WGSS 332 AMST 369

**Secondary Cross-listing**

From classical mythology to reality TV, bodies and minds that depart from the ordinary have long been sources of popular fascination. In recent history, people marked as "disabled" have been subject to medical scrutiny, labeled deficient or defective, and often barred from full participation in society. And yet, what counts as "disability"--and who counts as disabled--varies greatly depending on cultural and historical context. Arguably, disability has more to do with social conditions than with any innate characteristics of disabled people themselves. This class introduces disability studies, situating disability within its historical, political, and cultural contexts. As a GWSS course, we'll center queer and feminist perspectives; this class also emphasizes recent work. Echoing arguments in gender and sexuality studies, scholars have insisted that disability is not a natural or biological fact, but a socially constructed category. As such, scholars and activists have challenged medical models that conceptualize disability as an
individual defect in need of elimination. They have also questioned the idea that disability is simply a minority identity -- to the contrary, disability is a condition that most humans will experience at some point in our lives. This class frames "disability" broadly--encompassing not just conditions of physical impairment, but a wide range of bodily, sensory, cognitive, emotional, and behavioral differences and capacities. This class also centers how disability is produced intersectionally through regimes like race, capitalism, and empire. Topics include: theories of embodiment, eugenics, institutionalization and incarceration, neurodivergence, mad studies, the politics of health, storytelling and narrative, disability justice activism, neoliberalism, biopolitics, and crip theory. Along with scholarly writings, we'll consider activist texts, popular press, fiction, memoir, and a variety of other media.

Requirements/Evaluation: Students will submit three short reading response papers (2-3 pgs), ongoing brief/informal forum posts, and a longer final research paper (10-12 pgs); students will also work in small groups to facilitate a section of class twice per term.

Prerequisites: WGSS 101-level familiarity would be very helpful, but is not required.

Enrollment Limit: 15

Enrollment Preferences: Preference to majors, 3rd and 4th year students.

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 332(D2) AMST 369(D2)

Difference, Power, and Equity Notes: This class surveys the politics of disability in recent U.S. history, illustrating axes of difference and privilege based on ability as it intersects with various racial, gender, and other identities.

Spring 2024

SEM Section: 01 M 7:00 pm - 9:40 pm Abram J. Lewis

AMST 370 (S) Visual Politics

Cross-listings: AMST 370 ARTH 337 PSCI 337

Secondary Cross-listing

Even casual observers know that appearances matter politically and that the saturation of politics by visual technologies, media, and images has reached unprecedented levels. Yet the visual dimensions of political life are at best peripheral topics in contemporary political science and political theory. This seminar explores how our understanding of politics and political theory might change if visuality were made central to our inquiries. Treating the visual as a site of power and struggle, order and change, we will examine not only how political institutions and conflicts shape what images people see and how they make sense of them but also how the political field itself is visually constructed. Through these explorations, which will consider a wide variety of visual artifacts and practices (from 17th century paintings to the optical systems of military drones and contemporary forms of surveillance), we will also take up fundamental theoretical questions about the place of the senses in political life. Readings may include excerpts from ancient and modern theorists, but our primary focus will be contemporary and will bring political theory into conversation with other fields, particularly art history and visual studies but also film and media studies, psychoanalysis, neuroscience, and STS. Possible authors include Arendt, Bā, Bellong, Benjamin, Browne, Buck-Morss, Butler, Campt, Clark, Crary, Deleuze, Deleuz, Fanon, Foucault, Freedberg, Hobbes, Kittler, Mercer, Mitchell, Mulvey, Plato, Rancière, Scott, Sexton, Starr, Virilio, Warburg, and Zeki.

Requirements/Evaluation: regular, engaged class participation, several Glow posts, and *either* three 7- to 8-page papers *or* one much longer paper.

Prerequisites: at least one prior course in political theory, cultural theory, visual studies, or art history; or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Political Science and Art History majors (including students in the grad program); then qualified students from all disciplines welcome, space permitting

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 371  (S)  Rebels, Guerillas, and Insurgents: Resistance and Repression in US History  (DPE)
This course examines histories of resistance and repression throughout US history. We will consider the role of militancy in social or revolutionary movements, how states deploy power to respond to those movements, and debates around "violence" and political action. Wide ranging in both chronology and topic, course materials will explore slavery, piracy, indigenous resistance to US continental expansion, the expansion of US empire to places like Hawaii and the Philippines, social movements focused on race, class, gender, sexuality, and citizenship, as well as struggles over environmental justice and indigenous sovereignty. The course will also interrogate the rise of far-right paramilitary violence in the United States and the backlash to the social movements of the 1960s and 70s. Students will develop their skills in reading, writing, and communication, and classes will emphasize engagement with primary sources, cultural texts, and different forms of media.

Requirements/Evaluation:  Assignments will include participatory discussion, short papers, a midterm, and a final exam.
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Preference for upper-level (Junior/Senior) students, and students that have taken introductory courses in American Studies, History, and other Humanities disciplines
Expected Class Size: 20
Grading: yes pass/fail option, no fifth course option
Distributions: (D2) (DPE)
Difference, Power, and Equity Notes: This course focuses on resistance to different forms of inequality throughout US history. Students will gain a greater understanding of how race, gender, sexuality, class, and citizenship have been debated, contested, and reified through processes of resistance and repression. The course materials will seek to highlight the voices of groups and individuals that have often been left out of mainstream historical narratives.

AMST 372  (F)  Technologies of Race  (DPE) (WS)
Cross-listings: AFR 374 STS 373 AMST 372
Primary Cross-listing
This course is an introduction to theories, methods, sources, and approaches for interdisciplinary research and creativity in and through the interdisciplinary field of American Studies. We will focus on the intersection of race, gender, sexuality, and disability with modern media technologies, from early photography in the mid-19th century to contemporary trends in machine learning and artificial intelligence. Through a process of shared inquiry, course participants will investigate the ways that historical legacies of oppression and futuristic speculation combine to shape human lives in the present under racial capitalism. Whether analyses of the automation of militarized border control in Texas, or of the ways that obsolete, racist concepts are embedded in machine vision and surveillance systems, the readings in the course will chart out the key moments in the co-evolution of race and technology in the Americas. Students will gain a working competence in all four tracks of the American Studies major (Space and Place; Comparative Studies in Race, Ethnicity, and Diaspora; Arts in Context; and Critical and Cultural Theory). Finally, we will also explore alternative paths toward a future where technology might help to effect the abolition of oppressive structures and systems, rather than continue to perpetuate them.

Requirements/Evaluation: Four papers, in-class writing/reflective work, and a final exam.
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: AMST majors or prospective majors.
Expected Class Size: 16
Grading: no pass/fail option, yes fifth course option
This course is cross-listed and the prefixes carry the following divisional credit:
AFR 374(D2) STS 373(D2) AMST 372(D2)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to contextualize technologies historically and in relation to one another, with attention to their entanglements with racial discourses and racism. Students gain critical skills that equip them to imagine possible futures where technologies serve increasingly as abolitionist tools.

AMST 373  (F) US Empire in the Philippines: Capitalism, Colonialism, and Revolution  (DPE)

Cross-listings: AMST 373 AAS 373

Primary Cross-listing
When the United States of America took official colonial control of the Philippines in 1898, Filipinos had already been fighting an anti-colonial struggle against Spain for several years. With the start of the Philippine-American War in 1899, that fight continued. Keeping the always-present possibilities of Filipino revolt in mind, this course takes an interdisciplinary approach to the study of U.S. empire-building in the Philippines from the late-nineteenth to the mid-twentieth centuries. We will frame our understanding in terms of racial capitalism and the coloniality of power, with particular attention to the materiality of empire -- infrastructure, architecture, financing, markets, and population management -- and U.S. empire's production of racial, gender, indigenous, religious, and sexual categories and difference. Our readings may be drawn from critical ethnic studies, gender & sexuality studies, American studies, postcolonial theory, Black studies, disability studies, and more. Topics include the military "management" of Muslim, Christian, and animist groups, the Katipunan society, interracial intimacies, and early 20th century Filipino migration to the United States. Students are expected to take an active role in discussion, but no prior knowledge of the Philippines is expected.

Requirements/Evaluation: Evaluation will be based on a semi-self-paced portfolio model: by two different points in the semester, students will be responsible for handing in a collection of 1-2 page response papers, discussion posts, discussion questions, and/or a paper analyzing a primary source or theoretical argument. The minimum requirement is a word count e.g. 3,000 words by 10/15, another 3,000 by 11/15. For the final, students will collect their work, revise at least 30% of it according to professor and peer feedback, and write a final reflection paper. In pairs, students will also lead discussion during one or more class sessions.

Prerequisites: None

Enrollment Limit: 15

Expected Class Size: 10-15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 373(D2) AAS 373(D2)

Difference, Power, and Equity Notes: This course examines the creation and maintenance of racial, indigenous, religious, gender, sexual, and abilist categories in the context of world-historic systems of power, namely capitalism and colonialism. It tracks the unequal relations of power between American colonizers and Filipino colonized subjects, while keeping live the inherent power of Filipino people for revolt.

Fall 2023
**AMST 374 (S) Black Critical Theory, Black Avant-Garde (DPE)**

**Cross-listings:** AMST 374 ENGL 311 AFR 376

**Primary Cross-listing**

What is the relationship between violence and what constitutes the Black avant-garde and Black critical theory? Is it possible to conceptualize the latter two without an investigation of Black rebellion and its relationship between Black artistic and intellectual production? Can one argue that Black critique is none other than Black experimentation in form, or that Black abstraction is the requisite effector for all modes of Black praxis and thought? This course will explore these questions through a study of Black continental and diasporic avant-garde texts in multiple mediums. Alongside, we will also consider the emergence of contemporary Black critical theory, chronicling its development as both experimental and critical. Through the works of historical subjects of experimentation also considered to be objects critiquing in experimental form, the course will approach Black avant-gardism and Black critical theory as a productive opportunity to think about Blackness as critique, as experimentation, and as theoria. This pairing of Black avant-gardes and Black critical theory takes "avant" at its root—indicating what precedes or takes precedent—and "garde" as what is preeminent, or what protects. As such, we will start with the question of whether blackness, as an ideological fiction produced through violent historical ideologies and practices, could ever, or ever not, be anything but avant-garde?

**Requirements/Evaluation:** Weekly discussion posts and questions, a research presentation, and two 10-12 page papers

**Prerequisites:** None

**Enrollment Limit:** 15

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**AMST 375 (S) Asian American Sexualities (DPE)**

**Cross-listings:** AAS 375 AMST 375

**Primary Cross-listing**

Often framed as objects of sexual use and perversity, how might Asian/Asian American subjects contend with these positions and enact their own sexualities? Anchored in this question, this theory-intensive course introduces students to core texts in the fields of Asian American Studies, feminist and queer theory, and performance studies alongside a host of cultural productions (e.g., film, visual art, performance, poetry). It will focus on an array of topics, including the pressures to "come out," the history of "comfort women," HIV/AIDS, orientalism/ornamentalism, post-9/11 and the criminalization of Sikh, South Asian, and Muslim Americans, queer kinship, representations in pornography, drag performance (among others) to explore questions of racialized and sexualized pain alongside pleasure, play, and critique from feminist, queer, and queered positions.

**Requirements/Evaluation:** in-class discussion, weekly posts, class presentation, short paper, and final project (paper and creative options)

**Prerequisites:** preferably AMST 125 or WGSS 101/202

**Enrollment Limit:** 20

**Enrollment Preferences:** students who demonstrate interest in AAS; AMST/WGSS majors and potential AAS concentrators

AMST 379 (S) American Pragmatism

Cross-listings: PHIL 379 AMST 379

Secondary Cross-listing

Along with jazz, pragmatism stands as the greatest uniquely American contribution to world culture. As the music wails in the background, we will study the classic pragmatists: William James, C. S. Peirce, and John Dewey. We will continue with the contemporary inheritors of the tradition: Cornel West, Richard Rorty, and Hilary Putnam. Although it has influenced both analytic and continental philosophy, pragmatism is a powerful third philosophical movement. Always asking what practical difference would it make, our authors investigate the central questions and disputes of philosophy, from epistemology and metaphysics to ethics and religion. Rather than seeing philosophy as an esoteric discipline, the pragmatic philosophers (with the possible exception of Peirce) see philosophy as integral to our culture and see themselves as public intellectuals.

Requirements/Evaluation: final paper, several short assignments

Prerequisites: at least two PHIL courses

Enrollment Limit: 25

Enrollment Preferences: Philosophy and American Studies majors, then seniors and juniors of any major

Expected Class Size: 12-15

AMST 402 (S) Marxist Feminisms: Race, Performance, and Labor (DPE) (WS)

Cross-listings: THEA 402 AMST 402 AFR 329 WGSS 402

Primary Cross-listing

This seminar provides an overview of queer, black and women of color feminist, decolonial, and critical ethnic studies critiques of orthodox Marxism. Beginning with core texts from the tradition, including Capital Volume I, we will examine a range of social positions and modes of extraction that complicate Marx’s emphasis on the white male industrial factory worker. Every week, we will focus on texts that foreground conditions of reproduction, racial slavery, care and domestic work, indentured servitude, immigrant labor, land expropriation, and sex work among others. Throughout the seminar and particularly at the close of it, we will turn to critical perspectives and aesthetic practices that not only respond to these conditions but also incite new social relations and ways of being in the world. As such, this seminar will equip students with critical understandings of how racial capitalism has fundamentally relied on the mass elimination, capture, recruitment, and displacement of different racialized, gendered, and abled bodies in and beyond the U.S. as well as how the capitalist system of value and life under these conditions can and must be undone and reimaged.

Requirements/Evaluation: in-class discussion, short weekly posts, class presentation, final project

Prerequisites: previous coursework in AMST, WGSS, AFR, THEA, or LATS

Enrollment Limit: 12

Enrollment Preferences: senior AMST majors; juniors or seniors with previous experience in AMST, WGSS, AFR, and THEA

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
THEA 402(D2) AMST 402(D2) AFR 329(D2) WGSS 402(D2)

Writing Skills Notes: Students will present on and submit a 5-8 pg paper that rigorously analyzes and expands on a keyword. They will receive detailed feedback from me and one other student regarding grammar, structure, style, and argument. Using written and classroom feedback, students will then revise and resubmit their keyword papers to add to our final classroom keyword toolbox. For the final assignment, students will have the option to write a 8-10 page final research paper or manifesto.

Difference, Power, and Equity Notes: This course satisfies the DPE requirement as it explores difference, power, and equity by asking how racial, gendered, sexual, and class differences are produced, whose voices are centered and whose are excluded, and what forms of labor is valued over other forms.

Attributes: WGSS Theory Courses
Not offered current academic year

AMST 404 (S) New Works in Asian American Studies (DPE)

In this seminar, we will consider recent and/or recently intensifying debates, conversations, and intellectual directions in Asian American Studies. Topics may include settler colonialism; indigeneity, the Pacific, and the transpacific; war and refugee experiences; media, including video games; political participation, conservatism, and religion; affirmative action; sexual violence; mental health; and comparative and relational racialization e.g. scholarship at the intersection of Asian American, Latinx, Native American/Indigenous, and African American/Africana studies. We may also consider some new works of Asian American film and literature, and the criticism it generates. Course material will focus on scholarship that critically engage race, gender, sexuality, indigeneity, and/or disability as key terms. Students may be asked to develop a final project or paper based on one of the topics or books covered in the course; review a new work independently; or conduct an interview with an author. Students will gain an understanding of the field’s recent concerns but also become familiar with the broader political, social, and cultural contexts from which they emerge.

Requirements/Evaluation: In-class participation, weekly response papers, in-class presentation of the reading, final paper or project

Prerequisites: AMST125 (Introduction to Asian American Studies) or equivalent from another unit e.g. WGSS

Enrollment Limit: 12
**Enrollment Preferences:** Senior American Studies majors; juniors or seniors with demonstrated interest in Asian American Studies (especially previous coursework); seniors majoring in LATS, Africana, WGSS, or doing related independent/Honors coursework

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course centers Asian American scholarship that foregrounds modes of social difference, systems of power, and formations of identity, solidarity, and community. Students consider how Asian American experiences are shaped by uneven and often unjust social processes, and aspects of identity, such as race, indigeneity, gender/sexuality, class, and religion. Students will also consider Asian American intersections with Indigenous/Native American, Latinx, and African American experience.

**Attributes:** AMST 400-level Senior Seminars

Not offered current academic year

**AMST 405 (F) Critical Indigenous Theory** (DPE)

Intellectual decolonization is not a bounded project. On one hand, it demands a vocabulary of difference and refusal that rejects colonial theories and epistemologies. On the other, it demands that we interrogate our own intellectual and cultural traditions and trauma. Critical Indigenous theory is a tool in those projects, as it offers a corrective and an opening up of both dominant critical theory traditions that violently erase Indigenous bodies and political realities and of Indigenous theory that can essentialize difference and replicate oppressive dynamics in our communities. Critical Indigenous theory seeks to understand the structures and relations of power in settler colonialism, nested sovereignty, and culturally specific Indigenous philosophical traditions, like Indigenous studies more broadly, but also questions the key concepts that define Indigenous studies: tradition, sovereignty, authenticity, identity, race, gender, and sexuality. In this course, we will read major works in critical Indigenous theory that address indigeneity as it relates to race, postcolonial theory, feminist and two-spirit critique, alternative political engagement with the settler colonial state, and questions of "colonial unknowing." We will work on cultivating the reading practices needed to parse dense theoretical texts, and over the course of the semester you will develop a research project on a topic of your choosing that will allow you to take critical Indigenous theories and employ them as analytic tools and lenses.

**Requirements/Evaluation:** attendance and participation, one discussion prospectus, and a 20-page research paper

**Prerequisites:** junior or senior status and some background in American Studies, Native American Studies, or Critical Theory or permission of the instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** American Studies majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** Students will be invited to think deeply about the intersections of race, gender, colonialism, sexuality, and epistemology, and develop skills necessary to identify the theoretical basis of decolonial activism.

**AMST 406 (F) Environmental Planning Workshop: Community Project Experience**

**Cross-listings:** AMST 406 ENVI 402

**Secondary Cross-listing**

In this class you apply your education to effect social and environmental change in the Berkshires. Students work in small collaborative groups to address pressing issues facing the region. Class teams partner with community organizations and local & regional governments to work with clients to develop solutions. You will learn while doing and contribute to the community. The field of environmental planning encompasses the built environment, such as housing, zoning, transportation, renewable energy, waste, neighborhood design; the natural environment, such as open space, farmland, habitat and species protection, natural resource protection, air and water pollution and climate change, and the social environment, such as racial zoning, recreation, placemaking, ecjjustice, food security, and healthy communities. Skills taught include basic land use planning, GIS mapping, developing and conducting surveys, interview techniques, community-based research, project management, public presentations and professional report-writing. The class culminates in public presentations to the client organizations. The class hours include time for team project work, client
meetings and team meetings with the professor. Recent project topics: https://ces.williams.edu/environmental-planning-papers/

**Class Format:** The weekly conference session (1 hour) is dedicated to site visit field trips, team project work, client meetings and team meetings with professor.

**Requirements/Evaluation:** Response papers (three 1-page papers), in-class exercises, class discussion, small group work, public meeting attendance, project work, final report (due in segments during semester) and final presentation.

**Prerequisites:** ENVI 101 recommended; open to juniors and seniors.

**Enrollment Limit:** 16

**Enrollment Preferences:** Environmental Studies majors and concentrators, American Studies majors, Maritime Studies concentrators.

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Course fulfills senior seminar requirement for Environmental Studies Majors, Environmental Studies Concentrators, and Maritime Studies Concentrators. American Studies Space & Place elective. Course is an Environmental Studies Concentration elective (ENVI Policy and ENVI Humanities, Arts + Social Science) and Environmental Studies Major elective.

**AMST 407 (S) Colonialism and Critical Theory** (DPE) (WS)

French philosopher Michel Foucault argued that "racism first develops with colonization, or in other words, with colonizing genocide." Many prominent philosophers have developed intellectual tools that can help us better understand the ongoing colonialisms that impact our world. At the same time, many of these same theorists—Foucault included—are criticized for failing to pay adequate attention to the colonialism that shaped their historical moments. Taking this paradox as our jumping-off point, this course will examine prominent philosophical and theoretical texts and assess their utility for understanding processes of colonialism, imperialism, and militarism. We will also explore how the interventions of Postcolonial Theory and Critical Indigenous Theory highlight gaps in prominent theories of political-economy, ideology, biopower, race, gender, sexuality, and more. How do ideas like orientalism, settler-colonialism, sovereignty, or decolonization challenge the traditional "canon" of critical theory? How do intellectual ideas evolve over time, and how can we use these tools to make sense of a complex world too-often organized around fundamental inequalities? In our class meetings students will develop the reading and discussion practices necessary to parse dense theoretical texts, and practice deploying theoretical concepts to better understand complex philosophical, ethical, and political questions.

**Requirements/Evaluation:** Assignments will include participatory discussion, weekly responses to assigned readings, a midterm essay exam, and a final paper.

**Prerequisites:** Introductory course in American Studies, History, Native and Indigenous Studies, English, or Philosophy; or some prior coursework on colonialism, postcolonial theory, or critical theory

**Enrollment Limit:** 15

**Enrollment Preferences:** AMST senior major, but anyone with upper-level humanities training welcome

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** This course will develop student writing skills through short reading-response papers and smaller "low stakes" writing assignments, combined with a semester-long project that will break the research and writing process into manageable components, including revision and peer review.
Difference, Power, and Equity Notes: This course explores the intersections of race, gender, sexuality, class, and other social structures often organized around inequality. Students will develop tools to analyze how power shapes the differences produced by colonialism and similar historical processes.

AMST 409 (F) Prehistories of the War on Terror (DPE) (WS)

On September 11th, 2001, members of the terrorist organization Al-Qaeda hijacked four airplanes and crashed them into the World Trade Center, the Pentagon, and rural Pennsylvania. For many Americans this tragedy seemed to come out of nowhere. In an attempt to historicize these shocking events, and the global wars that resulted from them, this course will examine the prehistories of the War on Terror. We will study the United States’ emergence as a global power after World War II, US foreign policy and its relationship to the Middle East, and the political and cultural currents that informed American responses to the events of 9/11. We will also explore the history of the War on Terror itself. Topics will include the Cold War, the environmental history of oil, the history of terrorism, the relationship between race and war, and the invasions of Afghanistan and Iraq.

Requirements/Evaluation: Assignments will include participatory discussion, daily responses to assigned readings, short papers, and a research paper.

Prerequisites: Introductory course in American Studies or History; or some prior coursework on US history, empire, foreign relations, race, environment, and violence.

Enrollment Limit: 15

Enrollment Preferences: American Studies majors and students that have completed upper-level coursework in American Studies, History and related fields.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: In this workshop-style course students will focus on developing their skills in reading primary and secondary literature, advancing historical arguments, conducting research, engaging in discussion, and producing academic writing. Short writing assignments, peer review, and revision will break down the research process into manageable parts, scaffolding to a final research paper.

Difference, Power, and Equity Notes: This course explores the intersections of race, gender, sexuality, class, and other social structures often organized around inequality, with an emphasis on the Cold War and War on Terror. Students will develop tools to analyze how power shapes the differences produced by colonialism, empire, global capitalism, and similar historical processes.

AMST 411 (F) Transnationalism and Difference: Comparative Perspectives

Cross-listings: AMST 411 WGSS 409 LATS 409

Secondary Cross-listing

In the age of digital communications and mobile applications such as WhatsApp and Skype, transnational living has rapidly emerged as the norm as opposed to the exception. However, what does it really mean to "be transnational"? How are the lived experiences of transnational individuals and communities shaped by categories of difference such as gender, ethno-racial identity, sexuality, and class? What impacts do the growing number of transnational citizens and residents in the U.S. have on our understanding of "American" identity in the local, national, and global contexts? In this interdisciplinary seminar we will analyze recent theories regarding the origins and impacts of transnationalism. Particular attention will be paid throughout the semester to the intersections of gender, ethno-racial identity, sexuality, and class in connection with everyday transnational dynamics. The broad range of case studies examined includes Central American, Colombia, the Dominican Republic, Haiti, Indonesia, Jamaica, Mexico, the Middle East, and Peru.

Class Format: This course will follow a discussion format.

Requirements/Evaluation: student participation, an original 12-15 page semester-long research paper conducted in stages, and student presentation
Prerequisites: LATS 105, WGSS 101 or AMST 201; junior or senior standing

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, Women's, Gender, and Sexuality Studies majors, and American Studies majors by seniority. If the course is overenrolled students may be asked to submit a brief writing sample.

AMST 412 (S) Cold War Archaeology (DPE) (WS)

Cross-listings: AMST 412 STS 412 AFR 394

Primary Cross-listing

In this advanced American Studies course, we will examine Cold War history and culture with attention to the intersection of racialization and nuclear paranoia. The concurrent unfolding of the struggle for Civil Rights and the national strategy of Civil Defense played out against the backdrop of a global ideological battle, as the United States and the Soviet Union fought each other for planetary domination. From the scientific fantasy of bombproofing and "safety in space," to the fears of both racial and radioactive contamination that drove the creation of the American suburbs, the affective and material dimensions of nuclear weaponry have, from the beginning, been entangled with race. Drawing on the critical and analytical toolkits of American Studies and media archaeology, students will dig beneath the surface of received narratives about the arms race, the space race, and race itself. Students will uncover generative connections between mineral extraction, the oppression of Indigenous populations, the destructive legacies of "urban renewal," and the figure of the "typical American family" huddled in their backyard bunker. Finally, this course will examine the ways in which the Cold War exceeds its historical boundaries, entangles with the ideology and military violence of the Global War on Terror, and persistently shapes the present through its architectural, affective, and cultural afterlives.

Requirements/Evaluation: Three short papers, in-class writing/reflective work, and a final paper.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: AMST majors or prospective majors.

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 412(D2) STS 412(D2) AFR 394(D2)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one's thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to contextualize historical events during the Cold War in relation to racialization, inequitable distributions of resources, and the stratification of national space in relation to risk and radioactivity. Students gain critical skills that equip them to see the ways in which the Cold War continues to shape processes of racialization, oppression, and imperial extraction, and spatial arrangements.

Cross-listings: WGSS 414 AAS 414 AMST 414

Primary Cross-listing

How does one "do" or perform race and gender? This seminar offers a survey of foundational and emergent scholarship at the nexus of performance studies, critical ethnic studies, and gender and sexuality studies tandem with contemporary visual and performance art works. In doing so, it will explore how the framework of performance destabilizes notions of race and gender as identities that we are and approaches them as ones we enact, do, and undo. We will begin the course by tracing key concepts in performance studies before examining the relational ways racialized and gendered subjects strategically mobilize performance to respond to, negotiate, and navigate life under the conditions of anti-blackness, settler colonialism, racial capitalism, and empire. To this end, we will explore how seemingly racialized and gendered qualities, such as passivity, silence, depression, withholding, sexual submissiveness, contagion, and ignorance, are retooled as feminist and queer of color actions.

Requirements/Evaluation: in-class discussion, weekly posts, class presentation, two short written assignments, and final project (with creative option)

Prerequisites: AMST 101 or WGSS 101/202 and upper level courses in AMST, WGSS, AFR, or related fields

Enrollment Limit: 12

Enrollment Preferences: AMST seniors and juniors; WGSS seniors and juniors; AAS concentrators

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 414(D2) AAS 414(D2) AMST 414(D2)

Writing Skills Notes: Students will submit two written assignments - an object analysis paper and annotated bibliography - and give and receive peer feedback. They will use these building blocks and feedback on them to complete their final project.

Difference, Power, and Equity Notes: This course centrally examines the intersections of race, gender, sexuality, class, and ability. It explores specific strategies used to critique and navigate conditions under overlapping systems of power, including racial capitalism, settler colonialism, anti-blackness, and empire.

AMST 418 (S) Modernisms and the Archive

Cross-listings: ENGL 418 AMST 418

Secondary Cross-listing

This seminar positions us at the intersection of archival theory, print culture, and literary study in order to chart new pathways for understanding the making of modern poetry and poetics during the period of literary history (from 1900 to 1945) that we most closely associate with the term Modernism. Modernist Studies is at the moment undergoing a major and exciting shift made possible by digital archives that allow us to access and document the rich intertextual experience of reading Modernism as it unfolded in the influential little magazines that came to define Modernisms. Some, like Poetry magazine, defined the new poetry strictly along aesthetic lines and treated these publications as collectible objects. Others, such as The Crisis, brought together poetry and the politics of race and social justice and encouraged, as Bartholomew Brinkman has argued, "both aesthetic and socially engaged readings." We take advantage of digital archives, as well as physical ones, in order to tell new stories about both familiar and unfamiliar writers that can be discovered at the intersections of literary history and archives. Students will also have the opportunity to work in the Sterling Brown archive here at Williams. Recently acquired by Williams College Library Special Collections, this significant archive documents the life, work, and poetic practice of African-American writer and educator Sterling Brown, whose poetry and prose spans nearly five decades of the twentieth century, yet Brown has often been left out of the narrative we tell about modern poetry. Work in the Sterling Brown archive will culminate in a curated public exhibition featuring your discoveries. Iain Bailey has argued that we should think of the archive "as a place of work, rather than as a cache from which to draw certainties." With this caveat in mind and in the spirit of discovery, we will act over the course of the semester as investigators, curators,
From 18th-century claims that climate determined character to the 21st-century proliferation of DNA tests underwriting claims to Indigenous ancestry, race, colonialism, identity, and "nature" operate as interconnected terrains of power. Anchored in the contexts of U.S. colonialisms, racialization, and accumulation, this course aims to expose students to the cultural politics of "nature" as a way of "doing" American Studies. Specifically, this course investigates formations of and struggles against U.S. colonialisms, racialization, and accumulation via the many symbolic and material iterations, negotiations, and contestations of the contingent relations between and among human and non-human natures. Organized around a significant research paper and weekly written responses, this course ultimately aims to foster students' critical writing, reading, analytical thinking, and comparative inquiry skills across such contexts and sites of contestation, and across texts of different genres and media. We will work with a wide range of primary sources, including published fiction and poetry, legal documents, newspaper articles, speeches, recorded songs, and films, photos, paintings and other visual culture. By the end of this course, students should be able to describe the historical foundations of dominant ideas, attitudes, and practices toward non-human natures, as well as analyze how ideas of "nature" mediate the ways in which colonial, racial, gender, and sexual categories and structures inform and are (re)produced by U.S. institutions and in public areas such as the law, public policy, and property. Finally, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation.

**Requirements/Evaluation:** Evaluation will be based upon the following: Class Participation: 25%; Weekly Responses (350-500 words): 25%; Final Research Essay: 50%, broken down by Research Proposal (2-3 pgs, 10%), Peer Review and Feedback (2 pgs, 10%), Presentation (10%); Essay (15 pgs): 20%.

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** American Studies majors will be given preference; secondary preference given to students specializing in Native American and Indigenous Studies, as well as Africana and Environmental Studies majors.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)  (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 430(D2) ENVI 430(D2) AFR 390(D2)

**Writing Skills Notes:** Emphasis on revision and writing process includes: One thesis paper at 15 pages (receiving critical feedback from professor and peers); one thesis paper revision with critical feedback from professor and peers, including one letter of revision explaining the student's revision process; one research proposal (including thesis outline and annotated bibliography of primary texts) with critical feedback from professor; student
presentations and roundtable discussion based on the final paper.

**Difference, Power, and Equity Notes:** By the end of this course, students should be able to interpret how racialized and colonized peoples' visions, representations, and practices of liberation with regard to relations with non-human natures and the materiality of land precede, contend with, and exceed normative political, economic, and social categories of governance and systems of dispossession and exploitation. In order to addresses such issues of difference, power, and equity, this course provides students with the necessary th

**AMST 455 (F) Material Cultures in North American History** (DPE)

**Cross-listings:** AMST 455 HIST 455

**Secondary Cross-listing**

Material culture studies consider the dynamic relationships that people develop with the physical world. Tangible items like clothing, furniture, tools, and the built environment are all shaped by communities’ identities, aspirations, resources, struggles, and forms of power. This course approaches North American histories through the lens of materiality, and examines how interdisciplinary methodologies can illuminate multiple or alternate understandings of the past—and its continuing impacts in the twenty-first century. While many historians emphasize written archives and documents as primary sources, scholars and practitioners of material culture studies center everyday as well as exceptional material items that communities have produced and interacted with over many generations. Equally important are the afterlives of these items. At different turns, and across time, social groups have cherished certain belongings; contested, rejected, or remade them; ascribed and activated meanings that may be very different from what the original makers conceived. These continuing transits compel reckoning with major issues of justice, rights, restitution, and sovereignty. The course traces key theories, ethics, and practices of caretaking, preservation, repatriation, curation, creative re-making, and digitization. Members will participate in a series of visits to area museums, collections, and meaningful places to deepen skills of critical analysis. The scope of the course is North American and at times transoceanic. It also includes substantial focus on our location in the Northeast and local formations of materiality and memory, as well as topics in Native American and Indigenous Studies, settler colonialism, and decolonizing approaches. Class members will build familiarity with appropriate techniques for approaching and handling different forms of material culture. They will also cultivate skills for developing and carrying out an original research project; and explore diverse modes of analysis and expression for representing the stories of materials and the communities who engage with them.

**Requirements/Evaluation:** Active participation in class discussion and visits, reading reflections, in-class presentation, research project prospectus, research project

**Prerequisites:** Two prior courses in American History, American Studies, Native American and Indigenous Studies, or a related area

**Enrollment Limit:** 15

**Enrollment Preferences:** If overenrolled, junior and senior History and American Studies majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 455(D2) HIST 455(D2)

**Difference, Power, and Equity Notes:** This course examines diverse communities' historical experiences across North America in conjunction with resistances to Euro-American settler colonialism. It introduces students to foundational methodologies in material culture studies including decolonizing approaches, and explores key topics about caretaking, interpretation, and repatriation to descendant communities, such as the Native American Graves Protection and Repatriation Act.

**AMST 478 (S) Cold War Landscapes**

**Cross-listings:** HIST 478 AMST 478 ENVI 478

**Secondary Cross-listing**
The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in nations across the globe. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States and North America. We will then move on to examining others in Europe and the Soviet Union. Our approach to our topics will be interdisciplinary throughout the semester, with the additional goal of helping students frame their final projects. Students are encouraged to write their research papers on any geographical area of the world that interests them.

Requirements/Evaluation: class participation and semi-weekly critical writing on the reading; students will also be expected to keep up through the stages of the research paper process, which will involve submitting a short research plan, annotated bibliography, outline, and a rough draft, as well as the final 20- to 25-page paper.

AMST 490  (S)  The Suburbs  (WS)

Cross-listings: HIST 491 AMST 490 ENVI 491

Secondary Cross-listing

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

Class Format: Students will be assigned a tutorial partner, and tutorial pairs will meet with the professor for one hour each week at a regularly scheduled meeting time.

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History majors and students with previous coursework in History

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:

AMST 491 (F) Senior Honors Project: American Studies
This seminar is the first half of a year-long seminar that is required of AMST seniors who have been approved to write an honors thesis (critical-analytical, research-focused, creative, performative, or hybrid). Students will share work, critique each other's proposals and drafts, and support each other in the process of producing a thesis project. Although each student's major work for the year will be focusing on a specific topic with an advisor, the instructor of the honors seminar will offer helpful guidance on more general concerns such as conceptual approaches, research methodologies, creative exploration, the honing of arguments, writing issues, and other theoretical and practical questions. Satisfactory completion of the course will be required for students to continue on in the honors program.

Requirements/Evaluation: Satisfactory completion of the course will be required for students to continue on in the honors program.

AMST 17  (W)  Social Justice Advocacy/Just Futures in New York City

Winter Study Travel Course Proposal (January 2024) Social Justice in New York City

SPEC 27 (updated course last offered in Jan 2019) Instructor: Joy James, Ebenezer Fitch Professor of Humanities Instructor Email: jjames@williams.edu Department: American Studies/Humanities Course Title: Social Justice Advocacy/Just Futures: Student Experiential Learning with NYC Nonprofits: IFCO, BKLYN Combine; Ms. Stephanie Science Club/PS; JMAC for Families. This winter study course revises the 2019 course to include two additional nonprofits: BKLYN Combine and JMac for Families (Harlem). I. Ms. Stephanie Science Club Williams College students will shadow Stephanie E. Farmer, founder & Executive Director of Triple F Empowerment, Inc, a small Harlem-based nonprofit/grassroots organization engaged in STEAM education in public, under-resourced elementary and middle schools. Interns will have the opportunity to work with elementary students in Harlem through hands-on STEAM educational activities, facilitate science workshops conducted at a New York City public school during the week and volunteer on Saturdays at Ms. Steph's Science Club. As educational interns, students will have a weekly Q&A (debrief) session with Ms. Steph about education and STEAM. II. The BKLYN Combine Public Debate Program (BCPD) co-founded by Dr. Keith White, Esq. focuses on debate and critical analyses support youths to "interrogate information" so that "their relationship to that information becomes intimate and granular." The BCPD works to offer opportunities for critical analyses and learning legal rights for youths who also are introduced to debate. III. JMac for Families is based in Harlem, NY and works on behalf of working-class families who face unwarranted removal of their children through foster care. https://jmacforfamilies.org/ IV. IFCO is a nonprofit based in Harlem that provides medical care packages and advocacy for under-resourced communities and nations.

Requirements/Evaluation: A 10-page paper; Two five page papers; participations in seminar discussions, participation in nonprofit organizations engagement, journal.

Prerequisites: Interests in social justice and commitment to engage with nonprofits and to do prep readings on politics, human rights and civil rights advocacy relevant to NYC and specified nonprofits.

Enrollment Limit: 8

Enrollment Preferences: Preference is for students who are comfortable in an urban environment and who have interest in social justice, diverse communities, political analyses and civic engagement.

Expected Class Size: 8

Grading: pass/fail only

AMST 18  The Toxic Legacy of Local History: Industrialization, Deindustrialization, and Environmental Justice

The history of industrialization in the northern Berkshires provides a remarkable illustration of the forces of that have shaped American society over the last two centuries. In this course, we will examine a number of local case studies that illustrate these forces and their outcomes, with particular attention to the history of North Adams. We will investigate and discuss, - How the needs of industry determined the location and the subsequent economic development of North Adams; - The transition from nineteenth to twentieth century industrial production, with particular attention to the dramatic increase in sophistication of products and the toxicity of the waste stream; - The connection between immigration, labor, and unionization, exemplified by the recruitment of Chinese immigrants to North Adams to break a strike; - The rise of environmental regulation and the rapid exportation of hazardous industries to developing nations, leaving industrial cities like North Adams with almost no economic basis; - The toxic legacy of our industrial past: A housing stock heavily contaminated by lead paint; a neighborhood razed because of contaminated groundwater, and a river so polluted that fish caught in it can't be eaten. The course will highlight the local and global environmental justice and public health consequences of the different phases of industrialization, and will consider approaches to mitigating some of these impacts.

Requirements/Evaluation: Paper(s) or report(s); Presentation(s)

AMST 99 (W) Independent Study: American Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

Not offered current academic year
The disciplines of anthropology and sociology aim to teach students how to enter into the social/cultural worlds of others, how to grasp those worlds from the viewpoints of their inhabitants, and how to articulate those denizens’ habits of mind, worldviews, and values to broader audiences. Anthropology critically analyzes social forms and practices in all their local and global diversity, illuminating the cultural grounding of the ideologies, narratives, and structures in which we are all implicated. Archaeology extends this analysis to social formations of the historical and prehistorical past. Sociology studies the nature and trajectories of modernity, examining the intricacies of industrial and post-industrial societies and the dilemmas that confront individuals in modern social systems. These disciplines introduce students to classical and contemporary theories that illuminate the contours and contradictions of social experience. The Anthropology & Sociology program promotes a critical engagement with these theories while at the same time bringing evidence and case studies into conversation with theory.

The Department emphasizes qualitative fieldwork in its many forms. We teach students how to formulate, frame, and address intellectual problems. We also teach students the empirical methods widely used in anthropology, sociology, and other related disciplines, including, but not limited to ethnography, participant observation, interviewing, discourse and visual analysis, archival research, oral history, and archaeological methods.

Because the program emphasizes critical thinking skills to assess social claims made by others, and the application of anthropological and sociological skills to present day concerns, undergraduate training in Anthropology or Sociology has proven invaluable to majors pursuing a range of careers, including public policy, diplomacy, international development, marketing, social media development, K-12 education, journalism, medicine, and law.

MAJORS

The department offers separate majors in both Anthropology and Sociology, with a broad and diverse array of courses in both disciplines. The department is committed, however, to the unity of the social sciences. To this end, Anthropology and Sociology offer joint core courses in methodology.
and theory, as well as several elective courses in common. All joint courses are designated “ANSO.”

**Requirements**

For the degree in Anthropology or Sociology, students must complete a minimum of nine courses as outlined below:

**Core Courses**

Majors in both disciplines must take a sequence of four core courses. Three of these are joint (ANSO) courses. The sequences are:

**Anthropology**

ANTH 101 How to Be Human

**Sociology**

SOC 101 Invitation to Sociology

**Joint Courses**

ANSO 205 Ways of Knowing

ANSO 305 Social Theory

ANSO 402 Senior Seminar

**Elective Courses**

Majors in Anthropology or Sociology must take five elective courses from the course listings of their respective disciplines or from the joint ANSO listings. Two of the courses chosen are normally at the 300 level or above. In close consultation with their departmental advisors, students may take some selected courses from other disciplines to fulfill major requirements in either Anthropology or Sociology.

Majors in each wing of the department are allowed to count up to two courses in the other wing towards fulfillment of their major requirements.

**STATISTICS AND DATA ANALYSIS**

In addition to the nine total courses required for the major, it is recommended that Anthropology and Sociology majors take Statistics 101 or a comparable course in statistics and data analysis.

**AREA STUDIES CONCENTRATION**

Students who wish to combine a major in Anthropology or Sociology with an Area Studies concentration are encouraged to do so. Courses taken to satisfy an Area Studies requirement may be counted toward the major with prior approval of a student’s departmental advisor. The only exception to this rule is the Area Studies senior seminar, which cannot ordinarily be counted toward the Anthropology or Sociology degree.

**LANGUAGE STUDY, STUDY ABROAD, AND WINTER STUDY**

Departmental advisors will help interested students integrate a major with study abroad, foreign language study, or field research during the winter study period. The department encourages Williams students to take advantage of established foreign study programs in Egypt, Japan, India, Hong Kong, and other countries. Because some foreign study programs do not offer courses that can be counted toward the Anthropology or Sociology degrees, however, sophomores planning to study abroad in junior year must consult with the departmental advisor before declaring a major.

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). We welcome discussions of curricular plans for those major who travel abroad in their junior year. However, typically, students don’t have access to all the salient information until AFTER they have taken the course.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments. The syllabus and readings/assignment information is required in cases when the course title and description are not sufficient to ascertain whether a course should count towards the major. We also request information on course hours.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. We credit two, and in special cases three courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. The expectation is for an intellectually rigorous semester-long course with a paper/exam component.
Are there specific major requirements that cannot be fulfilled while on study away?
Yes. ANSO 205, ANSO 305 and ANSO 402 are almost always taken in the department.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Yes. ANSO 305 is offered in the fall and ANSO 205 and ANSO 402 only in the spring. We advise our majors to be aware if they plan to spend all or part of their junior year abroad.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
In one case, a student had assumed that he could take the equivalent of ANSO 205 abroad, and was disappointed to discover that was not the case. He ended up taking ANSO 205 his senior year.

THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY
Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W31-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.

ANSO 205 (S) Ways of Knowing
An applied exploration of how one makes sense of the social world through fieldwork. Some of the key questions of the course are: What are the philosophical and epistemological underpinnings of social inquiry? How does one frame intellectual problems and go about collecting, sifting, and assessing field materials? How do qualitative and quantitative approaches to social inquiry differ? How are they similar? What is the importance of history to sociological and anthropological research? How do social researchers use archival and other documentary materials to interpret society? What is the relationship between empirical data and the generation of social theory? What are the ethical dilemmas of fieldwork and of other kinds of social research? How do researchers’ personal biographies and values shape their work? We will approach these problems both abstractly and concretely, through readings in epistemology as well as a series of case studies, drawing upon the field experiences of departmental faculty and guest speakers. The course will also feature hands-on training in field methods, in which students design and undertake their own pilot field projects.

Requirements/Evaluation: full participation in the seminar, several short written assignments, and a final research essay/proposal
Prerequisites: ANTH 101 or SOC 101 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 19
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)

Spring 2024
SEM Section: 01 W 1:10 pm - 3:50 pm Ben Snyder

ANSO 305 (F) Social Theory
An introduction to social theory in anthropology and sociology, with strong emphasis on enduring themes that cut across disciplinary divides. What is modern about modern social theory? How do social thinkers construe "society" and "culture," and have these constructions withstood challenges over time? What role does human agency play in the unfolding of social life, and where does that sense of agency come from in the first place? What are the forces that animate social interaction on the level of individuals, social groups and complex units like nation-states? What are the possibilities and limits of systematic approaches to the study of human social experience? The course emphasizes major differences between interpretive frameworks as well as the common elements that contribute to a deeper understanding of the social world.
Requirements/Evaluation: full participation in the seminar, regular reading response memos, a class presentation and three papers

Prerequisites: ANTH 101 or SOC 101, ANSO 205, or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Winter Study ---------------------------------------------------------------

ANSO 17  (W) Journalism Today

Even as the field is constantly changing and reshaping itself, at the heart of journalism is the desire to thoughtfully report and write stories about the world around us. This course is a bottom-up examination of what that means, from the practical skills of how to hone a story idea and conduct an interview, to the process of crafting a finished work. Throughout the class, we'll do a series of small exercises to work on specific skills, building up to a feature-length work about a subject that matters to you by the end of the month. We'll read classic work from the past, as well as some exemplary pieces from today, and question and consider the ethical, legal, and professional questions that are inherent to nonfiction work. We'll also discuss the real-world applications of these ideas with a busy schedule of guest speakers (in-person and virtual), who will talk about their work and careers in the news business. Past guests, many of them Williams alumni, have included journalists from the New York Times, the Wall Street Journal, the Washington Post, NPR, ABC News, Bloomberg, and ProPublica. This course would be quite useful for students with experience in journalism and are considering it as a career, but also for anyone who wants to understand more about how the media works, or would simply like to experiment with and try out new ways of telling stories that make a difference.

Requirements/Evaluation: Paper(s) or report(s)
Prerequisites: n/a
Enrollment Limit: 15
Enrollment Preferences: If overenrolled, a statement of interest in journalism would be appreciated.
Expected Class Size: NA
Grading: pass/fail only
Unit Notes: I am a freelance writer and editor who was a reporter and OpEd editor at the Berkshire Eagle, and earlier had covered national energy policy in Washington, wrote about sports in Moscow, and worked on the international desk at Newsweek in New York.
Materials/Lab Fee: $94

ANSO 20    The Ayn Rand Cult and the Libertarian Mind

The broad, "underground" influence of publicist-novelist Ayn Rand stands as one of the more curious sociocultural phenomena to have emerged out of post-War America. Examples: A youthful Alan Greenspan was a dedicated disciple of Rand's in the 1940s and 50s; Michael Milken was reported to have kept twenty-six copies of Atlas Shrugged in his jail cell while serving time for securities fraud; former Congressman Paul Ryan and Exxon CEO (and then- Secretary of State) Rex Tillerson both are avowed fans of Ayn Rand; each year to this day, Rand's books sell hundreds of thousands of copies; and, in a crowning instance of "canonization," the U.S. Postal Service issued a commemorative stamp in Rand's honor (as part of its "Great American Authors" series) in April 1999. This course will examine the nature and origins of the Rand phenomenon through reading of relevant works of journalism, fiction, and philosophy. Titles to be studied: Jeffrey Walker, The Ayn Rand Cult; Mary Gaitskill, Two Girls: Fat and Thin; Gene H. Bell-Villada, The Pianist Who Liked Ayn Rand (selections) and On Nabokov, Ayn Rand and the Libertarian Mind; and John Locke, Second Treatise of Government. We will also view two films: the movie version of The Fountainhead (1949) and the 1996 documentary Ayn Rand: A Sense of Life. Note: No books by Rand will be read in this class! It is a course not "about" Rand but rather about the cultural sociology and anthropology of Randism.
Requirements/Evaluation: class attendance and participation, readings, short weekly journal entries, and a final 10-page paper
Prerequisites: some previous acquaintance with Rand's work
Enrollment Limit: 30
Enrollment Preferences: by seniority (i.e. first seniors, then juniors, then sophomores, etc.)
Expected Class Size: NA

ANTHROPOLOGY AND SOCIOLOGY (Div II)

ANTHROPOLOGY

Chair: Professor James Nolan

- Zaid Adhami, Assistant Professor of Religion and Faculty Affiliate in Anthropology & Sociology; affiliated with: Religion, Anthropology & Sociology
- Bhumika Chauhan, Visiting Lecturer in Sociology
- David B. Edwards, James N. Lambert ‘39 Professor of Anthropology
- Antonia E. Foias, Preston S. Parish ‘41 Third Century Professor of Anthropology; on leave Spring 2024
- Kim Gutschow, Senior Lecturer in Religion and Anthropology/Sociology; affiliated with: Religion, Anthropology & Sociology
- Nicolas C. Howe, Professor of Environmental Studies and Faculty Affiliate in Anthropology and Sociology; affiliated with: Center for Environmental Studies, Anthropology & Sociology; on leave Fall 2023
- Peter Just, Professor of Anthropology
- Kamal A. Kariem, Gaius Charles Bolin Fellow in the Department of German and Russian and Faculty Affiliate in Anthropology and Sociology; affiliated with: German and Russian, Anthropology & Sociology
- Joel Lee, Associate Professor of Anthropology; on leave 2023-2024
- James A. Manigault-Bryant, Chair and Professor of Africana Studies and Faculty Affiliate in Anthropology and Sociology and Religion; affiliated with: Africana Studies, Religion, Anthropology & Sociology
- Gregory C. Mitchell, Professor of Women’s, Gender and Sexuality Studies and Faculty Affiliate in Anthropology/Sociology; affiliated with: Women, Gender & Sexuality Studies, Anthropology & Sociology; on leave 2023-2024
- James L. Nolan, Washington Gladden 1859 Professor of Sociology
- Marketa Rulikova, Visiting Assistant Professor of Sociology
- Olga Shevchenko, Paul H. Hunn ’55 Professor in Social Studies; on leave Fall 2023
- Christina E. Simko, Chair and Associate Professor of Sociology; affiliated with: Anthropology & Sociology, American Studies
- Ben Snyder, Associate Professor of Sociology
- Phi H. Su, Assistant Professor of Sociology; affiliated with: Anthropology & Sociology, Science & Technology Studies

The disciplines of anthropology and sociology aim to teach students how to enter into the social/cultural worlds of others, how to grasp those worlds from the viewpoints of their inhabitants, and how to articulate those denizens’ habits of mind, worldviews, and values to broader audiences.

Anthropology critically analyzes social forms and practices in all their local and global diversity, illuminating the cultural grounding of the ideologies, narratives, and structures in which we are all implicated. Archaeology extends this analysis to social formations of the historical and prehistorical past. Sociology studies the nature and trajectories of modernity, examining the intricacies of industrial and post-industrial societies and the dilemmas that confront individuals in modern social systems. These disciplines introduce students to classical and contemporary theories that illuminate the contours and contradictions of social experience. The Anthropology & Sociology program promotes a critical engagement with these theories while at the same time bringing evidence and case studies into conversation with theory.

The Department emphasizes qualitative fieldwork in its many forms. We teach students how to formulate, frame, and address intellectual problems. We also teach students the empirical methods widely used in anthropology, sociology, and other related disciplines, including, but not limited to ethnography, participant observation, interviewing, discourse and visual analysis, archival research, oral history, and archaeological methods.

Because the program emphasizes critical thinking skills to assess social claims made by others, and the application of anthropological and sociological skills to present day concerns, undergraduate training in Anthropology or Sociology has proven invaluable to majors pursuing a range of careers, including public policy, diplomacy, international development, marketing, social media development, K-12 education, journalism, medicine, and law.

MAJORS
The department offers separate majors in both Anthropology and Sociology, with a broad and diverse array of courses in both disciplines. The department is committed, however, to the unity of the social sciences. To this end, Anthropology and Sociology offer joint core courses in methodology and theory, as well as several elective courses in common. All joint courses are designated “ANSO.”

Requirements

For the degree in Anthropology or Sociology, students must complete a minimum of nine courses as outlined below:

Core Courses

Majors in both disciplines must take a sequence of four core courses. Three of these are joint (ANSO) courses. The sequences are:

Anthropology
ANTH 101 How to Be Human

Sociology
SOC 101 Invitation to Sociology

Joint Courses
ANSO 205 Ways of Knowing
ANSO 305 Social Theory
ANSO 402 Senior Seminar

Elective Courses

Majors in Anthropology or Sociology must take five elective courses from the course listings of their respective disciplines or from the joint ANSO listings. Two of the courses chosen are normally at the 300 level or above. In close consultation with their departmental advisors, students may take some selected courses from other disciplines to fulfill major requirements in either Anthropology or Sociology.

Requirements for Majors in Each Wing

Majors in each wing of the department are allowed to count up to two courses in the other wing towards fulfillment of their major requirements.

STATISTICS AND DATA ANALYSIS

In addition to the nine total courses required for the major, it is recommended that Anthropology and Sociology majors take Statistics 101 or a comparable course in statistics and data analysis.

AREA STUDIES CONCENTRATION

Students who wish to combine a major in Anthropology or Sociology with an Area Studies concentration are encouraged to do so. Courses taken to satisfy an Area Studies requirement may be counted toward the major with prior approval of a student’s departmental advisor. The only exception to this rule is the Area Studies senior seminar, which cannot ordinarily be counted toward the Anthropology or Sociology degree.

LANGUAGE STUDY, STUDY ABROAD, AND WINTER STUDY

Departmental advisors will help interested students integrate a major with study abroad, foreign language study, or field research during the winter study period. The department encourages Williams students to take advantage of established foreign study programs in Egypt, Japan, India, Hong Kong, and other countries. Because some foreign study programs do not offer courses that can be counted toward the Anthropology or Sociology degrees, however, sophomores planning to study abroad in junior year must consult with the departmental advisor before declaring a major.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). We welcome discussions of curricular plans for those major who travel abroad in their junior year. However, typically, students don’t have access to all the salient information until AFTER they have taken the course.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments. The syllabus and readings/assignment information is required in cases when the course title and description are not sufficient to ascertain whether a course should count towards the major. We also request information on course hours.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. We credit two, and in special cases three courses.
Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
Yes. The expectation is for an intellectually rigorous semester-long course with a paper/exam component.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes. ANSO 205, ANSO 305 and ANSO 402 are almost always taken in the department.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Yes. ANSO 305 is offered in the fall and ANSO 205 and ANSO 402 only in the spring. We advise our majors to be aware if they plan to spend all or part of their junior year abroad.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
In one case, a student had assumed that he could take the equivalent of ANSO 205 abroad, and was disappointed to discover that was not the case. He ended up taking ANSO 205 his senior year.

THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY
Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W31-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.

ANTH 101  *(F)(S)* How To Be Human  (DPE)
Is there such a thing as "human nature"? This course is an introduction to cultural anthropology (also known as social or socio-cultural anthropology), the study of human society in all its profound variety. Through deep, sustained, systematic participation in and observation of a particular social context, anthropologists seek to comprehend and illuminate the human condition. Anthropologists’ insights into the ways in which human institutions - language, economy, religion, social stratification, law, sexuality, art, the state, and many more - are culturally constructed and reproduced have transformed the way the world is understood. Puncturing ethnocentrism, anthropology's attentiveness to the ideas and practices of cultures in every part of the globe vastly enriches the archive of human answers to human problems. The distinctive methods of the discipline enable anthropologists to discover patterns and phenomena not discernible in other modes of enquiry. With such findings anthropologists are able to make critical interventions in public discourse and to demonstrate how deeply we are all shaped by cultural forces.

Requirements/Evaluation:  weekly posts in response to readings, two group presentations, several short writing exercises, final exam
Prerequisites: none
Enrollment Limit:  30
Enrollment Preferences:  first-year students and sophomores
Expected Class Size:  30
Grading: yes pass/fail option, no fifth course option
Distributions:  (D2)  (DPE)

Difference, Power, and Equity Notes: The course is an introduction to cultural anthropology and deals extensively with race, ethnicity, religion, gender, etc., as cultural constructs creating social difference, hierarchies of power, and the creation of inequities in communities and societies. Readings in ethnography, social theory, and sociology are designed to give students a deeper appreciation of all these issues.

Fall 2023
LEC Section: 01    TR 11:20 am - 12:35 pm    David B. Edwards

Spring 2024
LEC Section: 01    TR 8:30 am - 9:45 am    Peter Just
ANTH 103 (F) Pyramids, Bones, and Sherds: What is Archaeology?

Anthropology examines not only living societies, but also prehistoric cultures whose remains are found worldwide. This course will present how archaeology reconstructs the various aspects of human society from the physical record of prehistory. How do we study the subsistence and settlement patterns, the political and social organization, and the economy and ideology of prehistoric societies who have left behind mute material records? The objective of anthropological archaeology is to bring to life these prehistoric cultures through archaeological analysis. The different goals, approaches and methodologies of modern archaeology will be discussed theoretically and then applied to case studies.

Requirements/Evaluation: class presentations, two 12-15pp analytical papers, midterm and final exams

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: First and second year students.

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

ANTH 138 (F) Spectacular Sex (DPE) (WS)

Cross-listings: WGSS 138 ANTH 138

Secondary Cross-listing

From Beyoncé's Coachella performance to Donald Trump's social media antics, spectacles captivate us. Spectacles may be live shows, media events, or even everyday performances ranging from interactive advertisements to viral video sensations. But what are the uses of spectacle? Why are some compelling while others fall flat? How do spectacles control society or maintain social norms? And, importantly for our purposes, how does spectacle shape gender in society? Or from another angle, how does sexuality infuse spectacle? This tutorial introduces students to theories of spectacle ranging from the ancient Greeks to Marxist-inspired thinkers in the 20th century. In particular, we will examine how feminist thinkers have contributed to this literature and how theories of spectacle relate to questions of gender and sexuality. Our weekly readings focus on pairings of theoretical readings with writing on popular cultural examples and case studies. Some possible topics include sporting events, charity ad campaigns, music videos, political events, and social media.

Requirements/Evaluation: weekly response papers; students will also select past papers to develop and rewrite as more formal essays

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first- and second-year students; a statement of interest will be solicited from pre-registrants

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 138(D2) ANTH 138(D2)

Writing Skills Notes: This course requires significant attention to the craft of writing. Essential to this craft is the process of editing and rewriting materials with feedback from peers and professors. Students are expected to focus on improving analytical skills, critical thinking, and argumentation through attention to the writing process. They are also expected to give meaningful critical feedback on the writing of their peers. Students will select past response papers for development and rewriting.

Difference, Power, and Equity Notes: This course deals substantively with questions about privilege and power as they interact along the intersections of race, gender, sexuality, class, ability, and other axes of difference.

Not offered current academic year

ANTH 162 (S) Languages of East Asia

Cross-listings: CHIN 162 GBST 162 ANTH 162 ASIA 162
Secondary Cross-listing

A survey of the Chinese, Japanese, and Korean languages in their linguistic and cultural context. Working with various types of multimedia including audio, video, animation, and texts, we'll take up the phonetics, phonology, morphology, syntax, and lexicon of these three major East Asian languages, including also their history and writing systems as well as how they function in the societies where they are spoken. Though the emphasis of the course is on linguistic description and analysis, there will also be an applied component, as part of which we'll learn several dozen common expressions in each language. Some of the questions to be discussed are: What are the similarities and differences among these three languages? How are and how aren't they related? How did the modern standard form of each develop and what is its relationship to any non-standard languages or dialects? How do these three languages reflect sociolinguistic phenomena such as gender, class, and politeness? How do the writing systems of these languages function and what is the role of Chinese characters in them? What has been the influence of Classical Chinese on Modern Chinese, Japanese, and Korean? How have these languages changed due to influence from English and other languages? How are they used in Asian American speech communities? And what are the prospects for their future development, including the influence of computers and digital communications? While this course is not intended as a comprehensive introduction to linguistics, it does introduce many basic terms and concepts from that discipline.

Class Format: combination of lecture, discussion, and language practice

Requirements/Evaluation: three quizzes, two 2- to 3-page papers, an oral presentation, and an 8- to 10-page term paper

Prerequisites: none (lectures, class discussions, and readings in English; no prior background in linguistics or any Asian language required)

Enrollment Limit: 20

Enrollment Preferences: open to all with preference to first-year students and sophomores as well as majors/concentrators in CHIN, JAPN, EALC, ANTH, ASIA and GBST

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Spring 2024

SEM Section: 01  MW 8:25 pm - 9:40 pm  Cornelius C. Kubler

ANTH 208 (F) The U.S. and Afghanistan: A Post-Mortem  (DPE)

Cross-listings: GBST 208 ASIA 208 ANTH 208 PSCI 220

Primary Cross-listing

The United States attacked and defeated the Afghan Taliban regime over in the course of a few short weeks in 2001. Within a few years, the finality of that victory was brought into question as the Taliban regrouped and eventually reasserted itself as a formidable guerilla army that the U.S. military could not easily defeat. At the same time that it was facing a more difficult military challenge than anticipated, the United States got bogged down in the process of nation-building, as well as efforts at social reform. This course examines the history of American involvement in Afghanistan, beginning with the Cold War when the U.S. used Afghanistan as a test case for new models of political modernization and economic development. We will go on to discuss the U.S. support for Islamist political parties during the Soviet occupation of Afghanistan in the 1980s and the consequent rise of the Taliban, and the role of Afghanistan in the September 11th attacks and the "War on Terror" that followed. The course will conclude with a consideration of the impact and legacy of the two decades of nation-building and social reform carried out by the United States since 9/11.

Requirements/Evaluation: grading will be determined by class participation, two short (500 word) essays, and a 15-page research paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors, Global Studies concentrators, Political Science and Asian Studies majors will get preference

Expected Class Size: 15-20

Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
GBST 208(D2) ASIA 208(D2) ANTH 208(D2) PSCI 220(D2)

Difference, Power, and Equity Notes: Among the topics relevant to power and difference to be considered in this course are the American support and later disavowal of Islamist political parties to advance US geopolitical goals, public relations efforts "to save Afghan women" after 9/11, and the uses and misuses of American military, economic, and political power to build a western-style democratic government and bring western-oriented social reforms to a society radically different from U.S. society.

Fall 2023
SEM Section: 01    MWF 10:00 am - 10:50 am     David B. Edwards

ANTH 212 (F) Foundations of China

Cross-listings: HIST 214 GBST 212 REL 218 CHIN 214 ASIA 211 ANTH 212

Secondary Cross-listing
This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

Requirements/Evaluation: short writing assignments (approximately 750-1000 words each), quizzes, a mid-term, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: Chinese majors, History majors, Religion majors, and Anthropology majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ANTH 214 (F) The Rise and Fall of Civilizations

Cross-listings: ANTH 214 ENVI 224

Primary Cross-listing

Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human prehistory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

Class Format: Class discussion and debates will complement lectures based on powerpoint presentation.

Requirements/Evaluation: midterm, final exam, 15pp analytical paper, two quizzes

Prerequisites: none
ANTH 217 (S) Indigeneity Today: Comparative Indigenous Identities in the US and Russia (DPE) (WS)

Cross-listings: ANTH 217 GBST 219 RUSS 217

Secondary Cross-listing

Indigenous movements for land, rights, and cultural preservation have spread to and originated in all corners of the world. However, the global nature of these movements at times obscures ways of being Indigenous in differing contexts. This course analyzes Indigeneity in both the United States and Russia today. Through reading and analyzing ethnography, theory, and literature, it focuses on Indigenous peoples in a comparative context. Rather than prioritizing concern with Indigenous peoples emerging from the US, it attempts to demonstrate what Indigeneity has been in both the United States and Russia and what it is and means today. It asks the following questions: what is Indigeneity and who is Indigenous; how is Indigenous identity constructed and by whom; and what convergences and divergences exist in Indigeneity between the US and Russia or for that matter in other contexts? To help answer these questions, in this course we will grapple with Indigeneity as a social category and other social formations, especially ethnicity, nationality, and race. Topics include: Indigeneity and the State, Revitalization and Resurgence, Indigenous People and Nature Protection, and Hemispheric and Global Indigeneities.

Requirements/Evaluation: 10 posts to the course Glow discussion page, 3 times leading class discussion on the assigned readings, 1 short presentation, 1 extended portfolio project with regular shorter and longer writing submissions, and 1 final paper and final presentation (as the final part of the portfolio).

Prerequisites: None

Enrollment Limit: 16

Enrollment Preferences: Majors and certificate-seekers in Russian, then majors in Anthropology and Sociology, and then Global Studies concentrators

Expected Class Size: 12-15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 217(D2) GBST 219(D2) RUSS 217(D1)

Writing Skills Notes: This course has the following assignments: Weekly post to the Glow discussion page, 1 short presentation, 1 extended project with regular writing submissions, 1 final paper and final presentation. For the extended project, we will have instructor feedback for all project assignments. In instructor feedback, comprehension of the material and the content of the writing, improvement in writing style and clarity, and development of voice will be discussed. There will also be peer feedback/review.

Difference, Power, and Equity Notes: In the course, students will learn about Indigeneity as a context-specific social formation. It understands Indigeneity as a category of difference with past and present importance. We will read about, discuss, and write about Indigeneity as a social category, along with other social categories it arose alongside (such as race, ethnicity, and nationality), and how it has been mobilized by both those who identify as Indigenous and by those who designate others as Indigenous.
ANTH 219  (S)  The Art and Archeology of Maya Civilization

Cross-listings: ARTH 209 ANTH 219

Primary Cross-listing

The ancient Maya civilization was one of the most sophisticated and complex cultures of prehispanic Central America. Its complex calendrics, astronomy, mathematics, art and hieroglyphic writing system are celebrated worldwide. The course will examine the trajectory and nature of ancient Maya civilization from the combined perspectives of archaeology and art history. The origins and evolution of the Maya states during the Preclassic period (1000 B.C.-A.D. 250) will be explored through the rich archaeological remains and Preclassic art styles. The Classic Maya civilization (A.D. 250-1000) will then be presented through a detailed survey of the archaeology, art and hieroglyphic texts of this period. Finally, the collapse of Classic Maya civilization and its transformation and endurance during the Postclassic period and under early Spanish rule (A.D. 1000-1600) will be critically evaluated through a review of the archaeological, iconographic, and ethnohistorical evidence.

Class Format: lecture/discussion

Requirements/Evaluation: midterm and final exams, hieroglyphic project, 15pp research paper

Prerequisites: none, but an introductory ARTH or ANTH course recommended

Enrollment Limit: none

Enrollment Preferences: Anthropology/Sociology and Art History majors

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 219(D2) ARTH 209(D2)

Not offered current academic year

ANTH 223  (S)  Ethnic Minorities in China: Past and Present  (DPE)

Cross-listings: ANTH 223 CHIN 223

Secondary Cross-listing

According to the most recent census conducted in China in 2010, of the 1.3 billion population of China, more than 110 million (8.49%) were ethnic minorities (shaoshu minzu). Most of the minority groups reside in autonomous regions and districts, which constitute 64% of China's total acreage. This course introduces students to the multiethnic aspect of China's past and present. We will ask the central question of "what is minzu" and address various topics such as the minority-group identification project; the definition of minzu (translated as "ethnic group," "nationality," or "race" by different scholars); the intersections between language, religion, tourism, diaspora and ethnicity; historical sino-centric views about "foreigners" and "barbarians" as well as the roles that "barbarians" have played in China's long history. We will examine how social differences and hierarchy are constructed and discuss how power plays in the shaping of "ethnicity." A multidisciplinary approach will be adopted for the course, taking in sources from anthropology, history, literature, ethnic studies, and cultural studies. Throughout the course, the pedagogical techniques of "intercultural dialogue" will be adopted to encourage students to discuss their own ethnic experiences and compare ethnic minority issues in China with similar issues in the United States. Students are also encouraged to come up with real-world solutions and strategies to deal with issues of racism, bias, and discrimination.

Requirements/Evaluation: class attendance, weekly quizzes, active participation in both the online discussion forum and in-class meetings, two short (5-page) response papers, and one final research paper (10-12 pages).

Prerequisites: none, open to all students; no knowledge of Chinese language required

Enrollment Limit: 15

Enrollment Preferences: current and prospective majors in the Department of Asian Studies, then to first-years

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Materials/Lab Fee: books and reading packet

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 223(DPE) CHIN 223(DPE)
ANTH 223(D2) CHIN 223(D2)

**Difference, Power, and Equity Notes:** We explore the interactions between "power" and "ethnicity," "center" and "periphery" in the Chinese context and compare them with students' own experiences. Students are required to write one short response paper on their personal encounter with the concept of "race" or "ethnicity." For the final research paper, students are required to identify one problem among all the ethnic minority issues in the Chinese context and write a policy recommendation to make real-world changes.

**Attributes:** ASAM Related Courses  GBST East Asian Studies Electives

Not offered current academic year

ANTH 225  (S)  Ways of Seeing

This course examines the potential of images for revealing aspects of cultural normally obscured by the written word and for transmitting different, sometimes undervalued insights and knowledge of the social world. The central focus of this course is documentary film, and we will consider both the theory and practice of the documentary in the United States and abroad as it has evolved over time and as it is evident in contemporary filmmaking. In the course of the semester, we will examine some of the ways in which filmmakers, and ethnographic filmmakers in particular, have approached the task of documenting and understanding different aspects of social reality. Among the questions that we will consider are the following: What is the relationship between written texts and images? What is it that documentary films "document?" What is the relationship between images and stories, and should the techniques used in fiction films to construct voice, point of view, identification, narrative sequence, etc. apply as well in the creation of nonfiction films? What is the role of film in anthropology, and how does ethnographic filmmaking relate to anthropology and to the broader documentary film tradition? In the last part of the course, we will consider the proliferation of cell phone videos and platforms such as Youtube and Instagram and their significance for the documentary film genre more generally.

**Requirements/Evaluation:** Weekly response/critiques of assigned films, a longer written paper (10-12 pages) or video essay of comparable scope

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Anthropology/Sociology majors, open to first-year students

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

ANTH 238  (F)  Black Voices in Anthropology

**Cross-listings:** AFR 238 ANTH 238

**Secondary Cross-listing**

What names and faces come to your mind when you think about Anthropology? The course introduces students to the lives and work of pioneering Black anthropologists whose contributions are still unknown or overlooked. Through different styles, methods, and theoretical approaches, each of these intellectuals has developed antiracist perspectives on foundational topics in the Social Sciences and the Humanities, contributing to advancing the study of the African continent and the Black Diaspora. Throughout the classes, students will learn about each author's journeys, which can spark significant changes in how we think about our roles as social scientists within and outside academic boundaries.

**Class Format:** Students will be required to develop and give a class presentation focused on contemporary Black anthropologists from Africa and the Diaspora.

**Requirements/Evaluation:** Class participation and attendance (asking questions and leading discussions); weekly e-reading response papers (300-500 words); formal class presentation (individually or in groups); and a final essay or research paper (5-10 pages).

**Prerequisites:** None

**Enrollment Limit:** 20

**Enrollment Preferences:** Should the course be overenrolled, preference will be given to majors and concentrators in Africana Studies, Sociology, and Anthropology.
Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

SEM Section: 01 TR 1:10 pm - 2:25 pm Messias Basques

ANTH 240 (S) Work as a Cultural System (DPE)

"You know my reputation," sang Billy Joe Shaver, "I am everything I do." In many ways we are homo faber, the species that makes its world and we are defined by what we make, by the work we do. This course will undertake a broad survey of work as cultural systems across time and space. How do societies define work, how do they organize it? Who controls the processes of work, who controls the product of work? When is work an act of pure creation and when is it stultifying labor? How is work enabled and how is it compensated? What defines the difference between work and leisure and how are they valued? How does control over access to work, the organization of work, and the appropriation of its products determine difference, power, and equity in a society? These questions will guide an examination of work drawing on works of philosophy, history, ethnography, literature, and film examining people at work ranging from hunter-gatherers to tin miners, from slaves to corporate managers, from merchant mariners in the age of sail to physicians struggling to adapt to computerized medical records.

Requirements/Evaluation: students will compose several response papers, a take-home midterm exam and a final research paper of 15-20 pages

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Access to work, control over the work process, control over the fruits of labor, and compensation for work, are a principal means for creating and maintaining social difference, power, and equity. It is impossible to seriously study the nature of work without discussing these topics. By placing the universal experience of work in a broad spatial and temporal context students will discover an enhanced analytical ability to critically understand their own experiences of work and those of others.

Not offered current academic year

ANTH 243 (F) Reimagining Rivers (WS)

Cross-listings: ENVI 243 ANTH 243

Secondary Cross-listing

In the era of climate change and widening inequality, how we live with rivers will help define who we are. Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including increased flooding, drought, pollution, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and ecological resilience far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Drawing on scholarship from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, and more.

Class Format: This class will be taught in a modified tutorial format, with five groups of three students, each of which will meet for one 75-minute session per week.

Requirements/Evaluation: Each week, each student will either write a 5-page essay on assigned readings or write a 2-page critique of a partner's paper.
Prerequisites: Environmental Studies 101
Enrollment Limit: 10
Enrollment Preferences: Environmental Studies majors and concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 243(D2) ANTH 243(D2)
Writing Skills Notes: Students take turns writing 5-page essays and 2-page responses to those essays, with each writing 6 in total. For each five-page paper, I meet with the student to discuss technical aspects of the paper and specific ways in which it could be improved. At the end of the semester, students have the option of handing in one revised paper as part of a portfolio of papers from throughout the semester. This enables me to have an ongoing, in-depth discussion with each student about their writing skills.
Attributes: ENVI Humanities, Arts + Social Science Electives

ANTH 249 (S) The Sacred in South Asia
Cross-listings: REL 149 ANTH 249 ASIA 242
Primary Cross-listing
Is religious identity necessarily singular and unambiguous? The jinn - Islamic spirits born of fire - are sought out for their healing and other powers not only by Muslims in India, but by Hindus, Christians and Sikhs, as well. In parts of Bengal statues of the Hindu goddess Durga are traditionally sculpted by Muslim artisans. Buddhist pilgrimage sites in Sri Lanka contain tombs of Muslim Sufi saints and shrines of Hindu deities. South Asia - where a fifth of humanity lives - provides some of the most striking examples of pluralism and religiously composite culture in our contemporary world. Yet at the same time, strident religious majoritarianism has been a defining feature of the politics of India, Pakistan and Sri Lanka for decades, and haunts Nepal and Bangladesh as well. Are these two modes of religious being - pluralistic and composite on the one hand, singular and majoritarian on the other - reflective of two different conceptions of selfhood? What if we turn from questions of community and identity to questions of unseen power and the sacred? This course is an exploration of lived religion in South Asia. It is simultaneously a study of popular Hinduism, Buddhism and Islam and an introduction to the anthropology of religion. Centered on in-depth studies of popular sites of ‘syncretic’ ritual practice (shared across religious difference) as well as studies of mass mobilizations that seek to align the religious community with the nation, we approach from multiple angles what the sacred might mean in modernity.
Requirements/Evaluation: weekly (1 page) posts on readings, two short (5 page) papers, and one (12-14 page) final research paper.
Prerequisites: Interest in the topic!
Enrollment Limit: 20
Enrollment Preferences: Students in all fields of study are most welcome; if overenrolled, priority will be given to majors in Anthropology, Sociology, Religion and Asian Studies.
Expected Class Size: 15
Grading: yes pass/fail option, no fifth course option

ANTH 254 (S) Food, Forests, & Fungi: Environmental Health in the Anthropocene (DPE) (WS)
Cross-listings: ENVI 254 ANTH 254 STS 254
Primary Cross-listing
This tutorial will examine the impacts of the climate crisis on human, environmental, and planetary health via the lens of food systems & plant medicines in the Anthropocene. We use anthropological, environmental, evolutionary, & ecological approaches to explore the ecosystems connecting
humans, plants, animals, and fungi that have been massively disrupted by systems of industrial agriculture, industrial forestry, corporate food systems, and corporate biomedicine. We will dwell on the growing signs of our climate catastrophe including the sharp rise of global temperatures, floods, hurricanes, alongside declining freshwater reserves, melting cryosphere, and falling crop yields, that are helping produce a growing wave of hunger and climate refugees in every world region. Along the way, we will hear from and read about youthful climate activists from Extinction Rebellion, Ende Gelände, Fridays for the Future, 350.org, and the Sunrise Movement who are designing and implementing innovative, local, and sustainable solutions to inaction, apathy, and inertia even as situations of internal migration or displacement, food scarcity, food sovereignty, water shortages, and other climate-related disruptions are increasing in both developing and developed parts of our globe. We learn how activist narratives intersect with wider movements to promote more local and circular economies of regenerative agriculture and forestry, ethically produced and sourced organic food, wild & cultivated botanicals, and complementary medicines that are healing both humans and the planet.

Requirements/Evaluation: Weekly attendance, reading 200-300 pages/week, weekly lead essays or oral responses to texts, showing up in mind & body each week.

Prerequisites: none, but a class in ENVI or ANTH preferred

Enrollment Limit: 10

Enrollment Preferences: ANTH, ENVI, STS majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (DPE)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 254(D2)  ANTH 254(D2)  STS 254(D2)

Writing Skills Notes: Students will write essays: either a lead essay of 1400 words, or written & oral feedback on the lead essay plus an oral response to text. Students receive intensive weekly feedback on their essays and a mid semester writing chat with instructor to negotiate and understand strengths and weaknesses of their writing.

Difference, Power, and Equity Notes: We will examine the ways that food systems reproduce social and structural inequalities within public health, environmental health, climate health. We also examined the interconnected nature of the health of our planet, food systems, forests, and fungal networks and how climate activism and action can fight unequal access to food, forests, nature, and health.

ANTH 255  (F)  Buddhism: Ideas and Practices

Cross-listings:  ANTH 255  ASIA 255  REL 255

Secondary Cross-listing

This course introduces students to Buddhism by examining its ideas and practices as they have taken place in actual social contexts rather than as disembodied textual objects. After examining the main ideas and narratives of the tradition, we turn our attention to Thailand where we examine how these ideas and narratives have shaped a whole range of practices, from meditation to shamanistic rituals. We then consider the transformations that Buddhism is undergoing in contemporary society, examining the rise of meditation movement, the changing role of monks and laity, the resurgence of the nun order, the rise of Buddhist social activism and the development of new Buddhist social philosophies. We ask questions such as: How can Buddhism adapt to a modern global consumerist society? What are the transformations involved in this process and the role that Buddhism can play in such a global society? Should Buddhists take advantage of the opportunities of this new global culture or should they adopt a critical stance toward its consumerist values?

Class Format: discussion

Requirements/Evaluation: full attendance and active participation; two essays

Prerequisites: none

Enrollment Limit: 25

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option
ANTH 258  (F)  Buddhism, Social Change, & Reproductive Justice in the Anthropocene  (DPE)  (WS)

Cross-listings:  WGSS 225 ASIA 258 ANTH 258 REL 258

Primary Cross-listing
This course considers how three women profoundly shaped the Buddha's life and legacy in terms of social change & reproductive justice. Our central characters are Maya--the Buddha's mother, who died shortly after delivering him; Pajapati--the Buddha's stepmother & aunt who raised him; and Yasodhara--his wife, whom he abandoned when he left home to seek enlightenment. We explore the classical Buddhist discourses and modern biographies to explore how these three women impacted what the Buddha taught and practiced in terms of social and gender justice. These women helped shape the Buddha's radical decision to found the first renunciate order for women in Asian history and helped shape Buddhist attitudes towards female empowerment, bodily autonomy, and reproductive justice for that past 2500 years. Our historical genealogy will explore how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice. Along the way we consider: How did these three women reject existing social hierarchies in the Buddha's day and with what impacts for modern Buddhist practices and institutions? How do the social transformations of the Buddha's day still impact modern struggles for gender justice & reproductive justice in the Anthropocene?

Requirements/Evaluation:  Attendance, writing weekly essays or written feedback. There are no grades first half of the semester but weekly feedback on writing.

Prerequisites:  none, but a course in ANTH or REL is preferred

Enrollment Limit:  10

Enrollment Preferences:  ANTH, REL, WGSS majors and ASIA concentrators

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 225(D2) ASIA 258(D2) ANTH 258(D2) REL 258(D2)

Writing Skills Notes:  We write every week--either 1500 word lead essays, or written feedback (and oral responses) to the lead essay and weekly text. We have a mid semester 'writing chat' with the instructor where we discuss strengths and weakness of individual student writing.

Difference, Power, and Equity Notes:  We explore the three women who left a lasting legacy on the Buddha's teachings and practices in terms of gender egalitarianism, social justice, and reproductive justice. Our historical genealogy explores how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice.

Fall 2023
TUT Section:  T1    TBA    Kim Gutschow

ANTH 262  (S)  Language and Power

"A language is a dialect with an army." This (originally Yiddish) aphorism points to ways in which language, often imagined to be a neutral or apolitical medium of communication, proves in practice to be a social domain fully implicated in the operations of power. How do we create community - and social exclusion - by the way that we talk? What role does speech play in the accumulation of cultural capital? How are racism and colonialism sustained or subverted by language practices, and how can speech transform the world? This introduction to linguistic anthropology draws together classic works of linguistic and semiotic theory with studies of the politics of actual speech grounded in rich and particular cultural and historical contexts, from witchcraft accusations in rural France to the partition of Hindi and Urdu in colonial South Asia. Students will gain familiarity with key concepts (speech acts, performatives, code-switching, language ideology), themes and debates in the social scientific study of language. Assignments include regular postings of 1-page critical response papers and an ethnographic project analyzing a series of speech events in our local community.

Requirements/Evaluation:  Regular postings of critical response papers and an ethnographic final project.
**Prerequisites:** None.

**Enrollment Limit:** 20

**Enrollment Preferences:** Students in all fields of study are most welcome. If overenrolled, priority will be given to Anthropology or Sociology majors or final-year students.

**ANTH 269 (F) Mindfulness Examined: Meditation, Emotion, and Affective Neuroscience**  (DPE) (WS)

**Cross-listings:** REL 269 ANTH 269 ASIA 269 STS 269

**Secondary Cross-listing**

This course asks students to practice and study mindfulness while observing their own minds, emotions, and behavior for an entire semester. We examine the historic roots and current applications of mindfulness, both as a Buddhist meditation practice as well as a secular tool to improve our awareness of awareness. Throughout, we are interested in the nexus of mind, brain, and emotions and the ways that mindfulness has been studied within contemplative and affective neuroscience, integrative neurobiology, and evolutionary psychology. How and why has the research on mindfulness and other meditative practices exploded since 2000? How has this research helped us understand and explain how our minds as well as brains shape everyday emotions and behaviors? We examine the ways evolutionary psychologists, clinical psychiatrists, neuroscientists, clinicians, and medical anthropologists have studied and applied mindfulness to better understand human emotions. We consider the applications of mindfulness for clinicians, therapists, and educators--all of whom attend to how emotions impact interpersonal relationships. We will train in a variety of meditation practices all semester, while learning to better appreciate our own minds, emotions, and relationships.

**Requirements/Evaluation:** weekly tutorial papers and discussion

**Prerequisites:** A prior class or some experience with meditation is recommended

**Enrollment Limit:** 10

**Enrollment Preferences:** ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 269(D2) ANTH 269(D2) ASIA 269(D2) STS 269(D2)

**Writing Skills Notes:** This class will involve weekly tutorial essays or oral responses, intensive written feedback on every essay, and a mid-semester 'writing chat' with the instructor.

**Difference, Power, and Equity Notes:** This class fulfills the Difference, Power, and Equity requirement because it will explore the ways that mindfulness can address the growing epidemic of anxiety, depression, and other mental health issues we find in the US today. We study mindfulness from an intersectional perspective and relate its benefits to intersecting inequities and intergenerational trauma in the US today.

Fall 2023

TUT Section: T1    TBA     Kim Gutschow

**ANTH 277 (S) Sensing Society**

How does socialization shape sensory perception? Our linguistic upbringing calibrates our hearing: whether we can discern the difference between a dental and a retroflex 't,' for instance. How else do our cultural contexts train us to engage the sensory world - to see in particular ways, to be attuned to particular sounds, to love some smells but be repelled by others, to have a 'discriminating palate'? How are sensory stereotypes - that certain categories of person are less sensitive to pain than others, for example - mobilized in the defense of unequal social orders? What does it mean for an entire class of society to be defined - as is the 'untouchable' in caste society - by reference to a primary sense? This course explores the social life of
the senses, investigating how our very perception of the world is socially conditioned and how 'commonsense' about the senses - that 'seeing is believing' while 'hearing voices' is a problem, for instance - are by no means universal, but are historically and culturally produced. Readings include historical, ethnographic and literary accounts of sensory cultures, in and (mostly) beyond North America. Toward critically examining how sensory socialization shapes us, students will maintain a sense-journal, conduct interviews with family members on sensory experience, and generate a sense-map of our Williamstown environment. This is a class plunged in the sounds, flavors and odors that give our social worlds life.

Requirements/Evaluation: Weekly discussion posts, sensory journal, an 8-page interview-based paper, and a collective sense-mapping project.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Everyone is most welcome. If overenrolled, anthropology and sociology majors would be given preference.

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

Not offered current academic year

ANTH 299  (F)  Ritual, Power and Transgression

Cross-listings: REL 274 ANTH 299

Primary Cross-listing

The focus of this course is on the role of ritual in harnessing political power. In the first part of the semester, we examine some of the ways in which different cultures manufacture social order and political power through categories of inclusion and exclusion, clean and dirty, proper and improper, and licit and illicit. We will be particularly attuned to the ways in which these categories are performed through and maintained by rituals and how bodies are deployed in ritual spaces as instruments of persuasion and control. We will also look in depth at a variety of ritual forms, including scapegoating and sacrifice, and how they serve as engines of political control and protest, and we will examine the uses of dead bodies and memorials as vehicles for gaining and maintaining political power and the destruction and desecration of bodies and memorials as a form of political protest and dissent. Throughout the semester, we will be relating theoretical texts and historical cases to current political struggles in this country and abroad.

Requirements/Evaluation: class participation, biweekly responses to instructor prompts, two short (500 words) response papers, and one 12-page (2400 words) research paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: ANSO and REL majors, open to first-years

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ANTH 301  (F)  Sexual Economies  (DPE)

Cross-listings: WGSS 301 AMST 334 ANTH 301

Secondary Cross-listing

This course examines various forms of sexual labor around the world in order to better understand how gendered and sexual performances are used in a variety of cultures and contexts for material benefit. Our topics include "traditional" forms of sex work such as street prostitution, pornography, and escorting as well as other forms of sexualized performances for benefit such as stripping or camming. We also discuss current issues and debates about discourses of "sex trafficking." Course readings come from a range of fields, but focus most heavily on anthropology, sociology, American studies, and gender studies. The readings for this class will frequently foreground the lived experiences of sex workers from a variety of nations, races, classes, religions, and backgrounds in order to explore the broader social implications of our subject matter. The format is largely discussion-based, with short lectures supplementing the reading with summaries of current scholarly and activist debates. We have a variety of guest speakers to share their diverse lived experiences related to this topic.
**Requirements/Evaluation:** midterm essay exam, short quizzes, participation, Marco Polo video chat posts

**Prerequisites:** none, though WGSS 101 and/or 202 may be helpful, but not required

**Enrollment Limit:** 20

**Enrollment Preferences:** based on statement of interest

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 301(D2) AMST 334(D2) ANTH 301(D2)

**Difference, Power, and Equity Notes:** We pay particular attention to the intersecting questions of race, sexuality, gender, and class as we explore the political economy of commercial sex. The course teaches students to examine the underlying political and economic structures that create systems of privilege and power, thereby complicating questions and assumptions about sexual consent, coercion, agency, and empowerment with particular attention to race and gender in comparative transnational contexts.

**ANTH 322 (F) Waste and Value**
What is trash and what is treasure? In what ways does value depend upon and necessitate waste, and how is the dialectic between the two inflected by culture? When we 'throw away' things at Williams College, where exactly do they go, and who handles them 'down the line'? What are the local and global economies of waste in which we are all embedded and how are they structured by class, race, caste, gender and nation? In this seminar we critically examine the production of waste - both as material and as category - and its role in the production of value, meaning, hierarchy and the environment. Readings include ethnographic accounts of sanitation labor and social hierarchy; studies of the political and environmental consequences of systems of waste management in the colonial period and the present; and theoretical inquiries into the relation between filth and culture, including work by Mary Douglas, Dipesh Chakrabarty and Karl Marx. Geographically the foci are South Asia, Japan, and the United States. There is also a fieldwork component to the course. In fieldtrips we follow the waste streams flowing out of Williams - to an incinerator, a sewage treatment plant, recycling and composting facilities and other sites - and students explore in individual, participant-observation-based research projects the everyday social life of waste in our communities.

Requirements/Evaluation: regular posting of critical response papers, field notes on waste streams, research-based final paper

Prerequisites: none

ANTH 324  (S)  Empires of Antiquity

Cycles of rise and collapse of civilizations are common in our human past. Among the most fascinating cases are those of empires, conquest-based states that encompass a number of different ethnicities, polities and peoples. However, their rise and often rapid collapse begs an important question: how stable have empires been in human prehistory? Are they intrinsically unstable political forms? The course will address these questions by examining the major empires of the Old and New World in pre-modern history: Persian; Assyrian; Mongol; Roman; Qin Chinese; Ottoman; Aztec; and Inca empires. Using readings by political scientists, historians, epigraphers, archaeologists and political anthropologists, we will consider the causes of the expansion and collapse of these empires. We will also explore their sociopolitical and economic structures as mechanisms for their maintenance in order to provide a cross-cultural comparison of the differential success and final decline of all these empires.

Class Format: seminar

Requirements/Evaluation: research paper, class presentation and active participation

Prerequisites: none; open to first-year students

Enrollment Limit: 25

Enrollment Preferences: ANSO majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Not offered current academic year

ANTH 328  (F)  Emotions and the Self

Everyone everywhere experiences emotions, and everyone everywhere is faced with the task of conceptualizing a self-hood and its place in the social world. This course analyzes a variety of recent attempts in the social sciences to come to grips with topics that have long been avoided: the nature of the interior experience and an epistemological framework for its cross-cultural comparison. Exploring the borderlands between anthropology, sociology, and psychology, we will bring the tools of ethnographic analysis to bear on central pan-human concepts: emotions and the self. By
examining these phenomena as they occur in other cultures, we will be better placed to apprehend and challenge the implicit (and often unconsciously held) assumptions about emotions and the self in our own culture, both in daily life and in academic psychological theory. What are emotions? Are they things--neuro-physiological states--or ideas--sociocultural constructions? How are they to be described; compared? What is the self? How are selves constructed and constituted? How do various cultures respond to categories of emotion and self, and how can we develop a sense of the relationship between self and emotion?

Requirements/Evaluation: typical for that of a tutorial
Prerequisites: none; open to first-year students with instructor's consent
Enrollment Limit: 10
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

ANTH 334  (S)  Imagining Joseph
Cross-listings: ANTH 334 REL 334 JWST 334 COMP 334

Primary Cross-listing
Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur'an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar's wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur'an, as well as the more expansive pleasures of linking post-scriptural expressions together.

Requirements/Evaluation: occasional response papers; substantial final project and paper; class participation
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: based on responses to a questionnaire
Expected Class Size: 10
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 337  (F)  Race, Sex & Gender in Brazil  (DPE)
Cross-listings: WGSS 337 ANTH 337
Secondary Cross-listing
The course introduces students to anthropological literature of Brazil as well as Brazilian novels and films. Its focus is on understanding the history and contemporary culture of Brazil through attention to racial justice, including the country's unique history and legacies of slavery in comparative context. It also examines questions of gender, including the history of feminism in Brazil and current debates related women's equality such as Brazil's abortion
laws, domestic violence, sexual tourism, and job opportunities for women. Lastly, we also examine LGBT history in Brazil and dive into writing about queer culture there. NOTE: Students must also commit to registering for a winter study travel course with a trip to Rio de Janeiro, during which time students will visit important historical sites, museums, and relevant cultural attractions. They will also meet collectively with faculty members from several universities and NGOs to learn about the research and projects our Brazilian hosts are engaged in. Students also have their own individual exploratory research projects there related to social justice, which are integral to the seminar. Students should also be aware of the physical demands of the trip, which include extensive walking, some hiking, and exposure to summer heat and the elements in the Atlantic Rainforest. Thanks to the Global Initiatives Venture Fund, the cost of the trip is covered for all students enrolled.

**Requirements/Evaluation:** research paper and its various components, participation

**Prerequisites:** none

**Enrollment Limit:** 7

**Enrollment Preferences:** students are required to attend an info session and submit an application that includes a statement of interest, finalists will need to complete an interview

**Expected Class Size:** 7

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** The cost of the winter study travel portion is included (i.e., airfare, most meals, lodging, etc.), but costs related to incidental expenses (e.g., souvenirs, drinks), passports, vaccinations, etc. are not and will vary by student.

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 337(D2) ANTH 337(D2)

**Difference, Power, and Equity Notes:** This is a class about social justice movements and racial/gender/sexual diversity. It includes experiential learning devoted to these issues and engages questions related to the origins of inequality and prejudice in Brazil.

Not offered current academic year

**ANTH 350  (F)  Queer Tongues & Lavender Linguistics  (DPE)**

**Cross-listings:** AMST 351 WGSS 350 ANTH 350

**Secondary Cross-listing**

This course in linguistics provides an introduction to linguistic anthropology, sociolinguistics, and folklore studies using topics and approaches related to gender and sexuality. It is a methods course based in empirical research principles, but a basic familiarity with the broad strokes of queer/feminist theory may be helpful. One goal of the class will be learning to read and write in IPA (International Phonetic Alphabet) and how to construct and use IPA “change charts.” We then build on this as we turn to sociolinguistics as students will learn how to do Discourse Analysis and Conversation Analysis, using WGSS-oriented topics (e.g., upspeak, vocal fry, so-called “gay voice,” the gendered nature of turn-taking and interrupting.) We then turn to an extended unit on queer folklore and folklife, learning how anthropologists and folklorists use motif type indexes (e.g., Propp Functions, Thompson Type Index, etc) to study oral narratives and how feminist/queer theorists can use these to analyze gender in folk/fairytale stories. We also read several linguistic anthropologists’ ethnographies of queer communities’ language practices in global context. The semester concludes with a unit on LGBT slang, argots, and profanity.

**Requirements/Evaluation:** IPA Quizzes (reading/writing), Conversation Analysis/Turmtaking Transcription Assignment, Urban Legends Tale Type Analysis, Short Analytical Paper on Feminist/Queer Folk Figures

**Prerequisites:** None; prior coursework in WGSS may be helpful, but is not required

**Enrollment Limit:** 15

**Enrollment Preferences:** WGSS majors; short statements of interest will be solicited in the event of overenrollment

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

AMST 351(D2) WGSS 350(D2) ANTH 350(D2)

**Difference, Power, and Equity Notes:** This course examines the centrality of power in communication as broken down along axes such as sex,
gender, and sexuality. It deliberately takes a canonical field (i.e., linguistic anthropology) that often neglected the gendered nature of communication and puts these questions at the center of the curriculum. Assignments are structured in such a way as to build awareness of the role of gender and sexuality within human interactions and how sociolinguistics reveal power imbalances.

ANTH 360  (S) Lessons Learned from Afghanistan on Governance and Development

Following the Taliban takeover and the US withdrawal, Americans have been quick to wipe from memory that the twenty year-long conflict in Afghanistan. This case of willful amnesia is unfortunate, not least because ignoring history ensures that past mistakes will be repeated. Without question, much went wrong, and it's important to learn from those mistakes. It's also the case that much went right, and it's equally important to recognize what was achieved in Afghanistan, even if those accomplishments have been overshadowed by the events of last summer. This course seeks to recover from the detritus of state collapse both the positive and negative lessons that can be learned from America's engagement in Afghanistan. This course will include students from Williams and the American University of Afghanistan (AUAF), and will be taught in collaboration with a team of Afghan alumni from Williams' Center for Development Economics who were directly involved in the state-building project in Afghanistan over the last two decades.

Class Format: The class will be held in collaboration with the American University of Afghanistan (AUAF), and AUAF students will also be participating in this class.

Requirements/Evaluation: Students will be expected to actively participate in class discussions and post responses and questions on each week's topic. Williams and AUAF students will work together in the preparation of their final projects, which will be research papers on a topic chosen and developed in consultation with the instructor.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: There will be 15 Williams students and 15 AUAF students in the class. Enrollment preference for Williams students will be given to ANSO majors and students who have taken courses related to the subject matter of the course.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

ANTH 371  (S) Campus and Community Health in Disruptive Times  (DPE) (WS)

Cross-listings: ANTH 371 WGSS 371 STS 370

Primary Cross-listing

We study and seek "campuses where students feel enabled to develop their life projects, building a sense of self-efficacy and respecting others, in community spaces that work to diminish rather than augment power asymmetries." -- Sexual Citizens  (Hirsch and Khan, 2020). Students will design and pursue innovative ethnographic projects that explore campus or community health. We will learn ethnographic techniques such as observant participation, interviewing, focus groups, qualitative surveys, as well as design thinking and data visualization skills. We use and critique the methods of medical anthropology and medical sociology in order to hone our skills in participatory research. Every week, we collaborate with and share our research with our participants and peers both inside and outside class through a variety of innovative exercises. We attend to the parallel roles of narrative and listening in both medicine and ethnography, as we contrast the discourse of providers & patients along with researchers & participants. We aim to understand the strengths and limits of ethnographic inquiry while privileging marginalized voices and attending to power and identity within our participatory research framework. We recognize that our campus health projects are always already shaped by power and privilege, as we examine the ways that daily life, individual practices, and collective institutions shape health on and off campus. Our ethnographic case studies explore how systemic inequalities of wealth, race, gender, sex, ethnicity, and citizenship shape landscapes of pediatric care, mental health, maternity care, and campus sexual assault in the US and elsewhere. We consider how lived practices shape health access & outcomes as well as well-being in our communities and on our campus.

Requirements/Evaluation: Weekly attendance, 3 written fieldnotes (3000 words), weekly writing & fieldwork exercises in class and out of class, a
**Final presentation** that includes data visualizations and analysis of research findings.

**Prerequisites:** A course in Anthropology, Sociology, STS or in DIV II is strongly recommended

**Enrollment Limit:** 19

**Enrollment Preferences:** Majors in Anthropology, Sociology, WGSS; Concentrators in PH, STS, ASIA, ENVI

**Expected Class Size:** 19

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ANTH 371(D2) WGSS 371(D2) STS 370(D2)

**Writing Skills Notes:** This class assignments includes over 9,000 words of essay assignments, and will help students develop critical writing skills, including use of rhetoric, evidence, argument, synthesizing data, logic, and anticipating counter-arguments.

**Difference, Power, and Equity Notes:** This class uses experiential learning to examine the intersectionality of race, class, gender, & sexuality in impacting healthcare and health outcomes. It explores the ways that intersectionality and implicit bias shapes health and well-being in patient/provider encounters as well as ethnographic research. It engages with and critiques efforts to 'improve' community and individual health outcomes in the US and elsewhere across the globe.

Winter Study

ANTH 15 (W) Photography and Personal Vision

When you look at a photograph, what is it really saying? How can you make a photograph that says what you mean? This course will delve into the concepts of photographic seeing and visual literacy, while also exploring practical ways to apply these concepts to your own photography. In class we will review photobooks and discuss how a well-sequenced body of work can be greater than the sum of its parts. We will learn how to use professional image editing software like Adobe Lightroom during the course. Students will learn to defend their work during in-class critiques, and at the end of the course the class will produce an exhibition of their photography. The class will meet in Hopkins Hall 105 two times per week - Tuesdays from 10am-12pm and Thursdays from 1pm-5pm. Generally, we'll be talking about reading pictures on Tuesdays, and we'll be talking about making pictures on Thursdays. Outside of class, students will be expected to photograph in the local area. Students must either own or borrow a digital SLR. Williams Equipment Loan has plenty of suitable cameras available for your use, and Adobe Lightroom is available on Williams computers. We will not spend a lot of time building technical proficiency in this class but I will give you suggestions on how to improve your images, regardless of your equipment or level of training. If you are having an issue with your camera or digital workflow, don't hesitate to reach out for technical assistance during the course - I will be available for one-on-one Zoom meetings throughout the winter study.

Requirements/Evaluation: final project or presentation

Prerequisites: No experience or personally-owned camera equipment is required, but students are welcome to use their own cameras if they have them. Williams Equipment Loan has an excellent selection of cameras to borrow.

Enrollment Limit: 10

Enrollment Preferences: If overenrolled, prospective students can email me

Expected Class Size: NA

Grading: pass/fail only

Unit Notes: Ben Brody is the Director of Photography for The GroundTruth Project and Report for America, and author of the critically acclaimed 2019 photobook Attention Servicemember. He lives in western Massachusetts.

- Ben Snyder, Associate Professor of Sociology
- Phi H. Su, Assistant Professor of Sociology; affiliated with: Anthropology & Sociology, Science & Technology Studies

The disciplines of anthropology and sociology aim to teach students how to enter into the social/cultural worlds of others, how to grasp those worlds from the viewpoints of their inhabitants, and how to articulate those denizens’ habits of mind, worldviews, and values to broader audiences.

**Anthropology** critically analyzes social forms and practices in all their local and global diversity, illuminating the cultural grounding of the ideologies, narratives, and structures in which we are all implicated. **Archaeology** extends this analysis to social formations of the historical and prehistorical past. **Sociology** studies the nature and trajectories of modernity, examining the intricacies of industrial and post-industrial societies and the dilemmas that confront individuals in modern social systems. These disciplines introduce students to classical and contemporary theories that illuminate the contours and contradictions of social experience. The Anthropology & Sociology program promotes a critical engagement with these theories while at the same time bringing evidence and case studies into conversation with theory.

The Department emphasizes qualitative fieldwork in its many forms. We teach students how to formulate, frame, and address intellectual problems. We also teach students the empirical methods widely used in anthropology, sociology, and other related disciplines, including, but not limited to ethnography, participant observation, interviewing, discourse and visual analysis, archival research, oral history, and archaeological methods.

Because the program emphasizes critical thinking skills to assess social claims made by others, and the application of anthropological and sociological skills to present day concerns, undergraduate training in Anthropology or Sociology has proven invaluable to majors pursuing a range of careers, including public policy, diplomacy, international development, marketing, social media development, K-12 education, journalism, medicine, and law.

**MAJORS**

The department offers separate majors in both Anthropology and Sociology, with a broad and diverse array of courses in both disciplines. The
department is committed, however, to the unity of the social sciences. To this end, Anthropology and Sociology offer joint core courses in methodology and theory, as well as several elective courses in common. All joint courses are designated “ANSO.”

Requirements
For the degree in Anthropology or Sociology, students must complete a minimum of nine courses as outlined below:

Core Courses
Majors in both disciplines must take a sequence of four core courses. Three of these are joint (ANSO) courses. The sequences are:

Anthropology
ANTH 101 How to Be Human

Sociology
SOC 101 Invitation to Sociology

Joint Courses
ANSO 205 Ways of Knowing
ANSO 305 Social Theory
ANSO 402 Senior Seminar

Elective Courses
Majors in Anthropology or Sociology must take five elective courses from the course listings of their respective disciplines or from the joint ANSO listings. Two of the courses chosen are normally at the 300 level or above. In close consultation with their departmental advisors, students may take some selected courses from other disciplines to fulfill major requirements in either Anthropology or Sociology.

Majors in each wing of the department are allowed to count up to two courses in the other wing towards fulfillment of their major requirements.

STATISTICS AND DATA ANALYSIS
In addition to the nine total courses required for the major, it is recommended that Anthropology and Sociology majors take Statistics 101 or a comparable course in statistics and data analysis.

AREA STUDIES CONCENTRATION
Students who wish to combine a major in Anthropology or Sociology with an Area Studies concentration are encouraged to do so. Courses taken to satisfy an Area Studies requirement may be counted toward the major with prior approval of a student’s departmental advisor. The only exception to this rule is the Area Studies senior seminar, which cannot ordinarily be counted toward the Anthropology or Sociology degree.

LANGUAGE STUDY, STUDY ABROAD, AND WINTER STUDY
Departmental advisors will help interested students integrate a major with study abroad, foreign language study, or field research during the winter study period. The department encourages Williams students to take advantage of established foreign study programs in Egypt, Japan, India, Hong Kong, and other countries. Because some foreign study programs do not offer courses that can be counted toward the Anthropology or Sociology degrees, however, sophomores planning to study abroad in junior year must consult with the departmental advisor before declaring a major.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). We welcome discussions of curricular plans for those major who travel abroad in their junior year. However, typically, students don't have access to all the salient information until AFTER they have taken the course.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description, and complete syllabus including readings/assignments. The syllabus and readings/assignment information is required in cases when the course title and description are not sufficient to ascertain whether a course should count towards the major. We also request information on course hours.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
Yes. We credit two, and in special cases three courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
Yes. The expectation is for an intellectually rigorous semester-long course with a paper/exam component.
Are there specific major requirements that cannot be fulfilled while on study away?

Yes. ANSO 205, ANSO 305 and ANSO 402 are almost always taken in the department.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. ANSO 305 is offered in the fall and ANSO 205 and ANSO 402 only in the spring. We advise our majors to be aware if they plan to spend all or part of their junior year abroad.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

In one case, a student had assumed that he could take the equivalent of ANSO 205 abroad, and was disappointed to discover that was not the case. He ended up taking ANSO 205 his senior year.

THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY

Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W31-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.

SOC 101  (F)(S)  Invitation to Sociology  (DPE)
This course provides students with an introduction to sociological analysis and an overview of sociology as a discipline. We will focus on the relationship of individuals to the social world and become acquainted with systematic institutional analysis. Students will explore the intersection of biography, history, culture, and social structure as seen in the work of classical and contemporary social thinkers, including Marx, Durkheim, Weber, Simmel, and Goffman. Special consideration will be given to the social and cultural problems of capitalism, rationality and irrationality in modern institutions and organizations, the psychological dilemmas facing the individual in modern society, and the problem of social order and conflict. Students will emerge from the semester equipped with an analytical lens that will enable them to see the social world -- ranging from everyday interactions to broad political struggle -- in a new light.

Requirements/Evaluation:  Thoughtful and consistent participation, several research memos and presentations, book review, final research paper

Prerequisites:  none

Enrollment Limit:  30

SOC 210  (S)  Networks of Power: Technology in Human Affairs

Cross-listings:  SOC 210 STS 210
Do we control our technologies, or do our technologies control us? This course will explore different philosophies of technological progress, particularly the constructivist and determinist theories, by examining major technological systems that shaped modern society, such as the telegraph system, the electric grid, radio and television broadcasting, and the internet. Each of these innovations entailed the construction of a complex network designed to serve a mix of public and business interests, and each resulted in wide-ranging and often unforeseen changes to people's lives. Guided by pertinent readings in the history and philosophy of technology, we will look critically at the forms and consequences of technological change, seeking answers to a series of complex and important questions: Is the course of technological progress an inevitable byproduct of scientific and engineering advances, or is it contingent on social and political circumstances and choices? Does technological change reinforce the social and political status quo or challenge it? Are technological and social progress synonymous, or is there a tension between the two? One of the goals of the course will be to provide students with a more informed and critical perspective on the technological upheavals that continue to shape society today.

Requirements/Evaluation: attendance and participation, team assignments, two in-class exams, one 15-page seminar paper
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Anthropology and Sociology majors
Expected Class Size: 15

SOC 211  (S)  Race, Environment, and the Body
Cross-listings: SOC 211 AFR 211 ENVI 211 AMST 211

Secondary Cross-listing
This course is organized around three distinct, but overlapping, concerns. The first concern is how polluting facilities like landfills, industrial sites, and sewage treatment plants are disproportionately located in communities of color. The second concern is the underlying, racist rationales for how corporations, in collaboration with state agencies, plot manufacturers of pollution. The final concern is how the environmental crises outlined in the first two sections of the course are experienced in the body. In reviewing a range of Black cultural productions--like literature, scholarship, music, and film--we will not only consider how environmental disparities physically affect human bodies, but also how embodiments of eco-crises lend to imaginaries of the relationship between the self and the natural world.

Class Format: discussion

SOC 212  (S)  Understanding Social Media
Cross-listings: STS 214 SOC 212

Not offered current academic year
Primary Cross-listing

Over just the last twenty years—beginning with Friendster and MySpace and continuing through Facebook and Twitter, Snapchat and Instagram—the rise of social media has had a profound influence on the way we live. It has given a new rhythm to our daily routines, shaped the way we inform ourselves and converse with others, and transformed media and entertainment, politics and public discourse, and many other aspects of culture. This seminar course will undertake a broad and critical examination of social media, looking at it from historical, economic, legal, social, and phenomenological perspectives. The topics addressed will include social media’s effects on self-image and self-formation, its influence on protest movements and political campaigns, its use as a conduit for news and propaganda, and the way commercial interests and technical characteristics have shaped its design and use. Through pertinent readings and lively discussions, and drawing on students’ own experiences with social media, the course will illuminate social media’s benefits and drawbacks while providing a foundation for thinking about possible legal, regulatory, and personal responses to this far-reaching and still unfolding social phenomenon.

SOC 216 (F) The City

Modern humans have moved to the city, a site with concentrated powers of various kinds, this move has effected irreversible change in human life. We will examine these forces through readings in urban theories as well as ethnographic studies. We will address themes such as the organization of urban life, the political economy of cities, housing and homelessness, and urban planning. The city is also the chief site of cultural production and meaning, and our scope of interest will range from studying subcultures, to reading graffiti, to analyzing monuments. Bearing in mind the inexorable social change of past decades, we will reconsider some classical thought on urban life in the context of postmodern discourse, conceptualize the post-industrial and global city, and conclude with an examination of the problems faced by cities in developing countries. This course is designed to provide students with a comprehensive introduction to urban studies. Students will become familiarized with both classical and modern urban theories, and in reading ethnographies they will have an opportunity to understand some fundamental methodological approaches to the study of the city.

SOC 217 (F) Inequality in a Classless Society: The Soviet Experiment and its Aftermath (DPE)

Cross-listings: ECON 107 SOC 217

Secondary Cross-listing

All societies have to come up with some way of distributing wealth and income. In turn, individuals and groups comprising these societies grapple with, justify, and at times contest their place in social and economic hierarchy. Complex as they are, such processes are all the more pressing in societies built on the explicit promise of economic equality, as was the case in the USSR and socialist Eastern Europe. Using the combined perspectives
offered by economics, history, and sociology, this course will trace the practices and lived realities of social differentiation and income/wealth distribution brought about by the socialist experiment and intensifying after its demise. We will explore the life of class in these supposedly classless societies, and its reconfiguration after 1991, approaching class as, simultaneously, a matter of social classification, consumption differences, cultural identity, economic policy, and political power. We will study how the economic and political developments of late-socialism and the transition period generated class-based differences in all walks of life, and ask what these experiments have to teach us about inequalities and persistent social and economic divisions closer to home.

Requirements/Evaluation: Class participation; small writing assignments and research exercises; and a final research project

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: 1st and 2nd-year students thinking about majoring in Anthropology, Sociology, or Economics

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Unit Notes: This course cannot count toward the ECON major. It may be taken for the SOC major.

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 107(D2) SOC 217(D2)

Difference, Power, and Equity Notes: The subject matter of this course is all about the origins, evolution, current structures, and implications of economic and social differentiation in a region quite apart from the United States. Moreover, by crossing disciplinary lines, we hope it will offer a particularly valuable perspective on such issues. Thus, we felt that it should naturally serve as a DPE course.

Not offered current academic year

SOC 218 (S) Law and Modern Society

This class is designed to introduce students to the field of law and society. The course begins with an overview of the various theoretical perspectives on the subject, including Durkheimian, Marxist, Foucauldian, and Weberian analyses of law and society; as well as the work of those following in the different theoretical schools established by these scholars. Informed by the theoretical overview, the next part of the course considers empirical research in selected areas of law, including tort law, criminal trial procedures, abortion and divorce law, "community justice," and the adjudication of drug offenses. Recognizing that understandings of our own legal practices are enlightened through comparisons to other legal systems, the second half of the course is primarily historical/comparative in focus. In this section, through an exploration of several case studies, American legal processes and habits are compared with related legal practices in such places as Japan, England, Scotland, Ireland, Australia, Germany, Norway, and Canada.

Class Format: discussion

Requirements/Evaluation: a short paper and midterm and final exams

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Priority given to sociology majors.

Expected Class Size: 30

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: JLST Interdepartmental Electives

Not offered current academic year

SOC 219 (S) Images and Society

“This is obvious!” is what we say when we believe our point is irrefutable. But images are far less obvious than we may like to think. This course will create a forum for discussing the role of images in our lives, as well as the place of the visual in social inquiry. It will explore the variety of ways in which images—and even vision itself—are shaped by the social and cultural context in which they are embedded, develop skills for critical analysis of existing representations, and address the analytical possibilities and limitations of the study of signs and images. The course will touch upon a range of visual material, from advertising to paintings, but the bulk of the course is dedicated to photography, both as an object of visual analysis and as, increasingly, a research method in social sciences. Topics for discussion include debates around truth in photography and the politics of
representation, changing uses of photography in institutional settings, different photographic cultures and their anthropological and sociological significance, as well as the use of photography in social research. Primary sources for the discussions will be drawn from a variety of spheres, from Soviet propaganda posters to Indian studio portraiture, and will include the images we encounter in everyday life, media, politics, academia, “high” art and pop culture.

Requirements/Evaluation: active class participation, several short papers, and a final paper

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: FMST Related Courses

Spring 2024

SOC 221  (F)  Money and Intimacy

Does money matter in affectionate relationships? Can dollars buy love and care? What impact does market economics have on intimate relationships? This course will examine these questions and their relevance over the course of history, considering what forces have contributed to the shift in thinking about them, and, most importantly, how sociological research and knowledge helps us understand their current status. We will look into a wide range of aspects of private life that require actors to mix personal affairs with financial transactions, including romantic encounters, marriages (and divorces), families of various kinds and compositions, child adoptions, and outsourced care for dependents to name just a few. Intimacy carries different value and content in these contexts, as so does handling exchanges within them, and negotiating the balance of intimate and economic exchanges also necessitates applying diverse strategies vis-à-vis the external social world. The course will simultaneously look into the changing character of the economy as it has responded to shifting social values. We will specifically focus on how previously private concerns have penetrated the public sphere and shaped the evolution of what has been dubbed ‘emotional capitalism’. People skills, teamwork, emotional labor, commodification of intimacy, care, sex, and body parts, are only few examples of the central concepts at stake. Naturally, a reflection on the growth of new technologies and social media will enrich many of the discussed themes.

Requirements/Evaluation: Each student will be expected to write a final research paper. Other requirements will include response papers to assigned readings and films, as well as contributions to both classroom and Glow discussions. There will be no final exam.

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

SOC 224 (F) Going Nuclear: American Culture in the Atomic Age

Cross-listings: SOC 224 HIST 273

Primary Cross-listing

This course will examine the historical development and use of the nuclear bomb. Among other features of the early atomic age, the course will look at the Manhattan Project, the delivery of the bombs for combat, the destructive effects of the bomb’s initial use in Hiroshima and Nagasaki, and the ongoing testing of nuclear weapons in the Marshall Islands after WWII. The class will investigate the role of the nuclear arms race in the Cold War, the consequences of nuclear production on specific communities, and the implications of the atomic age on our critical understanding of technological
innovation more generally. We will also consider the saliency of competing narratives interpreting America's decision (and continuing policies) to build, use, and stockpile nuclear weapons. Employing both sociological and historical perspectives, we will explore the interactions between science, politics, and culture in the nuclear age.

Requirements/Evaluation: a midterm, a final exam, and a 10- to 12-page research paper
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: Preference given to sociology and history majors.
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)

SOC 226 (F) The Working Globe: North and South Workers in Globalized Production (DPE)
Cross-listings: SOC 226 GBST 226
Primary Cross-listing
The course introduces students to the concept of globalization of production by focusing on how workers from distant cities and villages across the Global North and South are joined together in the same transnational labor processes. We will reflect on case studies that trace the real-world production of everyday goods and services like automobiles, garments, retail, and electronics. We will map global supply chains and investigate how they exploit and reproduce global inequalities. Focusing specifically on the labor process and on the condition of workers, students will acquire a grounded perspective on the global economy, as well as on the dynamics underlying precarity, deindustrialization, and uneven development. The key guiding concern for the course will be to understand the relationship between workers of the North and South: Does global production place these workers in a relation of fundamental conflict, or can a community of interest emerge between them?
Class Format: Assignments will require group work and presentations
Requirements/Evaluation: Class participation; 1-2 group presentations; 1 final paper
Prerequisites: None, open to all students
Enrollment Limit: 20
Enrollment Preferences: Preference given to ANTH/SOC majors and GBST concentrators
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
SOC 226(D2) GBST 226(D2)
Difference, Power, and Equity Notes: Primarily the course investigates how historical inequalities between countries are reproduced by centering production relations and the site of work. Students will delve deeply into the inequality between workers of the global North and South, and they will also encounter situations where these differences intersect with racial and gendered dynamics.

Fall 2023
SEM Section: 01    MWF 10:00 am - 10:50 am     Bhumika Chauhan

SOC 228 (S) The Panopticon: Surveillance, Power, and Inequality (DPE)
Cross-listings: SOC 228 STS 229
Primary Cross-listing

Surveillance is built into the very fabric of modern life. From CCTV cameras, to supermarket loyalty cards, to the massive gathering of personal data on social media sites, people participate in today's "surveillance societies" just by doing everyday activities. This course uses the metaphor of the "Panopticon" as a doorway to engagement with traditional and new forms of surveillance. First described by philosopher and social theorist Jeremy Bentham, the Panopticon is a physical structure that enables one observer to see all inhabitants without those inhabitants knowing when they are being observed. In *Discipline and Punish*, Michel Foucault famously expanded thinking on the Panopticon as a metaphor for the "disciplinary" power that lies at the heart of inequality in modern society. Since Bentham and Foucault's time, however, surveillance technologies have changed significantly. To what extent does the concept of the Panopticon give us purchase on today's surveillance societies? How does watching people with new digital and algorithmic surveillance technologies shape the exercise of power and, in turn, (re)produce forms of inequality? Can privacy, convenience, and safety ever be truly balanced? Topics include: the historical origins and expansion of surveillance in modern societies, policing and state surveillance, and social media surveillance.

**Requirements/Evaluation:** participation, reading responses, midterm essay, final paper  
**Prerequisites:** none  
**Enrollment Limit:** 20  
**Enrollment Preferences:** Anthropology and Sociology majors  
**Expected Class Size:** 20  
**Grading:** no pass/fail option, no fifth course option  
**Distributions:** (D2) (DPE)  

This course is cross-listed and the prefixes carry the following divisional credit:  
SOC 228(D2) STS 229(D2)  

**Difference, Power, and Equity Notes:** This course explores how power is distributed unequally through the mechanism of surveillance technologies, particularly in regard to racial and class differences. Among other topics, it will consider the concrete case of surveillance by police in Baltimore City and the question of if and when surveillance is appropriate there, given the city's ongoing crisis of citizen and police violence. Students will discuss police surveillance in a context shaped by racial segregation and class inequality.

Spring 2024  
SEM Section: 01 MR 1:10 pm - 2:25 pm Ben Snyder  

**SOC 230 (S) Memory and Forgetting** (DPE)  

**Cross-listings:** SOC 230 AMST 233  

**Primary Cross-listing**  
On the surface, remembering generally confronts us as a deeply personal act. What is more private than nostalgic reverie or the secrets of a dark and painful past? Yet even "individual" memories take shape through social frameworks, and we also remember "collectively" through shared myths, narratives, traditions, and the like. This course will explore the social dimensions of memory and remembering as well as their inevitable counterpart--forgetting. How do social frameworks inform our individual understandings of the past and shape our sense of selfhood? How and why are figures from the past cast as heroes or villains? How do collectivities celebrate past glories, and how do they deal with shameful or embarrassing episodes? How do economic and political power relations shape struggles over the past? In an increasingly global society, can we speak of "cosmopolitan" or "transcultural" forms of memory? Topics will include autobiographical memory and self-identity; memorials, museums, and monuments; reputations, commemorations, and collective trauma; silence, denial, and forgetting; and transitional justice, official apologies, and reparations.

**Requirements/Evaluation:** thoughtful and consistent class participation; an autobiographical essay (4-5 pages); four response papers (2 pages each); and a research paper (8-10 pages) with class presentation  
**Prerequisites:** none  
**Enrollment Limit:** 19  
**Enrollment Preferences:** if overenrolled, students will be asked to submit a short statement of interest  
**Expected Class Size:** 19  
**Grading:** no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 230(D2) AMST 233(D2)

Difference, Power, and Equity Notes: This course pays particular attention to how power and inequality shape narratives about the past. We will examine and compare several efforts to transform national memories, such as the Equal Justice Initiative memorial in the United States and the Truth and Reconciliation Commission in South Africa. In doing so, we will also consider the role of memory and memorialization in broader processes of social change.

SOC 241 (S) Meritocracy

Cross-listings: PSCI 241 SOC 241

Secondary Cross-listing

Although fewer than 1% of Americans have a degree from the country's top 30 colleges and universities, 39% of Fortune 500 CEOs, 41% of federal judges, 44% of the writing and editorial staff at the New York Times, 64% of Davos attendees, and 100% of Supreme Court justices do. Is this a positive sign that the United States is governed by its most talented and capable members who have risen through hard work and equal opportunity? Or a negative one pointing to the power of a corrupt and self-selecting elite? This course explores the theme of meritocracy—rule by the intelligent—in comparative perspective. We will look at both old and new arguments regarding the proper role and definition of merit in political society as well as take the measure of meritocracy in present-day Singapore, France, and the United States. The course concludes with a focus on the current debate over American meritocracy and inequality.

SOC 244 (F) What They Saw in America

Cross-listings: HIST 366 AMST 244 SOC 244

Primary Cross-listing

This course traces the travels and writings of four important observers of the United States: Alexis de Tocqueville, Max Weber, G.K. Chesterton, and Sayyid Qutb. The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider's view of America—one that sheds light on persisting qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors' respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race.

Requirements/Evaluation: A midterm examination, two short essays, and a final paper.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Priority given to Sociology, History, Anthropology, and American Studies majors.
This course is cross-listed and the prefixes carry the following divisional credit:

SOC 252 (S) Im/mobilities  (DPE) (WS)

Cross-listings: AMST 252 SOC 252

Primary Cross-listing

We think of the freedom to move as a mark of privilege. In the United States, passing a driving test, owning a car, and getting a passport are milestones that signal modernity and freedom. Likewise, we think of restrictions on movement as the domain of the underprivileged, such as the current and formerly incarcerated. But as the Covid-19 pandemic reveals, there have always been two sides to immobility: privileged as well as involuntary immobility. There are correspondingly two sides to mobility: those who move because they want to and others because they have no choice. In this class, students will explore conceptions of mobility as adventurous, free, and modern (as with jet-setting international elites). They will compare and contrast when mobility can be threatening, exclusionary, and limited (as recognized by the Black Lives Matter movement). This class invites students to interpret their environment through the lens of mobility and inequality in the time of coronavirus. Drawing on sociology, anthropology, cultural studies, geography, and migration studies, this interdisciplinary course offers a beginning conversation on the causes and consequences of the freedom to move—or to stay still.

Requirements/Evaluation:  Thoughtful and consistent class participation, several short reflection papers, two drafts of an opinion essay, class presentation

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Given to first-year students and sophomores

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 252(D2) SOC 252(D2)

Writing Skills Notes: Emphasis on the processes of writing and revising, several short papers on which students will receive close feedback, and drafts of a final paper

Difference, Power, and Equity Notes: This course explores a politics of im/mobilities: how we move through space through different bodies at the intersection of race, class, gender, ability, and citizenship. Students will use their own bodies as research sites for deepening their understanding of how we navigate the freedom to move or stay still.

Not offered current academic year

SOC 262 (S) Paper Trails  (DPE)

Cross-listings: GBST 262 SOC 262 STS 262

Primary Cross-listing

Long before the invention of the passport, states or state-like entities sought to document and manage populations and discipline bodies. This course invites students to critically reflect on documentation practices and systemic violence, particularly against racial, ethnic, sexual, and political minorities. Students will explore identity-making through documentary practices such as the three-generation life history, a biographical form that Soviet-allied countries used to reward loyalty and punish disloyalty. Labels, such as a criminal record or pre-existing health conditions, also trail or precede individuals their whole lives. Students will grapple with what happens when the paper trail goes cold—when identification documents are invalidated,
birth certificates withheld, household registries purged, and archives destroyed. Students will explore the rise of surveillance and biometric data alongside the actors, technologies, and industries that try to circumvent them in places such as the Xinjiang Uyghur Autonomous Region and along the US-Mexico border. In this project-based course, students will exhume paper trails and imagine alternative ways to create, alter, and subvert them.

Requirements/Evaluation: thoughtful and consistent class participation, facilitation of guest speakers, Special Collections visit, project memos, and final project and presentations

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Anthropology and sociology majors, Global Studies concentrators; Science and Technology Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
GBST 262(D2) SOC 262(D2) STS 262(D2)

Difference, Power, and Equity Notes: In this course, students will interrogate some of the key documents that structure our lives and serve as tools for waging systemic violence against ethnic, racial, sexual, and political minorities. Students will synthesize and apply these lessons about bureaucratic documentation toward the benefit of a community partner.

Not offered current academic year

SOC 291 (S) Religion and Ecology in America (WS)

Cross-listings: REL 291 ENVI 291 SOC 291

Secondary Cross-listing

This course examines the relationship between religious and environmental thought in America. Exploring a broad range of practices, symbols, and beliefs, we will examine the religious roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have writers, thinkers, and artists from different religious and cultural backgrounds shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? How have they influenced each other to produce distinctively American forms of eco-spirituality? In pursuit of these questions, we will consider a diverse array of topics and cases, including struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoormanship, Catholic climate activism, Jewish eco-mysticism, atheist biology, Buddhist therapy, and more.

Requirements/Evaluation: Each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper.

Prerequisites: ENVI 101 or instructor permission

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
REL 291(D2) ENVI 291(D2) SOC 291(D2)

Writing Skills Notes: Each student will write five five-page papers and five two-page papers in this class. They will be given extensive weekly feedback on their writing in the form of one-on-one meetings and written comments, and they will be given multiple opportunities for revision. Emphasis will be placed on the mechanics of argumentation, logic and rhetoric, and the development of a distinctive voice.

SOC 303 (S) Cultures of Climate Change

Cross-listings: ENVI 303 SOC 303

Secondary Cross-listing

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about what climate change means? How does something as complex as climate change become a “problem” in the first place? And what can its many proposed “solutions” tell us about the role of culture in environmental policy, politics, and decision-making. This course will explore a broad array of factors, from religion to race, class to colonialism. Emphasizing ethnographic and historical accounts of climate change as lived experience, it will apply a range of theories from the social sciences and humanities to case studies from around the world.

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators first; Anthropology and Sociology majors second

SOC 308 (S) What is Power?

Cross-listings: SOC 308 REL 308 PSCI 306 STS 308

Secondary Cross-listing

What is power? Despite the importance of notions of power across the social sciences, there is a broad lack of consensus. Is power essentially domination or resistance? Is it freedom, empowerment, privilege, or oppression? Are there forms of unequal social power which are morally neutral or even good? Is power the kind of thing held by individuals, races, genders, classes, discourses, causal mechanisms, institutions, or social structures? What is the connection between social and physical power? Does power obey laws? How does power relate to technology? Or knowledge? Or agency? Or ideology? This course begins with the observation that power is often described as a causal relation--an individual’s power is supposed to equal their capacity to produce a change in someone else’s behavior. This suggests that the better we can understand the nature of cause and effect, the better we can understand power. Fortunately, in recent decades philosophers have made significant progress in theorizing causation. Hence, this seminar will put two very different bodies of theory in conversation: critical theory about power and philosophy of science about cause and effect.

. We will touch on classic philosophical accounts of power and causation, but focus our attention on more recent developments in philosophy of science, political theory, and other fields. The insights we gain in this course from analyzing the nature of power should empower us to more effectively transform society. It will help students in the social sciences to understand the nature of causation in the social world, and it will help students interested in political action to better understand the nature of power. Thinkers to be considered may include: Aristotle, Amy Allen, Hannah Arendt, Bourdieu, Judith Butler, Nancy Cartwright, Foucault, Gramsci, Byung-Chul Han, Han Feizi, Giddens, Steven Lukes, Machiavelli, J.L. Mackie, Marx, Nietzsche, and Max Weber. (Note that in 2023 this course will also fulfill the senior seminar requirement for STS)

Requirements/Evaluation: critical annotations for every class, midterm review essay (4-6 pages), final essay (10-12 pages)

Prerequisites: None.

Enrollment Limit: 15

Enrollment Preferences: STS concentrators, then Religion, Sociology, and Political Science majors.

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

SOC 313  (S)  The 626  (DPE)
Cross-listings:  SOC 313 AAS 312

Primary Cross-listing

Ryka Aoki's *Light from Uncommon Stars* is "a defiantly joyful adventure in California's San Gabriel Valley, with cursed violins, Faustian bargains, and queer alien courtship over fresh-made doughnuts." What sociological insight could a sci-fi novel about intense extracurricular pressure, food, and foreignness have to offer about the San Gabriel Valley, area code 626? In this course, we take the fantastical characters and plots of Aoki's novel as an invitation to delve into the histories of Asian American settlement to Gabrielino/Tongva lands on the eastern fringes of present-day Los Angeles County. The multilingual boba shops, restaurants, and store fronts throughout the valley mask a history of violent backlash and English-only initiatives. Media reports of academic and musical prodigies skew a broader socioeconomic picture that includes crimmigration, deportation, and xenophobia. And the figure of an intergalactic refugee mother exposes the toll that crossing borders takes on individuals, families, and communities. In this project-based course, we survey the formation of a particular place and its surroundings. In doing so, students grapple with general questions such as: How does migration shape intergenerational dynamics? When and with what tools do people confront racism and intersecting forms of discrimination? How do ethnic enclaves form and fracture? And how do communities mobilize for political rights?

Requirements/Evaluation: thoughtful and consistent participation; mock film festival screening and vote; possible community partnership; regular writing assignments

Prerequisites: N/A

Enrollment Limit: 15

Enrollment Preferences: ANSO majors and AAS concentrators

Expected Class Size: 15

Grading: no pass/fail option,  no fifth course option

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 313(D2) AAS 312(D2)

Difference, Power, and Equity Notes: This course explores the making of the San Gabriel Valley as the "Asian American Holy Land." It delves into actors' diverse responses to the model minority stereotype, class, and belonging. Students will evaluate (pan)ethnicity as something to be explained, rather than explanatory, and consider the gaps between diversity and inclusion versus equity in the so-called majority-minority context of the 626.

SEM Section: 01  MW 11:00 am - 12:15 pm  Phi H. Su

SOC 329  (F)  Work and the Future of Capitalism

What does it mean to work? How does capitalism shape the way we work? What might work look like in the future? In this three-part course, students engage with global capitalism's past, present, and future, asking analytic and normative questions about work and the trajectory of capitalism. The first part of the course examines the historical origins of capitalism and leading theories about what capitalism is and how it stratifies the world into racialized social classes. A central theme in part one will be how capitalist labor relations shape meaning and subjectivity, particularly the experience of dignity. In part two, we examine recent and emerging trends in capitalist labor, such as the death of the career, the rise of the "gig" economy, platform capitalism, and even the seemingly inevitable end of work itself as entire occupations become automated by machine learning. A key question will be how these transformations exacerbate and/or alleviate longstanding inequalities from capitalism's 19th century past. The course concludes by asking students to imagine a better vision for work in the next century. Should we continue to work at all? What kinds of productive activity should we value, and how would we go about taming, eroding, or even smashing capitalism to allow them to flourish?

Requirements/Evaluation: participation, reading responses, midterm paper, final paper
Could you be competing for a job—even after getting a college degree—with a robot or an AI-powered chatbot? As technologies advance, every few years debates emerge: will this new kind of automation increase unemployment, or will it generate new kinds of jobs? Will these new jobs be more interesting and high paying, or will they be boring and poorly paid? To think these questions through, in this course we will study some key attempts to understand the socio-economic and political determinants as well as the repercussions of automation. We will delve into the micro-level dynamics operating between machines and workers involved in concrete production processes. We will also explore the macro-level trends in national and global inequality that social scientists associate with automation. In our investigation of both macro- and micro-levels, we will focus on how the risks and benefits of automation get distributed unevenly along already existing axes of class, race, gender, etc.

Requirements/Evaluation: Class participation; 1 mid-term paper proposal; 1 final paper
Prerequisites: none, open to all students
Enrollment Limit: 20
Enrollment Preferences: Preference given to ANTH/SOC majors and STS concentrators
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
STS 331(D2) SOC 331(D2)

Difference, Power, and Equity Notes: The course is centrally concerned with the iniquitous distribution of risks and benefits of automation. Students will gain familiarity with how social scientists study the impacts of automation on class, racial, and gendered dynamics. We will consider how automation may disempower certain workers, and deepen already existing social segmentations.
Requirements/Evaluation: Thoughtful and consistent class participation, visits to Sawyer Library and WCMA, three short response papers, and a final assessment on a "nowhere" of students' choosing
Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: Anthropology and Sociology majors, Global Studies concentrators
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
GBST 335(D2) SOC 335(D2)
Difference, Power, and Equity Notes: This course asks students to grapple with the asymmetries of modern statehood--why some places meet the criteria for statehood but are denied it, while others fall short of formal definitions but are still considered states. Students will assess the stakes of statehood for places that cannot achieve it or do not aspire to. They will creatively marshal these lessons to become the class expert on a "nowhere" that provides us with a lens for interrogating the world map as it currently exists.

SOC 338  (F) Transhumanism: Religion, Technoscience, Obsolescence

Cross-listings: STS 338 SOC 338 REL 338
Primary Cross-listing
This interdisciplinary seminar invites students to pursue sociohistorical analysis and sustained critical discussion of the transhumanist movement and its overriding aims: the augmentation, transformation, and eventual transcendence of human biological constitution; the realization, through speculative technoscientific means, of an enhanced or even "postbiological existence"--a "posthuman condition," "Humanity 2.0." Through close readings of primary historical documents, transhumanist texts, scholarship on transhumanism, works of science-fiction film, literature, and popular culture, we will position the movement as an empirical conduit through which to explore the sociohistorical conditions under which transhumanist ideas and practices have emerged, circulated, and taken up residence. To that end, we will consider the ties of transhumanism to eugenics and massive investments in pharmaceuticals, anti-aging medicine, and so-called "GNR" technologies (i.e. genetics, nanotechnology, and artificial intelligence and robotics); the movement's affinities with neoliberalism and what some have pointed to as transhumanism's racialized subtext of whiteness. We will furthermore devote considerable attention to the technological singularity, the figure of the cyborg, mind-uploading, space colonization, and cryonic suspension, all of which, like transhumanism broadly, suggest that science and technology have in some sense come to operate as powerful channeling agents for the very sorts of beliefs, practices, and forms of association that theorists of secularization expected modernity to displace. Lastly, throughout the course of the seminar we will take transhumanism as a provocation to think broadly and seriously about religion, technology, embodiment, and ways of being human.

Requirements/Evaluation: informal weekly writing, two short review essays, and one 15-page seminar paper
Prerequisites: Prior coursework in sociology-anthropology, history, religion, or science and technology studies.
Enrollment Limit: 14
Enrollment Preferences: Anthropology and Sociology majors and Science and Technology Studies concentrators
Expected Class Size: 14
Grading: yes pass/fail option, no fifth course option

SOC 340  (F) Performing Masculinity in Global Popular Culture  (DPE)
This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia, hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

Requirements/Evaluation: masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

Prerequisites: none; WGSS 202 would be helpful

Enrollment Limit: 15

Enrollment Preferences: a short statement of interest will be solicited; a subsection of applicants may be interviewed

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
SOC 340(D2) LATS 341(D2) THEA 341(D1) WGSS 347(D2) AMST 358(D2)

Difference, Power, and Equity Notes: This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

Attributes: EXPE Experiential Education Courses FMST Related Courses LATS Comparative Race + Ethnic Studies Electives
**Writing Skills Notes:** This is a tutorial course, with plenty of opportunities to work on writing and argumentation. Tutorial papers receive written feedback from both the instructor and the tutorial partner, and are workshopped during the tutorial meetings.

**Difference, Power, and Equity Notes:** Students will learn to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. We will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

**SOC 362 (S) Stories We Tell**

**Cross-listings:** COMP 362 SOC 362

**Primary Cross-listing**

From The Moth to StoryCorps to Williams College's own Storytime, stories are ubiquitous in contemporary society. Indeed, sociologists have argued that social life is itself "storied"—that we locate ourselves within familiar narrative structures, using them to "construct" identities and "tell" our lives. Stories, in this view, are not only the stuff of literature, but also the very fabric of social life: the foundation for individual and collective identities. This course grapples with the role of stories and storytelling in modern social life. What role do stories play in constituting personal identity? What cultural templates structure the stories we tell? Why are memoirs so popular, and how can we explain the more recent resurgence of interest in oral forms of storytelling? What role does storytelling play in politics and social movements? Specific topics will include confessional culture, podcasts, memoir, politics, and social change. Along the way, we will pay explicit attention to medium, and consider how sociologists might learn from journalists, documentarians, and memoirists to convey stories from their own research.

**Requirements/Evaluation:** weekly discussion questions, one 6-7-page paper, and a final project (either a 10-page paper or an equivalent podcast or video essay)

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** if overenrolled, students will be asked to submit a short statement of interest

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**SOC 380 (S) Who Cares? (DPE)**

What does it mean to care—about a person, a situation, or a cause? We often assume that care arises spontaneously and organically. Yet both feelings of care and acts of care always take shape in social contexts. In this course, we will uncover and critically interrogate the norms surrounding caring, caregiving, and care-receiving in our own communities. What social factors influence our willingness to offer care, and to accept it from others? Why is caregiving so heavily gendered and racialized? Is care inevitably corrupted by capitalism? Specific topics will include domestic work and reproductive labor; child welfare and foster care; therapy and mental health care; the discourse of self-care; and social movements that center around enacting care. The course will culminate in a significant experiential learning component; as a class, we will work collaboratively to design and implement a project that pushes or challenges the “care norms” in the northern Berkshires.

**Requirements/Evaluation:** thoughtful and consistent class participation; weekly journal entries (1-2 pages each); collaboratively designed experiential learning project; and a final paper (6-8 pages)

**Prerequisites:** none
Difference, Power, and Equity Notes: This course centers the relationship between structural inequality and the cultural norms surrounding caregiving and care-receiving. Throughout the semester, we will reflect on how care norms both reflect and perpetuate larger systems of inequality, especially race and gender. Through a student-designed experiential learning project, we will strive to create social change in the local community.

SOC 390  (S)  Sex Marriage Family

Cross-listings:  PSCI 380 SOC 390

Secondary Cross-listing

Something has happened to America over the past fifteen years. Large minorities of young adults, especially young men, are now celibate. Cohabitation has skyrocketed but marriage is disappearing, and the country's birth rate is at an all-time low. Not surprisingly, loneliness has become epidemic. A similar story can be told for most other developed countries. The implications for political polarization, economic growth, social insurance programs, public health, military defense, even national survival are grim. What is the cause of this loss of faith in the future? Can public policy reverse these trends? This course is an investigation into relations between the sexes in the developed world, the fate of children and the family, and government attempts to shape them. The course investigates family models in historical and comparative context; the family and the welfare state; the economics of sex, gender, marriage, and class inequality; the dramatic value and behavioral changes of Gen Z around sex, cohabitation, and parenthood; and state policies to encourage partnership.marriage and childbearing in both left-wing (Scandinavia) and right-wing (Central Europe) variants.

Requirements/Evaluation:  Two 4-5 page papers, 12-15 page research paper, discussion questions, class participation

ARABIC STUDIES
(Div I, with some exceptions as noted in course descriptions)

Chair: TBA
Assistant Professors: A. Eqeiq; Associate Professor: B. El Guabli, L. Nassif; Visiting Assistant Professor: N. Mangialardi
Language Fellow: TBA; Teaching Associate: TBA
A. Eqeiq (on leave Spring); L. Nassif (on leave Fall)

Middle Eastern and Maghrebi Studies is a vibrant, growing, and important field in the United States and around the world. Students wishing to enter this rich and varied discipline can begin with a major in Arabic Studies at Williams. The major is designed to give students a foundation in the Arabic language and to provide the opportunity for interdisciplinary and multidisciplinary study of Arab, Islamic, North African and Middle Eastern literatures, art, film, history, religion and politics.

THE MAJOR IN ARABIC STUDIES
Students wishing to major in Arabic Studies must complete ten courses, including the following six courses:

ARAB 101-102 Elementary Arabic
ARAB 201 Intermediate Arabic I
ARAB 202 Intermediate Arabic II
ARAB 301 Advanced Arabic I
ARAB 302 Advanced Arabic II

Students must also take at least one 400-level ARAB course, in addition to three other courses in Arabic and Middle Eastern Studies in Arabic Studies or affiliated units. At least one of these courses should be from the arenas of language and the arts (DIV I) and at least one from politics, religion, economics, history, etc. (DIV II). Students should consult with the Department to confirm that electives are authorized.

Students who place into more advanced language courses may substitute additional courses, adding up to a total of at least nine courses.

Up to four courses from approved study abroad programs may be counted toward the major.

Students who enter Williams with previous training in Arabic may be exempted from up to two of the required seven courses. Thus, in order to earn a certificate, a student must take no fewer than five courses (including three language courses) after enrolling at Williams.

THE CERTIFICATE IN ARABIC
The Certificate in Arabic demonstrates that a student has acquired a working foundation in the language. The sequence of seven language and culture courses is designed to supplement a student's major at Williams by enabling the student to expand their knowledge in a related field.

Required Courses

ARAB 101
ARAB 102
ARAB 201
ARAB 202
ARAB 301
ARAB 302

At least one elective course, either in Arabic literature, arts, or culture, or in Arabic history, religion, politics, economics, etc.

Students must earn a cumulative grade average of B or higher in the sequence of seven courses.

THE DEGREE WITH HONORS IN ARABIC STUDIES
Prerequisites
Honors candidates in Arabic are required to have maintained a GPA of 3.5 in the major to qualify for submitting a thesis proposal. In addition, candidates must demonstrate a strong interest in a specific topic for which an appropriate faculty advisor will be available in the senior year.

**Timing**

Students wishing to pursue a thesis in Arabic are strongly urged to secure an advisor by the end of the week after Spring Break in their junior year. By May 15th of their junior year, candidates must submit to the Program Advisory Committee a one- to two-page proposal and a preliminary bibliography. The Advisory Committee will inform candidates by June 1 whether they may proceed with the thesis and advise them about any changes that should be made in the focus or scope of the project. The summer before the senior year will be spent compiling a more detailed bibliography and preparing for the process of writing the thesis.

In their senior year, candidates will devote two semesters and the winter study period to their theses (ARAB 493-W31-ARAB 494). By the end of the Fall semester, students will normally have undertaken substantial research and produced the draft of at least the first half of the project. At this point students should also have a clear sense of the work remaining for completion of the thesis. In the course of the Fall semester, students will also have chosen and met with a second reader for the project, who will provide additional guidance and read the final thesis. By the end of Winter Study, students should have completed a draft of the entire project. At that time, the Comparative Literature Advisory Committee, together with the advisor, will determine whether the project may continue as an Honors Thesis, or whether its first portions (ARAB 493-W) will be graded as Independent Studies.

The second semester of independent thesis work will be spent revising as necessary. The completed thesis in its final form will be due one week before the last day of classes. At the end of the Spring term, the student will make a public presentation of the final project, to which members of the Advisory Committee will be specially invited.

**Characteristics of the Thesis, Evaluation, and Major Credit**

The topic of the thesis must have to do with some aspect of Arabic language, culture, history, politics, etc. and will be worked out between the thesis writer and her/his advisor. It is also possible to write a thesis that consists of an original translation of a significant text or texts; in this case, a theoretical apparatus must accompany the translation. The complete thesis must be at least 50 and at most 75 pages in length, excluding the bibliography.

The advisor will assign the grades for the thesis courses (ARAB 493-W-494); the Advisory Committee will determine whether a candidate will receive Honors, Highest Honors, or no honors.

For students who pursue an honors thesis, the total number of courses required for the major including the thesis course (ARAB 493-W-494) is 10, i.e., one of the thesis courses may substitute for one elective.

**STUDY ABROAD**

**FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in many cases, though students should be sure to contact the department.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description, and complete syllabus including readings/assignments. We may need specific information (assigned readings) to determine whether the course counts for Div I or II major credit.

**Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

Yes, four.

**Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

No.

**Are there specific major requirements that cannot be fulfilled while on study away?**

No. Students can receive credit toward the major's language requirements from for-credit summer language programs like Middlebury, etc. These count toward the 4-course maximum.

**Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

Yes. Make sure you have the needed number of Div I and Div II courses for the major. Know the difference.
Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

It has happened, but we try to be as flexible as possible.

**ARAB 101 (F) Elementary Arabic**

This is the first course in the year-long Beginning Arabic sequence. It will help you establish a foundation of communicative competence and understanding of the Arabic language and culture. The course adopts an integrated-skills approach with a focus on “formal Arabic” (or so-called Modern Standard Arabic), the language of formal writing and speech in Arab countries, while simultaneously familiarizing you with one variety of spoken Arabic. The course focuses on day-to-day situations and familiar topics.

**Requirements/Evaluation:** Daily homework, active class participation, a skit, a culture portfolio, tests, final exam, and engagement in a variety of co-curricular activities

**Prerequisites:** none

**Enrollment Limit:** 18

**Enrollment Preferences:** students considering a major in Arabic Studies

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** students registered for ARAB 101 and 102 are required to attend and pass the sustaining program during the Winter Study period; credit is granted only if both semesters (ARAB 101 and 102) are taken

**Distributions:** (D1)

Fall 2023

SEM Section: 01    M-F 10:00 am - 10:50 am     Nicholas R Mangialardi

**ARAB 102 (S) Elementary Arabic**

This is the second semester of the Beginning Arabic sequence. This course will continue building the listening, speaking, reading and writing skills students acquired in Arabic 101. Arabic 102 will also develop your competence in Modern Standard Arabic (MSA) primarily. The students will be equipped with the vocabulary, reading facility, grammatical skills as well as the cultural competence they need to navigate familiar topics and simple communication situation in MSA. Students will expand the range of topics, grammar, tenses, and pronouns they use to express themselves both orally and in writing in MSA. This second semester will allow students to listen (to), speak, read, and write about a variety of topics that are geared toward consolidating and enriching their prior acquisitions in Arabic.

**Requirements/Evaluation:** weekly quizzes, daily homework, in-class participation, skits, presentations, and recordings. Students are highly encouraged to participated in the events organized by Arabic Studies and the Arabic TAs.

**Prerequisites:** ARAB 101 or permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** In the event the course is over-enrolled, priority will be given to students majoring or intending to major in Arabic Studies.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** students registered for ARAB 101 and 102 are required to attend and pass the sustaining program during the winter study period; credit is granted only if both semesters (ARAB 101 and 102) are taken.

**Distributions:** (D1)

Spring 2024

LEC Section: 01    M-F 10:00 am - 10:50 am     Lama Nassif
The Iranian Revolution was a major turning point in world history that resulted in the establishment of the Islamic Republic of Iran. This tutorial will evaluate the causes and impact of the revolution and how this seminal event continues to have widespread repercussions around the globe. The first weeks will explore the history of pre-revolutionary Iran with special attention to religious and intellectual trends such as the ideas of Ayatollah Ruhollah Khomeini, Jalal al-e Ahmad, and Ali Shariati. We will then evaluate the revolution itself including the US hostage crisis, the downfall of the Shah Muhammad Reza Pahlavi Shah, and how Khomeini’s vision of society became paramount. Finally, we will explore the aftermath of the revolution including Iran’s geopolitics, the nature of the theocratic system in Iran as well as how the revolution impacted every day lives of Iranians in Iran and abroad particularly how they reflect on the revolution in memoirs, films, and literature.

Requirements/Evaluation: Weekly meetings. Weekly papers - either a 5 page primary paper or a 2-3 page response paper.

Prerequisites: No prerequisites.

Enrollment Limit: 10

Enrollment Preferences: First Years and Sophomores.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 109(D2) HIST 109(D2)

Writing Skills Notes: As a tutorial, students are expected to regularly write analytical and critical papers on the readings. They will receive regular and consistent feedback from the instructor and their partner and will be given the opportunity to re-write some of their assignments.

Difference, Power, and Equity Notes: The Iranian Revolution, like other major social movements, offered a compelling critique of the status quo and promised a more just society that would be more equitable for all Iranians. The tutorial will consider the relationship between the rhetoric of the Revolution and the lived reality, especially how this seminal event impacted the lives ordinary Iranians. Was the Revolution simply a change in the composition of the political elite or did it yield new realities and more access for Iranians

Attributes: HIST Group E Electives - Middle East

Not offered current academic year

ARAB 201 (F) Intermediate Arabic I (DPE) (WS)

This course will build on the students' acquisitions in Arabic 102 to consolidate their learning of the Modern Standard Arabic and one variety of spoken Arabic. In addition to expanding students' vocabulary and enhancing their communication skills, the course will deepen their knowledge and use of grammar in both speaking and writing. Upon successful completion of this course, students will be able to hold conversations in Arabic with some fluency on a variety of topics while developing cultural appreciation of Arabic-speaking countries.

Requirements/Evaluation: quizzes, tests, homework, and active class participation

Prerequisites: ARAB 102 or placement test

Enrollment Limit: 18

Enrollment Preferences: If the course is overenrolled preference will be given to those who intend to major or do a certificate in Arabic.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: This course involves a great deal of writing, ranging from vocabulary and grammar-focused exercises to written assignments about a variety of topics. Students will receive extensive and timely feedback on this written work.

Difference, Power, and Equity Notes: Any language is the locus of issues of difference, power, and equity. Students will learn about gender and pronouns. They will wonder why Arabic does not have a gender neutral pronoun. Students will understand how Arabic acts as a dominant language in places minority languages in the Middle East and North Africa. Students will emerge from the course with a critical understanding of Arabic language's politics.
ARAB 202  (S)  Intermediate Arabic II
As a continuation of ARAB 201, this course will expose students to Modern Standard Arabic while increasing their communicative and intercultural competencies, and their knowledge of Arab cultures. Our main textbook will be Al-Kitaab fii Ta'allum al-'Arabiyya Part II but outside materials from diverse media such as television and newspapers will also be included. Class will be conducted in Arabic.

Class Format: class meets in three 75-minute sessions. Additional conversation sessions are required at designated times throughout the semester
Requirements/Evaluation: Active daily class participation, daily homework and homework corrections, writing portfolio and portfolio corrections, oral components, quizzes, final exam, and co-curricular activities
Prerequisites: ARAB 201 or placement test.
Enrollment Limit: 12
Enrollment Preferences: Students considering an Arabic major.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

ARAB 209  (F) Saharan Imaginations  (DPE) (WS)

Cross-listings: COMP 234 ENVI 208 ARAB 209

Primary Cross-listing

Deconstructing reductive Saharanism, which the course conceptualizes as a universalizing discourse about deserts, this course seeks to critically examine the myriad assumptions that are projected upon deserts across times and cultures. In addition to their depiction as dead and empty, deserts have become a canvas for the demonstration of religiosity, resilience, heroism and athleticism. Cultural production, particularly literature and film, do, however, furnish a critical space in which important questions can be raised about deserts’ fundamental importance to different cultures and societies. Drawing on novels, films, and secondary scholarship, the course will help students understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the desert sub-genre of African, Euro-American, and Middle Eastern literatures. Whether grappling with transcontinental issues of climate change, cannibalization of biodiversity or overexploitation of natural resources, desert-focused cultural production invites us to interrogate the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature.

Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Students are admitted into the course on a first-come-first-serve basis. If the course is over-enrolled, preference will be given to Arabic Studies and Comparative Literature majors and certificates.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 234(D1) ENVI 208(D1) ARAB 209(D1)

Writing Skills Notes: Students will receive constant and extensive feedback on their written work. Students will write regular weekly responses on Glow, a reflection statement, two 5pp. papers for midterms, and one 10pp. final paper.

Difference, Power, and Equity Notes: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that
address issues of power and environmental discrimination.

ARAB 211  (S) Understanding 9/11 and the War in Iraq  (DPE) (WS)
Cross-listings: HIST 116 ARAB 211

Secondary Cross-listing

What were some of the causes of 9/11/2001 and what were some of the consequences? Why and how did the United States invade Iraq in 2003 and what impact did the subsequent occupation of that country have on the rest of the Middle East and the world in general? In this course on recent political and cultural international history, that will also consider this history in film and popular culture, the monumental ramifications of the "War on Terror" will be considered and how this framework has shaped the 21st century. In the first part of the course, US-Middle Eastern relations will be explored and the eventual emergence of al-Qaeda in the late 1990s. Then the terrorist attacks on American soil on 9/11 will be studied. In this segment, students will engage with oral histories and memoirs related to the fateful events of that day. In the following module the political and cultural responses will be considered. Particular attention will be on the prelude to the Iraq War, especially how that war was justified and rationalized. Here students will analyze political rhetoric, public discourse, and activism through a range of sources including in the media, the academy, and in popular culture. Then the attention will be turned to the invasion of Iraq in March 2003, and the eventual occupation of Iraq. The myriad Iraqi responses will be studied along with American military experience. Finally, the course will evaluate the significance of the first decade of the 21st century and how these events, and the memory of this decade, continue to reverberate today.

Requirements/Evaluation: Several short papers and a final oral history.
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: First-years and sophomores.
Expected Class Size: 19
Grading: no pass/fail option,  no fifth course option
Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
HIST 116(D2) ARAB 211(D2)

Writing Skills Notes: In this writing-intensive first-year seminar, students will engage with primary sources such as oral histories, autobiographies and political tracts and write short interpretive essays that will go through several editing stages. The final writing project will be an oral history of an individual who has a direct personal connection with either 9/11 and/or the wars in Iraq. The students will learn how to synthesize a range of experiences into a 10-12 page paper.

Difference, Power, and Equity Notes: This course will consider power and difference in a number of ways. First, it will evaluate how the US government used its political power to convince the public to support a military operation under questionable premises. Second, it will critically assess the "War on Terror" and who has benefited from it. Third, it will examine how the American military occupied Iraq and the ways in which Iraqis tried to resist the American designs on their country.

ARAB 212  (F) Distant Encounters: East Meets West in the Art of the European Middle Ages  (WS)
Cross-listings: ARTH 212 REL 210 ARAB 212

Secondary Cross-listing

In this tutorial, students will investigate the rich artistic consequences -- in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts -- of European contact with the Eastern Mediterranean between approximately 300 and 1450 CE. From the
beginnings of Christianity, pilgrims from Europe made the long journey to sacred sites in what they called the Holy Land (extending across parts of present-day Egypt, Israel, Syria, and Turkey), the place of Christ's life, death, and believed resurrection. Large numbers of pilgrims even made the long journey to the Holy Land, and especially to Jerusalem, to visit a range of sacred sites related to Christ and his saints. When these sites became less accessible with the spread of Islam in the seventh century -- and even before this time -- Europeans sought to recreate many of them at home. Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series of five major and several lesser "crusades." Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of the Eastern Mediterranean also came through trade and through the travel and settlement of non-Europeans in Europe itself, particularly in Spain, Sicily, and Venice. Through all of these centuries, moreover, the Christian, Greek-speaking empire of Byzantium, focused on its great capital of Constantinople (present-day Istanbul), interacted in myriad ways, both friendly and hostile, with the Latin-speaking polities of Western Europe, focused at least symbolically on their ancient capital of Rome. Together, by way of open discussion, we will explore artistic production within each of these different cross-cultural contexts of East-West encounter. In the process, we will reflect on how art could function as a conduit for the exchange of ideas in the Middle Ages, and how it could be used both to negotiate and to intensify cultural difference.

Requirements/Evaluation: participation in discussion; five 4-5-page papers; five 1-2-page papers; and one 6-8-page final paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first- and second-year students, but open to all

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 212(D1) REL 210(D2) ARAB 212(D1)

Writing Skills Notes: In this tutorial, students will develop skills of critical reading and focus on how to craft clear and persuasive arguments of their own. To help them achieve these goals, they will receive timely comments on their written work, especially the five 4-5-page papers they will submit, with suggestions for improvement.

ARAB 214 (S) Divas and Dervishes: Introduction to Modern Arab Music and Performance (DPE) (WS)

Cross-listings: MUS 214 ARAB 214 COMP 270

Primary Cross-listing

From Sufi rituals to revolutionary uprisings, music has long played a central role in the social, political, and religious life of the Arab world. This is especially audible in the modern era, when new technologies and institutions began to record, amplify, and broadcast the region's sounds, preserving centuries-old traditions while also producing new forms of popular music. This course introduces students to Arab musical genres and practices as they developed from the late nineteenth century. We will cover a broad geographical range, exploring the classical Andalusian repertoires of Algeria, ecstatic dervish chants in Egypt, patriotic pop tunes from Lebanon, and other topics. To highlight connections between musical traditions as well as their unique local features, we will ask questions such as: What can music tell us about interactions between sacred and secular life? How is music used to define social groups and negotiate identity, gender, and class? Which musical characteristics are associated with Arab "heritage" and "modernity," and how are these performed? In what ways does music shape everyday life in the Arab world? Class sessions and discussion will be based on academic readings and at-home listening assignments. No previous knowledge of Arabic or Arab music are required.

Requirements/Evaluation: In-class participation, short essays (1 page) every two weeks, midterm presentation, and a final paper (12-14 pages).

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies and Music majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
MUS 214(D1) ARAB 214(D1) COMP 270(D1)

Writing Skills Notes: Students will develop their writing skills by submitting one-page unit responses every two weeks and a final paper of 12-14 pages on a topic of their choice. Students will receive feedback on each writing assignment and have opportunities for multiple drafts and peer review during the semester.

Difference, Power, and Equity Notes: Through the lens of music, this course critically examines modern Arab society and power dynamics related to politics, gender, race, and class.

ARAB 222 (S) Photography in/of the Middle East (DPE)

Cross-listings: ARAB 222 ARTH 222

Secondary Cross-listing
Photography has been globally disseminated and locally inflected since its invention. In the Middle East, the powers and pleasures of the medium have been valued by colonial forces, indigenous populations, photojournalists and artists; the resulting images merit aesthetic and art historical appreciation even as they grant visual access to the social and political dynamics operative in diverse cultural contexts. We will explore photographic practices in various zones of the Middle East--e.g., the Holy Land, Turkey, Egypt and the Persian sphere--by attending to individual photographers and case studies. This tightly focused approach will support, in turn, a consideration of the agency and power of images more generally--what work do photographs do? Who resists and who benefits? The goal will be to appreciate diverse styles and perspectives that underlie renderings of the Middle East.

Class Format: Discussion and GLOW posts required.
Requirements/Evaluation: Discussion, GLOW Posts, final project
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: majors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 222(D1) ARTH 222(D1)

Difference, Power, and Equity Notes: Photographs are tricky. Whose experiences and values do they really represent--those who are depicted? Those who wield the camera? Or, those who view images that are so easily reproduced and widely shared? How does identity figure? Religious conviction? Political affiliation? And how are these variables encoded in the material evidence? Appreciating the myriad powers of images requires multiple skills--from close-looking to interdisciplinary analysis--useful in contemporary visual culture.

ARAB 224 (S) Second Language Learning: The Learner, the Classroom, and the Social World

Learning a second language is one of the most exhilarating, rewarding, and eye-opening experiences of a life-time. Millions of people around the globe embark on a journey of exploration of target languages and cultures while reflecting on the self and home culture(s) in the process. This course introduces you to core issues related to the learning of a second language. What are the processes involved in learning a second language? What does it mean to know another language? Is second language learning similar to first language learning? Why are some language learners more successful than others? What individual variables do learners bring to the learning process? How can classrooms facilitate second language learning? How do learners perceive teachers’ feedback? How does the specific socio-cultural context impact language learning? How does learning about the target culture feed into language learning? How does the learner's identity evolve in the process of second language learning? These are some key second language learning questions that we will examine in this class. Readings are drawn from studies on the learning of different languages.
ARAB 232 (S) Islam in Africa (DPE)

Cross-listings: REL 232 GBST 232 AFR 232 ARAB 232 HIST 202

Secondary Cross-listing

Islam in Africa is often relegated to the peripheries in the study of Islam, a religion most associated with Arabs and the Middle East. On the flip side, Islam is also portrayed as foreign to African belief systems and institutions. The relationship between Islam and Africa, however, begins with the very advent of Islam when early Arab Muslim communities took refuge in the Abyssinian empire in East Africa. This course explores the history of Islam and Muslim societies on the African continent by focusing on the localized practices of Islam while also connecting it to Islam as a global phenomenon. The course will begin with a historical focus on the spread of Islam in Africa from East Africa and North Africa in the seventh century all the way to the spread of Islam through Sufi brotherhoods in the eighteenth and nineteenth centuries. The course will also take an anthropological approach, exploring the diverse practices of Islam in African Muslim communities and the social and cultural impact of Islam on African societies. Among the topics the course will cover include African Muslim intellectual traditions, local healing practices, religious festivals, early modern African Muslim abolitionist movements, and the historical interactions between African and Asian Muslim communities in the Indian ocean world.

Requirements/Evaluation: Two essays during the semester and final project.

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: REL, HIST, ARAB, AFR, GBST majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 232(D2) GBST 232(D2) AFR 232(D2) ARAB 232(D2) HIST 202(D2)

Difference, Power, and Equity Notes: The course will urge students to consider how scholars construct centers and peripheries through a study of Islam in Africa that is often rendered to the peripheries in the study of Islam. The course will also explore the diversity of African Muslim communities, getting students to think about the diversity of human experiences and interpretations of shared sacred texts.

ARAB 236 (S) Reading the Qur'an

Cross-listings: GBST 236 REL 236 COMP 213 ARAB 236

Secondary Cross-listing

In the nearly 1500 years of Islamic history, the Qur'an has been a central source of spiritual insight, ethical and legal guidance, sacred stories, and theological principles. Considered the divine word of God, the Qur'an is central to devotional life. This course will explore the Qur'an as a text that is always in a state of production. We will focus significantly on close readings of the text of the Qur'an, in addition to pre-modern and modern Qur'anic exegesis. The course will begin with a historical account of the revelation and collection of the Qur'an, placing the form and content of the text in the context of 7th century Arab society and the life of the Prophet. We will then study Qur’anic commentaries to discuss how Muslims have drawn
theological, legal, philosophical, and mystical meaning from the Qur'an. We will pose some of the following questions: What do the different exegetical methods tell us about the intertextual nature of the Qur'an? How have these shifting notions affected the meaning made from Qur'anic verses and passages? What role do interpretive communities play in determining what the Qur'an says? Lastly, through an exploration of the art of Qur'an recitation, calligraphy, and Qur'an manuscripts, we will explore the ways in which the Qur'an is also an object of devotion in Muslim life.

Requirements/Evaluation: class participation, weekly reading responses, 3- to 4-page midterm paper, and a final project with a media component and a 4- to 6-page analytical essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Religion and Arabic Studies majors

ARAB 242  (S) Women, Gender, and Sexuality in Islam  
(DPE)

Cross-listings: REL 242 ARAB 242 WGSS 242

Secondary Cross-listing

The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media and ask the crucial question: do Muslim women need saving? We will then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism—the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam around women, gender, and sexuality and on Muslim women's own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.

Requirements/Evaluation: weekly discussion post, midterm essay, and final paper (6-8 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Religion, Women's, Gender and Sexuality Studies and Arabic majors

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 242(D2) ARAB 242(D2) WGSS 242(D2)

Difference, Power, and Equity Notes: This course explores the relationship between gender, authority, and civilizational discourse. To that end, the course will explore: 1) how assumptions about gender shaped the legal and Quranic exegetical tradition and Muslim feminist critiques. 2) The construction of the oppressed Muslim woman in justifying military invasion and nationalistic rhetoric. This course will introduce students to critical tools in decolonial feminism and the relationship between gender and power.

Not offered current academic year

ARAB 243  (F) Islamic Law: Past and Present

Cross-listings: HIST 302 REL 243 WGSS 243 ARAB 243

Secondary Cross-listing
From fear of the Shari'a to its implementation in so called "Islamic countries," Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari'a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

Requirements/Evaluation:  weekly responses, midterm essay, final essay

ARAB 252  (F) Arab Women Memoirs: Writing Feminist History  (DPE) (WS)
Cross-listings: ARAB 252 COMP 252 WGSS 251
Primary Cross-listing
This course reviews selected autobiographical writings by Arab women writers from the wave of independence in the 20th century to the contemporary Arab uprisings, passing through all the transformations that globalization and the technosphere have instigated. We will examine the role that first-voice narrative plays in shaping literature, history and thought, while providing a space to reclaim cultural, social and political agency. Focusing on the different articulations of self-representation, our discussion will address how these women reflect on the shifting discourses of identities, gender, nationalism, religion, feminism, sexuality, politics, borders and their histories. Questions we will address include: How did these memoirs contribute to the development of Arab feminist consciousness? In addition to the memoirs, we will look at women’s blogs and watch films that focus on first-person narrative to discuss related topics, such as, visual testimonies, virtual political participation and feminist resistance in the technosphere. Required texts may include: Fadwa Tuqan (A Mountainous Journey: An Autobiography), Fatima Mernissi (Dreams of Trespass: Tales of a Harem Girlhood), Radwa Ashour (The Journey), Fadia Faqir and Shirley Eber (In the House of Silence: Autobiographical Essays by Arab Women Writers), and Assia Djebar (Fantasia), as well as critical essays and selections from autobiographical writings that reflect the diversity of Arab women in the Middle East and the diaspora.

Requirements/Evaluation: students will write the following: three response papers (2-3 pages), at least 6 journal entries (300 words per entry) and a final analytical research essay (7-10 pages). They will have a final performance project.
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Arabic Studies majors
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 252(D1) COMP 252(D1) WGSS 251(D1)
**Writing Skills Notes:** In addition to writing several short papers, a final research paper, a reflection on their final performance project, students will write six journals. The combination of research writing, personal reflection echoes the creative non-fiction genre of the course. It also provides students with the opportunity to reflect on forms of history/memory writing.

**Difference, Power, and Equity Notes:** Gender inequality, sexism, and the intersection of colonialism, nationalism and capitalism are the heart of this course. The memoirs of Arab women writers from the late 19th century to the present continue to depict the history of women's movement and the struggle for women's rights in the Arab-speaking world while addressing the different hierarchies of power and domination that regulate them to second class citizens. Students will learn DPE vocabulary and critical terminology.

**ARAB 279  (S)  Islam on the Indian Ocean**

**Cross-listings:** ASIA 279 REL 279 GBST 279 ARAB 279

**Secondary Cross-listing**

While colonial and Eurocentric geographies speak in terms of continental separation, historically the continents of Africa and Asia have been connected to one another through a dual link: Islam and the Indian Ocean. Indian Ocean trade and travel have historically connected East Africa, the Arabian Peninsula, South Asia, and South East Asia, shaping the lives of people and communities who lived not only along the coasts but also inland. This course focuses on these transregional connections, looking at the Indian ocean as a connective space that binds people and regions together rather than separating them. The course will also examine the role of Islam as a religious, economic, social and political force that brought together Muslim communities throughout the regions along the Indian ocean. In exploring these connections, the course will cover a broad historical period, from the 7th century with the rise of Islam to European colonialism and the emergence of a global economy in the nineteenth century.

**Requirements/Evaluation:** weekly responses, midterm essay, final paper

**Prerequisites:** none

**ARAB 301  (F)  Advanced Arabic 1  (WS)**

A continuation of Intermediate Arabic, ARAB 301 aims to expand students' listening, reading, writing, and speaking skills in Arabic. The course will also stimulate students' intellectual curiosity about the Arabic-speaking regions and enhance their intercultural competence. Using Al-Kitaab as well as a variety of authentic written and audiovisual materials, the course will advance their proficiency in Modern Standard Arabic. The course will also encourage enrolled students to engage critically with a wide variety of topics in Arabic language as they enrich their knowledge of the different aspects of Arabic language and culture. Students at this stage will also be assisted to generate more complex written and oral assignments.

**Requirements/Evaluation:** active class participation, daily assignments, presentations, quizzes, midterm exam, final exam

**Prerequisites:** ARAB 202 or equivalent

**Enrollment Limit:** 8

**Enrollment Preferences:** Arabic majors and anyone who has a level-appropriate knowledge of Arabic language.

**Expected Class Size:** 2

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)  (WS)

**Writing Skills Notes:** Students will be writing multiple drafts in Arabic; the weekly written work expected from students is 800 words in Arabic
language, students will also be doing translations from Arabic into English or vice-versa; and all written work from students will be evaluated, and students will receive feedback to rework it. Students will receive detailed and consistent feedback about their writing in Arabic language.

Fall 2023

SEM Section: 01  MWF 8:30 am - 9:45 am  Amal Eqeiq

ARAB 302  (S) Advanced Arabic 2  (DPE)  (WS)

A continuation of Advanced Arabic 1, ARAB 302 aims to reinforce students' listening, reading, writing, and speaking skills in Arabic through a deeper engagement with authentic materials. Built around a plethora of texts and audiovisual materials, the course seeks to assist students to develop their language and critical thinking skills in Arabic. Situated at the intersection of language learning and content teaching, this course will prepare students for more scholarly engagement with Arabic in the fourth year. Like ARAB 301, the course will be conducted entirely in Arabic.

Requirements/Evaluation:  Reflections, discussions, essays, reading and writing project, quizzes, exams, and presentations.

Prerequisites:  ARAB 301 or equivalent

Enrollment Limit:  18

Enrollment Preferences:  Arabic Studies, or students who completed ARAB 301

Expected Class Size:  7

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D1)  (DPE)  (WS)

Writing Skills Notes:  Students will engage in daily writing and reflections involving prose responses (blogs, commentaries, etc.) to discussion prompts, movies, YouTube videos, comic analysis and articles. The students will also work on a portfolio with entries that will involve a careful process of revisions as well as rigorous research in Arabic recourses, summaries and essays. The instructor will give daily feedback on students' writing as well as training in writing skills to advance their writing abilities.

Difference, Power, and Equity Notes:  The students will engage in an exploration of social, political, and economic realities in Arab societies across state and community boundaries. They will examine similarities and differences across a variety of contexts involving differential power dynamics, biases, and gender roles. The selected texts will also expose students to issues of power and inequality based on internal and external factors in Arab societies as well as the social struggles of immigrants and refugees.

ARAB 303  (S) Food in the Middle East: A History  (DPE)

Cross-listings:  ARAB 303  HIST 303

Secondary Cross-listing

In this course we examine the rich culinary history of the Middle East first among the three major religions in the region (Judaism, Christianity, and Islam), then during the time of major Islamic Empires such as the Abbasids and Ottomans, and finally in the modern period. Using an array of primary and secondary sources, we explore the social, religious, literary, and economic place of food. We will study the consumption of an attitudes toward specific foodstuffs, gauging the medicinal and culinary value of spices, the historical taboos against drinking coffee and alcohol, and the dispute over various dishes within modern nationalist constructions. We will also investigate how Middle Eastern peoples from different ethnic, geographic, and religious backgrounds have historically used food to express their distinct cultural, national, and gendered identities.

Requirements/Evaluation:  attendance, participation, map exercise, leading discussion, 3 short essays, final paper/research project

Prerequisites:  none

Enrollment Limit:  20

Enrollment Preferences:  History and Arabic Studies majors, seniors

Expected Class Size:  20

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 303(D2) HIST 303(D2)

Difference, Power, and Equity Notes: This course explores a variety of themes within Middle Eastern food history and their implications to different religious communities, genders, and/or socio-economic groups, across a large swath of time. Students will be asked to explore these topics in class discussions and writing assignments, using multiple comparative perspectives.

ARAB 307  (F)  To Die For? Nationalism in the Middle East  (DPE)

Cross-listings: ARAB 307 HIST 307

Secondary Cross-listing

In 1932, or twelve years into his rule and twelve years after the establishment of Iraq, King Faysal I lamented that there were "no Iraqi people but only unimaginable masses of human beings, devoid of any patriotic idea, imbued with religious traditions and absurdities, connected by no common tie."

This course will consider how true the King's statement still holds by evaluating the various attempts at state and nation building in the modern Middle East. Some of the more prominent questions that this course will examine include: What is a nation? What are the essential characteristics of a nation? Who are a people? Why are people ready to die for the nation? And who is included and excluded in the nationalist narrative? After assessing some of the more influential theories of nationalism, we will explore the historical experience of nationalism and national identity in Egypt, Israel, Turkey, Iran, and Iraq. What has been at the basis of nationhood? How did European concepts of nation translate into the Middle Eastern context? What was the role of religion in these modern societies? How do traditional notions of gender effect concepts of citizenship? We will also explore some of the unresolved issues facing the various nations of the Middle East, such as unfulfilled nationalist aspirations, disputes over land and borders, and challenges to sovereignty.

Requirements/Evaluation: There will be several options to fulfill the requirements of this course including a weekly journal, oral exam or a final research paper (12-15 pages).

Prerequisites: None.

Enrollment Limit: 20

Enrollment Preferences: History and Arabic Studies majors, seniors, and students with a demonstrated interest in the Middle East.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 307(D2) HIST 307(D2)

Difference, Power, and Equity Notes: This course examines the power of the state to decide who is included and not included in the nationalist narrative. How does it seek to promote unity and how does it explain differences within and outside of society? Though nationalism can be a very powerful unifying factor, this course will also consider examples where nationalism has the opposite effect.

ARAB 308  (F)  The Nile  (DPE)

Cross-listings: GBST 320 ENVI 335 ARAB 308 AFR 350 HIST 308

Secondary Cross-listing

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It was on the banks of this river that the great Egyptian empires were founded that led to the building of some of humanity's most astounding structures and artworks. While the Nile seems eternal and almost beyond time and place, now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This alarming nexus of demography, climate change, and economic development has led to increasingly urgent questions of the Nile’s future. Is the Nile dying? How has the river, and people’s relationship with it, changed over the last century? This course will consider the history of the Nile and and its built and natural environment. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. By following an imaginary droplet flowing from tributaries until it makes its way into the Mediterranean Sea, we will learn about the diverse peoples and cultures along the way. We will evaluate the numerous
attempts to manage and control the Nile, including the building of big dams, and the continuous efforts to utilize the river for economic development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the major urban centers with the Nile and whether the tensions among Nile riparian states will lead to "water wars" in East Africa and the Middle East.

**Requirements/Evaluation:** short papers and final project/paper

**Prerequisites:** none, though background in Middle East history is preferable

**Enrollment Limit:** 19

**Enrollment Preferences:** History and Arabic Studies majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 320(D2) ENVI 335(D2) ARAB 308(D2) AFR 350(D2) HIST 308(D2)

**Difference, Power, and Equity Notes:** The course fulfills the DPE requirement because it evaluates the differing experiences of the Nile among different cultural groups. It will evaluate how the central government is constantly trying to change how people use their water and therefore over-determine how people interact with their natural environment.

**ARAB 331 (F) Popular Culture in the Arab World: Youth, Populism, and Politics (DPE)**

**Cross-listings:** COMP 332 ARAB 331

**Primary Cross-listing**

Since the uprisings in the Arab world in 2011 and the counter-revolutions that followed, much attention has been paid to the significant role of the "popular" in creating social and political transformations. The voice of the youth and "the street," in particular, emerged as massive sources and sites for political mobilization. But, are these categories identical? Does youth culture equal popular culture? This survey course is designed to provide students with an introduction to the different layers that constitute popular culture in the Arab world since the decolonization of Arab states in the 1950s. Questions that we will ask include: What constitutes "popular culture" in the Arab world? How is it different than folk culture, mass culture, or "high" culture? Who are the key players in the creation and dissemination of "popular" culture? Besides globalization, for example, what other social, political and economic dynamics engulf the definition of the "popular"? What are modes of self-fashioning and representation of Arab identity that characterize this culture? To answer these questions we will examine original sources (with English translation) that include a graphic novel, political cartoon and graffiti, documentaries, TV shows, soap operas, video clips, music, comedy, blogs, news and social media. A selection of essays from anthropology, Arab culture studies, political science, journalism, and online videos will be used to provide historical and critical context for the material discussed in class.

**Requirements/Evaluation:** active class participation, two shorter papers (3-4 pages), two film reviews and critical reflections (1-page), a performance, and a longer final paper (7-10 pages)

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** students majoring in or considering a major in Arabic Studies

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COMP 332(D1) ARAB 331(D1)

**Difference, Power, and Equity Notes:** As the course description explains, this course engages the concept of the popular through a critical examination of difference, power, and equality in the context of national revolt against colonialism, dictatorship, and socioeconomic injustice in the Arab world since the 1950s. The content will focus on addressing how voices from the margins, particularly the youth, the urban poor, and women,
articulated a political language of popular resistance against the dual hegemony of state and colony.

**ARAB 332 (S) Islam and Feminism**

**Cross-listings:** REL 332 WGSS 334 ARAB 332

**Secondary Cross-listing**

This course examines the relationship between feminism and Islam, focusing particularly on Islamic feminist scholarship. We will take a genealogical approach to our study of Islamic feminism tracing the different discourses that have informed and shaped the field. The first part of the course will begin with a critical examination of orientalist and colonial representations of Muslim women as oppressed and in need of liberation. We will then explore Muslim responses to such critiques that were entwined with nationalist and independence movements. This historical backdrop is critical to understanding why the question of women and their rights and roles become crucial to Muslim self-understanding and Islamic reform. The second part of the course will focus on major intellectuals and thinkers who have influenced Islamic feminism. Finally, the last part of our course will explore the breadth of Islamic feminist literature, covering the following themes: 1) feminist readings of scripture; 2) feminist critiques of Islamic law; and 3) feminist theology.

**Requirements/Evaluation:** weekly responses, midterm essay, final research paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Religion, Arabic Studies, Women's, Gender and Sexuality Studies, History majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**ARAB 337 (S) Soundscapes of Arabic Literature: Listening to Text and Society**

In recent years, scholars of the Arab world have paid increasing attention to the ways in which sound and sonic sources can add new depth to our understanding of the region. While much research has drawn on audio recordings, this course explores sounds, songs, noises, and silence through literature to develop a multi-sensory examination of the modern Arab world. We will listen to sounds of the past and present through novels, short stories, poems, and other texts (in translation), discussing how a consideration of the aural environment can shift the way we read both literature and history. Interdisciplinary in scope, this course introduces students to scholarly approaches in literary studies, anthropology, ethnomusicology, and the emerging field of sound studies. Units in this course are organized thematically rather than by country. We begin with an introduction to sound studies, then move on to reading literary texts from the Arab world and secondary scholarly studies to consider topics ranging from the sounds of quotidian street life to those of conflict in war. Students will learn to use the soundscape as a methodological tool through classroom discussions and weekly reading and writing assignments. Knowledge of the Arabic language is not required.

**Requirements/Evaluation:** In-class participation, weekly short essays (2 pages), midterm project, and a final paper (12 pages).

**Prerequisites:** No prerequisites.

**Enrollment Limit:** 19

**Enrollment Preferences:** Comparative Literature, Arabic Studies and Music majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

ARAB 340  (F)  Arab Women Memoirs: Writing Feminist History  (DPE) (WS)

In this seminar we review selected autobiographical writings by Arab women writers from the wave of independence in the 20th century to the contemporary Arab uprisings, passing through all the transformations that globalization and the technosphere have instigated. We will examine the role that first-voice narrative plays in shaping literature, history and thought, while providing a space to reclaim cultural, social and political agency. Focusing on the different articulations of self-representation, our discussion will address how these women reflect on the shifting discourses of identities, gender, nationalism, religion, feminism, sexuality, politics, borders and their histories. Questions we will address include: How did these memoirs contribute to the development of Arab feminist consciousness? How did these women writers carve a literary space for feminist memory in modern Arabic literature? In addition to the memoirs, we will look at women’s blogs and watch films that focus on first-person narrative to discuss related topics, such as, visual testimonies, virtual political participation and feminist resistance in the technosphere.

Requirements/Evaluation: Students will write the following: three response papers (2-3 pages), at least 6 journals entries (300 words per entry) and a final analytical research essay (7-10 pages). They will have a final performance project.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)  (DPE) (WS)

Writing Skills Notes: In addition to writing several short papers, a final research paper, a reflection on their final performance project, students will write six journals. The combination of research writing, personal reflection echoes the creative non-fiction genre of the course. It also provides students with the opportunity to reflect on forms of history/memory writing.

Difference, Power, and Equity Notes: Gender inequality, sexism, and the intersection of colonialism, nationalism and capitalism are the heart of this course. The memoirs of Arab women writers from the late 19th century to the present continue depict the history of women's movement and the struggle for women's rights in the Arab-speaking world while addressing the different hierarchies of power and domination that regulate them to second class citizens. Students will learn DPE vocabulary and critical terminology.

ARAB 360  (S)  Repairing a Broken World: Intro to North African Contemporary Art  (DPE)

Cross-listings: ARTH 560 ARAB 360 RLFR 360 COMP 361 ARTH 460

Secondary Cross-listing

How do artists respond to a world in crisis? How does visual art engage violent histories, injured bodies, social injustice and ecological disaster? In this course we will explore the political and ethical concept of repair as it emerges in the work of contemporary North African visual artists. Repair is both a material and symbolic transformational practice of putting together something that is torn or broken. It is never complete, nor does it redeem a history of harm or violence. Rather repair is an invitation: a bringing of people, histories, objects, buildings, feelings and geographies into relation with one another in order to link worlds that have been splintered and separated. It is also a call to imagine other futures. North African contemporary artists have deeply engaged in this type of repair work, attending to colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity and broken transmission of memory. We will dive into the work of individual artists as well as collectives while reading theoretical texts about broken-world thinking, reparative epistemology, alternative archives, and material reparations.

Class Format: Section 1 is conducted entirely in French. Section 2 is conducted in English (with the option of selected reading in French). Students are welcome to sign up for either section but students taking the course for RLFR credit must register for section 1.

Requirements/Evaluation: For undergrads: Active participation, weekly glow posts, 5-page mid-term paper, 10-12 page final paper and presentation. For grad students: Active participation, weekly glow posts, 5-page mid-term paper, and 20-page final paper and presentation.

Prerequisites: For RLFR students, any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18/sec

Enrollment Preferences: If over-enrolled, preference will be given to RLFR, ARAB, ARTH and COMP majors, and only 4 spots will be offered to Grad Art students.

Expected Class Size: 15/sec

Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTH 560(D1) ARAB 360(D1) RLFR 360(D1) COMP 361(D1) ARTH 460(D1)

Difference, Power, and Equity Notes: This course critically examines art work that engages colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity.

Not offered current academic year

ARAB 363 (S) Where are all the Jews? (DPE) (WS)

Cross-listings: ARAB 363 REL 268 COMP 363 JWST 268

Primary Cross-listing

Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance Israelite Universelle's schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews' departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, ethnographies, historiographical works, and anthropological texts alongside documentaries films, the students will understand how literature and film have become a locus in which amnesia about Arab/Berber Jews is actively contested by recreating a bygone world. Resisting both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

Requirements/Evaluation: 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: students interested in critical and comparative literary, religious or historical studies.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

Distributions: (D1) (DPE)

Writing Skills Notes: Students are required to present an outline of their papers before submitting a draft paper. The professor will give feedback on each written work to improve students' writing skills. Students are required to incorporate the feedback to improve their drafts before they become final. Students will receive detailed and consistent feedback about their writing in Arabic language. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Students in this course will understand the historical process that lead to the disappearance of Arab/Berber Jews. Students also will work out alternative ways to grasp Jewish-Muslim relations beyond nostalgia and conflict. Finally, students enrolled in the course will grapple with and try to disentangle the complexity of Jewish-Muslim citizenship in both pre-colonial and postcolonial contexts.

ARAB 369 (S) Indigenous Narratives: From the Fourth World to the Global South (DPE) (WS)

Cross-listings: GBST 369 COMP 369 HIST 306 ARAB 369

Secondary Cross-listing

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence
of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Amazigh poetics in the Maghreb, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? What is the connection between the recent "boom" of English translations of Indigenous texts and neoliberalism, multiculturalism and neo-colonialism? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Requirements/Evaluation: active class participation, several short response assignments (3-4 pages), two film reviews (1 page), a performance project, and a final paper (7-10 pages)

Prerequisites: None

Enrollment Limit: 19

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 369(D1) COMP 369(D1) HIST 306(D1) ARAB 369(D1)

Writing Skills Notes: This course will enable students to write weekly while engaging with various forms of writing skills: articulating arguments in short response papers (3-4 pages each), developing visual criticism through writing two film reviews, (1 page each), journaling through writing a personal reflections on a performance project, and honing research language in producing a final paper of 7-10 pages. Instructor's feedback and peer review sessions will include review of drafts and argumentative structures.

Difference, Power, and Equity Notes: At the heart of this course is the history of global Indigenous struggle for liberation and decolonization. The various novels, short stories, poems, films and other texts that students will engage with narrate histories of colonial dispossession, racial oppression, economic subjugation and dehumanization of minoritized Indigenous communities in the Americas, North Africa and the Middle East.

Not offered current academic year

ARAB 370 (S) Archives of Global Solidarity: Records of Collective Memory of Emancipation (DPE) (WS)

Cross-listings: COMP 370 ARAB 370 GBST 370

Primary Cross-listing

Departing from the Arabic notions of takatul and taddamun as interlinked expressions of social and political solidarity, this course seeks to investigate the textual and visual cultural production of solidarity in the Arabic-speaking world. While both terms have informed the shaping of modern Arab politics in the mid 20th century—from the birth of the socialist state to the rise of pan-Arabism—their instrumentalization as key principles of internationalism, Third Worldism, trans-nationalism, and global camaraderie since the 1990s is parallel to the emergence of social movements and popular resistance across the Middle East, North Africa and beyond. What is the meaning of solidarity and how it mobilized collective emancipation is the guiding question of this course. To interrogate this question we will read novels, poems, memoirs, labor unions and feminist manifestos, and essays that feature multidirectional solidarity and alliance building across borders of East-East and South-South. We will also examine visual and digital archives that documents particular historical moments that marked a turning point of global solidarity, such as the Spanish Civil War, the Cuban Revolution, the Algerian War, the Prague Spring, the Palestinian Intifada, the Zapatista Uprising, and most recently, the Arab Uprisings. As we approach these historical moments through a variety of texts and genres, we will identify encounters between activists and writers who established cross-regional movements and the cultural exchange between artistic collaborations.

Requirements/Evaluation: Students will write five responses to partner's papers (2 pages long); two 5-7 pages paper discussing aspects of the readings; one 10-minutes oral presentation of a reflection on digital solidarity, and a final poster project on archiving global solidarity.

Prerequisites: None
Enrollment Limit: 10

Enrollment Preferences: This tutorial will be aimed at first year and second year students interested in majoring in Arabic Studies, and/or concentrating in Comparative Literature and Global Studies.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 370(D1) ARAB 370(D1) GBST 370(D1)

Writing Skills Notes: Students will engage a variety of writing forms, including weekly response papers to their tutorial partner, a research final paper, an outline for an oral presentation, a reflection on digital media and a design of a poster. Throughout this process, they will receive oral and written feedback and work with revisions. The interdisciplinary material that will be covered in the tutorial will also require the production of distinct formats of writings and research skills.

Difference, Power, and Equity Notes: South-South and East-East encounters during the 1960s in the writings of contemporary Arab writers and activists resisting dictatorship and police states is the core of this tutorial. Students will gain a deeper understanding of DPE through a close examination of the triangulation of colonial boundaries, postcolonial states, and imperialist domination that shape the context of global solidarity in the Arab world and beyond.

ARAB 401 (F) Topics in Advanced Arabic: Contemporary Arab Cinema (DPE) (WS)
The Arab world is a fascinating region with rich traditions and vibrant societies. Through an exploration of contemporary Arab cinema, this course will introduce you to issues in modern Arab societies that represent the diversity of the region as well as the shared concerns and challenges. We will analyze select movies and texts, exploring how Arab filmmakers represent social, political, and economic change and realities in their societies. Some topics include nationalism and national identity, gender identities, civil wars, religion, social justice, and the recent revolts. The course will be conducted in Arabic, and we will employ linguistic and paralinguistic analyses of the movies as a means to explore modern Arab thought and cultures.

Requirements/Evaluation: class participation, daily writing and reflections, quizzes, blogs, leading a movie discussion, and a final project.

Prerequisites: ARAB 302 or equivalent.

Enrollment Limit: 19

Enrollment Preferences: if the course is overenrolled, preference will be given to Arabic majors.

Expected Class Size: 5-7

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will engage in daily writing and reflections involving prose responses to discussion prompts, movies, YouTube videos, articles, and quiz prompts. The students will also write blogs, a minimum of one speech, and a 5-7 pp. final research paper. The instructor will give daily feedback on students' writing as well as training in writing skills to advance their writing abilities.

Difference, Power, and Equity Notes: The students will engage in an exploration of social, political, and economic realities in Arab societies. They will examine similarities and differences across a variety of contexts involving differential power dynamics, biases, and gender roles. They will reflect on issues of power based on internal and external factors in these societies as positioned in a region torn by political, social, and religious conflicts.

Attributes: FMST Core Courses

Not offered current academic year

ARAB 402 (S) Travel Literature in Arabic: The World through Arab/Amazigh Eyes (DPE) (WS)
Arabic travel literature is a very rich genre that spans different periods and geographies, reflecting Arab/Amazigh writers' understanding of themselves and the world around them. From India to Russia to Cuba and Namibia, Arabs/Amazighs have traveled the world and inscribed their observations about different people and cultures in a significant literary output. This course draws on poems, dictionary entries, short stories, novels, films, and memoirs to initiate students to the various ways Arab/Amazigh travelers--ancient and contemporary--made sense of other cultures through their experience-based or fictionalized travel accounts. Reading travel writings about West Asia, Turkey, Africa, Europe, and the Americas, students will have a complicated understanding not only of the Arabic-speaking world, but also of the forces that shaped travelers' representations of other people...
and their cultures. The course will build students' linguistic autonomy and provide them with the analytical skills they need to examine copious literary texts independently. Students enrolled in this course are required to use the language resources available on campus to improve their language skills in order to benefit maximally from the literary and intellectual opportunities offered in the texts under study.

**Requirements/Evaluation:** Weekly responses on Glow, active participation in class, one five-page essay, and one ten-page final paper. There is no exam in this course.

**Prerequisites:** 302 or equivalent.

**Enrollment Limit:** 10

**Enrollment Preferences:** Arabic major or students intending to major in Arabic. Students whose Arabic is strong enough to pursue a literary course in Arabic.

**Expected Class Size:** 6

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** Students will improve their writing in Arabic by: 1. Writing weekly responses on Glow (500 words per week; 250 words per session) 2. One five-page essay for the mid-term 3. one ten-page final research paper

**Difference, Power, and Equity Notes:** The course will help students understand how travel is enmeshed in power relations and discursive production about other people. Of all literary genres, travel literature is more likely to slip into exoticism, essentialization, and overgeneralization about people and place. However, an active reading that is aware of these slippages will also open up literary texts to a rich learning about geography, politics, history, landscape, and culture.

Not offered current academic year

**ARAB 403 (F) Beyond the Letter: Visual Culture in the Arabic-Speaking World (DPE) (WS)**

Whereas poetry has been historically celebrated as the defining form of an “authentic” Arab culture from the pre-Islamic world to the present, visual culture, such as paintings, sculptures, installations, videoart, and photography, among others, has been relegated to the contemporary, the modern, the Westernized, and thereof, a representation of a less “authentic” Arab culture. In this course, we will challenge this false dichotomy by examining a variety visual culture artifacts from the Arabic-speaking world. Although the scope of our discussion will be limited to works from the 19th century to the present, our questions will investigate the deep roots of visual art in the Arabic-speaking world. We will also examine the work of poets-painters, such as Jabra Ibrahim Jabra and Etel Adnan that expanded from Palestine, Lebanon and Iraq to the United States, the manifestos of the Arab Surrealist Movement in Cairo in the 1930s, the Baghdad Modern Art Group in the 1950s and more recent works by individual artists navigating post-modern aesthetics, and dystopian futures, including Radia Bent Lhoucine, Amina Zoubair, Sophia Al-Maria and Juamana Manna, among others. In discussing these works, we will reflect on political and social events that shaped the production of visual culture in the Arabic-speaking world from the Gulf to the Maghreb. In addition to reading artists statements, exhibition reviews, art magazines and museum brochures that speak to the alphabet of visual culture, we will listen to interviews and watch short clips. In the process, we will active advanced grammar and vocabulary skills and employ paralinguistic analysis. The course is taught in Arabic.

**Requirements/Evaluation:** Active in-class participation; active participation in discussion forums on GLOW; weekly writing assignments of 2-3 pages; two in-class presentations; a final 10-pages essay.

**Prerequisites:** ARAB 302

**Enrollment Limit:** 10

**Enrollment Preferences:** ARBIC

**Expected Class Size:** 7

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

**Writing Skills Notes:** Students will write 2-3 pages weekly and will produce a 10-pages essay at the end of the course. They will also provide written feedback to in-class presentations and online discussions. The writing assignments will involve working with several drafts, revisions, and regular annotations of artwork.

**Difference, Power, and Equity Notes:** This course is motivated by addressing the power dynamics between art forms in the Arabic-speaking world (poetry versus visual culture). It also explores the intersection of gender, ethnicity, and access to different expressions and venues of art and art production.
ARAB 404 (S) Topics in Contemporary Arab Cultures (DPE) (WS)

What issues do contemporary Arab societies and cultures face? Through an exploration of various current issues, this course will introduce you to questions that engage Arab thought in modern times. What issues are central to women and young people today? How do the Arabic language and Arab identity intersect within increasingly multilingual and multicultural communities? What issues do minority communities in Arab countries face? How does globalization impact Arab societies? How do literature and art continue to reflect aspirations, challenges, and defiance? The course will explore these and other issues as represented in the language of print, internet, television, movies, and social media, and we will employ linguistic and paralinguistic analysis of these resources. Taught in Arabic.

Class Format: The course involves two main sessions and a third to be organized as a group or broken into conversation sessions.

Requirements/Evaluation: Class participation, daily writing and reflections, blogs, quizzes, leading a class presentation and discussion, and a final project.

Prerequisites: ARAB 302 or equivalent.

Enrollment Limit: 18

Enrollment Preferences: If the course is overenrolled, preference will be given to Arabic majors.

Expected Class Size: 7

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will engage in daily writing and reflections involving prose responses to discussion prompts, movies, YouTube videos, and articles. The students will also write blogs, commentaries, and a final project. The instructor will give daily feedback on students' writing as well as training in writing skills to advance their writing abilities.

Difference, Power, and Equity Notes: The students will engage in an exploration of social, political, and economic realities in Arab societies across state and community boundaries. They will examine similarities and differences across a variety of contexts involving differential power dynamics, biases, and gender roles. They will reflect on issues of power based on internal and external factors in Arab societies as positioned in a diverse region with unfolding political, social, and religious changes.

Spring 2024

SEM Section: 01 MWF 8:30 am - 9:45 am Lama Nassif

ARAB 405 (F) From Page to Stage: Singers and Songwriters of Modern Arab Music (DPE) (WS)

Since its earliest history, Arab music has accorded special status to the singing of poetry. Over the last century, many of the most popular songs across the Arab world were the result of poets, composers, and singers collaborating to turn written words into performable masterpieces. In this course, we will explore a variety of famous Arabic songs, examining how they were written, edited, performed, and, sometimes, censored and banned. Questions that we will ask in this course include: What is the process through which Arabic songs are made? Who is the "author" of the final song? How are song texts transformed when prepared for concert stages and recording studios? And what, in this process, shapes the success and popularity of a song? We will read song lyrics (poems) as literary texts to consider their language and poetic characteristics while also analyzing how songs can be used as a lens to think about politics, identity, religion, class, gender and broader topics related to modern Arab society. Students will become familiar with the lives and works of major singers, such as Umm Kulthum, Fairuz, and Marcel Khalife, and poets, such as Ahmad Shawqi, Nizar Qabbani, and Mahmoud Darwish. Readings and discussion will be in Arabic.

Requirements/Evaluation: Regular participation in class discussion; weekly listening assignments; biweekly one-page unit responses; final project/paper on a singer or songwriter from the twentieth or twenty-first century.

Prerequisites: ARAB 302 or equivalent.

Enrollment Limit: 19

Enrollment Preferences: If course is overenrolled, preference will be given to Arabic majors.

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option
**ARAB 408 (F) Appropriating History. Who Owns the Past? (DPE) (WS)**

**Cross-listings:** ARAB 408 HIST 489

**Secondary Cross-listing**

Who owns the past? How have modern states appropriated history? The political use of history is a critical ingredient in any nationalist discourse. In such narratives, the selective utilization of archaeology and ancient history often serves important functions in articulating a conscious and deliberate national history. Thus, in nationalist renderings, archaeological sites and artifacts are not merely relics of the past; they can also be potent and conspicuous symbols of national identity for the modern nation-state. In the Middle East, with its rich archaeological heritage, the relationship among politics, nationalism, and archeology has been particularly strong and interesting. This tutorial addresses the powerful nexus between history and nationalism with a special emphasis on the Middle East. It will explore the battle over who controls history and the "stuff" of history such as antiquities, land, heritage sites, and museum exhibitions and how that control has expressed itself in several Middle Eastern countries, including Iraq, Israel, Turkey, Egypt, Lebanon, and Iran. Furthermore, it will discuss how archaeology entered the political discourse, the ethics of repatriation and appropriation, and archaeology's role in contested terrains and political disputes.

**Requirements/Evaluation:** Format: tutorial. Requirements: 5-7 page essays or 2-3 response papers due each week

**Prerequisites:** None, though a demonstrated interest in the Middle East is important.

**Enrollment Limit:** 10

**Enrollment Preferences:** Seniors and to History and Arabic Studies majors.

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 408(D2) HIST 489(D2)

**Writing Skills Notes:** As a tutorial, students will receive extensive feedback on their writing each week both from the professor and their partner. Further, students will be given the opportunity to rewrite two of their papers in light of the criticism that they receive during the semester.

**Difference, Power, and Equity Notes:** This is a tutorial on a particular form of power, namely how the powerful seek to control the past. The ultimate question that this tutorial seeks to answer is: who owns the past? Which history is emphasized and which histories are overlooked? How do modern nation states in different Middle Eastern states cherry-pick the past in order to maintain and develop a national narrative that is suitable to the political and economic powers often at the expense of religious or linguistic minorities.

**ARAB 413 (F) The Big Ideas: Intended and Unintended Consequence of Human Ambition (DPE) (WS)**

**Cross-listings:** ARAB 413 HIST 413 GBST 413 ENVI 413

**Secondary Cross-listing**

What have been the most consequential ideas of the last 100 years? This course will explore some of the more audacious and ambitious plans to alter natural and urban environments in the late 19th century to the early part of the 21st, specifically those that sought to improve the human condition through science, engineering, and technology. By building big bold things, politicians around the globe sought to bring prosperity to their nation and embark on a path of modernity and independence. Through an intellectual, political and environmental history of major construction projects such as the building of the Suez Canal and the Aswan Dam, extensive river valley developments in Iran, Turkey and Iraq, and utopian and futuristic city planning in western Asia, students will consider how, with the benefit of hindsight, to best evaluate the feasibility of such bold schemes. Who has benefitted and who has not, what have been some of the unanticipated consequences, what was sacrificed or neglected, and what do these projects tell us about the larger processes of global capitalism, decolonization, and climate change?
Requirements/Evaluation: A presentation, shorter writing assignments and a longer research paper (20-25 pages) in the end. Students will submit shorter drafts of final paper in order to receive constructive feedback prior to final submission.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Seniors, especially History, Arabic and Environmental Studies majors.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 413(D2) HIST 413(D2) GBST 413(D2) ENVI 413(D2)

Writing Skills Notes: A 20-25 page research paper will be required at the end of the semester. Prior to getting to that point, students will submit an annotated bibliography, a two page proposal, a five and eventually a 10 page draft. Each draft will receive extensive comments and suggestions from peers and instructor. In this way, the student will think about the process of writing and the best way to set themselves up for success.

Difference, Power, and Equity Notes: This course examines how a number of different nations in Africa and Asia sought to improve the living conditions of the masses through major construction project. Though ostensibly these schemes were supposed to improve the livelihood of all, often they primarily benefitted the few - the urban elite - and not the general population. This course will therefore explore how certain class, gender and racial lines were solidified and maintained through economic development plans.

ARAB 427 Revolutions & Revolutionaries in the Arab World's Modern History (DPE) (WS)

What is the difference between a [Thawrah] (revolution), an ['Inqi'il Sha'ab'] (popular led-coup) and an ['Intif'ah] (uprising)? Was the 2011 "Arab Spring" the first time that people in the Arab world had revolted against their governments? Were the 1977 bread "riots" in Egypt an ['Intif'ah] or revolution that was quelled promptly ? How does the 1958 coup in Iraq compare to the coup there five years later in 1963 or other coups across the Arab world? What were the role of the Amazigh in North Africa in rebelling against colonialism? In this course, we will be looking transnationally at the different revolutions, uprisings and coups that have taken place in the Arab world in its modern history. Through a variety of medium, the course will explore the socio-political and economic factors that resulted in these instances in history and the effects thereof. We will also be looking at the cultural production that flourished after revolutions, coups and uprisings from the blatantly propagandist to the nuanced and subversive! The course will be entirely in Arabic and aims to take participants from intermediate high to the advanced-mid/high level according to ACTFL standards. The course will be engaging with and developing, on a weekly basis all five language skills: reading, writing, listening, speaking and cultural proficiency and will focus on the language functions that are required at this level. This writing intensive course will consist of multiple forms of evaluation such as participation, debates, presentations, a mid-term video project and an end of year writing project.

Class Format: flipped classroom

Requirements/Evaluation: writing assignments, participation, debates, presentations, a mid-term video project, and an end of year writing project

Prerequisites: having done three years of Arabic language and preferably time abroad

Enrollment Limit: 10

Enrollment Preferences: seniors

Expected Class Size: 6

Grading:

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will be expected to write 5-6 essays during the term, each of which consists of two drafts, in addition to a 5-page end of term paper. The focus in the essays in addition to knowledge of the subject matter, will be syntax, style, cohesion, development of arguments, and collocations. Prompt and detailed feedback will be given for both drafts to ensure improvement.

Difference, Power, and Equity Notes: The course will include material about multiple countries and their peoples in the Arab world while also being attentive to minorities and their status.

Winter Study  ---------------------------------------------------------------

ARAB 13   Introduction to Middle Eastern Hand Drumming
Since ancient times, percussion instruments have been at the heart of Middle Eastern musical and ritual life, providing intricate rhythmic patterns as foundation. Today, many of these drums accompany musical traditions across a wide Mediterranean region, from the Arab world to Greece, Turkey, Armenia, and beyond. This class offers students the opportunity to engage, in a hands-on ways, with the vibrant tradition of Middle Eastern drumming and its heritage of cross-cultural flows. In this course, we will study the fundamentals of Middle Eastern drumming on traditional percussion
instruments. We will focus on exploring the doumbek (i.e. Arab tabla), riqq, and frame drum. Students who have drums are welcome to bring their own, but the instructor will provide a variety of instruments for students to use in class and at home. Each class session will highlight technique, rhythm theory, and accompaniment. We will also dedicate time to learning a composition for this drum section. Some short readings and audio and video samples will supplement our in-class drumming, and there will also be optional evening practices. Evaluation will be based on a self-recorded demonstration of core rhythmic patterns as well as a final performance.

Requirements/Evaluation:  Presentation(s); Performance(s)

Prerequisites:  None

Enrollment Limit:  20

Enrollment Preferences:  Graduating students, Middle Eastern Music Ensemble members, and related Majors will be given priority in the event of overenrollment

Expected Class Size:  NA

Grading:

Unit Notes:  Rami El-Aasser is co-director of the Middle Eastern Music Ensemble at Williams. He plays traditional percussion (darbuka, riq, deff) and sings worldwide with groups including Alsarah & the Nubatones, and Zikrayat.

- Pallavi Sen, Assistant Professor of Art
- Gerald E. Sheffield, Visiting Lecturer in Art
- Stefanie Solum, Professor of Art; on leave 2023-2024

The Department offers students different paths to explore the vital connection between visuality and creativity. With courses of study in the History of Art and the Practice of Studio Art (or a combination of History and Studio), the Major is designed to train students to develop the technical, conceptual, critical, and historical tools they need to engage the visual world.

ADVISING
Majors are expected to discuss their choice of courses and path through the major with their advisor or another professor in the department. Official departmental advisors for each route through the major (listed here below) are available to field general questions concerning curriculum, requirements, and planning to study away.

Art History Faculty Advisor: Michelle Apotsos
Art Studio Faculty Advisor: Laylah Ali
History and Studio Faculty Advisor: Michelle Apotsos and Laylah Ali

ART HISTORY

The history of art is different from other historical disciplines in that it is founded on direct visual confrontation with objects that are both concretely present and yet documents of the past. We emphasize analysis of images, objects, and built environments as the basis for critical thought and visual literacy. In addition to formal and iconographic analysis, we use the work of other disciplines to understand visual images, such as social history, perceptual psychology, engineering, psychoanalysis, cultural studies, and archaeology. Because of its concentration on visual experience, the Art History major increases one’s ability to observe and to use those observations as analytical tools for understanding history and culture.

Major Requirements

The Art History major requires a minimum of nine courses:

Any three of the following six courses: ARTH 101, ARTH 102, ARTH 103, ARTH 104, ARTH 105, ARTH 106, ARTH 107 and ARTH 108

Any ARTS (studio) course.

Any two courses in Art History concerned with the following: one course in art history concerned with a period prior to 1800 and one course in art history concerned with post 1800.

ARTH 301 Methods of Art History [NOTE: starting in 2023-24, art-history majors may take either ARTH 301A or ARTH 301B to satisfy the methods requirement]

One 400-level Seminar or 500-level Graduate Seminar (in addition this course may be used to satisfy the pre-1800 or post-1800 requirement).

One additional course, at any level.

The faculty encourages students to construct a major with historical depth and cultural breadth. The numbered sequence of courses is intended to develop knowledge and skills appropriate to students’ level of experience, ultimately supporting original, independent work at the 400-level.

100-LEVEL COURSES require no experience in the subject. They are introductions to the field that develop students’ skills in visual analysis, interpretation, and written expression and argumentation.

200-LEVEL COURSES are introductions to specific fields within art history, but normally open to students with no experience in art history. Often, there is a significant lecture component to the courses.

300-LEVEL COURSES focus more closely on specific art-historical problems, or present material in a tutorial format. The goal of these courses is to build skills needed for independent research and sustained analytical writing. Generally, there is a higher expectation of student participation or initiative, and longer and/or more frequent writing assignments. In the 300 level, students learn to work with and evaluate different types of sources, research tools, historical perspectives, and methodological approaches.

400-LEVEL COURSES are intensive discussion-oriented seminars that emphasize critical analysis and build toward student-initiated, independent work (oral presentations and sustained, analytical research papers). Advanced majors who have taken ARTH 301 are encouraged to work at the 400 or 500 level, and papers produced in these courses are normally the basis for the senior thesis.

HISTORY AND STUDIO

This route offers students the opportunity to propose a course of study that investigates a particular medium or a particular issue bridging both wings of the department. Examples of past History and Studio projects include topics related to architecture, curating, and performance, but are not limited to these.

In many cases, it is better to choose the Art History or the Studio Art route, to the major, while taking additional courses in the other wing, as desired. The History and Studio route is offered as a third option and requires approval.

The application for the History and Studio route must include both a written statement and a list of proposed courses. It must be approved by an advisor from both Art History and Studio Art and be submitted to the department’s administrative assistant before registering for the major.

History and Studio students whose projects have a Studio emphasis have the opportunity to take the Senior Tutorial (ArtS 418) with permission of the instructor and to participate in the senior Studio exhibition. Those seniors with a History emphasis can apply to write a thesis and, if accepted, will be admitted to the required Winter Study and Senior Thesis Seminar (Arth 494) which culminate in a thesis and thesis presentation. Or, a student may propose a senior independent study.
Major Requirements

The History and Studio major requires a minimum of nine courses:

- Any TWO of the following six courses: ARTH 101, 102, 103, 104, 105 or 106
- ARTS 100-level course
- ARTS 200-level course
- ARTH 301 Methods OR ARTS 319 Junior Seminar.
- ARTH 400-level OR 500-level course
- ARTS elective
- ARTH elective
- ARTS 300-level course

OR ARTS 418 (with permission), if pursuing a Studio tracking an Art History track

OR an ARTH 400-level course or ARTH 494 (with permission), if pursuing an Art History track

The application for the History and Studio route must include both a written statement of purpose and a list of proposed courses. Both must be approved by two advisors, one from Art History and the other from Studio Art, and be submitted to the department’s administrative assistant before the student may register for the major.

History and Studio students whose ongoing projects have a Studio emphasis have the opportunity to take the Senior Tutorial (ARTS 418) with permission of the instructor and to participate in the senior Studio exhibition. Or, a student following the Studio Art track may propose a senior Independent Study project in order to pursue Honors. Those History and Studio majors with an Art History emphasis may apply to write a thesis and, if accepted, will be admitted to the required Winter Study and Senior Honors Seminar (ARTH 494).

One advisor from Art History and one from Studio Art must sign off each semester before a student may register for classes.

THE DEGREE WITH HONORS IN ART

Students who wish to become candidates for the degree with honors must show prior evidence of superior performance in the major as well as research capabilities to carry out the proposed project.

Art History

To graduate with honors in art history, students are to enroll in the Senior Thesis Seminar (ARTH 494) during the Spring semester of their senior year, where they will develop an original research paper (completed in a prior course, a travel research project, or an independent study). To be admitted to the seminar, students must submit their original research paper to the Art Department’s Administrative Assistant in Lawrence no later than the end of the reading period of the Fall semester. The paper must be properly formatted and include both illustrations and bibliography. It must additionally include a thesis project proposal of 500-700 words.

Students must also secure an academic advisor for their project and complete the advising Agreement Form (available from the Art Department’s Administrative Assistant) by the end of the reading period of the Fall semester. This form serves to verify: a) your advisor’s support of your project, and b) your advisor’s approval of your plans for Winter Study. Students should plan to dedicate Winter Study to work on their thesis project and, to this end, they should enroll in ARTH 31 immediately after (but not before) notification of admission into ARTH 494. (To avoid problems should they not be admitted to ARTH 494, students should pre-register in another Winter Study course). Because faculty are not usually available during this period, it is very important for students to plan, together with their advisors, a work schedule for Winter Study with concrete goals. Admission to the Senior Thesis Seminar will be determined by the instructor of the seminar, in consultation with the Art Department faculty. The important criteria for admission are: 1) the quality, originality, and potential of the research paper on which the thesis project will be based; 2) the availability of a suitable advisor for the project, and the commitment of that advisor to supervise the work during the Spring term; 3) strong past performance in the art history route to the Major; 4) completion of ARTH 301 by the time of the application (exceptions to this rule must be granted beforehand by the chair of the Department).

In early January, the instructor will notify students of their admission to the Thesis Seminar. Since enrollment is by invitation only, students should pre-register for four classes in the Spring semester. If invited to join the seminar, students should then drop one of those courses and add the Thesis Seminar during drop-add period. The Thesis Seminar is to be taken in addition to the nine required courses for the art history route to the Major. Once in the seminar, students will revise, refine, and expand on previous research and produce a paper of approximately 25 pages. At the end of the semester, they will present a shortened version of the paper to the faculty and public at the Williams College Museum of Art.

Students who have identified a thesis topic and secured an advisor may apply early (in the Spring semester of their junior year) in order to pursue—in relation to their thesis project—summer research opportunities and/or a faculty-sponsored independent study in the following Fall semester.
The procedure and criteria for students applying early are the same as those outlined above. (That is, students applying early would likewise take the Winter Study and Spring courses). Materials for early application (the same as outlined above) would be due by 5:00 pm on the Thursday preceding Spring Break.

### History and Studio

History and Studio majors may follow either the Studio Art or Art History route to honors. Alternatively, a student may pursue honors through an Independent Study project, to be undertaken during Winter Study and the Spring semester under the guidance of their two advisors.

The review process for the honors candidates in the senior seminars (ARTS 418 or ARTH 494) will proceed according to the regular honors process for the respective wing of the Art Department, and will include both advisors. If the honors project is conducted via an Independent Study, the final project will be submitted to the two advisors who will determine whether or not it will receive honors. If the student chooses not to follow the Honors route, they may take either a 300-level ARTS course, or a 400-level ARTH seminar instead.

The route to honors is a combination of the art studio and art history routes to honors. At the beginning of senior year, a candidate for honors in History and Studio makes a proposal to two faculty members, one faculty advisor from each wing of the department. If both advisors agree to supervise the project, the candidate enrolls in an independent study and works through the Fall semester and Winter Study. The progress of the project is assessed by both advisors at the end of Winter Study; if the project is not well enough developed, the advisors may end it at that time. If the project is allowed to move forward, the student enrolls either in Senior Seminar (ARTS 418, for which they will need permission of the instructor), if the project is primarily a matter of making art, or in an Honors Independent Study, if it is primarily a writing project. The final project is submitted to the two advisors, who will determine whether or not it will receive honors.

### STUDY ABROAD

The Art Department encourages students to travel during Winter Study, and to study abroad for a semester during the junior year. Students planning on studying abroad must: consult a departmental advisor, leave a copy of their Study Away Petition on file in the Department, and consider the required junior seminars (ARTH 301 and ARTS 319) that prepare students for the independent research and/or independent artistic production which is the focus of the senior year.

### Art History

Art History majors must take ARTH 301 in their junior year unless they are planning to study abroad for a full year or unless there is only one section of 301 offered; in that case, they may take the required class in their senior year (and should consider taking the course as a second-semester sophomore). The Department does not pre-approve courses for the art history major, but will offer provisional credit for courses that appear to satisfy requirements for the major. Art history majors may satisfy no more than 3 requirements abroad (the ARTS requirement may be satisfied abroad only if the student is away for the full academic year. Student may not receive credit for 400-level work while abroad). Art history students should be aware that in many programs course selection is limited and is not known before one commits to the program. It may happen that none of the art history courses offered during the semester abroad satisfy distribution requirements for the major.

### History and Studio

History and Studio majors must plan accordingly for their elected junior seminar. For art history courses taken abroad, history and Studio majors can seek provisional credit for courses that appear to satisfy requirements for the major. No provisional credit is possible for studio courses; students must submit their portfolios for review, and will receive credit only if the work completed abroad is deemed roughly equivalent in quality and quantity to coursework at the College (students should contact the Departmental advisor in studio for the portfolio review, and digital photographs are fine in the case that original work is not available). No more than 2 major requirements may be satisfied per semester while abroad (one in studio, one in history), with no more than 3 courses total. History and Studio majors cannot satisfy ARTS 319 or any 400-level courses abroad.

---

**ARTH 101 (F) Introduction to European Art Before 1700**

**Cross-listings:** ARTH 101 REL 105

**Primary Cross-listing**

A team-taught introduction to the art and architecture of Europe from the ancient Mediterranean to Baroque Italy. This course celebrates the glory of works of art as physical objects, to be viewed and contemplated, to be sure, but also often to be worshiped, worn, touched (even licked), held, exhibited, bought and sold, passed through or around, and lived in. To help students begin to appreciate how these works of art might have been understood by those who originally made and used them, the course sets its objects of study within a number of revealing historical contexts, from the social and the political to the philosophical and the art historical. To give students time with original works of art, our discussion-centered conferences use the wealth of art resources in Williamstown: the Clark Art Institute, the buildings and sculpture of the Williams College Campus, and the Williams College Museum of Art.
Class Format: This course has 2 components: lectures and conferences. The lectures will be twice or three times weekly, the conferences once per week. Both lectures and conferences will be held in person.

Requirements/Evaluation: Three shorter essays (one of which may be in the form of a take-home final exam), several quizzes, and engaged participation in conference sections

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: Preference will be based on a short questionnaire, which students will be asked to complete if the course is over-enrolled.

Expected Class Size: 60

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 101(D1) REL 105(D1)

Attributes: ARTH pre-1800 Courses

Not offered current academic year

ARTH 102 (S) Art and Architecture from the Age of Enlightenment to the Present

A semester-long, team-taught introduction to European and American art & architecture from approximately 1600 to the present. Students will learn how to analyze art made for the widest variety of purposes, from inspiration and contemplation to commemoration and condemnation. We will look at some of this era's most deeply moving art, including works by Rembrandt and Maya Lin, Bernini and Frank Lloyd Wright, Van Gogh and Kehinde Wiley. To the extent that we are able, we will also spend time with original works and familiarize ourselves with the wealth of resources in Williamstown: the Williams College Museum of Art, the Clark Art Institute, and the Chapin Rare Book Library.

Class Format: conference discussion

Requirements/Evaluation: quizzes, participation in conferences, midterm, two papers and a final exam

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: art history majors

Expected Class Size: 60

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Attributes: ARTH post-1800 Courses

Not offered current academic year

ARTH 103 (S) Introduction to East Asian Art

This course offers an introduction to the artistic traditions of China, Korea, and Japan, from the prehistoric era to the present day. Following a chronological order, the course surveys important artworks that represent major developments in medium, style, and subject matter in the three cultures, with particular attention to the movement of objects and art techniques across the region. Key themes of the course include bronzes, lacquerware, ceramics, tomb building, Buddhist reliquaries, ink painting, wood-block printmaking, and timber frame architecture. Students will learn about the development of art and artisanal practices in East Asia, while gaining a broader understanding of the continuity and discontinuity of the local artistic traditions in relation to the region's history, politics, religion, and culture. East Asia boasts a history of art that stretches five thousand years. In addition to gaining an overview of important artistic traditions in the region through the lectures, students will develop visual analysis skills and engage with critical methodologies in East Asian art through close-look exercises and discussion-driven case studies during sections. The course pays special attention to how the constant cross-cultural exchanges between China, Japan, and Korea contributed to the development of art in unique ways across time. What is the shape of "East Asian art"? How does art help define East Asia culturally? And what does it tell us about East Asia's past, present, and future? Exploring these questions through art, students gain an object-based understanding of the civilizations in East Asia. The curriculum also integrates objects from the Williams College Museum of Art.

Class Format: A museum field trip, possibly the MFA Boston, pending planning and approval.
Requirements/Evaluation: In addition to attendance and participation, students will write a biweekly reflection paper (no more than two pages, double-spaced) based on the readings or an artworks of choice. Students will also write a final paper (8-10 pages, double-spaced) that examines either a specific art object in-depth or a technique covered in the course, or a creative project in consultation with the instructor, and present it to the class (10 mins).

Prerequisites: none

Enrollment Limit: 45

Enrollment Preferences: Majors are prioritized if the course overenrolls.

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

ARTH 105 (S) Arts of South Asia (DPE)

Cross-listings: ASIA 105 ARTH 105

Primary Cross-listing

South Asia, which includes the modern-day nations of Afghanistan, Pakistan, India, Bangladesh, Sri Lanka, Nepal, Bhutan and Maldives, is often compared to the European continent. Regional societies in the Indian "subcontinent" are as distinct from each other as those of Italy, Germany and France. Similarly, they also differ in their language, dress, diet, rituals and politics. However, parallel to the wealth of diversity, South Asia also demonstrates a rich history of interconnectedness. This complex web of culture, language, religion and politics is best manifested in the arts of the region. How does visual culture reflect regional variations? How does a survey of artistic style and iconography help uncover networks of exchange across South Asia? What role did the arts play in the expression of religious traditions such as Buddhism, Hinduism, Jainism and Islam? With these questions in mind, this course is designed as a survey of the arts of South Asia starting with the height of the Indus Valley Civilization in 2600 BCE and ending in 1857 CE, a date that marks the cessation of independent rule in South Asia. Using the study of architecture, painting, sculpture and textiles, students will learn how to make stylistic and iconographic analyses, while also improving their art historical writing and analytic skills.

Prerequisites: none, open to all students

Enrollment Limit: 25

Enrollment Preferences: First years, sophomores and juniors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 105(D1) ARTH 105(D1)

Difference, Power, and Equity Notes: In addition to a survey, the course also highlights the conceptual differences between the arts of South Asia and Western constructs of art and culture. The survey will analyze how South Asian art was codified and examined during the colonial and post-colonial periods, and how that understanding has come to define the field over the last century. The course will encourage students to challenge longstanding biases and assumptions when studying these artworks.

ARTH 106 (F) An Invitation to World Architecture (DPE)

What is architecture? Built form? Object? Space? How do we think about architecture as we move around, within, and through it? What can architecture tell us not only about material, design, and engineering, but also about the individuals, groups, and communities who make it? These
inquiring provide the starting points for thinking about what architecture means as concept, space, and practice, and how it affects the ways in which human beings experience the world. As the primary mode through which we organize our lived reality, architecture not only channels human behavior into specific repertoires of action and reaction but also symbolizes beliefs, value systems, and ideas about the self, gender, nation, race/ethnicity, community, life, death, and the transcendent. Such themes, thus, constitute the critical lenses that students will use over the course of the semester to unpack how structural form has and continues to define the human condition in the broadest sense. Drawing from a variety of texts and examples that emphasize the diversity and complexity of architectonic traditions around the world, this course will analyze how individuals have employed architectural strategies to solve the problems of living within diverse contexts and how such spaces not only provide meaning in everyday life but also actively and dynamically order the world as space, object, environment, text, process, and symbol.

Class Format: This course has 2 components: lectures and conferences / discussion sections. Students will be expected to attend two lectures and one conference / discussion section weekly. Students will sign up separately for the lecture component and the conference / discussion section component.

Requirements/Evaluation: Written evaluative measures: 6 - 8 object lab assignments and / or written responses to class prompts, and 6 in-class quizzes. Other evaluative measures: conference / discussion section participation and attendance.

Prerequisites: None

Enrollment Limit: 45

Enrollment Preferences: This course has a running waitlist. Students waitlisted from past semesters will have enrollment priority, followed by art history majors, and then first-year students.

Expected Class Size: 45

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course fulfills DPE requirements in two ways. First, it unsettles established presuppositions, biases, and predispositions that have positioned the "West" as "best" in canons of architectural history. Secondly, it explores how architecture - past and present - communicates, supports, and/or resists hierarchies of power and socio-political influence in society by acting as modes of propaganda, tools of imperialism, sites of resistance, and/or spaces of affirmation.

ARTH 107 (F) Arts of Ancestral Native and Indigenous North America
This course introduces students to the art and architecture of ancestral Indigenous and Native North America. It will consider the artistic productions of several pre-contact and early colonial cultures that emerged in the regions now referred to as Mesoamerica, the "United States," and "Canada." Cultures to be addressed include Olmec, Maya, Teotihuacan, Zapotec, Mexico (Aztec), Chaco, Mississippian, Inuit, and Native Hawaiian, among others. Students will learn not only about these cultures but also the sources and methods by which present-day scholars have come to know of their complexity. Artforms to be addressed will include ceramics, murals, sculpture, inscriptions, feather work, shell work, sacred architecture, residential architecture, and urbanism. This is one half of a two-course sequence that also includes, "Arts of Ancestral Native and Indigenous South America and the Caribbean," (Spring 2024) and may be taken in any order or independently.

Requirements/Evaluation: Weekly readings (50 pages); Regular attendance at lectures (20%); Four 2-page artwork analysis essays due at regular intervals throughout the semester (40%); One 6-8-page final essay on a thematic topic of the student's choice (40%).

Prerequisites: None

Enrollment Limit: 45

Enrollment Preferences: Art History majors and first year students

Expected Class Size: 45

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

**ARTH 108 (S) Arts of Ancestral Native and Indigenous South America and the Caribbean**

This course introduces students to the art and architecture of ancestral Indigenous and Native South America. It will consider the artistic productions of several pre-contact and early colonial cultures that emerged in the Andes, Amazonia, the Southern Cone, and the Caribbean. Cultures to be addressed include Chavin, Nazca, Moche, Tiwanaku, Inca, Casarabe, Tupi-Guarani, Cocle, Taino, and Mapuche, among others. Students will learn not only about these cultures but also the sources and methods by which present-day scholars have come to know of their complexity. Artforms to be addressed will include ceramics, murals, sculpture, khipu, tocapu, feather work, shell work, sacred architecture, residential architecture, and settlement. This is one half of a two-course sequence that also includes, "Arts of Ancestral Native and Indigenous North America," and may be taken in any order or independently.

**Requirements/Evaluation:** Weekly readings (50 pages); Regular attendance at lectures (20%); Four 2-page artwork analysis essays due at regular intervals throughout the semester (40%); One 6-8-page final essay on a thematic topic of the student's choice (40%).

**ARTH 204 (F) Historical Research in Dance and Performance Studies**

This course is an introduction to the analysis of historical and socio-political context of movement-based performances. While readings and viewings will focus on dance genres practiced at Williams and beyond, an important element of the course will be the practice of documenting, interpreting, and writing about performances. The course will enable students interested in dance, theater, and visual arts (including commercial arts) to hone their skills in the practice of analyzing still and moving images, while also offering students of history and art history the opportunity to develop competency in historical research. This is primarily a discussion-based seminar course. Learning objectives: to understand the social and political contexts for various artistic and performative genres; to develop the ability to document, analyze, and write about dance as a historical and cultural text; to explore interdisciplinary modes of engaging with movement-based performances.

**Requirements/Evaluation:** short weekly responses and in-class writing assignments, participation in discussions and presentations, two 5-7 page essays, one final essay

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** first-years and sophomores

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

DANC 103(D1) ARTH 204(D1)
ARTH 205  (F)  Patrons, Rituals, and Living Images in Japanese Buddhism

Cross-listings: ASIA 205 REL 213 ARTH 205

Primary Cross-listing

This course introduces students to Buddhist art and architecture in Japan from its introduction in the sixth century through the present. We focus on the ways different communities--the imperial court, immigrant artists, monks, women, and commoners--employed and venerated Buddhist images for political legitimacy, personal salvation, and worldly benefit. This course also examines how Japanese Buddhist imagery became aestheticized in the early twentieth century and appropriated later in modern and contemporary visual cultures. Some of the topics to be discussed include the reception of continental styles of Buddhist sculpture, the relationship between mandalas and rituals, the role of women in developing Buddhist embroideries, and the Western reappraisal of Zen arts. Students will develop familiarity with the concepts and ideas underlying the production of Buddhist images and will gain foundational skills in analyzing the visual, material, and iconographic qualities of Japanese Buddhist art. For the final project, students will design a digital exhibition focused around one of the topics of the course.

Requirements/Evaluation: attendance, class participation, 4 reading and object response papers (2-3 pages), midterm, non-cumulative final exam, and digital exhibition project with an 8-10 minute presentation

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: First and second-year students, but open to all

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

ARTH 206  (S)  What is Islamic Art?  (DPE) (WS)

Cross-listings: REL 204 ARTH 206

Primary Cross-listing

Through a deep engagement with primary sources--visual, performative and textual--this tutorial introduces students to global cultures that have participated in the production of Islamic art and culture through the centuries. Through a diverse set of readings, we will discuss how Islamic art is viewed today. How did, for instance, Colonialism and Orientalism from the 18th to the 20th centuries create an entrenched narrative for the study of the field, that continues to hold sway to this day? How have Muslim cultures defined their own artistic production? In particular, how can specific artworks, such as figural painting or palace architecture, be understood as "Islamic"? What are some key scholarly debates around the term "Islamic Art"? The tutorial is specifically designed keeping in mind the period of soul-searching the field is currently going through, even to the point of questioning the very term "Islamic art" and its epistemological parameters. By familiarizing students to an important discipline in art history, the aim of the tutorial is to provide alternate methodologies as well as epistemologies that run parallel to more mainstream or familiar avenues of study.

Requirements/Evaluation: focused bi-monthly writing assignments, 5-7 pages in length, and bi-monthly peer response papers, 2 pages in length.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History majors and seniors, Religion majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 204(D1) ARTH 206(D1)
Writing Skills Notes: This tutorial helps students develop writing skills in terms of grammar, structure, and organization. It is designed to teach students how to make clear, well-articulated arguments. Students will receive extensive feedback every other week on their writing assignments from the instructor and their peers. There will also be a comprehensive mid-semester review from the instructor.

Difference, Power, and Equity Notes: In addition to introducing students to an important field of art history, the tutorial analyzes how Islamic art was codified and examined during the colonial and post-colonial periods, and how that understanding has come to define the field over the last century. The course will encourage students to challenge longstanding biases and assumptions when studying these artworks.

Not offered current academic year

ARTh 207 (F) "Out of Africa": Cinematic Port(Re)trayals of a Continent (DPE) (WS)

Cross-listings: AFR 207 ARTH 207

Primary Cross-listing

This tutorial provides a focused study of the politics / poetics of visualization and identification associated with film and cinema about Africa from past to present. From colonial-era propaganda newsreels about Africa’s ‘fighting men’ to contemporary white-savior narratives that exploit current socio-political ruptures on the continent for epic effect, films about Africa produced by a primarily Western cinematic regime have proven themselves to be highly effective apparatuses for framing “Africa” as a concept to be summoned time and time again to tell different stories for different audiences, and in doing so privilege particular viewpoints and imaginaries. This tutorial will provide a space for robust discussion and debate about the various representative tropes, conceptualizations, and visualizations that have been used to shape the contours of “Africa” as understood by a primarily Western audience from past to present, and how these same tropes in many ways have come to define the nature of the relationship between film / cinema and the continent over the history of their engagement. In doing so, it will also address how strategic displays and narratives deployed by cinematic productions often support specific power dynamics that locate an idea of “Africa” within paradigms of specific cultural and political understanding. In zeroing in on how such films promote targeted realities for people and places within the continent, this tutorial will address how “Africa” in Western film and cinematic traditions is positioned within a particular framework of understanding that is more often than not irrevocably tethered to a Western imaginary.

Requirements/Evaluation: targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History majors and seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 207(D1) ARTH 207(D1)

Writing Skills Notes: This course fulfills Writing Skills requirements through its focus on the development of writing proficiency in terms of writing mechanics, syntax, and organization. It is also designed to help students craft a general approach to formulating a well-articulated, compelling argument. Students will receive extensive feedback on bi-monthly writing assignments from both the instructor and their peers as well as a comprehensive mid-semester critique from the instructor.

Difference, Power, and Equity Notes: This course fulfills DPE requirements through its exploration of issues of ‘authentic’ representation as they have been applied to representations of “Africa” displayed within the contexts of Western film and cinema. Through discussions of cultural capital and the politics of representation, students analyze how a general African ‘identity’ has been dictated by Western film culture and how this hegemony is currently being disrupted by an emergent generation of African artists and filmmakers.

ARTh 208 (F) Chinese Painting

This course surveys the Chinese painting tradition, from the second half of the first millennium BCE to the present. Following a dynastic timeline, the course covers important painting genres including funerary, religious, figures and portraiture, landscape, ink, bird-and-flower, and oil painting and considers them in relation to the shifting historical and cultural context of China. Key themes of the course include the relationship between the art of painting and religious beliefs, political ideology, self-expression, premodern painting theories and criticism, and encounters between the East and the
West. As is the case with other cultures, the art of painting in China is shaped by both the painter and its time. In addition to an overview of the history of Chinese painting, students will develop skills in visually analyzing the style, the composition, and the brushstrokes of various painting genres, while gaining an understanding of how painting responded to different historical and cultural conditions in China. The course also pays special attention to primary sources on painting, through which students will learn to think about Chinese painting in its original artistic and intellectual context.

**Class Format:** A painting viewing session at museums, possibly at the Williams College Museum of Art, the MFA Boston, or the MET, pending planning and approval.

**Requirements/Evaluation:** In addition to attendance and participation, students will be graded on two short papers (4-6 pages, double-spaced), a final project (curating a mock exhibition or a 12-page research paper, double-spaced), and a presentation of the final project to the class (10-15 mins).

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** Majors are prioritized if the course overenrolls.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**ARTH 209 (S) The Art and Archeology of Maya Civilization**

**Cross-listings:** ARTH 209 ANTH 219

**Secondary Cross-listing**

The ancient Maya civilization was one of the most sophisticated and complex cultures of prehispanic Central America. Its complex calendrics, astronomy, mathematics, art and hieroglyphic writing system are celebrated worldwide. The course will examine the trajectory and nature of ancient Maya civilization from the combined perspectives of archaeology and art history. The origins and evolution of the Maya states during the Preclassic period (1000 B.C.-A.D. 250) will be explored through the rich archaeological remains and Preclassic art styles. The Classic Maya civilization (A.D. 250-1000) will then be presented through a detailed survey of the archaeology, art and hieroglyphic texts of this period. Finally, the collapse of Classic Maya civilization and its transformation and endurance during the Postclassic period and under early Spanish rule (A.D. 1000-1600) will be critically evaluated through a review of the archaeological, iconographic, and ethnohistorical evidence.

**Class Format:** lecture/discussion

**Requirements/Evaluation:** midterm and final exams, hieroglyphic project, 15pp research paper

**Prerequisites:** none, but an introductory ARTH or ANTH course recommended

**ARTH 210 (F) Intro to Latin American and Latinx Art: Contradictions & Continuities, Postcolonial to the Present  (DPE)**

This course introduces students to the breadth and richness of the visual arts in Latin American and U.S. Latinx art. The course begins in the late 19th and early 20th centuries, when artists and writers first began formulating the notion of an art "native" to Latin America, and continues through the ever-expanding cultural expressions developed throughout the 20th and 21st centuries. Through a contextual approach, we will pay particular attention to Latin American artists' shifting relationships to race, class, and gender issues, their affiliations with political and revolutionary ideals, and their critical stance vis-à-vis the European avant-gardes. Similarly, we will analyze the emergence and development of Latinx artistic practices in the postwar U.S., tracing these artists' own exploration of race, class, and gender dynamics. This class introduces Latin American and Latinx artistic practices and
scholarship to enable students to develop a critical understanding of the historical specificity of diverse movements, their relation to canonical definitions of modern and contemporary art, and their relevance to issues of colonialism, nationalism, revolutionary politics, and globalization. We will consider a vast array of genres—from painting and sculpture to printmaking, photography, conceptual, installation, and performance art—and will draw from artist statements, manifestos, and secondary interpretive texts to consider both the impetus behind these dynamic artworks and their lasting legacies.

Requirements/Evaluation: midterm exam and non-cumulative final exam, short writing assignments, attendance, and active participation

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: if overenrolled, waitlisted students will be selected on a lottery

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course fulfills DPE requirements through historical, visual, and thematic analyses that explore the cultural biases and geopolitical forces that have restricted the exposure of Latin American and Latinx art in the canon of Western art history. The course also centers on contextualizing Latin American and Latinx artistic practices and analyzing them in relation to race, gender, and class dynamics, and to issues of colonialism, nationalism, revolutionary politics, and globalization.

ARTH 211  (S)  Art and Experience in Ancient Rome

Cross-listings: ARTH 211 CLAS 210

Secondary Cross-listing

To see and be seen—it could be argued that this was the very definition of Roman culture. Much like today, spectacle and the dissemination of images lay at the heart of political and social life. The visual arts were crucial both to how the Romans rehearsed their identity and goals as a community, and to how individual Romans communicated their achievements and values. In this course, lectures on the art and architecture of ancient Rome (ca. 300 B.C.-A.D. 400) will provide the backdrop for an investigation into the role visual culture played in the lives of all Romans, including slaves and former slaves, women and children. Special topics will include the funeral and funerary portraiture; the military triumph and monuments of victory; the house as a site of memory; the use of images on coins; participation in religious celebrations; displays of war booty and prisoners of war; experience and audience at the racetrack and in the amphitheater; the spectacle of food and dining; and the Roman street as both contested space and a place for art. Readings will include a combination of primary and secondary sources. All readings are in translation.

Requirements/Evaluation: attendance and preparation, short writing assignments, two exams, and a final project

ARTH 212  (F)  Distant Encounters: East Meets West in the Art of the European Middle Ages  (WS)
Cross-listings: ARTH 212 REL 210 ARAB 212

Primary Cross-listing

In this tutorial, students will investigate the rich artistic consequences -- in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts -- of European contact with the Eastern Mediterranean between approximately 300 and 1450 CE. From the beginnings of Christianity, pilgrims from Europe made the long journey to sacred sites in what they called the Holy Land (extending across parts of present-day Egypt, Israel, Syria, and Turkey), the place of Christ's life, death, and believed resurrection. Large numbers of pilgrims even made the long journey to the Holy Land, and especially to Jerusalem, to visit a range of sacred sites related to Christ and his saints. When these sites became less accessible with the spread of Islam in the seventh century -- and even before this time -- Europeans sought to recreate many of them at home. Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series of five major and several lesser "crusades." Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of the Eastern Mediterranean also came through trade and through the travel and settlement of non-Europeans in Europe itself, particularly in Spain, Sicily, and Venice. Through all of these centuries, moreover, the Christian, Greek-speaking empire of Byzantium, focused on its great capital of Constantinople (present-day Istanbul), interacted in myriad ways, both friendly and hostile, with the Latin-speaking polities of Western Europe, focused at least symbolically on their ancient capital of Rome. Together, by way of open discussion, we will explore artistic production within each of these different cross-cultural contexts of East-West encounter. In the process, we will reflect on how art could function as a conduit for the exchange of ideas in the Middle Ages, and how it could be used both to negotiate and to intensify cultural difference.

Requirements/Evaluation: participation in discussion; five 4-5-page papers; five 1-2-page papers; and one 6-8-page final paper

ARTH 213 (S) The Human Figure in the Ancient Mediterranean

Cross-listings: CLAS 213 ARTH 213

Primary Cross-listing

From the earliest representations in the third millennium BCE until the end of the Roman period in the fifth century CE the human body remained the foremost choice of subject for artists, patrons, critics, and the public in the ancient Mediterranean world. This course will consider cultural ideas about the body in antiquity, and trace their repercussions in the modern era. Over the course of the semester we will concentrate on 12 case studies, each representing a specific concept from an area of the Mediterranean. Topics include the "shining bodies" of bare-chested potentates in Egypt and the ancient Near East, statues that give the dead voice, the perfection and humanity of the bodies of the gods, ancient Greek science and the nude goddess, the pathos of Hellenistic athletes, and the interpretative challenge of the ambiguous and sensuous marble forms of the Barberini Faun or the Sleeping Hermaphrodite, both found in Roman contexts. We'll consider the cross-influences of ideas about gender, class, race and the body coded in public and private art. Reading material will include ancient literature in translation as well as contemporary critical essays. Evaluation will be based on participation in discussion and group presentations, short response paper, tests on images, and a final 8-page research paper. Engaged library research of original paper topics will be supported throughout the semester.

Class Format: Lecture and Discussion

Requirements/Evaluation: participation in discussion and group presentations, short response paper, tests on images, a final 8-page research
Prerequisites: none

ARTH 218 (S) From the Battlefield to the Hermit's Cell: Art and Experience in Norman Europe (WS)

Cross-listings: REL 284 WGSS 284 ARTH 218

Primary Cross-listing

This tutorial provides students with the chance to investigate in-depth three of the most astonishing works of art created during the entire Middle Ages: the Bayeux Tapestry (c.1077-1082), the Cappella Palatina (c.1130s-1166), and the Psalter of Christina of Markyate (1120s-1160s). Created within a hundred years of each other all within territories controlled by the Normans—a warrior dynasty that settled in northern France in the 10th century and then expanded north into England and south into Italy in the 11th and 12th centuries—each of these works is unprecedentedly ambitious in scale, dazzling in its material properties, and survives in its original wholeness, a rarity in the medieval world. Despite these similarities, however, each work is very different from the other two and so sheds light on very different aspects of Norman experience, across Europe. The Bayeux Tapestry, likely made by female embroiderers for a baronial hall, is a giant textile (over 70 meters long) that in gruesome and fascinating detail tells the story of the Norman invasion of England by William the Conqueror in 1066. The Cappella Palatina in Palermo, in turn, commissioned by King Roger II, is a royal chapel covered in sumptuous mosaics that reveals through its decoration and ritual the dynamic interaction of Islamic, Byzantine, and Latin Christian traditions in the multicultural Norman kingdom of Sicily in the 12th century. And the Psalter of Christina of Markyate, a large prayerbook made for the use of a female recluse in southern England, contains 40 full-page paintings and 215 decorated initials, a vast and inventive program of imagery that through its creative profundity helped reshape private devotional art and culture for centuries to come. Through their variety, then, these three objects—an embroidery, a building, and a book—give students insight into the rich array of concerns and aspirations, from the political to the spiritual and from the public to the private, that gave substance and meaning to 11th- and 12th-century European life, for women as well as men. What is more, these three remarkable works of art have been the focus of much interesting scholarship in recent years, so an exploration of some of that literature provides a compelling introduction to the discipline of art history itself, past and present.

Requirements/Evaluation: Participation in discussion; five 5-7-page tutorial papers; five 1-2-page response papers.

Prerequisites: None

**ARTH 221 (F) History of Photography**

**Cross-listings:** ARTH 221 STS 221

**Primary Cross-listing**

This lecture course will examine the history of photography from its beginnings in the 1830s to the present, from the first grainy black and white images to the work of contemporary artists using cutting-edge photographic technologies. We will examine photographs used for documentary, scientific, and aesthetic purposes, and we will trace the medium’s emergence and acceptance as a fine art. We will also explore photography’s physical and conceptual characteristics as a medium, paying particular attention to its uniquely intimate and frequently contested relationship to “the real.” By the end of the course, students will have a broad understanding of photography as a unique medium within the history of art and knowledge of the theoretical frameworks that developed alongside that history.

**Requirements/Evaluation:** three to four short papers, quizzes, online presentations.

**ARTH 222 (S) Photography in/of the Middle East (DPE)**

**Cross-listings:** ARAB 222 ARTH 222

**Primary Cross-listing**

Photography has been globally disseminated and locally inflected since its invention. In the Middle East, the powers and pleasures of the medium have been valued by colonial forces, indigenous populations, photojournalists and artists; the resulting images merit aesthetic and art historical appreciation even as they grant visual access to the social and political dynamics operative in diverse cultural contexts. We will explore photographic practices in various zones of the Middle East--e.g., the Holy Land, Turkey, Egypt and the Persian sphere--by attending to individual photographers and case studies. This tightly focused approach will support, in turn, a consideration of the agency and power of images more generally--what work do photographs do? Who resists and who benefits? The goal will be to appreciate diverse styles and perspectives that underlie renderings of the Middle East.

**Class Format:** Discussion and GLOW posts required.

**Requirements/Evaluation:** Discussion, GLOW Posts, final project

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

**Difference, Power, and Equity Notes:** Photographs are tricky. Whose experiences and values do they really represent--those who are depicted? Those who wield the camera? Or, those who view images that are so easily reproduced and widely shared? How does identity figure? Religious conviction? Political affiliation? And how are these variables encoded in the material evidence? Appreciating the myriad powers of images requires
multiple skills--from close-looking to interdisciplinary analysis--useful in contemporary visual culture.

**ARTH 223 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora**

**Cross-listings:** COMP 322 AFR 323 ENGL 356 AMST 323 ARTH 223

**Secondary Cross-listing**

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as the late Congressman John Lewis' *March* and Ebony Flowers' *Hot Comb*, this course illustrates and critiques multiple ways the graphic novel commingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will build comic creation and analysis skills through short exercises, eventually building up to the final project of a graphic short story that illustrates historical and/or autobiographical narratives. No art experience is required, only an openness to expanding one's visual awareness and composition skills. This course is often taught in collaboration with the Williams College Museum of Art's Object Lab program, which allows the class to have its own space and art objects that are directly related to the course topic. This class may feature Object Lab participation, film screenings, and collaborations with guest speakers.

**Requirements/Evaluation:** class participation, written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story)

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** If the enrollment limit is exceeded, preference will be given to Africana Studies concentrators or students who have taken AFR 200, the department's introductory course.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**ARTH 225 (F) Art and Archaeology in Early China**

This course offers a survey of art and architecture in China from the beginning of civilization to the end of the Han dynasty (206 BCE-220 CE). Students are introduced to important artworks in ceramics, bronze, lacquer, jade, and built spaces including royal palaces, mausoleums, and ritual monuments, while learning to think about them in their archaeological context. Special attention is paid to the relationship between artistic innovations and the rise of new materials and craft technologies, such as glass and fire gilding.

**Class Format:** Fieldtrips to museums and conservation labs, possibly the Harvard Art Museums or the Williamstown Art Conservation Center, pending planning and approval.

**Requirements/Evaluation:** In addition to attendance and participation, students will be graded on two short papers (4-6 pages, double-spaced), a final research paper (min 12 pages, doublespaced) or a creative project in consultation with the instructor, and a final presentation (15 mins).

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** Majors are prioritized if the course overenrolls.

ARTH 228 (S) Velázquez, Goya, and Picasso

Cross-listings: ARTH 228 RLSP 228

Secondary Cross-listing

This course will provide an introduction to three major Spanish painters—Velázquez, Goya, and Picasso—who lived and worked, respectively, in the 17th, 18th, 19th, and 20th centuries. Though these painters are world famous, they are rarely studied comparatively, and in the context of their Spanish artistic roots. The syllabus will cover the historical and social contexts in which they started working, and how they followed, and departed from, artistic conventions of the time. Through specific paintings, we will consider the historical evolution of the artists’ relationship to their patrons and subjects, from the elite status of Velázquez within the royal court, to Goya’s dramatic rise with the reigns of Charles III, and Charles IV, and his subsequent exile to France. Picasso was free of royal patronage and also lived in France, yet despite this freedom he remained deeply connected to the themes and concerns of his Spanish artistic predecessors. In addition to key paintings including Velázquez’s “Las Meninas” and other royal portraits, Goya’s “Maja Desnuda” and his series “The Disasters of War,” Picasso’s “Guernica,” and his own 20th century reinterpretation of “Las Meninas,” we will focus on the artists’ shared subjects of portraits and war, and consider the following issues: How does the role of the Spanish artist change over the periods covered? How did the artist exercise his freedom whilst under the scrutiny of the court and the Catholic Church? How were these painters’ lives and work shaped by key historical events such as the Inquisition, Napoleon’s invasion of Spain, or the Spanish Civil War? How does the work of art evolve in its role from private royal commission to public display in museums open to all? We will read short literary pieces from each period, primary materials such as letters and other documents, and historical and critical works. All readings will be in English. Knowledge of Spanish is encouraged, but not required.

Requirements/Evaluation: 3- to 5-page weekly assignment

Prerequisites: none

Enrollment Limit: 10

ARTH 229 (F) The Art of Natural History (WS)

Cross-listings: ARTH 229 STS 226

Primary Cross-listing

The scientific revolutions of the eighteenth and nineteenth centuries fundamentally changed the way the natural world was seen and celebrated, classified and organized, displayed, and manipulated. New discoveries in the natural sciences and competing theories of evolution intertwined with shifting conceptions of natural history, of nature, and of humankind's proper place within it. This course will investigate the links between art and natural science. It will seek to understand the crucial role of the visual arts and visual culture in the study and staging of natural history from the eighteenth century to the present. We will pursue the questions that preoccupied the artists themselves. How should an artist react to new ecological insights? What is the proper artistic response to newly discovered flora and fauna? What is the role of aesthetics in the communication of knowledge? How are those aesthetics connected to ethics? How might a drawing of a plant convey information that is different from that of a photograph or a glass model of a plant? How might a theatrical diorama frame a scientific idea in a way that is different from a bronze statue? Students will seek to understand the myriad connections between seeing, depicting, and knowing, to question long-held assumptions about the division between “objective” science and “subjective” art, and to recognize that art has the ability not only to interpret, disseminate, and display scientific knowledge, but to create it as well.
**Requirements/Evaluation:** Five 5 page essays, five 1-2 page responses to partner's essays, critical conversation.

**Prerequisites:** None.

**Enrollment Limit:** 8

**Enrollment Preferences:** Sophomores with an interest in art history, art studio, ecology, environmental studies, and science and technology studies, juniors with these same interests, then art history majors, and science and technology majors, in that order.

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**ARTH 230 (F) From Alexander to Cleopatra: Remodeling the Mediterranean World**

**Cross-listings:** ARTH 230 CLAS 209

**Secondary Cross-listing**

The period between Alexander the Great (323 B.C.) and Cleopatra (30 B.C.), like our own, was characterized by internationalism, migration, wide-ranging cultural values and religious practices, and ethnically diverse urban populations. Large numbers of non-Greeks came under the control of newly established Hellenistic kingdoms, while in the west Rome's emergence as a superpower offered both new opportunity and danger. The Hellenistic world was a place of vibrant change in the spheres of art, architecture, urban planning, and public spectacle. In this course, we will consider the art and archaeology of this period in their political, social, and religious contexts, focusing on the visual language of power and royalty; developments in painting, sculpture, mosaics, and monumental architecture; interactions between Greeks and non-Greeks; and the impact of Greek culture in Rome.

**Requirements/Evaluation:** class participation, map quizzes, three short papers, mid-term exam, and a final paper

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** students with an interest in the ancient Mediterranean world and in the history of art and architecture

**Expected Class Size:** 35

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**ARTH 232 (S) Renaissance Rome: Renovating the Eternal City**

George Eliot called Rome "the city of visible history," a place with the power to bring "the past of a whole hemisphere" right before our eyes. The magnetic visual power of Rome did not just occur naturally, however; it is a product of a bold urban project first envisioned by Renaissance popes and brought into being by the artists and architects they hired. During the fifteenth and sixteenth centuries, Rome was transformed from a shrinking and neglected medieval town into a thriving center of artistic energy and invention. Beginning with the papacy's return to the city in 1417, we will focus on the historical, ideological, and artistic forces behind this period of renovation and restoration that reshaped the urban and artistic fabric of the city. We will study the particularly Roman foundations for the period known as the High Renaissance, then, approaching art historical touchstones by
Michelangelo, Raphael, and Bramante as works grounded in a uniquely Roman sense of time and historical destiny. We will conclude with a selective look at Baroque works by Caravaggio, Bernini and Borromini, exploring their powerful innovations and effects as a continuation of the Renaissance renewal of the eternal city.

Class Format: lecture

Requirements/Evaluation: Robust Community Discussions; 4-5 page visual and contextual analysis paper; 10-12 page research paper with multiple components (including prospectus, annotated bibliography, presentation); Google Earth Mapping Journal of Rome; Weekly Wellness

Prerequisites: none; open to Art majors as well as non-majors

Enrollment Limit: 15

Enrollment Preferences: Art majors current or prospective, and students following other majors with specific curricular interest in Roman history

Not offered current academic year

ARTH 233  (S)  Italian Renaissance Art

A survey of Italian art from Giotto to Michelangelo. This course will follow a chronological framework, giving students a grounding in the development of Italian art over the course of the 14th-16th centuries, but will also take a thematic approach that will allow us to delve into important art historical issues. Some, such as historical consciousness and the relationship to the past, or the reinvention of the idea of the artist and of art itself, will be important as we construct a critical understanding of the idea of "renaissance," or "rebirth," long central to the identity of the period. Others, such as gender, patronage, power, naturalism, and the materiality of objects, will bring us deep into the worlds in which these dazzling and still powerful works of art were originally created and experienced.

Class Format: Class time will be a combination of lecture segments and seminar discussions, with a mid-semester interlude of tutorial-style meetings.

Requirements/Evaluation: 2 Quizzes, 2 Essays, Final Take-Home Exam

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: ARTH majors and students interested in the ARTH major

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Attributes: ARTH pre-1800 Courses

ARTH 234  (S)  Arts of Tibet -- Sacred Abode of the Himalayas

Cross-listings: ASIA 234 ARTH 234

Primary Cross-listing

This course surveys the art and culture of Tibet from the time of the introduction of Buddhism in the seventh century to the modern period. Traditionally understood as the divine abode of Avalokitesvara, the bodhisattva who embodies the compassion of all buddha in Buddhist cosmology, Tibet was also fantasized as the immortal realm of "Shangri-la" by western interpreters. In this course, we will begin by examining the imagination and representation of Tibet and its culture in modern western discourses, and then shift the focus to the development of artistic forms of Tibet in the context of Tibet's history and religious movements, from ancient times to the present.

Class Format: A viewing session at museums, possibly at the Williams College Museum of Art, the MFA Boston, or the MET, pending planning and approval.

Requirements/Evaluation: In addition to attendance and participation, students will be graded on two ungraded quizzes, one movie response (1-2 pages, double-spaced), one midterm, and one final project (curating a mock exhibition or a 10-page double-spaced research paper along with a prospectus and a presentation).

Prerequisites: None
Enrollment Limit: 25
Enrollment Preferences: Majors and concentrations are prioritized if the course overenrolls.

ARTH 241 (F) Impressionism, Post-Impressionism, and Modernity

In 1874, an art critic mockingly termed Claude Monet's painting of a sunrise over the sea "impressionist [...] more unfinished than wallpaper in an embryonic state." With this phrase, he gave a name to a new style of painting that profoundly shaped the late nineteenth and early twentieth-century avant-garde movements in Europe and beyond. Beginning with the invention of photography in the early nineteenth century and ending with the advent of cinema, abstraction, and mechanized warfare in the first decades of the twentieth, this course will trace the origins and afterlives of "Impressionism" in art and cultural history. Many of the artists who continue to draw the largest crowds in museums around the world today—among them Manet and Monet, Degas and Seurat, Van Gogh and Rodin, Klimt and Picasso—fall within our period of study and will be subjects of our examination. Designed for students who have no prior experience studying art history, the course will prioritize methods of close looking and formal analysis. (If social distancing protocols allow, the course will include optional study visits to examine first-hand examples of paintings, sculptures, decorative arts, and printmaking at the Clark Art Institute and Manton Study Center for Works on Paper and Williams College Museum of Art). At the same time, the questions and methods at the core of our inquiry will be fundamentally interdisciplinary, and will engage students all across the humanities and sciences (major scientific figures such as the inventor Thomas Edison and the evolutionary biologist Charles Darwin will figure prominently in our narrative). Readings will emphasize close engagement with primary sources drawn from multiple disciplines: writings by artists and art critics from the period, as well as scientists, philosophers, psychologists, political theorists, and poets. We will approach "Impressionism" and "Post-Impressionism" as episodes in the cultural history of Europe that are uniquely revealing of a historical experience we still acutely feel today, which was called, for the first time in the nineteenth-century, "modernity."

Requirements/Evaluation: weekly discussion question, 1 visual analysis essay (4pp), take-home midterm, take-home final, research paper (8pp)
Prerequisites: None
Enrollment Limit: 30
Enrollment Preferences: Art-history majors, then art-studio and history and studio majors, then any interested student.
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option

Attributes: ARTH post-1800 Courses
Not offered current academic year

ARTH 242 (F) Art and Enlightenment in Europe

Cross-listings: ARTH 552 ARTH 242
Primary Cross-listing

This lecture course traces the emergence of new modes of art- and image-making during two momentous centuries of European history that established the paradoxical foundations of our modern world. In this period, modern democracy was founded and determined by exploitative labor, the extraction of natural resources, and the rise of the trans-Atlantic slave trade. Over two centuries from the founding of the French Academy in 1648 to the 1839 invention of photography, this course traces these tensions in art and intellectual thought, examining beauty and the sublime, rationality and madness, personhood and enslavement, natural history and extraction, democracy and tyranny. Often defined in terms of the "Enlightenment," this intellectual and artistic period engaged with freedom of religious thought, scientific experiment, and a belief that humanity was guided by reason and
rationality. Yet these same discourses also laid the foundation for the invention of race, nationalism, and the expansion of European colonialism.

Isolating a series of pivotal moments and emblematic figures in visual culture of this period, this course asks students to consider how art was implicated in Enlightenment, and, in turn, how Enlightenment was implicated in both newly liberatory and newly oppressive concepts of subjectivity and personhood. Particular emphasis will be placed on the history of science, and, relatedly, on the increasing global circulation of ideas, people, and goods. Artists in our purview include well-known figures like Velázquez, Rembrandt, Watteau, Hogarth, Goya, and Blake, as well as makers until recently left out of the art-historical canon, such as the Frankfurt-born botanical illustrator Maria Sibylla Merian, the Polynesian navigator and draftsman Tupaia, and the Guadeloupean neoclassical painter Guillaume Guillon-Lethière, the subject of a major upcoming exhibition at the Clark Art Institute. Designed for students with no prior experience studying art history, the course will work directly from objects in local collections, prioritizing methods of close looking and formal analysis. At the same time, the questions and methods of our inquiry will be fundamentally interdisciplinary. Readings will emphasize primary sources and recent scholarship. A separate discussion section will be offered for MA students.

Requirements/Evaluation: midterm exam; final exam; visual analysis paper (3 pages); final paper (10 pages)

ARTH 245  (S)  The Nature of Work

Cross-listings: ARTH 245 COMP 285 CLAS 243

Secondary Cross-listing

Work is something that touches the lived experience and historical realities of almost every human being in every time and place. But how did ancient Mediterranean societies and cultures define and deploy the concepts of "work" and "working," as both an activity and as discourse? This is a question that has received remarkably little attention, in part since modern scholars have all too often followed the lead of elite authors, who obscure the nature of work through their focus on its products: agricultural prosperity, material luxury, urban grandeur, etc. In this course, we will seek to shed light on the world of work in antiquity, to better understand both the experiences of those who worked for a living across an array of spheres and professions, and the value of work as a cultural, aesthetic, and literary concept. Special topics will include: the place of work in conceptions of a "golden age"; the literary topoi of work (like the idle shepherd or the virtuous peasant); representations of "heroic work" (most famously, the Labors of Hercules); the elision or erasure of non-elite labor for elite audiences in art and text; the iconography of work in painting, mosaic, and sculpture; and investigations into specific trades, crafts, and other forms of "making" (from midwifery to shoe making). Readings will be a combination of primary and secondary sources. All readings will be in translation.

Requirements/Evaluation: class participation; several short writing assignments; final paper

Prerequisites: none

ARTH 246  (S)  Museum Culture: Do you see what I see?!  (DPE)
We are all citizens of global visual culture, subject to a daily assault of images, artifacts, information and experiences. What we see and how we make meaning from it all depends on so many variables—who we are, where we are, and what we choose to look at. A critical question is how "art" figures and what agency it wields in millennial settings. This class is an opportunity to explore these issues with particular reference to museums and the objects enshrined therein. Digitized collections enable us to wander freely in space and time, following ideas/images through history even as we might also engage the 'real thing' in person. Our approach will be comparative and interrogative; case studies might range from an oil painting to a wooden sculpture, a coin to an illuminated manuscript, a photograph to a video. Along the way, we will consider what "art" really is and how different visual cultures might be presented or distorted in museum exhibitions and public spaces. Particular attention will be given to traditions or people that have been erased or misunderstood over time as art history has evolved as a discipline. Students will look, sketch, photograph and write throughout the semester, thereby exploring the entire spectrum of visuality from production to reception.

Requirements/Evaluation: Mandatory class attendance and substantive participation, weekly Glow Posts, curatorial term project.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Sophomores and majors.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: We will cover museums in diverse cultures and explore the porous boundaries between the "Orient", Europe and America. How art manifests inequalities of power and how museums privilege or erase particular groups of people will be addressed. Because collecting art entails money and privilege, understanding art history entails exploring social and cultural hierarchies.

SEM Section: 01 TF 2:35 pm - 3:50 pm Holly Edwards

ARTH 248 (S) War, Revolt, and Revolution in Art 1750-1850

This lecture course will focus on the dynamics of art, culture, and experience in Europe from the later eighteenth century to the middle of the nineteenth century. Spanning the global conflict of the Seven Years War, French Revolution of 1789, Haitian Revolution, Napoleonic occupations, and the Revolutions of 1848, this period of dramatic artistic, social, and political change gave rise to new conceptions of subjectivity, freedom, as expressed in the visual arts. How did art, new practices of art-making, and new modes of aesthetic experience convey and embody these crises, at once at the intimate level of individual experience and across transformations wrought by war and empire? We will examine the work of major artists in depth, particularly as that work helps constitute new accounts of the individual subject, the citizen, the migrations of populations, the spectacle of punishment, and other great alterations in the public sphere. Additionally, we will discuss the ways in which these histories have been addressed in art-historical writing and in museum practice.

Class Format: A third of our class time will be devoted to discussion. This course will also require students to visit WCMA, Special Collections, and the Clark.

Requirements/Evaluation: Attendance, participation, two essays (4-5 pages double spaced), midterm examination, final examination.

Prerequisites: none

ARTh 262 (F) Modern Architecture
A century ago, the Modern Movement promised the most sweeping cultural transformation since the Renaissance. Architecture was only one lobe of a comprehensive movement that embraced literature and painting, music and theater, all aspiring to the same radical emancipation from traditional form and structures of authority. What happened? How and why did modern architecture abandon its utopian vision. Students will explored the major developments in Western architecture from 1900 to the present, and become familiar with its major figures: Wright, Gropius, Mies van der Rohe, Le Corbusier, Aalto, Kahn, Venturi, Gehry, Koolhaas, and Hadid. Students will learn a variety of skills: design a 1000-square foot vacation house; present to the class an analysis of a building; and organize a small exhibition of architectural treatises in the Chapin Library.
Requirements/Evaluation: two hour tests and a design project including drawings and a written statement
Prerequisites: none

ARTh 272 (F) Art of the Noble Path: Buddhist Material Culture Across Asia
Cross-listings: ARTH 272 REL 272 ASIA 272
Primary Cross-listing
Buddhism has spread throughout Asia and beyond since its emergence in India in the 5th century BCE, providing a shared philosophical and cosmological framework for diverse cultures. Artistic expression, regional politics and cultural landscapes have been shaped by its remarkable influence. With patrons ranging from powerful monarchs and monks to merchants and tradespeople, Buddhist art has historically reflected the religion’s social inclusivity. This course will survey the architecture, painting and material culture of Buddhism in Asia, tracing its influence in diverse media, from rock-cut architecture to Zen painting. A close reading of primary texts, such as architectural inscriptions in India, manuscripts from Tibet, and travelogues of Chinese pilgrims, will provide greater context for the artworks.
**ARTH 272 (D1) The Postwar Avant-Gardes**

Artistic discourse in the Western hemisphere dramatically changed course in the wake of the Second World War. The mass trauma inflicted by the war prompted artists and critics throughout the region to reassess the role and potential of art in society. But the war’s mass displacement of communities also displaced the centers for artistic activity, and avant-garde practices soon expanded vigorously throughout the Americas. Through comparative studies, this course will analyze the artistic avant-gardes that emerged simultaneously in the United States and Latin America after 1945. We will place these myriad practices in dialogue, to elucidate the complexity, richness, and vitality of artistic practices in the postwar era.

**Requirements/Evaluation:** two exams, two short 2-page writing assignments, one 6- to 8-page research paper

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** If overenrolled, waitlisted students will be chosen on a lottery basis.

**ARTH 286 (F) Japanese Popular Visual Culture**

**Cross-listings:** ASIA 186 COMP 186 ARTH 286 ARTH 586

**Secondary Cross-listing**

The phrase "Japanese popular culture" often calls to mind comics and animation, but Japan’s earliest visual pop culture dates back to the 17th century and the development of arts like kabuki theater and woodblock prints that could be produced for a mass audience. This course traces Japanese popular culture through a range of visual media: kabuki and puppet theater, premodern and postmodern visual art (ukiyo-e, Superflat), classic film (Ozu, Mizoguchi, Kurosawa), manga/comics (Tezuka, Otomo, Hagio), and animation (Oshii, Miyazaki, Kon). The class will also study material examples of Japanese popular culture on display in the Repro Japan exhibition at the Williams College Museum of Art. We will develop visual reading skills to come up with original interpretations of these works, and compare different media to make them shed light on one another.

**Class Format:** discussion

**Requirements/Evaluation:** attendance, participation, two 5-page papers, final exam

**Prerequisites:** none

**Enrollment Limit:** 35

**Enrollment Preferences:** students majoring or considering a major in a related discipline

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1)
ARTh 289 (S) The Invention of Life Worlds

This course looks towards alternate and coexisting imaginaries of life worlds, examining their development in the arts and letters. With attention to visual and literary ethnography, science fiction, feminist theory, and creative non-fiction, we will contemplate methods of making and inventing in the contemporary world, focusing on the transhistorical and transcultural production of knowledge. Speculative forms of creative production and seminar discussion, as well as some of the most challenging ethical proposals for the future will guide our investigation of artworks, media, and literary production. Climate change, environmental justice, indigeneity, and multispecies interaction will resonate at the political center of this experimental seminar.

Requirements/Evaluation: Weekly response papers (1-2 pages); participation in class; one 12-15 page paper
Prerequisites: None
Enrollment Limit: 10
Enrollment Preferences: Students planning to major in Art History, Art History and Studio Art majors, then any interested student
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

ARTh 290 (S) Enslavement and Colonialism in Dutch Painting, ca. 1500-1800

This introductory lecture course to Dutch art from 1560-1795 will study how the rise of the trans-Atlantic slave trade and colonialism were central to the mythic construction of a Dutch Golden Age. From the iconic paintings of Rembrandt and Vermeer to the pictorial reproductions of the plantations in Indonesia and the Americas, we will ask how the visual record of this period has both written and erased the violent histories that are integral to the canon of Dutch painting. The course will begin with the iconoclastic riots in Antwerp in the 1560s and end with the slave revolt in the Dutch Colony of Curaçao in 1795, and throughout we will ask how to tell this history of enslavement and colonialism over two centuries when the voices of the enslaved and colonized were excised from the historical record.

Requirements/Evaluation: 2 visual analysis essays (3-4 pages each); midterm exam; and take-home final exam with essays.
Prerequisites: None
Enrollment Limit: 20
Enrollment Preferences: If the enrollment limit is exceeded, preference will be given to Art History and Art Studio majors.
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
Attributes: ARTh pre-1800 Courses

ARTh 301 (F) Methods of Art History (WS)

This course on the methods and historiography of art history offers art-history majors an overview of the discipline. The course surveys influential definitions of the discipline, the evolving tasks it has set itself, and the methods it has developed for implementing and executing them. Works of art will inevitably enter into our discussions, but the main objects of study will be texts about art as well as texts about methods for an historical study of art. The course is designed to offer a pluralistic perspective on key theoretical and methodological approaches to art history. Readings will regularly compare the Western discipline with frameworks from other parallel cultures. Topics include: style and periodization; iconography, narratology, and phenomenology; the social functions of images and the social history of art; the materiality of art; race, gender, and sexuality; the global scope of art and art history.

Class Format: In the fall of 2022, this class will meet in person. We will meet altogether once per week for a lecture. We will meet a second time
each week in a seminar format.

**Requirements/Evaluation:** Six 1,000-word analytical essays plus one 2,000-word writing project. Participation in class discussion. Attendance.

**Prerequisites:** Any prior ARTH course (one or more 100-level ARTH course[s] recommended). In the absence of prior coursework in art history, permission of instructor is necessary for admission.

**Enrollment Limit:** 19

**Enrollment Preferences:** The course is limited to art-history and (with permission) art history/studio majors. If the course is over-enrolled, preference will be given to senior AH majors, then juniors. Second-year students intending to major in art may enroll with permission.

**Expected Class Size:** 19

**Grading:** No pass/fail option, no fifth course option

**Unit Notes:** Satisfies the ARTH 301 requirement for the art-history major. Will satisfy the methods/junior seminar requirement for the history/studio major, but students wishing to do so must have permission of instructor to enroll.

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Students submit one 1,000-word essay every other week, for a total of six short essays. The purpose of the essays is to analyze the arguments and rhetoric of influential art-historical scholarship and criticism. The subject of the course, then, is how to write as an art historian. We discuss not only the content of the essays we read and write but also the form, both in class and in office hours.

Fall 2023

SEM Section: 01 TR 11:20 am - 12:35 pm Murad K. Mumtaz

**ARTH 301 (S) Methodologies of Art History (WS)**

The purpose of this course is to trace the origin and development of key ideas that define the discipline of art history. They include the idea that art has a history, that style is unique to individuals but also definitive of entire periods or cultures, that interpretation should be contextual, that representation is fundamentally subjective, that art can be an instrument of power, that reception is as much a part of the history of art as production, among many others. This course begins with a series of texts from around 1900, which drew upon nineteenth-century fields such as cultural history, psychology of perception, and psychology of empathy, to articulate the first methodologies of art history. The course then considers the critiques of those methods that emerged in the middle twentieth century from the fields of iconology, marxism, feminism, structuralism, and ethnic studies, among others. The course concludes with a consideration of the current revival of interest in the writings of the first art historians coming from perspectives such as phenomenology, aesthetics, anthropology, new materialism, "Bildwissenschaft," and neo-formalism. In this way, it becomes possible to see that the history of art is not merely the sum total of information available throughout the world about art objects, but also a coherent tradition of methodological debate about what are the most effective and responsible ways of writing the history of art.

**Class Format:** One one-hour recorded lecture per week will be upload to Glow.

**Requirements/Evaluation:** Six 1,000-word analytical essays. Six short responses to the papers of tutorial partners. Participation in class discussion. Attendance.

**Prerequisites:** Two prior ARTH courses (100-level ARTH courses are ideal). In the absence of prior coursework in art history, permission of instructor is necessary for admission.

**Enrollment Limit:** 10

**Enrollment Preferences:** This course is designed for art-history majors, and they receive first priority (seniors, then juniors). The course is also open to history and studio majors who need to complete the methods requirement. The course is not open to other students.

**Expected Class Size:** 5-10

**Grading:** No pass/fail option, no fifth course option

**Unit Notes:** Satisfies the ARTH 301 requirement for the art-history major. It will also satisfy the methods requirement for the history and studio major.

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Students submit one 1,000-word essay every other week, for a total of six short essays. The purpose of the essays is to analyze the arguments and rhetoric of influential art-historical scholarship and criticism. The subject of the course, then, is how to write as an art historian. We discuss not only the content of the essays we read and write but also the form, both in class and in office hours.
ARTH 304  (S) Indigenous American Urbanism: Teotihuacan and its Legacy in Comparative Perspective

This course offers students the opportunity to undertake close study of Teotihuacan, Mexico, (ca. 0-600 CE) the largest urban development of American antiquity as measured by spatial, and possibly also, population metrics. The first half of the semester involves an immersive look at the urbanism, architectural history, archaeology, and historiography of Teotihuacan, the present-day name of which means, “Where Men Become Gods,” in the Mexica (Aztec) language of Nahuatl. The following four weeks of the course will consider those major Ancestral American polities with which Teotihuacan interacted, including Monte Alban, Oaxaca and Tikal, Guatemala, or upon which its legacy exerted influence, including Chichen Itza, Yucatan and Tenochtitlan, Mexico City. The final two weeks of the course will consider comparative settlement and architectural data from Indigenous North and South America. Topics to be addressed over the semester will include the role of space in forging complex ancient societies; criteria for the identification of cities through archaeological remains; definitions of “complexity;” economic inequity within and between city-states; and comparative settlement patterns.

Requirements/Evaluation: Weekly readings (80-100 pages); Participation -- regular attendance, contribution to in-class discussions, and demonstrated knowledge of readings (20%); Six 3-page thematic essays addressing topics of the student's choice (60%); Final presentation of research findings (20%).

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Priority given to art history majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ARTH 306  (S) Building Power: Race and American Architecture  (DPE)

Cross-listings:  ARTH 306 AAS 306 AMST 306

Secondary Cross-listing

This course explores the many ways race is constructed through American architecture. We will survey different methodologies for linking architecture and race, including uncovering the history of buildings in the nation's capital, analyzing public housing and "domestic war,” and theorizing how racial difference and racialized power -- including white supremacy -- are implicated within modern architectural theory. Our readings will be drawn from Asian American, Latinx, and Black studies, as well as architectural history, art history, and urban studies. Together we will attempt to answer several questions about racialized architecture, such as why Asianness has often been associated with domestic interiors, how Blackness is coded in particular built forms, such as skyscrapers, and how architects and planners deploy the visual language of the Latinx barrio to mitigate anti-immigrant fear. We will also explore how BIPOC artists, architects, writers, and scholars engage architecture as a standpoint of critique, pushing back against the racialization of architecture and offer alternative or new ways of thinking about structures and space. While foregrounding race, the course will necessarily require intersectional thinking in relation (but not limited) to class, gender, citizenship, and ability.

Requirements/Evaluation: Students will be evaluated on response papers, discussion questions, and a final research project on an architectural object, theory, or style.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: First- and second-year students

Expected Class Size: 10-15

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
Difference, Power, and Equity Notes: The course examines how the production of racial categories and the maintenance of racial hierarchy and difference works through built forms, architectural style, and architectural theory. Students will see how buildings maintain social power, as well as how writers, architects, artists, and scholars use the architectural imagination to grapple with questions of racialized exclusion, dispossession, and crisis.

ARTh 307 (F) Contemporary methodologies in History and Practice

Cross-listings: ARTS 308 ARTH 307

Primary Cross-listing

This course explores contemporary methodologies that traverse both collective research and artistic production, providing an overview of theoretical and practical frameworks in contemporary art through case studies, close reading, and interdisciplinary artistic projects. We will speculate on the role of the artist, the curator, and the critic as “host” in order to foreground how a care-centered and collective approach to knowledge production can run counter to existing power paradigms, such as patriarchy, colonialism, and capitalism. Building on existing exchanges between disciplines—from feminist thought, queer theory, disability studies, visual and media studies—this hybrid studio and critical theory course presents contemporary art as a field uniquely suited to imagine alternative structures of institutional support and mutual aid. Through engagement with critical and creative texts, as well as a series of making exercises, we will experiment with practices of care and resource-sharing through art production, and imagine how arts practitioners can take a critical position that counters prevailing logics of individualism and enclosure.

Class Format: Studio

Requirements/Evaluation: Grade is evaluated based on class attendance and participation, completion of weekly readings and/or making exercises, and one final project that responds to course material and themes.

Prerequisites: At least one prior course in Art History or Studio Art, or permission of instructor.

Enrollment Limit: 15

Enrollment Preferences: History-and-Studio Majors get first priority, then regular Studio Majors and Art History Majors, then any interested student.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: Under $500. Students on financial aid may utilize the book grant to defray any materials costs.

Distributions: (D1)

ARTh 308 (S) African Art and the Western Museum (DPE) (WS)

Cross-listings: AFR 369 ARTH 308

Primary Cross-listing

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the current digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. Further, students will explore how the dialogues created between objects, individuals, and space often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

Requirements/Evaluation: Targeted bi-monthly writing assignments (3-5 pages in length) and bi-monthly peer response paper (1 page in length)
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Art History and African Studies Majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
AFR 369(D1) ARTH 308(D1)
Writing Skills Notes: Targeted bi-monthly writing assignments (3-5 pages in length) and bi-monthly peer response paper (1 page in length). Students can expect to receive timely comments on their writing skills, with suggestions for improvement from the instructor.
Difference, Power, and Equity Notes: This course explores issues of agency, authenticity, and appropriation as it applies to African artifacts displayed within the contexts of Western art museums. Through discussions of cultural capital, rights of seeing, and the politics of representation, students will analyze how the meaning of "African art" has been largely dictated by a Western museum culture and how this hegemony is currently being disrupted through strategic exhibition and display practices and narratives.

ARTH 310  (S)  An American Family and "Reality" Television  (WS)
Cross-listings: AMST 333 WGSS 312 ARTH 310
Primary Cross-listing
An American Family was a popular documentary series that featured the Loud family from Santa Barbara, California, whose everyday lives were broadcast on national television. The series generated an enormous amount of media attention, commentary, and controversy when it premiered on PBS in 1973. Today, it is regarded as the origin of so-called "Reality TV." In addition to challenging standard rules for television programming, the show challenged social conventions and asked viewers to think seriously about family relations, sexuality, domesticity, and the "American dream." Documenting the family's life over the course of eight months, the series chronicled the dissolution of the Louds' marriage and broadcast the "coming out" of eldest son Lance Loud, the first star of reality television. In this class, we will view the An American Family series in its entirety, research the program's historical reception, and analyze its influence on broadcast and film media, particularly on "reality" television. A final 14- to 18-page research paper will be prepared in stages, including a 6- to 8-page midterm essay that will be revised and expanded over the course of the semester.
Requirements/Evaluation: class presentations, research assignments and annotated bibliographies, and final 14- to 18-page research paper.
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: junior Art majors, followed by senior majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
AMST 333(D1) WGSS 312(D1) ARTH 310(D1)
Writing Skills Notes: There will be considerable focus on writing and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ARTH 311  (S)  Women and Art in East Asia  (DPE)
Cross-listings: ARTH 311 ASIA 311
Primary Cross-listing
For over a thousand years, women in East Asia profoundly influenced the development of the visual arts, yet their formidable presence remains largely
This seminar explores the critical roles women played as patrons, artists, and collectors of the arts in China, Korea, and Japan. We cover historical periods from the 10th century to the present day and discuss both traditional and nontraditional media including painting, sculpture, photography, and embroidery. Topics include didactic paintings for women in the Song court, calligraphy and painting as gendered modes of expression in Heian period Japan, the revival of Buddhist arts in Korea under the patronage of aristocratic women, and artworks by modern and contemporary artists that contest dominant representations of gender and sexuality. The course does not simply focus on artistic production, but also contextualizes these topics in light of emergent theorizations and readings on femininity, feminism, and the sexual politics of representation. Along with a final research paper, students will generate a substantial Wikipedia entry on a certain aspect of the course to promote the coverage of women and the arts online. No prior knowledge of Asian art history is required or assumed.

Requirements/Evaluation: attendance, class participation and discussion, 5 object or reading response papers (2-3 pages), Wikipedia page editing project and presentation (5-7 minutes long), and 8-10-page final research paper (written in stages over the semester including a 10-15-minute presentation)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Art History, Asian Studies, Chinese, or Japanese majors, but open to all

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 311(D1) ASIA 311(D1)

Difference, Power, and Equity Notes: This course fulfills the Difference, Power, and Equity by exploring the construction of gender in relation to power. We discuss how Daoist, Confucian, Shinto, and Buddhist ideas historically shaped attitudes toward women and address the ways in which colonialism and Orientalism shaped understandings of gender differences and roles in East Asia. Students will be introduced to theoretical texts of feminism and postcolonialism and learn to identify key issues to the feminist art historical project.

Not offered current academic year

ARTH 315 (S) Underground Berlin: Art, Performance, and Film, 1980s to Present (DPE)

Cross-listings: GERM 314 ARTH 315 WGSS 344

Primary Cross-listing

Subsequent to the National Socialist suppression of sexual expression, the intersections of politics and art in the post-World War II era reflected an organic embeddedness within the context of the city of Berlin. This course reflects upon this history to understand Berlin's present, its contradictory mix of new and old, "deep history" and nostalgia. Often described as an island moored within the communist territory of East Germany during the years of the Berlin Wall, West-Berlin became the city towards which many queer artists, musicians, and activists gravitated in order to avoid the involuntary conscription in the Bundeswehr, as an unexpected outcome of the government's plan to boost population in the former capital. We will focus on the excavation and recognition of inter/cultural positions that challenge German nationalism, at the same time that the country reestablished itself as a world power. Over the semester, we will rethink Berlin with respect to the once nascent geopolitics of the European Union, and the city's social fluctuations and periods of migration as registered through audiovisual and performative forms in advance of and in the decades following the fall of the wall in 1989. Focusing on art, performance, and film, we will examine the architectural, discursive, and cultural spaces in which these forms of creative and political expression take shape—from art museums and theater houses to occupied buildings, from independent publishing imprints and collaborative nonprofit organizations to night clubs. This course will examine the changing city with respect to activism, collectivity, alienation, solidarity, and belonging.

Requirements/Evaluation: Weekly response papers (1-2 pages); participation in class; one research paper (12-15 pages)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Art History majors, German majors, then any interested student

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
Difference, Power, and Equity Notes: Artistic works and subcultural formations addressed in this class reflect the intersection of difference, power, and equity in contemporary culture and society. Situating the work of artists and activists within a specific and evolving social and geopolitical context, it promotes greater understanding and skills for engaging in cultural debates on racism, homophobia, and sexism.

Not offered current academic year

ARTh 318 (S) Environmentalism in Experimental Media, Art and Politics, 1960s to Present

Over the semester we will address historical and contemporary debates on environmental politics from the critical perspective of artists, activists, and scholars from the 1960s to today. Organized thematically, this course addresses the aesthetics and politics of environmentalism alongside larger debates in the visual arts—including decolonial practices, globalization, conceptualism, collaboration and authorship, aesthetic reception, and the artistic transmission of ideas. We will place particular focus on lens-based and moving-image media practices with respect to the conceptualization of nature, as well as delve into the interrelation of materials and media in our greater cultural reckoning with climate change and environmental justice. Experiential engagement in the forms of screenings, group assignments, and the creation of site-specific and creative works in all media will amplify our art and media historical study of environmental politics in the public sphere. Students will also conduct independent research and essay writing in order to analyze the way we interpret, engage, alter, and mediate the natural world.

Requirements/Evaluation: Bi-monthly response papers (2 pages); participation in class and online forums; one 6-8 page paper; and a final media documentation project with accompanying written concept (5-7 pages)

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Art History and Studio Art Majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Attributes: ARTh post-1800 Courses

Not offered current academic year

ARTh 322 (F) Cold War Aesthetics in Latin America (DPE) (WS)

The Cold War was far more complex than a military conflict, with battles waged more in the symbolic than in the physical realm. The Cold War was therefore “everywhere and nowhere,” as new superpowers maneuvered to maintain geopolitical balance. Through a transnational lens this course considers the Cold War in Latin America as an aesthetic phenomenon with many facets, to recover how artistic practices unfolded myriad—and often conflicting—ideas regarding power, cultural influence, modernization, and revolution.

Requirements/Evaluation: Active participation, leading discussion, and five four-page writing assignments.

Prerequisites: One ARTh course.

Enrollment Limit: 12

Enrollment Preferences: If overenrolled, preference will be given to Art History majors.

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: This course foregrounds writing and peer reviews to develop critical thinking. We will have five four-page writing assignments, spaced throughout the semester, which will incorporate our class discussions and research. Students will receive critical feedback on both form and content from their professor and from their peers.

Difference, Power, and Equity Notes: This course fulfills DPE requirements through historical and visual analyses that examine the contestations of power that defined the Cold War era and their ramifications in the shaping of notions such as modernism, modernization, progress, citizenship, and resistance. The course takes a transnational perspective to analyze diverse artistic practices in relation to race, gender, and class dynamics, and to issues of cultural imperialism, nationalism, revolutionary politics, and globalization.

Attributes: ARTh post-1800 Courses
ARTH 324  (F)  Japanese Art and Visual Culture: Private/Public/Pop  (WS)
Cross-listings:  ARTH 525 COMP 324 ARTH 324 ASIA 324

This tutorial offers a survey of Japanese art and visual culture across time and media, with particular attention to two areas: the links between different artistic media, and the relationship between art and its audience. We'll begin with early court diaries and related scroll paintings as examples of "private" art. Then we'll move through progressively more public visual media of the 17th through 21st centuries: Kanô screen painting; nô, kabuki, and puppet theater; premodern architecture; popular woodblock prints; turn-of-the-century photography; and finally some examples of contemporary popular culture like comics, animation, and/or film. We will focus on the specificities of each medium while simultaneously developing formal visual reading skills that can work across different media.

Class Format: Students will meet with the instructor in pairs or trios for 75 minutes each week. This tutorial is offered simultaneously at the 300 level for undergraduates and at the 500 level for graduate students: graduate students will be paired with other graduate students and undergraduates with undergraduates.

Requirements/Evaluation: For undergraduates: weekly participation, 5 short written assignments in alternate weeks (ranging from 1 to 5 pages), and several 1-page peer critiques. For graduate students: weekly participation and 3-4 short written exercises that build toward a final 15-page research paper.

Prerequisites: No previous knowledge of Japanese art or culture is required. Students with similar preparation and interests will be paired with one another.

Enrollment Limit:  10
Enrollment Preferences:  Graduate Art students, followed by undergraduates majoring in Art History or Comparative Literature.

Grading:  no pass/fail option,  no fifth course option

This course is cross-listed and the prefixes carry the following divisional credit:
ARTH 525(D1) COMP 324(D1) ARTH 324(D1) ASIA 324(D1)

Writing Skills Notes: Students will write several regularly spaced papers that build on one another by tackling similar problems from different angles. Students will receive detailed feedback from the instructor on each paper, addressing argument, organization, and style, as well as peer feedback. (See requirements for details about the number and type of assignments.)

Not offered current academic year

ARTH 325  (S)  The Arts of the Book in Asia  (WS)
Cross-listings:  ARTH 325 ASIA 325

From palm leaf manuscripts to scrolls to Islamic codices, books have long served as vehicles of religious, cultural and artistic exchange in Asia. Owing both to their portability and status as finely crafted art objects, books have transmitted ideas across the continent, spreading courtly styles of painting from China to India, esoteric Buddhist teachings from Kashmir to Tibet and Mongolia, as well as the Quranic arts of calligraphy and illumination from Islamic South Asia to Southeast Asia. This co-taught seminar will highlight the interwoven history of book arts as it developed and disseminated across different regions of Asia. The course will also introduce students to the major art forms of the book, such as painting, calligraphy and illumination. The aim of the seminar is to understand the book as object while also investigating its content and its larger cultural significance. A number of class meetings will take place in the Chapin Library, where students will have the opportunity to study original manuscripts from the Special Collections. The course will culminate in an exhibition at Chapin Library which the students will curate using the Special Collections holdings.

Requirements/Evaluation:  3 essays, a final project/paper based on museum objects, wall label

Prerequisites:  none

Enrollment Limit:  16

Enrollment Preferences:  preference will be given to Art and Asian Studies Majors, and then to students of any major interested in the art and culture
of Asia

Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTH 325(D1) ASIA 325(D1)

Writing Skills Notes: Over the course of the semester students will write three papers at five pages each, culminating in a well-developed, focused final project. Students will be given extensive feedback on each assignment regarding grammar, style, and argument. The final paper will be part of a larger project in which students will work together to curate a small exhibition using the Chapin Library's Asian holdings. Each student will be asked to write a wall label for their selected object.

Not offered current academic year

ARTH 327  (F)  Acquiring Art: Selecting and Purchasing Objects For WCMA

Cross-listings: ECON 227 ARTH 527 ARTH 327

Primary Cross-listing

How do museums acquire art? Factors considered in selecting objects include: the museum's existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object's history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.

Requirements/Evaluation: Three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy for acquisition.

Prerequisites: ECON 110 or permission of instructor

Enrollment Limit: 20
Enrollment Preferences: Senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors

Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

ARTH 331  (S)  Michelangelo: Self and Sexuality  (WS)

Cross-listings: ARTH 331 WGSS 335

Primary Cross-listing

Who are artists? We each have different answers to this question, but our responses would probably share some common assumptions about human individuality and the centrality of the self to artistic creation. In this tutorial, we will take a critical lens to these ideas by studying the life, work, and passions of the Italian artist, Michelangelo Buonarroti (1475-1564). Michelangelo is a towering archetype of the autonomous artistic self: the distinctive
personality who telegraphs individual beliefs, feelings, and desires through the creative act. His lifelong engagement with the physicality, beauty, and sensuality of the (male) human body has encouraged the connection between the man and his work on the most intimate levels of pleasure and desire. Ironically, Michelangelo would not have understood our modern conceptions of artistic selfhood or sexuality, but his own Renaissance moment was obsessed with questions surrounding the nature of human identity and subjectivity. His artistic practice—from painting to poetry—wrestles with them in countless, fascinating ways. Students' writing and critical conversation will venture into the spaces between man and myth, selfhood and self-fashioning, artist and patron, past and present.

Requirements/Evaluation: Five 5-7 page essays, five 1-2 page responses to partner's essays, critical conversation
Prerequisites: Any ARTH course
Enrollment Limit: 10
Enrollment Preferences: ARTH majors and WGSS concentrators (or sophomores intending to pursue the ARTH major or WGSS concentration)
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)

ARTH 332  (S) Abstraction in Action: Global Modern and Contemporary Art  (WS)
Abstraction, be it gestural or geometrical, was a protagonist in the story of global modernisms and continues to be a powerful visual language in contemporary art. The term "abstraction" may first appear straightforward, but its associations are quite complex: in varying historical contexts, abstraction has signaled formalist rupture, cultural co-optation, revolutionary politics, as well as racial, feminist, and queer critique. This object-oriented course will delve deeply into non-representation in global modern and contemporary art; we will supplement our careful study of artworks with primary documents, as well as with canonical theoretical frameworks and the reassessments that have sought to complicate these. This seminar is organized into two weekly sessions—a lecture and a discussion—to introduce key concepts and issues and to allow for ample group dialogue on these. Ultimately, the course seeks to revise and expand the cartographies and ontologies of abstraction in the 20th and 21st centuries. As such, it welcomes students with an interest in modern and contemporary art, yet does not require previous coursework in either.
Class Format: biweekly seminar, with one lecture session and one discussion session
Requirements/Evaluation: participation, weekly assignments, final 12- to 15-page paper written in stages throughout the semester
Prerequisites: must have previously taken one Art History course in any area
Enrollment Limit: 12
Enrollment Preferences: If overenrolled, preference will be given to Art History, Studio Art, and History + Studio majors
Expected Class Size: 10
Grading: no pass/fail option, yes fifth course option
Distributions: (D1) (WS)
Writing Skills Notes: Students will complete short written assignments and will prepare a final paper in three stages throughout the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.
Attributes: ARTH post-1800 Courses
Not offered current academic year

ARTH 333  (F)(S) Once More With Feeling: Reenactment in Contemporary Visual Culture  (WS)
Cross-listings: ARTS 330 ARTH 333
Primary Cross-listing
The urge to relive the past is a fundamental human one, and artists have long drawn upon the ritualistic possibilities of reenactment as a way of interrogating time's uneasy returns and losses. In this course, we will study how artists working in a range of media deploy reenactment in collaboration with others, in order to ask what liberatory potential there might be in choosing to restage—and in many ways, relive—the past. This is a
hybrid course with roughly 50% of the course dedicated to critical analysis and 50% studio practice. Case studies drawn from film, theater and other art forms will accompany scholarly readings and short writing assignments, and students will also devise their own reenactment experiments in order to access the embodied and experiential possibilities of the course topic.

**Class Format:** discussion and studio practice

**Requirements/Evaluation:** 2-3 written responses, 2-3 creative exercises, class participation, one 12-15-page paper OR one creative final project

**Prerequisites:** must have previously taken one Art History or Art Studio course in any area OR professor permission

**Enrollment Limit:** 14

**Enrollment Preferences:** majors

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** The cost of materials will vary depending on the individual student project(s). Students are responsible for the cost of the materials. Students on financial aid can utilize the Book Grant to cover these expenses.

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 330(D1) ARTH 333(D1)

**Writing Skills Notes:** There will be considerable focus on writing and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes:** ARTH post-1800 Courses

**ARTH 335 (S) Uncovering Williams**

**Cross-listings:** ARTH 335 AMST 335

**Secondary Cross-listing**

Sparked by current controversies around visual representations at Williams, this course—a joint effort of the Williams College Museum of Art and the American Studies Program—interrogates the history of the college and its relationship to land, people, architecture, and artifacts. Students in this course will examine the visual and material culture of Williams and the land it occupies to uncover how the long and complex history of the college reverberates in the spaces and places students, faculty, and staff traverse daily. We take seriously that objects and environments are not neutral nor are the atmospheres that they reflect and produce. Our interdisciplinary approach draws from the methods and theories of American studies, art history, material culture studies, critical race theory, gender studies, and eco-criticism. Topics of discussion may include: the foundation of the college and displacement of native populations; buildings, objects, and monuments linked to Williams’ evangelical history and the role of missionaries in American imperialism; the symbolic meaning of the varied architectural styles at the college; and the visibility/visibility of the college’s relationship to slavery and Abolitionism.

**Requirements/Evaluation:** participation (discussion, GLOW posts), 2-3 short papers, one 5- to 6-page midterm paper, and a 10- to 12-page final project (either a research paper or a substantial arts-type project) and bibliography

**Prerequisites:** sophomore standing or permission of the instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** AMST majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

ARTh 337  (S) Visual Politics  
Cross-listings: AMST 370 ARTH 337 PSCI 337  
Secondary Cross-listing  
Even casual observers know that appearances matter politically and that the saturation of politics by visual technologies, media, and images has reached unprecedented levels. Yet the visual dimensions of political life are at best peripheral topics in contemporary political science and political theory. This seminar explores how our understanding of politics and political theory might change if visuality were made central to our inquiries. Treating the visual as a site of power and struggle, order and change, we will examine not only how political institutions and conflicts shape what images people see and how they make sense of them but also how the political field itself is visually constructed. Through these explorations, which will consider a wide variety of visual artifacts and practices (from 17th century paintings to the optical systems of military drones and contemporary forms of surveillance), we will also take up fundamental theoretical questions about the place of the senses in political life. Readings may include excerpts from ancient and modern theorists, but our primary focus will be contemporary and will bring political theory into conversation with other fields, particularly art history and visual studies but also film and media studies, psychoanalysis, neuroscience, and STS. Possible authors include Arendt, Bal, Belting, Benjamin, Browne, Buck-Morss, Butler, Campt, Clark, Crary, Debord, Deleuze, Fanon, Foucault, Freedberg, Hobbes, Kittler, Mercer, Mitchell, Mulvey, Plato, Rancière, Scott, Sexton, Starr, Virilio, Warburg, and Zeki.  
Requirements/Evaluation: regular, engaged class participation, several Glow posts, and *either* three 7- to 8-page papers *or* on short and one much longer paper.  
Prerequisites: at least one prior course in political theory, cultural theory, visual studies, or art history; or permission of instructor  
Enrollment Limit: 16  
Enrollment Preferences: Political Science and Art History majors (including students in the grad program); then qualified students from all disciplines welcome, space permitting  
Expected Class Size: 16  
Grading: no pass/fail option, no fifth course option  
Distributions: (D2)

ARTh 360  (F) The Gothic Cathedral: An Art History  
Cross-listings: ARTH 360 REL 360  
Primary Cross-listing  
Through their enormous scale, through the gravity-defying complexity of their construction, and through the sumptuousness of their materials and decoration, Gothic cathedrals -- the medieval equivalent of the blockbuster movie, and then some -- have amazed visitors for centuries. The widespread social media reaction of shock and dismay to the fire at Notre Dame Cathedral in Paris four years ago, moreover, indicates that this power of the cathedral to dazzle and to capture hearts remains very much alive. But how have art historians, specifically, made sense of these extraordinary, and extraordinarily complex, monuments? And how have the questions they have asked about the cathedral changed over time? Through a close examination of a number of influential books, in particular -- each one of them a kind of miniature cathedral in its own right -- this 300-level seminar will investigate the shifting interpretation of the Gothic Cathedral over the past 150 years. In so doing, the seminar aims to shed light not only on the fascinating multiplicity of realities that make up the Gothic cathedral but also on the changing shape of the discipline of art history itself, from its beginnings to the early 2020s.  
Requirements/Evaluation: participation in class discussion; 1 or 2 oral presentations; four 3-4-page papers, and a 6-8-page paper  
Prerequisites: none  
Enrollment Limit: 10
Enrollment Preferences: art majors and sophomores, but open to all

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ARTH 363  Space into Place: Composing Modernity through Maps and Landscape Paintings, 1500-1900

Colonial expansion and growing trade networks created new needs for picturing the globe in early modern Europe. In other words, globalization required a world broken down into concrete units that could be known and recognized. The artistic and the cartographic were two fundamental modes of representing space. What we might learn by bringing landscape paintings and maps together in dialogue? What are the aesthetic expectations of each genre? How were subject, scale, perspective, and proportion determined and by whom? Moving beyond a binary opposition of science versus art, we will study conventions and changes in mapmaking and landscape painting from the sixteenth to nineteenth centuries to analyze shifting conceptions of national identity, modernity, and the relation of humans to nature. Course lectures and an interdisciplinary array of readings will provide historical and conceptual support for object-based discussions in the Williams College Museum of Art, the Chapin Rare Book Library, and at the Clark Art Institute.

Class Format: this course will meet twice per week, the first meeting will be in the format of a lecture, the second will be a seminar-style discussion

Requirements/Evaluation: two short papers (4-5 pages), one longer final paper (10-12 pages), presentations, and participation in discussion

Prerequisites: none

Enrollment Limit: 20

Expected Class Size: 10

Grading:      

Distributions: (D1)

ARTH 368  HIV + AIDS in Film and Video  (DPE)

Spanning activist works, experimental film, Hollywood dramas and documentary, this course examines the role of moving images in reckoning with the global AIDS crisis, its aftermath, and its ongoing aftershocks. The AIDS crisis of the 1980s and 1990s was, in the words of Larry Kramer, a ‘plague’ of epic proportions, with an entire generation obliterated before it could reach maturity. And yet, the ‘plague’ years also spawned a remarkable amount of creative and activist image-making aimed at fighting, mourning, and grappling with AIDS. Now, we find ourselves in another pivotal moment: the past decade has yielded a new wave of artworks dedicated to memorializing the crisis, while for many communities, the crisis never ended. Together, we will ask difficult and probing questions about this phenomenon called the ‘AIDS epidemic,’ examining the role of art in frontline activism, the ethics of AIDS historiography, mainstream visions of the AIDS body, and the need for a diversity of AIDS narratives. This seminar-style course will combine weekly screenings with readings and intensive discussion.

Requirements/Evaluation: Discussion facilitation, attendance and participation, short response papers, long research paper

Prerequisites: ARTH 102 or permission of instructor; GRADART exempt from ARTH 102 prerequisite

Enrollment Limit: 12

Enrollment Preferences: senior majors

Expected Class Size: 12

Grading:      

Distributions: (D1) (DPE)
Difference, Power, and Equity Notes: This is an intersectional course in LGBTQ+ art history, with an examination of the relationship between sexuality, gender, ethnicity and power within AIDS activism and the AIDS crisis.

ARTH 379 (S) Writing Art

Cross-listings: ARTH 379 ENGL 379

Secondary Cross-listing

This course is conceived primarily as an experiential adventure in creative forms of art writing. We'll read several recent examples of such work (from writers including John Ashbery, Roland Barthes, John Berger, Teju Cole, Jorie Graham, Robin Coste Lewis, Eileen Myles, Ali Smith, Roberto Tejada, and John Yau) to get a sense of the range of approaches, from the ekphrastic poem to the essay to the novel, alive today; and we will spend considerable time in local museums, engaging intimately with works of art through various writing prompts, as you create your own creative responses to visual art. Along the way, we will work to historicize and theorize the relation between the verbal and visual arts, and to ask what looking at art brings to creative writing, as well as the ways creative writing might extend or alter the work of art history.

Class Format: This will be a hybrid course. We will divide our time between seminar meetings, where we will discuss published texts; museum visits, where you'll engage directly with visual art; and small group meetings, where you'll get feedback on your evolving work.

Requirements/Evaluation: engaged participation; successful completion of assignments; demonstrated commitment and quality of the work, as evidenced by a final portfolio of revised writing.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 12

Enrollment Preferences: Undergraduate majors in English or Art and graduate students in Art.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ARTH 390 (F) Art and Representation in the Wake of Empire, Europe After 1945 (DPE)

Foregrounding the exhibition as a critical form of aesthetic and political contestation, this course examines the transformation of colonial projects of early modernity to the post-World War II period. It will situate European visual culture within systems of transnational exchange and the art and cultures of other continents, while reflecting upon its economic and political impacts within its own newly reconfigured borders. National identity will be set in relief against a burgeoning cosmopolitanism, migration shifts, and increased tourism worldwide. Work in a variety of media will illustrate the multifaceted nature of these interactions and their engagement with materials, persons, and things in the commodification and use of natural resources. Of the themes addressed in this course—postcolony, anticapitalism, imperialism, neocolonialism, and existentialism—particular attention will be focused upon the history of independence movements in the former European colonies and their reflection in works of art in Europe and abroad. We will consider the role major international and perennial art exhibitions—such as Documenta in Germany and the Venice Biennale in Italy—have played in the reconceptualization of the field of contemporary art, as well as other institutions of art confronting new waves of fascism in Europe. With a transhistorical approach, we will assess the work of international curators and cultural theorists who have remapped the relationship between art and politics, and the Global North and South.

Requirements/Evaluation: Weekly response papers (1-2 pages); participation in class; one 12-15 page paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History and Studio Art majors, then any interested student

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option
Difference, Power, and Equity Notes: The course examines difference, power, and equity in artistic practice as a means of rethinking European identity within a globalized world. Migration, diaspora, and citizenship—and their differentials of power and movement—are central to course assignments and discussions. It focuses on the lasting impacts of colonialism beyond European borders as a way of understanding the logic of cultural hegemony.

Attributes: ARTH post-1800 Courses

ARTH 400  (F)  Clark Visiting Professor Seminar: The Image Multiplied: The Printed Image in Early Modern Europe
Cross-listings: ARTH 500 ARTH 400

Secondary Cross-listing
The technology of mechanically reproducing complex visual images on paper, a development of fifteenth-century Europe, transformed the early modern world no less than the emergence of digital media has transformed our own. Techniques of woodcut, engraving and etching quickly became important media for innovation within the fine arts. At the same time, they became equally important as sources for devotional imagery, for disseminating copies of other artworks, for the expansion of knowledge through scientific illustration, and for the effective broadcasting of political and religious messages during centuries of extraordinary political and religious upheaval. In this seminar we will investigate the cultural history of printed images in Europe from the time of their emergence in the fifteenth century through the mid-eighteenth century, focusing on the changing cultural circumstances of their production and reception. We will consider the work of major printmakers such as Mantegna, Dürer, Goltzius, Rembrandt, Callot, Hogarth, and Piranesi, but also that of many lesser-known (and anonymous) artists.

Requirements/Evaluation: writing assignments, participation
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: graduate students get preference; places for 8 undergraduate and 8 graduate students assured

ARTH 401  (S)  Museums: History and Practice
Cross-listings: LEAD 301 ARTH 501 ARTH 401

Secondary Cross-listing
Art museums express the cultural, aesthetic and social ideals of their period of formation and many of those ideals are embedded in the values and practices of institutions today. Comparing institutions past and present internationally, seminar participants will envision the art museum’s future while addressing programmatic and organizational challenges at this moment of participatory civic engagement and social, political unrest. With growing skepticism of institutional collecting practices and authoritative narratives, art museums, especially those in the United States, face internal and external pressure to “decolonize” as they attempt to alter their canon. There is pressure, as well, to embrace a more active role in climate and social justice movements. It is a time marked by calls for compensation transparency, participatory decision making, staff and trustee diversity, and greater scrutiny of funders. The seminar will consider this environment against past and current norms of governance, management and curatorial policies and practices. We will examine the traditional role of architecture and installation in interpretation and experience, prevailing and proposed guidelines in the accessioning and deaccessioning of works of art and both internal and external attitudes towards the repatriation and restitution of cultural property. Studying museums ranging in size and type from the “encyclopedic” to newly established contemporary arts institutions and alternative spaces, seminar participants will hear how museum leaders are dealing with challenges to current practice through weekly zoom sessions. Participants will also ponder how future museums might strive to balance the institution’s traditional scholarly and artistic role with new civic and social responsibilities, mindful of financial stability in a market-driven, metric-conscious, not-for-profit environment; doing so while addressing, in proposed program and
practice, the demands on museums emanating from a more ethically insistent internal and external world.

Requirements/Evaluation: oral presentations and discussion in class and one seminar paper (with class presentation) at the end of the semester

Prerequisites: undergraduates should email michael.conforti@williams.edu to schedule a discussion before registering for the course

ARTH 402 (F) Monuments and The Art of Memorial

The urge to commemorate is a timeless human impulse. Individuals, heroic acts, and historic events have been marked by mounds, architecture, images, words, and ephemera for over 5000 years. The value of the subject or focus of a commemoration changes over time. Entropy, iconoclasm, and vandalism have been seen as either positive or negative modes of destruction. Recent events have brought into high relief monuments long taken for granted as markers of the American urban landscape. Calls for the removal of monuments that have elevated individuals implicated in colonialism and racism have led to a powerful surge in alternative monument-making, and brought commemorative images back into public consciousness. Over the course of the seminar students will document and explore the concepts behind monuments and memorials in the Western tradition from their origins in the ancient Mediterranean (Mesopotamia, Egypt, Greece, Imperial Rome), and chart their reception, interpretation, destruction, and/or influence in later periods. We will also analyze the abstraction and inversion of monumental form, seen in the counter monuments of the late twentieth century such as Maya Lin's Vietnam Veterans Memorial (1982) or Gunter Demnig's Stumbling Stones project (Stolpersteine, 1992-the present), the world's largest decentralized memorial for the victims of Nazi terror. Our consideration of historical monuments will be paired with ongoing contemporary discussions of action around the removal of memorials, and the call for creative alternatives. During the second half of the semester seminar participants will research a memorial trend or a specific monument, and investigate and parse its context and reception over time. A short presentation and a substantial paper, written in stages, will be the end result of the research project.

Class Format: Discussion oriented course. Each student will have the opportunity to coordinate the discussion.

Requirements/Evaluation: The requirements of the course include: attendance, weekly posts on reading, and participation in discussion; a short (15-minute max) report on a research project; a 15-18 page paper on the research project, written in stages.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Art History majors and grad students, then any interested student

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Unit Notes: This course will fulfill the seminar requirement for the major in Art History. It can also fulfill the ARTH pre-1800 Course requirement if a seminar project is in the pre-modern era.

ARTh 403 (S) Clark Visiting Professor Seminar: Transatlantic Landscape

Cross-listings: ARTH 403 ARTH 503

Secondary Cross-listing

Landscape and the American encounter are inextricably bound together. Through the conventions of landscape representation and cartography developed in the sixteenth- and seventeenth-centuries, previously unknown regions of the globe were made legible to European audiences. What were these conventions? What aesthetic, social, and political factors contributed to their development? And with what success were they carried across the Atlantic? If European landscape was an agent of empire, in what ways was it challenged and even transformed by encounters with people whose ways of experiencing and thinking with the land did not conform to its conventions? This seminar will explore such questions by investigating the historiography and theory of landscape, and by looking closely at a number of case studies in transatlantic landscape, including the sixteenth-century mapping of New Spain, the Dutch representation of Brazil in the seventeenth century, Caribbean landscapes, the representation of the arctic, early archaeological campaigns in North America, and the surveying and representation of the western United States in the nineteenth century.

Requirements/Evaluation: research paper, class presentations
Prerequisites: none

ARTh 405 (F) Seminar in Architectural Criticism

How does one judge a building? According to its structural efficiency or its aesthetic qualities? Its social responsibility--or just its pizzazz? Depending on the building, and the critic, any of these questions might be pertinent, or impertinent. This seminar explores architectural criticism, that curious genre between literature and architecture, and looks at its history, nature and function. We will read and discuss classic reviews by historical and contemporary critics as John Ruskin, Mariana van Rensselaer, Lewis Mumford, Ada Louise Huxtable and Herbert Muschamp. Insights gained from these discussions will be applied by students to writing their own reviews, which will likewise be discussed in class. Early assignments will concentrate on mechanics: how to describe a building vividly and accurately, how to balance description and interpretation judiciously, how to compare. Subsequent ones will be more synthetic, encouraging students to write bold, lively and critical essays. The ultimate goal is to develop a distinctive and effective voice, and to gain a better understanding of the nature of criticism in general.

Requirements/Evaluation: students will write and revise six papers (5-7 pages) during the semester
Prerequisites: any 100 level ARTH course or permission of instructor
Enrollment Limit: 11
Enrollment Preferences: junior Art History majors
Expected Class Size: 11
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

ARTh 407 (F) Materials and Material Culture along the Eastern Silk Road

The Silk Road, a network of land and sea trading routes stretching from the Mediterranean to East Asia, served as a conduit for dynamic interactions
and cross-cultural exchanges in the era before globalization. As a great cultural highway, the Silk Road stimulated the movement of peoples, the trade of luxury goods, and the transmission of technologies, ideas, and artistic motifs. This seminar examines the materials and material things traveling along the Silk Road from the fall of the Han Dynasty in China to the rise of the Mongol Empire (ca. 300 to 1400 CE). We focus, in particular, on the movement and use of three key materials: silk, glass, and paper. Topics include the transmission of silk-weaving technologies between China and Central Asia, glass bead production on the Korean peninsula, and the role of Japan's Shosoin Treasury in the construction of kingship. The emphasis will be on the material culture and sites from China, Korea, and Japan, with forays to India, Afghanistan, Turkey, and beyond. You will learn to critically analyze issues related to cultural interactions and gain familiarity with critical approaches to materiality and material culture studies. As a class, we will also develop a collaborative timeline as a resource to remember historical developments as well as key dates, objects, materials, and individuals. No prior knowledge of Asian art history is required or assumed.

Requirements/Evaluation: attendance, class participation and discussion, 5 response papers (2-3 pages), Silk Road City presentation, 12-15 page final paper + presentation

Prerequisites: must have taken at least 1 art history course

Enrollment Limit: 12

Enrollment Preferences: Art History majors or seniors, but open to all

ARTH 411  (S)  Han Dynasty Art in the Ancient World

Although the Han Empire (206 BCE-220 CE) is credited for defining the "Han ethnical identity" or the so-called "Chinese-ness" as we know it today, its culture was also richly cosmopolitan, marked by constant interaction with the outside world. This course considers Han dynasty art from a transregional perspective by examining artworks that attest to rigorous artistic exchanges with foreign cultures, ranging from the luxury items imported from the Hellenistic, the Central Asian, and the Steppe cultures and their domestic adaptations, to the exported Han artworks excavated in the South East and the East Asian regions. These objects illustrate the Han Empire's growing awareness of its neighboring states and the ambition to visually assert itself as a powerful and open "universal empire." Students will learn about important artistic trends during one of the most international periods in ancient China, while gaining a materially-based vision of 4a globalizing ancient world bound closer than ever by the rise of the "Silk Roads" and maritime trade. The course is divided into four main sections following the logic of space. Assuming the viewpoint of the Han Empire, the course begins by examining the artistic exchanges with civilizations in the West (the Mediterranean and the Central Asian cultures) and then moving clockwise to the North (the Steppe cultures), the East (Korea and Japan), and finally the South (maritime trade with South East Asian states). This arrangement of the syllabus is designed to help the students grasp and internalize the dynamic cultural contacts in a more embodied manner, while providing a working version of a spatial "grid" for navigating the students in their own exploration of the history of art in the ancient global world.

Class Format: Field trips to museums, possibly the MET or the MFA Boston.

Requirements/Evaluation: In addition to attendance and active participation in seminar discussions, each student will present on a topic of choice for two of the four main sections outlined in the course description (each 20-25 mins). Students will also write a final research paper on a topic of choice (15-20 pages, double-spaced) in consultation with the instructor and present their findings to the class (20 mins).

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Art majors are prioritized if the course overenrolls.

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: ARTH pre-1800 Courses

ARTH 412 (F) The Politics of Aesthetics: Collaboration and Participation in Contemporary Art

The social turn is a hallmark of contemporary art, as artists since the 1960s turned from the art object toward dynamic exchanges with the public, from sole author to collaborative engagement. This seminar provides a theoretical framework to historicize as well as to critically analyze the promise and pitfalls of collaborative works, of favoring active participants over passive spectators, and of the meteoric rise of what is now commonly known as "social practice" art. A wide range of case studies from around the world will also allow us to delve into the intersections and productive tensions between aesthetics and politics, or between art and life.

Requirements/Evaluation: discussion questions, weekly presentations on either a text or an artist, three response papers, final 12- to 15-page paper

Prerequisites: must have previously taken an Art History course

Enrollment Limit: 10

Enrollment Preferences: If overenrolled, preference will be given to Art History seniors.

Expected Class Size: 7

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: ARTH post-1800 Courses

Not offered current academic year

ARTH 414 (F) Modernist Architecture: The Rise and Fall of the Modern Movement (WS)

Modern architecture was once a radical movement--as radical as modern art, music, and literature--but though its forms survive today, they have lost their revolutionary charge. It has dwindled, in the words of Nathan Glazer, "from a cause to a style." This seminar will examine the modern movement in architecture as a historical artifact, from its emergence in early 20th-century Europe to its worldwide dominance in the 1950s, and to its collapse into an ideology-free modern vernacular since the 1960s. We will look at the principal theorists of the movement, including Le Corbusier, Mies van der Rohe, and Adolf Loos, as well as the critics who undermined it, particularly Robert Venturi and Jane Jacobs. Potential research topics include the failure of urban renewal, the patronage of modernism by corporate America, postmodernist criticism, and the historiography of the modern movement--in short, any topic that falls between Mies’s "less is more" to Venturi’s "less is a bore."

Requirements/Evaluation: Several short classroom presentations. A 20-page research paper and a one-hour presentation & discussion in the seminar.

Prerequisites: At least two previous courses in art history.

Enrollment Limit: 11

Enrollment Preferences: Juniors, seniors and graduate students.

Expected Class Size: 11

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will prepare a seminar research paper of at least 20 pages that will be revised in multiple draft, responding to comprehensive feedback on content, style, logic, tone, grammar, word use, and so forth.

Not offered current academic year

ARTH 418 Gothic Wonder: Exploring the Medieval Cathedral Then and Now

Through their enormous scale, through the gravity-defying complexity of their construction, and through the sumptuousness of their materials and decoration, Gothic cathedrals were built to amaze visitors--the medieval equivalent of the blockbuster movie, and then some. The goal was to activate and overwhelm all of the senses and thereby both to produce an experience of transcendence for the people entering and using the cathedral, and to capture their hearts. The widespread social media reaction of shock and dismay to the fire at Notre Dame in Paris last year suggests that this power of the medieval cathedral to captivate remains very much alive. But these cathedrals have also, over the centuries, embodied and perpetuated hierarchies of authority and privilege, and have consumed vast economic resources. As a result, they have often been centers of conflict--and this too remains true today, as the heated debate in France over the rebuilding of Notre Dame testifies. This seminar will investigate the multiplicity of realities that make up the Gothic cathedral, from the Middle Ages to the present day. Together, we will look at a number of Europe's most renowned cathedrals, through time--in France (including Notre Dame in Paris), England, Italy, Germany, Spain, and elsewhere--and consider both how each building has changed over the centuries and how it has been differently interpreted. As this collective conversation is unfolding, students will also pursue individual research projects on a cathedral of their own choosing, the aim being similarly to examine one of these remarkable monuments over
time and in its shifting contexts.

**Requirements/Evaluation:** Participation in class discussion; oral presentation; 15-20-page research paper.

**Prerequisites:** Permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Art majors, but open to all

**Architecture and Sustainability in a Global World**  
(WS)

**Cross-listings:** ENVI 420 ARTH 420 GBST 420

**Primary Cross-listing**

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

**Requirements/Evaluation:** weekly reading discussion question posts on GLOW, leading class discussions, and a final project/paper (15-20 pages) with presentation

**Prerequisites:** none, although a course in art/architectural history or environmental studies would be advantageous

**Enrollment Limit:** 12

**Enrollment Preferences:** Art History majors, Environmental Studies majors, History and Studio majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Picturing God in the Middle Ages**

**Cross-listings:** REL 421 ARTH 421

**Primary Cross-listing**

How did medieval Europeans imagine their God and how did they give what they imagined pictorial form? How were these pictures used, both in public and in private life, and why? Paying particular attention to the function and experience of medieval works of art, this seminar will examine the evolution of images of God, in both the Eastern and Western halves of Europe, and the problems these images often generated. Through readings and class discussion, the course will investigate, among other specific topics: the varied attitudes toward the representability of God in Judaism, Islam,
and Christianity; the impact of the Roman cult of the emperor and of images of the dead on the earliest portraits of Christ; the cult of the icon, concerns over idolatry, and the destruction of images; ideas about spiritual versus physical vision and their influence on the making and viewing of pictures; the relationship of sacred images to relics, the Eucharist, and other aspects of Christian ritual; and the pictorial exploration of both the torture and sexuality of Christ. Students will also pursue an individual research project, in which they will examine in greater depth a specific depiction of divinity of their choosing, in light of what we have considered together in the seminar.

Class Format: Class will meet online at first but may shift to in-person if circumstances allow

Requirements/Evaluation: class participation, oral presentation, one short paper (2-3 pages), final research paper (15-20 pages)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Preference given to Art majors and seniors.

ARTH 425  (S)  Fragments and Healing: Disability Studies and Late Antique Art

Cross-listings: ARTH 425 REL 425 ARTH 584

Primary Cross-listing

This seminar will investigate some of the ways that contemporary Disability Studies can help us see and think about the complexities of differently abled bodies in Late Antiquity (broadly, from ca. 200 until ca. 750), the formative period for Christian art (and consequently for much of Western art). Disability Studies is an extremely active and rich body of literature and art that has not often been brought into conversation with historical periods of art, and so this seminar seeks to open up discussion of the insights possible from that conversation, not only how Late Antique art can be re-interpreted, but also how that period of art can reveal under-explored areas in the field of Disability Studies. The seminar will undertake a mutual interrogation of accepted notions in both fields and, in this way, to explore some new understandings of Disability Studies' capacities for allowing us to think with our art, culture, and bodies. The means at our disposal for this seminar are art of Late Antiquity and of the contemporary world, and that idea of mutual interrogation also operates in our study and display of that art. The seminar will look at art of healing and recuperation, art produced by and directed at diversely-abled bodies, and at fragments and restoration, and think about art as documents, reflections, and determinants of those bodies, now and in the past. It will, for this reason, work around the collection of WCMA, with exhibition and collection research, and the historical archives of the Library holdings, so that the widest possible study of bodies and difference is opened for our thinking and dialogue.

Requirements/Evaluation: participation in discussion; three 1-2-page reading reports; one 3-5-page exhibition response; one 15-20-page final essay

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: senior art-history majors and graduate students; other students will need instructor consent

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: In this seminar, students will develop skills of crafting clear and persuasive arguments through an iterative writing process. Further, to help them achieve these goals, they will receive timely comments on their written work.

Distributions: (D1)

ARTH 428  (F)  Anticolonial Approaches to the Arts of Ancestral Indigenous Americans

Approaches to the study of the arts of Ancestral Americans have traditionally emanated in both their conceptions and practices from settler colonialism, resulting in often hostile relations between investigators and descendant communities, the exclusion of Indigenous researchers, their sovereignties and knowledge regimes, and substantial distortions to historical understandings of the past. This course takes art histories of the Ancient Americas as its site for intervention as a means of introducing students to the oftentimes challenging labors of anticolonialism and the pursuit of the repair of past harms. Over the semester, students will learn how colonialism and its epistemologies have guided the formation of the field; how they can prioritize Indigenous and Native American ways of knowing and thinking in their understandings and research; how they can ethically conduct research without disturbing Ancestral American remains and the sovereignties of their descendants; and learn to make meaningful contributions to the projects of decolonization and repair.

Requirements/Evaluation: Weekly readings (100-200 pages); Participation -- regular attendance, contribution to in-class discussions, and demonstrated knowledge of readings (30%); One 10-12-page final essay, 3-page portions of which will be submitted for instructor feedback at monthly intervals (45%); Contribution to a collectively written class report through: 1) The co-authoring with a classmate of one report subsection of 2-3 pages (15%) and 2) Peer-review of subsections authored by other classmates (10%).

ARTH 442  (F)  Richardson, Sullivan, Wright: The Roots of American Modernism

Should a building express the facts of its program and materials--directly and without sentimentality? Or should a building be a physical manifestation of the personality and ego of its creator? These demands--one of radical objectivity, and one of radical subjectivity--seem to be mutually exclusive, yet together they form the basis for modern architecture at the start of the 20th century. The architectural lineage of Louis Sullivan, H. H. Richardson, and Frank Lloyd Wright is distinguished by the high degree of tension between the competing demands of factuality and selfhood. This seminar explores the theoretical roots of their architecture, its philosophical sources in transcendentalism, Unitarianism, German romanticism; and treating such aspects as decorative arts, architectural education and theory, and architectural autobiography.

Requirements/Evaluation: one hour presentation, 20-page paper

Prerequisites: any 100-level ARTH course or consent of instructor

Enrollment Limit: 11

Enrollment Preferences: senior Art majors and graduate students

ARTH 460  (S)  Repairing a Broken World: Intro to North African Contemporary Art  (DPE)

Cross-listings: ARTH 560 ARAB 360 RLFR 360 COMP 361 ARTH 460

Secondary Cross-listing
How do artists respond to a world in crisis? How does visual art engage violent histories, injured bodies, social injustice and ecological disaster? In this course we will explore the political and ethical concept of repair as it emerges in the work of contemporary North African visual artists. Repair is both a material and symbolic transformational practice of putting together something that is torn or broken. It is never complete, nor does it redeem a history of harm or violence. Rather repair is an invitation: a bringing of people, histories, objects, buildings, feelings and geographies into relation with one another in order to link worlds that have been splintered and separated. It is also a call to imagine other futures. North African contemporary artists have deeply engaged in this type of repair work, attending to colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity and broken transmission of memory. We will dive into the work of individual artists as well as collectives while reading theoretical texts about broken-world thinking, reparative epistemology, alternative archives, and material reparations.

**Class Format:** Section 1 is conducted entirely in French. Section 2 is conducted in English (with the option of selected reading in French). Students are welcome to sign up for either section but students taking the course for RLFR credit must register for section 1.

**Requirements/Evaluation:** For undergrads: Active participation, weekly glow posts, 5-page mid-term paper, 10-12 page final paper and presentation.
For grad students: Active participation, weekly glow posts, 5-page mid-term paper, and 20-page final paper and presentation.

**Prerequisites:** For RLFR students, any RLFR 200-level course or above, or by permission of instructor.

**Enrollment Limit:** 18/sec

**Enrollment Preferences:** If over-enrolled, preference will be given to RLFR, ARAB, ARTH and COMP majors, and only 4 spots will be offered to Grad Art students.

**ARTH 472 (F) Timelines**

"Art" is really time-consuming--to make, to view, to use, to understand. We enshrine it, excavate it, curate it, deploy it and sometimes we deliberately destroy it. We are always telling stories about the stuff. We seem to think that we control these many fabled things, though they meddle endlessly in the spaces between self and other, human and divine. Great art can be inspiring, enabling people to transcend time, or it can be traumatizing, making time stop altogether. Or both! To explore such powers, we will begin in the 19th century, when commonplace notions of past and present wobbled seriously with the invention of photography and the avid pursuit of archaeology. Thereafter, we will concentrate on the period between 1870 and 1930, but also operate across time and space. There will be no single story-line, but rather a series of case studies, ranging from iconic paintings and sacred spaces to photojournalism. Along the way, creativity and iconoclasm will be recurring themes. Choose this class if you are curious about the agency and power that art wields in our lives.

**Requirements/Evaluation:** Regular attendance and active class participation, Glow Posts, term project.

**ARTH 494 (S) Thesis Seminar**
To graduate with honors in art history, students are to enroll in the Senior Honors Seminar during the Spring semester of their senior year, where they will develop an original research paper based on prior research. Under the guidance of the instructor, students will present and defend their own work in both written and oral form, as well as respond to, and critique, the work of their peers. As students work toward transforming their existing paper into an honors' thesis, they will also be trained in skills necessary to analyze an argument effectively, and strategies of constructive critique.

Requirements/Evaluation: once in the seminar, students will revise, refine and expand on previous research and produce a paper of approximately 25 pages and present a shortened version of the paper to the faculty and public at the Williams College Museum of Art

Prerequisites: for requirements of entry into the course, please see "The Degree with Honors in Art, Art History"

Enrollment Limit: 8
Enrollment Preferences: permission of instructor required
Expected Class Size: 6
Grading: no pass/fail option, no fifth course option

ARTH 500  (F)  Clark Visiting Professor Seminar: The Image Multiplied: The Printed Image in Early Modern Europe
Cross-listings: ARTH 500 ARTH 400
Primary Cross-listing
The technology of mechanically reproducing complex visual images on paper, a development of fifteenth-century Europe, transformed the early modern world no less than the emergence of digital media has transformed our own. Techniques of woodcut, engraving and etching quickly became important media for innovation within the fine arts. At the same time, they became equally important as sources for devotional imagery, for disseminating copies of other artworks, for the expansion of knowledge through scientific illustration, and for the effective broadcasting of political and religious messages during centuries of extraordinary political and religious upheaval. In this seminar we will investigate the cultural history of printed images in Europe from the time of their emergence in the fifteenth century through the mid-eighteenth century, focusing on the changing cultural circumstances of their production and reception. We will consider the work of major printmakers such as Mantegna, Dürrer, Goltzius, Rembrandt, Callot, Hogarth, and Piranesi, but also that of many lesser-known (and anonymous) artists.

Requirements/Evaluation: writing assignments, participation
Prerequisites: none
Enrollment Limit: 16

Enrollment Preferences: graduate students get preference; places for 8 undergraduate and 8 graduate students assured

Expected Class Size: 16

ARTH 501  (S)  Museums: History and Practice

Cross-listings: LEAD 301 ARTH 501 ARTH 401

Primary Cross-listing

Art museums express the cultural, aesthetic and social ideals of their period of formation and many of those ideals are embedded in the values and practices of institutions today. Comparing institutions past and present internationally, seminar participants will envision the art museum’s future while addressing programmatic and organizational challenges at this moment of participatory civic engagement and social, political unrest. With growing skepticism of institutional collecting practices and authoritative narratives, art museums, especially those in the United States, face internal and external pressure to “decolonize” as they attempt to alter their canon. There is pressure, as well, to embrace a more active role in climate and social justice movements. It is a time marked by calls for compensation transparency, participatory decision making, staff and trustee diversity, and greater scrutiny of funders. The seminar will consider this environment against past and current norms of governance, management and curatorial policies and practices. We will examine the traditional role of architecture and installation in interpretation and experience, prevailing and proposed guidelines in the accessioning and deaccessioning of works of art and both internal and external attitudes towards the repatriation and restitution of cultural property. Studying museums ranging in size and type from the “encyclopedic” to newly established contemporary arts institutions and alternative spaces, seminar participants will hear how museum leaders are dealing with challenges to current practice through weekly zoom sessions. Participants will also ponder how future museums might strive to balance the institution’s traditional scholarly and artistic role with new civic and social responsibilities, mindful of financial stability in a market-driven, metric-conscious, not-for-profit environment; doing so while addressing, in proposed program and practice, the demands on museums emanating from a more ethically insistent internal and external world.

Requirements/Evaluation: oral presentations and discussion in class and one seminar paper (with class presentation) at the end of the semester

Prerequisites: undergraduates should email michael.conforti@williams.edu to schedule a discussion before registering for the course

Enrollment Limit: 10

ARTH 503  (S)  Clark Visiting Professor Seminar: Transatlantic Landscape

Cross-listings: ARTH 403 ARTH 503

Primary Cross-listing
Landscape and the American encounter are inextricably bound together. Through the conventions of landscape representation and cartography developed in the sixteenth- and seventeenth-centuries, previously unknown regions of the globe were made legible to European audiences. What were these conventions? What aesthetic, social, and political factors contributed to their development? And with what success were they carried across the Atlantic? If European landscape was an agent of empire, in what ways was it challenged and even transformed by encounters with people whose ways of experiencing and thinking with the land did not conform to its conventions? This seminar will explore such questions by investigating the historiography and theory of landscape, and by looking closely at a number of case studies in transatlantic landscape, including the sixteenth-century mapping of New Spain, the Dutch representation of Brazil in the seventeenth century, Caribbean landscapes, the representation of the arctic, early archaeological campaigns in North America, and the surveying and representation of the western United States in the nineteenth century.

Requirements/Evaluation: research paper, class presentations

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: second-year graduate students, then first-year graduate students, then advanced undergraduate students; places for 8 undergraduate and 8 graduate students assured

ARTH 504 (F) Proseminar in Research and Method

In this graduate Proseminar on Research and Method, we will read a number of texts that form the foundation of art history as a discipline, including the writings of Plato, Panofsky, Lessing, Heidegger, Wölflin, and Barthes (among others). We will study these works against the grain, considering how art history is currently transforming under the fields of ecology, disability studies, queer theory, and radical black feminism. Students will work closely with the collections of the Clark to theorize how absences are integral to institutional histories, and we will think about how we can, as historians, responsibly address voices that have been removed from the canons of art history. This course considers not only central writings of art historical methodology but also the limits for decolonizing art history and the museum, as we will examine how the formation of the discipline depended upon absenting critical perspectives and voices.

Requirements/Evaluation: class participation, writing assignments

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: limited to and required of first-year students in the Graduate Program in the History of Art

ARTH 506 (S) Expository Writing Workshop

This writing seminar for graduate students in Art History will afford intensive full group discussions of writing skills and substantial one-on-one writing consultations. Group discussions will center on three kinds of texts: Writing about writing, published writing in the discipline of Art History, and student writing in progress. In six such discussions we will improve our vocabulary and method for discussing writing; we will learn to build better and more sophisticated sentences, paragraphs, and arguments; and we will practice anticipatory reading and writing in order to strengthen our control of both
voice and structure. Each discussion will be supported with both exempla and exercises, and our watchword in all cases will be "revision." In one-on-one consultations (3-4 per person), I will offer tailored critique of each student's work, setting aside time as needed to troubleshoot sentences, paragraphs, or arguments together.

Requirements/Evaluation: class participation, participation in consultation meetings, writing assignments,

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: limited to and required of first-year students in the Graduate Program in the History of Art

ARTH 508  (S)  Art and Conservation: An Inquiry into History, Methods, and Materials

In this course students will learn to recognize the materials present in cultural heritage collections, understand the history of artist's methods and techniques, and hone their observation and examination skills when working with material culture. Students will form a basis in art conservation and condition assessment vocabulary and will exercise handling and examination skills for a variety of materials and artworks present during each session. Those who are planning careers involving work with cultural materials will explore cultural heritage through the lens of the art conservator and form a broader awareness of the ethics and procedures of conservation and preservation. An understanding of the vulnerabilities and condition issues of cultural materials and how to care for them will be developed as an impactful, practical resource for future careers in cultural heritage. A multi-disciplinary group of teachers from the staff at the Williamstown Art Conservation Center (WACC) will conduct lectures, practicums, discussions on conservation research literature and visits to nearby art institutions. Sessions are held at The WACC in the Lunder Center at Stone Hill on the Clark Art Institute campus. Students receive a syllabus with session outlines and required reading lists. Required readings are available via GLOW and on reserve at the Clark Library. Three exams will be given throughout the course and attendance is required at all sessions in lieu of a final exam (each weighted at 25% of the final grade).

Class Format: slide presentations, lectures, gallery talks, hands-on opportunities, technical examinations, and group discussions

Requirements/Evaluation: attendance is required at all sessions; the course grade is based on exams given throughout the semester; there is no final exam
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: Graduate Program students, then students in art history or studio art

ARTH 511  (F)  Interspecies beings: demigods and monsters in art and culture, ancient to modern
Cross-listings: ARTH 511 CLAS 436
Primary Cross-listing
Horse-men, cat-women, bull-men, mermaids, snake-people: interspecies creatures are everywhere in ancient Greek and Roman art and poetry. Embodied in satyrs, sphinxes, centaurs, nymphs, and other part-human, part-animal beings is an alternative evolutionary and cultural history. In it, humans and animals live as one. There is no distinction between nature and culture. Male and female are equal. The industrial revolution never happens. This course traces the history of interspecies beings from their origin in ancient Greek art and poetry until today. Three points are important: 1) the relationship between the imagery and ancient political theory about "primitive" life; 2) evolving conceptions of biology and the environment, and 3) the role played by interspecies beings in the conceptualization of what is possible in art. The first half of the course examines the origins and character of interspecies beings in works of ancient art such as the Parthenon, and in ancient writers including Hesiod and Ovid. We examine relevant religious practices, materialist conceptions of nature, and biological theories of speciation, in Empedokles, On nature, Euripides’ Bakchai, Plato’s Phaidros, and Lucretius’ De rerum natura. The second half of the course investigates the survival of classical monsters in the work of early-modern artists such as Botticelli, Michelangelo, Titian, and Dürer, and the rediscovery of ancient materialist theory. We consider the role played by interspecies beings in the formation of late modernism in art and literature. Key texts include Rousseau and Hobbes, Nietzsche’s Birth of Tragedy, Mallarmé’s "L’Apres midi d’une faun,” and Stoppard’s Arcadia. Problems include the relationship between nymphs and sex-workers in Manet, the meaning of the Minotaur in Picasso, and the interest in interspecies beings in the work of women surrealists such as Leonora Carrington. We conclude with contemporary popular culture such as the Hunger Games.

Class Format: Lecture and discussion.
Requirements/Evaluation: The requirements of the course include: attendance and participation in discussion; preparing summaries/analyses of
Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Priority goes to graduate students in art history. If space is available, senior art-history majors, classics majors, and environmental studies majors may enroll.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: This course will satisfy the seminar requirement in art history.

ARTH 513 (S) Contours of Abstraction in Modern and Contemporary Art

Abstraction, be it gestural or geometrical, was a protagonist of global modernisms and continues to be a powerful visual language in contemporary art. The term "abstraction" may first appear straightforward, but its associations are quite complex: in varying historical contexts, abstraction has signaled formalist rupture, revolutionary politics, appropriation, as well as racial, feminist, and queer critique. We will delve deeply into abstraction in global modern and contemporary art through myriad primary documents and theoretical frameworks so as to revise and expand its canonical contours and cartographies.

Requirements/Evaluation: Weekly presentations, response papers, final 20-page research paper

Prerequisites: Students at the undergraduate level must be seniors and Art History majors

Enrollment Limit: 12

Enrollment Preferences: Art History MA students and undergraduate Art History seniors

ARTH 521 (F) Islam and the Image (DPE) (WS)

Cross-listings: ARTH 521 REL 420

Primary Cross-listing

This seminar responds to a recent incident at a US liberal arts university where a professor was sacked for showing images of Prophet Muhammad as part of her section on Islamic art. Why is image-making so hotly contested in Islam? What is the history of figural depictions in this tradition? The seminar explores artworks made for Muslim patrons from the medieval period to the modern era, considering how paintings produced for Muslim audiences can be situated within the frameworks of "Islamic art," a loaded historiographical term that has been questioned in recent times. The seminar also addresses some of the major problems that continue to haunt art scholarship in the field. For most of its history, the academic study of Islamic art has seldom considered contemporaneous literary voices that shed light on the motivations behind artworks. Furthermore, the historiography, deeply entrenched in its colonial and orientalist roots, has largely isolated images from their supporting texts--a curious oversight in light of the fact that painting in Muslim lands has historically been primarily an art of the book. These biases have affected the way museums have collected, displayed and interpreted paintings. For example, Western museums continue to place figural depictions made for books and albums in
"South Asian" collections while textual manuscripts and calligraphic specimens made for the same Muslim audiences--even at times bound in the same albums--are categorized as "Islamic art." What does this isolation of text from image imply about prevailing views of Islamic art? To better understand the cultural, historical and religious context surrounding artworks students will read primary literature ranging from autobiography to devotional poetry, often written by the very patrons and subjects of the paintings to be discussed.

**Requirements/Evaluation:** class participation, short weekly writing assignments, final essay project

**Prerequisites:** Undergraduates wishing to enroll must have taken at least one art history course or one religious studies course. Undergraduates must email indicating their interest in the course prior to enrolling.

**Enrollment Limit:** 19

**Enrollment Preferences:** MA students, then advanced undergraduates

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

**ARTH 522 (F) Festivities in the Early Modern World**

**Cross-listings:** HIST 422 ARTH 522

**Primary Cross-listing**

In 1860, Jacob Burckhardt put festivals at the center of his influential study of Renaissance Italy. In the century and a half since, scholars have enriched and deepened our understanding of festivities across early modern Europe and the world during the era of early global interaction (ca. 1400—1800). In this seminar we will seek to establish why festivities were so intrinsic to early modern culture, and what work they did. To what extent was performing a form of knowledge? How did festivity mediate early global interaction? We will consider, moreover, the many ways in which ephemeral events were commemorated in paintings and prints, and to what extent historians can recapture the early modern festivity today. Beyond Europe, we will investigate how the festival cultures of the Americas, of Africa, and of Asia interacted with European festival traditions, whether in Goa, Pernambuco, or Mexico City. Ultimately, we will ask: what might an early modern cultural history focused on festivities reveal? We will approach this history through a combination of primary materials drawn from the holdings of Williams College’s Chapin Library and secondary readings, which will range from classics in the field to the most recent scholarship. Students will take turns delivering presentations on preselected objects of the week. By semester’s end each student will complete a 15-to-20-page research paper on a festival of their choosing.

**Requirements/Evaluation:** Engaged participation in discussions; in-class presentation; proposal and bibliography; research paper.

**Prerequisites:** For undergraduates, at least two prior courses in or related to History or Art History.

**Enrollment Limit:** 16

**Enrollment Preferences:** Priority for Graduate Art students. Four seats are reserved for undergraduates, with preference given to junior and senior majors in Art History and History. Undergraduates should email a brief statement of interest to ab24@williams.edu.

**Expected Class Size:** 16

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1)

ARTH 525  (F)  Japanese Art and Visual Culture: Private/Public/Pop  (WS)

Cross-listings:  ARTH 525  COMP 324  ARTH 324  ASIA 324

Secondary Cross-listing

This tutorial offers a survey of Japanese art and visual culture across time and media, with particular attention to two areas: the links between different artistic media, and the relationship between art and its audience. We'll begin with early court diaries and related scroll paintings as examples of "private" art. Then we'll move through progressively more public visual media of the 17th through 21st centuries: Kanô screen painting; nô, kabuki, and puppet theater; premodern architecture; popular woodblock prints; turn-of-the-century photography; and finally some examples of contemporary popular culture like comics, animation, and/or film. We will focus on the specificities of each medium while simultaneously developing formal visual reading skills that can work across different media.

Class Format: Students will meet with the instructor in pairs or trios for 75 minutes each week. This tutorial is offered simultaneously at the 300 level for undergraduates and at the 500 level for graduate students: graduate students will be paired with other graduate students and undergraduates with undergraduates.

Requirements/Evaluation: For undergraduates: weekly participation, 5 short written assignments in alternate weeks (ranging from 1 to 5 pages), and several 1-page peer critiques. For graduate students: weekly participation and 3-4 short written exercises that build toward a final 15-page research paper.

Prerequisites: No previous knowledge of Japanese art or culture is required. Students with similar preparation and interests will be paired with one another.

Enrollment Limit: 10

Enrollment Preferences: Graduate Art students, followed by undergraduates majoring in Art History or Comparative Literature.

Expected Class Size: 10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D1)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTH 525(D1)  COMP 324(D1)  ARTH 324(D1)  ASIA 324(D1)

Writing Skills Notes: Students will write several regularly spaced papers that build on one another by tackling similar problems from different angles. Students will receive detailed feedback from the instructor on each paper, addressing argument, organization, and style, as well as peer feedback. (See requirements for details about the number and type of assignments.)

ARTH 527  (F)  Acquiring Art: Selecting and Purchasing Objects For WCMA

Cross-listings:  ECON 227  ARTH 527  ARTH 327

Secondary Cross-listing

How do museums acquire art? Factors considered in selecting objects include: the museum's existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object's history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.

Requirements/Evaluation:  Three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student
will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy for acquisition.

**Prerequisites:** ECON 110 or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** Senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**ARTH 531 (S) 19th-Century American Performance and Popular Culture**

This course will study a wide variety of performances and emerging popular culture in 19th-century America, many of which, although not unique to the United State, reflect the U.S. back to itself in complex ways. Topics will include blackface minstrelsy, circuses and humbugs, male impersonators and burlesque, ethnic caricature, allegorical paintings on tour, vast panorama painting, anti-slavery imagery, late 19th-century theatre and spectacle, wild west shows as well as other mythologizing of indigenous Americans and the American landscape, the birth of the American art museum, and representations of significant moments of popular resistance, from the Lakota to the Great Railroad Strike of 1877. The central questions animating this course will be around the nature of performance and the popular. What can these two concepts tell us about the nature of art?

**Requirements/Evaluation:** Reading/writing assignments and class participation

**Prerequisites:** None

**Enrollment Limit:** 18

**Enrollment Preferences:** Grad students, undergrads must have approval from Professor Schmenner

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**ARTH 532 (F) Creative Life: The Visual Economy of Work**

This course is a seminar on life and work focusing on methodologies of production--art, creative writing, history, theory, and criticism. With an initial focus on the pivotal period from the invention of photography until the onset of World War II, the course will examine the economy of work within modern visual culture. What were the considerations at stake in capturing the "facts" of industrial production? We will examine historical definitions of work, and practices and activities from life that have typically qualified or have the potential to qualify as work (in addition to critiques of these equivalencies). The latter half of the course will be driven by considerations of these themes in relation to student and workers movements of 1968, and contemporary forms of globalization and pluralist subjectivities. One related concern will be the consideration of intersubjective relations--professional and personal partnerships, friendships, and networks--which not only influence the trajectory of one's life, but also the research one chooses to undertake. With the awareness that a range of drives and investments inhabit one's production, participants will be asked to reflect upon their own working practices as a means of critically engaging the affective relations governing artistic and intellectual labor. There will be an emphasis on cross-disciplinary ideas and influences--ranging from art history, film and media studies, the history of science, literature, and political history as a means of integrating theoretical approaches with a range of materials, including photography, cinema, illustrated magazines, advertisements, archives, world exhibitions, and product showrooms.
**Requirements/Evaluation:** Active discussion participation; rough draft (mid semester) and final research paper (20-25 pages)

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** MA students, then undergraduate art history majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**Not offered current academic year**

**ARTH 537**  (F)  HIV + AIDS in Film and Video  (DPE)  (WS)

Spanning activist works, experimental film, Hollywood dramas and documentary, this course examines the role of moving images in the global AIDS crisis, its aftermath, and its ongoing aftershocks. The AIDS crisis of the 1980s and 1990s was, in the words of Larry Kramer, a ‘plague’ of epic proportions, with an entire generation obliterated before it could reach maturity. And yet, the plague years also spawned a remarkable amount of creative and activist image-making aimed at fighting, mourning, and grappling with AIDS. Now, we find ourselves in another pivotal moment: while the past decade has provoked a new wave of AIDS historiography, the COVID-19 pandemic has caused AIDS to reverberate with even greater force. Together, we will ask difficult and probing questions about this phenomenon called the ‘AIDS epidemic,’ examining the role of art in frontline activism, the ethics of AIDS historiography, mainstream visions of the AIDS body, and the need for a diversity of AIDS narratives. This seminar-style course will combine weekly screenings with readings, short writing assignments, student-led discussion, and a final research project of the student’s design. In order to facilitate robust discussions and maximize student and faculty safety, the majority of this course will occur online. It will contain some in-person experiences when possible.

**Class Format:** This course will be largely conducted online, in order to facilitate robust discussions and maximize student and faculty safety. It will contain some in-person experiences when possible.

**Requirements/Evaluation:** Students will be evaluated according to the following criteria: weekly attendance, readings and participation in seminar discussion; leading class discussion once during the semester; 3 short response papers; one paper of 20+ pages of original student research.

**Prerequisites:** MA student, Art History or Studio Art major, or instructor permission

**Enrollment Limit:** 10

**Enrollment Preferences:** MA students first, followed by Art History and Studio Art majors

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)  (DPE)  (WS)

**Writing Skills Notes:** Students will be required to conduct regular writing assignments which will culminate in a graduate-level research paper.

**Difference, Power, and Equity Notes:** This course explores an epidemic that had devastating effects on LGBTQ+ people, and has disproportionately affected communities of color. Questions of difference, power, and equity are absolutely central to the course.

**Attributes:** ARTH post-1800 Courses

**Not offered current academic year**

**ARTH 538**  (F)  Realms of Earth and Sky: Indian Painting, ca. 600-1857  (WS)

On the basis of technique, Indian painting forms a continuum from the beginning of the first millennium down to the mid-nineteenth century: an outline in ink filled with flat, opaque colors which are burnished between each layer to give them opacity. In its media, its subject matter, regional variation, range of patronage, and artistic virtuosity, it displays startling diversity. From the northern Himalayan hills to Mysore in the south, artists, often working in family workshops for royalty, priests and wealthy merchants, have adorned caves and temples, illustrated books, and created lavish albums with themes ranging from the sacred to the secular. The study of Indian painting itself is a vast, evolving body of literature that continues to oscillate between discussions of artistic style and a concentration on content and context. The aim of this seminar is twofold: to outline the development of Indian painting historically; and to understand the political, social and religious circumstances that produced some of the greatest masterworks in Indian art. How was Indian painting used? Who were the patrons? How does the art form reflect the particular cultural values of its time? As an analytic framework, the seminar will consider Indian miniature painting both in light of primary literary sources as well as through current scholarship.

**Requirements/Evaluation:** Class participation. Short weekly responses. Final 15- to 20-page paper to be developed with the instructor throughout
the semester.

**Prerequisites:** none, open to all students

**Enrollment Limit:** 19

**Enrollment Preferences:** graduate students, undergraduate art majors

**Expected Class Size:** 8

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Students will submit short written assignments weekly. They will also be required to submit a final paper which they will develop throughout the semester. Students will receive comments and suggestions from the instructor on their writing skills.

Not offered current academic year

**ARTH 545  Architectural Theory in Crisis**

Why do buildings need words, or do they? For most of the world and most of history, buildings are made without the benefit of formal architectural thought. But at various times, ideas about the aesthetics of buildings, their cultural and philosophical meaning, and their underlying principles, have been matters of great public interest. And architectural theory—in the form of treatises, manifestos, and critical reviews—has exercised an enormous effect on building. This theory can be prescriptive, presenting categorical rules for making good buildings; it can be descriptive, looking at how buildings perform in the real world; and it can be radical, seeking to change the essence and definition of architecture. Theory seemed very important to architects twenty years ago, but that is not the case today. Why? We will investigate. Students will give short presentations on key theorists, such as Vitruvius, Alberti, Palladio, Laugier, Boulée, A. W. N. Pugin, Viollet-le-Duc, Gottfried Semper, Le Corbusier, and Robert Venturi. The semester will conclude with a 20-page seminar paper, based on comments and discussion following a classroom presentation.

**Class Format:** presentations

**Requirements/Evaluation:** several short presentations and a final 30-minute presentation, to be followed by a 20-page paper

**Prerequisites:** permission of instructor

**Enrollment Limit:** 11

**Enrollment Preferences:** Graduate students

**Expected Class Size:** 10

**Grading:**

**Distributions:** (D1)

Not offered current academic year

**ARTH 547  (F)  The Studio, The Bedroom, & the Tomb: Artists and Artistic Biographies in the 19th Century&Beyond**

How was the vocation of the artist thematized in the European cultural imagination in the Romantic age and its aftermath? Even more, how did artists themselves articulate, experience, and reproduce that sense of vocation?—What were its mythologies and poetics, at once as they were circulated in visual culture, but also as they were lived, experienced, and reproduced by artists themselves? We will explore such question across three historically, psychologically, and tropologically configured “sites”: the artist’s studio, the artist’s desire, and the artist’s death. Readings by Freud, Balzac, Kris and Kurtz, along with scholarship largely centered on the visual arts of the 18th and 19th centuries. With instructor permission, students may undertake research projects in any field of the history of art.

**Requirements/Evaluation:** presentations, research paper

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** graduate students, then advanced Art History major undergrads

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

Not offered current academic year
**ARTh 552 (F) Art and Enlightenment in Europe**

**Cross-listings:** ARTH 552 ARTH 242

**Secondary Cross-listing**

This lecture course traces the emergence of new modes of art- and image-making during two momentous centuries of European history that established the paradoxical foundations of our modern world. In this period, modern democracy was founded and determined by exploitative labor, the extraction of natural resources, and the rise of the trans-Atlantic slave trade. Over two centuries from the founding of the French Academy in 1648 to the 1839 invention of photography, this course traces these tensions in art and intellectual thought, examining beauty and the sublime, rationality and madness, personhood and enslavement, natural history and extraction, democracy and tyranny. Often defined in terms of the “Enlightenment,” this intellectual and artistic period engaged with freedom of religious thought, scientific experiment, and a belief that humanity was guided by reason and rationality. Yet these same discourses also laid the foundation for the invention of race, nationalism, and the expansion of European colonialism. Isolating a series of pivotal moments and emblematic figures in visual culture of this period, this course asks students to consider how art was implicated in Enlightenment, and, in turn, how Enlightenment was implicated in both newly liberatory and newly oppressive concepts of subjectivity and personhood. Particular emphasis will be placed on the history of science, and, relatedly, on the increasing global circulation of ideas, people, and goods. Artists in our purview include well-known figures like Velázquez, Rembrandt, Watteau, Hogarth, Goya, and Blake, as well as makers until recently left out of the art-historical canon, such as the Frankfurt-born botanical illustrator Maria Sibylla Merian, the Polynesian navigator and draftsman Tupaia, and the Guadeloupean neoclassical painter Guillaume Guillon-Lethière, the subject of a major upcoming exhibition at the Clark Art Institute. Designed for students with no prior experience studying art history, the course will work directly from objects in local collections, prioritizing methods of close looking and formal analysis. At the same time, the questions and methods of our inquiry will be fundamentally interdisciplinary. Readings will emphasize primary sources and recent scholarship. A separate discussion section will be offered for MA students.

**Requirements/Evaluation:** midterm exam; final exam; visual analysis paper (3 pages); final paper (10 pages)

**Prerequisites:** none

**Enrollment Limit:** 50

**Enrollment Preferences:** art history majors

**Expected Class Size:** 50

**Grading:** yes pass/fail option, yes fifth course option

**Attributes:** ARTH pre-1800 Courses

**Not offered current academic year**

**ARTh 553 (F) New Ecologies in Contemporary Art**

This seminar will consider a range of current artistic approaches to environmental questions, especially through the relational, systemic terms implied by ecology. As scholars have argued, where "nature" connotes that which is monolithic, ahistorical, and apart from humans, ecology reveals a situated and specific web of relationships, interdependencies, and power in which we are all implicated. Our seminar will pay particular attention to intersectional practices that acknowledge the ways extraction, exploitation, and dispossession have produced the environmental crises of the present, which also affect the most vulnerable and least responsible—both human and nonhuman—with greatest force. In addition to studying the work of emerging and established artists, we will read texts by the academics and activists with whom they are in dialogue, and welcome some of them as guests to our class. This seminar anticipates a group show on the subject at the Clark in summer 2023.

**Requirements/Evaluation:** seminar presentations; research paper (approximately 20pp)

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** MA students first, then art history majors; By application if over-enrolled

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**Attributes:** ARTH post-1800 Courses

**Not offered current academic year**
ARTh 558  (S)  Circa 1850: Artistic Currents and Cross-Currents

Although the history of nineteenth-century European art has often been narrated as a succession of "sms," the notion of discrete artistic movements following one upon the other is of course highly misleading. Despite common perceptions of Realism as the prevailing force at mid-century, many contradictory impulses were simultaneously at work. The Romantic strain in visual art continued, though sometimes in sublimated form, and historicizing and avant-garde perspectives alike jockeyed for influence in art criticism, sales rooms, and exhibition venues. Abetting this collision of styles was a proliferation of new media in visual culture more broadly. Focusing on European and American examples from the middle decades of the nineteenth century, this course addresses the emergence of new tendencies in art and the persistence or revival of old ones. We will explore a variety of topics, including the invention of photography and its impact on other image-making techniques; the opening of Japan and the vogue for Japonisme; medieval nostalgia in the face of rampant Haussmannization; and the role of tradition in vanguard art. On the American side, we will consider printmaking and photography as tools of documentation and self-fashioning during the Civil War era. This course will take place in the Manton Study Center for Works on Paper. Each session will engage directly with works from the Clark's collection, to be discussed and analyzed in conjunction with critical and theoretical readings.

Requirements/Evaluation: Reading/writing assignments, participation.

Prerequisites: None

Enrollment Limit: 16

Enrollment Preferences: Graduate students first. Undergraduates must receive permission from the instructor.

ARTh 559  (F)  Photographing City Life: Diane Arbus/James Van Der Zee

Diane Arbus and James Vander Zee in Manhattan. In this seminar we will discuss two photographers of city life: Diane Arbus (1923--1971) and James Van Der Zee (1886--1983). So doing, we will also observe how life in New York changed during their years of great productivity. In the first part of the course, "Diane Arbus in Manhattan," we will talk about Arbus' relationship to New York--the city of her birth. For most of her career, Arbus worked in Manhattan; indeed, one could think of the city as another character in her work. Arbus' relationship to myth--to storytelling--was profound. A great reader throughout her life, she was drawn to those writers who saw cities as very individualized places. In addition to looking at Arbus' photographs of life in Manhattan in the nineteen fifties, sixties, and in 1970, we will read her published letters, and those authors who inspired her with their artistry, and fascination with myth, including Borges, and Kafka. In the second part of the course, "James Van Der Zee and the Black Village," we will discuss the great Black photographer whose archives were just purchased by the Metropolitan Museum of Art (where Arbus' archives are as well). Born in Lenox, Massachusetts, Van Der Zee settled in Harlem in 1916; there, he opened a photography studio where he became known for his portraits of Black life as it was lived uptown. Admired by Arbus and others, Van Der Zee's interest in and commitment to his community extended to all aspects of Harlem life, including death. To support our discussions of Van Der Zee's Black village, we will read modernist classics, including Jean Toomer's "Cane," and Toni Morrison's "Jazz" that deal specifically with village life. Please note that seminar meetings will be held biweekly on 9/8, 9/29, 10/13, 10/20, 11/3, 11/17. The seminar will include several mandatory viewing excursions outside Williamstown. The dates of these excursions are TBD, but will be restricted to Fridays or weekends. Professor Als will hold office hours following the seminar at hours TBD. Application may apply.

How do artists respond to a world in crisis? How does visual art engage violent histories, injured bodies, social injustice and ecological disaster? In this course we will explore the political and ethical concept of repair as it emerges in the work of contemporary North African visual artists. Repair is both a material and symbolic transformational practice of putting together something that is torn or broken. It is never complete, nor does it redeem a history of harm or violence. Rather repair is an invitation: a bringing of people, histories, objects, buildings, feelings and geographies into relation with one another in order to link worlds that have been splintered and separated. It is also a call to imagine other futures. North African contemporary artists have deeply engaged in this type of repair work, attending to colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity and broken transmission of memory. We will dive into the work of individual artists as well as collectives while reading theoretical texts about broken-world thinking, reparative epistemology, alternative archives, and material reparations.  

Class Format: Section 1 is conducted entirely in French. Section 2 is conducted in English (with the option of selected reading in French). Students are welcome to sign up for either section but students taking the course for RLFR credit must register for section 1.  

Requirements/Evaluation: For undergrads: Active participation, weekly glow posts, 5-page mid-term paper, 10-12 page final paper and presentation.  
For grad students: Active participation, weekly glow posts, 5-page mid-term paper, and 20-page final paper and presentation.  

Prerequisites: For RLFR students, any RLFR 200-level course or above, or by permission of instructor.  

Enrollment Limit: 18/sec  

Enrollment Preferences: If over-enrolled, preference will be given to RLFR, ARAB, ARTH and COMP majors, and only 4 spots will be offered to Grad Art students.  

Expected Class Size: 15/sec  

Grading: yes pass/fail option, yes fifth course option  

Distributions: (D1)  (DPE)  
This course is cross-listed and the prefixes carry the following divisional credit:  
ARTH 560(D1) ARAB 360(D1) RLFR 360(D1) COMP 361(D1) ARTH 460(D1)  

Difference, Power, and Equity Notes: This course critically examines art work that engages colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity.  

Not offered current academic year

ARTH 561  (S)  Land, Memory, Materiality: Histories and Futures of Indigenous North American Arts  (DPE)  

Cross-listings: HIST 454 ARTH 561  

Primary Cross-listing  
This course engages Indigenous North American traditions of creative expression, remembrance, and representation in historical, contemporary, and future-facing ways. Drawing upon diverse Native American and First Nations theories and practices, it ranges widely across the continent to consider Indigenous arts and material culture within specific cultural, socioeconomic, and political contexts. Part of the course is grounded in the Native Northeast, including the Indigenous homelands of the Stockbridge-Munsee Mohican Community in which the Graduate Art Program and Williams College are situated. Other units will focus on continuities and transformations in artistic and maker-traditions within and across specific Indigenous nations and communities. The course is especially interested in connections between past and present, and the innovative ways Indigenous artists, makers, and knowledge-keepers have reckoned with what has come before, while also mapping meaningful future pathways. Topics will include repatriation and community-led restorative efforts to bring home ancestors and important heritage items "collected" over the centuries following 1492; concepts and practices of cultural, intellectual, visual, and political sovereignty; decolonizing museums; the complex dynamics of collaboration; Indigenous, African-American, and Afro-Indigenous artistic connections and solidarities; and Indigenous challenges to Eurocentric and settler colonial approaches to preservation, interpretation, and classification. Seminar members will develop familiarity with methods and ethics grounded in Native American and Indigenous Studies, and with new scholarship by leading and emerging critics and creators.  

Class Format: The course will feature seminar discussions as well as local trips to museums, libraries, and archives with pertinent collections and exhibitions.
**Requirements/Evaluation:** Engaged participation in discussions; in-class presentations; short writing assignments in preparation for final project; final original research and interpretive project, with presentation to seminar.

**Prerequisites:** For undergraduates, at least two prior courses in or related to History, Art History, Native American and Indigenous Studies, and/or Museum Studies.

**Enrollment Limit:** 16

**Enrollment Preferences:** Priority for Graduate Art students. Four seats are reserved for undergraduates, with preference to junior and senior majors in Art History and History. Undergraduates should email a brief statement of interest to cd10@williams.edu.

**Expected Class Size:** 16

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 454(D1) ARTH 561(D1)

**Difference, Power, and Equity Notes:** The course centers theories, experiences, and expressions from Native American/Indigenous communities, scholars, and artists/makers, while engaging foundational and new work in Native American and Indigenous Studies (NAIS). The course also provides students with critical tools for reckoning with settler colonialism and its historical as well as enduring impacts in Indigenous contexts; and with race, ethnicity, sovereignty, and tribal nationhood as key interpretive frames.

**Attributes:** HIST Group F Electives - U.S. + Canada

Not offered current academic year

**ARTH 563  (F)(S)  Contemporary Curatorial Workshop**

Bi-weekly seminar for graduate art history students to engage in discourse around contemporary curatorial practice with professionals in the field. Guest curators discuss their work and methodology and students enrolled in the course who are working on curatorial projects have the opportunity to workshop their ideas with their peers and guests. Under the direction of the chairs, students will participate in class discussions, present projects, host local and visiting curators, travel to visit exhibitions regionally as the schedule allows, and explore key topics in modern and contemporary art and curatorial practice.

**Class Format:** workshop, meets all year

**Requirements/Evaluation:** Attendance and participation

**Prerequisites:** Graduate art history

**Enrollment Limit:** 25

**Enrollment Preferences:** Open to graduate students in art history, and undergraduates with prior approval of the instructors and as space allows.

**Expected Class Size:** 25

**Grading:** pass/fail option only

**Distributions:** (D1)

**Attributes:** ARTH post-1800 Courses

**ARTH 565  (F)  Sonic Ecologies: Queer Listening, Orientations, and Objects**

This seminar considers sound, the aural imagination, and practices of listening in visual art and time-based media. Focusing on work produced in the 20th and 21st centuries, we will explore theoretical, media, aesthetic, and reception issues through an intersectional lens. While we will focus on queer theory and related artworks and art historical accounts, the course will also draw heavily on recent writings on and artistic practices that take up other related aspects of "ecology" broadly understood: interspecies relationality, the environment, the climate crisis, and scholarship grounded in the specificity of critical race theory, Latinx, Caribbean, and diasporic studies. Readings will tend toward the theoretical—from Sara Ahmed and José Esteban Muñoz to Tina Campt and Ren Ellis Neyra, among many others—but will be accompanied by art historical accounts and each class meeting
will be grounded by in-depth discussion of several specific works of art. When resonant, we will take advantage of access to relevant exhibitions, performances, or events at the Clark, Williams College Museum of Art, MASS MoCA, or Bennington College. The course will prioritize student-facilitated discussion, and student work will be focused on producing a substantial research paper (with an option to produce a hybrid research/creative project, developed in conversation with the instructor). Undergraduates welcome with permission of the course instructor.

Requirements/Evaluation: Reading and writing requirements, class participation

Prerequisites: None

Enrollment Limit: 18

Enrollment Preferences: Grad students first, then music majors and art majors, but undergraduates must seek approval from Professor Woolsey

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Attributes: ARTH post-1800 Courses

**ARTH 569 (F) Gérôme**

This course explores work and career of Jean-Léon Gérôme (1824-1904), perhaps the most renowned, popular, and influential artist of the later nineteenth century. With commercial and artistic relationships that spread his influence across the globe, Gérôme has come to seem very much like a highly successful contemporary artist, specifically with regard to his place in an international art world that married elite institutional practices to new technologies of reproduction, marketing techniques, and other instruments of modern mass culture. Gérôme's fame was short lived, however. In the wake of the Modernist revolution on the one hand, and Post-Colonial critique on the other, no discussion of the artist can avoid wrestling with complaints that have left him thoroughly diminished—though less forgotten than scorned. Not only did his art, as it seemed, help perpetrate a gigantic aesthetic error, it blundered onto ethically compromising terrain. Today Gérôme stands as Exhibit A in wide-ranging critique of Orientalism's ideological work. The course will interrogate the Modernist and Post-Colonial complaints against Gérôme in detail, even as it also explores his art from a range of other perspectives, many developed very recently. Topics include Gérôme's relationship to photography, to Orientalism and animal studies, to the cinema, to polychrome sculpture, his approach to historical narrative, and well as his voyeurism and other other manipulations of viewer experience so critical to his art. The seminar will engage the Clark's important collection of Gérôme paintings, and also travel to the Walters Art Gallery in Baltimore, conditions permitting. Students may prepare papers on any aspect of global late-nineteenth-century "academic" or "official" art that was informed by Gérôme's example.

Requirements/Evaluation: class participation, presentations in seminar, research paper (approximately 20 pp)

Prerequisites: None

Enrollment Limit: 16

Enrollment Preferences: MA students, then art history majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

**ARTH 570 (S) Image-making, Orientalism and Visual Culture**

Images enjoy extraordinary power in the spaces between self and other, human and divine. They play myriad roles--witness, surrogate, instigator, supplicant--and travel freely across political, religious and cultural boundaries. They are also subject to reproduction, alteration and destruction as disparate visual cultures interact and globalizing processes ensue. This course will focus on various regions--e.g. United States, France, Turkey, and the Perso-Islamic sphere--and the images that factor in the intervening spaces, from 1800 to the present. We will begin with the theme of self-fashioning and the peculiar nature of portraiture. Thereafter, the entanglement of religious beliefs and visual traditions will broaden our inquiry.
leading us to contested dynamics like iconoclasm and aniconism, and reductionist types like veiled women and pious men. Along the way, proliferating and palimpsestic forms of Orientalism will oblige us to consider the very concept of global visual culture. Students will submit weekly GLOW posts to foster class discussion and undertake a major research project over the course of the semester.

Requirements/Evaluation: Class participation, weekly oral presentations, 15-20 page term research project.

Prerequisites: None
Enrollment Limit: 12
Enrollment Preferences: Graduate students
Expected Class Size: 8
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

ARTH 576 (F) Paper, Process, Practice
Works on paper, particularly multiples, confound many of the received ideas around artistic invention and originality. This course will address the varied functions of printmaking in Europe over four centuries (1500-1900), giving special attention to the following questions: What is the relationship between prints and other artistic media? How do the material constraints involved in printmaking lead to a particular set of practices, and how in turn do those marry with technological advances to produce new aesthetic possibilities? To what extent did Old Masters such as Dürer and Rembrandt define the terms for later printmakers, and how did their example enable and/or discourage innovation in printed subject matter and style? What was the role of prints in creating both new forums for public discourse and new collecting publics? Arranged thematically rather than chronologically, this course will cover a wide array of printmakers and types of printed media.

Requirements/Evaluation: class participation, class presentation, research paper

Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: Art history MA students, then advanced undergraduates

ARTH 578 (F) The Idea and Materiality of Medieval and Early Modern European Books
How did medieval and Renaissance "books" work, when the codex was only one form of the book, which continually evolved, and when they weren't only used for reading? This course will explore the book as object and the book as concept. Drawing on the collection of manuscripts, incunables, and later printed books at WCMA, Chapin, and surrounding university museums, the course will consider how the forms and materiality of books could have affected readers' reception and perceptions, and in turn, how religious, cultural, political, and economical forces shape their format, decoration, and paratext. While it will primarily deal with Western books, we will also consider early ones from around the world. Students will have the opportunity to engage with Embodied Words: Reading in Medieval Christian Culture, contribute to the exhibition’s StoryMaps on medieval reading, and develop some codicological skills. Coming to the study of the book from the theory of thingness and cognitive linguistics, we will study our changing uses and relationships with and to books as instruments of doctrine and devotion, power and identity.

Requirements/Evaluation: class presentation; research paper (20pp); other assignments

Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: MA students, then advanced art history undergrad majors

ARTH 580  (S)  Picturing God in the Middle Ages

ARTH 5-- Spring 2022 Peter Low

How did medieval Europeans imagine their God and how did they give what they imagined pictorial form? How were these pictures used, both in public and in private life, and why? Paying particular attention as well to the materiality, experience, and manifold audiences of medieval works of art, this seminar will examine the evolution of images of God, in both the Eastern and Western halves of Europe, and the problems these images often generated. Through readings and class discussion, the course will investigate, among other specific topics: the varied attitudes toward the representability of God in Judaism, Islam, and Christianity; the tensions manifest in or evoked by this art, including picture vs. text, symbolism vs. mimesis, and asceticism vs. splendor; the impact of the Roman cult of the emperor and of images of the pagan deities on the earliest portraits of Christ; the cult of the icon, concerns over idolatry, and the destruction of images; ideas about the relationship between spiritual and physical vision and their influence on the making and viewing of pictures; the relationship of sacred images to the Eucharist and other aspects of Christian ritual; the role of the senses beyond vision in engaging with sacred art especially in the later Middle Ages; and the pictorial exploration of both the torture and sexuality of Christ. Students will also pursue an individual research project, in which they will examine in greater depth a specific depiction of God of their choosing, from any place and any time, in light of what we have considered together in the seminar.

Requirements/Evaluation: Evaluation will be based on class participation, oral presentations, and a final research paper (15-25 pages).

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: MA students, then senior art history majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

ARTH 581  Creative Life: The Visual Economy of Work

This course is a seminar on life and work focusing on methodologies of production--art, creative writing, history, theory, and criticism. With an initial focus on the pivotal period from the invention of photography until the onset of World War II, the course will examine the economy of work within modern visual culture. What were the considerations at stake in capturing the "facts" of industrial production? We will examine historical definitions of work, and practices and activities from life that have typically qualified or have the potential to qualify as work (in addition to critiques of these equivalencies). The latter half of the course will be driven by considerations of these themes in relation to student and workers movements of 1968, and contemporary forms of globalization and pluralist subjectivities. One related concern will be the consideration of intersubjective relations--professional and personal partnerships, friendships, and networks--which not only influence the trajectory of one's life, but also the research one chooses to undertake. With the awareness that a range of drives and investments inhabit one's production, participants will be asked to reflect upon their own working practices as a means of critically engaging the affective relations governing artistic and intellectual labor. There will be an emphasis on cross-disciplinary ideas and influences--ranging from art history, film and media studies, the history of science, literature, and political history as a means of integrating theoretical approaches with a range of materials, including photography, cinema, illustrated magazines, advertisements, archives, world exhibitions, and product showrooms.

Requirements/Evaluation: Active discussion participation; rough draft (mid semester) and final research paper (20-25 pages)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: MA students, then art history majors

Expected Class Size: 12

Grading: Distributions: (D1)

Not offered current academic year

ARTH 582  (F)  On Race, Art, and Property
In her seminal article "Whiteness as Property," critical race theorist and professor Cheryl Harris contends that the legal system in the United States "has come to embody and legitimize benefits that accrue to citizens who are white." The legacy of our legal system, which has dehumanized people by rendering them as property and legalized the theft of land by colonizers from Native Americans, is not confined to the past, but has shaped our world and thrives within our present moment. How has this legacy and Harris' theory been explored in contemporary art? How might it allow us to revisit artworks and practices by canonical artists from alternative perspectives? This course aims to study aspects of this complicated history through a broad range of texts from legal and literary theory to art history to Black and Native American studies to more immediately authored texts published on social media platforms. Students are encouraged to think dexterously as we study works by Gordon Matta-Clark, Michael Heizer, Sondra Perry, Cameron Rowland, and Cauleen Smith—among others.

Requirements/Evaluation: presentations, writing assignments

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: If over-enrolled, by application

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

ARTH 583 (F) Graphic Content: Typography and the Book between Art and Design

This seminar considers the entangled histories of fine art and graphic design by focusing on creative practices surrounding the letterform and the book form from 1900 to the present. We will study historical avant-garde movements active in publishing and making-public; the development of the graphic design discipline, in print and on screen; and logocentric artistic tendencies from concrete poetry and pop art to conceptualism and artists' books. We will also consider diverse literary practices, graphic visualization, and political agitation. The seminar will make use of the Clark library's outstanding collection of artists' books and the holdings of the Chapin library at Williams. We will welcome several guests, including art historians, artist-designers, designer-artists, editors, publishers, and bookmakers.

Requirements/Evaluation: class participation, class presentation, research paper/project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History MA students, then advanced undergraduates. Course will be by application if overenrolled.

Expected Class Size: 10

Grading: pass/fail option only

Distributions: (D1)

Not offered current academic year

ARTH 584 (S) Fragments and Healing: Disability Studies and Late Antique Art

Cross-listings: ARTH 425 REL 425 ARTH 584

Secondary Cross-listing

This seminar will investigate some of the ways that contemporary Disability Studies can help us see and think about the complexities of differently abled bodies in Late Antiquity (broadly, from ca. 200 until ca. 750), the formative period for Christian art (and consequently for much of Western art). Disability Studies is an extremely active and rich body of literature and art that has not often been brought into conversation with historical periods of art, and so this seminar seeks to open up discussion of the insights possible from that conversation, not only how Late Antique art can be re-interpreted, but also how that period of art can reveal under-explored areas in the field of Disability Studies. The seminar will undertake a mutual interrogation of accepted notions in both fields and, in this way, to explore some new understandings of Disability Studies' capacities for allowing us to think with our art, culture, and bodies. The means at our disposal for this seminar are art of Late Antiquity and of the contemporary world, and that idea of mutual interrogation also operates in our study and display of that art. The seminar will look at art of healing and recuperation, art produced by and directed at diversely-abled bodies, and at fragments and restoration, and think about art as documents, reflections, and determinants of those bodies, now and in the past. It will, for this reason, work around the collection of WCMA, with exhibition and collection research, and the historical archives of the Library holdings, so that the widest possible study of bodies and difference is opened for our thinking and dialogue.
ARHT 586 (F) Japanese Popular Visual Culture

Cross-listings: ASIA 186 COMP 186 ARTH 286 ARTH 586

Secondary Cross-listing

The phrase "Japanese popular culture" often calls to mind comics and animation, but Japan's earliest visual pop culture dates back to the 17th century and the development of arts like kabuki theater and woodblock prints that could be produced for a mass audience. This course traces Japanese popular culture through a range of visual media: kabuki and puppet theater, premodern and postmodern visual art (ukiyo-e, Superflat), classic film (Ozu, Mizoguchi, Kurosawa), manga/comics (Tezuka, Otomo, Hagio), and animation (Oshii, Miyazaki, Kon). The class will also study material examples of Japanese popular culture on display in the Repro Japan exhibition at the Williams College Museum of Art. We will develop visual reading skills to come up with original interpretations of these works, and compare different media to make them shed light on one another.

Class Format: discussion

Requirements/Evaluation: attendance, participation, two 5-page papers, final exam

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: students majoring or considering a major in a related discipline

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

ARHT 588 (S) The Scene of Decapitation in European Art (1600-1900)

From Goliath to Medusa, from Judith to Salome, from the invention of the guillotine to the mythology of the executioner under "Oriental despotism," the "scene" of decapitation has long stood as a central focus of European art, visual culture, and letters. This course examines that scene as an artistic, psychological, and intellectual problematic across painting, sculpture, and other media, with particular although not exclusive attention to the nineteenth-century. Although part and parcel of the larger spectacle of juridical punishment, the scene of decapitation arguably constitutes its own series, and for this reason has attracted numerous artists and a prestigious, multi-disciplinary literature. Artists include (but limited to) Caravaggio, Artemisia Gentileschi, Théodore Géricault, Gustave Moreau, and Henri Regnaut. Readings by Freud, Kristeva, Bersani, and many others, including a large body of art historical literature. Weekly readings, discussion, oral presentation, and research paper on a relevant topic from 1600 to 1900.
**ARTH 589  (S) Imitation, Copy, Reproduction**

Focusing primarily on European and American art before 1900, this course addresses the related categories of imitation, copy, and reproduction with particular attention to prints and other works of art on paper. We will consider the status of the multiple, the role of imitation in classical art theory and pedagogy, the motivations for (and protections against) different kinds of copying, the emergence of photomechanical processes, and the centrality of reproducible images to the art-historical enterprise, among other topics. The basis of our investigations will be works from the Clark's own collection, to be studied with a close eye to their medium and materiality. We will explore concepts of originality, fidelity, authenticity, and value in the light of critical and theoretical texts, while also examining the historical conditions that underlie distinct instances of image reproduction. This course will take place in the Manton Study Center for Works on Paper. Each session will offer direct engagement with works in the Clark's permanent collection. The course will also benefit from the exhibition Promenades on Paper: French Eighteenth-Century Drawings from the Bibliothèque nationale de France, which will be on view from December 17, 2022 through March 12, 2023 in the Clark Center.

**Requirements/Evaluation:** seminar presentation; research paper (approx 20pp)

**ARTH 590  (S) Guillaume Lethière (1760-1832) and Caribbean Networks in France during the 18th and 19th centuries**

Born in the colony of Guadeloupe to a French father and a formerly enslaved woman, Guillaume Lethière (1760-1832) would become a key figure in the Neoclassical movement, a well-respected pedagogue with a sizeable workshop populated by notable students, an ambitious collector, director of the Académie de France in Rome from 1807 to 1816, a favorite artist of Lucien Bonaparte, and a member of the Institut de France. Despite his many accomplishments and sizeable corpus of paintings and drawings, Lethière has notably disappeared from the "canon" of art history. Such a lacunae begs many questions about the circles of sociability in which he traveled, the reception of Caribbean artists in France in the eighteenth and early nineteenth centuries, and the lack of widespread knowledge on these topics today. This seminar will be timed with the planning of a major monographic exhibition to take place at the Clark Art Institute in the summer of 2024, and students will work alongside the curators on various aspects of the exhibition's organization. The course will also provide an opportunity for close examination of objects in the Clark's permanent collection, including Lethière masterpiece Brutus condemning his sons to death(1788), as well an album of approximately one hundred drawings by the artist.

**Requirements/Evaluation:** class participation, presentations, research paper (approximately 20 pages)

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** MA students, then art history major undergrads

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)
ARTH 591  (F)  Borders/Walls: Liminality and Politics in Documentary Cinema

Despite increased potentialities for mobility and exchange, borders and walls persist within contemporary culture. This research-based seminar examines where the foreclosure of these potentialities appears within global documentary cinema. It does so with the knowledge that walls have also played a significant role in cinema’s ongoing reinvention. Auguste and Louis Lumière’s first film featured not only the routine departure of the factory’s workers at the end of the working day, but also the built structure of the factory wall separating spheres of labor and leisure. Examining the intersection of concrete reality with the moving image, this seminar considers the implications of these spaces of liminality for the possibilities or limitations of the cinematic medium. It considers the way these mental, physical, and geopolitical constructs emerge both theoretically and materially as spaces that are tangibly felt, negotiated, and experienced. Given that site-specific works, institutional and civic contexts, as well as museums, serve as spaces of liminality and knowledge production, attention in this course will also be directed towards the (im)materiality of cinematic practice with respect to projection and the screen.

Requirements/Evaluation: Active discussion participation; rough draft (mid semester) and final research paper (20-25 pages)

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Graduate students, senior-level majors in art history

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ARTH 592  (F)  Chance and Design: Ideas and Iconographies of Causality in Europe before 1900

The idea of the work of art has a long history in Western philosophy and religious thought as the model for the idea of intentionality at the broadest scale; the relation of the artist to their artifact mirrored, in microcosm, the relation of an "intelligent designer" to a designed universe. The collapse of such models for thinking about both art and the natural and social world are characterized, typically, as intrinsic to the epoch of modernity. Within art history of the past half century, a significant amount of attention has been devoted to theorizing how many now-canonical artists (eg. the proto-conceptual artist Marcel Duchamp, the composer John Cage and choreographer Merce Cunningham) harnessed chance procedures with the aim of vacating their agency from the process of creation and with the "purpose to remove purposes." This course attempts to look before and beyond these well-trodden histories. Probing the visual dimension inherent in the concept of design and its absence (a visuality epitomized by blindfolded allegorical figure of Fortuna), we will seek to trace a more capacious genealogy for the efflorescence of chance, accident, and randomness as aesthetized objects of fascination in the twentieth century. We will trace the prehistory of these concepts in relation to both the abstraction of numbers and the concreteness of organisms, situating ideas of chance in relation to both the rise of a globalization and racial capitalism grounded in risk, financial speculation, and probability, as well as the eventual emergence in the nineteenth century, of an evolutionary theory capable of producing statements such as, "what a chance it has been... that has made a man," and recognizing "blind chance" as the originary driver of change in the organic world. The class will include presentations by invited guest scholars and focus on a number of case studies spanning the early modern period through the late nineteenth century, including topics such as: the concept of disegno and art as a model of intentionality, the iconography of fortune, gambling, and accidents, the association of chance and seafaring, the iconography of falling and gravity, the incorporation of chance into the material processes of image-making (for instance, in the invention of photography), and the visual culture and visual metaphors of Darwin's evolution. In association with our historical inquiries, the course will also meditate methodologically upon models of causality in art-historical explanation, as well on broader questions of how chance and ideas of chance and causality mediated modern Europe's relation to other parts of the world.

Requirements/Evaluation: class presentation, research paper of approximately 20 pages

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: grad students, then art history major undergrads

Expected Class Size: 10
ARTh 593  (S)  Sound/Image: Theories and Practices in Art History
This seminar serves as an introduction and deep dive into issues of sound in the visual arts. While we will examine modern and contemporary examples of sound art and multimedia work, this course considers sound, the aural imagination, and practices of listening much more expansively to probe the theoretical, conceptual, as well as technological, aesthetic, and reception issues surrounding sound in visual art. Course readings will combine art historical accounts with texts from philosophy and sound studies. We will read Michael Gaudio on representations of "the New World" in colonial America, consider recent attention paid to sound and the infiltration of sound recording media in nineteenth- and early-twentieth century America (by Rachel DeLue, Leo Mazow, and Asma Naarem), delve into the politics and poetics of European avant-garde performance, the cross-pollination of musical and artistic experimentation in 1960s New York and elsewhere (John Cage and Pauline Oliveros in connection with the worlds of dance, performance, and Black Mountain College), and consider more contemporary practices, particularly by artists working in Asia, Brazil, and artists engaging in Deaf studies and critiques of ableist hearing ideologies (such as Christine Sun Kim). We will also draw heavily on writings on sound, sensation, art (and film) by twentieth-century continental philosophy (Roland Barthes, Jean-Luc Nancy, Gilles Deleuze) as well as recent work by contemporary theorists probing the intersections of the sonic with race, gender, and politics (among them Salomé Voegelin and Robin James), as well as other topics from sound studies such as the mediation of technology, social and historical frameworks (such as Alain Corbin's study of the culture of the senses in the 19th-century French countryside), and the "ontological" turn and focus on materiality (Christoph Cox, Steve Goodman).

Requirements/Evaluation: Students will each be responsible for introducing key themes or questions from the readings in one class session. They will also complete a short paper focused on experimenting with sound/image ekphrasis (how do we write histories of sound?). The final project will be a research paper (approximately 20 pages), on which they will give a presentation in class near the end of term while the project is in its development stage.
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: MA students, then art history major undergrads
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D1)
Not offered current academic year

ARTh 594  (S)  Traveling Seminar: Slavery and the Dutch Golden Age
This course takes as its starting point the exhibition at the Rijksmuseum opening in September 2019: Slavery, an exhibition. With this installation, the curators of the Rijksmuseum seek to correct dominant narratives of seventeenth and eighteenth-century Dutch history, which have absented the role of slavery in determining the economic, social, and visual history of the Netherlands. With a Travel Grant awarded by the College Art Association, the students in this seminar will travel to the Netherlands to visit this exhibition and other relevant cultural institutions in order to examine the possibilities and limits for 'decolonizing' the museum. This course will study how slavery is imbricated within the mythic construction of a 'Dutch Golden Age' while also examining what happens when the history of enslaved peoples becomes translated into the space of a museum and exhibition. We will consider a revisionist history of Dutch artistic production, accounting for slavery in determining the Dutch economy and visual production while also asking what happens when slavery becomes narrated in the space of one of the nation's history museums. We will read contemporary black feminist theory such as Sylvia Wynter, Saidiya Hartman, Hortense Spillers, and Christina Sharpe as a means to struggle with how the space of the exhibition chooses to activate and write those missing histories, and we will examine if it is even possible to responsibly tell the story of slavery over two centuries when the majority of the subjects have been completely defaced, removed, and excised from the historical record, and their voices are often the ones still absent. In the words of Saidiya Hartman, we will ask: "Is it possible to construct a story from the 'locus of impossible speech' or resurrect lives from the ruins?"

Requirements/Evaluation: participation in class travel, class participation and presentation, research paper
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: MA art history students, by application if overenrolled
Expected Class Size: 12
ARTH 595 (F) Private Tutorial
Students may petition to take a private tutorial by arrangement with the instructor and with permission of the Graduate Program Director.

Requirements/Evaluation: per discretion of instructor
Prerequisites: permission from GradArt Director
Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: none
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
Not offered current academic year

ARTH 596 (S) Private Tutorial
Students may petition to take a private tutorial by arrangement with the instructor and with permission of the Graduate Program Director.

Grading: yes pass/fail option, yes fifth course option

Winter Study
-----------------------------------------------

ARTH 13 Stradivari

Antonio Stradivari is the most famous violin maker of all time. He made over 1,000 violins, violas and cellos which, for centuries, have been coveted by soloists for their inimitable tone, power and beauty. Stradivari violins weigh less than a loaf of bread, spend several hours a day under a chin, are occasionally forgotten in taxis and yet they have become multimillion-dollar proxies for culture, class and wealth. In this course we will learn how violins are made, how they work and what makes a Stradivari so special. We will study the evolution of this 17th century craft into an elevated art-form and examine why the name Stradivari attracts so much mystery, romance and myth-making. We will examine (and hear!) Stradivari instruments in person and we will blind-test old instruments against new. We will explore issues of connoisseurship, art business and performance psychology. We will visit a modern violin making workshop and a conservation lab and we will see how new technologies are revolutionizing the restoration of 400 year old instruments. Evaluation will be based on a final project, performance or paper.
**ARTh 31  (W)  Senior Thesis: Art History**

To be taken by students registered for ArtH 494. For requirements of entry into the course, please see "The Degree with Honors in Art, Art History" in the catalogue or on the Art Department's webpage.

**Class Format**: independent study

**Requirements/Evaluation**: Independent research and writing, attendance at sessions at Sawyer Library, Clark Institute Library, and Williams Writing Center

**Prerequisites**: Submission of thesis application, according to guidelines in course catalogue, and departmental acceptance into ARTH 494

**Enrollment Limit**: 8

**Enrollment Preferences**: Students need permission of the department to register for this course

**Expected Class Size**: 8

**Grading**: pass/fail only

**Not offered current academic year**

**ARTh 14  The Art Historian's Digital Tool Kit**

This course will provide students a thorough introduction to digital methods in art history and hands-on experience with a variety of essential tools. Through the process of curating a digital exhibition of historic photographs from the Visual Resources Center’s collection, students will learn about digital imaging and flatbed scanning, metadata creation and critical cataloging, digital exhibitions, geolocation and mapping, image annotation, timelines, and network analysis. Software and tools covered will include Photoshop, Omeka, TimelineJS, Graph Commons, and others. Working hands-on in the Visual Resources Center, students will spend about six hours per week in class learning important concepts, best practices, and tools. Short readings will be assigned on the application of digital methods to art historical scholarship. Students will present their final exhibition projects at the end of the course.

**Requirements/Evaluation**: Other: Final project and presentation

**Prerequisites**: Students must have completed one course in Art History.

**Enrollment Limit**: 10

**Enrollment Preferences**: Preference will be given to students who have completed multiple Art History courses.

**Expected Class Size**: NA

**Grading**:

**Unit Notes**: Amy McKenna, Director of Visual Resources, develops digital humanities teaching projects with Art faculty and curates digital and historic teaching collections. She received her Master’s degree in Art History from Southern Methodist University. Emily Leon, Digital Projects and Metadata Specialist, implements digital humanities teaching projects in collaboration with Art faculty and specializes in metadata and network analysis. She holds an MA in Digital Art History from Duke University.

**Attributes**: EXPE Experiential Education Courses  STUX Winter Study Student Exploration

**Not offered current academic year**
ARTH 33  (W)  Honors Independent Study: Art History
To be taken by candidates for honors by the independent study route.
Class Format: independent study
Grading: pass/fail only
Not offered current academic year

ARTH 51  (W)  International Study Trip
The International Study Trip, required of all first-year students in the Program, is unique among graduate art history programs. Students travel as a
group for approximately three weeks, accompanied by the Program Director and other faculty. The Program covers the cost of travel, accommodation,
admision, and additional expenses. Locations for study are selected based on faculty expertise and interest and have included in recent years: Italy,
Sicily, Denmark, Sweden, Great Britain, France, Austria, Hawaii, Australia, Japan, China, Taiwan, and Russia.

Requirements/Evaluation: Attendance and participation in trip activities.
Prerequisites: None
Enrollment Limit: 13
Enrollment Preferences: Grad students only. Required for grad students in their first year.
Expected Class Size: 13
Grading: pass/fail only
Attributes: ARTH post-1800 Courses
Not offered current academic year

ARTH 99  (W)  Independent Study: Art History
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a
faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late
September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is
approved prior to the Winter Study registration period.

Class Format: Independent study
Grading: pass/fail only
Not offered current academic year
ART (Div I)

ART STUDIO

Co-Chairs: Professors Michelle Apotsos and Laylah Ali

- Cecilia Aldarondo, Assistant Professor of Art
- Laylah Ali, Art Department Co-Chair & Chair of Studio Art, Francis Christopher Oakley Third Century Professor of Art
- Michelle M. Apotsos, Art Department Co-Chair & Chair of Art History, Associate Professor of Art
- Genesis Baez, Visiting Lecturer in Art
- Trenton D. Barnes, Assistant Professor of Art
- Mari Rodriguez Binnie, Assistant Professor of Art
- William B. Binnie, Visiting Lecturer in Art
- Ohan Breiding, Assistant Professor of Art; on leave 2023-2024
- Mariel Capanna, Mellon Postdoctoral Fellow in Art
- Michael Conforti, Lecturer in the Graduate Program in Art History; affiliated with: Graduate Program in the History of Art, Art
- Kerry C. Downey, Visiting Lecturer in Art
- Holly Edwards, Senior Lecturer in Art
- Giuseppina Forte, Assistant Professor of Architecture and Environmental Studies; affiliated with: Center for Environmental Studies, Art
- Michael A. Glier, Alexander Falck Class of 1899 Professor of Art
- Marc Gotlieb, Halvorsen Director of the Graduate Program in Art History; affiliated with: Graduate Program in the History of Art, Art
- Guy M. Hedreen, Amos Lawrence Professor of Art
- Catherine N. Howe, Lecturer in Art
- Frank Jackson, Visiting Assistant Professor of Art
- Michael J. Lewis, Faison-Pierson-Stoddard Professor of Art History; on leave Spring 2024
- Ziliang Liu, Assistant Professor of Art
- Peter D. Low, Professor of Art; on leave Spring 2024
- Elizabeth P. McGowan, Robert Sterling Clark Professor of Art
- Murad K. Mumtaz, Assistant Professor of Art
- Alyssa Pheobus Mumtaz, Visiting Lecturer in Art
- Amy D. Podmore, J. Kirk T. Varnedoe 1967 Professor of Art
- Rit Premnath, Associate Professor of Art
- Sarah Rara, Assistant Professor of Art; on leave 2023-2024
- Pallavi Sen, Assistant Professor of Art
- Gerald E. Sheffield, Visiting Lecturer in Art
- Stefanie Solum, Professor of Art; on leave 2023-2024

The Department offers students different paths to explore the vital connection between visuality and creativity. With courses of study in the History of Art and the Practice of Studio Art (or a combination of History and Studio), the Major is designed to train students to develop the technical, conceptual, critical, and historical tools they need to engage the visual world.

ADVISING
Majors are expected to discuss their choice of courses and path through the major with their advisor or another professor in the department. Official departmental advisors for each route through the major (listed here below) are available to field general questions concerning curriculum, requirements, and planning to study away.

Art History Faculty Advisor: Michelle Apotsos
Art Studio Faculty Advisor: Laylah Ali
History and Studio Faculty Advisor: Michelle Apotsos and Laylah Ali

ART STUDIO
The Studio division of the art major has been structured to develop students’ perceptions and imaginations as they investigate a variety of visual media and to foster the development of a critical understanding of making art to support creative interests.

Major Requirements
The Studio Art major requires a minimum of nine courses:
- ARTS 100 Drawing I
- One art history course (preferably taken by the end of the junior year)
- A combination of at least three 100 and 200-level courses in three different media (ARTS 100 and tutorials do not satisfy this requirement)
- ARTS 319 Junior Seminar
- One 300-level ARTS course
- One elected ARTS course
- ARTS 418 Senior Seminar

The numbered sequence of courses in the Studio Art major is intended to develop knowledge and skills appropriate to students’ levels of experience, ultimately supporting original, independent work at the 400-level. ARTS 100 is an introduction to the principles of drawing and design, which are the foundation of visual expression. An art history course not only increases visual knowledge of other periods and cultures, but also provides exposure to the methods of visual analysis. 100 and 200-level ARTS courses introduce the relation between form and content and serve as introductions to a variety of media including architecture, painting, performance, photography, printmaking, sculpture, and video. 300-level courses place greater emphasis on the application of visual skills to thematic concerns, and to the development of the student’s individual vision. The capstone to the major, ARTS 418, provides a comprehensive, professional exhibition experience. Students not only define, research, and create an original body of work, but are also engaged in all aspects of producing an exhibition at the Williams College Museum of Art.

The faculty encourages students to begin exploring studio art in the first year so that they can fully explore a variety of media in preparation for independent work in the junior and senior year. A successful route through the major might look like this:
- First year: two classes at the 100 and/or 200 level in different media and an art history class. We encourage students to explore media with which they are unfamiliar, as doing so provides a good base and allows for more flexibility later on. While there is only one art history class required for the major, we encourage students to take advantage of the rich art history offerings throughout their four years of study.
- Second year: at least two 100 and/or 200 level courses.
- Third year: Junior seminar, a 200- or 300-level course and a possible second art history class.
- Fourth year: one 300-level course, ARTS 418, and other courses chosen to support your individual interests.

HISTORY AND STUDIO
This route offers students the opportunity to propose a course of study that investigates a particular medium or a particular issue bridging both wings of the department. Examples of past History and Studio projects include topics related to architecture, curating, and performance, but are not limited to these.

In many cases, it is better to choose the Art History or the Studio Art route, to the major, while taking additional courses in the other wing, as desired. The History and Studio route is offered as a third option and requires approval.

The application for the History and Studio route must include both a written statement and a list of proposed courses. It must be approved by an advisor from both Art History and Studio Art and be submitted to the department’s administrative assistant before registering for the major.

History and Studio students whose projects have a Studio emphasis have the opportunity to take the Senior Tutorial (ARTS 418) with permission of the instructor and to participate in the senior Studio exhibition. Those seniors with a History emphasis can apply to write a thesis and, if accepted, will be admitted to the required Winter Study and Senior Thesis Seminar (ARTh 494)
which culminate in a thesis and thesis presentation. Or, a student may propose a senior independent study.

**Major Requirements**

**The History and Studio major requires a minimum of nine courses:**

- **Any TWO of the following six courses:** ARTH 101, 102, 103, 104, 105 or 106
- ARTS 100-level course
- ARTS 200-level course
- ARTH 301 Methods OR ARTS 319 Junior Seminar.
- ARTH 400-level OR 500-level course
- ARTS elective
- ARTH elective
- ARTS 300-level course

  OR ARTS 418 (with permission), if pursuing a Studio tracking an Art History track

  OR an ARTH 400-level course or ARTH 494 (with permission), if pursuing an Art History track

The application for the History and Studio route must include both a written statement of purpose and a list of proposed courses. Both must be approved by two advisors, one from Art History and the other from Studio Art, and be submitted to the department’s administrative assistant before the student may register for the major.

History and Studio students whose ongoing projects have a Studio emphasis have the opportunity to take the Senior Tutorial (ARTS 418) with permission of the instructor and to participate in the senior Studio exhibition. Or, a student following the Studio Art track may propose a senior Independent Study project in order to pursue Honors. Those History and Studio majors with an Art History emphasis may apply to write a thesis and, if accepted, will be admitted to the required Winter Study and Senior Honors Seminar (ARTH 494).

One advisor from Art History and one from Studio Art must sign off each semester before a student may register for classes.

**THE DEGREE WITH HONORS IN ART**

Students who wish to become candidates for the degree with honors must show prior evidence of superior performance in the major as well as research capabilities to carry out the proposed project.

**Art Studio**

Studio art concentrators who wish to be candidates for honors are required to take an extra studio course, of their choosing, for a total of ten courses. One of the ten courses must be the 400-level Senior Seminar (ARTS 418). Students must also take the Honors Independent Study course (ARTS 31) during Winter Study of their senior year. Studio faculty will provide feedback on the progress of the honors project at the beginning of the Spring semester.

Honors candidates enrolled in the Senior Seminar must demonstrate prior experience in the media chosen for the honors work. This proof may consist of one or more 200-level courses in the medium, course work at the 300 level, and/or a portfolio demonstrating the student’s proficiency in the media chosen for the honors project. This work must be presented to the instructor of the Senior Tutorial at the start of the Spring semester. At the end of the Spring semester of senior year, honors candidates will orally defend their work in the senior exhibition at WCMA. The entire studio faculty will attend each defense. Based on the work and the oral defense, the studio faculty (as a whole) will designate honors, high honors or no honors.

**History and Studio**

History and Studio majors may follow either the Studio Art or Art History route to honors. Alternatively, a student may pursue honors through an Independent Study project, to be undertaken during Winter Study and the Spring semester under the guidance of their two advisors.

The review process for the honors candidates in the senior seminars (ARTS 418 or ARTH 494) will proceed according to the regular honors process for the respective wing of the Art Department, and will include both advisors. If the honors project is conducted via an Independent Study, the final project will be submitted to the two advisors who will determine whether or not it will receive honors. If the student chooses not to follow the Honors route, they may take either a 300-level ARTS course, or a 400-level ARTH seminar instead.

**STUDY ABROAD**

The Art Department encourages students to travel during Winter Study, and to study abroad for a semester during the junior year. Students planning on studying abroad must: consult a departmental advisor, leave a copy of their Study Away Petition on file in the Department, and consider the required junior seminars (ARTH 301 and ARTS 319) that prepare students for the independent research and/or independent artistic production which is the focus of the senior year.
Art Studio

Studio Art Majors must take the required Junior Seminar (ARTS 319) in the fall semester of their junior year, unless they are planning to study abroad for a full year, or unless they have permission of the chair of the department (in these cases, they may take the required class in their sophomore or senior year). The Department does not grant pre-approval or provisional credit for study abroad courses; studio majors must submit their portfolios for review, and will receive credit only if the work completed abroad is deemed roughly equivalent in quality and quantity to coursework at the College (students should contact the Departmental advisor in studio for the portfolio review, and digital photographs are fine in the case that original work is not available). No more than 1 requirement for the major can be taken per semester abroad (2 if one of the courses is in art history). Courses must be in fine arts fields to qualify for major credit. ARTS 319 and ARTS 418 cannot be fulfilled abroad.

History and Studio

History and Studio majors must plan accordingly for their elected junior seminar. For art history courses taken abroad, history and studio majors can seek provisional credit for courses that appear to satisfy requirements for the major. No provisional credit is possible for studio courses; students must submit their portfolios for review, and will receive credit only if the work completed abroad is deemed roughly equivalent in quality and quantity to coursework at the College (students should contact the Departmental advisor in studio for the portfolio review, and digital photographs are fine in the case that original work is not available). No more than 2 major requirements may be satisfied per semester while abroad (one in studio, one in history), with no more than 3 courses total. History and studio majors cannot satisfy ARTS 319 or any 400-level courses abroad.

ARTS 100 (S) Drawing I

In childhood everyone draws. Like language drawing is a basic human tool to observe and interpret the world as well as to make comment about it and find agency within it. As an introduction to art making, this course will provide basic design and conceptual skills to engage feeling, develop content and communicate with others. Divided into sections on line, composition, proportion, value and space, the course is designed for those with no previous experience in drawing, but it is flexible enough to challenge experienced students. New concepts are introduced each week in slide talks and developed in workshops and through homework assignments.

Requirements/Evaluation: successful application of new skills, development of concept, participation in class, effort, timeliness and attendance

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: art majors, first years, sophomores, juniors, seniors

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $350-$500 Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

Spring 2024

STU Section: 01 M 1:10 pm - 3:50 pm Michael A. Glier

ARTS 100 (F) Drawing I

Drawing provides a wonderful vehicle for encountering and interpreting your experiences. This course will heighten your awareness of the visual world, teach basic drawing skills, and demonstrate how drawing operates as a form of visual exchange. A variety of materials will be covered as you explore the 2-dimensional concepts of line, form, proportion, gesture, spatial depth, and value. Towards the latter part of the semester, more emphasis will be placed on the use of drawing as idea, and you will be encouraged to express yourself through the visual language of drawing.

Requirements/Evaluation: This is an intensive studio course, requiring working in the drawing studio outside of scheduled class hours. Grading takes into account the quality and quantity of work produced, depth and quality of investigative process, participation in critiques, and attendance.

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Art Majors (declared); students who have previously enrolled but have been dropped from the course, first-year and sophomore students
Expected Class Size: 18
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $350-$500 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.
Distributions: (D1)

Fall 2023
STU Section: 02  M 1:10 pm - 3:50 pm  Amy D. Podmore

ARTS 100 (F) Drawing I
This course is designed to introduce the fundamentals of drawing. A significant portion of class time will be devoted to learning some of the basics of drawing, such as line, gesture, composition, and value. Acquiring technical skill is an important goal of this class, and intensive weekly assignments are a significant part of that process. Studio classes will also provide a general overview of broader art concepts, such as theme, consistency and style, to further expand their understanding of contemporary drawing practices.

Requirements/Evaluation: quality of work produced as well as successful completion of all assignments and attendance
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: art majors, first-years and sophomores
Expected Class Size: 18
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $350-$500. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.
Distributions: (D1)

Fall 2023
STU Section: 01  W 10:00 am - 12:30 pm  Gerald E. Sheffield

ARTS 100 (S) Drawing I
This course is designed to introduce students to perceptual, experiential and analytical moments associated with the language of drawing, and to do so in ways that offer the opportunity to see the world with greater clarity, and with a broader understanding of art and the visual language. This course provides technical skills associated with observational drawing, experiential moments with a variety of materials, and the opportunity for self expression and the communication of ideas. Each studio class blends drawing practices and exercises designed to further one's understanding of the language of drawing, and more broadly, offers a foundation for further study in the visual arts.

Requirements/Evaluation: Individual critiques, a mid-term critique, a final portfolio submission, attendance, effort and participation
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: Art Majors (declared); students who have previously enrolled but have been dropped from the course, first-year and sophomore students
Expected Class Size: 18
Grading: no pass/fail option, yes fifth course option
Materials/Lab Fee: $350-$500 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.
Distributions: (D1)

Spring 2024
STU Section: 02  W 7:00 pm - 9:40 pm  Frank Jackson
ARTS 100 (F) Drawing I
This inclusive drawing course welcomes students who are completely new to the study of art as well as those with prior experience. Using the tools of perceptual drawing as a shared language, students will embark on drawing inquiries and projects that bridge representational and abstract approaches to image making. Drawing from nature, communally built, immersive sculptural installations, architecture, light phenomena and the human body, students will actively seek new ways to engage with the visual representation of form and space, and the construction of meaning through images. The course will emphasize the craft of drawing through explorations of classic graphic media--charcoal, chalk, crayon, pencil--as well as experimental materials including foraged botanical inks, unusual drawing surfaces and collage. In addition to demonstrations and studio exercises the course includes weekly drawing assignments, group critiques, midterm and end of semester projects, and a final portfolio review. Skill-oriented formal learning will be supported by occasional readings, critical discussion and direct engagement with artworks from the drawing collections of WCMA and the Clark.

Requirements/Evaluation: Homework assignments, midterm critique, final critique, a final portfolio submission, attendance, effort and participation
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: Art Majors (declared); students who have previously enrolled but have been dropped from the course, first-year and sophomore students
Expected Class Size: 18
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $350-$500 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.
Distributions: (D1)

Fall 2023
STU Section: 03  R 9:55 am - 12:35 pm  Alyssa Pheobus Mumtaz

ARTS 103 (F)(S) Visual foundations: Locating the Self
In this hands-on, introductory level studio art class, students will learn methods in drawing, ink painting, collage and assemblage while being introduced to a variety of methods of organizing two and three-dimensional space (from Renaissance one-point perspective, to the multiple point perspective used in Indian miniature painting, the horizontal organization of space in Japanese scrolls and the topographical view of road maps). In this class, we will explore who we are in relation to each other, the places we come from and the place in which we find ourselves. Artmaking will be used as a means of mapping the self as a relational entity, while considering how each mode of organizing space brings its own constraints and possibilities.

Requirements/Evaluation: projects, assignments, class participation, attendance
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: first-years and sophomores
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $300-$500. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.
Distributions: (D1)

Fall 2023
STU Section: 01  W 1:10 pm - 3:50 pm  Rit Premnath
Spring 2024
STU Section: 01  T 1:10 pm - 3:50 pm  Rit Premnath

ARTS 105 (S) Video Essay
This introductory studio course engages the genre of video essay within contemporary art. Situated at the intersection of video art and documentary film practices, video essay explores the interval between politics and aesthetics, fiction and non-fiction, in an attempt to create a personal language with which to describe the tension between social, political, and personal realities. Students gain hands-on video production experience with editing, cinematography, and sound design grounded in the editorial and rhetorical strategies of video essay which articulate a language of relationships: between sound and image, artist and subject, fact and feeling, memory and language. Self-referential and reflexive, video essay operates in a space of inquiry incorporating poetry, philosophy, autobiography, politics, and cultural studies. The course examines how artists working with video essay move across disciplines in pursuit of a renewed relationship to processes of observation, memory, and recognition. Assignments emphasize the creation and presentation of an original body of video work for critique, alongside research, writing, and discussion of theoretical texts and artworks, including the work of Chris Marker, Hito Steyerl, Trinh T. Minh-ha, Harun Farocki, Agnès Varda, Arthur Jafa, Barbara Hammer, Derek Jarman, Renee Green, Moyra Davey, among others.

Requirements/Evaluation: Quality of work produced, depth and quality of investigative process, participation in critique and discussion, class citizenship, attendance

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: art majors

Expected Class Size: 14

Grading: yes pass/fail option, no fifth course option

Materials/Lab Fee: $250-$350 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

Not offered current academic year

ARTS 110 Digital Photography, Identity and Place

This introductory level course offers an in-depth exploration of digital photography. Emphasis is placed on the camera's relationship to the body and constructions of identity. Students will develop a fundamental control of photographic techniques through various exercises, experimentation, field, at home and/or studio experience. Students will learn how to use DSLR cameras and introductory level Photoshop editing techniques to create a personal body of work that examines the medium's role in representing various identities. Additionally, visiting artist lecture presentations and thorough critique will foster theoretical and visual literacy for the analysis of works. How is photography implicated in the construction and performance of identity? How does it complicate national, cultural, gender, race and sexual identity.

Requirements/Evaluation: Students must budget roughly ten hours per week outside of class for photographing and editing; Students must complete all projects on time. Students will create a photographic body of work with accompanying artist statement. Students must be active participants during class discussion and critiques.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Art majors who have not yet taken an introductory photography class

Expected Class Size: 12

Grading:

Materials/Lab Fee: $250 standard lab fee charged to term bill

Distributions: (D1)

Not offered current academic year

ARTS 111 (S) Introduction to Video Art

This course introduces students to video art as a time-based medium, encompassing both audio and visual elements, with vastly diverse, interdisciplinary approaches. Students will learn the basics of camera, sound, lighting, and editing alongside critical historical and aesthetic approaches to video art. Coursework includes screenings and discussions, hands-on tutorials, production assignments, readings and active participation in peer feedback. While this course engages collaborative learning, students are expected to do a significant amount of solo work outside of class as well as a self-directed final project. Students' final projects will explore the relationship between the technical and conceptual, through a
subject matter of their choosing.

**Requirements/Evaluation:** Completion of all weekly assignments and final project, participation in critique and discussion, two writing assignments, class citizenship, attendance

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** Preference will be given to art majors, sophomores, juniors, and seniors in that order. In case of over enrollment, there will be a waitlist.

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $250 Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D1)

### ARTS 112 (F)(S) Introduction to Documentary Filmmaking (DPE)

In a 2010 article, *New York Times* film critic A. O. Scott described documentary film as ‘heterogeneous to the point of anarchy.’ However, in the intervening decade, documentary has become simultaneously more commercial and formulaic. This course takes this notion of heterogeneity to heart, acquainting students with a wide array of creative approaches and key debates in documentary film. In addition to a historical, ethical and critical foundation in the field of documentary, students will acquire a basic grounding in the fundamentals of video production, including cinematography, sound and editing. Course requirements include class attendance and regular critiques, weekly film screenings and readings outside class, 2-3 minor filmmaking exercises, and major assignments in the form of 3-4 short nonfiction video projects.

**Requirements/Evaluation:** timely and committed completion of assignments, attendance and participation

**Prerequisites:** none

**Enrollment Limit:** 16

**Enrollment Preferences:** majors have priority

**Expected Class Size:** 16

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $250-$350. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** The practice of documentary film is centrally bound to ethics—who and how we represent onscreen. Historically, documentary has tended to gaze on marginalized communities in problematic ways; this course will make issues of power, race, class and representation central to the production of documentary media.

### ARTS 114 (S) Art into Activism

This introductory, hands-on studio art class will examine how art can be engaged with activist and political causes. Can art be created from social or political ideas? Is all political art merely propaganda? What makes a work "political"? What does artistic work that is topical, informed, and critical look like? What artistic strategies might be deployed for ends that are not considered art? In addition to looking at various works by contemporary artists and used in political movements, the majority of the class will be devoted to working on weekly assignments that will introduce students to 2-D image making, performance, and low tech video that will engage with the above questions. This class is a project based studio class which will require hours outside the class for the weekly assignments.
ARTS 115  (F)  Sculpture: Poetry with Objects
Sculpture employs the body and has the power to communicate via the physical world in powerful ways. ARTS 115 will offer instruction in how form and meaning can be created through the use of objects. Similar to poetry, where a particular word carries a specific history, meaning, and power, objects also contain complex associations. Through the process of alteration, transformation, and manipulation, sculpture reveals the narrative power of form and materials. This course will provide a historical framework for how sculpture—particularly contemporary works—have expressed ideas, while also providing instruction on techniques and methods used to build, dismantle, rearrange, combine and create art with objects as the inspiration. The ultimate goal will be to develop your individual voice and imagination, become familiar with processes and techniques, and to become fluent in generating meaning that is important to you. We will be integrating the study of a variety of artists whose work utilizes objects in their sculpture such as the work of: Jean Shin, Marcel Broodthaers, Dario Robletto, Doris Salcedo, Robert Gober, among others. Approximately two thirds of the term will consist of weekly meetings between myself and a pair of students, however, periodically throughout the term, we will meet with the entire class for PowerPoint presentations, demonstrations, visiting artist talks and group critiques.

Requirements/Evaluation: Art is a visual language, which speaks to us through our sense of sight and implied touch; you will be evaluated first and foremost on your ability to speak powerfully in this language. Grading also takes into account: effort, attitude, creativity, studio responsibility and participation. Attendance and punctuality is expected for the course. If you miss more than one unexcused class your grade will automatically drop a letter grade. All work must be completed by the final critique.

Prerequisites: None.
Enrollment Limit: 10
Enrollment Preferences: Declared and perspective art majors have preference.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: There will be a lab fee to cover a material cost for the class. TBA
Distributions: (D1)
Not offered current academic year

ARTS 117  (S)  Paint! An Introduction to Pigments and Binders
This introductory studio course offers a materials-based approach to painting. Guided by ancient artists' accounts and contemporary craft manuals, we will begin by making our own paints using non-toxic and inexpensive ingredients, combining earth and mineral pigments with binders like egg, oil, sap, casein, and wax. Experimenting with mark-making on a broad range of found and prepared substrates, we will carefully observe the affordances and constraints of each medium. Assignments will be simple and iterative: the semester-long repetition of a single, uncomplicated form will allow us to focus entirely on qualities of hue, texture, weight, transparency and opacity. Supplementary readings, museum visits, and group discussions will touch upon histories of pigment extraction and circulation as well as the production and evolution of paint media with special attention to environmentally gentle and sustainable practices. This course will include an introduction to the rare and ancient technique of buon fresco.

Requirements/Evaluation: Grading will take into consideration attendance, the timely completion of weekly studio assignments, the maintenance of a descriptive journal, engaged participation in studio exercises and group discussions, a demonstrated willingness to experiment, and active stewardship of our collaborative studio environment.

Prerequisites: None
Enrollment Limit: 15
ARTS 119  (S)  Miniature Stories
What is the American experience? What does an American look like? This course uses miniature set and puppet building techniques, using easily manipulated materials in order to tell stories about the American experience. Greer Lankton’s queer puppets and Charles Ledray’s intricate thrift store men’s suits use miniaturized scale as a vehicle to expand our understanding of the American experience through highly focused visuals. Students will explore how scale and point of view can be used to explore power dynamics, identity, and mythology. Students develop their own research methods based on short writing assignments, image and object collection, and material exploration.

Requirements/Evaluation:  Students’ production methods will incorporate scaled building techniques, introductory lighting, and staging processes towards the completion of a singular narrative work built in miniature. Students will also design and complete a shortlist, a collection of point-of-view stills that explore their chosen narrative in sequence. The course will culminate at an end of semester online exhibition of their work.

Prerequisites:  none

Enrollment Limit:  12

Enrollment Preferences:  Art majors

Expected Class Size:  12

Grading:  no pass/fail option,  no fifth course option

Materials/Lab Fee:  $75.00 lab fee

Distributions:  (D1)

Not offered current academic year

ARTS 121  (F)  Performing Identities: Introduction to Video and Performance Art
This course introduces students to the intersections of video and performance art with a focus on the unique history of artists performing for the video camera. Engaging critical questions about the politics of the body, this course explores the wide range of ways artists have performed their identities through a direct engagement of the camera and centers the lineages of BIPOC, queer and feminist art. Students will learn video basics (camera, sound, lighting, and editing) while exploring the elements of performance art (identity, guise, self/representation, performativity, spectator, site). We will consider viewing contexts such as social media platforms and art institution installations. While no prior experience is required, students will be invited to engage their interests and experiences in performance, including theater, dance, music, speech/debate, comedy, athletics and more. Students are expected to do a significant amount of solo work outside of class as well as a self-directed final project exploring a subject matter of their choosing.

Requirements/Evaluation:  Completion of all weekly assignments and final project, participation in critique and discussion, class citizenship, attendance

Prerequisites:  None

Enrollment Limit:  16

Enrollment Preferences:  Preference will be given to art majors, sophomores, juniors, and seniors in that order. In case of over enrollment, there will be a waitlist.

Expected Class Size:  16

Grading:  no pass/fail option,  no fifth course option

Materials/Lab Fee:  $250 Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions:  (D1)

Fall 2023
ARTS 122 (S) Photography, Identity and the Absence of Representation

This introductory level course offers an in-depth exploration of the DSLR camera and image by utilizing photographic digital technology. Emphasis is placed on the camera's relationship to the body, domestic space and constructions of identity. Students will develop a fundamental control of photographic processes through technical exercises and at-home/on-campus and online experimentations. Students will learn how to use DSLR cameras, editing techniques and photographic curation to create a portfolio and exhibition reflecting on a personal body of work that examines the medium's role in representing (or not representing) identities. There will be weekly readings and in-depth critiques to foster theoretical and visual literacy for the analysis of works. How is photography implicated in the construction and performance of identity? How does it complicate national, cultural, gender, race and sexual identity?

Requirements/Evaluation: Students midterm and final critique of their body of work and accompanying artist statement

Prerequisites: Art majors who are interested in and are doing work in identity politics.

Enrollment Limit: 12

Enrollment Preferences: Art majors who have not yet taken an introductory photography class

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $250 standard lab fee charged to term bill

Distributions: (D1)

Spring 2024

ARTS 123 (F) Drawing Dreaming

Sometimes a drawing is a recreation of what is right in front of us, accepted and understood by us both. And sometimes a drawing is what we have never seen before/what doesn't yet exist, but want very much to be real: a house, a garden, a truth, accountability for an injustice, a declaration, a dream, a scream, a monument (or its absence), a sculpture, an institution, a circumstance, a love, futures. In this class, we will use mark making as a tool for making such imaginings a little more solid, and clear. Each week we will look at artworks (or what could be perceived as that) that embody dreaming, envisioning, manifestation, and transformation, including but not limited to the spectacular public drawings now part of Richmond's confederate monuments, Shaker gift drawings, house and garden plans, protest signs, commemorative murals and memorials, flags, emblems, dream entries and tarot decks. Every other week, our class will host visitors whose art+work+life has inspired this course, including artists, educators, and organisers. Though this isn't a traditional drawing class, it will include introductions to various foundational techniques and tools, along with intensive drawing exercises before delving into self driven assignments.

Class Format: All students will be adequately trained in documenting their work for weekly reviews with the instructor.

Requirements/Evaluation: weekly assignments, mid-term project, final projects, attendance and participation, generous presence

Prerequisites: Previous drawing experience preferred and/or completion of Drawing 100.

Enrollment Limit: 17

Enrollment Preferences: Art/Art History majors

Expected Class Size: 17

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $100

Distributions: (D1)

Not offered current academic year

ARTS 125 (S) Introduction to Fresco Painting Materials and Techniques

This course offers a rare introduction to the materials, methods, and chemistry of buon fresco: the ancient craft of wall-painting with earth and mineral pigments onto freshly applied lime plaster. Fresco painting is an emphatically collaborative tradition, and as such we will treat the studio-classroom as
a shared laboratory for collective study and practice. Working together, students will gain hands-on experience with every step of the fresco-painting process: we will grind earth and mineral pigments, sift riverbed sand, mix and apply lime plasters, and paint with pigment suspensions using bristle brushes while following recipes and instructions gleaned from artists’ accounts and painting manuals. Testing a range of fresco techniques on a series of portable panels as well as on a classroom test-wall, students can expect to develop both troweling and painting skills, and to discover the nuances of color and texture that can be achieved through various combinations of natural pigments and plaster. The course will encourage descriptive and instructional writing, diagrammatic drawing, and photographic documentation as tools for craft stewardship and technical knowledge-sharing. Prior experience with drawing and/or painting will be helpful, but are not required. Lectures will provide a historic overview of fresco painting and its uses across cultures, and students will have an opportunity to explore a particular material, chemical, environmental, or socio-political aspect of the centuries-old wall-painting technique through the development of a final essay.

Requirements/Evaluation: Students are expected to produce a series of small fresco studies; to maintain a descriptive journal of processes, recipes and observations; and to submit one final essay (5-7 pages). Grading will also take into consideration attendance, the depth and quality of the investigative process, active participation in studio exercises and group discussions, and a demonstrated willingness to collaborate with peers.

Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Current and prospective Art Studio and Art History Majors. If over-enrolled, a wait-list will be maintained. Wait-listed students should submit a brief description of interest to the instructor.

Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $400-$600. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)
Not offered current academic year

ARTS 126 (F) Introduction to Digital Photography: Contemporary Photography Practices
This introductory studio course focuses on the making, editing, and printing of digital photographs. Rooted in the creation of original artworks, the course exposes students to the digital camera as a tool for developing a personal visual syntax and a body of work throughout the semester. We study contemporary photography practices and issues from the 1970's to the present, including portraiture, abstraction, documentary, performance, and more. The course oscillates between lectures and class discussions, critiques, technical demonstrations, and studio work-time. Through discussions and the study of artworks and texts, students will develop visual literacy skills to aid in the critical analysis, and creation, of photographs. Technically, students will learn to understand light and exposure, composition, color correction, a digital workflow through Adobe Bridge and Photoshop, and inkjet printing.

Class Format: Studio, seminar, lecture
Requirements/Evaluation: Students must budget 8 hours a week outside of class to photograph, edit, print, read, and write. Students will be evaluated on their effort and active participation, contributions to discussions and critiques, midterm critique, final project, and artist statement.
Prerequisites: N/A
Enrollment Limit: 12
Enrollment Preferences: Art majors who have not yet taken an introductory photography course
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $300 Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.
Distributions: (D1)

STU Section: 01 T 1:10 pm - 3:50 pm Genesis Baez

ARTS 127 (S) Introduction to Digital Photography: Photography & Identity
This introductory studio course focuses on the making, editing, and printing of digital photographs, with particular emphasis on understanding
photography’s crucial role in shaping, revising, and visualizing identities. Rooted in the creation of original artworks, the course exposes students to the digital camera as a tool for developing a personal visual syntax and a body of work throughout the semester. The course oscillates between class discussions, critiques, technical demonstrations, and studio work-time. We’ll consider how photography intersects with digital technologies, surveillance, media, colonial legacies, race, feminisms, gender, queerness, and archives. Through discussions and the study of artworks and texts, students will develop visual literacy skills to aid in the critical analysis, and creation, of photographs. Technically, students will learn to understand light and exposure, composition, color correction, a digital workflow through Adobe Bridge and Photoshop, and inkjet printing.

Requirements/Evaluation: Students must budget 8 hours a week outside of class to photograph, edit, print, read, and write. Students will be evaluated on their effort and active participation, contributions to discussions and critiques, midterm critique, final project, and artist statement.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Art majors, seniors who have not taken a photography class at Williams, and everyone else.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $300 Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

ARTS 131 (F) Moments of intimacy in photography

This course is an introduction to the black & white silver photographic process. Students will learn the mechanics of the analog 35mm camera, the process of developing films into negatives, and the technique of making perfect prints. By studying different approaches in the works of photographers from the early 20th century to the contemporary period (August Sanders, Walker Evans, Roy DeCarava, Duane Michals, Nan Goldin, Klavdij Sluban, etc.), students will develop their personal vision and create a portfolio related to the theme of the course, moments of intimacy. Finally, the students will experience how the ultimate step of the photographic film process, printing in the darkroom, can serve as an intimate and spiritual practice that reveals their creativity. Each student will exhibit a series of photographs along with an artist statement.

Requirements/Evaluation: One midterm evaluation and a final critique of the student's body of work, including the accompanying artist statement.

Prerequisites: Knowledge of black and white analog photography is preferred but not required.

Enrollment Limit: 12

Enrollment Preferences: Preference goes first to studio art majors needing major credit, then to other art majors, then to any interested student, beginning with first-years, then second-years, then third-years, then fourth-years

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $250 lab fee. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

ARTS 132 (F)(S) Sculpture: The Human Form in Contemporary Art

The figure has an intrinsic relationship to us and our lives and has provided artists with creative challenges throughout time. This course uses the human form as the subject to introduce students to the three-dimensional world of sculpture. It combines the traditional study of figure modeling in clay, with a more contemporary approach to how the figure is used in art today. The first part of the semester has you working from observation while learning how to realistically construct the human figure in the third dimension. You will work in clay, gaining skills in modeling, anatomy, the study of proportion, gesture, texture, negative and positive space, balance and gravity. Within this first portion of the class you will learn to translate directly from observation and gradually move towards abstraction. The second part of the term will provide the opportunity to explore a more open and contemporary approach to how sculpture utilizes the figure to express meaning, explore materials and employ form. You will be introduced to a variety of skills, materials and concepts as you learn to work in the round making a form interesting from all views. Ultimately you will begin to explore and develop the ability to communicate your ideas in a visual manner as well as comment on the human condition.
Requirements/Evaluation: This is an intensive hands-on studio course, requiring working in the sculpture studio outside of scheduled class hours. Grading takes into account the quality and quantity of work produced, depth and quality of investigative process, participation in critiques, and attendance.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Art Studio majors have priority

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $400-$600 to be charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

ARTS 136  (F)  Multiples! An Introduction to Printmaking

Printmaking is the process of creating an image by pressing an inked surface onto paper. In this introductory class, we will work our way through a wide variety of printmaking techniques to create a range of original works. These techniques may include linocut, woodcut, collograph, intaglio, monotype, and book structures. With the help of demonstrations, lectures, museum visits, and artist talks, we will explore the history and contemporary practice of each technique. You will gain familiarity with the printshop's tools and equipment; develop a sensitivity to different kinds of papers and inks; practice the proper usage of materials; and learn how to work in a shared and cooperative environment, collectively. Though introductory, this is a process based class with rigorous assignments. Absolute beginners can expect to refine their hand, expand their vocabulary of studio skills, gain deeper appreciation of materials, and learn how to plan and discuss their creative vision. For students with prior art experience, the course can help prepare for advanced print classes, and work towards creating a more interdisciplinary print portfolio.

Requirements/Evaluation: Students will complete 4 - 5 main assignments leading up to a final project. Students can expect to put in at least 6 - 10 hours of work every week.

Prerequisites: Letter of interest. If you have prior printmaking / general art experience, please submit 5-10 images of your best work.

Enrollment Limit: 12

Enrollment Preferences: Preference will be given to both prospective and current art majors and a waitlist will be maintained if the class is overenrolled.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $250

Distributions: (D1)

ARTS 200  (F)  Designing Character: Introduction to Costume Design for Performance

Cross-listings: ARTS 200 THEA 305

Secondary Cross-listing

This course introduces students to the processes and techniques of costume design for performance. With a focus on building character through research and design, students will practice developing costume design concepts and using them to illuminate a script, tell a story, and explore characters. Coursework is project-based and will include reading plays, researching period, rendering characters in costumes, expressing design ideas, and sharing and receiving feedback. Class projects will include The Bald Soprano by Eugene Ionesco and Intimate Apparel by Lynn Nottage. Drawing experience not required, but you must be brave enough to try.
Requirements/Evaluation: Project-based costume design work includes period research, drawing, painting, short writing assignments, and presentation. Class participation includes sharing work in process, receiving feedback, and offering generous feedback to classmates.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Theatre and Art Studio majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: does not satisfy any requirements for the Art major

Materials/Lab Fee: $100 lab fee charged to term bill

Distributions: (D1)

ARTS 201  (S)  Worldbuilding: Design for the Theater

Cross-listings: THEA 201 ARTS 201

Secondary Cross-listing

This course examines designers' creative processes as they investigate a theatrical text and then dream-into-being the fictional worlds of a hypothetical production. Class will consist of several practical projects in multiple areas of design. We will practice a two-pronged technique in response to a text: developing a personal, intuitive creative response while simultaneously supporting all logistical requirements, resulting in an inventive yet dramaturgically sound design. Emphasis will be on folding this individual work process into a larger group collaboration by refining methods of communication, presentation, and group critique.

Requirements/Evaluation: Coursework is group class discussion and critiques, paired with several hands-on projects throughout the term.

Prerequisites: THEA 101 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Theatre majors

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course is a prerequisite for all upper-level design and directing courses; this course does not count toward the Art major

Materials/Lab Fee: $125 for materials and copying charged to term bill

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

LAB Section: 02  TBA  Sydney Maresca

ARTS 202  (S)  Painterly Printmaking

This course focused on monotype printmaking, an improvisational and expressive form of painting on a plexiglas plate to make a unique print. Students will learn a variety of painterly and experimental techniques including but not limited to: monotype, stencil, collagraph, embossment, chine-colle, and transfer techniques. Weekly assignments will be process-based with no limitations placed on subject matter or content, but students are encouraged to build their own lexicon of imagery and interests. The final third of the course will be a student-guided final project where interdisciplinary approaches will be welcome, such as installation, books/zines, animation, and site-specific interventions (to name a few!). Students
will be expected to work a minimum of 10 hours outside of class in the print studio. $300 to 500 lab fee

Requirements/Evaluation: Students will have weekly assignments, a mid-term portfolio review, and a final project.

Prerequisites: Any ARTS class at Williams.

Enrollment Limit: 12

Enrollment Preferences: Preference will be given to students with some prior experiences with painting or printmaking.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $300-500. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

ARTS 203 Living Masks: Theory and Practice

The Mask is one of the oldest performance tools in the history of humanity - they conceal, reveal, and transform. For millennia they have been used in spiritual contexts like ritual storytelling, dance, and funerals. In our own times, theoretical and protective masks are part of everyday conversations and day to day life. This course will survey, discuss, and experiment with masks thematically and tangibly across histories, cultures, and traditions. There will be practical assignments in creating masks with various mediums such as recyclable materials, cloth, and paper mâché.

Requirements/Evaluation: multiple mask-fabricating assignments, some physical theatrical exercises, short papers, short presentations, a final paper and presentation, committed participation and attendance, students will also be expected to partake in discussions

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Theatre majors; Art Studio majors

Expected Class Size: 8

Grading:

Materials/Lab Fee: $75 lab fee

Distributions: (D1)

Not offered current academic year

ARTS 206 (F) Installation Art

This intensive studio art course welcomes students invested in any medium--including drawing, painting, sculpture, video and performance--to consider how the placement of materials in relation to each other shapes the meaning of an artwork. We will expand beyond traditional exhibition strategies by exploring the possibilities that various locations hold, both indoors and outdoors. When, how and where we see an artwork shapes the meaning of our encounter. Through workshops, presentations and studio projects, we will deepen our consideration of material relations within an artwork while also learning how to choreograph a viewer’s encounter with our artwork. This course will introduce students to global trajectories of Installation Art that include the varied practices of Pope L., Kishio Suga, Sheela Gowda, Xu Bing, Abraham Cruzvillegas, and Ann Hamilton, to name a few.

Requirements/Evaluation: projects, assignments, class participation, attendance

Prerequisites: students are required to have taken at least one ARTS 100-level class in sculpture, or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Art Studio Majors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $400-$600. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

STU Section: 01 T 1:10 pm - 3:50 pm Rit Premnath
ARTS 212 (S) Sculpture and Being a Sensorial Being

Experiencing Sculpture is often primarily considered in terms of its visual components, but there are many senses at play. How do the different senses overlap and weave together to create the multifaceted and multi-dimensional experience we understand as Visual? How, in isolating a sense, can we alter the way we understand an experience, an object, or each other? What can taste tell us about seeing? How can silence change our relationship to time? This introductory, hands-on studio art course will examine how sculpture - in its making, conception, and reception - engages the full range of senses and further, how the artist manipulates and plays with these senses to influence form and meaning. In class we will explore the work of artists and thinkers whose work address the senses in some manner. We will engage in in-class exercises and games that deprive or enhance our sensorial experiences to consider and re-consider how we come to know the world and relate to its matter through our unique bodies and varying receptors. Students will develop a competence in fundamental sculptural processes including and not limited to woodworking and welding techniques. Students will cultivate a fluency in the contemporary discourse around sculptural concerns and a proficiency in sculptural critique. Students will work both independently and collaboratively to create a body of work that explores our varying capacities to experience and create art.

Requirements/Evaluation: the quality of the work produced as well as participation in critiques, and attendance

Prerequisites: any ARTS 100-level course or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Art majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $300-$400 lab fee charged to term bill (dependent on class usage)

Distributions: (D1)

ARTS 215 (F) Sustainabuilding (verb)

Sustainability considerations figure prominently (and always have) in good building design. This architectural design studio will include instruction, research, and reading about current design and energy strategies. These lessons will be applied in two or more design problems. Drawings and models will be critiqued in class reviews with outside critics.

Requirements/Evaluation: quality of design and presentation

Prerequisites: none but ARTS 220 and/or ENVI 108 are recommended; permission of instructor is required; preregistration does not guarantee admission to the course

Enrollment Limit: 15

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: TBD lab fee charged to term bill

Distributions: (D1)

Not offered current academic year

ARTS 222 (S) Critical Practice of Architecture: Theories, Methods, and Techniques (DPE)

Cross-listings: ARTS 222 ENVI 202

Primary Cross-listing

In this course, students will transform an architectural or urban space through design interventions that contribute to reorienting public perception, imagination, and politics. Skills taught include methods and techniques for critical architecture practice, including architecture drawing, 2D graphic design, and 3D modeling (digital and physical). Students will also build on design strategies (e.g., spatial hijacking and détournement), community architecture, and visual techniques to rethink normative understandings of space and time. Through selected readings and discussions, we will examine key ideas that have inspired design thinking and activism. The class culminates in a presentation to external reviewers and a final exhibition.

Requirements/Evaluation: This is an intensive studio tutorial requiring working in the architecture studio and/or PC lab outside of scheduled class hours. The class will meet in large and small groups throughout the semester for critique and discussion. Assignments include weekly discussions and
design projects requiring drawings and model design. Final project: design project to reorient public perception, imagination, and politics. Evaluation will be based on the design quality at theoretical/conceptual levels.

**Prerequisites:** Drawing I or permission of instructor.

**Enrollment Limit:** 12

**Enrollment Preferences:** Studio Art majors, Art History and Studio Art majors, Envi majors and concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $350-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 222(D1) ENVI 202(D1)

**Difference, Power, and Equity Notes:** This design studio invites students to think critically about how power, equity, and difference are manifested through the built environment. It will equip them with the tools to become active agents of change through design activism. We will use design as a cultural practice and creative technique to envision more just and equitable futures through interventions in architectural or urban spaces.

**Attributes:** ENVI Humanities, Arts + Social Science Electives

Spring 2024

**STU Section:** 01  T 9:55 am - 12:35 pm  Giuseppina Forte

**ARTS 223 (S) Fresco Mural**

This studio course invites students to encounter the pleasures and challenges of creative collaboration through the planning and development of a co-authored buon fresco mural. With lesson plans structured around a single semester-long project, this course provides a rare introduction to the materials, techniques, and chemistry of fresco painting, as well as an historical overview of the ancient wall-painting medium. While each student will have opportunities to explore fresco mark-making individually on small portable panels, this course is designed to emphasize the historically collaborative and site-responsive nature of fresco painting. As such, the studio-classroom will generally be treated as a shared workshop for collective work. Throughout the course the student community will be challenged to maintain a spirit of improvisation while organizing and executing a long-term project. Students will acquire hands-on experience mixing lime plaster, grinding earth and mineral pigments, and preparing pigment suspensions for a large-scale fresco mural. Considering the wall-painting as a small part of a dynamic whole that includes an architectural substrate and a geographic environment, we will look at varied examples of site-bound wallworks, and will discuss their inherent connection and vulnerability to their social, infrastructural, and climatic conditions. To conclude this course, we will consider various strategies for in-situ wall-painting preservation in order to make an informed plan for the stewardship and/or transformation of our co-authored fresco.

**Requirements/Evaluation:** Students are expected to produce a series of written responses, preparatory drawings, color studies, and material studies leading up to the execution of a single co-authored fresco mural. Grading will take into consideration attendance, active engagement in studio exercises and group discussions, and a demonstrated willingness to collaborate with peers.

**Prerequisites:** 100-level studio art class completed, or a description of interest in the fresco process and/or collaborative work.

**Enrollment Limit:** 13

**Enrollment Preferences:** Enrollment preference will be given to Seniors, Juniors, and Sophomores, in that order. If over-enrolled, a wait-list will be maintained. Wait-listed students should submit a brief description of interest to the instructor.

**Expected Class Size:** 13

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $200-$350 charged to term bill

**Distributions:** (D1)

Not offered current academic year

**ARTS 225 (S) Video Ecologies**

This studio course in video art investigates human connection with landscapes and multi-species worlds, developing strategies by which our
environment is witnessed, altered, and negotiated through videographic acts. Video ecologies consider our environment as relational and invested with notions of identity. What can immersion in our environment as apprehended through the senses (including and beyond vision) reveal about historical and lived experience? How might video serve to open up new understandings, relationships, entanglements, accountabilities? This course will critically examine socio-political and personal dimensions of video art through readings and discussion engaging with environmentalism, intersectional feminism, feminist technoscience, queer theory, crip theory, and postcolonialism. With in-depth instruction on technical and conceptual strategies used in video art, the emphasis of the course will be on the creation of an original body of work that includes several short video assignments and a substantial final video or sound work grounded in research on a specific ecological subject chosen by the student. In-class tutorials provide hands-on experience with lens-based production strategies in the context of historical and contemporary examples of video art that explore land as a site for multiple temporalities and multi-species entanglements.

Requirements/Evaluation: quality of work produced, depth and quality of investigative process, participation in critique and discussion, class citizenship, attendance.

Prerequisites: 100 level video course or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Art majors with preference to seniors, juniors, sophomores in that order.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $250-$350 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

ARTS 226 (F) Intermediate Photography: Photography and the Senses

In the speed of a digital world, what can a slower, more tactile engagement with our materials and surroundings teach us about ourselves? This studio course builds on the skills of Introduction to Digital Photography through a multi-sensorial, tactile, and experimental approach. Students learn more advanced techniques in Photoshop and inkjet printing, and explore various paper types, material possibilities, and installation techniques. Through a series of creative assignments, we tap into all 5 senses (not just vision) in order to unlock embodied knowledge and new ways of seeing. Activities include, but are not limited to, engaging with sound experiments, creative writing games, activities exploring texture and material in nature, collage, and where appropriate, somatic exercises. An emphasis will be placed on play and experimentation, hands-on learning, and class discussions of artwork, texts, poetry, and other media. Students will work to create a series of works on a topic of their choice, to be discussed in regular critiques.

Requirements/Evaluation: Students must budget roughly ten hours per week outside of class for photographing, editing and printing. Students must complete all projects on time. Students must participate in class discussions and critiques, and submit a final project and artist statement.

Prerequisites: Intro to Digital Photography

Enrollment Limit: 12

Enrollment Preferences: Students who have taken Introduction to Digital Photography

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $300 Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

Fall 2023

STU Section: 01 M 1:10 pm - 3:50 pm Genesis Baez

ARTS 230 (S) Drawing II

This intermediate drawing course focuses on technique, style and content. Class sessions will focus on representing the human figure in representational and abstract styles, including cubism and abstract expressionism. Homework projects will focus on developing individual concepts and personal expression. Exercises will include traditional materials on paper as well as non-traditional methods and exercises. The course culminates with an independent project of work in series. Critique sessions will be held every other week in small, breakout meetings, which will be scheduled when class begins.
ARTS 234 (S) A Watery Place: Photography and the Fluid Process of Belonging

"I am a singular, dynamic whorl dissolving in a complex, fluid circulation," writes the feminist and environmental theorist Astrida Neimanis. How may we use lens-based media to think through belonging in more fluid terms? This studio course in photography explores belonging as an unfixed, continuous process. What does belonging mean to you? Can you belong to something that you can't see, or, as the poet Warsan Shire writes, to a place that won't let you stay? How are our attachments shaped, disrupted, and conjured? From Instagram accounts archiving images of communities pre-gentrification, to experimental films about family made with weather-damaged film, to self-portraiture and documentations of a changing landscape, this course explores the nuances that photography and lens-based media may reveal about the political and affective dimensions of belonging. We'll support our process by first studying texts and artworks that situate belonging in relation to place and place-making, geography, and ecology. We'll expand into more fluid embodiments of belonging, particularly in the context of migrations and diasporas, family and community, spirituality, climate change and our futures. We'll speculate how lens-based media may not only visualize experiences of belonging (or non-belonging), but facilitate connection. Technically, students will learn more advanced techniques in Photoshop and inkjet printing, and will explore various paper types, material possibilities, and installation techniques.

Requirements/Evaluation: Students must budget 10 hours a week outside of class to photograph/film, edit, print, read, and write. Knowledge of making photographs or video with dslr cameras, and editing/printing with Adobe Lightroom and/or Photoshop is required. Students will be evaluated on their effort and active participation, contributions to discussions and critiques, midterm critique, final project, and artist statement.

Prerequisites: Art majors who have taken a prior photo class at Williams, or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: Art majors working with themes of identity politics, home, place and the environment in their artwork and/or research.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: $250 - $350. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

Not offered current academic year
individualized formal language appropriate to their subject matter and ideas, they will be encouraged to think about material decision making—their choice of inks, paper, registration, printing technique, etc.—in conceptual terms. The course will culminate with a final project in which students will develop a serial body of work exploring constellations of imagery and the idea of the multiple, taking strategic cues from collage, artist books and other forms of narrative object making. As a rigorously hands-on experience, the course will foreground transformative material processes and self-directed studio practice, while also incorporating slide lectures, occasional readings and engagement with WCMA’s contemporary print collection.

**Requirements/Evaluation**: quality of work, investment of time and focus, active presence in discussions and critique, attendance, willingness to experiment, contributions to collaborative studio environment

**Prerequisites**: Any 100-level studio art course

**Enrollment Limit**: 12

**Enrollment Preferences**: based on portfolio and student questionnaire

**Expected Class Size**: 12

**Grading**: no pass/fail option, no fifth course option

**Materials/Lab Fee**: $300-$550 charged to term bill; lab fees are covered by the Book Grant for students receiving financial aid.

**Distributions**: (D1)

Not offered current academic year

**ARTS 236  (F)(S)  LINOCUTS! An introduction to relief printing**

A subset of relief printmaking, linocuts are images made by carving the surface of soft linoleum blocks. Relying almost completely on our hands, we will learn to work with a variety of cutting tools, controlling their speed and pressure to create bold, clear imagery. The course will include introductions to various methods in lino printing including stencilling, collaging, reduction printing, while also familiarising students with the fundamentals of printmaking inks and papers—how to use them, choose them, modify them. Lectures will consider the history of the block print, its present day interdisciplinary potential, and virtual visits with contemporary practitioners. Students will work towards creating a diverse portfolio that demonstrates fluency across various techniques, using them individually or in combination.

**Requirements/Evaluation**: completion of work, investment of time and focus, active presence in discussions and critique, attendance, inventiveness.

**Prerequisites**: Any 100 level studio art class. If you don't have this but would love to learn printmaking, write to me and share a portfolio of your existing work and/or any creative projects you have been a part of.

**Enrollment Limit**: 12

**Enrollment Preferences**: If the class is overenrolled, a portfolio of your creative work will be requested.

**Expected Class Size**: 12

**Grading**: no pass/fail option, no fifth course option

**Materials/Lab Fee**: $300-$550 charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Spring 2024

STU Section: 01  R 8:30 am - 11:10 am  Pallavi Sen

**ARTS 241  (S)  Introduction to Acrylic Painting: Five Modern Painters**

To learn the fundamentals of 2D design, as well as some of the concepts that inform modern painting, this class will engage the work of Jean-Michel Basquiat, Henri Matisse, Amy Sherald, Alma Thomas, and Stanley Whitney. All distinctly modern, the styles of these artists range from figurative to fully abstract. The class will spend two weeks on each artist, analyzing and copying a work in the first week and producing a visual response in the second. Students will meet twice a week, once as a class for technical demonstration and slide presentations and again in small groups of 3 or 4 for reading discussion and critique. Some demonstrations and supporting materials will be available asynchronously. The goals of the class are to introduce students to basic painting skills like color mixing, brushwork, composition, and palette management, as well as concepts like color theory, modernism and self-expression in a cultural context. So that students may work in a domestic setting, the size of the assignments are modest and the
materials like water-based acrylics, crayons, and paper are manageable. In order to post homework, students will need access to a digital camera.

**Requirements/Evaluation:** Students will be evaluated on technical improvement, conceptual development, expressiveness and inventiveness. Class participation, timeliness and attendance will also be considered.

**Prerequisites:** ARTS 100. Students with significant experience with drawing or painting, but have not completed Arts 100, require permission of the instructor.

**Enrollment Limit:** 12

**Enrollment Preferences:** art majors, sophomores, juniors, seniors, first years

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Materials/Lab Fee:** $350 - $500. Materials will be shipped directly to students.

**Grading:** yes pass/fail option, yes fifth course option

---

**ARTS 241 (F)(S) Introduction to Oil Painting**

This course is designed to introduce the fundamentals of oil painting. A significant portion of class time will be devoted to learning some of the basics of painting, such as the manipulation of color, value, surface, and texture, as well as to exploring the properties of several mediums (what the paint is mixed with to allow for application and drying). This course is focused on giving students access to a range of techniques that they can explore during the semester. We will also spend time looking at each other's work and giving feedback and suggestions as well as studying the work of established artists. Evaluation will be based on evidence of each student's progress, as shown by assignments and long-term projects; attendance and participation in class discussions.

**Requirements/Evaluation:** based on evidence of each student's progress, as shown by the weekly assignments; attendance and participation in class discussions

**Prerequisites:** ARTS 100

**Enrollment Limit:** 14

**Enrollment Preferences:** Art majors, sophomores

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $400-$600 charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

---

**ARTS 244 (F)(S) Taswirkhana: Technique and Practice of Indian Drawing and Painting** (DPE)

**Cross-listings:** ARTS 244 ASIA 239

**Primary Cross-listing**

Small in scale but vast in its representation, the world of Indian painting is famous for its stylized naturalism and mastery of line. It is an artistic practice whose legacy stretches back to at least the first century CE. This studio course will introduce students to the technique and practice of traditional Indian drawing and painting. The course is designed as a workshop in which students will learn to use materials and techniques of this art form. By engaging with a non-western traditional practice, the aim of the course is to expose students to a pluralistic engagement with art making. Students will learn paper and pigment preparation, as well as the basics of traditional drawing and painting techniques. The class will learn from studying a selection of original masterworks of Indian art from the Williams College Museum of Art that will be displayed in the Object Lab. Working with original artworks will help students situate the hands-on study of Indian painting practice alongside exemplary historical examples.

**Requirements/Evaluation:** Class participation, discussions and critiques, successful completion of all assignments and attendance
Prerequisites: none, open to all students
Enrollment Limit: 18
Enrollment Preferences: If the course over enrolls preference will be given to studio art and art history majors.
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $400
Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
ARTS 244(D1) ASIA 239(D1)

Difference, Power, and Equity Notes: The course invites students to engage with a pluralistic studio practice that is in stark contrast to mainstream modern and contemporary art practices. The course will follow a traditional, Indian workshop-style format which has its own particular rules and unique visual vocabulary. From the material preparation of pigments, paper and brushes, to the techniques of drawing and painting, the course will introduce students to an alternative, non-Western, mode of art making.

Spring 2024
STU Section: 01    M 7:00 pm - 9:40 pm     Murad K. Mumtaz

ARTS 251  (S)  The Personal Documentary  (DPE)
In this course, we will survey the terrain of personal documentary in all its complexity--its marginal roots, and its current mainstream appeal. Examining a wide array of formal approaches from diary films, to archival excavations, to first-person odysseys, we will ask: what does it mean to tell a story that is personal, vulnerable, ethical? How is the current watershed moment of COVID provoking us to re-imagine our ideas of self and community, private and public? How to avoid predictability and narcissism, and instead use self-reflection productively? How do race, sexuality, class and gender inflect personal filmmaking? Major assignments will include 3-4 short videos; supplementary assignments include a daily diary, weekly film screenings, and 1-2 readings per week. In order to comply with social distancing mandates, the majority of this course will occur online and production assignments will be designed to ensure maximum student safety. While students will have access to campus equipment and lab space, assignments will embrace the possibilities of at-home, DIY approaches to filmmaking.

Class Format: In order to comply with social distancing mandates, the majority of this course will occur online and production assignments will be designed to ensure maximum student safety. While students will have access to campus equipment and lab space, assignments will embrace the possibilities of at-home, DIY approaches to filmmaking.

Requirements/Evaluation: preparation and participation; 3-4 short videos; daily diary; weekly film screenings, 1-2 readings per week

ARTS 261  (S)  Design and Environmental Justice  (DPE)
Cross-listings: ARTS 261 ENVI 260
Secondary Cross-listing

This seminar/digital art studio offers key literature to examine the relationship between design and environmental justice. It will help build a vocabulary to study the environment as disputed terrain between technological fixes and issues of race, ethnicity, gender, sexuality, class, and colonial status. Students will develop textual/graphic projects about a chosen case study aiming to reorient public perception and imagination around environmental justice. Case studies include contemporary issues like "natural" disasters, eco-cities, and urbanization in the Global South and North. Skills taught include design-thinking and collaborative design, digital art (Photoshop), and participation in collective reviews and public presentations. The class culminates in a presentation to external reviewers and a final exhibition.

Class Format: Because this seminar is cross-listed with ARTS, there is a studio component (short assignments and final project).

Requirements/Evaluation: Active presence in class discussions and presentations, quality of work, depth and quality of the investigative process, willingness to experiment, and contributions to a collaborative learning environment. This intensive seminar/digital art studio requires working in the architecture studio and/or PC lab outside of scheduled class hours.

Prerequisites: Drawing I, ENVI 101, or permission from the instructor.

Enrollment Limit: 15

Enrollment Preferences: Envi majors and concentrators, Studio Art majors, Art History and Studio Art majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $300-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 261(D1) ENVI 260(D2)

Difference, Power, and Equity Notes: This seminar/digital art studio examines the interrelationship between design and environmental justice from an intersectional perspective. It encourages students to develop a critical understanding of the role that technical rationality, devoid of ethics and respect for difference, plays in producing racist, heteropatriarchal, and ecocidal forms of oppression. In parallel, we will explore place-based practices that counter neoliberal and extractivist approaches to the (built) environment.

Attributes: ENVI Humanities, Arts + Social Science Electives EVST Culture/Humanities

SEM Section: 01 TR 8:30 am - 9:45 am Giuseppina Forte

ARTS 266 (S) Intermediate Digital Photography: Contemporary Photo Practices

This course builds on skills developed in Intro to Digital Photo, with a focus on contemporary photography practices and issues from the 1970's-present. The emphasis of the course will be on the creation of photographic and lens-based artwork, to be discussed in critique. We will critically engage various aesthetic, cultural, social, and political points of view through the study of artworks, texts, publications, physical prints, films, and other media. Technically, students will learn more advanced techniques in Photoshop and inkjet printing, and will explore various paper types, material possibilities, and installation techniques.

Requirements/Evaluation: Students must budget 8-10 hours a week outside of class to photograph, edit, print, read, and write. Students will be evaluated on their effort and active participation, contributions to discussions and critiques, midterm critique, final project, and artist statement.

Prerequisites: Introduction to Digital Photography at Williams College

Enrollment Limit: 12

Enrollment Preferences: Art majors, seniors who have not yet taken Intermediate Photo, anyone else

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $300 Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

Spring 2024
ARTS 287  Design for Film & Television
The production designer is responsible for creating, controlling, and managing 'the look' of films and narrative television from page to screen. This hands-on course explores the processes of production design, art direction, and lighting direction processes as related to design for film and television. From initial Production Design sketches and ‘Feel-Boards’ to accommodating desired cinematographic angles when designing a studio set, design for film requires a designer to shape an entire visual world while keeping in mind the story as a whole. The goal of this course is to provide an initial understanding of the Production Design process in practice through studio work and instruction.

Class Format: This class will be a combination of instruction and in class studio work.

Requirements/Evaluation: committed participation in class discussion and feedback; and the thoughtful, timely completion and presentation of multiple design projects of varying scales, focusing on scenic and lighting design, considered both individually and when working in tandem

Prerequisites: THEA 201, THEA 285, ARTS 100, or permission from instructor with equivalent experience

Enrollment Limit: 12

Enrollment Preferences: In instance of over-enrollment, preference will be given to Seniors, Juniors, & Sophomores in the Theatre Majors & Art Majors

Expected Class Size: 8

Grading:

Materials/Lab Fee: up to $125 for materials and copying charged to term bill

Distributions: (D1)

Not offered current academic year

ARTS 288  Storyboarding: Building Visual Narratives
In this class, we will explore the process of sequencing images to create meaning over time. We will examine and research visual texts with episodic and sequential structures (such as picture books, comics, albums, film/animation, theatre, and opera) and interpret them into storyboards of various 2D and/or 3D visual media. We will focus on developing and communicating complete dramaturgically-based visual ideas with an eye towards conceptual artistic propositions. This class is geared towards all students interested in directing/writing/designing/creating for time-based visual mediums such as film and theatre. No previous artistic expertise is required, but the majority of the work here will be hands-on art projects, presentations, discussions and group critiques in a studio art class format.

Requirements/Evaluation: Coursework is comprised of text comprehension, group discussion/critique, and biweekly studio-style art projects.

Prerequisites: THEA 101 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: theatre majors, art majors

Expected Class Size: 8

Grading:

Materials/Lab Fee: materials and copying up to $125 to be added to the students' term bill

Distributions: (D1)

Not offered current academic year

ARTS 303 (F)  Public Address System: Art, Language, Action
This interdisciplinary tutorial engages the role of language in art, as students examine the role of text, speech, and gesture within their own work. The course engages the material and transformative effects of language in and alongside artworks, exploring the link between words and actions, the convergence of personal and political through speech and writing, and the role of the reader/viewer/receiver. Students engage a wide range of tactics for working with language within and alongside creative studio practices, through coursework that combines intensive studio work, writing, reading, and discussion. The tutorial format allows for a wide variety of media and approaches. Students will meet weekly with a peer and the professor to review work, as well as several sessions where the entire class will meet for presentation, critique, and discussion. The course demands significant outside studio time as well as maintaining a regular writing practice for the duration of the course. Emphasis is on the creation of an original body of
ARTS 304 (S) Color Theory: The Poetics and Politics of Color

This course will combine studio projects, workshops, and discussions to explore the multiple connotations of color. We will learn to use color not only as an aesthetic and emotional signifier, but also as a means of philosophical and political inquiry. The aim of this course will be to better understand and control the use of color by grappling with a wide range of perceptual, formal, and theoretical approaches. Shorter studio projects— including exercises in observational painting and color interaction— will lead to more sustained projects in which students explore their individual interests. Class presentations and short readings will introduce students to a variety of texts and artists, including Wittgenstein's Remarks on Color alongside Josef Albers' Interaction of Color and Byron Kim's Synecdoche and Hito Steyerl's video Adorno's Gray amongst others.

Requirements/Evaluation: projects, assignments, class participation, attendance

Prerequisites: students are required to have taken at least two ARTS 100-level class, or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Art Studio Majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $400-$600. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

Spring 2024

STU Section: 01  M 1:10 pm - 3:50 pm  Rit Premnath

ARTS 307 (S) The Body Reorganized

This tutorial course asks students to abstract and re-contextualize the body as a topic of conversation in order to expand our discussions about identity. We will discuss the work of artists in which the body remains conceptually central; such as Nick Cave, Saya Woolfalk, Sarah Lucas, Annette Messager. Students will look to their own lived experiences and supporting communities, research historical precedence for contemporary perspectives on identity, and find, through written and collected research, additional cultural work centered within multi-layered and non-normative experiences. Students will react to readings, Christian Enzensberger's "Smut: An Anatomy of Dirt", Mary Douglas' "Purity and Danger", etc. Students will design their own methods of making with foundational introductions to flexible plane paired with movement-based workshops including stop motion animation shot with cell phones. Students will construct a structural and/or wearable work that references the body, it's topographies, and potential for performance/pose. Research will culminate in an online exhibition documenting student projects through photographic stills and video.

Requirements/Evaluation: Students will construct a structural and/or wearable work that references the body, it's topographies, and potential for performance/pose. Research will culminate in an online exhibition documenting student projects through photographic stills and video.

Prerequisites: none
ARTS 308 (F) Contemporary methodologies in History and Practice

Cross-listings: ARTS 308 ARTH 307

Secondary Cross-listing

This course explores contemporary methodologies that traverse both collective research and artistic production, providing an overview of theoretical and practical frameworks in contemporary art through case studies, close reading, and interdisciplinary artistic projects. We will speculate on the role of the artist, the curator, and the critic as "host" in order to foreground how a care-centered and collective approach to knowledge production can run counter to existing power paradigms, such as patriarchy, colonialism, and capitalism. Building on existing exchanges between disciplines--from feminist thought, queer theory, disability studies, visual and media studies--this hybrid studio and critical theory course presents contemporary art as a field uniquely suited to imagine alternative structures of institutional support and mutual aid. Through engagement with critical and creative texts, as well as a series of making exercises, we will experiment with practices of care and resource-sharing through art production, and imagine how arts practitioners can take a critical position that counters prevailing logics of individualism and enclosure.

Class Format: Studio

Requirements/Evaluation: Grade is evaluated based on class attendance and participation, completion of weekly readings and/or making exercises, and one final project that responds to course material and themes.

Prerequisites: At least one prior course in Art History or Studio Art, or permission of instructor.

Enrollment Limit: 15

Enrollment Preferences: History-and-Studio Majors get first priority, then regular Studio Majors and Art History Majors, then any interested student.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: Under $500. Students on financial aid may utilize the book grant to defray any materials costs.

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 308(D1) ARTH 307(D1)

Attributes: ARTH post-1800 Courses

Not offered current academic year

ARTS 310 (F) Hybrid Forms and Collaborative Structures

This course is designed to explore how media such as photography, video, digital media, drawing and performance can become three-dimensional or "sculptural." We will explore the expanded potential of making three dimensional objects, installations, or experiences that are hybrid, interdisciplinary and collaborative. We will look at points of intersection and difference, boundaries both material, historically implied, and imagined. Students will be evaluated on their progress towards building a diverse and unique body of work, while strengthening their technical and analytical skills. This an upper-level course, prior studio classes are strongly recommended and a substantial amount of time spent outside of class is expected to complete projects.

Requirements/Evaluation: evaluation will be based on the quality of work produced, the depth and quality of the content and process, active and thoughtful participation critiques, and attendance

Prerequisites: two studio classes including one 200 level studio art course or a studio sculpture course, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Art majors, prior experience in sculpture
ARTS 313 (F) Inhabited Theatrical Environments: Scenic Design for Performance

Cross-listings: ARTS 313 THEA 315

Secondary Cross-listing
How do you develop a point of view and translate it to the stage? What is an effectively inhabited space for performance? We will explore the different ways a scenic environment provides the visual foundation for live theatrical events in theaters as well as site-specific shows. In addition to working intuitively, this course combines critical readings of texts to contextualize works for the current moment. Research will be at the center of our work -- deepening skills to source, curate, and present personal points of view as designers and creators. This work will serve to expand our imaginations to the aesthetic possibilities of performance. Students will also develop a basic knowledge of model building and drafting. Class time is a combination of discussions of theatrical texts, student project presentations, and studio work.

Requirements/Evaluation: Creative projects preparation and presentation. Active participation in class and critique sessions. Occasional writing assignments to accompany design work.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Theatre majors

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Materials/Lab Fee: Up to $125 in studio costs.

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTS 313(D1) THEA 315(D1)

Not offered current academic year

ARTS 314 (F) Design for the Pluriverse: Architecture, Urban Design, and Difference (DPE)

Cross-listings: ENVI 310 ARTS 314

Primary Cross-listing
The built environment has a critical role in shaping how people enact, reproduce, and refashion social relations over time. Spatial forms, such as architecture and urbanism, are enmeshed in relationships, contestations, and change processes. This studio tutorial investigates the role of different environments in supporting or preventing specific spatial practices and ensuring spatial justice. Using approaches from activist design, students will work in pairs to re-imagine spaces where different ways of being in the world can thrive and coexist--the pluriverse. Students will use a media they master to investigate a theme connecting design, the built environment (architecture and urbanism), and spatial justice.

Requirements/Evaluation: This is an intensive studio tutorial requiring working outside of scheduled class hours. In this course, students can work with the following media assuming that they can master them for a 300-level course: architecture models (physical and digital), photo reportages, 2D collages (e.g., Photoshop), creative writing (image-text booklets), digital humanities (cartographies, countermapping, oral histories, digital archives), and curatorial platforms. Students will participate in tutorials plus a final project of significant scope. Evaluation will be based primarily on the quality of the final project but also on participation.

Prerequisites: 200-level course on students' medium of choice (for the final project) or permission of instructor.

Enrollment Limit: 10

Enrollment Preferences: Studio Art majors, Art History and Studio Art majors, Envi majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option
Materials/Lab Fee: $350-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 310(D1) ARTS 314(D1)

Difference, Power, and Equity Notes: "Pluriverse" refers to various ways of being in the world. This tutorial will employ theories and approaches from design activism and critical environmental studies to analyze the relationship between space and difference, including, but not limited to, race, class, ethnicity, gender, sexuality, religion, and species. Students will apply these theories and approaches to creating place-based projects.

Attributes: ENVI Humanities, Arts + Social Science Electives

Fall 2023
TUT Section: T1    T 11:20 am - 12:35 pm     Giuseppina Forte

ARTS 315 (F) Humor

In this tutorial, students will explore how humor has been used by artists to communicate ideas powerfully, while working to develop their own voice, ideas, and strengths, visually. Students will explore the nuances of humor as a way to effectively communicate ideas through a visual format. Humor will be used as a way to unpack themes around intimacy and estrangement, history and memory, activism and protest, storytelling, play and silliness. Students will explore how one’s vulnerability in their work can become empowering. Being funny is not a prerequisite, nor the goal for this course, though it is absolutely welcome! The class will require good communication and will start with establishing a safe and trusting group dynamic that can encourage experimentation and risk taking. Through assigned readings, screenings, and visits to the WCMA students will explore themes of humor in painting, drawing, sculpture, installation, design, film, comedy performance and literature. This course is interdisciplinary and open to all media. Assignments in this course will be conceptually driven with formal restrictions depending on the students chosen medium. Students are expected to have a working knowledge of their medium prior to taking this course.

Class Format: The class will meet twice a week with one meeting in-person and the second meeting remote. Depending on the class size we may break into smaller independent lab groups / discussion groups.

Requirements/Evaluation: Quality of work produced, depth and quality of investigative process, participation in critique and discussion, class citizenship, attendance

Prerequisites: A previous course in the medium in which you plan to work. Students are expected to have a working knowledge of their medium prior to taking this course.

Enrollment Limit: 10

Enrollment Preferences: art majors or permission of instructor

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: Students will be responsible for purchasing their own materials.

Distributions: (D1)

ARTS 316 (F) Governing Cities by Design: the Built Environment as a Technology of Space (DPE)

Cross-listings: ARTS 316 ENVI 316

Secondary Cross-listing

Like in the classic era, cities of the 19th century were metaphors for government: good government could not exist without good governance of the city. This creative seminar charts the transformation of the built environment (architecture and urbanism) as a technology of space to govern cities and citizens from the mid-19th century until the present. Through debates and case studies across geographies and historical timeframes, we will analyze how regimes of government shape and are shaped by the built environment. The seminar has a studio component that consists of an urban project where students will apply theories and approaches to a real case study using digital art (2D and 3D modeling).

Class Format: Because this seminar is cross-listed with ARTS, there is a studio component (short assignments and final project)
**Requirements/Evaluation:** Active presence in class discussions and presentations, willingness to experiment, contributions to a collaborative seminar/studio environment, quality of work, depth and quality of the investigative process.

**Prerequisites:** ENVI 101 or instructor permission

**Enrollment Limit:** 15

**Enrollment Preferences:** Envi majors and concentrators, Studio Art majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $300-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 316(D1) ENVI 316(D2)

**Difference, Power, and Equity Notes:** Using theoretical perspectives from urban studies, this seminar/workshop explores how the built environment, as a technology of space, contributes to the production of difference, the establishment of certain regimes of power, and the erasure of specific urban histories—mainly those of underrepresented groups. Students will engage in multimedia place-based projects to imagine and create more equitable built environments.

**Attributes:** ENVI Humanities, Arts + Social Science Electives

---

**ARTS 317 (F) Water as Leitmotif: Queer Kinship and Collaborative Acts of Performance for the Camera**

This interdisciplinary tutorial course focuses on water as a poetic and political space of exploration. Through the discussion of critical and creative texts, visual and cinematic analysis, and a direct engagement with water, we will examine water as making material, a healing practice, a site of ecological consciousness, and a form of physical and psychic reorientation. The course content is informed by queer and feminist making practices, as well as contemporary environmental thought and aesthetics. Together we will speculate on new practices of intimacy, kinship and care-based relations through the lens of water and fluidity. Throughout the semester, students will make individual works at the intersection of performance, photographic and moving-image works, and will collaborate with their tutorial partners on a large-scale installation to be documented via still and moving image.

**Requirements/Evaluation:** Students need to know how to use a DSLR camera and/or a video camera. Students will be evaluated on their participation, reading discussions, presentations and final collaborative project.

**Prerequisites:** Art Majors who have taken ARTS 122, ARTS 226, ARTS 225, ARTS 303, ARTS 319 or ARTS 251

**Enrollment Limit:** 10

**Enrollment Preferences:** Art Majors who have taken Photography and/or Video classes

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

Not offered current academic year

---

**ARTS 319 (F) Junior Seminar**

Junior Seminar is a dynamic and immersive class tailored for art majors, aimed at exploring and fortifying their creative interests through a rigorous studio practice, engaging group discussions, and exposure to current themes, topics, materials, and concerns in contemporary art and its allied disciplines. Through a multifaceted approach that includes readings, presentations, lectures by visiting artists, and visits to art institutions and artists' studios, students will be immersed in the vibrant and interdisciplinary nature of contemporary art. They will be exposed to a diverse range of materials, techniques, and historical perspectives on art-making, while also contemplating the ecological, political, personal, cultural, and aesthetic implications associated with each of them.

**Requirements/Evaluation:** quality of work produced, participation in class discussions and critiques, successful completion of all assignments, and attendance
Prerequisites: three studio courses required for the major

Enrollment Limit: 12

Enrollment Preferences: Enrollment is limited to Studio Art Majors and History & Practice Majors.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: Studio Art and Art History and Practice majors are required to take this course in the junior year unless studying abroad during the fall semester

Materials/Lab Fee: The cost of materials will vary depending on the individual student project(s). Students are responsible for the cost of the materials. Students on financial aid can utilize the Book Grant to defray these expenses.

Distributions: (D1)

### ARSS 328 (F) The Art of Almost Nothing

In this studio tutorial class, students will create studio art projects by using materials that are mainly not bought but found, repurposed, and/or overlooked and ubiquitous. In this time of extreme material production and consumption, with a great deal being thrown out and unrecoverable, how can we make intentional, creative meaning from what is around us? This class is concerned with impacts on the environment but also with how consumer culture has wielded profound influence in the current production of studio art. How can we engage with our major concerns—aesthetic, topical, critical—and use what is around us mindfully and creatively with desired impact? Some of the artists we will look at: William Pope L., Ana Mendieta, David Hammons, Tania Bruguera, and the Yes Men. This class is a hands-on studio class with weekly assignments.

Class Format: studio class, 3 hours per week

Requirements/Evaluation: projects, assignments, class participation, attendance

Prerequisites: Three studio art classes of any kind at Williams or previous studio experience with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Any student who has taken at least three or more previous studio art classes at Williams

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: Under $100. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1)

### ARSS 330 (F)(S) Once More With Feeling: Reenactment in Contemporary Visual Culture

Cross-listings: ARSS 330 ARTH 333

Secondary Cross-listing

The urge to relive the past is a fundamental human one, and artists have long drawn upon the ritualistic possibilities of reenactment as a way of interrogating time's uneasy returns and losses. In this course, we will study how artists working in a range of media deploy reenactment in collaboration with others, in order to ask what liberatory potential there might be in choosing to restage—and in many ways, relive—the past. This is a hybrid course with roughly 50% of the course dedicated to critical analysis and 50% studio practice. Case studies drawn from film, theater and other art forms will accompany scholarly readings and short writing assignments, and students will also devise their own reenactment experiments in order to access the embodied and experiential possibilities of the course topic.

Class Format: discussion and studio practice

Requirements/Evaluation: 2-3 written responses, 2-3 creative exercises, class participation, one 12-15-page paper OR one creative final project
**Prerequisites:** must have previously taken one Art History or Art Studio course in any area OR professor permission

**Enrollment Limit:** 14

**Enrollment Preferences:** majors

**Expected Class Size:** 14

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** The cost of materials will vary depending on the individual student project(s). Students are responsible for the cost of the materials. Students on financial aid can utilize the Book Grant to cover these expenses.

**Distributions:** (D1) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ARTS 330(D1) ARTH 333(D1)

**Writing Skills Notes:** There will be considerable focus on writing and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes:** ARTH post-1800 Courses

---

**ARTS 332 (S) Living Things: Bodies and Objects in Sculpture and Performance**

**Cross-listings:** THEA 333 ARTS 332

**Secondary Cross-listing**

This studio course seeks to promote art making that transgresses the boundaries between the visual and performing arts to see a life that animates both bodies and objects. Cultivating various approaches to the experience of embodiment and kinesthetic responses to objects, props, and clothing, students will perform sculptures and sculpt performances indoors and outdoors. Exploring relationships between time and space will support creating works that suggest and invite movement, encourage interaction, and investigate the physical potency inherent in objects, people, and performance. Emphasis will be made on collaborative process and developing dialogue between actors, dancers, and visual artists.

**Requirements/Evaluation:** Evaluation will be based on participation in studio exercises, bi-weekly collaborative group projects, a final solo work to be performed at the end of the semester, and five 2-page reflection essays.

**Prerequisites:** Students must have completed at least one course either in Theatre or in Studio Art.

**Enrollment Limit:** 12

**Enrollment Preferences:** Preference will be given to Theatre and Studio Art majors.

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $200-$350 for supplies such as fabrics, papers, paints, markers, props, etc. as needed.

**Distributions:** (D1)

**This course is cross-listed and the prefixes carry the following divisional credit:**

**Not offered current academic year**

---

**ARTS 333 (S) Narrative Strategies**

In this tutorial, we will examine the use of narrative in a range of fine art practices, which could include painting, drawing, video, sculpture, installation, public art, sound art, and mixed media work. Students who are interested in telling or referencing stories in their work in some way will be given the opportunity to develop their ideas and skills in a challenging studio class. In addition to intensive projects, we will look at and discuss the work of artists like Allison Janae Hamilton, Lorna Simpson, Joe Sacco, Lydia Davis, and Omer Fast among others. One of the aims of this course is to challenge
traditional notions and expectations of narrative. For instance, what could minimally constitute a narrative piece? How do different mediums allow for time to unfold in unexpected ways? How does omission play a powerful role in a narrative? How might the role of the narrator (often so powerful and present in novels and short stories) change in a visual arts context? This is a studio tutorial with an emphasis on demanding, weekly projects. Students will work both in mediums of their choice and be asked to experiment with new, unfamiliar formats. Readings, outside lectures, and screenings may be required in addition to tutorial hours.

**Class Format:** studio tutorial with an emphasis on demanding, weekly projects; students will work both in mediums of their choice and be asked to experiment with new, unfamiliar formats; readings and screenings will be required in addition to tutorial hours

**Requirements/Evaluation:** evaluation based on assignments, studio performance, class participation, and attendance

**Prerequisites:** students are required to have taken at least two ARTS 200-level classes in any medium, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Art Studio majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** The cost of materials will vary depending on the individual student project(s). Students are responsible for the cost of the materials. Williams financial aid recipients can utilize the Book Grant to cover these expenses.

TUT Section: T1 W 10:00 am - 12:40 pm Laylah Ali

**ARTS 345 (S) Art in Times of Crisis** (DPE)

In an era of ever-increasing emergency, what is the role of art? Can poems save us? What media and forms of exhibition are best suited to respond to urgent crises? What creative methodologies might we develop in collaboration with one another, in the interest of building community as well as making great art? This course is an interdisciplinary, experimental intervention into our present era. In addition to producing multiple original artworks, students will do readings and investigations into art activist case studies from social movements such as Puerto Rican sovereignty, HIV + AIDS, and global climate justice.

**Requirements/Evaluation:** readings, screenings, attendance, participation, and committed completion of assignments

**Prerequisites:** any 200-level art studio class or submit a portfolio for consideration

**Enrollment Limit:** 10

**Enrollment Preferences:** majors and seniors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $250-$350 Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** This course examines crises which disproportionately impact communities of color and marginalized people. Race and class will be central areas of inquiry.

Not offered current academic year

**ARTS 369 (S) QUILTY!**

A quilt is a glorious formation to be asleep under, and in this class we will spend the entire semester making a single wonderful one. A dynamic composition for the home! Students will learn how to collect and choose fabrics, cut them into bold lively shapes, and practice efficient ways of using a needle and thread to sew them together. By looking at quilting traditions internationally, both improvisational and hyper precise methods of construction will be adopted - the quilt is for everyone! Students will also learn basic embroidery and applique techniques to embellish the quilt top, and draw with thread as they bind and stuff the layers of their quilt with (local) wool.

**Requirements/Evaluation:** a single quilted and bound queen sized quilt.

**Prerequisites:** 200 level studio art classes completed, and/or letter stating enthusiasm and investment in handwork and textiles, and/or previous sewing experience.
Enrollment Limit: 10
Enrollment Preferences: studio art majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

ARTS 383  (F)  The Actor-Creator: Introduction to Physical Theatre Tools
Cross-listings: THEA 283 ARTS 383
Secondary Cross-listing

This course is an introductory course to the Jacques Lecoq Pedagogy which was born in France and uses observation as a first creative tool. The body is at the heart of this pedagogy and we will have rigorous physical training in order to become more expressive, more precise, and more creative. Improvisation will be the key tool to learn and discover how to write theater on our feet. In the course, we will first observe life: spaces and people. What are the specifics of the different spaces that exist around us and how do they change the body that is in them? Then, we will look at the actor’s body. How do you enhance it’s presence? What brings life to this body? How can we allow ourselves to start using the body as a creative tool that will be able to transform and write? We will next observe the body within the elements. What kind of character will come out of fire? Or of air? What happens when air meets fire? By letting the elements transform us we will find specificity in the character’s physicality and relationships. Then we will look at painting, poetry, and music; How can we translate a poem on stage? How do words move? And colors? Is yellow’s rhythm the same as brown? We will end the course by working with full masks created by the students/artists and also brought by the teacher. Mask work is an incredible tool to help actors articulate their thoughts, and feelings, and craft their acting. What stories will come out of that? Who’s destiny will we learn about? This will be an occasion to bring forth stories you are interested in, that touch you and move you. This course is open to anyone who is interested in creating live performances. Whether you are a writer, a painter, a director, a musician, or an actor you are welcome to bring your fierce and curious artist spirit to create theater that will be telling the stories that matter to you today.

Requirements/Evaluation: Attendance and active participation in each class session. Assigned project and scene work (solo and in small groups). Creation of physical performance objects (masks, etc.) Solo and group presentation of assigned work in class.

ARTS 396  WONDERFUL THINGS!

A spinning top! A clock! A toy! A sundial, a deck of cards, a lantern, pompoms, building blocks that rise and topple, puppets, paper kites, paper planes, toy boats that float -- play objects are born into the world over and over, transforming in colour and shape, yet holding onto an essential structure that give them their name and purpose. In this class, students will construct their own versions of (some of) these classic objects using humble and lovely materials: paper, glue, bamboo, cloth, light, wood, perhaps wind, string. Our guides will be existing histories of making, the wonderful image of disparate objects on a well made shelf, all the handmade objects we have loved, childhood toys, a desire to play still, and delight.

Requirements/Evaluation: weekly assignments, final project

Prerequisites: Drawing 100 and/or sculpture classes and/or portfolio of studio work

ARTS 418 (S) Senior Seminar
In this capstone class for studio art majors, students define, research, create and present an original body of work which will be exhibited. The emphasis will be on producing a strong and coherent body of artwork for their senior exhibition at the Williams College Museum of Art, (in person or virtual). Students will focus on strengthening ideas, developing formal skills and practicing critical analysis. They may work in any medium in which they have developed a high degree of proficiency. To prepare to partake in an exhibition on this level, students must learn to schedule and pace themselves, communicate, deal with spatial considerations beyond their studio, document their work effectively and work within firm deadlines. The nature of this course will have you working closely as a team, as well as individually, towards creating a strong and exciting student show this May at the Williams College Museum of Art (or via a virtual platform). The class will meet in large and small groups throughout the semester for critique and discussion and also have assigned readings, films, and/or lectures.

Class Format: intensive studio art class

Requirements/Evaluation: Art is a visual language, which speaks to us through our sense of sight and implied touch; you will be evaluated first and foremost on your ability to speak powerfully in this language. Evaluation also takes into account: effort, attitude, creativity, studio responsibility and participation. If you miss more than one unexcused class your grade will automatically drop a letter grade. All work must be completed by the final critique.

Prerequisites: You must be a senior Art Studio major with all requirements fulfilled by the end of this term

Enrollment Limit: 15
Enrollment Preferences: Studio Art major; permission of instructor is required for History and Practice majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: The cost of materials will vary depending on the individual student project(s). Students are responsible for the cost of the materials. Williams financial aid recipients can utilize the Book Grant to cover these expenses.

Winter Study  

ARTS 11 FROM THE PAGE TO THE SCREEN

The course will explore the process by which the visual language of a film or television show is realized. How production and costume designers, hair and make-up artists, cinematographers, and other members of the creative team arrive at a unified vision which defines the look of any production. The course will be both analytical - dissecting the visual choices made by each member of the creative team on an array films or television shows - and practical - each group of students being assigned an unproduced screenplay or television script for which they will first have to define the visual language. And then create a document to illustrate that vision. Where is the story set? Where do the characters live? What do their houses or apartments look like? How do they dress, wear their hair? What is the overall color palette? How is the show lit? How is it shot? The techniques the students choose to create that document is up to them. It can be references from other films or television shows, images gleaned from other media, original drawings, or computer-generated images, either still or moving. A combination of some or all. Whatever they feel best conveys their vision of how to bring what’s "on the page” to the screen.

Requirements/Evaluation: Presentation(s); Creative project(s)

Prerequisites: None.

Enrollment Limit: 12

Enrollment Preferences: If overenrolled, will ask for a statement of interest.

Expected Class Size: NA

Grading:

Unit Notes: Frank Doelger, Class of 1975, is a multiple Emmy Award-winning television producer, whose credits include HBO's Game of Thrones, Rome, and John Adams, among many other successful productions.

ARTS 15  Architecture: Reimagining the Sugar House

This course will provide an opportunity to explore architectural design through reimaging New England's beloved 'sugar house'. By investigating the quintessential New England process of producing maple syrup, students will create their own interpretation while focusing on the architectural implications and exploring design possibilities. Maple Syrup production has a deep-rooted history throughout New England which can be experienced in the surrounding landscape and observed locally in Hopkins Forest. The built structures of this process are a direct result of the specific sugaring systems and provide an example of vernacular design as pure product of function. Additionally, as maple syrup production requires an in-depth understanding of nature and natural processes, it demonstrates an inherently active relationship between architecture and the natural environment. Consisting of a local site visit, site analysis, and conceptual design, this course plans for students to reimagine and explore these relationships through the development of architectural interventions. Throughout this course, students will gain understanding and experience in the architectural design process and are expected to present their final design project. Various mediums for the visual representation of final projects will be accepted.

Requirements/Evaluation: Presentation(s); Creative project(s); Other: Evaluation will be based on the completion of a final project, presentation of the final project, and attendance throughout the course.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Preference given to Seniors, Juniors, and Art Majors.

Expected Class Size: NA

Grading:

ARTS 20 (W)  Interpreting the Figure

This studio class investigates the human figure through observational drawing methods that include dry media, watercolor and experimental approaches. Students will work from the nude or draped model, sculptural forms, and reference images, as well as posing for each other (clothed). To contextualize the studio work, students will examine diverse ways the figure has been represented across time from several cultures and continents. Outside of class hours, students will be expected to keep a drawing and watercolor sketchbook of assigned prompts, drawing and written 'reflections', engaging with it a minimum of 10 hours per week. Additionally, the class will make site visits to WCMA and The Clark Art Institute. Required readings and film screenings will be assigned. Students will present and exhibit their final projects at the completion of WSP. Time commitment will be 2 3-hour classes per week plus a Friday field trip: attendance required.

Requirements/Evaluation: Presentation(s); Creative project(s)

Prerequisites: Basic Drawing experience is helpful but not required.

Enrollment Limit: 14

Enrollment Preferences: Seniority

Expected Class Size: NA

Grading: pass/fail only

ARTS 23  Clothes that Hang on Art: Survey of Artists Who Use Clothes to Make Art and Related Workshops

This course will look at a group of artists who use clothing as their medium for creating works of art whether it be as raw material, subject, or object. We will consider works from WCMA's collection including Judith Shea's "Panties", Yinka Shonibare's "Dreamscape", Papo Colo's "Working-Class America", and Fabrice Monteiro's "The Prophecy, Untitled #1". Students will also be introduced to artworks not in the collection, featuring artists such
as Louise Bourgeois, David Hammons, Steven Frost and Shinique Smith. We will discuss themes, techniques, processes, origin stories and the presence or absence of the body. Related workshops will give students the opportunity to explore making art with found garments. Prompts will be given to encourage the mining of personal stories to foster self-expression and discovery. Playfulness, experimentation, collaboration and introspection will be the core values of the class.

Requirements/Evaluation: Presentation(s); Creative project(s)

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Preference given to students who do not have a background in art and art making.

ARTS 24  (W)  Drawing as Meditation

Drawing as Meditation is a course focused on drawing as a cross-disciplinary practice that activates our radical imaginations. Going beyond the technical, we will center drawing as practice in mindfulness, where one's "mind" is understood as a fully embodied, inter/subjective experience. Diverse drawing experiments will bring awareness to our body sensations, emotions, thought patterns, and expectations we have for our drawings. Using both traditional and nontraditional drawing tools, we will explore a series of activities that draw on Psychology, Art Education, Performance Studies, and Liberatory practices. We will explore what it means to have a creative practice and how to incorporate forms of play into our learning and growth. Class time (two 3-hour sessions per week) will be split between short drawing activities and discussion. Enrolled students will be expected to complete daily drawing journals, as well as short readings and writings, not exceeding 10 hours per week. No prior drawing experience required, only a willing desire to put pencil to paper, to experiment, and to be open to what unfolds. Class times: Wednesday 1:00 pm - 3:50, Thursday 10:00 am - 12:50 pm

Requirements/Evaluation: Attendance, completion of daily drawing journals, participation in class activities

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Students who have otherwise struggled to enroll in arts classes. Preference for Juniors and Seniors

Expected Class Size: 15

Grading: pass/fail only

Materials/Lab Fee: $150. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

ARTS 30  (W)  Portrait Painting: Fayum mummies, the Obamas, and now.

This course will be a hybrid studio practice and visual survey of the painted portrait. We will trace various approaches to portraiture and mark-making, from the Fayum mummies, to the portraits of Barack and Michelle Obama, until the present, in order to inform how we will paint portraits (of oneself or another) throughout the course. Portraiture and figuration have experienced an explosive resurgence over the past decade, bolstered especially by artists from historically marginalized communities. This course will consider the historic underpinnings of the impulse to render a person's likeness, its function, and its role in wider culture. The course will culminate in a final exhibition of each participant's work, which students will work on in- and outside of class for the duration of the course. We will begin by looking at a range of approaches to portraiture, along with various drawing and painting exercises. We will then spend the bulk of winter term working towards a single, polished painting, in oil-on-canvas. In order to inform our own works, throughout the class we will consider many of the touchstone examples of portraiture over the centuries, as well as contemporary works, to survey a range of styles and how their respective techniques and painted marks have reflected the zeitgeist or collective psychology of a time and place. The course will meet three times per week to engage in dedicated studio work, and group analysis of historic examples of painted portraits. Outside of
class, students will be expected to continue their studio work, as well as additional drawing or painting exercises, readings, and possible film screening(s) and visits to nearby exhibitions. The final project, a single portrait painting, will be displayed in a group exhibition in Spencer Art Building at the culmination of the Winter Study period, at which time each artist will present their finished work.

Requirements/Evaluation: Presentation(s); Creative project(s); Final group critique with brief presentations by each artist, followed by an exhibition and reception.

Prerequisites: No experience necessary, but some background in painting and drawing is a plus.

Enrollment Limit: 15

Enrollment Preferences: Preference will be given to studio and art history students, and will be given to Seniors thereafter. Students who have taken ARTS 100 or ARTS241 will certainly hit the ground running a bit better but not essential.

Expected Class Size: NA

Grading: pass/fail only

Unit Notes: William Burton Binnie is an artist living and working in Williamstown, MA. He has been a Visiting Lecturer in Studio Art at Williams College since 2019. For more information visit: www.william-binnie.com

Not offered current academic year

ARTS 32 Knitting for Mindfulness: Relieving Anxiety and Stress

"In knitting, when you create the first stitch of a new project, you cast on. When an item is finished, you bind it off. Both of these actions, I've found are incredibly satisfying - the bookends of something manageable and finite. They give me a sense of completion in a world that will always and forever feel chaotic and incomplete." - Former First Lady Michelle Obama, The Light We Carry In this studio course, intended for both beginners and more advanced knitters, students will be introduced to the calming, joyful and meditative practice of knitting as both a creative outlet and a means of reducing anxiety and stress. Throughout the course, students will improve their knitting techniques while exploring the many physical and mental health benefits associated with this practice. Through hands-on instruction, students will improve their foundational skills of knitting as well as learning the history, art and technique of stranded colorwork. They will also learn how to read a knitting pattern and how to select appropriate yarn and needles for knitting projects through in-person field trips to two local yarn studios. By the end of the course, students will write and produce their own stranded colorwork pattern and project. Throughout the course, students will explore how knitting can serve as a meditative practice, helping to calm the mind and reduce stress. In addition to developing technical skills, students will explore the cultural, social, and political dimensions of knitting. This includes examining the gendered history of knitting, and the ways in which knitting has been reclaimed by modern-day makers and activists. By the end of the course, students will have developed a foundational knowledge of knitting and mindfulness techniques as well as skills and techniques to explore their own creative designs through the production of a personal knitting pattern.

Requirements/Evaluation: Presentation(s); Creative project(s)

Prerequisites: Knitting basics preferred. Students should know how to cast on, knit, purl and cast off a knitting project.

Enrollment Limit: 15

Enrollment Preferences: Students will submit samples of their previous knitting projects to demonstrate basic understanding of the craft.

Expected Class Size: NA

Grading:

Unit Notes: Ashley Weeks Cart '05 is a Berkshire-based artist specializing in natural light portrait photography. When she doesn't have a camera in her hand, she has a pair of knitting needles. She's been knitting since age 8, thanks to her Grammy.

ARTS 33    Flat Space: Gouache!

Gouache acts like opaque watercolor; it is excellent for painting small, flat areas of brilliant color on paper. In this course, we will make small but mighty gouache paintings on paper from observation and invention, focusing on depictions of space (inside, outside, real, imagined...). Instead of shading a space according to a light source and linear perspective, we will activate pattern and color-experimenting with shifts in scale, chroma, value, and temperature-to create space through flatness. We will look at rich painting traditions that arm flatness in this way, including Indo-Persian miniature paintings and ancient Egyptian paintings and drawings. We will also discuss global modern and contemporary painters who take up flatness, from Gustav Klimt to Chris Ofili. Class time will consist of painting exercises, discussions, group critiques, and independent work time towards the week's given painting assignment with 1:1 feedback. Homework will include a short reading each week. Coursework will culminate with an ambitious final painting of the student's choosing. This course is open to all levels of painting experience and beginning students will be encouraged! An interest in color, willingness to play, and follow-through are the only requirements.

Requirements/Evaluation: Other: In-class engagement, completion of assignments and final project
Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: Priority given to students who have yet to take a painting class, starting with art majors.
Expected Class Size: NA
Grading:

Unit Notes: Aparna Sarkar is a painter living in Brooklyn, NY. She holds an MFA in Painting from the Rhode Island School of Design and a BA in Mathematics from Pomona College, and will be teaching Introduction to Oil Painting at Williams in Spring 2024.

ARTS 34    Camera Performances

Taking inspiration from female and non-binary Latin American artists from the 1970s and the publication Radical Women: Latin American Art, 1960-1985 by Andrea Giunta and Cecilia Fajardo-Hill, students will receive a series of prompts for performances to be documented with video and photography. Each prompt will address a different photographic or video technique and touch on topics related to intimacy, care, domestic space, gender, and identity. This class meets twice weekly and is composed of image analysis exercises and practical assignments. Outside of class, students will be expected to create, perform, and document the performances individually and in groups. Students can use any type of digital cameras and can access Williams Equipment Loan and the Adobe Suite available on Williams computers. Students will also practice giving each other feedback and reflecting on their creative process for creating images.

Requirements/Evaluation: Paper(s) or report(s); Creative project(s)
Prerequisites: Students should have basic knowledge of editing software for photography (Lightroom or Photoshop) or for video (Premiere).
Enrollment Limit: 10
Enrollment Preferences: Preference will be given to students interested in Latino/a Studies or Gender Studies. Students should contact instructor.
Expected Class Size: NA
Grading:

Unit Notes: Luiza Folegatti is a Brazilian multidisciplinary artist and visual anthropologist. Her practice combines research on gender, migration, photography, and Latin American studies with social advocacy for immigrant rights.

ARTS 99  (W)  Independent Study: Art Studio

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late
September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
MASTER OF ARTS IN ART HISTORY

Requirements
To qualify for the Master of Arts degree in art history, candidates complete a minimum of twelve courses for graduate credit plus two winter study periods, the latter comprising an international Study Trip in the first year (ARTH 51) and preparation of a Draft Qualifying Paper in the second (ARTH 52). Students must also demonstrate reading proficiency in one foreign language, though further study in primary-research languages is encouraged. At the end of the second year, all students present a shortened version of the Qualifying Paper in the annual Graduate Symposium.

At least seven of the twelve courses required for graduation must be graduate seminars. (Students are free to pursue additional courses beyond those required for the degree.) Among the twelve courses counted towards the degree, three are required of all students: ARTH 504, “Proseminar in Research and Method,” to be taken in the first semester of study; ARTH 506, “Graduate Art History Writing Workshop,” to be taken in the second; and ARTH 509, “Graduate Student Symposium,” to be taken in the fourth semester. Additionally, all students must complete ARTH 507, “Object Workshop,” which is pass/fail, in their first year of study. The optional Curatorial Workshop, ARTH 563, is also pass/fail. Neither ARTH 507 nor ARTH 563 counts among the twelve courses required to complete the degree.

Students must also fulfill a distribution requirement by undertaking coursework in two of four geographical areas and two of three chronological periods.

Geographical Areas:
1) Europe and the Mediterranean Basin
2) Asia and the Pacific
3) The Americas
4) Africa and the Middle East

Chronological Periods:
1) Prehistoric to 1200
2) 1200 to 1800
3) 1800 to the present

Students may petition the Director to apply a thematic or non-period/geographic-specific course toward the distribution requirement by demonstrating substantial work in an appropriate area.

Undergraduate Courses and Independent Studies
With permission from the Director and the individual instructors, students may take up to five undergraduate courses for graduate credit, with the understanding that research papers submitted in such courses meet a standard commensurate with those prepared for graduate seminars.

In addition to regularly offered seminars and classes, students may arrange one independent study (ARTH 595/596) by submitting petitions to the Director describing the substance of their projects and the nature of the work they will submit for evaluation. The petitions must be co-signed in advance by both the student and their faculty supervisor.
Of the minimum requirement of twelve courses, the combined number of independent studies and undergraduate courses applied to the degree may not exceed five.

The Qualifying Paper

The Qualifying Paper is a substantially revised piece of academic writing produced in coursework at Williams in one of the previous three semesters, expanded and refined over the second Winter Study term and a portion of the fourth semester. Students submit the topic of the Qualifying Paper in writing by the final day of exams of their third semester. Before this, students must obtain their original faculty supervisor's agreement to be engaged in the Qualifying Paper process.

Three weeks prior to the Friday before Spring Break, students submit the final draft of their Qualifying Paper, including illustrations, to three faculty readers (generally the original faculty supervisor, the Director, and the Associate Director). Qualifying Papers should not exceed 8,000 words, including footnotes and bibliography.

Before Spring Break, students meet with their three readers to receive critical comments on the final QP and discuss its transformation into a twenty-minute presentation.

The Graduate Symposium

All second-year students speak in the Symposium, presenting twenty-minute talks developed from their Qualifying Papers. Each student has an ad hoc committee to give advice in preparing these presentations (ad hoc committees comprise the Director, the Associate Director, one additional faculty mentor, one first-year graduate student, and one second-year graduate student). Preparations include at least three practice sessions for each student. Speakers present the first and third of these run-throughs to the ad hoc committee, the second to the other second-year students in a workshop scheduled by the Director. The Graduate Symposium is scheduled for the Friday immediately preceding Commencement.

Languages

The Graduate Program's degree requires A2-level proficiency in one language other than English (or two college-level classes or equivalent) in a language of scholarly and academic relevance to the student's art-historical interests. This requirement can be fulfilled by college-level language coursework prior to matriculating at Williams, by language coursework at Williams College, by summer language study, or by other methods (such as language exposure at home). The requirement represents the minimum for graduation; the program supports and strongly encourages proficiency in multiple languages. Beyond the required languages, a maximum number of two additional language courses may be applied to the degree. Such additional language work may not count towards the seven required graduate seminars. Additional language work may be taken for a letter grade, pass/fail, or audit, subject to instructor approval.

Grades and Academic Standing

The Program uses the following grading system:

- A+ = truly exceptional (4.33)
- A = outstanding (4.00)
- A- = excellent (3.67)
- B+ = good (3.33)
- B = satisfactory (3.00)
- B- = barely adequate (2.67)
- C = inadequate (0)
- E = failing (0)

The Director reviews students’ records at the end of their first year; those with GPAs of 3.00 or lower may be asked to withdraw from the Program.

Letter grades are used in all seminars except ARTH 507, 509, and 563. These and the Winter Study courses (ARTH 51 and 52) are Pass/Fail.

Course instructors set the deadlines for coursework. If students seek and receive extensions that result in semester grades of Incomplete, they must hand in their work by the instructor's revised deadline, which will be no later than the second Monday of the next semester’s classes. Extensions beyond this date will be solely at the discretion of the Director (in consultation with the instructor).

Students who withdraw from the Program may, after a period of at least one year, petition to the Director for re-admission. Such a petition must include evidence that deficiencies have been remedied and that the student is capable of completing the course of study without further interruption.

The M.A. requirements are designed for completion in two consecutive academic years in residence. There is no credit for coursework done prior to matriculation in the Program. The Program is full time, requires students to live in Williamstown or its vicinity, and does not normally admit students on a part-time basis.
ARTH 500  (F)  Clark Visiting Professor Seminar: The Image Multiplied: The Printed Image in Early Modern Europe

Cross-listings:  ARTH 500 ARTH 400

Primary Cross-listing

The technology of mechanically reproducing complex visual images on paper, a development of fifteenth-century Europe, transformed the early modern world no less than the emergence of digital media has transformed our own. Techniques of woodcut, engraving and etching quickly became important media for innovation within the fine arts. At the same time, they became equally important as sources for devotional imagery, for disseminating copies of other artworks, for the expansion of knowledge through scientific illustration, and for the effective broadcasting of political and religious messages during centuries of extraordinary political and religious upheaval. In this seminar we will investigate the cultural history of printed images in Europe from the time of their emergence in the fifteenth century through the mid-eighteenth century, focusing on the changing cultural circumstances of their production and reception. We will consider the work of major printmakers such as Mantegna, Dürer, Goltzius, Rembrandt, Callot, Hogarth, and Piranesi, but also that of many lesser-known (and anonymous) artists.

Requirements/Evaluation:  writing assignments, participation

Prerequisites:  none

Enrollment Limit:  16

Enrollment Preferences:  graduate students get preference; places for 8 undergraduate and 8 graduate students assured

Expected Class Size:  16

Grading:  no pass/fail option,  no fifth course option

ARTH 501  (S)  Museums: History and Practice

Cross-listings:  LEAD 301 ARTH 501 ARTH 401

Primary Cross-listing

Art museums express the cultural, aesthetic and social ideals of their period of formation and many of those ideals are embedded in the values and practices of institutions today. Comparing institutions past and present internationally, seminar participants will envision the art museum's future while addressing programmatic and organizational challenges at this moment of participatory civic engagement and social, political unrest. With growing skepticism of institutional collecting practices and authoritative narratives, art museums, especially those in the United States, face internal and external pressure to "decolonize" as they attempt to alter their canon. There is pressure, as well, to embrace a more active role in climate and social justice movements. It is a time marked by calls for compensation transparency, participatory decision making, staff and trustee diversity, and greater scrutiny of funders. The seminar will consider this environment against past and current norms of governance, management and curatorial policies and practices. We will examine the traditional role of architecture and installation in interpretation and experience, prevailing and proposed guidelines in the accessioning and deaccessioning of works of art and both internal and external attitudes towards the repatriation and restitution of cultural property. Studying museums ranging in size and type from the "encyclopedic" to newly established contemporary arts institutions and alternative spaces, seminar participants will hear how museum leaders are dealing with challenges to current practice through weekly zoom sessions. Participants will also ponder how future museums might strive to balance the institution's traditional scholarly and artistic role with new civic and social responsibilities, mindful of financial stability in a market-driven, metric-conscious, not-for-profit environment; doing so while addressing, in proposed program and practice, the demands on museums emanating from a more ethically insistent internal and external world.

Requirements/Evaluation:  oral presentations and discussion in class and one seminar paper (with class presentation) at the end of the semester

ARTH 503  (S)  Clark Visiting Professor Seminar: Transatlantic Landscape

Cross-listings: ARTH 403 ARTH 503

Primary Cross-listing

Landscape and the American encounter are inextricably bound together. Through the conventions of landscape representation and cartography developed in the sixteenth- and seventeenth-centuries, previously unknown regions of the globe were made legible to European audiences. What were these conventions? What aesthetic, social, and political factors contributed to their development? And with what success were they carried across the Atlantic? If European landscape was an agent of empire, in what ways was it challenged and even transformed by encounters with people whose ways of experiencing and thinking with the land did not conform to its conventions? This seminar will explore such questions by investigating the historiography and theory of landscape, and by looking closely at a number of case studies in transatlantic landscape, including the sixteenth-century mapping of New Spain, the Dutch representation of Brazil in the seventeenth century, Caribbean landscapes, the representation of the arctic, early archaeological campaigns in North America, and the surveying and representation of the western United States in the nineteenth century.

Requirements/Evaluation: research paper, class presentations

Prerequisites: none

SEM Section: 01  M 1:00 pm - 3:50 pm  Michael P. Gaudio

ARTH 504  (F)  Proseminar in Research and Method

In this graduate Proseminar on Research and Method, we will read a number of texts that form the foundation of art history as a discipline, including the writings of Plato, Panofsky, Lessing, Heidegger, Wölfflin, and Barthes (among others). We will study these works against the grain, considering how art history is currently transforming under the fields of ecology, disability studies, queer theory, and radical black feminism. Students will work closely with the collections of the Clark to theorize how absences are integral to institutional histories, and we will think about how we can, as historians, responsibly address voices that have been removed from the canons of art history. This course considers not only central writings of art historical methodology but also the limits for decolonizing art history and the museum, as we will examine how the formation of the discipline depended upon absenting critical perspectives and voices.

Requirements/Evaluation: class participation, writing assignments
Prerequisites: none  
Enrollment Limit: 12  
Enrollment Preferences: limited to and required of first-year students in the Graduate Program in the History of Art  
Expected Class Size: 12

Fall 2023  
SEM Section: 01  T 1:00 pm - 3:50 pm  Caroline O. Fowler  

ARTh 506  (s) Expository Writing Workshop  
This writing seminar for graduate students in Art History will afford intensive full group discussions of writing skills and substantial one-on-one writing consultations. Group discussions will center on three kinds of texts: Writing about writing, published writing in the discipline of Art History, and student writing in progress. In six such discussions we will improve our vocabulary and method for discussing writing; we will learn to build better and more sophisticated sentences, paragraphs, and arguments; and we will practice anticipatory reading and writing in order to strengthen our control of both voice and structure. Each discussion will be supported with both exempla and exercises, and our watchword in all cases will be "revision." In one-on-one consultations (3-4 per person), I will offer tailored critique of each student's work, setting aside time as needed to troubleshoot sentences, paragraphs, or arguments together.  
Requirements/Evaluation: class participation, participation in consultation meetings, writing assignments,  
Prerequisites: none

Spring 2024  
SEM Section: 01  T 1:00 pm - 3:50 pm  Ezra D. Feldman  

ARTh 507  (F)(s) Object Workshop  
Meeting for six sessions over the semester, this workshop is designed to introduce first-year graduate students to technical, material, and connoisseurial perspectives relevant to the study and analysis of art objects. We will draw on local collections and expertise for our case studies.  
Requirements/Evaluation: participation

SEM Section: 01  TBA  Marc Gotlieb
ARTH 508 (S)  Art and Conservation: An Inquiry into History, Methods, and Materials

In this course students will learn to recognize the materials present in cultural heritage collections, understand the history of artist's methods and techniques, and hone their observation and examination skills when working with material culture. Students will form a basis in art conservation and condition assessment vocabulary and will exercise handling and examination skills for a variety of materials and artworks present during each session. Those who are planning careers involving work with cultural materials will explore cultural heritage through the lens of the art conservator and form a broader awareness of the ethics and procedures of conservation and preservation. An understanding of the vulnerabilities and condition issues of cultural materials and how to care for them will be developed as an impactful, practical resource for future careers in cultural heritage. A multi-disciplinary group of teachers from the staff at the Williamstown Art Conservation Center (WACC) will conduct lectures, practicums, discussions on conservation research literature and visits to nearby art institutions. Sessions are held at The WACC in the Lunder Center at Stone Hill on the Clark Art Institute campus. Students receive a syllabus with session outlines and required reading lists. Required readings are available via GLOW and on reserve at the Clark Library. Three exams will be given throughout the course and attendance is required at all sessions in lieu of a final exam (each weighted at 25% of the final grade).

Class Format: slide presentations, lectures, gallery talks, hands-on opportunities, technical examinations, and group discussions

Requirements/Evaluation: attendance is required at all sessions; the course grade is based on exams given throughout the semester; there is no final exam

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Graduate Program students, then students in art history or studio art

ARTH 511 (F)  Interspecies beings: demigods and monsters in art and culture, ancient to modern

Cross-listings: ARTH 511 CLAS 436
Horse-men, cat-women, bull-men, mermaids, snake-people: interspecies creatures are everywhere in ancient Greek and Roman art and poetry. Embodied in satyrs, sphinxes, centaurs, nympha, and other part-human, part-animal beings is an alternative evolutionary and cultural history. In it, humans and animals live as one. There is no distinction between nature and culture. Male and female are equal. The industrial revolution never happens. This course traces the history of interspecies beings from their origin in ancient Greek art and poetry until today. Three points are important: 1) the relationship between the imagery and ancient political theory about "primitive" life; 2) evolving conceptions of biology and the environment, and 3) the role played by interspecies beings in the conceptualization of what is possible in art. The first half of the course examines the origins and character of interspecies beings in works of ancient art such as the Parthenon, and in ancient writers including Hesiod and Ovid. We examine relevant religious practices, materialist conceptions of nature, and biological theories of speciation, in Empedokles, On nature, Euripides' Bakchai, Plato's Phaidros, and Lucretius' De rerum natura. The second half of the course investigates the survival of classical monsters in the work of early-modern artists such as Botticelli, Michelangelo, Titian, and Dürer, and the rediscovery of ancient materialist theory. We consider the role played by interspecies beings in the formation of late modernism in art and literature. Key texts include Rousseau and Hobbes, Nietzsche's Birth of Tragedy, Mallarmé's "L'Apres midi d'une faun," and Stoppard's Arcadia. Problems include the relationship between nympha and sex-workers in Manet, the meaning of the Minotaur in Picasso, and the interest in interspecies beings in the work of women surrealists such as Leonora Carrington. We conclude with contemporary popular culture such as the Hunger Games.

Class Format: Lecture and discussion.

Requirements/Evaluation: The requirements of the course include: attendance and participation in discussion; preparing summaries/analyses of reading assignments for discussions; one presentation on a research project, and one 20-page paper on the research project.

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Priority goes to graduate students in art history. If space is available, senior art-history majors, classics majors, and environmental studies majors may enroll.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: This course will satisfy the seminar requirement in art history.

Distributions: (D1)

SEM Section: 01 W 1:00 pm - 3:50 pm Guy M. Hedreen

ARTH 513 (S) Contours of Abstraction in Modern and Contemporary Art

Abstraction, be it gestural or geometrical, was a protagonist of global modernisms and continues to be a powerful visual language in contemporary art. The term "abstraction" may first appear straightforward, but its associations are quite complex: in varying historical contexts, abstraction has signaled formalist rupture, revolutionary politics, appropriation, as well as racial, feminist, and queer critique. We will delve deeply into abstraction in global modern and contemporary art through myriad primary documents and theoretical frameworks so as to revise and expand its canonical contours and cartographies.

Requirements/Evaluation: Weekly presentations, response papers, final 20-page research paper

Prerequisites: Students at the undergraduate level must be seniors and Art History majors

Enrollment Limit: 12

Enrollment Preferences: Art History MA students and undergraduate Art History seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Attributes: ARTH post-1800 Courses
This seminar responds to a recent incident at a US liberal arts university where a professor was sacked for showing images of Prophet Muhammad as part of her section on Islamic art. Why is image-making so hotly contested in Islam? What is the history of figural depictions in this tradition? The seminar explores artworks made for Muslim patrons from the medieval period to the modern era, considering how paintings produced for Muslim audiences can be situated within the frameworks of "Islamic art," a loaded historiographical term that has been questioned in recent times. The seminar also addresses some of the major problems that continue to haunt art scholarship in the field. For most of its history, the academic study of Islamic art has seldom considered contemporaneous literary voices that shed light on the motivations behind artworks. Furthermore, the historiography, deeply entrenched in its colonial and orientalist roots, has largely isolated images from their supporting texts—a curious oversight in light of the fact that painting in Muslim lands has historically been primarily an art of the book. These biases have affected the way museums have collected, displayed and interpreted paintings. For example, Western museums continue to place figural depictions made for books and albums in "South Asian" collections while textual manuscripts and calligraphic specimens made for the same Muslim audiences—even at times bound in the same albums—are categorized as "Islamic art." What does this isolation of text from image imply about prevailing views of Islamic art? To better understand the cultural, historical and religious context surrounding artworks students will read primary literature ranging from autobiography to devotional poetry, often written by the very patrons and subjects of the paintings to be discussed.

**Requirements/Evaluation:** class participation, short weekly writing assignments, final essay project

**Prerequisites:** Undergraduates wishing to enroll must have taken at least one art history course or one religious studies course. Undergraduates must email indicating their interest in the course prior to enrolling.

**Enrollment Limit:** 19

**Enrollment Preferences:** MA students, then advanced undergraduates

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ARTH 521(D1) REL 420(D2)

**Writing Skills Notes:** Weekly writing assignments consisting of 300-500 words. Final papers 15-20 pages for graduate students. 12-15 pages for undergraduate students. 1-page abstract for the final paper due by mid-November. A 4-5 page project outline due right after Thanksgiving break. After receiving feedback and comments from the instructor, the final paper will be due in the last week of classes.

**Difference, Power, and Equity Notes:** Highlights a global art history that is underrepresented. The class focuses on pluralistic engagements with non-Western cultures and epistemologies.

**Attributes:** ARTH pre-1800 Courses
Ultimately, we will ask: what might an early modern cultural history focused on festivities reveal? We will approach this history through a combination of primary materials drawn from the holdings of Williams College’s Chapin Library and secondary readings, which will range from classics in the field to the most recent scholarship. Students will take turns delivering presentations on preselected objects of the week. By semester’s end each student will complete a 15-to-20-page research paper on a festival of their choosing.

Requirements/Evaluation: Engaged participation in discussions; in-class presentation; proposal and bibliography; research paper.

Prerequisites: For undergraduates, at least two prior courses in or related to History or Art History.

Enrollment Limit: 16

Enrollment Preferences: Priority for Graduate Art students. Four seats are reserved for undergraduates, with preference given to junior and senior majors in Art History and History. Undergraduates should email a brief statement of interest to ab24@williams.edu.

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 422(D2) ARTH 522(D1)

**ARTH 525 (F) Japanese Art and Visual Culture: Private/Public/Pop** (WS)

**Cross-listings:** ARTH 525 COMP 324 ARTH 324 ASIA 324

**Secondary Cross-listing**

This tutorial offers a survey of Japanese art and visual culture across time and media, with particular attention to two areas: the links between different artistic media, and the relationship between art and its audience. We’ll begin with early court diaries and related scroll paintings as examples of "private" art. Then we’ll move through progressively more public visual media of the 17th through 21st centuries: Kanô screen painting; nô, kabuki, and puppet theater; premodern architecture; popular woodblock prints; turn-of-the-century photography; and finally some examples of contemporary popular culture like comics, animation, and/or film. We will focus on the specificities of each medium while simultaneously developing formal visual reading skills that can work across different media.

**Class Format:** Students will meet with the instructor in pairs or trios for 75 minutes each week. This tutorial is offered simultaneously at the 300 level for undergraduates and at the 500 level for graduate students: graduate students will be paired with other graduate students and undergraduates with undergraduates.

**Requirements/Evaluation:** For undergraduates: weekly participation, 5 short written assignments in alternate weeks (ranging from 1 to 5 pages), and several 1-page peer critiques. For graduate students: weekly participation and 3-4 short written exercises that build toward a final 15-page research paper.

**Prerequisites:** No previous knowledge of Japanese art or culture is required. Students with similar preparation and interests will be paired with one another.

**Enrollment Limit:** 10

**Enrollment Preferences:** Graduate Art students, followed by undergraduates majoring in Art History or Comparative Literature.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 525(D1) COMP 324(D1) ARTH 324(D1) ASIA 324(D1)

**Writing Skills Notes:** Students will write several regularly spaced papers that build on one another by tackling similar problems from different angles. Students will receive detailed feedback from the instructor on each paper, addressing argument, organization, and style, as well as peer feedback.

(See requirements for details about the number and type of assignments.)

ARTh 527  (F) Acquiring Art: Selecting and Purchasing Objects For WCMA

Cross-listings: ECON 227 ARTH 527 ARTH 327

Secondary Cross-listing

How do museums acquire art? Factors considered in selecting objects include: the museum’s existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object’s history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.

Requirements/Evaluation: Three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy for acquisition.

Prerequisites: ECON 110 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

ARTh 531  (S) 19th-Century American Performance and Popular Culture

This course will study a wide variety of performances and emerging popular culture in 19th-century America, many of which, although not unique to the United State, reflect the U.S. back to itself in complex ways. Topics will include blackface minstrelsy, circuses and humbugs, male impersonators and burlesque, ethnic caricature, allegorical paintings on tour, vast panorama painting, anti-slavery imagery, late 19th-century theatre and spectacle, wild west shows as well as other mythologizing of indigenous Americans and the American landscape, the birth of the American art museum, and representations of significant moments of popular resistance, from the Lakota to the Great Railroad Strike of 1877. The central questions animating this course will be around the nature of performance and the popular. What can these two concepts tell us about the nature of art?

Requirements/Evaluation: Reading/writing assignments and class participation

Prerequisites: None

Enrollment Limit: 18

Enrollment Preferences: Grad students, undergrads must have approval from Professor Schmenner

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Attributes: ARTH post-1800 Courses

Spring 2024
ARTH 532  (F) Creative Life: The Visual Economy of Work
This course is a seminar on life and work focusing on methodologies of production--art, creative writing, history, theory, and criticism. With an initial focus on the pivotal period from the invention of photography until the onset of World War II, the course will examine the economy of work within modern visual culture. What were the considerations at stake in capturing the "facts" of industrial production? We will examine historical definitions of work, and practices and activities from life that have typically qualified or have the potential to qualify as work (in addition to critiques of these equivalencies). The latter half of the course will be driven by considerations of these themes in relation to student and workers movements of 1968, and contemporary forms of globalization and pluralist subjectivities. One related concern will be the consideration of intersubjective relations--professional and personal partnerships, friendships, and networks--which not only influence the trajectory of one's life, but also the research one chooses to undertake. With the awareness that a range of drives and investments inhabit one's production, participants will be asked to reflect upon their own working practices as a means of critically engaging the affective relations governing artistic and intellectual labor. There will be an emphasis on cross-disciplinary ideas and influences--ranging from art history, film and media studies, the history of science, literature, and political history as a means of integrating theoretical approaches with a range of materials, including photography, cinema, illustrated magazines, advertisements, archives, world exhibitions, and product showrooms.

Requirements/Evaluation: Active discussion participation; rough draft (mid semester) and final research paper (20-25 pages)
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: MA students, then undergraduate art history majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

ARTH 537  (F) HIV + AIDS in Film and Video  (DPE) (WS)
Spanning activist works, experimental film, Hollywood dramas and documentary, this course examines the role of moving images in the global AIDS crisis, its aftermath, and its ongoing aftershocks. The AIDS crisis of the 1980s and 1990s was, in the words of Larry Kramer, a 'plague' of epic proportions, with an entire generation obliterated before it could reach maturity. And yet, the plague years also spawned a remarkable amount of creative and activist image-making aimed at fighting, mourning, and grappling with AIDS. Now, we find ourselves in another pivotal moment: while the past decade has provoked a new wave of AIDS historiography, the COVID-19 pandemic has caused AIDS to reverberate with even greater force. Together, we will ask difficult and probing questions about this phenomenon called the 'AIDS epidemic,' examining the role of art in frontline activism, the ethics of AIDS historiography, mainstream visions of the AIDS body, and the need for a diversity of AIDS narratives. This seminar-style course will combine weekly screenings with readings, short writing assignments, student-led discussion, and a final research project of the student's design. In order to facilitate robust discussions and maximize student and faculty safety, the majority of this course will occur online. It will contain some in-person experiences when possible.

Class Format: This course will be largely conducted online, in order to facilitate robust discussions and maximize student and faculty safety. It will contain some in-person experiences when possible.
Requirements/Evaluation: Students will be evaluated according to the following criteria: weekly attendance, readings and participation in seminar discussion; leading class discussion once during the semester; 3 short response papers; one paper of 20+ pages of original student research.
Prerequisites: MA student, Art History or Studio Art major, or instructor permission
Enrollment Limit: 10
Enrollment Preferences: MA students first, followed by Art History and Studio Art majors
Expected Class Size: 10
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)
Writing Skills Notes: Students will be required to conduct regular writing assignments which will culminate in a graduate-level research paper.
Difference, Power, and Equity Notes: This course explores an epidemic that had devastating effects on LGBTQ+ people, and has disproportionately affected communities of color. Questions of difference, power, and equity are absolutely central to the course.

Attributes: ARTH post-1800 Courses

ARTH 538  (F) Realms of Earth and Sky: Indian Painting, ca. 600-1857  (WS)

On the basis of technique, Indian painting forms a continuum from the beginning of the first millennium down to the mid-nineteenth century: an outline in ink filled with flat, opaque colors which are burnished between each layer to give them opacity. In its media, its subject matter, regional variation, range of patronage, and artistic virtuosity, it displays startling diversity. From the northern Himalayan hills to Mysore in the south, artists, often working in family workshops for royalty, priests and wealthy merchants, have adorned caves and temples, illustrated books, and created lavish albums with themes ranging from the sacred to the secular. The study of Indian painting itself is a vast, evolving body of literature that continues to oscillate between discussions of artistic style and a concentration on content and context. The aim of this seminar is twofold: to outline the development of Indian painting historically; and to understand the political, social and religious circumstances that produced some of the greatest masterworks in Indian art. How was Indian painting used? Who were the patrons? How does the art form reflect the particular cultural values of its time? As an analytic framework, the seminar will consider Indian miniature painting both in light of primary literary sources as well as through current scholarship.

Requirements/Evaluation: Class participation. Short weekly responses. Final 15- to 20-page paper to be developed with the instructor throughout the semester.

Prerequisites: none, open to all students

Enrollment Limit: 19

Enrollment Preferences: graduate students, undergraduate art majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1)  (WS)

Writing Skills Notes: Students will submit short written assignments weekly. They will also be required to submit a final paper which they will develop throughout the semester. Students will receive comments and suggestions from the instructor on their writing skills.

Not offered current academic year

ARTH 545 Architectural Theory in Crisis

Why do buildings need words, or do they? For most of the world and most of history, buildings are made without the benefit of formal architectural thought. But at various times, ideas about the aesthetics of buildings, their cultural and philosophical meaning, and their underlying principles, have been matters of great public interest. And architectural theory--in the form of treatises, manifestos, and critical reviews--has exercised an enormous effect on building. This theory can be prescriptive, presenting categorical rules for making good buildings; it can be descriptive, looking at how buildings perform in the real world; and it can be radical, seeking to change the essence and definition of architecture. Theory seemed very important to architects twenty years ago, but that is not the case today. Why? We will investigate. Students will give short presentations on key theorists, such as Vitruvius, Alberti, Palladio, Laugier, Boullée, A. W. N. Pugin, Viollet-le-Duc, Gottfried Semper, Le Corbusier, and Robert Venturi. The semester will conclude with a 20-page seminar paper, based on comments and discussion following a classroom presentation.

Class Format: presentations

Requirements/Evaluation: several short presentations and a final 30-minute presentation, to be followed by a 20-page paper

Prerequisites: permission of instructor

Enrollment Limit: 11

Enrollment Preferences: Graduate students

Expected Class Size: 10

Grading:

Distributions: (D1)

ARTH 547  (F) The Studio, The Bedroom, & the Tomb: Artists and Artistic Biographies in the 19th Century&Beyond
How was the vocation of the artist thematized in the European cultural imagination in the Romantic age and its aftermath? Even more, how did artists themselves articulate, experience, and reproduce that sense of vocation? What were its mythologies and poetics, at once as they were circulated in visual culture, but also as they were lived, experienced, and reproduced by artists themselves? We will explore such question across three historically, psychologically, and tropologically configured "sites": the artist's studio, the artist's desire, and the artist's death. Readings by Freud, Balzac, Kris and Kurtz, along with scholarship largely centered on the visual arts of the 18th and 19th centuries. With instructor permission, students may undertake research projects in any field of the history of art.

Requirements/Evaluation: presentations, research paper
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: graduate students, then advanced Art History major undergrads
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

ARTH 552 (F) Art and Enlightenment in Europe

Cross-listings: ARTH 552 ARTH 242

Secondary Cross-listing

This lecture course traces the emergence of new modes of art- and image-making during two momentous centuries of European history that established the paradoxical foundations of our modern world. In this period, modern democracy was founded and determined by exploitative labor, the extraction of natural resources, and the rise of the trans-Atlantic slave trade. Over two centuries from the founding of the French Academy in 1648 to the 1839 invention of photography, this course traces these tensions in art and intellectual thought, examining beauty and the sublime, rationality and madness, personhood and enslavement, natural history and extraction, democracy and tyranny. Often defined in terms of the "Enlightenment," this intellectual and artistic period engaged with freedom of religious thought, scientific experiment, and a belief that humanity was guided by reason and rationality. Yet these same discourses also laid the foundation for the invention of race, nationalism, and the expansion of European colonialism. Isolating a series of pivotal moments and emblematic figures in visual culture of this period, this course asks students to consider how art was implicated in Enlightenment, and, in turn, how Enlightenment was implicated in both newly liberatory and newly oppressive concepts of subjectivity and personhood. Particular emphasis will be placed on the history of science, and, relatedly, on the increasing global circulation of ideas, people, and goods. Artists in our purview include well-known figures like Velázquez, Rembrandt, Watteau, Hogarth, Goya, and Blake, as well as makers until recently left out of the art-historical canon, such as the Frankfurt-born botanical illustrator Maria Sibylla Merian, the Polynesian navigator and draftsman Tupaia, and the Guadeloupean neoclassical painter Guillaume Guillon-Lethière, the subject of a major upcoming exhibition at the Clark Art Institute. Designed for students with no prior experience studying art history, the course will work directly from objects in local collections, prioritizing methods of close looking and formal analysis. At the same time, the questions and methods of our inquiry will be fundamentally interdisciplinary. Readings will emphasize primary sources and recent scholarship. A separate discussion section will be offered for MA students.

Requirements/Evaluation: midterm exam; final exam; visual analysis paper (3 pages); final paper (10 pages)
Prerequisites: none
Enrollment Limit: 50
Enrollment Preferences: art history majors
Expected Class Size: 50
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

ARTH 553 (F) New Ecologies in Contemporary Art
This seminar will consider a range of current artistic approaches to environmental questions, especially through the relational, systemic terms implied by ecology. As scholars have argued, where "nature" connotes that which is monolithic, ahistorical, and apart from humans, ecology reveals a situated and specific web of relationships, interdependencies, and power in which we are all implicated. Our seminar will pay particular attention to intersectional practices that acknowledge the ways extraction, exploitation, and dispossession have produced the environmental crises of the present, which also affect the most vulnerable and least responsible—both human and nonhuman—with greatest force. In addition to studying the work of emerging and established artists, we will read texts by the academics and activists with whom they are in dialogue, and welcome some of them as guests to our class. This seminar anticipates a group show on the subject at the Clark in summer 2023.

Requirements/Evaluation: seminar presentations; research paper (approximately 20pp)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: MA students first, then art history majors; By application if over-enrolled

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

ARTH 558 (S) Circa 1850: Artistic Currents and Cross-Currents

Although the history of nineteenth-century European art has often been narrated as a succession of "sms," the notion of discrete artistic movements following one upon the other is of course highly misleading. Despite common perceptions of Realism as the prevailing force at mid-century, many contradictory impulses were simultaneously at work. The Romantic strain in visual art continued, though sometimes in sublimated form, and historicizing and avant-garde perspectives alike jockeyed for influence in art criticism, sales rooms, and exhibition venues. Abetting this collision of styles was a proliferation of new media in visual culture more broadly. Focusing on European and American examples from the middle decades of the nineteenth century, this course addresses the emergence of new tendencies in art and the persistence or revival of old ones. We will explore a variety of topics, including the invention of photography and its impact on other image-making techniques; the opening of Japan and the vogue for Japonisme; medieval nostalgia in the face of rampant Haussmannization; and the role of tradition in vanguard art. On the American side, we will consider printmaking and photography as tools of documentation and self-fashioning during the Civil War era. This course will take place in the Manton Study Center for Works on Paper. Each session will engage directly with works from the Clark's collection, to be discussed and analyzed in conjunction with critical and theoretical readings.

Requirements/Evaluation: Reading/writing assignments, participation.

Prerequisites: None

Enrollment Limit: 16

Enrollment Preferences: Graduate students first. Undergraduates must receive permission from the instructor.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

SEM Section: 01 M 10:00 am - 12:50 pm Anne R. Leonard

ARTH 559 (F) Photographing City Life: Diane Arbus/James Van Der Zee

Diane Arbus and James Vander Zee in Manhattan. In this seminar we will discuss two photographers of city life: Diane Arbus (1923–1971) and James Van Der Zee (1886–1983). So doing, we will also observe how life in New York changed during their years of great productivity. In the first part of the course, "Diane Arbus in Manhattan," we will talk about Arbus' relationship to New York--the city of her birth. For most of her career, Arbus worked in Manhattan; indeed, one could think of the city as another character in her work. Arbus' relationship to myth--to storytelling--was profound. A great reader throughout her life, she was drawn to those writers who saw cities as very individualized places. In addition to looking at Arbus' photographs of life in Manhattan in the nineteen fifties, sixties, and in 1970, we will read her published letters, and those authors who inspired her with their artistry,
and fascination with myth, including Borges, and Kafka. In the second part of the course, "James Van Der Zee and the Black Village," we will discuss the great Black photographer whose archives were just purchased by the Metropolitan Museum of Art (where Arbus' archives are as well). Born in Lenox, Massachusetts, Van Der Zee settled in Harlem in 1916; there, he opened a photography studio where he became known for his portraits of Black life as it was lived uptown. Admired by Arbus and others, Van Der Zee's interest in and commitment to his community extended to all aspects of Harlem life, including death. To support our discussions of Van Der Zee's Black village, we will read modernist classics, including Jean Toomer's "Cane," and Toni Morrison's "Jazz" that deal specifically with village life. Please note that seminar meetings will be held biweekly on 9/8, 9/29, 10/13, 10/20, 11/3, 11/17. The seminar will include several mandatory viewing excursions outside Williamstown. The dates of these excursions are TBD, but will be restricted to Fridays or weekends. Professor Als will hold office hours following the seminar at hours TBD. Application may apply.

ARTH 560  (S)  Repairing a Broken World: Intro to North African Contemporary Art  (DPE)

Cross-listings: ARTH 560 ARAB 360 RLFR 360 COMP 361 ARTH 460

Secondary Cross-listing

How do artists respond to a world in crisis? How does visual art engage violent histories, injured bodies, social injustice and ecological disaster? In this course we will explore the political and ethical concept of repair as it emerges in the work of contemporary North African visual artists. Repair is both a material and symbolic transformational practice of putting together something that is torn or broken. It is never complete, nor does it redeem a history of harm or violence. Rather repair is an invitation: a bringing of people, histories, objects, buildings, feelings and geographies into relation with one another in order to link worlds that have been splintered and separated. It is also a call to imagine other futures. North African contemporary artists have deeply engaged in this type of repair work, attending to colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity and broken transmission of memory. We will dive into the work of individual artists as well as collectives while reading theoretical texts about broken-world thinking, reparative epistemology, alternative archives, and material reparations.

Class Format: Section 1 is conducted entirely in French. Section 2 is conducted in English (with the option of selected reading in French). Students are welcome to sign up for either section but students taking the course for RLFR credit must register for section 1.

Requirements/Evaluation: For undergrads: Active participation, weekly glow posts, 5-page mid-term paper, 10-12 page final paper and presentation. For grad students: Active participation, weekly glow posts, 5-page mid-term paper, and 20-page final paper and presentation.

Prerequisites: For RLFR students, any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18/sec

Enrollment Preferences: If over-enrolled, preference will be given to RLFR, ARAB, ARTH and COMP majors, and only 4 spots will be offered to Grad Art students.

Expected Class Size: 15/sec

Grading: yes pass/fail option, yes fifth course option

ARTH 561  (S)  Land, Memory, Materiality: Histories and Futures of Indigenous North American Arts  (DPE)
This course engages Indigenous North American traditions of creative expression, remembrance, and representation in historical, contemporary, and future-facing ways. Drawing upon diverse Native American and First Nations theories and practices, it ranges widely across the continent to consider Indigenous arts and material culture within specific cultural, socioeconomic, and political contexts. Part of the course is grounded in the Native Northeast, including the Indigenous homelands of the Stockbridge-Munsee Mohican Community in which the Graduate Art Program and Williams College are situated. Other units will focus on continuities and transformations in artistic and maker-traditions within and across specific Indigenous nations and communities. The course is especially interested in connections between past and present, and the innovative ways Indigenous artists, makers, and knowledge-keepers have reckoned with what has come before, while also mapping meaningful future pathways. Topics will include repatriation and community-led restorative efforts to bring home ancestors and important heritage items "collected" over the centuries following 1492; concepts and practices of cultural, intellectual, visual, and political sovereignty; decolonizing museums; the complex dynamics of collaboration; Indigenous, African-American, and Afro-Indigenous artistic connections and solidarities; and Indigenous challenges to Eurocentric and settler colonial approaches to preservation, interpretation, and classification. Seminar members will develop familiarity with methods and ethics grounded in Native American and Indigenous Studies, and with new scholarship by leading and emerging critics and creators.

Class Format: The course will feature seminar discussions as well as local trips to museums, libraries, and archives with pertinent collections and exhibitions.

Requirements/Evaluation: Engaged participation in discussions; in-class presentations; short writing assignments in preparation for final project; final original research and interpretive project, with presentation to seminar.

Prerequisites: For undergraduates, at least two prior courses in or related to History, Art History, Native American and Indigenous Studies, and/or Museum Studies.

Enrollment Limit: 16

Enrollment Preferences: Priority for Graduate Art students. Four seats are reserved for undergraduates, with preference to junior and senior majors in Art History and History. Undergraduates should email a brief statement of interest to cd10@williams.edu.

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 454(D1) ARTH 561(D1)

Difference, Power, and Equity Notes: The course centers theories, experiences, and expressions from Native American/Indigenous communities, scholars, and artists/makers, while engaging foundational and new work in Native American and Indigenous Studies (NAIS). The course also provides students with critical tools for reckoning with settler colonialism and its historical as well as enduring impacts in Indigenous contexts; and with race, ethnicity, sovereignty, and tribal nationhood as key interpretive frames.

Attributes: HIST Group F Electives - U.S. + Canada

Not offered current academic year

ARTH 563 (F)(S) Contemporary Curatorial Workshop
Bi-weekly seminar for graduate art history students to engage in discourse around contemporary curatorial practice with professionals in the field. Guest curators discuss their work and methodology and students enrolled in the course who are working on curatorial projects have the opportunity to workshop their ideas with their peers and guests. Under the direction of the chairs, students will participate in class discussions, present projects, host local and visiting curators, travel to visit exhibitions regionally as the schedule allows, and explore key topics in modern and contemporary art and curatorial practice.

Class Format: workshop, meets all year

Requirements/Evaluation: Attendance and participation

Prerequisites: Graduate art history

Enrollment Limit: 25

Enrollment Preferences: Open to graduate students in art history, and undergraduates with prior approval of the instructors and as space allows.

Expected Class Size: 25

Grading: pass/fail option only
**ARTH 565 (F) Sonic Ecologies: Queer Listening, Orientations, and Objects**

This seminar considers sound, the aural imagination, and practices of listening in visual art and time-based media. Focusing on work produced in the 20th and 21st centuries, we will explore theoretical, media, aesthetic, and reception issues through an intersectional lens. While we will focus on queer theory and related artworks and art historical accounts, the course will also draw heavily on recent writings on and artistic practices that take up other related aspects of "ecology" broadly understood: interspecies relationality, the environment, the climate crisis, and scholarship grounded in the specificity of critical race theory, Latinx, Caribbean, and diasporic studies. Readings will tend toward the theoretical--from Sara Ahmed and José Esteban Muñoz to Tina Campt and Ren Ellis Neyra, among many others--but will be accompanied by art historical accounts and each class meeting will be grounded by in-depth discussion of several specific works of art. When resonant, we will take advantage of access to relevant exhibitions, performances, or events at the Clark, Williams College Museum of Art, MASS MoCA, or Bennington College. The course will prioritize student-facilitated discussion, and student work will be focused on producing a substantial research paper (with an option to produce a hybrid research/creative project, developed in conversation with the instructor). Undergraduates welcome with permission of the course instructor.

**Requirements/Evaluation:** Reading and writing requirements, class participation

**Prerequisites:** None

**Enrollment Limit:** 18

**Enrollment Preferences:** Grad students first, then music majors and art majors, but undergraduates must seek approval from Professor Woolsey

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)

**Attributes:** ARTH post-1800 Courses

**ARTH 569 (F) Gérôme**

This course explores work and career of Jean-Léon Gérôme (1824-1904), perhaps the most renowned, popular, and influential artist of the later nineteenth century. With commercial and artistic relationships that spread his influence across the globe, Gérôme has come to seem very much like a highly successful contemporary artist, specifically with regard to his place in an international art world that married elite institutional practices to new technologies of reproduction, marketing techniques, and other instruments of modern mass culture. Gérôme's fame was short lived, however. In the wake of the Modernist revolution on the one hand, and Post-Colonial critique on the other, no discussion of the artist can avoid wrestling with complaints that have left him thoroughly diminished--though less forgotten than scorned. Not only did his art, as it seemed, help perpetrate a gigantic aesthetic error, it blundered onto ethically compromising terrain. Today Gérôme stands as Exhibit A in wide-ranging critique of Orientalism's ideological work. The course will interrogate the Modernist and Post-Colonial complaints against Gérôme in detail, even as it also explores his art from a range of other perspectives, many developed very recently. Topics include Gérôme's relationship to photography, to Orientalism and animal studies, to the cinema, to polychrome sculpture, his approach to historical narrative, and well as his voyeurism and other other manipulations of viewer experience so critical to his art. The seminar will engage the Clark's important collection of Gérôme paintings, and also travel to the Walters Art Gallery in Baltimore, conditions permitting. Students may prepare papers on any aspect of global late-nineteenth-century "academic" or "official" art that was informed by Gérôme's example.

**Requirements/Evaluation:** class participation, presentations in seminar, research paper (approximately 20 pp)

**Prerequisites:** none
Enrollment Limit: 16
Enrollment Preferences: MA students, then art history majors

SEM Section: 01 R 1:00 pm - 3:50 pm Marc Gotlieb

ARTH 570 (S) Image-making, Orientalism and Visual Culture
Images enjoy extraordinary power in the spaces between self and other, human and divine. They play myriad roles--witness, surrogate, instigator, supplicant--and travel freely across political, religious and cultural boundaries. They are also subject to reproduction, alteration and destruction as disparate visual cultures interact and globalizing processes ensue. This course will focus on various regions--e.g. United States, France, Turkey, and the Perso-Islamic sphere--and the images that factor in the intervening spaces, from 1800 to the present. We will begin with the theme of self-fashioning and the peculiar nature of portraiture. Thereafter, the entanglement of religious beliefs and visual traditions will broaden our inquiry, leading us to contested dynamics like iconoclasm and aniconism, and reductionist types like veiled women and pious men. Along the way, proliferating and palimpsestic forms of Orientalism will oblige us to consider the very concept of global visual culture. Students will submit weekly GLOW posts to foster class discussion and undertake a major research project over the course of the semester.

Requirements/Evaluation: Class participation, weekly oral presentations, 15-20 page term research project.
Prerequisites: None

Enrollment Limit: 12
Enrollment Preferences: Graduate students
Expected Class Size: 8
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

ARTH 576 (F) Paper, Process, Practice
Works on paper, particularly multiples, confound many of the received ideas around artistic invention and originality. This course will address the varied functions of printmaking in Europe over four centuries (1500-1900), giving special attention to the following questions: What is the relationship between prints and other artistic media? How do the material constraints involved in printmaking lead to a particular set of practices, and how in turn do those marry with technological advances to produce new aesthetic possibilities? To what extent did Old Masters such as Dürer and Rembrandt define the terms for later printmakers, and how did their example enable and/or discourage innovation in printed subject matter and style? What was the role of prints in creating both new forums for public discourse and new collecting publics? Arranged thematically rather than chronologically, this course will cover a wide array of printmakers and types of printed media.

Requirements/Evaluation: class participation, class presentation, research paper
Prerequisites: none

Enrollment Limit: 16
Enrollment Preferences: Art history MA students, then advanced undergraduates
Expected Class Size: 16
Grading: pass/fail option only
Distributions: (D1)
Attributes: ARTH pre-1800 Courses

Not offered current academic year
How did medieval and Renaissance “books” work, when the codex was only one form of the book, which continually evolved, and when they weren't only used for reading? This course will explore the book as object and the book as concept. Drawing on the collection of manuscripts, incunables, and later printed books at WCMA, Chapin, and surrounding university museums, the course will consider how the forms and materiality of books could have affected readers' reception and perceptions, and in turn, how religious, cultural, political, and economical forces shape their format, decoration, and paratext. While it will primarily deal with Western books, we will also consider early ones from around the world. Students will have the opportunity to engage with Embodied Words: Reading in Medieval Christian Culture, contribute to the exhibition's StoryMaps on medieval reading, and develop some codicological skills. Coming to the study of the book from the theory of thingness and cognitive linguistics, we will study our changing uses and relationships with and to books as instruments of doctrine and devotion, power and identity.

Requirements/Evaluation: class presentation; research paper (20pp); other assignments

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: MA students, then advanced art history undergrad majors

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: ARTH pre-1800 Courses

one chooses to undertake. With the awareness that a range of drives and investments inhabit one's production, participants will be asked to reflect upon their own working practices as a means of critically engaging the affective relations governing artistic and intellectual labor. There will be an emphasis on cross-disciplinary ideas and influences--ranging from art history, film and media studies, the history of science, literature, and political history as a means of integrating theoretical approaches with a range of materials, including photography, cinema, illustrated magazines, advertisements, archives, world exhibitions, and product showrooms.

Requirements/Evaluation: Active discussion participation; rough draft (mid semester) and final research paper (20-25 pages)
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: MA students, then art history majors
Expected Class Size: 12
Grading:
Distributions: (D1)

ARTH 582 (F) On Race, Art, and Property

In her seminal article "Whiteness as Property," critical race theorist and professor Cheryl Harris contends that the legal system in the United States "has come to embody and legitimize benefits that accrue to citizens who are white." The legacy of our legal system, which has dehumanized people by rendering them as property and legalized the theft of land by colonizers from Native Americans, is not confined to the past, but has shaped our world and thrives within our present moment. How has this legacy and Harris' theory been explored in contemporary art? How might it allow us to revisit artworks and practices by canonical artists from alternative perspectives? This course aims to study aspects of this complicated history through a broad range of texts from legal and literary theory to art history to Black and Native American studies to more immediately authored texts published on social media platforms. Students are encouraged to think dexterously as we study works by Gordon Matta-Clark, Michael Heizer, Sondra Perry, Cameron Rowland, and Cauleen Smith--among others.

Requirements/Evaluation: presentations, writing assignments
Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: If over-enrolled, by application
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option

ARTH 583 (F) Graphic Content: Typography and the Book between Art and Design

This seminar considers the entangled histories of fine art and graphic design by focusing on creative practices surrounding the letterform and the book form from 1900 to the present. We will study historical avant-garde movements active in publishing and making-public; the development of the graphic design discipline, in print and on screen; and logocentric artistic tendencies from concrete poetry and pop art to conceptualism and artists' books. We will also consider diverse literary practices, graphic visualization, and political agitation. The seminar will make use of the Clark library's outstanding collection of artists' books and the holdings of the Chapin library at Williams. We will welcome several guests, including art historians, artist-designers, designer-artists, editors, publishers, and bookmakers.

Requirements/Evaluation: class participation, class presentation, research paper/project
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: Art History MA students, then advanced undergraduates. Course will be by application if overenrolled.
Expected Class Size: 10

ARTH 584  (S) Fragments and Healing: Disability Studies and Late Antique Art

Cross-listings: ARTH 425 REL 425 ARTH 584

Secondary Cross-listing

This seminar will investigate some of the ways that contemporary Disability Studies can help us see and think about the complexities of differently abled bodies in Late Antiquity (broadly, from ca. 200 until ca. 750), the formative period for Christian art (and consequently for much of Western art). Disability Studies is an extremely active and rich body of literature and art that has not often been brought into conversation with historical periods of art, and so this seminar seeks to open up discussion of the insights possible from that conversation, not only how Late Antique art can be re-interpreted, but also how that period of art can reveal under-explored areas in the field of Disability Studies. The seminar will undertake a mutual interrogation of accepted notions in both fields and, in this way, to explore some new understandings of Disability Studies' capacities for allowing us to think with our art, culture, and bodies. The means at our disposal for this seminar are art of Late Antiquity and of the contemporary world, and that idea of mutual interrogation also operates in our study and display of that art. The seminar will look at art of healing and recuperation, art produced by and directed at diversely-abled bodies, and at fragments and restoration, and think about art as documents, reflections, and determinants of those bodies, now and in the past. It will, for this reason, work around the collection of WCMA, with exhibition and collection research, and the historical archives of the Library holdings, so that the widest possible study of bodies and difference is opened for our thinking and dialogue.

Requirements/Evaluation: participation in discussion; three 1-2-page reading reports; one 3-5-page exhibition response; one 15-20-page final essay

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: senior art-history majors and graduate students; other students will need instructor consent

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: In this seminar, students will develop skills of crafting clear and persuasive arguments through an iterative writing process. Further, to help them achieve these goals, they will receive timely comments on their written work.

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 586  (F) Japanese Popular Visual Culture

Cross-listings: ASIA 186 COMP 186 ARTH 286 ARTH 586

Secondary Cross-listing

The phrase "Japanese popular culture" often calls to mind comics and animation, but Japan's earliest visual pop culture dates back to the 17th century and the development of arts like kabuki theater and woodblock prints that could be produced for a mass audience. This course traces Japanese popular culture through a range of visual media: kabuki and puppet theater, premodern and postmodern visual art (ukiyo-e, Superflat), classic film (Ozu, Mizoguchi, Kurosawa), manga/comics (Tezuka, Otomo, Hagio), and animation (Oshii, Miyazaki, Kon). The class will also study material examples of Japanese popular culture on display in the Repro Japan exhibition at the Williams College Museum of Art. We will develop visual reading skills to come up with original interpretations of these works, and compare different media to make them shed light on one another.

Class Format: discussion

Requirements/Evaluation: attendance, participation, two 5-page papers, final exam

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: students majoring or considering a major in a related discipline
ARTH 588 (S) The Scene of Decapitation in European Art (1600-1900)
From Goliath to Medusa, from Judith to Salome, from the invention of the guillotine to the mythology of the executioner under "Oriental despotism," the "scene" of decapitation has long stood as a central focus of European art, visual culture, and letters. This course examines that scene as an artistic, psychological, and intellectual problematic across painting, sculpture, and other media, with particular although not exclusive attention to the nineteenth-century. Although part and parcel of the larger spectacle of juridical punishment, the scene of decapitation arguably constitutes its own series, and for this reason has attracted numerous artists and a prestigious, multi-disciplinary literature. Artists include (but limited to) Caravaggio, Artemisia Gentileschi, Théodore Géricault, Gustave Moreau, and Henri Regnault. Readings by Freud, Kristeva, Bersani, and many others, including a large body of art historical literature. Weekly readings, discussion, oral presentation, and research paper on a relevant topic from 1600 to 1900.

Requirements/Evaluation: class presentation; research paper (approx 20pp)

ARTH 589 (S) Imitation, Copy, Reproduction
Focusing primarily on European and American art before 1900, this course addresses the related categories of imitation, copy, and reproduction with particular attention to prints and other works of art on paper. We will consider the status of the multiple, the role of imitation in classical art theory and pedagogy, the motivations for (and protections against) different kinds of copying, the emergence of photomechanical processes, and the centrality of reproducible images to the art-historical enterprise, among other topics. The basis of our investigations will be works from the Clark's own collection, to be studied with a close eye to their medium and materiality. We will explore concepts of originality, fidelity, authenticity, and value in the light of critical and theoretical texts, while also examining the historical conditions that underlie distinct instances of image reproduction. This course will take place in the Manton Study Center for Works on Paper. Each session will offer direct engagement with works in the Clark's permanent collection. The course will also benefit from the exhibition Promenades on Paper: French Eighteenth-Century Drawings from the Bibliothèque nationale de France, which will be on view from December 17, 2022 through March 12, 2023 in the Clark Center.

Requirements/Evaluation: seminar presentation; research paper (approx 20pp)

ARTH 590 (S) Guillaume Lethière (1760-1832) and Caribbean Networks in France during the 18th and 19th centuries
Born in the colony of Guadeloupe to a French father and a formerly enslaved woman, Guillaume Lethière (1760-1832) would become a key figure in the Neoclassical movement, a well-respected pedagogue with a sizeable workshop populated by notable students, an ambitious collector, director of the Académie de France in Rome from 1807 to 1816, a favorite artist of Lucien Bonaparte, and a member of the Institut de France. Despite his many accomplishments and sizeable corpus of paintings and drawings, Lethière has notably disappeared from the "canon" of art history. Such a lacunae begs many questions about the circles of sociability in which he traveled, the reception of Caribbean artists in France in the eighteenth and early nineteenth centuries, and the lack of widespread knowledge on these topics today. This seminar will be timed with the planning of a major monographic exhibition to take place at the Clark Art Institute in the summer of 2024, and students will work alongside the curators on various aspects of the exhibition's organization. The course will also provide an opportunity for close examination of objects in the Clark's permanent collection, including Lethière masterpiece Brutus condemning his sons to death (1788), as well as an album of approximately one hundred drawings by the artist.

Requirements/Evaluation: Brutus condemning his sons to death (1788), as well as an album of approximately one hundred drawings by the artist.

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: MA students, then art history major undergrads

Expected Class Size: 12

ARTH 591 (F) Borders/Walls: Liminality and Politics in Documentary Cinema

Despite increased potentialities for mobility and exchange, borders and walls persist within contemporary culture. This research-based seminar examines where the foreclosure of these potentialities appears within global documentary cinema. It does so with the knowledge that walls have also played a significant role in cinema's ongoing reinvention. Auguste and Louis Lumière's first film featured not only the routine departure of the factory's workers at the end of the working day, but also the built structure of the factory wall separating spheres of labor and leisure. Examining the intersection of concrete reality with the moving image, this seminar considers the implications of these spaces of liminality for the possibilities or limitations of the cinematic medium. It considers the way these mental, physical, and geopolitical constructs emerge both theoretically and materially as spaces that are tangibly felt, negotiated, and experienced. Given that site-specific works, institutional and civic contexts, as well as museums, serve as spaces of liminality and knowledge production, attention in this course will also be directed towards the (im)materiality of cinematic practice with respect to projection and the screen.

Requirements/Evaluation: Active discussion participation; rough draft (mid semester) and final research paper (20-25 pages)

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Graduate students, senior-level majors in art history

ARTH 592 (F) Chance and Design: Ideas and Iconographies of Causality in Europe before 1900

The idea of the work of art has a long history in Western philosophy and religious thought as the model for the idea of intentionality at the broadest scale; the relation of the artist to their artifact mirrored, in microcosm, the relation of an "intelligent designer" to a designed universe. The collapse of such models for thinking about both art and the natural and social world are characterized, typically, as intrinsic to the epoch of modernity. Within art history of the past half century, a significant amount of attention has been devoted to theorizing how many now-canonical artists (eg. the proto-conceptual artist Marcel Duchamp, the composer John Cage and choreographer Merce Cunningham) harnessed chance procedures with the aim of vacating their agency from the process of creation and with the "purpose to remove purposes." This course attempts to look before and beyond these well-trodden histories. Probing the visual dimension inherent in the concept of design and its absence (a visuality epitomized by blindfolded

Requirements/Evaluation: Active discussion participation; rough draft (mid semester) and final research paper (20-25 pages)

allegorical figure of Fortuna), we will seek to trace a more capacious genealogy for the efflorescence of chance, accident, and randomness as aesthetized objects of fascination in the twentieth century. We will trace the prehistory of these concepts in relation to both the abstraction of numbers and the concreteness of organisms, situating ideas of chance in relation to both the rise of a globalization and racial capitalism grounded in risk, financial speculation, and probability, as well as the eventual emergence in the nineteenth century, of an evolutionary theory capable of producing statements such as, "what a chance it has been... that has made a man," and recognizing "blind chance" as the originary driver of change in the organic world. The class will include presentations by invited guest scholars and focus on a number of case studies spanning the early modern period through the late nineteenth century, including topics such as: the concept of disegno and art as a model of intentionality, the iconography of fortune, gambling, and accidents, the association of chance and seafaring, the iconography of falling and gravity, the incorporation of chance into the material processes of image-making (for instance, in the invention of photography), and the visual culture and visual metaphors of Darwin's evolution. In association with our historical inquiries, the course will also meditate methodologically upon models of causality in art-historical explanation, as well on broader questions of how chance and ideas of chance and causality mediated modern Europe's relation to other parts of the world.

Requirements/Evaluation: class presentation, research paper of approximately 20 pages
Prerequisites: none
Enrollment Limit: 16
Enrollment Preferences: grad students, then art history major undergrads

ARTH 594 (S) Traveling Seminar: Slavery and the Dutch Golden Age
This course takes as its starting point the exhibition at the Rijksmuseum opening in September 2019: Slavery, an exhibition. With this installation, the
curators of the Rijksmuseum seek to correct dominant narratives of seventeenth and eighteenth-century Dutch history, which have absented the role of slavery in determining the economic, social, and visual history of the Netherlands. With a Travel Grant awarded by the College Art Association, the students in this seminar will travel to the Netherlands to visit this exhibition and other relevant cultural institutions in order to examine the possibilities and limits for ‘decolonizing’ the museum. This course will study how slavery is imbricated within the mythic construction of a ‘Dutch Golden Age’ while also examining what happens when the history of enslaved peoples becomes translated into the space of a museum and exhibition. We will consider a revisionist history of Dutch artistic production, accounting for slavery in determining the Dutch economy and visual production while also asking what happens when slavery becomes narrated in the space of one of the nation’s history museums. We will read contemporary black feminist theory such as Sylvia Wynter, Saidiya Hartman, Hortense Spillers, and Christina Sharpe as a means to struggle with how the space of the exhibition chooses to activate and write those missing histories, and we will examine if it is even possible to responsibly tell the story of slavery over two centuries when the majority of the subjects have been completely defaced, removed, and excised from the historical record, and their voices are often the ones still absent. In the words of Saidiya Hartman, we will ask: “Is it possible to construct a story from the ‘locus of impossible speech’ or resurrect lives from the ruins?”

Asian American Studies is a vibrant interdisciplinary field of study about race and racism, colonialism and empire, immigration and diaspora, war and militarism, labor and embodiment, citizenship and identity, and much more. AAS research and teaching are grounded in the histories, social relations, and cultural expressions related to Asian American, Asian immigrant, and/or Asian diasporic people. Asian Americanist scholars, artists, and activists thus continuously generate critical insights into these communities within, or in relation to, the United States or the Americas more broadly. The field encompasses comparative methods of study, transnational analysis, and the work of scholars from around the globe. AAS courses at Williams encourage inquiry within traditional disciplines, bolster a number of interdisciplinary fields, and showcase a wide variety of theories, methods, and methodologies (both creative and scholarly). AAS courses emphasize intersectional analyses of difference (e.g. race, gender, sexuality, ability, religion, citizenship, class), as well as the social and cultural construction of place and identity. Knowledge in this field is thus crucial for understanding society, history, literature, religion, culture, art, and beyond.

The concentration in Asian American Studies requires five courses. Students are required to take at least one 100- or 200-level introductory gateway course, one 400-level senior seminar in which to pursue a capstone project, and three electives. One elective must be a core elective, one must have a country-of-origin, transnational, diasporic, or comparative ethnic studies approach, and one must be at the 300-level or higher. These attributes are not mutually exclusive; some courses may satisfy all three attributes at once. The electives must also be taken in at least two different divisions of the college. Additional courses may be approved by the program advisory committee. Up to one course may be taken while studying abroad or away; the program advisory committee must approve this course as well.

Who or what constitutes the term "Asian American"? Leading with this provocation, this course offers an introductory survey of the interdisciplinary field of Asian American Studies, tracing its formation and evolution from the 1960s onward. Focusing on an array of foundational texts, cultural production, and primary sources central to the discipline, we will ask who has been included/excluded from this category and analyze the shifting constructions of Asian Americans from the nineteenth century to the present in tandem with other markers of difference. Over the course, we will study how these constructions have been shaped not only relationally through other racial formations but also by overlapping systems of power, including settler colonialism, U.S. war and empire, capitalism, and globalization within and beyond the U.S. Additionally, we will examine how this term has been undone and remade via political activism, visual and performance art, media, and contingent spaces.

Requirements/Evaluation: weekly readings, class discussions, weekly discussion posts, in-class presentation, midterm paper, and a final paper or creative project
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: If over enrolled: first-year students, AAS concentrators or prospective concentrators, AMST majors or prospective majors
Expected Class Size: 18
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
AMST 125(D2) AAS 125(D2)
Difference, Power, and Equity Notes: This course examines "Asian" and Asian American" as categories of racial difference constructed through various structures of power. Students in the course are asked to unpack how constructions of this difference have changed over time and produced uneven power relations and access to resources.

Fall 2023
SEM Section: 01    TF 2:35 pm - 3:50 pm     Kelly I. Chung
A tutorial designed to explore the interpretative difficulties and possibilities of East Asian mothers and motherhood in contemporary American literature (fiction and memoir). The "Tiger Mom"--highly controlling, strict, severe almost to the point of abuse--has become the go-to phrase for many Americans when referring to traditional East Asian mothering styles. This attempt to categorize and simplify cultural differences fails to capture the complex nature of East Asian mothering. While the American public imagines East Asian parenting as only unwavering and harsh, immigrant parents, for example, must often find a parenting strategy that bridges traditional East Asian and mainstream American norms. This course will explore the ways that contemporary Asian American authors depict the complexity of East Asian mothering and mothers. What kinds of mothering does the reductive category of Tiger Mom ignore? What are the central questions these authors pose about mothers and motherhood? How do they negotiate the tension between the individual versus the community, or the pursuit of the child's own interests as opposed to success as defined by the parent when it comes to that child's future? And what are the pitfalls of reading literature as social science? In keeping with tutorial format, students will meet in pairs with the instructor once a week; during these meetings, one student will present a short analytical paper on the texts covered that week. The other student will write a response paper and join the instructor in a discussion of both papers. The reading list may include work by Ocean Vuong, Yiyun Li, Michelle Zauner, Celeste Ng, Amy Tan, Jessamine Chan, Ed Lin, Maxine Hong Kingston, Trung Le Nguyen, and Amy Chua, among others.

Class Format: In keeping with tutorial format, students will meet in pairs with the instructor once a week; during these meetings, one student will present a short analytical paper on the texts covered that week. The other student will write a response paper and join the instructor in a discussion of both papers.

Requirements/Evaluation: A paper or response each week; extensive comments (verbal and written) on published and student work; active participation in class; creation of writing assignments and discussion questions.

Prerequisites: A 100-level English course, or the equivalent.

Enrollment Limit: 10

Enrollment Preferences: Anyone who has taken a 100-level English course, or the equivalent.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 206(D1) AAS 206(D2)

Writing Skills Notes: A paper a week, of varying lengths, with the opportunity for multiple drafts. Extensive time spent in and out of class on every stage of the writing process. Opportunities to meet with professor outside of class at any stage of writing. The students' writing tendencies, critical and analytical writing skills, and their editorial modes are as much a subject of the course as the published literature is.

**AAS 216 (F) Asian/American Identities in Motion (DPE)**

**Cross-listings:** ASIA 216 DANC 216 THEA 216 AMST 213 GBST 214 AAS 216

**Secondary Cross-listing**

The course aims to explore dance and movement-based performances as mediums through which identities in Asian and Asian-American (including South-Asian) communities are cultivated, expressed, and contested. Students will engage with how social and historical contexts influence the processes through which dance practices are invested with particular sets of meanings, and how artists use performance to reinforce or resist stereotypical representations. Core readings will be drawn from Dance, Performance, Asian, and Asian American Studies to engage with issues such as nation formation, racial and ethnic identity politics, appropriation, tradition and innovation among other topics. This is primarily a discussion-based seminar course, and might also include screenings, discussion with guest artists and scholars, and opportunities for creative projects. No previous dance experience is required.

**Requirements/Evaluation:** reading responses, in-class writing assignments, participation in discussions and presentations, essays, and a final cumulative essay assignment.

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** first years and sophomores

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ASIA 216(D1) DANC 216(D1) THEA 216(D1) AMST 213(D2) GBST 214(D2) AAS 216(D2)

**Difference, Power, and Equity Notes:** This course introduces students to the role of performance in nation formation in Asia and the history of Asian-Americans in the US through analysis of dance practices. Student will explore how race was central to the formation of Asian and the American nation, and how social and legal discriminatory practices against minorities influenced popular culture. The assigned material provide examples of how artists address these inequalities and differences in social power.

**AAS 237 (F) Islam in the United States: Race, Religion, Politics (DPE)**

**Cross-listings:** AMST 237 REL 237 AFR 237 AAS 237

**Secondary Cross-listing**

Malcolm X is one of the most iconic yet controversial figures in the black freedom struggle in the United States. He is also arguably the most prominent and influential Muslim in the history of the United States. His story and legacy powerfully illustrate the complex intersections of Muslim identity, political
resistance, and national belonging. From the early period of "Black Muslim" movements represented by Malcolm X, to the current "War on Terror" era, American Muslims have faced a complex intersection of exclusions and marginalization, in relation to national belonging, race, and religion. Taking Malcolm X as our point of departure, this course examines how American Muslims have navigated these multiple layers of marginalization. We will therefore consider how the broader socio-political contexts that Muslims are a part of shape their visions of Islam, and how they contest these competing visions among themselves. In so doing, we will examine the complex relation between religion, race, and politics in the United States. Throughout the course, we will be engaging with historical and anthropological material, autobiographies, documentaries, films, historical primary-source documents, music, and social media materials. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to ideology, race, nationality, ethnicity, culture, gender, and language.

Requirements/Evaluation: regular reading responses, 2 midterm essays, final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Majors and concentrators in REL, AFR, and AMST

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

AAS 253 (F) Embodied Knowledges: Latinx, Asian American, and Black American Writing on Invisible Disability (DPE)

Cross-listings: AAS 253 LATS 254 AMST 253

Secondary Cross-listing

This interdisciplinary course assumes an expansive approach towards disability, defining it not exclusively as a legible identity that one can lay claim to, but rather as an identity grounded in one's relationship to power (Kim and Schalk, 2020). This course centers on the critical role of lived experience as a key site of everyday theorization for the multiply marginalized, and specifically on the ways in which invisibly disabled Latinx, Asian American, and Black American individuals write the self. As scholars in disability studies argue, self-representations of disabled individuals carry the potential for us as a society to move beyond the binary narratives of "tragedy or inspiration" so often associated with disability. Rather, the self-produced narratives of US disabled writers of color offer a much more nuanced portrayal of everyday life with disability/ies for the multiply marginalized. Much like invisible disability itself, these self-representations ultimately refute traditional depictions of disability, and underscore the ways in which the bodymind serves as a rich, albeit often overlooked, site of knowledge. Embodied Knowledges draws on the insights of disability studies, crip studies, anthropology, literary studies, medicine, psychology, education, cultural studies, ethnic studies, American studies, gender and sexuality studies, sociology, and trauma studies. We will examine the works of Latinx, Asian American, and Black American writers and scholars others in relationship to one another, and as points of departure for examining issues such as the relationship between immigration and disability; intergenerational trauma; the impacts of paradigms such as the Model Minority Myth and notions of cultural deficit; passing; the politics of disability disclosure, the paradoxes of invisible disability; invisible disability in academic spaces; the role of culture and categories of difference such as race, gender, class and immigration status in societal approaches to and understandings of invisible disability; and future visions in the realm of disability justice and care work.

Requirements/Evaluation: Two 5-6 page essays; One group question assignment; Final reflection document

Prerequisites: None.

Enrollment Limit: 12

Enrollment Preferences: Preference given to majors or concentrators in LATS, AMST, and AAST, in order of seniority.

Expected Class Size: 12
Grading: yes pass/fail option, no fifth course option

AAS 275 (S) Acting Out: Performativity, Production, and Politics in East Asian Theatres (DPE)

Cross-listings: CHIN 275 COMP 271 THEA 271 ASIA 275 AAS 275

Secondary Cross-listing

"Asian Theatres," for those in the West, can conjure up a variety of exotic impressions: spectacle and cacophony, mysterious masks and acrobatic bodies, exquisite styles and strangely confusing conventions. Although Asian theatres have been studied systematically in the West for at least a century, the West has never truly left its "othering" look at them. Yet, what is "different" for the West is bedrock for Asian cultures. Theatre, one of the most important and dynamic forms of cultural production and communication, has actively involved all strata of Asian societies for a millennium. How to explain theatre's continued presence and relevance for Asian nations? What do the traditions of Kun, Noh, and Talchum reveal about the cultures and communities in which they were created? This course seeks to understand from the Asian perspective, rather than "exoticize" and "other," musical and dance theatres from China, Japan, and Korea. Examining the evolving presentations of signature dramas dating from the sixteenth to the eighteenth centuries, we will act out Asian theatres in the following ways: (1) by reading the original plays in translation in tandem with their contemporary and intercultural reproductions, we will explore how Asian theatres fare in the era of globalization within and beyond national borders; (2) by revealing the "technologies" of writing, reading, acting, and staging these plays in different cultural milieus, we will consider what kinds of language and rhetoric, forms of music and movement, as well as visual components are deployed to convey evolving messages; (3) by considering key performances held outside of the proscenium stage, we will gain exposure to alternative theatrical spaces in Asian and diasporic communities that reform performing conventions, reconfigure staging environments, and renegotiate cultural values. In this manner, we will together gain an appreciation for the aesthetic devices, thematic concerns, and production politics of East Asian theatres and their global reproductions. Class materials include drama, production videos, and invited zoom sessions with Asian theatre practitioners and directors who live in the U.S. and other diasporic communities. All materials are in English. No language prerequisite.

Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) three short papers (3 pages each); 3) a take-home midterm; and 4) participation in a final in-class theatre production.

Prerequisites: None; open to all. No knowledge of Asian languages required, though students with advanced Asian language proficiency are encouraged to work with primary sources if they wish.

Enrollment Limit: 20

Enrollment Preferences: Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; Theatre majors; Comp Lit majors; Concentrators in Asian Studies or Asian American Studies.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 275(D1) COMP 271(D1) THEA 271(D1) ASIA 275(D2) AAS 275(D2)

Difference, Power, and Equity Notes: This course examines the power dynamics of spectacle and cacophony and how theatre provided a cultural space that engaged all strata of East Asian societies, thereby masking class and ethnic divisions within these nation-states, while also presenting a distinct image of "China," "Japan," and "Korea" to be consumed in the West. Students will learn ways in which "traditional" theatre productions affirm or subvert Western biases against Asians.
**AAS 284  Asian American History** (DPE)

This course offers an overview of Asian American history from the late seventeenth century to the present. It will cover the earliest Asian migration and settlement in the U.S., the rise of anti-Asian movements, the experiences of Asian Americans during World War II and the Cold War, the emergence of the Asian American movement in the 1960s, the post-1965 Asian immigration, and the War on Terror. We will investigate broader themes including labor, citizenship, political resistance, gender and sexuality, community formation, empire, and transnationalism. We will also consider key contemporary issues, including race and ethnic relations, anti-Asian harassment and violence, and the legacy of U.S. colonialism in Asia-Pacific. Along the way, we will engage classic and recent scholarship in the field, and form our own interpretations of the past based on a wide range of sources—including films, novels, newspapers, government documents, political cartoons, and more. Throughout, the course advances the argument that citizenship and belonging in the U.S. cannot be fully understood without accounting for the experiences of Asian Americans.

**Requirements/Evaluation:** Attendance and participation in discussion, weekly reading responses (2 pages), midterm exam, and final in-class exam and take-home essay (7-10 pages)

**Prerequisites:** None

**Enrollment Limit:** 30

**Enrollment Preferences:** Preference given to History majors and Asian American Studies concentrators.

**Expected Class Size:** 25-30

**Grading:**

**Distributions:** (D2)  (DPE)

**Difference, Power, and Equity Notes:** This course introduces students to the incredible diversity of Asian Americans. It guides students through an examination of the historical events, policies and dynamics that have marginalized Asian American communities based on race, ethnicity, class, gender, sexuality, citizenship, and other forms of difference. It also explores the diverse ways that Asian Americans have sought inclusion and belonging in the U.S.

**AAS 306 (S) Building Power: Race and American Architecture** (DPE)

**Cross-listings:** ARTH 306 AAS 306 AMST 306

**Secondary Cross-listing**

This course explores the many ways race is constructed through American architecture. We will survey different methodologies for linking architecture and race, including uncovering the history of buildings in the nation's capital, analyzing public housing and “domestic war,” and theorizing how racial difference and racialized power -- including white supremacy -- are implicated within modern architectural theory. Our readings will be drawn from Asian American, Latinx, and Black studies, as well as architectural history, art history, and urban studies. Together we will attempt to answer several questions about racialized architecture, such as why Asianness has often been associated with domestic interiors, how Blackness is coded in particular built forms, such as skyscrapers, and how architects and planners deploy the visual language of the Latinx barrio to mitigate anti-immigrant fear. We will also explore how BIPOC artists, architects, writers, and scholars engage architecture as a standpoint of critique, pushing back against the racialization of architecture and offer alternative or new ways of thinking about structures and space. While foregrounding race, the course will necessarily require intersectional thinking in relation (but not limited) to class, gender, citizenship, and ability.

**Requirements/Evaluation:** Students will be evaluated on response papers, discussion questions, and a final research project on an architectural object, theory, or style.

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** First- and second-year students

**Expected Class Size:** 10-15
Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 306(D1) AAS 306(D2) AMST 306(D2)

Difference, Power, and Equity Notes: The course examines how the production of racial categories and the maintenance of racial hierarchy and difference works through built forms, architectural style, and architectural theory. Students will see how buildings maintain social power, as well as how writers, architects, artists, and scholars use the architectural imagination to grapple with questions of racialized exclusion, dispossession, and crisis.

AAS 312 (S) The 626 (DPE)

Cross-listings: SOC 313 AAS 312

Secondary Cross-listing

Ryka Aoki's *Light from Uncommon Stars* is "a defiantly joyful adventure in California’s San Gabriel Valley, with cursed violins, Faustian bargains, and queer alien courtship over fresh-made doughnuts." What sociological insight could a sci-fi novel about intense extracurricular pressure, food, and foreignness have to offer about the San Gabriel Valley, area code 626? In this course, we take the fantastical characters and plots of Aoki's novel as an invitation to delve into the histories of Asian American settlement to Gabrieleno/Tongva lands on the eastern fringes of present-day Los Angeles County. The multilingual boba shops, restaurants, and store fronts throughout the valley mask a history of violent backlash and English-only initiatives. Media reports of academic and musical prodigies skew a broader socioeconomic picture that includes crimmigration, deportation, and xenophobia. And the figure of an intergalactic refugee mother exposes the toll that crossing borders takes on individuals, families, and communities. In this project-based course, we survey the formation of a particular place and its surroundings. In doing so, students grapple with general questions such as: How does migration shape intergenerational dynamics? When and with what tools do people confront racism and intersecting forms of discrimination? How do ethnic enclaves form and fracture? And how do communities mobilize for political rights?

Requirements/Evaluation: thoughtful and consistent participation; mock film festival screening and vote; possible community partnership; regular writing assignments

Prerequisites: N/A

AAS 313 (S) Gender, Race, and the Power of Personal Aesthetics

Cross-listings: AFR 326 AAS 313 WGSS 313 AMST 313 LATS 313

Secondary Cross-listing
This course focuses on the politics of personal style among women of color in the digital era. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno-racial identity, neoliberal capitalism and class inform standards of beauty and ideas about the body, we will examine a variety of materials including commercial websites, podcasts, histories, personal narratives, ethnographies, and sociological case studies. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions among others: What are some of the everyday functions of personal style among women of color in the US and globally? How do Latina/x, Black, Arab American and Asian American female aesthetics reflect the specific circumstances of their creation? What role do transnational media and popular culture play in the development and circulation of gendered and raced aesthetic forms? How might the belief in personal style as activist strategy complicate traditional understandings of feminist political activity?

Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-7 pages, final written reflection.

Prerequisites: LATS 105, AMST 201, AFR 200, WGSS 101 or permission of instructor; first year students are not permitted to take this course.

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, Africana Studies majors, and Women's, Gender and Sexuality Studies majors by seniority. If the class is overenrolled students may be asked to submit a brief writing sample.

AAS 351 (F) Racism in Public Health (DPE)

Cross-listings: PHLH 351 AAS 351

Secondary Cross-listing

Across the nation, states, counties and communities have declared racism a public health crisis. This push to identify systemic racism as a high priority in public health action and policy is an important symbolic and political move. It names the faults of histories, systems and institutions but also brings to the spotlight the individual and community responsibility to dismantle racism in the US. In this tutorial, we will examine racism in public health policy, practice and research through an investigation of several mediums of evidence and information, ranging from peer reviewed literature to news editorials, podcasts and documentaries. We will explore specific pathways by which legacies of colonialism and racism function in various public health disciplines such as epidemiology, social & behavioral sciences, health policy and environmental health while also examining the dynamics of power and history in research and community practice. We will take deep dives into issues on how health can be impacted by redlining, racist medical algorithms, racial trauma and stress and police violence, to name a few. Students will also have two opportunities to select their own case studies, as a way for you to research and learn about particular racial health issues that are of personal interest. This course is also about self-reflection and exploration of the ways in which our identities and lived experiences impact our understanding and perspective. We will gain skills in speaking across differences and articulation of how our own perceptions and lived experiences of race and racism impact our study of public health. This tutorial requires an openness to self-reflection and the practice of listening and articulation.

Requirements/Evaluation: bi-weekly tutorial papers, weekly journaling, oral commentaries and tutorial discussion

Prerequisites: PHLH 201 or instructor approval.

Enrollment Limit: 10

Enrollment Preferences: 1-Public Health concentrators. 2- Asian American Studies concentrators.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
PHLH 351(D2) AAS 351(D2)

Difference, Power, and Equity Notes: In this course students will examine and critically examine the inequities and race based social and health injustices, and the ways racism infiltrates public health action and policy, both historically and currently. They will also refine their self reflection skills in understanding how their own positions of privilege and power, or lack thereof, inform their understanding of public health.

AAS 373 (F) US Empire in the Philippines: Capitalism, Colonialism, and Revolution  (DPE)

Cross-listings: AMST 373 AAS 373

Secondary Cross-listing

When the United States of America took official colonial control of the Philippines in 1898, Filipinos had already been fighting an anti-colonial struggle against Spain for several years. With the start of the Philippine-American War in 1899, that fight continued. Keeping the always-present possibilities of Filipino revolt in mind, this course takes an interdisciplinary approach to the study of U.S. empire-building in the Philippines from the late-nineteenth to the mid-twentieth centuries. We will frame our understanding in terms of racial capitalism and the coloniality of power, with particular attention to the materiality of empire -- infrastructure, architecture, financing, markets, and population management -- and U.S. empire's production of racial, gender, indigenous, religious, and sexual categories and difference. Our readings may be drawn from critical ethnic studies, gender & sexuality studies, American studies, postcolonial theory, Black studies, disability studies, and more. Topics include the military "management" of Muslim, Christian, and animist groups, the Katipunan society, interracial intimacies, and early 20th century Filipino migration to the United States. Students are expected to take an active role in discussion, but no prior knowledge of the Philippines is expected.

Requirements/Evaluation: Evaluation will be based on a semi-self-paced portfolio model: by two different points in the semester, students will be responsible for handing in a collection of 1-2 page response papers, discussion posts, discussion questions, and/or a paper analyzing a primary source or theoretical argument. The minimum requirement is a word count e.g. 3,000 words by 10/15, another 3,000 by 11/15. For the final, students will collect their work, revise at least 30% of it according to professor and peer feedback, and write a final reflection paper. In pairs, students will also lead discussion during one or more class sessions.

Prerequisites: None

Enrollment Limit: 15

Expected Class Size: 10-15

Grading:  no pass/fail option, yes fifth course option

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

**AAS 384 Comparative History of Science and Medicine in Asian/Pacific America, 1800-Present (DPE)**

How have scientific knowledge and medicine been tools of exclusion, violence, and imperial control against Asian Americans, as well as indigenous peoples, Black, Latinx, and white migrants, and their descendants? How have these groups negotiated and resisted encounters with such knowledge from the 19th century to the present? This seminar explores these questions by examining a series of case studies—including American colonial medicine and science in the Philippines and Hawai'i, Cold War migration of Chinese scientists and South Asian doctors to the U.S., and the politics of HIV/AIDS, psychiatry, and culturally competent care in Black, Asian, and Cuban migrant communities. Together, we will survey the literature in history, English, Global Health, Sociology, and other fields and consider how the Asian/Pacific American experience in science and medicine has been integral to, as well as informed by, the experiences of other groups in the transpacific world. Students will leave this course with interdisciplinary tools for understanding present-day health inequities in underserved Asian/Pacific American communities and other marginalized groups.

**Requirements/Evaluation:** Attendance and active participation in discussion, three response papers (3-4 pages), and final research paper (12-15 pages), as well as topic proposal, annotated bibliography, outline, and draft of the final paper

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** Preference to History majors, Asian American Studies concentrators, and Public Health concentrators

**Expected Class Size:** 20-25

**Grading:**

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course explores how knowledge about science and medicine has been constituted and remade over time by various groups in the transpacific world to exert power over others on the structural, community and individual levels. We will also consider how individuals who experienced violence and inequities as a result of encounters with such knowledge challenged definitions and practices of science and medicine.

**Attributes:** AAS Core Electives HIST Group F Electives - U.S. + Canada PHLH Social Determinants of Health

**Not offered current academic year**

---

**AAS 414 (S) Race and Performance (DPE) (WS)**
How does one "do" or perform race and gender? This seminar offers a survey of foundational and emergent scholarship at the nexus of performance studies, critical ethnic studies, and gender and sexuality studies tandem with contemporary visual and performance art works. In doing so, it will explore how the framework of performance destabilizes notions of race and gender as identities that we are and approaches them as ones we enact, do, and undo. We will begin the course by tracing key concepts in performance studies before examining the relational ways racialized and gendered subjects strategically mobilize performance to respond to, negotiate, and navigate life under the conditions of anti-blackness, settler colonialism, racial capitalism, and empire. To this end, we will explore how seemingly racialized and gendered qualities, such as passivity, silence, depression, withholding, sexual submissiveness, contagion, and ignorance, are retooled as feminist and queer of color actions.

**Requirements/Evaluation:** in-class discussion, weekly posts, class presentation, two short written assignments, and final project (with creative option)

**Prerequisites:** AMST 101 or WGSS 101/202 and upper level courses in AMST, WGSS, AFR, or related fields

**Enrollment Limit:** 12

**Enrollment Preferences:** AMST seniors and juniors; WGSS seniors and juniors; AAS concentrators

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 414(D2) AAS 414(D2) AMST 414(D2)

**Writing Skills Notes:** Students will submit two written assignments - an object analysis paper and annotated bibliography - and give and receive peer feedback. They will use these building blocks and feedback on them to complete their final project.

**Difference, Power, and Equity Notes:** This course centrally examines the intersections of race, gender, sexuality, class, and ability. It explores specific strategies used to critique and navigate conditions under overlapping systems of power, including racial capitalism, settler colonialism, anti-blackness, and empire.

DEPARTMENT of ASIAN LANGUAGES, LITERATURES, & CULTURES
CHINESE, JAPANESE, EAST ASIAN LANGUAGES & CULTURES

(Div I & II, see explanation below)

Chair: Professor Li Yu

Cecilia Chang, Frederick Latimer Wells Professor of Chinese; Masashi Harada, Assistant Professor of Japanese; Man He, Associate Professor of Chinese; Shinko Kagaya, Professor of Japanese; Cornelius C. Kubler, Stanfield Professor of Asian Studies; Christopher M. B. Nugent, Professor of Chinese; Kasumi Yamamoto, Frank M. Gagliardi Professor of Japanese; Li Yu, Professor of Chinese

Visitors: Xiaoming Hou, Visiting Assistant Professor of Chinese; Ju-Yin Wang, Visiting Lecturer in Chinese; Language Fellows: Jiayuan Li, Ai-Chen Wang; Teaching Associate: Yuk Man Ng

Department Mission Statement and Curricular Goal

The mission of the Department of Asian Languages, Literatures, and Cultures is to produce “global citizens” who will be able to make contributions in different sectors of society in a globalized and diverse world with multilingual abilities, intercultural communicative competence, and multicultural leadership skills. Graduates of our department will not only achieve proficiency in at least one Asian language but also become competent in intercultural communication. They will develop interpretive and analytical skills using both primary texts and secondary sources and become familiar with the textual and cultural traditions in Asia.

The department offers three distinct major tracks: Chinese, Japanese, and East Asian Languages & Cultures. Each major requires a minimum of ten courses. Up to four study-away credits can be counted toward a major.

Learning Objectives for the Chinese Major

Students who complete the requirements for a major in Chinese will be able to:

- Attain the Advanced level in speaking, listening and reading, and Intermediate High level in writing based on the ACTFL proficiency guidelines.
- Read and analyze basic texts written in Classical Chinese.
- Gain intercultural communicative skills to competently navigate a wide range of social and cultural contexts in Chinese-speaking environments.
- Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.
- Engage critically with important aspects of the historical and cultural developments and trends in China’s diverse and complex past and present.
- Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.

THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Mandarin Chinese language courses (CHIN 101, 102, 201, 202, 301, 302, 401, 402) and at least one course in Classical Chinese (CHIN 312). To gain a deeper understanding of Chinese cultural traditions, students should take at least one Chinese core elective in Chinese literary, linguistic, or cultural studies (taught either in English or in Chinese) with prefixes and primary cross-listings in CHIN.

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the Japanese Major

Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL Intermediate High to Advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
• Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.

THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Japanese language courses (JAPN 101, 102, 201, 202, 301, 302, 401, 402), at least one Japanese core elective in Japanese literary, linguistic, or cultural studies (taught either in English or in Japanese) with prefixes and primary cross-listings in JAPN, and one approved elective related to Japanese language and culture (including additional JAPN core electives, additional Asian language courses, or Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the East Asian Languages and Cultures Major

Students who complete the requirements for a major in East Asian Languages and Cultures will be able to:

• Attain a minimum of Intermediate High level in speaking, listening and reading of either Chinese or Japanese, and Intermediate Low level in writing in the language based on the ACTFL proficiency guidelines.

• Acquire research, problem-solving, and critical thinking skills by engaging in linguistic or literary analysis in the field of Chinese studies or Japanese studies.

• Obtain basic intercultural communicative skills to navigate some social and cultural contexts in Chinese- or Japanese-speaking environments.

• Continue their engagement with an Asian language and culture as lifelong learners and users of the target language.

• Students who choose the dual-language option will attain the Advanced level in speaking, listening, and reading in either Chinese or Japanese, and the intermediate level in a second Asian language based on the ACTFL proficiency guidelines.

THE MAJOR

East Asian Languages and Cultures (EALC) major: In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least six language courses (or attain a minimum proficiency equivalent to the completion of 302) in one East Asian language offered by the department (currently Chinese Mandarin and Japanese). To gain a deeper understanding of the Chinese or Japanese cultural traditions and to develop research skills in the Chinese or Japanese fields, they should take at least two Chinese/Japanese core electives in literary, linguistic, or cultural studies in their primary focus of study with prefixes and primary cross-listings in CHIN/JAPN, and two approved electives related to Chinese/Japanese language and culture (including additional CHIN/JAPN core electives, additional Asian language courses, or Chinese/Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

This major offers students who are able to complete the 402 level in either Chinese or Japanese by the end of their sophomore year a dual-language option which will allow them to learn a second Asian language and reach the Intermediate level in speaking that language by the time of graduation. Please consult with the chair or language coordinator for more information about this option.

LANGUAGE PLACEMENT

Students who have studied or otherwise developed some familiarity with Chinese or Japanese language before coming to Williams and who wish to continue their language study at the college should complete a placement evaluation before pre-registering for a language course. More information about the Chinese placement evaluation can be found at https://chinese.williams.edu/faq/. Students who wish to take the Japanese placement test should contact the Japanese faculty.

THE DEGREE WITH HONORS

The department offers students the option of pursuing a degree with Honors in Chinese, Japanese, or East Asian Languages and Cultures through writing an honors thesis. Honors theses allow students a unique opportunity to undertake an examination of topics and texts with a greater depth than regular courses allow. The great majority of students who undertake the challenge of writing an honors thesis find it to be one of their most rewarding academic experiences at Williams.

Students interested in pursuing a degree with Honors should begin thinking about their thesis topic and materials as early as possible. This is particularly true for students who need to gather materials or conduct research abroad, as this will typically take place during their junior year or the summer between their junior and senior years. It is the responsibility of the student to approach faculty members to inquire about their willingness to serve as a thesis advisor. Ideally, students should have previously taken a course with that faculty member in an area related to the subject matter of the thesis. Faculty members will usually only advise a single thesis per year, and never more than two, with students who first approach the faculty
It is recommended that students approach the faculty members with whom they are interested in working for their thesis by the end of the fall semester of their junior year.

Students must submit a proposal to the department chair and their intended advisor before they pre-register for senior year courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. If the department approves the thesis proposal, the student should enroll in CHIN 493-W31-494, or JAPN 493-W31-494, depending on their major track. Please note that admission to the honors thesis program will normally be limited to students with a consistent record of honors-level work, as indicated by at least a B+ average in their courses for the major.

Students will typically meet with their advisor once a week at a set time other than office hours. The advisor will present the student with a set of deadlines for different stages in the thesis, ranging from a bibliography to the final draft. While these deadlines will vary for different advisors and theses, two deadlines will apply to all theses, whether analytic or translation. 1) Students must submit a finished first chapter or substantial section of polished translation by the last day of the first semester reading period. If the student misses this deadline, he or she will not be allowed to continue the thesis. 2) The finished thesis is due to the advisor by 4:00 pm on the Monday two weeks after the last day of Spring Recess. The student should submit three copies of the thesis at this time. There will be no extensions.

The department will assign two readers, separate from the advisor, to each thesis. The readers will give a written assessment of the thesis that will be an important factor in the final determination of the student’s grades for the thesis and what honors designation, if any, will be given. These written comments will be shared with the student. Within two weeks after submission, the department will schedule an oral defense. This will be a one to one-and-a-half hour session in which the student will give a public presentation of his or her thesis to members of the department and invited guests followed by a question and answer period. A final, corrected copy of the thesis must be submitted to the Technical Services Department of Sawyer Library by 4:00 P.M. on the last day of the final examination period.

In order to qualify for Honors, the department must agree that the student has earned two semester grades of B+ or higher, based on his or her thesis and oral defense. Students whose thesis and defense are deemed by the department to be of exceptional merit will be awarded Highest Honors. A letter from the department chair will inform students of these decisions.

STUDY ABROAD

Students intending to major in the department are strongly encouraged to study in Asia at some point during their time at Williams—for a summer or for a semester or full year. Study-abroad in an immersive environment in the target culture is an indispensable step toward advanced proficiency in a second language. Prospective majors or language students who are planning to study abroad must attend the fall semester study-abroad information sessions organized by the department or discuss their plans with department faculty as far in advance as possible. The department administers the Linen Fellowships for Summer Study in Asia which fund selected students’ summer intensive language study or research projects. Up to four study-abroad courses may be transferred and counted toward graduation and toward the majors offered in the department. Students MUST contact the department faculty BEFORE assuming study-away credit will be granted toward the major in the department. Upon return, students should ask their study-away program to send their transcript to the Registrar’s office so that the appropriate number of credits can be transferred and granted by the department chair.

DEPARTMENT EMAIL LISTS

To be informed about the events, activities and funding opportunities in the department, please use your Williams login to sign up for one or more of the following GLOW special interest email lists.

“DALLC Majors and Faculty” (open to all current and prospective Chinese, Japanese, or East Asian Languages and Cultures majors):
https://glow.williams.edu/enroll/AWTMXP

“Asia-Related Funding Opportunities” (open to all students who would like to seek internal or external funding related to Asia):

“Special Interest Japanese” (open to all students interested in Japanese language and culture): https://glow.williams.edu/enroll/DAYTN3

CHIN 101 (F) Basic Chinese

An introduction to Mandarin, the language with the largest number of native speakers in the world, which is the national language of China and Taiwan, and one of the official languages of Singapore. Course objectives are for the student to develop simple, practical conversational skills and
acquire basic proficiency in reading and writing at about the 200-character level. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Both audio and video materials will be employed extensively.

**Class Format:** (for spoken classes) dialog performance, drills, communicative exercises; (for written classes) oral and silent reading, questions and discussion in Chinese, translation and explanation in English as needed.

**Requirements/Evaluation:** classroom performance, homework, quizzes, unit tests, and an oral and written final exam

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** If the course is overenrolled, first priority will be given to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; and second priority will be given to first-year students and sophomores.

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** Course credit granted only if both semesters (CHIN 101 and 102) as well as the Winter Study Sustaining Program are taken

**Distributions:** (D1)

**CHIN 102 (S) Basic Chinese**

An introduction to Mandarin, the language with the largest number of native speakers in the world, which is the national language of China and Taiwan, and one of the official languages of Singapore. Course objectives are for the student to develop simple, practical conversational skills and acquire basic proficiency in reading and writing in both the simplified and the traditional script at about the 500-character level. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Both audio and video materials will be employed extensively.

**Class Format:** (for spoken classes) dialog performance, drills, communicative exercises; (for written classes) oral and silent reading, questions and discussion in Chinese, translation and and explanation in English as needed.

**Requirements/Evaluation:** attendance and participation, daily quizzes in the form of dialog or reading performance, homework, regular unit tests, and an oral and written final exam

**Prerequisites:** CHIN 101 and WSP Sustaining Program or equivalent. Students who have never taken a Chinese language course at Williams should complete the Chinese Placement Evaluation in GLOW before registering for this course.

**Enrollment Limit:** 12

**Enrollment Preferences:** If the course is overenrolled, first priority will be given to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; and second priority will be given to first-year students and sophomores.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** students registered for CHIN 101-102 are required to attend and pass the sustaining course during the winter study period; credit granted only if both semesters (CHIN 101 and 102) are taken

**CHIN 131 (S) Basic Cantonese**

**Cross-listings:** ASIA 130 CHIN 131

**Primary Cross-listing**
An introduction to Standard Cantonese, a major regional language of southern China which is spoken by over 70 million people in Hong Kong, Macao, Guangdong, and Guangxi as well as by many overseas Chinese in Southeast Asia, Hawaii, and North America. Due to the pervasive influence of Hong Kong as well as the economic transformation of Guangdong Province, the prestige of Cantonese within greater China rose steadily in the period 1980-2010 and it continues to be an important language today. Our focus in this course will be on developing basic listening and speaking skills, though some attention will also be paid to written Cantonese, including the special characters which have been used for centuries to write colloquial Cantonese, which have become even more widely used in Hong Kong since 1997. Since students will ordinarily possess prior proficiency in Mandarin, a rather closely related language, they should be able to attain in one semester approximately the same proficiency level that is attained in the first two semesters of Mandarin.

Class Format: dialog performance, drills, communicative exercises, oral reading, questions, and discussion

Requirements/Evaluation: Evaluation is based on classroom performance, quizzes, unit tests, and an oral and written final exam.

Prerequisites: CHIN 202 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Chinese and East Asian Languages & Cultures majors as well as Asian Studies concentrators

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Spring 2024

SEM Section: 01 TF 1:10 pm - 2:25 pm Cornelius C. Kubler

CHIN 152 (S) Basic Taiwanese/Southern Min

Cross-listings: CHIN 152 ASIA 152

Primary Cross-listing

This course constitutes an introduction to Taiwanese, the majority language of Taiwan, which is essentially the same as the native language of Xiamen, China and environs. Different varieties of this language, which is also known as Amoy, Hokkien, Fukienese, and Southern Min are spoken by about 50 million people in Taiwan, southern Fujian, the Philippines, Indonesia, Malaysia, and Singapore. Suppressed in Taiwan by the Japanese from 1895-1945 and by the KMT Chinese government from 1945 through the 1970s, Taiwanese--in both its spoken and written forms--has been experiencing a fascinating revival in recent decades. The most divergent of all the Sinitic languages, this language is of special linguistic interest because it has preserved a number of features of Old Chinese. Our focus will be on developing basic listening and speaking skills, though we will also study some of the special characters used to write Taiwanese. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Since students in the course will ordinarily possess prior proficiency in Mandarin, a related language, we should be able to cover in one semester about as much as is covered in the first two semesters of Mandarin. Classes will include dialog performance, drills, communicative exercises, and oral reading and discussion of written Taiwanese.

Requirements/Evaluation: classroom performance, homework, quizzes, unit tests, and an oral and written final exam

Prerequisites: CHIN 301 or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: if course is over-enrolled, preference given to majors in CHIN, EALC, JAPN and concentrators in Asian Studies

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

CHIN 162 (S) Languages of East Asia
Cross-listings: CHIN 162 GBST 162 ANTH 162 ASIA 162

Primary Cross-listing

A survey of the Chinese, Japanese, and Korean languages in their linguistic and cultural context. Working with various types of multimedia including audio, video, animation, and texts, we'll take up the phonetics, phonology, morphology, syntax, and lexicon of these three major East Asian languages, including also their history and writing systems as well as how they function in the societies where they are spoken. Though the emphasis of the course is on linguistic description and analysis, there will also be an applied component, as part of which we'll learn several dozen common expressions in each language. Some of the questions to be discussed are: What are the similarities and differences among these three languages? How are they related? How did the modern standard form of each develop and what is its relationship to any non-standard languages or dialects? How do these three languages reflect sociolinguistic phenomena such as gender, class, and politeness? How do the writing systems of these languages function and what is the role of Chinese characters in them? What has been the influence of Classical Chinese on Modern Chinese, Japanese, and Korean? How have these languages changed due to influence from English and other languages? How are they used in Asian American speech communities? And what are the prospects for their future development, including the influence of computers and digital communications? While this course is not intended as a comprehensive introduction to linguistics, it does introduce many basic terms and concepts from that discipline.

Class Format: combination of lecture, discussion, and language practice

Requirements/Evaluation: three quizzes, two 2- to 3-page papers, an oral presentation, and an 8- to 10-page term paper

Prerequisites: none (lectures, class discussions, and readings in English; no prior background in linguistics or any Asian language required)

Enrollment Limit: 20

Enrollment Preferences: open to all with preference to first-year students and sophomores as well as majors/concentrators in CHIN, JAPN, EALC, ANTH, ASIA and GBST

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

CHIN 200  (F)  Accelerated Chinese on Special Topics for Heritage Speakers

Cross-listings: ASIA 201 CHIN 200

Primary Cross-listing

This course is tailor designed for students who already possess intermediate-level proficiency in speaking Chinese but lack the basic reading and writing skills, commonly referred to as heritage speakers of Chinese. They will make accelerated progress in their literacy skills through this course and be able to take either CHIN 202 or CHIN 302 in the spring semester. Adopting a semi-tutorial format (a mix of group classes and two/three-people classes), this course aims to provide differentiated instruction to heritage learners of varying proficiency levels whose Chinese speaking and listening abilities exceed their reading and writing skills. This tailored course will help students effectively expand their literacy skills while helping to solidify the linguistic foundation for continuous proficiency advancement. The main theme of the course is focused on the experiences of Chinese Americans in a global context. Students will gain a deeper understanding of Chinese culture by way of individual projects that are meaningful and relevant to their intellectual interests. Students who are placed into CHIN 102 or 202 at the beginning of the fall semester should consider taking this course in the fall.

Class Format: Semi-tutorial format, students will meet as a large group in most weeks for linguistic development and two-to-three-people groups in some weeks for project-based discussions.

Requirements/Evaluation: Active participation in class, homework, quizzes, essays, oral presentations, and a final project

Prerequisites: Students must complete the Chinese Placement Evaluation in GLOW before registering for this course

Enrollment Limit: 12
Enrollment Preferences: Enrollment priority goes to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures, concentrators in the Program of Asian Studies, and then to first-year students and sophomores.

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2023

LEC Section: 01  MR 2:35 pm - 3:50 pm  Cecilia Chang

CHIN 201  (F) Intermediate Chinese I

Intermediate Chinese I and II are designed to consolidate the foundations built in Basic Chinese and continue developing students’ skills in aural comprehension, speaking, reading, writing, and intercultural communication. Upon completion of the courses, students should be able to speak Chinese with fluency on everyday topics, reach a literacy level of 1000 characters (approximately 1200 common words written in both traditional and simplified characters), read materials written in simple standard written Chinese, and produce both orally and in writing short compositions on everyday topics. Conducted in Mandarin.

Class Format: Students will do dialog performance and communicative exercises in the speaking/listening classes. We will do read-aloud, questions and answers in the reading/writing classes.

Requirements/Evaluation: attendance and active participation, daily quizzes in the form of speaking or reading performances, homework, regular unit tests, and a final exam (including both oral and written portions)

Prerequisites: CHIN 102 or permission of instructor. Students who have never taken a Chinese language course at Williams should complete the Chinese Placement Evaluation in GLOW before registering for this course.

Enrollment Limit: 12

Enrollment Preferences: Priorities will be given to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures, first-year students and sophomores, then to juniors and seniors.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Upon completion of the courses, students should be able to speak Chinese with fluency on everyday topics, reach a literacy level of 1000 characters (approximately 1200 common words written in both traditional and simplified characters), read materials written in simple standard written Chinese, and produce both orally and in writing short compositions on everyday topics. Conducted in Mandarin.

Requirements/Evaluation: attendance and active participation, daily homework and quizzes, regular written and oral unit tests, essays, and a final exam

Prerequisites: CHIN 201 or permission of instructor. Students who have never taken a Chinese language course at Williams should complete the Chinese Placement Evaluation in GLOW before registering for this course.

Enrollment Limit: 12

Enrollment Preferences: Priorities will be given to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures, first-year students and sophomores, then to juniors and seniors.
**CHIN 214 (F) Foundations of China**

**Cross-listings:** HIST 214 GBST 212 REL 218 CHIN 214 ASIA 211 ANTH 212

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

**Requirements/Evaluation:** short writing assignments (approximately 750-1000 words each), quizzes, a mid-term, and a final exam

**Prerequisites:** None

**Enrollment:** 40

**Enrollment Preferences:** Chinese majors, History majors, Religion majors, and Anthropology majors

**Expected Class Size:** 25

**CHIN 215 (S) Foundations of Confucian Thought** (DPE) (WS)

**Cross-listings:** REL 295 ASIA 215 CHIN 215

This course focuses on the foundational texts of the Confucian tradition: the Analects (purported to record the words of Confucius himself), *Mengzi* (often romanized as "Mencius"), and *Xunzi*. Beyond those questions noted above, we will further examine how these texts construct their arguments; how they were first composed, compiled, and circulated; how they employ such key concepts as "humaneness" (*ren*), "moral power" (*de*), and "ritual propriety" (*li*); and how they functioned as part of the larger philosophical, linguistic, political, and historical context that we now think of as "early China."

**Requirements/Evaluation:** Evaluation is based on writing assignments (3-4 pages, 5-6 pages, and 10-12 pages) and participation in class discussions.

**Prerequisites:** None

**Enrollment Limit:** 19
Enrollment Preferences: Enrollment priority goes to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; current or prospective Asian Studies concentrators; and Religion majors.

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
REL 295(D2) ASIA 215(D1) CHIN 215(D1)

Writing Skills Notes: Writing will include short writing assignments (1 paragraph, 3-4 pages, and 5-6 pages) that will involve drafts, feedback and revision, and one longer final paper of 10-12 pages that will involve close consultation with the instructor during the writing process.

Difference, Power, and Equity Notes: Throughout the course we will examine how these texts deal with issues of differentials of power, both political and social, in a range of contexts. In particular, we will discuss how these texts conceptualize political and social power and how they see hierarchy and difference functioning in both beneficial and deleterious ways in society.

CHIN 223 (S) Ethnic Minorities in China: Past and Present (DPE)

Cross-listings: ANTH 223 CHIN 223

Primary Cross-listing

According to the most recent census conducted in China in 2010, of the 1.3 billion population of China, more than 110 million (8.49%) were ethnic minorities (shaoshu minzu). Most of the minority groups reside in autonomous regions and districts, which constitute 64% of China's total acreage. This course introduces students to the multiethnic aspect of China's past and present. We will ask the central question of "what is minzu" and address various topics such as the minority-group identification project; the definition of minzu (translated as "ethnic group," "nationality," or "race" by different scholars); the intersections between language, religion, tourism, diaspora and ethnicity; historical sino-centric views about "foreigners" and "barbarians" as well as the roles that "barbarians" have played in China's long history. We will examine how social differences and hierarchy are constructed and discuss how power plays in the shaping of "ethnicity." A multidisciplinary approach will be adopted for the course, taking in sources from anthropology, history, literature, ethnic studies, and cultural studies. Throughout the course, the pedagogical techniques of "intercultural dialogue" will be adopted to encourage students to discuss their own ethnic experiences and compare ethnic minority issues in China with similar issues in the United States. Students are also encouraged to come up with real-world solutions and strategies to deal with issues of racism, bias, and discrimination.

Requirements/Evaluation: class attendance, weekly quizzes, active participation in both the online discussion forum and in-class meetings, two short (5-page) response papers, and one final research paper (10-12 pages).

Prerequisites: none, open to all students; no knowledge of Chinese language required

Enrollment Limit: 15

Enrollment Preferences: current and prospective majors in the Department of Asian Studies, then to first-years

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Materials/Lab Fee: books and reading packet

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ANTH 223(D2) CHIN 223(D2)

Difference, Power, and Equity Notes: We explore the interactions between "power" and "ethnicity," "center" and "periphery" in the Chinese context and compare them with students' own experiences. Students are required to write one short response paper on their personal encounter with the concept of "race" or "ethnicity." For the final research paper, students are required to identify one problem among all the ethnic minority issues in the Chinese context and write a policy recommendation to make real-world changes.

Attributes: ASAM Related Courses  GBST East Asian Studies Electives

Not offered current academic year
From the first "wows" that the short films invoked at a Shanghai teahouse in 1896, Chinese films have made successive wonders that straddle reality and fantasy, technological modernity and shadow-making craft, aesthetic experiments and monetary yearnings, global investments and local interest. This seminar will explore the evolving relationships between Chinese films and five "significant others" that are central to film and film-making. Roughly following a chronological order, this course will examine 1) the effect of new technological developments (such as photography, sound, color, special FX) on film; 2) the tension between film and traditional modes of public entertainment (such as operas and shadow plays); 3) film's social role to affirm and contest gender, national, and class identities; 4) the need to garner differing sources of financial support (state funding, cultural entrepreneurs, and transnational capital); and 5) the circulation of Chinese films in the global market. Class materials include various genre films (melodrama, horror, martial arts, comedy, etc.), directors' notes, contemporary reviews, and scholarship in China and media studies. All materials and discussions are in English.

Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) Pre-class discussion posts based on reading and recorded lectures (Graded as Complete or Incomplete); 3) Three short papers (3-5 pages); and 4) the final project (including a presentation, and a paper or other form of project).

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: current or prospective majors in Department of Asian Languages, Literatures, and Cultures; Comp Lit majors; those with Asian Studies Concentration.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 226(D1) ASIA 226(D1) COMP 296(D1)

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze the clashes and negotiations between Western media technological modernities and Chinese indigenous understanding of shadows, visuality, and sound. By discussing various films produced from mainland China, Hong Kong, Taiwan, and other diaspora areas from 1920 to now, this course asks students to explore how cinema invokes (and erases) differences, and consolidates (and challenges) hegemonic notions of nation, gender, and class.

Attributes: FMST Core Courses

Not offered current academic year
Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) Publishing GLOW Discussion posts based on reading (Graded as Complete or Incomplete); 3) three short papers (3-5 pages); 4) the final project (including an abstract, a presentation, and a paper or other form of project).

Prerequisites: None; no knowledge of Chinese language required, though students with Chinese language background are encouraged to work with Chinese sources if they wish; open to all

Enrollment Limit: 20

Enrollment Preferences: Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; Comp majors; Asian Studies Concentration; WSGG majors; and then to first-year students

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 255(D1) COMP 254(D1) CHIN 253(D1)

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze the shaping of social stigma as well as the dynamics of unequal power by means of closely reading "illness" in 20th and 21st century China. We will examine how "illness" is sometimes gendered and politicized; how "illness", in other times, empowers individuals and bonds underrepresented minorities. Illness, as a seemingly universal human experience, tells diverse stories of (in)difference, (dis)power, and (un)equity.

CHIN 275 (S) Acting Out: Performativity, Production, and Politics in East Asian Theatres (DPE)

Cross-listings: CHIN 275 COMP 271 THEA 271 ASIA 275 AAS 275

Primary Cross-listing

"Asian Theatres," for those in the West, can conjure up a variety of exotic impressions: spectacle and cacophony, mysterious masks and acrobatic bodies, exquisite styles and strangely confusing conventions. Although Asian theatres have been studied systematically in the West for at least a century, the West has never truly left its "othering" look at them. Yet, what is "different" for the West is bedrock for Asian cultures. Theatre, one of the most important and dynamic forms of cultural production and communication, has actively involved all strata of Asian societies for a millennium. How to explain theatre's continued presence and relevance for Asian nations? What do the traditions of Kun, Noh, and Talchum reveal about the cultures and communities in which they were created? This course seeks to understand from the Asian perspective, rather than "exoticize" and "other," musical and dance theatres from China, Japan, and Korea. Examining the evolving presentations of signature dramas dating from the sixteenth to the eighteenth centuries, we will act out Asian theatres in the following ways: (1) by reading the original plays in translation in tandem with their contemporary and intercultural reproductions, we will explore how Asian theatres fare in the era of globalization within and beyond national borders; (2) by revealing the "technologies" of writing, reading, acting, and staging these plays in different cultural milieus, we will consider what kinds of language and rhetoric, forms of music and movement, as well as visual components are deployed to convey evolving messages; (3) by considering key performances held outside of the proscenium stage, we will gain exposure to alternative theatrical spaces in Asian and diasporic communities that reform performing conventions, reconfigure staging environments, and renegotiate cultural values. In this manner, we will together gain an appreciation for the aesthetic devices, thematic concerns, and production politics of East Asian theatres and their global reproductions. Class materials include drama, production videos, and invited zoom sessions with Asian theatre practitioners and directors who live in the U.S. and other diasporic communities. All materials are in English. No language prerequisite.

Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) three short papers (3 pages each); 3) a take-home midterm; and 4) participation in a final in-class theatre production.

Prerequisites: None; open to all. No knowledge of Asian languages required, though students with advanced Asian language proficiency are encouraged to work with primary sources if they wish.

Enrollment Limit: 20

Enrollment Preferences: Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; Theatre majors; Comp Lit majors; Concentrators in Asian Studies or Asian American Studies.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option
This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 275(D1) COMP 271(D1) THEA 271(D1) ASIA 275(D2) AAS 275(D2)

**Difference, Power, and Equity Notes:** This course examines the power dynamics of spectacle and cacophony and how theatre provided a cultural space that engaged all strata of East Asian societies, thereby masking class and ethnic divisions within these nation-states, while also presenting a distinct image of "China," "Japan," and "Korea" to be consumed in the West. Students will learn ways in which "traditional" theatre productions affirm or subvert Western biases against Asians.

CHIN 312 (F) Introduction to Classical Chinese

This course is an introduction to the grammar and basic vocabulary of Classical Chinese, the standard written language of China from around the seventh century BCE through the 1920s (and for many centuries an important written language in Japan, Korea, and Vietnam as well). Aspects of Classical Chinese continue to play a role in both written (e.g., in newspaper, academic, and legal writing) and in spoken (e.g., proverbs and aphorisms) modern Chinese. Our work in this course will be based on reading, translating, and discussing philosophical, political, literary, and historical anecdotes from the Spring and Autumn (770-481 BCE) through the Han (206 BCE-220 CE) periods, as they served as the foundation for the language. We will conduct discussions of grammatical and philological issues primarily in English and most of our translation work will be from Classical Chinese into English. We will, however, frequently discuss the points of intersection between Classical and Modern Chinese. Students are required to have completed CHIN 202 or the equivalent. Students who have extensive reading knowledge of Chinese characters through other languages (such as Japanese) may also take this course with the instructor's permission.

Requirements/Evaluation: classroom performance, homework, quizzes, tests, and a final exam
Prerequisites: CHIN 202 or extensive reading knowledge of Chinese characters through other languages
Enrollment Limit: 40
Enrollment Preferences: Students who have completed CHIN 202 or have extensive reading knowledge of Chinese characters through other languages
Expected Class Size: 10

CHIN 425  (F)  Becoming Taiwan: Social, Cultural, and Economic Discourses of Modern Day Taiwan

Cross-listings: CHIN 425 ASIA 425

Primary Cross-listing

A small island in East Asia and home to 23 million people, Taiwan is the largest economy that is not a member of the United Nations. From 1949, when the Nationalist Party (KMT) retreated to Taiwan after the Chinese Civil War, to becoming one of the Four Asian Tigers in the latter half of the 20th century, Taiwan has developed into a multifaceted society through an array of social/cultural/economic changes associated with industrialization, globalization and identity formation. In this course, we will examine some of the signal examples of these experiences that define the Taiwan society that it is today through literary works and films, as well as journalistic and academic articles. By way of group discussions and individual projects, students will acquire domain-specific vocabulary and develop abilities to analyze and discuss in Mandarin complex ideas related to the aforementioned issues. Using a semi-tutorial format, this course is designed to develop linguistic proficiency at the levels of Advanced Low to Advanced Mid based on the ACTFL proficiency guidelines. Language partners will be arranged through collaboration with a graduate program in Chinese pedagogy in Taiwan for opportunities for in-depth discussions on course content.

Class Format: Mandarin Chinese will be the instructional language for this course. Semi-tutorial format, students will meet as a large group on one day for linguistic development and three to four people groups on other days for discussions.

Requirements/Evaluation: quizzes, presentations, posting of discussion questions, two position papers (3 pages) and one final paper (5 pages)

Prerequisites: CHIN 402 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Majors in Chinese; DALLC; Asian Studies Concentration; seniors.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 425(D1) ASIA 425(D1)

Not offered current academic year
Spring Grass (Chuncao) is a Chinese novel written by award-winning author Qiu Shanshan (1958-). Using the literary techniques of social realism, the novel chronicles the life of a young rural woman from 1961 to 2001. Spring Grass, the protagonist of the novel, was born in a rural village to a mother who preferred sons over daughters. At a young age, Spring Grass was deprived of the opportunity to attend school. Against all odds, she managed to marry for love, venture into the city, and become an enterprising migrant worker. This novel not only reflects the struggles of women in contemporary China but also captures the economic transformation of modern China since 1978 when the Reform and Open-Door Policy (gaige kaifang) was initiated. The novel was adapted into a television drama series and became an instant hit in 2008. This course takes an interdisciplinary, cultural studies and humanistic approach to studying a literary text, using literature as a means to help students better understand social and cultural issues. Through close readings of the novel, the eponymous TV drama series, documentaries, and films depicting rural life and women’s roles in China, as well as in-depth discussions of both primary and secondary sources that deal with the cultural, historical, and socioeconomic background of the unfolding story of Spring Grass, this course aims to provide a window for students to examine the issues of inequality in the Chinese village and society at large. Why would mothers be harsh to their own daughters and bar girls’ right to education? Why would young people leave their village and migrate to the city? Why would migrant workers leave their children behind in the village? Why would economic developments in China exacerbate the problem of gender inequality in society? Why would the ideology and cultural logic behind Mao Zedong's proclamation "women can hold up half of the sky" add more burden to women rather than truly liberate them? Why would city people discriminate against country folks? After taking this course, students will gain a deeper understanding of the issues related to gender inequality (nannü bu pingdeng) and the urban/rural-gap (chengxiang chabie) in China. Throughout the course, they are also encouraged to critically think about how to achieve equity in different societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or WGSS and language learners wishing to take the course in Chinese should register under CHIN.

Requirements/Evaluation: For all students, active participation in tutorial meetings and an online writing portfolio as the final project. For CHIN students, four 4- or 5-page tutorial papers and revisions in Chinese, four 2-page critiques. For ASIA/WGSS students, five 5-page tutorial papers in English, five 2-page critiques, one revised paper.

Prerequisites: For students registering under CHIN, the prerequisite is CHIN 402 or a language proficiency interview conducted by the instructor. For students registering under ASST or WGSS, there is no prerequisite.

Enrollment Limit: 10

Enrollment Preferences: Enrollment priorities will be given to Chinese language learners who register under CHIN, and to freshmen and sophomores who register under ASST or WGSS.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 127(D2) ASIA 127(D1) CHIN 427(D1)

Writing Skills Notes: Writing is taught using the writing-as-process pedagogical approach. The writing process consists of invention, composition, and revision. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. The instructor gives detailed feedback to students' drafts and students are required to turn in revisions. At the end of the semester, students will compile an online writing portfolio to showcase their best works.

Difference, Power, and Equity Notes: The issue of "inequality," including both gender inequality and regional inequality is the driving force behind the readings and discussions of this tutorial. Students are guided to develop an empathetic way of interpreting a literary work that features a rural woman/migrant worker. They will critically analyze the sources of inequality in the Chinese cultural context and explore ways to address such inequality.
What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical “pasts” remembered, forgotten, and subverted in a literary “presence”? This tutorial explores the politics of memory in contemporary literatures and films from the People’s Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these “post” societies represent state-sponsored narratives of remembrance, dissidents’ collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, mesology and mythology, amnesia and nostalgia, and diaspora and settlement in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include “root-seeking”, “new realist”, “avant-garde” and “hooligan” novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three “post” societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or COMP and language learners wishing to take the course in Chinese should register under CHIN.

Requirements/Evaluation: attendance and participation, five 5-page papers, five peer-review and critique papers, revisions on selected papers.

Prerequisites: None for students taking the course under ASST and COMP 297; CHIN 402 or permission of the instructor for students taking CHIN 428

Enrollment Limit: 10

Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; COMP majors; Asian Studies Concentration

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 297(D1) CHIN 428(D1) ASIA 228(D1)

Writing Skills Notes: Students will write a 5-page paper every other week for a total of five papers. On weeks when they are not writing papers, they are expected to critique their tutorial partner’s paper as peer reviewers. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. Students are also required to revise key paragraphs, sections, and papers throughout the semester.

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze and critique the following entangled modernist dualisms: present and pasts; memory and representations; diaspora and settlement; transnationalism and localism. By discussing texts produced from the PRC, Hong Kong, Taiwan, and other diaspora areas in these “post” societies, this course asks students to explore how literary and cinematic narratives invoke (and erase) differences, and challenge (and consolidate) borders.

Winter Study -----------------------------------------------------------------------------------------------

CHIN 25  (W)  Taiwan Study Tour
Interested in learning first-hand about Taiwanese culture and becoming acquainted with what has been called the "Taiwan (economic and political) miracle"? Want to improve your knowledge of Mandarin, the language with the largest number of native speakers in the world? Then join us on this 24-day study tour to Taiwan. We'll spend the first two and one-half weeks in Taipei, the capital city, where 3 hours of Mandarin language classes at levels from beginning to advanced will be scheduled each morning at the Language Center of National Chengchi University. After class we'll meet as a group for lunch and discussion. Visits to cultural, economic, and political/diplomatic sites of interest and activities with students from several Taiwanese universities will be scheduled for some afternoons and Saturdays, with other afternoons as well as evenings and Sundays free for self-study and individual exploration. During the last week, we'll travel to central and southern Taiwan, staying at small hotels and youth hostels. Two orientation sessions will be conducted on campus in the fall to help participants prepare for their experience. Requirements include background readings in English on Taiwanese history, culture, and society; satisfactory preparation for and performance in the language classes; active participation in all scheduled activities; and the writing of a 10-page paper on a topic related to Taiwan that also incorporates your experiences and reflections. Scheduled activities will come to about 30 hours per week, with 15 hours per week spent in the classroom during the first 2 weeks. There will be 3-4 mandatory field trips each week to sites of interest.

Requirements/Evaluation:  A 10-page paper; Satisfactory completion of the language course and active participation in all scheduled activities
Prerequisites:  none
Enrollment Limit:  15
Enrollment Preferences:  Open to all with first preference to CHIN and EALC majors and second preference to those with language proficiency at level of first-year Chinese or higher
Expected Class Size:  15
Grading:  pass/fail only
Unit Notes:  Jerling Kubler has served as Visiting Instructor and Visiting Lecturer in the College's Chinese language program and, as adjunct instructor, has taught several iterations of the WSP course Theory and Practice of Chinese Cooking.

Department Mission Statement and Curricular Goal

The mission of the Department of Asian Languages, Literatures, and Cultures is to produce “global citizens” who will be able to make contributions in different sectors of society in a globalized and diverse world with multilingual abilities, intercultural communicative competence, and multicultural leadership skills. Graduates of our department will not only achieve proficiency in at least one Asian language but also become competent in intercultural communication. They will develop interpretive and analytical skills using both primary texts and secondary sources and become familiar with the textual and cultural traditions in Asia.

The department offers three distinct major tracks: Chinese, Japanese, and East Asian Languages & Cultures. Each major requires a minimum of ten courses. Up to four study-away credits can be counted toward a major.

Learning Objectives for the Chinese Major

Students who complete the requirements for a major in Chinese will be able to:

- Attain the Advanced level in speaking, listening and reading, and Intermediate High level in writing based on the ACTFL proficiency guidelines.
- Read and analyze basic texts written in Classical Chinese.
- Gain intercultural communicative skills to competently navigate a wide range of social and cultural contexts in Chinese-speaking environments.
- Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.
- Engage critically with important aspects of the historical and cultural developments and trends in China’s diverse and complex past and present.
- Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.

THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Mandarin Chinese language courses (CHIN 101, 102, 201, 202, 301, 302, 401, 402) and at least one course in Classical Chinese (CHIN 312). To gain a deeper understanding of Chinese cultural traditions, students should take at least one Chinese core elective in Chinese literary, linguistic, or cultural studies (taught either in English or in Chinese) with prefixes and primary cross-listings in CHIN.

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the Japanese Major

Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL Intermediate High to Advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
• Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.

THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Japanese language courses (JAPN 101, 102, 201, 202, 301, 302, 401, 402), at least one Japanese core elective in Japanese literary, linguistic, or cultural studies (taught either in English or in Japanese) with prefixes and primary cross-listings in JAPN, and one approved elective related to Japanese language and culture (including additional JAPN core electives, additional Asian language courses, or Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the East Asian Languages and Cultures Major

Students who complete the requirements for a major in East Asian Languages and Cultures will be able to:

• Attain a minimum of Intermediate High level in speaking, listening and reading of either Chinese or Japanese, and Intermediate Low level in writing in the language based on the ACTFL proficiency guidelines.

• Acquire research, problem-solving, and critical thinking skills by engaging in linguistic or literary analysis in the field of Chinese studies or Japanese studies.

• Obtain basic intercultural communicative skills to navigate some social and cultural contexts in Chinese- or Japanese-speaking environments.

• Continue their engagement with an Asian language and culture as lifelong learners and users of the target language.

• Students who choose the dual-language option will attain the Advanced level in speaking, listening, and reading in either Chinese or Japanese, and the intermediate level in a second Asian language based on the ACTFL proficiency guidelines.

THE MAJOR

East Asian Languages and Cultures (EALC) major: In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least six language courses (or attain a minimum proficiency equivalent to the completion of 302) in one East Asian language offered by the department (currently Chinese Mandarin and Japanese). To gain a deeper understanding of the Chinese or Japanese cultural traditions and to develop research skills in the Chinese or Japanese fields, they should take at least two Chinese/Japanese core electives in literary, linguistic, or cultural studies in their primary focus of study with prefixes and primary cross-listings in CHIN/JAPN, and two approved electives related to Chinese/Japanese language and culture (including additional CHIN/JAPN core electives, additional Asian language courses, or Chinese/Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

This major offers students who are able to complete the 402 level in either Chinese or Japanese by the end of their sophomore year a dual-language option which will allow them to learn a second Asian language and reach the Intermediate level in speaking that language by the time of graduation. Please consult with the chair or language coordinator for more information about this option.

LANGUAGE PLACEMENT

Students who have studied or otherwise developed some familiarity with Chinese or Japanese language before coming to Williams and who wish to continue their language study at the college should complete a placement evaluation before pre-registering for a language course. More information about the Chinese placement evaluation can be found at https://chinese.williams.edu/faq/. Students who wish to take the Japanese placement test should contact the Japanese faculty.

THE DEGREE WITH HONORS

The department offers students the option of pursuing a degree with Honors in Chinese, Japanese, or East Asian Languages and Cultures through writing an honors thesis. Honors theses allow students a unique opportunity to undertake an examination of topics and texts with a greater depth than regular courses allow. The great majority of students who undertake the challenge of writing an honors thesis find it to be one of their most rewarding academic experiences at Williams.

Students interested in pursuing a degree with Honors should begin thinking about their thesis topic and materials as early as possible. This is particularly true for students who need to gather materials or conduct research abroad, as this will typically take place during their junior year or the summer between their junior and senior years. It is the responsibility of the student to approach faculty members to inquire about their willingness to serve as a thesis advisor. Ideally, students should have previously taken a course with that faculty member in an area related to the subject matter of the thesis. Faculty members will usually only advise a single thesis per year, and never more than two, with students who first approach the faculty
member about serving as advisor being given priority. It is recommended that students approach the faculty members with whom they are interested in working for their thesis by the end of the fall semester of their junior year.

Students must submit a proposal to the department chair and their intended advisor before they pre-register for senior year courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. If the department approves the thesis proposal, the student should enroll in CHIN 493-W31-494, or JAPN 493-W31-494, depending on their major track. Please note that admission to the honors thesis program will normally be limited to students with a consistent record of honors-level work, as indicated by at least a B+ average in their courses for the major.

Students will typically meet with their advisor once a week at a set time other than office hours. The advisor will present the student with a set of deadlines for different stages in the thesis, ranging from a bibliography to the final draft. While these deadlines will vary for different advisors and theses, two deadlines will apply to all theses, whether analytic or translation. 1) Students must submit a finished first chapter or substantial section of polished translation by the last day of the first semester reading period. If the student misses this deadline, he or she will not be allowed to continue the thesis. 2) The finished thesis is due to the advisor by 4:00 pm on the Monday two weeks after the last day of Spring Recess. The student should submit three copies of the thesis at this time. There will be no extensions.

The department will assign two readers, separate from the advisor, to each thesis. The readers will give a written assessment of the thesis that will be an important factor in the final determination of the student’s grades for the thesis and what honors designation, if any, will be given. These written comments will be shared with the student. Within two weeks after submission, the department will schedule an oral defense. This will be a one to one-and-a-half hour session in which the student will give a public presentation of his or her thesis to members of the department and invited guests followed by a question and answer period. A final, corrected copy of the thesis must be submitted to the Technical Services Department of Sawyer Library by 4:00 P.M. on the last day of the final examination period.

In order to qualify for Honors, the department must agree that the student has earned two semester grades of B+ or higher, based on his or her thesis and oral defense. Students whose thesis and defense are deemed by the department to be of exceptional merit will be awarded Highest Honors. A letter from the department chair will inform students of these decisions.

STUDY ABROAD

Students intending to major in the department are strongly encouraged to study in Asia at some point during their time at Williams—for a summer or for a semester or full year. Study-abroad in an immersive environment in the target culture is an indispensable step toward advanced proficiency in a second language. Prospective majors or language students who are planning to study abroad must attend the fall semester study-abroad information sessions organized by the department or discuss their plans with department faculty as far in advance as possible. The department administers the Linen Fellowships for Summer Study in Asia which fund selected students’ summer intensive language study or research projects. Up to four study-abroad courses may be transferred and counted toward graduation and toward the majors offered in the department. Students MUST contact the department faculty BEFORE assuming study-away credit will be granted toward the major in the department. Upon return, students should ask their study-away program to send their transcript to the Registrar’s office so that the appropriate number of credits can be transferred and granted by the department chair.

DEPARTMENT EMAIL LISTS

THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Mandarin Chinese language courses (CHIN 101, 102, 201, 202, 301, 302, 401, 402) and at least one course in Classical Chinese (CHIN 312). To gain a deeper understanding of Chinese cultural traditions, students should take at least one Chinese core elective in Chinese literary, linguistic, or cultural studies (taught either in English or in Chinese) with prefixes and primary cross-listings in CHIN.

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the Japanese Major

Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL Intermediate High to Advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.

THE MAJOR
In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Japanese language courses (JAPN 101, 102, 201, 202, 301, 302, 401, 402), at least one Japanese core elective in Japanese literary, linguistic, or cultural studies (taught either in English or in Japanese) with prefixes and primary cross-listings in JAPN, and one approved elective related to Japanese language and culture (including additional JAPN core electives, additional Asian language courses, or Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the East Asian Languages and Cultures Major
Students who complete the requirements for a major in East Asian Languages and Cultures will be able to:

• Attain a minimum of Intermediate High level in speaking, listening and reading of either Chinese or Japanese, and Intermediate Low level in writing in the language based on the ACTFL proficiency guidelines.
• Acquire research, problem-solving, and critical thinking skills by engaging in linguistic or literary analysis in the field of Chinese studies or Japanese studies.
• Obtain basic intercultural communicative skills to navigate some social and cultural contexts in Chinese- or Japanese-speaking environments.
• Continue their engagement with an Asian language and culture as lifelong learners and users of the target language.
• Students who choose the dual-language option will attain the Advanced level in speaking, listening, and reading in either Chinese or Japanese, and the intermediate level in a second Asian language based on the ACTFL proficiency guidelines.

THE MAJOR
East Asian Languages and Cultures (EALC) major: In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least six language courses (or attain a minimum proficiency equivalent to the completion of 302) in one East Asian language offered by the department (currently Chinese Mandarin and Japanese). To gain a deeper understanding of the Chinese or Japanese cultural traditions and to develop research skills in the Chinese or Japanese fields, they should take at least two Chinese/Japanese core electives in literary, linguistic, or cultural studies in their primary focus of study with prefixes and primary cross-listings in CHIN/JAPN, and two approved electives related to Chinese/Japanese language and culture (including additional CHIN/JAPN core electives, additional Asian language courses, or Chinese/Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

This major offers students who are able to complete the 402 level in either Chinese or Japanese by the end of their sophomore year a dual-language option which will allow them to learn a second Asian language and reach the Intermediate level in speaking that language by the time of graduation. Please consult with the chair or language coordinator for more information about this option.

LANGUAGE PLACEMENT
Students who have studied or otherwise developed some familiarity with Chinese or Japanese language before coming to Williams and who wish to continue their language study at the college should complete a placement evaluation before pre-registering for a language course. JAPN 101 (F) Elementary Japanese

An introduction to modern spoken and written Japanese, the course aims to instill proficiency in Japanese by developing four necessary skills of speaking, listening, reading, and writing to successfully interact with native speakers. The relationship between language and culture and the
sociolinguistically appropriate use of language will be stressed throughout. Audio, video and computer--assisted learning materials will be used extensively. Classes consist of a combination of "act" classes, conducted exclusively in Japanese, where students use the language in various types of drills and communicative activities, and "fact" classes, conducted in Japanese and English, where students learn about the language and culture.

**Class Format:** fact classes, three hours per week; act classes three hours per week

**Requirements/Evaluation:** daily classroom performance, homework, quizzes, chapter tests, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** current or prospective majors in the Department of Asian Languages, Literatures, and Cultures

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** students registered for JAPN 101-102 are required to attend and pass the sustaining program during the Winter Study period; credit granted only if both semesters (JAPN 101 and 102) are taken

**Distributions:** (D1)

**JAPN 102  (S) Elementary Japanese**

An introduction to modern spoken and written Japanese, the course aims to instill proficiency in Japanese by developing four necessary skills of speaking, listening, reading, and writing to successfully interact with native speakers. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Audio, video and computer--assisted learning materials will be used to facilitate learning. Classes consist of a combination of "act" classes, conducted exclusively in Japanese, where students use the language in various types of drills and communicative activities, and "fact" classes, conducted in Japanese and English, where students learn about the language and culture.

**Class Format:** fact classes, three hours per week; act classes three hours per week

**JAPN 131  (F) Introduction to Japanese Formal Linguistics**

**Cross-listings:** ASIA 131 JAPN 131

**Primary Cross-listing**

This course offers a general introduction to Japanese theoretical linguistics, a scientific study of the Japanese language. We will study the major
subfields of theoretical linguistics, which addresses speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meaning (semantics). We will study those topics as we mainly compare Japanese and English. The knowledge and hands-on experience gained will enable us to pursue one of the above core fields and start investigating applied linguistics more effectively, including first/second language acquisition, pragmatics, psycholinguistics, neurolinguistics, sociolinguistics, historical linguistics and language change, and cross-linguistic variation and language universals. Although there is no prerequisite, Japanese language proficiency would be beneficial.

Class Format: combination of lecture and discussion
Requirements/Evaluation: quizzes, problem sets, mid-term exam, and final exam
Prerequisites: none
Enrollment Limit: 20
Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
ASIA 131(D1) JAPN 131(D1)
Attributes: Linguistics

Fall 2023
SEM Section: 01 TF 1:10 pm - 2:25 pm Masashi Harada

JAPN 201 (F) Intermediate Japanese
This course is a continuation of First-Year Japanese 101-102, further developing the four skills of speaking, listening, reading, and writing. The same general methodology will be used. Upon completing the course, students will have been introduced to most of the major structural patterns of contemporary Japanese and will be able to read simple expository prose.
Class Format: fact classes, three hours per week; act classes three hours per week
Requirements/Evaluation: daily performance, homework, quizzes, chapter tests, and a final exam
Prerequisites: JAPN 101-102 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

JAPN 220 (S) Being Korean in Japan (DPE)

Cross-listings: ASIA 220 JAPN 220

Primary Cross-listing

Who are Zainichi Koreans (Koreans in Japan)? How are they different from Koreans in Korea or in the United States? Contemporary Korean TV dramas and films have depicted Koreans as attractive and successful people appealing to Hallyu (Korean Wave) fans around the world. However, Zainichi Koreans, who are the largest ethnic minority in Japan, have been frequently portrayed as abusive husbands/fathers, pitiful wives/mothers, or juvenile delinquents in both Japanese and Korean cinema and literature. Through close readings of films, novels, and short essays, we will explore little-known yet significant representations of Zainichi Koreans by focusing on Japanese and Korean historical contexts. By doing so, we will discover new aspects of transnational exchange not only between Japanese and Koreans, but also between South and North Koreans in Japan. All class materials will be available in English translation or with English subtitles.

Requirements/Evaluation: attendance/participation; short written responses; midterm essay; group presentation; final essay

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: Open to all students, but if over-enrolled, priority will be given to Asian Studies and Japanese majors

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 220(D1) JAPN 220(D1)

Difference, Power, and Equity Notes: This course looks at the dynamics of unequal power in the social marginality of Korean immigrants in Japan. Exploring historical contexts, students will analyze how the ethnic particularity of the Korean minority has engaged with and against Japanese society. Students will also examine how we might associate the minority culture and history with extensive global issues, including the relationships between environmental problems and minorities, wars and women, and imperialism and migration.

Not offered current academic year

JAPN 223 (S) Japanese Food Culture in a Global Context (DPE)

Cross-listings: COMP 223 JAPN 223

Primary Cross-listing

The bourgeoning popularity of Japanese food on a global scale has resulted in a surge of new research, literature, and films. Conversely, the effects of globalization have transformed the dining experience within Japan to be ever more multiethnic. This interdisciplinary course explores the complex relationship between food and culture in Japan, and the emergence of Japanese cuisine as a global phenomenon, referring to a variety of materials and practices. Topics to be addressed include modernization, nation-building, militarization, globalization, the environment, and popular culture.

Requirements/Evaluation: active class participation, three response papers, two small written report (including class presentations), and one research paper and presentation

Prerequisites: none

Enrollment Limit: 20
Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 223(D1) JAPN 223(D1)

Difference, Power, and Equity Notes: This course explores the complex relationship between food and culture in and out of Japan, in relation to a variety of topics such as modernization, nation-building, militarization, globalization, environmentally sustainable development, and popular culture. Students will have the opportunity to critically analyze how various social/cultural, historical, and political contexts shaped and unveiled (in)difference, (dis)power, and (in)equity in food production and consumption.

Not offered current academic year

JAPN 240 (S) Toward Healing Trauma in Japanese and Korean Cinema (DPE)

Cross-listings: JAPN 240 ASIA 240

Primary Cross-listing

This course examines Japanese and Korean cinema from the 1930s to the present, with a focus on narratives of trauma. We will analyze cinematic representations of social conflicts caused by continuous negotiations of tradition and progress, gender and identity, and everyday life and war wounds in the transition from imperial/colonial to post-imperial/post-colonial periods. Along with exploring historical contexts, we will compare the ways in which Japanese and Korean filmmakers have confronted social injustice by addressing the pain of trauma. In doing so, we will discover the meanings of cultural confrontation in the process of healing and reconciliation in our society. All readings and screenings will be available in English translation or with English subtitles.

Requirements/Evaluation: class attendance and participation, weekly GLOW posts, two short essays (4-5 pages each), and a final project
Prerequisites: none
Enrollment Limit: 20

Enrollment Preferences: Open to all students, but if over-enrolled, priority will be given to majors in the Department of Asian Languages, Literatures, and Cultures

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

JAPN 240(D1) ASIA 240(D1)

Difference, Power, and Equity Notes: This course traces the trajectories of Japanese and Korean films that deal with contentious issues which have left deep scars in society, including the legacies of Japanese colonialism and Cold War politics in East Asia. Students will have the opportunity to think critically about the implications of such cultural representations of social wounds and injustice on the way toward reconciliation.

Not offered current academic year

JAPN 301 (F) Upper-Intermediate Japanese

This course is a continuation of Japanese 201 and 202. Students will further develop the four skills of speaking, listening, reading, and writing, while consolidating the foundations built in Elementary and Intermediate Japanese. The same general methodology will be used. In this course, students begin to emphasize vocabulary building through the study of situationally oriented materials stressing communicative competence. The reading of expository prose in both semi-authentic and authentic materials of intermediate difficulty will also receive some extensive attention.

Class Format: three 75-minute classes

Requirements/Evaluation: daily performance, homework, quizzes, a midterm, and a final exam
Prerequisites: JAPN 202 or permission of instructor
Enrollment Limit: 12

Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures
Expected Class Size: 8
Grading: no pass/fail option, yes fifth course option
Distributions: (D1)

Fall 2023
LEC Section: 01  MWF 8:30 am - 9:45 am  Shinko Kagaya

JAPN 302 (S) Upper-Intermediate Japanese
This course is a continuation of Japanese 301. Students will further develop the four skills of speaking, listening, reading, and writing, while consolidating the foundations built in Elementary and Intermediate Japanese. In this course, students work on the reading skills for comprehending primary source materials and expository prose of intermediate difficulty; the communication skills for conducting practical conversations and presentations; and the listening skills for interpreting various types of information.

Class Format: three 75-minute classes
Requirements/Evaluation: daily performance, homework, quizzes, a midterm, and a final exam
Prerequisites: JAPN 301 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures
Expected Class Size: 8
Grading: no pass/fail option, yes fifth course option
Distributions: (D1)

Spring 2024
LEC Section: 01  MWF 8:30 am - 9:45 am  Masashi Harada

JAPN 401 (F) Advanced Japanese
This course is a continuation of Japanese 301 and 302. Students will develop the four skills of speaking, listening, reading, and writing in the discussion of social issues in contemporary Japan. Topics may vary according to the level of the students.

Class Format: three 75-minute classes
Requirements/Evaluation: daily performance, homework, quizzes and projects (presentations)
Prerequisites: JAPN 302 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures
Expected Class Size: 8
Grading: no pass/fail option, yes fifth course option
Distributions: (D1)

Fall 2023
SEM Section: 01  MWF 11:00 am - 12:15 pm  Shinko Kagaya

JAPN 402 (S) Advanced Japanese
A continuation of Japanese 401, developing speaking, listening, reading, and writing skills in the discussion of social issues in contemporary Japan. Topics may vary according to the level of the students.

Class Format: three 75-minute classes
Requirements/Evaluation: daily performance, homework, quizzes and projects (presentations)
Prerequisites: JAPN 401 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures
Expected Class Size: 8
Grading: no pass/fail option, yes fifth course option
Distributions: (D1)

Winter Study ----------------------------------------------------------------------

JAPN 31  (W) Senior Thesis: Japanese
To be taken by all students who are candidates for honors in Japanese.

Class Format: independent study
Grading: pass/fail only

Not offered current academic year

JAPN 88 (W) Japanese Sustaining Program

Students registered for JAPN 101-102 are required to attend and pass the Japanese Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program; check your class schedule to confirm enrollment.

Requirements/Evaluation: regular attendance and active participation
Prerequisites: Japanese 101
Grading: pass/fail option only
Materials/Lab Fee: one Xerox packet

Not offered current academic year

JAPN 99 (W) Independent Study: Japanese

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

Not offered current academic year
Program in Asian Studies  
(Div I & II)  
Chair: Anne Reinhardt, Professor of History

Advisory Committee:
- Sarah Allen, Chair and Associate Professor of Comparative Literature
- George Crane, Edward S. Greenbaum 1910 Professor of Political Science
- Kim Gutschow, Senior Lecturer in Religion and Anthropology/Sociology
- Aparna Kapadia, Associate Professor of History
- Cornelius C. Kubler, Stanfield Professor of Asian Studies
- Joel Lee, Assistant Professor of Anthropology
- Man He, Assistant Professor of Chinese
- Christopher Nugent, Professor of Chinese
- Annie Reinhardt, Professor of History
- Li Yu, Professor of Chinese

The interdisciplinary Program in Asian Studies invites students to explore the vast and diverse area that is Asia through individually designed concentrations that can include coursework in anthropology, art, history, language, performance, political science, religion, and literature.

Students will have the opportunity to:
- Gain knowledge about the societies and cultures of Asia.
- Appreciate the diversity in, connections among, and interactions between, different regions of Asia.
- Develop in-depth knowledge of a particular aspect of Asia—thematically, disciplinarily, or geographically.
- Understand how “Asia” and “Asian Studies” have been constituted.
- Hone skills in research or creative endeavor.

CONCENTRATION REQUIREMENTS

The concentration is composed of six courses:
- one (1) required course: ASIA 210. This course draws upon interdisciplinary work from the humanities and social sciences that critically investigates how “Asia” and “Asian Studies” have been conceived and, in the case of “Asian Studies,” practiced as a field of inquiry. Ideally this course would be taken in the sophomore or junior year, after students have taken at least one Asian Studies related course.
- a three (3) course curricular focus, which could center either on a region or country interdisciplinarily (e.g. South Asia via history, anthropology, and art) or on a theme inter-regionally (e.g. Imperialism/Colonialism in Asia; Art and Performance in Asia). Each student would specify a curricular focus in consultation with a faculty advisor.
- two (2) additional courses relating to Asia. These courses may be used to further develop the chosen curricular focus, or to bring greater disciplinary or geographic breadth to the concentration. One or both of these courses may be Asian language courses.
- a research or creative project capstone and symposium. A research paper or performance/exhibit done within one of the courses included in the concentration. (This is not an extra course, but a requirement for a research or performance project as a part of the concentration). Senior concentrators will present their work to a gathering of fellow concentrators and faculty at the Senior Asian Studies Symposium, to be held in the Spring semester of each year. They will be asked to reflect upon how their projects fit into their Asian Studies concentrations, which will give them the opportunity to tie that work into their goals within the concentration and what they have gained from the concentration more broadly.

In order to maximize breadth, among the five classes that comprise the curricular focus and electives at least two (and not necessarily more) different disciplines and at least two regions or countries of Asia (China, Japan, Korea, Taiwan, East Asia, Southeast Asia, South Asia) must be covered.

STUDY ABROAD

With permission of the faculty advisor, as many as two courses from a study abroad program may be counted toward the concentration.
FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your program typically pre-approve courses for concentration credit?

Yes.

What criteria will typically be used/required to determine whether a student may receive concentration credit for a course taken while on study away?

Course title and description, complete syllabus including readings/assignments.

Does your program place restrictions on the number of concentration credits that a student might earn through study away?

Yes, two courses.

Does your program place restrictions on the types of courses that can be awarded credit towards your concentration?

Approved courses only.

Are there specific concentration requirements that cannot be fulfilled while on study away?

Yes. ASIA 210 must be taken at Williams.

Are there specific concentration requirements in your program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Not in particular. Students are always strongly encouraged to consult with the program faculty ahead of time to plan on what courses to take during study away and what courses to take upon return.

HONORS

For students interested in graduating with honors in Asian Studies, a thesis completed over one semester and a Winter is required, above and beyond the six-course concentration. Thesis proposals are due to the Advisory Committee in the Spring for a fall thesis in the next academic year, and in the Fall for a spring thesis in that academic year.

ASIA 105  (S)  Arts of South Asia  (DPE)

Cross-listings:  ASIA 105 ARTH 105

Secondary Cross-listing

South Asia, which includes the modern-day nations of Afghanistan, Pakistan, India, Bangladesh, Sri Lanka, Nepal, Bhutan and Maldives, is often compared to the European continent. Regional societies in the Indian "subcontinent" are as distinct from each other as those of Italy, Germany and France. Similarly, they also differ in their language, dress, diet, rituals and politics. However, parallel to the wealth of diversity, South Asia also demonstrates a rich history of interconnectedness. This complex web of culture, language, religion and politics is best manifested in the arts of the region. How does visual culture reflect regional variations? How does a survey of artistic style and iconography help uncover networks of exchange across South Asia? What role did the arts play in the expression of religious traditions such as Buddhism, Hinduism, Jainism and Islam? With these questions in mind, this course is designed as a survey of the arts of South Asia starting with the height of the Indus Valley Civilization in 2600 BCE and ending in 1857 CE, a date that marks the cessation of independent rule in South Asia. Using the study of architecture, painting, sculpture and textiles, students will learn how to make stylistic and iconographic analyses, while also improving their art historical writing and analytic skills.

Prerequisites:  none, open to all students

Enrollment Limit:  25

Enrollment Preferences:  First years, sophomores and juniors

Expected Class Size:  20

Grading:  yes pass/fail option, yes fifth course option

Distributions:  (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 105(D1) ARTH 105(D1)

Difference, Power, and Equity Notes:  In addition to a survey, the course also highlights the conceptual differences between the arts of South Asia
and Western constructs of art and culture. The survey will analyze how South Asian art was codified and examined during the colonial and post-colonial periods, and how that understanding has come to define the field over the last century. The course will encourage students to challenge longstanding biases and assumptions when studying these artworks.

ASIA 111 (F) The Asia-Pacific War (WS)

Cross-listings: HIST 112 ASIA 111

Secondary Cross-listing

The "Asia-Pacific War," as it is known in Japan, raged from the full-scale Japanese invasion of China in 1937 until Japan's total defeat in 1945. This war, though certainly tied to the Allied war against Germany and Italy, was viewed by many participants at the time as truly a war apart due to the immense distances involved, the gleeful, racism-fueled brutality on both sides of the conflict, and the resultant abuses of POWs, use of atomic weapons, and other atrocities. Students will explore the intersection of colonialism, racism and opportunism that fed the conflagration, and the remarkable rapprochement between American and Japanese former enemies immediately after the war. It will examine in depth the roles of China and the USSR in this conflict, which are often mentioned but functionally ignored in the West. It will cover the various warzones and home fronts, focusing as much as possible on conveying the experiences of participants through primary sources. It will likewise seek to bridge the analysis of the military and socio-political sides of this conflict, which are often treated as distinct, by drawing on key academic works in the field.

Requirements/Evaluation: Weekly meetings with professor and one peer partner; 5-page papers (6 total); 2-page critiques of partner's papers (6 total)

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: History majors and Asian Studies concentration students, then everyone else.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 112(D2) ASIA 111(D2)

Writing Skills Notes: Students will alternate weekly between writing 5-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular written feedback on their writing from the professor, as well as oral critiques from the professor and tutorial partners.

ASIA 117 (F) Bombay/Mumbai: Making of a Modern Metropolis (WS)

Cross-listings: ASIA 117 HIST 117 GBST 117

Secondary Cross-listing

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of
historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of colonial and modern India through the history of its most important city.

**Requirements/Evaluation:** assessment will be based on class participation and weekly written responses to readings (2 pages), 2-3 short papers (4-5 pages), leading to an oral presentation and final paper (10-12 pages). All writing assignments are structured to build up the final paper.

**Prerequisites:** First years and sophomores only

**Enrollment Limit:** 19

**Enrollment Preferences:** first-years, and then sophomores who have not previously taken a 100-level seminar.

**Expected Class Size:** 12-15

**Grading:** no pass/fail option, no fifth course option

SEM Section: 01  MWF 11:00 am - 12:15 pm  Aparna Kapadia

**ASIA 127 (F) Spring Grass: A Peek into Inequality in China (DPE) (WS)**

**Cross-listings:** WGSS 127 ASIA 127 CHIN 427

**Secondary Cross-listing**

*Spring Grass (Chuncao)* is a Chinese novel written by award-winning author Qiu Shanshan (1958-). Using the literary techniques of social realism, the novel chronicles the life of a young rural woman from 1961 to 2001. Spring Grass, the protagonist of the novel, was born in a rural village to a mother who preferred sons over daughters. At a young age, Spring Grass was deprived of the opportunity to attend school. Against all odds, she managed to marry for love, venture into the city, and become an enterprising migrant worker. This novel not only reflects the struggles of women in contemporary China but also captures the economic transformation of modern China since 1978 when the Reform and Open-Door Policy (*gaige kaifang*) was initiated. The novel was adapted into a television drama series and became an instant hit in 2008. This course takes an interdisciplinary, cultural studies and humanistic approach to studying a literary text, using literature as a means to help students better understand social and cultural issues. Through close readings of the novel, the eponymous TV drama series, documentaries, and films depicting rural life and women's roles in China, as well as in-depth discussions of both primary and secondary sources that deal with the cultural, historical, and socioeconomic background of the unfolding story of Spring Grass, this course aims to provide a window for students to examine the issues of inequality in the Chinese village and society at large. Why would mothers be harsh to their own daughters and bar girls' right to education? Why would young people leave their village and migrate to the city? Why would migrant workers leave their children behind in the village? Why would economic developments in China exacerbate the problem of gender inequality in society? Why would the ideology and cultural logic behind Mao Zedong's proclamation "women can hold up half of the sky" add more burden to women rather than truly liberate them? Why would city people discriminate against country folks? After taking this course, students will gain a deeper understanding of the issues related to gender inequality (*nannü bu pingdeng*) and the urban/rural-gap (*chengxiang chabie*) in China. Throughout the course, they are also encouraged to critically think about how to achieve equity in different societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or WGSS and language learners wishing to take the course in Chinese should register under CHIN.

**Requirements/Evaluation:** For all students, active participation in tutorial meetings and an online writing portfolio as the final project. For CHIN students, four 4- or 5-page tutorial papers and revisions in Chinese, four 2-page critiques. For ASIA/WGSS students, five 5-page tutorial papers in English, five 2-page critiques, one revised paper.

**Prerequisites:** For students registering under CHIN, the prerequisite is CHIN 402 or a language proficiency interview conducted by the instructor. For students registering under ASST or WGSS, there is no prerequisite.

**Enrollment Limit:** 10

**Enrollment Preferences:** Enrollment priorities will be given to Chinese language learners who register under CHIN, and to freshmen and sophomores who register under ASST or WGSS.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 127(D2) ASIA 127(D1) CHIN 427(D1)

Writing Skills Notes: Writing is taught using the writing-as-process pedagogical approach. The writing process consists of invention, composition, and revision. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. The instructor gives detailed feedback to students’ drafts and students are required to turn in revisions. At the end of the semester, students will compile an online writing portfolio to showcase their best works.

Difference, Power, and Equity Notes: The issue of “inequality,” including both gender inequality and regional inequality is the driving force behind the readings and discussions of this tutorial. Students are guided to develop an empathetic way of interpreting a literary work that features a rural woman/migrant worker. They will critically analyze the sources of inequality in the Chinese cultural context and explore ways to address such inequality.

Fall 2023

TUT Section: T1 TBA Li Yu

ASIA 130 (S) Basic Cantonese

Cross-listings: ASIA 130 CHIN 131

Secondary Cross-listing
An introduction to Standard Cantonese, a major regional language of southern China which is spoken by over 70 million people in Hong Kong, Macao, Guangdong, and Guangxi as well as by many overseas Chinese in Southeast Asia, Hawaii, and North America. Due to the pervasive influence of Hong Kong as well as the economic transformation of Guangdong Province, the prestige of Cantonese within greater China rose steadily in the period 1980-2010 and it continues to be an important language today. Our focus in this course will be on developing basic listening and speaking skills, though some attention will also be paid to written Cantonese, including the special characters which have been used for centuries to write colloquial Cantonese, which have become even more widely used in Hong Kong since 1997. Since students will ordinarily possess prior proficiency in Mandarin, a rather closely related language, they should be able to attain in one semester approximately the same proficiency level that is attained in the first two semesters of Mandarin.

Class Format: dialog performance, drills, communicative exercises, oral reading, questions, and discussion
Requirements/Evaluation: Evaluation is based on classroom performance, quizzes, unit tests, and an oral and written final exam.
Prerequisites: CHIN 202 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: Chinese and East Asian Languages & Cultures majors as well as Asian Studies concentrators
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option
Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 131 (F) Introduction to Japanese Formal Linguistics

Cross-listings: ASIA 131 JAPN 131

Secondary Cross-listing
This course offers a general introduction to Japanese theoretical linguistics, a scientific study of the Japanese language. We will study the major
subfields of theoretical linguistics, which addresses speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meaning (semantics). We will study those topics as we mainly compare Japanese and English. The knowledge and hands-on experience gained will enable us to pursue one of the above core fields and start investigating applied linguistics more effectively, including first/second language acquisition, pragmatics, psycholinguistics, neurolinguistics, sociolinguistics, historical linguistics and language change, and cross-linguistic variation and language universals. Although there is no prerequisite, Japanese language proficiency would be beneficial.

Class Format: combination of lecture and discussion

Requirements/Evaluation: quizzes, problem sets, mid-term exam, and final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

SEM Section: 01 TF 1:10 pm - 2:25 pm Masashi Harada

ASIA 152 (S) Basic Taiwanese/Southern Min

Cross-listings: CHIN 152 ASIA 152

Secondary Cross-listing

This course constitutes an introduction to Taiwanese, the majority language of Taiwan, which is essentially the same as the native language of Xiamen, China and environs. Different varieties of this language, which is also known as Amoy, Hokkien, Fukienese, and Southern Min are spoken by about 50 million people in Taiwan, southern Fujian, the Philippines, Indonesia, Malaysia, and Singapore. Suppressed in Taiwan by the Japanese from 1895-1945 and by the KMT Chinese government from 1945 through the 1970s, Taiwanese—in both its spoken and written forms—has been experiencing a fascinating revival in recent decades. The most divergent of all the Sinitic languages, this language is of special linguistic interest because it has preserved a number of features of Old Chinese. Our focus will be on developing basic listening and speaking skills, though we will also study some of the special characters used to write Taiwanese. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Since students in the course will ordinarily possess prior proficiency in Mandarin, a related language, we should be able to cover in one semester about as much as is covered in the first two semesters of Mandarin. Classes will include dialog performance, drills, communicative exercises, and oral reading and discussion of written Taiwanese.

Requirements/Evaluation: classroom performance, homework, quizzes, unit tests, and an oral and written final exam

Prerequisites: CHIN 301 or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: if course is over-enrolled, preference given to majors in CHIN, EALC, JAPN and concentrators in Asian Studies

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ASIA 153 (F) Japanese Film

Cross-listings: COMP 153 ASIA 153
From the swashbuckling samurai films of Kurosawa and delicate family dramas of Ozu to edgy cinematic experiments and a breathtaking range of animation, Japan has one of the most varied and exciting film traditions in the world. This course will introduce you to major periods, genres, and directors in that tradition. We will read film criticism that represents a range of approaches, but we’ll focus particularly on learning and practicing the kind of close visual analysis that will allow you to build your own original descriptions of how a given scene “works.” Throughout the course we will consider the relationship between classic cinema and popular genres like sword flicks, melodramas, psychological thrillers, and anime, focusing particularly on directors whose work seems to borrow equally from genre film and the artistic avant-garde. All texts are translated or subtitled. All levels welcome.

Requirements/Evaluation: attendance & participation, a few short response assignments, two 5-page papers, in-class test

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: comparative literature majors

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

ASIA 162  (S) Languages of East Asia

Cross-listings: CHIN 162 GBST 162 ANTH 162 ASIA 162

Secondary Cross-listing

A survey of the Chinese, Japanese, and Korean languages in their linguistic and cultural context. Working with various types of multimedia including audio, video, animation, and texts, we’ll take up the phonetics, phonology, morphology, syntax, and lexicon of these three major East Asian languages, including also their history and writing systems as well as how they function in the societies where they are spoken. Though the emphasis of the course is on linguistic description and analysis, there will also be an applied component, as part of which we’ll learn several dozen common expressions in each language. Some of the questions to be discussed are: What are the similarities and differences among these three languages? How are and how aren’t they related? How did the modern standard form of each develop and what is its relationship to any non-standard languages or dialects? How do these three languages reflect sociolinguistic phenomena such as gender, class, and politeness? How do the writing systems of these languages function and what is the role of Chinese characters in them? What has been the influence of Classical Chinese on Modern Chinese, Japanese, and Korean? How have these languages changed due to influence from English and other languages? How are they used in Asian American speech communities? And what are the prospects for their future development, including the influence of computers and digital communications? While this course is not intended as a comprehensive introduction to linguistics, it does introduce many basic terms and concepts from that discipline.

Class Format: combination of lecture, discussion, and language practice

Requirements/Evaluation: three quizzes, two 2- to 3-page papers, an oral presentation, and an 8- to 10-page term paper

Prerequisites: none (lectures, class discussions, and readings in English; no prior background in linguistics or any Asian language required)

Enrollment Limit: 20

Enrollment Preferences: open to all with preference to first-year students and sophomores as well as majors/concentrators in CHIN, JAPN, EALC, ANTH, ASIA and GBST

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

The phrase "Japanese popular culture" often calls to mind comics and animation, but Japan's earliest visual pop culture dates back to the 17th century and the development of arts like kabuki theater and woodblock prints that could be produced for a mass audience. This course traces Japanese popular culture through a range of visual media: kabuki and puppet theater, premodern and postmodern visual art (ukiyo, Superflat), classic film (Ozu, Mizoguchi, Kurosawa), manga/comics (Tezuka, Otomo, Hagio), and animation (Oshii, Miyazaki, Kon). The class will also study material examples of Japanese popular culture on display in the Repro Japan exhibition at the Williams College Museum of Art. We will develop visual reading skills to come up with original interpretations of these works, and compare different media to make them shed light on one another.

**ASIA 201 (F) Accelerated Chinese on Special Topics for Heritage Speakers**

**Cross-listings:** ASIA 201 CHIN 200

**Secondary Cross-listing**

This course is tailor designed for students who already possess intermediate-level proficiency in speaking Chinese but lack the basic reading and writing skills, commonly referred to as heritage speakers of Chinese. They will make accelerated progress in their literacy skills through this course and be able to take either CHIN 202 or CHIN 302 in the spring semester. Adopting a semi-tutorial format (a mix of group classes and two/three-people classes), this course aims to provide differentiated instruction to heritage learners of varying proficiency levels whose Chinese speaking and listening abilities exceed their reading and writing skills. This tailored course will help students effectively expand their literacy skills while helping to solidify the linguistic foundation for continuous proficiency advancement. The main theme of the course is focused on the experiences of Chinese Americans in a global context. Students will gain a deeper understanding of Chinese culture by way of individual projects that are meaningful and relevant to their intellectual interests. Students who are placed into CHIN 102 or 202 at the beginning of the fall semester should consider taking this course in the fall.
Class Format: Semi-tutorial format, students will meet as a large group in most weeks for linguistic development and two-to-three-people groups in some weeks for project-based discussions.

Requirements/Evaluation: Active participation in class, homework, quizzes, essays, oral presentations, and a final project

Prerequisites: Students must complete the Chinese Placement Evaluation in GLOW before registering for this course

Enrollment Limit: 12

Enrollment Preferences: Enrollment priority goes to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures, concentrators in the Program of Asian Studies, and then to first-year students and sophomores

ASIA 203 (S) Modern Japan

Cross-listings: HiST 203 ASIA 203

Secondary Cross-listing

This course is intended to familiarize you with the history of modern Japan, the world's third-largest economy and a dynamic influence on global culture. We will begin during the Edo Period (1600-1868), during which feudal (e.g., the status system) and more modern (e.g., a consumer society) features of Japanese life developed alongside each other. We will then examine the Meiji Restoration and explore how the Imperial Japanese state led Japan through modernization into total defeat by 1945. The course then looks at economic recovery and societal change during the postwar period, taking us up to the present day. Students will become familiar with several significant shifts in interpretation of key aspects of Japanese history. We will cover the rise and demise of the erroneous "national seclusion" narrative, the legislation of Japanese Emperor's divinity, and the debate over Japan's supposed ethnic and cultural distinctiveness. We will focus especially closely on the roles of class, gender, imperialism and foreign contacts in modern Japanese history. You are expected to critically analyze assigned primary and secondary sources and to communicate your ideas to your classmates effectively both orally and in writing. You are also expected to collaborate with your classmates to complete group activities. You will also conduct limited original archival research.

Class Format: This class features an immersive simulation, in which students will simulate the Meiji Restoration. The final project is a collaborative research project and presentation working with Japan-related sources from Williams's Special Collections.

Requirements/Evaluation: Class participation, two 5-6 page essays, immersive simulation midterm, collaborative final research presentation

Prerequisites: None

ASIA 205 (F) Patrons, Rituals, and Living Images in Japanese Buddhism
This course introduces students to Buddhist art and architecture in Japan from its introduction in the sixth century through the present. We focus on the ways different communities—the imperial court, immigrant artists, monks, women, and commoners—employed and venerated Buddhist images for political legitimacy, personal salvation, and worldly benefit. This course also examines how Japanese Buddhist imagery became aestheticized in the early twentieth century and appropriated later in modern and contemporary visual cultures. Some of the topics to be discussed include the reception of continental styles of Buddhist sculpture, the relationship between mandalas and rituals, the role of women in developing Buddhist embroideries, and the Western reappraisal of Zen arts. Students will develop familiarity with the concepts and ideas underlying the production of Buddhist images and will gain foundational skills in analyzing the visual, material, and iconographic qualities of Japanese Buddhist art. For the final project, students will design a digital exhibition focused around one of the topics of the course.

Requirements/Evaluation: attendance, class participation, 4 reading and object response papers (2-3 pages), midterm, non-cumulative final exam, and digital exhibition project with an 8-10 minute presentation

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: First and second-year students, but open to all

ASIA 210  (S)  Approaches to Asian Studies

Cross-listings:  PSCI 207 ASIA 210

Primary Cross-listing

Home to over half of the world's population and to more than twenty of the world's largest cities, Asia has gained global prominence in recent years; the twenty-first century in fact has widely been deemed the 'Asian Century'. But what is Asia? And what does it mean to study this richly diverse region? This seminar will address these questions with the aim of introducing students to important theoretical topics and key concepts that are relevant to the comparative and critical study of Asia. One central concern will be to consider the different ways of understanding "Asia", both in terms of how the term and the region have been historically constituted; another will be to facilitate an understanding some of the salient factors (geography, belief systems, economy and polity)--past and present--that make for Asia's coherence and divergences; a third concern will be to unpack the troubled notions of "East" and "West" and re-center Asia within the newly emerging narratives of global interconnectedness. Beginning with the evolution of the field, this course will equip students with the methodological tools to critically navigate their own specific regional, inter-regional, or interdisciplinary tracks in the Asian Studies concentration.

Requirements/Evaluation:  Two short papers (5-6); one longer final paper (10-15); discussion participation.

Prerequisites:  At least one prior course related to Asia

Enrollment Limit: 20

Enrollment Preferences:  Asian Studies concentrators; seniors; juniors; sophomores

ASIA 211  (F)  Foundations of China

Cross-listings:  HIST 214 GBST 212 REL 218 CHIN 214 ASIA 211 ANTH 212

Secondary Cross-listing

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

Requirements/Evaluation:  short writing assignments (approximately 750-1000 words each), quizzes, a mid-term, and a final exam

Prerequisites:  none

China's presence continues to grow in our world today, but contemporary China also evinces complex contradictions: a market economy promoted by a nominally Communist government, extremes of urban wealth and rural poverty, increasing participation in the international community and intensifying nationalist rhetoric. This course examines China’s historical engagement with the modern world to offer perspective on its current conditions. We will begin with the Qing (1644-1911) conquest of China and consolidation of a multi-ethnic empire, and investigate China's encounters with Western and Japanese imperialism, the rise of Chinese nationalism, Republican and Communist revolutions, and the often turbulent history of the People’s Republic. Throughout, we will examine themes of social, economic, intellectual, and cultural change through predominantly primary source reading and analysis.

Requirements/Evaluation:  class participation, two short papers, two essays, a midterm and a self-scheduled final exam

Prerequisites:  none; open to all

Enrollment Limit:  40

Enrollment Preferences:  open to all; preference to History or Asian Studies majors only if overenrolled

Cross-listings:  REL 295 ASIA 215 CHIN 215

Secondary Cross-listing

How should people treat each other? What constitutes human nature and does it tend towards good or evil? How should we organize society, by focusing on laws and regulations, or on ritual and moral guidance? What is the nature of moral rulership? What is the proper relationship between the individual and larger units of society, from the family to the state? These are some of the key questions that the school of thought that has come to be known as “Confucianism” addresses. As the dominant moral and political philosophy for thousands of years in much of East Asia, Confucianism has shaped our world, past and present, in innumerable ways. In this class we will focus on the foundational texts of the Confucian tradition: the Analects (purported to record the words of Confucius himself), Mengzi (often romanized as “Mencius”), and Xunzi. Beyond those questions noted above, we will further examine how these texts construct their arguments; how they were first composed, compiled, and circulated; how they employ such key concepts as “humaneness” (ren), “moral power” (de), and “ritual propriety” (li); and how they functioned as part of the larger philosophical, linguistic, political, and historical context that we now think of as "early China."

Requirements/Evaluation:  Evaluation is based on writing assignments (3-4 pages, 5-6 pages, and 10-12 pages) and participation in class discussions.

Prerequisites:  None.

Enrollment Limit:  19

Enrollment Preferences:  Enrollment priority goes to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; current or prospective Asian Studies concentrators; and Religion majors.
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

Secondary Cross-listing

The course aims to explore dance and movement-based performances as mediums through which identities in Asian and Asian-American (including South-Asian) communities are cultivated, expressed, and contested. Students will engage with how social and historical contexts influence the processes through which dance practices are invested with particular sets of meanings, and how artists use performance to reinforce or resist stereotypical representations. Core readings will be drawn from Dance, Performance, Asian, and Asian American Studies to engage with issues such as nation formation, racial and ethnic identity politics, appropriation, tradition and innovation among other topics. This is primarily a discussion-based seminar course, and might also include screenings, discussion with guest artists and scholars, and opportunities for creative projects. No previous dance experience is required.

Requirements/Evaluation: reading responses, in-class writing assignments, participation in discussions and presentations, essays, and a final cumulative essay assignment.

Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: first years and sophomores
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE)

ASIA 217 (F) Premodern Japan
Cross-listings: HIST 217 ASIA 217

Secondary Cross-listing
This course is intended to familiarize students with the premodern history of Japan, roughly defined as before the Meiji Restoration of 1868 and the modernizing reforms it unleashed. We will examine the archipelago's natural environment and the human impact thereon. We will explore the creation of "Japan" as a coherent political and cultural unit, key figures and works of Japanese culture and the shift in cultural production from elite patronage to the market. We will examine the Imperial institution and gendered aspects of Japanese private and public life, tracing the changing role Japanese women played in both spheres. We will also pay close attention to the rise of the samurai, both as warriors and political elites, and Japan's relationship with foreign lands and peoples. Students will become familiar with several significant shifts in interpretation of key aspects of Japanese history, such as the growing appreciation of the roles of non-elites in history, and the shift away from the "national seclusion" understanding of Japanese foreign relations.

**Class Format:** discussion

**Requirements/Evaluation:** Class participation; Semester-long immersive simulation, where groups of students produce bi-weekly, 2-page collective response papers (6 total); 5-6 page assigned reading-based and research papers (2 total); Final research presentation or self-scheduled final exam (1 total)

Stunning revolutions, the construction and collapse of an empire, the waging of wars, devastating defeat and occupation by a foreign power, and postwar economic ups and downs have marked Japan's modern experience. This course will explore how various Japanese people from factory workers and farmers to politicians and intellectuals have understood, shaped, and lived the upheavals from the 1850s through the present day. And it will examine how the country of Japan as well as individual Japanese people have defined the identities and meanings of "modern Japan." We will ask why a modernizing revolution emerged out of the ashes of the early modern order; what democracy and its failures wrought; how world war was experienced and what legacies it left in its wake; and how postwar Japan has struggled with the successes and costs of affluence. Materials will include anthropological studies, government documents, intellectual treatises, fiction, films, and oral histories.

**Class Format:** lecture and discussion

**Requirements/Evaluation:** class participation, response papers, two short papers (5 pages), and a self-scheduled final exam or research paper

Who are Zainichi Koreans (Koreans in Japan)? How are they different from Koreans in Korea or in the United States? Contemporary Korean TV dramas and films have depicted Koreans as attractive and successful people appealing to Hallyu (Korean Wave) fans around the world. However, Zainichi Koreans, who are the largest ethnic minority in Japan, have been frequently portrayed as abusive husbands/fathers, pitiful wives/mothers, or juvenile delinquents in both Japanese and Korean cinema and literature. Through close readings of films, novels, and short essays, we will explore little-known yet significant representations of Zainichi Koreans by focusing on Japanese and Korean historical contexts. By doing so, we will discover new aspects of transnational exchange not only between Japanese and Koreans, but also between South and North Koreans in Japan. All class materials will be available in English translation or with English subtitles.

**Requirements/Evaluation:** attendance/participation; short written responses; midterm essay; group presentation; final essay

**Prerequisites:** none

**Enrollment Limit:** 16

This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from c. 1750 to 1947. This period spans the decline of the Mughal Empire through British colonial rule, South Asians' struggle for independence, and the Partition of India. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and podcasts. One objective of this course is to introduce students to the different political and social processes that led to the creation of India and Pakistan; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

**Class Format:** This class will also have a small but significant discussion component.

**Requirements/Evaluation:** class participation, response papers (2-3 pages), two short essays (4-5 pages), midterm and final exams

**Prerequisites:** none; open to all

**Enrollment Limit:** 40

**Enrollment Preferences:** history majors if the the class is overenrolled.

**Secondary Cross-listing**

This course is an introduction to the history of India and South Asia from prehistoric times to the emergence of early modernity. During these centuries, the subcontinent emerged as one of the most diverse and complex regions of the world, as it continues to be even today. The course will cover the period between the rise of the urban Indus Valley civilization to the end of the Mughal Empire and will address topics such as the origins and development of the caste system and 'Hinduism', society and culture in the great epics like the Ramayana, the beginnings of Jain and Buddhist thought, politics and patronage under Islamic polities, the formation of Mughal imperial authority through art, architecture and literature, among others. Through the study of social processes, the course will focus on the diversity and connectedness that have defined the subcontinent throughout its history. It will also consider the role of history in the region and how a number of events from the past continue to inform its present.

**Class Format:** Lecture-discussion

**Requirements/Evaluation:** class participation, reading responses, 2 essays, mid-term and a final exam

**Prerequisites:** none; open to all

**Enrollment Limit:** 40

**Enrollment Preferences:** History Majors, and anyone interested in South Asian history before colonialism

**Expected Class Size:** 20-25

**Grading:** yes pass/fail option, no fifth course option

### ASIA 226  (F) Chinese Film and Its Significant Others  (DPE)

**Cross-listings:** CHIN 226 ASIA 226 COMP 296

**Secondary Cross-listing**

From the first "wows" that the short films invoked at a Shanghai teahouse in 1896, Chinese films have made successive wonders that straddle reality and fantasy, technological modernity and shadow-making craft, aesthetic experiments and monetary yearnings, global investments and local interest. This seminar will explore the evolving relationships between Chinese films and five "significant others" that are central to film and film-making. Roughly following a chronological order, this course will examine 1) the effect of new technological developments (such as photography, sound, color, special FX) on film; 2) the tension between film and traditional modes of public entertainment (such as operas and shadow plays); 3) film's social role to affirm and contest gender, national, and class identities; 4) the need to garner differing sources of financial support (state funding, cultural entrepreneurs, and transnational capital); and 5) the circulation of Chinese films in the global market. Class materials include various genre films (melodrama, horror, martial arts, comedy, etc.), directors' notes, contemporary reviews, and scholarship in China and media studies. All materials and discussions are in English.

**Requirements/Evaluation:** Evaluation will be based on 1) ACTIVE in-class discussion; 2) Pre-class discussion posts based on reading and recorded lectures (Graded as Complete or Incomplete); 3) Three short papers (3-5 pages); and 4) the final project (including a presentation, and a paper or other form of project).

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** current or prospective majors in Department of Asian Languages, Literatures, and Cultures; Comp Lit majors; those with Asian Studies Concentration.

Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
CHIN 226(D1) ASIA 226(D1) COMP 296(D1)

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze the clashes and negotiations between Western media technological modernities and Chinese indigenous understanding of shadows, visuality, and sound. By discussing various films produced from mainland China, Hong Kong, Taiwan, and other diaspora areas from 1920 to now, this course asks students to explore how cinema invokes (and erases) differences, and consolidates (and challenges) hegemonic notions of nation, gender, and class.

ASIA 228 (S) Present Pasts: The Politics of Memory in Contemporary Chinese Literatures and Films (DPE) (WS)

Cross-listings: COMP 297 CHIN 428 ASIA 228

Secondary Cross-listing

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "pasts" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, mesology and mythology, amnesia and nostalgia, and diaspora and settlement in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies. This tutorial is conducted in either Chinese or English. Students wishing to take the course in English should register under ASST or COMP and language learners wishing to take the course in Chinese should register under CHIN.

Requirements/Evaluation: attendance and participation, five 5-page papers, five peer-review and critique papers, revisions on selected papers.

Prerequisites: None for students taking the course under ASST and COMP 297; CHIN 402 or permission of the instructor for students taking CHIN 428

Enrollment Limit: 10

Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; COMP majors; Asian Studies Concentration

Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 297(D1) CHIN 428(D1) ASIA 228(D1)

Writing Skills Notes: Students will write a 5-page paper every other week for a total of five papers. On weeks when they are not writing papers, they are expected to critique their tutorial partner's paper as peer reviewers. Detailed writing prompts will be provided to students to generate and organize ideas for each essay. Students are also required to revise key paragraphs, sections, and papers throughout the semester.

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze and critique the following entangled modernist dualisms: present and pasts; memory and representations; diaspora and settlement; transnationalism and localism. By discussing texts produced from the PRC, Hong Kong, Taiwan, and other diaspora areas in these "post" societies, this course asks students to explore how literary and cinematic narratives invoke (and erase) differences, and challenge (and consolidate) borders.

ASIA 230 Performance Practices of India (DPE)
This course explores ancient and contemporary performance practices in India. Our objects of study will include the text and performance of Sanskrit plays, contemporary and experimental theater productions, as well as forms of dance and ritual. We will discuss dramaturgical structure, staging, acting conventions, gender representation, performer training, the experience and role of the audience, as well as mythological and political themes. Thinking historically and ethnographically, we will seek to understand the aesthetics and social purposes of these practices, in addition to the relationship that performance has with everyday life, contested concepts of the nation, and caste. Throughout the semester we will interrogate the ways in which Western categories such as "classical," "folk," "religious," "traditional," and even the distinction between "dance/theater/music/visual arts" are not indigenous or accurate concepts for organizing thinking about performance in this part of the world.

Requirements/Evaluation: Evaluation will be based on participation in discussion, reading responses, an oral presentation, and one 10-page paper.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: preference for seniors and juniors

Expected Class Size: 12

Grading:

Distributions:  (D1)  (DPE)

Difference, Power, and Equity Notes: We will examine British colonial edicts that prohibited performance practices as a form of social control as well as in the name of Christian morality. From here we will explore how upper-caste Independence era artists and leaders sought to reinvent the arts as vessels of "Indian" identity, at the cost of further marginalizing hereditary performance communities. We will also interrogate how the Indian state has promoted narrow visions of "femininity" and how artists contest religious nationalism

ASIA 234  (S)  Arts of Tibet -- Sacred Abode of the Himalayas

Cross-listings: ASIA 234 ARTH 234

Secondary Cross-listing

This course surveys the art and culture of Tibet from the time of the introduction of Buddhism in the seventh century to the modern period. Traditionally understood as the divine abode of Avalokitesvara, the bodhisattva who embodies the compassion of all buddha in Buddhist cosmology, Tibet was also fantasized as the immortal realm of "Shangri-la" by western interpreters. In this course, we will begin by examining the imagination and representation of Tibet and its culture in modern western discourses, and then shift the focus to the development of artistic forms of Tibet in the context of Tibet's history and religious movements, from ancient times to the present.

Class Format: A viewing session at museums, possibly at the Williams College Museum of Art, the MFA Boston, or the MET, pending planning and approval.

Requirements/Evaluation: In addition to attendance and participation, students will be graded on two ungraded quizzes, one movie response (1-2 pages, double-spaced), one midterm, and one final project (curating a mock exhibition or a 10-page double-spaced research paper along with a prospectus and a presentation).

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: Majors and concentrations are prioritized if the course overenrolls.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

ASIA 239 (F)(S) Taswirkhana: Technique and Practice of Indian Drawing and Painting (DPE)

Cross-listings: ARTS 244 ASIA 239

Secondary Cross-listing

Small in scale but vast in its representation, the world of Indian painting is famous for its stylized naturalism and mastery of line. It is an artistic practice whose legacy stretches back to at least the first century CE. This studio course will introduce students to the technique and practice of traditional Indian drawing and painting. The course is designed as a workshop in which students will learn to use materials and techniques of this art form. By engaging with a non-western traditional practice, the aim of the course is to expose students to a pluralistic engagement with art making. Students will learn paper and pigment preparation, as well as the basics of traditional drawing and painting techniques. The class will learn from studying a selection of original masterworks of Indian art from the Williams College Museum of Art that will be displayed in the Object Lab. Working with original artworks will help students situate the hands-on study of Indian painting practice alongside exemplary historical examples.

Requirements/Evaluation: Class participation, discussions and critiques, successful completion of all assignments and attendance

Prerequisites: none, open to all students

Enrollment Limit: 18

Enrollment Preferences: If the course over enrolls preference will be given to studio art and art history majors.

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $400

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 244(D1) ASIA 239(D1)

Difference, Power, and Equity Notes: The course invites students to engage with a pluralistic studio practice that is in stark contrast to mainstream modern and contemporary art practices. The course will follow a traditional, Indian workshop-style format which has its own particular rules and unique visual vocabulary. From the material preparation of pigments, paper and brushes, to the techniques of drawing and painting, the course will introduce students to an alternative, non-Western, mode of art making.

ASIA 240 (S) Toward Healing Trauma in Japanese and Korean Cinema (DPE)

Cross-listings: JAPN 240 ASIA 240

Secondary Cross-listing

This course examines Japanese and Korean cinema from the 1930s to the present, with a focus on narratives of trauma. We will analyze cinematic representations of social conflicts caused by continuous negotiations of tradition and progress, gender and identity, and everyday life and war wounds in the transition from imperial/colonial to post-imperial/post-colonial periods. Along with exploring historical contexts, we will compare the ways in which Japanese and Korean filmmakers have confronted social injustice by addressing the pain of trauma. In doing so, we will discover the meanings of cultural confrontation in the process of healing and reconciliation in our society. All readings and screenings will be available in English translation or with English subtitles.

Requirements/Evaluation: class attendance and participation, weekly GLOW posts, two short essays (4-5 pages each), and a final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Open to all students, but if over-enrolled, priority will be given to majors in the Department of Asian Languages, Literatures, and Cultures

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
JAPN 240(D1) ASIA 240(D1)

Difference, Power, and Equity Notes: This course traces the trajectories of Japanese and Korean films that deal with contentious issues which have left deep scars in society, including the legacies of Japanese colonialism and Cold War politics in East Asia. Students will have the opportunity to think critically about the implications of such cultural representations of social wounds and injustice on the way toward reconciliation.

Not offered current academic year

ASIA 241 (S) Colonialism and Underdevelopment in South Asia (DPE) (QFR)
Cross-listings: ASIA 241 ECON 240

Secondary Cross-listing
British colonial rule in South Asia shaped economy and society in fundamental ways. As resistance to colonial rule emerged in the late nineteenth century, "nationalist" writers developed a critique of its economic impact via taxation, fiscal policy, trade, and many other policies. In their turn, supporters of British rule, "apologists," argued that British rule had laid the foundations of economic growth by securing property rights, enforcing contracts, and developing infrastructure. The debate between "nationalists" and "apologists" has never quite ended, but after the recent growth of the Indian economy it has lost some of its emotional charge. We will use this opportunity to revisit the controversy.

Requirements/Evaluation: essays (one every other week) and responses to partner's essays will be evaluated
Prerequisites: one course in ECON
Enrollment Limit: 10
Enrollment Preferences: Economics major, prior course on South Asia
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ASIA 241(D2) ECON 240(D2)

Difference, Power, and Equity Notes: Issues of difference, power, and equity are at the heart of any analysis of colonialism, hence the DPE designation.

Quantative/Formal Reasoning Notes: Students will write six essays, in which they will employ economic models and engage with quantitative evidence, so the course satisfies the QFR requirement.

ASIA 242 (S) The Sacred in South Asia
Cross-listings: REL 149 ANTH 249 ASIA 242

Secondary Cross-listing
Is religious identity necessarily singular and unambiguous? The jinn - Islamic spirits born of fire - are sought out for their healing and other powers not only by Muslims in India, but by Hindus, Christians and Sikhs, as well. In parts of Bengal statues of the Hindu goddess Durga are traditionally sculpted by Muslim artisans. Buddhist pilgrimage sites in Sri Lanka contain tombs of Muslim Sufi saints and shrines of Hindu deities. South Asia - where a fifth of humanity lives - provides some of the most striking examples of pluralism and religiously composite culture in our contemporary world. Yet at the same time, strident religious majoritarianism has been a defining feature of the politics of India, Pakistan and Sri Lanka for decades, and haunts Nepal and Bangladesh as well. Are these two modes of religious being - pluralistic and composite on the one hand, singular and majoritarian on the other - reflective of two different conceptions of selfhood? What if we turn from questions of community and identity to questions of unseen power and the sacred? This course is an exploration of lived religion in South Asia. It is simultaneously a study of popular Hinduism, Buddhism and Islam and an introduction to the anthropology of religion. Centered on in-depth studies of popular sites of 'syncretic' ritual practice (shared across religious difference) as well as studies of mass mobilizations that seek to align the religious community with the nation, we approach from multiple angles what the sacred might mean in modernity.

Requirements/Evaluation: weekly (1 page) posts on readings, two short (5 page) papers, and one (12-14 page) final research paper.
Prerequisites: Interest in the topic!

Enrollment Limit: 20

Enrollment Preferences: Students in all fields of study are most welcome; if overenrolled, priority will be given to majors in Anthropology, Sociology, Religion and Asian Studies.

ASI 244 (F) Mind and Persons in Indian Thought

Cross-listings: ASIA 244 PHIL 245 REL 244

Secondary Cross-listing

In this course, we follow the Indian philosophical conversation concerning the self and the nature of consciousness, particularly as they are found in its various Yogic traditions. We start with some of the Hindu views about the self and the mind and consider their ethical implications. We then consider a range of Buddhist critiques of these views, focusing more particularly on the Madhyamaka, which radicalizes the critique of the self into a global anti-realist and skeptical stance. We also examine the Yogacara school, which offers a process view of reality focusing on the analysis of experience. We conclude by considering some of the later Hindu holistic views of the self as responses to the Buddhist critique. In this way we come to realize that far from being the irrational foil of "the West," Indian tradition is a rich resource for thinking through some of the central questions that have challenged philosophers in both traditions.

ASI 249 (S) Political Power in Contemporary China

Cross-listings: ASIA 249 PSCI 247

Secondary Cross-listing

The People’s Republic of China has experienced rapid and extensive economic, social and cultural transformation over the past forty years. Its political system, however, is little changed. The Communist Party still monopolizes power and works hard to suppress organized opposition. Political dissent has taken various forms since 1979 but the regime has found ways to repress and divert it. Yet, in spite of the state’s efforts, opposition and dissent continue to bubble to the surface. The course will review the political development of the PRC since 1949 and, then, focus on the dynamics of political contention and regime persistence since the Tiananmen Crisis of 1989.

**ASIA 250 (F) Scholars, Saints and Immortals: Virtue Ethics in East Asia**  
**Cross-listings:** REL 250 ASIA 250  
**Secondary Cross-listing**

In East Asian cultures, as in the United States, popular conceptions of morality typically take their shape, not from explicit rules, but from moral paragons—stylized figures that are said to embody a distinctive cluster of virtues. For example, American Christians invoke not only Jesus, but also a pantheon of “secular saints” as diverse as Martin Luther King Jr. and General Patton, George Washington and Cesar Chavez. This course will explore the cultural functions of moral paragons and philosophies of virtue in East Asia by introducing students to examples from Chinese and Japanese history, ranging from Confucian articulations of the ideal scholar-bureaucrat to Buddhist conceptions of the Bodhisattva to Taoist immortals. It will also address the history of ethical thought in East Asia, focusing particular attention on conceptions of “Virtue Ethics.” This approach has come to be seen by some contemporary analytic philosophers as a way out of the impasse produced by ethical relativism and the loss of theological rationales for moral action. Readings will include Euro-American philosophers such as Nietzsche and MacIntyre as well as primary texts in translation by Chuang-tzu, Confucius, Shantideva and others. The fall 2021 iteration of the course will have a special focus with a few additional readings on idealized communities and political “utopias.”

**ASIA 252 Comparative Politics of South Asia**

South Asia is home to around 2 billion people (over 24% of the world), making it the most populous and densely populated region in the world. The region is also one of the poorest in the world and lags in human development. Ethnic, linguistic, and religious diversity is offset by common cultural traditions and practices that serve to unite the people of the Indian Subcontinent. The course introduces students to the comparative politics of South Asia, highlighting the complexities and potential of the region. Every week we explore a different component of South Asian politics. The course covers the creation of the states of modern South Asia, partition and independence, democratization, electoral politics and political parties, economic and social development, ethnic identity and conflict, and the contemporary regional challenges of democratic backsliding and climate change.
**Requirements/Evaluation:** three 5-7 page papers or one research paper; presentation; class participation

**ASIA 253 (S) Love and Death in Modern Japanese Literature and Visual Culture**

**Cross-listings:** ASIA 253 COMP 255  

**Secondary Cross-listing**
Modern Japanese literature is filled with compelling love stories that are variously passionate and poignant, tragic or uplifting, heartwarming or twisted, and sometimes all of the above. This course offers a survey of modern Japanese fiction and visual culture through the lens of the love story, beginning with tales of doomed lovers that were popular in the eighteenth-century kabuki and puppet theaters, and moving through a range of other relationships, including parental love and sacrifice, sex and the occult, and romance at an advanced age. We will focus on novels and short stories by canonical modern authors like Tanizaki, Kawabata, and Mishima, as well as contemporary popular fiction by writers like Murakami Haruki and Murakami Ryu. We will also give significant attention to popular visual culture, including puppet theater, comics, animation, and film. The class and the readings are in English.

**Requirements/Evaluation:** attendance and participation, a few short response assignments, one test, two 5-page papers, and an ungraded creative project  
**Prerequisites:** none; no familiarity with Japanese language or culture is required  
**Enrollment Limit:** 15

**ASIA 255 (F) Buddhism: Ideas and Practices**

**Cross-listings:** ANTH 255 ASIA 255 REL 255  

**Secondary Cross-listing**
This course introduces students to Buddhism by examining its ideas and practices as they have taken place in actual social contexts rather than as disembodied textual objects. After examining the main ideas and narratives of the tradition, we turn our attention to Thailand where we examine how these ideas and narratives have shaped a whole range of practices, from meditation to shamanistic rituals. We then consider the transformations that Buddhism is undergoing in contemporary society, examining the rise of meditation movement, the changing role of monks and laity, the resurgence of the nun order, the rise of Buddhist social activism and the development of new Buddhist social philosophies. We ask questions such as: How can Buddhism adapt to a modern global consumerist society? What are the transformations involved in this process and the role that Buddhism can play in such a global society? Should Buddhists take advantage of the opportunities of this new global culture or should they adopt a critical stance toward its consumerist values? 

**Class Format:** discussion  

**Requirements/Evaluation:** full attendance and active participation; two essays
This course considers how three women profoundly shaped the Buddha's life and legacy in terms of social change & reproductive justice. Our central characters are Maya—the Buddha's mother, who died shortly after delivering him; Pajapati—the Buddha's stepmother & aunt who raised him; and Yasodhara—his wife, whom he abandoned when he left home to seek enlightenment. We explore the classical Buddhist discourses and modern biographies to explore how these three women impacted what the Buddha taught and practiced in terms of social and gender justice. These women helped shape the Buddha's radical decision to found the first renunciate order for women in Asian history and helped shape Buddhist attitudes towards female empowerment, bodily autonomy, and reproductive justice for that past 2500 years. Our historical genealogy will explore how Buddhism continues to disrupt modern hierarchies of sex, gender, caste, & class while claiming reproductive and social justice. Along the way we consider: How did these three women reject existing social hierarchies in the Buddha's day and with what impacts for modern Buddhist practices and institutions? How do the social transformations of the Buddha's day still impact modern struggles for gender justice & reproductive justice in the Anthropocene?

Requirements/Evaluation: Attendance, writing weekly essays or written feedback. There are no grades first half of the semester but weekly feedback on writing.

Prerequisites: none, but a course in ANTH or REL is preferred

Enrollment Limit: 10

Enrollment Preferences: ANTH, REL, WGSS majors and ASIA concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 266 (S) Confession and Deception in Japanese Literature

Cross-listings: ASIA 266 COMP 266

Secondary Cross-listing

Situated at the origins of Japanese literature are the beautiful and revealing diaries of ladies in waiting at the tenth-and eleventh-century court. Yet one of the most famous of these women turned out to be a man. For the next thousand years, Japanese literary tradition would place a premium on
confessional writing, but the distortions and concealments of these narrators (and the authors hiding behind them) would always prove at least as interesting as the revelations. This course examines several centuries of Japanese literature to ask whether you can ever put your true self into writing; along the way I will ask you what you reveal, conceal, discover, or reinvent about yourself when you write about literature for a class like this. Texts will range from classical and medieval court literature by Sei Shônagon and Lady Nijô, through autobiographical and confessional novels by Sôseki, Tanizaki, Mishima, and Abe Kôbô, to documentary and subculture films like The New God and Kamikaze Girls. The class and the readings are in English; no familiarity with Japanese language or culture is required.

Requirements/Evaluation: attendance and participation, a few short response assignments, one test, two 5-page papers, and an ungraded creative project

Prerequisites: none; no familiarity with Japanese language or culture is required

Enrollment Limit: 25

ASIA 269 (F) Mindfulness Examined: Meditation, Emotion, and Affective Neuroscience  (DPE) (WS)

Cross-listings: REL 269 ANTH 269 ASIA 269 STS 269

Secondary Cross-listing

This course asks students to practice and study mindfulness while observing their own minds, emotions, and behavior for an entire semester. We examine the historic roots and current applications of mindfulness, both as a Buddhist meditation practice as well as a secular tool to improve our awareness of awareness. Throughout, we are interested in the nexus of mind, brain, and emotions and the ways that mindfulness has been studied within contemplative and affective neuroscience, integrative neurobiology, and evolutionary psychology. How and why has the research on mindfulness and other meditative practices exploded since 2000? How has this research helped us understand and explain how our minds as well as brains shape everyday emotions and behaviors? We examine the ways evolutionary psychologists, clinical psychiatrists, neuroscientists, clinicians, and medical anthropologists have studied and applied mindfulness to better understand human emotions. We consider the applications of mindfulness for clinicians, therapists, and educators--all of whom attend to how emotions impact interpersonal relationships. We will train in a variety of meditation practices all semester, while learning to better appreciate our own minds, emotions, and relationships.

Requirements/Evaluation: weekly tutorial papers and discussion

Prerequisites: A prior class or some experience with meditation is recommended

Enrollment Limit: 10

Enrollment Preferences: ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 269(D2) ANTH 269(D2) ASIA 269(D2) STS 269(D2)

Writing Skills Notes: This class will involve weekly tutorial essays or oral responses, intensive written feedback on every essay, and a mid-semester 'writing chat' with the instructor.

Difference, Power, and Equity Notes: This class fulfills the Difference, Power, and Equity requirement because it will explore the ways that mindfulness can address the growing epidemic of anxiety, depression, and other mental health issues we find in the US today. We study mindfulness from an intersectional perspective and relate its benefits to intersecting inequities and intergenerational trauma in the US today.
ASIA 272 (F) Art of the Noble Path: Buddhist Material Culture Across Asia

Cross-listings: ARTH 272 REL 272 ASIA 272

Secondary Cross-listing

Buddhism has spread throughout Asia and beyond since its emergence in India in the 5th century BCE, providing a shared philosophical and cosmological framework for diverse cultures. Artistic expression, regional politics and cultural landscapes have been shaped by its remarkable influence. With patrons ranging from powerful monarchs and monks to merchants and tradespeople, Buddhist art has historically reflected the religion's social inclusivity. This course will survey the architecture, painting and material culture of Buddhism in Asia, tracing its influence in diverse media, from rock-cut architecture to Zen painting. A close reading of primary texts, such as architectural inscriptions in India, manuscripts from Tibet, and travelogues of Chinese pilgrims, will provide greater context for the artworks.

Requirements/Evaluation: 3 ten-minute quizzes, weekly Glow responses, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Art History majors, Asian Studies majors, Religious Studies majors, Art Studio majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

ASIA 275 (S) Acting Out: Performativity, Production, and Politics in East Asian Theatres (DPE)

Cross-listings: CHIN 275 COMP 271 THEA 271 ASIA 275 AAS 275

Secondary Cross-listing

"Asian Theatres," for those in the West, can conjure up a variety of exotic impressions: spectacle and cacophony, mysterious masks and acrobatic bodies, exquisite styles and strangely confusing conventions. Although Asian theatres have been studied systematically in the West for at least a century, the West has never truly left its "othering" look at them. Yet, what is "different" for the West is bedrock for Asian cultures. Theatre, one of the most important and dynamic forms of cultural production and communication, has actively involved all strata of Asian societies for a millennium. How to explain theatre's continued presence and relevance for Asian nations? What do the traditions of Kun, Noh, and Talchum reveal about the cultures and communities in which they were created? This course seeks to understand from the Asian perspective, rather than "exoticize" and "other," musical and dance theatres from China, Japan, and Korea. Examining the evolving presentations of signature dramas dating from the sixteenth to the eighteenth centuries, we will act out Asian theatres in the following ways: (1) by reading the original plays in translation in tandem with their contemporary and intercultural reproductions, we will explore how Asian theatres fare in the era of globalization within and beyond national borders; (2) by revealing the "technologies" of writing, reading, acting, and staging these plays in different cultural milieus, we will consider what kinds of language and rhetoric, forms of music and movement, as well as visual components are deployed to convey evolving messages; (3) by considering key performances held outside of the proscenium stage, we will gain exposure to alternative theatrical spaces in Asian and diasporic communities that reform performing conventions, reconfigure staging environments, and renegotiate cultural values. In this manner, we will together gain an appreciation for the aesthetic devices, thematic concerns, and production politics of East Asian theatres and their global reproductions. Class materials include drama, production videos, and invited zoom sessions with Asian theatre practitioners and directors who live in the U.S. and other diasporic communities. All materials are in English. No language prerequisite.

Requirements/Evaluation: Evaluation will be based on 1) ACTIVE in-class discussion; 2) three short papers (3 pages each); 3) a take-home midterm; and 4) participation in a final in-class theatre production.

Prerequisites: None; open to all. No knowledge of Asian languages required, though students with advanced Asian language proficiency are encouraged to work with primary sources if they wish.
Enrollment Limit: 20

Enrollment Preferences: Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; Theatre majors; Comp Lit majors; Concentrators in Asian Studies or Asian American Studies.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 275(D1) COMP 271(D1) THEA 271(D1) ASIA 275(D2) AAS 275(D2)

Difference, Power, and Equity Notes: This course examines the power dynamics of spectacle and cacophony and how theatre provided a cultural space that engaged all strata of East Asian societies, thereby masking class and ethnic divisions within these nation-states, while also presenting a distinct image of "China," "Japan," and "Korea" to be consumed in the West. Students will learn ways in which "traditional" theatre productions affirm or subvert Western biases against Asians.

ASIA 279 (S) Islam on the Indian Ocean

Cross-listings: ASIA 279 REL 279 GBST 279 ARAB 279

Secondary Cross-listing

While colonial and Eurocentric geographies speak in terms of continental separation, historically the continents of Africa and Asia have been connected to one another through a dual link: Islam and the Indian Ocean. Indian Ocean trade and travel have historically connected East Africa, the Arabian Peninsula, South Asia, and South East Asia, shaping the lives of people and communities who lived not only along the coasts but also inland. This course focuses on these transregional connections, looking at the Indian ocean as a connective space that binds people and regions together rather than separating them. The course will also examine the role of Islam as a religious, economic, social and political force that brought together Muslim communities throughout the regions along the Indian ocean. In exploring these connections, the course will cover a broad historical period, from the 7th century with the rise of Islam to European colonialism and the emergence of a global economy in the nineteenth century.

ASIA 291 (F) Red Chamber Dreams: Reading China's Greatest Novel (WS)

Cross-listings: COMP 291 ASIA 291

Secondary Cross-listing

Since it first began to circulate in manuscript in the mid-eighteenth century, Cao Xueqin's novel Story of the Stone (Shitou ji), also called Dream of the Red Chamber (Honglou meng), has captured the imaginations of readers young and old with its sprawling story of the coming-of-age of members of a wealthy family on the cusp of ruin. As critically acclaimed as it is beloved, Story of the Stone is widely regarded as China's greatest novel due to the
intricacy of its narrative, the complexity of its characters, and the sophistication with which it deals with themes as varied as romance, enlightenment, sexuality and gender identity, and the construction of public and private spaces. The focus of this tutorial will be reading the 120-chapter novel. Students will have the option to read either in Chinese or English (though papers and class discussion will be in English). We will also read scholarly literature to learn about some of the major critical approaches to the novel, and about its enduring importance in the Chinese literary tradition.

**Requirements/Evaluation:** Tutorial papers (including revisions); responses to tutorial partners' papers; engagement in in-class discussion.

**Prerequisites:** None.

**Enrollment Limit:** 10

**Enrollment Preferences:** Comparative literature majors and prospective majors; Asian Studies concentrators.

**Expected Class Size:** 10

**Grading:** No pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 310 (S) Everyday Modernity in Japan

Cross-listings: ASIA 310 HIST 317

Secondary Cross-listing

This course asks one overarching question: What is everyday life like in modern Japan? There, one often hears the words "modern" contrasted with "traditional." When talking about Japan itself, the former is usually coded as "western," and the latter as "Japanese." Many Japanese politicians and cultural authorities, with the help of Orientalist westerners, are happy to highlight this distinction to promote notions of Japanese uniqueness. However, though modernization in Japan did usher in tremendous, often traumatic changes, not every aspect of "modern" Japanese life came from the west, and not all western imports were/are unwelcome. Moreover, many cultural imports, such as concrete buildings and the consumption of red meat, are now interwoven into the fabric of daily life in Japan. This course examines the complex history of modernity in Japan within living memory, highlighting on its presence in the daily lives of ordinary residents of Japan. What do people eat? Where do they live? How do they think about themselves and their neighbors? We will start with the Pacific War (1937-45), but focus especially closely on postwar and contemporary Japan. We will first get a sense of the chronology and major themes in Japanese history from this time period, then explore five units, "sites of modernity" that zoom in on different but interrelated aspects of ordinary Japanese life: 1) Total War, 2) The City, 3) Work, 4) Food, 5) Race and Ethnicity. Sources and data will be drawn from scholarly works, videos, movies, websites, maps, brochures and ephemera, as well as other sources. Students will analyze these sources, discuss them and complete various assignments.

Requirements/Evaluation: Discussion participation, in-class exam, two 6-page analytic essays, job application assignment, syllabus unit design assignment

ASIA 311  (S) Women and Art in East Asia  (DPE)

Cross-listings: ARTH 311 ASIA 311

Secondary Cross-listing

For over a thousand years, women in East Asia profoundly influenced the development of the visual arts, yet their formidable presence remains largely hidden. This seminar explores the critical roles women played as patrons, artists, and collectors of the arts in China, Korea, and Japan. We cover historical periods from the 10th century to the present day and discuss both traditional and nontraditional media including painting, sculpture, photography, and embroidery. Topics include didactic paintings for women in the Song court, calligraphy and painting as gendered modes of expression in Heian period Japan, the revival of Buddhist arts in Korea under the patronage of aristocratic women, and artworks by modern and contemporary artists that contest dominant representations of gender and sexuality. The course does not simply focus on artistic production, but also contextualizes these topics in light of emergent theorizations and readings on femininity, feminism, and the sexual politics of representation. Along with a final research paper, students will generate a substantial Wikipedia entry on a certain aspect of the course to promote the coverage of women and the arts online. No prior knowledge of Asian art history is required or assumed

Requirements/Evaluation: attendance, class participation and discussion, 5 object or reading response papers (2-3 pages), Wikipedia page editing project and presentation (5-7 minutes long), and 8-10-page final research paper (written in stages over the semester including a 10-15-minute presentation)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Art History, Asian Studies, Chinese, or Japanese majors, but open to all

ASIA 312  (S) The Mughal Empire: Power, Art, and Religion in India

Cross-listings: ASIA 312 HIST 312 GBST 312 REL 312

Secondary Cross-listing

Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith—much larger than any European empire in the early modern world—the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor's memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

ASIA 315  (F)  Minorities and the State in Modern East Asia  (DPE)

Cross-listings:  HIST 315 ASIA 315

Secondary Cross-listing

This course examines the relationships between minority peoples and the institution of the state in East Asia, focusing mostly but not exclusively on the early modern and modern periods (17th-20th centuries). We will explore the histories of the Ainu people of Japan, the “Small Peoples” of Russian Siberia, the Tibetan, Uighur and riverine communities of Mainland China, as well as the Hill Peoples of Southeast Asia. It also examines non-indigenous minority groups, such as conquest elites, mixed-race communities, and others. We will analyze how the transition to modernity, evolving understandings of race, gender, class, nation, the impact of imperialism and globalization all influenced the history of East Asian minority peoples. What, if anything, do all of these groups have in common? What do their histories reveal about the history of East Asia and of the countries in which they live? How are the lives of minority groups in East Asia changing today? What can their experiences reveal to us about the larger world? The class is structured as a reading-intensive seminar. Students will engage in and lead discussions, compose reading reaction papers and a final analytical essay. Students will be expected to use scholarly works in order to construct cogent, relevant arguments, which they will communicate both orally and in writing. Students will evaluate primary sources in order to engage with the people they study as directly as possible. Students will lead
discussions on complex topics and develop as leaders and team members in professional settings. This course will present students with an opportunity to hone critical thinking and information literacy skills to a high level. All of you will have to analyze and process complex and often contradictory information, certainly in your personal lives and very likely in your professional lives.

**Class Format:** This discussion-intensive class requires students to lead several discussion sections during the semester.

**Requirements/Evaluation:** Map assignment, discussion participation, leading discussion (four times), three-page response essays (five times), final six-page research essay or presentation

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** History majors, Asian Studies concentrators, then all others

**Expected Class Size:** 15-20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** The study of East Asia's history is all too often conflated with the study of states, so that many less privileged histories are obscured. Chief among these are the histories of minority groups, who are often excluded from power. For this reason, this course puts the history of East Asia's many minority groups front and center in examining their multifaceted interactions with regional states, as well as the of ethnic, linguistic, religious, and regional identities

**Attributes:** HIST Group B Electives - Asia

Not offered current academic year

ASIA 318 (S) A History of the Samurai

**Cross-listings:** ASIA 318 HIST 316

**Secondary Cross-listing**

It is difficult to find a person unaware of the samurai. However, most people, both in Japan and abroad, engage with their idealized images rather than as an actual historical phenomenon. The aim of this course is to bring the samurai to life as a distinct status group that left an indelible mark on the history of Japan, and thereby to separate fact from fiction. We will also explore the creation of iconic images of the samurai, which continue to influence worldwide popular culture. We will use academic readings, primary sources, and other media to examine the samurai from their origins during the Heian period (8th to 12th centuries) to their official dissolution in the late 19th century. We will focus on their development as a special status group and explore how they managed to maintain their corporate identity for so long. We will trace the evolution of the samurai from rural enforcers to territorial magnates to bureaucrats. This evolution affected and was affected by the development of samurai warfare, ethics, aesthetics, religious practices, ideas relating to gender roles and other aspects of samurai life, which we will explore. We will see how these ideas and practices mediated their relations with household, society, and government. Finally, we will examine why samurai status was abolished at the start of the Meiji period, and how former samurai transformed into modern citizens. Students will engage in discussion, write essays, and complete immersive historical simulation assignments.

**Class Format:** This class features a semester-long immersive historical simulation where students work in teams to create samurai clans and navigate historical, as well as historically plausible, scenarios.

**Requirements/Evaluation:** Class participation, map creation assignment, four 2-page essays, semester-long immersive simulation (Samurai clan creation), final 6-page essay

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** History majors, Asian Studies concentrators, then all others

**Expected Class Size:** 15-20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

ASIA 320  (S)  Emotions in Modern Japanese History
Cross-listings:  HIST 320 ASIA 320

Secondary Cross-listing

Emotions have been integral to the human experience--to relationships between people, political decision making, economic behavior, individual and communal identities, international affairs, and national projects. This course will consider a full range of emotions including fear, insecurity, pride, anxiety, desire, anger, and happiness. And it will examine these emotions as both actors in history and subjects of historical inquiry. We will ask how emotions have reflected and shaped the making of modern Japan. What role have emotions played in steering the course of Japanese history, from the modernizing revolutions of the late 1800s, imperialism, colonialism, and war, to the navigation of both affluence and economic insecurity in the postwar era? How have emotions been talked about and represented in modern Japan? We will also discuss different ways of researching and writing a history of emotions.

ASIA 321 (S) A Global History of Manga and Anime

Cross-listings: HIST 321 ASIA 321

Secondary Cross-listing

Japanese comic books and cartoons are known throughout the world by their Japanese names: "manga" and "anime." This is no accident, but a reflection of their enormous global popularity. Why are they so popular? How can we use them as historical sources for Japanese history and society? What do they reveal about the place of Japan in today's global culture? How did these two phenomena emerge and develop, and how do they influence each other? This class will explore these and other related questions through readings, screenings, discussion, and original research. It will trace the evolution of manga and anime from traditional Japanese (kibyoshi, ukyo-e and kawaraban) and western (comic strips and Disney films) influences, and the explosion of their popularity after World War II. We will use manga and anime, especially "girls" (shojo) anime and manga as windows onto the intersection of Japanese and global society, economy and politics.

Requirements/Evaluation: class participation (assessed weekly), weekly prep/response assignments (12 total), 8-9 page research and class-reading based essays (2 total), original research presentation for final assignment (1 total).

ASIA 324 (F) Japanese Art and Visual Culture: Private/Public/Pop (WS)

Cross-listings: ARTH 525 COMP 324 ARTH 324 ASIA 324

Secondary Cross-listing

This tutorial offers a survey of Japanese art and visual culture across time and media, with particular attention to two areas: the links between different artistic media, and the relationship between art and its audience. We'll begin with early court diaries and related scroll paintings as examples of "private" art. Then we'll move through progressively more public visual media of the 17th through 21st centuries: Kanô screen painting; Nô, kabuki, and puppet theater; premodern architecture; popular woodblock prints; turn-of-the-century photography; and finally some examples of contemporary popular culture like comics, animation, and/or film. We will focus on the specificities of each medium while simultaneously developing formal visual reading skills that can work across different media.

Class Format: Students will meet with the instructor in pairs or trios for 75 minutes each week. This tutorial is offered simultaneously at the 300 level for undergraduates and at the 500 level for graduate students: graduate students will be paired with other graduate students and undergraduates with undergraduates.

Requirements/Evaluation: For undergraduates: weekly participation, 5 short written assignments in alternate weeks (ranging from 1 to 5 pages), and several 1-page peer critiques. For graduate students: weekly participation and 3-4 short written exercises that build toward a final 15-page research paper.

Prerequisites: No previous knowledge of Japanese art or culture is required. Students with similar preparation and interests will be paired with one another.

Enrollment Limit: 10
Enrollment Preferences: Graduate Art students, followed by undergraduates majoring in Art History or Comparative Literature.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

Writing Skills Notes: Students will write several regularly spaced papers that build on one another by tackling similar problems from different angles. Students will receive detailed feedback from the instructor on each paper, addressing argument, organization, and style, as well as peer feedback. (See requirements for details about the number and type of assignments.)

Not offered current academic year

ASIA 325 (S) The Arts of the Book in Asia (WS)

Cross-listings: ARTH 325 ASIA 325

Secondary Cross-listing

From palm leaf manuscripts to scrolls to Islamic codices, books have long served as vehicles of religious, cultural and artistic exchange in Asia. Owing to their portability and status as finely crafted art objects, books have transmitted ideas across the continent, spreading courtly styles of painting from China to India, esoteric Buddhist teachings from Kashmir to Tibet and Mongolia, as well as the Quranic arts of calligraphy and illumination from Islamic South Asia to Southeast Asia. This co-taught seminar will highlight the interwoven history of book arts as it developed and disseminated across different regions of Asia. The course will also introduce students to the major art forms of the book, such as painting, calligraphy and illumination. The aim of the seminar is to understand the book as object while also investigating its content and its larger cultural significance. A number of class meetings will take place in the Chapin Library, where students will have the opportunity to study original manuscripts from the Special Collections. The course will culminate in an exhibition at Chapin Library which the students will curate using the Special Collections holdings.

Requirements/Evaluation: 3 essays, a final project/paper based on museum objects, wall label

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: preference will be given to Art and Asian Studies Majors, and then to students of any major interested in the art and culture of Asia

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 325(D1) ASIA 325(D1)

Writing Skills Notes: Over the course of the semester students will write three papers at five pages each, culminating in a well-developed, focused final project. Students will be given extensive feedback on each assignment regarding grammar, style, and argument. The final paper will be part of a larger project in which students will work together to curate a small exhibition using the Chapin Library's Asian holdings. Each student will be asked to write a wall label for their selected object.

ASIA 345 (F) The Meaning of Life and Politics in Ancient Chinese Thought

Cross-listings: PSCI 345 ASIA 345

Secondary Cross-listing

How can we live a good life? What standards should we use to judge how political power is constituted and used? This class will involve students in close reading of, and exegetic writing about, core texts of ancient Chinese philosophy in English translation. The purpose is to gain an understanding of a number of different perspectives on life and politics, especially Confucianism, Legalism and Daoism. While the primary focus will be on the meaning of the texts in the context of their own times, contemporary applications of core concepts will also be considered. The class will begin with background readings, since no prior work in Chinese philosophy or history is assumed. Then the class will read significant portions of the following canonical works: Yi jing, Analects, Mencius, Daodejing, Zhuangzi, and Han Feizi.
Secondary Cross-listing

East is East, and West is West, Rudyard Kipling famously wrote in 1889, but never has this been true. Just as war, imperialism, and transnational flows of capital move people, cultures, and ideas across the Pacific, similar patterns of migration and mobility shape the transmission of illness and disease as well. This course explores global health and disease control as sites of domination and resistance in the Pacific Rim. Articulating the linkages between Asia/America, we will look at the racialization of people and pestilence during the third plague pandemic in Hong Kong and San Francisco, malaria control projects in colonial Southeast Asia, and the rise of modern genomics out of the ashes of Hiroshima and concern over radiation risk, and other cases, to understand how disregard for Asian bodies has shaped the development of modern medicine and public health. At the same time, Indonesia’s claim of "viral sovereignty" to protect their biological specimens from Western intellectual property regimes and Hmong refugees’ resistance to biomedical intervention in their struggles with mental illness offer counterpoints to Western hegemony. This course provides a critical examination of biosecurity as modern geopolitical struggle and puts Asia-Pacific and the Pacific Rim at the center of our exploration of global health.

Requirements/Evaluation: Reading responses, two short review essays, and one seminar paper

Prerequisites: Previous coursework in anthropology and sociology, some knowledge of the Asia-Pacific region.

Enrollment Limit: 12

Enrollment Preferences: Juniors and Seniors, STS concentrators. If overenrolled, students will submit a short paragraph explaining their interest in the course.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ASIA 353 (S) Separation: An Introduction to Postcolonial Literature (DPE)

Secondary Cross-listing

Few themes in the history of human societies have produced as much writing as that of separation--from a lover, from one's homeland, from God(s). In
the past two centuries, this theme has been essential to representing experiences of exile and migration in the wake of the colonially mediated transition to world capitalism. In this course, we will take up the theme of separation as a privileged point of entry into postcolonial literature and towards understanding the multiple meanings of "postcoloniality." We will encounter examples in which this theme shapes critical thought and helps imagine new modes of existence, as well as those in which the grief of separation shades into such overpowering melancholy that writing becomes impossible. We will also look at what the preoccupation with separation can tell us about the ways human beings relate to human and non-human objects, and how they make and experience history. To think through these issues, we will read nineteenth and twentieth century works dealing with experiences of love, ecstasy, migrancy, exile, and slavery, composed in diverse geographical, socio-political, and linguistic contexts. We will read works (novels, poems, memoirs, essays) and watch films from South Asia, Egypt, the Caribbean, the US, and Europe, composed in multiple languages (English, Hindi, Urdu, Persian, French, Arabic, Bengali and Malayalam).

Requirements/Evaluation: mid-term paper (6-page), participation in class discussions and one roundtable, final paper (15-page)
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 25
Enrollment Preferences: English majors, then sophomores considering the major
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
COMP 350(D1) ENGL 352(D1) ASIA 353(D1)
Difference, Power, and Equity Notes: This course examines how the political impact of colonization upon both "colonizer" and "colonized" gets expressed in literary productions of the nineteenth and the twentieth centuries. It explores the way these literary works understand the axes of social identity that shape oppression and inequity--coloniality, race, caste, gender--as constitutive of the unevenly developing world of capitalism. The concepts upon which the course focuses are essential to contemporary social critique.

ASIA 354 (F) Nationalism in East Asia
Cross-listings: PSCI 354 ASIA 354 HIST 318
Secondary Cross-listing
Nationalism is a major political issue in contemporary East Asia. From anti-Japanese demonstrations in China, to tensions on the Korea peninsula, to competitive elections in Taiwan, to controversies in Japan about how history is portrayed in high school textbooks, national identity is hotly debated and politically mobilized all across the region. This course begins with an examination of the general phenomena of nationalism and national identity and their historical development in East Asia. It then considers how nationalism is manifest in the contemporary politics and foreign relations of China, Japan, South Korea, North Korea and Taiwan.
Requirements/Evaluation: 2-3 short papers; final exam
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: in the following order, seniors, juniors, sophomores, then first-years

Democratization in South Asia

Democratization has had both successes and failures in postcolonial South Asia. The region is home to the world's largest democracy in India, often cited as an unlikely and puzzling success story. At the same time, periods of democratic rule in Pakistan and Bangladesh are broken up by military interference, Sri Lanka's democracy is plagued by ethnic conflict, and Afghanistan has been unable to sustain democracy due to weak state institutions. What explains this diverse and uneven pattern of democracy in South Asia? The course delves into theories on political parties, ethnic politics, electoral institutions, civil-military relations, political violence, state-building, inter-state conflict, and civil wars to understand the variation in regime type in the region. It covers domestic and international factors that lead to democratization and democratic backsliding. We will focus on the role of political parties in democratization; the emergence of political dynasties; changes in the characteristics of the political elite; investigate claims of democratic deepening; and examine the effect of inter-state wars, land disputes, and insurgencies on democratic stability in the region.

Requirements/Evaluation: three 5 to 7-page papers or one research paper; presentation; class participation

Prerequisites: previous course in political science or permission of the instructor

Enrollment Limit: 16

Enrollment Preferences: preference given to political science majors

Expected Class Size: 14

Grading:

Distributions: (D2)

The Vietnam Wars

This course explores Vietnam's twentieth century wars, including an anti-colonial war against France (1946-1954), a massive Cold War conflict involving the United States (1965-1973), and postcolonial confrontations with China and Cambodia in the late-1970s. Course materials will focus primarily on Vietnam's domestic politics and its relations with other countries. Lectures, readings, films, and discussions will explore the process by which Vietnam's anti-colonial struggle became one of the central conflicts of the Cold War, and examine the ramifications of that fact for all parties involved. The impact of these wars can hardly be overstated, as they affected the trajectory of French decolonization, altered America's domestic politics and foreign policy, invigorated anti-colonial movements across the Third World, and left Vietnam isolated in the international community. Students will read a number of scholarly texts, primary sources, memoirs, and novels to explore everything from high-level international diplomacy to personal experiences of conflict and dramatic social change wrought by decolonization and decades of warfare.

Requirements/Evaluation: class participation, several short papers, and a 10- to 12-page final paper

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: History and Asian Studies majors

Expected Class Size: 10-15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Secondary Cross-listing

What do Ibrahim Ben Yiju, a Jewish merchant from 11th century Yemen, Ibn Batutah, a Muslim scholar from 15th century Morocco and Captain Kidd, a 17th century English pirate have in common? All three men travelled and lived in the Indian Ocean region! This course explores the history of one of the world's oldest maritime highways that has connected the diverse cultures of Asia, Africa and Europe for millennia, thus making it a vital element in the birth of globalization. Moving away from conventional land-centric histories, we will focus instead on understanding the human past through oceanic interactions. South Asian ports and port cities remained the fulcrum of the Indian Ocean world throughout its history; traders, travellers, nobles, scholars, pilgrims and pirates from all over the world travelled to the Indian coast in search of adventure, spices, knowledge and wealth. Thus we will primarily focus on India's role in the Indian Ocean roughly from the rise of Islam in the seventh century CE through the expansion of various European communities in the region and the subsequent rise of the global economy and colonialism in the nineteenth century. Rather than following a strict temporal chronology we will concentrate on themes such as travel and adventure; trade and exchange; trust and friendship; religion and society; piracy; the culture of port cities; and food across time.

Requirements/Evaluation: class participation and weekly responses to readings, 4 short papers (4-5 pages), an oral presentation and final research (10 pages) paper based on any one of the 4 papers written during the course.

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: history majors and students with demonstrable interest in maritime/Indian Ocean history

Expected Class Size: 10-12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 391(D2) GBST 391(D2) HIST 391(D2)

Writing Skills Notes: Students will write 4 short papers (4-5 pages) each and receive detailed feedback from the instructor. One of the four papers will become the basis of a final research paper (10-12 pages) on which each student will work closely with the instructor and receive feedback on improving research and writing skills.

Difference, Power, and Equity Notes: This course questions the conventional view that global interconnectedness was the result of Europe's discovery of 'new worlds'. Instead, it centers non-European actors in facilitating global networks before colonialism. Throughout, students will critically engage questions of how Asian and African players forged and shaped global connections across the Indian Ocean arena and examine the ways in which these contributions have been overshadowed in traditional historiography.

ASIA 412 (F) Gandhi: History, Ideas and Legacy (WS)

Cross-listings: LEAD 322 ASIA 412 REL 412 HIST 496 GBST 412

Secondary Cross-listing

This course studies the life, work, and ideas of M.K. Gandhi (1869-1948), one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. This tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the context and nature of Gandhian nationalism? Did it help to integrate the Indian nation? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Requirements/Evaluation: 5-7-page essays or 2-page critique due each week and a final report (3-4 pages) at the end of the semester.
Prerequisites: None, except students who have taken HIST488T will not be permitted to take this class.

Enrollment Limit: 10

Enrollment Preferences: Senior history majors and students who have previously taken HIST221. Students who have previously taken HIST488T will not be permitted to take this class.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ASIA 416 (F) The Many Lives of Tokyo (WS)

Cross-listings: HIST 416 ASIA 416

Secondary Cross-listing

The city of Tokyo has had many lives from its early modern founding as the shogun’s capital of Edo to its contemporary incarnation as a global megacity. This seminar explores how and why the city has changed—how an unassuming fishing village was transformed over four centuries into a vibrant early modern city of over a million people, the heart of a modern nation and metropole of an expansive empire, an emblem of urban cosmopolitanism, and a sprawling metropolis. Our focus will be on how people have lived, conceived, and shaped Edo/Tokyo. We will consider how different and various people have moved through the city; where and how they have lived, worked, and enjoyed themselves; how they have interacted with the natural and built environments; and how they have expressed their discontents with, and aspirations for, the city. Topics to be examined include: physical expansion, urbanization, and suburbanization; destruction and reconstruction from fires, earthquakes, and war; cultivation of opportunities to consume; and creation of urban popular cultures. The centerpiece of the seminar is the research and writing of a substantial and original paper that delves into a question of interest to you about the history of Tokyo.

Requirements/Evaluation: class participation, discussion posts, response papers, and a research paper (20-25 pages)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History majors and Asian Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

ASIA 417 (F) The Treaty System and Treaty Ports of China, 1840-1945

Cross-listings: ASIA 417 HIST 417

Secondary Cross-listing
China in the nineteenth and early twentieth centuries was not colonized by a single Western power; instead several Western powers (and later Japan) exercised domination over China through a system of "unequal treaties" that granted them special privileges within Chinese territory. The years (1842-1943) in which these treaties were in effect is often called "The Century of Humiliation" by contemporary Chinese nationalists: a period of weakness that the rising Chinese nation still strives to overcome. The system imposed by these nineteenth century treaties, however, was a complex amalgam of legal, commercial, and residence privileges for foreigners in China that played a significant role in shaping the modern nation. One the most recognizable features of this system was the treaty port—an urban center designated as open to foreign residence, trade, and shipping. Extending from an initial five open ports to nearly fifty by the turn of the century, these ports became commercial and industrial centers that connected China to the global economy and created novel spaces of culture, labor, society, and politics. In this research seminar, we will use several recent online collections of English-language primary source material to investigate the role of the treaty system and the treaty ports in modern Chinese history. The seminar will begin with an exploration of the historiography of the treaty system and "foreign presence" and culminate in an original research paper on a related topic of each student's choice. Throughout, we will work on general and specific research methods.

Class Format: This is a research seminar. Our goal will be to produce a 20-30 page original research paper by the end of the semester. In addition to discussion of readings, considerable time in class will be spend on research methods.

Requirements/Evaluation: Active participation in class discussion and activities; several short papers (5-7 pages) leading to a final research paper (20-30 pages)

Prerequisites: no prerequisites

Enrollment Limit: 20

Enrollment Preferences: Senior History majors, History majors, Asian Studies concentrators

ASIA 425 (F) Becoming Taiwan: Social, Cultural, and Economic Discourses of Modern Day Taiwan

Cross-listings: CHIN 425 ASIA 425

Secondary Cross-listing

A small island in East Asia and home to 23 million people, Taiwan is the largest economy that is not a member of the United Nations. From 1949, when the Nationalist Party (KMT) retreated to Taiwan after the Chinese Civil War, to becoming one of the Four Asian Tigers in the latter half of the 20th century, Taiwan has developed into a multifaceted society through an array of social/cultural/economic changes associated with industrialization, globalization and identity formation. In this course, we will examine some of the signal examples of these experiences that define the Taiwan society that it is today through literary works and films, as well as journalistic and academic articles. By way of group discussions and individual projects, students will acquire domain-specific vocabulary and develop abilities to analyze and discuss in Mandarin complex ideas related to the aforementioned issues. Using a semi-tutorial format, this course is designed to develop linguistic proficiency at the levels of Advanced Low to Advanced Mid based on the ACTFL proficiency guidelines. Language partners will be arranged through collaboration with a graduate program in Chinese pedagogy in Taiwan for opportunities for in-depth discussions on course content.

Class Format: Mandarin Chinese will be the instructional language for this course. Semi-tutorial format, students will meet as a large group on one day for linguistic development and three to four people groups on other days for discussions.

Requirements/Evaluation: quizzes, presentations, posting of discussion questions, two position papers (3 pages) and one final paper (5 pages)

ASIA 470 The Indian Economy: Development and Social Justice
The Indian economy has (usually) grown rapidly in the last three decades, but poverty has declined relatively slowly, malnutrition remains high, and the sex ratio remains heavily biased against women. Is this the persistence of long-standing historical disadvantages such as those faced by Scheduled Castes and Tribes? Does this reflect failures in policy, in areas such as trade, credit, or labor law? Or is the quality of governance primarily to blame? We will use the theoretical and quantitative methods of an economist to consider these questions.

Requirements/Evaluation: Short response papers to assigned readings; classroom presentations/commentary on assigned readings; empirical research project; classroom presentation of empirical research project; participation in classroom discussion.

Prerequisites: ECON 251 and 255, or equivalent, or permission of instructor

ASIA 481 (F) History of Taiwan (WS)
Cross-listings: ASIA 481 HIST 481
Secondary Cross-listing
Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. We will also examine contemporary arguments for Taiwan as part of China. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

Requirements/Evaluation: weekly papers and critiques
Prerequisites: none
Enrollment Limit: 10
Enrollment Preferences: History and Asian Studies majors/concentrators

Not offered current academic year
How long will the Sun shine? How do we discover Earth-like planets among the many exoplanets circling other stars? How did the universe begin and how has it evolved over its 13.8-billion-year history? How do we detect not only light but also gravitational waves from afar? Astronomy is the science that asks and tries to answer questions like these. We have come a long way toward understanding what makes the sky appear as it does and how the Universe behaves. The Astronomy Department offers courses for anyone who is interested in learning about the Universe, and who would like to be able to follow new astronomical discoveries as they are made. All courses in Astronomy satisfy the Division III requirement. The Astronomy major and the Astrophysics major (administered jointly with the Physics Department) are described below.

The beginning astronomy courses are offered on two levels. Astronomy 101, 102, 104, and 330-range courses are intended primarily for non-science majors and have no prerequisite. Astronomy 111 is designed for students with some exposure to physics. It has a prerequisite of one year of high school physics or permission of the instructor, and a co-requisite of Mathematics 140 or equivalent background in calculus.

Most of the astronomy courses take advantage of our observational and computational facilities including a 24-inch computer-controlled telescope with sensitive electronic detectors, and our own computer network for image processing and data analysis. The Astronomy Department site can be found at astronomy.williams.edu.

ASTRONOMY MAJOR

The Astronomy major is designed for students with an interest in learning about many aspects of modern astronomy, but who do not choose to take the most advanced physics and math courses of the astrophysics major. It is also appropriate as a second major for students concentrating in another field; in particular, combining an Astronomy major with a related major like Geoscience or Computer Science has been a fruitful path for some of our students. The Astronomy major emphasizes understanding the observed properties of the physical systems that comprise the known Universe, from the Sun and solar system, to the evolution of stars and star clusters, to the Milky Way Galaxy, to external galaxies and clusters of galaxies.

Because some knowledge of physics and calculus is necessary to understand many astronomical phenomena, the Astronomy major requires the first two semesters each of the physics and calculus that are also required of Physics majors and Astrophysics majors.

There are several possible routes through the Astronomy major, depending on preparation and interest. Students considering a major in Astronomy should consult with members of the department early and often. A first-year student, if unsure about choosing between Astronomy and Astrophysics, may wish to take not only Astronomy 111 but also Physics 131, 141, or 151 and Mathematics 140 (if necessary) in the fall. Students who might place out of physics courses should read the section on placement under Physics.

Major Requirements for Astronomy

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond

Two 200-level Astronomy courses (or additional 400-level Astronomy courses as substitutes)

Two 400-level Astronomy courses

Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement

Physics 142 Foundations of Modern Physics or Physics 151 Seminar on Modern Physics

Mathematics 140 Calculus II

Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus OR equivalent placement

The total number of courses required for the Astronomy major is nine. A typical path through the major will begin with Physics 141, which is suitable for students with one year of high school physics and a background in calculus. However, students without high school physics may begin with Physics 131, and students entering with Advanced Placement in physics and/or math may obtain credit toward the major for the equivalent of Physics 142 and/or Mathematics 150 or 151 taken elsewhere. There are some aspects of astronomy that are closely related to chemistry or geosciences. In recognition of this, certain advanced courses in those departments can be accepted for credit toward the Astronomy major.
THE DEGREE WITH HONORS IN ASTRONOMY

The honors degree in Astronomy will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astronomy 493) and the winter study project (Astronomy 031). At the end of the winter study period, the department will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

ASTROPHYSICS MAJOR

The Astrophysics major is designed for students who want a rigorous introduction to the field, and includes not only those who plan graduate study in astronomy, astrophysics, or a closely related area, but also those interested in a wide variety of careers. Astrophysics alumni are not only astronomers but also computer scientists, geologists, teachers, doctors, lawyers, business school professors, and so on. In recent years, many astrophysics majors have had a second major in fields as wide ranging as mathematics, computer science, geosciences, economics, English, and art history. This major emphasizes the description of the Universe and its constituents in terms of physical processes. Potential Astrophysics majors should consult early with members of the Astronomy and Physics Departments to determine their most appropriate route through the major. An essential ingredient in such students’ undergraduate training is experience in physics and mathematics. Therefore, the major normally will begin in the first year a student is at Williams with Physics 131, 141, or 151 and Mathematics 140 or 150 or 151 in the fall. Physics 141 is recommended for students with one year of high school physics and a background in calculus. Students with very good background placing them out of Physics 142 and out of Mathematics 140 may choose to take Physics 201 and Mathematics 150 or 151 instead. Astronomy 111 will often be taken in the fall of the sophomore year; however, many students take it in the fall of their first year at Williams, along with physics and math. Students who might place out of physics courses should read the section on placement under Physics; those who place out of Physics 131 or 141 into Physics 142 or 151 should particularly consider taking Astronomy 111 in the fall of their first year.

In addition to the major courses described below, other courses in geosciences, mathematics, and computer science may also be appropriate.

Major Requirements for Astrophysics

- Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond
- Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement
- Physics 142 Foundations of Modern Physics OR Physics 151 Seminar on Modern Physics
- Physics 201 Electricity and Magnetism
- Physics 202 Waves and Optics
- Physics/Mathematics 210 Mathematical Methods for Scientists
- Physics 301 Introductory Quantum Physics
- Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus
- Three 400-level astronomy courses OR two 400-level astronomy courses and one of the following:
  - Astronomy 211 Astronomical Observing and Data Analysis
  - Physics 302 Statistical Physics
  - Physics 402T Applications of Quantum Mechanics
  - Physics 405T Electromagnetic Theory
The total number of courses required for the Astrophysics major, an interdisciplinary major, is eleven. Students entering with Advanced Placement in physics and/or mathematics may obtain credit toward the major for the equivalent of Physics 141 and/or Mathematics 140 and/or 150 or 151 taken elsewhere, but at least 8 courses in astronomy, physics, and mathematics must be taken at Williams. There are some aspects of astrophysics that are closely related to chemistry or geosciences. In recognition of this relation, certain advanced courses in those departments can be accepted for credit toward the Astrophysics major on a two-for-one basis. It is not possible to double major in Astrophysics and Physics.

**THE DEGREE WITH HONORS IN ASTROPHYSICS**

The honors degree in Astrophysics will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy or Physics. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astrophysics 493) and the winter study project (Astrophysics 031). At the end of the winter study period, the departments will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The departments will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chairs as early as possible.

**STUDY ABROAD**

**FAQ**

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. PHYS 301, a required course for the Astrophysics major, is only taught in the fall, and is difficult to replicate abroad, especially regarding the lab component.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.
ASTR 101  (F)  Stars: From Suns to Black Holes

Looking at the Sun and the sky at night have you ever wondered why they are shining and what they are made of? Do they evolve and if so how do they change? The last decade has brought exciting new astronomical discoveries. For the first time a gravitational wave signal produced by merging of two black holes has been detected. The gravitational wave antennas detected the merger of two neutron stars which also caused flashes throughout the whole electromagnetic spectrum from radio waves to very energetic gamma rays. We now know that most of the heavy elements that exist in nature were formed during mergers of neutron stars. Large telescopes, new detectors, and new observational techniques have also made possible the discovery of thousands of exoplanets. The recently launched James Webb telescope is discovering galaxies that were formed soon after the Big Bang and is observing atmospheres of exoplanets to search for possible signs of life. Here on Earth, there is soon to be total solar eclipse that will be visible in the Southern and North-Eastern parts of the US on April 8, 2024. In this course, to help you appreciate and better understand the continuous stream of astronomical discoveries, we will discuss the basic methods and instruments used in astronomical observations, but also discuss what is happening at the centers of stars and how they evolve and why some stars explode and form neutron stars and black holes.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester.

Requirements/Evaluation: two hour tests, a final exam, an observing portfolio, and lab reports

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first enrolled

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course

Distributions: (D3)

LAB Section: 05  W 2:30 pm - 4:00 pm  Kevin Flaherty

ASTR 102  (S)  Our Solar System and Others

What makes Earth different from all the other planets? What have NASA's Curiosity and Perseverance on Mars (with their alumni/ae participation!) found about that planet’s past running water and suitability for life? How has knowledge about Pluto and Arrokoth beyond it been transformed by NASA's flybys and the associated ground-based studies with which Williams College faculty and students participated? Will asteroids or comets collide with the Earth again? What is a solar eclipse like and how do we prepare for the April 8, 2024, totality? What do we learn from the rare transits of Mercury and of Venus that Williams faculty and students have studied? What may the new James Webb Space Telescope reveal about exoplanets and their atmospheres? Astronomy 102, a non-major, general introduction to the part of contemporary astronomy that comprises the study of the solar system (and the systems of planets around other stars), will provide answers to these questions and more. We will cover the historical development of humanity's understanding of the solar system, examining contributions by Aristotle, Ptolemy, Copernicus, Galileo, Kepler, Newton, Einstein, and others. We will discuss the discovery of over 4000 exoplanets around stars other than the Sun. The course gives special attention to exciting discoveries of the past few years by space probes and by the Hubble Space Telescope and the Kepler/K2/TESS missions, as well as plans and hopes for NASA's James Webb Space Telescope (which launched in December 2021). We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 101 (stars and stellar evolution) and 104 (galaxies and cosmology), and students who have taken those courses are welcome.

Class Format: lecture (three hours per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration.. Planetarium and Roof-Observing TAs will be available for consultation, in addition to the instructors, throughout the semester.
ASTR 104  (S)  The Milky Way Galaxy and the Universe Beyond

How was the Universe created, and how has it evolved to its presently observed structure? This course will start at the Big Bang, the beginning of everything, and move forward from there. About five centuries ago Galileo Galilei used his own primitive telescope to make many astronomical discoveries: observing the moons of the Jupiter, craters on the Moon, and Sun spots to name a few. Galileo also noticed that stars are not spread on the celestial sphere at random but form a disk like structure, which we now call the Milky Way Galaxy -- our cosmic home. Almost a hundred years ago Edwin Hubble discovered that the Universe contains many galaxies and that they are moving away from each other. Hubble discovered that the Universe -- the largest physical object -- expands, so it had a beginning. In this course we will explore the tools and techniques that astronomers use to study stars and galaxies. From the discovery of the Milky Way to the expanding Universe, we will cover the key concepts and discoveries that have shaped our understanding of the cosmos. During recent decades astronomers have made exciting -- and unsettling -- new discoveries: it turns out that most of matter in the Universe does not emit light and most probably is composed of particles of unknown origin, and that the expansion of the Universe is now accelerating, pushed by a mysterious dark energy. At this point, astronomers have evidence to show that at early epochs the Universe was very dense and very hot. This early epoch is called the Big Bang. How the Big Bang happened is not known yet but there are several interesting hypotheses that our Universe could be one of many. This course will introduce important highlights in the observation and interpretation of remarkable astronomical phenomena and explore these many mysteries.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester. Current astronomical discoveries will be discussed at the beginning of each class and by email throughout the semester.

Requirements/Evaluation:  two hour tests, a final exam, lab reports, and an observing portfolio
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: first-years
Expected Class Size: 15
Grading: yes pass/fail option, no fifth course option
Unit Notes: non-major course
Distributions: (D3)
Astrobiology is the study of the origin, evolution, and distribution of life in the universe. As such it is an inherently interdisciplinary field, incorporating all of the basic natural sciences: biology, chemistry, physics, astronomy, and the earth sciences, as well as aspects of philosophy, sociology, and engineering. Questions we will seek answers to in this class include: How, why, when, and where did life evolve on Earth, and what does that tell us about how it might evolve elsewhere? What are the chances that there is life on other planets and moons in our solar system, and why? Are there habitable planets elsewhere in the universe, and will we ever truly know if any of them contain life? We will approach these questions using a combination of lectures, activities, labs, homework assignments, and visits from some of the country's leading Astrobiology researchers. Examples of lab and homework activities include exploring our definition of life by making observations about living and non-living systems, examining evidence for ancient habitable environments in rocks, and modeling chemical fingerprinting tools used by Mars rovers. Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will present a mock NASA mission proposal. This course requires no previous experience in the sciences. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** Lectures will be partially flipped with student responsible for watching videos before class; class time will be split between short lectures, small group activities, and class discussions. Lab groups will meet in person every other week and have group project work on alternate weeks that may be done virtually or in person.

**Requirements/Evaluation:** Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will present a mock NASA mission proposal.

**Prerequisites:** none

**Enrollment Limit:** 46

**Enrollment Preferences:** first year and second year students, Geosciences majors

**Expected Class Size:** 46

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** This course counts towards the GEOS Group B Electives - Sediments and Life

**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 107(D3) ASTR 107(D3)

**Attributes:** GEOS Group B Electives - Sediments + Life

Not offered current academic year

**ASTR 111 (F) Introduction to Astrophysics** (QFR)

The science of astronomy spans vast scales of space and time, from individual atoms to entire galaxies and from the universe's beginning to the future fate of our Sun. In this course, we will survey some of the main ideas in modern astrophysics, with an emphasis on the physics of stars and galaxies. ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the other sciences or mathematics and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include gravity and orbits, radiation laws and stellar spectra, physical characteristics of the Sun and other stars, star formation and evolution, black holes, galaxies, the expanding universe, and the Big Bang. Students will also use telescopes to observe stars, nebulae, planets, and galaxies and to make daytime observations of the Sun.

**Class Format:** The class has 6 afternoon labs. Nighttime observing sessions will occur throughout the semester.

**Requirements/Evaluation:** weekly problem sets, two hour-long tests, a final exam, lab reports, and an observing portfolio

**Prerequisites:** a year of high school Physics, concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

**Enrollment Limit:** 28

**Enrollment Preferences:** potential Astronomy majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** The course requires regular problem sets and quantitative assignments. The course will emphasize how physical equations explain the observed properties of the universe.

---

Fall 2023
ASTR 211 (S) Astronomical Observing and Data Analysis (QFR)
How do astronomers make scientific measurements for objects that are light-years away from Earth? This course will introduce the basics of telescopes and observations and will give students hands-on training in the techniques astronomers use to obtain, process, and analyze scientific data. We will discuss observation planning, CCD detectors, signal statistics, image processing, and photometric and spectroscopic observations. We will begin by focusing on ground-based optical observations and will move on to non-optical observations, both electromagnetic (e.g., radio waves, X-rays) and non-electromagnetic (e.g., gravitational waves, neutrinos). Throughout the course, students will use computational techniques to work with real astronomical data, taken with our 24" telescope and from data archives.

Class Format: discussion, computer lab work, and observing
Requirements/Evaluation: weekly problem sets, lab work, and observing projects
Prerequisites: MATH 150 or 151; prior experience with Unix and computer programming is helpful, but not required
Enrollment Limit: 14
Enrollment Preferences: Astronomy or Astrophysics majors
Expected Class Size: 8
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: The course requires regular problem sets. Labs require computer programming and statistical and graphical analyses of data.

Spring 2024
LEC Section: 01 MR 1:10 pm - 2:25 pm Anne Jaskot
LAB Section: 02 W 1:10 pm - 3:50 pm Kevin Flaherty

ASTR 240 (F) Great Astronomers and Their Original Publications (WS)
Cross-listings: STS 240 ASTR 240 LEAD 240
Primary Cross-listing
In this course we will study some of the greatest figures in astronomy and consider their leadership in advancing progress in the field. We will consider their lives and works, especially as represented by original copies of their books and other publications. These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; Dialogo, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619, Rudolphine Tables 1627); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (Principia Mathematica: laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (Miscellanea curiosa, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); George Ellery Hale (Mt. Wilson Observatory 100" telescope, 1917; Palomar Observatory 200" telescope, 1948), Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe's expansion rate, 2000s). First editions will be available in Williams' Chapin Library of rare books, where we will meet in an adjacent classroom. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the Gutenberg Bible (c. 1453) and a Shakespeare First Folio (1623, with a discussion of astronomical references in Shakespeare's plays). The course will be taught in collaboration between an astronomer and a rare-books librarian, with remote lectures by experts from around the world.

Class Format: Meeting on campus in the Chapin Library classroom (Sawyer 452)
Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper; student choice of additional readings from a provided reading list
Prerequisites: none
Enrollment Limit: 12

Enrollment Preferences: if overenrolled, preference by written paragraph of explanation of why student wants to take the course

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

STS 240(D3) ASTR 240(D3) LEAD 240(D3)

Writing Skills Notes: Comments on submitted papers will aid in writing skills

Attributes: LEAD Facets or Domains of Leadership

Not offered current academic year

ASTR 317 (S)  **Current topics in Planetary Geology**  (WS)

Cross-listings: ASTR 317 GEOS 317

Secondary Cross-listing

We will look in detail at geological processes on rocky and icy bodies of the Solar System. Each week will have a specific theme, and students will read a series of scientific articles on that topic. The readings will form the basis for writing and discussion. Areas to be investigated may include ice ages on Mars, the origin of Earth’s moon, tectonics on Venus, chaos terrain on Europa, geysers on Enceladus, cryovolcanism on Triton, methane lakes on Titan, the viability of mining in the Asteroid Belt, and the prospects for life on other worlds. This course is in the Solid Earth group for the Geosciences major.

Class Format: Students meet with the professor weekly, in pairs, with one student writing each week and the other critiquing; and both engaging in detailed discussion of the readings.

Requirements/Evaluation: Evaluation is based on written papers, critiques, and discussion.

Prerequisites: GEOS/ASTR 217 (Planets and Moons); OR any two courses at 200-level or higher in Geosciences and/or Astronomy; OR permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences and Astronomy majors and prospective majors

Expected Class Size: 6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ASTR 317(D3) GEOS 317(D3)

Writing Skills Notes: This tutorial-style course focuses on writing, with 6 papers (5-7 pages) written bi-weekly throughout the semester, and partner critiques in alternate weeks.

Attributes: GEOS Group C Electives - Solid Earth

Not offered current academic year

ASTR 330 (S) **The Nature of the Universe**

This course is a journey through space and time from the first fractions of a second after the Big Bang to the ultimate fate of the Universe billions of years into the future. Topics include the Big Bang and its remnant cosmic background radiation, cosmic inflation, conditions during the first three minutes, creation of the elements, stellar and galactic black holes, relativity, the detection of gravitational waves, galaxies and quasars, dark matter, and the formation of the large-scale structure of the Universe. We will explore current ideas about the fate of our Universe, including the acceleration of its expansion, and its implications for the end of time. Finally, we will consider the fantastic but serious theoretical proposal that ours is but one of countless universes existing within a **multiverse**.

Class Format: lecture/discussion, three hours per week

Requirements/Evaluation: two midterm exams, a small observing portfolio, occasional quizzes, and a final exam

Prerequisites: none
Enrollment Limit: 48
Enrollment Preferences: open only to juniors and seniors; closed to students who have taken or are taking ASTR 104, and closed to ASTR, ASPH, and PHYS majors; preference given to seniors
Expected Class Size: 25
Grading: yes pass/fail option, no fifth course option
Unit Notes: non-major course; course in the 33X sequence are meant as general education courses for students in all majors
Distributions: (D3)
Not offered current academic year

ASTR 402  (F)  Between the Stars: The Interstellar Medium  (QFR)
The matter between the stars—the interstellar medium—tells the story of the evolution of galaxies and the stars within them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject as they evolve, and to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars' nuclear fusion. Interpreting the emission from this interstellar gas is one of astronomers' most powerful tools to measure the physical conditions, motions, and composition of our own galaxy and others. In this course we will study the interstellar medium in its various forms, from cold, dense, star-forming molecular clouds to X-ray-emitting bubbles formed by supernovae. We will learn about the physical mechanisms that produce the radiation we observe, including radiative ionization and recombination, collisional excitation of "forbidden" lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. Finally, we will discuss the evolution of interstellar material in galaxies across cosmic time. This course is observing-intensive. Throughout the semester, students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium taken using the rooftop telescope.
Class Format: Tutorial meetings will be scheduled with the professor. Students will also complete observing projects using the rooftop telescope.
Requirements/Evaluation: weekly problem sets, 10-page final paper, and observing projects
Prerequisites: ASTR 111 and PHYS 201 or permission of instructor

ASTR 404  (S)  Unsolved Problems in Galaxy Evolution
In this tutorial, we will learn about galaxies and their evolution by focusing on some of the key mysteries astronomers are trying to solve. Questions may include: How do galaxies turn their gas supply into stars? Is there a universal initial mass function for star formation? What is the origin of multiple stellar populations in globular clusters? Why do some galaxies cease star formation? Which galaxies reionized the universe? We will discuss the nature of each unsolved problem, debate the theories proposed to answer it, and consider how future progress might be made.
Requirements/Evaluation: student's papers, responses to the partner's papers, and problem sets
Prerequisites: ASTR 111 and PHYS 142 or 151 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Juniors and Seniors
Expected Class Size: 6
Grading:  no pass/fail option,  no fifth course option
A star is a very interesting, very complicated physical object. Properties of stars and their evolutionary paths depend on an intricate interplay of different physical phenomena with gravity, nuclear interactions, radiation processes and even quantum and relativistic effects playing important roles. Using basic physics we will construct simple models of stars and discuss their evolution, concentrating on the key physical processes that play the dominant role at different evolutionary stages. We will discuss late stages of stellar evolution and concentrate on the basic properties of three possible remnants: white dwarfs, neutron stars and black holes. Radio and X-ray pulsars, supernovae including Type Ia and Gamma Ray Bursts will be discussed as well as observational confirmation of existence of black holes. We will explore extreme conditions existing near neutron stars and black holes and discuss their astrophysical consequences. We will also discuss the recent exciting detection of gravitational waves by the LIGO/VIRGO laser interferometric detectors.

Class Format: discussion three hours per week
Requirements/Evaluation: classroom participation, homework assignments, a midterm exam and a final exam
Prerequisites: PHYS 201 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: physics, astrophysics, and astronomy majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

Astronomy/Astrophysics independent study, directed by one of the Astronomy faculty: Pasachoff/Jaskot/Flaherty

**Requirements/Evaluation:** Regular work with the instructor; submitted presentations and papers as agreed upon

**Prerequisites:** suitable Astronomy/Astrophysics/Physics/Math-Stats-Geosciences/Chemistry courses

**Enrollment Limit:** 10

**Enrollment Preferences:** research topic

**Expected Class Size:** 5

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** Substantial quantitative and formal reasoning are involved

**Spring 2024**

IND Section: 01   TBA     Protik K. Majumder

**ASTR 499 (F)(S) Physics and Astronomy Colloquium**

**Cross-listings:** ASTR 499 PHYS 499

**Secondary Cross-listing**
Physicists and Astronomers from around the country come to explain their research. Students of Physics and Astronomy at any level are welcome. Registration is not necessary to attend. A non-credit course.

Class Format: colloquium

Requirements/Evaluation: not a for-credit course

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Grading: non-graded

Unit Notes: registration not necessary to attend

Distributions: No divisional credit

This course is cross-listed and the prefixes carry the following divisional credit:

ASTR 499 No divisional credit
PHYS 499 No divisional credit

Fall 2023
LEC Section: 01    F 2:35 pm - 3:50 pm     David R. Tucker-Smith

Spring 2024
LEC Section: 01    F 2:35 pm - 3:50 pm     David R. Tucker-Smith

Winter Study  

ASTR 16 (W) An infinity of worlds: planets and the search for life in the universe

Less than a generation ago, we wondered, as we had for millions of years before, whether there were any other planets at all. Now, we are privileged to be in the first generation of humans to know that many of the points of light dusting our night sky are host to orbiting worlds, some of which may be like our Earth. In this course, we will explore the techniques that are being used to discover these new worlds. We will make our own contributions to this great age of discovery, by using NASA spacecraft data to search for new planets. This course, aimed at non-majors, will deal with the science of planet hunting, the astounding diversity of planets known to exist, the emerging science of astrobiology, and the enduring question of "are we alone?" through works of science fiction and cutting-edge research. Coursework will consist of readings from popular science books aimed at a general audience, science-fiction short stories, and excerpts from science-fiction novels, in addition to 1-2 relevant feature films. The primary mode of instruction will be 6 hours per week of in-person class meetings including lectures, small-group activities, and optional evening observing sessions at the rooftop telescope (weather permitting). Evaluation will be based on a final 10-page paper, the topic and format of which is extremely broad.

Requirements/Evaluation: Paper(s) or report(s)

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: If overenrolled, preference will be given to first years and sophomores. I am willing to open a second section if enrollment numbers permit.

Expected Class Size: NA

Grading: pass/fail only

Unit Notes: Rob Wittenmyer ’98 is Professor of astrophysics at the University of Southern Queensland in Australia. He is a veteran planet hunter with more than 100 published planet discoveries.

Attributes: STUX Winter Study Student Exploration

Not offered current academic year

ASTR 31 (W) Senior Research: Astronomy

To be taken by students registered for Astronomy 493, 494.

Grading: pass/fail only

Not offered current academic year
**ASTR 32 (W) Senior Research: Astrophysics**

To be taken by students registered for Astrophysics 495, 496.

**Class Format:** independent study

**Grading:** pass/fail only

Not offered current academic year

---

**ASTR 99 (W) Independent Study: Astronomy or Astrophysics**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Grading:** pass/fail only

Not offered current academic year
How long will the Sun shine? How do we discover Earth-like planets among the many exoplanets circling other stars? How did the universe begin and how has it evolved over its 13.8-billion-year history? How do we detect not only light but also gravitational waves from afar? Astronomy is the science that asks and tries to answer questions like these. We have come a long way toward understanding what makes the sky appear as it does and how the Universe behaves. The Astronomy Department offers courses for anyone who is interested in learning about the Universe, and who would like to be able to follow new astronomical discoveries as they are made. All courses in Astronomy satisfy the Division III requirement. The Astronomy major and the Astrophysics major (administered jointly with the Physics Department) are described below.

The beginning astronomy courses are offered on two levels. Astronomy 101, 102, 104, and 330-range courses are intended primarily for non-science majors and have no prerequisite. Astronomy 111 is designed for students with some exposure to physics. It has a prerequisite of one year of high school physics or permission of the instructor, and a co-requisite of Mathematics 140 or equivalent background in calculus.

Most of the astronomy courses take advantage of our observational and computational facilities including a 24-inch computer-controlled telescope with sensitive electronic detectors, and our own computer network for image processing and data analysis. The Astronomy Department site can be found at astronomy.williams.edu.

ASTRONOMY MAJOR

The Astronomy major is designed for students with an interest in learning about many aspects of modern astronomy, but who do not choose to take the most advanced physics and math courses of the astrophysics major. It is also appropriate as a second major for students concentrating in another field; in particular, combining an Astronomy major with a related major like Geoscience or Computer Science has been a fruitful path for some of our students. The Astronomy major emphasizes understanding the observed properties of the physical systems that comprise the known Universe, from the Sun and solar system, to the evolution of stars and star clusters, to the Milky Way Galaxy, to external galaxies and clusters of galaxies. Because some knowledge of physics and calculus is necessary to understand many astronomical phenomena, the Astronomy major requires the first two semesters each of the physics and calculus that are also required of Physics majors and Astrophysics majors.

There are several possible routes through the Astronomy major, depending on preparation and interest. Students considering a major in Astronomy should consult with members of the department early and often. A first-year student, if unsure about choosing between Astronomy and Astrophysics, may wish to take not only Astronomy 111 but also Physics 131, 141, or 151 and Mathematics 140 (if necessary) in the fall. Students who might place out of physics courses should read the section on placement under Physics.

Major Requirements for Astronomy

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond

Two 200-level Astronomy courses (or additional 400-level Astronomy courses as substitutes)

Two 400-level Astronomy courses

Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement

Physics 142 Foundations of Modern Physics or Physics 151 Seminar on Modern Physics

Mathematics 140 Calculus II

Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus OR equivalent placement

The total number of courses required for the Astronomy major is nine. A typical path through the major will begin with Physics 141, which is suitable for students with one year of high school physics and a background in calculus. However, students without high school physics may begin with Physics 131, and students entering with Advanced Placement in physics and/or math may obtain credit toward the major for the equivalent of Physics 142 and/or Mathematics 150 or 151 taken elsewhere. There are some aspects of astronomy that are closely related to chemistry or geosciences. In recognition of this, certain advanced courses in those departments can be accepted for credit toward the Astronomy major.
THE DEGREE WITH HONORS IN ASTRONOMY

The honors degree in Astronomy will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astronomy 493) and the winter study project (Astronomy 031). At the end of the winter study period, the department will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

ASTROPHYSICS MAJOR

The Astrophysics major is designed for students who want a rigorous introduction to the field, and includes not only those who plan graduate study in astronomy, astrophysics, or a closely related area, but also those interested in a wide variety of careers. Astrophysics alumni are not only astronomers but also computer scientists, geologists, teachers, doctors, lawyers, business school professors, and so on. In recent years, many astrophysics majors have had a second major in fields as wide ranging as mathematics, computer science, geosciences, economics, English, and art history. This major emphasizes the description of the Universe and its constituents in terms of physical processes. Potential Astrophysics majors should consult early with members of the Astronomy and Physics Departments to determine their most appropriate route through the major. An essential ingredient in such students’ undergraduate training is experience in physics and mathematics. Therefore, the major normally will begin in the first year a student is at Williams with Physics 131, 141, or 151 and Mathematics 140 or 150 or 151 in the fall. Physics 141 is recommended for students with one year of high school physics and a background in calculus. Students with very good background placing them out of Physics 142 and out of Mathematics 140 may choose to take Physics 201 and Mathematics 150 or 151 instead. Astronomy 111 will often be taken in the fall of the sophomore year; however, many students take it in the fall of their first year at Williams, along with physics and math. Students who might place out of physics courses should read the section on placement under Physics; those who place out of Physics 131 or 141 into Physics 142 or 151 should particularly consider taking Astronomy 111 in the fall of their first year.

In addition to the major courses described below, other courses in geosciences, mathematics, and computer science may also be appropriate.

Major Requirements for Astrophysics

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond

Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement

Physics 142 Foundations of Modern Physics OR Physics 151 Seminar on Modern Physics

Physics 201 Electricity and Magnetism

Physics 202 Waves and Optics

Physics/Mathematics 210 Mathematical Methods for Scientists

Physics 301 Introductory Quantum Physics

Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus

Three 400-level astronomy courses OR two 400-level astronomy courses and one of the following:

Astronomy 211 Astronomical Observing and Data Analysis

Physics 302 Statistical Physics

Physics 402T Applications of Quantum Mechanics

Physics 405T Electromagnetic Theory
The total number of courses required for the Astrophysics major, an interdisciplinary major, is eleven. Students entering with Advanced Placement in physics and/or mathematics may obtain credit toward the major for the equivalent of Physics 141 and/or Mathematics 140 and/or 150 or 151 taken elsewhere, but at least 8 courses in astronomy, physics, and mathematics must be taken at Williams. There are some aspects of astrophysics that are closely related to chemistry or geosciences. In recognition of this relation, certain advanced courses in those departments can be accepted for credit toward the Astrophysics major on a two-for-one basis. It is not possible to double major in Astrophysics and Physics.

**THE DEGREE WITH HONORS IN ASTROPHYSICS**

The honors degree in Astrophysics will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy or Physics. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astrophysics 493) and the winter study project (Astrophysics 031). At the end of the winter study period, the departments will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The departments will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chairs as early as possible.

**STUDY ABROAD FAQ**

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

**Can your department or program typically pre-approve courses for major/concentration credit?**

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

**What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?**

Course title and description, and complete syllabus including readings/assignments.

**Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?**

No.

**Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?**

No.

**Are there specific major requirements that cannot be fulfilled while on study away?**

No.

**Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)**

Yes. PHYS 301, a required course for the Astrophysics major, is only taught in the fall, and is difficult to replicate abroad, especially regarding the lab component.

**Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:**

None to date.
ASTR 101  (F)  Stars: From Suns to Black Holes

Looking at the Sun and the sky at night have you ever wondered why they are shining and what they are made of? Do they evolve and if so how do they change? The last decade has brought exciting new astronomical discoveries. For the first time a gravitational wave signal produced by merging of two black holes has been detected. The gravitational wave antennas detected the merger of two neutron stars which also caused flashes throughout the whole electromagnetic spectrum from radio waves to very energetic gamma rays. We now know that most of the heavy elements that exist in nature were formed during mergers of neutron stars. Large telescopes, new detectors, and new observational techniques have also made possible the discovery of thousands of exoplanets. The recently launched James Webb telescope is discovering galaxies that were formed soon after the Big Bang and is observing atmospheres of exoplanets to search for possible signs of life. Here on Earth, there is soon to be total solar eclipse that will be visible in the Southern and North-Eastern parts of the US on April 8, 2024. In this course, to help you appreciate and better understand the continuous stream of astronomical discoveries, we will discuss the basic methods and instruments used in astronomical observations, but also discuss what is happening at the centers of stars and how they evolve and why some stars explode and form neutron stars and black holes.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester.

Requirements/Evaluation: two hour tests, a final exam, an observing portfolio, and lab reports

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first enrolled

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course

Distributions: (D3)

Fall 2023

LAB Section: 03 T 2:30 pm - 4:00 pm Kevin Flaherty
LAB Section: 04 W 1:00 pm - 2:30 pm Kevin Flaherty
LAB Section: 05 W 2:30 pm - 4:00 pm Kevin Flaherty

ASTR 102  (S)  Our Solar System and Others

What makes Earth different from all the other planets? What have NASA's Curiosity and Perseverance on Mars (with their alumni/ae participation!) found about that planet's past running water and suitability for life? How has knowledge about Pluto and Arrokoth beyond it been transformed by NASA's flybys and the associated ground-based studies with which Williams College faculty and students participated? Will asteroids or comets collide with the Earth again? What is a solar eclipse like and how do we prepare for the April 8, 2024, totality? What do we learn from the rare transits of Mercury and of Venus that Williams faculty and students have studied? What may the new James Webb Space Telescope reveal about exoplanets and their atmospheres? Astronomy 102, a non-major, general introduction to the part of contemporary astronomy that comprises the study of the solar system (and the systems of planets around other stars), will provide answers to these questions and more. We will cover the historical development of humanity's understanding of the solar system, examining contributions by Aristotle, Ptolemy, Copernicus, Galileo, Kepler, Newton, Einstein, and others. We will discuss the discovery of over 4000 exoplanets around stars other than the Sun. The course gives special attention to exciting discoveries of the past few years by space probes and by the Hubble Space Telescope and the Kepler/K2/TESS missions, as well as plans and hopes for NASA's James Webb Space Telescope (which launched in December 2021). We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 101 (stars and stellar evolution) and 104 (galaxies and cosmology), and students who have taken those courses are welcome.

Class Format: lecture (three hours per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration.. Planetarium and Roof-Observing TAs will be available for consultation, in addition to the instructors, throughout the semester.
ASTR 104  (S)  The Milky Way Galaxy and the Universe Beyond

How was the Universe created, and how has it evolved to its presently observed structure? This course will start at the Big Bang, the beginning of everything, and move forward from there. About five centuries ago Galileo Galilei used his own primitive telescope to make many astronomical discoveries: observing the moons of the Jupiter, craters on the Moon, and Sun spots to name a few. Galileo also noticed that stars are not spread on the celestial sphere at random but form a disk-like structure, which we now call the Milky Way Galaxy -- our cosmic home. Almost a hundred years ago Edwin Hubble discovered that the Universe contains many galaxies and that they are moving away from each other. Hubble discovered that the Universe -- the largest physical object -- expands, so it had a beginning. In this course we will explore the tools and techniques that astronomers use to study stars and galaxies. From the discovery of the Milky Way to the expanding Universe, we will cover the key concepts and discoveries that have shaped our understanding of the cosmos. During recent decades astronomers have made exciting -- and unsettling -- new discoveries: it turns out that most of matter in the Universe does not emit light and most probably is composed of particles of unknown origin, and that the expansion of the Universe is now accelerating, pushed by a mysterious dark energy. At this point, astronomers have evidence to show that at early epochs the Universe was very dense and very hot. This early epoch is called the Big Bang. How the Big Bang happened is not known yet but there are several interesting hypotheses that our Universe could be one of many. This course will introduce important highlights in the observation and interpretation of remarkable astronomical phenomena and explore these many mysteries.

Class Format: lecture (two sessions per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration. Planetarium and Roof-Observatory TAs will be available for consultation, in addition to the instructors, throughout the semester. Current astronomical discoveries will be discussed at the beginning of each class and by email throughout the semester.

ASTR 107  (F)  Astrobiology

Cross-listings: GEOS 107 ASTR 107

Spring 2024

LEC Section: 01  TR 9:55 am - 11:10 am  Marek Demianski
LAB Section: 02  T 1:00 pm - 2:30 pm  Kevin Flaherty
LAB Section: 03  T 2:30 pm - 4:00 pm  Kevin Flaherty
LAB Section: 04  W 1:00 pm - 2:30 pm  Kevin Flaherty
LAB Section: 05  W 2:30 pm - 4:00 pm  Kevin Flaherty

Secondary Cross-listing
Astrobiology is the study of the origin, evolution, and distribution of life in the universe. As such it is an inherently interdisciplinary field, incorporating all of the basic natural sciences: biology, chemistry, physics, astronomy, and the earth sciences, as well as aspects of philosophy, sociology, and engineering. Questions we will seek answers to in this class include: How, why, when, and where did life evolve on Earth, and what does that tell us about how it might evolve elsewhere? What are the chances that there is life on other planets and moons in our solar system, and why? Are there habitable planets elsewhere in the universe, and will we ever truly know if any of them contain life? We will approach these questions using a combination of lectures, activities, labs, homework assignments, and visits from some of the country’s leading Astrobiology researchers. Examples of lab and homework activities include exploring our definition of life by making observations about living and non-living systems, examining evidence for ancient habitable environments in rocks, and modeling chemical fingerprinting tools used by Mars rovers. Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will present a mock NASA mission proposal. This course requires no previous experience in the sciences. This course is in the Sediments and Life group for the Geosciences major.

Class Format: Lectures will be partially flipped with student responsible for watching videos before class; class time will be split between short lectures, small group activities, and class discussions. Lab groups will meet in person every other week and have group project work on alternate weeks that may be done virtually or in person.

Requirements/Evaluation: Assessment will be based on participation, quizzes, labs and homework assignments, and a final group project where students will present a mock NASA mission proposal.

Prerequisites: none

Enrollment Limit: 46

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 46

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course counts towards the GEOS Group B Electives - Sediments and Life

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 107(D3) ASTR 107(D3)

Attributes: GEOS Group B Electives - Sediments + Life

Not offered current academic year

ASTR 111 (F) Introduction to Astrophysics (QFR)

The science of astronomy spans vast scales of space and time, from individual atoms to entire galaxies and from the universe's beginning to the future fate of our Sun. In this course, we will survey some of the main ideas in modern astrophysics, with an emphasis on the physics of stars and galaxies. ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the other sciences or mathematics and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include gravity and orbits, radiation laws and stellar spectra, physical characteristics of the Sun and other stars, star formation and evolution, black holes, galaxies, the expanding universe, and the Big Bang. Students will also use telescopes to observe stars, nebulae, planets, and galaxies and to make daytime observations of the Sun.

Class Format: The class has 6 afternoon labs. Nighttime observing sessions will occur throughout the semester.

Requirements/Evaluation: weekly problem sets, two hour-long tests, a final exam, lab reports, and an observing portfolio

Prerequisites: a year of high school Physics, concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

Enrollment Limit: 28

Enrollment Preferences: potential Astronomy majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The course requires regular problem sets and quantitative assignments. The course will emphasize how physical equations explain the observed properties of the universe.

Fall 2023
ASTR 211  (S)  Astronomical Observing and Data Analysis  (QFR)

How do astronomers make scientific measurements for objects that are light-years away from Earth? This course will introduce the basics of telescopes and observations and will give students hands-on training in the techniques astronomers use to obtain, process, and analyze scientific data. We will discuss observation planning, CCD detectors, signal statistics, image processing, and photometric and spectroscopic observations. We will begin by focusing on ground-based optical observations and will move on to non-optical observations, both electromagnetic (e.g., radio waves, X-rays) and non-electromagnetic (e.g., gravitational waves, neutrinos). Throughout the course, students will use computational techniques to work with real astronomical data, taken with our 24” telescope and from data archives.

Class Format: discussion, computer lab work, and observing

Requirements/Evaluation: weekly problem sets, lab work, and observing projects

Prerequisites: MATH 150 or 151; prior experience with Unix and computer programming is helpful, but not required

Enrollment Limit: 14

Enrollment Preferences: Astronomy or Astrophysics majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: The course requires regular problem sets. Labs require computer programming and statistical and graphical analyses of data.

Spring 2024

LEC Section: 01  MR 1:10 pm - 2:25 pm  Anne Jaskot

LAB Section: 02  W 1:10 pm - 3:50 pm  Kevin Flaherty

ASTR 240  (F)  Great Astronomers and Their Original Publications  (WS)

Cross-listings:  STS 240 ASTR 240 LEAD 240

Primary Cross-listing

In this course we will study some of the greatest figures in astronomy and consider their leadership in advancing progress in the field. We will consider their lives and works, especially as represented by original copies of their books and other publications. These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; Dialogo, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619, Rudolphine Tables 1627); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (Principia Mathematica: laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (Miscellanea curiosa, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); George Ellery Hale (Mt. Wilson Observatory 100” telescope, 1917; Palomar Observatory 200” telescope, 1948), Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe's expansion rate, 2000s). First editions will be available in Williams' Chapin Library of rare books, where we will meet in an adjacent classroom. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the Gutenberg Bible (c. 1453) and a Shakespeare First Folio (1623, with a discussion of astronomical references in Shakespeare's plays). The course will be taught in collaboration between an astronomer and a rare-books librarian, with remote lectures by experts from around the world.

Class Format: Meeting on campus in the Chapin Library classroom (Sawyer 452)

Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper; student choice of additional readings from a provided reading list

Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: if overenrolled, preference by written paragraph of explanation of why student wants to take the course
Expected Class Size: 12
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
STS 240(D3) ASTR 240(D3) LEAD 240(D3)
Writing Skills Notes: Comments on submitted papers will aid in writing skills
Attributes: LEAD Facets or Domains of Leadership
Not offered current academic year

ASTR 317 (S) Current topics in Planetary Geology (WS)
Cross-listings: ASTR 317 GEOS 317
Secondary Cross-listing
We will look in detail at geological processes on rocky and icy bodies of the Solar System. Each week will have a specific theme, and students will read a series of scientific articles on that topic. The readings will form the basis for writing and discussion. Areas to be investigated may include ice ages on Mars, the origin of Earth's moon, tectonics on Venus, chaos terrain on Europa, geysers on Enceladus, cryovolcanism on Triton, methane lakes on Titan, the viability of mining in the Asteroid Belt, and the prospects for life on other worlds. This course is in the Solid Earth group for the Geosciences major.
Class Format: Students meet with the professor weekly, in pairs, with one student writing each week and the other critiquing; and both engaging in detailed discussion of the readings.
Requirements/Evaluation: Evaluation is based on written papers, critiques, and discussion.
Prerequisites: GEOS/ASTR 217 (Planets and Moons); OR any two courses at 200-level or higher in Geosciences and/or Astronomy; OR permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Geosciences and Astronomy majors and prospective majors
Expected Class Size: 6
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
ASTR 317(D3) GEOS 317(D3)
Writing Skills Notes: This tutorial-style course focuses on writing, with 6 papers (5-7 pages) written bi-weekly throughout the semester, and partner critiques in alternate weeks.
Attributes: GEOS Group C Electives - Solid Earth
Not offered current academic year

ASTR 330 (S) The Nature of the Universe
This course is a journey through space and time from the first fractions of a second after the Big Bang to the ultimate fate of the Universe billions of years into the future. Topics include the Big Bang and its remnant cosmic background radiation, cosmic inflation, conditions during the first three minutes, creation of the elements, stellar and galactic black holes, relativity, the detection of gravitational waves, galaxies and quasars, dark matter, and the formation of the large-scale structure of the Universe. We will explore current ideas about the fate of our Universe, including the acceleration of its expansion, and its implications for the end of time. Finally, we will consider the fantastic but serious theoretical proposal that ours is but one of countless universes existing within a multiverse.
Class Format: lecture/discussion, three hours per week
Requirements/Evaluation: two midterm exams, a small observing portfolio, occasional quizzes, and a final exam
Prerequisites: none
Enrollment Limit: 48
Enrollment Preferences: open only to juniors and seniors; closed to students who have taken or are taking ASTR 104, and closed to ASTR, ASPH, and PHYS majors; preference given to seniors
Expected Class Size: 25
Grading: yes pass/fail option, no fifth course option
Unit Notes: non-major course; course in the 33X sequence are meant as general education courses for students in all majors
Distributions: (D3)

ASTR 402  (F)  Between the Stars: The Interstellar Medium  (QFR)
The matter between the stars—the interstellar medium—tells the story of the evolution of galaxies and the stars within them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject as they evolve, and to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars’ nuclear fusion. Interpreting the emission from this interstellar gas is one of astronomers’ most powerful tools to measure the physical conditions, motions, and composition of our own galaxy and others. In this course we will study the interstellar medium in its various forms, from cold, dense, star-forming molecular clouds to X-ray-emitting bubbles formed by supernovae. We will learn about the physical mechanisms that produce the radiation we observe, including radiative ionization and recombination, collisional excitation of “forbidden” lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. Finally, we will discuss the evolution of interstellar material in galaxies across cosmic time. This course is observing-intensive. Throughout the semester, students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium taken using the rooftop telescope.

Class Format: Tutorial meetings will be scheduled with the professor. Students will also complete observing projects using the rooftop telescope.
Requirements/Evaluation: weekly problem sets, 10-page final paper, and observing projects
Prerequisites: ASTR 111 and PHYS 201 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: juniors and seniors
Expected Class Size: 6
Grading: no pass/fail option, no fifth course option
Distributions: (D3)  (QFR)

Quantitative/Formal Reasoning Notes: In this course, students will derive quantitative physical formulas, use these equations to calculate and compare physical properties, and generate and analyze graphical representations of data. They will also make and analyze measurements of astronomical data through observing projects.

Fall 2023
TUT Section: T1  TBA  Anne Jaskot

ASTR 404  (S)  Unsolved Problems in Galaxy Evolution
In this tutorial, we will learn about galaxies and their evolution by focusing on some of the key mysteries astronomers are trying to solve. Questions may include: How do galaxies turn their gas supply into stars? Is there a universal initial mass function for star formation? What is the origin of multiple stellar populations in globular clusters? Why do some galaxies cease star formation? Which galaxies reionized the universe? We will discuss the nature of each unsolved problem, debate the theories proposed to answer it, and consider how future progress might be made.
Requirements/Evaluation: student's papers, responses to the partner's papers, and problem sets
Prerequisites: ASTR 111 and PHYS 142 or 151 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Juniors and Seniors
Expected Class Size: 6
Grading: no pass/fail option, no fifth course option
ASTR 410 (S) Compact Stellar Remnants: White Dwarfs, Neutron Stars and Black Holes

A star is a very interesting, very complicated physical object. Properties of stars and their evolutionary paths depend on an intricate interplay of different physical phenomena with gravity, nuclear interactions, radiation processes and even quantum and relativistic effects playing important roles. Using basic physics we will construct simple models of stars and discuss their evolution, concentrating on the key physical processes that play the dominant role at different evolutionary stages. We will discuss late stages of stellar evolution and concentrate on the basic properties of three possible remnants: white dwarfs, neutron stars and black holes. Radio and X-ray pulsars, supernovae including Type Ia and Gamma Ray Bursts will be discussed as well as observational confirmation of existence of black holes. We will explore extreme conditions existing near neutron stars and black holes and discuss their astrophysical consequences. We will also discuss the recent exciting detection of gravitational waves by the LIGO/VIRGO laser interferometric detectors.

Class Format: discussion three hours per week
Requirements/Evaluation: classroom participation, homework assignments, a midterm exam and a final exam
Prerequisites: PHYS 201 or permission of instructor
Enrollment Limit: 19
Enrollment Preferences: physics, astrophysics, and astronomy majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

Not offered current academic year

ASTR 493 (F) Senior Research: Astronomy

An original experimental or theoretical investigation is carried out under the direction of a faculty member in Astronomy, as discussed under the heading of the degree with honors in Astronomy above. This is part of a full-year thesis (493-494).

Prerequisites: permission of department
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

ASTR 494 (S) Senior Research: Astronomy

An original experimental or theoretical investigation is carried out under the direction of a faculty member in Astronomy, as discussed under the heading of the degree with honors in Astronomy above. This is part of a full-year thesis (493-494).

Winter Study

ASTR 16 (W) An infinity of worlds: planets and the search for life in the universe

Less than a generation ago, we wondered, as we had for millions of years before, whether there were any other planets at all. Now, we are privileged to be in the first generation of humans to know that many of the points of light dusting our night sky are host to orbiting worlds, some of which may be like our Earth. In this course, we will explore the techniques that are being used to discover these new worlds. We will make our own contributions to this great age of discovery, by using NASA spacecraft data to search for new planets. This course, aimed at non-majors, will deal with the science of planet hunting, the astounding diversity of planets known to exist, the emerging science of astrobiology, and the enduring question of "are we alone?" through works of science fiction and cutting-edge research. Coursework will consist of readings from popular science books aimed at a general audience, science-fiction short stories, and excerpts from science-fiction novels, in addition to 1-2 relevant feature films. The primary mode of instruction will be 6 hours per week of in-person class meetings including lectures, small-group activities, and optional evening observing sessions at the rooftop telescope (weather permitting). Evaluation will be based on a final 10-page paper, the topic and format of which is extremely broad.

Requirements/Evaluation: Paper(s) or report(s)

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: If overenrolled, preference will be given to first years and sophomores. I am willing to open a second section if enrollment numbers permit.

Expected Class Size: NA

Grading: pass/fail only

Unit Notes: Rob Wittenmyer '98 is Professor of astrophysics at the University of Southern Queensland in Australia. He is a veteran planet hunter with more than 100 published planet discoveries.

Attributes: STUX Winter Study Student Exploration

Not offered current academic year

ASTR 31 (W) Senior Research: Astronomy

To be taken by students registered for Astronomy 493, 494.

Grading: pass/fail only

Not offered current academic year
ASTR 32 (W) Senior Research: Astrophysics
To be taken by students registered for Astrophysics 495, 496.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year

ASTR 99 (W) Independent Study: Astronomy or Astrophysics
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Grading: pass/fail only

Not offered current academic year
Biochemistry and molecular biology are dynamic fields that lie at the forefront of science. Through elucidation of the structure and function of biologically important molecules (such as nucleic acids, lipids, proteins, and carbohydrates) these disciplines have provided important insights and advances in the fields of molecular engineering (recombinant DNA technology, "intelligent" drug design, "in vitro evolution"), genomics and proteomics, signal transduction, immunology, developmental biology, and evolution.

The Biochemistry and Molecular Biology Program is designed to provide students with an opportunity to explore living systems in molecular terms. Biochemistry and molecular biology are at the interface between the chemical and biological methods of looking at nature; therefore, the program draws heavily from these disciplines. While chemistry is concerned with the relationship between molecular structure and reactions, and biology focuses on cells and organisms, biochemistry and molecular biology probe the details of the structures and interactions of molecules in living systems in order to provide the foundation for a better understanding of biological molecules both individually and as members of more complex structures.

PROGRAM

While aspects of biochemistry and molecular biology can be very diverse, a common set of chemical and biological principles underlie the more advanced topics. With this in mind, the program has been structured to provide the necessary background in chemistry and biology and the opportunity to study the many facets of the modern areas of the biochemical sciences. Students interested in the Biochemistry and Molecular Biology Program should plan their course selection carefully. Since it is expected that Biochemistry 321 and 322 would be taken in the junior year, students are advised to take the prerequisites for those courses in both chemistry and biology during their first two years at Williams. While the program is open to all students, it is expected that it will appeal primarily to majors in biology and chemistry because of the number of courses required in those fields. In addition to taking the required courses, students planning to complete the Biochemistry and Molecular Biology Program are strongly encouraged to elect courses in mathematics and physics.

The following interdepartmental courses serve as the core of the Biochemistry and Molecular Biology Program. BIMO 321 and 322 provide a comprehensive introduction to biochemistry. BIMO 401, the capstone course for the concentration, provides students the opportunity to examine the current scientific literature in a wide variety of BIMO-related research areas.

To complete the concentration in Biochemistry and Molecular Biology, a student must complete all of the required courses listed below, take at least one elective in biology and one elective in chemistry from the list below, and attend at least eight Biology and/or Chemistry Department colloquia. Since the Chemistry Department counts two biology courses and the Biology Department counts two chemistry courses toward the majors (each of which can be completed with only eight other courses), a student majoring in either chemistry or biology would have to take only two or three additional courses to complete the program.

Required Courses

BIMO 321 / BIOL 321 / CHEM 321(F) LEC Biochemistry I: Structure and Function of Biological Molecules
Taught by: B. Thuronyi
BIMO 322 / BIOL 322 / CHEM 322(S) LEC Biochemistry II: Metabolism
Taught by: Caitlyn Bowman-Cornelius

BIMO 401(S) SEM Topics in Biochemistry and Molecular Biology
Taught by: Steven Swoap

BIOL 101(F) LEC The Cell
Taught by: Tim Lebestky, Steven Swoap

BIOL 102(S) LEC The Organism
Taught by: Robert Savage, Luana Maroja

BIOL 202(F) LEC Genetics
Taught by: David Loehlin

CHEM 101(F, S) LEC Concepts of Chemistry
Taught by: Sarah Goh, Ben Augenbraun, Amy Gehring, Bob Rawle

CHEM 200(S) LEC Advanced Chemical Concepts
Taught by: Stephanie Christau, Anthony Carrasquillo

CHEM 201 LEC Organic Chemistry: Introductory Level
Taught by: TBA

CHEM 251(F) LEC Organic Chemistry: Intermediate Level
Taught by: Amanda Turek, Thomas Smith

CHEM 256(S) LEC Foundations of Physical and Inorganic Chemistry
Taught by: Katie Hart

Elective Courses

Students can check with the program chair to see if other courses not listed here might count as electives.

BIOL 305(F) LEC Evolution
Taught by: Luana Maroja

BIOL 308 LEC Integrative Plant Biology: Fundamentals and New Frontiers
Taught by: Claire Ting

BIOL 312 / NSCI 312 LEC Sensory Biology
Taught by: Heather Williams

BIOL 313(F) LEC Immunology
Taught by: Damian Turner

BIOL 315 LEC Microbiology: Diversity, Cellular Physiology, and Interactions
Taught by: Lois Banta

BIOL 319 / CHEM 319 / CSCI 319 / MATH 319 / PHYS 319 SEM Integrative Bioinformatics, Genomics, and Proteomics Lab
Taught by: Lois Banta

BIOL 326(S) LEC Cellular Assembly and Movement
Taught by: Pei-Wen Chen

BIOL 330 LEC Genomes: Structure, Function, Evolution
Taught by: David Loehlin

BIOL 407 / NSCI 347(S) SEM Neurobiology of Emotion
Taught by: Tim Lebestky

BIOL 408(S) SEM RNA Worlds
Taught by: David Loehlin
BIOL 410 SEM Nanomachines in Living Systems
Taught by: Pei-Wen Chen
Catalog details
BIOL 411 TUT Developmental Biology: From Patterning to Pathogenesis
Taught by: Robert Savage
Catalog details
BIOL 414(F) SEM Life at Extremes: Molecular Mechanisms
Taught by: Claire Ting
Catalog details
BIOL 419 SEM Secrets of Enzymes: Fidelity, Promiscuity, and Disease
Taught by: Cynthia Holland
Catalog details
BIOL 436(F) SEM Metabolites as Messengers
Taught by: Caitlyn Bowman-Cornelius
Catalog details
CHEM 324(F) LEC Enzyme Kinetics and Reaction Mechanisms
Taught by: Amy Gehring
Catalog details
CHEM 326(S) SEM Chemical and Synthetic Biology
Taught by: B Thuronyi
Catalog details
CHEM 338 TUT Bioinorganic Chemistry: Metals in Living Systems
Taught by: Christopher Goh
Catalog details
CHEM 342(S) LEC Synthetic Organic Chemistry
Taught by: Thomas Smith
Catalog details
CHEM 344(S) LEC Physical Organic Chemistry
Taught by: Amanda Turek
Catalog details
CHEM 348(F) LEC Polymer Chemistry
Taught by: Stephanie Christau
Catalog details
CHEM 364 / ENVI 364 LEC Instrumental Methods of Analysis
Taught by: Michael Ihde, Christopher Goh
Catalog details
CHEM 366(F) LEC Thermodynamics and Statistical Mechanics
Taught by: Enrique Peacock-López
Catalog details
CHEM 367(S) LEC Biophysical Chemistry
Taught by: Bob Rawle
Catalog details

Colloquium Requirement
Concentrators must attend at least eight Biology and/or Chemistry Department colloquia. The Biology and Chemistry Departments hold colloquia on Friday afternoons during the fall and spring semesters. Scientists from other academic or research institutions are invited to present their research to students and faculty. There are approximately a dozen colloquia offered each semester among which BIMO concentrators may choose. Attendance at the honors student research presentations and the Biology/BIMO Alumni Reunion poster session also count toward the colloquium requirement. Concentrators may receive credit for colloquia attended during any of their semesters at Williams College.

BIMO 321 (F) Biochemistry I: Structure and Function of Biological Molecules (QFR)
Cross-listings: BIMO 321 BIOL 321 CHEM 321

Primary Cross-listing
This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity
to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

**Class Format**: lecture, three times per week and laboratory, four hours per week

**Requirements/Evaluation**: quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

**Prerequisites**: BIOL 101, CHEM 200 and CHEM 201; or either CHEM 155 or 256 and CHEM 251

**Enrollment Limit**: 16/lab

**Enrollment Preferences**: junior and senior Biology and Chemistry majors and BIMO concentrators

**Expected Class Size**: 48

**Grading**: no pass/fail option, no fifth course option

**Unit Notes**: Cannot be counted towards the Biology major in addition to BIOL 222

**Distributions**: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIMO 321(D3) BIOL 321(D3) CHEM 321(D3)

**Quantative/Formal Reasoning Notes**: This course fulfills the QFR requirement with regular problem sets in which quantitative/formal reasoning skills are practiced.

**Attributes**: BIGP Courses  BIMO Required Courses

---

**Fall 2023**

**LEC Section**: 01  MWF 10:00 am - 10:50 am  B  Thuronyi

**LAB Section**: 02  T 1:00 pm - 5:00 pm

**LAB Section**: 03  W 1:00 pm - 5:00 pm

**LAB Section**: 04  R 1:00 pm - 5:00 pm

---

**BIMO 322 (S)  Biochemistry II: Metabolism**  (QFR)

**Cross-listings**: BIOL 322 BIMO 322 CHEM 322

**Primary Cross-listing**

This lecture course provides an in-depth presentation of the complex metabolic reactions that are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

**Class Format**: Lecture three hours per week and laboratory three hours per week.

**Requirements/Evaluation**: several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of data

**Prerequisites**: BIOL 101, plus either: CHEM 156 and CHEM 256, or CHEM 155 and CHEM 156, or CHEM 200 and CHEM 201, or permission of instructor

**Enrollment Limit**: 48

**Enrollment Preferences**: junior and senior Biology and Chemistry majors and BIMO concentrators

**Expected Class Size**: 48

**Grading**: no pass/fail option, no fifth course option

**Unit Notes**: cannot be counted towards the Biology major in addition to BIOL 222

**Distributions**: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BION 322(D3) BIMO 322(D3) CHEM 322(D3)

**Quantative/Formal Reasoning Notes**: The laboratory program is quantitative covering data analyses, numerical transformations, graphical displays.
**BIMO 401 (S) Topics in Biochemistry and Molecular Biology (WS)**

This seminar course involves critical reading, analysis, and discussion of papers from the current biochemistry and molecular biology literature. Specific topics vary from year to year but are chosen to illustrate the importance of a wide range of both biological and chemical approaches to addressing important questions in the biochemical and molecular biological fields. To facilitate discussion, students will prepare written critiques analyzing the data and conclusions of the chosen literature.

**Class Format:** three hours per week

**Requirements/Evaluation:** class presentations and discussion, frequent short papers, and a final paper

**Prerequisites:** BIOL 202 and BIMO 321

**Enrollment Limit:** 12

**Enrollment Preferences:** those completing the BIMO concentration; open to others with permission of instructor

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (WS)

**Writing Skills Notes:** The critical analysis of published papers in the biochem literature, as expressed in clear and succinct writing, is a key learning goal for the course. The students write seven literature critiques (typically 5-6 pages long) throughout the semester. While the specific topic each week differs, the parameters of the assignment are the same each time, allowing students to progressively improve their writing. I provide extensive written feedback on each critique, returned before the next due date

**Attributes:** BIMO Required Courses

---

**BIMO 99 (W) Independent Study: Biochemistry and Molecular Biology**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

**Not offered current academic year**
Bioinformatics, genomics, and proteomics are rapidly advancing fields that integrate the tools and knowledge from biology, chemistry, computer science, mathematics, physics, and statistics in research at the intersection of the biological and informational sciences. Inspired by the enormous amount of biological data that are being generated from the sequencing of genomes, these new fields will help us pose and answer biological questions that have long been considered too complex to address. Research in genomics, proteomics, and bioinformatics will also significantly impact society affecting medicine, culture, economics, and politics.

The Bioinformatics, Genomics, and Proteomics curriculum involves faculty from the Biology, Chemistry, Computer Science, Mathematics/Statistics, and Physics departments and was designed to provide students with an understanding of these revolutionary new areas of investigation. Students interested in graduate work in bioinformatics, genomics, and proteomics should take the BiGP courses and their prerequisites. Interested students are also encouraged to participate in independent research with members of the advisory faculty as they explore the development of these new fields.
The Biology curriculum has been designed to provide students with a broad base for understanding principles governing life processes at all levels, from biochemistry and cell biology to physiology to ecology and behavior. Courses emphasize fundamentals common to all sub-disciplines including the coupling of structure to function, the transfer of energy in living systems, communication, and the molding of diversity by the evolutionary process. In upper-level courses and in independent and honors research, students have the opportunity to investigate areas at the frontiers of modern biology.

Although the Biology major is specifically designed to provide a balanced curriculum in the broader context of the liberal arts, it is also excellent preparation for graduate studies in the life sciences and in the health professions.

MAJOR REQUIREMENTS

In order to make the major accessible to students with diverse interests, required courses are kept to a minimum. The Biology major is satisfied by nine courses, as follows:

BIOL 101 The Cell

BIOL 102 The Organism

Any two 200-level electives with labs in which at least one faculty member is a member of the Williams College Biology Department. (Tutorials may not be used to fulfill this requirement.)

Any two 300-level electives. (Both of these must have an associated lab component).
Any one 400-level seminar course. (Honors thesis BIOL 493-494 do not fulfill this requirement).

Any two more courses which can be at the 200-, 300- or 400-level, OR one such course plus two semesters of Organic Chemistry (CHEM 156 and 251) OR General Chemistry II and Organic Chemistry I (CHEM 200 and 201).

Students who are off-cycle members of the Class of 2024 who have already declared the Biology major may choose to fulfill either the major requirements above OR the previous major requirements:

- BIOL 101 The Cell
- BIOL 102 The Organism
- BIOL 202 Genetics
- Any two 300-level courses. Two 300-level electives (Both of these must have an associated lab component).
- One 400-level seminar course (Honors thesis BIOL 493-494 do not fulfill this requirement)
- Any three additional courses, which can be at the 200-, 300- or 400-level, OR any two such courses plus two semesters of Organic Chemistry (CHEM 156/251).

In order to ensure that majors in the Class of 2024 who choose to fulfill the previous major requirements broaden their knowledge of biology, one of their elective courses for the major must include an upper-level (200+) course covering biological processes at levels of organization above the cell. Courses that satisfy this distribution requirement are indicated in the individual course description.

Note: Independent study courses and AMS 311 (same as Biology 231) do not fulfill the 300-level or 400-level course requirements. WIOX 316 Biology: Evolution, in the Williams Oxford Program qualifies for major credit at the 200-level.

COURSE SELECTION AND PLACEMENT

It is preferable for students who plan to major in biology, or think they may be interested in doing so, to take Biology 101, 102 during their first year at Williams. It is also possible to begin the Biology major during the sophomore year, although students should understand that it may require taking two or more biology courses during several semesters.

Students interested in biology, whether or not they intend to major in it, are encouraged to take Biology 101, 102. It is also possible, with permission of the instructor, to take Biology 203 Ecology, Biology 204 Animal Behavior and Biology 220 Field Botany without prerequisite. Other 100-level biology courses are designed specifically for students who do not intend to take additional upper-level courses in biology. All of these courses satisfy the Division III distribution requirement.

Beginning students should normally enroll in Biology 101 and 102. With permission of the instructor, students may take Biology 102 prior to taking Biology 101. Students with unusually strong backgrounds in biology, such as those with outstanding performance on the College Board Biology Advanced Placement Test, may be permitted to elect a sophomore-level course in lieu of Biology 101 and/or Biology 102 upon successful completion of a departmental qualifying exam, administered during First Days.

The Biology Department encourages majors to have breadth in their course selections. Biology encompasses a wide spectrum of disciplines and uses different methodologies to approach research questions. Yet advances in each discipline of biology increasingly inform thinking throughout the field. We encourage biology majors to gain exposure to diverse conceptual frameworks and methodologies through their choice of courses.

COURSES RELATED TO THE BIOLOGY MAJOR

Students planning to pursue their interest in biology and related fields after completing their undergraduate degrees are strongly encouraged to take one year of chemistry, at least one semester of mathematics (a course in statistics is recommended), and one semester of physics. Students may wish to check the requirements for graduate admission at relevant universities, and are also encouraged to consult with the Biology Department’s graduate school advisor about prerequisites for admission to graduate programs.

BIOCHEMISTRY AND MOLECULAR BIOLOGY

Students interested in Biochemistry and Molecular Biology (BIMO) should consult the general statement under Biochemistry and Molecular Biology.

BIOINFORMATICS, GENOMICS AND PROTEOMICS

Students interested in Bioinformatics, Genomics and Proteomics (BiGP) should consult the general statement under Bioinformatics, Genomics and Proteomics. Biology majors interested in this field are strongly encouraged to enroll in Integrative Bioinformatics, Genomics, and Proteomics (Biology 319).

NEUROSCIENCE

Students interested in Neuroscience (NSCI) should consult the general statement under Neuroscience.
PUBLIC HEALTH
Students interested in Public Health (PH) should consult the general statement under Public Health.

ENVIRONMENTAL STUDIES
Students interested in Environmental Studies (ENVI) should consult with Biology faculty members associated with the program and the general statement under Environmental Studies.

THE DEGREE WITH HONORS IN BIOLOGY
In order to be recommended for the degree with honors, a Biology major is normally expected to have completed the equivalent of two semesters and a winter study (031) of independent research culminating in a thesis which demonstrates outstanding achievement of an original and innovative nature. Although the presentation of a thesis and associated oral presentation in the fall and poster defense in the spring are required for consideration for a degree with honors, their completion should not be interpreted as a guarantee of a degree with honors. The principal considerations in admitting a student to the program of independent honors research will be mastery of fundamental material and skills, ability to pursue independent study successfully, and demonstrated interest and motivation. Students interested in participating in the honors program should consult with the department early in the winter study semester of the junior year; approval must be received before spring registration in the junior year. The number of Biology Department faculty available to mentor research students and the number of students each can accommodate in her/his lab vary from year to year. Although the department will make every effort to provide an opportunity for students to conduct Honors research, you should be aware that it may not be possible to assign all applicants to a laboratory.

The minimum course requirements for a degree with honors in Biology are Biology 101, Biology 102, two 200-level biology courses with labs, two 300-level biology courses (each of which must have a laboratory associated with it), one 400-level biology course, Biology 493, Biology 494, WSP 031, and any other two courses in biology (or any other one course and two semesters of Chemistry: Chemistry 200/201 or Chemistry 156/251). Note: A student who has a double major cannot count any course twice. For example, if a student is a Biology and Chemistry major, Organic Chemistry can only be counted in one of the two majors.

In addition to the normal honors route, which includes two semesters (Biology 493-494) and a winter study of research (WSP 031) during senior year, students have the option, subject to the approval of their thesis advisor, to begin the honors research during winter study junior year or during the second semester junior year. In general, thesis students who start during WSP or spring semester of their junior year are working on a project that requires winter or spring field work. Students beginning honors in winter study of junior year would take Biology 494 in the spring of their junior year followed by Biology 493 in the fall of their senior year; students beginning honors during the second semester of junior year would take Biology 494 that semester, followed by Biology 493 in the fall of senior year and winter study research in the winter of the senior year.

STUDY ABROAD
Students planning on majoring in Biology are strongly advised to take Biology 202 and/or Biology 203 and/or Biology 212 before going abroad, since these courses are prerequisites for many upper-level courses. Biology majors studying abroad may receive credit toward the major for at most two 200-level electives. Students should meet with the Department's study abroad advisor to discuss study abroad options.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in many cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department. We usually want to see a syllabus.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description, ideally complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
Yes. Only two of the nine major course credits can be taken somewhere other than Williams.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
Yes. Courses taken for major credit anywhere other than Williams will only count as 200-level elective credit, regardless of the level or format of the course.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes. Two 200-level lab courses, 300-level lab courses, and 400-level senior seminar.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Yes. Biology 202, Biology 203 and Biology 212 are only offered in the fall. Those late to the major need to be aware of this as these courses are prerequisites for most upper division courses.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

Courses that are focused on clinical areas of study, and courses in environmental studies that focus on policy or sociology rather than biology, would not be granted credit in biology.

CREDIT FOR COURSES AT OTHER INSTITUTIONS

Students who enroll in study away programs may receive credit for up to two 200-level electives towards the biology major. Courses must be pre-approved by the Biology Department Study Away Advisor.

Students wishing to satisfy prerequisites for courses offered by the Biology Department with courses taken at other institutions should consult, in person, with a member of the Biology Department, prior to registering for the course that requires a prerequisite. Such consultations will include a review of the course syllabi and the transcripts of the relevant previous college work, and students should bring these materials with them.

RESEARCH AND THESIS COURSES

Individual research projects must be approved by the department. Application should be made to the department prior to spring registration.

Note: Senior thesis and independent study courses do not count as 300-level or 400-level course requirements for the major. Only one research course (i.e., BIOL 297, BIOL 298, or the combination of BIOL 493 and BIOL 494) may be counted towards the major requirements.

BIOL 100  (W)  Biology of Exercise and Nutrition

This class, intended for the non-scientist, focuses on the impact of exercise and nutrition on the human body. We will discuss topics such as how different types of training influence exercise performance; the changes that occur in the cardiovascular system during an exercise routine; an examination of the inherent limits of the body to perform aerobic and anaerobic tasks; and long-term health consequences of a lifetime of activity or inactivity. We will also examine how nutrition and metabolism affect body composition. For example, we will rigorously and scientifically scrutinize the use of “fad” diets as a means to lose weight.

Class Format: Daily 10:15am-noon and 1:30-3:30pm

Requirements/Evaluation: Two examinations will make up 1/2 of the grade, with the other 1/2 of the grade from laboratory assignments. Laboratory assignments include pre-lab questions and post-lab data analysis.

Prerequisites: Permission of a dean.

Enrollment Limit: 15

Enrollment Preferences: students who need to make up a deficiency

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar’s Office will register students in both BIOL 100 and BIOL 41.

Distributions: (D3)

Not offered current academic year

BIOL 101  (F)  The Cell

This course investigates cell structure and function as a consequence of evolutionary processes, and it stresses the dynamic properties of living systems. Topics include an introduction to biological molecules and enzyme action, membrane structure and function, energy exchange and design of metabolic systems, expression of genetic information, protein trafficking, cell signaling, the cell cycle, and cancer. Student-designed laboratory experiments and discussions based on primary biology literature will highlight how biological knowledge is created and understood.

Class Format: 3 hours of lecture per week and one laboratory/discussion per week (3 hours).

Requirements/Evaluation: hour tests, a final exam, lab reports, discussion assignments, and discussion participation

Prerequisites: none
BIOL 102 (S) The Organism
This course focuses upon the developmental and evolutionary processes that have given rise to a wide diversity of multicellular organisms. We consider many levels of biological organization, from molecular and cellular to individuals and populations in our examination of evolutionary concepts. Topics include meiosis and sexual reproduction, developmental and evolutionary mechanisms, and speciation with representative examples from a diversity of plants and animals. Readings are drawn from a variety of sources, including the recent primary literature.

Requirements/Evaluation: hour tests, a final exam and laboratory reports
Prerequisites: BIOL 101 or permission of instructor

Spring 2024
LEC Section: 01  TR 9:55 am - 11:10 am  Robert M. Savage
LEC Section: 02  TR 11:20 am - 12:35 pm  Robert M. Savage
LEC Section: 03  MWF 11:00 am - 11:50 am  Luana S. Maroja

LAB Section: 05  W 1:00 pm - 3:50 pm  Janis E. Bravo
LAB Section: 06  R 1:00 pm - 3:50 pm  Deborah L. Carlisle
LAB Section: 07  T 1:00 pm - 3:50 pm  Deborah L. Carlisle
LAB Section: 08  W 1:00 pm - 3:50 pm  Luana S. Maroja
LAB Section: 09  R 1:00 pm - 3:50 pm  Luana S. Maroja
BIOL 120  (F)  Biology Through The Media
This course explores the foundational concepts examined in Williams's Introduction to Biology series through their expression in mass media: news outlets, television and feature films. Each topic will be presented through the lens of a "media story," either based in fact or fictional. The first half of the course investigates cell structure and function, paying special attention to how information is conveyed in a cell. The focus then shifts to the developmental and evolutionary processes that have given rise to the diversity of life. This is a qualitative-focused, non-majors course and, as such, the students are not expected to have much, if any, background in biology.

Requirements/Evaluation:  midterm, two short papers, film screenings as a group outside of class and a final exam
Prerequisites:  no prerequisites and may not be taken as credit towards the Biology major
Enrollment Limit:  80
Enrollment Preferences:  Senior, juniors, sophomores and first-year students in that order
Expected Class Size:  40-60
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D3)
Not offered current academic year

BIOL 134  (F)  The Tropics: Biology and Social Issues  (DPE)
Cross-listings:  BIOL 134 ENVI 134
Primary Cross-listing
Biology and Social Issues of the Tropics explores the biological dimensions of social and environmental issues in tropical societies, focusing specifically on the tropics of Africa, Asia, Latin America, Oceania, and the Caribbean. Social issues are inextricably bound to human ecologies and their environmental settings. Each section of the course provides the science behind the issues and ends with options for possible solutions, which are debated by the class. The course highlights differences between the tropics and areas at higher latitudes while also emphasizing global interconnectedness. It begins with a survey of the tropical environment, including a global climate model, variation in tropical climates and the amazing biodiversity of tropical biomes. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria, AIDS and Covid-19 (SARS-CoV-2). The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the interaction of humans with their supporting ecological environment, and global climate change. This course fulfills the DPE requirement. Through lectures, debates and readings, students confront social and environmental issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

Class Format:  Debate
Requirements/Evaluation:  two hour exams, a short paper, debate presentation, and a final exam
Prerequisites:  none
Enrollment Limit:  62
Enrollment Preferences:  Preference will be given to Environmental Studies majors/concentrators, students in need of a Division III or DPE requirement, and then Seniors, Juniors, Sophomores, and First Year students.
Expected Class Size:  62
Grading:  no pass/fail option,  no fifth course option
Unit Notes:  Does not count for credit in the Biology major.
Distributions:  (D3)  (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
BIOL 134(D3) ENVI 134(D3)

Difference, Power, and Equity Notes:  This course highlights differences between the tropics and higher latitudes. For each section we focus on difference--different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and different contributions to and impacts of climate change. For each section we highlight differences in power and the inequities of resource distribution. We then debate potential solutions to ameliorate these inequities.

Attributes:  ENVI Natural World Electives  GBST African Studies Electives  PHLH Biomedical Determinants of Health
BIOL 135  (F)  Evolution as Fact and Theory
This course examines evolution as a science and its current and historical importance. Lectures focus on the evidence for evolution, the main evolutionary forces (natural selection and others) and the diversification processes that generate biodiversity. We will also explore recent evolutionary trends and discussions such as human evolution, heritability, personalized genomics, antibiotic and pesticide resistance, climate change, and the conflict between creationists and evolutionists. The course has a required day trip to the American Museum of Natural History in NYC.

Requirements/Evaluation:  exams, panel discussion, short papers and participation
Prerequisites:  none
Enrollment Limit:  60
Enrollment Preferences:  Non biology majors, 1st year students
Expected Class Size:  60
Grading:  yes pass/fail option,  yes fifth course option
Unit Notes:  may not be taken as credit towards the Biology major; not open to students who took BIOL 305
Distributions:  (D3)
Not offered current academic year

BIOL 165  (F)  Coral Reefs: Ecology, Threats, & Conservation
Cross-listings:  MAST 265 BIOL 165 ENVI 265
Secondary Cross-listing
Coral reefs are a fascinating ecosystem found throughout the world's tropical oceans. Corals can thrive in nutrient-poor oceans because of the mutualistic relationship with algal symbionts. And as a foundational species, corals provide a habitat for numerous species, possibly the highest diversity found on the planet. However, these complex and beautiful ecosystems are declining worldwide from a variety of local and global threats. In this course, we will explore coral reef ecology through an in-depth examination of the biotic and abiotic factors contributing to the ecosystem’s functioning. We will also investigate the causes and consequences of threats to coral reefs, such as ocean warming, ocean acidification, and resource extraction. Finally, we will identify the many efforts worldwide to conserve coral reefs and promote their resilience. In this seminar course, you will demonstrate your proficiency through knowledge assessments, short writing reflections, a virtual coral fragmentation experiment, and a creative advocacy project. This course aims to deepen your awareness of the complex species interactions on coral reefs and the physical factors affecting coral survival while fostering hope through current conservation efforts.

Requirements/Evaluation:  Four 1-paragraph discussion board post, One 20-question knowledge assessment (quiz), Three 2-page writing reflections, One lab results and discussion write-up 2-3 pages figures included, and a creative (medium is student choice) advocacy project.
Prerequisites:  none, open to all students
Enrollment Limit:  20
Enrollment Preferences:  1. First-Year, 2. Sophomores
Expected Class Size:  16
Grading:  yes pass/fail option,  yes fifth course option
Unit Notes:  Does not count for Biology major credit.
Distributions:  (D3)
This course is cross-listed and the prefixes carry the following divisional credit:

Attributes:  ENVI Natural World Electives
Not offered current academic year

BIOL 202  (F)  Genetics  (QFR)
Genetics, classically defined as the study of heredity, is today a multidisciplinary field whose principles provide critical insight and tools to most areas
of biology and medicine. This course covers the experimental basis for our current understanding of the inheritance, structures, and functions of genes. It introduces approaches used by contemporary geneticists and molecular biologists to explore questions in areas of biology ranging from evolution to medicine. A primary focus of the course is on students developing familiarity with problem solving, the logic and quantitative reasoning required to understand how genetic mechanisms lead to biological patterns. The laboratory part of the course provides an experimental introduction to modern genetic analysis as well as introductions to interpreting genetic reasoning in the primary research literature. Laboratory experiments include investigating chromosome structure using microscopy, mapping a mutation to the genome by integrating multiple streams of evidence, and determining the structure of a DNA plasmid using molecular tools.

Class Format: Lecture: three hours per week, Lab: three hours per week.

Requirements/Evaluation: bi-weekly problem sets; weekly laboratory exercises and laboratory reports; three exams

Prerequisites: BIOL 101 and 102

Enrollment Limit: 120

Enrollment Preferences: students interested in the Biology major

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course develops quantitative skills through solving problems. Students learn to apply basic calculations and logic to predict the outcomes of biological systems, for example, describing the likelihood that an individual will be affected by an inherited disease. Application of quantitative and logical analysis contributes to a large component of the in-class work and the graded material for the class, in the form of problem sets, exams, and data analysis for lab reports.

BIOL 203 (F) Ecology (QFR)

Cross-listings: ENVI 203 BIOL 203

Primary Cross-listing

This course combines lectures & discussion with field and indoor laboratory activities to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to engage students in the natural history of the region and build skills in data analysis and scientific writing.

Requirements/Evaluation: pre-class quizzes, lab reports, two mid-term exams, and a final exam

Prerequisites: BIOL 102, or ENVI 102, or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: students planning to pursue Biology and/or ENVI

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
Quantitative/Formal Reasoning Notes: Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component (based in R). Students are introduced to t-tests, chi-square analysis, and regression.

BIOL 204 (S) Animal Behavior
Making sense of what we see while watching animals closely is both an enthralling pastime and a discipline that draws on many aspects of biology. Explanations can be found on many levels: evolutionary theory tells us why certain patterns have come to exist, molecular biology can help us understand how those patterns are implemented, neuroscience gives insights as to how the world appears to the behaving animal, endocrinology provides information on how suites of behaviors are regulated. The first part of the course focuses upon how descriptive studies provide the basis for formulating questions about behavior as well as the statistical methods used to evaluate the answers to these questions. We then consider the behavior of individuals, both as it is mediated by biological mechanisms and as it appears from an evolutionary perspective. The second half of the course is primarily concerned with the behaviors of groups of animals from a wide variety of vertebrate and invertebrate species, concentrating upon the stimuli, responses, and internal mechanisms that maintain social systems and on the selection pressures that drive animals toward a particular social system.

Class Format: six hours per week
Requirements/Evaluation: quizzes, exams, and lab reports
Prerequisites: BIOL 102, or PSYC 101, or permission of instructor
Enrollment Limit: 32
Enrollment Preferences: Biology majors and Neuroscience concentrators
Expected Class Size: 32
Grading: yes pass/fail option, no fifth course option

BIOL 205 (S) Physiology
This lecture-based course examines principles, patterns, and mechanisms of biological function from the level of cells and tissues to the whole organism. The themes of the course include structure and function, mechanisms of regulation, control and integration, and adaptation to the environment. Examples of these themes are taken from a wide variety of organisms with a focus on vertebrates. Laboratories provide practical experience in measurement and experimental elucidation of physiological phenomena and functional analysis of gross structure.

Requirements/Evaluation: Daily practice problems, midterm exams, laboratory exercises, and a final exam
Prerequisites: BIOL 101; open to first-year students only with permission of instructor
Enrollment Limit: 72
Enrollment Preferences: Seniors, then juniors, then sophomores.
**BIOL 206  (S)  Marine Biology**

The oceans impact almost all life and processes on Earth. In this course we will explore the astounding diversity of life in the world's oceans, from the smallest photosynthetic microbes on the planet to the largest animals that weigh almost 200 tons. Using an integrative approach that spans from the molecular to the organismal to the ecological levels, we will focus on the biology of marine organisms, and their interactions and interrelationships. Topics including primary production, reproduction, acclimation to stresses, adaptation, and evolution will be discussed in the context of environments such as the open oceans, coastal waters, rocky intertidal zones, coral reefs, and the deep sea. We will emphasize how recent scientific advances have revolutionized our understanding of marine organisms and explore solutions to global challenges, including climate change and ocean acidification, pollution, sustainable fishing and aquaculture, and habitat conservation.

**Requirements/Evaluation:** two exams, one two-page research paper, one final project with a three-page written component and an oral presentation component, participation in discussions, laboratory assignments

**Prerequisites:** Biology 101 and Biology 102, or permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** Biology majors: seniors who need a second 200-level course for the major, and then juniors who need a second 200-level course for the major

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D3)

---

**BIOL 209  (F)  Animal Communication  (WS)**

**Cross-listings:** BIOL 209 NSCI 209

**Primary Cross-listing**

Animal communication systems come in as many varieties as the species that use them. What they have in common are a sender that encodes information into a physical signal and a receiver that senses the signal, extracts the information, and adjusts its subsequent behavior accordingly. This tutorial will consider all aspects of communication, using different animal systems to explore different aspects of the biology of signaling. Topics will include the use of syntax to carry meaning in chickadee calls, the "piracy" of signaling system by fireflies, statements of identity and affiliation in the form of toothed whales' signature whistles, long-distance chemical attractants that allow male moths to find the object of their desire, and cultural evolution within learned signaling systems.

**Requirements/Evaluation:** evaluation will be based on five 5-page papers, five short response papers, & the student's effectiveness in tutorial presentations.
Prerequisites: BIOL 101 and 102; open to sophomores, juniors, and seniors
Enrollment Limit: 10
Enrollment Preferences: Biology majors and senior Neuroscience concentrators who need a Biology elective to complete the concentration
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (WS)

BIOL 211 (S) Paleobiology
Cross-listings: BIOL 211 GEOS 212
Secondary Cross-listing
The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. We will explore how, why, when, and where fossils form and learn about the major groups of fossilized organisms and how they have changed through time. In addition, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climatic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.
Class Format: One day field trip to the the Paleozoic of New York State
Requirements/Evaluation: Weekly lab assignments, frequent short quizzes and writing assignments, and a final project with a written and oral presentation component.
Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205
Enrollment Limit: 24
Enrollment Preferences: sophomore and junior GEOS majors
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Unit Notes: does not satisfy the distribution requirement for the Biology major

BIOL 212 (F) Neuroscience

Cross-listings: PSYC 212 NSCI 201 BIOL 212

Secondary Cross-listing

This course is designed to give an overview of the field of neuroscience progressing from a molecular level onwards to individual neurons, neural circuits, and ultimately regulated output behaviors of the nervous system. Topics include a survey of the structure and function of the nervous system, basic neurophysiology and neurochemistry, development, learning and memory, sensory and motor systems, and clinical disorders. Throughout the course, many examples from current research in neuroscience are used to illustrate the concepts being considered. The lab portion of the course will emphasize a) practical hands-on exercises that amplify the material presented in class; b) interpreting and analyzing data; c) presenting the results in written form and placing them in the context of published work; and d) reading and critiquing scientific papers.

Requirements/Evaluation: Evaluation will be based on participation in discussion groups, exercises, problem sets and quizzes performed in small groups, lab reports, midterm exams, and a final exam.

Prerequisites: PSYC 101 or BIOL 101; open to first-year students only with permission of instructor

Enrollment Limit: 72

Enrollment Preferences: Sophomores and Biology and Psychology majors

BIOL 219 (F) Dangerous Exposures: Environment, Immunity, and Infectious Disease  (WS)

Global reports of emerging infectious diseases and old diseases with new pathogenic properties incite fears for personal safety as well as national security. The specter of a contagious pandemic has captured the public imagination through the mass news media, movies, and even popular online and board games. In this tutorial course, we will explore the ecology and evolution of several recently emergent diseases such as Ebola hemorrhagic fever, dengue, and AIDS. Topics to be considered include transmission dynamics, epidemiological modeling of vaccination strategies, and wildlife reservoirs that contribute to human virus exposure. We will examine progress in preventing the parasitic disease malaria and why such diseases have proven so refractory. We will also discuss the science behind the recent development of the vaccine against the human papillomavirus, which causes cervical cancer, and the intriguing and highly unusual transmissible cancers in dogs and Tasmanian devils. Finally, we will think about the contributions of inadequate diagnostic capacities world-wide and broader issues of resource shortages in driving the global emergence of drug resistance in tuberculosis and other diseases. One common theme in each of these case studies will be the interplay between the host immune response and the evolution of the pathogen. Although the primary focus of the course is on biology rather than policy, each week's readings will have implications for public health and/or conservation biology.

Requirements/Evaluation: six 4- to 5-page papers; tutorial presentations, and the student's progress towards intellectual independence and creativity as a presenter and a respondent

Prerequisites: BIOL 101 and 102

Enrollment Limit: 10

Enrollment Preferences: sophomores who have taken BIOL 202, students interested in public health

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major
Writing Skills Notes: We work deliberately throughout the semester on writing skills including construction of a written argument and logical flow as well as mechanics. Students write six 4-5-page papers, alternating weekly between papers and written critiques of their partner's writing. Based on substantive feedback from the instructor as well as their partner, students revise and resubmit two of their six papers.

Attributes: PHLH Biomedical Determinants of Health

BIOL 220  (S) Field Botany and Plant Natural History

Cross-listings: BIOL 220 ENVI 220

Primary Cross-listing

This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. Lectures focus on the evolution of the land plants, the most recent and revolutionary developments in plant systematics and phylogeny, the cultural and economic uses of plants and how plants shape our world. The course covers the role of plants in ameliorating global climate change, their importance in contributing to sustainable food production and providing solutions to pressing environmental problems. Throughout we emphasize the critical role of biodiversity and its conservation. The labs cover field identification, natural history and the ecology of local species.

Class Format: both field and indoor laboratories

Requirements/Evaluation: Based on two hour exams, field quizzes, a final project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Biology majors, and Environmental Studies majors & concentrators

Expected Class Size: 24

Grading: no pass/fail option, yes fifth course option

Materials/Lab Fee: There is a charge for the lab manual ($25); the sketchbook ($7) and hand lens ($23) can be self-provided or purchased from the department.

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 220(D3) ENVI 220(D3)

Attributes: ENVI Natural World Electives EXPE Experiential Education Courses PHLH Nutrition, Food Security + Environmental Health

BIOL 222  (S) Essentials of Biochemistry  (QFR)

This course will explore the biochemistry of cellular processes and contextualize these processes in healthy and diseased states. Lecture topics in this one semester course will include the structure and function of proteins (enzymes and non-enzymatic proteins), lipids, and carbohydrates. Lectures will also survey the major metabolic pathways (carbohydrates, lipids, and amino acids) with particular attention to enzyme regulation and the integration of metabolism in different tissues and under different metabolic conditions. In the discussion/laboratory component of the course a combination of primary literature, hypothesis-driven exercises, problem solving, and bench work will be used to illustrate how particular techniques and experimental approaches are used in biochemical fields.

Class Format: in-person lecture and lab

Requirements/Evaluation: Four exams, in-class discussion of papers, short writing assignments and lab reports.

Prerequisites: BIOL 101 and CHEM 156; not open to students who have taken BIOL 321 or BIOL 322

Enrollment Limit: 18
Enrollment Preferences: seniors who need to fulfill the biochemistry requirement for premedical school

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major; cannot be counted towards the biology major in addition to either BIOL 321 or BIOL 322; cannot be counted towards the BIMO concentration

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: The laboratory program is quantitative covering data analyses, numerical transformations, graphical displays.

Not offered current academic year

BIOL 231  (F)(S)  Marine Ecology

Cross-listings: BIOL 231 MAST 311

Secondary Cross-listing

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skillset as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.

Class Format: including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: none

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course is only offered through the Williams-Mystic Maritime Studies Program located in Mystic, CT. satisfies the distribution requirement for the Biology major.

Distributions: (D3)

BIOL 305 (F) Evolution (QFR)
This course offers a critical analysis of contemporary concepts in biological evolution. We focus on the relation of evolutionary mechanisms (e.g., selection, drift, and migration) to long term evolutionary patterns (e.g., evolutionary innovations, origin of major groups, and adaptation). Topics include micro-evolutionary models, natural and sexual selection, speciation, the inference of evolutionary history, evolutionary medicine among others.
Requirements/Evaluation: independent research project, problem sets, participation in discussions and exams
Prerequisites: BIOL 102 and one 200 level BIOL course
Enrollment Limit: 24
Enrollment Preferences: Seniors and biology majors
Expected Class Size: 24
Grading: yes pass/fail option, yes fifth course option
Unit Notes: satisfies the distribution requirement for the Biology major
Distributions: (D3) (QFR)

BIOL 308 (S) Integrative Plant Biology: Fundamentals and New Frontiers
Plants are one of the most successful groups of organisms on Earth and have a profound impact on all life. Successful use of plants in addressing
global problems and understanding their role in natural ecosystems depends on fundamental knowledge of the molecular mechanisms by which they grow, develop, and respond to their environment. This course will examine the molecular physiology of plants using an integrative approach that considers plants as dynamic, functional units in their environment. Major emphasis will be on understanding fundamental plant processes, such as photosynthesis, growth and development, water transport, hormone physiology, and flowering, from the molecular to the organismal level. Environmental effects on these processes will be addressed in topics including photomorphogenesis, stress physiology, mineral nutrition, and plant-microbe interactions. Discussions of original research papers will examine the mechanisms plants use to perform these processes and explore advances in the genetic engineering of plants for agricultural, environmental, and medical purposes. Laboratory activities stress modern approaches and techniques used in investigating plant physiological processes.

Class Format: six hours per week
Requirements/Evaluation: short papers, lab reports and exams
Prerequisites: BIOL 101 and BIOL 102, or permission of instructor
Enrollment Limit: 24
Enrollment Preferences: Biology majors

BIOL 311 (F) Neural Systems and Circuits
Cross-listings: BIOL 311 NSCI 311
Primary Cross-listing
This course will examine the functional organization of the mammalian brain, emphasizing both neuroanatomy and neurophysiology. How do specific populations of neurons and their connections encode sensory information, form perceptions of the external and internal environment, make cognitive decisions, and execute movements? How does the brain produce feelings of reward/motivation and aversion/pain? How does the nervous system regulate homeostatic functions such as sleep, food intake, and thirst? We will explore these questions using a holistic, integrative approach, considering molecular/cellular mechanisms, physiological characterizations of neurons, and connectivity among brain systems. Journal article discussions will complement course topics, providing experience in reading, understanding, and critiquing primary research papers. Writing an original literature review article will provide experience in expository writing and anonymous peer review. Laboratory sessions will provide experience in examining macroscopic and microscopic neural structures, as well as performing experiments to elucidate the structure and function of neural systems using classical and cutting-edge techniques.
Requirements/Evaluation: Class participation, completion of labs, literature review assignment, hour exams, a final exam
Prerequisites: BIOL 212 (same as PSYC 212 or NSCI 201) or BIOL 205
Enrollment Limit: 24
Enrollment Preferences: Biology majors and Neuroscience concentrators
Expected Class Size: 24
Grading: no pass/fail option, no fifth course option
Unit Notes: does not satisfy the distribution requirement for the Biology major
Distributions: (D3)
This course is cross-listed and the prefixes carry the following divisional credit:
BIOL 311(D3) NSCI 311(D3)
Attributes: NSCI Group A Electives
Not offered current academic year

BIOL 312 (F) Sensory Biology
Cross-listings: NSCI 312 BIOL 312
Primary Cross-listing
How do animals sense properties of the physical world? How do they convert physical or chemical energy to a signal within a cell that carries information? How is that information represented? What are the limits on what can be sensed? We will look for answers to these questions by investigating the molecular and cellular mechanisms of sensory transduction and how these mechanisms constrain the types of information that the nervous system encodes and processes. We will also ask how natural selection shapes the type of sensory information that animals extract from the world, and what adaptations allow some species to have "special" senses. Some of the examples we will consider are: bat echolocation (hair cells in the ear), detecting visual motion (amacrine cells in the mammalian retina), the constant reshaping of the olfactory system (chemical mapping of odors), what makes a touch stimulus noxious, and enhanced color vision (in birds, bees, and shrimp). Laboratory exercises will focus on the nematode *C. elegans*, an important model system, to explore and extend how we understand touch, temperature sensation, chemosensation, and light sensation.

**Requirements/Evaluation:** Four take-home exams, an independent group research project (proposal, followed by results/discussion), presentation about a non-standard sensory system, many short online quizzes, and lab + class participation.

**Prerequisites:** BIOL 101 and either BIOL 212/NSCI 201 or BIOL 205

**Enrollment Limit:** 24

**Enrollment Preferences:** Preference to senior Biology majors who need a 300-level course; then to senior Neuroscience concentrators who need a Group A elective; then to Biology majors. Not open to students who have taken Biology 213.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**
NSCI 312(D3) BIOL 312(D3)

**Attributes:** BIMO Interdepartmental Electives NSCI Group A Electives

LAB Section: 03  T 1:00 pm - 3:50 pm  Damian Turner

**BIOL 314 (S) Neuroethology**

How does an animal experience its environment? What mechanisms allow an animal to select and generate behaviors? In this course we will use a comparative approach to examine how nervous systems have evolved to solve problems inherent to an animal’s natural environment. We will discuss how animals sense physical and chemical properties of their surroundings and convert this information to a signal encoded in their brain. We will
explore how nervous systems of diverse species are adapted to extract sensory information that is relevant to their survival—such as sound, light, and smell. We will also examine how neural circuits control muscles to generate motor behaviors such as locomotion and vocalization and how sensory information is integrated to influence behavior. To highlight the discovery process, we will read and discuss primary research articles that complement course content. During labs we will use a variety of approaches such as electrophysiology, optogenetics, behavior, and data analysis to understand sensory and motor systems in several different organisms.

**Requirements/Evaluation:** Participation in class and lab, several take-home exams, independent group research project and presentation, and short written class and lab assignments.

**Prerequisites:** BIOL 212 or BIOL 205

**Enrollment Limit:** 24

**Enrollment Preferences:** Senior, then junior, Biology majors and NSCI concentrators who need a 300-level course or a NSCI elective

**Expected Class Size:** 24

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D3)

**Attributes:** NSCI Group A Electives

**BIOL 315 (S) Microbiology: Diversity, Cellular Physiology, and Interactions**

The Covid pandemic and the alarming spread of antibiotic resistant bacteria are but two of the reasons for the resurgence of interest in the biology of viruses and microorganisms. This course will examine microbes from the perspectives of cell structure and function, genomics, and evolution. A central theme will be the adaptation of bacteria as they evolve to fill specific ecological niches, with an emphasis on microbe-host interactions that lead to pathogenesis. We will consider communication among bacteria as well as between bacteria and their environment. Topics include: microbial development, population dynamics, metagenomics, bioremediation, plant and animal defenses against infection, and bacterial strategies to subvert the immune system. We will also discuss a few viral examples, including SARS-CoV2, in the context of pathogen-host co-evolution and the immune system. In the lab, major projects will focus on the mammalian gut microbiome and the isolation and characterization of bacteria from natural environments. The lab experience will culminate in multi-week independent investigations. Readings will be comprised primarily of articles from the primary literature.

**Class Format:** lectures three hours a week and laboratory three hours a week

**Requirements/Evaluation:** three exams/writing assignments, responses to thought questions on readings, a lab report/notebook, and an oral presentation

**Prerequisites:** BIOL 202 or 203

**Enrollment Limit:** 24

**Enrollment Preferences:** senior and then junior Biology majors

**Expected Class Size:** 24

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** does not satisfy the distribution requirement for the Biology major

**Distributions:** (D3)

**BIOL 319 (S) Integrative Bioinformatics, Genomics, and Proteomics Lab (QFR)**

**Cross-listings:** BIOL 319  CSCI 319  CHEM 319  MATH 319  PHYS 319

Primary Cross-listing
What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

Class Format: The lab for this course will meet for two afternoons per week. Some lab sessions will be shorter than 3 hours.

Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Limit: 12

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 321 (F) Biochemistry I: Structure and Function of Biological Molecules (QFR)

Cross-listings: BIMO 321 BIOL 321 CHEM 321

Secondary Cross-listing

This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Prerequisites: BIOL 101, CHEM 200 and CHEM 201; or either CHEM 155 or 256 and CHEM 251

Enrollment Limit: 16/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 48

Grading: no pass/fail option, no fifth course option

Unit Notes: Cannot be counted towards the Biology major in addition to BIOL 222

Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 322  (S)  Biochemistry II: Metabolism  (QFR)
Cross-listings: BIOL 322 BIMO 322 CHEM 322

Secondary Cross-listing
This lecture course provides an in-depth presentation of the complex metabolic reactions that are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

Class Format: Lecture three hours per week and laboratory three hours per week.

Requirements/Evaluation: several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of data

Prerequisites: BIOL 101, plus either: CHEM 156 and CHEM 256, or CHEM 155 and CHEM 156, or CHEM 200 and CHEM 201, or permission of instructor

Enrollment Limit: 48
Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 48

Grading: no pass/fail option,  no fifth course option

BIOL 326  (S)  Cellular Assembly and Movement
This course will focus on how multi-protein complexes are assembled to control key cellular processes in eukaryotic systems: 1) protein sorting and trafficking, 2) establishment and maintenance of cell architecture, and 3) mitosis, cell migration and tissue morphogenesis that require coordination of
the membrane transport and cytoskeleton. The course will highlight involvement of these processes in pathological conditions. Laboratories will use mammalian tissue culture as a model system to study cellular functions. Important techniques in cell biology will be introduced in the first half of the semester; in the second half of the term, students will conduct a multi-week independent project. Textbook readings will be supplemented with primary literature.

**Class Format:** lectures, three hours a week; laboratory, three hours a week. The laboratory projects will require additional time outside of class hours.

**Requirements/Evaluation:** three exams, in-class discussion of papers, lab reports, an oral presentation and research paper based on an independent lab research project

**Prerequisites:** BIOL 202 or BIOL 212 or BIOL 222

**Enrollment Limit:** 24

**Enrollment Preferences:** senior and junior Biology majors

**Expected Class Size:** 24

**Grading:** no pass/fail option, yes fifth course option

### BIOL 329 (F) Conservation Biology

**Cross-listings:** BIOL 329 ENVI 339

**Primary Cross-listing**

Conservation Biology focuses on protection of the Earth's biodiversity. This course starts with an overview of biodiversity including patterns of species richness, causes of species loss (extinction), and the critical contributions of biodiversity to ecosystem function and human welfare. Then we analyze ways to conserve biodiversity at the genetic, population, species and community/ecosystem levels. Labs are field oriented, and focus on local New England communities and ecosystems. Labs emphasize knowing the dominant species in each system; they also stress how to collect and analyze the field data on ecological community structure and function that are critical to test hypotheses that relate to different conservation goals.

**Class Format:** lectures, discussions, and a weekly lab.

**Requirements/Evaluation:** Evaluation will be based on lab assignments and reports, discussion participation, two exams and an independent project.

**Prerequisites:** BIOL 203/ENVI 203 or BIOL 220 or BIOL 305 or permission of instructor.

**Enrollment Limit:** 24

**Enrollment Preferences:** Biology majors, Environmental Studies majors, seniors, and juniors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

**This course is cross-listed and the prefixes carry the following divisional credit:**

BIOL 330 (S) Genomes: Structure, Function, Evolution

Genome sequencing technologies have opened the “book of life” to biologists. But making sense of genomes is still a work in progress. This course will examine central features of genomes, their evolution, and their contribution to human diseases such as cancer. Genome biology is a new field, and this presents the opportunity to learn science as it is being done. Biologists working today started out knowing nothing about core features of genomes, such as why most of the DNA is repetitive, or why segments of genes get removed in the RNA, or why silenced genes wake up in cancer cells. They began to find meaning by adopting dual perspectives of function and neutral evolution. Students will learn to walk these same paths and learn to evaluate for themselves what genome complexity means. In lab, students will develop hands-on and computational skills for investigating genome structural variation, then apply them in the second half of the semester in independent lab investigations.

Class Format: lectures, three hours a week; laboratory, three hours a week.

Requirements/Evaluation: Written responses to readings in primary literature; three take-home written exams; two laboratory reports; oral presentation of an independent laboratory project.

Prerequisites: BIOL 202

Enrollment Limit: 24

Enrollment Preferences: Biology majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the biology major.

Distributions: (D3)

Attributes: BIGP Courses BIMO Interdepartmental Electives

BIOL 337 (F) Evolutionary Ecology (QFR)

Evolutionary ecology is an interdisciplinary field that integrates concepts in genetics, adaptation, and ecology to understand how evolution operates in the context of ecological communities. This course provides an overview of the discipline including foundational concepts in evolutionary demography, phenotypic plasticity, and population genetics. It also explores how breakthroughs in these topics provide a framework for advances in our understanding of the evolution of reproductive timing and ageing, interspecific interactions (e.g. competition, predation), cooperation, and altruism. The course combines lectures, readings, in-class discussion, and a lab section that includes a mixture of field, computer, and lab projects. Laboratories will give students practical, hands-on experience in how to develop, plan, and carry out evolutionary ecology research from start to finish.

Class Format: lecture, 3 hours per week; laboratory and discussion, 3 hours per week

Requirements/Evaluation: Evaluation will be based on lab assignments, two exams, discussion participation, and a written paper.

Prerequisites: BIOL 102, plus either BIOL 202 or BIOL 203 or equivalent

Enrollment Limit: 24

Enrollment Preferences: preference given to biology majors, seniors, and juniors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Unit Notes: Satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Evolutionary ecology uses concepts in genetics and ecology to understand how the frequency of alleles in a population changes over time. These changes are formalized in equations that describe these processes. Students will gain experience in utilizing these equations to describe, analyze, and predict the evolutionary outcome of ecological interactions for both theoretical and experimental purposes. Thus, the students will gain experience in solving systems of equations using algebra and in stat

Not offered current academic year

BIOL 407 (S) Neurobiology of Emotion

Cross-listings: BIOL 407 NSCI 347
Emotion is influenced and governed by a number of neural circuits and substrates, and emotional states can be influenced by memory, cognition, and many external stimuli. We will read and discuss articles about mammalian neuroanatomy associated with emotion as defined by classic lesion studies, pharmacology, electrophysiology, fMRI imaging, knockout and optogenetic mouse studies, for investigating neural circuit function in order to gain an understanding of the central circuits and neurotransmitter systems that are implicated in emotional processing. We will focus initially on the neural circuits involved in fear, as a model for how human and animal emotion and physiology is studied, with special sessions on emotional responses to music and art, as well as discussions about burgeoning neurobiological research into the emotion of disgust. The larger goal of the course is to give students opportunities and experience in critical evaluation and discussion of primary scientific literature, and to develop and refine strategies on how to use scientific evidence in building arguments in essays.

Requirements/Evaluation: class participation and several short papers
Prerequisites: BIOL212/NSCI201; open to juniors and seniors. Sophomores must get instructor's consent prior to enrolling.
Enrollment Limit: 12
Enrollment Preferences: senior Biology majors who have not taken a 400-level Biology course; then to eligible NSCI concentrators

BIOL 408 (S) RNA Worlds
RNA is known best as the message cells use to turn genes into proteins. Yet investigations of several unusual genetic phenomena over the past few decades did not find protein-coding genes, but instead uncovered non-coding RNAs with a cornucopia of functions. Today, biologists have begun to develop a framework for how RNA's non-coding functions play central roles in immune defense and genetic conflicts, in gene regulation and cancer. We will develop our own understanding of this middle world, of RNA's power to protect the genome and direct cellular processes, through reading and discussion of primary scientific literature. We will learn how this emerging perspective of RNA's non-coding functions helps to resolve mysteries of epigenetic inheritance and has opened the door to RNA therapeutics.
Class Format: discussion, three hours per week
Requirements/Evaluation: class participation and 4 three-page papers
Prerequisites: BIOL 202; open to juniors and seniors
Enrollment Limit: 12
Enrollment Preferences: senior Biology majors who have not taken a 400-level course
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option

BIOL 410 (S) Nanomachines in Living Systems
Through reading and discussing the primary literature, this course will explore how nanometer-sized biological molecules like proteins perform functions that require integration of information and transmission of force at much larger scales, microns and above. These nanoscale proteins will be considered as nanomachines that can transform a chemical energy into a mechanical one. We will focus on the cytoskeleton, which gives cells their shape, organizes the internal parts of cells and provides mechanical support for essential cellular processes like cell division and movement. An emphasis will be placed on how the biochemical properties of actin, actin-binding proteins and motors are used to generate mechanical force necessary for the respective biological function. Topics will include some controversial and emerging hypotheses in the field: sliding versus depolymerizing hypotheses for constriction of the contractile ring in cytokinesis, roles of cytoskeleton in pathogen entry and propagation, organelle dynamics, polarity establishment in cell migration, immunological synapse and neuronal function.

Requirements/Evaluation: class participation and several short papers
Prerequisites: BIOL 202; open to juniors and seniors
Enrollment Limit: 20
Enrollment Preferences: senior Biology majors who have not taken a 400-level course, then juniors
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Unit Notes: does not satisfy the distribution requirement for the Biology major
Distributions: (D3)
Attributes: BIMO Interdepartmental Electives
Not offered current academic year

BIOL 411  (F)  Developmental Biology: From Patterning to Pathogenesis
A small number of developmental regulators coordinate the interplay between cell proliferation and specification of cell fates during animal development. The genetic basis of many of the cancer and degenerative diseases are, in fact, due to these same developmental regulators whose expression is misregulated in the adult. Through the reading of primary literature, this course in developmental biology will examine the mechanisms of gene expression of key regulators, the biological processes they mediate in the embryo, and how they become misregulated in proliferative and degenerative diseases.

Requirements/Evaluation: bi-weekly tutorial papers, oral commentaries, and tutorial discussion
Prerequisites: BIOL 202
Enrollment Limit: 14
Enrollment Preferences: Senior Biology majors who have not taken a 400-level course followed by seniors then juniors in the major
Expected Class Size: 14
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
Attributes: BIMO Interdepartmental Electives
Not offered current academic year

BIOL 414  (F)  Life at Extremes: Molecular Mechanisms
All organisms face variability in their environments, and the molecular and cellular responses to stresses induced by environmental change often illuminate otherwise hidden facets of normal physiology. Moreover, many organisms have evolved unique molecular mechanisms, such as novel cellular compounds or macromolecular structural modifications, which contribute to their ability to survive continuous exposure to extreme conditions, such as high temperatures or low pH. This course will examine how chaperonins, proteases, and heat- and cold-shock proteins are regulated in response to changes in the external environment. We will then consider how these and other molecular mechanisms function to stabilize DNA and proteins- and, ultimately, cells and organisms. Other extreme environments, such as hydrothermal vents on the ocean floor, snow fields, hypersaline lakes, the intertidal zone, and acid springs provide further examples of cellular and molecular responses to extreme conditions. Biotechnological applications of these molecular mechanisms in areas such as protein engineering will also be considered. Class discussions will focus upon readings from the primary literature.

Class Format: discussion three hours per week
Requirements/Evaluation: several short papers, participation in class discussions and course notebook
**Prerequisites:** open to juniors and seniors who are Biology majors; all other students interested in this course should contact the professor; BIOL 202 recommended

**Enrollment Limit:** 12

**Enrollment Preferences:** senior Biology majors who have not taken a 400-level course; then junior Biology majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D3)

**Attributes:** BIMO Interdepartmental Electives  MAST Interdepartmental Electives

**BIOL 417 (S) Translational Immunology: From Bench to Bedside**

Recent advances in the field of immunology have led to the development of new approaches to prevent and treat diseases that affect millions of people worldwide. Drugs that modulate the body’s natural immune response have become powerful tools in treating major diseases--infection, autoimmunity and cancer. This course will use readings from the primary literature to explore central themes involved in translating basic research to new clinical and therapeutic approaches. Topics will include vaccine development, autoimmunity and cancer immunotherapy.

**Requirements/Evaluation:** Class participation and 4 essays

**Prerequisites:** BIOL 202; open to juniors and seniors

**Enrollment Limit:** 12

**Enrollment Preferences:** senior biology majors who have not taken a 400-level course; then juniors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**BIOL 419 (S) Secrets of Enzymes: Fidelity, Promiscuity, and Disease**

Living organisms have spent the past 4 billion years evolving proteins and enzymes that perform basic cellular functions to support life. Over time, duplications and mutations of these enzymes have led to novel reactions, pathways, and chemistries. To gain an appreciation for these molecular catalysts, we will start by considering how enzymes are synthesized and how errors are introduced and naturally corrected. We will then analyze the effects of beneficial errors on the evolution of new function and the effects of undesirable errors in human disease. The final section of this course will focus on how enzymes such as CRISPR/Cas9 act as ‘molecular scissors’ to cut DNA and how these enzymes can be used to correct errors. We will explore the implications of this field in active areas of biomedical research, including antibiotic resistance and personalized medicine. Discussions and writing assignments will focus on reading and critiquing the scientific literature.

**Class Format:** discussion three hours per week

**Requirements/Evaluation:** four 3- to 4-page papers and participation in discussions

**Prerequisites:** BIOL 202 recommended

**Enrollment Limit:** 12

**Enrollment Preferences:** senior Biology majors that have not had a 400-level course, followed by senior Biology majors, followed by junior Biology majors

**Expected Class Size:** 12
BIOL 421  (S)  Thermoregulation: From Molecules to Organisms

Thermal physiology involves the study of molecular events, organ systems, and organism-environmental interactions that are involved with heat production and temperature maintenance. The area of thermal physiology has been around for over 100 years. However, only in the last 5-7 years has the science progressed to understanding basic fundamental mechanisms for generating and regulating heat production. This tutorial will focus on four questions: 1) how do organisms generate heat? 2) how do organisms sense the temperature in the environment? 3) how do organisms integrate information about the environment (temperature, humidity, time of day, etc.) with internal information (deep body temperature, energy stores, etc.) to regulate their metabolic production of heat? 4) how do animals make “the decision” to enter a state of torpor?

Requirements/Evaluation:  five 4- to 5-page papers; five 1- to 2-page response papers; tutorial presentations; contribution to the intellectual enterprise

Prerequisites:  BIOL 205 or permission of instructor

Enrollment Limit:  10

Enrollment Preferences:  senior Biology majors that have not had a 400-level course, followed by senior Biology majors, followed by junior Biology majors

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Unit Notes:  does not satisfy the distribution requirement for the Biology major

Distributions:  (D3)

Attributes:  BIMO Interdepartmental Electives

Not offered current academic year

BIOL 425  (F)  Coevolution  (WS)

Coevolution, defined as reciprocal adaptation between species, is central to understanding biological phenomena ranging from global patterns of biodiversity to the molecular mechanisms of evolution. The focus of this tutorial will be on coevolution as a paradigm for understanding species diversification.

Requirements/Evaluation:  Evaluation will be based on 5 (4-5-page) papers, tutorial presentations, and the student’s effectiveness as a critic.

Prerequisites:  BIOL 203 or 305

Enrollment Limit:  10

Enrollment Preferences:  Senior biology majors

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Unit Notes:  satisfies the distribution requirement for the Biology major

Distributions:  (D3)  (WS)

Writing Skills Notes:  Each student will write five 4- to 5-page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write five 1-page critiques of their partners’ papers.

Not offered current academic year

BIOL 428  (S)  Forests of the Future--Understanding Global Change through 'Big Science' Experiments

Increases in atmospheric CO2 and warming temperatures associated with global climate change affect the growth and physiology of plants and microorganisms and the cycling and storage of carbon and nutrients within terrestrial ecosystems. These changes cross scale and encompass complex feedbacks that are challenging to predict and understand. Over the past several decades, scientists have used large-scale global change experiments to depict the future of organisms and ecosystems in a CO2-enriched, warmer world. In this course, we will trace the progress of these
experiments and evaluate our understanding of the effect of global changes on plant growth and physiology, microbial community composition and activity, and ecosystem nutrient cycling processes. We will then consider the interactive effects of multi-factor global changes and assess the promises and challenges of interpreting biological responses at the ecosystem level. Finally, we will investigate how experimental results can be integrated within models that describe and predict ecosystem function at a global scale. Throughout the course, we will consider how understanding gained from manipulative experiments can be used to inform and prioritize climate change mitigation strategies. Discussions and writing assignments will focus on reading and critiquing the scientific literature. Writing assignments will include two short writing assignments (3 pages each) and a final research proposal (6 pages), as well as formal written peer review. Students will gain experience revising scientific writing.

Requirements/Evaluation: Writing assignments will include two short writing assignments (3 pages each) and a final experimental/grant proposal (6 pages), as well as formal written peer review. Students will gain experience revising scientific writing.

Prerequisites: BIOL203 (Ecology) or BIOL302 (Communities and Ecosystems) or BIOL329 (Conservation Biology)

Enrollment Limit: 12

Enrollment Preferences: Senior Biology majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

BIOL 435  (F)  Causes of the obesity epidemic

The prevalence of a host of metabolic diseases has increased dramatically in recent decades. The causes underlying these increases remain hotly contested. During this course we will discuss primary literature to better understand the mechanisms by which our body regulates energy metabolism and how this is shaped by our brain, genetics and evolution. Subsequently, we will explore how modern society has changed our metabolic environment and try to figure out what regulatory mechanisms should be targeted to reverse the obesity epidemic.

Requirements/Evaluation: Evaluation will be based on four 4-5 page papers and class participation.

Prerequisites: BIOL 205 or BIOL 212 / NSCI 201 or Permission of Instructor.

Enrollment Limit: 24

Enrollment Preferences: Senior Biology majors who have not taken a 400-level course, then junior Biology majors.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Not offered current academic year

BIOL 436  (F)  Metabolites as Messengers

Beyond the genome, transcriptome, and proteome is the metabolome, the suite of small-molecule metabolites present in a biological sample. These molecules are not simply the products of the proteome nor a collection of cellular fuels and wastes. In this seminar, we will investigate metabolites as signals that influence cellular processes. Biochemistry and molecular biology textbooks often emphasize the proteins that mediate cellular communication. Of course, specialized metabolites like neurotransmitters and certain hormones are well known to regulate information flow between cells. But what about molecules that participate in the metabolic processes of almost every cell--how can these intermediary metabolites be used as signals? How do they communicate acutely and with specificity? What role do they play in sensing (or promoting) environmental change? And how can metabolites be regulated to override their typical fates in metabolic pathways and serve as signals? We'll examine these questions and more at the levels of inter-organellar, intercellular, and inter-organismal metabolic communication by reading the primary scientific literature together.

Familiarity with typical mechanisms of cellular communication and/or physiology (BIOL 205) is recommended but not required.

Class Format: Discussion, three hours per week

Requirements/Evaluation: class participation and three to five papers of length 3-5 pages each

Prerequisites: BIOL 222 or 322; open to juniors and seniors

Enrollment Limit: 12

Enrollment Preferences: senior Biology majors who have not taken a 400-level course

Expected Class Size: 12
BIOL 437  (F)  Neural flexibility: plasticity, modulation and evolution

Animals must adapt their behaviors to match their environment in order to survive and reproduce. How does the nervous system mediate behavioral change that occurs in seconds, hours, months, or millions of years? In this course we will use a comparative approach to explore how neural circuits control behavioral flexibility over a range of timescales. We will first discuss circuits that control behavioral switches that occur very rapidly based on environmental and social stimuli. Next, we will consider the role that internal state and identity play in modulating neuronal circuits over an organism’s lifetime to influence behavioral decisions. Finally, we will examine how evolution tinkers with neural circuits to lead to behavioral change over very long timescales. Throughout the course we will explore how modifications to neural circuits—including connectivity, synaptic plasticity, neuromodulation and neuron physiology—can lead to differences in behavior and ask if there are connections between common mechanisms underlying behavioral change across timescales. Discussions and assignments in this course will focus on reading and critically evaluating primary scientific literature.

Requirements/Evaluation: class participation and three to five papers of length 3-5 pages each
Prerequisites: BIOL 212 or BIOL 205
Enrollment Limit: 12
Enrollment Preferences: senior Biology majors who have not taken a 400-level course
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
Attributes: NSCI Group A Electives

BIOL 454  (F)  Climate Change Physiology

Cross-listings: ENVI 454  BIOL 454

Primary Cross-listing

Animals are increasingly faced with rapid climate change driven by human activities across the globe. How do they cope with challenges imposed by increasing temperature? And, how might physiological mechanisms at the organismal level scale up to influence population processes? This course uses an integrative approach to understand the impacts of climate change at multiple levels of biological organization in both terrestrial and aquatic environments. We examine physiological mechanisms underlying animal responses and the role of acclimation versus adaptation in coping with rapidly shifting thermal environments. We then consider the impacts of these mechanisms on whole organism performance and their consequences for population persistence. Finally, we learn the analytical tools used to incorporate physiological mechanisms into ecological models to predict future responses to global climate change. Class discussions will focus on readings drawn from the primary literature.

Requirements/Evaluation: Evaluation will be based on class participation and several short papers.
Prerequisites: BIOL 203 or BIOL 205, or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Biology seniors who have not yet taken a 400 level course
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Unit Notes: Satisfies the distribution requirement for the Biology major.

**BIOL 455 (S) Neural Regeneration**

**Cross-listings:** BIOL 455 NSCI 455

**Primary Cross-listing**

Injury to the human nervous system can cause lasting impairment, but non-mammalian animals have prodigious capacity to regenerate neurons, regrow axons, and repair scars. What accounts for these differences? Regeneration can occur in multiple modes: replacement of injured neurons, repairs such as axonal regrowth to reconnect to a target structure, or repurposing existing neurons for new tasks through neural plasticity. We will explore the molecular foundations that underlie neuronal proliferation, neural plasticity, and inflammatory responses. We will consider the potential for translating these findings to inform treatments for humans who suffer from neural injury or neurodegenerative disease. Class discussions will focus on readings from the primary literature.

**Class Format:** Discussion, 3 hours per week

**Requirements/Evaluation:** Evaluation will be based on class participation, brief weekly responses, and four short research proposals.

**Prerequisites:** BIOL 212/NSCI 201 or permission of instructor.

**Enrollment Limit:** 10

**Enrollment Preferences:** Biology seniors who have not yet taken a 400 level course and Neuroscience senior concentrators who need a Group A elective.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

**BIOL 477 (S) Evolution of Species Coexistence**

How can two or more species coexist if they compete for the same resources? Or when one preys on the other? Understanding species coexistence has been central to ecology since its inception. The question is important because species diversity is a defining characteristic of natural ecosystems. This course provides an in-depth look into the theoretical and empirical evidence for species coexistence. It also explores how the evolution of interacting species can change the identity and number of species in a community thereby playing a key role in determining and maintaining species diversity. Finally, the course will address how this body of theory and empirical evidence can be used to predict how we might expect diversity to change with increases in human-caused disruptions to the natural environment.

**Requirements/Evaluation:** Evaluation will be based on participation in discussions, several short papers, and presentations.

**Prerequisites:** BIOL/ENVI 203

**Enrollment Limit:** 12

**Enrollment Preferences:** Biology seniors who have not yet taken a 400 level course

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

Not offered current academic year

**BIOL 493 (F) Senior Thesis Research: Biology**

Each student prepares a thesis under the supervision of a member of the department. Thesis work can begin either in the spring of the junior or the fall
of the senior year, and includes the Winter Study period of the senior year. The number of Biology Department faculty available to mentor research students and the number of students each can accommodate in their lab vary from year to year. Although the department will make every effort to provide an opportunity for students to conduct Honors research, you should be aware that it may not be possible to assign all applicants to a laboratory. This is part of a full-year thesis (493-494).

Requirements/Evaluation: Written thesis, poster presentation at the end of the year, oral presentation in October of the senior year.

Prerequisites: Students must apply during the first week in February of their junior year to pursue an Honors thesis in Biology.

Enrollment Limit: 30

Enrollment Preferences: Senior Biology majors

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Unit Notes: Senior majors are required to participate in Biology Colloquium, which is scheduled for most Fridays at 1:10 pm.

Distributions: (D3)

Fall 2023

BIOL 13 (W) Intro to Animal Tracking
This course is an introduction to the ancient art and science of animal tracking, and its use for ecological inventory. Participants will deepen their skills as naturalists, their awareness of the natural world, and discover that even the greens at Williams College are abundant with wildlife. Students will have field time in class at Hopkins Forest as well as thorough independent study at a convenient outdoor location of each student’s choosing. Basic concepts of animal tracking, its history and use by indigenous people throughout the world will be discussed through video and slide show.
Requirements/Evaluation: Paper(s) or report(s); Presentation(s); Performance(s); Creative project(s); Other: Field test of tracking skills
Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: seniors to freshman
Expected Class Size: NA
Grading: pass/fail only
Unit Notes: Dan Yacobellis has been working with school children, teens and adults since 1997. Dan Created Tamakoce wilderness Programs in 2006 and runs programs on topics including tracking, friction fire making and other primitive skills.
Materials/Lab Fee: $80
Attributes: EXPE Experiential Education Courses  SLFX Winter Study Self-Expression  STUX Winter Study Student Exploration  WELL Winter Study Wellness
Not offered current academic year

BIOL 22 (W) Introduction to Biological Research
An experimental research project will be carried out under the supervision of the Biology Department. It is expected that the student will spend 20 hours per week in the lab at a minimum, and a 10-page written report is required. This experience is intended for, but not limited to, first-year students and sophomores, and requires the permission of the instructor.
Class Format: Independent study
Requirements/Evaluation: A 10-page paper
Prerequisites: None. Students may not register until they have a confirmed placement in a Williams Biology lab. The instructor will work with student to identify possible mentors, but it is the student's responsibility to talk to the mentor and get approval.
Enrollment Limit: 18
Enrollment Preferences: First years and sophomores
Expected Class Size: NA
Grading: pass/fail only

Not offered current academic year

BIOL 23 Tropical Ecology: From the Andes to the Amazon basin
One of the most striking patterns in biogeography is the increasing level of species richness as one moves from the poles to the equator. As the name implies, Ecuador straddles the equator, but perhaps less well known is that Ecuador includes an altitudinal gradient that ranges from the high Andes (over 20,000 feet) to the Amazon basin. This combination of equatorial proximity and vertical relief has generated one of the most bio-diverse regions in the world - Ecuador is home to over 23 thousand species and makes up about 6% of the world's diversity in an area approximately the size of Colorado. This course will include a 10-day trip to Ecuador where we will visit three distinct habitats - the páramo and Polylepis "forests" of the high Andes, mid-elevation tropical cloud forest, and lowland tropical rain forest. Through a combination of lectures, field trips, guest seminars, and independent exploration, this course will introduce students to the natural history and ongoing research taking place in these ecosystems. A typical day during our trip to Ecuador will involve a morning natural history hike, with opportunity for independent exploration in the afternoon. Evenings will involve either night hikes, or seminar presentations by resident researchers. During our trip, students will collect data for an independent project on self-selected topics that could include, for example, altitudinal gradients in hummingbird diversity, the pros and cons of ecotourism in Ecuador, or analysis of camera-trap data in the Amazon basin. Upon return to campus, students will complete their independent project analysis which they will

Winter Study ----------------------------------------------------------------------------
use as the basis for a short report and final poster presentation.

Requirements/Evaluation: Short paper and final project or presentation.

Prerequisites: None

Enrollment Limit: 6

Enrollment Preferences: By interview with preference given to students that have taken BIOL 203

Expected Class Size: 6

Grading: TRVL Winter Study Travel Course

Not offered current academic year

BIOL 24 Introduction to Ecology and Evolutionary Biology Research

An experimental research project in ecology/evolutionary biology will be carried out under the supervision of the Biology Department. It is expected that the student will spend 20 hours per week in the lab at a minimum, and a 10-page written report is required. This experience is intended for, but not limited to, first-year students and sophomores, and requires the permission of the instructor.

Requirements/Evaluation: A 10-page paper.

Prerequisites: None. Students may not register until they have a confirmed placement in a Williams Biology lab. The instructor will work with student to identify possible mentors, but it is the student's responsibility to talk to the mentor and get approval.

Enrollment Limit: 12

Enrollment Preferences: First years and sophomores

Expected Class Size: 8

Grading: Not offered current academic year

BIOL 27 Introduction to Molecular and Cell Biology and Biochemistry Research

An experimental research project in molecular or cellular biology/biochemistry will be carried out under the supervision of the Biology Department. It is expected that the student will spend 20 hours per week in the lab at a minimum, and a 10-page written report is required. This experience is intended for, but not limited to, first-year students and sophomores, and requires the permission of the instructor.

Requirements/Evaluation: A 10-page paper.

Prerequisites: None. Students may not register until they have a confirmed placement in a Williams Biology lab. The instructor will work with student to identify possible mentors, but it is the student's responsibility to talk to the mentor and get approval.

Enrollment Limit: 12

Enrollment Preferences: First years and sophomores

Expected Class Size: 8

Grading: Not offered current academic year

BIOL 28 Introduction to Research in Neuroscience and Organismal Biology

An experimental research project in neurobiology/organismal biology will be carried out under the supervision of the Biology Department. It is expected that the student will spend 20 hours per week in the lab at a minimum, and a 10-page written report is required. This experience is intended for, but not limited to, first-year students and sophomores, and requires the permission of the instructor.

Requirements/Evaluation: A 10-page paper.

Prerequisites: None. Students may not register until they have a confirmed placement in a Williams Biology lab. The instructor will work with student to identify possible mentors, but it is the student's responsibility to talk to the mentor and get approval.

Enrollment Limit: 12

Enrollment Preferences: First years and sophomores

Expected Class Size: 8
BIOL 31 (W) Senior Thesis: Biology
Continuation of Senior Honors thesis research. Required of all thesis students.

Prerequisites: Honors thesis student
Enrollment Limit: 33
Enrollment Preferences: To be taken by students registered for Biology 493, 494.
Expected Class Size: NA
Grading: pass/fail only
Attributes: EXPE Experiential Education Courses STUX Winter Study Student Exploration

BIOL 99 (W) Independent Study: Biology
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

Not offered current academic year
CHEMISTRY (Div III)

Chair: Professor Thomas Smith

- Ben L. Augenbraun, Assistant Professor of Chemistry
- Anthony J. Carrasquillo, Assistant Professor of Chemistry
- Stephanie Christau, Visiting Assistant Professor of Chemistry
- Amy Gehring, Philip and Dorothy Schein Professor of Chemistry, Director of the Science Center
- Christopher Goh, Associate Dean for Institutional Diversity, Equity and Inclusion, Professor of Chemistry; affiliated with: Institutional Diversity, Equity, and Inclusion, Chemistry
- Sarah L. Goh, Professor of Chemistry
- Kerry-Ann Green, Assistant Professor of Chemistry; on leave 2023-2024
- Katie M. Hart, Assistant Professor of Chemistry
- Michael H. Ihde,
- Jenna MacIntire, Lecturer in Chemistry
- Lee Y. Park, William R. Kenan, Jr. Professor of Chemistry; on leave 2023-2024
- Enrique Peacock-López, Halford R Clark Professor of Natural Sciences
- Bob Rawle, Assistant Professor of Chemistry
- Jennifer K. Rosenthal, Instructor in Chemistry
- Thomas E. Smith, Chair and J. Hodge Markgraf ’52 Professor of Chemistry
- Laura R. Strauch, Lecturer in Chemistry
- B Thuronyi, Assistant Professor of Chemistry
- Amanda K. Turek, Assistant Professor of Chemistry

MAJOR

Through a variety of individual courses and sequential programs, the department provides an opportunity for students to explore the nature and significance of chemistry, an area of important achievement in our quest for knowledge about ourselves and the world around us. The student of chemistry is able to become aware of the special viewpoint of chemists, the general nature of chemical investigation, some of its important results, how these results are expressed, and something of their significance within the fields of science and in the area of human endeavor as a whole. The Chemistry major provides excellent preparation for graduate study in chemistry, biochemistry, chemical engineering, environmental science, materials science, medicine, and the medical sciences.

A major in chemistry can be achieved in several ways, preferably beginning in the student’s first year at Williams, but also beginning in the sophomore year. For students who are interested in fulfilling pre-medical requirements and/or pursuing study abroad, we strongly recommend consultation with the chemistry department as early as possible in order to plan a course of study. Building on a foundation in general chemistry, organic chemistry, and physical chemistry, a student elects additional advanced courses to complete a major that is consistent with their background in other sciences, interests, and goals. A student’s program can emphasize any subdiscipline of chemistry including biochemistry, environmental, inorganic, materials, organic, and physical chemistry. Students considering a major in chemistry should consult with a member of the department as early as possible in order to plan a program which best suits their interests and abilities and which makes full use of their previous preparation.

For students beginning their chemistry studies in Fall 2023 or later.

Most students will begin their study in the department in Chemistry 101 (Concepts of Chemistry), which may be taken in the fall or the spring semester. For students with little or no high school chemistry, we offer Chemistry 100 (Chemistry Matters) in the fall semester as preparation for Chemistry 101 in the spring semester. All students interested in taking Chemistry 100 or Chemistry 101 must complete a brief departmental survey to assist in determining the best first semester placement. After Chemistry 101, students will take Chemistry 200 (Advanced Concepts in Chemistry) and Chemistry 201 (Introduction to Organic Chemistry), in either order. After completing these courses, students can move into elective courses.
Completion of a Chemistry major requires nine semester chemistry courses beginning with Chemistry 101. Chemistry 100 can count as one of these courses. Alternatively, two approved courses from adjacent sciences (those with significant chemical and/or quantitative content) from Biology, Computer Science, Geosciences, Mathematics, Physics, or Statistics can count towards one of their required Chemistry credits. Only one course designated as pass/fail may be counted towards the major. Chemistry 242 (Intermediate Organic Chemistry) is required for the major, as is at least one course selected from Chemistry 361, 363, 364, 366, or 367. Starting at the 300 level, at least three of the courses taken must have a laboratory component. The specific courses selected, will depend on each student’s future plans and interests, and can be determined in consultation with the chair or major advisor. In addition, the department has a number of “Independent Research Courses” which, while they do not count toward completion of the major, provide a unique opportunity to pursue an independent research project under the direction of a faculty member.

**Required Foundational Courses**

- 101 Concepts of Chemistry
- 200 Advanced Chemical Concepts
- 201 Organic Chemistry: Introductory Level
- 242 Organic Chemistry: Intermediate Level (required for the major)

**For students who began their chemistry studies in Fall 2022 or earlier.**

All students begin their study in the department with either Chemistry 151, 153, or 155 in the fall semester. Placement at the introductory level is based upon responses on the departmental survey and consultation with the faculty; results of the College Board Advanced Placement Test or the International Baccalaureate Exam are also taken into account.

The first year is completed with Chemistry 156. In the second year at the introductory level, students take Chemistry 251 and Chemistry 256 (those students who complete 155 are exempted from 256). Completion of a Chemistry major requires either nine semester chemistry courses or eight semester chemistry courses plus two approved courses from adjacent sciences (those with significant chemical and/or quantitative content) from Biology, Computer Science, Geosciences, Mathematics, Physics, or Statistics. Only one course designated as pass/fail may be counted towards the major. For all majors, at least one must be selected from Chemistry 361, 363, 364, 366, or 367. Starting at the 300 level, at least three of the courses taken must have a laboratory component. The specific courses selected, will depend on each student’s future plans and interests, and can be determined in consultation with the chair or major advisor. In addition, the department has a number of “Independent Research Courses” which, while they do not count toward completion of the major, provide a unique opportunity to pursue an independent research project under the direction of a faculty member.

**Foundational Courses**

**Second Year**

*Fall: 251 Organic Chemistry: Intermediate Level*

*Spring: 256 Advanced Chemical Concepts (or 300-level if completed 155)*

**Elective Courses**

- 319 Integrative Bioinformatics, Genomics, and Proteomics Lab
- 321 Biochemistry I-Structure and Function of Biological Molecules
- 322 Biochemistry II-Metabolism
- 324 Enzyme Kinetics and Reaction Mechanisms
- 326 Chemical and Synthetic Biology
- 335 Inorganic/Organometallic Chemistry
- 336 Materials Chemistry
- 338 Bioinorganic Chemistry: Metals in Living Systems
- 341 Toxicology and Cancer
- 342 Synthetic Organic Chemistry
- 343 Medicinal Chemistry
- 344 Physical Organic Chemistry
For the purpose of assisting students in selecting a program consistent with their interests and possible continuation of their studies at the graduate level, the following groupings of electives and faculty advisors are suggested. However, a case can be made for selecting courses from the different groups.

**Biochemistry:** Chemistry 321, Chemistry 322, Chemistry 324, Chemistry 326, Chemistry 341, Chemistry 364, Chemistry 367. Students interested in biochemistry should consult with Professors Gehring, Hart, Rawle, or Thuronyi.

**Environmental Chemistry:** Chemistry 363, Chemistry 361, Chemistry 364, Chemistry 366. Students interested in environmental chemistry should consult with Professor Carrasquillo.

**Inorganic Chemistry:** Chemistry 335, Chemistry 336, Chemistry 338, Chemistry 361, Chemistry 364, Chemistry 366. Students interested in inorganic chemistry should consult with Professors C. Goh, Green, or Park.

**Materials Chemistry:** Chemistry 335, Chemistry 336, Chemistry 348, Chemistry 361, Chemistry 364, Chemistry 366. Students interested in materials science should consult with Professors S. Goh or Park.

**Organic Chemistry:** Chemistry 341, Chemistry 342, Chemistry 343, Chemistry 344, Chemistry 348, Chemistry 363, Chemistry 364, Chemistry 361, Chemistry 366. Students interested in organic chemistry should consult with Professors S. Goh, Green, Smith, Thuronyi, or Turek.

**Physical Chemistry:** Chemistry 361, Chemistry 364, Chemistry 366, Chemistry 368T. Students interested in physical chemistry should consult with Professors Augenbraun, Carrasquillo, or Peacock-López.

While any accepted route through the major would permit a student to proceed to graduate study in chemistry, four electives should be considered a minimum, and at least a semester of research is strongly recommended.

The department’s curriculum is approved by the American Chemical Society (ACS), a professional body of academic, industrial, and research chemists. The ACS suggests the following courses for someone considering graduate study or work in chemistry or a related area:

For students beginning in 2023 or later: CHEM 101, CHEM 200, CHEM 201, CHEM 242
For students beginning in 2022 or earlier: CHEM 151, CHEM 156, CHEM 251, CHEM 256

At the upper level, the ACS recommends 321, 335, 364, (one of 361, 366 or 367) and at least 3 courses (all of which must have a laboratory component or at least one must be a research course of 393 or above) from our remaining upper level electives: 319, 322, 324, 326, 336, 341, 342, 343, 344, 348, 361, 363, 366, 367, 368T, 393, 394, 397, 398, 493, 494, 497, 498, BIMO 401. Students are strongly encouraged (though not required) to pursue independent research in some form. In addition, students have also completed 2 semesters of calculus and 2 semesters of physics. Students completing these requirements can be designated Certified ACS Majors.

**BIOCHEMISTRY AND MOLECULAR BIOLOGY (BIMO)**

Students interested in Biochemistry and Molecular Biology should consult with the general statement under the Biochemistry and Molecular Biology Program (BIMO) in the Courses of Instruction. Students interested in completing the BIMO program are also encouraged to complete the biochemistry courses within the chemistry major by taking 321, 322, 324, 326, and 367 in addition to the first and second year required courses.

**BIOINFORMATICS, GENOMICS, AND PROTEOMICS (BiGP)**
Students interested in Bioinformatics, Genomics, and Proteomics should consult the general statement under Bioinformatics, Genomics, and Proteomics in the Courses of Instruction. Students interested in these areas are also encouraged to complete the biochemistry courses within the chemistry major by taking 319, 321, 322, 324 and 367 in addition to the first and second year required courses.

THE DEGREE WITH HONORS IN CHEMISTRY
The degree with honors in Chemistry provides students with an opportunity to undertake an independent research project under the supervision of a faculty member, and to report on the nature of the work in two short oral presentations and in a written thesis.

Chemistry majors who are candidates for the degree with honors take the following in addition to a major outlined above:
Chemistry 493-W31-494 Senior Research and Thesis

The principal considerations in admitting a student to a program of independent research are mastery of fundamental materials and skills, ability to pursue independent study successfully, and demonstrated student interest and motivation. In addition, to enroll in these courses leading to a degree with honors, a student must have at least a B- average in all chemistry courses or the permission of the chair. At the end of the first semester of the senior year, the department reviews the student’s progress and determines whether the student is a candidate for a degree with honors. The designation of a degree with honors in Chemistry or a degree with highest honors in Chemistry is based primarily on a departmental evaluation of the accomplishments in these courses and on the quality of the thesis. Completion of the research project in a satisfactory manner and preparation of a well-written thesis usually results in a degree with honors. In cases where a student has demonstrated unusual commitment and initiative resulting in an outstanding thesis based on original results, combined with a strong record in all of their chemistry courses, the department may elect to award a degree with highest honors in Chemistry.

EXCHANGE AND TRANSFER STUDENTS
Students from other institutions wishing to register for courses in chemistry involving college-level prerequisites should do so in person with a member of the Chemistry Department. Registration should take place by appointment during the spring semester prior to the academic year in which courses are to be taken. Students are requested to have with them transcripts of the relevant previous college work.

COURSES FOR NON-MAJORS WITH NO PREREQUISITES
Students with principal interests outside of the sciences may extend a secondary school foundation in chemistry by electing a basic two-semester introductory course of a general nature or they may elect semester courses designed for non-majors. All courses in chemistry satisfy the divisional distribution requirement.

STUDY ABROAD
Students who wish to complete a chemistry major (or chemistry requirements for pre-medical study) as well as to study abroad during their junior year are encouraged to begin taking chemistry in their first semester at Williams, and should consult with members of the department as early as possible.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department. We can give provisional approval in some cases if enough detail is available, but we always ask to see the details after the course is completed before signing off on the major credit.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study abroad?
Course title and description, complete syllabus, including readings/assignments, and complete description of laboratory program. The biggest question is whether or not there is a lab component of the course and whether it is sufficient to fulfill the equivalent lab experience of Williams courses.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No official restrictions, but we advise our students to take the majority of their chemistry courses at Williams.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
Yes. We have several special requirements. Only one non-lab class can be used toward the upper-level major requirements. This is usually the restriction that causes difficulty with study abroad—where appropriate lab courses may not be available. One of the lab courses must also meet our departmental “quantitative requirement.” In principle, this could be met by a course taken abroad, but we would likely be more conservative in authorizing this equivalency.

Are there specific major requirements that cannot be fulfilled while on study away?
No. In principle, all major requirements could be filled abroad, but laboratory programs abroad are not always sufficiently rigorous to meet our standards. We look for at least 40 hours of wet-lab time for the lab component. Importantly, this cannot be work in a professor’s research lab, but must be “exercises” giving our students practice with standard techniques and methods of analysis.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. The lab requirements that I’ve mentioned above are the main complicating factors. Also our first two years of (“introductory”) chemistry courses are taught in an unconventional way. If a student had not yet completed all four of those courses before studying abroad, they would need to be aware of special timing that might complicate things. For our first two years of instruction, we teach one semester of introductory chemistry followed by two semesters of organic chemistry, and top things off with a final semester of a course that is somewhat specific to Williams. There are ways to take “equivalent” courses elsewhere, but we would need to work very closely with the student to ensure that all of the pieces fit together appropriately.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date, but there may have been times when the lab component of a course was not sufficient and we were only able to assign major credit for a non-lab course instead of a course-with-a-lab.

---

**CHEM 100 (F) Chemistry Matters (QFR)**

Chemistry matters! From fueling the world’s economy to preventing the next pandemic to forecasting future climate change, chemistry touches all aspects of daily life. This course provides an introduction to chemical principles and applications for students with little or no high school chemistry background. Through the lens of contemporary issues and applications (e.g. energy, environment, materials, medicine, etc.), students will be introduced to concepts fundamental to studying matter at the molecular level. Particular emphasis will be placed on skills essential for students to understand chemistry in these contexts, including quantitative reasoning and the development of chemical literacy and intuition. Laboratory meetings will be used to reinforce lecture material through experimentation at the bench and active learning exercises.

**Class Format:** lecture, three times per week and laboratory, three hours per week

**Requirements/Evaluation:** problem set assignments, laboratory work and analysis, quizzes/exams and a final assessment

**Prerequisites:** Students are required to take the online Chemistry Placement Survey prior to registering for the course (chemistry.williams.edu/placement).

**Enrollment Limit:** 32; 16/lab

**Enrollment Preferences:** First-year students with little or no high school chemistry experience.

**Expected Class Size:** 32

**Grading:** yes pass/fail option, no fifth course option

**Unit Notes:** CHEM 100 may be taken concurrently with MATH 102—see under Mathematics; CHEM 100 or its equivalent is a prerequisite to CHEM 101.

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This course fulfills the QFR requirement with regular problem sets and in class activities in which quantitative/formal reasoning skills are practiced.

---

**CHEM 101 (F)(S) Concepts of Chemistry (QFR)**

This course broadens and deepens the foundation in chemistry of students who have had one or more years of chemistry at the high school level. Most students begin study of chemistry at Williams with this course. Familiarity with stoichiometry, basic concepts of equilibria, the model of an atom,
Lewis structures and VSEPR, and gas laws is expected. Principal topics for this course include modern atomic theory, molecular structure and bonding, states of matter, chemical equilibrium (acid-base and solubility), and an introduction to atomic and molecular spectroscopies. Laboratory periods will largely focus on experiment design, data analysis, literature, scientific writing, ethics, and other skills critical to students' development as scientists. The course is of interest to students who anticipate professional study in chemistry, related sciences, or one of the health professions, as well as to those who want to explore the fundamentals of chemistry as part of their general education. This course may be taken pass/fail; however, students who are considering graduate study in science or in the health professions should elect to take this course for a grade.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: problem sets and/or quizzes, laboratory work, and exams

Prerequisites: Students are required to take the online Chemistry Placement Survey prior to registering for the course (chemistry.williams.edu/placement).

Enrollment Limit: 45; 16/lab

Enrollment Preferences: first-year students

Expected Class Size: 45/lecture

Grading: yes pass/fail option, no fifth course option

Unit Notes: CHEM 101 or its equivalent is a prerequisite for both CHEM 200 and Chem 201 and is required for the BIMO concentration.

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.

Attributes: BIMO Required Courses

CHEM 114 (S) The Science Behind Materials: Shaping the Past and Future of Society (QFR)

We are surrounded by materials. They have fulfilled human needs since ancient times. From Phoenician glass to flexible OLED displays, materials have impacted society and changed the way humans lead their lives. What makes materials the way they are? Why are some brittle while others are ductile? How can we design materials with specific properties that will solve tomorrow's problems? To answer these questions, we have to think about materials at the atomic scale, looking at how their smallest building blocks organize into specific structures. In this course, we will explore the relationships between structure, processing, and properties for a range of materials including metals, ceramics, polymers, and composites. We will talk about some of the cutting-edge research that materials scientists are working on today, concluding with an outlook to potential applications of emerging technologies.
CHEM 115  (F)  AIDS: The Disease and Search for a Cure

Cross-listings: STS 115 CHEM 115

Primary Cross-listing

Since the discovery of the human immunodeficiency virus (HIV-1) in 1983, modern techniques of molecular biology have revealed much about its structure and life cycle. The intensity of the scientific investigation directed at HIV-1 is unprecedented in history. We now know more about this virus than any other pathogen. However, the early optimism concerning the prospects for an effective AIDS vaccine has not yet materialized, and HIV strains that are resistant to drug therapies are common. We are now four decades into the AIDS pandemic, and the World Health Organization estimates that there are more than 38 million HIV-infected persons worldwide. After an introduction to chemical structure, we examine the molecular biology of the HIV virus, the molecular targets of anti-HIV drugs, and the prospects for a cure. We look at how HIV-1 interacts with the human immune system and discuss strategies for developing an effective HIV vaccine.

Class Format: three hours per week

Requirements/Evaluation: problem sets, a midterm, quizzes, a final exam, and a presentation/discussion

Prerequisites: none; designed for the non-science major who does not intend to pursue a career in the natural sciences

Enrollment Limit: 32

Enrollment Preferences: seniors, juniors, sophomores, then first-year students

Expected Class Size: 32

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 115(D2) CHEM 115(D3)

Attributes: PHLH Biomedical Determinants of Health

Fall 2023

LEC Section: 01    MWF 11:00 am - 12:15 pm     Amy Gehring

CHEM 117  (S)  Roses are Red, Violets are Blue: The Origins, Perception, and Impact of Color  (QFR)

Have you ever been tickled pink? Felt blue? Seen red?, Been green with envy? The course will consider color, starting with the physical and chemical origins of color (the electromagnetic spectrum, the absorption and emission of electromagnetic radiation, refraction, diffraction, incandescence, fluorescence, phosphorescence, iridescence). We will develop an understanding of chemical bonding and how that influences color. We will cover how we measure and describe color from a scientific perspective as well as how we can generate materials and devices with different color properties (liquid crystal displays, light emitting diodes for instance). From there we will discuss pigments used in works of art and textiles over time, the characteristics that make certain pigments suitable for particular applications. If we have time, we will touch on the historical and cultural impacts and meanings of different pigments and hues, the biological perception of color, and some color theory.

Requirements/Evaluation: exams, problem sets, quizzes, a paper, brief laboratory exercises, and a final paper/project

Prerequisites: non-science students; students who have taken any introductory chemistry or physics courses are ineligible
Enrollment Limit: 16
Enrollment Preferences: first-years and sophomores
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course will require students to become comfortable with some quantitative descriptions of light and its interaction with matter.

CHEM 200  (S)  Advanced Chemical Concepts  (QFR)
Class of 2027 ONLY (Class of 2024, 2025, 2026 see CHEM 256). This course treats an array of topics in modern chemistry, emphasizing broad concepts that connect and weave through the various subdisciplines of the field—biochemistry, inorganic chemistry, organic chemistry, and physical chemistry. It provides the necessary background in chemical science for students who are planning advanced study or a career in chemistry, biological science, geoscience, environmental science, or a health profession. Topics include coordination complexes, thermodynamics, electrochemistry, and kinetics. Laboratory sections will give students hands-on experience involving synthesis, characterization, and reactivity studies of coordination and organic complexes; spectroscopic analyses; thermodynamics; electrochemistry; and kinetics. Students will hone their skills in the presentation of results through written reports and worksheets.

Class Format: lecture, three times per week and laboratory, four hours per week
Requirements/Evaluation: homework assignments, laboratory work, quizzes, midterm exam, and a final exam
Prerequisites: CHEM 101
Enrollment Limit: 45; 16/lab
Enrollment Preferences: first-year students, then sophomores
Expected Class Size: 45/lecture
Grading: no pass/fail option, no fifth course option
Unit Notes: Chem 200 is required for the BIMO concentration
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular and substantial problem sets in which quantitative/formal reasoning skills are practiced and evaluated.
Attributes: BIMO Required Courses

Spring 2024

LAB Section: 05  W 1:00 pm - 5:00 pm
LAB Section: 06  R 1:00 pm - 5:00 pm

CHEM 201  Organic Chemistry: Introductory Level  (QFR)
This course provides the necessary background in organic chemistry for students who are planning advanced study or a career in chemistry, the biological sciences, or the health professions. It initiates the systematic study of the common classes of organic compounds with emphasis on theories of structure and reactivity. The fundamentals of molecular modeling as applied to organic molecules are presented. Specific topics include basic organic structure and bonding, isomerism, stereochemistry, molecular energetics, the theory and interpretation of infrared and nuclear magnetic spectroscopy, substitution, elimination and addition reactions. The coordinated laboratory work includes purification and separation techniques, structure-reactivity studies, organic synthesis, IR and NMR spectroscopy, and the identification of unknown compounds.

Class Format: lecture, three times per week and laboratory, four hours per week
CHEM 251 (F) Organic Chemistry: Intermediate Level

This course is a continuation of Chemistry 156 and it concludes the systematic study of the common classes of organic compounds with emphasis on theories of structure and reactivity. Specific topics include radical chemistry, an introduction to mass spectrometry and ultraviolet spectroscopy, the theory and chemical reactivity of conjugated and aromatic systems, the concepts of kinetic and thermodynamic control, an extensive treatment of the chemistry of the carbonyl group, alcohols, ethers, polyfunctional compounds, the concept of selectivity, the fundamentals of organic synthesis, an introduction to carbohydrates, carboxylic acids and derivatives, acyl substitution reactions, amines, and an introduction to amino acids, peptides, and proteins. The coordinated laboratory work includes application of the techniques learned in the introductory level laboratory, along with new functional group analyses, to the separation and identification of several unknown samples. Skills in analyzing NMR, IR, and MS data are practiced and further refined.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: midterm exams, problem sets, laboratory performance, including written lab reports, and a final exam

Prerequisites: CHEM 156 or permission of instructor

Enrollment Limit: 45; 16/lab

Enrollment Preferences: seniors, juniors, then sophomores

Expected Class Size: 45

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Attributes: BIMO Required Courses

Not offered current academic year

CHEM 256 (S) Foundations of Physical and Inorganic Chemistry

Class of 2024, 2025, and 2026 ONLY (Class of 2027 see CHEM 200). This course treats an array of topics in modern chemistry, emphasizing broad concepts that connect and weave through the various subdisciplines of the field–biochemistry, inorganic chemistry, organic chemistry, and physical chemistry. It provides the necessary background in chemical science for students who are planning advanced study or a career in chemistry, biological science, geoscience, environmental science, or a health profession. Topics include coordination complexes, thermodynamics, electrochemistry, and
kinetics. Laboratory sections will give students hands-on experience involving synthesis, characterization, and reactivity studies of coordination and organic complexes; spectroscopic analyses; thermodynamics; electrochemistry; and kinetics. Students will hone their skills in the presentation of results through written reports and worksheets.

**Class Format:** lecture, three times per week and laboratory, four hours per week

**Requirements/Evaluation:** homework assignments, laboratory work, quizzes, midterm exam, and a final exam

**Prerequisites:** CHEM 251 or permission of instructor

**Enrollment Limit:** 60; 16/lab

**Enrollment Preferences:** seniors, juniors, then sophomores

**Expected Class Size:** 60

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** for the BIMO concentration, CHEM 256 not required if CHEM 155 was taken

**Distributions:** (D3)

**Attributes:** BIMO Required Courses

**CHEM 319  (S) Integrative Bioinformatics, Genomics, and Proteomics Lab  (QFR)**

**Cross-listings:** BIOL 319  CSCI 319  CHEM 319  MATH 319  PHYS 319

**Secondary Cross-listing**

What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

**Class Format:** The lab for this course will meet for two afternoons per week. Some lab sessions will be shorter than 3 hours.

**Requirements/Evaluation:** lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

**Prerequisites:** BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

**Enrollment Limit:** 12

**Enrollment Preferences:** seniors, then juniors, then sophomores

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**
Quantitative/Formal Reasoning Notes: Through lab work, homework sets and a major project, students will learn or further develop their skills in programming in Python, and about the basis of Bayesian approaches to phylogenetic tree estimation.

Attributes: BIGP Courses  BIMO Interdepartmental Electives

Not offered current academic year

CHEM 321  (F)  Biochemistry I: Structure and Function of Biological Molecules  (QFR)

Cross-listings: BIMO 321 BIOL 321 CHEM 321

Secondary Cross-listing

This course introduces the foundational concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Prerequisites: BIOL 101, CHEM 200 and CHEM 201; or either CHEM 155 or 256 and CHEM 251

Enrollment Limit: 16/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 48

Grading: no pass/fail option, no fifth course option

Unit Notes: Cannot be counted towards the Biology major in addition to BIOL 222

Distributions: (D3)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIMO 321(D3) BIOL 321(D3) CHEM 321(D3)

Quantitative/Formal Reasoning Notes: This course fulfills the QFR requirement with regular problem sets in which quantitative/formal reasoning skills are practiced.

Secondary Cross-listing

This lecture course provides an in-depth presentation of the complex metabolic reactions that are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.
Class Format: Lecture three hours per week and laboratory three hours per week.

Requirements/Evaluation: several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of data

Prerequisites: BIOL 101, plus either: CHEM 156 and CHEM 256, or CHEM 155 and CHEM 156, or CHEM 200 and CHEM 201, or permission of instructor

Enrollment Limit: 48

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 48

Grading: no pass/fail option, no fifth course option

Unit Notes: cannot be counted towards the Biology major in addition to BIOL 222

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 322(D3) BIMO 322(D3) CHEM 322(D3)

Quantitative/Formal Reasoning Notes: The laboratory program is quantitative covering data analyses, numerical transformations, graphical displays.

CHEM 324 (F) Enzyme Kinetics and Reaction Mechanisms

Enzymes are complex biological molecules capable of catalyzing chemical reactions with very high efficiency, stereo-selectivity and specificity. The study of enzymatically-catalyzed reactions gives insight into the study of organic reaction mechanisms in general, and into the topic of catalysis especially. This course explores the methods and frameworks for determining enzymatic reaction mechanisms. These methods are based on a firm foundation of organic reaction mechanisms and chemical kinetics. We will investigate the major types of biochemical reactions, focusing on their catalytic mechanisms and how those mechanisms can be elucidated. We will lay the foundation for this mechanistic consideration with discussion of transition state theory, structure-reactivity relationships, steady state and pre-steady kinetics, use of isotopes, genetic modification, and other tools for probing enzymatic reactions. We will also examine the catalytic roles of a variety of vitamins and cofactors.

Class Format: three hours per week

Requirements/Evaluation: problem sets, quizzes, a midterm exam, a paper, and a final exam

Prerequisites: CHEM/BIOL/BIMO 321 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Chemistry majors or BIMO concentrators

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

CHEM 326 (S) Chemical and Synthetic Biology

This course surveys the rapidly evolving, interdisciplinary and interconnected fields of chemical and synthetic biology. Chemical biology uses precise molecular-level manipulations to influence living systems from the bottom up, often by introducing components that are foreign to nature. Synthetic
biology takes advantage of existing molecular technology and adopts an engineering mindset to reprogram life. Students will achieve literacy through immersion in chemical and synthetic biology. We will prioritize broad exposure to these fields, their vocabulary, culture, practices and ideas, through extensive engagement with the primary literature that expert practitioners use to teach themselves. The course model is instructor-facilitated peer-to-peer instruction, emphasizing skills important for autonomous and collaborative work in real-world scientific and professional fields. Topics we will cover include synthetic genomes, metabolic engineering, chemical synthesis and manipulation of biomacromolecules, directed evolution, and reworking of the central dogma of biology.

Class Format: two and a half hours of whole-class meetings and one hour of small-group meetings per week and online discussion using Perusall

Requirements/Evaluation: Course work includes consistent and intensive engagement with primary literature, discussions, weekly short presentations, formal and informal writing assignments, and an independent research project. The workload is designed to be distributed evenly throughout the semester. There are no exams. The course will be specifications-graded.

Prerequisites: CHEM/BIO/BIMO 321 or permission of the instructor

Enrollment Limit: 16

Enrollment Preferences: seniors, then junior Chemistry and Biology majors with a demonstrated interest in chemical or synthetic biology

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

CHEM 335 (F) Inorganic/Organometallic Chemistry

This course covers fundamental aspects of the chemistry of main group elements and transition metals, and highlights how these properties are key to understanding the roles of these elements in applications such as the catalysis of synthetic organic transformations, the functions of enzymatic processes, the production of commodity chemicals such as plastics, and the actions of metal-based drugs such as cis-platin. The course introduces concepts of symmetry and group theory, and their systematic application to the study of the structure, bonding, and spectroscopy of inorganic and organometallic compounds. The course also covers the kinetics and mechanism of selected inorganic and organometallic reactions. Class discussions will involve exploration of the primary literature and review articles around recent developments and applications in inorganic chemistry, such as finding molecular solutions to water oxidation, the capture of solar energy, to cancer treatments and the optimization of industrial-scale reactions.

Class Format: lecture, three hours per week and laboratory, four hours per week

Requirements/Evaluation: problem sets, two exams, presentations, and group-based literature reviews

Prerequisites: CHEM 155 or CHEM 256 and CHEM 251; or CHEM 200 and CHEM 201

Enrollment Limit: 16; 8/lab

Enrollment Preferences: senior and junior chemistry majors

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Distributions: (D3)

Not offered current academic year

CHEM 336 (F) Materials Chemistry

Materials have defined much of what is possible in our daily lives. Materials scientists are at the center of imagining and delivering progress, as they improve existing materials and develop new ones to meet today’s needs. Materials science focuses on the relationships between the structure, processing, properties, and performance of materials. In this course, we will explore how the properties and potential applications of a solid are related to its atomic and molecular structure, as well as to its organization on larger length scales than are traditionally considered in chemistry. We will cover a variety of different types of materials including metals, ceramics, polymers, and composites. We will examine some of the latest developments in materials science, including new strategies for the synthesis of materials on different length scales, as well as a variety of potential applications of emerging technologies.
CHEM 338 (S) Bioinorganic Chemistry: Metals in Living Systems

Bioinorganic chemistry is an interdisciplinary field that examines the role of metals in living systems. Metals are key components of a wide range of processes, including oxygen transport and activation, catalytic reactions such as photosynthesis and nitrogen-fixation, and electron-transfer processes. Metals furthermore perform regulatory roles and stabilize the structures of proteins. In medical applications, they are central to many diagnostic and therapeutic tools, and some metals are highly toxic. The course begins with a review and survey of the principles of coordination chemistry: topics such as structure and bonding, spectroscopic methods, electrochemistry, kinetics and reaction mechanisms. Building on this fundamental understanding of the nature of metals, we will explore the current literature in fields of interest in small groups, presenting our findings to the class periodically.

Class Format: The course will begin with a series of lectures on principles of coordination chemistry, followed by tutorial meetings to discuss journal articles and book materials.

Requirements/Evaluation: problem sets, two exams, class engagement, a class presentation, and a final project

Prerequisites: CHEM 155 or CHEM 256 and CHEM 251; or CHEM 200 and 242

Enrollment Limit: 10

Enrollment Preferences: Chemistry majors and BIMO concentrators

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D3)

Attributes: BIMO Interdepartmental Electives

CHEM 342 (S) Synthetic Organic Chemistry

The origins of organic chemistry are to be found in the chemistry of living things and the emphasis of this course is on the chemistry of naturally-occurring compounds. This course presents the logic and practice of chemical total synthesis while stressing the structures, properties and preparations of terpenes, polyketides and alkaloids. Modern synthetic reactions are surveyed with an emphasis on the stereochemical and mechanistic themes that underlie them. To meet the requirements for the semester's final project, each student chooses an article from the recent synthetic literature and then analyzes the logic and strategy involved in the published work in a final paper. A summary of this paper is also presented to the class in a short seminar. There will be no laboratory component in 2022. Instead, one of the three class meetings each week will focus on discussion and presentation of reactions, mechanisms, and syntheses from the chemical literature.

Class Format: lecture, three hours per week and conference, 1.5 hours per week

Requirements/Evaluation: problem sets, midterm exams, class participation, class presentations, and a final project

Prerequisites: CHEM 155 or CHEM 256 and CHEM 251 or permission of instructor; or CHEM 200 and CHEM 242 or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Chemistry majors, seniors and juniors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option
CHEM 344 (S) Physical Organic Chemistry
The structure of a molecule is inherently linked to its reactivity, and these correlations form the basis for understanding organic reaction mechanisms. This course advances the understanding from previous organic courses through a detailed examination of the concepts that underlie these structure/reactivity relationships, including molecular strain and stability, acid/base chemistry, steric and electronic effects, and aromaticity. These concepts will also be explored in the context of specific classes of reaction mechanisms. Classical and modern experimental and theoretical tools used to elucidate reaction mechanisms will also be presented, including reaction kinetics, isotope effects, and linear free energy relationships. By studying the primary literature, we will see how these experiments have been applied to the elucidation of reaction mechanism, while also learning to design a set of experiments for study of mechanisms of contemporary interest.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: problem sets, exams, laboratory reports, presentations, and class participation

Prerequisites: CHEM 155 or CHEM 256 and CHEM 251; or CHEM 200 and CHEM 201

Enrollment Limit: 8

Enrollment Preferences: Chemistry majors: seniors, juniors, sophomores

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Attributes: BIMO Interdepartmental Electives

CHEM 345 (F) Supramolecular Organic Chemistry
Supramolecular chemistry is the study of chemical systems, often with practical applications, that are composed of two or more molecular components held together by non-covalent interactions. More specifically, we will focus on the use of “synthetic influence” over organic compounds and reactions to make tailor-made building blocks that will produce functional molecular assemblies. The various analytical methodologies used to probe these relatively weaker and more dynamic chemical systems will be studied. We will also examine (and be inspired by) the supramolecular chemistry found in nature, as the field was originally defined by the host-guest interactions used to explain receptor-substrate binding in many biological systems. Today, the field has intersected with numerous disciplines which we will explore; these include analytical molecular recognition and sensing, self-assembly molecular engineering, catalysis, and organic-based molecular devices, among others. We will also explore more complex supramolecular topics such as dynamic covalent chemistry and the mechanical bond. Students will be expected to delve into the chemical literature and analyze the research of pioneering chemists in the field (past and present) by choosing one prominent journal article, culminating in a final literature review paper.

Class Format: lecture/discussion

Requirements/Evaluation: problem sets, research article review homework assignments, class/discussion participation, exams, and a final literature review paper

Prerequisites: CHEM 251 and CHEM 256

Enrollment Limit: 20

Enrollment Preferences: Chemistry majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option
CHEM 348 (F) Polymer Chemistry
From synthetic to natural macromolecules, we encounter polymers everywhere and every day. This course explores the multitude of synthetic techniques available and discusses how structure defines function. Topics include polymer types, concept of molecular weight, structure-property relationships and polymer synthesis methods including condensation and chain (anionic, cationic, radical) polymerizations. Fundamentals of composition and physical properties of polymers, and methods of characterization are also covered. Examples of polymer functionalization, self-assembly, and surface modification are also discussed.

Class Format: lecture, three hours per week
Requirements/Evaluation: problem sets, participation, in-class presentations, research paper discussions, and a final project
Prerequisites: CHEM 251 or CHEM 242
Enrollment Limit: 12
Enrollment Preferences: Chemistry majors
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
Attributes: BIMO Interdepartmental Electives MTSC Courses

CHEM 361 (S) Quantum Chemistry and Chemical Dynamics
This course provides an introduction to quantum mechanics which serves as the basis for understanding atomic and molecular structure as well as spectroscopic methods. This leads to a discussion of chemical kinetics and molecular reaction dynamics in the gas phase and in solution. Computational chemistry methods are used to illustrate chemical concepts, to interpret experimental data, and to extend hypotheses. Applications of these principles are chosen from contemporary research fields, including polymer chemistry, photochemistry, atmospheric chemistry, and solid and liquid state chemistry. Quantitative laboratory experiments and consultation with the scientific literature provide the background necessary for carrying out an independent theoretical or experimental project.

Class Format: lecture, three times per week and laboratory, four hours per week
Requirements/Evaluation: class participation, problem sets, exams, laboratory work, and an independent project
Prerequisites: CHEM 155 or CHEM 256; or CHEM 200
Enrollment Limit: 16; 8/lab
Enrollment Preferences: seniors, then juniors
Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
This course introduces students to the methods used to assess the risks posed by organic chemicals to human, animal, and ecosystem health. Our goal is to develop a quantitative understanding for how specific features of organic molecular structure directly dictate a given molecule's environmental fate. We will begin by using thermodynamic principles to estimate the salient physiochemical properties of molecules (e.g., vapor pressure, solubility, charging behavior, etc.) that impact the distribution, or partitioning, of organic chemicals between air, water, soils, and biota. Then, using quantitative structure activity relationships, we will predict the degradation kinetics resulting from natural nucleophilic, photochemical, and biological processes that determine chemical lifetime in the environment.

Class Format: lecture, three hours per week and laboratory, four hours per week

Requirements/Evaluation: weekly problem sets, laboratory exercises, two midterm exams, a final exam, participation in lecture and lab

Prerequisites: CHEM 155 or CHEM 256 and CHEM 156; or CHEM 200 and CHEM 201

Enrollment Limit: 16

Enrollment Preferences: junior and senior Chemistry and Environmental Studies majors with a demonstrated interest in environmental chemistry

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

CHEM 364 (S) Instrumental Methods of Analysis

Instrumental methods of analysis provide scientists with different lenses to observe and elucidate fundamental chemical phenomena and to measure parameters and properties at the atomic, molecular, and bulk scales. This course introduces a framework for learning about a variety of instrumental techniques that typically include chromatography, mass spectrometry, thermal methods, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies. Students complete two 5-6 week long laboratory projects and gain hands-on experience and project planning skills to study molecules and materials of interest. This practical experience is complemented by lectures that cover the theory and broader applications of these techniques. Students also explore the primary literature and highlight recent advances in instrumental methods that address today's analytical questions. The skills learned are useful in a wide variety of scientific areas and will prepare you well for research endeavors.

Class Format: lecture, two times per week and laboratory, four hours per week; periodic small group meetings to plan laboratory research projects

Requirements/Evaluation: Weekly data analysis and project planning assignments for laboratory and analysis of readings for class, problem sets, two project reports and presentations, one oral presentation of an application of instrumental methods, a final independent literature project and presentation; demonstrated progress in research skills, and project engagement.

Prerequisites: CHEM 155 or CHEM 256 and CHEM 251 (may be taken concurrently with CHEM 256 with permission of instructor); or CHEM 200 and CHEM 201

Enrollment Limit: 16; 8/lab

Enrollment Preferences: Chemistry and Environmental Studies majors

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

CHEM 366 (F) Thermodynamics and Statistical Mechanics

The thermodynamic laws provide us with our most powerful and general scientific principles for predicting the direction of spontaneous change in
This course develops the concepts of energy, entropy, free energy, temperature, heat, work, and chemical potential within the framework of classical and statistical thermodynamics. The principles developed are applied to a variety of problems: chemical reactions, phase changes, energy technology, industrial processes, and environmental science. Laboratory experiments provide quantitative and practical demonstrations of the theory of real and ideal systems studied in class.

**Class Format:** lecture, three times per week and laboratory, four hours per week

**Requirements/Evaluation:** class participation, oral presentations, problem sets, laboratory work, and an independent project

**Prerequisites:** CHEM 155 or CHEM 256 or CHEM 200, and basic knowledge of applied integral and differential calculus

**Enrollment Limit:** 16/lab

**Enrollment Preferences:** Chemistry majors: seniors, juniors, then sophomores

**Expected Class Size:** 16

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D3)

**Attributes:** BIMO Interdepartmental Electives

---

**CHEM 367 (S) Biophysical Chemistry**

In this course, physical chemistry concepts are presented from the viewpoint of their practical application to a set of biochemical problems, which are explored side-by-side in the lecture and highly-integrated lab program. Major emphasis is placed on quantitative thermodynamic models of equilibrium processes, and students will learn how to develop and apply mathematical models to data. The main topics covered include: 1) conformations of biological macromolecules and the forces that stabilize them; 2) spectroscopic techniques for the study of structure and function; and 3) macromolecular interactions and binding.

**Class Format:** lecture, three hours per week and laboratory, four hours per week

**Requirements/Evaluation:** problem sets and/or quizzes, laboratory work, and exams

**Prerequisites:** CHEM 155 or CHEM 256 and CHEM 251; or CHEM 200 and CHEM 201; and BIMO 321 (or permission of instructor), with MATH 140 or equivalent preferred

**Enrollment Limit:** 18; 6/lab

**Enrollment Preferences:** junior and senior Chemistry majors

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

**Attributes:** BIMO Interdepartmental Electives

---

**CHEM 368 (S) Computational Chemistry and Molecular Spectroscopy (QFR)**

This tutorial provides an introduction to the principles of computational quantum mechanics and their application to problems of chemical interest such as chemical bonding, chemical reactivity, and molecular spectroscopy. Emphasis is placed upon modern electronic structure calculations, their fundamentals, practical considerations, interpretation, and applications to current research questions. Under guidance in sessions and through independent work, students will use computational methods to explore assigned weekly research problems. The research results will be presented to
and discussed with the tutorial partner at the end of each week.

Requirements/Evaluation: tutorial participation, presentations, and submitted papers
Prerequisites: CHEM 361 or equivalent background in Physics
Enrollment Limit: 10
Enrollment Preferences: Chemistry majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course fulfills the QFC requirement with problem sets for assignments in which quantitative/formal reasoning skills are practiced.

Winter Study  ------------------------------------------------------------------------------------------------------------------

CHEM 12  (W)  The Practice and Processes of Making Pottery
This course will introduce students to creative methods of working with clay and glazes to create functional pottery, and to the materials and processes of ceramics. Classes will take place in a working Williamstown pottery studio with potter's wheels and space for hand-building and discussions. Studio lessons are designed to stimulate creativity and discovery. Instruction and projects will be tailored to each student's interests, experiences, and abilities. Students will be encouraged to consider how value and beauty can be found in that which is incomplete, impermanent, and/or imperfect. Genuineness and authenticity will be encouraged and valued. We will learn about the origins and properties of clay and glaze materials and about how combinations of materials and the high temperature processes result in mature clay bodies and glazes. We will study the major components of glazes and how the manipulation of these materials changes how glazes appear and function. Evaluation for this course will include a final project, and the critical review of the same. Assessment will take place during individual discussion with the instructor during the construction and finishing processes
and in a structured, group critique where finished work will be evaluated by all members of the class through a group discussion led by the instructor. No previous experience is necessary. The only prerequisite for this course is an honest interest in learning about the making and chemistry of pottery. Studio time will likely be afternoons and early evenings, with an optional weekend session to accommodate schedules. Class time is about 12 hours weekly, and may include some outside of class reading and other assignments.

Requirements/Evaluation: final project or presentation
Prerequisites: None; no pottery making experience or science background are necessary; students are encouraged to submit a brief description of their interest in participating
Enrollment Limit: 10
Enrollment Preferences: Level of enthusiasm for learning the craft, materials, and processes of pottery
Expected Class Size: NA
Grading: pass/fail only
Unit Notes: Tim Duncan has been making pottery for over 30 years. He teaches in a home studio that accommodates up to 10 students, and focuses on creating lessons that stimulate creativity and discovery.
Materials/Lab Fee: $63
Attributes: EXPE Experiential Education Courses  SLFX Winter Study Self-Expression

Not offered current academic year

CHEM 16 (W) Glass and Glassblowing
This course provides an introduction to both a theoretical consideration of the glassy state of matter and the practical manipulation of glass. We do flameworking with hand torches for at least 12 hours per week. While no previous experience is required, students with patience, good hand-eye coordination, and creative imagination will find the course most rewarding. The class is open to both artistically and scientifically oriented students. Note: if you are required to participate in a sustaining language program during Winter Study, this course meets at the same time. The first and last classes are required, so make your travel plans accordingly.
Requirements/Evaluation: class participation, exhibition of glass projects, a 10-page paper, and a presentation to the class
Prerequisites: none
Enrollment Limit: 10
