Education is inherently political, and politics necessarily involves pedagogy. Who should teach, what is taught, how it is taught, and why it is taught are questions hotly debated at all levels and in all sites of education because the answers have implications for societal reproduction or transformation. Politicians, activists, even family members at the dinner table all seek to educate in ways that incline us toward particular political positions. At the heart of this class stands the question: if different pedagogies point us in different political directions, then what kind of pedagogy or pedagogies serve the end of liberation from oppression and why? Are there certain pedagogical "goods" that reliably serve the goal of liberation across sites? Or do different sites require different approaches? To begin to answer these questions, we will engage a variety of thinker-teachers and groups known for their commitment to a "pedagogy of liberation." While feminist thinkers will be foregrounded, we may also look to thinker-teachers who and groups that do not claim this label. In addition to engaging texts which reflect on different aspects of radical pedagogy (content, form, method, etc.) and radical pedagogy in different settings (the college classroom, the social movement headquarters, the home), we will witness radical pedagogy in practice. Moreover, we will enact various radical pedagogical strategies in our own classroom and beyond.

**Requirements/Evaluation:** Perusall, aspirational learning statement, syllabus co-construction and reflection, class facilitation, interview project and reflection, one-on-one discussions

**Prerequisites:** None

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference will be given to WGSS majors.

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This class is concerned with the relationship between pedagogy and equity - how can pedagogy be leveraged to combat oppression and encourage equity? In it, students will gain not just insight on, but practice in enacting radical democratic pedagogies that flatten power differentials and encourage effective engagement across difference.

**WGSS 351 (F) Trans/national Femininities** (DPE)

This course studies femininity in a trans/national context. Here, trans suggests that we will not be looking at femininity as necessarily or inherently attached to the biological category "female." Instead, we will think about femininity as a gender performed by and written on many kinds of bodies, with specific attention to trans feminine experiences. The term "transnational" suggests that we will attempt to talk about femininity not only in the context of
the US and the "western" world but across different nations and within a broader socio-cultural framework. We will consider a broad range of disciplinary accounts of femininity in the US and beyond. We will discuss how class, bodily comportment, ability, and other facets affect feminine performance and feminine/feminist/queer politics. Our course materials include scholarship, film, art, and literature. Finally, this course centers the voices of trans and cis women, femmes, and queer BIPOC (black, indigenous, and/or people of color).

**Requirements/Evaluation:** short informal writing assignments, discussion facilitation, in class activities and discussion, student presentations, substantive student-led final project.

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** WGSS majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** This course examines how femininity is constructed on multiple kinds of bodies and across multiple national contexts. It employs a wide range of theoretical approaches for thinking about femininity and the diversity of feminine experiences. We examine femininity as a social location which intersects with embodiment, ability, class, and nation in order to consider structures of power that both effect and are affected by our understandings of femininity.

**WGSS 359  (S) Queer of Color Critique and Literatures  (DPE)**

Queer of color critique (QoCC) takes an intersectional approach to the study of sexuality and is particularly interested in how sexuality is constituted with and through other social formations like race, class, ability, gender, and nation. It draws on many different theoretical frameworks (women of color feminisms, materialist and post structuralist critiques, and queer critiques) and draws from many different disciplines (sociology, literary studies, psychology, etc). In this course we will study the key histories, terms, and debates in QoCC. Rather than imagine QoCC as a response to queer critique alone, we will study it as a co-occurring field with a long history. Reflecting QoCC’s interest in national and diasporic formations, we will situate our exploration of queerness in a transnational and global perspective. Our course materials include scholarly works as well as arts and literatures which develop and employ QoCC. QoCC is not only a theoretical framework, or a way of interpreting the world. Through our discussions and assignments, we will use QoCC to imagine new worlds.

**Requirements/Evaluation:** short informal writing assignments, 2 formal essays, discussion facilitation, in class activities, substantive student-led final project.

**Prerequisites:** None

**Enrollment Limit:** 19

**Enrollment Preferences:** WGSS majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** his course examines non-normative sexualities in marginalized groups within and outside western communities. It draws on scholarship, literature, arts and film to understand diverse queer of color experiences and to understand queer of color critique as a field and methodology. It considers how sexuality is informed by and central to how we understand power, discrimination, normativity, and global sexual politics. It helps situate sexuality within a broader nexus of concerns about identity polit

Data for Justice Research Practicum (DPE) (QFR)

Cross-listings: STS 363 / INTR 350 / AMST 363

Secondary Cross-listing

Civil rights activist, educator, and investigative journalist Ida B. Wells said that "the way to right wrongs is to shine the light of truth upon them." In this inclusive, collaborative, research-based course, students will bring statistical, computational, and/or mathematical approaches to bear on issues of social justice. Guided closely by the instructor, students will work in groups to carry out original research in an area such as criminal justice, education equity, environmental justice, health care equity, economic justice, or inclusion in arts/media. Prior research experience is not required; one goal of this course is to build skills for advanced research.

Class Format: This course is an intensive research practicum. Formation of research groups and selection of research topics will be facilitated by the instructor. The primary modality of work is peer collaboration.

Requirements/Evaluation: To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based, ungraded assessment framework.

Prerequisites: INTR 150 (Data for Justice), or prior equivalent exposure to computing, statistics, and social justice topics as approved by the instructor.

Enrollment Limit: 10

Enrollment Preferences: Students who have a declared major in Division I or II, who meet the prerequisites of the course, and who fill out the instructor's preregistration survey (contact the instructor for link).

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 363(D2) STS 363(D2) INTR 350(D2) AMST 363(D2)

Difference, Power, and Equity Notes: Students will research issues of social justice in areas such as criminal justice, arts/media, environmental justice, education, and health care, and along identity axes such as gender, race/ethnicity, disability status, and sexual orientation.

Quantitative/Formal Reasoning Notes: Students will use multiple mathematical, statistical, and computational frameworks to acquire, model, and analyze real-world data.

Asian American Sexualities (DPE)

Cross-listings: AMST 375 / AAS 375

Secondary Cross-listing

Perceived as objects of sexual use and perversity, how might Asian/Asian American subjects contend with these projections and enact their own genders and sexualities? Anchored in this question, this theory-intensive seminar will provide a study of seminal and recent scholarship at the intersections of Asian American Studies, feminist criticism, and queer theory that focus on or are read in tandem with a collection of cultural expressions, including film, sculpture, poetry, drag performance, music, manifestos, and visual and performance art. To first root us, the seminar will introduce key uses and theorizations of sex/gender, sexuality, and queerness. Then, across the semester, we will focus on deployments of them through a range of topics, including sexual subjugation and activism of "comfort women," orientalism/orientalism, the queering of Sikh, South Asian, and Muslim Americans post-9/11, western demands to "come out," representations in pornography, lesbian invisibility, devaluation of trans* lives, etc., exploring questions of racialized, gendered, and sexual subordination alongside power, pleasure, play, and critique. To this end, we will approach gender and sexuality not as identity categories that one is or has but socially and biologically construed categories, loci for intervention and play, anti-normative positions, lived experiences, and ever-evolving processes of doing, becoming, and unbecoming.

Requirements/Evaluation: in-class discussion, weekly posts, short presentation, one paper, and one longer paper or creative assignment that will be peer reviewed and revised

Prerequisites: AMST 125 or WGSS 101/202

**SEM Section: 01**  
**Cancelled**

**WGSS 376 (F) Sex, Gender, and the Law in U.S. History** (DPE)

**Cross-listings:** HIST 376

**Secondary Cross-listing**

This course explores that ways in which the law has defined and regulated gender and sexuality in the United States, and the ways that individuals have experienced and responded to those definitions and regulations. We will evaluate how the law has dictated different roles for men and women, how sexual acts have been designated as legal or illegal, and the ways that race, class, and nationality have complicated the definition and regulation of gender and sexuality. This course examines how assumptions about gender and sexuality have informed the creation and development of American law and the changing meanings of citizenship; considers how laws regulating sex and gender have yielded varied effects for men and women across race and class divides, challenging some differences while naturalizing others; and assesses the power and shortcomings of appeals to formal legal equality waged by diverse groups and individuals. Throughout the course, we will consider the various methodologies and approaches of the interdisciplinary field of legal history. Topics to be covered will include the Constitution, slavery, marriage, divorce, custody, inheritance, immigration, sexual violence, reproduction, abortion, privacy, suffrage, jury duty, work, and military service.

**Requirements/Evaluation:** four papers, including three short (3-5-pages) papers, and one final paper of 8-10 pages

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** History majors, Women's, Gender and Sexuality Studies majors

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

WGSS 376(D2) HIST 376(D2)

**Difference, Power, and Equity Notes:** This course fulfills the DPE requirement because it examines the legal, social, and political constructions and theorizations of difference, power, and equity. It examines the ways that individuals and groups have organized across various axes of difference to fight for legal equality, and explores how those individuals and groups have experienced legal equality and legal inequality in varied ways.

**WGSS 391 (F) Contemporary North American Queer Literatures and Theories** (DPE)
Moving through the mid-twentieth century and into the twenty-first, this course will consider how North American writers have represented queer life in all its complexities. From the problem of the happy ending to the intersectional politics of representation, the narrative complexities of coming out to the rejection of identity, the course will consider the relationship between literary form and queer content. In so doing, it will also touch upon some of the key debates in queer literary theory and consider the impact of events such as civil rights movements, gay and lesbian and trans uprisings, the AIDS crisis, debates over respectability politics, and current efforts to police what students read in schools on literary and cultural production. Readings may include work by such authors as Baldwin, Highsmith, Rich, Lorde, Delany, Kushner, Feinberg, Bechdel, Thom, and Machado and theorists such as Ferguson, Sedgwick, Fawaz, Love, Butler, and Hartman.

Requirements/Evaluation: active class participation, several short writing assignments, two 5-page papers, and one longer research paper.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor;

Enrollment Limit: 25

Enrollment Preferences: English majors; WGSS majors

WGSS 398 (F) Feminist and Queer Horror Films (DPE)

Cross-listings: THEA 390 / ENGL 333 / COMP 390 / AMST 390

Primary Cross-listing

This course focuses on pairing theoretical readings with a variety of horror films with feminist or queer themes. Many tropes are associated with this genre - "the final girl" in slasher movies, "the transvestite murderer," femme lesbian vampires, supernatural BDSM figures, vampires as allegories for HIV/AIDS, werewolves as metaphors for FTM gender transitions or puberty, lonely mothers in creaky houses as unreliable narrators, Satanic spawn, and creepy long-haired girls. Some films reinforce gender stereotypes while others snap on more explicitly feminist and queer lenses. This course functions as a survey of many different genres, introducing students to classic 1970s films and working up to the present day and we will learn how these tropes developed and then were subverted by more modern day films such as those by A24 Studies and the new renaissance of Black horror, etc. Most films will focus on the US, with some notable exceptions in Japan, Spain, and elsewhere globally. There will be graphic content. You must be 18 or over to take this class.

Requirements/Evaluation: Class participation, short reflection papers, 2-3 extemporaneous oral class responses, several creative assignments.

Prerequisites: None. Prior WGSS courses will be helpful.

Enrollment Limit: 15

Enrollment Preferences: Stage 1 is a statement of interest form; Stage 2 will be a very brief interview. There is NO preference by major or class year.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: Some of the creative assignments will have an "arty-craftsy" component, but should not cost more than 25 dollars total per student per semester, though amounts will vary depending on how the student chooses to execute the assignment.
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 398(D2) THEA 390(D1) ENGL 333(D1) COMP 390(D1) AMST 390(D2)

**Difference, Power, and Equity Notes:** This course necessarily examines power when it comes to gender and sexuality - who has it? what do they do with it? how does this power turn deadly? how can agency be regained? Horror is almost never about equitable situations but rather the imbalance that comes from difference (along whatever axis) causing a lack of equity.

**WGSS 402 (F) Marxist Feminisms: Race, Performance, Labor (DPE) (WS)**

**Cross-listings:** AAS 402 / AMST 402

**Secondary Cross-listing**

This seminar provides an overview of queer, black and women of color feminist, decolonial, and critical ethnic studies critiques of orthodox Marxism. Beginning with core texts from the tradition, including *Capital Volume I*, we will examine a range of social positions and modes of extraction that complicate Marx’s emphasis on the white male industrial factory worker. Every week, we will focus on texts that foreground conditions of reproduction, racial slavery, care and domestic work, indentured servitude, immigrant labor, land expropriation, and sex work among others. Throughout the seminar and specifically at the close of it, we will turn to critical perspectives and aesthetic practices that not only respond to these conditions but also incite new social relations and ways of being in the world. As such, this seminar will equip students with critical understandings of how racial capitalism has fundamentally relied on the mass elimination, capture, recruitment, and displacement of different racialized, gendered, and abled bodies in and beyond the U.S. as well as how the capitalist system of value and life under these conditions can and must be undone and reimagined.

**Requirements/Evaluation:** in-class participation, presentation, weekly posts, paper, and final project (paper, community resource distribution proposal, and creative project options)

**Prerequisites:** AMST 101, AMST/AAS 125, or similar courses

**Enrollment Limit:** 12

**Enrollment Preferences:** AMST and WGSS juniors and seniors, AAS concentrators

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

**WGSS 408 (S) Senior Seminar: Nineteenth-Century French Novel: Desperate Housewives and Extreme Makeovers (DPE)**

**Cross-listings:** RLFR 412 / COMP 412
Secondary Cross-listing

In 1834, Honoré de Balzac wrote that “Paris is a veritable ocean. Sound it: you will never know its depth.” The same can be said of the French nineteenth-century novel and its boundless ability to echo the past and illuminate the present. From the Romanticism of Stendhal and Hugo, and the Realism of Balzac and Flaubert, to the Naturalism of Zola and Maupassant, the novel became a forum for examining illicit sexuality, institutional misogyny, social injustice, criminal passions, revolutionary struggles, and Parisian pleasures in nineteenth-century France. Characters such as the miserable housewife Emma Bovary, the reluctant revolutionary Jean Valjean, the social climber Julien Sorel, the ambitious undergraduate Eugène de Rastignac, and the domestically abused Gervaise Macquart became synonymous with France’s turbulent social and political landscape from the 1830s to the 1880s. As recent film adaptations make clear, these desperate housewives and extreme makeovers continue to haunt our twenty-first century present. Reinterpreted by such actors as Gérard Depardieu, Isabelle Huppert, Uma Thurman, Claire Danes, and Jennifer Aniston, the nineteenth-century novel continues to sound out the scandalous and sensational depths of our own century. Readings to include novels by Balzac, Stendhal, Hugo, Flaubert, Maupassant, Zola. Films to include adaptations by Clément, Berri, August, Arteta, Lelouch, Chabrol. Conducted in French.

Requirements/Evaluation: Active class participation, midterm exam, and two papers.

Prerequisites: A 200-level or 300-level RLFR course at Williams, or Advanced coursework during Study Abroad in France or the Francophone World, or permission of the instructor.

Enrollment Limit: 16

Enrollment Preferences: French Majors and French Certificate students, Comparative Literature Majors, Women’s, Gender, & Sexuality Studies Majors.

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 408(D2) RLFR 412(D1) COMP 412(D1)

Difference, Power, and Equity Notes: This course analyzes difference, power, and equity through its examination of gender diversity, institutional misogyny, urban criminality, human sexuality, social injustice, and revolutionary struggle in nineteenth-century France. In class discussions and critical essays on 1830s-1880s France, students will examine and articulate the inequities and injustices between women and men, the privileged and oppressed, the wealthy and working class, and both the rural and urban poor.

Spring 2025

SEM Section: 01 TR 11:20 am - 12:35 pm Brian Martin

WGSS 411 (S) Psychoanalysis and Its Discontents: The Psyche and the Social (DPE)

For many decades, psychoanalysis has been profoundly influential to radical thinkers seeking to overthrow regimes of racism, colonialism, heteropatriarchy, capitalism, and ableism. At the same time, psychoanalysis has also been crucial to enforcing those very regimes. Whether mobilized towards liberatory or oppressive ends, it is difficult to overstimate psychoanalysis’s influence on intellextion, politics, and everyday social existence over the last century—even though we don’t always realize it’s there. If you bristle at the mention of Freud but think microaggressions are real, content warnings are a good idea, or that sharing about your feelings supports your wellbeing and relationships, your beliefs and values are probably indebted to psychoanalysis. This class surveys psychoanalytic perspectives on "the social," that is, race, gender, sexuality, capitalism, dis/ability, imperialism, and so on. It also provides an introduction to basic foundations of psychoanalytic thought—especially Freud, object relations theory, and a bit of Lacan—with an emphasis on how the psychoanalytic canon underpins contemporary queer, feminist, and postcolonial theory; ethnic studies; disability studies; and religious studies. Building from foundations, we’ll also examine radical psychoanalysis alongside radical critiques of psychoanalysis. Additional topics and bodies of thought include trauma, Afropessimism, sexual difference feminism, antipsychiatry, and schizoanalysis. This class satisfies the WGSS Junior/Senior Seminar major requirement.

Requirements/Evaluation: weekly discussion questions, oral presentations, participation, dream journal, final research project

Prerequisites: Students will benefit from coursework backgrounds in WGSS, AMST, ethnic studies, and/or the humanities broadly.

Enrollment Limit: 19

Enrollment Preferences: WGSS majors, juniors/seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option
This class examines psychoanalysis's role in shaping difference, power, and equity. In the wake of losses due to various histories of forced migration and slavery, the AIDS epidemic, war, and social exclusion, various scholars and critics have posited melancholia as a structuring condition of contemporary life as subjects differently navigate loss, displacement, and exclusion. Theories of racial and queer melancholia have emerged as supple frameworks through which to consider how queer and racialized subjects hold onto non-normative ways of being, relation, and sociality against the normalizing tides of erasure. We will chart out a connection between how we relate to and apprehend the past as it then pertains to how we relate to and apprehend others. Beginning with a dive into Freudian psychoanalysis, this seminar will explore concepts of loss and melancholia and their uptake into critical theory, critical race theory, and queer theory/queer of color critique. Alongside our scholarly inquiries, we will engage with a range of art, literature, performance, and film that explore topics of memory, trauma, migration, the queer past and the queer future, subjectivity, relationality, and gender and sexuality.

**Requirements/Evaluation:** In-class participation, discussion posts, short analysis papers, and a final paper that engages original research and/or creative work.

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** AMST, WGSS majors, AAS concentrators or students interested in majoring/concentrating in these areas.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 418(D2) AMST 415(D2) AAS 415(D2)

**Writing Skills Notes:** Students will produce a number of written assignments that assess their analysis, critique, and interpretation of critical texts and artistic works. This includes regular discussion posts, paper presentations, and a final essay that will receive peer and instructor feedback.

**Difference, Power, and Equity Notes:** This course engages with a major topic of concern—the theory of melancholia—across a number of fields including ethnic studies, women's, gender, and sexuality studies, and critical theory. In particular, attention is paid to the function of loss, dispossession, and displacement as it affects individuals and communities who are differently marginalized by colonialism, racial capitalism, and heteronormativity.

**Attributes:** AMST Critical and Cultural Theory Electives

Spring 2025

SEM Section: 01 MR 2:35 pm - 3:50 pm Ethan Fukuto
The seminar will underscore major tensions and antagonisms against frameworks of relationality. Tracing primary sources, cultural expressions, and literature within the traditions of ethnic studies and transnational/women of color feminisms, it will trace the shifts in approaches to relationality, especially as it relates to practices of reciprocity and community-building across difference. At the same time, it will turn to works that name relationality as what Frank B. Wilderson calls a "ruse," or trick, that subsumes the specific, exceptional position of blackness. Our units will include discussions of Afro-Pessimism, indigeneity, racialized settler colonialism as well as queer theory debates on queer presentism (i.e., a queer "no future") versus queer futurity. Studying the tensions that emerge from multiple, distinct, and contradictory planes of power, oppression, and temporalities, how do we assess, work through, and reconcile, if at all, relations deemed as "irreconcilable" across vectors of difference?

Requirements/Evaluation: in-class participation, paper presentation, peer feedback, writing webs (short series of writing exercises), and final project developed from original research and/or creative work

Prerequisites: AMST 101 or WGSS 101

Enrollment Limit: 12

Enrollment Preferences: AMST and WGSS seniors and juniors

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 396(D2) AMST 428(D2) WGSS 428(D2)

Writing Skills Notes: Students will regularly engage in a series of writing exercises and submit a longer paper presentation that will be peer reviewed and revised.

Difference, Power, and Equity Notes: The main objective of the course is to study and assess ethnic studies' approaches to questions of difference, particularly as it relates to theories of racialization and relationality across multiple nodes of power and oppression.

WGSS 475 (S) Dreaming Latina/x Feminist Disability Studies (DPE) (WS)

Cross-listings: LATS 475 / AMST 413

Secondary Cross-listing

In this course we will defy the traditional notion that disabled and queer people of color have no right to future dreams, as we collectively imagine how the emergent field of Latina/x feminist disability studies might take shape. What are the sites of focus, methods, and political commitments of Latina/x feminist disability studies? Where is the power in meaningfully uniting an analysis of disability to one of sexuality and gendered Latinidad? How does a Latina/x-centric approach productively inform our understanding of disability? What is the political potential of Latina/x feminist disability studies -- not exclusively as a set of theories, but also as a mindset and an everyday call to action? If we were to collectively compose a manifesto for Latina/x feminist disability studies, what might it contain? How might we actively cultivate a community of care in the classroom as well as other spaces at Williams? Just what might Latina/x feminist disability justice dreams look like? How might Latina/x feminist disability justice dreams feel? Feminist, queer, and disabled crips-of-color scholars have recently called for a more meaningful engagement with race in feminist disability studies.

Simultaneously, we have also witnessed a small but steady growth in the amount of Latinx studies scholarship that thoughtfully integrates questions of disability. This interdisciplinary course responds to these important shifts in its focus on a series of topics bridging Latinx studies, gender studies, queer studies, crips studies, and critical disability studies. These include but are not limited to the body, the environment, temporality, labor, citizenship, dependency, and visibility/invisibility. Through these topics, we will explore the ways in which the different approaches to these specific issues across Latinx, critical disability, crips, queer and gender studies are in fruitful conversation with one another -- and sometimes even at odds -- as we actively interrogate the intersections of gender, race, ethnicity, sexuality, and disability within the everyday.

Requirements/Evaluation: Major assignments for this course include a semester-long independent research paper (15-20 pages) broken up into steps, participation in crafting the class manifesto, a semester-long collaborative artistic exercise, and a final reflection document (3-4 pages).

Prerequisites: None.

Enrollment Limit: 12
Enrollment Preferences: Priority given to LATS concentrators by seniority, followed by WGSS and AMST majors by seniority.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: Lab fee: $200 for art supplies per student

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 475(D2) LATS 475(D2) AMST 413(D2)

Writing Skills Notes: We focus on building writing and interdisciplinary research skills, with a particular emphasis on the processes of research, revision, and collaborative writing. The primary research paper (an independent project of 15-20 pages) is divided into stages, and students are required to revise and resubmit their work at various junctures in the research process. The written class manifesto requires students to compose a document together, revising their work as a group over the course of the semester.

Difference, Power, and Equity Notes: This course privileges an intersectional analysis regarding questions of race, ethnicity, gender, sexuality, and disability. It obligates students to consider how these categories of difference actively work in tandem with one another in everyday US Latina/x and transnational (US-Latin America and the Caribbean) contexts. This seminar also underscores how these categories of difference are actually products of a given historical and political moment.

Visitors: Yumemi Hanaki, Visiting Lecturer in Japanese; Xiaoming Hou, Visiting Assistant Professor of Chinese; Ju-Yin Wang, Visiting Lecturer in Chinese; Language Fellows: Xuechan Dai, Yen-Yu Lin; Teaching Associate: Mei Ki (Lina) Law

Department Mission Statement and Curricular Goal

The mission of the department is to produce “global citizens” with multilingual abilities, intercultural communicative competence, and multicultural leadership skills, who will be able to make contributions in different sectors of society in a globalized and diverse world. Graduates of our department will not only achieve proficiency in at least one Asian language but also become competent in intercultural communication. They will develop interpretive and analytical skills using both primary texts and secondary sources and become familiar with the textual and cultural traditions in Asia.

The department offers three distinct major tracks: Chinese, Japanese, and East Asian Languages & Cultures. Each major requires a minimum of ten courses. Up to four study-away credits can be counted toward a major.

Learning Objectives for the Chinese Major

Students who complete the requirements for a major in Chinese will be able to:

- Attain the Advanced level in speaking, listening and reading, and Intermediate High level in writing based on the ACTFL proficiency guidelines.
- Read and analyze basic texts written in Classical Chinese.
- Gain intercultural communicative skills to competently navigate a wide range of social and cultural contexts in Chinese-speaking environments.
- Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.
- Engage critically with important aspects of the historical and cultural developments and trends in China’s diverse and complex past and present.
- Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.

The Major

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Mandarin Chinese language courses (CHIN 101, 102, 201, 202, 301, 302, 401, 402) and at least one course in Classical Chinese (CHIN 312). To gain a deeper understanding of Chinese cultural traditions, students should take at least one Chinese core elective in Chinese literary, linguistic, or cultural studies (taught either in English or in Chinese) with prefixes and primary cross-listings in CHIN.

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the Japanese Major

Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL Intermediate High to Advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
- Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.
THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Japanese language courses (JAPN 101, 102, 201, 202, 301, 302, 401, 402), at least one Japanese core elective in Japanese literary, linguistic, or cultural studies (taught either in English or in Japanese) with prefixes and primary cross-listings in JAPN, and one approved elective related to Japanese language and culture (including additional JAPN core electives, additional Asian language courses, or Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the East Asian Languages and Cultures Major

Students who complete the requirements for a major in East Asian Languages and Cultures will be able to:

- Attain a minimum of Intermediate High level in speaking, listening and reading of either Chinese or Japanese, and Intermediate Low level in writing in the language based on the ACTFL proficiency guidelines.
- Acquire research, problem-solving, and critical thinking skills by engaging in linguistic or literary analysis in the field of Chinese studies or Japanese studies.
- Obtain basic intercultural communicative skills to navigate some social and cultural contexts in Chinese- or Japanese-speaking environments.
- Continue their engagement with an Asian language and culture as lifelong learners and users of the target language.
- Students who choose the dual-language option will attain the Advanced level in speaking, listening, and reading in either Chinese or Japanese, and the intermediate level in a second Asian language based on the ACTFL proficiency guidelines.

THE MAJOR

East Asian Languages and Cultures (EALC) major: In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least six language courses (or attain a minimum proficiency equivalent to the completion of 302) in one East Asian language offered by the department (currently Chinese Mandarin and Japanese). To gain a deeper understanding of the Chinese or Japanese cultural traditions and to develop research skills in the Chinese or Japanese fields, they should take at least two Chinese/Japanese core electives in literary, linguistic, or cultural studies in their primary focus of study with prefixes and primary cross-listings in CHIN/JAPN, and two approved electives related to Chinese/Japanese language and culture (including additional CHIN/JAPN core electives, additional Asian language courses, or Chinese/Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

This major offers students who are able to complete the 402 level in either Chinese or Japanese by the end of their sophomore year a dual-language option which will allow them to learn a second Asian language and reach the Intermediate level in speaking that language by the time of graduation. Please consult with the chair or language coordinator for more information about this option.

LANGUAGE PLACEMENT

Students who have studied or otherwise developed some familiarity with Chinese or Japanese language before coming to Williams and who wish to continue their language study at the college should complete a placement evaluation before pre-registering for a language course. More information about the Chinese placement evaluation can be found at https://chinese.williams.edu/faq/. Students who wish to take the Japanese placement test should contact the Japanese faculty.

THE DEGREE WITH HONORS

The department offers students the option of pursuing a degree with Honors in Chinese, Japanese, or East Asian Languages and Cultures through writing an honors thesis. Honors theses allow students a unique opportunity to undertake an examination of topics and texts with a greater depth than regular courses allow. The great majority of students who undertake the challenge of writing an honors thesis find it to be one of their most rewarding academic experiences at Williams.

Students interested in pursuing a degree with Honors should begin thinking about their thesis topic and materials as early as possible. This is particularly true for students who need to gather materials or conduct research abroad, as this will typically take place during their junior year or the summer between their junior and senior years. It is the responsibility of the student to approach faculty members to inquire about their willingness to serve as a thesis advisor. Ideally, students should have previously taken a course with that faculty member in an area related to the subject matter of the thesis. Faculty members will usually only advise a single thesis per year, and never more than two, with students who first approach the faculty member about serving as advisor being given priority. It is recommended that students approach the faculty members with whom they are interested in
working for their thesis by the end of the fall semester of their junior year.

Students must submit a proposal to the department chair and their intended advisor before they pre-register for senior year courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. If the department approves the thesis proposal, the student should enroll in CHIN 493-W31-494, or JAPN 493-W31-494, depending on their major track. Please note that admission to the honors thesis program will normally be limited to students with a consistent record of honors-level work, as indicated by at least a B+ average in their courses for the major.

Students will typically meet with their advisor once a week at a set time other than office hours. The advisor will present the student with a set of deadlines for different stages in the thesis, ranging from a bibliography to the final draft. While these deadlines will vary for different advisors and theses, two deadlines will apply to all theses, whether analytic or translation. 1) Students must submit a finished first chapter or substantial section of polished translation by the last day of the first semester reading period. If the student misses this deadline, he or she will not be allowed to continue the thesis. 2) The finished thesis is due to the advisor by 4:00 pm on the Monday two weeks after the last day of Spring Recess. The student should submit three copies of the thesis at this time. There will be no extensions.

The department will assign two readers, separate from the advisor, to each thesis. The readers will give a written assessment of the thesis that will be an important factor in the final determination of the student’s grades for the thesis and what honors designation, if any, will be given. These written comments will be shared with the student. Within two weeks after submission, the department will schedule an oral defense. This will be a one to one-and-a-half hour session in which the student will give a public presentation of his or her thesis to members of the department and invited guests followed by a question and answer period. A final, corrected copy of the thesis must be submitted to the Technical Services Department of Sawyer Library by 4:00 P.M. on the last day of the final examination period.

In order to qualify for Honors, the department must agree that the student has earned two semester grades of B+ or higher, based on his or her thesis and oral defense. Students whose thesis and defense are deemed by the department to be of exceptional merit will be awarded Highest Honors. A letter from the department chair will inform students of these decisions.

STUDY ABROAD

Students intending to major in the department are strongly encouraged to study in Asia at some point during their time at Williams—for a summer or for a semester or full year. Study-abroad in an immersive environment in the target culture is an indispensable step toward advanced proficiency in a second language. Prospective majors or language students who are planning to study abroad must attend the fall semester study-abroad information sessions organized by the department or discuss their plans with department faculty as far in advance as possible. The department administers the Linen Fellowships for Summer Study in Asia which fund selected students’ summer intensive language study or research projects. Up to four study-abroad courses may be transferred and counted toward graduation and toward the majors offered in the department. Students MUST contact the department faculty BEFORE assuming study-away credit will be granted toward the major in the department. Upon return, students should ask their study-away program to send their transcript to the Registrar’s office so that the appropriate number of credits can be transferred and granted by the department chair.

DEPARTMENT EMAIL LISTS

To be informed about the events, activities and funding opportunities in the department, please use your Williams login to sign up for one or more of the following GLOW special interest email lists.

“DALLC Majors and Faculty” (open to all current and prospective Chinese, Japanese, or East Asian Languages and Cultures majors):
https://glow.williams.edu/enroll/AWTMXP

“Asia-Related Funding Opportunities” (open to all students who would like to seek internal or external funding related to Asia):
https://glow.williams.edu/enroll/PGJHAC

“Special Interest Chinese” (open to all students interested in Chinese language and culture): https://glow.williams.edu/enroll/XEYMPG

“Special Interest Japanese” (open to all students interested in Japanese language and culture): https://glow.williams.edu/enroll/DAYTN3

Nate Vellekoop, Visiting Assistant Professor of Economics
Tara E. Watson, Professor of Economics
David J. Zimmerman, Professor of Economics and Orrin Sage Professor of Political Economy

GENERAL INFORMATION
The primary objective of the economics major is to develop an understanding of how individuals, organizations and societies meet their material needs. The introductory courses present the fundamental principles of economics at a level that is useful for understanding a wide range of social and policy issues. The core theory courses provide a more rigorous grounding in the tools used in analyzing individual choice, the functioning of markets, and the behavior of output, employment, and inflation. The econometrics course familiarizes students with the methods used to analyze economic data, and equips them with the tools necessary to critique and conduct empirical research. The electives draw on the skills developed in the introductory and core courses to gain a richer understanding of specific aspects of economic behavior and public policy.

Planning for a possible economics major. Given the hierarchical structure of the economics major, students considering an economics major should try to start with ECON 110 during their first year. Since ECON 255 requires a prior statistics course (STAT 161, 201 or 202), prospective economics majors should complete the statistics requirement relatively early in their college careers. Since the 400-level electives typically require at least two of the intermediate core courses (ECON 251, 252, or 255), students are strongly encouraged to complete the core courses by the end of junior year. We prefer that the three intermediate core classes be taken at Williams, so students planning on studying abroad as juniors should aim to complete these courses before departure if possible.

Preparation for graduate school. Graduate study in economics requires considerably more mathematical training than that necessary for the economics major. We advise students who are considering pursuing a Ph.D. to take at a minimum MATH 150 or 151, MATH 250, MATH 350, MATH/STAT 341, and MATH 309. We also advise students to consider electives such as ECON 451, 471, 472, 474, or 475 that present advanced perspectives on contemporary economic theory or econometrics. As graduate schools look for evidence of research aptitude, we also encourage those interested in graduate school to pursue the Honors program.

The economics major and business careers. The analytical and critical thinking skills taught in economics classes are useful for many careers, including business. The major is not designed to provide pre-professional training in business or management, however. Students from a wide variety of majors, including the sciences and humanities, have gone on to successful business careers. We therefore advise those interested in business to acquire a broad exposure to the arts, social science, and natural sciences, and to major in a subject that engages their interest even if that subject is something other than economics.

MAJOR REQUIREMENTS
Nine courses are required for the economics major. These are:

Introductory Courses
Economics 110 Principles of Microeconomics
Economics 120 Principles of Macroeconomics. Prerequisite: ECON 110

Passing the quantitative studies exam or the equivalent is a prerequisite for both classes. Both are suitable for non-majors. Courses numbered 200-299 will require one or both as prerequisites.

Core Courses
Economics 251 Price and Allocation Theory. Prerequisites: differential calculus (MATH 130 or equivalent) and ECON 110
Economics 252 Macroeconomics. Prerequisites: differential calculus (MATH 130 or equivalent), ECON 110 and ECON 120
Economics 255 Econometrics. Prerequisites: differential calculus (MATH 130 or equivalent) plus STAT 161, 201 or 202 or a score of 5 on the AP Statistics exam. STAT 101 will also serve as a prerequisite, but only if taken prior to the fall of 2018. STAT 346 can be used to satisfy the ECON 255 major requirement, although not all upper-level electives and seminars accept STAT 346 as a prerequisite in lieu of ECON 255. Students with a double major in Statistics and Economics who choose to use STAT 346 to satisfy the ECON 255 requirement must take an additional ECON elective at any level. POEC 253 may not substitute for ECON 255 in fulfilling the major requirements, although some electives may accept POEC 253 as a prerequisite in lieu of ECON 255.

The three core classes may be taken in any order. All of the 300- and 400-level electives will require at least one of the core classes, and many of the 400-level seminars require ECON 255.

Elective Courses
Students must complete at least four economics electives at the 200-level or higher in addition to the introductory and core classes listed above. At least two must be advanced electives numbered 300 to 398. At least one must be a seminar numbered 400-490. A second seminar may be taken in lieu of a 300-level elective. Enrollment preference for 400-level classes is given to seniors who have not already taken a seminar. Note that some of the advanced electives may have specific requirements beyond the core economics courses and MATH 130. With the permission of the instructor, undergraduates may enroll in 500-level graduate courses given by the Center for Development Economics. These courses can substitute for advanced electives numbered 300-398, unless otherwise noted in the course description.

AP, IB and A-level Exams

The ECON 110 requirement may be waived for students who earned a 5 on the microeconomics AP exam, and the ECON 120 requirement may be waived for those who received a 5 on the macroeconomics AP exam. Both the ECON 110 and 120 requirements may be waived for students who received an A on the A-level exam in economics or earned a 6 or 7 in the higher economics IB exam. A requirement may be waived for students who earned below a 5 on the microeconomics or macroeconomics AP exams or below a 6 on the higher economics IB exam after consultation with the department. In all cases, results from the department placement exam are taken into account in making the determination of whether a requirement will be waived.

Students who started at Williams prior to Fall 2020 will receive major credit for each course requirement that is waived and may complete the major with either eight or seven additional courses, depending on whether they place out of one or both introductory courses. These would include the introductory course for which no advanced placement was granted (if applicable), the three core classes, and four electives.

Students who started at Williams in Fall 2020 and following receive advanced placement, but no reduction in the number of courses required for the major. Completion of a major in Economics requires nine semester courses. These would include the introductory course for which no advanced placement was granted (if applicable) and one additional elective at the 200-level or higher, or two additional electives at the 200-level or higher if both ECON 110 and 120 requirements are waived, the three core theory classes, and the four electives.

A score of 5 on the statistics AP exam, a 6 or a 7 on the statistics IB exam, or an A on the A-level statistics exam will satisfy the statistics prerequisites for ECON 255.

STUDY ABROAD AND TRANSFER CREDIT

Students may receive credit towards the major for college courses taken at other institutions, including those taken as part of a study abroad program. Most economics courses taken elsewhere that have an introductory economics prerequisite will qualify for 200-level elective credit. Some may be able to count towards a specific departmental requirement, including the introductory or core courses, or qualify as a 300-level elective. In order to receive major credit, courses must count towards the student’s Williams degree. Students wanting major credit for courses taken outside of Williams should contact the Department’s Coordinator for Transfer/Study Abroad Credit prior to taking the course for approval. (The Department’s website will indicate which faculty member is serving as the Coordinator.) General study away guidelines for Economics are posted at econ.williams.edu/major/study-abroad.

THE DEGREE WITH HONORS IN ECONOMICS

Graduating with honors requires the completion of a substantial piece of independent research. Those with an economics GPA of at least 3.5 are encouraged to apply. In addition, because theses typically make use of empirical methods, those considering writing a thesis are strongly advised to complete Econ 255 before the end of junior year.

The honors program involves working closely with a faculty adviser on a subject related to the faculty member’s area of expertise. The first step in pursuing honors is therefore to develop a thesis proposal in consultation with a faculty adviser. The proposal is then submitted to the Department for approval.

The Department offers both a half-year and a full-year honors program:

The half-year program entails enrolling in a one-semester seminar plus a WSP class. Students may either enroll in ECON 491 in the fall semester and ECON 30 during winter study, or they may take ECON 30 during winter study and ECON 492 in the spring. Proposals for a fall semester thesis are due in May of the junior year, while those doing a spring thesis will submit their proposals in December of the senior year. Those choosing the half-year option often base their projects on research that had been initiated in an advanced elective or a seminar, although this is not a requirement.

The full-year program involves taking ECON 493 in the fall, ECON 31 during winter study, and ECON 494 in the spring. Proposals are due in May of the junior year.

Both programs require students to remain on campus during winter study.

Prospective honors students considering studying abroad during their junior year should plan to complete the core courses and at least one 300-level elective by the end of their sophomore year. They are also urged to begin their collaboration with their intended adviser prior to departure, and to consult with the Director of Research on the options for pursuing honors. (The Department’s website will indicate which faculty member is serving as the Director of Research.)
Further details on the two routes, the application procedure and deadlines are contained in memos sent to economics majors in the spring and fall semesters. The information is also available on the Department’s web site.

In addition to completing the research project, the College requires that in order to graduate with honors, students must take at least one course in addition to the minimum number required for the major. Students in the full-year program may substitute ECON 493 for an upper-level elective (excluding those numbered 400-490). Students enrolled in the half-year program may not substitute ECON 491 or 492 for one of their electives.

GRADUATE COURSES IN DEVELOPMENT ECONOMICS

Graduate courses given by the Center for Development Economics are open to undergraduates who have taken the prerequisites, although in most cases, permission of instructor is also required. Unless otherwise specified in the course description, these courses can substitute for electives numbered 300-398 in the major.

ECON 105  (F)  Gender in the Global Economy  (DPE)

Cross-listings:  WGSS 211

Secondary Cross-listing

This course will present a feminist economic analysis of the global economy, and some of the urgent issues facing women in the Global South. The course will start by developing theoretical resources: these will include feminist critiques of economic theory, work on care labor and the shifting boundaries between markets, governments, households and the environment, and discussions of intersectionality and difference. Then we will discuss a series of interlinked issues which may include the contradictory effects of structural adjustment and its successors; the informal sector and global value chains; the economics of sex work and global sex trafficking; climate change; and migration. We will finish by looking at community-based activism, non-governmental organizations, and the possibilities for North/South alliances.

Class Format: lecture/discussion

Requirements/Evaluation:  reaction papers, research paper; participation in class discussion will count for part of the grade

Prerequisites:  none

Enrollment Limit:  20

Enrollment Preferences:  Women's, Gender and Sexuality Studies majors

Expected Class Size:  12

Grading:  no pass/fail option,  yes fifth course option

Unit Notes:  This course cannot count toward the ECON major.

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 105(D2)  WGSS 211(D2)

Difference, Power, and Equity Notes:  This course meets the DPE requirement because it asks students to reflect critically on issues of gender and economic power around the world in a comparative contextual framework.

Attributes:  GBST Economic Development Studies  WGSS Racial Sexual + Cultural Diversity Courses

Fall 2024

SEM Section: 01    TF 2:35 pm - 3:50 pm    Kiaran Honderich

ECON 110  (F)(S)  Principles of Microeconomics  (QFR)

This course is an introduction to the study of the forces of supply and demand that determine prices and the allocation of resources in markets for goods and services, markets for labor, and markets for natural resources. The focus is on how and why markets work, why they may fail to work, and the policy implications of both their successes and failures. The course focuses on developing the basic tools of microeconomic analysis and then applying those tools to topics of popular or policy interest such as minimum wage legislation, pollution control, competition policy, international trade policy, discrimination, tax policy, and the role of government in a market economy.

Requirements/Evaluation:  problem sets, quizzes, short essays, two midterms, final exam
Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: This course is required of Economics and Political Economy majors and highly recommended for those non-majors interested in Environmental Studies and Women's, Gender and Sexuality Studies.

Expected Class Size: 40

Grading: yes pass/fail option, no fifth course option

Unit Notes: The department recommends students follow this course with ECON 120 or with a lower-level elective that has ECON 110 as its prerequisite; students may alternatively proceed directly to ECON 251 after taking this introductory course.

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

Attributes: POEC Required Courses

Fall 2024
LEC Section: 01 TF 1:10 pm - 2:25 pm Matthew Chao
LEC Section: 02 TF 2:35 pm - 3:50 pm Matthew Chao

LEC Section: 04 TR 9:55 am - 11:10 am Owen Thompson
LEC Section: 05 MWF 8:30 am - 9:45 am Nate Vellekoop
LEC Section: 06 MWF 11:00 am - 12:15 pm Nate Vellekoop

Spring 2025
LEC Section: 01 TF 1:10 pm - 2:25 pm Ethan Holdahl
LEC Section: 02 TF 2:35 pm - 3:50 pm Ethan Holdahl

ECON 120 (F)(S) Principles of Macroeconomics (QFR)
This course provides an introduction to the study of the aggregate national economy. It develops the basic theories of macroeconomics and applies them to topics of current interest. Issues to be explored include: the causes of inflation, unemployment, recessions, and depressions; the role of government fiscal and monetary policy in stabilizing the economy; the determinants of long-run economic growth; the long- and short-run effects of taxes, budget deficits, and other government policies on the national economy; the role of financial frictions in amplifying recessions; and the workings of exchange rates and international finance.

Requirements/Evaluation: Depending on instructor, may include: problem sets, short essays, quizzes, reading assignments, either one or two midterms, and a final exam.

Prerequisites: ECON 110

Enrollment Limit: 40

Enrollment Preferences: First-year students and sophomores.

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and describing those results in words.

Attributes: POEC Required Courses

Fall 2024
LEC Section: 01 MWF 11:00 am - 12:15 pm Bumsoo Kim
LEC Section: 02 TR 9:55 am - 11:10 am David A. Love

Spring 2025
ECON 204 (S) Global Poverty and Economic Development (DPE)

Cross-listings: ENVI 234

Primary Cross-listing

Why are some nations rich while other nations are poor, and what can be done to end global poverty and promote shared prosperity? This course explores the historical determinants of global poverty and inequality, and analyzes the range of policy options available to promote economic development and equalize opportunities. Drawing on research in development economics, development studies, political science, and anthropology, we seek to understand the factors that shaped the global economy and contributed to the cross-country income disparities observed today. In addition, we'll use the tools of modern empirical microeconomics to assess the possibilities for eliminating global poverty and underdevelopment in the future. Undergraduate students will receive 200-level credit and should not register at the 500-level.

Class Format: discussion

Requirements/Evaluation: class discussion, short written assignments and/or empirical exercises, in-class quizzes and exams

Prerequisites: one economics course or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 204(D2) ECON 507(D2) ENVI 234(D2)

Difference, Power, and Equity Notes: This course provides a setting for students to learn about the causes and consequences of poverty in developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. The course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

Attributes: ENVI Environmental Policy GBST African Studies GBST Economic Development Studies POEC Comparative POEC/Public Policy Courses

Not offered current academic year

ECON 205 (F) Public Economics

This course examines the role of the government in the economy. We consider three broad issues: When should governments intervene in the economy? What is the most effective form of intervention? What effects do government policies have on incentives and behavior? In addition to a theoretical perspective, we will discuss particular government spending programs in the United States, including Social Security, various types of publicly-provided insurance, spending on education, and public assistance for the poor. Finally, we will study how the government raises revenue through taxation. We will discuss the principles that guide tax design and consider the effects of the tax code on behavior.

Class Format: Lecture / discussion format.

Requirements/Evaluation: problem sets, short writing assignments, participation in discussion and activities, midterm exam, and final exam

Prerequisites: ECON 110

Enrollment Limit: 25

Enrollment Preferences: Prospective economics and political economy majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option
ECON 213 (S) Introduction to Environmental and Natural Resource Economics  (QFR)

Cross-listings:  ENVI 213 / CAOS 213

Primary Cross-listing

We'll use economics to provide one perspective on reasons humans harm the environment and overuse natural resources, and what we can do about it. We'll study climate change, pollution in general, cost benefit analysis, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We'll talk about how economists put a dollar value on nature and ecosystem services (as well as human health and life!), and the concerns people may have about doing so. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth. Consideration of justice and equity will be woven throughout the whole semester.

Requirements/Evaluation:  problem sets, short essays, final paper; intermediate assignments may include a poster, one or more short presentation(s), other brief writing assignment(s)

Prerequisites:  ECON 110 or equivalent

Enrollment Limit:  30

Enrollment Preferences:  first-year and sophomore students

Expected Class Size:  30

Grading:  yes pass/fail option,  yes fifth course option

Unit Notes:  this course will count toward both the Environmental Studies major and concentration

Distributions:  (D2)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 213(D2) ENVI 213(D2) CAOS 213(D2)

Quantitative/Formal Reasoning Notes:  We will use formal theory expressed in math and graphs, perform calculations, and consume statistical data.

ECON 214 (F) The Economics and Ethics of CO2 Offsets  (WS)

Cross-listings:  ENVI 212

Primary Cross-listing

Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Class Format:  Each student will be the tutorial partner of one other student, and each pair of tutorial partners will meet with the instructor for 75 minutes each week.

Requirements/Evaluation:  a 5- to 7-page paper every other week; a 3-page written critique every other week; one re-write paper

Prerequisites:  ECON 110 or the equivalent, permission of instructor

Enrollment Limit:  10

Enrollment Preferences:  first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 214(D2) ENVI 212(D2)

Writing Skills Notes: Each student will write five 5-7 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write five 3-page critiques of their partner's papers. As the final assignment, each student will revise one of their five papers.

ECON 216 (S) Global Crises and Socio-Economic Policies

Socio-economic policies (health, education, welfare, jobs) that respond to global crises have evolved over the past four decades. For most of the last century, macroeconomic priorities in developing countries constrained the potential of these policies during crisis periods when governments faced pressure to cut public spending, with adverse consequences for the most vulnerable. However, over the past two decades, developing country governments have increasingly integrated health, education, welfare and employment policies to counter shocks and build economic resilience. These more comprehensive responses proved vital during the COVID-19 crisis's cascading series of epidemiological, economic, social, and political shocks, as public health measures created severe livelihoods disasters for the most vulnerable. In this respect, COVID-19 serves as a harbinger of the future shocks that climate change threatens. This tutorial will focus on how developing country governments can build bridges across vital policy sectors--particularly health, education, welfare and employment--and link these to other economic interventions in order to better tackle future global crises. Building on a historical analysis, the course will examine the path-breaking examples of many developing countries' bold responses to the COVID-19 pandemic, the resulting fiscal challenges, and the lessons these offer for future crises including those resulting from climate change. The course will conclude with a forward-looking exercise, examining the role of integrated health, education, welfare and employment policies in better enabling developmental responses to both climate change adaptation and mitigation strategies. This will include an exploration of the emerging work across the global South on a Just Transition to green and sustainable development, which aims to optimally integrate climate, development and equity strategies.

Requirements/Evaluation: Students will write five papers during the term and will prepare and deliver formal comments on five papers written by
your tutorial partner.

**Prerequisites:** Econ 110 or equivalent

**Enrollment Limit:** 10

**Enrollment Preferences:** First-year students and sophomores intending to major in economics.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**Attributes:** GBST Economic Development Studies POEC Depth

Not offered current academic year

**ECON 218 (F) Capital and Coercion** (DPE)

**Cross-listings:** CAOS 218

**Primary Cross-listing**

Capital, tradable ownership shares in long-lived corporations, invented in the 17th century, has connected people of different races, religions, and geographies. There are huge profits from such economic interactions, but also risks: of being cheated, deceived, or coerced. This course uses insights from the economics of incentives (principal-agent models, contracts, mechanism design) to investigate the interplay between capital, coercion, and resistance. The role of prejudice will be central, as will the rise of middlemen as enforcers of coercion. Case studies span the 17th century to the 20th and include: the spice trade and conflict in the Indian Ocean, capital markets and fraud in Amsterdam and London, the Atlantic trade in enslaved people, the Dutch "cultivation system" in Java, the slow end of slavery in Brazil, and colonial control and independence in Kenya. Required readings for this class will include primary historical sources, and even excerpts from autobiographical novels!

**Requirements/Evaluation:** Students will be evaluated based on weekly reading responses, class participation, a midterm and a final.

**Prerequisites:** Econ 110

**Enrollment Limit:** 15

**Enrollment Preferences:** If overenrolled, students will be asked to submit a short statement of interest.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

CAOS 218(D2) ECON 218(D2)

**Difference, Power, and Equity Notes:** This course analyzes the evolution of economic inequity. It analyzes how global market opportunities have been shaped by race, religion, wealth, and power.

**Attributes:** GBST Economic Development Studies POEC Depth

Not offered current academic year

**ECON 219 (S) Global Economic History** (WS)

What generated the rise of agricultural civilizations and early empires in the ancient world? Why did Western Europe--and not China, India, or the Middle East--first experience the Industrial Revolution? Why did Latin America stagnate over the 20th century, while Japan and eventually China and India boomed? What explains the historical success of the US economy? Why did the Soviet Union rise and fall? And why was African economic growth slow for so long before taking off in recent decades? These and other questions will guide our exploration of global economic development over the past several millennia. Our focus will be broadly comparative across space and time, with an emphasis on how institutions, resource endowments, culture, technology, and market forces help explain economic differences and change around the world. Throughout the course, we will draw on micro and macroeconomic concepts and simple empirical tools to understand and interpret the historical roots of the modern global economy.

**Class Format:** tutorial; weekly one hour meetings in groups of two

**Requirements/Evaluation:** evaluation will be based on five 5- to 6-page papers, critiques of fellow students' papers, a longer revision of a paper, and engagement in discussion

**Prerequisites:** ECON 110 and ECON 120 or equivalent courses subject to instructor approval
Enrollment Limit: 10
Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or History
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)
Writing Skills Notes: This tutorial course requires students to write five 5-7-page papers, to write 1-2 page responses to their tutorial partner's papers, and to revise and extend one of their papers into a larger final paper of approximately 10-12 pages. Along the way, I offer detailed comments on all of their writing, with an eye towards producing a very polished final paper.

ECON 220 (F) We Hold These Truths: Growth, Change, and Struggle in American Economic History
This course examines the growth and development of the American economy from the colonial era to today. The emphasis will be on the use of economic theory and quantitative evidence to explore key questions and themes in U.S. history. While we will study the key drivers of longer-term American economic success, we will also concentrate on the experiences of those marginalized, coerced, or otherwise oppressed over this history. Topics may include some or all of the following: the development of colonial markets, the economics of the U.S. Constitution, Native Americans in the American economy, slavery and racial inequality, immigration, innovation, industrialization, government regulation and policymaking, the Great Depression, the changing roles of women in the U.S. economy, post-World War II growth, the construction of the social safety net, and the place of the United States in the modern global economy. Comparisons will be made to European and non-European experiences when appropriate.
Class Format: lecture/seminar
Requirements/Evaluation: small exams, short assignments, and a research paper
Prerequisites: ECON 110 and 120
Enrollment Limit: 30
Enrollment Preferences: Sophomores and juniors
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)

Not offered current academic year

ECON 227 (F) Acquiring Art: Selecting and Purchasing Objects For WCMA
Cross-listings: ARTH 527 / ARTH 327
Secondary Cross-listing
How do museums acquire art? Factors considered in selecting objects include: the museum's existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object's history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.
Requirements/Evaluation: Three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy for acquisition.
Prerequisites: ECON 110 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
ARTH 527(D1) ECON 227(D2) ARTH 327(D1)

Attributes: ARTH post-1800

Not offered current academic year

ECON 229 (F) Law and Economics (QFR)

This course applies the tools of microeconomic analysis to private (i.e., civil) law. This analysis has both positive and normative aspects. The positive aspects deal with how individuals respond to the incentives created by the legal system. Examples include: how intellectual property law encourages the creation of knowledge while simultaneously restricting the dissemination of intellectual property; how tort law motivates doctors to avoid malpractice suits; and how contract law facilitates agreements. The normative aspects of the analysis ask whether legal rules enhance economic efficiency (or, more broadly, social welfare). Examples include: what legal rules are most appropriate for mitigating pollution, ensuring safe driving, and guaranteeing workplace safety? The course will also cover the economics of legal systems; for example, what are the incentives for plaintiffs to initiate lawsuits and what role do lawyers play in determining outcomes.

Class Format: discussion

Requirements/Evaluation: class participation, problem sets, paper based on actual court cases, a midterm exam, and a final exam

Prerequisites: ECON 110

Enrollment Limit: 35

Enrollment Preferences: ECON and POEC majors (and potential majors) will receive priority if the course is overenrolled

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: This course uses economic models to explore the logic of legal concepts. While some arguments will be qualitative, students will also use numerical examples to illustrate the principles of the course.

Fall 2024

SEM Section: 01 W 7:00 pm - 9:40 pm William M. Gentry

ECON 230 (S) The Economics of Health and Health Care (WS)

What is health? How do we improve it? Health is an essential component of individual well-being and a fundamental input to a productive economy, making its production a societal priority, as well as an individual one. This course examines the economics of the supply and demand for health through applied microeconomic analysis. The course focuses on three broad areas: the inputs to health and the demand for health care; the structure and functioning of health care markets and the roles of key institutions; and the role of public policy in furthering individual and population health. Special attention will be devoted to topics of current policy interest, including health disparities, problems of health care costs and cost containment, health insurance reform and the Affordable Care Act, the role of public health interventions, and drug development and regulation.

Class Format: The class is a mixture of lecture and discussion.

Requirements/Evaluation: Several short papers, participation in class discussion, and a final research project and presentation.

Prerequisites: ECON 110 and a class in statistics

Enrollment Limit: 30
Enrollment Preferences: Economics majors who need a 200-level elective, Political Economy majors, and Public Health concentrators

Expected Class Size: 30

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write 3 policy memos over the course of the semester. Synthesis of peer-reviewed literature, use of citation management systems, and clarity in technical writing will be emphasized. Students will receive timely, substantial, individualized feedback to develop their technical writing ability over the course of the semester. Opportunities to meet with professor outside of class at any stage of writing.

ECON 231  (S)  The Economics of Inequality

There are many outcomes in the United States that show profound levels of inequality: education, earnings, wealth, housing, environmental health, and life expectancy, just to name a few. This course examines the economic forces that drive and/or explain these inequalities in the U.S. The beginning of the course covers definitions and economic techniques used to measure income and wealth inequality, as well as differences between perceived and actual inequalities. We then move on to the theoretical underpinnings of the rise of domestic economic inequality, as well as models and theories of discrimination. Finally, we will explore how economic inequalities carry over into health, housing, and environmental quality through policies or social mechanisms. We will discuss and investigate the following questions and more: How are skill and education related to income? How do income and health interact, and which causes the other? How is the level of economic inequality in the country perceived? Which historic policies have led to specific inequalities, and was the inequality an intentional or inadvertent outcome? What have other countries done differently, and how does what the U.S. has done compare in terms of disparities? What exactly is discrimination, and what are the cumulative effects of it in the labor market and health outcomes?

Class Format: Lecture and small discussion groups

Requirements/Evaluation: Several short papers (peer- and instructor-reviewed), article review, and final project and presentation

Prerequisites: ECON 110

Enrollment Limit: 25

Enrollment Preferences: Economics majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: POEC Depth

Not offered current academic year

ECON 232  (S)  Financial Markets, Institutions and Policies  (QFR)

The focus of the course will be on how firms, financial markets, and central banks interact in the economy. Key questions addressed in the course include: How do firms allocate their resources to enhance their value? How are firms evaluated by the financial markets? How are asset prices determined, and how are these prices related to interest rates? Are financial markets efficient, and what are the implications of their efficiency or lack thereof? How does the financial system help with the management of risks faced by society? We will also study the role of the central bank (the Federal Reserve in the US), monetary policy, and government regulation and their impacts on financial decision making. Key questions include: How do central banks set monetary policy and how do those policies affect the economy and the financial decision-making process? How does monetary policy change when interest rates are (virtually) zero?

Class Format: There will be a mix of lecture and discussion.

Requirements/Evaluation: 5-7 Problem Sets, Quantitative Exercises, Group Paper, and Final Exam

Prerequisites: ECON 110 and ECON 120

Enrollment Limit: 25

Enrollment Preferences: Sophomore and Junior Economics majors
ECON 233 (S) Behavioral Economics and Public Policy

In many ways, the fields of psychology and economics both study the same phenomena: the motives that guide our decision-making across different contexts. This course provides a survey of the ways in which these two fields intersect, i.e., behavioral economics. Topics include how individual responses to economic incentives can be influenced by heuristics, framing, social norms, and other psychological motives; we will also study how these concepts are incorporated into microeconomics models. Concurrently, the course will review applications of these ideas to public policy and firm strategy. For instance, we will examine how behavioral economics has informed efforts to reduce poverty, increase environmental conservation, encourage long-term financial planning, and improve health and diet outcomes, among many other topics. The course will also discuss whether and how we ought to judge which behaviors are socially desirable and worth encouraging through policy.

Requirements/Evaluation: One midterm, one final exam, 4-6 problem sets, and 1-2 writing assignments
Prerequisites: ECON 110
Enrollment Limit: 30
Enrollment Preferences: If over-enrolled, I will aim to accept a mix of years and majors
Expected Class Size: 30
Grading: yes pass/fail option, no fifth course option
Distributions: (D2)
Attributes: POEC Depth, POEC Skills

ECON 240 (S) Colonialism and Underdevelopment in South Asia  (DPE) (QFR)

Cross-listings: ASIA 241

Primary Cross-listing

British colonial rule in South Asia shaped economy and society in fundamental ways. As resistance to colonial rule emerged in the late nineteenth century, "nationalist" writers developed a critique of its economic impact via taxation, fiscal policy, trade, and many other policies. In their turn, supporters of British rule, "apologists," argued that British rule had laid the foundations of economic growth by securing property rights, enforcing contracts, and developing infrastructure. The debate between "nationalists" and "apologists" has never quite ended, but after the recent growth of the Indian economy it has lost some of its emotional charge. We will use this opportunity to revisit the controversy.

Requirements/Evaluation: essays (one every other week) and responses to partner's essays will be evaluated
Prerequisites: one course in ECON
Enrollment Limit: 10
Enrollment Preferences: Economics major, prior course on South Asia
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
Difference, Power, and Equity Notes: Issues of difference, power, and equity are at the heart of any analysis of colonialism, hence the DPE designation.

Quantitative/Formal Reasoning Notes: Students will write six essays, in which they will employ economic models and engage with quantitative evidence, so the course satisfies the QFR requirement.

Attributes: GBST South + Southeast Asia Studies  POEC Depth

Not offered current academic year

ECON 251  (F)(S)  Price and Allocation Theory  (QFR)
A study of the determination of relative prices and their importance in shaping the allocation of resources and the distribution of income. Subjects include: behavior of households in a variety of settings, such as buying goods and services, saving, and labor supply; behavior of firms in various kinds of markets; results of competitive and noncompetitive markets in goods, labor, land, and capital; market failure; government policies as sources of and responses to market failure; welfare criteria; limitations of mainstream analysis.

Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets and multiple exams, including a final exam. They may also include one or more quizzes, short essays, collaborative projects, or presentations.

Prerequisites:  ECON 110 and MATH 130 or its equivalent

Enrollment Limit:  30

Enrollment Preferences:  Current or prospective Economics majors.

Expected Class Size:  30

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)  (QFR)

Quantitative/Formal Reasoning Notes: Course involves developing and analyzing mathematical models of real-world phenomena, grounded in tools like calculus and game theory. Students are assumed to be comfortable with topics from introductory calculus, including differentiation and integration.

ECON 252  (F)(S)  Macroeconomics  (QFR)
A study of aggregate economic activity: output, employment, inflation, and interest rates. The class will develop a theoretical framework for analyzing economic growth and business cycles. The theory will be used to evaluate policies designed to promote growth and stability, and to understand economic developments in the U.S. and abroad. Instructors may use elementary calculus in assigned readings, exams and lectures.

Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets and/or written assignments, midterm(s), and a final exam.

Prerequisites:  ECON 110 and 120 and MATH 130 or its equivalent

Enrollment Limit:  30

Enrollment Preferences:  Current or prospective Economics majors.

Expected Class Size:  30

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D2)  (QFR)

Quantitative/Formal Reasoning Notes: Course involves mathematical modeling of real-world phenomena, analyzing quantitative results, and
An introduction to the theory and practice of applied quantitative economic analysis. This course familiarizes students with the strengths and weaknesses of the basic empirical methods used by economists to evaluate economic theory against economic data. Emphasizes both the statistical foundations of regression techniques and the practical application of those techniques in empirical research, with a focus on understanding when a causal interpretation is warranted. Computer exercises will provide experience in using the empirical methods, but no previous computer experience is expected. Highly recommended for students considering graduate training in economics or public policy.

Requirements/Evaluation: Requirements vary by professor, but typically include frequent problem sets, multiple exams, a group project, and possible additional assignments or quizzes.

Prerequisites: MATH 130, plus STAT 161, 201 or 202 (or equivalent, including a score of 5 on the AP Statistics Exam), plus one course in ECON; STAT 101 will also serve as a prerequisite, but only if taken prior to the fall of 2018

Enrollment Limit: 30

Enrollment Preferences: Current or prospective Economics and Political Economy majors.

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Unit Notes: Students may substitute the combination of STAT 201 and 346 for ECON 255

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course teaches research tools necessary to analyze data.

Attributes: POEC Required Courses

ECON 257 (F) Economic Perspectives on Racial Inequality (DPE)

This course will examine the causes and consequences of racial disparities in economic outcomes. Specific topics will include the determinants and consequences of racial differences in earnings and human capital; formal models of taste-based and statistical discrimination; racial segregation in neighborhoods and schools; the economic history of slavery, Reconstruction and the Civil Rights Movement; and the structure and efficacy of government anti-discrimination policies. Much of the course will focus on racial discrimination faced by African Americans specifically, but there will also be coverage of other racial and ethnic minority groups. The course will additionally focus almost exclusively on the US, although many of the theories and techniques we will develop are applicable to other contexts as well. The course will utilize basic microeconomic tools, such as straightforward extensions of the supply and demand model, and ECON 110 is a prerequisite. We will also make extensive use of descriptive statistics, and an introductory statistics course such as STAT 161 will be useful, but is not required.
Requirements/Evaluation: exams, short written responses, problem sets, participation

Prerequisites: ECON 110

Enrollment Limit: 25

Enrollment Preferences: First- and second-year students.

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: The course is well suited for the DPE distribution requirement as it will develop in detail not only the existence of race-based differences in a wide variety of key socioeconomic outcomes, but also explore the historical and contemporary processes that lead to those differences.

ECON 299  (F)  Economic Liberalism and Its Critics

Cross-listings:  POEC 250 / PSCI 238

Secondary Cross-listing

Economic liberalism holds that society is better off if people enjoy economic freedom. Its critics point to what they believe this position ignores or what it wrongly assumes, and hence, how it would make bad policy. This course explores the relationship between politics and economics by surveying influential works of political economy. Its first part examines major thinkers in relation to the historical development of capitalism in Western Europe and the United States: the classical liberalism of Adam Smith, Karl Marx's revolutionary socialism, and the reformist ideas of John Maynard Keynes. The second part considers mid-20th-century writers who revise and critique economic liberalism from a variety of perspectives, including Joseph Schumpeter, Friedrich Hayek, Milton Friedman, Ronald Coase, Arthur Okun, and Albert O. Hirschman. The third part surveys significant topics relevant to the themes of the course, with applications to current public policy issues, such as: power relations and autonomy in the workplace; asymmetric information and social insurance; economic inequality and distributive justice; equality of opportunity; the economics of health care; positional goods and the moral foundations of capitalism; social media and addiction; economic nationalism; behavioral economics; climate change and intergenerational equity; finance and financial crises; and rent-seeking. The combination of the historical focus of the early part of the course with discussion of modern policy issues and debates in the latter part of the course permits you to appreciate the ongoing dialogue between classical and contemporary views of political economy.

Class Format: This course uses a flipped classroom approach. Before each class meeting, students watch a lecture video, and (at least six times) write an essay relating to the assigned reading and video. In-person class time is devoted primarily to Socratic discussion.

Requirements/Evaluation: six short essays and a final exam

Prerequisites:  ECON 110 and 120 or equivalent; PSCI 110 (formerly PSCI 201; may be taken concurrently with POEC 250); open to non-majors

Enrollment Limit:  30

Enrollment Preferences:  Political Economy majors and sophomores intending a Political Economy major

ECON 308  (S)(S)  Skills for a Modern Economy and How to Pay for Them

Cross-listings:

Secondary Cross-listing

Skills are a major driver of economic growth. The skills gap between rich and poor countries explains many of their income differences. The skills gap is a determinant of structural change, the process by which economies grow certain sectors (like manufacturing and services) and shrink others (like agriculture) in the process of achieving high-income country status and reducing poverty. The skills gap both affects and is affected by every other aspect of the economy: agricultural productivity, health, poverty rates, and fiscal capacity. This course will examine the economic policies that are essential for nations to upgrade the skills of their workforce, including the fiscal policies to finance those investments. The course will also explore complementary economic policies—in areas from labor markets to agriculture to healthcare—that allow maximum returns to skills investments.

Class Format: Students will meet the professor in pairs, approximately one hour each week.

Requirements/Evaluation:  During a typical week one student in the pair will write a short paper, and the other will respond. The following week the roles will be reversed. Evaluation will be based on the papers written as well as the responses.

Prerequisites:  For CDE Fellows: fall semester courses. For undergraduates: Econ 251, Econ 252, and Econ 255, or permission of instructor.

Enrollment Limit:  10

Enrollment Preferences:  CDE Fellows, Economics majors.

Expected Class Size:  10
Evidence from across the developing world suggests that the "binding constraints" to economic growth can be remarkably heterogeneous—i.e., the growth potential of stagnating or underperforming economies may be unlocked in a large variety of ways. For instance, pre-reform China had been constrained by poor supply incentives in agriculture, whereas Brazil has been held back by an inadequate supply of credit, South Africa by poor employment incentives in manufacturing, El Salvador by insufficient production incentives in tradables, Zimbabwe by bad governance, and so forth. How can developing-country policymakers determine country-specific constraints like these, thus enabling them to pragmatically pursue a selected set of growth-promoting policies rather than attempting to implement a "laundry list" of reforms that are naively based on "best practice" rules-of-thumb? This course will serve as a primer on "growth diagnostics," an empirically-driven analytical framework for identifying the most binding constraints to economic growth in a given country at a point in time, thereby allowing policymakers to develop well-targeted reforms for relaxing these constraints while being cognizant of the nation's prevailing economic, political, and social context. The course will first build on the basic theories and empirics of economic growth to elucidate the diagnostic framework and will then employ a wide range of country-specific case studies to demonstrate how the framework can be operationalized for policy making. Throughout the semester, students will be required to work in groups, each representing a given developing or emerging-market economy, in order to build a growth diagnostic for their group's assigned country by the end of the course.

Requirements/Evaluation: extensive class participation, several short (5-page) reports, a final group project comprising a country growth diagnostic, and a final group presentation on the diagnostic

Prerequisites: for undergraduates ECON 251, ECON 252, and either ECON 255 or STAT 346

Enrollment Limit: 19

Enrollment Preferences: CDE fellows and senior Economics majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 345(D2) ECON 545(D2)

Quantitative/Formal Reasoning Notes: The course material will be draw heavily on mathematical and statistical models of economic growth and macroeconomic development, and students will be required to routinely develop mathematical models and/or conduct econometric analysis in their assignments.

Spring 2025

SEM Section: 01 TR 9:55 am - 11:10 am Quamrul H. Ashraf
Requirements/Evaluation: Grades are principally based on readings questions, problem sets, two in-class exams, and short presentations by students.

Prerequisites: ECON 255, POEC 253, STAT 346, or permission of the instructor. CDE Fellows should have taken ECON 502 or 503.

Enrollment Limit: 20

Enrollment Preferences: Economics majors and CDE Fellows

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 348(D2) ECON 548(D2)

Attributes: GBST Economic Development Studies POEC Comparative POEC/Public Policy Courses

Not offered current academic year

ECON 349 (S) The Economics of Labor Market Institutions
This course offers an introduction to the economics of modern labor markets. On the one hand, the course offers analytical tools to assess the efficiency of the labor market. On the other hand, the course gives an overview of "real-world" economics by showing differences in labor markets between countries. In some countries there are strict rules about the hiring and firing of workers. In some countries unions are well organized and influential, in others union membership is low. Some countries have high minimum wages, others have no minimum wage at all. Not only do institutions differ by country, the labor market outcomes in terms of unemployment, participation, job creation, wage distribution differ as well. We will study the empirical evidence, economic models, and policy issues germane to labor markets from an international perspective.

Requirements/Evaluation: Problem sets, group exercises, and exams

Prerequisites: POEC 253 or ECON 255

Enrollment Limit: 25

Enrollment Preferences: Students majoring in economics or political economy

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Spring 2025

LEC Section: 01 TR 8:30 am - 9:45 am Nate Vellekoop

ECON 350 (S) Household Finance
Household decisions about borrowing, saving, investment, housing, and labor supply have major implications for the financial system and the behavior of the economy as a whole. This was perhaps most vividly illustrated by the roles of household borrowing and spending in the Global Financial Crisis. But household finance is also central to understanding some of the most important current topics in economics and policy research, including wealth inequality, inflation, Social Security and pension reform, health care, and macroeconomic policy. This class applies both theory and empirical evidence to investigate some of the most important household decisions and their role in shaping the macroeconomy. We will begin with a study of household savings and portfolio choice, with an emphasis on some of the ways that real-world behavior departs from the assumptions of full rationality and complete information. We will then apply this framework to study a range of topics, including fiscal and monetary policy, government debt, inflation expectations, student loans, housing leverage, social insurance, and inequality.

Class Format: About half the class will be lecture, with the other half discussion.

Requirements/Evaluation: Class participation, problem sets, written assignments, and exams

Prerequisites: Econ 251 and Econ 255, or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: Economics majors

Expected Class Size: 25
ECON 352  (S)  Financial Development and Regulation

Cross-listings:
Secondary Cross-listing

This course focuses on the financial system in developing countries and its role in economic development and stability. From both theoretical and applied perspectives, we will investigate the implications of financial development on economic development & growth, income inequality, and short-term fluctuations. We will also explore the dynamics that shape the institutions of a society's financial structure and study the complexities of financial policy design. Throughout the course, a variety of tools of modern economics will be considered, such as theory-based quantitative structural methods, reduced form empirics, and field experiments, and we will study the consequences of finance on economic well-being. The first part of the course focuses on the functions of finance, how it contributes to growth and poverty alleviation, and what can be done to increase financial inclusion. What are the key parts of the infrastructure that are needed to improve access to financial services, including via 'fintech,' which is taking off in many developing countries? The second part of the course will build upon the first part and investigate how imperfections in financial development could make developing countries susceptible to short-term stability issues. A key focus of the second part will be how to prevent or minimize crises, and we will analyze the government's role as regulator, supervisor, standard setter, contract enforcer, and owner.

Class Format: discussion
Requirements/Evaluation: Midterm, team assignment and formal in-class debates, and a final research paper.
Prerequisites: For undergraduates, Econ 110, 120, and POEC 253 or ECON 255; undergraduate enrollment limited and requires instructor's permission
Enrollment Limit: 20
Enrollment Preferences: CDE students, as well as undergraduates interested in the role of the financial system in low and middle-income countries.
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:
ECON 352(D2) ECON 510(D2)

Spring 2025
LEC Section: 01    MR 1:10 pm - 2:25 pm    Burak Uras

ECON 355  (F)  Financial Crises, Credit Cycles, and Macroeconomic Policies

This course examines macroprudential policies which aim to mitigate systemic risk to the financial system. We will discuss several instances of financial crises and the conditions leading up to these episodes. Particular focus will be placed on recent research into current macroprudential policies and their implications for financial stability. Topics to be covered include: the concept of cycles in macroeconomics, business and credit cycle measurement, co-movement between economic aggregates, domestic and international policies targeting financial stability, and the effect of these policies on financial markets and the real economy.
Requirements/Evaluation: Problem sets, presentations, and a final paper
Prerequisites: Economics 252 and 255
Enrollment Limit: 25
Enrollment Preferences: junior and senior Economics majors
ECON 357  (F)  The Economics of Higher Education
This tutorial will utilize economic theory and econometric methods to understand a variety of issues pertaining to the economics of colleges and universities. In particular, we'll discuss the logic of non-profit enterprises, the financial structure of a college or university, competition in the market for higher education, policies impacting tuition and financial aid, the individual and societal returns from investments in higher education, and the distinctive features of academic labor markets. Particular attention will be paid to selective liberal arts colleges.
Class Format: will meet weekly in groups of two
Requirements/Evaluation: six 5- to 7-page papers and on the quality of the student's oral presentations and commentary on the work of their colleagues
Prerequisites: ECON 251 and 255 or STAT 346 or permission of instructor
Enrollment Limit: 10
Enrollment Preferences: Economics majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Attributes: POEC Depth POEC Skills
Not offered current academic year

ECON 359  (S)  Developing Country Macroeconomics II: Institutions and Policy Regimes
Cross-listings:
Secondary Cross-listing
Developing countries must confront a number of macroeconomic challenges that industrialized countries do not have to contend with: exchange rate volatility, large capital flows and commodity price fluctuations, for example. Building on ECON 505, this course examines these issues from both theoretical and empirical standpoints. The focus will be on the design of monetary, fiscal and exchange rate policies and institutions to enhance macroeconomic stability, and create an environment conducive to growth.
Requirements/Evaluation: two midterms and a final project
Prerequisites: ECON 505 or 506; undergraduate enrollment limited and requires instructor's permission
Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: 25-30
Grading: yes pass/fail option, no fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:
ECON 515(D2) ECON 359(D2)
Attributes: GBST Economic Development Studies

Spring 2025
SEM Section: 01    TR 8:30 am - 9:45 am     Bumsoo Kim

ECON 360  (F)  Monetary Economics  (QFR)
This course covers a range of theoretical and applied issues bearing on monetary policy as conducted in the U.S. and abroad. Topics to be covered
include: the causes of inflation, how central banks manage interest rates, the channels through which monetary policy affects the economy, and the costs and benefits of imposing rules on the conduct of policy. The class will also touch on a number of current issues facing central banks, such as unconventional monetary policy and cryptocurrencies.

Requirements/Evaluation: Two exams, a research paper and/or class presentation
Prerequisites: ECON 252 and 255. Multivariate calculus (MATH 150 or 151) is recommended but not required
Enrollment Limit: 20
Enrollment Preferences: junior and senior Economics majors
Expected Class Size: 20
Grading: yes pass/fail option, no fifth course option
Distributions: (D2) (QFR)
Quantitative/Formal Reasoning Notes: The course entails the use of mathematical economic models, the presentation of quantitative information, and the interpretation of statistical analysis.
Attributes: GBST Economic Development Studies POEC Depth

Not offered current academic year

ECON 364 (S) Theory of Asset Pricing (QFR)
What is the price of time? What is the price of risk? How do markets allocate resources across time and uncertain states of the world? This course theoretically studies how markets allocate scarce resource across time and when outcomes are risky. The "goods" in such markets are called "assets" and the prices of "assets" determine the cost of trading resources across time and across uncertain states of the world. We theoretically investigate how equilibrium determines the price of time, then asset price implications; then asset allocations and prices in the presence of risk; finally, implications for new assets.

Requirements/Evaluation: problem sets and exams
Prerequisites: ECON 251 or ECON 252; and ECON 255 or STAT 201
Enrollment Limit: 25
Enrollment Preferences: Economics majors
Expected Class Size: 25
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (QFR)
Quantitative/Formal Reasoning Notes: uses extensive mathematical modeling, including engaging with results from econometrics and statistics

Spring 2025
LEC Section: 01 TR 8:30 am - 9:45 am Greg Phelan

ECON 365 (F) Exchange Rates and International Finance
This course provides an overview of exchange rates, international financial flows, and the conduct of policy. The first half of the course explores the exchange rate -- what we know, what we don't know, what determines them, why the classic "puzzles" are puzzling, and the reign of the dollar as a dominant currency. The second half of the course transitions to the broader sphere of international finance, navigating through global imbalances, global financial cycles, and the role of currency unions and policies. We will study the historical evolution of thought in this strand of literature to better understand contemporary research and policy questions.

Requirements/Evaluation: Problem sets, presentations, and one or more exams
Prerequisites: ECON 252 and ECON 255. ECON 215 recommended but not required.
Enrollment Limit: 25
Enrollment Preferences: Economics majors
Expected Class Size: 25
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)
ECON 366 (S) International Trade and Development

Secondary Cross-listing

This course will examine the causes and consequences of globalization and its implications for less-developed countries. We will study the classic models of international trade and discuss the empirical relevance of these theories. In addition, we will focus on other dimensions of globalization that are of particular importance to developing countries such as trade and education, emigration, brain drain, remittances, foreign direct investment, trade policies, infant industry protection, trade and growth, the resource course, and trade agreements.

Class Format: discussion

Requirements/Evaluation: problem sets, midterm, presentation, and final

Prerequisites: ECON 251 and ECON 255; undergraduate enrollment limited and requires instructor's permission

Enrollment Limit: 19

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Spring 2025

SEM Section: 01 TR 11:20 am - 12:35 pm Will Olney

ECON 367 (S) The Political Economy of Social Insurance (WS) (QFR)

The Great Society policies of the 1960s dramatically changed the ways people living in poverty interacted with the federal government, but the benefits associated with these policies seem to have stagnated. Since 1965, the annual poverty rate in the United States has hovered between 10% and 15%, though far more than 15% of Americans experience poverty at some point in their lives. In this course, we will study public policies that, explicitly or implicitly, have as a goal improving the well-being of the poor in the United States. These policies include social insurance programs such as Unemployment Insurance; safety net programs such as Temporary Assistance to Needy Families, Supplemental Nutrition Assistance Program, Medicaid, and housing assistance; education programs such as Head Start and public education; and parts of the tax code, including the Earned Income Tax Credit and Child Tax Credit. We will explore the design and function of these programs, with a particular focus on the context in which they were developed. What political incentives and constraints have strung up our social safety net? How do these factors affect the goals of policy, the trade-offs inherent to the policy's design, and why poverty has not sustained a downward trend in the United States? Through careful consideration, students will learn how to communicate a path forward for public policy which accounts for theoretical economic expectations and the reality of political constraints in policy design.

Class Format: Lecture with substantial class discussion.

Requirements/Evaluation: Several short policy memos, participation in class discussion, and a final analytical essay.

Prerequisites: ECON 253 or 255

Enrollment Limit: 25

Enrollment Preferences: Students majoring in economics or political economy.

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (WS) (QFR)

Writing Skills Notes: Students will write 4 policy memos over the course of the semester followed by a longer, final analytical essay. Synthesis of peer-reviewed literature, use of citation management systems, and clarity in technical writing will be emphasized. Students will receive timely, substantial, individualized feedback to develop their technical writing ability over the course of the semester. Opportunities to meet with professor

Fall 2024

LEC Section: 01 MWF 8:30 am - 9:45 am Bumsoo Kim
outside of class at any stage of writing.

Quantitative/Formal Reasoning Notes: This course will use quantitative tools of economics. Focus on building data visualization & science communication skills after ECON 255.

Attributes: POEC Skills

Spring 2025
LEC Section: 01    TF 2:35 pm - 3:50 pm     Shyam Raman

ECON 368 (F) Public Economics and Fiscal Policies
The public sector is an important part of the economy. Its objectives are to increase efficiency by correcting market failures, redistribute to achieve a more equal distribution, conduct fiscal policies to stabilize the economy, and, in a broader sense, set the rules of the game. This course discusses the role of the government in the economy, the different ways it acts to solve market failures and redistribute, and the consequences of government actions and government failures. We will draw on a political economy perspective to discuss how the nature of government decision-making impacts these outcomes. The course takes a comparative perspective in discussing differences in addressing market failures and redistribution in more market-oriented economies - like the US - and in economies where the government plays a more active role - like the Nordic countries. The course will also give considerable attention to the structure of fiscal policies and how they are employed to stabilize the economy.

Requirements/Evaluation: Problem sets, writing assignments, and a final exam
Prerequisites: Economics 251 and 255
Enrollment Limit: 25
Enrollment Preferences: Junior and Senior Economics and Political Economy majors
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Not offered current academic year

ECON 370 (F) Data Science for Economic Analysis
This course provides a hands-on introduction to data science tools most relevant for economic analysis including data visualization, machine learning, and text analysis. Economists and other social scientists tend to use these data science tools differently than many researchers in statistics and computer science - conducting empirical analysis that is explicitly grounded in economic theory, and focusing on causal inference rather than prediction. Through a combination of lectures, hands-on labs, and group projects, students will develop the theoretical and practical skills needed to analyze economic data using modern data science techniques in both R and Python.

Class Format: The course includes traditional lectures, interactive labs in R and Python, and in-class presentations by students. Prior experience with statistical software (Stata or R) or computer programming is required.

Requirements/Evaluation: Grades are based on class participation, empirical exercises in R and Python, class presentations, and one exam.
Prerequisites: ECON 255 or or STAT 346
Enrollment Limit: 25
Enrollment Preferences: Economics majors
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2)

Fall 2024
LEC Section: 01    MWF 8:30 am - 9:45 am     Pamela Jakiela

ECON 371 (F) Time Series Econometrics and Empirical Methods for Macro (QFR)
Econometric methods in many fields including macro and monetary economics, finance and international growth and development, as well as
numerous fields beyond economics, have evolved a distinct set of techniques which are designed to meet the practical challenges posed by the typical empirical questions and available time series data of these fields. The course will begin with an introductory review of concepts of estimation and inference for large data samples in the context of the challenges of multivariate endogenous systems, and will then focus on associated methods for analysis of short run dynamics such as vector autoregressive techniques and methods for analysis of long run dynamics such as cointegration techniques. Students will be introduced to concepts and techniques analytically, but also by intuition, learning by doing, and by computer simulation and illustration. The course is particularly well suited for economics majors wishing to explore advanced empirical methods, or for statistics, mathematics or computer science majors wishing to learn more about the ways in which the subject of their majors interacts with the field of economics. The method of evaluation will include a term paper. ECON 252 and either STATS 346 or ECON 255 are formal prerequisites, although for students with exceptionally strong math/stats backgrounds these can be waived subject to instructor permission. Students who complete this course will also be permitted to enroll in Econ 471 (a follow up senior seminar course) during the spring semester if they are interested.

Requirements/Evaluation: term paper and regular homework assignments

Prerequisites: ECON 252 and either ECON 255 or STATS 346

Enrollment Limit: 19

Enrollment Preferences: students wishing to write an honors thesis, and students with strong MATH/STAT/CSCI backgrounds

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Uses quantitative/formal reasoning intensively in the form of mathematical and statistical arguments, as well as computer programming.

Fall 2024
SEM Section: 01  W 7:00 pm - 9:40 pm  Peter L. Pedroni

ECON 375 (S) Inclusive Growth and Crisis Response: The Role of Social Protection Systems

Cross-listings:

Secondary Cross-listing

Over the past three decades, developing countries have increasingly expanded social protection systems to tackle poverty and vulnerability while promoting inclusive social development and equitable economic growth. These systems provide pro-poor policy instruments that can balance trade and labor market reforms, fiscal adjustments (such as reduced general subsidies) and other economic policies aimed at enabling better market performance. In addition, social protection systems help vulnerable people to cope with shocks to their livelihoods, promoting resilience, human capital development and sometimes high-return risk-taking. In times of crisis, these systems are more important than ever. From March to June 2020, the World Bank identified 195 countries that have adapted and expanded their social protection systems to respond to the COVID-19 pandemic. This tutorial offers the opportunity to explore how shock-responsive social protection systems can better enable developing countries to respond to global and local shocks in a manner that minimizes the medium- to long-term costs of the resulting crises. The tutorial examines how developing countries build social protection systems to tackle poverty, vulnerability and social exclusion that result from global and local shocks. Topics include how the design and implementation of effective interventions both respond to crises and strengthen long-term developmental outcomes. The tutorial focuses on country responses to the COVID-19 pandemic as both a relevant case study and an example of the kinds of global crises to which national social protection systems must be able to respond in the future.

Requirements/Evaluation: Students will write five papers during the term, and will prepare and deliver formal comments on five papers written by other students

Prerequisites: ECON 251 or ECON 252

Enrollment Limit: 10

Enrollment Preferences: CDE Fellows; Junior and senior Economics majors at instructor's discretion.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 532(D2) ECON 375(D2)
From the iron plow, to the steam engine, to modern biotechnology, innovation drives economic growth and raises living standards. Whether we are talking about great inventions or small tweaks, the tools of economics can help us understand how new ideas, technologies, and products emerge, spread, and become obsolete. In this course, we will examine the creation of new knowledge, the translation of ideas and scientific advances into practical applications, and the adoption of new technologies by producers and consumers. We will study the incentives that potential innovators face, how these are affected by patents and other forms of intellectual property rights, how entrepreneurs finance and market their innovations and how different market structures can influence the resulting trajectory of innovation and adoption. We will also discuss how government policies can foster the financing and development of innovation. Throughout the course, we will explore historical and contemporary case studies of the creation, exploitation, and consequences of innovation.

Class Format: discussion

Requirements/Evaluation: reading responses and short writing assignments; empirical exercises; constructive contributions to class discussions; an exam; and a final group project.

Prerequisites: ECON 251 and (ECON 255 or POEC 253 or STAT 346)

Attributes: POEC Depth POEC Skills

Not offered current academic year

The world today is marred by vast disparities in the standard of living, with about a 30-fold difference in real GDP per capita between the poorest and most affluent of nations. What are the causes of such differences in prosperity across countries? Are the origins of global inequality to be found in underlying differences among societies over the past few decades, the past few centuries, or the past few millennia? If contemporary differences in living standards have such "deep" historical roots, what scope exists for policies to reduce global inequality today? Can we expect inequality to be reduced through some natural process of macroeconomic development, or is it likely to persist unless acted upon by policy? This course will present a unified theory of economic growth for thinking about these and related questions. Examples of issues to be covered include: the Neoclassical growth model and its inefficacy for answering questions about development over long time horizons; Malthusian stagnation across societies during the pre-industrial stage of economic development; the importance of the so-called demographic transition and of human capital formation in the course of industrialization; the persistent influence of colonialism, slavery, and ethnic fragmentation in shaping the quality of contemporary politico-economic institutions; and the enduring effects of geography on comparative development, through its impact on the emergence of agriculture in early human societies and its influence in shaping the composition of traits in populations across the globe.

Class Format: discussion

Requirements/Evaluation: problem sets, at least one exam, a research paper, and a class presentation

Prerequisites: ECON 251, ECON 252, and either ECON 255 or STAT 346

Enrollment Limit: 25

Enrollment Preferences: junior and senior Economics majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: The course material will draw heavily on mathematical and statistical models of economic growth and macroeconomic development. Students will be required to routinely develop and solve sophisticated mathematical models of economic growth,
involving the rigorous application of solution concepts from constrained optimization and from optimal control theory. Students will also be required to perform some econometric analyses in their assignments.

**Attributes:** GBST Economic Development Studies POEC Comparative POEC/Public Policy Courses

Secondary Cross-listing

Development organizations face strict competition for scarce resources. Both public and private organizations are under increasing pressure to use rigorous program evaluation in order to justify funding for their programs and to design more effective programs. This course is an introduction to evaluation methodology and the tools available to development practitioners, drawing on examples from developing countries. It will cover a wide range of evaluation techniques and discuss the advantages and disadvantages of each. The course is a mix of applied econometrics and practical applications covering implementation, analysis, and interpretation. You will learn to be a critical reader of evaluations, and to develop your own plan to evaluate an existing program of your choice.

**Requirements/Evaluation:** Empirical exercises, exams, writing assignments, and collaborative projects

**Prerequisites:** one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503)

**Enrollment Limit:** 20

**Enrollment Preferences:** CDE Students, but undergraduates with the prerequisites are welcome

**Expected Class Size:** 20

**ECON 381 (S) Global Health Policy Challenges**

**Cross-listings:**

Primary Cross-listing

Poor health is both a cause and a consequence of poverty. It can trap individuals in poverty and reduce aggregate economic growth. This course will be structured around major global health challenges, including maternal health, infectious diseases (e.g. HIV/AIDS, tuberculosis, COVID), neglected tropical diseases (e.g malaria, dengue, Ebola), nutritional deficiencies, and mental health. We will focus primarily, but not exclusively, on health in low-income countries in this course. Students will read papers and conducted empirical assignments related to the various topics, as well as develop their own research idea during the semester related to one of the topics covered.

**Requirements/Evaluation:** empirical problem sets, a short paper and a substantive research paper that includes some analysis of existing data

**Prerequisites:** ECON 251 and (POEC 253 or ECON 255 or STAT 346) or permission of instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** juniors and sophomores

**Expected Class Size:** 25

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 381(D2) ECON 571(D2)
ECON 382 (F) Gentrification and Neighborhood Change (DPE)

While the phenomenon we call "gentrification" was first noted in the 1960s, these changes in urban neighborhoods have recently drawn increasing scrutiny and concern. Coming at a time of growing income inequality, the movement of higher income households into neighborhoods previously occupied by lower-income households has raised concerns about displacement, housing affordability, access to employment and other problems that may be associated with a gentrifying city. These problems may be further exacerbated by residential segregation and reduced support for public housing and transportation. This course will provide an opportunity to study these issues in depth. What, exactly, is gentrification? What do we know about the economic causes and consequences of gentrification and neighborhood change? How are these causes and consequences affected by growing income inequality and continued segregation in housing? What policy options might be pursued that could improve the well-being of existing and potential residents of the neighborhoods in US cities?

Requirements/Evaluation: Students will meet in pairs once per week. On alternate weeks students will write a 10-12 page primary paper on an assigned topic, and on the next week write a 4-5 page comment and discussion on the primary paper. At least one of the primary papers written by each student during the course must incorporate some analysis of data on gentrification using data introduced in discussion.

Prerequisites: Economics 251 (Price and Allocation Theory), Statistics 161 or Economics 255 (Econometrics) or POEC 253 (Empirical Methods in Political Economy) or instructor permission.

Enrollment Limit: 10

Enrollment Preferences: Economics and Political Economy majors, Juniors and Seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Gentrification has been identified in the survey of DPE suggestions as a worthwhile and important topic for a course satisfying the DPE requirement. Gentrification, with its consequent displacement of low-income and frequently minority households in cities is widely viewed as a problem and there have been increasing demands for local policies to limit the rate or extent of gentrification. We will address the causes, measurement of gentrification and extent to which it burdens poor households.

ECON 384 (F) Corporate Finance (QFR)

This course analyzes the major financial decisions facing firms. While the course takes the perspective of a manager making decisions about both what investments to undertake and how to finance these projects, it will emphasize the underlying economic models that are relevant for these decisions. Topics include capital budgeting, links between real and financial investments, capital structure choices, dividend policy, and firm valuation.

Class Format: Lecture / discussion

Requirements/Evaluation: Problem sets, exams, short project

Prerequisites: ECON 251, 252, and some familiarity with statistics (e.g., ECON 255)

Enrollment Limit: 25

Enrollment Preferences: Economics majors; seniority

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: The course uses quantitative models to evaluate decisions.
ECON 385 (F) Games and Information (QFR)
This course is a mathematical introduction to strategic thinking and its applications. Ideas from game theory, including Nash equilibrium and its refinements, commitment and credibility, repeated games, and information asymmetries, incentive contracts, and signaling, will be introduced. Applications will be drawn from economics, history, and politics around the globe, and include topics such as: trust between strangers, corruption and fraud, racial bias, violence and deterrence. And we will explore how to write and recognize game-theory models to help make sense of strategic interactions in the world around us.

Requirements/Evaluation: Two exams, regular problem sets and assignments in which students create game-theoretic models.
Prerequisites: ECON 251 or permission of instructor
Enrollment Limit: 25
Enrollment Preferences: juniors
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Unit Notes: students who have taken MATH 335 or CSCI 357 cannot receive credit for this class
Distributions: (D2) (QFR)
Quantitative/Formal Reasoning Notes: Mathematical analysis of strategic interaction is emphasized throughout,

LEC Section: 01  TR 9:55 am - 11:10 am  Ethan Holdahl

ECON 387 (S) Economics of Climate Change (QFR)
Cross-listings: CAOS 387
Primary Cross-listing
This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

Requirements/Evaluation: problem sets, midterm, group presentation, final exam
Prerequisites: ECON 251, familiarity with statistics
Enrollment Limit: 25
Enrollment Preferences: Junior/Senior Economics majors and CDE fellows
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
CAOS 387(D2) ECON 387(D2) ECON 522(D2)
Quantitative/Formal Reasoning Notes: The course involves simple calculus-based theory and applied statistics.
Attributes: ENVI Environmental Policy MAST Interdepartmental Electives POEC Comparative POEC/Public Policy Courses
Not offered current academic year

ECON 389 (S) Tax Policy in Global Perspective (QFR)
Cross-listings:
Government policy is important for economic development. To finance their policies, governments must build the fiscal capacity to implement a tax system. In turn, fiscal capacity—the ability for the government to raise revenue—depends on economic development. This endogeneity between fiscal capacity and economic development creates challenges for tax policy in developing countries. Given these challenges, what types of taxes should countries use to raise revenues? How can governments build the fiscal capacity to generate revenue to finance critical services? This class explores tax policy from a global and comparative perspective. Because most students will be CDE fellows, we will emphasize tax policy issues, examples, and evidence that are pertinent to developing countries. However, many tax policy lessons are universal so we will also learn about tax policies in developed countries, especially issues relevant for transnational transactions. Topics addressed include: how economic principles can be applied to the efficiency and equity consequences of tax policies; how personal income taxes, corporate income taxes, and value-added taxes are designed and administered and how they influence the economy; ideas for fundamental tax reforms; the debate over progressive taxes versus "flat" taxes; how taxes affect incentives to save and invest; how market failures and administrative problems may influence the optimality of tax policy; the implications of global capital flows and corporate tax avoidance for tax policy; tax holidays and other special tax incentives for investment; empirical evidence on the influence of taxes on foreign direct investment, labor supply, and tax evasion; tax policy towards natural resources such as minerals and oil; case studies of efforts to reform tax administration and reduce tax evasion and corruption; taxes on land and property; taxes on imports and exports; presumptive taxation; and the informal economy and its implications for tax policy.

Requirements/Evaluation: midterm exam, several problem sets, two 10-page essays

Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503); students who have previously taken ECON 351 will not be enrolled

Enrollment Limit: 19

Enrollment Preferences: CDE students, but undergraduates with the prerequisites are welcome

Expected Class Size: 15-19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 389(D2) ECON 514(D2)

Quantitative/Formal Reasoning Notes: The course builds on other QFR Reasoning econ classes.

ECON 394 (S) European Economic History

Economic history directly informs our understanding of the processes of economic development. With this in mind, this course will explore a series of questions related to the economic development of Europe from the pre-modern period until today. What was economic life like in the Roman Empire and Medieval Europe? Why did modern economic growth first occur in Europe, and not in China or the Middle East? Why did the Industrial Revolution occur in Britain and not France? What was the role of colonialism in the acceleration of European growth? What explains the rise and fall of the Soviet economy? What are the causes and consequences of European economic integration since World War II? To answer these and other questions, we will investigate how institutional changes, the evolution of technology, aspects of globalization, and various forms of government intervention have impacted economic growth and living standards in European history, and how those developments have affected the rest of the world. Drawing on a wide variety of empirical and theoretical readings, the course will focus on how economic historians marshal evidence and construct arguments in ways that borrow from and contribute to other fields of economics.

Class Format: discussion

Requirements/Evaluation: class participation, reading responses, short assignments, quizzes, and a final research paper

Prerequisites: ECON 251 or ECON 252 AND (ECON 255 or POEC 253 or STAT 346)

Enrollment Limit: 25

Enrollment Preferences: Students majoring in economics, political economy, or history.

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option
ECON 397  (F)  Independent Study: Economics (Advanced)
Students are invited to apply to undertake independent study on subjects of their own choosing. Interested students should consult with a faculty member about designing an appropriate project well in advance of fall registration.

Requirements/Evaluation:  Determined in consultation with the faculty member advising the independent study
Prerequisites:  At least one of (Econ 251, Econ 252, or Econ 255), consent of an instructor and of the department chair
Enrollment Limit:  none
Enrollment Preferences:  none
Expected Class Size:  NA
Grading:  yes pass/fail option,  yes fifth course option
Unit Notes:  An approved project may count as one of the two advanced electives required for the major

Distributions:  (D2)

IND Section: 01    TBA     Owen Ozier

ECON 439  (S)  Debt Sustainability
The stock of government debt has skyrocketed in many countries. At the same time, interest rates have risen as global central banks have sought to tame inflation, generating concerns about the sustainability of public debt, especially in many lower-income and emerging market economies. What does fiscal/debt sustainability mean, and what are the implications of high public debt for growth and stability? How do the IMF and other institutions assess a country’s public debt sustainability? How does uncertainty factor into these assessments, and what special considerations are relevant for natural resource exporters? How have governments sought to bring down high levels of debt, or to prevent excessive debt levels from arising in the first place? Do these approaches need to be modified to account for the impact of COVID on debt stocks? How will demographic developments and climate change affect debt sustainability? By addressing these questions, the course will seek a nuanced understanding of the role of public debt in the economy and its benefits and risks.

Class Format:  Students will meet the professor in pairs, approximately one hour each week.
Requirements/Evaluation:  During a typical week one student in the pair will write a short paper, and the other will respond. The following week the roles will be reversed. Evaluation will be based on the papers written as well as the responses.
Prerequisites: For CDE Fellows: fall semester courses. For undergraduates: Econ 251, Econ 252, and Econ 255, or permission of instructor.

Enrollment Limit: 10

Enrollment Preferences: CDE Fellows, Economics majors.

Expected Class Size: 10

Grading:

Distributions: (D2)

ECON 450 (F) Advanced Topics in Macroeconomics

This seminar explores some of the central topics in macroeconomics, including economic growth, saving and investment, business cycle fluctuations, monetary policy, and financial crises. The first part of the course focuses on long-run economic growth. Using economic theory and evidence, we will attempt to answer some of the most important questions in all of economics: Why are some countries poor and other countries rich? What can governments do to achieve faster and environmentally sustainable rates of growth? What are the growth consequences of sustained budget deficits? Understanding the behavior of the economy in the long run is one of the key tasks of macroeconomics. But as illustrated by the Global Financial Crisis and the Covid pandemic, the short run matters as well. In the second part of the class, we will turn our attention to economic downturns and financial crises. Using historical work on past crises and the accumulating evidence on recent ones, we will study a host of short-run topics, including financial markets, the effectiveness of fiscal and monetary policies, consumer expectations, asset prices, employment, and productivity. Because this is an advanced class in macroeconomics, we will approach these issues as practicing economists working with the best possible models and empirical techniques. Students will have an opportunity to apply these methods in a required end-of-term research paper.

Requirements/Evaluation: Midterm, final, class participation and research paper

Prerequisites: Economics 251, 252, and 255

Enrollment Limit: 19

Enrollment Preferences: Preference will be given to senior Economics majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

Fall 2024

SEM Section: 01 MR 1:10 pm - 2:25 pm David A. Love

ECON 452 (S) Foundations of Money, Credit, Banking, and FinTech

This course aims to address fundamental questions at the core of monetary and financial macroeconomics: what is money, and why is it an essential means for transactions? What is monetary policy, when does it become effective, and what should optimal monetary policy arrangements look like? How do financial markets and institutions interact with monetary policy? Throughout the course we will develop and solve rigorous general equilibrium macro models that feature money, financial markets, and institutions to address these questions. We will also connect the implications of the models with real world evidence. In the first part of the course, we will study the monetary policy transmission mechanisms and familiarize ourselves with the implications of rational expectations for monetary policy. We will build familiarity with discrete-time dynamic optimization techniques, develop and solve workhorse monetary DSGE (dynamic-stochastic general equilibrium) models, and explore the interactions between nominal variables (such as inflation and nominal interest rates) and real economic variables (such as output and unemployment) - over the business cycle and in the long-run. The second part of the course will extend the monetary macro models developed in the first part by incorporating foundations for credit, banking, and fintech to understand why the needs for these financial arrangements arise and how they interact with money and monetary policy.

Class Format: discussion

Requirements/Evaluation: Homework assignments, exams, and a final group project.

Prerequisites: Econ 252 and Math 130 or equivalent.

Enrollment Limit: 19

Enrollment Preferences: Junior or senior economics majors who are interested in monetary economics and macro-finance.

Expected Class Size: 19
ECON 453 (S) Research and Methods in Applied Microeconomics

The main goal of this course is to expose students to modern empirical economic research. The basic format for each class session will be to read and discuss in detail a single academic journal article. Students will additionally submit short written responses on each of the assigned articles, and replicate the findings of several of the articles in Stata. Finally, students will write an original empirical paper as a final project on a topic of their choosing. The papers we read will come from several fields of applied microeconomics, including labor economics, health economics, public economics, and the economics of education. Some of the specific topics we will cover include human capital development and the effectiveness of early childhood interventions, the returns to college, the effects of neighborhoods on long term outcomes, gaps in labor market outcomes by race and gender, and evaluations of a range of public policies including the minimum wage, abortion access, and Medicaid. In addition to being interested in the actual findings of research on these topics, the course will introduce students to the key research methodologies used in modern applied microeconomics. In particular, the assigned readings are sequenced to systematically introduce students to the use of fixed effects, differences-in-differences, instrumental variables, regression discontinuity designs, and randomized controlled trials. The course will be as much about these methodologies as about the specific findings of the assigned readings, and the hope is that seeing these methods used in actual research will reinforce and build on the topics covered in Econ 255 (Econometrics).

Requirements/Evaluation: a series of short papers and empirical exercises, constructive contributions to class discussion, class presentations, and a 15- to 20-page original empirical research paper

Prerequisites: ECON 251 and ECON 255 or POEC 253

Enrollment Limit: 15

Enrollment Preferences: senior Economics majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: POEC Depth POEC Skills

Not offered current academic year

ECON 454 (F) Macroeconomic Perspectives on Labor Markets (QFR)

This seminar will cover aggregate trends in the labor market from a macroeconomic perspective, along with the tools that economists use to study them. We will think about the workforce as a whole but we will also highlight research that studies heterogeneity within the economy, such as patterns by race, gender, education, or occupation. Students will learn basic search and matching models, as well as related empirical methods. We will read papers that employ a variety of survey and administrative data, and we will discuss what types of research questions are best answered by each data source. We will use real data to apply the methods we learn. Potential topics include occupational mismatch, wage inequality, and monopsony.

Requirements/Evaluation: Class participation, short assignments, midterm exam, and a final project

Prerequisites: Econ 251, 252, and 255

Enrollment Limit: 19

Enrollment Preferences: Junior and senior economics majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Quantitative/Formal Reasoning Notes: Course includes regular problem sets that require quantitative and formal reasoning skills.

Fall 2024

SEM Section: 01 MWF 8:30 am - 9:45 am Caitlin E. Hegarty
**ECON 455 (F) Research in Economic History: Sources, Methods, and Applications**

Historical approaches towards understanding current economic issues are increasingly in vogue. This course will explore new developments in the field of economic history, focusing on how economic historians use qualitative and quantitative evidence and the conceptual tools of economics to address questions of historical and current relevance. Along the way, we will consider works from both sides of the history - economics boundary, focusing on the ways that the two disciplines can and should borrow from one another. We will range widely across space and time, but some possible topics to be investigated include technological innovation, labor coercion, migration, trade and capital flows, colonialism, corporate governance, and political economy. Students are expected to not only read and analyze recent scholarship in economic history, but to also produce and present their own original research over the semester.

**Requirements/Evaluation:** short writing assignments and empirical exercises, constructive contributions to class discussion, class presentations, and a 15- to 20-page original research paper (written in stages)

**Prerequisites:** ECON 251 and ECON 255 or consent of instructor; a previous history course is recommended but not required

**Enrollment Limit:** 19

**Enrollment Preferences:** senior Economics majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

**Attributes:** POEC Comparative POEC/Public Policy Courses

*Not offered current academic year*

---

**ECON 456 (F) Income Distribution**

This course examines the distribution of income in the United States. Questions to be addressed may include the following: How have wage inequality and the skill premium evolved over time? What factors explain a rising skill premium? How does income differ with race and gender? How is poverty measured, and what are the factors associated with living in poverty? How do government programs change the distribution of income? How much income mobility is there across generations? Students will become more critical readers of current economic literature, and will apply their skills in conducting empirical research.

**Requirements/Evaluation:** short writing assignments, computer lab exercises, oral presentations, and a 15- to 20-page research paper including original empirical analysis (written in stages)

**Prerequisites:** ECON 251 and 255 or equivalent

**Enrollment Limit:** 20

**Enrollment Preferences:** senior Economics majors

**Expected Class Size:** 20

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

**Attributes:** POEC U.S. Political Economy + Public Policy Course

*Not offered current academic year*

---

**ECON 458 (S) Economics of Risk**

Risk and uncertainty are pervasive features of economic decisions and outcomes. Individuals face risk about health status and future job prospects. For a firm, developing new products is risky; furthermore, once a product has been developed, the firm faces product liability risk if it turns out to be unsafe. Investment decisions—from managing a portfolio to starting a business—are also fraught with uncertainty. Some risks are environmental—both manmade problems and natural disasters; other risks include the possibility of terrorist attack and, more locally, issues of campus safety. This tutorial explores both the private market responses to risk (e.g., financial markets, insurance markets, private contracting, and precautionary investments and saving) and government policies towards risk (e.g., regulation, taxation, and the legal system). From a theoretical standpoint, the course will build on expected utility theory, diversification, options valuation, principal-agent models, contract theory, and cost-benefit analysis. We will apply these tools to a wide variety of economic issues such as the ones listed above. One goal of the course is to discover common themes across the disparate topics. Students will be expected to read and synthesize a variety of approaches to risk and uncertainty and apply them to various issues.
Class Format: tutorial; students will meet with the instructor in pairs in each week

Requirements/Evaluation: For the first ten weeks, each student will write a 5 - 7 page paper every other week, and comment (of 2 - 3 pages) on their partner’s work in the other weeks; the final two weeks will be reserved for papers on a topic of each student's interest (again, 5 - 7 pages but without needing to write a comment on their partner's work); one of the papers during the term will be revised to reflect feedback from the instructor and the student's partner

Prerequisites: ECON 251, 252, and 255; or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: senior Economics majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Not offered current academic year

ECON 459  (F)  Institutions and Development

Why are some societies rich and others poor? While typical answers emphasize proximate causes like factor accumulation (i.e., growth in physical and human capital), technological progress, and demographic change, the institutional approach highlights the role of social, political, and cultural factors, broadly defined, as fundamental determinants of economic prosperity. The central idea is that the value-added of economic activities to society is primarily conditioned by the social arrangements within which these activities occur - namely, arrangements that generate a structure of private incentives, which can either promote behavior that is conducive to economic development or lead to the pursuit of private gain at the expense of the common good. Thus, the key to economic development in this approach is the emergence of complementary institutions and structures of governance in society. This course will survey the recent literature on the topic of institutions and economic development, with an emphasis on empirical evidence in the context of both historical and contemporary societies. The purpose of the course will be to expose students to the core ideas and empirical tools employed at the frontier of research in this area. The readings will primarily comprise published journal articles and unpublished working papers, and students should expect to apply concepts from across all the core courses in economics.

Requirements/Evaluation: extensive class participation, two 5-page review papers, two class presentations, and one 15- to 20-page empirical research paper (written in stages)

Prerequisites: ECON 251, ECON 252, and either ECON 255 or STAT 346

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Not offered current academic year

ECON 460  (F)  Women, Work, and the World Economy from 5,000 BC to the Present

Now and throughout history, views of the appropriate role for women in society have varied tremendously across cultures and communities: are women autonomous productive agents, are they men's property, or do they fall somewhere in between? In this course, we explore the causes and consequences of women's position in society for growth and economic development, analyzing women's economic roles in historical and cultural perspective. Students will become more critical readers of current economic literature, and will apply their skills in conducting empirical research.

Requirements/Evaluation: short writing assignments, computer lab exercises, oral presentations, and a 15- to 20-page research paper including original empirical analysis (written in stages)

Prerequisites: ECON 251 and 255 or equivalent

Enrollment Limit: 19

Enrollment Preferences: junior and senior economics majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)
ECON 462 (S) Topics in African Development

This course will examine a selection of current issues in development economics with a specific emphasis on how they relate to Sub-Saharan Africa. Core topics to be addressed include agriculture, labor markets with a specific emphasis on south-south migration, credit, and land markets. Some specific questions that may be addressed include: How has agricultural productivity changed over time? What are constraints to improving agricultural productivity? What drives south-south migration? What are the impacts of migration on destination and origin communities? Students will critically read published journal articles (or working papers) and actively participate in class discussions. Students will also complete original empirical analysis on a related topic.

Requirements/Evaluation: short writing assignments, class discussion, oral presentations, 15-20 page empirical research paper

Prerequisites: ECON 251 and 255 or equivalent

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Not offered current academic year

ECON 463 (F) Financial History (WS)

What can we learn from financial history to understand the successes and failures of finance today and in coming years? This course opens with a brief survey of some of the major characteristics, issues, and challenges of financial systems today, and then examines earlier experience with these phenomena. Topics to be examined include: the role of credit and more generally finance in economic development historically, including in the financial revolutions from Northern Italy, the Netherlands, Britain and the US; the evolution of money, from stones or cigarettes to digital currencies; the relationship between finance and government, and the extent to which it has changed over time; lessons from early asset bubbles and more recent crises (including that of 2008-09) for modern financial systems; the effect of institutions (laws, norms, and culture) and political systems in shaping the impact of finance, as illustrated by comparisons between Mexico and the U.S., among other cases; and lessons from U.S. financial history for policies today. The course also examines the tools that were developed in earlier eras to deal with different risks, evaluates their efficacy, and considers lessons for modern financial regulation, including how financial systems can be prepared, if possible, for the risks that are already unfolding -- such as those posed by technology change, electronic currencies, and climate risk.

Requirements/Evaluation: Either 6 short papers or 3 short papers and one longer research paper (student choice), at least two oral presentations, and contributions to class discussions.

Prerequisites: ECON 251, ECON 252, and ECON 255 (or STAT 346 or Poli Ec 253) are required.

Enrollment Limit: 15

Enrollment Preferences: Senior Economics majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will either write 6 shorter papers (5-8 pages) or 3 short and one longer research paper. Writing skills and clarity of exposition will be emphasized.

Not offered current academic year

ECON 465 (S) Pollution and Labor Markets

If your home town has polluted air, does that reduce your wage? Do you work less? Are you less likely to finish high school? These are specific instances of an important general question: how does pollution affect labor market outcomes? The answer matters for individual decisions (where to live) and government policies (air pollution regulations). This seminar begins from theories of optimizing worker behavior in the presence of pollution. Building on this foundation, we will critically evaluate new empirical research into the impacts of pollution on human capital, labor supply, and
productivity. We will also study the impact of pollution regulations on wages and employment. Included papers will cover both developed and developing countries.

**Requirements/Evaluation:** class discussion, presentation of reading, paper replication, 15- to 20-page empirical paper (written in stages) and accompanying short presentation

**Prerequisites:** ECON 251 and ECON 255; STAT 201/346 acceptable in place of ECON 255 prerequisite with instructor permission

**Enrollment Limit:** 19

**Enrollment Preferences:** Economics majors, seniority

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

**Attributes:** ENVI Environmental Policy, PHLH Decision-Making by Institutions + Individuals, POEC Comparative POEC/Public Policy Courses

Not offered current academic year

---

**ECON 471 (S) Topics in Advanced Econometrics (QFR)**

The course uses both a practical and conceptual/theory based approach, with emphasis on methods of structural identification of dynamics in VARs and long run cointegration and nonlinear function estimation and analysis, both in conventional time series and especially panel time series which contain spatial dimensions. The course will also investigate methods of computer simulation related to these techniques. The course is well suited for students considering empirically oriented honors theses in fields that employ these techniques, such as macro, finance, growth, trade and development, as well as fields outside of economics that use time series data. It is also well suited for students majoring in economics, statistics, computer sciences or mathematics who wish to expand their econometrics training and understanding to a more advanced level.

**Requirements/Evaluation:** periodic homework assignments, term paper

**Prerequisites:** ECON 371

**Enrollment Limit:** 19

**Enrollment Preferences:** students with strong quantitative backgrounds, and to students intending to write an honors thesis

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

**Quantitative/Formal Reasoning Notes:** Course will make use of mathematics, statistics and computer analysis for the conceptualization and implementation of the econometric topics that are taught.

---

**ECON 472 (F) Macroeconomic Instability and Financial Markets**

This advanced course in macroeconomics and financial theory attempts to explain the role and the importance of the financial system in the global economy. The course will provide an understanding of why there is financial intermediation, how financial markets differ from other markets, and the equilibrium consequences of financial activities. Rather than separating off the financial world from the rest of the economy, we will study financial equilibrium as a critical element of economic equilibrium. An important topic in the course will be studying how financial market imperfections amplify and propagate shocks to the aggregate economy. The course may cover the following topics: the determination of asset prices in general equilibrium; consequences of limited asset markets for economic efficiency; theoretical foundations of financial contracts and justifications for the existence of financial intermediaries; the roles of financial frictions in magnifying aggregate fluctuations and creating persistence and instability; the role of leverage and financial innovation in fueling financial crises.

**Requirements/Evaluation:** problem sets, exams, and potentially student presentations

**Prerequisites:** ECON 251 and ECON 252

**Enrollment Limit:** 19

**Enrollment Preferences:** Economics majors

**Expected Class Size:** 15
ECON 474  (S)  Advanced Methods for Causal Inference

Cross-listings:

Primary Cross-listing

How do we estimate the causal effect of a policy on an outcome? Building on a basic understanding of econometrics and statistics, this methodology course will take students through several applied microeconometric techniques for answering this question. Students will be expected to use statistical software throughout, as we explore the inner workings of these methods and the assumptions required for them to deliver credible estimates. We will discuss the randomized trial and its variants, then cover difference-in-difference, regression discontinuity, and instrumental variables. We will discuss historical roots of modern methods, and will explore newer alternatives to the most commonly used kinds of statistical tests.

Class Format: Students will work on laptops in class. Students without laptops should borrow them from the library. Some prior knowledge of either Stata, R, Matlab, or other mathematical/statistical software is essential.

Requirements/Evaluation: Grades are principally based on problem sets, participation in the in-class activities, one in-class exam, and a final replication project.

Prerequisites: Econ 251 and either Econ 255 or Stat 346. CDE Fellows should have taken ECON 502 or 503.

Enrollment Limit: 19

Enrollment Preferences: Junior and senior Economics majors. CDE Fellows require the instructor's permission.

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Spring 2025

SEM Section: 01  TF 1:10 pm - 2:25 pm  Owen Ozier

ECON 475  (S)  Advanced Economic Theory  (QFR)

This course studies advanced topics in micro and macro economic theory. A major focus is on the mathematical underpinnings of advanced modern economics, with a particular emphasis on proofs. Topics may include existence of Nash equilibria, games of incomplete information, equilibrium refinement and selection, global games, Bayesian persuasion, Mirrless taxation, dynamic programming, existence of general equilibrium, recursive equilibria, stochastic models in continuous time, and others. The focus of this class is primarily on mathematical formalism, rigor, and proofs. These tools are essential components of any graduate program in economics. Students who wish to see pure math theorems applied to other fields may also be interested.

Requirements/Evaluation: May include problem sets, exams, participation, term paper

Prerequisites: MATH 150 or equivalent, ECON 251, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Senior Economics Majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)  (QFR)

Quantitative/Formal Reasoning Notes: Mathematical modeling and proofs

Not offered current academic year

ECON 476  (S)  Behavioral Economics: Theory and Methods
Behavioral economics emphasizes that models in economics should account for the psychological plausibility of their assumptions and consequences. This course will cover how the field has incorporated insights from psychology into standard microeconomics models of decision-making. In the process, we will review the different methods that are used to empirically test the psychological foundations of these models, including laboratory experiments, field experiments, and quasi-experimental analyses. Assignments, lectures, and class discussions will focus on academic papers that use behavioral economics models to study a variety of topics, such as household finance, public policy, voting, and others. Throughout the semester, students will also work towards formulating and completing their own original research project.

**Class Format:** Classes will be a mix of lectures and discussion sessions. The lectures will provide a broad overview of a specific topic or theory. Discussion sessions will center on a single academic paper (related to a topic covered in a previous lecture) that students will have read before class.

**Requirements/Evaluation:** one 15-25 page research paper, six to eight 1-2 page written responses to assigned readings, and class participation during discussion sessions

**Prerequisites:** ECON 251; ECON 255 or STAT 346

**Enrollment Limit:** 19

**Enrollment Preferences:** Economics majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

---

ECON 477 (F) Economics of Environmental Behavior (QFR)

**Cross-listings:** CAOS 477 / ENVI 376

**Primary Cross-listing**

A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to assess how policies can help or hurt the environment. Topics we may study include: common pool resources, voluntary conservation, social norms and nudges, discrimination and justice, rationality, firm responses to mandatory and voluntary regulation, voting and public opinion, and international environmental agreements. We'll also build familiarity with the main methodologies of modern economic research: theoretical modeling, empirical analysis of observational data, and experiments.

**Class Format:** Class sessions will largely consist of presentations and discussions of academic research papers, as well as lab sessions to work on empirical exercises and other interactive activities

**Requirements/Evaluation:** class participation, regular reading markup, empirical exercises, oral presentation(s), and an original research paper using an experiment, observational data, or theory

**Prerequisites:** ECON 251 and (ECON 255 or STAT 346)

**Enrollment Limit:** 19

**Enrollment Preferences:** senior Economics majors and junior Economics majors considering a thesis

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**
CAOS 477(D2) ENVI 376(D2) ECON 477(D2)

**Quantitative/Formal Reasoning Notes:** The research students will consume and produce in the class will be based on math-based theory and/or econometric-based empirical analysis.

**Attributes:** CAOS Senior Seminars ENVI Humanities, Arts + Social Science Electives POEC Depth POEC Skills
ECON 491 (F) Honors Seminar: Economics
This course is required of candidates for honors in economics. Each candidate prepares an honors thesis under the supervision of an economics professor who serves as the thesis advisor and the faculty member serving as the Economics Department's Director of Research. Candidates will develop their projects independently, but will be guided by a common timeline and set of expectations. This is part of a one-semester thesis comprising this course as well as a Winter Study course.

Requirements/Evaluation: Students complete a major piece of novel, independent research in economics, culminating in submission of the written thesis and an oral presentation
Prerequisites: admission by the department in the spring of the junior year
Enrollment Limit: n/a
Enrollment Preferences: senior econ majors only
Expected Class Size: n/a
Grading: no pass/fail option, no fifth course option

ECON 501 (F) Economic Growth and Development
This course focuses on the analysis of modern economic growth and comparative development across nations. Motivated by several stylized facts from cross-country data, we will pose a series of questions: Why are some countries so rich while others remain so poor? What explains heterogeneity in the experience of economic growth across nations, with some growing at a moderate pace over long periods of time, others experiencing rapid growth over shorter intervals, and yet others stagnating persistently? Do all economies face comparable challenges to achieving sustained economic growth? Will poorer countries ever catch up to richer ones? To answer these and other related questions, we will explore the underlying mechanisms of economic growth. What role is played by savings and investment (i.e., the accumulation of physical capital)? What is the influence of population growth? How important are investments in human capital (i.e., education and population health)? What about technological differences across nations? How much significance should we ascribe to cross-country differences in geographical characteristics? How much should we ascribe to differences in the quality of institutions? For each question, we will explore both theoretical and empirical approaches, ranging from formal models to qualitative historical evidence to cross-country growth regressions. We will debate the usefulness of these different approaches for development policy and will discuss the reasons why so many questions about economic growth remain difficult to answer.

Class Format: discussion
Requirements/Evaluation: problem sets, one midterm exam, and a final exam
Prerequisites: for undergraduates ECON 251, ECON 252, and either ECON 255 or STAT 346
Enrollment Limit: 32
Enrollment Preferences: junior and senior economics majors only; this is a core course in the master's program at the CDE, so undergraduate enrollment is very limited and requires instructor's permission
Expected Class Size: 30-32
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Attributes: GBST Economic Development Studies
ECON 502 (F) Statistics/Econometrics
This course focuses on basic methods of bringing economic theory and data together to provide empirical guidance for policy formulation, including use of computers in econometric analysis. This course covers techniques of econometric analysis using a moderate level of mathematical exposition.

Requirements/Evaluation: problem sets, group project, midterm exam, final exam.
Prerequisites: admission depends on previous background in statistics and mathematics
Enrollment Limit: 19
Enrollment Preferences: Limited to CDE students
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
Attributes: COGS Related Courses

ECON 503 (F) Statistics/Econometrics: Advanced Section
The course introduces students to the statistical methods used by economists, including those studying policy questions. The focus is on applications. Students will also work with Stata, a software widely used by economists.

Class Format: discussion
Requirements/Evaluation: problem sets, midterm exam, small project, and a final
Prerequisites: admission depends on previous background in statistics and mathematics
Enrollment Preferences: limited to CDE students
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

ECON 504 (F) Public Economics in Developing Countries
This class is about microeconomic and empirical analysis of government expenditure programs in developing and transitional countries. It provides tools for understanding the effects of government policies, as well as a useful conceptual framework for analyzing normative questions such as "what role should government play in the economy" and "what is a good policy?" The course begins by considering the efficiency of market economies, and rationales for government intervention in the market, such as public goods, externalities, information-based market failures, imperfect competition, and equity. We also consider ways that human behavior might deviate from perfect rationality, and what that might imply for policy. Along the way, we apply these concepts to various examples of policy issues, including, among other things, the environment, education, health, infrastructure, security, social insurance, and aid to the poor. We then turn to the general question of how to make the government work better, addressing questions such as the following. When is it better to have the government own and produce things, and when is it better to privatize? What are the incentives of politicians and government employees, and how does the design of political and budgetary institutions affect the degree to which they serve the public interest? How should responsibilities be divided up between the central government and local governments, and what are the advantages and disadvantages of "decentralization?" What can be done to improve the delivery of basic services? For example, how might one address problems of corruption and absenteeism? Throughout the course, we consider examples of empirical research, and to facilitate this, we will occasionally introduce econometric tools that are particularly useful for microeconomic policy evaluation.
Class Format: discussion

Requirements/Evaluation: problem sets, one 10-page paper, a midterm, and a final exam

Prerequisites: ECON 110; in addition, an empirical methods course (POEC 253, ECON 255, 502 or 503, or STAT 346) must be taken before or concurrently with this class; undergraduate enrollment limited and requires instructor's permission

ECON 505 (F) Developing Country Macroeconomics I: Theory

The macroeconomic structures of developing countries tend to be very different from those in high-income countries, and their macroeconomic policy environments also differ in important ways from those in rich countries. This course is intended to introduce students to a set of models that is particularly suitable for analyzing macroeconomic performance in developing countries, as well as to develop some analytical tools that help us understand why such countries have often experienced a variety of macroeconomic crises, including sovereign debt, currency, and banking crises.

Requirements/Evaluation: two hour tests and a comprehensive final exam

Prerequisites: ECON 251 and 252; undergraduate enrollment limited and requires instructor's permission

Enrollment Limit: 25

Expected Class Size: 20-25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

Attributes: GBST Economic Development Studies

Fall 2024

LEC Section: 01 MWF 8:30 am - 9:45 am Peter J. Montiel

ECON 506 (F) Fundamentals of Developing Country Macroeconomics

This is a practically oriented course in macroeconomic theory and policy. Macroeconomics is the study of the economy's aggregate behavior, covering such topics as the determinants of output, employment, inflation, and the current account balance. The state of the economy affects everyone. As a result, macroeconomic issues play a central role in national and international debates. In this course, we will build a simple closed economy macro model suitable for analyzing macroeconomic policy. It will be extended to the open economy and the course will include discussions of key issues related to monetary, fiscal and exchange rate policies with a particular focus on developing and emerging economies.

Requirements/Evaluation: two hour tests and a comprehensive final exam

Prerequisites: none; enrollment limited to CDE students

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Fall 2024

ECON 507 (S) Global Poverty and Economic Development (DPE)

Secondary Cross-listing

Why are some nations rich while other nations are poor, and what can be done to end global poverty and promote shared prosperity? This course explores the historical determinants of global poverty and inequality, and analyzes the range of policy options available to promote economic development and equalize opportunities. Drawing on research in development economics, development studies, political science, and anthropology, we seek to understand the factors that shaped the global economy and contributed to the cross-country income disparities observed today. In addition, we'll use the tools of modern empirical microeconomics to assess the possibilities for eliminating global poverty and underdevelopment in the future. Undergraduate students will receive 200-level credit and should not register at the 500-level.

Class Format: discussion

Requirements/Evaluation: class discussion, short written assignments and/or empirical exercises, in-class quizzes and exams

Prerequisites: one economics course or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 204(D2) ECON 507(D2) ENVI 234(D2)

Difference, Power, and Equity Notes: This course provides a setting for students to learn about the causes and consequences of poverty in developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. The course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

---

ECON 508 (S)(S) Skills for a Modern Economy and How to Pay for Them

Skills are a major driver of economic growth. The skills gap between rich and poor countries explains many of their income differences. The skills gap is a determinant of structural change, the process by which economies grow certain sectors (like manufacturing and services) and shrink others (like agriculture) in the process of achieving high-income country status and reducing poverty. The skills gap both affects and is affected by every other aspect of the economy: agricultural productivity, health, poverty rates, and fiscal capacity. This course will examine the economic policies that are essential for nations to upgrade the skills of their workforce, including the fiscal policies to finance those investments. The course will also explore complementary economic policies--in areas from labor markets to agriculture to healthcare--that allow maximum returns to skills investments.

Class Format: Students will meet the professor in pairs, approximately one hour each week.

Requirements/Evaluation: During a typical week one student in the pair will write a short paper, and the other will respond. The following week the roles will be reversed. Evaluation will be based on the papers written as well as the responses.

Prerequisites: For CDE Fellows: fall semester courses. For undergraduates: Econ 251, Econ 252, and Econ 255, or permission of instructor.

Enrollment Limit: 10

Enrollment Preferences: CDE Fellows, Economics majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

---

ECON 510 (S) Financial Development and Regulation

---
This course focuses on the financial system in developing countries and its role in economic development and stability. From both theoretical and applied perspectives, we will investigate the implications of financial development on economic development & growth, income inequality, and short-term fluctuations. We will also explore the dynamics that shape the institutions of a society's financial structure and study the complexities of financial policy design. Throughout the course, a variety of tools of modern economics will be considered, such as theory-based quantitative structural methods, reduced form empirics, and field experiments, and we will study the consequences of finance on economic well-being. The first part of the course focuses on the functions of finance, how it contributes to growth and poverty alleviation, and what can be done to increase financial inclusion. What are the key parts of the infrastructure that are needed to improve access to financial services, including via 'fintech,' which is taking off in many developing countries? The second part of the course will build upon the first part and investigate how imperfections in financial development could make developing countries susceptible to short-term stability issues. A key focus of the second part will be how to prevent or minimize crises, and we will analyze the government's role as regulator, supervisor, standard setter, contract enforcer, and owner.

Class Format: discussion

Requirements/Evaluation: Midterm, team assignment and formal in-class debates, and a final research paper.

Prerequisites: For undergraduates, Econ 110, 120, and POEC 253 or ECON 255; undergraduate enrollment limited and requires instructor's permission

Enrollment Limit: 20

Enrollment Preferences: CDE students, as well as undergraduates interested in the role of the financial system in low and middle-income countries.

ECON 514 (S) Tax Policy in Global Perspective (QFR)

Cross-listings: 

Primary Cross-listing

Government policy is important for economic development. To finance their policies, governments must build the fiscal capacity to implement a tax system. In turn, fiscal capacity—the ability for the government to raise revenue—depends on economic development. This endogeneity between fiscal capacity and economic development creates challenges for tax policy in developing countries. Given these challenges, what types of taxes should countries use to raise revenues? How can governments build the fiscal capacity to generate revenue to finance critical services? This class explores tax policy from a global and comparative perspective. Because most students will be CDE fellows, we will emphasize tax policy issues, examples, and evidence that are pertinent to developing countries. However, many tax policy lessons are universal so we will also learn about tax policies in developed countries, especially issues relevant for transnational transactions. Topics addressed include: how economic principles can be applied to the efficiency and equity consequences of tax policies; how personal income taxes, corporate income taxes, and value-added taxes are designed and administered and how they influence the economy; ideas for fundamental tax reforms; the debate over progressive taxes versus "flat" taxes; how taxes affect incentives to save and invest; how market failures and administrative problems may influence the optimality of tax policy; the implications of global capital flows and corporate tax avoidance for tax policy; tax holidays and other special tax incentives for investment; empirical evidence on the influence of taxes on foreign direct investment, labor supply, and tax evasion; tax policy towards natural resources such as minerals and oil; case studies of efforts to reform tax administration and reduce tax evasion and corruption; taxes on land and property; taxes on imports and exports; presumptive taxation; and the informal economy and its implications for tax policy.

Requirements/Evaluation: midterm exam, several problem sets, two 10-page essays

Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or
ECON 255, 502, or 503); students who have previously taken ECON 351 will not be enrolled

Enrollment Limit: 19
Enrollment Preferences: CDE students, but undergraduates with the prerequisites are welcome
Expected Class Size: 15-19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:

ECON 515 (S) Developing Country Macroeconomics II: Institutions and Policy Regimes
Cross-listings:
Primary Cross-listing
Developing countries must confront a number of macroeconomic challenges that industrialized countries do not have to contend with: exchange rate volatility, large capital flows and commodity price fluctuations, for example. Building on ECON 505, this course examines these issues from both theoretical and empirical standpoints. The focus will be on the design of monetary, fiscal and exchange rate policies and institutions to enhance macroeconomic stability, and create an environment conducive to growth.
Requirements/Evaluation: two midterms and a final project
Prerequisites: ECON 505 or 506; undergraduate enrollment limited and requires instructor's permission
Enrollment Limit: none
Enrollment Preferences: none
Expected Class Size: 25-30
Grading: yes pass/fail option, no fifth course option

ECON 516 (S) International Trade and Development
Cross-listings:
Primary Cross-listing
This course will examine the causes and consequences of globalization and its implications for less-developed countries. We will study the classic models of international trade and discuss the empirical relevance of these theories. In addition, we will focus on other dimensions of globalization that are of particular importance to developing countries such as trade and education, emigration, brain drain, remittances, foreign direct investment, trade policies, infant industry protection, trade and growth, the resource course, and trade agreements.
Class Format: discussion
Requirements/Evaluation: problem sets, midterm, presentation, and final
Prerequisites: ECON 251 and ECON 255; undergraduate enrollment limited and requires instructor's permission
ECON 522  (S)  Economics of Climate Change  (QFR)
Cross-listings: CAOS 387
Secondary Cross-listing
This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.
Requirements/Evaluation: problem sets, midterm, group presentation, final exam
Prerequisites: ECON 251, familiarity with statistics
Enrollment Limit: 25
Enrollment Preferences: Junior/Senior Economics majors and CDE fellows

ECON 523  (S)  Program Evaluation for International Development
Cross-listings:
Primary Cross-listing
Development organizations face strict competition for scarce resources. Both public and private organizations are under increasing pressure to use rigorous program evaluation in order to justify funding for their programs and to design more effective programs. This course is an introduction to evaluation methodology and the tools available to development practitioners, drawing on examples from developing countries. It will cover a wide range of evaluation techniques and discuss the advantages and disadvantages of each. The course is a mix of applied econometrics and practical applications covering implementation, analysis, and interpretation. You will learn to be a critical reader of evaluations, and to develop your own plan to evaluate an existing program of your choice.
Requirements/Evaluation: Empirical exercises, exams, writing assignments, and collaborative projects
Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503)

ECON 524 (S) Advanced Methods for Causal Inference

Cross-listings:

Secondary Cross-listing

How do we estimate the causal effect of a policy on an outcome? Building on a basic understanding of econometrics and statistics, this methodology course will take students through several applied microeconometric techniques for answering this question. Students will be expected to use statistical software throughout, as we explore the inner workings of these methods and the assumptions required for them to deliver credible estimates. We will discuss the randomized trial and its variants, then cover difference-in-difference, regression discontinuity, and instrumental variables. We will discuss historical roots of modern methods, and will explore newer alternatives to the most commonly used kinds of statistical tests.

Class Format: Students will work on laptops in class. Students without laptops should borrow them from the library. Some prior knowledge of either Stata, R, Matlab, or other mathematical/statistical software is essential.

Requirements/Evaluation: Grades are principally based on problem sets, participation in the in-class activities, one in-class exam, and a final replication project.

Prerequisites: Econ 251 and either Econ 255 or Stat 346. CDE Fellows should have taken ECON 502 or 503.

Enrollment Limit: 19

Enrollment Preferences: Junior and senior Economics majors. CDE Fellows require the instructor's permission.

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

ECON 532 (S) Inclusive Growth and Crisis Response: The Role of Social Protection Systems

Cross-listings:

Primary Cross-listing

Over the past three decades, developing countries have increasingly expanded social protection systems to tackle poverty and vulnerability while promoting inclusive social development and equitable economic growth. These systems provide pro-poor policy instruments that can balance trade and labor market reforms, fiscal adjustments (such as reduced general subsidies) and other economic policies aimed at enabling better market performance. In addition, social protection systems help vulnerable people to cope with shocks to their livelihoods, promoting resilience, human capital development and sometimes high-return risk-taking. In times of crisis, these systems are more important than ever. From March to June 2020, the World Bank identified 195 countries that have adapted and expanded their social protection systems to respond to the COVID-19 pandemic. This tutorial offers the opportunity to explore how shock-responsive social protection systems can better enable developing countries to respond to global and local shocks in a manner that minimizes the medium- to long-term costs of the resulting crises. The tutorial examines how developing countries
build social protection systems to tackle poverty, vulnerability and social exclusion that result from global and local shocks. Topics include how the design and implementation of effective interventions both respond to crises and strengthen long-term developmental outcomes. The tutorial focuses on country responses to the COVID-19 pandemic as both a relevant case study and an example of the kinds of global crises to which national social protection systems must be able to respond in the future.

Requirements/Evaluation: Students will write five papers during the term, and will prepare and deliver formal comments on five papers written by other students

Prerequisites: ECON 251 or ECON 252

Enrollment Limit: 10

Enrollment Preferences: CDE Fellows; Junior and senior Economics majors at instructor's discretion.

Expected Class Size: 10

ECON 538 (S) Resilience and Macroeconomic Policy

Despite tremendous improvements in combating global hunger and child mortality, an increasing number of the world's population continue to live in fragile conditions, buffeted by climate change, conflict, forced migration, weak governance, and state inability to deliver basic services to its citizens. Setting macroeconomic policy is difficult in such countries. Not only are decisions affected by policymakers' distorted incentives and governments' internal conflicts, fragility also weakens policy transmission mechanisms and constrains policy spaces. This course aims at identifying the causes and consequences of fragility and at discussing how policies should be changed to enhance resilience in such countries. The course will, first, look into the definition and characteristics of fragility, its numerical representation, and its causes and main consequences. The course will also highlight how policy is made in states of fragility, in particular, fiscal policy, monetary policy, exchange rate policy, export promotion policy, etc.), as well as consider policy interactions. Finally, the course will focus on efforts to mitigate fragility and enhance resilience in such countries, including the role of structural policies and that of international financial institutions.

Requirements/Evaluation: Students will write 5-6 papers during the term, and will prepare and deliver formal comments on 5-6 papers written by other students. The required text is "Macroeconomic Policy in Fragile States," edited by Ralph Chami, Raphael Espinoza, and Peter Montiel, 2021, OUP.

Prerequisites: ECON 252 and ECON 255

Enrollment Limit: 10

Enrollment Preferences: Economics majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ECON 539 (S) Debt Sustainability

The stock of government debt has skyrocketed in many countries. At the same time, interest rates have risen as global central banks have sought to tame inflation, generating concerns about the sustainability of public debt, especially in many lower-income and emerging market economies. What does fiscal/debt sustainability mean, and what are the implications of high public debt for growth and stability? How do the IMF and other institutions assess a country's public debt sustainability? How does uncertainty factor into these assessments, and what special considerations are relevant for natural resource exporters? How have governments sought to bring down high levels of debt, or to prevent excessive debt levels from arising in the first place? Do these approaches need to be modified to account for the impact of COVID on debt stocks? How will demographic developments and
climate change affect debt sustainability? By addressing these questions, the course will seek a nuanced understanding of the role of public debt in the economy and its benefits and risks.

**Class Format:** Students will meet the professor in pairs, approximately one hour each week.

**Requirements/Evaluation:** During a typical week one student in the pair will write a short paper, and the other will respond. The following week the roles will be reversed. Evaluation will be based on the papers written as well as the responses.

**Prerequisites:** For CDE Fellows: fall semester courses. For undergraduates: Econ 251, Econ 252, and Econ 255, or permission of instructor.

**Enrollment Limit:** 10

**Enrollment Preferences:** CDE Fellows, Economics majors.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

---

**ECON 540 (F)(S) Research Studies**

In this course, each Fellow carries out an individual research study on a topic in which they have particular interest, usually related to one of the three seminars. The approach and results of the study are reported in a major paper. Research studies are analytical rather than descriptive and in nearly all cases include quantitative analyses. Often the topic is a specific policy problem in a Fellow's own country.

**Class Format:** research

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

**ECON 545 (S) Growth Diagnostics**  (QFR)

**Cross-listings:**

**Secondary Cross-listing**

Evidence from across the developing world suggests that the "binding constraints" to economic growth can be remarkably heterogeneous—i.e., the growth potential of stagnating or underperforming economies may be unlocked in a large variety of ways. For instance, pre-reform China had been constrained by poor supply incentives in agriculture, whereas Brazil has been held back by an inadequate supply of credit, South Africa by poor employment incentives in manufacturing, El Salvador by insufficient production incentives in tradables, Zimbabwe by bad governance, and so forth.

How can developing-country policymakers determine country-specific constraints like these, thus enabling them to pragmatically pursue a selected set of growth-promoting policies rather than attempting to implement a "laundry list" of reforms that are naively based on "best practice" rules-of-thumb?

This course will serve as a primer on "growth diagnostics," an empirically-driven analytical framework for identifying the most binding constraints to economic growth in a given country at a point in time, thereby allowing policymakers to develop well-targeted reforms for relaxing these constraints while being cognizant of the nation's prevailing economic, political, and social context. The course will first build on the basic theories and empirics of economic growth to elucidate the diagnostic framework and will then employ a wide range of country-specific case studies to demonstrate how the framework can be operationalized for policy making. Throughout the semester, students will be required to work in groups, each representing a given developing or emerging-market economy, in order to build a growth diagnostic for their group's assigned country by the end of the course.

**Requirements/Evaluation:** extensive class participation, several short (5-page) reports, a final group project comprising a country growth diagnostic, and a final group presentation on the diagnostic

**Prerequisites:** for undergraduates ECON 251, ECON 252, and either ECON 255 or STAT 346

**Enrollment Limit:** 19

**Enrollment Preferences:** CDE fellows and senior Economics majors

**Expected Class Size:** 19
Grading: no pass/fail option, no fifth course option

Cross-listings:
Secondary Cross-listing
Children around the world face unequal opportunities to attend school, and to learn. This course will introduce students to economic studies of education, focusing on pre-school through high school. The course will mainly cover research in low-income and middle-income countries, but will also discuss connections to policy debates in the United States and elsewhere. Topics will include the importance of early-life conditions and investments; the connections between health and education; the roles of information, incentives, inputs, and technology; research methods; and decisions between policy options. Students in this course will analyze data themselves, and will critically read published research.

Requirements/Evaluation: Grades are principally based on readings questions, problem sets, two in-class exams, and short presentations by students.

Prerequisites: ECON 255, POEC 253, STAT 346, or permission of the instructor. CDE Fellows should have taken ECON 502 or 503.

Enrollment Limit: 20

Enrollment Preferences: Economics majors and CDE Fellows

ECON 571 (S) Global Health Policy Challenges

Cross-listings:
Secondary Cross-listing
Poor health is both a cause and a consequence of poverty. It can trap individuals in poverty and reduce aggregate economic growth. This course will be structured around major global health challenges, including maternal health, infectious diseases (e.g. HIV/AIDS, tuberculosis, COVID), neglected tropical diseases (e.g malaria, dengue, Ebola), nutritional deficiencies, and mental health. We will focus primarily, but not exclusively, on health in low-income countries in this course. Students will read papers and conducted empirical assignments related to the various topics, as well as develop their own research idea during the semester related to one of the topics covered.

Requirements/Evaluation: empirical problem sets, a short paper and a substantive research paper that includes some analysis of existing data

Prerequisites: ECON 251 and (POEC 253 or ECON 255 or STAT 346) or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: juniors and sophomores

Winter Study  

ECON 15  (W) Introduction to Management Consulting
Introduction to Management Consulting provides a broad overview of the management consulting industry from the perspective of an experienced practitioner. The objectives of the class are to provide a real world view as to what consultants do and to help prepare students who are considering joining a management consulting firm post-Williams. The class will begin with a broad discussion of the differences in the types of business consulting and how management consulting firms are utilized by corporations and private equity firms. The next section will introduce the complexities in developing successful business strategies and review common frameworks for structuring strategic analysis. Students will then be provided instruction on (and practice with) the tools utilized by strategy consultants to analyze markets, evaluate competitive environments, synthesize customer information, and perform financial analysis in order to develop growth strategies. Additionally, one class session will be devoted to tips for getting a job in management consulting including how to ace case interviews. The final small group project will entail the development and delivery of a consulting presentation for a business with a strategic need.

Requirements/Evaluation:  Presentation(s); Other: Homework and class participation
Prerequisites:  None
Enrollment Limit:  25
Enrollment Preferences:  If the course is over enrolled, students will be asked to address a few short questions germane to their interest in the course, and I will make the final selection.
Expected Class Size:  NA
Grading:  pass/fail only
Unit Notes:  Peter McKelvey '86 is the former President of the Americas Region of L.E.K. Consulting, a global management consulting firm.  He was with L.E.K. for 29 years and has extensive experience in corporate strategy development and mergers & acquisitions.
Materials/Lab Fee:  $36

Not offered current academic year

ECON 22  (W) Volunteer Income Tax Assistant
This experiential course provides students with the opportunity to explore public policy through training and work as volunteer income tax preparers for low-income working people in North Adams, Massachusetts. By the end of the term, students will be IRS-certified volunteer income tax preparers. Students will progress through the IRS "Link and Learn" online tax preparer training program that leads to certification, both in class and on their own time. Class sessions will also include several lectures/discussions that offer a brief overview of the U.S. income tax and its history, as well its relationship to U.S. social policy (especially policy towards lower-income households). This year’s course is co-taught by a behavioral economist, and thus some class time will be devoted to discussing the psychological aspects of filing taxes, both when filing for yourself and when serving as a volunteer assistant for low-income clients. At the end of the term, students have the option of writing a 10-page analytic essay or serving as volunteer tax preparers for local clients of the Berkshire Community Action Council. Note: This course satisfies the Political Economy Major Experiential Learning requirement.

Requirements/Evaluation:  10-page paper, or serving as volunteer tax preparers for local clients of the Berkshire Community Action Council
Prerequisites:  none
Enrollment Limit:  18
Enrollment Preferences:  statement of interest
ECON 23 (W) Investing With Purpose: The planning and practice of endowment investing

Are you eager to learn about investing? Or perhaps you are interested in non-profits and want to understand how endowments support their mission? Maybe you’ve thought about a potential career in finance, but want to know the difference between asset management and investment banking? ECON 23 is open to students of all majors and backgrounds; students with no prior experience are welcome and encouraged to apply. ECON 23 is designed to introduce students to investing and equip students with key industry knowledge and skills. The course is taught by members of the Williams College Investment Office, which oversee the college's $3.5 billion endowment. We’ll start with an introduction to the role that the endowment plays in supporting the college’s mission. Next, the course will cover different investment assets including equity, hedge funds, venture capital, private equity, fixed income, and impact investing. Students will receive a brief overview of accounting and will have the opportunity to learn about different career paths in finance. Through discussions, readings, and a group case study, students will apply skills learned. Students will learn from practicing investment professionals through guest speakers and will gain practical skills in Microsoft Excel through training and project work. The course will conclude with a required trip to Boston, where the class will spend the day with the Investment Office team and network with Williams alumni working in endowment management, private equity, consulting, and more. The course is open to first-years, sophomores, and juniors. To apply, please email investmentoffice@investments.williams.edu by 11:59 PM ET on Sunday, October 20, 2024 your resume and a brief personal statement discussing how your background and curiosity inform your interest in this course and what you hope to gain from it. For students without a resume prepared, ensure your personal statement contains relevant information you wish to convey.

Requirements/Evaluation: Other: Evaluation is based on class attendance, participation, and completion of assignments, which include required readings, weekly journal reflections, Excel assignments, a financial statements analysis, and a group case study. Additionally, students are required to attend a day-long trip to Boston to meet with the Investment Office team and guest speakers.

Prerequisites: None

Enrollment Limit: 18

Enrollment Preferences: First-years, sophomores, and juniors

ECON 24 (W) The Economics, Geography and Appreciation of Wine

This course provides an introduction to the economics, geography and appreciation of wine. We will be studying the economics and geography of wine production, and will also learn to identify, understand and appreciate the major wine types of the world. The course will involve lectures, outside readings, discussions, and in-class wine tastings. We will focus primarily on the Old World wine styles and regions of France, Italy, Germany, Austria, Spain and Portugal, but will also cover some New World wine regions including California, Oregon, Chile, Argentina, South Africa, New Zealand and Australia among others.

Requirements/Evaluation: final project or presentation and a blind tasting exam

Prerequisites: none, but students must be 21 years old on or before the first day of class

Enrollment Limit: 10

Enrollment Preferences: Mix of academic record and diversity of backgrounds and interests. Students are invited to email the instructor with a brief description of background and interests, but are not required to do so.

Expected Class Size: 10

Grading: pass/fail only

Materials/Lab Fee: $300

ECON 26  (W)  Micro-Simulation Modeling for Ex Ante Policy Analysis

Cross-listings:
Secondary Cross-listing

Micro-simulation modeling provides one of the most powerful tools for ex ante evidence-based analysis of economic and social policy interventions. Rooted in representative household surveys of a country's population, the models provide a picture of poverty, employment, consumption and income levels throughout the country. A micro-simulation model enables researchers to investigate the impact of existing economic and social policy interventions (such as tax and public benefit interventions) on income levels, poverty, inequality and other outcomes. In addition, researchers are able to simulate the impact and estimate the cost of new policy interventions. During this course, students will learn to apply these methods to analyze public policies and interpret the findings. The course examines measurement issues, analytical tools and their application to household survey data for a range of developing countries. The course also links the outcomes of the analysis with the challenges of policy implementation, exploring how the political environment and/or institutional setting may result in the implementation of second-best options. This is a hands-on modeling course, and students will build a micro-simulation model for a country of their choice and use this model in completing the course requirements. The course will employ Excel, Stata and advanced micro-simulation packages. The final requirement for the course is a policy paper that provides students with an opportunity to write accessible prose that communicates the methodology adopted and the key lessons of the analysis

Requirements/Evaluation: two 10-page papers and final project and presentation
Prerequisites: Fall semester CDE courses for CDE fellows
Enrollment Limit: 10
Enrollment Preferences: CDE Fellows; undergraduate enrollment at the discretion of the instructor.
Expected Class Size: NA
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:
ECON 52(D2) ECON 26(D2)
Attributes: EXPE Experiential Education Courses STUX Winter Study Student Exploration

ECON 28  (W)  Product Management and Solution Design
In this course, students will work in small teams to design a software product that solves a problem of their choosing. To support this endeavor, we will examine, critique, and apply methodologies intended to solve these problems, including those developed by Marty Cagan, Steve Blank, Don Norman, Steve Krug, and Eric Ries. Students will learn to act as effective product managers, achieving alignment between business, technology, and UI/UX design. Such alignment is crucial given that technology projects often fail not because of the quality of technical engineering but due to misalignment in these three areas. Google Glass failed to account for its price tag, fashion, and the privacy panic. The initial Obamacare website failed to address management issues and predict the volume of website visitors. Flexcube failed to update and incorporate users into the design of their product,
resulting in a $500 M UX mistake for Citi bank. These organizations did not identify the right problem, or did not build the right solution. The underlying conflict is IT teams like to be told what to build, but users often do not know what they want or how to express it. We will learn how product managers and their interdisciplinary teams can bridge that gap.

Requirements/Evaluation:  Presentation(s); Creative project(s)
Prerequisites:  None
Enrollment Limit:  15
Enrollment Preferences:  Preference for upper classmen (seniors, juniors)
Expected Class Size:  NA
Grading:  pass/fail only

Unit Notes:  Allan Wellenstein is a SVP at DataArt, where he heads the DataArt Solution Advisors consulting group as well as their product management competency. Though technically headquartered in NYC, he lives with his wife and three children in Pittsfield.

ECON 29 (W)  Infrastructure Policy in Developing Countries

Cross-listings:
Secondary Cross-listing
This is a CDE winter term course, open to undergraduates. Students will be introduced to policy-making challenges of infrastructure, with a focus on developing countries. Students will read and discuss case studies on how different countries have sought to address infrastructure challenges through policy interventions. Through these, students are expected to develop an appreciation for different elements of infrastructure policy, and how countries have succeeded - or not - in using policies to meet their development objectives. The course will touch on evolving energy technologies, different transportation sectors, public-private partnerships, infrastructure financing and the impacts of climate change. The course approach is applied political economy as opposed to theory, and there are no prerequisites. Case examples will be drawn from a range of developing countries, covering Latin America, Africa, the Middle East and Asia. Students are expected to participate actively in class discussions, and will write a paper and deliver a team presentation on ways in which infrastructure challenges can be approached in a country of their choosing.

Requirements/Evaluation:  Paper(s) or report(s); Presentation(s); Other: Class participation
Prerequisites:  None
Enrollment Limit:  10
Enrollment Preferences:  Interest in the topic.
Expected Class Size:  NA
Grading:  no pass/fail option, no fifth course option

Unit Notes:  The instructor is the former Global Director of Infrastructure at the World Bank Group's International Financial Corporation. He has over three decades of experience in economic development, and teaches, consults, and writes about infrastructure.

Distributions:  (D2)
This course is cross-listed and the prefixes carry the following divisional credit:

ECON 30 (W)  Honors Project: Economics

The "Specialization Route" to the degree with Honors in Economics requires that each candidate take an Honors Winter Study Project in January of their senior year. Students who wish to begin their honors work in January should submit a detailed proposal. Decisions on admission to the Honors WSP will be made in the fall. Information on the procedures will be mailed to senior majors in economics early in the fall semester. Seniors who wish to apply for admission to the Honors WSP and thereby to the Honors Program should register for this WSP as their first choice. Some seniors will have begun honors work in the fall and wish to complete it in the WSP. They will be admitted to the WSP if they have made satisfactory progress. They should register for this WSP as their first choice.
**ECON 31 (W) Honors Thesis: Economics**

To be taken by students participating in year-long thesis research Economics 493-494.

**Class Format:** thesis

**Grading:** pass/fail only

Not offered current academic year

**ECON 32 (W) The Fun of Fundraising**

According to the National Center for Charitable Statistics, there are 1.5 million non-profit organizations registered in the U.S., and each of those organizations needs to actively fundraise in order to sustain their operations. Each year, hundreds of billions of dollars are contributed to charities from donors across the U.S. What is it that makes people want to give? What do donors consider when choosing what organizations to support? What type of an impact do individuals want to make through their philanthropy? This class will examine these questions and more through case studies, conversations with non-profit leaders and board members, and philanthropists. Students will gain a basic understanding of a non-profit financial model and how non-profits can demonstrate impact to existing and potential donors, as well as the different ways in which fundraising can actually be fun and can inform a potential career in the non-profit sector. Much of the course reading will involve actual fundraising materials and collateral, including appeals, brochures, grant applications, and stewardship reports. Final projects will give students the opportunity to try their own hand at creation of stewardship or solicitation pieces, potentially in partnership with for the benefit of a local non-profit. In addition to regular course meetings, occasional meetings with non-profit leaders or donors may be required; whenever possible (based on the schedule of the guest speaker), these will be scheduled during the day, and any evening events would be optional.

**Requirements/Evaluation:** Paper(s) or report(s); Presentation(s)

**Prerequisites:** None

**Enrollment Limit:** 20

**Enrollment Preferences:** Seniors receive priority; then by personal statement of interest

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Ryan Ford ’09 has fifteen years experience in higher education supporting alumni engagement and philanthropy. He is currently Director of Milestone Reunion Programs at Williams after previously working at Dartmouth, Harvard, and non-profit setting.

**Attributes:** EXPE Experiential Education Courses  STUX Winter Study Student Exploration

Not offered current academic year

**ECON 33 (W) Climate and Energy Finance**

How do we finance the energy transition? How do we use money to mitigate the worst effects of global warming? How can a career in finance fight climate change? This course introduces students to key topics, market players, and tools in climate and energy finance and surveys how to mobilize capital to finance clean energy (largely in a U.S. energy market context) and other climate-forward outcomes. Students will learn fundamental financial and investment concepts, including basic capital structures, three-statement models, and project finance. Students will explore sectors for decarbonization beyond energy, including food systems, buildings, and transportation. All modules will emphasize equity and social justice challenges and successes. Some modules may even be fun. Throughout, students will learn about market participants in each area and hear from guest speakers so that they may complete the course with a better understanding of careers at the intersection of climate change and finance.

**Requirements/Evaluation:** Paper(s) or report(s); Presentation(s)

**Prerequisites:** N/A

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference will be given to students interested in exploring careers in energy, finance, and/or climate justice, based on a paragraph expressing their interest. All levels of experience are welcome, especially beginners.
ECON 34 (W) Data for Development

Cross-listings:
Secondary Cross-listing

Recently we have experienced an explosion in publicly available data sources that can be helpful to inform development research. This course is designed to provide hands-on experience using microeconomic data to assess trends in key indicators used to measure progress towards the sustainable development goals. The course will build students’ skills in finding, accessing and using various data sources. It will also expose students to the range of new types of data for development. Students will build skills in data cleaning, data manipulation and data visualization techniques. The course will use Stata, and most of the course will involve hands-on in-class data workshops, interspersed with some lectures and readings. Each student will focus on a low- or middle-income country of their choice and produce a policy report using the data skills acquired during the course.

Requirements/Evaluation: Short paper and final project or presentation

Prerequisites: CDE students need to have completed their fall semester core classes. Undergrad students need to have taken STAT 161 or equivalent.

Enrollment Limit: 15

Enrollment Preferences: CDE preference. Undergrad students can enroll at the discretion of the instructor.

Expected Class Size: NA

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 34(D2) ECON 53(D2)

ECON 35 Deconstructing Finance: An Introduction

Are you thinking of a career in Finance, but not sure what it really means? Conflicted? Have you ever talked to someone in Finance and learned from their career experience? Are you interested in developing your resume and interviewing skills? This introductory course will define the institutions that comprise the world of Finance. This will be accomplished in three units. First, we will explore the sell side from the buy side, defining the market interrelationships. This will require reading provided in a packet. Second, building on the first unit we will have panel discussions with various senior Finance professionals comprising asset management, investment banking and global markets. Third, we will develop skills in writing resume reviews and practice interviews. Students will practice as both interviewee and interviewer for specific job roles, graded for competencies and whether the results justify an offer/further interviews.

Requirements/Evaluation: Presentation(s); Performance(s)

Prerequisites: Freshman and Sophomores preferred with interest in segment of Finance

Enrollment Limit: 12

Enrollment Preferences: Freshman and Sophomore year preferred with statement on what they intend to learn from course.

Expected Class Size: NA

Grading:

Unit Notes: Henry Lee received a BA in Political Economy from Williams College in 1979 and an MBA in Finance from the Wharton School at the University of Pennsylvania in 1984. He has over 40 years of experience in capital markets with Goldman, Lehman and BNP.

Attributes: STUX Winter Study Student Exploration WELL Winter Study Wellness
ECON 36 The Liberal Arts in Investing

Consider the following quotes and questions: "You can't really know where you are going until you know where you have been." -Maya Angelou
"Acquire worldly wisdom and adjust your behavior accordingly." -Charlie Munger
Why does the CEO of the world's largest sovereign wealth fund, responsible for investing $1.6 trillion, have Master's Degrees in the History of Art and Social Psychology? How can a generalist background compete in a world of increasing specialization? This course explores the intersection of liberal arts education and the field of investing. Investors such as family offices and foundations see a wide spectrum of the finance world through their investments across asset classes, geographies, sectors, and styles. Given this breadth of exposure, a broad educational background provides an advantageous toolkit for evaluating investment opportunities and building strong connections across the industry. By studying examples from subjects such as psychology, biology, history, economics, and more, students will see how interdisciplinary learnings can be applied to investments in asset classes such as public equities, venture capital, real assets, and more. Consider artificial intelligence (AI), which many consider a generational investment opportunity. While specialists may only understand narrow aspects of this mega-trend, a well-rounded investor will draw lessons from historical examples of disruptive technologies, examine philosophical and ethical considerations, and evaluate potential implications across a variety fields. Between class discussions, readings, weekly reflections, and a final presentation, students will leave this class with an appreciation for the quotes and questions listed above. The only prerequisite is intellectual curiosity! All backgrounds, regardless of intent to work in finance, are encouraged to apply. All costs (books, films, optional coffee chats, etc.) will be covered by the instructor.

Requirements/Evaluation: Paper(s) or report(s); Presentation(s); Other: Class participation
Prerequisites: None; all backgrounds, regardless of intent to work in finance, are encouraged to apply.
Enrollment Limit: 10
Enrollment Preferences: If overenrolled, preference will be given to students who email a brief statement of interest to the instructor (jb@omptrustco.com).
Expected Class Size: NA
Grading:

Unit Notes: Jack Bissell ('16) is a Managing Director at Old Mountain, a Boston-based single-family office. He previously worked at the Williams Investment Office in Boston. Jack graduated Williams College with a degree in Economics and is a CFA Charterholder.

ECON 37 Storytelling in Business

The liberal arts graduate interested in pursuing a corporate career may at first feel disadvantaged by their lack of a business, marketing, or communications major. However, it is precisely the core liberal arts skill set - research, critical thinking, persuasive writing, creativity - that is most valued in a corporate context. A key attribute of the successful businessperson is their ability to influence people and to spark change; storytelling is one of the most powerful tools by which to do so. In this interactive course, students will practice the art of storytelling in the business domain. We will begin by exploring the power of stories across the course of human history and in contemporary society today. From there, we will examine first-hand how quantitative information can serve as an effective means of marshalling evidence in support of a story. For better or worse, PowerPoint is the primary communications vehicle inside large businesses, so the next phase of the course will deal with telling stories through slide presentations. Finally, we will close with a session on how to tell your own story, which will be an important part of securing a job and progressing your career. Throughout the course, students will be required to present in front of their peers, culminating in the delivery of a final slide presentation on a topic of each student's choice. Additionally, the course will feature a number of guest speakers from various business backgrounds (e.g. tech start-up, venture capital, corporate messaging) who pitch and evaluate business stories every day.

Requirements/Evaluation: Presentation(s); Other: Class participation
Prerequisites: None
Enrollment Limit: 20
Enrollment Preferences: Seniority
Expected Class Size: NA

Unit Notes: Laurence Birdsey is a Managing Director & Partner at Boston Consulting Group (BCG) where he serves healthcare clients on operations
**ECON 38  Case Studies: How the Internet Created a Cultural and Business Revolution**

How did new technology companies harness the power of the Internet to disrupt traditional industries and create new categories of culture and commerce during the past 25 years? What management decisions led to the early demise of both emerging and once-dominant media businesses? In this Business Case Study Class, we will study the evolution of Internet technology, culture, and commerce through the lens of an emerging business and the issues that they were wrestling with on the path to success (or failure). Each case study will present a company's story with historical industry analysis and a specific range of issues and problems for which students are asked to discuss, debate, analyze, and ultimately take a position to solve complex problems. The case studies will follow business categories that include e-commerce, advertising, media publishing, social media, and on-demand sharing, through the lens of successfully disruptive businesses that include Amazon, Google, Netflix, Facebook, Airbnb, and Uber and failed businesses such as AOL, Myspace, and Blockbuster. Required Texts: *Here Comes Everybody* by Clay Shirky, Penguin Group (USA), 2008. *How We Got to Now* by Steven Johnson, Penguin Group (USA), 2018. *Understanding Michael Porter* by Joan Magretta, Harvard Business Press, 2011. Weekly news and scholarly articles related to each case study In addition to the readings, students will be asked to lead and participate in class discussion, produce short writing assignments, develop independent case analyses, and complete a take-home final exam.

**Requirements/Evaluation:** Paper(s) or report(s); Presentation(s); Performance(s); Other: Take-home test

**Prerequisites:** None

**Enrollment Limit:** 30

**Enrollment Preferences:** Class standing, majors, concentrations, specific courses taken, or areas of interest.

**Expected Class Size:** NA

**Grading:**

**Unit Notes:** Michael Cohen is an entrepreneur, strategy consultant, and investor primarily focused on media and disruptive technology through his firm, Catch Interact. He holds a BA in English from Tufts University and an MBA from Columbia Business School.

**ECON 51 (W) Infrastructure Policy in Developing Countries**

**Cross-listings:**

**Primary Cross-listing**

This is a CDE winter term course, open to undergraduates. Students will be introduced to policy-making challenges of infrastructure, with a focus on developing countries. Students will read and discuss case studies on how different countries have sought to address infrastructure challenges through policy interventions. Through these, students are expected to develop an appreciation for different elements of infrastructure policy, and how countries have succeeded - or not - in using policies to meet their development objectives. The course will touch on evolving energy technologies, different transportation sectors, public-private partnerships, infrastructure financing and the impacts of climate change. The course approach is applied political economy as opposed to theory, and there are no prerequisites. Case examples will be drawn from a range of developing countries, covering Latin America, Africa, the Middle East and Asia. Students are expected to participate actively in class discussions, and will write a paper and deliver a team presentation on ways in which infrastructure challenges can be approached in a country of their choosing.

**Requirements/Evaluation:** Paper(s) or report(s); Presentation(s); Other: Class participation

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** Interest in the topic.

**Expected Class Size:** NA

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** The instructor is the former Global Director of Infrastructure at the World Bank Group's International Financial Corporation. He has over three decades of experience in economic development, and teaches, consults, and writes about infrastructure.
**ECON 51 (W) Micro-Simulation Modeling for Ex Ante Policy Analysis**

**Cross-listings:**

**Primary Cross-listing**

Micro-simulation modeling provides one of the most powerful tools for ex ante evidence-based analysis of economic and social policy interventions. Rooted in representative household surveys of a country's population, the models provide a picture of poverty, employment, consumption and income levels throughout the country. A micro-simulation model enables researchers to investigate the impact of existing economic and social policy interventions (such as tax and public benefit interventions) on income levels, poverty, inequality and other outcomes. In addition, researchers are able to simulate the impact and estimate the cost of new policy interventions. During this course, students will learn to apply these methods to analyze public policies and interpret the findings. The course examines measurement issues, analytical tools and their application to household survey data for a range of developing countries. The course also links the outcomes of the analysis with the challenges of policy implementation, exploring how the political environment and/or institutional setting may result in the implementation of second-best options. This is a hands-on modeling course, and students will build a micro-simulation model for a country of their choice and use this model in completing the course requirements. The course will employ Excel, Stata and advanced micro-simulation packages. The final requirement for the course is a policy paper that provides students with an opportunity to write accessible prose that communicates the methodology adopted and the key lessons of the analysis.

**Requirements/Evaluation:** two 10-page papers and final project and presentation

**Prerequisites:** Fall semester CDE courses for CDE fellows

**Enrollment Limit:** 10

**Enrollment Preferences:** CDE Fellows; undergraduate enrollment at the discretion of the instructor.

**Expected Class Size:** NA

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 51(D2) ECON 29(D2)

**Attributes:** STUX Winter Study Student Exploration

Not offered current academic year

---

**ECON 52 (W) Data for Development**

**Cross-listings:**

**Primary Cross-listing**

Recently we have experienced an explosion in publicly available data sources that can be helpful to inform development research. This course is designed to provide hands-on experience using microeconomic data to assess trends in key indicators used to measure progress towards the sustainable development goals. The course will build students' skills in finding, accessing and using various data sources. It will also expose students to the range of new types of data for development. Students will build skills in data cleaning, data manipulation and data visualization techniques. The course will use Stata, and most of the course will involve hands-on in-class data workshops, interspersed with some lectures and readings. Each student will focus on a low- or middle-income country of their choice and produce a policy report using the data skills acquired during the course.

**Requirements/Evaluation:** Short paper and final project or presentation

**Prerequisites:** CDE students need to have completed their fall semester core classes. Undergrad students need to have taken STAT 161 or equivalent.

**Enrollment Limit:** 15

**Enrollment Preferences:** CDE preference. Undergrad students can enroll at the discretion of the instructor.

**Expected Class Size:** NA
ECON 55  (W)  Monetary Policy in Emerging and Developing Economies

The goal of the class is to help you become an effective macroeconomic policy analyst. Specifically, you will acquire experience in obtaining, manipulating, and presenting macroeconomic data, learn how to effectively communicate economic ideas and analysis in writing, and hone oral presentation skills. The focus will be on four practical issues encountered in the formulation and implementation of monetary policy: (1) estimating monetary policy rules, (2) measuring potential output, (3) modeling inflation, and (4) understanding monetary policy transmission. The course will entail writing a case study in which you will use macroeconomic theory as a guide for interpreting macroeconomic data, and a policy memo in which you will make a case for a specific policy action based on sound theoretical and empirical analysis.

Requirements/Evaluation:  1 case-study; 1 policy memo
Prerequisites:  CDE Students only, not open to undergraduate students
Enrollment Limit:  10
Enrollment Preferences:  CDE Graduate students
Expected Class Size:  N/A
Grading:  no pass/fail option,     no fifth course option
Not offered current academic year

ECON 99  (W)  Independent Study: Economics

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period. Winter Study 99 projects sponsored by the economics department must adhere to a specific set of rules outlined on the economics department website at (https://econ.williams.edu/major/economics-winter-study-99-guidelines/). Please review these rules well in advance of the deadline.

Class Format: independent study
Requirements/Evaluation:  5 page paper on the economics literature relevant to the project is due at the beginning of the Winter Study period. For an internship, a final 10 page paper summarizing the findings of the internship and relating them explicitly to the issues discussed in the proposal is required at the end of the Winter Study period. Proposals for 99s other than internships must set out a clear schedule of work and means of evaluation. Unless compelling considerations argue otherwise, you should expect to include a paper as part of your work.
Prerequisites:  ECON 110 or ECON 120, plus one economics course relevant to the project.
Enrollment Limit:  NA
Enrollment Preferences:  NA
Expected Class Size:  NA
Grading:  pass/fail only
Not offered current academic year
The study of English allows students to explore the critical role language and literature play in the shaping of human culture and social experience. Department courses cover a variety of national, regional, and diasporic literary traditions; acquaint students with a range of genres and cultural practices, including poetry, prose, drama, film, and mixed or emerging media; and employ a range of critical and methodological approaches. All foster skills of critical analysis, interpretation, and written argument and expression. By cultivating a sophisticated awareness of linguistic and literary representation, and by encouraging the ability to read critically and write persuasively, the English major provides students with intellectual and analytical skills that they can draw upon to follow a wide range of paths.

COURSES AND COURSE-NUMBERING

100-level Courses
At the introductory level, the department offers a range of writing-intensive 100-level courses which focus on interpretive skills as well as skills in writing and argumentation. All 100-level courses are designed primarily for first-year students, although they are open to interested sophomores, juniors, and seniors. A 100-level course is required for admission to most upper-level English courses, except in the case of students who have placed out of the introductory courses by receiving a score of 5 on the Advanced Placement examination in English Literature or of 6 or 7 on the Higher Level International Baccalaureate English exam.

200-level Courses
Most 200-level courses are designed primarily for qualified first-year students, sophomores, and junior and senior non-majors, but they are open to
junior and senior majors and count as major courses. Several 200-level courses have no prerequisites; see individual descriptions for details. 200-level Gateway courses are designed for first- and second-year students who are considering becoming English majors, or who are interested in pursuing upper-level course work in the department. All Gateway courses are writing-intensive. First-year students who have placed out of the 100-level courses are encouraged to take a Gateway course as their introduction to the department.

300-level Courses

The majority of English Department courses are designed primarily for students who have some experience with textual analysis, and are open to sophomores, juniors, and seniors. First-year students who wish to enroll in a 300-level course are advised to consult the instructor.

400-level Courses

400-level courses are intensive, discussion-oriented classes. Limited to 15 students, 400-level courses should be attractive to any student interested in a course that emphasizes student initiated independent work. Majors considering Honors work and who wish to prepare for it are urged to take a 400-level course before senior year.

ADVISING

All students who wish to discuss English Department offerings are invited to see any faculty member or the department chair. Prospective majors are particularly encouraged to discuss their interest with faculty as early as possible. In the spring of the sophomore year, newly declared majors must meet with a faculty member to discuss the Major Plan. Declared majors will be assigned a permanent advisor shortly after they declare the major.

MAJOR

Major Plan. Shortly after declaring the major, all English majors must complete a short written plan for how they intend to complete the major. In this plan, students should consider how they can most fruitfully explore the broad range of genres, historical periods, and national and cultural traditions that literature in English encompasses, and how they wish to focus upon a particular intellectual interest within English. Students are encouraged to begin discussing the Major Plan with a faculty member as soon as they become interested in the major; junior majors must meet with faculty advisors to revisit Major Plans as they register for courses. There will also be informational meetings and web resources available to assist new majors in developing the Major Plan.

Students majoring in English must take at least nine courses, including the following:

Any 100-level English class. Students exempted by the department from 100-level courses will substitute an elective course.

At least one 200-level Gateway course (grouped at the end of the 200-level course descriptions). Gateway courses are designed for first- and second-year students contemplating the major or intending to pursue more advanced work in the department; these courses focus on analytical writing skills while introducing students to critical methods and historical approaches that will prove fruitful as they pursue the major. (Note: a Gateway course can fulfill a Literary Histories or Criticism requirement as well as the Gateway requirement.)

At least one Criticism course (identified in parentheses at the end of the course description). A course fulfilling the criticism requirement entails a sustained and explicit reflection on problems of critical method, whether by engaging a range of critical approaches and their implications or by exploring a particular method, theorist, or critic in depth. (Please note that when a Criticism course is also listed as satisfying the Literary Histories requirement, the course may be used to satisfy either requirement, but not both.)

At least three courses at the 300-level or above.

At least three courses designated as Literary Histories. Literary Histories courses concern the emergence or development of a specific literary tradition or problem and/or its transformation across multiple historical periods. Literary Histories are identified by LH-A, LH-B, or LH-C in parentheses at the end of the course description.

LH-A: courses dealing primarily with literature written before 1800.
LH-B: courses dealing primarily with literature written before 1900 but not included in LH-A (courses on literature from 1800-1900 and some surveys).
LH-C: courses dealing primarily with literature written after 1900.

Of the three Literary Histories courses required for the major, at least two must focus on literature before 1900 (LH-A or LH-B), with at least one of these focusing primarily on literature before 1800 (LH-A).

For further clarification, please see the English Department website at english.williams.edu.

Courses Outside the Department

The department will give one elective course credit toward the major for a course taken in literature of a foreign language, whether the course is taught in the original language or in translation. Such a course may not be used to satisfy the department’s Literary Histories, Criticism, or Gateway requirements.
STUDY AWAY

Majors who plan to study abroad should be proactive in understanding how this will affect their plans for completing major requirements. Such plans should be discussed in advance with the student’s advisor as well as the department’s academic assistant. Approval of departmental credit for courses taken off-campus must be obtained in advance from the department chair.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments. In most cases we require syllabus, readings, and assignments. The one exception is the Oxford Program. We need only the title and description for that particular program.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes, for most programs we allow only two electives towards the major. Again, the exception is the Oxford Program where we allow four.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes, students cannot receive credit for the Gateway requirement. It is difficult to receive credit for our criticism requirement as well.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. Students must be aware that if they do not take a Gateway before their study away they will have to do it when they come back. Likewise for our criticism requirement.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

This happens most often when the student does don’t come to see the Chair before they leave or if they change their plans once they are away at their program.

THE DEGREE WITH HONORS IN ENGLISH

The English Department offers three routes toward honors: a creative writing thesis, a critical thesis, and a critical specialization. Candidates for the program should have at least a 3.5 average in courses taken in English, but admission will not depend solely on course grades. Formal application to pursue honors must be made to the director of honors (Ricardo Wilson) by April of the junior year.

All routes require students to take a minimum of ten regular-semester courses (rather than the nine otherwise required for the major). Students doing a creative writing thesis must, by graduation, take at least nine regular semester courses, and, in addition, take English 497 (Honors Thesis) and English W31 (Senior Thesis, winter study) during senior year. Students writing a critical thesis must, by graduation, take at least eight regular-semester courses, and, in addition, take English 493 and English 494 (fall Honors Colloquium and spring Honors Thesis) and English W31 (Senior Thesis, winter study) during senior year. Students pursuing a critical specialization must, by graduation, take at least eight regular-semester courses, and in addition, take English 493 and English 494 (fall Honors Colloquium and spring Honors Thesis) and English W30 (Senior Thesis: Specialization Route, winter study) during senior year.

Creative Writing Thesis

The creative writing thesis is a significant body of (usually) fiction or poetry completed during the fall semester and winter study of the senior year, and usually including revised writing done in earlier semesters. (With permission of the honors committee, the thesis may be undertaken during the winter study period and the spring semester of the senior year.) Requirements for admission include outstanding work in an introductory and an advanced workshop (or, in exceptional cases, not including poetry or fiction, a substantial body of work in place of an advanced workshop), a recommendation from one of the creative writing teachers (who will then act as thesis advisor), and the approval of the departmental honors committee. A creative thesis begun in the fall is due on the last day of winter study; one begun in winter study is due the third Monday after spring break. The methods of evaluation are identical to those for critical projects (but their page limits do not apply).

Critical Thesis
The critical thesis is a substantial critical essay written during both semesters as well as the winter study period of the senior year. It must consider critical and/or theoretical as well as literary texts. The thesis is normally about 15,000 words (45 pages); in no case should it be longer than 25,000 words (75 pages). The proposal, a 3-page description of the thesis project, should indicate the subject to be investigated and the arguments to be considered, along with a bibliography. The finished thesis is due on the third Monday following spring break. After the critical thesis has been completed, students publicly presents their work.

Critical Specialization

The critical specialization route is a series of forays into a broad area of interest related to work undertaken in at least two courses. At least one of these courses must be in the English Department, and both need to have been taken by the end of fall term in senior year. The specialization route entails: (1) a set of three 10-page essays which together advance a flexibly related set of arguments; (2) an annotated bibliography (5 pages) of secondary sources, explaining their importance to the area of specialization; (3) a meeting with the three faculty evaluators (one of whom is the advisor) during the last two weeks in February to discuss the trio of essays and the annotated bibliography; (4) a fourth essay of 12 pages, considering matters that arose during the faculty-student meeting and reflecting on the outcome of the specialization. The 3-page proposal for the specialization should specify the area and range of the study, the issues likely to be explored, and the methods to be used for their investigation. It should also describe the relationship between previous coursework and the specialization, and include a brief bibliography of secondary works. The first two papers are due by the end of fall semester; the third paper is due at the end of winter study; the bibliography is due mid-February; and the final paper is due the third Monday after spring break.

Applying to the Honors Program

All students who wish to apply to the honors program are required to consult with a prospective faculty advisor and the director of honors before April of the junior year. Prior to pre-registration in April, candidates for critical theses and specializations submit a 3-page proposal that includes an account of the proposed project and a bibliography. Students applying to creative writing honors submit a brief proposal describing the project they wish to pursue. Decisions regarding admission to the honors program will be made by the end of May. Admission to the honors program depends on the department’s assessment of the qualifications of the student, the feasibility of the project, and the availability of an appropriate advisor.

When pre-registering for Fall classes of their senior year, students who are applying to critical honors should register for the Honors Colloquium as one of their four courses.

Progress and Evaluation of Honors

While grades for the fall and winter study terms are deferred until both the honors project and review processes are completed, students must do satisfactory work to continue in the program. Should the student’s work in the fall semester not meet this standard, the course will convert to a standard independent study (English 397), and the student will register for a regular winter study project. A student engaged in a year-long project must likewise perform satisfactorily in winter study (English W30 or W31) to enroll in English 494 in the spring semester. When such is not the case, the winter study course will be converted to an independent study “99.”

Students are required to submit one electronic copy to the department academic assistant at pmalanga@williams.edu. Students should also give a final hard copy to their thesis advisor. Both the electronic copy and the hard copy are due on the dates applicable to the type of project pursued (see the above descriptions of each type of project for the due dates). All honors projects are evaluated by the advisor and two other faculty members. The colloquium director, in consultation with the advisor, gives the first semester grade, and the advisor determines the student’s second semester grade in honors, while the two external readers recommend to the department that the project receive Highest Honors, Honors, or no Honors. Honors of any kind are contingent upon satisfactory completion of courses in the major during the senior year. Highest Honors are normally awarded only to students whose performance in both the honors program and regular courses in the major has been exceptional.

ENGL 102 (W) Representing US Childhoods

Childhood as it is understood today in the US is a relatively recent invention. In this course we will read works of literature, history, and cultural studies, as well as consider such mediums as art, films, podcasts and music, and analyze material culture (objects such as toys and clothing) associated with childhood and children in the U.S. Along the way, we will consider questions such as how childhood has emerged as a distinct stage of life; how definitions of childhood vary (or not) across differences such as race, gender, class; what places and spaces define childhood; how writers and artists contribute to constructing particular visions of childhood and what the resonances of these representations are; and what it means to “grow up.” An emphasis will be placed on learning to analyze closely a variety of texts and objects.

Requirements/Evaluation: There will be at least three short (2-5 page) writing assignments; a revision of at least one of those papers; and a short final reflection essay. As an intensive winter study, this class will require approximately 12-15 hours of in-person class time a week, as well as time outside of class on reading and writing assignments.
**ENGL 103 (W) The Art of the Undergraduate Essay  (WS)**

Writing papers for college courses feels different -- and, for most people, more challenging -- than writing papers in high school. No longer can you get away with papers written according to the old formula,”tell-'em-what-you're-going-to-tell-'em, tell 'em, tell-em-what-you-told-'em” formula. Professors now assume that you will design complex arguments supported by subtle evidence and in-depth analysis. In this course, we will study and practice the art of the college essay. We will work in three disciplines or fields: literature, interdisciplinary social studies, and visual art/film. At the end of this intensive course, you will feel comfortable answering the prompts and assignments in a wide range of courses. Readings will be relatively short; assignments will be frequent; drafts and revisions will be built into the curriculum.

**Class Format:** During the visual art unit, we may visit local museums. Drop-in office hours will be available several afternoons every week.

**Requirements/Evaluation:** attendance and active classroom participation (including occasional field trips); daily writing exercises and several short papers; regular one-on-one meetings with professor for writing critiques.

**Prerequisites:** permission of a dean

---

**ENGL 104 (F) Borders, Migration, and the Literatures of Displacement  (DPE) (WS)**

In this course we will read literature that is about migration experiences, border-crossings, and various forms of colonial displacement. Our aim in reading such literature will be not merely to study the problem of borders, displacement, and forced migration from a top-down perspective (like that of the analyst who, for the best of reasons, seeks to understand an issue in order to resolve it); but to shift our own perspective away from a position that assumes that the problem is not truly ours in the first place to deal with. While the contemporary issue of global migration and its particular manifestations in and around the site of the U.S.-Mexico border will be a central component of this course, our readings will not be limited to texts that deal exclusively with the historical present or the U.S.-Mexico border alone. As such, readings will likely include work by figures such as: Américo Paredes, Gloria Anzaldúa, Jason De León, Carmen Boulosa, Héctor Tobar, Javier Zamora, Tayeb Salih, Karen Tei Yamashita, Amara Lakhous, and others.

**Requirements/Evaluation:** at least 20 pages of writing, regular homework assignments, class participation

**Prerequisites:** none

---

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: The instructor will provide written feedback on student work. Students will receive timely feedback on essay assignments with suggestions for improvement and will revise their essays.

Difference, Power, and Equity Notes: This course offers students the opportunity to think critically about the experiences of socially marginalized groups throughout the globe with a particular emphasis on the Latin American diaspora in the U.S. It emphasizes forms and experiences of displacement produced by the histories of European colonialism and U.S. imperialism.

Attributes: LATS Countries of Origin + Transnationalism Elect

Not offered current academic year

ENGL 105 (F) American Girlhoods (DPE) (WS)

Cross-listings: WGSS 105

Primary Cross-listing

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

Requirements/Evaluation: at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 105(D2) ENGL 105(D1)

Writing Skills Notes: Students do at least 20 pages of writing (4-5 papers) and are required to revise several papers. We also devote significant class time to talking about successful academic writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equality and power and what kinds of literary and cultural forms writers utilize to illuminate these differences.

Fall 2024

SEM Section: 01 TF 2:35 pm - 3:50 pm Kathryn R. Kent

ENGL 107 (F) Temptation (WS)

Cross-listings: COMP 106

Primary Cross-listing

We want most those things we can't--or shouldn't--have. Or, to put it another way, it is when limitations are placed on our actions by law, religion, or the facts of our own biology that we experience desire most acutely. In this course, we will examine fictional narratives, lyric poems, and philosophical meditations in which people are tempted to act against their better judgement. Free will, ambition, temperance, suspense, despair, and repression will be our conceptual preoccupations. We will get to know such writers and artists as Homer, Euripides, Ovid, Augustine, Shakespeare, Donne, Milton, Laclos, Mozart, Freud, Frost, and Scorsese.

Requirements/Evaluation: Four five-page papers, in-class presentation, thoughtful participation in discussions

Prerequisites: None
Enrollment Limit: 19

Enrollment Preferences: First-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 107(D1) COMP 106(D1)

Writing Skills Notes: Students will write four five-page papers, each of which will receive timely and extensive written feedback from the instructor. Students will be invited to discuss their papers with the instructor at the draft stage.

Fall 2024
SEM Section: 01 TR 9:55 am - 11:10 am Emily Vasiliauskas
SEM Section: 02 TR 11:20 am - 12:35 pm Emily Vasiliauskas

ENGL 108 (F)(S) Idleness & Insubordination: Literatures Against Work (WS)
Under the regime of idleness, to kill the time, which kills us second by second, there will be shows and theatrical performances always and always. --Paul Lafargue, "The Right to Be Lazy" What right do we have to stay in bed? To laze about in the heat of the day? What is the relationship between loafing and literary production? Departing from the ancient paradigm of otium (idleness, leisure, retirement) and negotium (work, service, activity), this course tracks the diversions and detours by which artists and writers have insisted on not keeping busy. We'll consider the possibilities and limits of idleness in the space of the household and on Wall Street; we'll read about people who literally wander and those who stay in place and say, "I prefer not to." Encountering Virgil's world-weary shepherd-songs, Shakespeare's colonial imaginary, and contemporary meditations on pastoral retreat, we'll ask after the difference between idleness as rest and idleness as protest. What poetic, narrative, and visual forms constitute an "idle aesthetic"? Alongside literature and a few films, we'll dip into a selection of theoretical essays that think about how repeated refusals to work can cultivate new subjectivities under capitalism. What forms of creativity and community are developed when we withhold our labors? How do such forms resist and remake the world? Our inquiry will likely include works by Nanni Balestrieri, Zora Neale Hurston, June Jordan, Clarice Lispector, Herman Melville, Andrew Marvell, Arthur Robins, Ousmane Sembène, Agnès Varda, among others.

Requirements/Evaluation: 4-5 papers, with revisions; a creative assignment. Regular discussion posts, self-reflections, and annotation/journal-entries. Two conferences with instructor.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will produce at least 20 pages of polished writing across the semester. We'll devote class time regularly to discussing successful writing and revisions skills. Students will receive timely feedback on their assignments. As regular writing is part of an engaged reading practice, students will also be asked to do frequent short informal exercises (in class and out).

Fall 2024
SEM Section: 01 TR 8:30 am - 9:45 am Kathryn Crim
Spring 2025
SEM Section: 01 TR 8:30 am - 9:45 am Kathryn Crim

ENGL 109 (S) Narrating Change (DPE) (WS)
How do we narrate change? Change is radical (from radix, "root," thus pertaining to what is essential) when it alters how we experience, think, and act. If we change radically, and the structure of our experience is altered, how are we then to connect what comes before to what comes after? On the other hand, if change does not cause such a transformation in the self, then how is it experienced? The works we will consider in this class will help us...
examine the ways human beings work through, think about, and represent change. The event of colonization will be our chief example and we will examine it through novels, critical theoretical works, and films that focus on Africa, South Asia and North America. Expect to encounter works by Chinua Achebe, Nadine Gordimer, Satyajit Ray, Saadat Hasan Manto, W.E.B. Du Bois and others.

Requirements/Evaluation: Four writing assignments, participation in classroom discussions and roundtables, and at least two individual conferences.

Prerequisites: no prerequisites

Enrollment Limit: 19

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will write more than 20 pages. They will receive extensive feedback on their writing from me and will revise and expand one essay. Texts read in class will also be examined as models for how to organize thought through writing.

Difference, Power, and Equity Notes: Almost all readings for this class require sustained engagement with questions of power, identity, and socioeconomic inequality.

Not offered current academic year

ENGL 112 (F) Introduction to Literary Criticism (WS)

What determines meaning? How we interpret is inevitably inflected by our own priorities and preoccupations, by the contexts in which we read, by literary and other conventions, and by the historical and personal circumstances of a work’s composition, as well as deriving from the particular words of a text and from the mutable life of language itself. So how to go about the task of reading literature well? This course will focus on key introductory methods and critical approaches, and is intended to develop your skills in reading, writing about, discussing and interpreting literary texts. Our initial readings—mainly short fiction and poetry, along with selected introductory work in critical theory—will invite increased self-consciousness about literary form, the functions of criticism, and the process of reading and interpretation. In the last weeks of the course, we will address longer texts, including at least one play, one novel and one film.

Requirements/Evaluation: Four papers rising from 3-6 pages, regular Glow posts, and contribution to class discussions.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: First-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Four papers, rising from 3 pages for the first, to 6 pages for the last. Regular postings on Glow. Extensive written feedback on longer papers, plus the option of revision.

Fall 2024

SEM Section: 01 MR 1:10 pm - 2:25 pm James L. Pethica

ENGL 113 (F) The Feminist Poetry Movement (DPE) (WS)

Cross-listings: AMST 113 / WGSS 113

Primary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major “tool” for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At
the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: two-three short analysis papers, creative (1-2 pages), curated final project (archival exhibit and digital project), presentations

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first years

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 113(D2) ENGL 113(D1) WGSS 113(D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: two to three four-to-five-page graded papers, one creative assignment, and a final digital research project (8-10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

Fall 2024

SEM Section: 01 TF 2:35 pm - 3:50 pm Bethany Hicok

ENGL 114 (F) Literary Speakers (WS)

The general purpose of this course is to develop students' skills as interpreters of poetry and short fiction. Its particular focus is on how--and with what effects--poets create the voices of their poems, and fiction writers create their narrators. We'll consider the ways in which literary speakers inform and entice, persuade and sometimes deceive, their audiences. Readings will include texts from various historical periods, with particular emphasis on twentieth-century writers (including works by James Joyce, Henry James, Vladimir Nabokov, Robert Frost, Toni Cade Bambara, Raymond Carver, and Seamus Heaney).

Requirements/Evaluation: 4 or 5 papers, of varying lengths, spaced throughout the term (about 15-20 pages total); detailed feedback will be provided on each paper, along with opportunities for revision. There will be no examinations in this course.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: first-year students and then sophomores who have not yet taken a 100-level course in English

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: There will be 4-5 papers assigned, spaced evenly throughout the term, ranging in length from 1-2 pages to about 5 pages. Detailed feedback will be provided on each paper. There will be opportunities for revisions, and for conferences before and after each paper. At least two classes during the term will be specifically devoted to issues related to paper writing.
ENGL 116 (F) The Remix: Adaptation and Revelation (WS)

This course explores the ideas of remaking and adaptation. We examine twentieth and twenty-first-century fiction, poetry, film, and hybrid texts that interact with subject matter stretching from Greek mythology to New World castaway stories to global pandemics. What is the nature of the work they attempt? What is lost and gained in these re-visions? In response to these questions, emphasis is placed on critical reading and writing (and rewriting), as well as on research skills. Works considered throughout the term come from, among others, Jorge Luis Borges, Anne Carson, J.M. Coetzee, Alfonso Cuarón, and Natasha Trethewey.

Requirements/Evaluation: at least 20 pages of writing; GLOW posts; class participation

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will do at least 20 pages of writing (4 papers) and will be required to significantly revise one paper. Students will also provide two detailed editorial responses to the work of another student. Significant class time will be spent covering strategies for effective and persuasive academic writing. Throughout the semester, students will receive written feedback from the instructor with specific suggestions for revision and improvement.

Not offered current academic year

ENGL 117 (F) Introduction to Cultural Theory (WS)

Cross-listings: COMP 117

Primary Cross-listing

This course has a clear purpose. If you had signed up for a course in biology, you would know that you were about to embark on the systematic study of living organisms. If you were registered for a course on the American Civil War, you would know that there had been an armed conflict between the northern and southern states in the 1860s. But if you decide you want to study "culture," what exactly is it that you are studying? The aim of this course is not to come up with handy and reassuring definitions for this word, but to show you why it is so hard to come up with such definitions. People fight about what the word "culture" means, and our main business will be to get an overview of that conceptual brawl. We will pay special attention to the conflict between those thinkers who see culture as a realm of freedom or equality or independence or critical thought and those thinkers who see culture as a special form of bondage, a prison without walls. The course will be organized around short theoretical readings by authors ranging from Matthew Arnold to Laura Mulvey, but we will also, in order to put our new ideas to the test, watch several films (mostly of the class's choosing) and listen to a lot of rock and roll. Why do you think culture matters? Once you stop to pose that question, there's no turning back.

Class Format: discussion

Requirements/Evaluation: four formal writing assignments totaling 20 pages (three full essays + one lead-in assignment), informal writing twice weekly, class attendance and participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 117(D1) ENGL 117(D1)

Writing Skills Notes: Students will write three five- to seven-page papers, on which I will provide extensive feedback. Before writing their first papers, students will submit theses and introductions, which I will help them refine. We will hold three extra writing sessions, to discuss how best to organize arguments. Students will write informally before every class.
ENGL 118  (F)  Creative Non-fiction  (WS)
In this course we will read some of the most prominent practitioners of creative non-fiction--writers like John McPhee, Joan Didion, Malcolm Gladwell, Susan Orlean, Janet Malcolm, Joshua Foer, Zadie Smith and Oliver Sacks. Students will also write in a variety of non-fiction modes--explainers, profiles, essays, memoirs. We will probe the border between invention and fact and consider the ways that narratives are constructed.

Class Format: workshop

Requirements/Evaluation: four short exercises of three pages or less; three longer assignments of five pages; and a final assignment, which is a revision and expansion of an earlier essay

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Four short exercises of three pages or less; three longer assignments of five pages; and a final assignment, which is a revision and expansion of an earlier essay. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Not offered current academic year

ENGL 120  (F)(S)  The Nature of Narrative  (WS)

Cross-listings: COMP 111

Secondary Cross-listing

Narrative--storytelling--is a fundamental human activity. Narratives provide us with maps of how the world does or should or might work, and we make sense of our own experiences through the narratives we construct ourselves. This course examines the nature and functions of narrative using texts from a wide range of literary traditions, media, and genres. Readings may span classics (e.g. Homeric epic, The Tale of Genji, and/or the Popol Vuh), fiction ranging from nineteenth-century realism to postmodern experimentation (possibly including Kafka, Tolstoy, Toni Morrison, and/or Emile Habibi), and visual literature from film and drama to graphic memoir (possibly including Mizoguchi Kenji, Art Spiegelman, Alison Bechdel, and/or Joe Sacco). We may also read some short works of literary theory from around the world to help us broaden our idea of what literature can be and do. All readings in English.

Class Format: The second half of the course may incorporate a modified tutorial format, where small groups meet with the instructor once a week, with students' papers and responses forming the basis of the discussion.

Requirements/Evaluation: Regular attendance and participation in class; short and mid-length writing assignments spaced throughout the semester; revision of selected assignments after receiving instructor feedback.

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Comparative Literature majors, students considering a major in Comparative Literature, first-years, sophomores.

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 111(D1) ENGL 120(D1)

Writing Skills Notes: Multiple writing assignments that build upon each other, including drafts and revisions, with substantial individualized feedback.
ENGL 123 (S) The Short Story (WS)
The reading for this course will consist entirely of short stories by such writers as Poe, Hawthorne, James, Doyle, Hemingway, Faulkner, Gilman, Chopin, Cather, Toomer, McCullers, O'Connor, Borges, Nabokov, Kincaid, Saunders, Diaz, and Shepard. We will read one or two per class meeting; at the end of the course, we'll be reading one collection, by Raymond Carver. Reading short stories will allow us to pay close attention to the form of our texts, and to paragraphs, sentences, and words. The premise of the essays you will write is that short stories and short essays are both arts based on controlling the release of information and meaning, and that studying the two genres together will have reciprocal benefits for reading and writing.

Class Format: class meetings will be devoted almost entirely to discussion

Requirements/Evaluation: grades will be based on the five formal writing assignments, with rewards for improvement, plus class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken a 100-level English course; then sophomores who have not taken a 100-level English course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: There will be five formal writing assignments, totaling about twenty pages. My response to each paper will include extensive marginal comments on technical issues, and a typed page of comments on the ideas and structure of the paper as a whole. Final grades will be determined by both the student's intellectual engagement and his or her increasing mastery of the art of writing essays.

Spring 2025

SEM Section: 01 TR 9:55 am - 11:10 am John K. Limon

ENGL 130 Writing for the Humanities (WS)
Compelling academic prose is a rare beast. In this course we will investigate what makes for good academic writing and how we can produce it ourselves. We will begin with words, then progress to sentences, paragraphs, and essays. Our reading will be close, our writing closer. Topics include the following: Are adverbs incredibly important? When is less more, and when isn’t it? Is your garden English, or is it Chinese? What is the "uneven U" and why does it work? How does your audience affect how you write? In addition to reading writing about writing by Orwell, Fish, Tufte, Hayot, and (inevitably) Strunk and White, we will look closely at academic prose out in the wild, both good and bad. This course is for anyone who is interested in exploring in more depth the craft of writing, whether you have always considered yourself a "good writer" or struggle to fill a single page (or both). Our focus will be on academic writing for the humanities, but the skills we will develop are relevant to many other contexts as well.

Requirements/Evaluation: Regular attendance and active participation in class; writing assignments ranging in length from sentences to essays of varying length (500 words to 5-7 pages).

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: First- and second-year students

Expected Class Size: 12

Grading:
ENGL 131 (F) All About Sonnets (WS)

Fourteen lines in a fixed pattern. When Sir Thomas Wyatt introduced the sonnet to England in the 1500s with his translations of Petrarch, the form quickly became entrenched in English, and has been in regular use ever since. Originally penned as expressions of idealized love, sonnets soon expanded to address other kinds of emotionally intense relationships—God, Nature, art, a particular place, the State, oppressors—while still, obsessively, returning to love in all its myriad forms. This makes the sonnet, deeply personal though it is, also a kind of pocket-sized literary tradition, as each new generation of poets extends, disrupts, and comments upon the whole history of sonnets. "A sonnet is a moment's monument," wrote D.G. Rossetti (in, of course, a sonnet)—speaking of the sonnet's tendency to offer just a snapshot of the poet's mental and emotional state—but the tradition of producing numbered sequences of sonnets can also string those moments into a kind of narrative. Similarly, while the sonnet is founded in strong feeling, it is also obsessed with logic, delighting in logical argumentation, contradictions and paradoxes. This course will focus on a broad range of sonnets, historically, geographically and thematically, as well as criticism and theory relating to sonnets. Studying sonnets that are variously inspiring, devastating, and lol funny, we will become Sonnet Experts, while developing broadly useful skills in careful reading, concise writing and sound argumentation. Poets will include Shakespeare, Wordsworth, Keats, Elizabeth Barret Browning, DG and Christina Rossetti, Claude McKay, Edna St. Vincent Millay, John Berryman, Seamus Heaney, Vikram Seth, and many, many more. No prior experience with poetry is presumed.

Class Format: first week in regular class meetings, followed by weekly tutorial meetings in pairs

Requirements/Evaluation: five tutorial essays 3-5 pages; five responses to partners tutorial essays; 10 sonnet paraphrases and/or "prose sonnets;"
thoughtful participation in tutorial meetings

Enrollment Limit: 10
Enrollment Preferences: first-year students
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Bi-weekly short analytic papers (1000 words) which will be critiqued in tutorial meetings and revised as needed. Bi-weekly critique of partner's paper. Regular sonnet paraphrases and or "prose sonnets" that will be critiqued for linguistic precision and succinctness.

Not offered current academic year

ENGL 138 (S) What is a Self? Investigations in Literature, Philosophy, and Psychology (WS)

The experience of having a self (or a subjective point of view) informs and colors literally everything we think, see, and feel. And yet what is a self? Is it the unchanging essence of who we are as individuals? Or is it the historically contingent product of ever-changing cultural and political forces (like the media, gender norms, and ideologies about race, to name just a few)? Or, perhaps, is the belief that we have a self just one big illusion, as the Buddha suggested millennia ago and as modern philosophers and scientists have argued in their own different ways more recently? In this class, we'll explore the deep mystery of human existence that we call "the self" or "subjectivity," looking at various attempts to capture, represent, and explain it (even escape it!). Our investigations will be wide-ranging, looking at examples from literature, philosophy, religion, and psychology. Works we'll study include: Tim O'Brien's The Things They Carried, Toni Morrison's Beloved, and theoretical writings on the self by Plato, Thoreau, and Jean-Paul Sartre among others. We'll even try our hand at meditation, while learning about the Buddhist idea of "no self." Students who genuinely find the experience of the self puzzling and fascinating will get the most out of this class. Bring an open mind about what it is to have a mind in the first place.

Requirements/Evaluation: four essays totaling 18-20 pages; active class participation; participation in other short informal writing assignments.

Prerequisites: none

Enrollment Limit: 19
Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: The course will center on explicit, in-depth discussion of writing. We will read and discuss both writing on writing, and examples of prose. Students will complete weekly writing assignments of varying lengths and degrees of formality on which they will receive feedback from the instructor with particular attention to the craft of writing; some assignments will also be shared with the rest of the class.

Not offered current academic year
ENGL 150  (F)(S)  Expository Writing  (WS)

Writing clearly is the most important skill you can learn in college. Do you suffer from writer's block? Do you receive consistent criticism of your writing without also learning strategies for how to improve? This course is for students who want to learn how to write a well-argued, intelligible essay that offers a complex interpretive argument based on close, critical analysis of texts. We will derive our method for mastering the complex art of writing from Atul Gawande's bestselling book, *The Checklist Manifesto*. In addition to sharpening your skills in reading, note-taking and literary analysis, this class will give you tools for generating drafts, peer editing, revising, and polishing your writing. The readings for this course will be literary works, scholarly essays and nonfiction -- mostly contemporary, and mostly American.

**Requirements/Evaluation:** Requirements include active class participation (including peer-editing), drafts and revisions of four to five papers totaling at least 20 pages. Overall evaluation will include improvement and effort.

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** first-year students, especially students with demonstrated need for help with analytical writing

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1)  (WS)

**Writing Skills Notes:** This course is devoted to the study of writing, focusing especially on expository essays. Four to five papers are assigned, totaling at least 20 pages. Special attention will be paid to drafts, revision and building peer editing skills. Regular, one-on-one meetings with professor will be encouraged.

---

ENGL 151  (F)  Lying About the Truth: Writing about Autobiographical Writing  (WS)

The goal of this course is to teach you how to write a clear, well-argued, intelligible and interesting analytical paper. We will spend most of our class time actively engaged in a variety of techniques to improve your critical reasoning and analytical skills, both written and oral. Though the skills you learn will be applicable to other disciplines, and a central purpose of the course is to improve all aspects of your writing, this is a literature class, designed partly to prepare you for upper level courses in the English Department, so we will, therefore, spend equal time on the interpretation of literature, in this case, contemporary American autobiographical fiction. All readers fall prey to it: the autobiographical fallacy--the conflation of author and narrator. Writers know readers are susceptible to it. A course designed to explore the uses and abuses of the autobiographical fallacy by contemporary American authors. How do writers of autobiographical fiction take advantage of this tendency? What role does the autobiographical play in a writer's authority? What's the relationship between reader and writer in autobiographical writing? What do writers of such fiction want from a reader, and how does encouraging the autobiographical fallacy get them what they want? Reading list may include: Tim O'Brien, Yiyun Li, Junot Diaz, ZZ Packer, Lorrie Moore, Amy Hempel, Nam Le, Dorothy Allison, Ocean Vuong.

**Requirements/Evaluation:** Several short essays, most with drafts and revisions, one student-led class discussion, written comments on published and student work, active participation in discussions.

**Prerequisites:** None

**Enrollment Limit:** 12

**Enrollment Preferences:** Preference to First Year students who do not have a 5 on the AP Lit exam or a 6 or 7 on the IB and have not previously
ENGL 153 (S) Androids, Cyborgs, Selves (WS)

Cross-listings: STS 153

Primary Cross-listing

In this expository writing course, we will analyze and argue about how humanoid and partly human bodies appear in legend, fiction, and film. When are these bodies inviting? When are they threatening? How are they gendered, how are they raced, and why? Which technologies fit easily into human forms, and which are resistant? What do the persons who inhabit these near-human bodies desire? Students in this course will develop arguments in reply to these and related questions, developing 3 or 4 essays through multiple stages of planning, drafting, and revising. Because this is an expository writing seminar, we will spend half or more of our class time discussing and practicing writing skills.

Requirements/Evaluation: several response papers (500 words); three or four essays (1200-1500 words, in multiple drafts); class participation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: See details for ENGL 100-level courses on English Department Website.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 153(D2) ENGL 153(D1)

Writing Skills Notes: This expository writing course is dedicated to facilitating real improvement in students' written argumentative work. Students will write and revise response papers and 5-page essays (in multiple drafts) over the course of the semester, receiving substantial instructor feedback. Students will practice: drafting, revising, and responding to critique; writing appropriately for given occasions and audiences; grounding their writing in close, analytical reading; and acknowledging sources.

Spring 2025

SEM Section: 01 TR 8:30 am - 9:45 am Ezra D. Feldman

ENGL 156 (F) New American Fiction (WS)

The goal of this course is to teach you how to write a clear, well-argued, and interesting analytical paper. We will spend most of our class time actively engaged in a variety of techniques to improve your critical reasoning and analytical skills, both written and oral. Though the skills you learn will be applicable to other disciplines, and a central purpose of the course is to improve all aspects of your writing, this is a literature class, designed partly to prepare you for upper level courses in the English Department, so we will, therefore, spend equal time on the interpretation of literature, in this case, contemporary American fiction, examining the very, very recent (last thirty years) developments in American fiction. We will read short stories and novels by writers such as Danielle Evans, George Saunders, Kali Fajardo-Anstine, Mary Robison, Karen Russell, ZZ Packer, Ocean Vuong, Yiyun Li, among others.

Requirements/Evaluation: Active participation, written and verbal comments on published and peer work, five essays (2-7 pages each, most in multiple drafts, including a final radical revision of an essay of the student's choice).

Prerequisites: None

Enrollment Limit: 12
Enrollment Preferences:  First-Year students
Expected Class Size:  12
Grading:  yes pass/fail option,  no fifth course option
Distributions:  (D1)  (WS)

Writing Skills Notes: Five essays ranging from 2-7 pages each, most in multiple drafts. Students will receive extensive written comments on their writing skills, with suggestions for improvement, and may choose to meet with the professor individually outside of class as often as they'd like. Students will also comment (verbal and written) on published work and their peers’ drafts, operating under the assumption that becoming a better writer involves becoming a better reader.

Fall 2024
SEM Section: 01    MR 1:10 pm - 2:25 pm    Karen L. Shepard

ENGL 158  (F)  Expository Writing: Contemporary Linked Stories  (WS)
In this expository writing and writing intensive course, we will read and write about several collections of linked short stories about altered states of mind and body, immigrant experiences, and the magic of everyday life. We will examine linked stories as a form organizing narratives that can stand alone, but that resonate powerfully with one another, sharing themes, settings, and sometimes even characters. Texts may include Denis Johnson's Jesus' Son, Bryan Washington's Lot, Carmen Maria Machado's Her Body and Other Parties, and Alice Munro's Juliet stories. Class time will be split nearly equally between analysis of the assigned texts and active work with student writing, including freewriting, rewriting, sentence and paragraph workshops, peer editing, and writing strategy sessions.

Requirements/Evaluation:  4 or 5 two-page assignments, two with required revisions; 4 five-page papers, all with required revisions; discussion participation; attendance.
Prerequisites:  none
Enrollment Limit:  12
Enrollment Preferences:  First preference goes to first-year students who have not received a 5 on AP LITERATURE or a 6 or 7 on the IB. Additional rules via English Department Website.
Expected Class Size:  12
Grading:  yes pass/fail option,  no fifth course option
Distributions:  (D1)  (WS)

Writing Skills Notes: This course is dedicated to the teaching of college-level expository writing. Students will complete several assignment sequences that build from 2-page response papers to 5-page argumentative essays and that include required revisions at multiple stages. About half the class time will be spent discussing and practicing writing strategies and mechanics.
Attributes:  ENGL Literary Histories C
Not offered current academic year

ENGL 159  (F)  Other People's Lives: Contemporary American Memoir  (WS)
The goal of this course is to teach you how to write a clear, well-argued, intelligible and interesting analytical paper. We will spend most of our class time actively engaged in a variety of techniques to improve your critical reasoning and analytical skills, both written and oral. Though the skills you learn will be applicable to other disciplines, and a central purpose of the course is to improve all aspects of your writing, this is a literature class, designed partly to prepare you for upper level courses in the English Department, so we will, therefore, spend equal time on the interpretation of literature, in this case, contemporary American memoir, examining the ways in which recent American memoirists represent themselves through prose and the choices they make in shaping their life stories. Given the techniques shared by novelists and memoirists, how firm is the line between fiction and non-fiction? What are the sources of a memoirist's authority? What are the ethics of memoir-writing? What kind of relationships do memoirists seek with their readers, and how do they go about achieving them?

Requirements/Evaluation:  Several short essays, most with drafts and revisions, one student-led class discussion, written comments on published and student work, active participation in discussions.
Prerequisites:  None
Enrollment Limit:  12
Enrollment Preferences: Preference to First Year students who do not have a 5 on the AP Lit exam or a 6 or 7 on the IB and have not previously taken a 100-level course.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Five papers, of varying lengths, most of which will go through multiple drafts. Extensive time spent in and out of class on every stage of the writing process. Opportunities to meet with professor outside of class at any stage of writing. Revision built into the course assignments. Commenting on published and peer work as a way to further develop one's own editorial eye.

Attributes: ENGL Literary Histories C

Not offered current academic year

ENGL 161 (F) Metafiction (WS)

Cross-listings: COMP 161

Primary Cross-listing

This course will examine ways in which literary works reflect on their status as written texts. We'll look at the formal pleasures and puzzles generated by techniques including frame narratives, recursion, and self-reference, in novels, films, and stories by Vladimir Nabokov, Jorge Luis Borges, Kelly Link, Paul Park, and others. Ultimately, we will use our study of metafiction to focus inquiry into the socializing force of self-consciousness in human development. Note that students will be required to use, as well as interpret, metafictional techniques in their assigned writing, and will write one or two essays in collaboration with a Chat AI.

Requirements/Evaluation: Several short exercises; four or five papers of increasingly complexity, totaling 22 pages; consistent attendance and participation; a love of reading, and a willingness to reread.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course; sophomores

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 161(D1) ENGL 161(D1)

Writing Skills Notes: Students write five essays with considerable feedback from the instructor.

Fall 2024

SEM Section: 01 TF 1:10 pm - 2:25 pm Shawn J. Rosenheim

ENGL 162 (S) Robots, Puppets, and Dolls (WS)

Is Pinocchio alive? How about the Terminator, or Chat GPT-3 ? This course explores our persistent interest in human simulacra (robots, puppets, dolls; but also automata and cyborgs) and what they suggest about human identity, independence, and free will. We'll look at a wide range of simulacra as they appear in literature, film, and, increasingly, in the actual world ("reborn" dolls, therapy robots, AI). We will frame our explorations with readings in artificial intelligence, neurology, and psychoanalysis (Freud on the uncanny; Winnicott on transitional objects). Throughout, we will wonder: why this fascination with the almost living? How is it that we often care more for Wall-E or the Velveteen Rabbit than we do for real people?

Requirements/Evaluation: students write five essays over the course of the term, in addition to a number of ungraded but required exercises

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level English course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option
Distributions: (D1) (WS)

Writing Skills Notes: The course requires frequent and serious written work: six exercises, and five essays of between 750 and 1500 words, over the course of the semester. All the essays receive letter grades, and comments addressed to their design and execution.

Not offered current academic year

ENGL 202 (S) Modern Drama

Cross-listings: COMP 202 / THEA 229

Secondary Cross-listing

An introduction to major plays and key movements in European and American theatre since the late nineteenth century. Our focus will be on close reading, with attention also to questions of performance and production. Plays to be discussed will likely include: Ibsen, Hedda Gabler; Wilde, The Importance of Being Earnest; Chekhov, The Cherry Orchard; Pirandello, Six Characters in Search of an Author; Brecht, Mother Courage; Miller, Death of a Salesman; Beckett, Waiting for Godot; Hansberry, A Raisin in the Sun; Pinter, Betrayal; Churchill, Cloud Nine; Stoppard, Arcadia.

Requirements/Evaluation: Two 6-page papers; regular Glow posts; and active participation in class discussions.

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Theatre, English, and Comparative Literature majors

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Unit Notes: This course is strongly recommended for any students majoring in Theatre.

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 203 (S) The Uses of Shakespeare (WS)

The plays of Shakespeare have a performance history that is exceptionally rich and strange. In this course we will read several of the plays and look at some of the ways they have been re-imagined and restaged. We will consider the origin of the plays as popular entertainment—competing for an audience against bear-baitings and public executions. We will consider their transformation into canonical texts and their de-canonization in parodies like Dogg's Hamlet and Drunk Shakespeare. Among the works we will read and watch are Twelfth Night, Shakespeare Behind Bars, Hamlet, Rosencrantz and Guildenstern are Dead, Rosencrantz and Guildenstern are Undead, The Merchant of Venice, To Be or Not to Be. Assignments will include analytical essays and creative adaptations in a variety of media.

Requirements/Evaluation: three 6-8 page papers, in-class presentation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Unit Notes: Gateway

Distributions: (D1) (WS)

Writing Skills Notes: Multiple papers; written feedback on writing; class discussion devoted to the challenges of analytic writing.

Attributes: ENGL 200-level Gateway Courses ENGL Literary Histories A

Not offered current academic year
ENGL 204  (F)  Hollywood Film

For almost a century, Hollywood films have been the world's most influential art form, shaping how we dress and talk, how we think about sex, race, and power, and what it means to be American. We'll examine both the characteristic pleasures provided by Hollywood's dominant genres—including action films, horror films, thrillers and romantic comedies—and the complex, sometimes unsavory fantasies they mobilize. We will do this by looking carefully at a dozen or so iconic films, probably including Psycho, Casablanca, The Godfather, Schindler's List, Bridesmaids, Groundhog Day, 12 Years a Slave and Get Out.

Requirements/Evaluation: Two 2-page essays, two editing exercises, a midterm, and a final exam

Prerequisites: None

Enrollment Limit: 60

Enrollment Preferences: English majors

Expected Class Size: 60

Grading: no pass/fail option, yes fifth course option

ENGL 206  (S)  Beyond the Tiger Mom: Depictions of East Asian Mothers in Contemporary American Literature  (WS)

Cross-listings: AAS 206

Primary Cross-listing

A tutorial designed to explore the interpretative difficulties and possibilities of East Asian mothers and motherhood in contemporary American literature (fiction and memoir). The "Tiger Mom"—highly controlling, strict, severe almost to the point of abuse—has become the go-to phrase for many Americans when referring to traditional East Asian mothering styles. This attempt to categorize and simplify cultural differences fails to capture the complex nature of East Asian mothering. While the American public imagines East Asian parenting as only unwavering and harsh, immigrant parents, for example, must often find a parenting strategy that bridges traditional East Asian and mainstream American norms. This course will explore the ways that contemporary Asian American authors depict the complexity of East Asian mothering and mothers. What kinds of mothering does the reductive category of Tiger Mom ignore? What are the central questions these authors pose about mothers and motherhood? How do they negotiate the tension between the individual versus the community, or the pursuit of the child's own interests as opposed to success as defined by the parent when it comes to that child's future? And what are the pitfalls of reading literature as social science? In keeping with tutorial format, students will meet in pairs with the instructor once a week; during these meetings, one student will present a short analytical paper on the texts covered that week. The other student will write a response paper and join the instructor in a discussion of both papers. The reading list may include work by Ocean Vuong, Yiyun Li, Michelle Zauner, Celeste Ng, Amy Tan, Jessamine Chan, Maxine Hong Kingston, Alice Sola Kim, and Amy Chua, among others.

Class Format: In keeping with tutorial format, students will meet in pairs with the instructor once a week; during these meetings, one student will present a short analytical paper on the texts covered that week. The other student will write a response paper and join the instructor in a discussion of both papers.

Requirements/Evaluation: A paper or response each week; extensive comments (verbal and written) on published and student work; active participation in class; creation of writing assignments and discussion questions.

Prerequisites: A 100-level English course, or the equivalent.

Enrollment Limit: 10

Enrollment Preferences: Anyone who has taken a 100-level English course, or the equivalent.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 206(D1) AAS 206(D2)

Writing Skills Notes: A paper a week, of varying lengths, with the opportunity for multiple drafts. Extensive time spent in and out of class on every
stage of the writing process. Opportunities to meet with professor outside of class at any stage of writing. The students' writing tendencies, critical and analytical writing skills, and their editorial modes are as much a subject of the course as the published literature is.

**ENGL 208 (S) Designer Genes** (DPE)

**Cross-listings:** STS 208 / WGSS 208 / AMST 206

**Primary Cross-listing**

In this course, we explore cultural texts that attempt to come to terms with—or exploit—the revolution in contemporary genetics with a particular focus on gender, race, class, and sexuality. The mapping of the human genome in 2001 opened incredible opportunities for medicine, law, and society, but it also, as Alice Wexler has written, "opened a vast arena for contests of power over what it means to be human, who has the power to define what is normal, [and] who has access to what resources and when." Wexler was writing before the final sequencing of the human genome. Now we have CRISPR technology, ushering in a new, more pressing set of ethical concerns. We are currently in the midst of a "global race to genetically modify humans," as the anthropologist Eben Kirksey has documented in his new book *The Mutant Project*. How will we come to define the human? Who gets to decide? Our writers and filmmakers make clear that genetic medicine cannot be thought apart from a profit-driven American health care system or family and gender dynamics. Joanna Rudnick's documentary *In the Family*, for instance, explores the personal and political issues associated with hereditary breast cancer and the patenting of genes. Octavia Butler's Afro-futurist novel *Dawn* explores black female sexuality, reproduction, and the survival of the species in her character's encounter with a genetically enhanced alien species. The film *Gattaca* shows us a fully realized dystopian society where genetically modified humans are the norm—a society that now "has discrimination down to a science." The transgender artist Tamara Pertamina, on the other hand, "hopes to decolonize the science of genetic engineering," as Kirksey has written, with her performance artist projects. Our texts come from a number of different genres, including the memoir, science fiction, film, documentary, art, and non-fiction writing at the intersections of science, medicine, philosophy, anthropology, and law.

**Requirements/Evaluation:** Personal essay, short analysis papers, final research group project

**Prerequisites:** none

**Enrollment Limit:** 25

**Enrollment Preferences:** None; if class is overenrolled, professor will ask for statements of interest.

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENGL 208(D1) STS 208(D2) WGSS 208(D2) AMST 206(D2)

**Difference, Power, and Equity Notes:** This course asks students to think deeply about questions of social justice in the context of the revolution in modern genetics. Race, class, gender, and sexuality all play a role in who has access to new life-saving technologies, and how these technologies are used. This course employs critical tools (feminist and queer theory, ethics’ case studies, close reading) to help students question and articulate the social injustices at play in scientific research and bioengineering.

**ENGL 209 (S) Theories of Language and Literature** (WS)

**Cross-listings:** COMP 265

**Primary Cross-listing**

This course is made up of questions: What is literature and why would anyone want to study it? What can you figure out by examining language that you can't figure out by studying history or psychology? Do students of literature have distinctive ways of asking questions about the world? Why do we call some language literary? Can any language be literary if it appears in the right kind of book? Is there a difference between verbal forms of art and visual or auditory ones? Can novels do things that plays and poetry cannot? Why does anyone read poetry anyway?
ENGL 213 (S) Making Radio

This course has two aims. The first is to teach the necessary skills (including interview technique, field recording, editing, and scoring) to make broadcast-worthy audio nonfiction. The second is to use this process to investigate fundamental aspects of narrative. How does a story build a contract with listeners? What's the role of the narrator? How can one appropriately speak for (and sometimes against) another person? This is less a course in journalism than an experiment in documentary cinema for the ear. We'll do some reading in narrative theory and radio technique, and will listen to exemplary works (including episodes of This American Life, RadioLab, Love and Radio, and Snap Judgment), but most of our time--and this is a time-consuming course--will be spent making and critiquing each other's pieces. Students will produce five or six pieces total, at least two of which must develop out of interviews with strangers.

Requirements/Evaluation: Five short audio pieces; attendance and active participation.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: sophomores; English majors; students with radio or studio art training

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: The student version of Hindenburg audio software ($95); students on financial aid will have this expense covered by the college.

Not offered current academic year

ENGL 215 (S) Introduction to Asian American Literature  (DPE)

Cross-listings: AAS 215

Primary Cross-listing

This course will provide an introduction to some of the major works of Asian American literature, from the mid-20th century to the present. Throughout, we'll attend to the intersection of aesthetics and politics, exploring the creative ways Asian American literary texts both reflect and respond to the historical forces that have shaped Asian American experiences and identities, including exclusion, internment, and U.S. wars and imperialism in Asia. Works we're likely to read include: John Okada's No-No Boy, Maxine Hong Kingston's The Woman Warrior, Theresa Hak Kyung Cha's Dictee, Jessica Hagedorn's Dogeaters, lê thj diem thúy's The Gangster We Are All Looking For, and Jhumpa Lahiri's Interpreter of Maladies.

Requirements/Evaluation: class participation, occasional informal discussion posts, a 5-page midterm paper, and an 8-10 page final paper.
Enrollment Limit: 20
Enrollment Preferences: If over-enrolled, enrollment preference will be given to Asian American Studies concentrators and prospective concentrators.
Expected Class Size: 20
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AAS 215(D2) ENGL 215(D1)

Difference, Power, and Equity Notes: This course offers students the opportunity to learn and think critically about Asian American community struggles throughout U.S. history while examining the forms of literary expressions that arise out of and in relation to those struggles. It also delves into the intersectional nature of Asian American community struggles as they emerge along the fault lines of race, class, and gender/sexuality.
Attributes: AAS Core Electives AAS Gateway Courses

Spring 2025

ENGL 220  (S) Introduction to African American Literature

Cross-listings: AFR 220 / AMST 220

Primary Cross-listing

What does it mean, socially, culturally, historically, personally, and spiritually, to be African American? No single, simple answer suffices, but African American literature as a genre is defined by its ongoing engagement with this complex question. This course will examine a series of texts that in various ways epitomize the fraught literary grappling with the entailments of American blackness. Readings will include texts by Frederick Douglass, Booker T. Washington, Zora Neale Hurston, Langston Hughes, Richard Wright, Ralph Ellison, Amiri Baraka, Toni Morrison, and Ishmael Reed.

Requirements/Evaluation: writing assignments for the course will total 20 pages, distributed over three papers
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: English majors
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

Not offered current academic year

ENGL 221  (S) Hip Hop Culture  (DPE) (WS)

Cross-listings: AMST 222 / AFR 222 / MUS 217

Secondary Cross-listing

The course examines how young people of color created hip hop culture in the postindustrial ruins of New York City, a movement that would eventually grow into a global cultural industry. Hip hop music producers have long practiced “diggin’ in the crates”—a phrase that denotes searching through record collections to find material to sample. In this course, we will examine the material and technological history of hip hop culture, with particular attention to hip hop’s tendency to sample, remix, mash-up, and repurpose existing media artifacts to create new works or art. We will use a media archaeological approach to examine the precise material conditions that first gave rise to graffiti art, deejaying, rapping, and breakdancing, and to analyze hip hop songs, videos, and films. Media archaeology is a critical and artistic practice that seeks to interpret the layers of significance
embedded in cultural artifacts. How does hip hop archaeology remix the past, the present, and the future? How do the historical, political, and cultural coding of hip hop artifacts change as they increasingly become part of institutional collections, from newly established hip hop archives at Cornell and Harvard to the Smithsonian National Museum of African American History and Culture?

Requirements/Evaluation: Four papers, project with presentation, and a final exam.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: AMST majors or prospective majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 222(D2) ENGL 221(D1) AFR 222(D2) MUS 217(D1)

Writing Skills Notes: Students in this course develop a capacity to write generative arguments in an interdisciplinary scholarly context. Students will receive feedback not only on structure, substance, and style, but also on how to best build a line of inquiry, how to gather high-quality evidence, and how to make one’s thinking productively intersect with more than one scholarly or creative field.

Difference, Power, and Equity Notes: This course requires students to use an effective descriptive and critical vocabulary to discuss and analyze artifacts of hip hop culture, with attention to race, gender, class, sexuality, and other categories of social difference. They must understand the material, technological, historical, and cultural contexts that gave rise to hip hop culture, and proficiently synthesize scholarly perspectives related to the formation and transformations of hip hop from the early 70s to the early 21st cent.

Spring 2025

SEM Section: 01 TR 11:20 am - 12:35 pm Brian Murphy

ENGL 222 (S) Lyric Poetry (WS)

The goal of this writing-skills gateway course is to advance our abilities as rigorous, subtle, and imaginative interpreters of poetry. Our focus will be on lyrics--relatively short poems in which a single speaker describes (often in intense language) his or her emotions, attitudes, or state of mind. Our readings will be drawn from a range of historical periods from the seventeenth century forward, with particular emphasis on poems written since the mid-nineteenth century. Among the poets we are likely to study: Ben Jonson, Wordsworth, Coleridge, Keats, Dickinson, Hardy, Owen, Yeats, Auden, Frost, Gluck, and Heaney. We will also discuss works by two poets at Williams: Lawrence Raab and Jessica Fisher.

Requirements/Evaluation: active participation in seminar discussions, and four or five papers (about 20 pages total)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: sophomores and first-year students who have not yet taken an ENGL Gateway course

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: There will be 4 or-5 papers assigned, ranging in length from 4-6 pages, spaced evenly throughout the term. Total writing will be about 20 pages. Detailed feedback will be provided on each paper. There will be opportunities for revisions, and for conferences related to the papers.

Attributes: ENGL 200-level Gateway Courses ENGL Literary Histories B

Not offered current academic year

ENGL 225 Introduction to Asian American Literature: Fiction and Memoir (WS)

This Gateway is for students who want an opportunity to explore some of the wonderful fiction and creative nonfiction written by Asian American writers over the past hundred years. Likely readings include: Carlos Bulosan's America is in the Heart (1946); John Okada's No-No Boy (1957); Maxine Hong Kingston's Woman Warrior (1976); Chang-rae Lee's Native Speaker (1995); Jhumpa Lahiri's Interpreter of Maladies (1999); lê thi diem
thúy's The Gangster We are All Looking For (2003); Ruth Ozeki's A Tale for the Time Being (2013); and Celeste Ng's Everything I Never Told You (2014). As we read, we will attend to the various ways in which the often difficult, and sometimes traumatic, historical experiences of Asian Americans have informed their acts of literary invention. And in order to better understand the broader, ever shifting, social contexts in and against which these literary works were created, we will supplement our primary readings with texts that discuss the experiences of Asian Americans from a historical and sociological perspective.

Requirements/Evaluation: four papers totaling about 20 pages; engaged participation in class discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Grading:

Distributions: (D1) (WS)

Writing Skills Notes: Four 5-page essays in multiple drafts. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: ENGL 200-level Gateway Courses

Not offered current academic year

ENGL 227 (F) Elegies (WS)

This tutorial explores elegies as a literary genre. In their most familiar form, elegies honor and memorialize the dead. More broadly conceived, the genre includes works lamenting other kinds of loss as well: the loss of a lover, place, country, or cherished version of one's past. We'll consider the special challenges and opportunities of the elegiac voice: how it manages to give public expression to private grief; negotiates problems of tone and perspective; worries about and celebrates the capacity of language to generate hope and consolation; and seeks a kind of solace in the literary effort to evoke, preserve, or rewrite a lost life or an absent past. This course focuses primarily on poetry, English and American, across a broad historical range. We'll first read poems from 1600-1900—including works by Jonson, Milton, Donne, Dryden, Gray, Shelley, Tennyson, and Whitman, and then turn to some of the twentieth-century's great poetic elegists—Wilfred Owen, W.B.Yeats, W.H.Auden, Robert Lowell, and Seamus Heaney. Finally, we'll consider how the elegiac voice works in fiction, especially in stories by James Joyce ("The Dead") and Vladimir Nabokov ("Spring in Fialta").

Requirements/Evaluation: Active participation in tutorial meetings. Students will write a 4- to 5-page paper every other week (five in all), and comment on their partners' papers in alternate weeks

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 10

Enrollment Preferences: Sophomores, but juniors and seniors are also welcome.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: All tutorials (at least in English) are by definition Writing Skills courses. Students will write either the main paper or a response critique in alternate weeks. Students will also have the opportunity to revise.

Attributes: ENGL Literary Histories B

Not offered current academic year

ENGL 228 (S) The Renaissance in England and the European Continent: Self and World (DPE) (WS)

Cross-listings: COMP 230

Primary Cross-listing

At the same time as the individual human being in possession of a distinctive personality was taking on enormous importance in politics, philosophy, literature, and the visual arts, early modern Europeans were encountering unprecedented levels of cultural diversity. In this interdisciplinary course, we will consider these two developments both separately and together. As Renaissance humanists were acquiring a sophisticated understanding of the distance between the present and various European pasts (the recent medieval past and the remote history of antiquity), they were also coming into
contact with non-European cultures in Africa, the Americas, and Asia via trade and economic development, imperial expansion, and religious conversion. Always at stake in these encounters was the question of who counted as an individual; the self was not considered to be intrinsic to human nature but rather the product of historical and cultural developments. Themes will include religious pluralism, the sacred and the secular, vernacularity, exploration and empire, the relationship between mind and body, slavery, trade, wealth, gender, self-fashioning, and style. We will consider such English writers as the Pearl poet, More, Marlowe, Spenser, Shakespeare, Browne, and Milton; such continental intellectuals as Descartes, Erasmus, Las Casas, and Castiglione; and such continental artists as Michelangelo, Velázquez, Bruegel, and Rembrandt.

Requirements/Evaluation: Five four-page papers, in-class presentation, thoughtful participation in discussions

Prerequisites: A 100-level ENGL course, a score of 5 on the AP English Literature exam, a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: First- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 230(D1) ENGL 228(D1)

Writing Skills Notes: The course asks students to write five four-page papers and offers exposure to a range of humanistic modes, from close reading to visual analysis to the exposition of philosophical claims. One paper will involve independent research. The instructor will provide frequent and extensive written feedback on student work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course examines the role of historical and cultural difference within and beyond Europe at the very beginning of globalization. Students will become acquainted with the origins of colonialism and the global traffic in slaves, as well as with the complex role of writers and intellectuals in questioning, defending, and imagining these practices. We will consider the epistemological challenges of accessing the testimony of subordinated persons.

SEM Section: 01 TR 9:55 am - 11:10 am Emily Vasiliauskas

ENGL 231 (F)(S) Literature of the Sea (DPE)

Cross-listings: CAOS 231

Secondary Cross-listing

The ocean, and human relationships with it, have been central features of literatures and cultures around the world for more than a thousand years. But since literary study is typically based around authors' homelands, careful examination of the oceanic experience is often pushed to the periphery—an "empty space" to be crossed between nations, a "vast darkness" antithetical to human life, or a mirror for land-born concerns. Increasingly, however, scholars and readers are centering the sea and stories about it as a means stepping outside human frameworks of space and time, situating the complex emotions and narratives inspired by the ocean into a complex network of geologic history and teeming other-than-human life. This course examines a wide range of texts and perspectives on the ocean and human relationships with it. Doing so will help us consider how literature both plays into and subverts dominant viewpoints of the ocean. Through texts that consider 19th-century whaling, the Middle Passage, the postcolonial Caribbean, and islands throughout the Pacific Ocean, we will explore a range of questions, including: What can we learn from examining efforts to write about the ocean? How do ocean stories help individuals understand themselves, their communities, and their place in global environments? What can the range of cultural and literary perspectives on our "single, global ocean" reveal about the ways different people are both connected with and profoundly distant from each other? Most importantly, we will practice, as a classroom community, different strategies for carefully reading texts while connecting them to cultural traditions, surrounding environments, and personal experiences.

Class Format: weekly roundtable discussions, including coastal and near-shore field trips and multiple field seminars.

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final assignment

Prerequisites: N/A

Enrollment Limit: 25
Enrollment Preferences: Williams-Mystic Students only
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option

ENGL 233 (F) Great Big Books (WS)
Cross-listings: COMP 293
Primary Cross-listing
Some of the greatest novels are really, really long--so long that they are too seldom read and taught. This course takes time to enjoy the special pleasures of novels of epic scope: the opportunity to immerse oneself in a wide and teeming fictional world; to focus sustained attention on the
changeable fortunes of characters and societies over a long span of time; to appreciate the detailed grounding of lives in their social environment and historical moment; to experience the leisurely and urgent rhythms, with their elaborate patterning of build-ups and climaxes, that are possible in such works. We will read but two novels, both preoccupied with the disruption and evolution of lives and loves at moments of historic upheaval: War and Peace (1869), Leo Tolstoy’s epic of the Napoleonic Wars, and Parade’s End (1924-28), Ford Madox Ford’s modernist masterpiece about World War I and its traumatic impact on English social life. Set a century apart, the novels are distinguished by vivid and scrupulous representation of their respective wars, by their shrewd accounts of political and social pressures informing the crises, and by their insight into the struggles of those whose lives are engulfed in global crisis. Tolstoy’s and Ford’s approaches to fictional representation, however, provide intriguing contrasts: one favors the lucidity of classic realism, the other the challenges of modernist innovation; one deploys a single multiplot novel, the other a tetralogy of shorter novels developing a single plot. We will discuss the differing strategies and effects of these two approaches, as well as the more general difficulties of reading and interpreting long fiction.

Requirements/Evaluation: regular class participation and four 5-page papers, two of them submitted in both a draft and a revision

Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 233(D1) COMP 293(D1)

Writing Skills Notes: Four 5-page papers, two of them submitted in both a draft and a revision; two mandatory paper conferences to discuss the drafts; occasional in-class discussion of issues of writing and argumentation.

ENGL 234 (S) The Video Essay

While people today experience an unprecedented flood of moving images, few have had the chance to think critically about film and video. Fewer still have had the opportunity to think with the medium, exploiting the resources of film and video in an effort to understand how these media affect viewers. The Video Essay offers a chance to do that. After being introduced to the fundamentals of film analysis and receiving training in basic video editing, students will spend the term alternating between making short video essays and commenting on the essays produced by their partners. Note that this is primarily a course in film analysis: students will not shoot any original material. No prior experience is required.

Class Format: We will meet together for three weeks, then break into groups of four. Students in each group will alternate weekly between creating video essays on film topics, and writing commentaries on the essays of their partner.

Requirements/Evaluation: four written exercises (1-2 pages); five video essays, increasing from two to six minutes; and four written commentaries on one’s partner’s video essays.

Prerequisites: permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: sophomores; first-year students; English majors

ENGL 238 (F) 1930s Black Literature (WS)

Cross-listings: AFR 260

Primary Cross-listing
This course explores Black literary output of the 1930s in all its forms with the belief that this often under-appreciated decade contains many of the impulses that would come to structure the literary landscape in the decades that follow. These include an unflinching embrace of humor and satire, engagements with social realism, and a keen attention to notions of the radical in the international context. Special attention will be paid to how the writing pushes away from the development of what we have come to understand as the Harlem Renaissance of the 1920s. Work to be considered throughout the term comes from, among others, Marita Bonner, Arna Bontemps, Sterling Brown, Langston Hughes, Zora Neal Hurston, George Schuyler, Dorothy West, Richard Wright, and Octavia Wynbush.

Requirements/Evaluation: weekly reading responses, active class participation, two close readings (500 words each), annotated bibliography, class presentation, final paper (8-10 pages)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 260(D2) ENGL 238(D1)

Writing Skills Notes: Beyond the quantity of assigned writing, significant class time will be spent covering strategies for effective and persuasive academic writing. Throughout the semester, students will receive written feedback from the instructor with specific suggestions for revision and improvement.

ENGL 239  (S)  Zen and the Art of American Literature

Just one hundred years ago, few Americans knew the first thing about Buddhism. But these days, who hasn't heard of (or even tried) mindfulness or meditation? Buddhist ideas and practices now seem ubiquitous, available even in the form of smartphone apps like Headspace and Calm. In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today. We'll read some Buddhist American literary texts, like Ruth Ozeki's wondrous novel, A Tale for the Time Being. And we'll range far beyond the world of literature into other cultural domains in which Buddhism has had a deep impact, like psychotherapy, environmentalism, Western attitudes towards death and dying, and the ongoing struggle for racial justice. And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week). No prior experience with meditation is necessary. Just an open mind.

Requirements/Evaluation: Since this is an experiential course, presence is essential and will be strictly required (so after two allowed absences, each subsequent absence will lower a student's final course grade by 1/3 of a letter grade: A- to B+, for example). Other requirements: short reading responses and free-writing exercises for each class meeting, a 3-4 page midterm essay, and an 8-10 page final essay.

Prerequisites: none

Enrollment Limit: 50

Enrollment Preferences: Enrollment preference will go to seniors. Students who preregister are required to fill out the expression of interest form at http://tinyurl.com/Engl239Spring2025 by the end of pre-registration.

ENGL 240 (F) What is a Novel? (WS)

What is a novel? Where did novels come from? Why would anyone invent such a thing in the first place? This course is an introduction to the ways literary critics have attempted to give a genre as hard-to-pin down as the novel a theoretical framework. For a long time, nobody thought the novel even needed a theory--too popular, too loose and baggy to be thought of as any one thing. Today, novel theory is legion. To name a few, one can find theories of the novel that identify themselves as formalist, psychoanalytic, post-structuralist, Marxist, historical, and post-colonial, as well as accounts that emphasize sexuality and gender, for example, or the novel’s trans-national development. We will move back and forth from the theory of the novel to its practice in order to see how the novel and its understanding have changed over the past 200 or so years. We’ll center our studies in the Age of the Novel in Britain, the 19th century (Jane Austen, Charles Dickens), and extend our investigations to one of its contemporary heirs (Sally Rooney). Theorists will include Bakhtin, Benjamin, Marx, Lukacs, Barthes, Ian Watt, Jameson, Sedgwick, Said, Bersani, Moretti.

Requirements/Evaluation: 4 papers; weekly posts to glow; regular, substantial, and intensive participation in class discussion.
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 19
Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option

ENGL 241 (S) Introduction to Comparative Literature

Cross-listings: COMP 225

Secondary Cross-listing

Comparative literature involves reading and analyzing literature drawn from different times, movements, cultures, and media. In this class, we will study English translations of texts from eras spanning the ancient to the contemporary; literary movements including romanticism, realism, and postmodernism; national traditions arising in Europe, Asia, and the Americas; and media from prose fiction to theater, comics, and film. Throughout the course, we will consider what it means to think about all these different works as literary texts. To help with this, we will also read selections of literary theory that define literature and its goal in abstract or philosophical terms. Assignments will focus on close, creative reading of relatively short texts by authors like Homer, Sei Shônagon, Kleist, Lermontov, Zola, Borges, Wilde, Bechdel, and others. All readings will be in English.

Requirements/Evaluation: attendance, participation, two 5-page papers, a few short responses, midterm exam
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Comparative Literature majors
Expected Class Size: 25
Grading: no pass/fail option, yes fifth course option
Unit Notes: This course can be substituted for COMP 111 to satisfy the gateway requirement for Comparative Literature majors.
Distributions: (D1) This course is cross-listed and the prefixes carry the following divisional credit:

COMP 225(D1) ENGL 241(D1)

ENGL 242 Bewilderment: Contemporary U.S. Poetry and the Ethics of Unknowing (DPE) (WS)

"I perceive I have not really understood any thing, not a single object, and that no man ever can," wrote Walt Whitman in a great poem of 1860. "Tell all the truth, but tell it slant," answered Emily Dickinson a few years later, as if suggesting a strategy for how to write one’s way into Whitman’s radical
uncertainty. These articulations of knowing and unknowing, of telling and untelling, continue to thread their way into U.S. poetry today. This course will explore bewilderment as both a poetic strategy and an ethical position. How do error, randomness, contradiction, obliquity, and dissociation serve the poem and the poet? How do such strategies counter ideas of literary mastery, heroism, virtuosity, privilege and celebrity? What are the political possibilities of such counter stances, especially as embodied and expressed by poets who speak from outside the stronghold of the white male establishment? We will primarily read from recently published work in the U.S., but will also be interested to track the literary traditions that have shaped how contemporary poets think and write. Authors read may include: Wanda Coleman, Eileen Myles, Anne Carson, Layli Long Soldier, Vanessa Angelica Villarreal, Fanny Howe, Terrance Hayes, Jennifer Chang, Tiana Clark, Brenda Hillman, Jane Wong, Tommy Pico, Paisley Rekdahl, Brian Teare, Diana Khoi Nguyen, and C. D. Wright.

Requirements/Evaluation: Classroom participation in discussion, several papers of graduated lengths and complexity (for a total of 20 pages of writing).

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: potential sophomore English majors have first choice, then prospective or current American Studies majors

Expected Class Size: 19

Grading:

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Gateway courses in English traditionally emphasize writing skills, and this course is no exception. Attention will paid to drafts and revisions of essays.

Difference, Power, and Equity Notes: The vast majority of works read are authored by poets outside the white male straight cisgender establishment. More importantly, we will constantly engage the question of how poetry may serve the needs of equity and inclusion in the U.S. contemporary literary marketplace.

Attributes: ENGL 200-level Gateway Courses

ENGL 243 (S) The Contemporary African American and Latin American Novella  (WS)

Cross-listings: COMP 268

Primary Cross-listing

This tutorial examines how the novella has been deployed in the African American and Latin American contexts in our present century. Throughout the term, we will grow a vocabulary to understand how, from the perspective of craft, an elongated brevity can often lend itself, perhaps counterintuitively, to such an immersive reading experience. We will also contemplate why so many of the texts appear focused on countering established historical narratives. What unique possibilities does the form of the novella offer in this regard? In these explorations, we will encounter novellas from, among others, César Aira, Yuri Herrera, Jocelyn Nicole Johnson, Gayl Jones, John Keene, Bruna Dantas Lobato, Toni Morrison, and Alejandro Zambra. These readings will be paired with brief critical texts that will frame the essays to be written each week.

Requirements/Evaluation: five tutorial essays (4-5 pages); five responses to partners tutorial essays; thoughtful participation in tutorial meetings

Prerequisites: A 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 10

Enrollment Preferences: Sophomores, but juniors and seniors are also welcome.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 247  Art of the Essay
The "essay" is one way of writing about the intersection of self and world. Writers from 16th century French Michel Montaigne to contemporary American physician Siddhartha Mukherjee and Canadian lyric essayist Anne Carson have experimented in this form, varying the proportion of self-scrutiny to outward focus. We will study the meandering history of this rich literary form, learning both how to analyze and interpret representative examples from multiple traditions, and how to try our hand at our own creative nonfiction. That is, you will do both critical writing and creative writing for this course. Throughout, we will track how this genre serves those writers and readers who gravitate toward its special arts. Works read include those by the writers named above, as well as a selection from the following list: Henry David Thoreau, William James, Gertrude Stein, James Baldwin, James Agee, John McPhee, Alice Walker, Gloria Anzaldua, Claudia Rankine, Theresa Hak Kyung Cha, and Maggie Nelson.

Requirements/Evaluation: four papers (two critical and two creative), of varying lengths (from 2-10 pages), for a total of 20 pages

Prerequisites: none

Enrollment Limit: 25
Enrollment Preferences: first- and second-year students
Expected Class Size: 25
Grading:
Distributions: (D1)

ENGL 250  (S)  Americans Abroad  (DPE)
Cross-listings: GBST 242 / AMST 242 / COMP 242
Secondary Cross-listing
This course will explore some of the many incarnations of American experiences abroad from the end of the 19th century to the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war, peace, and pandemic. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler's expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? How did recent lockdowns and border closings impact and/or interrupt these complex experiences?

Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gelhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors and artists we will study chose, or were forced to, leave
oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their (and our) concept of "home" into something that reflects individual identity, and not one imposed by any national culture--American or foreign.

**Requirements/Evaluation:** Each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student's own experiences.

**Prerequisites:** Any literature course at Williams or permission of instructor.

**Enrollment Limit:** 18

**Enrollment Preferences:** Comparative Literature, English or American Studies majors, and/or students who have studied away or plan on doing so, and/or students who are from international and/or bilingual (or multilingual) backgrounds.

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 242(D2) AMST 242(D2) COMP 242(D1) ENGL 250(D1)

**Difference, Power, and Equity Notes:** We will read and analyze primary materials and literature that reflect on Americans who chose, or were forced to, reinvent themselves abroad to escape oppressive situations in the United States related to gender, class, race, or political views. The socio-historical context of each writer will be crucial to understanding their situations. Students will write critical papers, and their own narrative in which they reflect on a situation of personal dislocation, either while traveling, or at home.

Fall 2024

SEM Section: 01 M 7:00 pm - 9:40 pm Nelly A. Rosario
ENGL 253 (F) Feminist Theatres: A Global Perspective (DPE) (WS)

Cross-listings: THEA 250 / COMP 247 / WGSS 250

Secondary Cross-listing

What makes a work of theatre "feminist"? How do plays and performances across global networks engage with different models of feminism: liberal, radical, materialist, and intersectional? Why has feminism mattered to theatre-makers of the past? Should it still matter now? If so, what forms might future feminist theatres take? In this tutorial course, students will work in pairs to examine the social and political relation of feminism to the art and practice of theatre. Taking a global and comparative perspective on the subject, we will focus on the intersectionalities of gender, race, class, ethnicity, nationality, and sexual identity in the production of feminist-driven theatrical practices. Artists, companies, and movements to be considered may include: Spiderwoman Theatre, Adrienne Kennedy, Caryl Churchill, Sphinx Theatre Company, Ntozake Shange, Griselda Gambaro, Manjula Padmanabhan, Cherrie Moraga, Lisa Kron, Arethusa Speaks, Maya Krishna Rao, Tracie Chima Utloh-Ezeajugh, Alexis Scheer, Tori Sampson, Clare Barron, and others. Close analysis of source material will be informed by critical and autobiographical writings by: Audre Lorde, Judith Butler, bell hooks, Gloria Anzaldúa, Kimberlé Crenshaw, Eve K. Sedgwick, Gayatri Spivak, Jill Dolan, José E. Muñoz, and Donna Haraway. This course will follow a standard tutorial format, with students taking turns presenting or responding to their peer every other week; for their presentations, students will write a 5-page paper or, in up to two cases if they choose, offer their argumentation through more performance-driven methods (such as an oral argument, spoken-word monologue, or activist prompt).

Requirements/Evaluation: students will meet with instructor in pairs for an hour each week; every other week they will be responsible for sharing either a 5-page paper or, if they choose, in up to two cases, a more performance-driven presentation, such as: an oral argument, spoken-word monologue, or activist prompt (five presentations/papers in all). They will comment on / respond to their partner's papers/presentations in alternate weeks; emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and written and oral communication.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: THEA majors; WGSS majors; ENGL majors; COMP majors. Students from all majors are welcome and invited to contact Prof. Holzapfel about their interest in the class: ash2@williams.edu

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
THEA 250(D1) COMP 247(D1) WGSS 250(D2) ENGL 253(D1)

Writing Skills Notes: This course fulfills the writing skills requirement by engaging students in the active and creative process of critical writing, based on the notion that "writing is thinking, not thinking written down." Emphasis will be given to crafting and developing an argument, clarifying prose, selecting evidence, gaining authority, and incorporating theoretical ideas into an essay. We will also focus on the performance and presentation of written arguments.

Difference, Power, and Equity Notes: This tutorial examines intersections between gender, race, sexuality, class, nationality, and ethnicity in relation to theatre's ongoing engagement with feminism. We will consider how articulations of difference, power, and equity arise and are, in fact, prioritized in quite different ways within the politics of feminism itself, leading to their variable expressions through art.

Not offered current academic year

ENGL 254 (F) Catastrophe/Apocalypse: The Movie

The film industry has always appreciated the visual and dramatic possibilities of catastrophe, and given that the apocalyptic and post-apocalyptic sensibility seems to be everywhere in our culture, being plugged into the zeitgeist might at this point necessarily entail a familiarity with the tropes and assumptions of this subgenre. This course will consider the ways in which such films model for us those moments when our expectations and/or actions collide with the devastating realities of our physical world and/or political situation. How do we measure loss when loss occurs at the upper end of the human scale? How do we consider collectively, in either secular or metaphysical terms, the issue of our own complicity in--if not responsibility for--disaster? Films to be studied will include Alfonso Cuarón's Children of Men, Jordan Peele's Get Out, Ridley Scott's Blade Runner, Alfred Hitchcock's The Birds, Danny Boyle's 28 Days Later, Lorene Scafaria's Seeking a Friend for the End of the World, Jeff Nichols' Take Shelter, Armando Iannucci's The Death of Stalin, Juan Carlos Fresnadillo's 28 Weeks Later, Bruce McDonald's Pontypool, Yoshio Nakamura's Fish Story, and Joshua Oppenheimer's The Act of Killing.

Requirements/Evaluation: Three short papers and in-class presentations

Prerequisites: an introductory film course or permission of the instructor
ENGL 256 (S) Stop Making Sense: Absurd(ist) Theatre in Historical Context (WS)

Cross-listings: COMP 256 / THEA 252

Secondary Cross-listing

We want to make sense of things. In nearly all of our academic pursuits, the point of analysis is to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

Requirements/Evaluation: Evaluation will be based on weekly tutorial papers/response papers, and active participation in weekly tutorial sessions.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Theatre, English, and Comparative Literature majors.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 256(D1) THEA 252(D1) ENGL 256(D1)

Writing Skills Notes: Weekly tutorial papers and response papers, plus regular feedback on writing/argumentation skills. The course will provide consistent and ongoing feedback on students' writing, and will require multiple assignments, each prompting comments which address writing problems and strategies, as appropriate.

Not offered current academic year

ENGL 257 (F) The Personal Essay (WS)

The personal essay as a literary form includes a wide range of genres including literary journalism, creative nonfiction and the lyric essay. (Note the exclusion of "memoir" or "autobiography" in this list. This course is NOT a course in memoir or autobiography.) As a Gateway to the English major, this course we will focus on critical methods and analytical writing skills that will serve students who want to pursue more advanced work in the department. (Note: this is not a creative writing course.) We will consider the literary history of the personal essay from Montaigne to yesterday, attending primarily to writers from the 20th and 21st centuries, and from the U.S. The reading list may include: James Baldwin, James Agee, Annie Dillard, Audre Lorde, John McPhee, Joan Didion, Adrian NicholeLeBlanc, Jennifer S. Cheng, Anne Carson, Samuel Delaney, Maggie Nelson, Alexander Chee, Lydia Yuknavitch, Saidiya Hartman and Karen Green.

Requirements/Evaluation: Evaluation will be based on class participation, peer editing, writing and revision, with special attention given to the student's engagement in every aspect of the writing process.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.
Enrollment Limit: 19
Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19
Grading: no pass/fail option, yes fifth course option
Distributions: (D1) (WS)

Writing Skills Notes: This course will demand weekly writing and critical responses, drafts and revisions of essays, as well as peer editing. There will be 4-5 essays required, for a total of approximately 25-30 pages. One-on-one meetings with the professor will be a regular feature.

Attributes: ENGL 200-level Gateway Courses

Not offered current academic year

ENGL 258 (F) Poetry and the City (WS)

In this course we will consider poems generated out of the experiences of urban life. The city provides for poets a vivid mental and imaginative landscape in which to consider the relation of vice and squalor to glamour; the nature of anonymity and distinction; and the pressure of myriad bodies on individual and mass consciousness. We will explore ways in which the poet's role in the body politic emerges in representations of the city as a site both of civilized values and/or struggles for power marked by guile and betrayal. Taking into account the ways in which cities have been transformed over time by changing social and economic conditions, we will consider such issues as what the New York of the 1950s has to do with the London of the late eighteenth and early nineteenth centuries, and why poetry as a genre might be particularly suited to representing the shifting aspects and populations of urban life. Poets will include Dante, Pope, Swift, Blake, Wordsworth, Whitman, Baudelaire, Yeats, Crane, Moore, Hughes, Brooks, Lorca, Bishop, Ginsberg, Baraka, Ashbery, Yau, Bitsui, Rankine, and Diaz. We will also draw on essays by Simmel, Benjamin, Williams, and Canetti, photographs by Hines, Weegee, Abbott, and Nishino; the blues, as sung by Holliday and Vaughan; and films such as Man with a Movie Camera, Rear Window, and Breathless.

Class Format: discussion-based
Requirements/Evaluation: class participation; the course will require four 5-page essays in multiple drafts
Prerequisites: 100-level English course or a 5 on the AP literature exam, or permission of the instructor.

Enrollment Limit: 19
Enrollment Preferences: first-year and sophomore students who are thinking of majoring in English, and majors who have not yet taken a Gateway course

Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (WS)

Writing Skills Notes: The course will require four 5-page essays in multiple drafts. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ENGL 262 (F) European Cinema and Film Theory (WS)

This seminar explores the foundations of contemporary European cinema by studying a range of films from 1920-1985, and offers a grounding in film theory and aesthetics by pairing such films with theoretical essays by philosophers and aestheticians from the silent era through the 1970s. We will establish a kind of map of cinematic styles and movements, ranging from German expressionism and Soviet montage in silent films of the 1920s, through French realism of the prewar and Italian neorealism of the early postwar era, to the insurrectionary films of the French New Wave and the stylistic innovations of the German New Wave and of Swedish cinema in the 1960s and 1970s. We will study films by such directors as Wiene, Murnau, Lang, Eisenstein, Vertov, Dreyer, Renoir, Riefenstahl, Rossellini, Fellini, Truffaut, Godard, Varda, Herzog, Bergman, Tarkovsky, and Almodóvar.

Requirements/Evaluation: regular class participation and four 5-page papers, two of them submitted in both a draft and a revision
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19
Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course
ENGL 263  (S)  Novel Worlds  (WS)
Reading a novel can feel like falling into another world, each novel its own trip down a granularly detailed rabbit hole. From Jane Austen's "3 or 4 families in a country village" to the teeming novels of Charles Dickens, the novel's distinctive power is in making both the few and the many feel like a complete world. But what are worlds, anyway? Are they spaces? Or are they not a thing at all, but social systems--ways of belonging that are constantly being made and remade? This course is about the specific world--imagining powers of the novel, tracing out various techniques and strategies by which literary texts create worlds. Our hunch: the modern notion of "world" finds its origin in the novel, and the novel constitutes one of the most sophisticated sites of reflection upon that notion. We'll read a number of novels, ranging from 19th-century authors like Austen and Dickens, to contemporary genre writing--science fiction and the detective novel--to see how novels, and ideas of world, shift over time and space. To get at our central questions, we'll read some philosophical and critical texts preoccupied by world-ness, consider the colonial contexts of some novel worlds, and engage contemporary debates around the possibilities of ”World Literature.” Likely authors include Jane Austen, Charles Dickens, Lewis Carroll, Arthur Conan Doyle, Oscar Wilde, Italo Calvino, and China Mieville.

Requirements/Evaluation: papers (approximately 20 pages), other forms of writing in-class and otherwise, engaged participation in course discussions.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: sophomores and first-year students

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)  (WS)

Writing Skills Notes: 4-5 shorter writing assignments totaling 20 pages of writing; regular feedback on writing assignments through written comments and in-person meetings.

ENGL 264  (S)  Utopia and the Idea of America(s)  (WS)
Cross-listings: COMP 295

Primary Cross-listing
What value does the utopian/dystopian text hold in the development of alternative thought? This course, primarily grounded in science fiction and the African American and Latin American contexts, will address this question via the thoughtful examination of a range of theoretical, fictional, and cinematic texts from, among others, Thomas More, John Akomfrah, Samuel Delany, Octavia Butler, Jorge Luis Borges, Alfonso Cuarón, José Vasconcelos, Eduardo Urzaiz, and Fredric Jameson.

Requirements/Evaluation: weekly reading responses, active class participation, two close readings (500 words each), annotated bibliography, class presentation, final paper (8-10 pages)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)  (WS)

**ENGL 266 (F) Postmodernism (WS)**

**Cross-listings:** COMP 231

**Secondary Cross-listing**

In one definition, postmodernism in art and literature is what you get when you combine modernism's radical experimentation with pop culture's easy appeal. This term has been used to describe works from Andy Warhol's paintings of Campbell's soup cans and Jean Baudrillard's critical essays on Disneyland to Murakami Haruki's euphoric conspiracy novels. Theorists of the postmodern have argued that it represents not only a radical change in aesthetic sensibilities, but a fundamentally new relationship between art, language, and society. In this tutorial, we will read some of the most important theoretical essays defining the postmodern (essays which themselves often embrace this playful and sometimes ironic style), and we will pair them with artistic texts that are said to illustrate the features of postmodernism. The latter will be mainly novels and short stories from around the world, but one feature of this theory is a flattening of the distinction between high and low culture as well as between the written and the visual, so we will also examine examples from architecture, visual art, and/or broader pop culture. Texts will include essays by critics like Jean Baudrillard, Fredric Jameson, Jean-François Lyotard, and Azuma Hiroki; novels and short stories by writers like Don DeLillo, Italo Calvino, and Murakami Haruki; painting and sculpture associated with Pop Art and Superflat; the architecture of Williamstown-area museums; etc. Writing assignments will focus on reading the theoretical texts closely and applying their ideas to the artistic texts in creative and interesting ways. Open to sophomores as well as advanced students.

**Class Format:** After an introductory lecture meeting, students will meet with the instructor in pairs for approximately an hour each week.

**Requirements/Evaluation:** participation plus 4 papers (4-5 pages), 2 short papers (1-2 pages), and 4 peer critiques (1 page)

**Prerequisites:** a previous literature or critical theory course at Williams plus sophomore standing or higher, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Comparative Literature majors, students with a demonstrated interest

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 266(D1) COMP 231(D1)

**Writing Skills Notes:** Students will write several regularly spaced papers that build on one another by revisiting, extending, and/or rewriting earlier material. Students will receive detailed written feedback from the instructor on each paper, addressing argument, organization, and style, as well as written peer feedback on the longer papers. (See requirements for details about the number and type of assignments.)

**ENGL 267 Stop Making Sense: Absurd(ist) Theatre in Historical Context (WS)**

In most academic work the point of analysis is to make sense, to find meaning, to explain intricate or confusing phenomena, to provide clarity from complexity. What happens when we can't do this, indeed, when the objects of our analytical attention seem willfully designed to thwart the attempt? Such is the challenge of "understanding" the traditions of the absurd. In this tutorial course, we will engage this challenge within the realm of Western theatre and performance from 1900 to the present. Beginning with selected readings from writers who have engaged the absurd in theoretical fashion (Albert Camus, Soren Kierkegaard, Jean-Paul Sartre, Martin Esslin), the course will move swiftly to original artworks for contemplation and analysis. Some questions we will grapple with include: How do we, can we, should we respond to art that specifically defies meaning? Can art that seems pointless have a point? How and when have strategies of nonsense, circular reasoning, linguistic obfuscation, and intentional theatrical absence been
employed to disguise, or deflect attention from, specific didactic (even political) agendas? What role specifically does theatre, theatricality, or performativity play in the presentation of art that refuses understanding? Playwrights will range from canonical (Samuel Beckett, Eugene Ionesco) to more obscure but equally engaging (as well as baffling) artists (Peter Handke, Slavomir Mrocek, Richard Foreman). We will follow standard practice in tutorial pairs, as each week one student will prepare original analysis of the assigned reading, and the other will craft a response to prompt an hour-long discussion. Whether we "make sense," or perhaps discover different ways of appreciating the varied works of art, will depend on the nature of those weekly attempts.

Requirements/Evaluation: Standard tutorial requirements; weekly paper or response paper from each member of the tutorial pair. Evaluation based on improvement in written expression and engaged contribution to weekly discussions.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Theatre, English, and Comparative Literature majors and prospective majors.

Expected Class Size: 10

Grading:

Distributions: (D1) (WS)

Writing Skills Notes: This tutorial will demand writing from each student each week (either a primary paper or a shorter response paper), and each student will receive regular, extensive feedback including a focus on strategies for successful persuasive argumentation.

ENGL 268  (F)  Being Muslim, Being American: American Muslim Literature in the 21st century  (DPE)

Cross-listings: AMST 166 / COMP 166 / REL 166

Secondary Cross-listing

Islam and Muslims in the United States are the subject of extensive public scrutiny and media coverage in broader public discourses. It is less common, however, to hear Muslims' own voices speak about their lives, experiences, beliefs, and commitments. This course will take a literary approach to exploring American Muslims' own narratives about themselves, which will serve as an introduction to religion in contemporary U.S. culture. We will address questions such as: How do American Muslims attempt to fashion their identity in the wake of 9/11? What are the pressures and demands of American national belonging and cultural citizenship that Muslims must navigate? How are race, gender, ethnic heritage, and immigration definitive of Muslim experiences and self-understandings? How are Muslims approaching the tensions between communal belonging and individuality? What are the competing claims and contestations about authentic expressions of Islam? We will be engaging such themes through an analysis of popular memoirs, autobiographies, novels, short stories, poetry, films, and comedy.

Requirements/Evaluation: regular reading responses, short midterm essays, and final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: First-year students and sophomores

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 166(D2) COMP 166(D1) ENGL 268(D1) REL 166(D2)

Difference, Power, and Equity Notes: This course will explore the intersections of power in American Muslim life, such as: Muslims as a religious minority in the context of the War on Terror; racial and ethnic differences in Muslim communities; immigration and national belonging; competing claims to religious authenticity and authority; and conflicting gendered norms. Students will learn to identify these multiple layers and configurations in the texts, and how to analyze their workings in nuanced multidimensional ways.

Not offered current academic year

ENGL 279  (S)  Introduction to Latinx Literature: From 'I Am Joaquin' to Borderless-Future Dreams  (DPE) (WS)

This course is designed to introduce you to Latinx literary and cultural production from the 1930s through the present. We will read and encounter some of the most urgent and exciting literary-artistic texts produced by Latinxs in the U.S., focusing our attention on the post-war period and the
flourishing of the Chicano Movement-related cultural renaissance of the late 1960s and early 70s, along with the Movement’s significant aftermaths. This focus highlights the significant contributions Chicano voices have made to Latinx literary studies and creates space for the incorporation of other Latin American-descended peoples (including Nuyoricans, Cubanos, Central Americans, Afro-Latinxs, and more). In addition to traditional narrative forms, we will also study poetry, films, photography, plays, murals, and performance art. In this way, you will gain a critical awareness of how Latinxs have historically engaged in various modes of artistic experiment to better question some of the twentieth and twenty-first centuries’ most pressing global and local political issues (from migration to racism to coloniality to heterosexism to gentrification to U.S. imperialism and more). The course, at its core, will explore issues of identity-formation, particularly as they relate to Latinx struggles for equality on the fault lines of race, class, and gender/sexuality. Who and/or what is the Latinx subject, and how does the question of identity relate to struggles for cultural recognition and political equality? To what extent does the Latinx subject’s political freedom rest upon practices and processes of identity-formation or, alternatively, dis-identification? As we explore these questions, we will also examine how Latinxs come to inhabit and articulate a sense of space and place in the shifting landscapes of culture—from the city to the campo to the cultural in-between of the border.

Requirements/Evaluation: Active participation in in-class and online discussion, four 4-5 page essays, writing-related homework assignments, and an in-class presentation.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.

Enrollment Limit: 19

Enrollment Preferences: Sophomores considering the English major, but juniors and seniors are also welcome.

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: The instructor will provide written feedback on student work. Students will receive timely feedback on essay assignments with suggestions for improvement and will revise their essays.

Difference, Power, and Equity Notes: This course offers students the opportunity to learn and think critically about Latinx community struggles throughout U.S. social history while examining the forms of cultural expression that arise out of and in relation to those struggles. It also delves into the intersectional nature of Latinx community struggles as they emerge along the fault lines of race, class, and gender/sexuality.

ENGL 281 (F)(S) Introductory Workshop in Poetry

Poetry is a capacious genre, and notoriously difficult to define. Emily Dickinson wrote of it this way: "If I read a book and it makes my whole body so cold no fire can ever warm me, I know that is poetry. If I feel physically as if the top of my head were taken off, I know that is poetry. These are the only ways I know it. Is there any other way?" In this introductory workshop, we will develop an expansive definition of poetry and a facility with its many strategies. We'll read broadly in canonical and contemporary poetry and will engage in various exercises, improvisations, and collaborations. You will write your own poems, as well as brief reflection papers. You will give thoughtful feedback on one others' poems, and revise your own work as part of a final portfolio.

Requirements/Evaluation: engaged participation; successful completion of assignments; demonstrated commitment and substantial improvement, as evidenced by a final portfolio of revised poems.

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: All interested students should pre-register and will be emailed with instructions if the course is over-enrolled.

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

ENGL 286  (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film
Cross-listings: AFR 283 / AMST 283 / WGSS 283

Secondary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1999). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and
visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

**Requirements/Evaluation:** facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

**ENGL 290 (S) Technologies of Friendship**

**Cross-listings:** STS 290

**Secondary Cross-listing**

Contemporary friendships—whether among roommates, near neighbors, or friends living thousands of miles apart—are highly mediated. We communicate and signal our attachment through Zoom windows, apps, and social media platforms, and we create ambiguous relationships with people whom we "follow" or "friend" without having met in person. Sometimes we text as much as we talk even with intimate friends, and carrying on in-person friendships was complicated in myriad ways by the Covid-19 pandemic. But friendships have always been mediated, and in this tutorial we will examine how writers across centuries have described the tools and technologies of friendship: some perhaps quaint or sentimental (for example the written letter) and others creepy or invasive (for example Apple's "Find My" app or social media's "suggestions"). We will ask common and important questions, such as "Can one have too many friends?"; "Are long-distance friendships sustainable?"; and "What health risks do we take for friendship, and what other risks do technologies of friendship carry?" Readings will include works of fiction and journalism, and scholarship from psychology, the history of technology, and science and technology studies. The technologies we will consider include emojis, coffeehouses, memes, letters, telephones, video games, social media, and novels themselves.

**Requirements/Evaluation:** Students will write essays and critique their partner's essays in alternate weeks. Essays will receive detailed instructor feedback, including writing instruction.

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** STS concentrators

**Expected Class Size:** 10

**ENGL 293 (S) "Make it New": The Modernist Experiment (WS)**

In her essay "Mr. Bennett and Mrs. Brown" (1924), Virginia Woolf proposed that around 1910 "human character" itself had suddenly changed, rendering existing conventions "in religion, conduct, politics, and literature" no longer adequate to express the new age. "And so the smashing and the crashing began. Thus it is that we hear all around us, in poems and novels . . . the sound of breaking and falling, crashing and destruction." This course will explore the effort of artists in the decade or so before and after World War I to "make it new." We will read work by Conrad, Yeats, Frost, Pound, Joyce, T.S.Eliot, Mansfield, Woolf, Faulkner, Wallace Stevens, William Carlos Williams and others, and chart the range of innovative narrative and formal strategies Modernist writers adopted in their efforts to represent consciousness, experience, memory and the objective world more fully and accurately in an era of massive social, political and technological change. We will also consider some non-print media, including developments in the visual arts from the post-impressionists through to the surrealists, the work of the Bahaus, and early experiments in film.

Requirements/Evaluation: Active class participation; three papers rising from 3-7 pages; regular short reading responses

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Students who have declared or are considering English or Comparative Literature majors; students who have taken or placed out of a 100-level ENGL course.

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Three papers rising from 3-7 pages; regular short reading responses. Students will receive comprehensive feedback on their writing, and opportunities for revision.

Attributes: ENGL 200-level Gateway Courses ENGL Literary Histories C
ENGL 294 (F)(S) On Occupations: Work, Colonization and Contemporary Life  (DPE) (WS)

Cross-listings: COMP 299

Primary Cross-listing

Reading political essays, critical theory, historiography, and literary works, in this course we will ask what thinking through the different senses of "occupation" can teach us about contemporary life. The course wagers that there is a connection between why some nations are or were "under" occupation and why, as individuals, all of us must "have" occupations. On the one hand, we will think about work: What does it mean to have an occupation today? There was a time when most people could distinguish between the time of work and that of leisure. But we live under a different regime. What now is the difference between work and leisure for those working "gigs"? In the case of "creatives," Bifo Berardi says, it is the soul itself that has been put to work. And then there are those who are unemployed, i.e., those occupied by the most widespread form of work there is--looking for work. On the other hand, we will ask questions about colonialism: Did not Europe's occupation of the globe birth this world in which the only way to live is to be occupied in a narrow sense, i.e., to always be working or looking for work? And isn't one economic function of the occupation of peoples in our own times to create a cheap workforce? Finally, we will ask what art and political organizing can teach us about a "de-occupied" life--a life after work, a life without colonization. Writers will include Marx, Jyotiba Phule, Du Bois, Raymond Williams, Premchand, M. E. O'Brien and Eman Abdelhadi, Bifo Berardi, David Graeber, Mahatma Gandhi, Rabindra Nath Tagore, Mahasweta Devi, Edward Said etc.

Requirements/Evaluation: Students will read 100-120 pages each week. Each student will do one classroom presentation about the week's readings. Other assignments include weekly journals, an annotated bibliography, a proposal, and a final paper.

Prerequisites: 100-level English course or a 5 on the AP literature exam, or permission of the instructor.

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores considering majoring in English or Comparative Literature, and English majors who have not yet taken a gateway course.

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 294(D1) COMP 299(D1)

Writing Skills Notes: Students will write over 20 pages in the semester and they will receive extensive feedback.

Difference, Power, and Equity Notes: Students will read and discuss texts about the organization of power in contemporary society. They will reflect upon the economic structures that underpin a range of oppressive social forms.

Attributes: ENGL 200-level Gateway Courses ENGL Literary Histories C
Famous Men; Tillie Olsen, Yonnondio; Ida B. Wells, A Red Record; and Harriet Beecher Stowe, Key to Uncle Tom's Cabin.

Requirements/Evaluation: Evaluation will be based on class participation, writing and discussion. According to the tutorial format, you will be assigned a semester-long partner. You will be expected to write a critical paper every other week, alternating with the critical response to your partner’s work.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: This is a tutorial for sophomores. Priority will be given to potential American Studies majors, especially those who have taken AMST101; potential English majors will be considered as space is available.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 299(D2) ENGL 299(D1)

Writing Skills Notes: As per traditional tutorial format, this course will be writing intensive. Every week, one student will write a 5-page paper responding to the readings of the week; the other student will craft a response (a combination of written notes and critical conversation). The total amount of writing for each student will thus be upwards of 30 pages. There will be considerable attention given to argument, use of evidence, etc. The option to revise a paper will always be available.

Difference, Power, and Equity Notes: This course shares the core mission of the DPE initiative: to teach students how to “analyze the shaping of social differences, dynamics of unequal power, and processes of change.” The course is built around U.S. texts that speak truth to power. Researching and exposing the quantitative and qualitative data that prove the existence and effects of systemic racism, xenophobia, sexism, homophobia and uneven economic development, the writers we will study merge research, writing and activism.

ENGL 301 (F) Sublime Confusion: A Survey of Literary and Critical Theory

Cross-listings: COMP 301

Secondary Cross-listing

Which is more appealing, a roller coaster or a rose? For much of its history, art and literary theory has conceived itself as a science devoted to explaining and defining “beauty.” But running alongside this is an edgier countercurrent that worships something else: an experience of excitement, fear, suspense, or thrilling confusion often described as “the sublime.” The sublime interested early critics, from classical rhetoricians to the German Idealists, as a way to make aesthetics more scientific paradoxically by identifying the doorway through which art and literature escaped the realm of reason. More recently the notion of literature’s exciting confusion has played a key role in modern critical theory from Russian formalism to new criticism, deconstruction, postmodernism, and posthumanism. (In fact, poststructuralist criticism itself has a thrillingly confusing quality that we will not ignore.) We will take up a cross section of critical theory from classical times to the present, focusing on careful reading of relatively short texts by Plato, Aristotle, Addison, Burke, Schiller, Nietzsche, Shklovsky, I.A. Richards, Barthes, Derrida, Lyotard, Fredric Jameson, Haraway, and others. Case studies ranging from opera to Xbox will enlighten, thrill, and confound you. Written assignments will encourage you to parse these theories carefully and apply them to the literary texts that most interest you: prose, poetry, or drama from any time and place; film, visual art, or architecture; music, new media, or digital media, and beyond.

Requirements/Evaluation: attendance and active participation, several short response assignments, final project consisting of a scripted oral presentation and a 15-page final paper

Prerequisites: 200- or 300-level course in literature, theory, or philosophy, or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: students majoring or considering a major in a related field

Expected Class Size: 9

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 302  (S)  “A language to hear myself”: Advanced Studies in Feminist Poetry and Poetics  (DPE)

Cross-listings:  WGSS 330 / AMST 310

Primary Cross-listing

The title of this course comes from Adrienne Rich's 1969 poem "Tear Gas," grounding our study in 1960s, 70s, and 80s feminist activist poetry but also in our current moment to answer a fundamental question: what can poetry do for us? In this period, feminist activist poets were at the center of a revolutionary social justice movement that changed the world. Feminist presses published much of the new poetry. This course focuses on the theory and practice of feminist poetry and print culture during this period, and how feminist experiments in language changed how we understand American poetry. We focus on the theoretical writings and poetry chapbooks of a diverse group of poets who powered the movement, including Audre Lorde, Mitsuye Yamada, Nelly Wong, Robin Morgan, June Jordan, Joy Harjo, Gloria Anzaldúa, Sonia Sanchez, Adrienne Rich, Judy Grahn, and Pat Parker. We also read the work of some later feminist theorists, such as Sara Ahmed. We spend time in the archives, analyzing documents from the period, including feminist magazines and original publications of poetry chapbooks often published by the period's many feminist presses and consider how such attention allows us to construct alternative narratives for feminism and American poetry. Writing at the intersections of race, class, gender, and sexuality, and of multiple social justice movements (Civil Rights, anti-Vietnam War, LGBTQ activism, and Black Power), these poets gave us a new language to "hear," not only ourselves, but the experience and pain of others, and, in so doing, they moved personal experience into public discourse around issues of inequality and human flourishing in a democratic society.

Requirements/Evaluation:  short analysis papers (4-5 pages), creative (1-2 pages), Perusall annotations, longer final researched paper (10-12 pages) or alternative digital project, curated exhibition of archival materials in Special Collections

Prerequisites:  a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit:  25

Enrollment Preferences:  English, Women's, Gender, and Sexuality Studies, American Studies majors

Expected Class Size:  25

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 330(D2) ENGL 302(D1) AMST 310(D2)

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the feminist movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the period.

Not offered current academic year

ENGL 303  (S)  The New Television

TV has changed a lot, and it seems like a good time to figure out how. We will watch full seasons of landmark shows (Game of Thrones, Girls, Breaking Bad, The Sopranos) in order to answer a series of questions: How does the new television differ from older network shows? What are its distinctive storytelling techniques? What, in particular, is the appeal of complex and long-form narrative? Is modern television, as often claimed, a reinvention of the nineteenth-century novel? Which features does it take over from the novel and do they work the same way on the screen as they do on the page? But then what is television's relationship to the film genres that it also inherits? What happens to a gangster movie when you extend it out to eighty-six hours? What's the difference between a zombie movie and a really long zombie movie? And how is it that the new television has reclaimed the word binge, which used to be associated with broken diets and heavy drinking?

Requirements/Evaluation:  informal weekly writing; class participation; midterm and final essays, 30 pages total

Prerequisites:  a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam.
ENGL 304 (S) Prophecy, Poetry, and Property in the Radical Seventeenth Century
This course offers a study of seventeenth-century poetry and prose in a prophetic strain, with a particular (though not exclusive) attention to writing by women, from Aemilia Lanyer to Anna Trapnell to Anne Bradstreet. How did these writers mobilize the resources of ritual and scripture to criticize and remake the world? In what ways did religious devotion, erotic passion, and dream inform political thinking and shape the public sphere? We'll consider the relationship between intimate feeling, apocalyptic desire, and the material realities of a burgeoning British empire—enclosure, dispossession, transatlantic enslavement. As prophetic modes overlap with and inflect controversies such as the querelle des femmes, the witch hunt, and the execution of Charles I, we'll interrogate the construction and deconstruction of social identities. Thus a collateral concern will be recent critical approaches to the early modern category of "woman"—in Black feminism, queer studies, and Marxist-feminism. Throughout our inquiry, we'll take seriously the claim that the seventeenth century was "radical"—in the sense of enacting a "departure from what is usual or traditional" and in the sense of being the "root, basis, or foundation" of a modernity we are still living in and through (see Oxford English Dictionary, "radical" def. 7c and def. 2).

Requirements/Evaluation: Two 8-page papers (one at midterm and one final); maintenance of a reading journal or "commonplace book"; regular discussion posts; brief collaborative research exercises; and a creative response.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 305 (S) The American Modernist Novel
For the purposes of this course, the American modernist novel will include prose fiction written between 1910 and 1940 by such writers as Gertrude Stein, Willa Cather, F. Scott Fitzgerald, Ernest Hemingway, Jean Toomer, and William Faulkner. The emphasis will be on formal prose experimentation for the sake of representing new realities: radical re-conceptions of race and gender, revolutionary technologies such as the car or telephone, the Great War discrediting of all forms of authority. Newly unmoored questions of how to lead a life or organize a society are reflected by a set of unique innovations in how to write a novel.

Requirements/Evaluation: Three papers of ascending weight in determining the final grade, 3-4 pp., 4-5 pp., 5-7 pp. Class participation is expected and rewarded.

Prerequisites: 100-level English course or permission of instructor.
ENGL 311  (S)  Black Critical Theory, Black Avant-Garde  (DPE)

Cross-listings:  AMST 374 / AFR 376

Secondary Cross-listing
What is the relationship between violence and what constitutes the Black avant-garde and Black critical theory? Is it possible to conceptualize the latter two without an investigation of Black rebellion and its relationship between Black artistic and intellectual production? Can one argue that Black critique is none other than Black experimentation in form, or that Black abstraction is the requisite effector for all modes of Black praxis and thought? This course will explore these questions through a study of Black continental and diasporic avant-garde texts in multiple mediums. Alongside, we will also consider the emergence of contemporary Black critical theory, chronicling its development as both experimental and critical. Through the works of historical subjects of experimentation also considered to be objects critiquing in experimental form, the course will approach Black avant-gardism and Black critical theory as a productive opportunity to think about Blackness as critique, as experimentation, and as theoría. This pairing of Black avant-gardes and Black critical theory takes "avant" at its root--indicating what precedes or takes precedent--and "garde" as what is preeminent, or what protects. As such, we will start with the question of whether blackness, as an ideological fiction produced through violent historical ideologies and practices, could ever, or ever not, be anything but avant-garde?

Requirements/Evaluation:  Weekly discussion posts and questions, a research presentation, and two 10-12 page papers
Prerequisites:  None
Enrollment Limit:  15
Enrollment Preferences:  Preference will be given to AMST majors and prospective majors, as well as ENGL and AFR majors or prospective majors.
Expected Class Size:  15
Grading:  no pass/fail option,  yes fifth course option
Distributions:  (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 374(D2)  ENGL 311(D1)  AFR 376(D2)

Difference, Power, and Equity Notes:  This course examines race through the lens of historic modalities of power and violence. Additionally, it attends to the artistic, political, and intellectual production of a racialized population responding to ideological and state technologies that not only create difference, but also perpetuate asymmetrical relations of power.
Attributes:  AMST Arts in Context Electives  AMST Comp Studies in Race, Ethnicity, Diaspora  AMST Critical and Cultural Theory Electives

ENGL 312  (S)  Poetry and the Ecological Imagination

How does the human imagination encounter its environment? And how do poets reflect an increasing awareness of anthropogenic climate change and other forms of environmental catastrophe? In this class, we'll read selections from the long tradition of ecologically-minded poetry to answer these questions. Our readings will focus primarily on writers from Romanticism to the present, from John Clare and Gerard Manley Hopkins to contemporary writers including Juliana Spahr and Craig Santos Perez, whom we'll read alongside various theoretical texts that will introduce you to some of the major ecocritical concepts. Finally, we will explore via our own writing the ethical and aesthetic imperative to find ways of imagining the ever-changing relation between the imagination and the environment.

Requirements/Evaluation:  one 7-page paper, one 12-page paper, in-class presentation, thoughtful participation in discussions
Prerequisites:  either a 100-level ENGL course, a score of 5 on the AP English Literature exam, a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor
Enrollment Limit:  25
Enrollment Preferences:  English majors and those intending to major in English
Expected Class Size:  12
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D1)
Attributes:  ENGL Literary Histories B  ENGL Literary Histories C
ENGL 315 (S) Milton's Paradise Lost

Cross-listings: REL 319

Primary Cross-listing

If you know anything about John Milton, you probably think of him as some blind guy who wrote a really long poem about the Bible. It's hard to shake the feeling that Milton is the fustiest of English poets--dull, pious, brilliant and all, and not someone you would read if you didn't have to. But then what are we to make of the following? The first piece that Milton wrote that was read widely throughout Europe was a boisterous defense of the English Revolution. Milton was most famous in his lifetime as the poet who went to bat for the Puritan insurgents—the poet who came right out and said that the king looked better without his head. Of all the major English poets, Milton is the revolutionary. So a course on Milton is by necessity a course on literature and revolution. We will read Paradise Lost, widely regarded as the greatest non-dramatic poem in English, and a few other books to help us prepare for that big one. Some questions: How did the mid-seventeenth century, probably the most tumultuous decades in the history of modern Britain, transform the culture of the English-speaking world? What is the relationship between literature and the state or between literature and radical politics? Is there a poetics of revolution? How can a poet who seems to be writing for Sunday school—about God and Adam and Eve and the serpent—really have been writing about rebellion all along?

Requirements/Evaluation: one 6- to 8-page paper, one 10- to 12-page paper, informal weekly writing assignments, and active seminar participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam. If you are interested in taking the course without the prereq, do contact Prof. Thorne.

Enrollment Limit: 25

Expected Class Size: 15

Attributes: ENGL Literary Histories A

Not offered current academic year

ENGL 316 (F) Unfinishing America (DPE) (WS)

Cross-listings: AMST 326

Secondary Cross-listing

The Great American Novel is a moribund cliché. Few would argue that any one work of fiction could capture the essence of American life. In this class, we will flip the Great American Novel on its head by reading Ralph Ellison's unfinished second novel. After publishing the acclaimed Invisible Man in 1952, Ellison seemed poised to deliver the next Great American Novel. But he never did. When he died in 1994, 42 years later, he left behind thousands of pages of material, but no finished second novel. Why wasn't he able to finish it? Some of it was bad luck. Some of it was a struggle with genre and form. However, perhaps the real reason Ellison's novel proved impossible is what it was trying to say. This is a book about the historical trauma of racism. Therefore, the thesis of this class is that the Great American Novel cannot be written as long as American history remains whitewashed. Ellison's manuscript shows this in surprising ways, from its depiction of racial passing and the taboo of interracial sex to its extended exploration of Black and Indigenous cultures in the former Oklahoma Territory. In addition to Ellison, we will read the work of the Chicano author Tomás Rivera, whose fragmentary fictions provoke similar questions. This class culminates in a final project that asks students to "unfinish" an American cultural object.

Requirements/Evaluation: Assignments include a daily free-writing exercise, graded note-taking, three 1-2-page reflective essays, two brief creative writing assignments, and a final creative project.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: AMST majors, then juniors and sophomores
Expected Class Size: 15
Grading: no pass/fail option, yes fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 316(D1) AMST 326(D2)

Writing Skills Notes: Each student will be responsible for producing a reader's guide to Ellison's unfinished second novel. Students will write, rewrite, and revise their reader's guide throughout the semester. Three drafts will be due throughout the semester. A quality reader's guide will highlight the book's main themes, profile the main characters, and retrace the book's development. Students will also complete one draft of a guide to Rivera's novella, due at the end of the semester.

Difference, Power, and Equity Notes: "Unfinishing America" satisfies the Difference, Power and Equity requirement because it calls into question mainstream American culture from Black, Chicano, and Indigenous perspectives. It interrogates the relations of power that have driven American history, from the Civil War and Westward expansion in the 19th century to the struggle for Civil Rights against Jim Crow in the 20th. Finally, it asks what it would mean to have true equity amidst great diversity in American culture.

ENGL 317 (F) Black Migrations: African American Performance at Home and Abroad
Cross-listings: THEA 317 / DANC 317 / AFR 317 / AMST 317 / COMP 319
Secondary Cross-listing
In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

Class Format: discussion
Requirements/Evaluation: class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report
Prerequisites: none; open to all
Enrollment Limit: 15
Enrollment Preferences: Africana Studies majors and concentrators; Dance and Theatre majors; American Studies, Comparative Literature, and English majors

ENGL 318 (S) Literary Taste and After Taste
Why are some literary works acclaimed or neglected when they first appear, and why do their critical assessments change--sometimes drastically--over time? What does it mean to think of a work as 'before its time'? What is the relation between critical trends and their affinity for particular literary styles? In thinking about these issues, we will consider a few crucial instances: modernist poets and New Critics' celebration of Donne and Marvell over Milton in the early 20th century; 18th and 19th century writers' fascination with medievalism and the Gothic; deconstructionist critics' absorption with Romantic poetry; Marxist and neo-Marxist critics' qualified embrace of realism and critique of postmodernism; and recent and contemporary debates about the relation of aesthetic forms to representations of race, ethnicity, and gender.

Requirements/Evaluation: class participation and two essays, approximately 20 pages of writing

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 20

**ENGL 320**  (F)  Race and Psychoanalysis: Slavery and the Psyche  (DPE)

Cross-listings: AMST 365 / GBST 365 / AFR 365

Secondary Cross-listing

This course explores slavery and the psyche through a constellation of Black diasporic literary, visual, and theoretical texts from the US, Caribbean, and Africa. Unwieldy and generative, the opacity of race within the field (and practice) of psychoanalysis shares a fraught intimacy with the co-constitutive terrains of violence and race that form the unconscious. Querying what escapes the hermeneutics of psychoanalysis and aesthetics in the fantasies race engenders, we will examine modernity's articulation of racialization through conceptualizations--both fantasmatic and real--of self, world, knowledge, and possibility. Course texts may include: Edwidge Danticat's *The Farming of Bones*, Adrienne Kennedy's *Funnyhouse of a Negro*, Bessie Head's *A Question of Power*, Arthur Jafa's *APEX and Love is the Message and the Message is Death*, Conceição Evaristo's *Ponciá Vicêncio*, Lars von Trier's *Manderlay*, Charles Burnett's *Killer of Sheep*, Derek Walcott's "Laventille"; and, selections from Sigmund Freud, Jacques Lacan, David Marriott, Kathleen Pogue White, Franz Fanon, Hortense Spillers, Nathan Gorelick, Jared Sexton, Melanie Klein, Jacques-Alain Miller, Melanie Suchet, and Jean Laplanche. Note: This course will reflect the Continental tradition in philosophy. Student should be familiar with the basic interventions of psychoanalysis.

Requirements/Evaluation: Weekly discussion posts and questions, 2 Papers, 10-12 pages, Research presentation

Prerequisites: One Writing Skills or writing intensive course; one intro course in one of following: American Studies, Africana Studies, Comparative Literature, English, Global Studies, Philosophy, Psychology, Women, Gender, and Sexuality Studies

Enrollment Limit: 15

Enrollment Preferences: Juniors or Seniors with majors or concentrations in any of the areas: American Studies, Africana Studies, Comparative Literature, English, Global Studies, Philosophy, Psychology, and Women's, Gender, and Sexuality Studies

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1)  (DPE)

**ENGL 321**  (S)  Samuel Johnson and the Literary Tradition
Samuel Johnson (1709-1784) has been exceptionally influential not only because he was a distinguished writer of poems, essays, criticism, and biographies, but also because he was the first true historian of English literature, the first who sought to define its "tradition." We will read Johnson's own works and James Boswell's *Life of Johnson* to discover Johnson's talents, tastes, and standards as an artist, as a moral and literary critic, and as a man. We next will use Johnson's *Preface to Shakespeare* and *Lives of the Poets* to examine how this great intelligence assessed writers from the Renaissance through the eighteenth century. While reading his commentary on Shakespeare and his critical biographies of Milton, Dryden, Pope, and Gray, we will analyze selected works by these writers so as to evaluate Johnson's views and sharpen our understanding of the relationship between his standards and values, and the ones we hold today--both individually and collectively.

**Requirements/Evaluation:** midterm and final papers (15-20 pages total), and a take-home final exam

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 20

**Enrollment Preferences:** English majors, but all interested students are welcome.

Not offered current academic year

ENGL 324 (F) Romanticism, Belatedly (DPE)

**Cross-listings:** COMP 327

**Primary Cross-listing**

What is Romanticism? Instead of searching for an answer at the movement's supposed point of origin (1790-1830, in Germany, England, and France), we will begin in early twentieth-century South Asia. In the nineteenth century, English Romantic poetry and, to a lesser extent, ethico-political and aesthetic ideas associated with German Idealism circulated in South Asia as part of a colonial education aimed at producing a "class of persons Indian in blood and color, but English in tastes, in opinions, in morals and in intellect" (Macaulay). The intentions of this plan of education aside, it unwittingly opened channels for literary, philosophical, and political exchange that were harmful to colonial rule, and essential to how we understand worlds of literature today. Behind the backs of its homegrown, self-anointed inheritors, Romanticism in the "colonies" led multiple other lives and was transformed in encounters that must--belatedly--be read back into its originary texts. Hence, in counter-chronological fashion, in this class we will begin with important postcolonial works by Faiz Ahmad Faiz (Urdu), Suryakant Tripathi Niral (Hindi), Mahadevi Verma (Hindi), Sarojini Naidu (English), Mohammad Iqbal (Urdu and Persian), and Rabindranath Tagore (Bengali), to move on to Karl Marx and Heinrichs Heine (German), Charles Baudelaire (French), and George Eliot (English), to end with John Keats (English), William Wordsworth (English), and G.W.F. Hegel (German). In considering these texts with an eye to poetics and interpretation, we will pay close attention to concepts that they bring to the fore, key among them "belatedness" (Nachträglichkeit), "allegory", "critique," "non-identity." We will read non-English language texts in translation, though we will have occasion to discuss originals.

**Requirements/Evaluation:** One mid-term essay (6-8 pages), one presentation or participation in roundtable, one final paper (12 pages)

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 25

**Enrollment Preferences:** English majors, then sophomores considering the major

**Expected Class Size:** 25

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COMP 327(D1) ENGL 324(D1)

**Difference, Power, and Equity Notes:** This course examines how the political impact of colonization upon both Europe and South Asia gets expressed in literary productions of the nineteenth and the twentieth centuries. It explores the way these literary works understand the axes of social identity that shape oppression and inequity--coloniality, race, caste, gender--as constitutive of the unevenly developing world of capitalism. The concepts upon which the course focuses are essential to contemporary social critique.

**Attributes:** ENGL Literary Histories B ENGL Literary Histories C

ENGL 325 (S) Joyce, Woolf, and Proust

Cross-listings: COMP 366

Primary Cross-listing

This seminar focuses on novels by three of the most important writers of modernist fiction: Marcel Proust (Swann's Way, the first novel of his sequence In Search of Lost Time); Virginia Woolf (To the Lighthouse); and James Joyce (Ulysses, read in slightly abridged form). By juxtaposing these pathbreaking texts, we will examine the distinctive yet related ways in which they explore crucial preoccupations of modernism: the threat and the exhilaration of cultural loss in face of social and political transformations in the early twentieth century; the turn to memory, to art, and to objects as stays against de-stabilized subjectivity and as means of re-thinking value; the emergence of new forms of political and sexual identity; the heightening of consciousness to the verge of transport or disintegration; and the roots and perversities of desire. Students who have studied Ulysses in a previous course are welcome.

Requirements/Evaluation: regular class participation, two 8- to 10-page papers

Prerequisites: a 100-level ENGL course, a score of 5 on the AP English Lit exam, or a score of 6 or 7 on the Higher Level IB English exam; students who have taken ENGL 360 are welcome

Enrollment Limit: 22

Enrollment Preferences: English and Comparative Literature majors

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: ENGL Literary Histories C

Not offered current academic year

ENGL 327 (F) Autofiction

At a minimum, autofiction refers to contemporary fiction with writer-protagonists who plausibly resemble their author and who often share a name with him or her. When did it begin? Perhaps In Search of Lost Time and Portrait of the Artist as a Young Man are modernist precursors, but the category comes into its own in the twenty-first century, when writers who know that reality is a fiction nevertheless crave truth, and authors who know that selves are constructs need to express themselves. Or perhaps they know that if the world and self are already fictions, why disguise it by traditional plotting and characterizing? The critical world isn’t sure yet what to make of this widespread confounding of novel and memoir, so the course will be exploratory. We’ll read about seven books of the quasi-genre, chosen from early prototypes by Marguerite Duras and Peter Weiss, canonized exemplars by Ben Lerner and Dave Eggers, and recent experiments by Sheila Heti, Tao Lin, Jenny Offill, Nell Zink, Will Self, Rachel Cusk, and Ron Currie.

Requirements/Evaluation: No exams. Three papers, 4 pp., 5 pp., 6-8 pp. The final paper may have a creative component. Contribution to class discussions is expected and rewarded.

Prerequisites: 100-level English course or permission of instructor.

Enrollment Limit: 25

Enrollment Preferences: English majors, then sophomores considering the English major.

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Attributes: ENGL Literary Histories C

ENGL 328 (S) Austen and Eliot

Austen and Eliot profoundly influenced the course of the novel by making internal consciousness crucial to narrative form. In this course we will explore Austen’s innovative aesthetic strategies and the ways in which Eliot assimilated and transformed them. By placing each writer’s work in its
political and philosophical context-in Austen's case, reactions to the aftermath of the French Revolution, in Eliot's, to the failed mid-century European revolutions and the pressures of British imperialism—we will consider how each writer conceives social and historical exigencies to shape comedies and dramas of consciousness. Readings will include Austen's Pride and Prejudice, Emma, Mansfield Park, and Persuasion; Eliot's The Mill on the Floss, The Lifted Veil; and Daniel Deronda; selected letters and prose; and critical essays.

Class Format: discussion

Requirements/Evaluation: two papers of approximately 8-10 pages

Prerequisites: a Gateway course or permission of the instructor

Enrollment Limit: 25

Enrollment Preferences: junior and senior English majors

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: ENGL Literary Histories B

Not offered current academic year

ENGL 329 (F) Writing Gender in Sci-Fi and Speculative Fictions (DPE)

Cross-listings: WGSS 329 / STS 323

Secondary Cross-listing

This creative writing course will pair selected readings in feminist STS and queer theory with science fiction, speculative fiction, and horror stories that together put questions to gender. How and when is sci-fi a home for radical re-imaginings of gender? When and why does "genre fiction" house (and facilitate) radical gender politics—or their opposite? Readings may include works by Octavia Butler, Ursula Le Guin, Brian Evason, and Samuel Delany. Students will both analyze these fictions and take them as inspirations for their own stories and worlds.

Class Format: This course balance seminar-style discussion with workshops examining students' creative writing.

Requirements/Evaluation: Students will be evaluated on three substantial pieces of writing, in multiple drafts. Students will be able to choose their balance of creative and analytical (expository) prose (2-1 or 1-2). Attendance, along with seminar and workshop discussion, will count toward the final grade. There will be no exam.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: STS concentrators; WGSS majors; students who have not taken other creative writing courses at Williams.

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 329(D2) ENGL 329(D1) STS 323(D2)

Difference, Power, and Equity Notes: In this course students will confront and reflect on the operations of difference, power, and equity through readings, class discussions, and assignments. Readings include scholarship on the construction of gender and sexuality, as well as works of fiction that denaturalize the categories of sex and gender. Course assignments will include expository and creative writing, and students will work in both modes to imagine how this world could be otherwise and how other worlds could be.

Fall 2024

SEM Section: 01   W 1:10 pm - 3:50 pm   Ezra D. Feldman

ENGL 331 (F) Fanaticism

Cross-listings: COMP 333

Primary Cross-listing

From the early modern period on, writers of literature and political philosophy have repudiated fanaticism, whether as a religious, political, or amorous
posture. But what is fanaticism, and why should it be considered such a threat? In this course, we will examine these questions by considering literary texts that dramatize fanaticism in light of accounts by philosophers and historians. Readings will draw on literary works by Spenser, Swift, M. Shelley, Hog, Dickens, Eliot, Conrad, among others, and political philosophy and historical writings by Hobbes, Locke, Hume, Voltaire, Kant, Diderot, Burke, Hume, Carlyle, Adorno, and a range of recent critics. We will also watch films by Riefenstahl, Hitchcock and Pontecorvo, and look at paintings, drawings and sculpture by Fragonard, Goya, and Shibonare. Since fanaticism has recently had considerable political currency, we will also examine contemporary accounts that reanimate the debates and concerns of the course.

Requirements/Evaluation: Regular class participation and two papers, 7-10 pages in length.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 22

Enrollment Preferences: English and Comparative Literature majors, then qualified sophomores and first-year students.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ENGL 332  (S)  Aesthetic Outrage

Cross-listings: COMP 307

Primary Cross-listing

In this course we will explore interdisciplinary ways of understanding and theorizing the outraged reception of provocative works of film, theater, and fiction. When riots, censorship, trials, and vilification greet such works in moments of political and social upheaval, the public outrage is often strangely out of proportion to either the work's aesthetic nature or its overt commentary on the political crisis. Something powerfully symptomatic is at work, then: a set of threatened investments, unacknowledged values, and repressed ideas which surface explosively, but indirectly, in the aesthetic outrage. In an attempt to understand the strange logic of public outrage against works of art, we will explore the respective works' historical contexts, and use theoretical models--aesthetic, political, psychological, social--as a means of illuminating the dynamics of outrage and exposing understated linkages between a work's figurative logic and the political passions of its historical moment. We will study instances of outrage in the context of the French Revolution (Beaumarchais' *The Marriage of Figaro*), the wave of anarchist terrorism in turn-of-the-century Paris (Jarry's *Ubu the King*), the trials of Oscar Wilde for "gross indecency" (*The Picture of Dorian Gray*), the Irish Revolution (Synge's *The Playboy of the Western World* and O'Casey's *The Plough and the Stars*), and Stalinist collectivization (Eisenstein's suppressed film *Bezhin Meadow*). Non-literary reading will include historiographic work on these crises, as well as essays and excerpts by theorists from various disciplines, such as Kristeva, Foucault, Freud, Girard, Arendt, Sedgwick, Bakhitin, Douglas, and Rancière.

Requirements/Evaluation: active participation in class discussions, two papers 8-10 pages in length.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 22

Enrollment Preferences: English majors and Comparative Literature majors, then highly qualified sophomores

Expected Class Size: 18

Grading: no pass/fail option, yes fifth course option

ENGL 333  (F)  Feminist and Queer Horror Films  (DPE)

Cross-listings: WGSS 398 / THEA 390 / COMP 390 / AMST 390
This course focuses on pairing theoretical readings with a variety of horror films with feminist or queer themes. Many tropes are associated with this genre - "the final girl" in slasher movies, "the transvestite murderer," femme lesbian vampires, supernatural BDSM figures, vampires as allegories for HIV/AIDS, werewolves as metaphors for FTM gender transitions or puberty, lonely mothers in creaky houses as unreliable narrators, Satanic spawn, and creepy long-haired girls. Some films reinforce gender stereotypes while others snap on more explicitly feminist and queer lenses. This course functions as a survey of many different genres, introducing students to classic 1970s films and working up to the present day and we will learn how these tropes developed and then were subverted by more modern day films such as those by A24 Studies and the new renaissance of Black horror, etc. Most films will focus on the US, with some notable exceptions in Japan, Spain, and elsewhere globally. There will be graphic content. You must be 18 or over to take this class.

Requirements/Evaluation: Class participation, short reflection papers, 2-3 extemporaneous oral class responses, several creative assignments.

Prerequisites: None. Prior WGSS courses will be helpful.

Enrollment Limit: 15

Enrollment Preferences: Stage 1 is a statement of interest form; Stage 2 will be a very brief interview. There is NO preference by major or class year.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: Some of the creative assignments will have an "artsy-craftsy" component, but should not cost more than 25 dollars total per student per semester, though amounts will vary depending on how the student chooses to execute the assignment.

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 398(D2) THEA 390(D1) ENGL 333(D1) COMP 390(D1) AMST 390(D2)

Difference, Power, and Equity Notes: This course necessarily examines power when it comes to gender and sexuality - who has it? what do they do with it? how does this power turn deadly? how can agency be regained? Horror is almost never about equitable situations but rather the imbalance that comes from difference (along whatever axis) causing a lack of equity.

Attributes: WGSS Racial Sexual + Cultural Diversity Courses

Secondary Cross-listing

How can we capture the "liveness" of dance and performance through writing? How can the spoken and written word promote a deeper understanding of felt emotions expressed through embodied practice? In this tutorial, we will explore different modes of writing about performance such as ethnography, non-/fiction, and performative writing. While there will be skill-based goals and a set outline for the tutorial, core texts that will anchor the conversations and paired writing assignments will be selected according to the interests of enrolled students. Texts will be complemented with visual materials and/or virtual conversation with artist-scholars to encourage a multilayered experience with writing about performance. The course is reading and writing intensive, and oriented towards juniors, seniors, and those with deep interest in analytical and creative writing. Students will (i) read several monographs during the semester, (ii) produce creative and critical writing (at least 5-6 pages every two weeks and a longer final essay) (iii) be committed to the peer review and revision process of their own work and that of their writing partners, and (iv) participate in discussions about course materials and reflections about their writing process.

Class Format: enrollment in the course will require each student to have in-person or zoom meeting with the instructor before the first class meeting, and attendance in the first organizational meeting or class session.

Requirements/Evaluation: This tutorial is reading and writing intensive, and oriented towards juniors, seniors, and those with deep interest in analytical and creative writing. Students will (i) read several monographs during the semester, (ii) produce creative and critical writing (at least 5-6 pages every two weeks and a longer final essay) (iii) be committed to the peer review and revision process of their own work and that of their writing
partners, and (iv) participate in discussions about course materials and reflections about their writing process.

**Prerequisites:** none

**Enrollment Limit:** 8

**Enrollment Preferences:** Juniors and seniors, and those with specific interest in performance, creative, and analytical writing. Prior dance or performance experience not required.

**Expected Class Size:** 6

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**
ENGL 335(D1) DANC 302(D1)

**Writing Skills Notes:** Each student will write three 5- to 6-page papers on which the professor and peers will provide critical feedback on content, style, and form. After each cycle of feedback, students will have the option to submit a revision, and discuss the revision process and the revised paper. As the final assignment, students will select one of the three papers to develop into a longer essay, which will be 10-15 pages.

**Difference, Power, and Equity Notes:** The monographs that will anchor the tutorial engage with politics of identity as it manifests in both staged and in everyday performances. The introductory points of exploration and the objects of analysis in the course are bodies in motion. So our inquiry throughout the semester will necessarily include how bodies "make meaning" in a network of power relationships within the context of historical associations to markers of race, class, gender, sexuality, and socially constructed differences

**ENGL 338 (S) Literature of the American Renaissance**

**Cross-listings:** AMST 338

**Primary Cross-listing**
The term "American Renaissance" refers to a period of US writing, primarily a couple of decades before the Civil War but extending after it: the time of Poe, Emerson, Thoreau, Hawthorne, Melville, Dickinson, Whitman, Jacobs, and Douglass. At stake throughout was the soul of the nation in a time of exuberant political expansion, spiritual optimism, social experimentation, deadening social conventionality, spiritual constriction, labor exploitation, and slavery. The question repeatedly asked was what it means to be free. The question is personal, political, social, and spiritual, and always, for writers, literary: what are the limits or possibilities of writing freely? The course is foundational for any understanding of American literature of the 20th- and 21st centuries.

**Requirements/Evaluation:** Three papers: 4 pp., 5 pp., 6-8 pp. Active class participation is expected and rewarded.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on he Higher Level IB English exam, or permission of the instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** English majors; prospective English majors; American Studies majors; Comparative Literature majors

**ENGL 341 (S) Sexuality in US Modernisms** (DPE)
Cross-listings: WGSS 342

Primary Cross-listing

This course investigates how sexual identities, desires, and acts are represented and reproduced in U.S. literary and popular culture. Focusing on 1880-1940 (when, in the U.S. the terms "homosexual" and "heterosexual" came to connote discrete sexual identities), we will explore what it means to read and theorize "queerly." Among the questions we will ask are: What counts as "sex" or "sexual identity" in a text? Are there definably queer and/or transgender writing styles or cultural practices? What does sexuality have to do with gender? How are sexual subjectivities intertwined with race, ethnicity, class, and other identities and identifications? Why has "queerness" proven to be such a powerful and sometimes powerfully contested concept? We will also explore what impact particular literary developments--the move from realism to modernism--and historical events such as the rise of sexology, first-wave feminism and the Harlem Renaissance--have had on queer cultural production. The class will also introduce students to some of the most influential examples of queer literary and cultural theory. Readings may include works by authors such as James, Cather, Far, Hughes, Nugent, Stein, Fitzgerald, and Larsen, as well as queer literary theory and critique by scholars such as Butler, Coviello, Ferguson, Foucault, Freeman, Freedman, Hartman, Lorde, Love, Muñoz, Rich, Rodriguez, Ross, and Sedgwick.

Class Format: discussion/seminar

Requirements/Evaluation: active class participation, several short writing assignments, two 5-page papers, and one 7-9-page paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 25

Enrollment Preferences: English majors and/or students interested in WGSS

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 342(D2) ENGL 341(D1)

Difference, Power, and Equity Notes: This course considers the history and literature of sexuality in the US alongside questions of race, gender, class, region and more. It examines how literary form theorizes sexuality, and how sexuality affects literary form, in ways that consider (in)equity and power in a variety of contexts.

Not offered current academic year

ENGL 342 (S) Advanced Topics in Cultural Theory

Many people these days have views about the politics of pop culture. Audiences show up at superhero movies already asking questions about how Marvel has opted to represent this or that group. Fans don't need to be told that hip-hop in the US involves questions of power. So what are the questions we ask next? Can we get more precise about the role of politics in culture? Or about the role of culture in politics? Is there, for instance, a right way to represent injustices? And how exactly could culture and the media be made more democratic? Can the arts help us imagine better ways of organizing our societies? Does all political struggle have to involve the media? And what is the fate of art in societies in which everything is for sale? Readings will include Antonio Gramsci, Raymond Williams, Fredric Jameson, Theodor Adorno, Ernst Bloch, and others.

Requirements/Evaluation: one 6- to 8-page paper, one 10- to 12-page paper, informal weekly writing assignments, and active seminar participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam. If you are interested in taking the course without the prereq, do contact Prof. Thorne.

Enrollment Limit: 25

Enrollment Preferences: Preference given to students who have taken ENGL/COMP 117 and to English majors.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

ENGL 343  (S) Whitman and Dickinson in Context  (WS)

In this tutorial, we will read closely the works of two of the most influential and experimental poets in the nineteenth-century U.S., Walt Whitman and Emily Dickinson. In addition to studying in depth their poems and other writings--in Whitman's case, his essays, in Dickinson's, her letters--we will delve into some of the major critical debates surrounding their work, both individually and when compared to one another. For example, Whitman is often viewed as perhaps the most public nineteenth-century American poet, whereas Dickinson is regarded as perhaps the most "private." We will interrogate this assumption, exploring how each poet represents publicity and privacy in their work, as well as their efforts to "perform" and/or reform an American self. We will also examine how each poet engages questions of gender and sexuality, as well as contemporary debates surrounding such issues as abolition, slavery, women's suffrage, temperance, and settler colonialism. We will consider what role their whiteness plays in their poetry and personas. Finally, we will explore Whitman and Dickinson's relation to significant literary and philosophical movements of the period, including transcendentalism and the culture of sentiment. Throughout the course, emphasis will be on analyzing and generating interpretations of Whitman and Dickinson's works, constructing critical arguments in dialogue with other critics, formulating cogent written critiques, and carrying on an oral debate about a variety of interpretations. Students will meet with the instructor in pairs for an hour each week. They will alternate between writing 5- to 7-page papers and commentaries on their partner's papers.

Requirements/Evaluation: five 5- to 7-page papers, final paper, oral presentation and critique

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 10

Enrollment Preferences: English majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will write at least five 5-7 page papers, five responses to their partner's writing, and on-going commentary from the instructor on their writing skills.

Attributes: ENGL Literary Histories B

Not offered current academic year

ENGL 345  (F) Shakespeare on Page, Stage and Screen: Text to Performance  (WS)

Cross-listings: THEA 340 / COMP 343

Secondary Cross-listing

Four centuries on, Shakespeare still challenges us. How should we weigh the respective claims of our own era's concerns--with matters of gender, sexuality, race, class, or materiality, for instance--against historicist attention to the cultural, political and theatrical circumstances in which his plays were actually written? And when it comes to realizing the texts in dramatic performance, such challenges--and opportunities--multiply further. Critical fidelity to Shakespeare's times, language and theatrical milieu prioritizes a historical authenticity that can be constraining or even sterilizing. At the other extreme, staging the plays with the primary aim of making them "speak to our times" risks revisionary absorption in our own interests. We will read six plays, of different genres and written at different periods of Shakespeare's career. These will likely be Romeo and Juliet, Henry V, Twelfth Night, Hamlet, The Tempest, and A Midsummer Night's Dream. Close reading of the texts will be the priority, but we will also attend to the demands and opportunities of performance, and assess a range of recent film and stage productions.

Requirements/Evaluation: Three papers ranging from 4 to 7 pages; regular Glow posts; class participation.

Prerequisites: A THEA course; a 100-level ENGL course; a score of 5 on the AP Literature exam or a 6 or 7 on the IB exam; or permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: Theatre and English majors or prospective majors

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Writing Skills Notes: Three papers rising from 4 to 6+ pages; regular discussion board postings and several short response papers. Students will receive substantive feedback on their writing, and there will be opportunities for revision.
ENGL 346  (S)  Literary History: Shakespeare, Dickinson, Celan, Knausgaard

Cross-listings:  COMP 329

Primary Cross-listing

This course will consider literature as a distinctive kind of historical object, one that emerges within a specific linguistic, cultural, and political context and that, nevertheless, travels far beyond its point of origin into unknown and, indeed, unknowable futures. The four figures who will concern us this semester are interested in one another - the later writers are careful readers of the earlier ones - but our thinking will go beyond reception history and the dynamics of literary influence. Instead, we will focus on the way in which literature's own temporality structures its history and, indeed, the way in which history itself might be conceived in literary terms. We will read a lot of lyric poems, but we will end the semester with perhaps the most important contemporary European novel. We will also read a significant body of theory and criticism, including works by Theodor Adorno, Giorgio Agamben, Maurice Blanchot, Martin Buber, Sharon Cameron, Anne Carson, Jonathan Culler, Joel Fineman, Virginia Jackson, Boris Maslov, and Sianne Ngai.

Requirements/Evaluation:  Midterm paper of 6-8 pages, final research paper of 10-12 pages, thoughtful participation in class discussions

Prerequisites:  either a 100-level ENGL course, a score of 5 on the AP English Literature exam, a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit:  25

Enrollment Preferences:  English majors and those intending to major in English. Reading knowledge of German welcome but not expected.

Expected Class Size:  25

Grading:  no pass/fail option, yes fifth course option

Distributions:  (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes:  ENGL Literary Histories A  ENGL Literary Histories B  ENGL Literary Histories C

ENGL 349  (S)  Contemporary American Theatre: Poetry, Politics, Place

As Gertrude Stein once remarked, "The hardest thing is to know one's present moment." What is going on in U.S. theatre today? Who are the dramatists and theatre makers of the present moment? This survey course will introduce students to twenty-first century American drama and performance, focusing on the poetic, political, and environmental aspects of the art form. Topics to be considered may include: theatre as social practice, the rise of artivism, participatory, site-specific, and immersive theatre, social justice theatre, supernaturalism, changing labor practices in the industry, and the turn to digital performance. Artists and companies to be considered may include: Suzan Lori-Parks, Branden Jacobs-Jenkins, Quiara Alegría Hudes, Anne Washburn, Taylor Mac, Hansol Jung, Clare Barron, Jeremy O. Harris, Lucas Hnath, Lauren Yee, Larissa FastHorse, Jihae Park, The Civilians, Elevator Repair Service, Jackie Sibblies Drury, Eboni Booth, Sanaz Toossi, Alexis Scheer, and Jacklyn Backhaus. Assignments will include both critical and creative responses to the material addressed in the class. Whenever possible, we will attend live performances on campus and in the regional community.

Requirements/Evaluation:  written and dramaturgical-based assignments; a 10-minute oral presentation in pairs on a selected artist or group; a 5-7 page mid-term critical paper, and a final 7-9 page paper, 20-page theatrical script, or 5-10 minute live performance

Prerequisites:  none

Enrollment Limit:  16

Enrollment Preferences:  Theatre majors, or students interested in the arts

Expected Class Size:  16
ENGL 352 (F) Separation: An Introduction to Postcolonial Literature (DPE)

Cross-listings: ASIA 353 / COMP 350

Primary Cross-listing

Few themes in the history of human societies have produced as much writing as that of separation--from a lover, from one's homeland, from God(s). In the past two centuries, this theme has been essential to representing experiences of exile and migration in the wake of the colonially mediated transition to world capitalism. In this course, we will take up the theme of separation as a privileged point of entry into postcolonial literature and towards understanding the multiple meanings of "postcoloniality." We will encounter examples in which this theme shapes critical thought and helps imagine new modes of existence, as well as those in which the grief of separation shades into such overpowering melancholy that writing becomes impossible. We will also look at what the preoccupation with separation can tell us about the ways human beings relate to human and non-human objects, and how they make and experience history. To think through these issues, we will read nineteenth and twentieth century works dealing with experiences of love, ecstasy, migrancy, and exile, composed in diverse geographical, socio-political, and linguistic contexts. We will read works (novels, poems, memoirs, essays) and watch films from South Asia, Egypt, the Caribbeans, the US, and Europe, composed in multiple languages (English, Hindi, Urdu, Persian, French, Arabic, Bengali and Malyalam).

Requirements/Evaluation: mid-term paper (6-page), participation in class discussions and one roundtable, final paper (15-page)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors, then sophomores considering the major

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASIA 353(D1) COMP 350(D1) ENGL 352(D1)

Difference, Power, and Equity Notes: This course examines how the political impact of colonization upon both "colonizer" and "colonized" gets expressed in literary productions of the nineteenth and the twentieth centuries. It explores the way these literary works understand the axes of social identity that shape oppression and inequity--coloniality, race, caste, gender--as constitutive of the unevenly developing world of capitalism. The concepts upon which the course focuses are essential to contemporary social critique.

SEM Section: 01 TF 1:10 pm - 2:25 pm Paresh Chandra

ENGL 353 (S) Disinterest in the Bhagavad Gita

Cross-listings: COMP 313 / REL 353 / ASIA 351

Primary Cross-listing

In this course, students will read the Bhagavad Gita alongside selected responses to it. These responses range from philosophical and theological commentaries written in Sanskrit by Shankaracharya, Abhinavagupta, and Ramanuja, to later "Bhakti" poetic responses in other Indian languages, to 18th and 19th century European aesthetic and political commentary (Herder, Schlegel, Hegel), to the work of 20th century commentators like M.K. Gandhi, B.G. Tilak, B.R. Ambedkar and D.D. Kosambi. We will examine the Gita's theory of action and the place of disinterest in this theory. We will inquire into the social, metaphysical, and political conditions of possibility of such disinterestedness, and think about disinterestedness itself as a condition for political action and aesthetic experience. Finally, we will reflect on how such a comparative history of interpretation might help us model a dialectical history of thought.

Requirements/Evaluation: Weekly meetings, weekly reading; weekly essay or response. Attendance in 2-3 lectures over the semester.

Prerequisites: No prerequisites
**ENGL 353 (D1) Attention and Distraction**

Reverie, absorption, immersion, daydreaming: this class will be about the history, cultural forms, and affects of attention and distraction. We’ll occupy ourselves with a range of literary and visual works to get at the varied histories and states of attention from the past two centuries. The nineteenth century will be the locus of our investigations, and the realist novel--whose attention to the unnoticed and ordinary is one of its distinctive features, and whose size can lend itself as much to skimming as to intensive reading--will be of particular interest to us. But we’ll also read around in detective fiction, poetry, experimental novels about what happens when nothing happens, art history, Erving Goffman's sociology of everyday life, and theoretical works on perception, attention, and reading. Oscillating between the nineteenth century’s anxieties about attention and distraction and more contemporary texts, we will take the measure of the long arc of what Jonathan Crary calls a state of 24/7 attentiveness, an "unremitting glare of monotonous stimulation." Among our questions: Why does being deeply absorbed in an artwork or activity often feel a lot like zoning out, a drift into a state of distraction? Do artworks encourage, or discourage, certain forms of attention? What conditions--cultural, political, philosophical--made attention into a subject of concern over the past 200 years? Do certain literary forms encourage, or discourage, particular forms of attentiveness? Alongside our reading, we’ll engage in a variety of attentional exercises, and keep an attention journal to register and reflect on our own states of distraction, absorption, reverie, drift, etc.

Requirements/Evaluation: 3 papers, an attention journal, regular contributions to glow, and class participation

Prerequisites: English 100 level or Gateway Course

Enrollment Limit: 25

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

**ENGL 356 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora**

Cross-listings: ARTH 223 / AFR 323 / AMST 323 / COMP 322

Secondary Cross-listing

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as the late Congressman John Lewis' *March* and Ebony Flowers' *Hot Comb*, this course illustrates and critiques multiple ways the graphic novel commingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will build comic creation and analysis skills through short exercises, eventually building up to the
final project of a graphic short story that illustrates historical and/or autobiographical narratives. No art experience is required, only an openness to expanding one's visual awareness and composition skills. This course is often taught in collaboration with the Williams College Museum of Art's Object Lab program, which allows the class to have its own space and art objects that are directly related to the course topic. This class may feature Object Lab participation, film screenings, and collaborations with guest speakers.

Requirements/Evaluation: class participation, written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: If the enrollment limit is exceeded, preference will be given to Africana Studies concentrators or students who have taken AFR 200, the department's introductory course.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: this course is part of the Gaudino Danger Initiative

ENGL 357 (S) Film and Philosophy: Cavell and Hollywood Cinema

A central figure in the movement known as ordinary language philosophy who wrote compelling studies of Wittgenstein, Emerson, Thoreau, and Heidegger, Stanley Cavell was also passionately devoted to Hollywood cinema. Although the highly popular films of Hollywood's "Golden Age" in the '30s and '40s have often been dismissed as light entertainment, Cavell took such films very seriously. Following his early major study of the aesthetics of cinema (The World Viewed: Reflections on the Ontology of Film), he transformed the critical understanding of two central Hollywood genres that had previously been regarded as slight and commercial, in Pursuits of Happiness: The Hollywood Comedy of Remarriage and Contesting Tears: The Melodrama of the Unknown Woman. For Cavell, the seeming frivolity or pathos of such films energizes the subtle engagement of philosophical and political ideas that he traces in them. Cavell's culminating work on cinema, Cities of Words, explores ideas of moral perfectionism in essays on prominent philosophers and literary artists, paired with analyses of Hollywood films that for him pursue the same issues. His essays explore these films' meditations on the nature of happiness, the instability of identity and difficulty of self-knowledge, the surprising forms fidelity may take, the genuineness of false appearance, the explosiveness of desire in a world of compromise, and the claims and possibilities of moral growth. Yet his analyses never lose sight of the immediate pleasurable quality of such films as a popular art-form, and his acute eye allows him to single out and make use of their striking cinematic qualities. In few other thinkers is the disarming appeal of popular art brought together with the resonances of philosophical and literary thought so productively. Readings will be drawn from the four books named above, and will be analyzed together with films such as The Lady Eve, The Philadelphia Story, Gaslight, Adam's Rib, Stella Dallas, It Happened One Night, Letter from an Unknown Woman, and The Awful Truth.

Requirements/Evaluation: Active and regular participation in class discussions, and two papers 8-10 pages in length.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or consent of the instructor

ENGL 359 (F) Irregular Unions in James and Ford

Henry James and Ford Madox Ford helped to inspire the crucial shift in British fiction from late 19th-century classic realism to the pathbreaking modernism of the 1920s. Their formal experiments were driven in striking ways by their response to recent dissident trends in attitudes toward sexuality, gender, and marriage, and their consequent engagement with so-called "irregular unions," sexual relationships forged out of wedlock in the face of societal repression and in the name of more liberated ideas of sexual morality. For James and Ford, such revolutions in the social sphere prompted renewed scrutiny of conceptions of moral fidelity and integrity, new ways of capturing subjectivity and its limitations, and a radical probing of what it means to know. Their work reflects the transition from the norms of Victorianism to a disorienting modern world marked by newly permissive social behavior, class mobility and conflict, emergent technological and commercial forms, suffragism and "the New Woman," and world war. We will study such novels as James's *What Maisie Knew* and *The Ambassadors* and Ford's *The Good Soldier* and *Parade's End*.

**Requirements/Evaluation:** regular class participation, two 8- to 10-page papers

**Prerequisites:** a 100-level ENGL course, a score of 5 on the AP English Lit exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 22

**Enrollment Preferences:** English majors

**Expected Class Size:** 16-18

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**Attributes:** ENGL Literary Histories C

ENGL 362 (S) Advanced Writing for Television - Revision

Students will start with the first draft of their (previously written) pilot script. Each pilot will be evaluated by the class, the instructor and the writer, to create a plan for revision that reflects an understanding of story, script and series structure. Armed with a detailed outline for revision, each student will execute two drafts and a polish of their pilot.

**Requirements/Evaluation:** Students will work in a collaborative Writer's Room, as well as independently. Active participation in class discussions essential. Each student will execute two drafts and a polish of their series pilot. Grading: 50% class participation (discussion, notes), 50% final script.

**Prerequisites:** A completed pilot script for a television series. If script was not written for ENGL 291, enrollment subject to permission of instructor.

**Enrollment Limit:** 6

**Enrollment Preferences:** Students who have taken ENGL 291 and pre-registered for this course. If the class is over-enrolled, students will be given an assignment to determine admission.

**Expected Class Size:** 6

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

ENGL 364 (F) Boucicault to McDonagh: Irish Theatre, 1870 to the present (DPE)

**Cross-listings:** COMP 360 / THEA 336

During the Irish Literary Revival of c.1885-1920, Irish writers sought to assert "Irishness" as culturally distinctive, and resisted the marginalizing impacts of British colonial rule. The achievement of Independence in 1923 brought years of insularity and censorship, but over the past three decades Ireland's embrace of globalization and the hybridizing impacts of postmodernism has led to a remarkable flowering of creative vitality. This course will trace the evolution of Irish theatre over the past century-and-a-half. We will read plays by Dion Boucicault, Oscar Wilde, W.B.Yeats, J.M.Synge, Augusta Gregory, George Bernard Shaw, Douglas Hyde, Sean O'Casey, Samuel Beckett, Brendan Behan, Brian Friel, Marina Carr, Frank McGuinness, Christina Reid, Conor McPherson, and Martin McDonagh, and also chart the course of the founding and history of the Abbey Theatre, one of first National Theatres in Europe.
**Requirements/Evaluation:** Two essays of 6+ pages; regular Glow posts; class participation

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Theatre majors, English and Comparative Literature majors

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COMP 360(D1) ENGL 364(D1) THEA 336(D1)

**Difference, Power, and Equity Notes:** This course is centrally concerned with identity politics within a colonial context. Irish writers prior to independence from Britain sought to assert "Irishness" as culturally distinctive. After 1923, they continued to wrestle with the legacies of colonial subjection and the inferiorizing identifications that had been ingrained during colonial rule. The texts we will read centre on questions of cultural self-definition and explore (and resist) the process of othering.

**ENGL 365 (F) Wonderland(s): Alice in Translation**

**Cross-listings:** GBST 345 / COMP 345

**Secondary Cross-listing**

"What do you mean by that?" said the Caterpillar, sternly. "Explain yourself!" "I can't explain myself, I'm afraid, Sir," said Alice, "because I'm not myself, you see?" The confusion around personal identity, which Alice is seen to experience as she makes her way through Wonderland, can be examined productively as an allegory of translation. Beyond its representation of the developmental and socio-cultural transitions of a child, what happens to Alice, a seminal text in children's literature, when it travels down the rabbit hole to a new linguistic wonderland? For starters, the seven-year-old girl becomes Marie in Danish, Arihi in Maori, Ai-chan in Japanese, and Paapachchi in Kannada. Then there are the highly idiosyncratic humor, word play, embedded English nursery rhymes, and iconic illustrations by Tenniel. How do they fare in new linguistic, cultural, and even genre contexts? Lewis Carroll told his publisher in 1866: "Friends here seem to think the book is untranslatable." And yet. Over 200 translations later, including Kazakh, Shona, Papiamento, Braille, and Emoji, Alice continues to delight and confound readers all over the world and to pose myriad challenges as well as opportunities for translators. This course will serve as an introduction to the theory and practice of translation using Carroll's Alice as an anchoring primary text. We will examine key disciplinary issues and concepts, such as equivalence, domestication, foreignization, and autonomy, and challenge the old canard that translation leads ineluctably, and exclusively, to loss.

**Requirements/Evaluation:** active, regular, and substantive class participation; discussion leading; weekly translation exercises; 2-3 short writing assignments; final project

**Prerequisites:** students must have at least three years of college-level second-language instruction already in place, or the equivalent (advanced proficiency), or permission of the instructor

Fall 2024

**SEM Section:** 01 MWF 8:30 am - 9:45 am Janneke van de Stadt

**ENGL 369 (S) American Poetry**
In this course, we'll read the work of some of the key figures in American poetry and poetics from the last hundred years. We'll get an overview of the 20th century's major poetic movements and trends, as well as an intimate sense of several contemporary poets, some of whom we will hear and meet in person. We'll read a few writers deeply, tracing both their inheritances and also the ways they "make it new," in Pound's phrase, and asking what these innovations disclose about the formal, political, and experiential possibilities of poetry as a cultural form. At the same time, we will examine what these works reveal about the transactions between poetic practice and social life. How do these poems encounter the conditions of their day--wars on other shores, economic crises and globalization, commodity fetishism, technological progress, racial and gender oppression, ecological devastation--and theorize their work in relation to other forms of media? What do these poems tell us about life in the "American century"?

Requirements/Evaluation: midterm paper of 6-8 pages, final research paper of 10-12 pages, thoughtful participation in class discussions

Prerequisites: either a 100-level ENGL course, a score of 5 on the AP English Literature exam, a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 25

Enrollment Preferences: English majors and those intending to major in English

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

ENGL 370  (F)  Literary and Critical Theory in the Twentieth Century

Cross-listings: COMP 380

Secondary Cross-listing

From the rise of modern literary criticism around 1900 to the explosion of high theory in the 1980s and 1990s, the twentieth century witnessed an international flowering of new ideas about how to interpret art and literature: Russian Formalism, American New Criticism, French Structuralism and Deconstruction, and a welter of post- prefixed concepts that claim to transcend national boundaries: the poststructural, the postmodern, the postcolonial, the posthuman. What are the ideas associated with these different movements, and how are they connected? Does each represent a radical break with previous ways of reading, or do they actually build on one another and evolve in a systematic way? And given the entanglement between criticism and teaching, which are the theories that seem to define the work we do (and want to do) here at Williams? This course will focus on a very careful reading of essays representing major 20th-century critical schools (and a couple of their earlier precursors), by critics like Plato, Schiller, Shklovsky, Richards, Barthes, Derrida, de Man, Beauvoir, and Butler. Written assignments will encourage you to parse these theories carefully and apply them to the literary texts that most interest you: prose or poetry from any time and place; film, visual art, or architecture; music, new media, or digital media, etc.

Requirements/Evaluation: attendance and active participation, several short response assignments, final project consisting of a scripted oral presentation and a 15-page final paper

Prerequisites: at least one previous literature or theory course

Enrollment Limit: 15

Enrollment Preferences: Comparative Literature majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

ENGL 371  (F)  The Brothers Karamazov  (WS)

Cross-listings: RUSS 331 / COMP 331

Secondary Cross-listing
Widely hailed as one of the greatest novels ever written, Dostoevsky’s *The Brothers Karamazov* contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man’s earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky’s masterwork, and we will read a variety of secondary sources alongside *The Brothers Karamazov*, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky’s answers to these so-called “accursed questions” through the unique artistic form of *The Brothers Karamazov*.

**Requirements/Evaluation:** completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions

**Prerequisites:** at least one 200-level literature class

**Enrollment Limit:** 10

**Enrollment Preferences:** students majoring or considering a major in Russian, Comparative Literature, or English

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**ENGL 378 (S) Proust’s “In Search of Lost Time”**

**Cross-listings:** COMP 378 / RLFR 378

**Primary Cross-listing**

In this seminar we will study Marcel Proust’s novel-sequence *In Search of Lost Time*, widely regarded as one of the most transformative works of 20th-century fiction. The first-person narrative chronicling the life of a fictional figure bearing a close relationship to Proust himself spans several decades from the late 19th to the early 20th century, centering on French high society as it enters the modern world, shaped by historical events such as the Dreyfus Affair and the First World War. Proust's exploration of the consciousness of the protagonist, an aspiring writer, has led readers to see him as a philosopher of aesthetics, of the psyche, of time and memory, and of the nature of desire. His narrative ranges from meditations on such subjects to social satire to absorbing and sometimes soap opera-like plots exploring upward and downward social mobility and a wide array of sexual entanglements, straight and queer. Through his fluent prose, Proust renders the vicissitudes of desire, loss, and joy, of betrayal and emotional intransigence, and tests the power of memory and the imagination to recapture the past. Because of the length of *In Search of Lost Time*, the emphasis of the course will be more on reading (about 7 to 7½ hours per week) and less on writing (four or five 1½-page journal entries and a final paper of 8-10 pages) than the average 300-level course; and approximately one-third of the sequence will be bracketed as optional reading.

**Requirements/Evaluation:** Regular class participation, several 2-page journal entries, and a final paper of 8-10 pages

**Prerequisites:** a 100-level ENGL course, a score of 5 on the AP English Lit exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 22

**Enrollment Preferences:** English, French, and Comparative Literature majors

**ENGL 382 (F) Advanced Workshop in Poetry**
As an advanced poetry workshop and reading seminar, this class assumes that its members are already practicing poets with a grounding in the foundational techniques of poetry writing. We will work in a spirit of shared experiment, pushing our inquiries into this art form further and developing a community of writers engaged in collaborations on and off the page. Readings and assignments will investigate different impulses—formal, textural, tonal, thematic—in poetry across time. I will ask you to inhabit, query, stretch, and even resist these impulses as you develop your own poems. My hope is that through sustained interaction and collaboration with each other, your writing will undergo a variety of productive evolutions.

**Class Format:** This workshop will include weekly readings and writing assignments, frequent improvisations and collaborations, and the attendance of several arts events.

**Requirements/Evaluation:** engaged participation; successful completion of assignments; demonstrated commitment and substantial improvement, as evidenced by a final portfolio of revised poems.

**Prerequisites:** ENGL 281 or permission of instructor.

**Enrollment Limit:** 12

**Enrollment Preferences:** All interested students should pre-register and will be emailed with instructions if the course is over-enrolled.

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1)

**Attributes:** ENGL Creative Writing Courses

---

**ENGL 383 (F) Advanced Fiction**

A further consideration of the complexities and possibilities involved in the writing of short fiction. Exercises, short assignments, and discussion of published fiction will be combined with workshops of student stories and individual conferences with the instructor.

**Requirements/Evaluation:** 30 pages of fiction and six exercises

**Prerequisites:** ENGL 283 or 385 or permission of the instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** should the course over-enroll selection will be made on the basis of writing samples

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**ENGL 384 (S) Advanced Fiction Workshop**

An advanced workshop for students with experience writing fiction and an understanding of the basics of plot, character, setting, and scene. Exercises and discussion of published fiction will be combined with workshops of student fiction and individual conferences with the instructor. Writers will submit manuscripts for discussion, receive feedback from peers, and revise their work.

**Requirements/Evaluation:** Active participation, successful completion of assigned exercises and story drafts, and a final portfolio of revised fiction.

**Prerequisites:** ENGL 283, or permission of the instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** All interested students should pre-register and will be emailed with instructions for a writing sample if the course is over-enrolled. Please note that pre-registration is not a guarantee of a place in the class.

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)
ENGL 387 (F) The Fabrication of Nature in Early Modernity: Literature, Science, Empire

Writers in early modern Europe frequently conceived the order and movement of nature in terms of one of two central figures: as a book written by God or as a divinely woven tapestry. This course traces an arc from these metaphors to Karl Marx's claim that "the sensuous world [is] a historical product, the result of activity of a whole succession of generations." Taking up episodes in the history of literature and science between the sixteenth and eighteenth centuries, our aim will be to study the ways that poetic speculation, scientific investigation and experiment, and capitalist expansion (as well as political ambition and struggle) have colluded in the fabrication of "nature"—theories of the cosmos and of climate, of animal and plant life, and of human difference. How does a close study of literary language and form help us to discern nature as a historical product intimately connected to processes of dispossession, to the circulation of goods and bodies, and to the formation of nation and empire? Specific topics may include the Copernican Revolution, the discovery of the microscopic world, fantasies of life on the moon, the literal and discursive "discovery" of Africa and the Americas, mappings of the human body, the figure of the magus and the witch. We're likely to read some drama (Christopher Marlowe, William Shakespeare), essays (Michel de Montaigne, Francis Bacon, Galileo Galilei, Robert Hooke, René Descartes), poetry (John Donne, John Milton, Andrew Marvell, Margaret Cavendish, Lucy Hutchinson), and fiction (Aphra Behn, Daniel Defoe, Jonathan Swift). While the literary will be our "lens," the course should also appeal to students with interests in the sciences, environmental studies, and/or social thought.

Requirements/Evaluation: Two 8-page papers (one at midterm and one final); maintenance of a reading journal or "commonplace book"; regular discussion posts; and a creative response.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors; Environmental science majors and concentrators

ENGL 388 (S) Fiction Writing Workshop (DPE) (WS)

Cross-listings: LATS 322

Secondary Cross-listing

This workshop is focused on the art and practice of writing fiction and geared toward students interested in working on creative honors theses. Readings include published fiction by primarily Latin and other writers who center Global South experiences, with attention paid to how each author employs narrative elements—characterization, plotting, structure, dialogue mechanics, setting, tone, theme—as well as the values and visions expressed. Students will present short fiction or novel excerpts for peer critique and the editorial advice of the instructor. Regular in-class exercises and take-home assignments will help students expand their narrative skills.

Requirements/Evaluation: Attendance and class participation, regular writing exercises, 4- to 5-page midterm paper (close-reading a text), 10- to 15-page final creative paper (close-reading a text and creative-writing response)

Prerequisites: LATS 222- Ficciones

Enrollment Limit: 15

Enrollment Preferences: LATS concentrators, honors theses

ENGL 389  (F)  Fiction of Virginia Woolf

Cross-listings: WGSS 389

Primary Cross-listing

"Let us record the atoms as they fall upon the mind in the order in which they fall, let us trace the pattern, however disconnected and incoherent in appearance, which each sight or incident scores upon the consciousness. Let us not take it for granted that life exists more fully in what is commonly thought big than in what is commonly thought small" ("Modern Fiction"). Virginia Woolf's fiction represents a self-conscious and highly experimental challenge to the conventions of Victorian and Edwardian fiction, in an effort to re-center the novel on lived experience. This course will explore the evolution of the innovative fictional forms by which she tried to bridge the gap between the experience of consciousness and its representation in language. We will also consider the links between Woolf's concern with in the fluidity of consciousness and her interest in gender fluidity and androgyny. We will read most of the major novels, probably including The Voyage Out, Jacob's Room, Mrs. Dalloway, To the Lighthouse, Orlando, The Waves, and Between the Acts, together with selected short fiction and critical essays.

Requirements/Evaluation: discussion, weekly journal, three 4- to 6-page essays

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: none

ENGL 390  (F)  Robert Frost and Seamus Heaney

This seminar examines the achievement of two of the most influential poets of the last hundred years: America's Robert Frost (1874-1963), and Seamus Heaney (1939-2013)--the Nobel laureate widely acknowledged as the greatest Irish poet since Yeats. They have garnered high praise from elite literary critics, and also captured the imaginations of a broad reading public. They write in an idiom that is deeply rooted in the ordinary vernacular speech of their respective countries, but rises above it into a universal language that transcends place and time. Their images first focus our gaze on the natural world we can see all around us, but then subtly shift our attention to what can't be readily observed or reliably known. Their poems can initially appear simple or self-evident in their meanings, but then quietly double-back on us with unexpected forms of mystery and complexity. To get a comprehensive sense of the arc of their careers, we will read most all of their poems, with each class discussion focusing on a few particularly important texts. We will also read some of their essays and lectures on the art and purpose of poetry. Where appropriate, we will attend to the biographical, cultural, and (especially with Heaney) political circumstances that shaped their opportunities as artists.

Requirements/Evaluation: Midterm and final papers (15-20 pages in total)

Prerequisites: A 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor.
ENGL 391 (F) Contemporary North American Queer Literatures and Theories (DPE)

Cross-listings: WGSS 391

Primary Cross-listing

Moving through the mid-twentieth century and into the twenty-first, this course will consider how North American writers have represented queer life in all its complexities. From the problem of the happy ending to the intersectional politics of representation, the narrative complexities of coming out to the rejection of identity, the course will consider the relationship between literary form and queer content. In so doing, it will also touch upon some of the key debates in queer literary theory and consider the impact of events such as civil rights movements, gay and lesbian and trans uprisings, the AIDS crisis, debates over respectability politics, and current efforts to police what students read in schools on literary and cultural production. Readings may include work by such authors as Baldwin, Highsmith, Rich, Lorde, Delany, Kushner, Feinberg, Bechdel, Thom, and Machado and theorists such as Ferguson, Sedgwick, Fawaz, Love, Butler, and Hartman.

Requirements/Evaluation: active class participation, several short writing assignments, two 5-page papers, and one longer research paper.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor;

ENGL 394 (F) The Nature of Nature

Cross-listings: ENVI 390

Primary Cross-listing

"Nature" is one of the commonest words in English. And yet what does it mean? Is it primarily descriptive (all living things), or normative ("natural" foods, "human nature")? This course will consider the richly incoherent ways we think about the living world, paying particular attention to the difficulty of narrating processes that are too big, too small, too quick, or too slow for direct human apprehension. We'll explore the way popular nature writing mingles scientific reporting with implicit and explicit judgments about human identity, and take up the insoluble problem of our proper relation to animals. Considerable attention will be paid to the ethical dimensions of contemporary environmental consciousness and unconsciousness. Writers studied will include Elizabeth Kolbert, Descartes, William Cronon, and Charles Darwin.

Requirements/Evaluation: Several short exercises, two six-page comparative essays, and a final self-designed project, subject to my approval. Active participation in class. The final project should explore something serious -- about nature, about yourself -- in ways that are not merely verbal or
academic, but instead involve a sense of risk.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 25

**ENGL 395  (S) Shakespeare's Hands: Literary Labors and the Politics of Embodiment**

The body part that might be said to distinguish the human, a "hand" also signifies metonymically--to indicate a person doing manual (from the Latin manus and French main), domestic, or aesthetic labor. Think of a sailor, a weaver, a soldier, but also an artist, musician, writer, or actor. This course will read a handful of Shakespeare's plays and poems with an attention to the oftentimes marginal figurations of labor and work, asking how such a focus can illuminate the politics of embodiment in the early modern era (as well as in later modern stagings and rewritings). What might allusions to textile production in Othello tell us about the play's contestation of ethnicity and sexuality? How does the performance of hauling wood in The Tempest afford an inquiry into racial formation and its connection with enclosure, colonization, and enslavement? What's the relationship between the "mechanical" craftwork and the mercantile imaginary of A Midsummer Night's Dream? We'll also spend some time considering the economy of early modern play-making, and the disciplining of the hand in the early modern schoolroom. How does the study of such literary labors change or inflect the way we describe generic forms (tragedy, comedy, lyric) and the way we read otherwise central gestures of Shakespearean plots: clasping, lending, building, mending, praying, stealing, murdering, mothering. Each of Shakespeare's plays will anchor a set of other readings in Shakespeare's sources and contemporaries (e.g. Burton, Montaigne, Hayklut, Petrarch, Marlowe, More) and in theories of work, labor, and the body (e.g. Ahmed, Arendt, Bourdieu, Butler, Fanon, Foucault, Marx, Ngai).

**Requirements/Evaluation:** One midterm paper and one final short research paper; maintenance of a reading journal or "commonplace book"; regular discussion posts; a recitation; and a creative response.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

**Enrollment Limit:** 25

**Distributions:** (D1)

**Attributes:** ENGL Literary Histories A

---

**ENGL 396  Theater and Voyeurism**

Seventeenth-century philosophy was ambivalent about the senses. Around the same time as Descartes was wondering whether everything he had ever seen, heard, and felt might have been an illusion produced by an evil deceiver, Francis Bacon was placing the close observation of nature at the center of a new scientific practice. Do the senses shore up the subject by distancing her from objects and from others and by providing her with insight about them? Or do the senses make her vulnerable to a world that is endlessly and often violently imposing itself on her? We will consider this problem in cultural and intellectual history through the case of the theater, with a special focus on tragedy. Ancient Greek tragedy made the mere fact of seeing the basis of an epistemological difference between the audience (whose looking is a privileged form of knowing) and the protagonist (who is
paradigmatically blind), and this difference can be understood as a way of reflecting on the conditions of the theatrical medium itself: the audience
sees the character, but the character does not see the audience. Early modern tragedy drew on the Greek tradition of dramatic irony, but wondered
whether looking was as straightforward as it looked, making voyeurism a two-way street: one form of seeing what others don't involves being forced to
see something unbearable, and early modern theater took a special interest in obscenity, which Greek theater tended to avoid or marginalize. We will
consider works by Homer, Sophocles, Euripides, Aristotle, Ovid, Seneca, Marlowe, Spenser, Shakespeare, Vermeer, Jonas Barish, Laura Mulvey,
Jacques Rancière, and Michael Fried.

Requirements/Evaluation: One 7-page midterm paper, one 12-page final paper, thoughtful participation in class discussions
Prerequisites: a 100-level English course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 25
Enrollment Preferences: English majors and those intending to major in English
Expected Class Size: 25
Grading:
Distributions: (D1)
Attributes: ENGL Literary Histories A

ENGL 397  (F)(S)  Independent Study: English

English independent study. The current department chair is the official "Instructor," but an independent study can be advised and graded by any willing member of the department.

Requirements/Evaluation: decided by faculty advisor
Prerequisites: unusually qualified and committed students who are working on a major writing or research project must first find an advisor for the project
Enrollment Limit: 100
Enrollment Preferences: unusually qualified and committed students who are working on a major writing or research project must first find an advisor for the project
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option
Distributions: (D1)

ENGL 402  (S)  The Historical Novel

Cross-listings: COMP 406

Primary Cross-listing

Setting a novel in a prior time period risks estranging a reader, yet the genre has roused deep-rooted interest, intense critical debate, and aesthetic daring. In this course, we will explore the complex and layered uses of a historical past in literary works of the seventeenth through twenty-first centuries, by way of novels by Madame de Lafayette, Scott, M. Shelley, Dickens, Eliot, Ford, Woolf, Morrison, Sebald, and Roy. Exploring the uses of gothic and sensational effects, dystopian and utopian possibilities, and fractured time, we will consider the aesthetic and political experiments historical novels have spawned. We will do so in context of the sustained critical engagement with the genre by such thinkers as Lukacs, Benjamin, Adorno, Jameson, McKeon and Moretti.

Requirements/Evaluation: class discussion and two 8-10 page papers or one longer final paper.
Prerequisites: a 100-level English course and a 300-level English course or permission of the instructor
Enrollment Limit: 15
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
This course is cross-listed and the prefixes carry the following divisional credit:
COMP 406(D1) ENGL 402(D1)

ENGL 411  Psychoanalysis and Its Discontents: The Psyche and the Social (DPE)
For many decades, psychoanalysis has been profoundly influential to radical thinkers seeking to overthrow regimes of racism, colonialism, heteropatriarchy, capitalism, and ableism. At the same time, psychoanalysis has also been crucial to enforcing those very regimes. Whether mobilized towards liberatory or oppressive ends, it is difficult to overstate psychoanalysis's influence on intellection, politics, and everyday social existence over the last century--even though we don't always realize it's there. If you bristle at the mention of Freud but think microaggressions are real, content warnings are a good idea, or that sharing about your feelings supports your wellbeing and relationships, your beliefs and values are probably indebted to psychoanalysis. This class surveys psychoanalytic perspectives on "the social," that is, race, gender, sexuality, capitalism, dis/ability, imperialism, and so on. It also provides an introduction to basic foundations of psychoanalytic thought--especially Freud, object relations theory, and a bit of Lacan--with an emphasis on how the psychoanalytic canon underpins contemporary queer, feminist, and postcolonial theory; ethnic studies; disability studies; and religious studies. Building from foundations, we'll also examine radical psychoanalysis alongside radical critiques of psychoanalysis. Additional topics and bodies of thought include trauma, Afrofeminism, sexual difference feminism, antipsychiatry, and schizoanalysis. This class satisfies the WGSS Junior/Senior Seminar major requirement.

Requirements/Evaluation: weekly discussion questions, oral presentations, participation, dream journal, final research project
Prerequisites: Students will benefit from coursework backgrounds in WGSS, AMST, ethnic studies, and/or the humanities broadly.
Enrollment Limit: 19
Enrollment Preferences: WGSS majors, juniors/seniors
Expected Class Size: 10
Grading:
Unit Notes: senior seminar
Distributions: (D2) (DPE)
Difference, Power, and Equity Notes: This class examines psychoanalysis's role in shaping difference, power, and equity.
Not offered current academic year

ENGL 417  (S)  The 19th Century and Its Shadow
Cross-listings: AFR 303
Primary Cross-listing
This course explores canonical American literature from the nineteenth century alongside a selection of contemporary literary and cinematic texts that call on and intervene with this body of work. Following Toni Morrison's charge that the contemplation of a black presence "is central to any understanding of our national literature and should not be permitted to hover at the margins of the literary imagination," this course focuses on how ideas of race are explored throughout the canon and how they have been carried forward. Works considered throughout the term come from, among others, Julie Dash, Frederick Douglass, Saidiya Hartman, Harriet Jacobs, Mat Johnson, Herman Melville, Toni Morrison, Nate Parker, Edgar Allen Poe, Quentin Tarantino, Mark Twain, and Colson Whitehead.

Requirements/Evaluation: weekly reading responses, active class participation, three close readings (500 words each), annotated bibliography, class presentation, final paper (13-15 pages)
Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 15
Enrollment Preferences: English majors, then sophomores considering the major
ENGL 418 (S) Modernisms and the Archive

Cross-listings: AMST 418

Primary Cross-listing

This seminar positions us at the intersection of archival theory, print culture, and literary study in order to chart new pathways for understanding the making of modern poetry and poetics during the period of literary history (from 1900 to 1945) that we most closely associate with the term Modernism. Modernist Studies is at the moment undergoing a major and exciting shift made possible by digital archives that allow us to access and document the rich intertextual experience of reading Modernism as it unfolded in the influential little magazines that came to define Modernisms. Some, like Poetry magazine, defined the new poetry strictly along aesthetic lines and treated these publications as collectible objects. Others, such as The Crisis, brought together poetry and the politics of race and social justice and encouraged, as Bartholomew Brinkman has argued, "both aesthetic and socially engaged readings." We take advantage of digital archives, as well as physical ones, in order to tell new stories about both familiar and unfamiliar writers that can be discovered at the intersections of literary history and archives. Students will also have the opportunity to work in the Sterling Brown archive here at Williams. Recently acquired by Williams College Library Special Collections, this significant archive documents the life, work, and poetic practice of African-American writer and educator Sterling Brown, whose poetry and prose spans nearly five decades of the twentieth century, yet Brown has often been left out of the narrative we tell about modern poetry. Work in the Sterling Brown archive will culminate in a curated public exhibition featuring your discoveries. Iain Bailey has argued that we should think of the archive "as a place of work, rather than as a cache from which to draw certainties." With this caveat in mind and in the spirit of discovery, we will act over the course of the semester as investigators, curators, collaborators, and inquirers in the workshop of literary production and its aesthetic products.

Requirements/Evaluation: Short papers, archival presentations, final paper or digital project (12-15 pages)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 15

Enrollment Preferences: English Majors, American Studies Majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Not offered current academic year

ENGL 483 (S) Representing History

Cross-listings: COMP 483

Primary Cross-listing

Moments of political turmoil expose the highly charged ways in which a culture structures itself around a narrative past. In this course, we will read literary and cinematic works that invoke such moments of upheaval -- the French and Russian Revolutions as well as those of 1848, the rise of fascism and the Great Depression of the 1930s, the battle for Algerian independence, and the AIDS crisis -- in order to explore those fraught narratives of the past. We will consider such issues as the aesthetics of fascism and of democracy under pressure, fantasies of decolonization, representational clashes of culture, forms of affective and sexual disorientation, and the uses of melancholy in representing historical loss. Readings
will be drawn from literary works by Mary Shelley, Balzac, Eliot, Conrad, Kafka, Borges, Stoppard, Kushner, Morrison, Pamuk, Bolano, Sebald, and Philip, and essays by Kant, Burke, Marx, Benjamin, Adorno, Foucault, Jameson, Lefort, and Ahmed. Films will include such works as Eisenstein’s *October*, Riefenstahl’s *The Blue Light*, Wellman’s *Nothing Sacred*, and Pontecorvo’s *The Battle of Algiers*.

**Class Format:** discussion

**Requirements/Evaluation:** two shorter or one longer paper/s, approximately 20 pages

**Prerequisites:** a 300-level English course or permission of the instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** English and Comparative Literature majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

**ENGL 493 (F) Honors Colloquium: English (WS)**

A colloquium for students pursuing critical theses and critical specializations. Students will present and critique their work in progress, and discuss issues particular to researching and structuring a long analytical thesis. We will also discuss the work of a variety of recent critics representing a range of methods of literary study. Satisfactory completion of the course will be required for students to continue on in the honors program. The course will meet sometimes as a full seminar and other times in tutorial-style small groups.

**Requirements/Evaluation:** participation and individual progress on the thesis project, which will be determined in consultation with each student’s honors advisor

**Prerequisites:** admission to the department Honors program

**Enrollment Limit:** none

**Enrollment Preferences:** none

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (WS)

**Writing Skills Notes:** Students will write a 20-page thesis chapter in stages and over multiple drafts. Students will receive from the instructor timely comments on their writing, with suggestions for improvement.

Fall 2024

**Distributions:** (D1)

Spring 2025

HON Section: 01  TBA  Bernard J. Rhie

**ENGL 497 (F)(S) Honors Independent Study: English**

English honors thesis. Required of all senior English majors pursuing departmental honors in creative writing.
ENGL 19 (W) The Personal is Political: A Narrative Nonfiction Writing Workshop

Since St. Augustine's Confessions, great political thinkers have crafted personal stories as evidence of and witness to their own political times. Frederick Douglass and Harriet Jacobs told their stories to further the abolitionist movement. W.E.B. DuBois, James Baldwin, and Simone de Beauvoir ushered us through the turbulent 20th century showing how the personal is political, and the political, personal. Today, Ta-Nehisi Coates, Suki Kim, Maggie Nelson, Kiese Laymon, and Claudia Rankine, among others, show us how well-crafted personal stories can bring important political ideas to the forefront of our collective imagination. Anticipating criticism of the form, Beauvoir wrote in the preface to her 1961 autobiography that "if any individual... reveals himself honestly, everyone, more or less, becomes involved. It is impossible for him to shed light on his own life without at some point illuminating the lives of others." In this workshop, you will do just that, crafting a personal nonfiction story in essay form. We'll meet for six hours each week, splitting our time between discussions of the published work we're reading and a workshop-setting discussion of the work you're producing. Your engagement with this class will occupy time outside of the classroom as well, during which you'll be engaged in the writing process and reading for class.

Requirements/Evaluation:  Paper(s) or report(s); Presentation(s)
Prerequisites:  the spark of an idea about which you'd like to write an essay
Enrollment Limit:  12
Enrollment Preferences:  by seniority, (starting with seniors, who won't have another chance to take it) because I've found older and more experienced students get more out of the class than first-years.
Expected Class Size:  NA
Grading:  pass/fail only
Unit Notes: Julia Munemo directs the Writing Center. Her personal, political stories include her 2020 memoir The Book Keeper and a (hopefully forthcoming) collection called Dreaming in Whitopia: Essays on Race, Mental Health, and Motherhood.
Materials/Lab Fee:  $30

ENGL 22 Shakespeare's Love's Labor's Lost

A close study of Shakespeare's brilliant and strange comedy, Love's Labor's Lost, culminating in a performance. No prior experience in the theater is required, not least because your instructor is, in this area, an ignorant schoolmaster.

Requirements/Evaluation:  Engaged participation in reading, discussion, and performance
Prerequisites:  None
Enrollment Limit:  25
Enrollment Preferences:  Majors and those intending to major in the arts and humanities
Expected Class Size:  25
Grading:  

Not offered current academic year

ENGL 24 (W) The Craft of Fiction: A Short
In Bird by Bird, Anne Lamott advises aspiring authors to approach writing in gradual steps (or, in her words, "bird by bird," rather than being "immobilized by the hugeness of the task ahead." In this course, we too will move "bird by bird," through writing exercises that tackle the essentials of fiction. We will read the likes of Chimamanda Ngozi Adichie, Octavia Butler, Anton Chekhov, Stuart Dybek, Adam Johnson, Denis Johnson, Herman Melville, Lorrie Moore, Tim O'Brien, and Zadie Smith to parse and then practice the techniques these authors employ to create plot, structure conflict, establish characters, and make them talk. By studying an array of voices, students will find which cadences best fit their own work. We'll visit Arrowhead, Melville's Pittsfield house, to see where he wrote Moby Dick, as well as spend time in local museums, engaging closely with works of art there to further inspire and deepen our fiction. Beginning in Week Two, students will present their own works-in-progress, which we will discuss in a supportive workshop environment. At course's end, students will have polished a piece of short fiction, explored the beginnings of several new projects, and learned numerous techniques to keep them writing in the future. Evaluation will be based on workshop participation and classroom discussion, brief writing exercises, and a ten-page short story. Students are expected to spend an hour daily on their own fiction writing, in addition to the time required to complete each meeting's reading and writing exercises. We will typically meet twice a week for three hours, though occasionally the class may extend slightly beyond this timeframe given travel to and from field trip destinations.

Requirements/Evaluation: Creative project(s)

Prerequisites: None
Enrollment Limit: 12
Enrollment Preferences: Students must submit a letter explaining why they would like to take the class and detailing any past fiction-writing experience. Please also include a brief writing sample (ideally fiction, but could also be creative non-fiction) of 500-1,000 words.
Expected Class Size: NA
Grading: pass/fail only

Unit Notes: Sara Houghteling is the author of the novel Pictures at an Exhibition. A former lecturer in English at Stanford, she currently works in the Research and Academic Program at the Clark Art Institute.
Materials/Lab Fee: $70

ENGL 28 (W) Adorno’s Aesthetic Theory

Theodor Adorno was one of the twentieth century’s most challenging thinkers—a German Jewish refugee who loathed the United States but ended up in Los Angeles, who had no hope for Germany but returned there after the war. His intellectual contributions are too extensive to list: He produced groundbreaking work in philosophy, musicology, literary criticism, sociology, and political theory. The last book he ever wrote was called Aesthetic Theory and summed up a lifetime of thinking about what had happened to art in the twentieth century. Its questions will be our questions: What is the responsibility of art in the face of suffering? What kind of art is possible in a world reduced to rubble? Is it possible to produce a form of art that does not dominate others, that cannot be put in the service of their domination? A word about the course's format: Aesthetic Theory is one of those rare books that can change the way you think about nearly everything. You can almost feel your brain shifting into a higher gear as you read it. It is also almost impossible to read on your own. So we will be reading Adorno together in class, actually going through the book sentence by sentence. We will meet every weekday for ninety minutes or two hours.

Requirements/Evaluation: A 10-page paper.
Prerequisites: Some background in critical theory or continental philosophy would help, but is not strictly necessary.
Enrollment Limit: 30
Enrollment Preferences: Preference will be given to juniors and seniors.
Expected Class Size: NA
Grading: pass/fail only
Attributes: STUX Winter Study Student Exploration

Not offered current academic year

ENGL 29 (W) The Observer, The Subject, and The Audience

In his book The Peregrine, British naturalist J.A. Baker suggests that obsession and loss of self is required for anyone looking to capture truth: "the hunter must become the thing he hunts." This class will explore the practice of observation, with a focus on documentary film and nonfiction literature. What are the methods and strategies? What are the ethics and the cultural implications? Through film viewings and readings, students will gain an
understanding of narrative styles, while discussing how ethical, practical, and aesthetic choices influence the relationship with both the subject and the intended audience. Work will include six to eight hours of weekly viewing, and a similar amount of reading.

**Requirements/Evaluation:** Paper(s) or report(s); Presentation(s); Creative project(s)

**Prerequisites:** None.

**Enrollment Limit:** 16

**Enrollment Preferences:** English majors. Seniority.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Phil Wall '07 is an award-winning filmmaker known for "The Standard" (2020) and "The Book Keepers" (2022). He lives in Brooklyn, NY, where he works on independent and commercial narrative content.

**Materials/Lab Fee:** $85

**Grading:** pass/fail only

**Not offered current academic year**

ENGL 34  The Name is Bond, James Bond: Ian Fleming's Creation, Entertainment, and the Legacies of Empires

In course, we will learn about the fun, as well as the unexpected moments of gravity, in the practice of film blogging about one of the globe's most enduring popular products. Brimming with unabashed expressions of misogyny, racism and a nostalgia for colonialist empire, much of the cinematic and literary world of Ian Fleming's James Bond continues to resist rehabilitation. Without minimizing the unsavory aspects of Bond, we will examine the shifts of emphasis in Fleming's fiction, from the Cold War narratives of Soviet Russia as Bond's enemy to the presciently anti-neoliberal novels about the capitalist conglomerate of SPECTRE as his ultimate adversary. How is SPECTRE portrayed in the novels and the films, and to what extent do the movie adaptations attempt to correct the ideologically problematic aspects of the novels, which even Fleming himself acknowledged? What is the significance of Fleming's training and service in British naval intelligence during the second World War, and how did his peripheral involvement in the project of decoding of the Nazi 'Enigma' code serve as the inspiration for his fiction? Why do fascist politics invariably lurk behind the masks of all the Bond villains, even those who are Communists or ideologues of the free market? By immersing ourselves in the practice of informal blogging outside of the compositional strictures of mainstream film criticism, we will pay particularly close attention to the shifting representations of gender and Englishness in the Bond novels and films, as well as the therapeutic value of imagining a sophisticated evil that may ultimately be defeated.

**Requirements/Evaluation:** Paper(s) or report(s); Presentation(s)

**Prerequisites:** None

**Enrollment Limit:** 20

**Enrollment Preferences:** Through discussion with them about their interests.

**Expected Class Size:** NA

**Grading:**

**Unit Notes:** Alexandar Mihailovic has published extensively about film. *Screening Solidarity: Neoliberalism and Transnational Cinemas*, the book he co-authored with Patricia A. Simpson and Helga Druxes, was published in 2023 by Bloomsbury Academic Press.
ENGL 35  Alternative Literatures

Publishing is a mature industry dominated by a few incumbent forms, perhaps the most enduring of which is the book. This codification affords powerful reach and dazzling variations on theme, but, as with all dominant forms, demands conformity, which excludes divergent experiences and modes of expression. Traditionally, the gaps left by mainstream publishing have been filled by experimental texts printed in shorter runs within smaller, alternative communities, many of which constitute forms and traditions in and of themselves. Zines, chapbooks, pamphlets, broadsides, and more will be xeroxed, risographed, and printed-on-demand by and for immigrants, punks, the disabled, political dissidents, and other outsiders. In this explosion of multiplicity, we see text paired with image, innovations in layout and book binding, and radical expressions of the book as a site of casual play, among other surprises. Alternatives Literatures will survey the many forms a literary text might take, giving students a conceptual and practical basis for the creation and publication of their own alternative literatures, which will be exhibited and circulated as a capstone to the course. This structure, commonly known as a craft course, mixes two primary modalities, the literature seminar and the creative writing workshop, but will also borrow elements from the art studio and lecture.

Requirements/Evaluation: Creative project(s); Other: Class preparation and engagement.
Prerequisites: There are no academic prerequisites. See sample syllabus for other requirements.
Enrollment Limit: 20
Enrollment Preferences: Random number generator. The spirit of the course is egalitarian so no special consideration should be made.
Expected Class Size: NA
Grading:

Unit Notes: Nick Greer is a writer, editor, and designer from Berkeley. He holds an MFA Creative Writing from the University of Arizona and BAs from Williams College ('08). For more: nick-greer.com.

ENGL 99  (W)  Independent Study: English

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only

Not offered current academic year
CONCENTRATION IN COASTAL AND OCEAN STUDIES

Understanding the oceans, the coasts, and our interactions with both is critical in this era of climate change, sea-level rise, fisheries crises, and the internationalization of the high seas. The oceans control the planet's weather, they supply about 20% of the world's food, and ocean-going cargo ships carry 90% of international trade goods. More than a third of the global population lives within some tens of kilometers of the coast, and about 10% of the world's people could be directly impacted by sea level rise in the coming decades. Williams run the Williams-Mystic Program, one of the nation's few interdisciplinary semesters investigating the multifaceted ocean and coastal system via the humanities, social sciences, and physical sciences; and Coastal and Ocean Studies (CaOS) provides an on-campus structure for students to weave the Williams-Mystic curriculum into an interdisciplinary concentration.

Candidates for the concentration in Coastal and Ocean Studies must complete a minimum of seven courses: the four Williams-Mystic courses (which cover history, literature, science, and policy of the coasts and oceans); an oceanography course, an elective, and a 400-level Senior Seminar. The Williams-Mystic courses require a semester away at the Williams-Mystic Program, and the remainder of the concentration is completed on campus.

Students who have completed other study-away programs that emphasize marine studies should consult with the program chair about the possibility of completing the Coastal and Ocean Studies concentration. More information can be found on the Coastal and Ocean Studies web page, and the CaOS curriculum is summarised on this information sheet.

Course requirements (7 courses in all)

One foundational oceanographic course from the following list:

- CAOS/ENVI/GEOS 104 Oceanography
- CAOS/GEOS 110/ENVI 109 Oceans and Society
- CAOS/GEOS 201 Oceanographic Processes

Four core courses across the humanities, science, and social sciences (taken at Williams-Mystic):

- CAOS/ENGL 231 Literature of the Sea
- CAOS 311/BIOL 231 Marine Ecology OR CAOS/GEOS 210 Oceanographic Processes
- CAOS/ENVI 351/PSCI 319 Marine Policy
- CAOS/HIST 352 America and the Sea, 1600-Present

One capstone Course

- ENVI/CAOS 412 Senior Seminar: Perspectives on Environmental Studies

Elective Courses to bring the total to 7

A number of elective courses are available across the disciplinary spectrum, based on either a clear coastal and ocean statement in the course description or broad practical/theoretical applicability to coastal and ocean studies. Concentrators will take a minimum of one course from the list below. Students using CAOS/GEOS 201 Oceanographic Processes at Williams Mystic to meet their foundational oceanographic course requirement will need to take two electives to meet the seven-course requirement. If concentrators find other courses in the catalog that they believe meet the requirements for a CAOS elective, they may bring them to the attention of the Chair.

GEOS 110 / ENVI 109 / CAOS 110 LEC Oceans and Society
Taught by: Rónadh Cox
Catalog details

INDEPENDENT STUDY

The following courses are offered for students pursuing CaOS research, and they may be used as electives for the concentration:

- CAOS 397, 398 Independent Study: Coastal and Ocean Studies
HONORS IN COASTAL AND OCEAN STUDIES

Candidates for honors in Coastal and Ocean Studies will complete a thesis project in their senior year, involving original research under the supervision of a faculty advisor (archive, museum, field, or laboratory) followed by analysis and write-up of results. The work may be a continuation and expansion of Williams-Mystic research or may be a new and separate project. The research duration may either be one semester plus a winter study, or a full year (two semesters plus winter study). Data collection during the summer before the senior year may be necessary in some cases. Honors will be awarded if the thesis shows a high degree of scholarship, originality, and intellectual insight.

CAOS 100  (S)  Introduction to Weather and Climate  (QFR)

Cross-listings: GEOS 100

Secondary Cross-listing

How is it that we have such a hard time predicting if it’s going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore how fundamental laws of physics determine why air moves and changes, creating the wind, clouds, precipitation, and extreme events that form our weather. Building off of our understanding of the atmosphere, we’ll look at longer time scales to develop an understanding of earth’s climate system, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will use weather and climate models to learn how scientists and meteorologists predict future conditions. Labs include benchtop experiments, data analysis projects, and self-scheduled meteorological observations. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly problem sets, lab assignments, midterm exam, and final exam

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 100(D3) CAOS 100(D3)

Quantitative/Formal Reasoning Notes: This course will have regular problem sets which require substantial quantitative reasoning. Labs will require analysis, presentation, and explanation of quantitative data, and exams will require some quantitative problem solving.

Attributes: ENVI Natural World Electives  EXPE Experiential Education Courses

Not offered current academic year

CAOS 104  (F)  Oceanography

Cross-listings: ENVI 104 / GEOS 104

Secondary Cross-listing

The oceans cover three quarters of Earth’s surface, yet oceanography as a modern science is relatively young: the first systematic explorations of the geology, biology, physics and chemistry of the oceans began in the late 19th century. This introduction to ocean science includes the creation and destruction of ocean basins with plate tectonics; the source and transport of seafloor sediments and the archive of Earth history they contain; currents, tides, and waves; photosynthesis and the transfer of energy and matter in ocean food webs; the composition and origin of seawater, and how its chemistry traces biological, physical and geological processes; oceans and climate change; and human impacts.

Class Format: two 75-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast of New England.

Requirements/Evaluation: lab activities, homework, reading-comprehension quizzes, three tests

Prerequisites: none

Enrollment Limit: 48
ENVI 104 (D3) GEOS 104 (D3) CAOS 110 (D3)

Attributes: ENVI Natural World Electives EXPE Experiential Education Courses

CAOS 110 (F) Oceans and Society

Cross-listings: GEOS 110 / ENVI 109

Secondary Cross-listing

Oceans impact society in many ways: they provide much of our protein, they hide untapped mineral wealth, their circulation regulates global climate, they transport and accumulate our plastic garbage, marine storms batter coastal infrastructure, and sea-level rise threatens communities. However, despite the oceans' importance throughout history—for trade, as a source of food, and because of their unpredictable dangers—we know shockingly little about them. More than 6000 people have reached the summit of Everest, Earth's highest elevation; but only 22 have visited Challenger Deep, the deepest point below the ocean surface. We have mapped the surfaces of Mars and Venus in far more detail than the topography of Earth's ocean basins. New marine organisms are discovered regularly. And we still don't fully understand the complex details of how ocean and atmosphere work together as the planet's climate engine. In this course, you will examine ocean science themes with direct societal relevance that are also at the forefront of scientific investigation. Topics will be selected based on current events, but are likely to include deep sea mining, meridional overturning, sea level rise, atmospheric rivers, and aquaculture. By taking focused dives into a range of subjects you will learn about the evolution and operation of the ocean as a physical and geological system as well as investigating the intersections between ocean functions, climate change, and human societies. Exercises and discussions will foreground active learning. A field trip to the Atlantic coast will integrate experiential investigation of the intersection between coastal change, extreme weather, and communities. The aim is to have energised interdisciplinary discussions about topics of pressing societal relevance, to understand some of the fundamentals of ocean science, to develop expertise in gathering and distilling information by researching new topics, and thereby to improve critical and analytical thinking.

Class Format: Two 75-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast.

Requirements/Evaluation: Evaluation is based on engagement with in-class activities, six graded lab exercises, four short writing/research assignments, and a five-page term paper

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: First year and second year students

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course and GEOS 104 Oceanography cannot both be taken for credit.

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year.
CAOS 134  (F)  The Tropics: Biology and Social Issues  (DPE)  

Cross-listings: BIOL 134  

Secondary Cross-listing  

Biology and Social Issues of the Tropics explores the biological dimensions of social and environmental issues in tropical societies, focusing specifically on the tropics of Africa, Asia, Latin America, Oceania, and the Caribbean. Social issues are inextricably bound to human ecologies and their environmental settings. Each section of the course provides the science behind the issues and ends with options for possible solutions, which are debated by the class. The course highlights differences between the tropics and areas at higher latitudes while also emphasizing global interconnectedness. It begins with a survey of the tropical environment, including a global climate model, variation in tropical climates and the amazing biodiversity of tropical biomes. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria, AIDS and Covid-19 (SARS-CoV-2). The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the interaction of humans with their supporting ecological environment, and global climate change. This course fulfills the DPE requirement. Through lectures, debates and readings, students confront social and environmental issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.  

Class Format: Debate  

Requirements/Evaluation: two hour exams, a short paper, debate presentation, and a final exam  

Prerequisites: none  

Enrollment Limit: 62  

Enrollment Preferences: Preference will be given to Environmental Studies majors/concentrators, students in need of a Division III or DPE requirement, and then Seniors, Juniors, Sophomores, and First Year students.  

Expected Class Size: 62  

Grading: no pass/fail option, no fifth course option  

Unit Notes: Does not count for credit in the Biology major.  

Distributions: (D3)  (DPE)  

This course is cross-listed and the prefixes carry the following divisional credit:  

BIOL 134(D3) CAOS 134(D3)  

Difference, Power, and Equity Notes: This course highlights differences between the tropics and higher latitudes. For each section we focus on difference--different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and different contributions to and impacts of climate change. For each section we highlight differences in power and the inequities of resource distribution. We then debate potential solutions to ameliorate these inequities.

CAOS 206  Marine Biology  

The oceans impact almost all life and processes on Earth. In this course we will explore the astounding diversity of life in the world's oceans, from the smallest photosynthetic microbes on the planet to the largest animals that weigh almost 200 tons. Using an integrative approach that spans from the molecular to the organismal to the ecological levels, we will focus on the biology of marine organisms, and their interactions and interrelationships. Topics including primary production, reproduction, acclimation to stresses, adaptation, and evolution will be discussed in the context of environments such as the open oceans, coastal waters, rocky intertidal zones, coral reefs, and the deep sea. We will emphasize how recent scientific advances have revolutionized our understanding of marine organisms and explore solutions to global challenges, including climate change and ocean acidification, pollution, sustainable fishing and aquaculture, and habitat conservation.  

Requirements/Evaluation: two exams, one two-page research paper, one final project with a three-page written component and an oral presentation component, participation in discussions, laboratory assignments  

Prerequisites: Biology 101 and Biology 102, or permission of instructor  

Enrollment Limit: 20  

Enrollment Preferences: Biology majors: seniors who need a second 200-level course for the major, and then juniors who need a second 200-level course for the major  

Expected Class Size: 20
CAOS 210  (F)(S)  Oceanographic Processes

Cross-listings: GEOS 210

Primary Cross-listing

Part of the Williams-Mystic Coastal and Ocean Studies Program, this course provides an introduction to physical, geological, chemical, and biological oceanography. Using local field sites as well as places visited on field seminars, we will investigate why the Earth has oceans, why they are salty, how they move and flow, reasons for sea level change on both long and short timescales, and how our oceans interact with the atmosphere to control global climate. We will emphasise societal interactions with the ocean, and will consider coastal processes including land loss. We will apply an environmental justice and anti-racist lens to our discussions. Field work will take place on shores in southern New England, as well as during field seminars on the Atlantic ocean, the West Coast and the Mississippi River Delta. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: Flipped classroom will focus on active learning using data-based exercises. Mini-symposia will involve student research and discussion.

Requirements/Evaluation: graded lab exercises, mini-symposium participation, and a research project

Prerequisites: none

Enrollment Limit: 24

Enrollment Preferences: none

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: This course is taught at our Mystic Seaport campus. Students must be enrolled in the Williams-Mystic Coastal and Ocean Studies Program.

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

CAOS 212  Paleobiology

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. We will explore how, why, when, and where fossils form and learn about the major groups of fossilized organisms and how they have changed through time. In addition, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.
Class Format: One day field trip to the Paleozoic of New York State

Requirements/Evaluation: Weekly lab assignments, frequent short quizzes and writing assignments, and a final research project presented in poster form.

Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205

Enrollment Limit: 24

Enrollment Preferences: sophomores, and junior GEOS majors

CAOS 213 (S) Introduction to Environmental and Natural Resource Economics (QFR)

Cross-listings: ECON 213 / ENVI 213

Secondary Cross-listing

We'll use economics to provide one perspective on reasons humans harm the environment and overuse natural resources, and what we can do about it. We'll study climate change, pollution in general, cost benefit analysis, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We'll talk about how economists put a dollar value on nature and ecosystem services (as well as human health and life!), and the concerns people may have about doing so. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth. Consideration of justice and equity will be woven throughout the whole semester.

Requirements/Evaluation: problem sets, short essays, final paper; intermediate assignments may include a poster, one or more short presentation(s), other brief writing assignment(s)

Prerequisites: ECON 110 or equivalent

Enrollment Limit: 30

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course will count toward both the Environmental Studies major and concentration

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 213(D2) ENVI 213(D2) CAOS 213(D2)

Quantitative/Formal Reasoning Notes: We will use formal theory expressed in math and graphs, perform calculations, and consume statistical data.

CAOS 215 (S) Climate Changes (QFR)

Cross-listings: GEOS 215

Secondary Cross-listing

Paleoclimatology is the reconstruction of past climate variability and the forces that drove the climate changes. The Earth's climate system is experiencing unprecedented and catastrophic change because of anthropogenic emission of greenhouse gases and land use change. Paleoclimatology allows humans to put modern climate changes into the context of the history of this planet, and shows how and why it is unprecedented and catastrophic. Each climate event we study from Earth's past teaches us lessons on why the climate system responds to anthropogenic perturbations, what climate changes we're committed to in the future, how long-lasting they will be, and what climate consequences we
can avoid if we take action and reduce greenhouse gas emissions sooner. In this course, we will discuss the major mechanisms that cause natural climate variability, how climate of the past is reconstructed, and how climate models are used to test mechanisms that drive climate variation. With these tools, you will analyze and interpret data and model simulations from climate events from Earth's history, and apply these findings to anthropogenic climate changes happening now and that are projected to happen in the future. Laboratories and homework will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: This class has three scheduled lectures per week, and one lab meeting per week which will consist of field excursions, lab exercises, problem solving and discussion

Requirements/Evaluation: lab exercises and homework (25%), three quizzes (50%), and a final project (25%)

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor

Enrollment Limit: 24

Enrollment Preferences:  Geosciences majors and Environmental Studies majors and concentrators and Maritime Studies concentrators

Expected Class Size: 16

Grading:  yes pass/fail option, yes fifth course option

Distributions:  (D3)  (QFR)

CAOS 218 (F) Capital and Coercion  (DPE)

Cross-listings: ECON 218
Secondary Cross-listing

Capital, tradable ownership shares in long-lived corporations, invented in the 17th century, has connected people of different races, religions, and geographies. There are huge profits from such economic interactions, but also risks: of being cheated, deceived, or coerced. This course uses insights from the economics of incentives (principal-agent models, contracts, mechanism design) to investigate the interplay between capital, coercion, and resistance. The role of prejudice will be central, as will the rise of middlemen as enforcers of coercion. Case studies span the 17th century to the 20th and include: the spice trade and conflict in the Indian Ocean, capital markets and fraud in Amsterdam and London, the Atlantic trade in enslaved people, the Dutch “cultivation system” in Java, the slow end of slavery in Brazil, and colonial control and independence in Kenya. Required readings for this class will include primary historical sources, and even excerpts from autobiographical novels!

Requirements/Evaluation: Students will be evaluated based on weekly reading responses, class participation, a midterm and a final.

Prerequisites: Econ 110

Enrollment Limit: 15

Enrollment Preferences: If overenrolled, students will be asked to submit a short statement of interest.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

CAOS 218(D2) ECON 218(D2)

Difference, Power, and Equity Notes: This course analyzes the evolution of economic inequity. It analyzes how global market opportunities have been shaped by race, religion, wealth, and power.

Attributes: GBST Economic Development Studies POEC Depth

Not offered current academic year

CAOS 231 (F)(S) Literature of the Sea (DPE)

Cross-listings: ENGL 231

Primary Cross-listing

The ocean, and human relationships with it, have been central features of literatures and cultures around the world for more than a thousand years. But since literary study is typically based around authors’ homelands, careful examination of the oceanic experience is often pushed to the periphery--an "empty space" to be crossed between nations, a "vast darkness" antithetical to human life, or a mirror for land-borne concerns. Increasingly, however, scholars and readers are centering the sea and stories about it as a means stepping outside human frameworks of space and time, situating the complex emotions and narratives inspired by the ocean into a complex network of geologic history and teeming other-than-human life. This course examines a wide range of texts and perspectives on the ocean and human relationships with it. Doing so will help us consider how literature both plays into and subverts dominant viewpoints of the ocean. Through texts that consider 19th-century whaling, the Middle Passage, the postcolonial Caribbean, and islands throughout the Pacific Ocean, we will explore a range of questions, including: What can we learn from examining efforts to write about the ocean? How do ocean stories help individuals understand themselves, their communities, and their place in global environments? What can the range of cultural and literary perspectives on our "single, global ocean" reveal about the ways different people are both connected with and profoundly distant from each other? Most importantly, we will practice, as a classroom community, different strategies for carefully reading texts while connecting them to cultural traditions, surrounding environments, and personal experiences.

Class Format: weekly roundtable discussions, including coastal and near-shore field trips and multiple field seminars.

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final assignment

Prerequisites: N/A

Enrollment Limit: 25

Enrollment Preferences: Williams-Mystic Students only

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Unit Notes: offered only at Mystic Seaport

Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
CAOS 231(D1) ENGL 231(D1)

Difference, Power, and Equity Notes: This course focuses on the range of cultural perspectives about the sea, as well as the ways those perspectives can unsettle and challenge dominant narratives about the sea and its role in colonial expansion. Furthermore, this course centers voices that are typically overlooked in the genre of "Sea Literature," paying particular attention to Indigenous and African-American narratives about the ocean.

CAOS 234 Francophone Oceania: The Other Side of the Postcard

Manava i Te Ao Ma'ohi Tongan-Fijian author Epeli Hau'ofa writes: "Centuries before Europeans entered the Pacific, in the days when boundaries were not imaginary lines in the ocean but points of entry that were constantly negotiated and even contested, the sea was open to anyone who could navigate a way through." Of critical importance to Oceanian communities and scholarship today is the project of remembering and re-membering the stories, knowledges, travel routes, and more-than-human ecologies that have crisscrossed the vast aqueous landscapes of this "other" side of the globe. This course is a comprehensive survey of the literature, modern history, and aesthetics that inform the field of contemporary Francophone Oceanian Studies. Major concepts in Indigenous Oceanian philosophy and genealogies of thought (from Ma'ohi, Kanak, and Ni-Vanuatu communities in particular), European imperialism and racial politics, gender and sexuality, maritime knowledges, the French nuclear agenda and climate fiction will be studied. Students will use multimedia formats and storytelling techniques to cross-examine narrative development, philosophy, and Oceanian history from a comparative perspective. Texts may include: Déwé Gorodé's Sous les cendres des conques (1985), Chantal T. Spitz's L'île des rêves écrasés (1991), Claudine Jacques' L'Âge du perroquet-banane, Parabole païenne (2002), Ari'irau's Matamimi ou la vie nous attend (2006), Nicholas Kurtovič's Dans le ciel splendide (2015), Titaua Peu's Pīna (2016), and Titaua Porcher's Hīna, Maui et compagnie (2018) among others. Conducted in French.

Requirements/Evaluation: Evaluation will be based on active participation and preparation, two short presentations, a guided journal, and a final project.

Prerequisites: RLFR 105 or 106; or results of the College Placement exam; or permission of Instructor.

Enrollment Limit: 20

Enrollment Preferences: French majors and certificate holders

Expected Class Size: 15

Grading: Distributions: (D1)

CAOS 269 (F) Environmental Law and Policy

Cross-listings: ENVI 269

Secondary Cross-listing

America's environmental statutes, regulations, legal precedents, and policies have grown in complexity over the last 75 years. These bi-partisan, broadly supported laws also shaped environmental laws and policies in the European Union, China, the Middle East, and countries in the Global South. Yet in 2024, America is no longer a global leader in climate mitigation or environmental protection. As legal and policy solutions to environmental problems continue to evolve based on values, science, market dynamics, and increasing climate change impacts, it is important to study this complex legal landscape to understand where opportunities lie for more ambitious and just solutions to complex environmental problems. This class surveys major environmental laws and policies by looking at cases of current, complex environmental problems. This course will focus not only on the hallmark American environmental laws, regulations, and policies but also on the interplay of state and tribal law, food, water, mineral, energy, tax, and animal rights law issues, and international treaties and climate agreements. By the completion of the semester, students will understand both the successes and failures of modern environmental law. In addition to learning about the substantive legal issues covered in the
course, students will develop legal research skills associated with researching statutes and regulations and interpreting judicial decisions. This course will help students interested in future work in law or policy understand how to analyze cases, regulations, and policy, and see opportunities for future solutions.

**Requirements/Evaluation:** 1) Class Participation (leading discussion and presenting materials) 20%; 2) Weekly 300-word Case Briefs 30%; 3) Comparative Law/Policy Analysis (5-7 page research paper) 30%; 4) Final Exam 20%

LEC Section: 01    TF 2:35 pm - 3:50 pm     Lindi von Mutius

**CAOS 275  Ocean and Climate Changes**

Earth’s oceans are a central part of the global climate system, and changes to the oceans throughout Earth’s history were often accompanied by dramatic climate shifts. In this class we will discuss the interconnected nature of oceans and climate, evidence for ocean and climate changes in the geologic past, what is happening to the oceans today, and what may happen in the future due to human-induced climate change. We will use computer models to explore ocean circulation in three dimensions, examine societal case studies to appreciate how people rely on the oceans, and analyze articles from the scientific literature to learn about the origins of foundational oceanographic knowledge and modern advances. Using marine sediment records, we will synthesize paleoclimate data and reconstruct past changes in the ocean and climate system. Through these explorations you will learn about the influence of the oceans on the global carbon system over both short and long timescales, and how changes in ocean circulation have altered Earth’s energy balance. Using modern satellite data, we will investigate changes happening in the world’s oceans today and assess the mechanisms thought to be responsible. We will visit a dedicated ocean research facility to learn about the tools and techniques employed by oceanographers to answer questions about our changing oceans. And, with the aid of emissions scenarios and probabilistic models, we will explore future scenarios of climate change and evaluate how the oceans will be affected by, and will in turn influence, the changing climate system.

**Requirements/Evaluation:** 2 lectures per week, one 3 hour lab per week. Students should expect to spend about 7 additional hours per week out of class working on course-related reading/homework/studying/project preparation. Readings, podcasts, and/or videos before most lecture and some lab meetings. Short, check-in quizzes.

**Prerequisites:** one 100-level GEOS course

**Enrollment Limit:** 24

**Enrollment Preferences:** sophomores, and junior Geos majors

**Expected Class Size:** 24

**Grading:** (D3)

**Attributes:** GEOS Group A Electives - Climate + Oceans

Not offered current academic year

**CAOS 279 (S) Islam on the Indian Ocean**

**Cross-listings:** REL 279 / ASIA 279 / ARAB 279

**Secondary Cross-listing**

While colonial and Eurocentric geographies speak in terms of continental separation, historically the continents of Africa and Asia have been
connected to one another through a dual link: Islam and the Indian Ocean. Indian Ocean trade and travel have historically connected East Africa, the Arabian Peninsula, South Asia, and South East Asia, shaping the lives of people and communities who lived not only along the coasts but also inland. This course focuses on these transregional connections, looking at the Indian ocean as a connective space that binds people and regions together rather than separating them. The course will also examine the role of Islam as a religious, economic, social and political force that brought together Muslim communities throughout the regions along the Indian ocean. In exploring these connections, the course will cover a broad historical period, from the 7th century with the rise of Islam to European colonialism and the emergence of a global economy in the nineteenth century.

CAOS 309 (F) Modern Climate (QFR)

Cross-listings: GEOS 309

Secondary Cross-listing

What will happen to the Earth's climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects--like the albedo feedback associated with sea ice and glacier loss--and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: 4 multi-week lab projects and several short quizzes

Prerequisites: Any of GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor

CAOS 311 (F)(S) Marine Ecology

Cross-listings: BIOL 231

Primary Cross-listing

We have explored only a fraction of the ocean, with about 10% of marine species classified and 20% of the ocean mapped. Many discoveries remain to be made, and marine ecology is one technique to uncover new insights. The field of marine ecology, rooted in the theory of evolution, describes the
mechanisms and processes that drive the diversity, abundance, and distribution of marine organisms. The goal is to document natural patterns and make predictions about how species will respond to environmental changes by investigating the relationship between the abiotic environment and biotic interactions. This course will take a deep dive into the unique challenges to life in the ocean. You will compare and contrast different marine ecosystems, such as coral reefs, kelp forests, and the deep sea. You will also practice a marine ecologist's skill set as you design, carry out, and analyze your own research project, which will improve your scientific writing, data analysis, and communication skills. Importantly, you will connect your research and course topics to larger marine conservation issues and broader societal impacts.

Class Format: including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: none

CAOS 323 (S) Law and Politics of the Sea

Cross-listings: PSCI 323

Secondary Cross-listing

Can international law save the seas? That is one current bet. The sea law regime centers on the United Nations Convention on the Law of the Sea (UNCLOS), which gathers into one place what most countries consider to be scattered ancient laws about piracy, transit through other countries’ territorial waters, fishing, jurisdiction over ships, and so forth. It also creates ocean zones, with rules for each, and a system for taxing firms that it licensed to exploit minerals on the high seas, and sharing the proceeds with developing countries. It seeks to mitigate conflicts among countries and companies as they energetically compete to exploit the seas. In 2023, UNCLOS launched a follow-on treaty, the Agreement on the Conservation and Sustainable Use of Marine Biological Diversity of Areas Beyond National Jurisdiction (BBNJ), which adds areas in the high seas that all nations commit to protect. This course explores the politics and practices that arise from UNCLOS and BBNJ. We engage with the agreements’ history, content, and exclusions, examine the incentives they provides states and criminals, and assess the way that geopolitical and climate collapse create new opportunities and constraints for states, firms, international organizations, and activists. Topics include piracy, naval officers’ guidelines, conflict in the South China Sea, bonded labor, refugee quarantine on islands, marine genetic resources, Arctic transit, and ocean pollution. This is a way to understand major deals regarding the oceans; it is also a way to understand what it means to consider an international legal agreement a solution to something.

Requirements/Evaluation: Three 6-page papers, longer final paper, class participation including weekly writing

Prerequisites: Introduction to International Relations, and/or International Law, or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Political science majors, Marine Studies majors, seniors

Expected Class Size: 12
CAOS 327 (F) Coastal Processes and Geomorphology  (QFR)

Secondary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces—wind, waves, storms, and people—that shape the coastal zone, as well as the geologic formations—sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs—that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, quizzes, and an independent research project

Prerequisites: Either GEOS 104 or GEOS 210; or permission of instructor. No prior knowledge is necessary, but this course does build on principles used to explore complex scientific challenges.

Enrollment Limit: 15

Enrollment Preferences: Geosciences majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course counts toward the GEOS Group B Electives - Sediments + Life.

Distributions:  (D3)  (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 327(D3) GEOS 327(D3) CAOS 327(D3)

Quantitative/Formal Reasoning Notes: This course will involve the use of MATLAB software to quantitatively analyze coastal process and geomorphological data.

Attributes: ENVI Natural World Electives  GEOS Group B Electives - Sediments + Life
Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

**Class Format:** This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

**Requirements/Evaluation:** Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

**Prerequisites:** none

**Enrollment Limit:** 23

**Enrollment Preferences:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Expected Class Size:** 22

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** must be enrolled at Williams-Mystic in Mystic, Connecticut

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 319(D2) ENVI 351(D2) CAOS 351(D2)

**Writing Skills Notes:** Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

**Difference, Power, and Equity Notes:** Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

**CAOS 352 (F)(S) American Maritime History (DPE) (WS)**

**Cross-listings:** HIST 352

**Primary Cross-listing**

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

**Class Format:** Seminars, discussions, and field seminars
Requirements/Evaluation: Participation in class discussions, activities, and presentations, regular papers, and a final independent research project
Prerequisites: None
Enrollment Limit: 27
Enrollment Preferences: If course over-enrolls, preference will be given to sophomores and juniors
Expected Class Size: 22
Grading: no pass/fail option, no fifth course option
Unit Notes: Offered only at Mystic Seaport
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 352(D2) CAOS 352(D2)

Writing Skills Notes: Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

CAOS 361 (F) The Atlantic World: Connections, Crossings, and Confluences (DPE)

Cross-listings: AMST 360 / HIST 361
Secondary Cross-listing

This course considers the Atlantic World as both a real place and a concept: an ocean surrounded and shaped by diverse people and communities, and an imagined space of shared and competing affiliations. Moving from "time out of mind" to the early nineteenth century, it examines ecological, cultural, political, economic, intellectual, and spiritual transits as well as exchanges among Indigenous/Native American, African and African American, Asian and Asian American, and Euro-colonial people. It introduces conceptual dimensions of this Atlantic paradigm and case studies that illuminate its human subtleties, with the goal of examining "early American" histories through transnational and transoceanic lenses. The course takes an interdisciplinary approach to these intertwined histories, and reckons with how the very construction of "history" has, at different turns, affected what is shared, known, valued, and commemorated—or overwritten, denied, or seemingly silenced. Attentive to the structures of power that inflect every part of Atlantic histories, it offers specific ethical frameworks for approaching these topics. Blending methods grounded in oral traditions and histories, place-based knowledge systems, documentary/written archives, songs, archaeology, material culture, and other forms of expression and representation, it invites class members to revisit the nature and meanings of these connected spaces. The course consistently connects historical experiences with the twenty-first century, and how communities today are grappling with the afterlives and ongoing effects of these Atlantic pasts through calls to action for reparations, repatriation and rematriation, Land Back, climate justice, and other forms of accountability. The course also provides an opportunity to engage with original materials pertaining to Atlantic World histories in the Williams College Archives/Special Collections and Art Museum.

Requirements/Evaluation: active participation in class discussion, several short essays based on readings and discussion topics, museum/archives assignment, final essay/project
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: If the course over-enrolls, preference is for sophomore, junior, and senior History and American Studies majors
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 360(D2) HIST 361(D2) CAOS 361(D2)

Difference, Power, and Equity Notes: This course examines the formation and articulation of racial, ethnic, cultural, and other forms of difference across the Atlantic World, and ways that people from Indigenous, African/American, and Asian/American communities have engaged with and challenged European colonization. It devotes substantial time to critical methodologies that re-center voices oftentimes treated as "silenced" or "absent" in colonial literatures, and helps students build fluencies in approaching and interpreting them.

CAOS 387 (S) Economics of Climate Change (QFR)

Cross-listings: ECON 387 / ECON 522

Secondary Cross-listing

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

Requirements/Evaluation: problem sets, midterm, group presentation, final exam

Prerequisites: ECON 251, familiarity with statistics

Enrollment Limit: 25

Enrollment Preferences: Junior/Senior Economics majors and CDE fellows

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

CAOS 410 (S) The Cryosphere

Cross-listings: ENVI 410 / GEOS 410

Secondary Cross-listing

The Earth's climate system is often described in terms of its spheres, including the atmosphere, biosphere, lithosphere, oceans, and the cryosphere. The cryosphere is the naturally occurring ice on Earth in all its many forms: snow, glaciers, ice sheets, sea ice, frozen lakes and rivers, and permafrost (frozen soil). These parts of the climate system may seem remote, but have implications for climate and weather around the world. Melting glaciers and ice sheets have already contributed to sea level rise, and are projected to do so even more in the future. This course will explore the cryosphere, including snow, sea ice, permafrost, and glaciers through lectures, hands-on and data analysis labs, reading journal articles, and a final project. As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major.

Class Format: Class periods and lab periods will be used interchangeably based on the weather.

Requirements/Evaluation: Evaluation will be based on short papers, labs responses, and a research project

Prerequisites: GEOS 215 or GEOS 255 or GEOS 309 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Senior GEOS majors, then other GEOS majors and senior ENVI majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

Materials/Lab Fee: Labs will be outside during the winter: students should be prepared to dress appropriately for the weather.

CAOS 414 Life at Extremes: Molecular Mechanisms

All organisms face variability in their environments, and the molecular and cellular responses to stresses induced by environmental change often illuminate otherwise hidden facets of normal physiology. Moreover, many organisms have evolved unique molecular mechanisms, such as novel cellular compounds or macromolecular structural modifications, which contribute to their ability to survive continuous exposure to extreme conditions, such as high temperatures or low pH. This course will examine how chaperonins, proteases, and heat- and cold-shock proteins are regulated in response to changes in the external environment. We will then consider how these and other molecular mechanisms function to stabilize DNA and proteins- and, ultimately, cells and organisms. Other extreme environments, such as hydrothermal vents on the ocean floor, snow fields, hypersaline lakes, the intertidal zone, and acid springs provide further examples of cellular and molecular responses to extreme conditions. Biotechnological applications of these molecular mechanisms in areas such as protein engineering will also be considered. Class discussions will focus upon readings from the primary literature.

Class Format: discussion three hours per week
CAOS 438  (F)  Species Interactions Under Global Change

Cross-listings:  BIOL 438

Secondary Cross-listing

Anthropogenic changes to the world’s ecosystems often have clear effects on the abundance and distribution of species. These effects, however, do not occur in a vacuum: changes in any given species’ presence, abundance, or behavior can cascade into large and surprisingly context-dependent effects on the interactions of other organisms. In this course we will examine competitive, mutualistic, and antagonistic interactions in the Anthropocene from the species pair to community scale. We will explore the ecological and evolutionary mechanisms underlying the outcomes of these interactions, examining patterns including phenological mismatch, species invasions, and anthropogenic land use change. Classes will focus on critical evaluation of evidence from the primary literature, drawing on examples from community ecology, disease dynamics, and global change biology.

Requirements/Evaluation:  class participation and three to five papers of length 3-5 pages each

Prerequisites:  BIOL 203 or BIOL 204 or BIOL 329 or permission from instructor

Enrollment Limit:  12

Enrollment Preferences:  senior Biology majors who have not taken a 400-level course, open to juniors and seniors

Expected Class Size:  12

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

CAOS 465  Solutions to the Biodiversity Crisis

The biodiversity crisis is one of the greatest challenges of our century. Faced with climate change, persistent pollution, and habitat fragmentation, species are declining locally and globally. In this upper-level seminar we will integrate knowledge from the natural sciences, social sciences, policy, arts, and the humanities to design and implement biodiversity interventions. Through readings, discussions with experts, and applied projects, we will learn how biodiversity conservation and restoration can be socially just; how spaces can be designed to promote the flourishing of life; and how much local environmental management can alter global trends. We will also envision what the biotic world might look like in 10, 100, and 1000 years and consider who gets to decide which species live and which die, and who should decide.

Requirements/Evaluation:  One 5-7-page paper; final collaborative project

Prerequisites:  Environmental Studies 101 and 102

Enrollment Limit:  19

Enrollment Preferences:  Environmental/Maritime Studies majors and concentrators; seniors

Expected Class Size:  12
CAOS 477 (F) Economics of Environmental Behavior (QFR)

Cross-listings: ENVI 376 / ECON 477

Secondary Cross-listing

A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We’ll use economics to model environmental behavior and to assess how policies can help or hurt the environment. Topics we may study include: common pool resources, voluntary conservation, social norms and nudges, discrimination and justice, rationality, firm responses to mandatory and voluntary regulation, voting and public opinion, and international environmental agreements. We’ll also build familiarity with the main methodologies of modern economic research: theoretical modeling, empirical analysis of observational data, and experiments.

Class Format: Class sessions will largely consist of presentations and discussions of academic research papers, as well as lab sessions to work on empirical exercises and other interactive activities

Requirements/Evaluation: class participation, regular reading markup, empirical exercises, oral presentation(s), and an original research paper using an experiment, observational data, or theory

Prerequisites: ECON 251 and (ECON 255 or STAT 346)

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors and junior Economics majors considering a thesis

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

CAOS 477(D2) ENVI 376(D2) ECON 477(D2)

Quantitative/Formal Reasoning Notes: The research students will consume and produce in the class will be based on math-based theory and/or econometric-based empirical analysis.

- Claire Ting, Professor of Biology
ENVIRONMENTAL STUDIES

The Environmental Studies Program at Williams College offers a major in Environmental Studies and a concentration in Environmental Studies. The concentration is designed to complement a major in a different discipline. The critical environmental issues of our time call upon citizens to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. The curricular options in Environmental Studies—the major and concentration—are interdisciplinary programs designed to prepare students to understand these issues by integrating perspectives and methodologies from the natural sciences, the social sciences, and the arts and humanities, which together form a solid liberal arts foundation.

The Environmental Studies Program is housed within the Center for Environmental Studies (CES). CES manages the 2600-acre Hopkins Memorial Forest and the Environmental Analysis Laboratory in the Morley Science Laboratory, both of which afford many opportunities for hands-on environmental field work and lab experience. CES also sponsors a wide range of programs including the Friday Log Lunch Speaker Series, The Class of 1960 Scholars Program, the Hopkins Forest Caretaker Program, and the CES Summer Grants Program, which provides generous support for summer research and internships. The Center for Environmental Studies is housed in the Class of 1966 Environmental Center, a renovated historic structure certified as a Living Building Challenge by the International Living Future Institute.

LEARNING GOALS

Environmental Studies students are encouraged to examine environmental issues in the vicinity of Berkshire County, other regions of the US, and the world. Many of the courses include an experiential component so that students encounter the complexities of environmental issues firsthand and learn to address all aspects of environmental challenges.

Incoming students with an interest in Environmental Studies should consider taking ENVI 101: Nature and Society during their first year at Williams. This gateway course is required for the major and the concentration and provides an intellectual framework for critical, interdisciplinary environmental inquiry in the social sciences and humanities while surveying the most pressing environmental problems of our time. In the spring, many first-year students also take ENVI 102: Introduction to Environmental Science, which provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere, hydrosphere, and biosphere. In this class, students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine real-world case studies at global and local scales.

While ENVI 101 is a recommended starting point for both the major and the concentration, many students come to Environmental Studies through an interest in applying a specific discipline to environmental problems. Students with strong interests in more traditional disciplines such as biology, chemistry, geosciences, or economics are advised to begin the introductory course sequence for those subjects in their first semester as well. These students have two main options: a major in a traditional discipline with a concentration in Environmental Studies—a popular choice for students who wish to attend graduate school in the so-called “hard sciences”—or a double major.

The Environmental Studies Program also serves as the on-campus base for the Williams-Mystic Program, an extraordinary maritime studies program housed at Williams Mystic Campus on the Atlantic coast in Connecticut. Students who wish to pursue a concentration in Coastal and Ocean Studies combine a one-semester course of study at the Williams-Mystic campus with core courses and elective courses as described in the college catalog. Students may spend a semester at the Mystic campus in either the sophomore, junior, or senior year; choosing which semester to spend at Mystic should be done in consultation with a member of the Coastal and Ocean Studies advisory committee.

Students interested in the Environmental Studies major or concentration are encouraged to consult with members of the Environmental Studies Program and to contact the Environmental Studies Chair (jac9@williams.edu) or Associate Director (sgardner@williams.edu).

STUDY AWAY

Many study away options are available to students in Environmental Studies, including the Williams-Mystic Maritime Studies Program. Students considering either a semester or year away who intend to major in Environmental Studies should consult the Chair or Associate Director of Environmental Studies and the Dean in charge of study abroad as early as possible to discuss their options. Students may take up to two courses outside of Williams toward their major, but must have approval in writing from the Chair of Environmental Studies.

THE MAJOR IN ENVIRONMENTAL STUDIES

The Environmental Studies major is a ten-course major. All majors are required to take ENVI 101 and ENVI 102; three “foundational” courses in the sciences, social sciences, and humanities (one in each category chosen from a list of options); and one 400-level seminar (chosen from a list of options). In addition to these six core courses, students select four electives, three of which must be from one of the main curricular areas (sciences, social sciences, and humanities).

ENVI 101 – Nature and Society: An Introduction to Environmental Studies, establishes an intellectual framework for interdisciplinary environmental thinking in the humanities, policy studies, and social sciences. ENVI 102 – Introduction to Environmental Science, introduces students to the interdisciplinary study of the Earth's systems through the synthesis of physical, chemical, geological, and biological perspectives. Students with a score of 5 on the AP Environmental Science exam may take a 200-level environmental science lab course (cross-listed with Environmental Studies) in lieu of ENVI 102.
In addition to 101 and 102, all majors must take three more advanced “foundational” courses in the three main branches of the environmental curriculum: humanities, social science and policy, and environmental science—one from each of three lists of courses (see below).

Building on this five-course foundation, Environmental Studies majors gain depth in their chosen area of study by taking three electives from one of the three main curricular branches, plus a fourth elective from another branch to provide cross-disciplinary breadth. These electives should be chosen in close consultation with a faculty adviser to ensure intellectual coherence and academic rigor.

In their junior or senior year, students choose a 400-level senior seminar (or “research practicum”) that focuses on advanced, interdisciplinary research and/or problem-solving, typically with an applied, experiential, and/or service-learning focus.

**ADVISING**

Majors (or first-years and sophomores interested in the major offered by CES) are encouraged to talk at any time with the Chair, Associate Director of Environmental Studies, or any other Environmental Studies faculty. All incoming majors will be assigned a faculty advisor in the spring of their sophomore year.

**Planning for Prerequisites on your Path through the Major**

While ENVI 101 or ENVI 102 are recommended starting points for the major, and are prerequisites for many other ENVI course offerings, please note that some of the course options for the major may have other courses as prerequisites that may not count toward the programs. For example, ENVI/ECON 213 (*Intro to Environmental and Natural Resource Economics*) has a prerequisite of ECON 110 (*Principles of Microeconomics*). We strongly suggest that you do advance planning to avoid being blocked from taking a relevant course.

**Credit for AP, IB, A-levels and other pre-Williams Courses**

Students are not allowed to place out of ENVI 101. Students with a score of 5 on the AP Environmental Science exam may take a 200-level environmental science lab course (cross-listed with Environmental Studies) in lieu of ENVI 102.

**Introductory Required Courses (2 courses)**

ENVI 101 Nature and Society: An Introduction to Environmental Studies

ENVI 102 Introduction to Environmental Science

**Foundational Required Courses for all Environmental Studies Majors (3 courses, 1 from each category)**

**Culture/Humanities Foundational (1 course)**

Electives (4 courses)

Four electives from three lists of approved courses in Environmental Studies or cross-listed courses in other units. These three lists correspond with the three categories of foundational courses (e.g. environmental science, social science and policy, culture and humanities). Students must choose at least three of these four electives from one list, ensuring depth in their general area of interest. See the Environmental Studies Program website for up-to-date lists of electives in each category.

Senior Seminar Required Course (1 course)

In the junior or senior year, students take one 400-level seminar in Environmental Studies. One of these seminars, Environmental Planning, is offered every fall. The others are offered regularly on rotation. These seminars focus on advanced, interdisciplinary research and/or problem-solving, typically with an applied, experiential, and/or service-learning focus.

INDEPENDENT STUDY AND WINTER STUDY

In addition to courses fulfilling the Environmental Studies major requirements, the following courses are offered:

- ENVI 397, 398 Independent Study of Environmental Problems
- ENVI 493-W31-494 Honors Thesis and Senior Research

Winter Study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year’s Winter Study offerings.

HONORS IN ENVIRONMENTAL STUDIES MAJOR

A student pursuing either the major or concentration in Environmental Studies can pursue an honors thesis, which is a year-long project conducted over the fall semester, Winter Study, and spring semester of the senior year. Given the breadth of environmental studies, a thesis may follow a variety of formats. In general, it is a good idea for the student to use the thesis to build upon prior coursework and/or prior research, internship, or activism experience, and many students conduct thesis research during the summer before senior year. Students completing an Environmental Studies thesis may elect to opt out of the ENVI Senior Seminar.

Prospective thesis students should submit their proposals by the first week of April in their Junior year. However, students who plan to request a CES-ENVI summer student research/internship grant should have their proposals completed by the end of spring break to ensure that applications for summer funding can be made in a timely fashion. The ENVI Advisory Committee will review all thesis proposals and will notify students of decisions by the end of April.

Prospective thesis students should identify and work with an advisor to prepare the thesis proposal. Potential advisors may be any faculty member or affiliate of the Environmental Studies Program. If the advisor is a faculty affiliate, the student should also identify an ENVI faculty member to serve as second reader. The second reader provides additional guidance throughout the thesis process and evaluates the final product along with the thesis advisor. In cases when a prospective thesis student is unable to identify a thesis advisor, they should reach out to the chair for guidance.

The Environmental Studies Program will endeavor to facilitate networking among students who are working on theses in the same semester so that a thesis cohort can support each other through the research and writing process. The final thesis will be evaluated by the thesis advisor and in some cases a second reader, who will then decide to award no Honors, Honors or, in recognition of exceptional work, Highest Honors. When submitting your thesis to Williams’ library archive, please be sure to follow the Special Collections guidelines.
ENVI 100  Introduction to Weather and Climate  (QFR)

How is it that we have such a hard time predicting if it’s going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore how fundamental laws of physics determine why air moves and changes, creating the wind, clouds, precipitation, and extreme events that form our weather. Building off of our understanding of the atmosphere, we’ll look at longer time scales to develop an understanding of earth’s climate system, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will use weather and climate models to learn how scientists and meteorologists predict future conditions. Labs include benchtop experiments, data analysis projects, and self-scheduled meteorological observations. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly problem sets, lab assignments, midterm exam, and final exam

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 60

Grading:

Distributions: (D3)  (QFR)

Quantitative/Formal Reasoning Notes: This course will have regular problem sets which require substantial quantitative reasoning. Labs will require analysis, presentation, and explanation of quantitative data, and exams will require some quantitative problem solving.

Attributes: ENVI Natural World Electives  EXPE Experiential Education Courses

Not offered current academic year

ENVI 101  (F)(S)  Nature and Society: An Introduction to Environmental Studies

Environment and society interact on scales from the local to the global. This course explores these interactions and introduces students to the interdisciplinary methods of environmental studies. We will investigate the social, political, and historical aspects of environmental problems -- including environmental racism, species extinction, climate change, massive urbanization -- as well as their possible solutions. Throughout the course, we will ask how unequal distributions of power affect people and environments. Case studies, readings, discussions, and field exercises will help students develop their understanding of how built and unbuilt environments influence and are influenced by human activities.

Requirements/Evaluation: participation, in-class exercises, several short writing assignments (varying from 2-5 pages), mid-term exam, final exam

Prerequisites: none

Enrollment Limit: 30/section

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 30/section

Grading:  yes pass/fail option,  yes fifth course option

Unit Notes: required course for the Environmental Studies major and concentration

ENVI 102  (S)  Introduction to Environmental Science

Environmental Science is an interdisciplinary field that develops scientific and technical means for assessing and mitigating human impacts on the environment. This course provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere, hydrosphere, and biosphere. Students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine
real-world case studies at global and local scales. Topics may include: climate change, air and water pollution, resource extraction and management, land use change, and their effects on environmental quality, biodiversity, and human health. During weekly fieldwork and laboratory sessions, students gain hands-on experience in collecting, analyzing, and interpreting data that can be used to make recommendations for addressing local environmental issues.

Class Format: Two 75-minute lecture/discussion sessions and one 3-hour field/laboratory session each week.

Requirements/Evaluation: Weekly quizzes, final project, lab assignments, participation

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first- and second-year students, Environmental Studies majors and concentrators

Expected Class Size: 48

Grading: yes pass/fail option, yes fifth course option

ENVI 103 (F) Global Warming and Environmental Change

Cross-listings: GEOS 103

Secondary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and wildfires, the natural processes that shape Earth’s surface are tied to temperature and precipitation. People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with geography. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate. We will also visit and engage with Black communities and community leaders across New England who are grappling with the unjust distribution of resources to mitigate climate impacts and who have been disproportionate bearers of environmental risk.

Requirements/Evaluation: written reports from laboratories and readings, class participation, a midterm and final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first year and second year students, Geosciences majors and Environmental Studies majors and concentrators

Expected Class Size: 48

Grading: yes pass/fail option, no fifth course option

ENVI 104 (F) Oceanography
Cross-listings: GEOS 104 / CAOS 104

Secondary Cross-listing

The oceans cover three quarters of Earth's surface, yet oceanography as a modern science is relatively young: the first systematic explorations of the geology, biology, physics and chemistry of the oceans began in the late 19th century. This introduction to ocean science includes the creation and destruction of ocean basins with plate tectonics; the source and transport of seafloor sediments and the archive of Earth history they contain; currents, tides, and waves; photosynthesis and the transfer of energy and matter in ocean food webs; the composition and origin of seawater, and how its chemistry traces biological, physical and geological processes; oceans and climate change; and human impacts.

Class Format: two 75-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast of New England.

Requirements/Evaluation: lab activities, homework, reading-comprehension quizzes, three tests

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first year and second year students, Geosciences majors, Maritime Studies concentrators

Expected Class Size: 48

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course and GEOS 110 Oceans and Society cannot both be taken for credit.

Distributions: (D3)

ENVI 105 (S) The Co-Evolution of Earth and Life

Cross-listings: GEOS 101

Secondary Cross-listing

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will examine the relationship between Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system and learn about the dramatic changes that have occurred throughout the history of our planet. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve and how did this biological event lead to profound changes in the world's oceans and atmospheres? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and spread of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth's dynamic history.

Class Format: one laboratory per week plus one all-day field trip

Requirements/Evaluation: lab assignments, weekly quizzes, and a final independent project

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option
**ENVI 108 (S) Energy Science and Technology (QFR)**

**Cross-listings:** PHYS 108

**Secondary Cross-listing**

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating and lighting, and energy storage. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

**Class Format:** Two meetings per week. Some weeks that means two lectures. Other weeks, that means one lecture plus one lab, with the class divided between two lab sections.

**Requirements/Evaluation:** weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative

**Prerequisites:** high school physics, high school chemistry, and mathematics at the level of MATH 130

**Enrollment Limit:** 10 per lab

**Enrollment Preferences:** non-physics majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 108(D3) PHYS 108(D3)

**Attributes:** ENVI Natural World Electives

---

**ENVI 109 (F) Oceans and Society**

**Cross-listings:** GEOS 110 / CAOS 110

**Secondary Cross-listing**

Oceans impact society in many ways: they provide much of our protein, they hide untapped mineral wealth, their circulation regulates global climate, they transport and accumulate our plastic garbage, marine storms batter coastal infrastructure, and sea-level rise threatens communities. However, despite the oceans’ importance throughout history—for trade, as a source of food, and because of their unpredictable dangers—we know shockingly little about them. More than 6000 people have reached the summit of Everest, Earth’s highest elevation; but only 22 have visited Challenger Deep, the deepest point below the ocean surface. We have mapped the surfaces of Mars and Venus in far more detail than the topography of Earth’s ocean basins. New marine organisms are discovered regularly. And we still don’t fully understand the complex details of how ocean and atmosphere work.
together as the planet's climate engine. In this course, you will examine ocean science themes with direct societal relevance that are also at the forefront of scientific investigation. Topics will be selected based on current events, but are likely to include deep sea mining, meridional overturning, sea level rise, atmospheric rivers, and aquaculture. By taking focused dives into a range of subjects you will learn about the evolution and operation of the ocean as a physical and geological system as well as investigating the intersections between ocean functions, climate change, and human societies. Exercises and discussions will foreground active learning. A field trip to the Atlantic coast will integrate experiential investigation of the intersection between coastal change, extreme weather, and communities. The aim is to have energised interdisciplinary discussions about topics of pressing societal relevance, to understand some of the fundamentals of ocean science, to develop expertise in gathering and distilling information by researching new topics, and thereby to improve critical and analytical thinking.

Class Format: Two 75-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast.

Requirements/Evaluation: Evaluation is based on engagement with in-class activities, six graded lab exercises, four short writing/research assignments, and a five-page term paper

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: First year and second year students

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course and GEOS 104 Oceanography cannot both be taken for credit.

ENVI 134 The Tropics: Biology and Social Issues (DPE)

Biology and Social Issues of the Tropics explores the biological dimensions of social and environmental issues in tropical societies, focusing specifically on the tropics of Africa, Asia, Latin America, Oceania, and the Caribbean. Social issues are inextricably bound to human ecologies and their environmental settings. Each section of the course provides the science behind the issues and ends with options for possible solutions, which are debated by the class. The course highlights differences between the tropics and areas at higher latitudes while also emphasizing global interconnectedness. It begins with a survey of the tropical environment, including a global climate model, variation in tropical climates and the amazing biodiversity of tropical biomes. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria, AIDS and Covid-19 (SARS-CoV-2). The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the interaction of humans with their supporting ecological environment, and global climate change. This course fulfills the DPE requirement. Through lectures, debates and readings, students confront social and environmental issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

Class Format: Debate

Requirements/Evaluation: two hour exams, a short paper, debate presentation, and a final exam

Prerequisites: none

Enrollment Limit: 62

Enrollment Preferences: Preference will be given to Environmental Studies majors/concentrators, students in need of a Division III or DPE requirement, and then Seniors, Juniors, Sophomores, and First Year students.

Expected Class Size: 62

Grading:

Unit Notes: Does not count for credit in the Biology major.

Distributions: (D3) (DPE)

Difference, Power, and Equity Notes: This course highlights differences between the tropics and higher latitudes. For each section we focus on difference–different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and different contributions to and impacts of climate change. For each section we highlight differences in power and the inequities of
resource distribution. We then debate potential solutions to ameliorate these inequities.

Not offered current academic year

ENVI 201  (S)  The Geoscience of Epidemiology and Public Health  (DPE)

Cross-listings: GEOS 207

Secondary Cross-listing

The Coronavirus pandemic has highlighted the many ways that diseases can be transmitted in the environment. As a society we are becoming aware of the many ways that geological processes and materials and influence human health, in ways both beneficial and dangerous. This course unites geoscience, biomedicine and public health approaches to address a wide range of environmental health problems. These include water-related illnesses (e.g. diarrhea, malaria); minerals and metals, both toxic (e.g. asbestos, arsenic) and essential (e.g. iodine); radioactive poisoning (e.g. radon gas); and the transport of pathogens by water and wind. In many cases, the environmental health problems disproportionately affect marginalised populations, contributing to greater disease and death among poor communities and populations of colour. We will examine the broad array of dynamic connections between human health and the natural world. We will discuss the social justice implications of a range of environmental health problems. And we will examine current research into how coronaviruses, such as the one causing COVID-19, are transported in the environment. This course is in the Sediments and Life group for the Geosciences Major.

Requirements/Evaluation: Evaluation will be based on short weekly writing assignments as well as an individual project and poster presentation.

Prerequisites: No prerequisites

Enrollment Limit: 34

Enrollment Preferences: Preference to first-years, sophomores, and prospective Geosciences majors

Expected Class Size: 30

Grading: yes pass/fail option,  yes fifth course option

Distributions: (D3)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 207(D3) ENVI 201(D3)

Difference, Power, and Equity Notes: Through a series of case studies, we will examine ways in which marginalised groups (whether due to poverty, race, or ethnicity) are disproportionately affected by environmental health issues. Themes of power and equity in terms of decision making, access to knowledge, and funding availability, will be woven into all aspects of the class and will underpin our analysis of the science.

ENVI 202  (F)  Critical Practice of Architecture: Theories, Methods, and Techniques  (DPE)

Cross-listings: ARTS 222

Secondary Cross-listing

In this course, students will transform an architectural or urban space through design interventions that contribute to reorienting public perception, imagination, and politics. Skills taught include methods and techniques for critical architecture practice, including architecture drawing, 2D graphic design, and 3D modeling (digital and physical). Students will also build on design strategies (e.g., spatial hijacking and détournement), community architecture, and visual techniques to rethink normative understandings of space and time. Through selected readings and discussions, we will examine key ideas that have inspired design thinking and activism. The class culminates in a presentation to external reviewers and a final exhibition.

Requirements/Evaluation: This is an intensive studio tutorial requiring working in the architecture studio and/or PC lab outside of scheduled class hours. The class will meet in large and small groups throughout the semester for critique and discussion. Assignments include weekly discussions and design projects requiring drawings and model design. Final project: design project to reorient public perception, imagination, and politics. Evaluation will be based on the design quality at theoretical/conceptual levels.

Prerequisites: Drawing I or permission of instructor.

Enrollment Limit: 12

Enrollment Preferences: Studio Art majors, Art History and Studio Art majors, Envi majors and concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $350-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 222(D1) ENVI 202(D1)

Difference, Power, and Equity Notes: This design studio invites students to think critically about how power, equity, and difference are manifested through the built environment. It will equip them with the tools to become active agents of change through design activism. We will use design as a cultural practice and creative technique to envision more just and equitable futures through interventions in architectural or urban spaces.

STU Section: 01 TR 9:55 am - 11:10 am Giuseppina Forte

ENVI 203 (F) Ecology (QFR)
Cross-listings: BIOL 203

Secondary Cross-listing

This course combines lectures & discussion with field and indoor laboratory activities to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to engage students in the natural history of the region and build skills in data analysis and scientific writing.

Requirements/Evaluation: pre-class quizzes, lab reports, two mid-term exams, and a final exam
Prerequisites: BIOL 102, or ENVI 102, or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: students planning to pursue Biology and/or ENVI
Expected Class Size: 30
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
BIOL 203(D3) ENVI 203(D3)

Quantitative/Formal Reasoning Notes: Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component (based in R). Students are introduced to linear models, multidimensional data analysis and contingency tables.

ENVI 208 (S) Saharan Imaginations (DPE) (WS)
Cross-listings: ARAB 209 / COMP 234

Secondary Cross-listing
Deconstructing reductive Saharanism, which the course conceptualizes as a universalizing discourse about deserts, this course seeks to critically examine the myriad assumptions that are projected upon deserts across times and cultures. In addition to their depiction as dead and empty, deserts have become a canvas for the demonstration of religiosity, resilience, heroism and athleticism. Cultural production, particularly literature and film, do, however, furnish a critical space in which important questions can be raised about deserts' fundamental importance to different cultures and societies. Drawing on novels, films, and secondary scholarship, the course will help students understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the desert sub-genre of African, Euro-American, and Middle Eastern literatures. Whether grappling with transcontinental issues of climate change, cannibalization of biodiversity or overexploitation of natural resources, desert-focused cultural production invites us to interrogate the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature.

Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper
Prerequisites: none
Enrollment Limit: 14
Enrollment Preferences: If the course is over-enrolled, students will required to provide a 200-word paragraph in which they explain how the course fits within their plan of study at Williams.
Expected Class Size: 14
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 209(D1) COMP 234(D1) ENVI 208(D1)

Writing Skills Notes: Students will receive constant and extensive feedback on their written work. Students will write regular weekly responses on Glow, a reflection statement, two 5pp. papers for midterms, and one 10pp. final paper.

Difference, Power, and Equity Notes: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

ENVI 209 Modern Climate (QFR)

What will happen to the Earth's climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects--like the albedo feedback associated with sea ice and glacier loss--and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: 4 multi-week lab projects and several short quizzes
Prerequisites: Any of GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: GEOS and ENVI majors
Expected Class Size: 20
Grading:
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: Lab projects consist of a series of numerical climate modeling projects, which require significant quantitative and logical reasoning.
ENVI 211  (S)  Race, Environment, and the Body

Cross-listings:  SOC 211 / AMST 211 / AFR 211

Secondary Cross-listing

This course is organized around three distinct, but overlapping, concerns. The first concern is how polluting facilities like landfills, industrial sites, and sewage treatment plants are disproportionately located in communities of color. The second concern is the underlying, racist rationales for how corporations, in collaboration with state agencies, plot manufacturers of pollution. The final concern is how the environmental crises outlined in the first two sections of the course are experienced in the body. In reviewing a range of Black cultural productions—like literature, scholarship, music, and film—we will not only consider how environmental disparities physically affect human bodies, but also how embodiments of eco-crises lend to imaginaries of the relationship between the self and the natural world.

Class Format: discussion

Requirements/Evaluation:  class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference given to AFR concentrators, ENVI concentrators and majors, and ANSO majors.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Not offered current academic year

ENVI 212  (F)  The Economics and Ethics of CO2 Offsets  (WS)

Cross-listings:  ECON 214

Secondary Cross-listing

Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about “commodifying” the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve “carbon neutrality?”

Class Format: Each student will be the tutorial partner of one other student, and each pair of tutorial partners will meet with the instructor for 75 minutes each week.

Requirements/Evaluation: a 5- to 7-page paper every other week; a 3-page written critique every other week; one re-write paper

Prerequisites:  ECON 110 or the equivalent, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions:  (D2)  (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
ECON 214(D2) ENVI 212(D2)

Writing Skills Notes: Each student will write five 5-7 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write five 3-page critiques of their partner’s papers. As the final assignment, each student will revise one of their five papers.

Attributes: ENVI Environmental Policy POEC Depth

Not offered current academic year

ENVI 213 (S) Introduction to Environmental and Natural Resource Economics (QFR)

Cross-listings: ECON 213 / CAOS 213

Secondary Cross-listing

We’ll use economics to provide one perspective on reasons humans harm the environment and overuse natural resources, and what we can do about it. We’ll study climate change, pollution in general, cost benefit analysis, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We’ll talk about how economists put a dollar value on nature and ecosystem services (as well as human health and life!), and the concerns people may have about doing so. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth. Consideration of justice and equity will be woven throughout the whole semester.

Requirements/Evaluation: problem sets, short essays, final paper; intermediate assignments may include a poster, one or more short presentation(s), other brief writing assignment(s)

Prerequisites: ECON 110 or equivalent

Enrollment Limit: 30

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course will count toward both the Environmental Studies major and concentration

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 214 (S) Mastering GIS

Cross-listings: GEOS 214

Secondary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS has opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, weekly quizzes, and a research project

Prerequisites: at least one course in Geosciences or Environmental Studies

ENVI 215  Climate Changes  (QFR)

Paleoclimatology is the reconstruction of past climate variability and the forces that drove the climate changes. The Earth's climate system is experiencing unprecedented and catastrophic change because of anthropogenic emission of greenhouse gases and land use change. Paleoclimatology allows humans to put modern climate changes into the context of the history of this planet, and shows how and why it is unprecedented and catastrophic. Each climate event we study from Earth's past teaches us lessons on why the climate system responds to anthropogenic perturbations, what climate changes we're committed to in the future, how long-lasting they will be, and what climate consequences we can avoid if we take action and reduce greenhouse gas emissions sooner. In this course, we will discuss the major mechanisms that cause natural climate variability, how climate of the past is reconstructed, and how climate models are used to test mechanisms that drive climate variation. With these tools, you will analyze and interpret data and model simulations from climate events from Earth's history, and apply these findings to anthropogenic climate changes happening now and that are projected to happen in the future. Laboratories and homework will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

Class Format: This class has three scheduled lectures per week, and one lab meeting per week which will consist of field excursions, lab exercises, problem solving and discussion

Requirements/Evaluation: lab exercises and homework (25%), three quizzes (50%), and a final project (25%)
Prerequisites: 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor

ENVI 220  (S)  Field Botany and Plant Natural History

Cross-listings: BIOL 220

Secondary Cross-listing

This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. Lectures focus on the evolution of the land plants, the most recent and revolutionary developments in plant systematics and phylogeny, the cultural and economic uses of plants and how plants shape our world. The course covers the role of plants in ameliorating global climate change, their importance in contributing to sustainable food production and providing solutions to pressing environmental problems. Throughout we emphasize the critical role
of biodiversity and its conservation. The labs cover field identification, natural history and the ecology of local species.

**Class Format:** both field and indoor laboratories

**Requirements/Evaluation:** Based on two hour exams, field quizzes, a final project, and a final exam

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** Biology majors, and Environmental Studies majors & concentrators

**Expected Class Size:** 24

**Grading:** no pass/fail option, yes fifth course option

**Unit Notes:** satisfies the distribution requirement for the Biology major

**Materials/Lab Fee:** There is a charge for the lab manual ($25); the sketchbook ($7) and hand lens ($23) can be self-provided or purchased from the department.

**Distributions:** (D3)

**ENVI 224  (F) The Rise and Fall of Civilizations**

**Cross-listings:** ANTH 214

**Secondary Cross-listing**

Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human prehistory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

**Class Format:** Class discussion and debates will complement lectures based on powerpoint presentation.

**Requirements/Evaluation:** midterm, final exam, 15pp analytical paper, two quizzes

**Prerequisites:** none

**Enrollment Limit:** 30

**Enrollment Preferences:** First and second years.

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

Not offered current academic year

**ENVI 229  (F) Environmental History**

**Cross-listings:** HIST 264
This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: with field trips
Requirements/Evaluation: several short essays; final research project
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: juniors, seniors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 231 (S) Africa and the Anthropocene (DPE)
Cross-listings: STS 231 / AFR 231
Primary Cross-listing
Despite its low contributions to global carbon emissions, the continent of Africa is predicted to experience some of the worst effects of climate change. This interdisciplinary course investigates the causes and consequences of this troubling contradiction. It positions the African continent as an important site for understanding how legacies of empire, racial and gendered inequality, resource extraction, and capital accumulation impact contemporary global environmental politics. Students will engage theoretical texts, reports from international organizations, films, novels, and web-based content. Topics include: humanism/post-humanism; migration and displacement; representations of conflict; and sustainable development.
Requirements/Evaluation: Assignments include: 2 short written commentaries (2-3 pages each), mid-term current event analysis (5-7 pages), final analytical essay (10-12 pages) and class presentation
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies majors and concentrators
Expected Class Size: 19
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
STS 231(D2) ENVI 231(D2) AFR 231(D2)
Difference, Power, and Equity Notes: Africa and the Anthropocene considers inequity in environmental politics from the vantage of the African continent. Through selected readings and classroom discussions students will tackle questions of power, racial and gendered difference, empire, and economic stratification. The course contributes to the DPE requirement by helping students to develop skills to better analyze abiding challenges in global society.
Attributes: AFR Black Landscapes ENVI Humanities, Arts + Social Science Electives GBST African Studies GBST Economic Development Studies
Not offered current academic year
ENVI 234  (S) Global Poverty and Economic Development  (DPE)

Cross-listings:  ECON 204 / ECON 507

Secondary Cross-listing

Why are some nations rich while other nations are poor, and what can be done to end global poverty and promote shared prosperity? This course explores the historical determinants of global poverty and inequality, and analyzes the range of policy options available to promote economic development and equalize opportunities. Drawing on research in development economics, development studies, political science, and anthropology, we seek to understand the factors that shaped the global economy and contributed to the cross-country income disparities observed today. In addition, we'll use the tools of modern empirical microeconomics to assess the possibilities for eliminating global poverty and underdevelopment in the future. Undergraduate students will receive 200-level credit and should not register at the 500-level.

Class Format: discussion

Requirements/Evaluation: class discussion, short written assignments and/or empirical exercises, in-class quizzes and exams

Prerequisites: one economics course or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 204(D2) ECON 507(D2) ENVI 234(D2)

Difference, Power, and Equity Notes: This course provides a setting for students to learn about the causes and consequences of poverty in developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. The course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

ENVI 243  (S) Reimagining Rivers  (DPE) (WS)

Cross-listings: ANTH 243

Primary Cross-listing

In the era of climate change and widening inequality, how we live with rivers will help define who we are. Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including increased flooding, drought, pollution, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and ecological resilience far into the future unless we learn to manage rivers more justly and sustainably. Can we reimage rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Drawing on scholarship from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, and more.

Requirements/Evaluation: Each week, each student will either write a 5-page essay on assigned readings or write a 2-page critique of a partner's paper.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 243(D2) ANTH 243(D2)

**Writing Skills Notes:** Students take turns writing 5-page essays and 2-page responses to those essays, with each writing 6 in total. For each five-page paper, I meet with the student to discuss technical aspects of the paper and specific ways in which it could be improved. At the end of the semester, students have the option of handing in one revised paper as part of a portfolio of papers from throughout the semester. This enables me to have an ongoing, in-depth discussion with each student about their writing skills.

**Difference, Power, and Equity Notes:** This course focuses on the role of rivers in struggles over cultural difference, social power, and environmental equity. Throughout the course, students read and write extensively about environmental justice, and they engage with diverse theoretical approaches to studying the intersection of water, power, and social identity. Our focus from beginning to end is on the profound impact of river management on the lives of marginalized indigenous, agrarian, and urban communities.

**Spring 2025**

TUT Section: T1    TBA    Nicolas C. Howe

**ENVI 244 (S) Environmental Ethics (WS)**

**Cross-listings:** PHIL 244

**Primary Cross-listing**

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature, among others. Most sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

**Requirements/Evaluation:** five essays (5-7 pages each) and five prepared oral responses to partners’ essays; evaluation will be based on essays, oral responses, and quality of discussion

**Prerequisites:** ENVI 101 or one course in PHIL

**Enrollment Limit:** 10

**Enrollment Preferences:** declared and prospective Environmental Studies majors and concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** meets Value Theory requirement only if registration is under PHIL

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 244(D2) PHIL 244(D2)

**Writing Skills Notes:** Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

**Spring 2025**

TUT Section: T1    TBA    Julie A. Pedroni

**ENVI 254 (S) Food, Forests, & Fungi: Environmental Health in the Anthropocene (DPE) (WS)**

**Cross-listings:** STS 254 / ANTH 254
This tutorial will examine the impacts of the climate crisis on human, environmental, and planetary health via the lens of food systems & plant medicines in the Anthropocene. We use anthropological, environmental, evolutionary, & ecological approaches to explore the ecosystems connecting humans, plants, animals, and fungi that have been massively disrupted by systems of industrial agriculture, industrial forestry, corporate food systems, and corporate biomedicine. We will dwell on the growing signs of our climate catastrophe including the sharp rise of global temperatures, floods, hurricanes, alongside declining freshwater reserves, melting cryosphere, and falling crop yields, that are helping produce a growing wave of hunger and climate refugees in every world region. Along the way, we will hear from and read about youthful climate activists from Extinction Rebellion, Ende Gelände, Fridays for the Future, 350.org, and the Sunrise Movement who are designing and implementing innovative, local, and sustainable solutions to inaction, apathy, and inertia even as situations of internal migration or displacement, food scarcity, food sovereignty, water shortages, and other climate-related disruptions are increasing in both developing and developed parts of our globe. We learn how activist narratives intersect with wider movements to promote more local and circular economies of regenerative agriculture and forestry, ethically produced and sourced organic food, wild & cultivated botanicals, and complementary medicines that are healing both humans and the planet.

Requirements/Evaluation: Weekly attendance, reading 200-300 pages/week, weekly lead essays or oral responses to texts, showing up in mind & body each week.

Prerequisites: none, but a class in ENVI or ANTH preferred

Enrollment Limit: 10

Enrollment Preferences: ANTH, ENVI, STS majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 254(D2) ANTH 254(D2) ENVI 254(D2)

Writing Skills Notes: Students will write essays: either a lead essay of 1400 words, or written & oral feedback on the lead essay plus an oral response to text. Students receive intensive weekly feedback on their essays and a mid semester writing chat with instructor to negotiate and understand strengths and weaknesses of their writing.

Difference, Power, and Equity Notes: We will examine the ways that food systems reproduce social and structural inequalities within public health, environmental health, climate health. We also examined the interconnected nature of the health of our planet, food systems, forests, and fungal networks and how climate activism and action can fight unequal access to food, forests, nature, and health.

Not offered current academic year

ENVI 255 (F) Environmental Observation

Cross-listings: GEOS 255

Secondary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: Weekly labs, four quizzes, and a final project

Prerequisites: at least one prior course in GEOS or ENVI

Enrollment Limit: 20

Enrollment Preferences: sophomores, then GEOS majors

ENVI 257 (S) Cities, Suburbs, and Rural Places (DPE)  
Cross-listings: AMST 247 / LATS 230

Secondary Cross-listing
Long associated with cities in the scholarly and popular imagination, transnational migrants have increasingly settled in U.S. suburbs and rural localities and have made these places home. Through the lens of new destinations for im/migrants, this course introduces spatial methods, perspectives, and concepts to understand cities, suburbs, and rural places. We ask how geographically specific forces and actors shape migrants’ living conditions, as well as consider the spatially uneven outcomes of complex processes like globalization. We analyze how different actors discursively and materially demarcate who belongs and who does not, and how these boundaries shape migrants’ everyday practices. This interdisciplinary course highlights the legal, economic, political, environmental, social, and cultural dimensions of how transnational migrants become part of and create homes in new destinations. Through a range of textual materials (academic, literary, popular, visual), we explore the construction of landscapes, how people shape space at local and regional scales, and where people do life's work and come together to build cultural space. Rooted
in critical race geographies, case studies are comparative across different racial and ethnic groups in the U.S. West, South, Midwest, and Northeast. This course will be mostly discussion-based, grading based on participation, short writing exercises, four assignments, and a final project.

**Class Format:** This is also a discussion course. While I will spend some time at the beginning of the class lecturing, most of the time will be spent in class discussions.

**Requirements/Evaluation:** Grading based on participation, short writing exercises, four assignments, and a final project. All writing materials and exams are based on coursework.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** LATS concentrators or those intending to become LATS concentrators

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 257(D2) AMST 247(D2) LATS 230(D2)

**Difference, Power, and Equity Notes:** Students examine how race, gender, sexuality, class, and documentation status also impact how immigrants 'transition' to new migration destinations. We consider how the exercise of unequal power affects migration, settlement, and place-making. Students analyze representations and demographic data to determine how people are portrayed and what their material conditions are.

LEC Section: 01   TR 9:55 am - 11:10 am   Edgar Sandoval

**ENVI 260 (S) Design and Environmental Justice (DPE)**

**Cross-listings:** ARTS 261

**Primary Cross-listing**

This seminar/digital art studio offers key literature to examine the relationship between design and environmental justice. It will help build a vocabulary to study the environment as disputed terrain between technological fixes and issues of race, ethnicity, gender, sexuality, class, and colonial status. Students will develop textual/graphic projects about a chosen case study aiming to reorient public perception and imagination around environmental justice. Case studies include contemporary issues like "natural" disasters, eco-cities, and urbanization in the Global South and North. Skills taught include design-thinking and collaborative design, digital art (Photoshop), and participation in collective reviews and public presentations. The class culminates in a presentation to external reviewers and a final exhibition.

**Class Format:** Because this seminar is cross-listed with ARTS, there is a studio component (short assignments and final project).

**Requirements/Evaluation:** Active presence in class discussions and presentations, quality of work, depth and quality of the investigative process, willingness to experiment, and contributions to a collaborative learning environment. This intensive seminar/digital art studio requires working in the architecture studio and/or PC lab outside of scheduled class hours.

**Prerequisites:** Drawing I, ENVI 101, or permission from the instructor.

**Enrollment Limit:** 15

**Enrollment Preferences:** Envi majors and concentrators, Studio Art majors, Art History and Studio Art majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $300-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 261(D1) ENVI 260(D2)
Difference, Power, and Equity Notes: This seminar/digital art studio examines the interrelationship between design and environmental justice from an intersectional perspective. It encourages students to develop a critical understanding of the role that technical rationality, devoid of ethics and respect for difference, plays in producing racist, heteropatriarchal, and ecocidal forms of oppression. In parallel, we will explore place-based practices that counter neoliberal and extractivist approaches to the (built) environment.

Attributes: ENVI Humanities, Arts + Social Science Electives  EVST Culture/Humanities

Not offered current academic year

ENVI 261  (S)  Science and Militarism in the Modern World  (WS)

Cross-listings: STS 261

Primary Cross-listing

In 1961, United States President Dwight D. Eisenhower warned about the global dangers of what he called the "military-industrial complex." In this course, we will interrogate the military-scientific complex, or the imbrication of militarism and scientific knowledge. Surveying conflicts from World War II through to the present-day War on Terror, this course will consider how empire, networks of expert knowledge, resource extraction, environmental contamination, and land degradation have shaped the modern world. Students will engage a range of textual materials including books, films, photographs, and news reports. Course requirements include weekly writing assignments and participation in small group discussions.

Class Format: This course adopts a tutorial model. Students will be divided into 5 groups of 2. Each week the groups will meet with me. Each pair will include one "presenter," who shares a 5-7 page paper responding to the week's theme, and one "respondent," who will offer a 2-3 page response to the presenter's paper. The roles of presenter and respondent will alternate each week. Each student will produce 5 papers as "presenter" and 5 papers as "respondent."

Requirements/Evaluation: Each student will produce five (5-7 page) papers as "presenter" and five (2-3 page) papers as "respondent." Grades will be issued based on the portfolio of papers and active participation in discussions.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: ENVI and STS majors and concentrators

Expected Class Size: 10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 261(D2)  STS 261(D2)

Writing Skills Notes: This is a writing intensive tutorial. Students will complete weekly written assignments and receive in-depth feedback to improve their writing. Over the course of the semester, students will write 10 papers ranging from 2-7 pages.

Attributes: ENVI Humanities, Arts + Social Science Electives

Not offered current academic year

ENVI 264  (S)  Architecture as Politics: Space, Design, Technology  (DPE)

Cross-listings: ARTS 254

Secondary Cross-listing

This course delves into the intersection of architecture as a form of political expression, technology, and their collective impact on societal change. Emphasizing architecture as a discipline deeply intertwined with politics and shaped by technological advancement, this course will examine how a spectrum of art tools--from traditional to digital and computational--helps shape buildings and public spaces, shifts power structures, and hinders or promotes social justice. The curriculum blends theoretical exploration with practical application. Students will engage in critical analysis, technology-driven design workshops, and peer evaluations, culminating in a final project that melds techno-political theory with cutting-edge architectural practices. This course is ideal for students keen on leveraging technological architectural techniques to craft spaces with profound political and social impact.

Requirements/Evaluation: This is an intensive studio tutorial requiring working outside of scheduled class hours. In this course, students can work with the following media assuming that they can master them for a 200-level course: architecture models (physical and digital), photo reportages, 2D collages (e.g., Photoshop), digital humanities (cartographies, counter mapping, oral histories, digital archives), and curatorial platforms. Students will participate in tutorials plus a final project of significant scope. Evaluation will be based primarily on the quality of the final project but also on
Enrollment Limit: 10

Enrollment Preferences: Studio Art majors, Art History and Studio Art majors, ENVI majors and concentrators.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $350-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 254(D1) ENVI 264(D1)

Difference, Power, and Equity Notes: This tutorial will employ theories and approaches from design activism and critical environmental studies to analyze the relationship between space and difference, including, but not limited to, race, class, ethnicity, gender, sexuality, religion, and species. Students will apply these theories and approaches to creating place-based projects.

Spring 2025

TUT Section: T1 TR 11:20 am - 12:35 pm Giuseppina Forte

ENVI 269 (F) Environmental Law and Policy

Cross-listings: CAOS 269

Primary Cross-listing

America’s environmental statutes, regulations, legal precedents, and policies have grown in complexity over the last 75 years. These bi-partisan, broadly supported laws also shaped environmental laws and policies in the European Union, China, the Middle East, and countries in the Global South. Yet in 2024, America is no longer a global leader in climate mitigation or environmental protection. As legal and policy solutions to environmental problems continue to evolve based on values, science, market dynamics, and increasing climate change impacts, it is important to study this complex legal landscape to understand where opportunities lie for more ambitious and just solutions to complex environmental problems. This class surveys major environmental laws and policies by looking at cases of current, complex environmental problems. This course will focus not only on the hallmark American environmental laws, regulations, and policies but also on the interplay of state and tribal law, food, water, mineral, energy, tax, and animal rights law issues, and international treaties and climate agreements. By the completion of the semester, students will understand both the successes and failures of modern environmental law. In addition to learning about the substantive legal issues covered in the course, students will develop legal research skills associated with researching statutes and regulations and interpreting judicial decisions. This course will help students interested in future work in law or policy understand how to analyze cases, regulations, and policy, and see opportunities for future solutions.

Requirements/Evaluation: 1) Class Participation (leading discussion and presenting materials) 20%; 2) Weekly 300-word Case Briefs 30%; 3) Comparative Law/Policy Analysis (5-7 page research paper) 30%; 4) Final Exam 20%

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: Preference to Environmental Studies majors and concentrators and sophomores and above.

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Fall 2024
ENVI 275 (S) Environmental Science, Policy, and Justice (DPE)

Cross-listings: STS 275

Primary Cross-listing
Environmental science is much more than collecting data. Scientific experts are often called upon--and often position themselves--to guide environmental governance, which means that science has (some) power over public life. What is, and what should be, the relationship between science, on the one hand, and the creation and implementation of environmental policy, on the other? In this seminar we will study how science shapes governance and how science itself is governed. We will explore how legislatures, agencies, and courts respond to scientific information and uncertainty. And we will learn about how communities facing environmental racism and injustice collect data and use it in their advocacy. Along the way, we will challenge the idea of a unified “scientific method,” and we will think about how Western scientific knowledge relates to other ways of knowing, including non-Western sciences, embodied knowledge, and traditional knowledge. Topics include: international climate negotiation, chemical exposure, the regulation of biotechnology, agricultural policy, pandemic responses, and plastics and electronics waste.

Requirements/Evaluation: several short essays, final essay

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: juniors, seniors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 275(D2) ENVI 275(D2)

Difference, Power, and Equity Notes: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. Using case studies we will analyze how communities facing environmental racism interact with scientists and sciences.

Attributes: ENVI Environmental Policy  EVST Social Science/Policy

Not offered current academic year

ENVI 288 (F) Environmental Security: Policy Dilemmas and Solutions

Cross-listings: GBST 288

Primary Cross-listing
Water wars. Climate refugees. Scarcity-induced conflict. These and other challenges shape collective discourses about the climate change present and future. This course explores the relationship between environmental and security issues. It surveys the emergence of environmental security as a field of study and a policy arena. Students will engage a range of materials, including policy documents from the United Nations, international non-governmental organizations, global think tanks, the United States Department of Defense, and other security agencies. Students will also explore critical scholarship on the possibilities and limitations of environmental security as a leading policy paradigm.

Requirements/Evaluation: Class discussions; Two short response papers (2-5 pages each); Semester-long group policy project, including a mid-term policy report (4-6 pages) and a final group presentation as part of a mini conference put on by the class.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: environmental studies majors and concentrators; global studies concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 288(D2) GBST 288(D2)
ENVI 291 (F) Religion and Ecology in America  (WS)

Cross-listings: REL 291 / SOC 291

Primary Cross-listing

This course examines the relationship between religious and environmental thought in American cultural history. Exploring a broad range of practices, stories, and beliefs, we will examine the spiritual roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have religious writers, thinkers, and artists shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? In pursuit of these questions, we will consider a diverse array of topics and cases, including struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoorsmanship, Catholic climate activism, Jewish eco-mysticism, atheist biological theory, Buddhist eco-spirituality, and more.

Requirements/Evaluation: Each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading:  no pass/fail option,  no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 291(D2) REL 291(D2) SOC 291(D2)

Writing Skills Notes: Each student will write five five-page papers and five two-page papers in this class. They will be given extensive weekly feedback on their writing in the form of one-on-one meetings and written comments, and they will be given multiple opportunities for revision. Emphasis will be placed on the mechanics of argumentation, logic and rhetoric, and the development of a distinctive voice.

Attributes: ENVI Humanities, Arts + Social Science Electives

ENVI 297 (F) Global Sustainable Development  (DPE)

Cross-listings: GBST 287

Primary Cross-listing

In 2015, the United Nations launched the Sustainable Development Goals, an ambitious multi-pronged effort to eliminate poverty, improve health outcomes, advance clean energy, address the effects of climate change, and support more equitable forms of life on earth. This course explores the historical antecedents and contemporary manifestations of global sustainable development, a constellation of ideas and a set of policy imperatives. This course will ask: what is sustainability and how did it emerge as a key paradigm in the present? Relatedly, how have different organizations and actors worked to address entrenched global challenges? Students will engage a range of materials, including policy documents from the United Nations, World Bank, and international non-governmental organizations. Students will also explore critical scholarship on the possibilities and limitations of global development. Together we will grapple with ways to build more sustainable futures.

Requirements/Evaluation: Class discussions; 2 Policy Analysis Papers (4-6 pages each); Class presentations; Final Take-Home exam (8-10 pages)

Prerequisites: none

Enrollment Limit: 19
Enrollment Preferences: Envi majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 297(D2) GBST 287(D2)

Difference, Power, and Equity Notes: This class considers topics of global inequality, including the impacts of colonialism, uneven development, extractive capitalism, gender-based discrimination/violence, and racial/ethnic environmental disparities. Students are invited to reconsider stereotypes about the "developing world" through a deep engagement with history and policy-making.

Attributes: ENVI Environmental Policy EVST Social Science/Policy

Not offered current academic year

ENVI 298 (F) Cultural Geography

Why do things happen where they do? What is the relationship between place and identity? How do history and politics shape the way people conceptualize space? What can landscapes tell us about the values, beliefs, and ideas of the people who inhabit them? Questions like these drive the vibrant field of cultural geography. Cultural geographers study how humans shape, experience, and imagine the material world. They explore the relationship between humans and their environment at scales ranging from the global to the local, and they ask how we may better understand ourselves and others by examining the places and landscapes we create. Drawing on case studies from around the world and exploring our local area, this class will survey the major theoretical, methodological, and empirical themes that have preoccupied modern geographers. Along the way, students will acquire some useful tools for making a world that is more beautiful, sustainable, and just.

Requirements/Evaluation: Three 5-7-pages essays and several shorter writing assignments.

Prerequisites: Environmental Studies 101

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

ENVI 300 (S) "'Rebel Ecologies': Black and Indigenous Struggles for Land and Life"

Cross-listings: WGSS 362 / AFR 300 / AMST 362

Secondary Cross-listing

This course will ask, what other socioecological models exist? We will weave together a study of differing, yet often converging or synergistic traditions of Black/Womanist eco-feminism that often confronts the social constructions of race, gender, class and sexuality, dominant religion as a means of social control, imperialism, capitalism, and colonialism; Ecosocialism which often frames ecology in terms of a mode of production beyond or outside of capitalism; and Indigenous perspectives on resistance to capitalist extraction, imperialism, and colonialism. Given ongoing struggles against the extraction of land and labor, the urgent calls raised in the present-day "climate strike," the COVID-19 Pandemic, Black-led pandemic rebellions, along with long(er) histories of land-based peoples around the planet opposing racial capitalism, settler colonialism, and imperialism, this class will explore not only what those in opposition to both extractivism and expropriation resist, but also what we want. We will critique binaries, settler notions of time and explore theories of change. Additionally, this class will look to an array of literature, film, sound, and other forms of cultural production in order to not just "locate," but describe and reveal rebel ecological visions emerging "from below." Ultimately this class will consider how the above ecological praxis can work simultaneously and within a sense of plurality, examining what we can learn from the work of activists, intellectuals, and defenders on the frontline. This course is an extension of Dr. Guess' concept of a "rebel ecology."

Requirements/Evaluation: The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as
Discussion Leader at least twice 20%; Weekly 500-word Literature Review 20%; One Final Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More projects might include, an annotated bibliography of 7 texts, film analysis, syllabus, book review, a written play, an op-ed, etc. We will discuss further possibilities in class.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: If the course is overenrolled, preference will be given to Africana studies concentrators.

Expected Class Size: 7

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 362(D2) AFR 300(D2) ENVI 300(D2) AMST 362(D2)

Not offered current academic year

ENVI 303  (S)  Cultures of Climate Change

Cross-listings: SOC 303

Primary Cross-listing
This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about what climate change means? How does something as complex as climate change become a "problem" in the first place? And what can its many proposed "solutions" tell us about the role of culture in environmental policy, politics, and decision-making. This course will explore a broad array of factors, from religion to race, class to colonialism. Emphasizing ethnographic and historical accounts of climate change as lived experience, it will apply a range of theories from the social sciences and humanities to case studies from around the world.

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators first; Anthropology and Sociology majors second

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Not offered current academic year

ENVI 304  (S)  Sacred Custodians: Environmental Conservation in Africa  (DPE)

Cross-listings: HIST 304 / GBST 304 / AFR 335

Secondary Cross-listing
In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of de-forestation. Ken Saro-Wiwa was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental crisis that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction,
game parks, desertification, wildlife and hunting, traditional practices, and climate change.

**Requirements/Evaluation:** Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and one exam.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** If course is over-enrolled, preference to History Majors and students with a demonstrated interest in African studies.

**Expected Class Size:** 15-20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 304(D2) GBST 304(D2) ENVI 304(D2) AFR 335(D2)

**Difference, Power, and Equity Notes:** This course will intensively explore the question of how various global and local actors have defined environmental degradation and promoted approaches to conservation in Africa. It guides students through an examination of the different power dynamics that have shaped environmental conservation thought and practices on the continent. This course, therefore, provides a critical lens through which to examine the inequalities rooted in race, gender, and other forms of difference

**ENVI 311 (S) Environmental Literature and Film in Latin America (DPE) (WS)**

**Cross-listings:** RLS 304 / COMP 311

**Secondary Cross-listing**

What use are aesthetics when the world is (literally) on fire? We will take up this question and others in a critical engagement with Latin American cultural production of the twentieth and twentieth centuries, especially works of literature and film that directly or indirectly engage with environmental crisis. Students can expect to explore a variety of media, forms and genres, including works that range from (more or less) mainstream to cutting edge. Our examinations of literature and film will be supported by theoretical writings produced in the Americas and other places. Writers and directors whose work may be considered include, but are not limited to: Lucrecia Martel, Ciro Guerra, Rafael Barrett, Samanta Schweblin, Ernesto Cardenal, Juan Rufio, María Luisa Bombal, Eduardo Gudynas, Silvia Rivera Cusicanqui, Eduardo Viveiros de Castro, Isabelle Stengers.

**Requirements/Evaluation:** This course will be conducted seminar-style. Students will be expected to prepare thoroughly and be active, engaged participants in class discussions. In addition to day to day preparation and participation, other graded assignments will include discussion-leading, one short (5-7 page) essay and a longer (15-20 page) paper combining research and original analysis.

**Prerequisites:** One college literature of film course at the 200-level or above.

**Enrollment Limit:** 19

**Enrollment Preferences:** Envi majors and concentrators, Comp Lit majors, Spanish majors and those working towards the Spanish certificate.

**Expected Class Size:** 12

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D1) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 311(D1) RLS 304(D1) COMP 311(D1)

**Writing Skills Notes:** All students in the course will write (and rewrite) no less than 20 pages. Major writing assignments will be scaffolded, with explicit discussion of the writing process (pre-writing, drafting, revision) and consultation.

**Difference, Power, and Equity Notes:** The works of literature and film that we will be examining challenge North American conceptions of climate change (and environmental crisis more broadly) by making visible (often uncomfortably so) the colonial and neocolonial history of extractivism.

ENVI 316  (F)  Governing Cities by Design: the Built Environment as a Technology of Space  (DPE)

Cross-listings: ARTS 316

Primary Cross-listing

Like in the classic era, cities of the 19th century were metaphors for government: good government could not exist without good governance of the city. This creative seminar charts the transformation of the built environment (architecture and urbanism) as a technology of space to govern cities and citizens from the mid-19th century until the present. Through debates and case studies across geographies and historical timeframes, we will analyze how regimes of government shape and are shaped by the built environment. The seminar has a studio component that consists of an urban project where students will apply theories and approaches to a real case study using digital art (2D and 3D modeling).

Class Format: Because this seminar is cross-listed with ARTS, there is a studio component (short assignments and final project)

Requirements/Evaluation: Active presence in class discussions and presentations, willingness to experiment, contributions to a collaborative seminar/studio environment, quality of work, depth and quality of the investigative process.

Prerequisites: ENVI 101 or instructor permission

Enrollment Limit: 15

Enrollment Preferences: ENVI majors and concentrators, Studio Art majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $250-$350 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 316(D1) ENVI 316(D2)

Difference, Power, and Equity Notes: Using theoretical perspectives from urban studies, this seminar/workshop explores how the built environment, as a technology of space, contributes to the production of difference, the establishment of certain regimes of power, and the erasure of specific urban histories—mainly those of underrepresented groups. Students will engage in multimedia place-based projects to imagine and create more equitable built environments.

ENVI 319  (S)  The Law and Policy of Climate Change

This course explores the legal frameworks that guide climate change mitigation efforts and adaptation strategies. This course builds on knowledge gained in the fall semester Environmental Law and Policy course, but will also refresh the basic tenets of environmental law. After a brief introduction to climate change and its projected impacts, we review the legal framework of international climate change law, including the evolution of climate change-related laws in the United States and related litigation. This analysis focuses on the federal level but also considers the separate authority of states and municipalities to take action. Massachusetts and Boston are the primary case studies for the course, but other state examples will inform our classes on non-federal policy-making. In addition to learning about the substantive legal issues covered in the course, students develop or practice legal research skills associated with researching statutes and regulations and interpreting judicial decisions. Students gain experience with activities relevant to designing and implementing climate change policy by writing comments on regulations, drafting statutory or regulatory language, and writing corporate climate change statements.

Requirements/Evaluation: Class Participation (leading discussion and presenting materials) 20%; Weekly 300-500-word Responses 30%; Policy Proposal (5-7 page research paper) 25%; Final Exam 25%

Prerequisites: ENVI 269 or permission of instructor.

Enrollment Limit: 25

Enrollment Preferences: Environmental studies concentrators and majors and sophomores and above.

Expected Class Size: 25
ENVI 320  (S)  Ecosystem ecology in the Anthropocene

Cross-listings:  BIOL 320 / GEOS 320

Secondary Cross-listing

Ecosystem ecology provides a framework for understanding the multidirectional interactions between biological organisms and their physical environments, and provides critical insight into our approaches for managing resource use in an era of anthropogenic change. In this class, we will explore the biological and biogeochemical underpinnings of ecosystem carbon and nutrient cycling. Topics will include interactions between species composition and ecosystem function, nutrient use efficiency, resource transformations, ecosystem management and restoration, and feedbacks to global change. Lecture content will be supported by regular discussions of the primary literature. Labs will introduce students to field and laboratory techniques to study resource and energy flow in local ecosystems, as well as approaches to project design, hypothesis development, data collection, and analysis. The laboratory program will culminate with a multi-week independent project.

Class Format: lectures, discussions, and a weekly lab

Requirements/Evaluation: Evaluation will be based on lab assignments, discussion participation, three exams, and an independent project

Prerequisites:  BIOL/ENVI 203 or GEOS 208 or BIOL 211 or GEOS 212

Enrollment Limit:  20

Enrollment Preferences:  Biology majors, then Environmental studies majors/concentrators or Geosciences majors

Expected Class Size:  20

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 320(D3)  ENVI 320(D3)  GEOS 320(D3)

Attributes:  ENVI Natural World Electives

ENVI 322  (F)  Waste and Value

Cross-listings:  GBST 322 / ANTH 322

Secondary Cross-listing

What is trash and what is treasure? In what ways does value depend upon and necessitate waste, and how is the dialectic between the two inflected by culture? When we 'throw away' things at Williams College, where exactly do they go, and who handles them 'down the line'? What are the local and global economies of waste in which we are all embedded and how are they structured by class, race, caste, gender and nation? In this seminar we critically examine the production of waste - both as material and as category - and its role in the production of value, meaning, hierarchy and the environment. Readings include ethnographic accounts of sanitation labor and social hierarchy; studies of the political and environmental consequences of systems of waste management in the colonial period and the present; and theoretical inquiries into the relation between filth and culture, including work by Mary Douglas, Dipesh Chakrabarty and Karl Marx. Geographically the foci are South Asia and North America. There is also a fieldwork component to the course. In fieldtrips we follow the waste streams flowing out of Williams - to an incinerator, a sewage treatment plant, recycling and composting facilities and other sites - and students explore in individual, participant-observation-based research projects the everyday social life of waste in our communities.

ENVI 327  (F) Coastal Processes and Geomorphology   (QFR)
Cross-listings: GEOS 327 / CAOS 327
Secondary Cross-listing
Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, quizzes, and an independent research project

Prerequisites: Either GEOS 104 or GEOS 210; or permission of instructor. No prior knowledge is necessary, but this course does build on principles used to explore complex scientific challenges.

Enrollment Limit: 15

Enrollment Preferences: Geosciences majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course counts toward the GEOS Group B Electives - Sediments + Life.

Distributions: (D3)   (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 327(D3) GEOS 327(D3) CAOS 327(D3)

Quantitative/Formal Reasoning Notes: This course will involve the use of MATLAB software to quantitatively analyze coastal process and
Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth’s surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will explore local case studies of geomorphology, such as the impact of ice-age glaciation on landscapes in the northeastern United States and the legacy of deforestation and river damming during the colonial era. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, a research project, and a midterm and final exam

Prerequisites: At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: GEOS and ENVI majors

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

attempts to manage and control the Nile, including the building of big dams, and the continuous efforts to utilize the river for economic development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the major urban centers with the Nile and whether the tensions among Nile riparian states will lead to "water wars" in East Africa and the Middle East.

Requirements/Evaluation: short papers and final project/paper
Prerequisites: none, though background in Middle East history is preferable
Enrollment Limit: 19
Enrollment Preferences: History and Arabic Studies majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 308(D2) GBST 320(D2) AFR 350(D2) ENVI 335(D2) HIST 308(D2)

Difference, Power, and Equity Notes: The course fulfills the DPE requirement because it evaluates the differing experiences of the Nile among different cultural groups. It will evaluate how the central government is constantly trying to change how people use their water and therefore over-determine how people interact with their natural environment.

Attributes: HIST Group E Electives - Middle East HIST Group P Electives - Premodern
Not offered current academic year

ENVI 339 (F) Conservation Biology
Cross-listings: BIOL 329
Secondary Cross-listing
Conservation Biology focuses on protection of the Earth's biodiversity. This course starts with an overview of biodiversity including patterns of species richness, causes of species loss (extinction), and the critical contributions of biodiversity to ecosystem function and human welfare. Then we analyze ways to conserve biodiversity at the genetic, population, species and community/ecosystem levels. Labs are field oriented, and focus on local New England communities and ecosystems. Labs emphasize knowing the dominant species in each system; they also stress how to collect and analyze the field data on ecological community structure and function that are critical to test hypotheses that relate to different conservation goals.

Class Format: lectures, discussions, and a weekly lab.
Requirements/Evaluation: Evaluation will be based on lab assignments and reports, discussion participation, two exams and an independent project.
Prerequisites: BIOL 203/ENVI 203 or BIOL 220 or BIOL 305 or permission of instructor.
Enrollment Limit: 24
Enrollment Preferences: Biology majors, Environmental Studies majors, seniors, and juniors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D3)
This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ENVI 346 (F) Environmental Psychology
Cross-listings: PSYC 346
Secondary Cross-listing
This is a course on contemporary social psychology as it pertains to the natural environment. Our two primary questions in this course are: (1) how can research and theory in social psychology help us understand the ways in which people engage with threats to the natural environment?, and (2) how can social psychology help us encourage environmentally responsible behavior and sustainable practices? Because human choice and behavior...
play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of environmental solutions.

Requirements/Evaluation: a series of papers, two essay exams, written and oral reports of research

Prerequisites: PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.

Enrollment Limit: 19

Enrollment Preferences: Psychology majors, Environmental Studies majors, and Environmental Studies concentrators

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ENVI 351 (F)(S) Marine Policy (DPE) (WS)

Cross-listings: PSCI 319 / CAOS 351

Secondary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.

Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available

Prerequisites: none

Enrollment Limit: 23

Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut

Expected Class Size: 22

Grading: no pass/fail option, no fifth course option

Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

PSCI 319(D2) ENVI 351(D2) CAOS 351(D2)

Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.

Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

Attributes: ENVI Environmental Policy EXPE Experiential Education Courses POEC Depth
ENVI 363  (F)  Environmental Fate of Organic Chemicals

Cross-listings:  CHEM 363

Secondary Cross-listing

This course introduces students to the methods used to assess the risks posed by organic chemicals to human, animal, and ecosystem health. Our goal is to develop a quantitative understanding for how specific features of organic molecular structure directly dictate a given molecule’s environmental fate. We will begin by using thermodynamic principles to estimate the salient physiochemical properties of molecules (e.g., vapor pressure, solubility, charging behavior, etc.) that impact the distribution, or partitioning, of organic chemicals between air, water, soils, and biota. Then, using quantitative structure activity relationships, we will predict the degradation kinetics resulting from natural nucleophilic, photochemical, and biological processes that determine chemical lifetime in the environment.

Class Format: lecture, three hours per week and laboratory, four hours per week

Requirements/Evaluation: weekly problem sets, laboratory exercises, two midterm exams, a final exam, participation in lecture and lab

Prerequisites:  CHEM 155 or CHEM 256 and CHEM 156; or CHEM 200 and CHEM 201

Enrollment Limit:  12

Enrollment Preferences:  junior and senior Chemistry and Environmental Studies majors with a demonstrated interest in environmental chemistry

Expected Class Size:  12

Grading:  no pass/fail option, no fifth course option

Distributions:  (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 363(D3) CHEM 363(D3)

Attributes:  ENVI Natural World Electives  EVST Environmental Science

ENVI 364  (S)  Instrumental Methods of Analysis

Cross-listings:

Secondary Cross-listing

Instrumental methods of analysis provide scientists with different lenses to observe and elucidate fundamental chemical phenomena and to measure parameters and properties at the atomic, molecular, and bulk scales. This course introduces a framework for learning about a variety of instrumental techniques that typically include chromatography, mass spectrometry, thermal methods, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies. Students complete laboratory projects and gain hands-on experience and project planning skills to study molecules and materials of interest. This practical experience is complemented by lectures that cover the theory and broader applications of these techniques. Students also explore the primary literature and highlight recent advances in instrumental methods that address today's analytical questions. The skills learned are useful in a wide variety of scientific areas and will prepare you well for research endeavors.

Class Format: lecture, two times per week and laboratory, four hours per week

Requirements/Evaluation:  Weekly data analysis, laboratory assignments and reports, readings for class, problem sets, one oral presentation of an application of instrumental methods, a final independent literature project and presentation; demonstrated progress in research skills, and project engagement.

Prerequisites:  CHEM 251 and CHEM 256 (or permission of instructor); or CHEM 200 and CHEM 201 (can be taken concurrently with CHEM 201)
Enrollment Limit: 16
Enrollment Preferences: Chemistry and Environmental Studies majors

ENVI 376 (F) Economics of Environmental Behavior (QFR)
Cross-listings: CAOS 477 / ECON 477
Secondary Cross-listing
A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to assess how policies can help or hurt the environment. Topics we may study include: common pool resources, voluntary conservation, social norms and nudges, discrimination and justice, rationality, firm responses to mandatory and voluntary regulation, voting and public opinion, and international environmental agreements. We'll also build familiarity with the main methodologies of modern economic research: theoretical modeling, empirical analysis of observational data, and experiments.
Class Format: Class sessions will largely consist of presentations and discussions of academic research papers, as well as lab sessions to work on empirical exercises and other interactive activities
Requirements/Evaluation: class participation, regular reading markup, empirical exercises, oral presentation(s), and an original research paper using an experiment, observational data, or theory
Prerequisites: ECON 251 and (ECON 255 or STAT 346)
Enrollment Limit: 19
Enrollment Preferences: senior Economics majors and junior Economics majors considering a thesis
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 380 (F) Animals and Society
Cross-listings: STS 379
Primary Cross-listing
How do humans and animals shape each other’s lives? People encounter animals in farms, laboratories, zoos, wildernesses, and backyards, on purpose and by chance. They treat animals as family members, entertainment, food, vectors of disease, and objects of scientific wonder. Drawing on the works of biologists, philosophers, and feminist science and technology studies scholars, this seminar will examine our relationships with animals and help clarify our responsibilities to them. We will ask: What are the social and environmental consequences of consuming animals? Should humans swim with dolphins, feed manatees, use gene-editing to create species that can survive climate change? Should moral standing depend upon the
ability to communicate or the ability to experience emotions like grief and joy? What can animal models tell us about human health and society, and when is animal otherness too large a gap to bridge? What might human violence toward animals tell us about sexism, racism, or capitalism, and what will human-animal relationships look like in the future?

**Requirements/Evaluation:** short essays, final portfolio

**Prerequisites:** none

**Enrollment Limit:** 18

**Enrollment Preferences:** juniors and seniors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

**ENVI 387 Economics of Climate Change (QFR)**

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

**Requirements/Evaluation:** problem sets, midterm, group presentation, final exam

**Prerequisites:** ECON 251, familiarity with statistics

**Enrollment Limit:** 25

**Enrollment Preferences:** Junior/Senior Economics majors and CDE fellows

**Expected Class Size:** 25

**Grading:**

**Distributions:** (D2) (QFR)

**Quantitative/Formal Reasoning Notes:** The course involves simple calculus-based theory and applied statistics.

**Attributes:** ENVI Environmental Policy POEC Depth

**ENVI 390 (F) The Nature of Nature**

**Cross-listings:** ENGL 394

**Secondary Cross-listing**

"Nature" is one of the commonest words in English. And yet what does it mean? Is it primarily descriptive (all living things), or normative ("natural" foods, "human nature")? This course will consider the richly incoherent ways we think about the living world, paying particular attention to the difficulty of narrating processes that are too big, too small, too quick, or too slow for direct human apprehension. We'll explore the way popular nature writing mingles scientific reporting with implicit and explicit judgments about human identity, and take up the insoluble problem of our proper relation to animals. Considerable attention will be paid to the ethical dimensions of contemporary environmental consciousness and unconsciousness. Writers studied will include Elizabeth Kolbert, Descartes, William Cronon, and Charles Darwin.

**Requirements/Evaluation:** Several short exercises, two six-page comparative essays, and a final self-designed project, subject to my approval. Active participation in class. The final project should explore something serious -- about nature, about yourself -- in ways that are not merely verbal or academic, but instead involve a sense of risk.

**Prerequisites:** a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam
Enrollment Limit: 25
Enrollment Preferences: English majors; Environmental Studies majors and concentrators; Philosophy majors.
Expected Class Size: 25
Grading: no pass/fail option, no fifth course option

ENVI 402  (F) Environmental Planning Workshop: Community Project Experience
Cross-listings: AMST 406
Primary Cross-listing
In this class you apply your education to effect social and environmental change in the Berkshires. Students work in small collaborative groups to address pressing issues facing the region. Class teams partner with community organizations and local & county governments to conduct applied research and to develop solutions. Students will learn experientially and contribute to the community. The field of environmental planning
encompasses the built environment (eg: housing, zoning, transportation, renewable energy, waste, neighborhood design), the natural environment (eg: farmland, ecosystems, habitat, natural resources, air and water pollution and climate change), and the social environment (eg: spatial geography, racial zoning, recreation, placemaking, ecojustice, food security, and public health). Skills taught include land use planning, community-based research, basic GIS mapping, developing/conducting surveys, interview technique, project management, public presentations and professional report-writing. The class culminates in presentations to the client organizations. Class hours include time for team project work, client meetings and team meetings with the professor. Recent project topics: https://ces.williams.edu/environmental-planning-papers/

Class Format: The weekly conference session (1 hour) is dedicated to site visit field trips, team project work, client meetings and team meetings with professor.

Requirements/Evaluation: Response papers (three 1-page papers), in-class exercises, class discussion, small group work, public meeting attendance, project work, final report (due in segments during semester) and final presentation.

Prerequisites: ENVI 101 recommended; open to juniors and seniors.

Enrollment Limit: 16

Enrollment Preferences: Environmental Studies majors and concentrators, American Studies majors, Maritime Studies concentrators.

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Unit Notes: Course fulfills senior seminar requirement for Environmental Studies Majors & Environmental Studies Concentrators. American Studies Space & Place elective. Course is an Environmental Studies Concentration elective (ENVI Policy and ENVI Humanities, Arts + Social Science) and Environmental Studies Major elective.

ENVI 410 (S) The Cryosphere

Cross-listings: CAOS 410 / GEOS 410

Secondary Cross-listing

The Earth’s climate system is often described in terms of its spheres, including the atmosphere, biosphere, lithosphere, oceans, and the cryosphere. The cryosphere is the naturally occurring ice on Earth in all its many forms: snow, glaciers, ice sheets, sea ice, frozen lakes and rivers, and permafrost (frozen soil). These parts of the climate system may seem remote, but have implications for climate and weather around the world. Melting glaciers and ice sheets have already contributed to sea level rise, and are projected to do so even more in the future. This course will explore the cryosphere, including snow, sea ice, permafrost, and glaciers through lectures, hands-on and data analysis labs, reading journal articles, and a final project. As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major.

Class Format: Class periods and lab periods will be used interchangeably based on the weather.

Requirements/Evaluation: Evaluation will be based on short papers, labs responses, and a research project

Prerequisites: GEOS 215 or GEOS 255 or GEOS 309 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Senior GEOS majors, then other GEOS majors and senior ENVI majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during
ENVI 413  (F) The Big Ideas: Intended and Unintended Consequence of Human Ambition  (DPE) (WS)

Cross-listings:  HIST 413 / GBST 413 / ARAB 413

Secondary Cross-listing

What have been the most consequential ideas of the last 100 years? This course will explore some of the more audacious and ambitious plans to alter natural and urban environments in the late 19th century to the early part of the 21st, specifically those that sought to improve the human condition through science, engineering, and technology. By building big bold things, politicians around the globe sought to bring prosperity to their nation and embark on a path of modernity and independence. Through an intellectual, political and environmental history of major construction projects such as the building of the Suez Canal and the Aswan Dam, extensive river valley developments in Iran, Turkey and Iraq, and utopian and futuristic city planning in western Asia, students will consider how, with the benefit of hindsight, to best evaluate the feasibility of such bold schemes. Who has benefitted and who has not, what have been some of the unanticipated consequences, what was sacrificed or neglected, and what do these projects tell us about the larger processes of global capitalism, decolonization, and climate change?

Requirements/Evaluation:  A presentation, shorter writing assignments and a longer research paper (20-25 pages) in the end. Students will submit shorter drafts of final paper in order to receive constructive feedback prior to final submission.

Prerequisites:  None

Enrollment Limit:  15

Enrollment Preferences:  Seniors, especially History, Arabic and Environmental Studies majors.

Expected Class Size:  15

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE)  (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 413(D2)  GBST 413(D2)  ARAB 413(D2)  ENVI 413(D2)

Writing Skills Notes:  A 20-25 page research paper will be required at the end of the semester. Prior to getting to that point, students will submit an annotated bibliography, a two page proposal, a five and eventually a 10 page draft. Each draft will receive extensive comments and suggestions from peers and instructor. In this way, the student will think about the process of writing and the best way to set themselves up for success.

Difference, Power, and Equity Notes:  This course examines how a number of different nations in Africa and Asia sought to improve the living conditions of the masses through major construction project. Though ostensibly these schemes were supposed to improve the livelihood of all, often they primarily benefitted the few - the urban elite - and not the general population. This course will therefore explore how certain class, gender and racial lines were solidified and maintained through economic development plans.

Attributes:  HIST Group E Electives - Middle East

Not offered current academic year

ENVI 450  (F) Senior Seminar: Environmental Ethnography  (WS)

A key question orients this course: What can the embodied, place-based, and detailed approach of ethnographic study bring to our understandings of the environment? This upper-level seminar will explore this question through classroom discussions and a semester-length research project. Students will engage different styles of environmental ethnography while undertaking their own ethnographic projects involving the Williams College community and surrounding areas. Students will learn to work across different kinds of evidence as they draft fieldnotes, code fieldwork data, extrapolate key
ideas from their fieldwork materials, and discover new ways of building environmental knowledge. Students will use these materials to collectively assemble an edited volume of ethnographic snapshots to be presented to the wider Environmental Studies community at Williams.

**Requirements/Evaluation:** Participation in seminar discussions; Weekly fieldnotes (2-3 pages per week); Mid-term coded fieldwork notes and summary statements (9-20 pages); Final ethnographic paper (10-12 pages) and short film

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Environmental Studies majors and concentrators; Juniors and Seniors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** This is a writing intensive capstone seminar. Students will produce and receive peer and professor feedback on weekly written assignments. The course includes a 9-20 page midterm and a 10-12 page final ethnographic paper.

**Attributes:** ENV Environmental Policy  EVST Senior Seminar

---

**ENV 460  (S)  Communicating Climate Change**

Long-term, probabilistic thinking about scary scenarios is hard. When the relevant time frames extend to centuries and millennia, it is really hard. And when the degree of scariness is determined by sciences that few people understand, it is really, really hard. Such is the challenge of climate change communication. No matter what your interests or career paths might be, you will need to be able to communicate effectively about environmental problems, often with people who see them very differently from you. It is difficult to communicate about any problem across social, political, and cultural divides. But environmental problems present special challenges. For one thing, they typically involve complicated, contested science. For another, their effects are often difficult to perceive yet potentially devastating in their consequences, especially for future generations and marginalized people. For yet another, their solutions often seem hopelessly difficult to implement. And for yet another, they are thoroughly entangled with almost every other problem we face, from pandemics to racism to wealth inequality. How do we communicate clearly, persuasively, and responsibly about something so complex? What does climate change really mean? This seminar brings together students with interests in the humanities, arts, social sciences and sciences to seek answers to this fundamental question. Drawing on insights from the qualitative social sciences and environmental humanities, we will develop a theoretical and methodological tool kit that can be applied to concrete, practical problems. Over the course of the semester, each student will pursue a major independent project that allows them to put these tools to use while exploring a topic of personal significance.

**Requirements/Evaluation:** Several sequenced short writing assignments leading to a 15-20 page final paper.

**Prerequisites:** Environmental Studies 101 and 102.

**Enrollment Limit:** 19

**Enrollment Preferences:** Environmental/Maritime Studies majors and concentrators.

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Attributes:** CAOS Senior Seminars  ENV Core Courses  EVST Core Courses

---

**ENV 465  (S)  Solutions to the Biodiversity Crisis**

The biodiversity crisis is one of the greatest challenges of our century. Faced with climate change, persistent pollution, and habitat fragmentation, species are declining locally and globally. In this upper-level seminar we will integrate knowledge from the natural sciences, social sciences, policy, arts, and the humanities to design and implement biodiversity interventions. Through readings, discussions with experts, and applied projects, we will
learn how biodiversity conservation and restoration can be socially just; how spaces can be designed to promote the flourishing of life; and how much local environmental management can alter global trends. We will also envision what the biotic world might look like in 10, 100, and 1000 years and consider who gets to decide which species live and which die, and who should decide.

Requirements/Evaluation: One 5-7-page paper; final collaborative project
Prerequisites: Environmental Studies 101 and 102
Enrollment Limit: 19
Enrollment Preferences: Environmental/Maritime Studies majors and concentrators; seniors

ENVI 478 (S) Cold War Landscapes
Cross-listings: AMST 478 / HIST 478
Secondary Cross-listing
The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in nations across the globe. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States and North America. We will then move on to examining others in Europe and the Soviet Union. Our approach to our topics will be interdisciplinary throughout the semester, with the additional goal of helping students frame their final projects. Students are encouraged to write their research papers on any geographical area of the world that interests them.

Requirements/Evaluation: Class participation and semi-weekly critical writing on the reading; students will also be expected to keep up through the stages of the research paper process, which will involve submitting a short research plan, annotated bibliography, outline, and a rough draft, as well as the final 20- to 25-page paper.
Prerequisites: none
Enrollment Limit: none
Enrollment Preferences: History, ENVI, and AMST majors if over-enrolled

Spring 2025
SEM Section: 01 TF 2:35 pm - 3:50 pm Karen R. Merrill

ENVI 491 (S) The Suburbs (WS)
Cross-listings: AMST 490 / HIST 491
Secondary Cross-listing
The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race),
consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Class Format: Students will meet with the professor either in assigned pairs or "trios" at a regularly scheduled time each week. Students in pairs will meet for one hour; students in trios will meet for 75 minutes.

Requirements/Evaluation: This class follows a typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History majors and students with course work related to the topic.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 491(D2) AMST 490(D2) HIST 491(D2)

Writing Skills Notes: Students will reflect on what their writing goals are for the semester, and they will receive feedback on their writing from the professor and from their tutorial partner. The final writing assignment will afford students the chance also to reflect back on their previous papers and the semester's course content.

Winter Study

ENVI 14 Environmental Law and Policy
This course covers the major environmental protection areas, and current issues, such as air and water pollution, climate change, regulation of toxic wastes, cleanup of contaminated sites, environmental justice, and ecosystem and endangered species protections. It also introduces students to the American legal system by covering a range of environmental legal actions, including both common law lawsuits by private persons, and governmental regulation and enforcement under the major environmental statutes. Students will be exposed to careers in environmental law and policy and will also develop legal reasoning, argumentation, and writing skills.

Requirements/Evaluation: Paper(s) or report(s); Presentation(s)
Prerequisites: None
Enrollment Limit: 25
Enrollment Preferences: ENVI studies majors will be given preference.
Expected Class Size: NA
Grading:
Unit Notes: Korinna Garfield is a current student at Boston College Law School studying environmental law. She is a graduate of Williams College with a major in Environmental Studies and a concentration in Justice and Law.
Attributes: EXPE Experiential Education Courses STUX Winter Study Student Exploration
Not offered current academic year

ENVI 24 (W) Farming New England: A Deep Dive Into the Regional Food System
Farmers feed us all. In this intensive experiential course, students will learn how. New England produces about 10 percent of its own food: 90 percent of the food is imported from outside the region. Farming in the region has been in decline for decades and farms face a range of challenges, from climate change induced flood & drought, to financial woes and debt, social isolation, and physical maladies. With more support, regenerative farming techniques and a new generation of trained farmers, New England's farms can succeed and continue to contribute to the regional food system. This can only happen with supportive policies that promote family farms and local agriculture, and of course, a new generation of farmers. This class examines the complexities of the regional food system from multiple perspectives: farmers, farming, agronomy, climate change, food insecurity, food systems planning, agricultural policy, agricultural economics and markets, culture, race and class, and land use planning. Five overarching questions shape the class: What are the challenges and opportunities to farming in New England? How can New England's agriculture succeed and expand? How is regenerative farming part of the solution? What will it take for the region to produce more of its own food and address regional food insecurity? How can farming be more socially just and racially equitable? Students will learn through immersion in the agricultural world for the month. Class meets three days a week: two days a week of farmwork on a variety of farms (livestock farms, dairy farms (cow and goat), cheesemaking operations, diversified farms, vegetable & greenhouse, and the Food Bank), and one day a week meeting with experts: agronomists, ag extension workers, farmland planners, and agricultural/food system policymakers. Students will learn through hands-on work (yes, you will get dirty!), conversation with farmers and others in the agricultural field, class reading, group discussion, reflection, and writing. The class will spend a Saturday at the NOFA Conference (Northeast Organic Farmers Association), Students are encouraged to reflect on their daily class experiences and will keep a journal after each class meeting. The class will include two overnight trips (1 and 2 nights) in the New England region.
Class Format: Experiential, primarily field-based class.
Requirements/Evaluation: Class participation: farmwork, class discussion, conversations with farmers and others involved in the class; journal.
Prerequisites: None
Enrollment Limit: 6
Enrollment Preferences: Environmental Studies majors and concentrators; students with a demonstrated interest in agriculture and/or outdoor work & experience.
Expected Class Size: 6
Grading: pass/fail only
Materials/Lab Fee: $600
Attributes: EXPE Experiential Education Courses
ENVI 31  (W) Senior Research and Thesis: Environmental Studies
To be taken by students registered for Environmental Studies 493-494.

**Class Format:** thesis
**Grading:** pass/fail only

Not offered current academic year

ENVI 99  (W) Independent Study: Environmental Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study
**Grading:** pass/fail only

Not offered current academic year
ENVIRONMENTAL STUDIES PROGRAM

ENVIRONMENTAL STUDIES CONCENTRATION
Chair: José Antonio Constantine
Associate Director: Sarah Gardner

FACULTY AND STAFF AFFILIATES (2023-24)

- Alex Apotsos, Lecturer in Geosciences
- Lois M. Banta, Professor of Biology
- Julie C. Blackwood, Associate Professor of Mathematics
- Alice C. Bradley, Assistant Professor of Geosciences
- Nicole G. Brown, Associate Professor of Classics
- Cory E. Campbell, Instructional Technology Specialist
- Anthony Carrasquillo, Assistant Professor of Chemistry
- Gregory Casey, Assistant Professor of Economics
- Phoebe A. Cohen, Chair and Associate Professor of Geosciences
- Mea S. Cook, Associate Professor of Geosciences
- Joan Edwards, Samuel Fessenden Professor of Biology
- Laura Ephraim, Associate Professor of Political Science
- Jessica M. Fisher, Associate Professor of English
- Antonia Foias, Professor of Anthropology and Sociology
- Jennifer L. French, Rosenberg Professor of Spanish and Environmental Studies
- Matthew Gibson, Associate Professor of Economics
- Allison Gill, Assistant Professor of Biology
- Kim Gutschow, Senior Lecturer of Religion and Anthropology and Sociology
- Sarah Jacobson, Professor of Economics
- Paul Karabinos, Professor of Geosciences
- Joel Lee, Associate Professor of Anthropology
- Scott Lewis, Assistant Professor of Physical Education and Associate Director of Outing Club
- James Manigault-Bryant, Chair and Professor of Africana Studies
- Luana Maroja, Professor of Biology
- Karen R. Merrill, Professor of History
- Manuel Morales, Professor of Biology and Director of Research Hopkins Forest
- James Nolan, Chair of Anthropology and Sociology and Washington Gladden 1859 Professor of Sociology
- Kenneth Savitsky, Professor of Psychology
- Greta F. Snyder, Lecturer in Women's, Gender, and Sexuality Studies
- Claire Ting, Professor of Biology
ENVIRONMENTAL STUDIES

The Environmental Studies Program at Williams College offers a major in Environmental Studies and a concentration in Environmental Studies. The concentration is designed to complement a major in a different discipline. The critical environmental issues of our time call upon citizens to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political, and ethical choices. The curricular options in Environmental Studies—the major and concentration—are interdisciplinary programs designed to prepare students to understand these issues by integrating perspectives and methodologies from the natural sciences, the social sciences, and the arts and humanities, which together form a solid liberal arts foundation.

The Environmental Studies Program is housed within the Center for Environmental Studies (CES). CES manages the 2600-acre Hopkins Memorial Forest and the Environmental Analysis Laboratory in the Morley Science Laboratory, both of which afford many opportunities for hands-on environmental field work and lab experience. CES also sponsors a wide range of programs including the Friday Log Lunch Speaker Series, The Class of 1960 Scholars Program, the Hopkins Forest Caretaker Program, and the CES Summer Grants Program, which provides generous support for summer research and internships. The Center for Environmental Studies is housed in the Class of 1966 Environmental Center, a renovated historic structure certified as a Living Building Challenge by the International Living Future Institute.

LEARNING GOALS

Environmental Studies students are encouraged to examine environmental issues in the vicinity of Berkshire County, other regions of the US, and the world. Many of the courses include an experiential component so that students encounter the complexities of environmental issues firsthand and learn to address all aspects of environmental challenges.

Incoming students with an interest in Environmental Studies should consider taking ENVI 101: Nature and Society during their first year at Williams. This gateway course is required for the major and the concentration and provides an intellectual framework for critical, interdisciplinary environmental inquiry in the social sciences and humanities while surveying the most pressing environmental problems of our time. In the spring, many first-year students also take ENVI 102: Introduction to Environmental Science, which provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere, hydrosphere, and biosphere. In this class, students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine real-world case studies at global and local scales.

While ENVI 101 is a recommended starting point for both the major and the concentration, many students come to Environmental Studies through an interest in applying a specific discipline to environmental problems. Students with strong interests in more traditional disciplines such as biology, chemistry, geosciences, or economics are advised to begin the introductory course sequence for those subjects in their first semester as well. These students have two main options: a major in a traditional discipline with a concentration in Environmental Studies—a popular choice for students who wish to attend graduate school in the so-called “hard sciences”—or a double major.

The Environmental Studies Program also serves as the on-campus base for the Williams-Mystic Maritime Studies Program, an extraordinary maritime studies program housed at Williams Mystic Campus on the Atlantic coast in Connecticut. Students who wish to pursue a concentration in Coastal and Ocean Studies combine a one-semester course of study at the Williams-Mystic campus with core courses and elective courses as described in the college catalog. Students may spend a semester at the Mystic campus in either the sophomore, junior, or senior year; choosing which semester to spend at Mystic should be done in consultation with a member of the Coastal and Ocean Studies advisory committee.

Students interested in the Environmental Studies major or concentration are encouraged to consult with members of the Environmental Studies Program and to contact the Environmental Studies Chair (jac9@williams.edu) or Associate Director (sgardner@williams.edu).

STUDY AWAY

Many study away options are available to students in Environmental Studies, including the Williams-Mystic Maritime Studies Program. Students considering either a semester or year away who intend to concentrate in Environmental Studies should consult the Chair or Associate Director of Environmental Studies and the Dean in charge of study abroad as early as possible to discuss their options. Students may take up to two courses outside of Williams toward their concentration, but must have approval in writing from the Chair of Environmental Studies.

THE CONCENTRATION IN ENVIRONMENTAL STUDIES

The Environmental Studies concentration provides students with an opportunity to explore how humans interact with the environment, including physical, biological, philosophical, and social elements. The concentration is designed so that students will understand the complexity of issues and perspectives that inhere in environmental problems and will appreciate that most environmental issues lack distinct disciplinary boundaries. The goal of the concentration is to educate students to be well-informed, environmentally literate citizens who have the capacity to become active participants in the local and global community. To this end, the concentration is designed to develop the capability to think in interdisciplinary ways and to use synthetic approaches to solve problems while incorporating the knowledge and experiences gained from majoring in other departments at the College.

The Environmental Studies concentration is a six-course concentration in which students gain broad exposure to environmental studies while pursuing another major. In addition to the core introductory courses of ENVI 101 and ENVI 102, students pursuing the concentration will take one elective from each group that represents a broad category of inquiry: Environmental Policy; Humanities, Arts and Social Sciences; and the Natural
Planning for Prerequisites on your Path through the Concentration

While ENVI 101 or ENVI 102 are recommended starting points for the concentration, and are prerequisites for many other ENVI course offerings, please note that some of the course options for the major may have other courses as prerequisites that may not count toward the programs. For example, ENVI/ECON 213 (Intro to Environmental and Natural Resource Economics) has a prerequisite of ECON 110 (Principles of Microeconomics). We strongly suggest that you do advance planning to avoid being blocked from taking a relevant course. Students interested in the program are encouraged to consult with members of the Environmental Studies Program and to contact the Chair or Associate Director.

Credit for AP, IB, A-levels and other pre-Williams Courses

Students are not allowed to place out of ENVI 101. Students with a score of 5 on the AP Environmental Science exam may take a 200-level environmental science lab course (cross-listed with Environmental Studies) in lieu of ENVI 102.

Introductory Required Courses (2 courses)
ENVI 101 Nature and Society: An Introduction to Environmental Studies
ENVI 102 Introduction to Environmental Science

Electives (3 courses)
In addition to ENVI 101, 102 and one 400-level senior seminar, each student must take three electives from a list of approved courses in Environmental Science, Social Science/Policy, and Culture/Humanities. Courses taken abroad may be included with the approval of the Chair or Associate Director.

Senior Seminar Required Course (1 course)
In the junior or senior year, students will take one 400-level seminar in Environmental Studies. These seminars will focus on advanced, interdisciplinary research and/or problem-solving, typically with an applied, experiential, and/or service-learning focus.

INDEPENDENT STUDY AND WINTER STUDY
In addition to courses fulfilling the Environmental Studies concentration requirements, the following courses are offered:
ENVI 397, 398 Independent Study of Environmental Problems
ENVI 493-W31-494 Honors Thesis and Senior Research

Winter Study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year’s Winter Study offerings.

HONORS IN THE ENVIRONMENTAL STUDIES CONCENTRATION
A student pursuing either the major or concentration in Environmental Studies can pursue an honors thesis, which is a year-long project conducted over the fall semester, Winter Study, and spring semester of the senior year. Given the breadth of environmental studies, a thesis may follow a variety of formats. In general, it is a good idea for the student to use the thesis to build upon prior coursework and/or prior research, internship, or activism experience, and many students conduct thesis research during the summer before senior year. Students completing an Environmental Studies thesis may elect to opt out of the ENVI Senior Seminar.

Prospective thesis students should submit their proposals by the first week of April in their Junior year. However, students who plan to request a CES-ENVI summer student research/internship grant should have their proposals completed by the end of spring break to ensure that applications for summer funding can be made in a timely fashion. The ENVI Advisory Committee will review all thesis proposals and will notify students of decisions by the end of April.

Prospective thesis students should identify and work with an advisor to prepare the thesis proposal. Potential advisors may be any faculty member or affiliate of the Environmental Studies Program. If the advisor is a faculty affiliate, the student should also identify an ENVI faculty member to serve as second reader. The second reader provides additional guidance throughout the thesis process and evaluates the final product along with the thesis advisor. In cases when a prospective thesis student is unable to identify a thesis advisor, they should reach out to the chair for guidance.

The Environmental Studies Program will endeavor to facilitate networking among students who are working on theses in the same semester so that a thesis cohort can support each other through the research and writing process. The final thesis will be evaluated by the thesis advisor and in some cases a second reader, who will then decide to award no Honors, Honors or, in recognition of exceptional work, Highest Honors. When submitting your thesis to Williams’ library archive, please be sure to follow the Special Collections guidelines.
ENVI 100   Introduction to Weather and Climate (QFR)
How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore how fundamental laws of physics determine why air moves and changes, creating the wind, clouds, precipitation, and extreme events that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop an understanding of earth's climate system, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will use weather and climate models to learn how scientists and meteorologists predict future conditions. Labs include benchtop experiments, data analysis projects, and self-scheduled meteorological observations. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly problem sets, lab assignments, midterm exam, and final exam
Prerequisites: none
Enrollment Limit: 60
Enrollment Preferences: first year and second year students, Geosciences majors
Expected Class Size: 60
Grading:
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course will have regular problem sets which require substantial quantitative reasoning. Labs will require analysis, presentation, and explanation of quantitative data, and exams will require some quantitative problem solving.
Attributes: ENVI Natural World Electives  EXPE Experiential Education Courses
Not offered current academic year

ENVI 101  (F)(S) Nature and Society: An Introduction to Environmental Studies
Environment and society interact on scales from the local to the global. This course explores these interactions and introduces students to the interdisciplinary methods of environmental studies. We will investigate the social, political, and historical aspects of environmental problems -- including environmental racism, species extinction, climate change, massive urbanization -- as well as their possible solutions. Throughout the course, we will ask how unequal distributions of power affect people and environments. Case studies, readings, discussions, and field exercises will help students develop their understanding of how built and unbuilt environments influence and are influenced by human activities.

Requirements/Evaluation: participation, in-class exercises, several short writing assignments (varying from 2-5 pages), mid-term exam, final exam
Prerequisites: none
Enrollment Limit: 30/section
Enrollment Preferences: Environmental Studies majors and concentrators
Expected Class Size: 30/section
Grading: yes pass/fail option, yes fifth course option
Unit Notes: required course for the Environmental Studies major and concentration
Distributions: (D2)

ENVI 102  (S)  Introduction to Environmental Science

Environmental Science is an interdisciplinary field that develops scientific and technical means for assessing and mitigating human impacts on the environment. This course provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere, hydrosphere, and biosphere. Students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine real-world case studies at global and local scales. Topics may include: climate change, air and water pollution, resource extraction and management, land use change, and their effects on environmental quality, biodiversity, and human health. During weekly fieldwork and laboratory sessions, students gain hands-on experience in collecting, analyzing, and interpreting data that can be used to make recommendations for addressing local environmental issues.

Class Format: Two 75-minute lecture/discussion sessions and one 3-hour field/laboratory session each week.

Requirements/Evaluation: Weekly quizzes, final project, lab assignments, participation

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first- and second-year students, Environmental Studies majors and concentrators

Expected Class Size: 48

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Required course for Environmental Studies major and concentration

ENVI 103  (F)  Global Warming and Environmental Change

Cross-listings: GEOS 103

Secondary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and wildfires, the natural processes that shape Earth's surface are tied to temperature and precipitation. People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with geography. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate. We will also visit and engage with Black communities and community leaders across New England who are grappling with the unjust distribution of resources to mitigate climate impacts and who have been disproportionate bearers of environmental risk.

Requirements/Evaluation: written reports from laboratories and readings, class participation, a midterm and final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first year and second year students, Geosciences majors and Environmental Studies majors and concentrators

Expected Class Size: 48

Grading: yes pass/fail option, no fifth course option

Not offered current academic year

ENVI 104  (F)  Oceanography

Cross-listings: GEOS 104 / CAOS 104

Secondary Cross-listing

The oceans cover three quarters of Earth's surface, yet oceanography as a modern science is relatively young: the first systematic explorations of the geology, biology, physics and chemistry of the oceans began in the late 19th century. This introduction to ocean science includes the creation and destruction of ocean basins with plate tectonics; the source and transport of seafloor sediments and the archive of Earth history they contain; currents, tides, and waves; photosynthesis and the transfer of energy and matter in ocean food webs; the composition and origin of seawater, and how its chemistry traces biological, physical and geological processes; oceans and climate change; and human impacts.

Class Format: two 75-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast of New England.

Requirements/Evaluation: lab activities, homework, reading-comprehension quizzes, three tests

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first year and second year students, Geosciences majors, Maritime Studies concentrators

Expected Class Size: 48

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course and GEOS 110 Oceans and Society cannot both be taken for credit.

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 104(D3) GEOS 104(D3) CAOS 104(D3)

ENVI 105  (S)  The Co-Evolution of Earth and Life

Cross-listings: GEOS 101

Secondary Cross-listing

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will examine the relationship between Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system and learn about the dramatic changes that have occurred throughout the history of our planet. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve and how did this biological event lead to profound changes in the world's oceans and atmospheres? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and spread of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth's dynamic history.

Class Format: one laboratory per week plus one all-day field trip

Requirements/Evaluation: lab assignments, weekly quizzes, and a final independent project

Prerequisites: none
Enrollment Limit: 30
Enrollment Preferences: first year and second year students, Geosciences majors
Expected Class Size: 30

ENVI 108 (S) Energy Science and Technology (QFR)
Cross-listings: PHYS 108
Secondary Cross-listing
Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating and lighting, and energy storage. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.
Class Format: Two meetings per week. Some weeks that means two lectures. Other weeks, that means one lecture plus one lab, with the class divided between two lab sections.
Requirements/Evaluation: weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative
Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130
Enrollment Limit: 10 per lab
Enrollment Preferences: non-physics majors
Expected Class Size: 20
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 109 (F) Oceans and Society
Cross-listings: GEOS 110 / CAOS 110
Secondary Cross-listing
Oceans impact society in many ways: they provide much of our protein, they hide untapped mineral wealth, their circulation regulates global climate,
they transport and accumulate our plastic garbage, marine storms batter coastal infrastructure, and sea-level rise threatens communities. However, despite the oceans’ importance throughout history—for trade, as a source of food, and because of their unpredictable dangers—we know shockingly little about them. More than 6000 people have reached the summit of Everest, Earth’s highest elevation; but only 22 have visited Challenger Deep, the deepest point below the ocean surface. We have mapped the surfaces of Mars and Venus in far more detail than the topography of Earth’s ocean basins. New marine organisms are discovered regularly. And we still don’t fully understand the complex details of how ocean and atmosphere work together as the planet’s climate engine. In this course, you will examine ocean science themes with direct societal relevance that are also at the forefront of scientific investigation. Topics will be selected based on current events, but are likely to include deep sea mining, meridional overturning, sea level rise, atmospheric rivers, and aquaculture. By taking focused dives into a range of subjects you will learn about the evolution and operation of the ocean as a physical and geological system as well as investigating the intersections between ocean functions, climate change, and human societies. Exercises and discussions will foreground active learning. A field trip to the Atlantic coast will integrate experiential investigation of the intersection between coastal change, extreme weather, and communities. The aim is to have energised interdisciplinary discussions about topics of pressing societal relevance, to understand some of the fundamentals of ocean science, to develop expertise in gathering and distilling information by researching new topics, and thereby to improve critical and analytical thinking.

Class Format: Two 75-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast.

Requirements/Evaluation: Evaluation is based on engagement with in-class activities, six graded lab exercises, four short writing/research assignments, and a five-page term paper

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: First year and second year students

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course and GEOS 104 Oceanography cannot both be taken for credit.

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 110(D3) CAOS 110(D3) ENVI 109(D3)

Attributes: ENVI Natural World Electives  EXPE Experiential Education Courses  MAST Interdepartmental Electives

Not offered current academic year

ENVI 134  The Tropics: Biology and Social Issues  (DPE)

Biology and Social Issues of the Tropics explores the biological dimensions of social and environmental issues in tropical societies, focusing specifically on the tropics of Africa, Asia, Latin America, Oceania, and the Caribbean. Social issues are inextricably bound to human ecologies and their environmental settings. Each section of the course provides the science behind the issues and ends with options for possible solutions, which are debated by the class. The course highlights differences between the tropics and areas at higher latitudes while also emphasizing global interconnectedness. It begins with a survey of the tropical environment, including a global climate model, variation in tropical climates and the amazing biodiversity of tropical biomes. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria, AIDS and Covid-19 (SARS-CoV-2). The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the interaction of humans with their supporting ecological environment, and global climate change. This course fulfills the DPE requirement. Through lectures, debates and readings, students confront social and environmental issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

Class Format: Debate

Requirements/Evaluation: two hour exams, a short paper, debate presentation, and a final exam

Prerequisites: none

Enrollment Limit: 62

Enrollment Preferences: Preference will be given to Environmental Studies majors/concentrators, students in need of a Division III or DPE requirement, and then Seniors, Juniors, Sophomores, and First Year students.

Expected Class Size: 62

Grading:
Unit Notes: Does not count for credit in the Biology major.

Distributions:  (D3)  (DPE)

Difference, Power, and Equity Notes: This course highlights differences between the tropics and higher latitudes. For each section we focus on difference--different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and different contributions to and impacts of climate change. For each section we highlight differences in power and the inequities of resource distribution. We then debate potential solutions to ameliorate these inequities.

Attributes:  ENVI Natural World Electives  GBST African Studies  PHLH Biomedical Determinants of Health

Not offered current academic year

ENVI 201  (S)  The Geoscience of Epidemiology and Public Health  (DPE)

Cross-listings:  GEOS 207

Secondary Cross-listing

The Coronavirus pandemic has highlighted the many ways that diseases can be transmitted in the environment. As a society we are becoming aware of the many ways that geological processes and materials influence human health, in ways both beneficial and dangerous. This course unites geoscience, biomedicine and public health approaches to address a wide range of environmental health problems. These include water-related illnesses (e.g. diarrhea, malaria); minerals and metals, both toxic (e.g. asbestos, arsenic) and essential (e.g. iodine); radioactive poisoning (e.g. radon gas); and the transport of pathogens by water and wind. In many cases, the environmental health problems disproportionately affect marginalised populations, contributing to greater disease and death among poor communities and populations of colour. We will examine the broad array of dynamic connections between human health and the natural world. We will discuss the social justice implications of a range of environmental health problems. And we will examine current research into how coronaviruses, such as the one causing COVID-19, are transported in the environment. This course is in the Sediments and Life group for the Geosciences Major.

Requirements/Evaluation: Evaluation will be based on short weekly writing assignments as well as an individual project and poster presentation.

Prerequisites: No prerequisites

Enrollment Limit: 34

Enrollment Preferences: Preference to first-years, sophomores, and prospective Geosciences majors

Expected Class Size: 30

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D3)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 207(D3)  ENVI 201(D3)

Difference, Power, and Equity Notes: Through a series of case studies, we will examine ways in which marginalised groups (whether due to poverty, race, or ethnicity) are disproportionately affected by environmental health issues. Themes of power and equity in terms of decision making, access to knowledge, and funding availability, will be woven into all aspects of the class and will underpin our analysis of the science.

Attributes:  ENVI Natural World Electives  GEOS Group B Electives - Sediments + Life  PHLH Nutrition,Food Security+Environmental Health

Not offered current academic year

ENVI 202  (F)  Critical Practice of Architecture: Theories, Methods, and Techniques  (DPE)

Cross-listings:  ARTS 222

Secondary Cross-listing

In this course, students will transform an architectural or urban space through design interventions that contribute to reorienting public perception, imagination, and politics. Skills taught include methods and techniques for critical architecture practice, including architecture drawing, 2D graphic design, and 3D modeling (digital and physical). Students will also build on design strategies (e.g., spatial hijacking and détournement), community architecture, and visual techniques to rethink normative understandings of space and time. Through selected readings and discussions, we will examine key ideas that have inspired design thinking and activism. The class culminates in a presentation to external reviewers and a final exhibition.

Requirements/Evaluation: This is an intensive studio tutorial requiring working in the architecture studio and/or PC lab outside of scheduled class hours. The class will meet in large and small groups throughout the semester for critique and discussion. Assignments include weekly discussions and
design projects requiring drawings and model design. Final project: design project to reorient public perception, imagination, and politics. Evaluation will be based on the design quality at theoretical/conceptual levels.

**Prerequisites:** Drawing I or permission of instructor.

**Enrollment Limit:** 12

**Enrollment Preferences:** Studio Art majors, Art History and Studio Art majors, Envi majors and concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $350-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 222(D1) ENVI 202(D1)

**Difference, Power, and Equity Notes:** This design studio invites students to think critically about how power, equity, and difference are manifested through the built environment. It will equip them with the tools to become active agents of change through design activism. We will use design as a cultural practice and creative technique to envision more just and equitable futures through interventions in architectural or urban spaces.

**Attributes:** ENVI Humanities, Arts + Social Science Electives

---

**ENVI 203 (F) Ecology (QFR)**

**Cross-listings:** BIOL 203

**Secondary Cross-listing**

This course combines lectures & discussion with field and indoor laboratory activities to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overview of global environmental patterns and then builds from the population to ecosystem level. Throughout the course, we will emphasize the connection between basic ecological principles and current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow). Laboratory activities are designed to engage students in the natural history of the region and build skills in data analysis and scientific writing.

**Requirements/Evaluation:** pre-class quizzes, lab reports, two mid-term exams, and a final exam

**Prerequisites:** BIOL 102, or ENVI 102, or permission of instructor

**Enrollment Limit:** 30

**Enrollment Preferences:** students planning to pursue Biology and/or ENVI

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 203(D3) ENVI 203(D3)

**Quantitative/Formal Reasoning Notes:** Much of the material in this course centers on the interpretation and application of mathematical models used to describe ecological systems. The laboratory section of this course also contains a large data analysis component (based in R). Students are introduced to linear models, multidimensional data analysis and contingency tables.

ENVI 208 (S) Saharan Imaginations  (DPE) (WS)

Cross-listings: ARAB 209 / COMP 234

Secondary Cross-listing

Deconstructing reductive Saharanism, which the course conceptualizes as a universalizing discourse about deserts, this course seeks to critically examine the myriad assumptions that are projected upon deserts across times and cultures. In addition to their depiction as dead and empty, deserts have become a canvas for the demonstration of religiosity, resilience, heroism and athleticism. Cultural production, particularly literature and film, do, however, furnish a critical space in which important questions can be raised about deserts’ fundamental importance to different cultures and societies. Drawing on novels, films, and secondary scholarship, the course will help students understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the desert sub-genre of African, Euro-American, and Middle Eastern literatures. Whether grappling with transcontinental issues of climate change, cannibalization of biodiversity or overexploitation of natural resources, desert-focused cultural production invites us to interrogate the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature.

Requirements/Evaluation:  active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: If the course is over-enrolled, students will required to provide a 200-word paragraph in which they explain how the course fits within their plan of study at Williams.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 209(D1) COMP 234(D1) ENVI 208(D1)

Writing Skills Notes: Students will receive constant and extensive feedback on their written work. Students will write regular weekly responses on Glow, a reflection statement, two 5pp. papers for midterms, and one 10pp. final paper.

Difference, Power, and Equity Notes: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

ENVI 209  Modern Climate  (QFR)

What will happen to the Earth’s climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects—like the albedo feedback associated with sea ice and glacier loss—and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: 4 multi-week lab projects and several short quizzes

Prerequisites: Any of GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: GEOS and ENVI majors
ENVI 211  (S)  Race, Environment, and the Body
Cross-listings:  SOC 211 / AMST 211 / AFR 211
Secondary Cross-listing
This course is organized around three distinct, but overlapping, concerns. The first concern is how polluting facilities like landfills, industrial sites, and sewage treatment plants are disproportionately located in communities of color. The second concern is the underlying, racist rationales for how corporations, in collaboration with state agencies, plot manufacturers of pollution. The final concern is how the environmental crises outlined in the first two sections of the course are experienced in the body. In reviewing a range of Black cultural productions—as literature, scholarship, music, and film—we will not only consider how environmental disparities physically affect human bodies, but also how embodiments of eco-crises lend to imaginaries of the relationship between the self and the natural world.

Class Format: discussion

Requirements/Evaluation:  class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

Prerequisites:  none

Enrollment Limit:  20

Expected Class Size:  20

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)

ENV 121  (F)  The Economics and Ethics of CO2 Offsets  (WS)
Cross-listings:  ECON 214
Secondary Cross-listing
Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about “commodifying” the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve “carbon neutrality?”

Class Format:  Each student will be the tutorial partner of one other student, and each pair of tutorial partners will meet with the instructor for 75 minutes each week.

Requirements/Evaluation:  a 5- to 7-page paper every other week; a 3-page written critique every other week; one re-write paper

Prerequisites:  ECON 110 or the equivalent, permission of instructor

Enrollment Limit:  10
Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 214(D2) ENVI 212(D2)

Writing Skills Notes: Each student will write five 5-7 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write five 3-page critiques of their partner's papers. As the final assignment, each student will revise one of their five papers.

ENVI 213 (S) Introduction to Environmental and Natural Resource Economics (QFR)

Cross-listings: ECON 213 / CAOS 213

Secondary Cross-listing

We'll use economics to provide one perspective on reasons humans harm the environment and overuse natural resources, and what we can do about it. We'll study climate change, pollution in general, cost benefit analysis, environmental justice, natural resources (like fisheries, forests, and fossil fuels), and energy. We'll talk about how economists put a dollar value on nature and ecosystem services (as well as human health and life!), and the concerns people may have about doing so. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth. Consideration of justice and equity will be woven throughout the whole semester.

Requirements/Evaluation: problem sets, short essays, final paper; intermediate assignments may include a poster, one or more short presentation(s), other brief writing assignment(s)

Prerequisites: ECON 110 or equivalent

Enrollment Limit: 30

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course will count toward both the Environmental Studies major and concentration

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ECON 213(D2) ENVI 213(D2) CAOS 213(D2)

ENVI 214 (S) Mastering GIS

Cross-listings: GEOS 214

Secondary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS has opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the
end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

**Class Format**: lecture, three hours per week and laboratory, three hours per week

**Requirements/Evaluation**: weekly lab exercises, weekly quizzes, and a research project

**Prerequisites**: at least one course in Geosciences or Environmental Studies

**Enrollment Limit**: 18

**Enrollment Preferences**: Geosciences majors and Environmental Studies majors and concentrators.

ENVI 215  (QFR)  

Paleoclimatology is the reconstruction of past climate variability and the forces that drove the climate changes. The Earth's climate system is experiencing unprecedented and catastrophic change because of anthropogenic emission of greenhouse gases and land use change. Paleoclimatology allows humans to put modern climate changes into the context of the history of this planet, and shows how and why it is unprecedented and catastrophic. Each climate event we study from Earth's past teaches us lessons on why the climate system responds to anthropogenic perturbations, what climate changes we're committed to in the future, how long-lasting they will be, and what climate consequences we can avoid if we take action and reduce greenhouse gas emissions sooner. In this course, we will discuss the major mechanisms that cause natural climate variability, how climate of the past is reconstructed, and how climate models are used to test mechanisms that drive climate variation. With these tools, you will analyze and interpret data and model simulations from climate events from Earth's history, and apply these findings to anthropogenic climate changes happening now and that are projected to happen in the future. Laboratories and homework will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

**Class Format**: This class has three scheduled lectures per week, and one lab meeting per week which will consist of field excursions, lab exercises, problem solving and discussion

**Requirements/Evaluation**: lab exercises and homework (25%), three quizzes (50%), and a final project (25%)

**Prerequisites**: 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor

**Enrollment Limit**: 24

**Enrollment Preferences**: Geosciences majors and Environmental Studies majors and concentrators and Maritime Studies concentrators

**Expected Class Size**: 16

**Grading:

**Distributions**: (D3) (QFR)

**Quantitative/Formal Reasoning Notes**: Labs and homework include quantitative problem solving, visualization and analysis of quantitative data, and scientific computing with Matlab. No previous programming experience is assumed.

ENVI 220  (S)  Field Botany and Plant Natural History

---
Cross-listings: BIOL 220

Secondary Cross-listing

This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. Lectures focus on the evolution of the land plants, the most recent and revolutionary developments in plant systematics and phylogeny, the cultural and economic uses of plants and how plants shape our world. The course covers the role of plants in ameliorating global climate change, their importance in contributing to sustainable food production and providing solutions to pressing environmental problems. Throughout we emphasize the critical role of biodiversity and its conservation. The labs cover field identification, natural history and the ecology of local species.

Class Format: both field and indoor laboratories

Requirements/Evaluation: Based on two hour exams, field quizzes, a final project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Biology majors, and Environmental Studies majors & concentrators

Expected Class Size: 24

Grading: no pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Materials/Lab Fee: There is a charge for the lab manual ($25); the sketchbook ($7) and hand lens ($23) can be self-provided or purchased from the department.

ENVI 224 (F) The Rise and Fall of Civilizations

Cross-listings: ANTH 214

Secondary Cross-listing

Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human prehistory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

Class Format: Class discussion and debates will complement lectures based on powerpoint presentation.

Requirements/Evaluation: midterm, final exam, 15pp analytical paper, two quizzes

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: First and second years.

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 224(D2) ANTH 214(D2)
ENVI 229 (F) Environmental History

Primary Cross-listing
This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: with field trips
Requirements/Evaluation: several short essays; final research project
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: juniors, seniors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 229(D2) HIST 264(D2)

ENVI 231 (S) Africa and the Anthropocene (DPE)

Primary Cross-listing
Despite its low contributions to global carbon emissions, the continent of Africa is predicted to experience some of the worst effects of climate change. This interdisciplinary course investigates the causes and consequences of this troubling contradiction. It positions the African continent as an important site for understanding how legacies of empire, racial and gendered inequality, resource extraction, and capital accumulation impact contemporary global environmental politics. Students will engage theoretical texts, reports from international organizations, films, novels, and web-based content. Topics include: humanism/post-humanism; migration and displacement; representations of conflict; and sustainable development.

Requirements/Evaluation: Assignments include: 2 short written commentaries (2-3 pages each), mid-term current event analysis (5-7 pages), final analytical essay (10-12 pages) and class presentation
Prerequisites: none
Enrollment Limit: 19
Enrollment Preferences: Environmental Studies majors and concentrators
Expected Class Size: 19
Grading: no pass/fail option, yes fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
STS 231(D2) ENVI 231(D2) AFR 231(D2)
**Difference, Power, and Equity Notes:** Africa and the Anthropocene considers inequity in environmental politics from the vantage of the African continent. Through selected readings and classroom discussions students will tackle questions of power, racial and gendered difference, empire, and economic stratification. The course contributes to the DPE requirement by helping students to develop skills to better analyze abiding challenges in global society.

**Attributes:** AFR Black Landscapes ENVI Humanities, Arts + Social Science Electives GBST African Studies GBST Economic Development Studies

Not offered current academic year

**ENVI 234 (S) Global Poverty and Economic Development (DPE)**

**Cross-listings:** ECON 204 / ECON 507

**Secondary Cross-listing**

Why are some nations rich while other nations are poor, and what can be done to end global poverty and promote shared prosperity? This course explores the historical determinants of global poverty and inequality, and analyzes the range of policy options available to promote economic development and equalize opportunities. Drawing on research in development economics, development studies, political science, and anthropology, we seek to understand the factors that shaped the global economy and contributed to the cross-country income disparities observed today. In addition, we’ll use the tools of modern empirical microeconomics to assess the possibilities for eliminating global poverty and underdevelopment in the future. Undergraduate students will receive 200-level credit and should not register at the 500-level.

**Class Format:** discussion

**Requirements/Evaluation:** class discussion, short written assignments and/or empirical exercises, in-class quizzes and exams

**Prerequisites:** one economics course or permission of instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** first-year and sophomore students

**Expected Class Size:** 25

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 204(D2) ECON 507(D2) ENVI 234(D2)

**Difference, Power, and Equity Notes:** This course provides a setting for students to learn about the causes and consequences of poverty in developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. The course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

**Attributes:** ENVI Environmental Policy GBST African Studies GBST Economic Development Studies POEC Comparative POEC/Public Policy Courses

Not offered current academic year

**ENVI 243 (S) Reimagining Rivers (DPE) (WS)**

**Cross-listings:** ANTH 243

**Primary Cross-listing**

In the era of climate change and widening inequality, how we live with rivers will help define who we are. Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including increased flooding, drought, pollution, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and ecological resilience far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Drawing on scholarship from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, and more.

**Requirements/Evaluation:** Each week, each student will either write a 5-page essay on assigned readings or write a 2-page critique of a partner's paper.
Prerequisites: None
Enrollment Limit: 10
Enrollment Preferences: Environmental Studies majors and concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 243(D2) ANTH 243(D2)

Writing Skills Notes: Students take turns writing 5-page essays and 2-page responses to those essays, with each writing 6 in total. For each five-page paper, I meet with the student to discuss technical aspects of the paper and specific ways in which it could be improved. At the end of the semester, students have the option of handing in one revised paper as part of a portfolio of papers from throughout the semester. This enables me to have an ongoing, in-depth discussion with each student about their writing skills.

Difference, Power, and Equity Notes: This course focuses on the role of rivers in struggles over cultural difference, social power, and environmental equity. Throughout the course, students read and write extensively about environmental justice, and they engage with diverse theoretical approaches to studying the intersection of water, power, and social identity. Our focus from beginning to end is on the profound impact of river management on the lives of marginalized indigenous, agrarian, and urban communities.

ENVI 244 (S) Environmental Ethics (WS)

Cross-listings: PHIL 244

Primary Cross-listing
What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature, among others. Most sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Requirements/Evaluation: five essays (5-7 pages each) and five prepared oral responses to partners' essays; evaluation will be based on essays, oral responses, and quality of discussion

Prerequisites: ENVI 101 or one course in PHIL

Enrollment Limit: 10

Enrollment Preferences: declared and prospective Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: meets Value Theory requirement only if registration is under PHIL

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 244(D2) PHIL 244(D2)

Writing Skills Notes: Students will write five tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

Attributes: ENVI Humanities, Arts + Social Science Electives EVST Culture/Humanities PHIL Contemporary Value Theory Courses
ENVI 254  (S)  Food, Forests, & Fungi: Environmental Health in the Anthropocene  (DPE) (WS)
Cross-listings:  STS 254 / ANTH 254

Secondary Cross-listing

This tutorial will examine the impacts of the climate crisis on human, environmental, and planetary health via the lens of food systems & plant medicines in the Anthropocene. We use anthropological, environmental, evolutionary, & ecological approaches to explore the ecosystems connecting humans, plants, animals, and fungi that have been massively disrupted by systems of industrial agriculture, industrial forestry, corporate food systems, and corporate biomedicine. We will dwell on the growing signs of our climate catastrophe including the sharp rise of global temperatures, floods, hurricanes, alongside declining freshwater reserves, melting cryosphere, and falling crop yields, that are helping produce a growing wave of hunger and climate refugees in every world region. Along the way, we will hear from and read about youthful climate activists from Extinction Rebellion, Ende Gelände, Fridays for the Future, 350.org, and the Sunrise Movement who are designing and implementing innovative, local, and sustainable solutions to inaction, apathy, and inertia even as situations of internal migration or displacement, food scarcity, food sovereignty, water shortages, and other climate-related disruptions are increasing in both developing and developed parts of our globe. We learn how activist narratives intersect with wider movements to promote more local and circular economies of regenerative agriculture and forestry, ethically produced and sourced organic food, wild & cultivated botanicals, and complementary medicines that are healing both humans and the planet.

Requirements/Evaluation:  Weekly attendance, reading 200-300 pages/week, weekly lead essays or oral responses to texts, showing up in mind & body each week.

Prerequisites:  none, but a class in ENVI or ANTH preferred

Enrollment Limit:  10

Enrollment Preferences:  ANTH, ENVI, STS majors and concentrators

Expected Class Size:  10

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 254(D2)  ANTH 254(D2)  ENVI 254(D2)

Writing Skills Notes:  Students will write essays: either a lead essay of 1400 words, or written & oral feedback on the lead essay plus an oral response to text. Students receive intensive weekly feedback on their essays and a mid semester writing chat with instructor to negotiate and understand strengths and weaknesses of their writing.

Difference, Power, and Equity Notes:  We will examine the ways that food systems reproduce social and structural inequalities within public health, environmental health, climate health. We also examined the interconnected nature of the health of our planet, food systems, forests, and fungal networks and how climate activism and action can fight unequal access to food, forests, nature, and health.

Attributes:  ENVI Humanities, Arts + Social Science Electives  PHLH Nutrition,Food Security+Environmental Health

Not offered current academic year

ENVI 255  (F)  Environmental Observation
Cross-listings:  GEOS 255

Secondary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and
Climate group for the Geosciences major.

Requirements/Evaluation: Weekly labs, four quizzes, and a final project

Prerequisites: at least one prior course in GEOS or ENVI

Enrollment Limit: 20

Enrollment Preferences: sophomores, then GEOS majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

ENVI 256  (F) Race, Environment, and the Body

Cross-listings: SOC 255 / AFR 255 / AMST 257

Secondary Cross-listing

This course examines the relationship between structural racism and racial/ethnic health disparities. Through class discussions of readings and media images, we will explore three topics: 1) how racism intersects with classism, sexism, and xenophobia to govern the implementation of local, state and federal health care policies; 2) how the uneven enforcement of health care policies ultimately produces differences in mortality, morbidity, and quality of life among various populations; and 3) anti-racist public health scholarship that offers strategies for creating racial health equity.

Class Format: Discussion

Requirements/Evaluation: Class participation, 2-3 short papers (5-7 pages), and a final presentation

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: Preference given to AFR majors, ENVI concentrators and majors, and ANSO majors.

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

ENVI 257  (S) Cities, Suburbs, and Rural Places  (DPE)

Cross-listings: AMST 247 / LATS 230

Secondary Cross-listing

Long associated with cities in the scholarly and popular imagination, transnational migrants have increasingly settled in U.S. suburbs and rural localities and have made these places home. Through the lens of new destinations for im/migrants, this course introduces spatial methods,
perspectives, and concepts to understand cities, suburbs, and rural places. We ask how geographically specific forces and actors shape migrants' living conditions, as well as consider the spatially uneven outcomes of complex processes like globalization. We analyze how different actors discursively and materially demarcate who belongs and who does not, and how these boundaries shape migrants' everyday practices. This interdisciplinary course highlights the legal, economic, political, environmental, social, and cultural dimensions of how transnational migrants become part of and create homes in new destinations. Through a range of textual materials (academic, literary, popular, visual), we explore the construction of landscapes, how people shape space at local and regional scales, and where people do life's work and come together to build cultural space. Rooted in critical race geographies, case studies are comparative across different racial and ethnic groups in the U.S. West, South, Midwest, and Northeast.

This course will be mostly discussion-based, grading based on participation, short writing exercises, four assignments, and a final project.

**Class Format:** This is also a discussion course. While I will spend some time at the beginning of the class lecturing, most of the time will be spent in class discussions.

**Requirements/Evaluation:** Grading based on participation, short writing exercises, four assignments, and a final project. All writing materials and exams are based on coursework.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** LATS concentrators or those intending to become LATS concentrators

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 257(D2) AMST 247(D2) LATS 230(D2)

**Difference, Power, and Equity Notes:** Students examine how race, gender, sexuality, class, and documentation status also impact how immigrants 'transition' to new migration destinations. We consider how the exercise of unequal power affects migration, settlement, and place-making. Students analyze representations and demographic data to determine how people are portrayed and what their material conditions are.

LEC Section: 01 TR 9:55 am - 11:10 am Edgar Sandoval

ENVI 260  (S) Design and Environmental Justice  (DPE)

**Cross-listings:** ARTS 261

**Primary Cross-listing**

This seminar/digital art studio offers key literature to examine the relationship between design and environmental justice. It will help build a vocabulary to study the environment as disputed terrain between technological fixes and issues of race, ethnicity, gender, sexuality, class, and colonial status. Students will develop textual/graphic projects about a chosen case study aiming to reorient public perception and imagination around environmental justice. Case studies include contemporary issues like "natural" disasters, eco-cities, and urbanization in the Global South and North. Skills taught include design-thinking and collaborative design, digital art (Photoshop), and participation in collective reviews and public presentations. The class culminates in a presentation to external reviewers and a final exhibition.

**Class Format:** Because this seminar is cross-listed with ARTS, there is a studio component (short assignments and final project).

**Requirements/Evaluation:** Active presence in class discussions and presentations, quality of work, depth and quality of the investigative process, willingness to experiment, and contributions to a collaborative learning environment. This intensive seminar/digital art studio requires working in the architecture studio and/or PC lab outside of scheduled class hours.

**Prerequisites:** Drawing I, ENVI 101, or permission from the instructor.

**Enrollment Limit:** 15

**Enrollment Preferences:** Envi majors and concentrators, Studio Art majors, Art History and Studio Art majors

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option
Materials/Lab Fee: $300-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 261(D1) ENVI 260(D2)

Difference, Power, and Equity Notes: This seminar/digital art studio examines the interrelationship between design and environmental justice from an intersectional perspective. It encourages students to develop a critical understanding of the role that technical rationality, devoid of ethics and respect for difference, plays in producing racist, heteropatriarchal, and ecocidal forms of oppression. In parallel, we will explore place-based practices that counter neoliberal and extractivist approaches to the (built) environment.

Attributes: ENVI Humanities, Arts + Social Science Electives  EVST Culture/Humanities

Not offered current academic year

ENVI 261 (S) Science and Militarism in the Modern World  (WS)

Cross-listings: STS 261

Primary Cross-listing

In 1961, United States President Dwight D. Eisenhower warned about the global dangers of what he called the "military-industrial complex." In this course, we will interrogate the military-scientific complex, or the imbrication of militarism and scientific knowledge. Surveying conflicts from World War II through to the present-day War on Terror, this course will consider how empire, networks of expert knowledge, resource extraction, environmental contamination, and land degradation have shaped the modern world. Students will engage a range of textual materials including books, films, photographs, and news reports. Course requirements include weekly writing assignments and participation in small group discussions.

Class Format: This course adopts a tutorial model. Students will be divided into 5 groups of 2. Each week the groups will meet with me. Each pair will include one "presenter," who shares a 5-7 page paper responding to the week’s theme, and one "respondent," who will offer a 2-3 page response to the presenter’s paper. The roles of presenter and respondent will alternate each week. Each student will produce 5 papers as "presenter" and 5 papers as "respondent."

Requirements/Evaluation: Each student will produce five (5-7 page) papers as “presenter” and five (2-3 page) papers as “respondent.” Grades will be issued based on the portfolio of papers and active participation in discussions.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: ENVI and STS majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 261(D2) STS 261(D2)

Writing Skills Notes: This is a writing intensive tutorial. Students will complete weekly written assignments and receive in-depth feedback to improve their writing. Over the course of the semester, students will write 10 papers ranging from 2-7 pages.

Attributes: ENVI Humanities, Arts + Social Science Electives

Not offered current academic year

ENVI 264 (S) Architecture as Politics: Space, Design, Technology  (DPE)

Cross-listings: ARTS 254

Secondary Cross-listing

This course delves into the intersection of architecture as a form of political expression, technology, and their collective impact on societal change. Emphasizing architecture as a discipline deeply intertwined with politics and shaped by technological advancement, this course will examine how a spectrum of art tools—from traditional to digital and computational—helps shape buildings and public spaces, shifts power structures, and hinders or promotes social justice. The curriculum blends theoretical exploration with practical application. Students will engage in critical analysis, technology-driven design workshops, and peer evaluations, culminating in a final project that melds techno-political theory with cutting-edge
architectural practices. This course is ideal for students keen on leveraging technological architectural techniques to craft spaces with profound political and social impact.

**Requirements/Evaluation:** This is an intensive studio tutorial requiring working outside of scheduled class hours. In this course, students can work with the following media assuming that they can master them for a 200-level course: architecture models (physical and digital), photo reportages, 2D collages (e.g., Photoshop), digital humanities (cartographies, counter mapping, oral histories, digital archives), and curatorial platforms. Students will participate in tutorials plus a final project of significant scope. Evaluation will be based primarily on the quality of the final project but also on participation.

**Prerequisites:** Drawing I or permission of instructor.

**Enrollment Limit:** 10

**Enrollment Preferences:** Studio Art majors, Art History and Studio Art majors, ENVI majors and concentrators.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Materials/Lab Fee:** $350-$450 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

**Distributions:** (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 254(D1) ENVI 264(D1)

**Difference, Power, and Equity Notes:** This tutorial will employ theories and approaches from design activism and critical environmental studies to analyze the relationship between space and difference, including, but not limited to, race, class, ethnicity, gender, sexuality, religion, and species. Students will apply these theories and approaches to creating place-based projects.

ENVI 269  (F) Environmental Law and Policy

**Cross-listings:** CAOS 269

**Primary Cross-listing**

America's environmental statutes, regulations, legal precedents, and policies have grown in complexity over the last 75 years. These bi-partisan, broadly supported laws also shaped environmental laws and policies in the European Union, China, the Middle East, and countries in the Global South. Yet in 2024, America is no longer a global leader in climate mitigation or environmental protection. As legal and policy solutions to environmental problems continue to evolve based on values, science, market dynamics, and increasing climate change impacts, it is important to study this complex legal landscape to understand where opportunities lie for more ambitious and just solutions to complex environmental problems. This class surveys major environmental laws and policies by looking at cases of current, complex environmental problems. This course will focus not only on the hallmark American environmental laws, regulations, and policies but also on the interplay of state and tribal law, food, water, mineral, energy, tax, and animal rights law issues, and international treaties and climate agreements. By the completion of the semester, students will understand both the successes and failures of modern environmental law. In addition to learning about the substantive legal issues covered in the course, students will develop legal research skills associated with researching statutes and regulations and interpreting judicial decisions. This course will help students interested in future work in law or policy understand how to analyze cases, regulations, and policy, and see opportunities for future solutions.

**Requirements/Evaluation:** 1) Class Participation (leading discussion and presenting materials) 20%; 2) Weekly 300-word Case Briefs 30%; 3) Comparative Law/Policy Analysis (5-7 page research paper) 30%; 4) Final Exam 20%

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 25

**Enrollment Preferences:** Preference to Environmental Studies majors and concentrators and sophomores and above.

**Expected Class Size:** 25

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

Depth

Fall 2024
LEC Section: 01    TF 2:35 pm - 3:50 pm     Lindi von Mutius

ENVI 275  (S)  Environmental Science, Policy, and Justice  (DPE)

Cross-listings: STS 275

Primary Cross-listing

Environmental science is much more than collecting data. Scientific experts are often called upon--and often position themselves--to guide environmental governance, which means that science has (some) power over public life. What is, and what should be, the relationship between science, on the one hand, and the creation and implementation of environmental policy, on the other? In this seminar we will study how science shapes governance and how science itself is governed. We will explore how legislatures, agencies, and courts respond to scientific information and uncertainty. And we will learn about how communities facing environmental racism and injustice collect data and use it in their advocacy. Along the way, we will challenge the idea of a unified "scientific method," and we will think about how Western scientific knowledge relates to other ways of knowing, including non-Western sciences, embodied knowledge, and traditional knowledge. Topics include: international climate negotiation, chemical exposure, the regulation of biotechnology, agricultural policy, pandemic responses, and plastics and electronics waste.

Requirements/Evaluation: several short essays, final essay

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: juniors, seniors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
STS 275(D2) ENVI 275(D2)

Difference, Power, and Equity Notes: This course will explore how unequal power leads to environmental injustice. Specifically, we will analyze how local and global environmental problems are distributed unevenly according to race, gender, and class. Using case studies we will analyze how communities facing environmental racism interact with scientists and sciences.

Attributes: ENVI Environmental Policy  EVST Social Science/Policy

Not offered current academic year

ENVI 288  (F)  Environmental Security: Policy Dilemmas and Solutions

Cross-listings: GBST 288

Primary Cross-listing

Water wars. Climate refugees. Scarcity-induced conflict. These and other challenges shape collective discourses about the climate change present and future. This course explores the relationship between environmental and security issues. It surveys the emergence of environmental security as a field of study and a policy arena. Students will engage a range of materials, including policy documents from the United Nations, international non-governmental organizations, global think tanks, the United States Department of Defense, and other security agencies. Students will also explore critical scholarship on the possibilities and limitations of environmental security as a leading policy paradigm.

Requirements/Evaluation: Class discussions; Two short response papers (2-5 pages each); Semester-long group policy project, including a mid-term policy report (4-6 pages) and a final group presentation as part of a mini conference put on by the class.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: environmental studies majors and concentrators; global studies concentrators
Expected Class Size: 19
Grading: no pass/fail option, yes fifth course option

ENVI 291 (F) Religion and Ecology in America (WS)
Cross-listings: REL 291 / SOC 291
Primary Cross-listing
This course examines the relationship between religious and environmental thought in American cultural history. Exploring a broad range of practices, stories, and beliefs, we will examine the spiritual roots and branches of modern environmentalism. Rather than survey the formal teachings of organized religious groups, we will explore the creation and contestation of environmental meaning in the public sphere through literature, art, philosophy, and popular culture. How have religious writers, thinkers, and artists shaped the way we think about nature? How have they shaped the way we think about politics, science, and social justice? In pursuit of these questions, we will consider a diverse array of topics and cases, including struggles to protect Native American sacred places, the role of Black churches in fighting environmental racism, Protestant outdoorism, Catholic climate activism, Jewish eco-mysticism, atheist biological theory, Buddhist eco-spirituality, and more.

Requirements/Evaluation: Each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper.
Prerequisites: None
Enrollment Limit: 10
Enrollment Preferences: Environmental Studies majors and concentrators
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 291(D2) REL 291(D2) SOC 291(D2)
Writing Skills Notes: Each student will write five five-page papers and five two-page papers in this class. They will be given extensive weekly feedback on their writing in the form of one-on-one meetings and written comments, and they will be given multiple opportunities for revision. Emphasis will be placed on the mechanics of argumentation, logic and rhetoric, and the development of a distinctive voice.

Fall 2024
TUT Section: T1 TBA Nicolas C. Howe

ENVI 297 (F) Global Sustainable Development (DPE)
Cross-listings: GBST 287
Primary Cross-listing
In 2015, the United Nations launched the Sustainable Development Goals, an ambitious multi-pronged effort to eliminate poverty, improve health outcomes, advance clean energy, address the effects of climate change, and support more equitable forms of life on earth. This course explores the historical antecedents and contemporary manifestations of global sustainable development, a constellation of ideas and a set of policy imperatives. This course will ask: what is sustainability and how did it emerge as a key paradigm in the present? Relatedly, how have different organizations and actors worked to address entrenched global challenges? Students will engage a range of materials, including policy documents from the United
Nations, World Bank, and international non-governmental organizations. Students will also explore critical scholarship on the possibilities and limitations of global development. Together we will grapple with ways to build more sustainable futures.

**Requirements/Evaluation:** Class discussions; 2 Policy Analysis Papers (4-6 pages each); Class presentations; Final Take-Home exam (8-10 pages)

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Envi majors and concentrators

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 297(D2) GBST 287(D2)

**Difference, Power, and Equity Notes:** This class considers topics of global inequality, including the impacts of colonialism, uneven development, extractive capitalism, gender-based discrimination/violence, and racial/ethnic environmental disparities. Students are invited to reconsider stereotypes about the "developing world" through a deep engagement with history and policy-making.

**Attributes:** ENVI Environmental Policy  EVST Social Science/Policy

---

**ENVI 298  (F) Cultural Geography**

Why do things happen where they do? What is the relationship between place and identity? How do history and politics shape the way people conceptualize space? What can landscapes tell us about the values, beliefs, and ideas of the people who inhabit them? Questions like these drive the vibrant field of cultural geography. Cultural geographers study how humans shape, experience, and imagine the material world. They explore the relationship between humans and their environment at scales ranging from the global to the local, and they ask how we may better understand ourselves and others by examining the places and landscapes we create. Drawing on case studies from around the world and exploring our local area, this class will survey the major theoretical, methodological, and empirical themes that have preoccupied modern geographers. Along the way, students will acquire some useful tools for making a world that is more beautiful, sustainable, and just.

**Requirements/Evaluation:** Three 5-7-pages essays and several shorter writing assignments.

**Prerequisites:** Environmental Studies 101

**Enrollment Limit:** 19

**Enrollment Preferences:** Environmental Studies majors and concentrators.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

---

**ENVI 300  (S) "Rebel Ecologies": Black and Indigenous Struggles for Land and Life**

**Cross-listings:** WGSS 362 / AFR 300 / AMST 362

**Secondary Cross-listing**

This course will ask, what other socioecological models exist? We will weave together a study of differing, yet often converging or synergistic traditions of Black/Womanist eco-feminism that often confronts the social constructions of race, gender, class and sexuality, dominant religion as a means of social control, imperialism, capitalism, and colonialism; Ecosocialism which often frames ecology in terms of a mode of production beyond or outside of capitalism; and Indigenous perspectives on resistance to capitalist extraction, imperialism, and colonialism. Given ongoing struggles against the extraction of land and labor, the urgent calls raised in the present-day "climate strike," the COVID-19 Pandemic, Black-led pandemic rebellions, along with long(er) histories of land-based peoples around the planet opposing racial capitalism, settler colonialism, and imperialism, this class will explore not only what those in opposition to both extractivism and expropriation resist, but also what we want. We will critique binaries, settler notions of time
and explore theories of change. Additionally, this class will look to an array of literature, film, sound, and other forms of cultural production in order to not just "locate," but describe and reveal rebel ecological visions emerging "from below." Ultimately this class will consider how the above ecological praxis can work simultaneously and within a sense of plurality, examining what we can learn from the work of activists, intellectuals, and defenders on the frontline. This course is an extension of Dr. Guess' concept of a "rebel ecology."

**Requirements/Evaluation:** The following requirements serve as the basis for course evaluation: Attendance and Participation 30%; Serve as Discussion Leader at least twice 20%; Weekly 500-word Literature Review 20%; One Final Project, which can take any number of forms, including the conventional research paper (8-12 double-spaced pages plus bibliography). More projects might include, an annotated bibliography of 7 texts, film analysis, syllabus, book review, a written play, an op-ed, etc. We will discuss further possibilities in class.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** If the course is overenrolled, preference will be given to Africana studies concentrators.

**Expected Class Size:** 7

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

**This course is cross-listed and the prefixes carry the following divisional credit:**

Not offered current academic year

**ENVI 303 (S) Cultures of Climate Change**

**Cross-listings:** SOC 303

**Primary Cross-listing**

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about what climate change means? How does something as complex as climate change become a "problem" in the first place? And what can its many proposed "solutions" tell us about the role of culture in environmental policy, politics, and decision-making. This course will explore a broad array of factors, from religion to race, class to colonialism. Emphasizing ethnographic and historical accounts of climate change as lived experience, it will apply a range of theories from the social sciences and humanities to case studies from around the world.

**Requirements/Evaluation:** a 15- to 18-page research paper and several shorter writing assignments

**Prerequisites:** ENVI 101 or permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** Environmental Studies majors and concentrators first; Anthropology and Sociology majors second

**Expected Class Size:** 19

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

Not offered current academic year

**ENVI 304 (S) Sacred Custodians: Environmental Conservation in Africa (DPE)**

**Cross-listings:** HIST 304 / GBST 304 / AFR 335

**Secondary Cross-listing**

In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari
Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of deforestation. Ken Saro-Wiwa was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental crisis that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction, game parks, desertification, wildlife and hunting, traditional practices, and climate change.

Requirements/Evaluation: Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and one exam.

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: If course is over-enrolled, preference to History Majors and students with a demonstrated interest in African studies.

Expected Class Size: 15-20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 304(D2) GBST 304(D2) ENVI 304(D2) AFR 335(D2)

Difference, Power, and Equity Notes: This course will intensively explore the question of how various global and local actors have defined environmental degradation and promoted approaches to conservation in Africa. It guides students through an examination of the different power dynamics that have shaped environmental conservation thought and practices on the continent. This course, therefore, provides a critical lens through which to examine the inequalities rooted in race, gender, and other forms of difference

ENVI 311 (S) Environmental Literature and Film in Latin America (DPE) (WS)

Cross-listings: RLSP 304 / COMP 311

Secondary Cross-listing

What use are aesthetics when the world is (literally) on fire? We will take up this question and others in a critical engagement with Latin American cultural production of the twentieth and twentieth centuries, especially works of literature and film that directly or indirectly engage with environmental crisis. Students can expect to explore a variety of media, forms and genres, including works that range from (more or less) mainstream to cutting edge. Our examinations of literature and film will be supported by theoretical writings produced in the Americas and other places. Writers and directors whose work may be considered include, but are not limited to: Lucrecia Martel, Ciro Guerra, Rafael Barrett, Samanta Schweblin, Ernesto Cardenal, Juan Rufio, María Luisa Bombal, Eduardo Gudynas, Silvia Rivera Cusicanqui, Eduardo Viveiros de Castro, Isabelle Stengers.

Requirements/Evaluation: This course will be conducted seminar-style. Students will be expected to prepare thoroughly and be active, engaged participants in class discussions. In addition to day to day preparation and participation, other graded assignments will include discussion-leading, one short (5-7 page) essay and a longer (15-20 page) paper combining research and original analysis.

Prerequisites: One college literature of film course at the 200-level or above.

Enrollment Limit: 19

Enrollment Preferences: Envi majors and concentrators, Comp Lit majors, Spanish majors and those working towards the Spanish certificate.

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 311(D1) RLSP 304(D1) COMP 311(D1)

Writing Skills Notes: All students in the course will write (and rewrite) no less than 20 pages. Major writing assignments will be scaffolded, with explicit discussion of the writing process (pre-writing, drafting, revision) and consultation.
Difference, Power, and Equity Notes: The works of literature and film that we will be examining challenge North American conceptions of climate change (and environmental crisis more broadly) by making visible (often uncomfortably so) the colonial and neocolonial history of extractivism.

Attributes: ENVI Humanities, Arts + Social Science Electives

Not offered current academic year

ENVI 316 (F) Governing Cities by Design: the Built Environment as a Technology of Space (DPE)

Cross-listings: ARTS 316

Primary Cross-listing

Like in the classic era, cities of the 19th century were metaphors for government: good government could not exist without good governance of the city. This creative seminar charts the transformation of the built environment (architecture and urbanism) as a technology of space to govern cities and citizens from the mid-19th century until the present. Through debates and case studies across geographies and historical timeframes, we will analyze how regimes of government shape and are shaped by the built environment. The seminar has a studio component that consists of an urban project where students will apply theories and approaches to a real case study using digital art (2D and 3D modeling).

Class Format: Because this seminar is cross-listed with ARTS, there is a studio component (short assignments and final project)

Requirements/Evaluation: Active presence in class discussions and presentations, willingness to experiment, contributions to a collaborative seminar/studio environment, quality of work, depth and quality of the investigative process.

Prerequisites: ENVI 101 or instructor permission

Enrollment Limit: 15

Enrollment Preferences: ENVI majors and concentrators, Studio Art majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $250-$350 lab fee charged to term bill. Lab and materials fees for all studio art classes are covered by the Book Grant for all Williams financial aid recipients.

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 316(D1) ENVI 316(D2)

Difference, Power, and Equity Notes: Using theoretical perspectives from urban studies, this seminar/workshop explores how the built environment, as a technology of space, contributes to the production of difference, the establishment of certain regimes of power, and the erasure of specific urban histories--mainly those of underrepresented groups. Students will engage in multimedia place-based projects to imagine and create more equitable built environments.

ENVI 319 (S) The Law and Policy of Climate Change

This course explores the legal frameworks that guide climate change mitigation efforts and adaptation strategies. This course builds on knowledge gained in the fall semester Environmental Law and Policy course, but will also refresh the basic tenets of environmental law. After a brief introduction to climate change and its projected impacts, we review the legal framework of international climate change law, including the evolution of climate change-related laws in the United States and related litigation. This analysis focuses on the federal level but also considers the separate authority of states and municipalities to take action. Massachusetts and Boston are the primary case studies for the course, but other state examples will inform our classes on non-federal policy-making. In addition to learning about the substantive legal issues covered in the course, students develop or practice legal research skills associated with researching statutes and regulations and interpreting judicial decisions. Students gain experience with activities relevant to designing and implementing climate change policy by writing comments on regulations, drafting statutory or regulatory language, and writing corporate climate change statements.

Requirements/Evaluation: Class Participation (leading discussion and presenting materials) 20%; Weekly 300-500-word Responses 30%; Policy Proposal (5-7 page research paper) 25%; Final Exam 25%
Prerequisites: ENVI 269 or permission of instructor.

Enrollment Limit: 25

Enrollment Preferences: Environmental studies concentrators and majors and sophomores and above.

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ENVI 320  (S)  Ecosystem ecology in the Anthropocene

Cross-listings: BIOL 320 / GEOS 320

Secondary Cross-listing

Ecosystem ecology provides a framework for understanding the multidirectional interactions between biological organisms and their physical environments, and provides critical insight into our approaches for managing resource use in an era of anthropogenic change. In this class, we will explore the biological and biogeochemical underpinnings of ecosystem carbon and nutrient cycling. Topics will include interactions between species composition and ecosystem function, nutrient use efficiency, resource transformations, ecosystem management and restoration, and feedbacks to global change. Lecture content will be supported by regular discussions of the primary literature. Labs will introduce students to field and laboratory techniques to study resource and energy flow in local ecosystems, as well as approaches to project design, hypothesis development, data collection, and analysis. The laboratory program will culminate with a multi-week independent project.

Class Format: lectures, discussions, and a weekly lab

Requirements/Evaluation: Evaluation will be based on lab assignments, discussion participation, three exams, and an independent project

Prerequisites: BIOL/ENVI 203 or GEOS 208 or BIOL 211 or GEOS 212

Enrollment Limit: 20

Enrollment Preferences: Biology majors, then Environmental studies majors/concentrators or Geosciences majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

ENVI 322  (F)  Waste and Value

Cross-listings: GBST 322 / ANTH 322

Secondary Cross-listing

What is trash and what is treasure? In what ways does value depend upon and necessitate waste, and how is the dialectic between the two inflected by culture? When we 'throw away' things at Williams College, where exactly do they go, and who handles them 'down the line'? What are the local and global economies of waste in which we are all embedded and how are they structured by class, race, caste, gender and nation? In this seminar we critically examine the production of waste - both as material and as category - and its role in the production of value, meaning, hierarchy and the environment. Readings include ethnographic accounts of sanitation labor and social hierarchy; studies of the political and environmental
consequences of systems of waste management in the colonial period and the present; and theoretical inquiries into the relation between filth and culture, including work by Mary Douglas, Dipesh Chakrabarty and Karl Marx. Geographically the foci are South Asia and North America. There is also a fieldwork component to the course. In fieldtrips we follow the waste streams flowing out of Williams - to an incinerator, a sewage treatment plant, recycling and composting facilities and other sites - and students explore in individual, participant-observation-based research projects the everyday social life of waste in our communities.

Requirements/Evaluation: regular posting of critical response papers, field notes on waste streams, research-based final paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: All students are welcome to the course. If overenrolled, preference will be given to majors in Anthropology and Sociology and concentrators in Environmental Studies and Asian Studies.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

ENVI 327 (F) Coastal Processes and Geomorphology (QFR)

Cross-listings: GEOS 327 / CAOS 327

Secondary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, quizzes, and an independent research project

Prerequisites: Either GEOS 104 or GEOS 210; or permission of instructor. No prior knowledge is necessary, but this course does build on principles used to explore complex scientific challenges.

Enrollment Limit: 15

Enrollment Preferences: Geosciences majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course counts toward the GEOS Group B Electives - Sediments + Life.
Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 327(D3) GEOS 327(D3) CAOS 327(D3)

Quantitative/Formal Reasoning Notes: This course will involve the use of MATLAB software to quantitatively analyze coastal process and geomorphological data.

Fall 2024
LEC Section: 01    MWF 8:30 am - 9:45 am     Alex A. Apotsos

ENVI 331  (S)  Geomorphology

Cross-listings: GEOS 301

Secondary Cross-listing

Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth's surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will explore local case studies of geomorphology, such as the impact of ice-age glaciation on landscapes in the northeastern United States and the legacy of deforestation and river damming during the colonial era. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and Life group for the Geosciences major.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, a research project, and a midterm and final exam

Prerequisites: At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: GEOS and ENVI majors

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

ENVI 335  (F)  The Nile  (DPE)

Cross-listings: ARAB 308 / GBST 320 / AFR 350 / HIST 308

Secondary Cross-listing

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It was on the banks of this river that the great Egyptian empires were founded that led to the building of some of humanity's most astounding structures and artworks. While the Nile seems eternal and almost beyond time and place, now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time
the number of people who rely on the river is ever increasing. This alarming nexus of demography, climate change, and economic development has led to increasingly urgent questions of the Nile’s future. Is the Nile dying? How has the river, and people’s relationship with it, changed over the last century? This course will consider the history of the Nile and its built and natural environment. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. By following an imaginary droplet flowing from tributaries until it makes its way into the Mediterranean Sea, we will learn about the diverse peoples and cultures along the way. We will evaluate the numerous attempts to manage and control the Nile, including the building of big dams, and the continuous efforts to utilize the river for economic development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the major urban centers with the Nile and whether the tensions among Nile riparian states will lead to “water wars” in East Africa and the Middle East.

Requirements/Evaluation: short papers and final project/paper
Prerequisites: none, though background in Middle East history is preferable
Enrollment Limit: 19
Enrollment Preferences: History and Arabic Studies majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 308(D2) GBST 320(D2) AFR 350(D2) ENVI 335(D2) HIST 308(D2)

Difference, Power, and Equity Notes: The course fulfills the DPE requirement because it evaluates the differing experiences of the Nile among different cultural groups. It will evaluate how the central government is constantly trying to change how people use their water and therefore over-determine how people interact with their natural environment.

Attributes: HIST Group E Electives - Middle East  HIST Group P Electives - Premodern
Not offered current academic year

ENVI 339  (F) Conservation Biology
Cross-listings: BIOL 329
Secondary Cross-listing
Conservation Biology focuses on protection of the Earth's biodiversity. This course starts with an overview of biodiversity including patterns of species richness, causes of species loss (extinction), and the critical contributions of biodiversity to ecosystem function and human welfare. Then we analyze ways to conserve biodiversity at the genetic, population, species and community/ecosystem levels. Labs are field oriented, and focus on local New England communities and ecosystems. Labs emphasize knowing the dominant species in each system; they also stress how to collect and analyze the field data on ecological community structure and function that are critical to test hypotheses that relate to different conservation goals.

Class Format: lectures, discussions, and a weekly lab.
Requirements/Evaluation: Evaluation will be based on lab assignments and reports, discussion participation, two exams and an independent project.
Prerequisites: BIOL 203/ENVI 203 or BIOL 220 or BIOL 305 or permission of instructor.
Enrollment Limit: 24
Enrollment Preferences: Biology majors, Environmental Studies majors, seniors, and juniors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: ENVI Natural World Electives
Not offered current academic year

ENVI 346  (F) Environmental Psychology
Cross-listings: PSYC 346
Secondary Cross-listing

This is a course on contemporary social psychology as it pertains to the natural environment. Our two primary questions in this course are: (1) how can research and theory in social psychology help us understand the ways in which people engage with threats to the natural environment?, and (2) how can social psychology help us encourage environmentally responsible behavior and sustainable practices? Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of environmental solutions.

Requirements/Evaluation: a series of papers, two essay exams, written and oral reports of research
Prerequisites: PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.
Enrollment Limit: 19
Enrollment Preferences: Psychology majors, Environmental Studies majors, and Environmental Studies concentrators
Expected Class Size: 19
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)
This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ENVI 351  (F)(S)  Marine Policy  (DPE)  (WS)
Cross-listings: PSCI 319 / CAOS 351
Secondary Cross-listing

Coastal communities are home to nearly 40% of the U.S. population, but occupy only a small percentage of our country's total land area. Intense population density, critical transportation infrastructure, significant economic productivity, and rich cultural and historic value mark our coastal regions as nationally significant. But, coastal and ocean-based climate-induced impacts such as sea level rise, ocean warming and acidification pose extraordinary challenges to our coastal communities, and are not borne equally by all communities. This seminar considers our relationship with our ocean and coastal environments and the foundational role our oceans and coasts play in our Nation's environmental and economic sustainability as well as ocean and coastal climate resiliency. Through the lens of coastal and ocean governance and policy-making, we critically examine conflict of use issues relative to climate change, climate justice, coastal zone management, fisheries, ocean and coastal pollution and marine biodiversity.

Class Format: This class is taught only at Williams-Mystic in Mystic, Connecticut and includes coastal and near-shore interdisciplinary field seminars, and 10 days offshore.
Requirements/Evaluation: Weekly Readings; Class Participation; Small and large group strategy exercises (written and oral); Written Research Project: issues paper and draft research paper; Final Research Project: multiple formats available
Prerequisites: none
Enrollment Limit: 23
Enrollment Preferences: must be enrolled at Williams-Mystic in Mystic, Connecticut
Expected Class Size: 22
Grading: no pass/fail option, no fifth course option
Unit Notes: must be enrolled at Williams-Mystic in Mystic, Connecticut
Distributions: (D2)  (DPE)  (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
PSCI 319(D2) ENVI 351(D2) CAOS 351(D2)
Writing Skills Notes: Each student will write one 3-5 page research issues paper and one 8-10 page draft research paper as well as a final project with written components equaling 5-8 pages. Each submission receives written feedback from the professor, including research guidance, input on grammar, structure, language, analysis. Students also receive verbal feedback in individual conferences to discuss research paper organization, analysis, structure and grammar as well as final project input.
Difference, Power, and Equity Notes: Coastal and ocean policy issues relating to climate change, coastal zone management, fisheries, ocean
pollution and marine biodiversity impact environmental and climate justice. Students examine coastal governance while considering the disproportionate burdens on underrepresented populations in U.S. coastal communities caused by climate change and coastal policies. Students analyze multi-disciplinary evidence and work to strengthen their integrative, analytical, writing, and advocacy skills.

**ENVI 363  (F) Environmental Fate of Organic Chemicals**

**Cross-listings:** CHEM 363

**Secondary Cross-listing**

This course introduces students to the methods used to assess the risks posed by organic chemicals to human, animal, and ecosystem health. Our goal is to develop a quantitative understanding for how specific features of organic molecular structure directly dictate a given molecule's environmental fate. We will begin by using thermodynamic principles to estimate the salient physiochemical properties of molecules (e.g., vapor pressure, solubility, charging behavior, etc.) that impact the distribution, or partitioning, of organic chemicals between air, water, soils, and biota. Then, using quantitative structure activity relationships, we will predict the degradation kinetics resulting from natural nucleophilic, photochemical, and biological processes that determine chemical lifetime in the environment.

**Class Format:** lecture, three hours per week and laboratory, four hours per week

**Requirements/Evaluation:** weekly problem sets, laboratory exercises, two midterms, a final exam, participation in lecture and lab

**Prerequisites:** CHEM 155 or CHEM 256 and CHEM 156; or CHEM 200 and CHEM 201

**Enrollment Limit:** 12

**Expected Class Size:** 12

**Grading:** no pass/fail option, no fifth course option

**ENVI 364  (S) Instrumental Methods of Analysis**

**Cross-listings:**

**Secondary Cross-listing**

Instrumental methods of analysis provide scientists with different lenses to observe and elucidate fundamental chemical phenomena and to measure parameters and properties at the atomic, molecular, and bulk scales. This course introduces a framework for learning about a variety of instrumental techniques that typically include chromatography, mass spectrometry, thermal methods, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies. Students complete laboratory projects and gain hands-on experience and project planning skills to study molecules and materials of interest. This practical experience is complemented by lectures that cover the theory and broader applications of these techniques. Students also explore the primary literature and highlight recent advances in instrumental methods that address today’s analytical questions. The skills learned are useful in a wide variety of scientific areas and will prepare you well for research endeavors.
Class Format: lecture, two times per week and laboratory, four hours per week

Requirements/Evaluation: Weekly data analysis, laboratory assignments and reports, readings for class, problem sets, one oral presentation of an application of instrumental methods, a final independent literature project and presentation; demonstrated progress in research skills, and project engagement.

Prerequisites: CHEM 251 and CHEM 256 (or permission of instructor); or CHEM 200 and CHEM 201 (can be taken concurrently with CHEM 201)

ENVI 376 (F) Economics of Environmental Behavior (QFR)

Cross-listings: CAOS 477 / ECON 477

Secondary Cross-listing

A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to assess how policies can help or hurt the environment. Topics we may study include: common pool resources, voluntary conservation, social norms and nudges, discrimination and justice, rationality, firm responses to mandatory and voluntary regulation, voting and public opinion, and international environmental agreements. We'll also build familiarity with the main methodologies of modern economic research: theoretical modeling, empirical analysis of observational data, and experiments.

Class Format: Class sessions will largely consist of presentations and discussions of academic research papers, as well as lab sessions to work on empirical exercises and other interactive activities

Requirements/Evaluation: class participation, regular reading markup, empirical exercises, oral presentation(s), and an original research paper using an experiment, observational data, or theory

Prerequisites: ECON 251 and (ECON 255 or STAT 346)

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors and junior Economics majors considering a thesis

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

ENVI 380 (F) Animals and Society

Cross-listings: STS 379

Primary Cross-listing
How do humans and animals shape each other's lives? People encounter animals in farms, laboratories, zoos, wildernesses, and backyards, on purpose and by chance. They treat animals as family members, entertainment, food, vectors of disease, and objects of scientific wonder. Drawing on the works of biologists, philosophers, and feminist science and technology studies scholars, this seminar will examine our relationships with animals and help clarify our responsibilities to them. We will ask: What are the social and environmental consequences of consuming animals? Should humans swim with dolphins, feed manatees, use gene-editing to create species that can survive climate change? Should moral standing depend upon the ability to communicate or the ability to experience emotions like grief and joy? What can animal models tell us about human health and society, and when is animal otherness too large a gap to bridge? What might human violence toward animals tell us about sexism, racism, or capitalism, and what will human-animal relationships look like in the future?

Requirements/Evaluation: short essays, final portfolio
Prerequisites: none
Enrollment Limit: 18
Enrollment Preferences: juniors and seniors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 380(D2) STS 379(D2)
Attributes: ENVI Humanities, Arts + Social Science Electives

Not offered current academic year

ENVI 387 Economics of Climate Change (QFR)
This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration. We will consider the distribution of climate damages across poor and wealthy people, both within and across countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. Throughout the course we will discuss the limits of the economic approach, pointing out normative questions on which economic theory provides little guidance.

Requirements/Evaluation: problem sets, midterm, group presentation, final exam
Prerequisites: ECON 251, familiarity with statistics
Enrollment Limit: 25
Enrollment Preferences: Junior/Senior Economics majors and CDE fellows
Expected Class Size: 25
Grading: (D2) (QFR)
Quantitative/Formal Reasoning Notes: The course involves simple calculus-based theory and applied statistics.
Attributes: ENVI Environmental Policy  POEC Depth

Not offered current academic year

ENVI 390 (F) The Nature of Nature
Cross-listings: ENGL 394  ENGL 394
Secondary Cross-listing
"Nature" is one of the commonest words in English. And yet what does it mean? Is it primarily descriptive (all living things), or normative ("natural" foods, "human nature")? This course will consider the richly incoherent ways we think about the living world, paying particular attention to the difficulty of narrating processes that are too big, too small, too quick, or too slow for direct human apprehension. We'll explore the way popular nature writing mingles scientific reporting with implicit and explicit judgments about human identity, and take up the insoluble problem of our proper relation to animals. Considerable attention will be paid to the ethical dimensions of contemporary environmental consciousness and unconsciousness. Writers
Requirements/Evaluation: Several short exercises, two six-page comparative essays, and a final self-designed project, subject to my approval. Active participation in class. The final project should explore something serious -- about nature, about yourself -- in ways that are not merely verbal or academic, but instead involve a sense of risk.

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors; Environmental Studies majors and concentrators; Philosophy majors.

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Attributes: ENGL Criticism Courses ENVI Humanities, Arts + Social Science Electives

---

ENVI 397 (F) Independent Study of Environmental Problems

Individuals or groups of students may undertake a study of a particular environmental problem. The project may involve either pure or applied research, policy analysis, laboratory or field studies, or may be a creative writing or photography project dealing with the environment. A variety of nearby sites are available for the study of natural systems. Ongoing projects in the College-owned Hopkins Forest include ecological studies, animal behavior, and acid rain effects on soils, plants, and animals. Students may also choose to work on local, national, or international policy or planning issues, and opportunities to work with town and regional planning officials are available. Projects are unrestricted as to disciplinary focus. Students should consult with faculty well before the start of the semester in which they plan to carry out their project.

Prerequisites: approval by the Chair of Environmental Studies

Grading: yes pass/fail option, yes fifth course option

Distributions: No divisional credit

---

ENVI 398 (S) Independent Study of Environmental Problems

Individuals or groups of students may undertake a study of a particular environmental problem. The project may involve either pure or applied research, policy analysis, laboratory or field studies, or may be a creative writing or photography project dealing with the environment. A variety of nearby sites are available for the study of natural systems. Ongoing projects in the College-owned Hopkins Forest include ecological studies, animal behavior, and acid rain effects on soils, plants, and animals. Students may also choose to work on local, national, or international policy or planning issues, and opportunities to work with town and regional planning officials are available. Projects are unrestricted as to disciplinary focus. Students should consult with faculty well before the start of the semester in which they plan to carry out their project.

Prerequisites: approval by the Chair of Environmental Studies

Grading: yes pass/fail option, yes fifth course option

Distributions: No divisional credit

---

ENVI 402 (F) Environmental Planning Workshop: Community Project Experience
Cross-listings: AMST 406

Primary Cross-listing

In this class you apply your education to effect social and environmental change in the Berkshires. Students work in small collaborative groups to address pressing issues facing the region. Class teams partner with community organizations and local & county governments to conduct applied research and to develop solutions. Students will learn experientially and contribute to the community. The field of environmental planning encompasses the built environment (eg: housing, zoning, transportation, renewable energy, waste, neighborhood design), the natural environment (eg: farmland, ecosystems, habitat, natural resources, air and water pollution and climate change), and the social environment (eg: spatial geography, racial zoning, recreation, placemaking, ecojustice, food security, and public health). Skills taught include land use planning, community-based research, basic GIS mapping, developing/conducting surveys, interview technique, project management, public presentations and professional report-writing. The class culminates in presentations to the client organizations. Class hours include time for team project work, client meetings and team meetings with the professor. Recent project topics: https://ces.williams.edu/environmental-planning-papers/

Class Format: The weekly conference session (1 hour) is dedicated to site visit field trips, team project work, client meetings and team meetings with professor.

Requirements/Evaluation: Response papers (three 1-page papers), in-class exercises, class discussion, small group work, public meeting attendance, project work, final report (due in segments during semester) and final presentation.

Prerequisites: ENVI 101 recommended; open to juniors and seniors.

Enrollment Limit: 16

Enrollment Preferences: Environmental Studies majors and concentrators, American Studies majors, Maritime Studies concentrators.

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Unit Notes: Course fulfills senior seminar requirement for Environmental Studies Majors & Environmental Studies Concentrators. American Studies Space & Place elective. Course is an Environmental Studies Concentration elective (ENVI Policy and ENVI Humanities, Arts + Social Science) and Environmental Studies Major elective.

ENVI 410 (S) The Cryosphere

Cross-listings: CAOS 410 / GEOS 410

Secondary Cross-listing

The Earth's climate system is often described in terms of its spheres, including the atmosphere, biosphere, lithosphere, oceans, and the cryosphere. The cryosphere is the naturally occurring ice on Earth in all its many forms: snow, glaciers, ice sheets, sea ice, frozen lakes and rivers, and permafrost (frozen soil). These parts of the climate system may seem remote, but have implications for climate and weather around the world. Melting glaciers and ice sheets have already contributed to sea level rise, and are projected to do so even more in the future. This course will explore the cryosphere, including snow, sea ice, permafrost, and glaciers through lectures, hands-on and data analysis labs, reading journal articles, and a final project. As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major.

Class Format: Class periods and lab periods will be used interchangeably based on the weather.

Requirements/Evaluation: Evaluation will be based on short papers, labs responses, and a research project

Prerequisites: GEOS 215 or GEOS 255 or GEOS 309 or MAST 311 or permission of instructor
ENROLLMENT LIMIT: 10
ENROLLMENT PREFERENCES: Senior GEOS majors, then other GEOS majors and senior ENVI majors
EXPECTED CLASS SIZE: 10
GRADING: yes pass/fail option, yes fifth course option
UNIT NOTES: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major
MATERIALS/LAB FEE: Labs will be outside during the winter: students should be prepared to dress appropriately for the weather.

ENVI 413 (F) The Big Ideas: Intended and Unintended Consequence of Human Ambition (DPE) (WS)
CROSS-LISTINGS: HIST 413 / GBST 413 / ARAB 413
SECONDARY CROSS-LISTING
What have been the most consequential ideas of the last 100 years? This course will explore some of the more audacious and ambitious plans to alter natural and urban environments in the late 19th century to the early part of the 21st, specifically those that sought to improve the human condition through science, engineering, and technology. By building big bold things, politicians around the globe sought to bring prosperity to their nation and embark on a path of modernity and independence. Through an intellectual, political and environmental history of major construction projects such as the building of the Suez Canal and the Aswan Dam, extensive river valley developments in Iran, Turkey and Iraq, and utopian and futuristic city planning in western Asia, students will consider how, with the benefit of hindsight, to best evaluate the feasibility of such bold schemes. Who has benefitted and who has not, what have been some of the unanticipated consequences, what was sacrificed or neglected, and what do these projects tell us about the larger processes of global capitalism, decolonization, and climate change?

REQUIREMENTS/EVALUATION: A presentation, shorter writing assignments and a longer research paper (20-25 pages) in the end. Students will submit shorter drafts of final paper in order to receive constructive feedback prior to final submission.

PREREQUISITES: None

ENROLLMENT LIMIT: 15
ENROLLMENT PREFERENCES: Seniors, especially History, Arabic and Environmental Studies majors.
EXPECTED CLASS SIZE: 15
GRADING: no pass/fail option, no fifth course option
DISTRIBUTIONS: (D2) (DPE) (WS)

THIS COURSE IS CROSS-LISTED AND THE PREFIXES CARRY THE FOLLOWING DIVISIONAL CREDIT:
HIST 413(D2) GBST 413(D2) ARAB 413(D2) ENVI 413(D2)

WRITING SKILLS NOTES: A 20-25 page research paper will be required at the end of the semester. Prior to getting to that point, students will submit an annotated bibliography, a two page proposal, a five and eventually a 10 page draft. Each draft will receive extensive comments and suggestions from peers and instructor. In this way, the student will think about the process of writing and the best way to set themselves up for success.

DIFFERENCE, POWER, AND EQUITY NOTES: This course examines how a number of different nations in Africa and Asia sought to improve the living conditions of the masses through major construction project. Though ostensibly these schemes were supposed to improve the livelihood of all, often they primarily benefitted the few - the urban elite - and not the general population. This course will therefore explore how certain class, gender and racial lines were solidified and maintained through economic development plans.

NOT OFFERED CURRENT ACADEMIC YEAR
A key question orients this course: What can the embodied, place-based, and detailed approach of ethnographic study bring to our understandings of the environment? This upper-level seminar will explore this question through classroom discussions and a semester-length research project. Students will engage different styles of environmental ethnography while undertaking their own ethnographic projects involving the Williams College community and surrounding areas. Students will learn to work across different kinds of evidence as they draft fieldnotes, code fieldwork data, extrapolate key ideas from their fieldwork materials, and discover new ways of building environmental knowledge. Students will use these materials to collectively assemble an edited volume of ethnographic snapshots to be presented to the wider Environmental Studies community at Williams.

Requirements/Evaluation: Participation in seminar discussions; Weekly fieldnotes (2-3 pages per week); Mid-term coded fieldwork notes and summary statements (9-20 pages); Final ethnographic paper (10-12 pages) and short film

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; Juniors and Seniors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: This is a writing intensive capstone seminar. Students will produce and receive peer and professor feedback on weekly written assignments. The course includes a 9-20 page midterm and a 10-12 page final ethnographic paper.

ENVI 460  (S) Communicating Climate Change

Long-term, probabilistic thinking about scary scenarios is hard. When the relevant time frames extend to centuries and millennia, it is really hard. And when the degree of scariness is determined by sciences that few people understand, it is really, really hard. Such is the challenge of climate change communication. No matter what your interests or career paths might be, you will need to be able to communicate effectively about environmental problems, often with people who see them very differently from you. It is difficult to communicate about any problem across social, political, and cultural divides. But environmental problems present special challenges. For one thing, they typically involve complicated, contested science. For another, their effects are often difficult to perceive yet potentially devastating in their consequences, especially for future generations and marginalized people. For yet another, their solutions often seem hopelessly difficult to implement. And for yet another, they are thoroughly entangled with almost every other problem we face, from pandemics to racism to wealth inequality. How do we communicate clearly, persuasively, and responsibly about something so complex? What does climate change really mean? This seminar brings together students with interests in the humanities, arts, social sciences and sciences to seek answers to this fundamental question. Drawing on insights from the qualitative social sciences and environmental humanities, we will develop a theoretical and methodological tool kit that can be applied to concrete, practical problems. Over the course of the semester, each student will pursue a major independent project that allows them to put these tools to use while exploring a topic of personal significance.

Requirements/Evaluation: Several sequenced short writing assignments leading to a 15-20 page final paper.

Prerequisites: Environmental Studies 101 and 102.

Enrollment Limit: 19

Enrollment Preferences: Environmental/Maritime Studies majors and concentrators.

ENVI 465  (S)  Solutions to the Biodiversity Crisis

The biodiversity crisis is one of the greatest challenges of our century. Faced with climate change, persistent pollution, and habitat fragmentation, species are declining locally and globally. In this upper-level seminar we will integrate knowledge from the natural sciences, social sciences, policy, arts, and the humanities to design and implement biodiversity interventions. Through readings, discussions with experts, and applied projects, we will learn how biodiversity conservation and restoration can be socially just; how spaces can be designed to promote the flourishing of life; and how much local environmental management can alter global trends. We will also envision what the biotic world might look like in 10, 100, and 1000 years and consider who gets to decide which species live and which die, and who should decide.

Requirements/Evaluation:  One 5-7-page paper; final collaborative project
Prerequisites:  Environmental Studies 101 and 102
Enrollment Limit:  19
Enrollment Preferences:  Environmental/Maritime Studies majors and concentrators; seniors
Expected Class Size:  12
Grading:  no pass/fail option, no fifth course option

ENVI 478  (S)  Cold War Landscapes

Cross-listings:  AMST 478 / HIST 478

Secondary Cross-listing

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in nations across the globe. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States and North America. We will then move on to examining others in Europe and the Soviet Union. Our approach to our topics will be interdisciplinary throughout the semester, with the additional goal of helping students frame their final projects. Students are encouraged to write their research papers on any geographical area of the world that interests them.

Requirements/Evaluation:  Class participation and semi-weekly critical writing on the reading; students will also be expected to keep up through the stages of the research paper process, which will involve submitting a short research plan, annotated bibliography, outline, and a rough draft, as well as the final 20- to 25-page paper.
Prerequisites:  none
Enrollment Limit:  12
Enrollment Preferences:  History, ENVI, and AMST majors if over-enrolled
Expected Class Size:  10

ENVI 491 (S) The Suburbs (WS)

Cross-listings: AMST 490 / HIST 491

Secondary Cross-listing

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

Class Format: Students will meet with the professor either in assigned pairs or “trios” at a regularly scheduled time each week. Students in pairs will meet for one hour; students in trios will meet for 75 minutes.

Requirements/Evaluation: This class follows a typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History majors and students with course work related to the topic.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
ENVI 491(D2) AMST 490(D2) HIST 491(D2)

Writing Skills Notes: Students will reflect on what their writing goals are for the semester, and they will receive feedback on their writing from the professor and from their tutorial partner. The final writing assignment will afford students the chance also to reflect back on their previous papers and the semester’s course content.

ENVI 14  Environmental Law and Policy
This course covers the major environmental protection areas, and current issues, such as air and water pollution, climate change, regulation of toxic wastes, cleanup of contaminated sites, environmental justice, and ecosystem and endangered species protections. It also introduces students to the American legal system by covering a range of environmental legal actions, including both common law lawsuits by private persons, and governmental regulation and enforcement under the major environmental statutes. Students will be exposed to careers in environmental law and policy and will also develop legal reasoning, argumentation, and writing skills.

Requirements/Evaluation: Paper(s) or report(s); Presentation(s)
Prerequisites: None
Enrollment Limit: 25
Enrollment Preferences: ENVI studies majors will be given preference.

ENVI 24 (W) Farming New England: A Deep Dive Into the Regional Food System
Farmers feed us all. In this intensive experiential course, students will learn how. New England produces about 10 percent of its own food: 90 percent of the food is imported from outside the region. Farming in the region has been in decline for decades and farms face a range of challenges, from climate change induced flood & drought, to financial woes and debt, social isolation, and physical maladies. With more support, regenerative farming techniques and a new generation of trained farmers, New England's farms can succeed and continue to contribute to the regional food system. This can only happen with supportive policies that promote family farms and local agriculture, and of course, a new generation of farmers. This class examines the complexities of the regional food system from multiple perspectives: farmers, farming, agronomy, climate change, food insecurity, food systems planning, agricultural policy, agricultural economics and markets, culture, race and class, and land use planning. Five overarching questions shape the class: What are the challenges and opportunities to farming in New England? How can New England's agriculture succeed and expand? How is regenerative farming part of the solution? What will it take for the region to produce more of its own food and address regional food insecurity? How can farming be more socially just and racially equitable? Students will learn through immersion in the agricultural world for the month. Class meets three days a week: two days a week of farmwork on a variety of farms (livestock farms, dairy farms (cow and goat), cheesemaking operations, diversified farms, vegetable & greenhouse, and the Food Bank), and one day a week meeting with experts: agronomists, ag extension workers, farmland planners, and agricultural/food system policymakers. Students will learn through hands-on work (yes, you will get dirty!), conversation with farmers and others in the agricultural field, class reading, group discussion, reflection, and writing. The class will spend a Saturday at the NOFA Conference (Northeast Organic Farmers Association), Students are encouraged to reflect on their daily class experiences and will keep a journal after each class meeting. The class will include two overnight trips (1 and 2 nights) in the New England region.

Class Format: Experiential, primarily field-based class.
Requirements/Evaluation: Class participation: farmwork, class discussion, conversations with farmers and others involved in the class; journal.
Prerequisites: None
Enrollment Limit: 6
Enrollment Preferences: Environmental Studies majors and concentrators; students with a demonstrated interest in agriculture and/or outdoor work & experience.
Expected Class Size: 6
Grading: pass/fail only
Materials/Lab Fee: $600

ENVI 31 (W) Senior Research and Thesis: Environmental Studies
To be taken by students registered for Environmental Studies 493-494.
Class Format: thesis
Grading: pass/fail only
Not offered current academic year

ENVI 99 (W) Independent Study: Environmental Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only
Not offered current academic year
Experiential education, involving “learning by doing” outside the classroom, is a robust part of the Williams curriculum. In addition to the use of traditional laboratory work in the natural sciences and studio work in art, faculty have been challenging students to become engaged more personally in the Williams curriculum through field work, whether in the form of research, sustained work on special projects, or through placement with community organizations. Courses which include experiential learning provide students with opportunities to encounter firsthand the issues that they read and study about, requiring them to apply academic learning to nonacademic settings and challenging them to use their experiences in those settings to think more critically and deeply about what they are studying. Experiential courses, as defined above, range from fully integrated off-campus programs such as the Williams-Mystic: Coastal and Ocean Studies Program to courses involving a small field research exercise or project. The amount and nature of the experiential component(s) varies according to the instructor’s judgment. More information can be found on the Center for Learning in Action website.
Film and Media Studies is a vibrant interdisciplinary field. It studies traditional visual and audio-only forms, such as film, television and radio, as well as new media such as podcasts, video installations, interactive video projects, video games, augmented reality, animation, streaming video and other forms that will undoubtedly emerge in the future. Given the explosive growth in the variety of moving-image media, and their penetration into entertainment, art, science and public discourse, the study of film and related media must encompass a variety of theoretical approaches and must cultivate a number of specific skills in production and analysis. Production and analysis feed into each other, together providing the necessary tools for understanding why and how the moving image generates meaning in the world. The field of film and media studies thus unites numerous aspects of production, theoretical lenses of analysis and interpretation, and critical understanding of the complex relations between media and larger social and cultural forces.

Students interested in Film and Media Studies will naturally take different paths through the numerous relevant courses offered at Williams. It is however strongly recommended that they seek a balance between production courses (most of which are offered by Art Studio, Computer Science, and Theatre) and theoretical courses (offered by numerous departments in Divisions I and II). This will help students to think critically both about and with moving images, in the same way that they think with and about words.

Currently, students interested in film and media can major in the field only through the Contract Major. Guidance on course selection (with or without the aim of completing the contract major in film and media studies) can be sought from the faculty with whom students take the first couple of film and media courses. In addition, Professor Stephen Tifft has volunteered to serve as an advisor to students interested in this field.
MAJOR—French Language and Literature
The French major seeks to provide training in literary and cultural analysis and linguistic expression through the study of selected texts from the French-speaking world. Emphasis is placed on the changes in form and subject matter from the early modern period to the contemporary era.

The major consists of nine courses. One of these courses must be the 400-level senior seminar during the student’s final year at the College.

Students entering the major program at the 200-level may, with the permission of the Department, choose as part of their major program, one course in Art History, History, Philosophy, Comparative Literature or other subjects that relate to and broaden their study of French. Students entering the major program at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program.

Working with the major advisor, the student will formulate a curricular plan that will ensure balance and coherence in courses taken. Such balance and coherence will be based on the above areas of literary and cultural investigation. Prospective majors should discuss their program with the major advisor by the end of their sophomore year. This is especially imperative for students who are planning to spend a part or all of their junior year in France.

Inasmuch as all courses in French assume the active participation of each student in discussions conducted in the foreign language, regular attendance at class meetings is expected.

MAJOR—French Studies
The major in French Studies is an interdisciplinary program that provides students with the opportunity to acquire skills and knowledge embracing the cultural, historical, social, and political heritage of France and the Francophone world. The program allows for an individualized course of study involving work in several departments and the opportunity to study abroad.

Students electing the French Studies major should register with the French Studies faculty advisor during their sophomore year. At that time, they should submit a feasibility plan that articulates their projected program.

The French Studies major consists of ten courses satisfying the following requirements:

- at least five RLFR courses in French language, literature, film, or culture;
- the RLFR senior seminar during the student’s final year at the College;

Electives: The remaining courses needed to complete the major must be drawn from at least three different departments and relate primarily to an aspect of the cultures, histories, societies, and politics of France and the Francophone world. These courses will be selected in consultation with members of the Department of Romance Languages. Appropriate electives might include:

- AFR 360 Political Thought Frantz Fanon
- ARTH 254 Manet to Matisse
- HIST 390 Haitian and French Revolutions
- RLFR 101-450 All courses in French and Francophone language, literature, film, and culture

THE DEGREE WITH HONORS IN FRENCH
Students majoring in French may apply to be admitted to the Honors Program in French upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader). This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether they can proceed with the thesis, and
if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent reading, researching (in relevant archives or with field work), and compiling a more detailed bibliography.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493-W31-494). The thesis will be written in French and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in French. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

THE CERTIFICATE IN FRENCH

The Certificate in French Language and Cultures consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher.

For students with no prior study of French, the course sequence will consist of RLFR 101-102, RLFR 103, RLFR 104, and three additional courses, with at least one of these at the 200-level or higher taken at Williams. For students starting the sequence at RLFR 103 or higher, six additional courses must be taken, including at least three French courses at the 200-level or higher. For these students starting at French 103 or higher, two electives may be taken in other departments: one elective should be in French or Francophone culture (art, literature, theatre, music) and the other in French or Francophone civilization (history, political science, philosophy).

PLACEMENT

A placement test in French is administered at Williams at the opening of the fall semester. Incoming first-year students who register for any French course above the 101 level must take this test, regardless of their previous preparation.

STUDY ABROAD

We encourage all students of French to complement their courses at Williams with the life-changing experience of studying abroad in a Francophone country. In particular, French majors and certificate students are strongly advised to complete part of the requirements for the major or certificate by studying abroad, for either a semester or a year. Most study abroad programs require applicants to have completed a fifth-semester French course in college (French 105) or higher before they go abroad. Credit for up to a total of 4 courses towards the major or certificate can be granted for either a semester or a full year abroad, at the discretion of the Romance Languages Department. Students who are planning to get credit for their study abroad courses should meet with a French faculty member in advance, to review the courses they intend to take abroad. Normally, only courses that focus on French language or Francophone literature, history, politics, art, and culture may be counted towards the major or certificate. The final assignment of course credit will be authorized in consultation with the student’s French advisor, once the student has returned to Williams. Such credits can only be determined by review of course format, course materials, and evidence of satisfactory academic performance; students should thus provide not only their study abroad transcript, but retain course materials (including syllabi, papers, exams, and other projects) for potential review back at Williams. While students can gain credit for 100-, 200-, and 300-level courses during their time abroad, the 400-level senior seminar must be taken during the senior year at Williams. Early planning is essential: Students interested in studying abroad are strongly urged to attend the yearly Francophone Study Away Information Session (held each October) during their first year or sophomore year. Students will receive credit for only those study abroad programs recommended and approved by the Dean of Study Away and the Romance Languages Department. Williams has long-term affiliations with the following programs: Hamilton College (Paris), Sweet Briar College (Paris), CUPA (Paris), Middlebury College (Paris), Wellesley College (Aix-en-Provence), Boston University (Grenoble), and both SIT and CIEE (in Morocco, Senegal, and Madagascar). For more on all approved study-abroad programs, see the webpages for the French program (french.williams.edu) and Study Away (study-away.williams.edu/programs). Finally, the Department does not administer proficiency exams (for study abroad, fellowships, or job applications) to students who have not completed a French course at Williams; and most study abroad programs will not accept students who have not taken any college courses in French (at Williams) prior to their application. Students should thus plan well ahead (as early as their first year and sophomore year) to take appropriate courses at Williams, before applying for and taking part in study abroad programs in the Francophone world.
This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, and active engagement with music, video, and film, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. Conducted in French.

Requirements/Evaluation: Active class participation, workbook exercises and compositions, chapter tests, midterm, and final exam.

Prerequisites: None. For students who’ve never formally studied French. Students who’ve previously studied French (in any formal course, at any level) MUST take the French Placement Test in the summer or during First Days. For more info: https://french.williams.edu

Enrollment Limit: 18

Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to first-year and second-year students and those with compelling justification for admission.

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Unit Notes: RLFR 101-102 is a year-long course. Credit is granted only if both semesters (RLFR 101 and 102) are taken. RLFR 101-102 students must also take the French Winter Study Course. This commitment to a year-long immersion in French is designed to help students become fully conversant in French by the end of the academic year.

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: Through its focus on French and Francophone cultures around the world, this course enables students to gain both linguistic and cultural proficiency, and to engage with the great diversity of colonial and post-colonial cultures, histories, and identities in France and Belgium, Québec and Martinique, Sénégal and Morocco.

Fall 2024

SEM Section: 01 M-F 10:00 am - 10:50 am Brian Martin

RLFR 102 (S) Introduction to French Language and Francophone Cultures

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, video-observations, and film-viewing, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. Conducted in French.

Class Format: This class meets 5 times a week from M-F. Students are required to attend class from Monday to Friday.

Requirements/Evaluation: participation, daily homework including weekly short writing assignments, oral and written mid-semester and final exams

Prerequisites: RLFR 101, or by Placement Test, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Preference will go to first- and second-year students and those with compelling justification for admission. Statement of interest solicited if overenrolled.

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2025

LEC Section: 01 M-F 10:00 am - 10:50 am Sophie F. Saint-Just

RLFR 103 (F) Intermediate Studies in French Language and Francophone Cultures

As a continuation of French 101-102, this dynamic first-semester intermediate course is designed to help you improve your French, while at the same
time learning more about French and Francophone cultures, politics, literature, and film. Through the active study and daily practice of listening, speaking, reading, and writing in French, you will continue developing your communication skills and learn to express your opinions and ideas; improve your command of spoken and written French through a revision of important grammatical structures; strengthen your reading and writing skills in order to prepare you for further study of literary texts; and develop an increased vocabulary and cultural appreciation of French-speaking cultures around the world.

**Class Format:** This class is scheduled to meet 5 times a week. Students will meet with the instructor 3 times a week, with the French TA once a week, and will do guided group work once a week.

**Requirements/Evaluation:** Class participation, Homework, Regular tests, Short Writing Assignments and Final Exam.

**Prerequisites:** RLFR 101-102, or by Placement Test, or Permission of Instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** All are welcome, but if over-enrolled, preference will be given to first-year and second-year students and those with compelling justification for admission.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

**RLFR 104 (S) Intermediate French II: Advanced Intermediate Studies in French**

As a continuation of French 103, this course will help students gain greater fluency in French, through an exploration of French and Francophone literature, film, media, politics, and culture. With a focus on listening, speaking, reading, and writing, students will review advanced grammar expand their vocabulary, gain greater confidence, and both discuss and debate central questions in the social, political, and cultural landscape of French-speaking communities in Europe, Africa, and the Caribbean.

**Requirements/Evaluation:** Participation, Homework, Writing Assignments, Quizzes, Final Project.

**Prerequisites:** RLFR 103, or by Placement Test, or Permission of Instructor.

**Enrollment Limit:** 18

**Enrollment Preferences:** Enrollment preference for students who completed RLFR 103 in Fall 2024, or those who have placed into RLFR 104 on the French Placement Test.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**RLFR 105 (F) Advanced French: Advanced Studies in French Language and Francophone Culture (DPE) (WS)**

In this French course, we will read and examine literary texts from the twelfth to the 19th centuries, and films from the twentieth and twenty-first centuries. In order to analyze them, we will briefly situate them in their social and historical contexts. These works will help us better understand contemporary France and explore France's colonial past. We will also learn how to write two short research paper in French in the form of an explication de texte. While the themes, authors, time periods will vary, our approach will remain the same. Three themes, love, fear, and France's colonial past, will serve as the course's organizing principles. A small section of the course will be devoted to grammar revisions in order to continue to improve our reading and language skills. Throughout the semester we will develop our writing skills in French. Conducted in French

**Requirements/Evaluation:** class participation, online grammar exercises, 2 four-page papers, 1 class introduction, 2 low-stakes one-page response papers.
Prerequisites: RLFR 104, placement exam, or by permission of instructor

Enrollment Limit: 15

Enrollment Preferences: All are welcome, but if overenrolled, preference will be given to first- and second-year students and French major and certificate students. If necessary, a statement of interest will be solicited.

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: In this course students will practice writing two short structured papers in French where there will present their interpretation of literary or visual text. Students will write two response papers.

Difference, Power, and Equity Notes: In this course student will examine visual and literary texts that reframe difference, power and equity in relation to race, class, gender, ethnicity, sexuality, and religion.

Fall 2024

RLFR 106 (S) Advanced French: Danger and Desire in French Film and Fiction (DPE)

Cross-listings: COMP 107

Primary Cross-listing
This is an advanced course in French language designed to help you improve your speaking, comprehension, reading, and writing, through the dynamic study of short literary texts and films focusing on danger and desire in nineteenth-, twentieth-, and twenty-first-century France and the Francophone World. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French and Francophone fiction, film, and cultures. This is an ideal course to prepare for study abroad or for more advanced coursework in French and Francophone literature and cinema. As a focus for improving your French, we will examine a broad range of texts and films on danger and desire in France, Québec, and Algeria from 1820 to 2025, with an emphasis on passion and ambition, infatuation and seduction, betrayal and vengeance, courage and cruelty, warfare and resistance. Works to include nineteenth-century texts by Chateaubriand, Duras, Balzac, Mérimée, Flaubert, Maupassant, Zola; twentieth-century texts by Colette, Camus, Sartre, Beauvoir, Duras, Ernaux, Guibert, Quint, Lindon, Vilrouge; and twenty-first-century films by Caron, Ozon, Ducastel, Martineau, Dercourt, and Becker. Conducted in French.

Requirements/Evaluation: Active class participation, grammar exercises, midterm exam, and two papers.

Prerequisites: Exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor.

Enrollment Limit: 16

Enrollment Preferences: All are welcome, but if over-enrolled, preference will be given to French Majors and French Certificate students.

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 107(D1) RLFR 106(D1)

Difference, Power, and Equity Notes: This course centers on a critical examination of difference, power, and equity in French film and fiction. The content examines the effects of class, ethnicity, gender, and sexuality on social inequalities among rich and poor, soldiers and civilians, nations and colonies, men and women. The course employs critical tools to teach students how to articulate and interrogate social injustice, through reading, viewing, discussion, writing, and revision.

Spring 2025
SEM Section: 01 TR 9:55 am - 11:10 am Brian Martin

RLFR 107 (S) Advanced French: Formation and Transformation (DPE)
This advanced course is designed to help you refine your French speaking, comprehension, and writing skills in preparation for studying abroad or for more advanced French coursework. We will explore the themes of *formation* (the French term that means at once education and training) and personal transformation, through fictional and autobiographical texts and films. How do individuals find their place in societies and both define and redefine their own identities? Is it possible to reflect critically on one's own *formation*, or is it easier to do so through works of fiction? We will also reflect on our own educational experiences as we read works by authors such as Marguerite Duras, Maryse Condé, Annie Ernaux, and Pierre Bourdieu, and watch both recent and classic films from 1950s France to 2020s Québec.

**Requirements/Evaluation:** One close-reading presentation and essay, one discussion-leading presentation, two analytical essays, final project

**Prerequisites:** Successful performance in RLFR 105 or 106, or by placement test, or permission of the instructor.

**Enrollment Limit:** 20

**Enrollment Preferences:** Students from all majors welcome, but if over-enrolled, preference will be given to French majors and certificate students.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**Difference, Power, and Equity Notes:** This course explores questions of difference, power, and equity through a critical analysis of educational systems in France and the Francophone World. Although education is assumed to create equity (in both France and in North America), the content of this course will help students nuance this view and articulate how different social identities are often excluded from the power and opportunity that education seems to promise.

**Not offered current academic year**

**RLFR 206 (S) The Outsider in French & Francophone Film Adaptations of Literary Texts (DPE)**

**Cross-listings:** COMP 209

**Primary Cross-listing**

In this course students will examine the figure of the outsider (queer, black, woman, intruder, loner) in several French and Francophone literary texts and their film adaptations and will explore questions such as: how are such outsiders translated onto the screen? To what extent does outsider status help maintain, challenge, or reveal hegemonic discourse? In what ways do non-Western and Western filmmakers (re)cast power and privilege through the figure of the outsider in their film adaptations (of Western canonical texts)? Students will read original French and Francophone literary texts and apply theories of film adaptation to their analyses.

**Requirements/Evaluation:** Three response papers, one short essay on film adaption, one video essay with a student partner

**Prerequisites:** Students should have taken RLFR 105 or above, or placement test, or by permission of instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** Comparative Literature majors, Africana Studies concentrators, French majors and certificates

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

RLFR 206(D1) COMP 209(D1)

**Difference, Power, and Equity Notes:** This course fulfills the DPE requirement because it focuses via the figure of the outsider on power dynamics (based on sexual identity race, class, gender) between cultural producers in literary texts and their film adaptations.

**Attributes:** FMST Core Courses

**Spring 2025**

**SEM Section:** 01  TR 11:20 am - 12:35 pm  Sophie F. Saint-Just

**RLFR 213 (F) Francophone North America in the 21st Century: Revendications, réparations et retrouvailles**

This course investigates post-2000 productions from Acadie, Haiti, Louisiana, and Quebec to examine the socio-literary changes and the current phenomenon of "L'Archipel linguistique." Looking at the concept of "Retrouvailles," or the gathering of Francophone regions through literary expression
in a largely Anglophone continent, we will examine how literature depicts current affairs, as well as what it can do to produce change. In addition to novels and films, we will rely on radio shows, news pieces, and tv shows to get a broader picture of the present stakes. All course discussions will be in French. Topics will include socio-political and cultural issues, (neo)colonialism, activism, linguistic insecurity, and race relations as they are addressed in visual art, music, and literature. Some of the texts covered in this course are *Kukum* (2019) by Michel Jean, *L'Enigme du retour* (2009) by Dany Laferrière, *Ô Malheureuse* (2019) by Ashlee Michot, *Suite des sens* (2023) by Jean Arceneaux, *Alma* (2006) by Georgette LeBlanc. Conducted in French.

**Requirements/Evaluation:** Evaluation is based on active in-class engagement, two short written compositions, two short presentations, and a final project.

**Prerequisites:** French 105 or 106, or results of the Williams College French Placement Test, or permission of instructor.

**Enrollment Limit:** 20

**Enrollment Preferences:** Preference given to French majors or French certificate students and Comp Lit majors.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)

*Not offered current academic year*

---

**RLFR 216  (S)  Women Behaving Badly: Deviant Women in Early Modern French Literature**  (DPE)

**Cross-listings:** WGSS 216

**Primary Cross-listing**

Female deviance often implies resisting a dominant and oppressive patriarchal status quo embedded within cultural and historical backgrounds. This course explores female characters in early modern French literature who refuse to conform to established gender roles. Defying social constructs of femininity, through either judicious negotiations or more aggressive and violent behavior, is an important trope in the writings of both male and female authors of the seventeenth and eighteenth centuries. What constitutes deviant behavior, however, depends on social definitions of gender roles, which evolve over time. In this course, we will first examine women's place within the historical and socio-cultural context of the Ancien Régime, which will lead to an examination of female behavior censured during the seventeenth and eighteenth centuries. We will then reflect on how we, as modern readers, perceive such deviancy at it relates to the past. Finally, we will discuss the relevance of studying deviant women in light of current events, such as the #MeToo movement, which has led to a new level of consciousness and empathy for the plight of marginalized groups. Potential readings to include Corneille's *Médée*, Madame de la Fayette's *Princesse de Clèves*, Laclos's *Liaisons dangereuses*, and Isabelle de Charrière's *Lettre à Mistriss Henley*.

**Requirements/Evaluation:** active class participation, one presentation (8-10 minutes), three to four papers (3-5 pages), and a longer final paper

**Prerequisites:** strong performance in RLFR 105; successful performance in RLFR 106; or by French placement exam; or by permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French majors and certificate students; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D1)  (DPE)

*This course is cross-listed and the prefixes carry the following divisional credit:*

WGSS 216(D2) RLFR 216(D1)

**Difference, Power, and Equity Notes:** This course focuses on a critical examination of difference, power, and equity in early modern France. Through the study of deviant women, the course thus challenges students to examine the effects of class, race, ethnicity, gender, and sexuality in narratives on women, misogyny, and criminality.

Spring 2025

**SEM Section:** 01  TR 9:55 am - 11:10 am  Preea Leelah

**RLFR 217  (F)  Fierté, Sororité, Vitalité: Trans and Non-Binary Narratives of Francophone Expression**
Ten years have passed since Time magazine announced to the world with its June 2014 cover story that the "Transgender Tipping Point" was upon us. The cover spoke to a nation confronting transgender equality as "America's Next Civil Rights Frontier." While this "tipping point" is perhaps salient in the United States, trans(gender), non-binary, and genderqueer identities have world histories with their own vocabularies, knowledge systems, and critiques of normativities. As an important branch of feminist, gender, and sexuality studies, transgender studies continue to revolutionize intersectional inquiry and activist initiatives. In this course, students will explore the genealogical roots of Francophone trans literatures, art, and media as they overlap with fields like critical race studies, Indigenous studies, medicine and technology, carceralty, care, sex work, and entertainment. This course provides an introduction trans studies and trans of color critique and focuses particularly on the contemporary period to gives students insight into the ongoing debates that structure the field and its near future. The course will also have a strong focus on genre and medium as students engage with visual art collections (Kehinde Wiley's Tahiti and Namsa Leuba's Illusions), documentary film (Véronique Kanor's Les femmes viennent aussi de Mars), serial web comics (Sophie Labelle's Assignée garçon), podcasts (Lauren Bastide's La Poudre with Paul Preciado), poetry and performance art (Kama La Mackereî's Zom-Fam), short stories (Chantal Spitz's "Joséphine" and Magali Nirina Marson's "Je me déserte..."), and novels (Ananda Devi's Le rire des déesses, Emmanuelle Bayamack-Tam's Arcadie, and Abdellah Taïa's Un pays pour mourir). Conducted in French.

Requirements/Evaluation: Evaluation will be based on active participation and preparation, one presentation, one short essay, one multimedia midterm project, and a final paper.

Prerequisites: French 105 or 106, or results of the College Placement Exam, or permission of instructor.

Enrollment Limit: 20

Enrollment Preferences: French majors and certificate students.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

RLFR 225 (F) Remembering the Great War: The First World War in Literature and Film (DPE)

Cross-listings: COMP 224

Secondary Cross-listing

From 1914 to 1918, the First World War ravaged Europe and slaughtered millions of soldiers and civilians from across the globe. Known as the "war to end (all) war(s)," World War I set the stage for an entire century of military conflict and carnage. New technologies led to unprecedented violence in the trenches, killing and wounding as many as 41 million soldiers and civilians. Beyond the slaughter at the front, the Great War also led to the global influenza pandemic that claimed up to 50 million lives, and the Armenian genocide that presaged the later atrocities of the Holocaust. The war also led to massive political transformation, from the Irish Rebellion and Russian Revolution, to the collapse of the German, Russian, Austro-Hungarian, and Ottoman Empires, and the redrawing of national borders across Europe and the Middle East. Even the end of the war with the Treaty of Versailles lay the groundwork for new animosities that would lead to the Second World War just two decades later. However, the First World War also inspired great social change, from the emergence of the United States as a global leader and the founding of the League of Nations, to growing discontent with colonial rule in Asia and Africa, and greater power for women whose wartime labor influenced the post-war passage of their right to vote in countries across Europe and North America. In our study of the Great War, we will examine texts and films that bear witness to the suffering and courage of soldiers and civilians, and consider the legacy of the war in the twentieth- and twenty-first centuries. Readings to include memoirs and novels by Barbusse, Barker, Brittain, Cocteau, Graves, Hemingway, Jünger, Remarque, Wharton, Woolf; poetry by Apollinaire, Brooke, Mackintosh, McCrae, Owen, Sassoon; films by Attenborough, Boyd, Carion, Chaplin, Jeunet, Ozen, Renoir, Trumbo, Walsh, Weir; and archival materials on the roles of Williams students and faculty during the First World War. Readings and Discussions in English.

Requirements/Evaluation: Active class participation, two shorter papers (4-5 pages), a midterm, and a longer final paper (5-7 pages).

Prerequisites: None.

Enrollment Limit: 16

Enrollment Preferences: All are welcome, but if the course is overenrolled, preference will be given to Comparative Literature majors and French majors and certificate students; if the course is over-enrolled, students will submit a form online.

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
Difference, Power, and Equity Notes: As the course description explains, this course centers on a critical examination of difference, power, and equity during WWI. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequalities among soldiers & civilians, nations & colonies, men & women. The course also employs critical tools to teach students how to articulate and interrogate the social injustices of the Great War, from reading & discussion, to analytical essays & archival investigation.

Not offered current academic year

RLFR 229 Black Outside the U.S.
This course explores multiple ways Black identity evolves, adapts and is experienced differently depending on location. Students analyze Black experience in the U.S., France and Senegal through a range of texts from books and social media to music and film. One key aspect of the course is a study abroad trip to Senegal, which increases cultural awareness through experiential learning. This combination of textual learning with experiential knowledge exemplifies how language, religion, gender, geography, and performance shape one's racial identity. In the first section of the course, students investigate Black experience in the U.S., focusing on such topics as the one-drop rule, racial profiling and where mixed people fit within Black/White tensions. The second section highlights the politics of language in France. Students explore how words like "Black," "noir" and "race" have strong political connotations in France and spur both resistance to and alliance with Black American civil rights history. In the third part of the course, students visit Dakar, Senegal, and analyze Blackness through their own observations and encounters. Their trip insights jumpstart the final focus of the course on Senegal. Students investigate the influence of French colonialism on Black identity in Senegal, which makes the two geographical experiences of Blackness very different but still forever linked.

Class Format: seminar, the course includes a required spring break trip to Dakar, Senegal, which is no additional cost to students
Requirements/Evaluation: evaluation will be based on class participation, short weekly reading responses, two 4-5 page papers, a presentation based on the spring break trip, and a final presentation including a short 2-page report
Prerequisites: none
Enrollment Limit: 8
Enrollment Preferences: students who have taken other AFR courses, Francophone speakers and students
Expected Class Size: 8
Grading:
Distributions: (D2)

RLFR 232 (S) Liberté, Egalité, Fraternité ? Race, Gender, and Political Power in Eighteenth-Century France (DPE)
Cross-listings: COMP 219
Primary Cross-listing
The French Revolution of 1789 was, to a large extent, inspired by Enlightenment thinkers such as Voltaire, Rousseau, and Diderot who promoted ideas on individual liberty, scientific progress, religious freedom, and secularism. The Revolution brought with it promises of a society freed from the abuses of an absolute monarchy. Yet as feminist thinker Olympe de Gouges would note, when France redefined its notion of citizenship after 1789, it did not include women and people of color. This course examines Enlightenment ideas that led to the French Revolution, while analyzing how those ideas failed to bring true equality. Voltaire, Buffon, and Montesquieu all advocated for the abolition of slavery, but they also held racist and sexist views, justified by pseudoscientific discourse. By further juxtaposing these thinkers with feminist and abolitionist authors such as Olympe de Gouges and Claire de Duras, we will examine how eighteenth-century female authors advocated for the rights of women. Finally, we will analyze artworks such as Marie-Guillelmine Benoist's Portrait d'une nègresse (1800) and discuss how France is using such works today to reckon with its history of discrimination.
Requirements/Evaluation: active class participation, one presentation (8-10 minutes), three to four papers (3-5 pages), and a longer final paper
Prerequisites: excellent performance in RLFR 105; successful performance in RLFR 106; other RLFR 200-level courses; or by French placement exam; or by permission of instructor
Enrollment Limit: 20
Enrollment Preferences: French majors and certificate students; Comparative Literature majors; and those with compelling justification for admission
Expected Class Size: 20
This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 232(D1) COMP 219(D1)

**Difference, Power, and Equity Notes:** In its focus on Race, Gender, and Political Power, this course centers on a critical examination of difference, power, and equity in eighteenth-century France. Through the study of enlightenment and feminist thinkers and leaders, the course asks students to analyze the social, political, and discursive effects of class, race, ethnicity, gender, and sexuality in narratives on revolution, and to re-examine both past and present definitions of "liberty, equality, fraternity."

*Not offered current academic year*

**RLFR 234  (S)  Francophone Oceania: The Other Side of the Postcard**

Manava i Te Ao Ma'ohi! Tongan-Fijian author Epeli Hau'ofa writes: "Centuries before Europeans entered the Pacific, in the days when boundaries were not imaginary lines in the ocean but points of entry that were constantly negotiated and even contested, the sea was open to anyone who could navigate a way through." Of critical importance to Oceanian communities and scholarship today is the project of remembering and re-membering the stories, knowledges, travel routes, and more-than-human ecologies that have crisscrossed the vast aqueous landscapes of this "other" side of the globe. This course is a comprehensive survey of the literature, modern history, and aesthetics that inform the field of contemporary Francophone Oceanian Studies. Major concepts in Indigenous Oceanian philosophy and genealogies of thought (from Ma'ohi, Kanak, and Ni-Vanuatu communities in particular), European imperialism and racial politics, gender and sexuality, maritime knowledges, the French nuclear agenda and climate fiction will be studied. Students will use multimedia formats and storytelling techniques to cross-examine narrative development, philosophy, and Oceanian history from a comparative perspective. Texts may include: Déwé Gorodé's *Sous les cendres des conques* (1985), Chantal T. Spitz's *L’île des rêves écrasés* (2002), Ari’irau’s *Matamimi ou la vie nous attend* (2006), Nicholas Kurtovitch’s *Dans le ciel splendide* (2015), Titaua Peu's *Pina* (2016), and Titaua Porcher's *Hina, Maui et compagnie* (2018) among others. Conducted in French.

**Requirements/Evaluation:** Evaluation will be based on active participation and preparation, two short presentations, a guided journal, and a final project.

**Prerequisites:** RLFR 105 or 106; or results of the College Placement exam; or permission of Instructor.

**Enrollment Limit:** 20

**Enrollment Preferences:** French majors and certificate holders

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**RLFR 260  (F)  Francophone Graphic Novels  (DPE)**

**Cross-listings:** COMP 260

**Primary Cross-listing**

In this class we will read contemporary graphic novels and *bandes dessinées* from Côte d'Ivoire, Morocco, Guadeloupe, Lebanon, France, and Québec to analyze how they approach subjects such as colonial history, migration and discrimination, gender and sexuality, and representations of disability and the racialized body. We will pay particular attention to the visual form and the critical theory of the graphic novel to further understand why this hybrid genre has become so popular and widespread, and how it is shaping conversations about difference and power in the Francophone world. *Conducted in French.*

**Requirements/Evaluation:** weekly 1-page response papers, midterm 4-5-page paper, presentation and final 7-8-page research paper

**Prerequisites:** RLFR 105, 106, by placement or by permission of instructor

**Enrollment Limit:** 20

**Enrollment Preferences:** French majors and certificate students, Comparative Literature majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D1) (DPE)
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 260(D1) RLFR 260(D1)

Difference, Power, and Equity Notes: The readings in this course focus on French colonial and Francophone postcolonial history, contemporary migration, and structures of discrimination built on race, religion, gender, and ableism in the French-speaking world. We will explore how graphic novels in their hybrid visual/verbal forms propose different ways of shaping the dynamics and the discourse of difference and power.

RLFR 262 (S) Lâche pas la patate: Francophone Culture in Louisiana

The expression "Lâche pas la patate," or "don't drop the potato" is a way of saying "don't ever stop speaking French in Louisiana." This begs the question: why preserve a language? In Louisiana, Francophone activists have been fighting to preserve their unique dialect of French--or what Professor Barry Jean Ancelet calls "the problem language"--for decades. By promoting the education and use of French in the state, what else are they preserving? From historical, thematic, and literary perspectives, this course is designed to provide an answer to such questions through the examination of Francophone Louisiana from its foundation as a French colony to today. In this course, we rely on contemporary publications and media in French to get a broader picture of the current stakes in Francophone Louisiana. Topics will include sociolinguistics, race relations, creolization, activism, and Americanization. Primary sources include rituals, cartoons, films, memes, music, literature, and cuisine. Texts and media (such as films and podcasts) included are Les Aventures de Boudini et ses amis, Tout bec doux, Ô Malheureuse, Film Quest, L'Habitation Saint-Ybars, Bayou zen, Finding Cajun, Mille misères La Veillée, Charrer-Veiller, Feux Follets, Istrouma: Manifeste Houma. Conducted in French.

Requirements/Evaluation: Evaluation is based on active in-class engagement, a mid-term exam, two short presentations, and a final research project.

Prerequisites: French 105 or 106; or results of the College Placement Test, or permission of instructor.

Enrollment Limit: 20

Enrollment Preferences: French majors/certificate students, comp lit majors.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

RLFR 307 (F) Building Francophone Cities: Literature, Art and History (DPE)

Cross-listings: COMP 308

Primary Cross-listing

Through literature, visual art, and urban history, this class will engage with the remarkable histories, presents and imagined futures of five Francophone cities: Casablanca (Morocco), Algiers (Algeria), Kinshasa (Democratic Republic of the Congo), Fort-de-France (Martinique) and Port-au-Prince (Haiti). We will learn about their colonial foundations and postcolonial transformations while paying attention to how these urban spaces and their people and histories are represented and imagined by poetry, novels, and visual art. (Conducted in French)

Requirements/Evaluation: Active participation, weekly 1-page response papers, midterm 5-page paper, final project (oral presentation and 8-page paper).

Prerequisites: RLFR 105 or above, or by permission of instructor

Enrollment Limit: 18

Enrollment Preferences: French majors or certificate students, Comp. Lit. majors

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 307(D1) COMP 308(D1)
Difference, Power, and Equity Notes: This course examines the French colonial history and postcolonial futures of five major Francophone cities and pays particular attention to questions of representation of class, race and gender in the historical, literary and visual record.

Not offered current academic year

RLFR 316 (F) Paris on Fire: Incendiary Voices from the City of Light (DPE)

Cross-listings: WGSS 315 / COMP 314

Primary Cross-listing

During the 1830s, Honoré de Balzac described Paris as a "surprising assemblage of movements, machines, and ideas, a city of one hundred thousand novels, the head of the world," but also characterized the French capital as a "land of contrasts," a "monstrous wonder," a "moral sewer." Similarly, writers from Victor Hugo to Émile Zola have simultaneously celebrated Parisian elegance and condemned the appalling misery of Paris's urban poor. Since 1889, Paris has been fêted as the "City of Light" for its Enlightenment legacy, Eiffel Tower modernity, and luminous energy, captured in countless paintings, photographs, and film. However, Paris is also the site of revolution, resistance, and riots. From revolutionary revolt (1830, 1848, 1871), to wartime resistance (1870, 1914-18, 1940-44), to reformist and race riots (1968 and 2005), Paris has repeatedly sparked with incendiary passion and political protest. As fires raged during the 2005 riots, many heard the echo of Hitler's 1944 question, "Is Paris burning?" and asked: why was Paris burning again at the dawn of the twenty-first century? Following the 2015 terrorist attacks, many wondered yet again what the future would hold for the City of Light. To answer these questions, we will examine the social, political, and literary landscape of Paris during the nineteenth, twentieth, and twenty-first centuries, from urbanization and modernization, to occupation and liberation, to immigration and globalization. Readings to include poetry, short stories, and novels by Hugo, Balzac, Baudelaire, Maupassant, Verne, Zola, Apollinaire, Colette, Duras, Perec, Rochefort, and Charef. Films to include works by Clair, Truffaut, Godard, Minnelli, Clément, Lelouch, Luhrmann, Kassovitz, Besson, and Jeunet. Conducted in French.

Requirements/Evaluation: Active class participation, midterm exam, and two papers.

Prerequisites: Strong performance in RLFR 106, or another RLFR 200-level or 300-level course, or permission of the instructor.

Enrollment Limit: 16

Enrollment Preferences: French Majors and French Certificate students, Comparative Literature Majors.

Expected Class Size: 16

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLFR 316(D1) WGSS 315(D2) COMP 314(D1)

Difference, Power, and Equity Notes: This course examines the operations of difference, power, and equity in French film and fiction, history and politics, art and culture, from 1830 to 2025. In readings, lectures, and discussions, we will look at how class, ethnicity, gender, and sexuality structure the lives and struggles of the working class and urban poor, women and men, migrants and immigrants. Students will learn critical tools to better understand and interrogate social inequity and injustice.

RLFR 318 (F) Twentieth-Century French Novel: From Adversity to Modernity (DPE)

Cross-listings: COMP 318

Primary Cross-listing

In his futurist novel Paris in the Twentieth Century (1863), Jules Verne envisions an era of technological superiority, complete with hydrogen cars and high-speed trains, televisions and skyscrapers, computers and the internet. But in Verne's vision of modernity, technological sophistication gives way to intellectual stagnation and social indifference, in a world where poetry and literature have been abandoned in favor of bureaucratic efficiency, mechanized surveillance, and the merciless pursuit of profit. To contest or confirm this dystopic vision, we will examine a broad range of twentieth-century novels and their focus on adversity and modernity. In a century dominated by the devastation of two World Wars, the atrocities of colonial empire, and massive social and political transformation, the novel both documented and interrogated France's engagement with race and
ethnicity, gender and sexuality, colonialism and immigration. Within this historical context, we will discuss the role of the novel in confronting war and disease, challenging poverty and greed, and exposing urban isolation and cultural alienation in twentieth-century France. Readings to include novels by Colette, Genet, Camus, Duras, Ernaux, Guibert, Begag. Lectures to include discussions of Gide, Proust, Sartre, Beauvoir, Cixous, Foucault, Jelloun, Djébar. Films to include works by Fassbinder, Annaud, Lioret, Ducastel, Martinneau, Téchiné, Charef. Conducted in French.

Requirements/Evaluation: Active class participation, two shorter papers, a midterm, and a longer final paper.
Prerequisites: A 200-level course (at Williams or abroad), or by placement test, or permission of the instructor.
Enrollment Limit: 16
Enrollment Preferences: French majors and certificate students, Comparative Literature majors, and those with compelling justification for admission. Seniors returning from Study Abroad (in France or other Francophone countries) are particularly welcome.
Expected Class Size: 16
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
COMP 318(D1) RLFR 318(D1)
Difference, Power, and Equity Notes: As the course description explains, this course focuses on a critical examination of difference, power, and equity in twentieth-century France. The course also employs critical tools to teach students how to examine the roles of race and ethnicity, gender and sexuality, colonialism and immigration, in the French novel's critical representation of war and disease, poverty and greed, urban isolation and cultural alienation during the twentieth-century.
Not offered current academic year

RLFR 320 (F) Transcending Boundaries: The Creation and Evolution of Creole Cultures (DPE)
Cross-listings: COMP 310 / GBST 306 / AFR 306
Primary Cross-listing
Born out of a history of resistance, Creole cultures transcend racial boundaries. This course provides a comprehensive framework for understanding the creation of Creole nations in various parts of the world. Beginning with an examination of the dark history of slavery and French colonialism, we will reflect upon the cultural transformation that took place when people speaking mutually unintelligible languages were brought together. We will then delve into the study of how deterritorialized peoples created their languages and cultures, distinct from the ones imposed by colonizing forces. As we journey from the past to the present, we will also explore how international events such as a worldwide pandemic, social justice, racism, and police brutality are currently affecting these islands. Potential readings will include prominent authors from different Creole-speaking islands, including Frantz Fanon and Aimé Césaire from Martinique, Maryse Condé from Guadeloupe, Ananda Devi from Mauritius and Jacques Roumain from Haiti. Conducted in French with introductions to different creoles.
Requirements/Evaluation: Active class participation, three papers (of 3-4 pages each), presentation, final research paper (7-8 pages)
Prerequisites: Any RLFR 200-level course or above, or by permission of instructor.
Enrollment Limit: 18
Enrollment Preferences: All are welcome. If overenrolled, preference will be given to French majors and certificate students; Comparative Literature majors; Africana Studies students; Global Studies students; and those with compelling justification for admission
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
COMP 310(D1) RLFR 320(D1) GBST 306(D2) AFR 306(D2)
Difference, Power, and Equity Notes: This course qualifies for a Difference, Power, and Equity requirement because it examines the history of slavery as related to French colonialism in different parts of the world. It also considers international issues of social justice, racism and police brutality.
Not offered current academic year

RLFR 330 (S) Unveiling Herstory: Heroines of the Francophone Enlightenment (DPE)
On May 10, 2022, Paris unveiled the first statue of a black woman, Solitude, an emblematic figure of courage and resilience in the eighteenth-century
fight against slavery in Guadeloupe. Against the backdrop of the contemporary French movement wherein statues of Enlightenment thinkers like Diderot, Rousseau, and Voltaire have been vandalized and sparked intense debates on memory and politics, Solitude’s recognition adds a profound dimension. Once revered as iconoclastic and progressive these male figures have in recent years been scrutinized for perpetuating ideals associated with white male hegemony, challenging conventional notions of freedom and equality. This tutorial invites students to reevaluate the Enlightenment movement, navigating beyond traditional narratives centered around male figures like Voltaire and Rousseau. It explores the transformative era post-French Revolution, shining a spotlight on the exceptional contributions made by women who defied societal norms within the eighteenth-century francophone world. Adopting a global perspective, the course not only examines events in France but also delves into its former colonies, particularly Haiti and Guadeloupe. By scrutinizing literary and ethnographic texts, as well as visual imagery, the course unravels the stories of remarkable women like Charlotte Corday, a key influencer during the Reign of Terror, and Sanité Belair, an active participant in the Haitian Revolution. The overarching goal is to underscore the significant roles and contributions of these women, often marginalized in historical narratives. Moreover, the course addresses the impact of archival gaps, shedding light on how the destruction of judicial archives by the French in their former colonies has shaped the remembrance of figures like Solitude and Belair.

Prerequisites: Any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 10

Enrollment Preferences: All are welcome. If overenrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course examines the history of slavery and French colonialism. It also explores issues of female empowerment, racism, social justice and equity.

RLFR 360  (F) Repairing a Broken World: Intro to North African Contemporary Art  (DPE)

Cross-listings: ARTH 460 / ARTH 560 / ARAB 360 / COMP 361

Primary Cross-listing

How do artists respond to a world in crisis? How does visual art engage violent histories, injured bodies, social injustice and ecological disaster? In this course we will explore the political and ethical concept of repair as it emerges in the work of contemporary North African visual artists. Repair is both a material and symbolic transformational practice of putting together something that is torn or broken. It is never complete, nor does it redeem a history of harm or violence. Rather repair is an invitation: a bringing of people, histories, objects, buildings, feelings and geographies into relation with one another in order to link worlds that have been splintered and separated. It is also a call to imagine other futures. North African contemporary artists have deeply engaged in this type of repair work, attending to colonial history, economies of extraction and environmental damage, race and slavery, housing inequity, gender identity and broken transmission of memory. We will dive into the work of individual artists as well as collectives while reading theoretical texts about broken-world thinking, reparative epistemology, alternative archives, and material reparations.

Class Format: Conducted in French.

Requirements/Evaluation: For undergrads: Active participation, 8 1-page response papers, 5-page mid-term paper, 10-12 page final paper and presentation. For grad students: Active participation, 8 response papers, 5-page mid-term paper, and 20-page final paper and presentation.

Prerequisites: Any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: If over-enrolled, preference will be given to RLFR, ARAB, ARTH and COMP majors, and only 2 spots will be offered to Grad Art students.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
**RLFR 378 (S) Proust's "In Search of Lost Time"**

**Cross-listings:** ENGL 378 / COMP 378

**Secondary Cross-listing**

In this seminar we will study Marcel Proust's novel-sequence *In Search of Lost Time*, widely regarded as one of the most transformative works of 20th-century fiction. The first-person narrative chronicling the life of a fictional figure bearing a close relationship to Proust himself spans several decades from the late 19th to the early 20th century, centering on French high society as it enters the modern world, shaped by historical events such as the Dreyfus Affair and the First World War. Proust's exploration of the consciousness of the protagonist, an aspiring writer, has led readers to see him as a philosopher of aesthetics, of the psyche, of time and memory, and of the nature of desire. His narrative ranges from meditations on such subjects to social satire to absorbing and sometimes soap opera-like plots exploring upward and downward social mobility and a wide array of sexual entanglements, straight and queer. Through his fluent prose, Proust renders the vicissitudes of desire, loss, and joy, of betrayal and emotional intransigence, and tests the power of memory and the imagination to recapture the past. Because of the length of *In Search of Lost Time*, the emphasis of the course will be more on reading (about 7 to 7½ hours per week) and less on writing (four or five 1½-page journal entries and a final paper of 8-10 pages) than the average 300-level course; and approximately one-third of the sequence will be bracketed as optional reading.

**Requirements/Evaluation:**
- Regular class participation, several 2-page journal entries, and a final paper of 8-10 pages
- Prerequisites: a 100-level ENGL course, a score of 5 on the AP English Lit exam, or a score of 6 or 7 on the Higher Level IB English exam
- Enrollment Limit: 22
- Enrollment Preferences: English, French, and Comparative Literature majors
- Grading: yes pass/fail option, yes fifth course option
- Distributions: (D1)

**Not offered current academic year**

**RLFR 412 (S) Senior Seminar: Nineteenth-Century French Novel: Desperate Housewives and Extreme Makeovers**  (DPE)

**Cross-listings:** WGSS 408 / COMP 412

**Primary Cross-listing**

In 1834, Honoré de Balzac wrote that "Paris is a veritable ocean. Sound it: you will never know its depth." The same can be said of the French nineteenth-century novel and its boundless ability to echo the past and illuminate the present. From the Romanticism of Stendhal and Hugo, and the Realism of Balzac and Flaubert, to the Naturalism of Zola and Maupassant, the novel became a forum for examining illicit sexuality, institutional misogyny, social injustice, criminal passions, revolutionary struggles, and Parisian pleasures in nineteenth-century France. Characters such as the miserable housewife Emma Bovary, the reluctant revolutionary Jean Valjean, the social climber Julien Sorel, the ambitious undergraduate Eugène de Rastignac, and the domestically abused Gervaise Macquart became synonymous with France's turbulent social and political landscape from the 1830s to the 1880s. As recent film adaptations make clear, these desperate housewives and extreme makeovers continue to haunt our twenty-first century present. Reinterpreted by such actors as Gérard Depardieu, Isabelle Huppert, Uma Thurman, Claire Danes, and Jennifer Aniston, the nineteenth-century novel continues to sound out the scandalous and sensational depths of our own century. Readings to include novels by Balzac, Stendhal, Hugo, Flaubert, Maupassant, Zola. Films to include adaptations by Clément, Berri, August, Arteta, Lelouch, Chabrol. Conducted in French.

**Requirements/Evaluation:**
- Active class participation, midterm exam, and two papers.
- Prerequisites: A 200-level or 300-level RLFR course at Williams, or Advanced coursework during Study Abroad in France or the Francophone World,
or permission of the instructor.

Enrollment Limit: 16

Enrollment Preferences: French Majors and French Certificate students, Comparative Literature Majors, Women's, Gender, & Sexuality Studies Majors.

Expected Class Size: 16
Grading: no pass/fail option, no fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
WGSS 408(D2) RLFR 412(D1) COMP 412(D1)

Difference, Power, and Equity Notes: This course analyzes difference, power, and equity through its examination of gender diversity, institutional misogyny, urban criminality, human sexuality, social injustice, and revolutionary struggle in nineteenth-century France. In class discussions and critical essays on 1830s-1880s France, students will examine and articulate the inequities and injustices between women and men, the privileged and oppressed, the wealthy and working class, and both the rural and urban poor.

SEM Section: 01    TR 11:20 am - 12:35 pm    Brian Martin

RLFR 414  (S)  Senior Seminar: Coming of Age: French and Francophone Childhood and Adolescent Film  (DPE)
Cross-listings: COMP 414
Primary Cross-listing

Like the bildungsroman in literature, the coming of age story is a genre in itself in cinema. In this senior seminar, we will watch, discuss, and analyze French and Francophone childhood and adolescent narrative films whose protagonists bring into focus larger issues such as racial discrimination, class, gender, sexual identity, social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking. We will watch seminal films by Euzhan Palcy, the Dardennes brothers, Céline Sciamma, Férid Boughédir, François Truffaut, Faiza Ambah, and Raoul Peck.

Requirements/Evaluation: three three-page response papers; thesis statement, methodology, and works cited list on one page; 2 low-stakes presentations and one script of a video essay or academic journal "special issue" essay
Prerequisites: 200-level RLFR courses
Enrollment Limit: 19
Enrollment Preferences: French and Comparative Literature majors and certificate students
Expected Class Size: 10
Grading: yes pass/fail option, no fifth course option
Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
RLFR 414(D1) COMP 414(D1)

Difference, Power, and Equity Notes: This course qualifies for a Difference, Power, and Equity requirement because the films we focus on racial inequality, class, gender, sexual identity, post slavery society in the Caribbean, lack of social mobility, repression from the state, regime change, delinquency, justice, bereavement, and human trafficking.
Not offered current academic year

RLFR 415  (S)  Breaking the Silence: Women Voices, Empowerment and Equality in the Francophone World  (DPE)
Cross-listings: WGSS 415 / COMP 415
Primary Cross-listing

How have Francophone women challenged the historical and current effects of colonialism and gendered racism in France and the Francophone world? How have Francophone women writers challenged the status quo of patriarchy and advocated for change? Beginning with political activist Olympe de Gouges, who published Le droit de la femme et de la citoyenne (1791) challenging gender inequality in France, we will then examine Claire
de Duras' portrayal of the intersection between race and gender, Simone de Beauvoir's challenge to traditional femininity and gender roles, and Ananda Devi's intimate portrayal of violence against women in post-colonial societies. Throughout the course, we will use a feminist and intersectional lens to analyze how Francophone women writers have broken the silence then and now.

Requirements/Evaluation: Three 3-4-page response papers, a final 10-page research paper, presentation and active participation.

Prerequisites: Any 200-level RLFR course, or by permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Senior French majors and students completing the certificate in French, but open to advanced students of French; Comparative Literature majors; Women's, Gender and Sexuality Studies majors; and those with compelling justification for admission.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 415(D2) COMP 415(D1) RLFR 415(D1)

Difference, Power, and Equity Notes: In its focus on Race, Gender, and Political Power, this course centers on a critical examination of difference, power, and equity. This course uses a feminist and intersectional lens to analyze how French and Francophone women writers have challenged the historical and current effects of colonialism and gendered racism.

RLFR 13 (W) Creative Portraiture in the Darkroom

In this course, we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use the view camera (the large format camera used during the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, sensitive media, and negative, and use them as tools to make creative portraits in the darkroom. By the end of the course, students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. This class requires an average of 10 weekly lab or studio hours outside of regular classes.

Requirements/Evaluation: Paper(s) or report(s); Creative project(s)

Prerequisites: Knowledge of black and white analog photography is preferred but not required.

Enrollment Limit: 10

Enrollment Preferences: Art majors, then random

Expected Class Size: NA

Grading: pass/fail only

Unit Notes: Daniel Goudrouffe is a professional photographer. Employing a documentarian approach to depict the Caribbean, Goudrouffe expresses a collective awareness of the impact of enslavement and colonialism on everyday life. His work constitutes a rare cont

MAJOR

The Geosciences major offers an understanding of the evolution of our planet and its interacting global systems. In this era of global change, geoscience provides the tools that can help us learn to live sustainably with our environment, and appreciate our place within the vastness of Earth history. Forces within the Earth create mountain ranges and ocean basins and drive the movements of continents. Wind, water and ice shape the surface of the Earth, making and changing the landscapes around us. Sedimentary rocks and the fossils within them teach us how life and climate have evolved over the vastness of time.

Geosciences graduates have a wide range of career options, both with and without graduate training. The many choices include environmental consulting, hazard assessment, hydrology, energy industries, outdoor education, working for geoscience and environment related government agencies and nonprofits, and research and teaching in universities, colleges, and secondary schools. Many students choose to double-major in fields as diverse as Art, Economics, History, Physics, Mathematics, English, and Philosophy, and often find jobs where they can apply the synergies of their Geosciences double major. No matter what field they enter, all our Geosciences graduates pursue their lives and careers with a deeper appreciation for the natural world around them.

The major is designed to provide a solid grounding in the geosciences while being adaptable enough to accommodate diverse paths driven by student interests. There are no required courses, but students work through the menu below, which allows a lot of scheduling flexibility.

If you have questions about the major, or how the different requirements apply to you, please contact the Geosciences Chair.

Geosciences major requirements:

The Geosciences major requires a minimum of nine courses, distributed by course level and topic group; each course can fulfill both a course level and topic group requirement. To complete the minimum nine courses, students can add electives at any level, as long as GEOS is the primary course prefix, and the total number of 100 level courses does not exceed two. In addition, students may count either GEOS 104 or GEOS 110 towards the major, but not both.

Course Level Requirements:

- At least one and at most two 100-level courses:
  
  GEOS 100 Introduction to Weather and Climate
  GEOS 101 Co-Evolution of Earth and Life
  GEOS 102 An Unfinished Planet
  GEOS 103 Global Warming and Environmental Change
  GEOS 104 Oceanography
  GEOS 107 Astrobiology
GEOS 109 Geologic Hazards
GEOS 110 Oceans and Society

At least two 200-level courses selected from this group:

GEOS 201 Field Methods and Structural Geology
GEOS 207 The Geoscience of Epidemiology and Public Health
GEOS 208 The Modern Carbon Cycle: the Story from Stable Isotopes
GEOS 210 Oceanographic Processes (Williams Mystic course)
GEOS 212 Paleobiology
GEOS 214 Mastering GIS
GEOS 215 Climate Change
GEOS 217 Planets and Moons
GEOS 255 Environmental Observations
GEOS 275 Ocean and Climate Changes

At least two 300-level courses selected from this group:

GEOS 301 Geomorphology
GEOS 302 Sedimentology
GEOS 304 Mineralogy and Petrology
GEOS 309 Modern Climate
GEOS 327 Coastal Processes and Geomorphology

At least one of the following 400-level courses:

GEOS 401 Global Tectonics and the Rise of Mountains
GEOS 405 Geochemistry: Understanding Earth’s Environment
GEOS 409 Volcanology
GEOS 410 The Cryosphere
GEOS 411 Geobiology
GEOS 414 Reading Deep Time

Elective courses at all levels

Geosciences majors can select from any of the previous courses in addition to the following elective courses to bring the total to number of Geosciences courses to nine:

GEOS 111T Radical Science- How Geology Changed the Way We See the World
GEOS 211T Rates and Dates: Calibrating the Rock Record
GEOS 220T Evolution of and on Volcanic Islands
GEOS 221T Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics
GEOS 227T Climate Data Analysis
GEOS 250T Climate, Tectonics, and Erosion
GEOS 280T Carbon Dioxide Uptake and Our Climate Future
GEOS 312T Mass Extinctions: Patterns and Processes

Disciplinary Groupings

Students must take one and preferably two courses from each of the following three groups:

Climate and Oceans:

GEOS 208 The Modern Carbon Cycle: The Story from Stable Isotopes
GEOS 210 Oceanographic Processes (only offered at Williams-Mystic)
GEOS 215 Climate Changes
GEOS 221T Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics
GEOS 255 Environmental Observation
GEOS 227T Climate Data Analysis
GEOS 275 Ocean and Climate Changes
GEOS 280T Carbon Dioxide Uptake and Our Climate Future
GEOS 309 Modern Climate
GEOS 405 Geochemistry: Understanding Earth’s Environment
GEOS 410 The Cryosphere

Sediments and Life:
GEOS 207 The Geoscience of Epidemiology and Public Health
GEOS 212 Paleobiology
GEOS 301 Geomorphology
GEOS 302 Sedimentology
GEOS 308 Life on Mars?
GEOS 312T Mass Extinctions: Patterns and Processes
GEOS 404/GEOS 327 Coastal Processes and Geomorphology
GEOS 411 Geobiology
GEOS 414 Reading Deep Time

Solid Earth:
GEOS 201 Field Methods and Structural Geology
GEOS 211T Rates and Dates: Calibrating the Rock Record
GEOS 205 Economic Geology and Earth Resources
GEOS 217 Planets and Moons
GEOS 220T Evolution of and on Volcanic Islands
GEOS 250T Climate, Tectonics, and Erosion
GEOS 304 Mineralogy and Petrology
GEOS 317 Current Topics in Planetary Geology
GEOS 401 Global Tectonics and the Rise of Mountains
GEOS 409 Volcanology

PREPARATION FOR GRADUATE SCHOOL
Students planning to go to graduate school should be aware that most graduate programs will expect applicants to have a background in math/stats as well as a year or so of study in related sciences, in addition to the requirements of the Geosciences major. The selection of outside courses will depend on the field in which a student wants to specialize. Graduate programs in solid-earth geosciences commonly expect entering students to have taken courses in chemistry. For those going into environmental geosciences, courses in chemistry, computer science and/or statistics are recommended. For those considering geobiology programs, biology courses are important. For students entering planetary geology, physics is recommended. Students considering graduate work in geosciences should therefore consult with faculty to ensure that they plan wisely.

THE DEGREE WITH HONORS IN GEOSCIENCES
The degree with honors in Geosciences provides students with an opportunity to undertake a year-long independent research project under the supervision of a faculty member, culminating in a thesis that demonstrates outstanding achievement of an original and innovative nature. In addition to the major requirements listed above, those who are candidates for the degree with honors take the following sequence in the Fall, Winter Study, and Spring of their senior year:
GEOS 493-031-494 Senior Research and Thesis

The principal considerations in admitting a student to the honors thesis program are interest and motivation, mastery of fundamental material and skills, and ability to pursue independent study diligently. Interested students should talk to Geosciences faculty about project options at any time, but generally no later than January of the Junior year.

STUDY AWAY
Students planning to study off-campus should meet as early as possible with the Department Chair to plan and to discuss how potential courses
might be used in the major; note that the Chair cannot pre-approve abroad credit. Although many study-away programs do not offer geoscience courses, there are some that dovetail well with Geosciences. Examples include the Williams-Mystic program, the Frontiers Abroad program at Canterbury University in New Zealand, and the program at the University of Otago in New Zealand. Courses offered at Norwegian Technical Universities and at several universities in the United Kingdom have also been accepted. Up to two geoscience courses taken away from Williams can be counted toward the nine-course major. Be sure to meet with a Geosciences faculty advisor or Department Chair to discuss your plans and ideas for off-campus work.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Generally not until after a student returns and can provide course material for review (e.g. Syllabus and/or completed work such as exams, portfolios, lab reports and the like).

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Complete syllabus and course description, including readings, assignments, evaluation criteria.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. A maximum of two courses can be credited toward major requirements.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Students should consult with the chair or other department faculty members to plan ahead and make sure that requirements can be met. In general, only courses with a lab and/or field component may count towards core GEOS requirements, other courses may be counted as GEOS electives.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t.

None to date.

GEOS 100  (S) Introduction to Weather and Climate  (QFR)

Cross-listings: CAOS 100

Primary Cross-listing

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore how fundamental laws of physics determine why air moves and changes, creating the wind, clouds, precipitation, and extreme events that form our weather. Building off of our understanding of the atmosphere, we’ll look at longer time scales to develop an understanding of earth's climate system, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will use weather and climate models to learn how scientists and meteorologists predict future conditions. Labs include benchtop experiments, data analysis projects, and self-scheduled meteorological observations. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: weekly problem sets, lab assignments, midterm exam, and final exam

Prerequisites: none

Enrollment Limit:  60

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size:  60

Grading:     yes pass/fail option,     yes fifth course option
Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 100(D3) CAOS 100(D3)

Quantitative/Formal Reasoning Notes: This course will have regular problem sets which require substantial quantitative reasoning. Labs will require analysis, presentation, and explanation of quantitative data, and exams will require some quantitative problem solving.

Attributes: ENVI Natural World Electives EXPE Experiential Education Courses

Not offered current academic year

GEOS 101 (S) The Co-Evolution of Earth and Life

Cross-listings: ENVI 105

Primary Cross-listing

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will examine the relationship between Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system and learn about the dramatic changes that have occurred throughout the history of our planet. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve and how did this biological event lead to profound changes in the world's oceans and atmospheres? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and spread of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth's dynamic history.

Class Format: one laboratory per week plus one all-day field trip

Requirements/Evaluation: lab assignments, weekly quizzes, and a final independent project

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first year and second year students, Geosciences majors

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option

Distributions: (D3)

GEOS 102 (S) An Unfinished Planet

Earth is an evolving planet. The pace of plate tectonics may be imperceptibly slow but earthquakes and volcanic eruptions caused by shifting plates disrupt civilizations. In a geological time frame, nothing on Earth is permanent: ocean basins open and close, mountains rise and fall, continental masses collide and pull apart. There is a message here for all of us who live, for an infinitesimally brief time, on the moving surface of the globe. This course uses the plate tectonics model— one of the fundamental scientific accomplishments of the 20th century— to interpret the processes and products of a changing Earth. The emphasis will be on mountain systems (on land and beneath the oceans) as expressions of plate interactions. Specific topics include the rocks and structures of modern and ancient mountain belts, the patterns of global seismicity and volcanism, the nature of the Earth’s interior, the changing configurations of continents and ocean basins through time, and, in some detail, the formation of the Appalachian Mountain system and the geological assembly of New England. Readings will be from a physical geology textbook and primary sources. This course is in the Solid Earth group for the Geosciences major.
**Class Format:** lecture three hours per week and lab (two involving field work) two hours per week; one required all-day field trip on the last Monday of the semester to the Connecticut Valley and the highlands of western Massachusetts

**Requirements/Evaluation:** three hour-tests and weekly lab work

**Prerequisites:** none

**Enrollment Limit:** 40

**Enrollment Preferences:** first year and second year students, Geosciences majors

**Expected Class Size:** 40

**Grading:** yes pass/fail option, no fifth course option

**GEOS 103 (F) Global Warming and Environmental Change**

**Cross-listings:** ENVI 103

**Primary Cross-listing**

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and wildfires, the natural processes that shape Earth's surface are tied to temperature and precipitation. People are beginning to feel the impacts, but in different ways depending on where they call home. In this course, we will investigate how climate change is altering landscapes and the natural processes that support them, highlighting all the ways that people are being affected today. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with geography. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as fresh water and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate. We will also visit and engage with Black communities and community leaders across New England who are grappling with the unjust distribution of resources to mitigate climate impacts and who have been disproportionate bearers of environmental risk.

**Requirements/Evaluation:** written reports from laboratories and readings, class participation, a midterm and final exam

**Prerequisites:** none

**Enrollment Limit:** 48

**Enrollment Preferences:** first year and second year students, Geosciences majors and Environmental Studies majors and concentrators

**Expected Class Size:** 48

---

**GEOS 104 (F) Oceanography**

**Cross-listings:** ENVI 104 / CAOS 104

**Primary Cross-listing**

The oceans cover three quarters of Earth's surface, yet oceanography as a modern science is relatively young; the first systematic explorations of the geology, biology, physics and chemistry of the oceans began in the late 19th century. This introduction to ocean science includes the creation and destruction of ocean basins with plate tectonics; the source and transport of seafloor sediments and the archive of Earth history they contain; currents,
tides, and waves; photosynthesis and the transfer of energy and matter in ocean food webs; the composition and origin of seawater, and how its chemistry traces biological, physical and geological processes; oceans and climate change; and human impacts.

Class Format: two 75-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast of New England.

Requirements/Evaluation: lab activities, homework, reading-comprehension quizzes, three tests

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first year and second year students, Geosciences majors, Maritime Studies concentrators

Expected Class Size: 48

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course and GEOS 110 Oceans and Society cannot both be taken for credit.

Distributions: (D3)

GEOS 109 (S) Geologic Hazards

Dramatic geologic events like earthquakes, volcanic eruptions, and tsunamis can inflict devastating tolls on human life, infrastructure, and economies, as the recent earthquakes in Turkey, Syria, and Afghanistan have sadly demonstrated. These events loom large in our imagination because of this same destructive power. Pop culture is full of references to natural disasters. (Think Hollywood movies like Don't Look Up, San Andreas, or The Day After Tomorrow. Even South Park has a volcano.) Most of these portrayals are based on some tiny seed of established scientific idea or fact, but much of the (mis)information they present is inaccurate. This course seeks to set the record straight. We will develop a framework based on fundamental geologic principles to understand why the most potent natural hazards are concentrated at tectonic plate boundaries. Case studies from recent and historical events will be used to investigate both how volcanoes and earthquakes work and how cascading systems failures exacerbate the human impacts of these phenomena. Exploration of these topics will include lectures, hands-on activities, and weekly laboratory exercises. Occasional comparison to disaster movies will be used to separate fact from fiction. The course will culminate in a final creative or written project.

Requirements/Evaluation: weekly lab assignments, 2 midterms, final project

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first and second year students

Expected Class Size: 48

Grading: yes pass/fail option, no fifth course option

Distributions: (D3)

Not offered current academic year

GEOS 110 (F) Oceans and Society

Cross-listings: CAOS 110 / ENVI 109

Primary Cross-listing

Oceans impact society in many ways: they provide much of our protein, they hide untapped mineral wealth, their circulation regulates global climate, they transport and accumulate our plastic garbage, marine storms batter coastal infrastructure, and sea-level rise threatens communities. However, despite the oceans’ importance throughout history—for trade, as a source of food, and because of their unpredictable dangers—we know shockingly
little about them. More than 6000 people have reached the summit of Everest, Earth's highest elevation; but only 22 have visited Challenger Deep, the deepest point below the ocean surface. We have mapped the surfaces of Mars and Venus in far more detail than the topography of Earth's ocean basins. New marine organisms are discovered regularly. And we still don't fully understand the complex details of how ocean and atmosphere work together as the planet's climate engine. In this course, you will examine ocean science themes with direct societal relevance that are also at the forefront of scientific investigation. Topics will be selected based on current events, but are likely to include deep sea mining, meridional overturning, sea level rise, atmospheric rivers, and aquaculture. By taking focused dives into a range of subjects you will learn about the evolution and operation of the ocean as a physical and geological system as well as investigating the intersections between ocean functions, climate change, and human societies. Exercises and discussions will foreground active learning. A field trip to the Atlantic coast will integrate experiential investigation of the intersection between coastal change, extreme weather, and communities. The aim is to have energised interdisciplinary discussions about topics of pressing societal relevance, to understand some of the fundamentals of ocean science, to develop expertise in gathering and distilling information by researching new topics, and thereby to improve critical and analytical thinking.

**Class Format:** Two 75-minute lecture/discussion meetings each week; 2-hour lab every second week; one all-day field trip to the Atlantic coast.

**Requirements/Evaluation:** Evaluation is based on engagement with in-class activities, six graded lab exercises, four short writing/research assignments, and a five-page term paper

**Prerequisites:** none

**Enrollment Limit:** 60

**Enrollment Preferences:** First year and second year students

**Expected Class Size:** 60

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** This course and GEOS 104 Oceanography cannot both be taken for credit.

**Distributions:** (D3)

**GEOS 111 (F) Radical Science- How Geology Changed the Way We See the World**  (WS)

Copernicus shocked Europe when he suggested that the Earth is not the center of the universe. Hutton and other geologists made an equally radical proposal more than two centuries later when they introduced the concept of deep time and argued that the Earth was much older than 6,000 years, as determined by biblical scholars. Several decades later, Darwin and Wallace shook the foundation of western philosophy once more when they proposed that organisms evolved. When geologists reinterpreted landscape features once attributed to the great flood as evidence for past continental glaciation, the concept of extreme climate change through time sprang to life. During the 20th century, the permanence of Earth's geography was challenged by the continental drift hypothesis, which was initially rejected for decades until it reemerged as plate tectonic theory. This tutorial explores how geologic breakthroughs challenged western views of humans as the center of creation living in a world with limited change. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics. This course is in the Solid Earth group for the Geosciences major.

**Requirements/Evaluation:** five 5-page papers and five oral critiques of partner's papers

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** First year students then second year students

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)  (WS)

**Writing Skills Notes:** Students will write five 5-page papers and will receive peer and instructor feedback on how to improve their writing skills and formulate sound arguments.

Not offered current academic year
GEOS 201  (F)  Field Methods and Structural Geology  (WS)

Geologic history is preserved in rocks and it can be deciphered using fundamental principles such as superposition and cross-cutting relationships. Field observations are essential to understanding the rock record, and data and interpretations are encoded in geologic maps. This course introduces students to topographic and geologic maps, best practices for geologic field work, the field identification of common minerals and rocks, geologic contacts, and structures such as folds, and faults. Students will develop skills for presenting field data in papers, figures, and oral presentations. This course is in the Solid Earth group for the Geosciences major.

Class Format: lecture and discussion, three hours per week and laboratory, three hours per week

Requirements/Evaluation: short weekly writing assignments will form the basis for two 10-page papers based on field trips and a final independent project

Prerequisites: Any 100 level geosciences course or permission of instructor.

Enrollment Limit: 16

Enrollment Preferences: Geosciences majors or students with a strong interest in geosciences

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: $15 for field supplies

Distributions: (D3)  (WS)

Writing Skills Notes: There will be two 10-page papers, each based on four field trips. Students will submit short field descriptions and figures with captions after each field trip. The shorter assignments will be incorporated in two papers. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

GEOS 207  (S)  The Geoscience of Epidemiology and Public Health  (DPE)

Cross-listings: ENVI 201

Primary Cross-listing

The Coronavirus pandemic has highlighted the many ways that diseases can be transmitted in the environment. As a society we are becoming aware of the many ways that geological processes and materials and influence human health, in ways both beneficial and dangerous. This course unites geoscience, biomedicine and public health approaches to address a wide range of environmental health problems. These include water-related illnesses (e.g. diarrhea, malaria); minerals and metals, both toxic (e.g. asbestos, arsenic) and essential (e.g. iodine); radioactive poisoning (e.g. radon gas); and the transport of pathogens by water and wind. In many cases, the environmental health problems disproportionately affect marginalised populations, contributing to greater disease and death among poor communities and populations of colour. We will examine the broad array of dynamic connections between human health and the natural world. We will discuss the social justice implications of a range of environmental health problems. And we will examine current research into how coronaviruses, such as the one causing COVID-19, are transported in the environment. This course is in the Sediments and Life group for the Geosciences Major.

Requirements/Evaluation: Evaluation will be based on short weekly writing assignments as well as an individual project and poster presentation.

Prerequisites: No prerequisites

Enrollment Limit: 34

Enrollment Preferences: Preference to first-years, sophomores, and prospective Geosciences majors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 207(D3) ENVI 201(D3)

Difference, Power, and Equity Notes: Through a series of case studies, we will examine ways in which marginalised groups (whether due to poverty,
race, or ethnicity) are disproportionately affected by environmental health issues. Themes of power and equity in terms of decision making, access to knowledge, and funding availability, will be woven into all aspects of the class and will underpin our analysis of the science.

**Cross-listings:** CAOS 210

**Secondary Cross-listing**

Part of the Williams-Mystic Coastal and Ocean Studies Program, this course provides an introduction to physical, geological, chemical, and biological oceanography. Using local field sites as well as places visited on field seminars, we will investigate why the Earth has oceans, why they are salty, how they move and flow, reasons for sea level change on both long and short timescales, and how our oceans interact with the atmosphere to control global climate. We will emphasise societal interactions with the ocean, and will consider coastal processes including land loss. We will apply an environmental justice and anti-racist lens to our discussions. Field work will take place on shores in southern New England, as well as during field seminars on the Atlantic ocean, the West Coast and the Mississippi River Delta. This course is in the Oceans and Climate group for the Geosciences major.

**Class Format:** Flipped classroom will focus on active learning using data-based exercises. Mini-symposia will involve student research and discussion.

**Requirements/Evaluation:** graded lab exercises, mini-symposium participation, and a research project

**Prerequisites:** none

**Enrollment Limit:** 24

**Enrollment Preferences:** none

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** This course is taught at our Mystic Seaport campus. Students must be enrolled in the Williams-Mystic Coastal and Ocean Studies Program.

**GEOS 211 (F) Rates and Dates: Calibrating the Rock Record (WS)**

Late in the eighteenth century, the Scottish naturalist, James Hutton, argued that Earth had "no vestige of a beginning, no prospect of an end" challenging the widely held biblical view that Earth was a mere 6,000 years old. Yet it was not until the discovery of radioactive decay that geologists were able to accurately date rocks and assign absolute ages to the geologic time scale, which had been developed using fossils and relative dating of rocks. Before radiometric dating, there were numerous attempts to estimate the age of Earth using the rates of natural phenomena, but these early approaches were plagued by faulty assumptions about geologic processes. We still endeavor to estimate the rate of a wide variety of geologic processes, and many are critical to society, such as climate change, sea-level rise, plate motions, and mass extinctions. In this tutorial, we explore the methods of radiometric dating that allow us to determine the age of igneous rocks that cooled from a magma, estimate when deeply buried metamorphic rocks cooled below certain temperatures, and determine the age of organic materials from their radiocarbon signatures. We then examine methods used to estimate the rates of geologic processes with particular emphasis on diffusion -- the movement of matter or energy in
response to a gradient in concentration, temperature, or potential energy -- and the explicit and implicit assumptions that are critical to rate calculations. Topics include the basic isotope systematics of geochronology (U-Pb, K-Ar, and 14C ages) and thermochronology (U-Th/He or 40Ar/39Ar), as well as the rates of processes such as plate motion, sea-level rise or fall, glacial advance or retreat, magma storage and ascent, and/or mineral growth rates. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics. This course is in the Solid Earth group for the Geosciences major.

Requirements/Evaluation: Four 5-page papers and four oral critiques of partner's papers, plus 2 problem sets

Prerequisites: Any 100-level Geosciences course

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors or students with a strong interest in Geosciences.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

GEOS 212 (S) Paleobiology

Cross-listings: BIOL 211

Primary Cross-listing

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. We will explore how, why, when, and where fossils form and learn about the major groups of fossilized organisms and how they have changed through time. In addition, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

Class Format: One day field trip to the the Paleozoic of New York State

Requirements/Evaluation: Weekly lab assignments, frequent short quizzes and writing assignments, and a final research project presented in poster form.

Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205

Enrollment Limit: 24

Enrollment Preferences: sophomores, and junior GEOS majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS has opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

**Class Format:** lecture, three hours per week and laboratory, three hours per week

**Requirements/Evaluation:** weekly lab exercises, weekly quizzes, and a research project

**Prerequisites:** at least one course in Geosciences or Environmental Studies

**Enrollment Limit:** 18

**Enrollment Preferences:** Geosciences majors and Environmental Studies majors and concentrators.

---

Paleoclimate is the reconstruction of past climate variability and the forces that drove the climate changes. The Earth's climate system is experiencing unprecedented and catastrophic change because of anthropogenic emission of greenhouse gases and land use change. Paleoclimate allows humans to put modern climate changes into the context of the history of this planet, and shows how and why it is unprecedented and catastrophic. Each climate event we study from Earth's past teaches us lessons on why the climate system responds to anthropogenic perturbations, what climate changes we're committed to in the future, how long-lasting they will be, and what climate consequences we can avoid if we take action and reduce greenhouse gas emissions sooner. In this course, we will discuss the major mechanisms that cause natural climate variability, how climate of the past is reconstructed, and how climate models are used to test mechanisms that drive climate variation. With these tools, you will analyze and interpret data and model simulations from climate events from Earth's history, and apply these findings to anthropogenic climate changes happening now and that are projected to happen in the future. Laboratories and homework will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change. This course is in the Oceans and Climate group for the Geosciences major.

**Class Format:** This class has three scheduled lectures per week, and one lab meeting per week which will consist of field excursions, lab exercises, problem solving and discussion

**Requirements/Evaluation:** lab exercises and homework (25%), three quizzes (50%), and a final project (25%)

**Prerequisites:** 100-level course in GEOS, CHEM, or PHYS or ENVI 102 or permission of instructor

**Enrollment Limit:** 24

**Enrollment Preferences:** Geosciences majors and Environmental Studies majors and concentrators and Maritime Studies concentrators
Expected Class Size: 16
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
GEOS 215(D3) CAOS 215(D3)
Quantitative/Formal Reasoning Notes: Labs and homework include quantitative problem solving, visualization and analysis of quantitative data, and scientific computing with Matlab. No previous programming experience is assumed.

Not offered current academic year

GEOS 234 (S) Introduction to Materials Science (QFR)
Cross-listings: PHYS 234
Secondary Cross-listing
Materials Science is the study of how the microscopic structure of materials—whether steel, carbon fiber, glass, wood, plastic, or mayonnaise—determines their macroscopic mechanical, thermal, electric, and other properties. Topics of this course include classifying materials; material structure; thermodynamics and phase transformations; material properties and testing; how solids bend, flow, and ultimately break; and how to choose the right material for design applications. Materials Science is a highly interdisciplinary field and as a result the course prerequisites are broad but also flexible. Interested students who are unsure about their preparation are strongly encouraged to contact the instructor.
Class Format: lecture (3 hours per week) plus three to four small-group laboratory sessions throughout the semester (to be scheduled with instructor)
Requirements/Evaluation: weekly problem sets, class participation, and midterm and final exams, all of which have a substantial quantitative component
Prerequisites: high school physics and chemistry, preferably at the AP level, and MATH 140 or AP Calculus (BC), and one 200-level PHYS, CHEM, or GEOS course; or permission of instructor
Enrollment Limit: 20
Enrollment Preferences: based on students' scientific background and seniority
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Unit Notes: This course does not count toward the Geosciences major.
Distributions: (D3) (QFR)
This course is cross-listed and the prefixes carry the following divisional credit:
PHYS 234(D3) GEOS 234(D3)
Quantitative/Formal Reasoning Notes: Weekly problem sets and exams all have a substantial quantitative component.

GEOS 250 (F) Climate, Tectonics, and Erosion (WS)
Traditionally tectonics investigated processes operating deep in the crust and mantle, whereas geomorphology focused on surficial processes that shape the landscape. This course explores the complex interactions between tectonic and surficial processes. It has long been recognized that crustal uplift during mountain building creates new landscapes, but we now suspect that variations in erosion rate can fundamentally influence the development of mountains. Climate plays a central role in this feedback loop; the rise of mountains can change climate, and such changes can alter regional erosion rates. This course will examine how geologists use characteristic markers to estimate the amount of surface uplift, methods for determining uplift rate, surface response to faulting and folding, measuring displacement of the crust with GPS and interferometry methods, how mountain building affects erosion and exhumation rates, the limits to relief in mountains, and the interaction between mountains and climate. This course is in the Solid Earth group for the Geosciences major.
**Class Format:** After an initial group meeting, students will meet in pairs for one hour each week with the instructor; each student will orally present a written paper every other week for criticism during the tutorial session

**Requirements/Evaluation:** five 4- to 5-page papers based on journal articles

**Prerequisites:** at least one of the following courses: GEOS 101, 102, 103, 201, 215, 301, 302, 304, or permission of instructor

**Enrollment Limit:** 10

**Enrollment Preferences:** Geosciences majors and students with a strong interest in Geosciences

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3) (WS)

**Writing Skills Notes:** Five 4- to 5-page papers distributed throughout the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes:** GEOS Group C Electives - Solid Earth

**GEOS 255 (F) Environmental Observation**

**Cross-listings:** ENVI 255

**Primary Cross-listing**

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, remote sensing, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information.

We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation:** Weekly labs, four quizzes, and a final project

**Prerequisites:** at least one prior course in GEOS or ENVI

**Enrollment Limit:** 20

**Enrollment Preferences:** sophomores, then GEOS majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D3)

**GEOS 275 (S) Ocean and Climate Changes**

Earth's oceans are a central part of the global climate system, and changes to the oceans throughout Earth's history were often accompanied by
dramatic climate shifts. In this class we will discuss the interconnected nature of oceans and climate, evidence for ocean and climate changes in the geologic past, what is happening to the oceans today, and what may happen in the future due to human-induced climate change. We will use computer models to explore ocean circulation in three dimensions, examine societal case studies to appreciate how people rely on the oceans, and analyze articles from the scientific literature to learn about the origins of foundational oceanographic knowledge and modern advances. Using marine sediment records, we will synthesize paleoclimate data and reconstruct past changes in the ocean and climate system. Through these explorations you will learn about the influence of the oceans on the global carbon system over both short and long timescales, and how changes in ocean circulation have altered Earth's energy balance. Using modern satellite data, we will investigate changes happening in the world's oceans today and assess the mechanisms thought to be responsible. We will visit a dedicated ocean research facility to learn about the tools and techniques employed by oceanographers to answer questions about our changing oceans. And, with the aid of emissions scenarios and probabilistic models, we will explore future scenarios of climate change and evaluate how the oceans will be affected by, and will in turn influence, the changing climate system.

Requirements/Evaluation: 2 lectures per week, one 3 hour lab per week. Students should expect to spend about 7 additional hours per week out of class working on course-related reading/homework/studying/project preparation. Readings, podcasts, and/or videos before most lecture and some lab meetings. Short, check-in quizzes.

Prerequisites: one 100-level GEOS course

Enrollment Limit: 24

Enrollment Preferences: sophomores, and junior Geos majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

GEOS 280 Carbon dioxide uptake and our climate future (WS)

Because of the failure to substantially reduce global greenhouse gas emissions, it is now clear that removal of carbon dioxide already emitted to the atmosphere is necessary to meet the 1.5 degree Celsius maximum warming target to avoid severe and irreversible consequences from continued greenhouse gas emissions. Natural carbon sinks have already taken up two thirds of the excess carbon dioxide from the atmosphere, and these terrestrial and marine systems are being investigated to determine if this uptake can be enhanced by geoengineering: human intervention to offset the impacts of climate change. In addition, technologies are being developed to capture carbon dioxide directly from the atmosphere, though none are yet operating at a large enough scale and low enough cost. In this tutorial, students will study the terrestrial, near-coastal, and deep-ocean carbon cycles, and analyze both the capacity for future natural uptake, the potential augmented uptake that could be achieved by deliberate manipulation of these systems, and the impacts of these carbon cycle perturbations on ecosystems and humans. Students will evaluate the scientific basis behind real startup ventures and carbon credit schemes that capitalize on the exploding interest and investment in carbon uptake technologies. And they will write a research proposal for investigating and/or testing a scientifically compelling carbon uptake strategy. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: evaluation will be based on the critical analysis of readings through discussion, writing and revision

Prerequisites: one GEOS course or ENVI 102

Enrollment Limit: 10

Enrollment Preferences: students with a strong interest in Geosciences, Geosciences majors, Environmental Studies majors and concentrators

Expected Class Size: 10

Grading:

Distributions: (D3) (WS)

Writing Skills Notes: Each student will write five 5-page papers and five 1-page response papers; students will give and receive feedback through peer review and tutorial meeting discussion and will develop their writing and critical analysis skills through revision.

Attributes: GEOS Group A Electives - Climate + Oceans

GEOS 301 Geomorphology

Cross-listings: ENVI 331
Geomorphology is the study of landforms, the processes that shape them, and the rates at which these processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in the evolution of Earth's surface and the ways our activities are changing the planet. We will examine the ways in which climatic, tectonic, and volcanic forces drive landscape evolution over relatively short periods of geologic time, generally thousands to a few millions of years. More recently, the impacts of human activity in reshaping landscapes, determining the movement of water, and changing climate could not be clearer. We will also examine how these impacts are affecting communities, including causes and possible solutions to environmental injustice. We will explore local case studies of geomorphology, such as the impact of ice-age glaciation on landscapes in the northeastern United States and the legacy of deforestation and river damming during the colonial era. We will learn a range of practical skills for describing physical environments and for predicting how they change, including field surveys, GIS analysis, and numerical modelling. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** lecture, three hours per week and laboratory, three hours per week

**Requirements/Evaluation:** weekly lab exercises, a research project, and a midterm and final exam

**Prerequisites:** At least one 100-level and one 200-level GEOS or ENVI course or permission of instructor

**Enrollment Limit:** 18

**Enrollment Preferences:** GEOS and ENVI majors

**Expected Class Size:** 18

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS Group B Electives - Sediments + Life

---

**GEOS 302 (S) Sedimentology** (WS)

Sediments and sedimentary rocks are the book in which Earth's history is recorded, where we read the stories of ancient oceans and continents, and how life evolved. Sand and dirt preserve information about the rocks that were eroded to form them, the fluids and forces that transported them, the ways in which they were deposited, and the ecosystems that they supported. Understanding sediments is also fundamental to society, for many kinds of civil engineering as well as pollution and environmental remediation. We will investigate sediment composition, fluid mechanics, bedforms, and depositional environments, building to an integrated understanding of erosion, deposition, and changes over time. We will also acknowledge and examine the roles that racism and colonialism have played in sedimentologic research. This course is in the Sediments and Life group for the Geosciences major.

**Class Format:** lecture/discussion three hours per week and laboratory three hours per week; field trips: two half-day and one all-day

**Requirements/Evaluation:** lab and field exercises, writing assignments, participation in discussions

**Prerequisites:** At least one course in GEOS Group B (Solid Earth) AND one course in GEOS Group C (Sediments and Life); or permission of instructor

**Enrollment Limit:** 15

**Enrollment Preferences:** Geosciences majors

**Expected Class Size:** 12

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D3) (WS)

**Writing Skills Notes:** Weekly 2-3 page writing assignments will be thoroughly edited for style, grammar, and syntax; each student will compile their
papers as a growing body of work, and each new assignment will be read and edited in the context of previous submissions.

**GEOS 304  (S)  Mineralogy and Petrology**

Minerals are Earth's basic building blocks. They form, deform, and transform in response to environment conditions, and in doing so, they record a wide range of processes in the Earth system. In this course, we will use minerals to understand the geologic record at multiple timescales, from the slow process of continental assembly and break-up to rapid processes such as volcanic eruptions and biogeochemical cycles. Central to this analysis is rock and mineral characterization. Therefore, laboratory and field studies will hone fundamental observational skills of minerals at multiple scales, from atomic scale crystalline structures to macroscopic physical properties in hand sample. Discussion of experimental and natural data (phase relationships, thermodynamics, and major and trace element geochemistry) in conjunction with these petrographic approaches, will create a framework for interpreting the dynamic processes and geologic settings where igneous and metamorphic rocks form. The semester will culminate in a final project that applies both the observation and interpretive skills developed, giving students the chance to collect data and "read the geologic record" left behind in rocks from around the world.

**Class Format**: three lectures per week with two lab sections.

**Requirements/Evaluation**: This class may include field trips, problem sets, 2-3 exams and an final project

**Prerequisites**: 1 100-level GEOS course

**Enrollment Limit**: 24

**Enrollment Preferences**: GEOS majors who have taken at least one 100-level GEOS course.

**Expected Class Size**: 24

**Grading**:  yes pass/fail option,  no fifth course option

**GEOS 309  (F)  Modern Climate  (QFR)**

**Cross-listings**: CAOS 309

**Primary Cross-listing**

What will happen to the Earth's climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects--like the albedo feedback associated with sea ice and glacier loss--and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

**Requirements/Evaluation**: 4 multi-week lab projects and several short quizzes

**Prerequisites**: Any of GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor

**Enrollment Limit**: 20

**Enrollment Preferences**: GEOS and ENVI majors

**Expected Class Size**: 20

**Grading**:  yes pass/fail option,  yes fifth course option

**Distributions**:  (D3)  (QFR)

**This course is cross-listed and the prefixes carry the following divisional credit:**
GEOS 309(D3) CAOS 309(D3)

Quantitative/Formal Reasoning Notes: Lab projects consist of a series of numerical climate modeling projects, which require significant quantitative and logical reasoning.

Not offered current academic year

GEOS 312  (F)  Mass Extinctions: Patterns and Processes  (WS)

Over the last 541 million years of Earth history, five major mass extinctions have occurred, each dramatically changing the makeup and course of life on our planet. During some of these events, over 75% of all marine animal species went extinct; during others, groups like the dinosaurs vanished from the planet after tens of millions of years of ecological dominance. This tutorial course will explore the idea of extinction from the evolution of the concept in human thought to current research on the mechanisms and patterns of extinctions through time. We will examine what makes an extinction "mass", delve into the causes and consequences of the major mass extinction events of the Phanerozoic, and discuss the potential human-induced "6th extinction" event occurring in the present day. This course is in the Sediments and Life group for the Geosciences major.

Class Format: Weekly 1-hour tutorial meetings with pairs of students; one required all-day field trip.

Requirements/Evaluation: four 4-5-page papers, one revision, tutorial presentations, the student's effectiveness as a critic, and 1 problem set

Prerequisites: GEOS 107 or GEOS 212; or permission of instructor + any 200 level GEOS course

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)  (WS)

Writing Skills Notes: This is a tutorial that involves students writing 4 original response papers and one substantial revision to their writing.

GEOS 320  (S)  Ecosystem ecology in the Anthropocene

Cross-listings: BIOL 320 / ENVI 320

Secondary Cross-listing

Ecosystem ecology provides a framework for understanding the multidirectional interactions between biological organisms and their physical environments, and provides critical insight into our approaches for managing resource use in an era of anthropogenic change. In this class, we will explore the biological and biogeochemical underpinnings of ecosystem carbon and nutrient cycling. Topics will include interactions between species composition and ecosystem function, nutrient use efficiency, resource transformations, ecosystem management and restoration, and feedbacks to global change. Lecture content will be supported by regular discussions of the primary literature. Labs will introduce students to field and laboratory techniques to study resource and energy flow in local ecosystems, as well as approaches to project design, hypothesis development, data collection, and analysis. The laboratory program will culminate with a multi-week independent project.

Class Format: lectures, discussions, and a weekly lab

Requirements/Evaluation: Evaluation will be based on lab assignments, discussion participation, three exams, and an independent project

Prerequisites: BIOL/ENVI 203 or GEOS 208 or BIOL 211 or GEOS 212

Enrollment Limit: 20

Enrollment Preferences: Biology majors, then Environmental studies majors/concentrators or Geosciences majors

Expected Class Size: 20

Attributes: ENVI Natural World Electives
Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces—wind, waves, storms, and people—that shape the coastal zone, as well as the geologic formations—sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs—that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, quizzes, and an independent research project

Prerequisites: Either GEOS 104 or GEOS 210; or permission of instructor. No prior knowledge is necessary, but this course does build on principles used to explore complex scientific challenges.

Enrollment Limit: 15

Enrollment Preferences: Geosciences majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course counts toward the GEOS Group B Electives - Sediments + Life.

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 410 (S) The Cryosphere

Cross-listings: CAOS 410 / ENVI 410

Primary Cross-listing

The Earth's climate system is often described in terms of its spheres, including the atmosphere, biosphere, lithosphere, oceans, and the cryosphere. The cryosphere is the naturally occurring ice on Earth in all its many forms: snow, glaciers, ice sheets, sea ice, frozen lakes and rivers, and permafrost (frozen soil). These parts of the climate system may seem remote, but have implications for climate and weather around the world. Melting glaciers and ice sheets have already contributed to sea level rise, and are projected to do so even more in the future. This course will explore the cryosphere, including snow, sea ice, permafrost, and glaciers through lectures, hands-on and data analysis labs, reading journal articles, and a final project. As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major.

Class Format: Class periods and lab periods will be used interchangeably based on the weather.

Requirements/Evaluation: Evaluation will be based on short papers, labs responses, and a research project

Prerequisites: GEOS 215 or GEOS 255 or GEOS 309 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Senior GEOS majors, then other GEOS majors and senior ENVI majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

Materials/Lab Fee: Labs will be outside during the winter: students should be prepared to dress appropriately for the weather.

Distributions: (D3)

GEOS 414 (S) Reading Deep Time (QFR)

Ancient sedimentary rocks and the fossils they contain are time machines—direct windows into the deep history of life on Earth and the environments that life inhabited. In this course, you will learn to "read" these deep time records by collecting, interpreting, and analyzing paleontological, stratigraphic, and sedimentological data. The course will be organized around a week-long spring break trip to explore the rocks of the House Range of Utah. The Cambrian and Ordovician strata of the House Range offer an outstanding record of one of the most important periods in Earth history, tracking the rise of animal ecosystems and major increases in fossil diversity. The first 6 weeks of class will be spent learning the fundamentals of quantitative methods in paleontology and stratigraphy (often referred to as historical geology). Labs will focus on skill building including learning basic coding in R (no experience needed or expected), and learning how to interpret paleontological, sedimentological, and stratigraphic data. We will also read widely on the field locality and on the Cambrian and Ordovician Periods. During the field trip, we will explore the House Range. Students will learn skills including interpreting geological maps, measuring stratigraphic sections, finding and identifying fossils, and correlating rock units across basins. We will collect samples and data on the field trip and bring them back to Williams. The second 6 weeks of the course will be spent processing and analyzing the samples and data collected during the field trip, culminating in final projects to be done in small groups. Students will help determine what data we will collect in the field and what projects emerge. Examples might be interpreting carbon isotopic analyses to reconstruct ancient oceanographic conditions, biostratigraphic correlation using fossils to reconstruct basin dynamics, determining paleoenvironment based on analyses of thin sections, or digging into trilobite fossil preservation and evolutionary trends. Students will draw on previous experiences and course content in the Geosciences and bring small group research projects to completion by the end of the semester, which will be presented in poster form. This course fulfills the Geosciences Group B Elective: Sediments and Life.

Class Format: Weekly lectures, paper discussions, and hands-on labs. Required week-long spring break field course.

Requirements/Evaluation: Short papers and lab assignments, spring break field course participation (REQUIRED), and a final group project presented in poster form.

Prerequisites: GEOS majors who have taken at least one of the following courses: GEOS 212, GEOS 203, GEOS 201, GEOS 301, GEOS 302, GEOS 312T, or permission of instructor.

Enrollment Limit: 12

Enrollment Preferences: Senior, and then Junior, Geosciences majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: As a 400-level seminar, this capstone course is intended to build on and extend knowledge and skills students have developed during previous courses in the major

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course will rely on the programming language R. Students will learn how to code in R, and will use R to analyze large data sets of geological data. The majority of labs, as well as the final project, will rely on R, statistical analyses, and wrangling data.

Attributes: GEOS Group B Electives - Sediments + Life

GEOS 470 (S) Science for Environmental Justice (DPE)

Cross-listings:

Primary Cross-listing

Economically challenged communities and communities of color are disproportionately affected by environmental contamination and disturbance. Although environmental racism caused by industrial pollution has been made clear in scholarship for some time, the integrated stresses of climate change and industrial contamination are now triggering new challenges to life in underprivileged communities. Resolving environmental injustice will require meaningful engagement from scientists across a range of disciplines, from chemistry and the geosciences to ecology and public health. In this senior seminar, you will learn about the history of the environmental justice movement while examining how science has been used to address cases of environmental contamination and mismanagement. You can expect experiences in field data collection, laboratory analyses, and numerical modeling, skills that are required to assist communities suffering from environmental injustice. And we will work in partnership with residents of Tallevast, Florida, who have long suffered from the impacts of groundwater contamination and governmental neglect. This partnership will involve a residential field trip to Tallevast during spring break, where you will undertake an environmental study in support of the community.

Class Format: Weekly lectures, paper discussions, and hands-on labs. Required week-long spring break field trip.
Requirements/Evaluation:  weekly lab exercises and seminar presentations; a research project; a final presentation; and a spring break field trip

Prerequisites:  At least one 200-level Division III course and at least one 300-level Geosciences or Environmental Studies course or permission of instructor.

Enrollment Limit:  12

Enrollment Preferences:  Fourth year, and then third year, Geosciences majors and Environmental Studies majors or concentrators

Expected Class Size:  12

Grading:  no pass/fail option,  no fifth course option

Unit Notes:  As a 400-level seminar, this capstone course is intended to build and extend knowledge and skills that students have developed during previous courses in either the Geosciences or Environmental Studies majors.

Materials/Lab Fee:  The spring break field trip is being funded by the Freeman Foote Field Trip Fund for the Sciences.

Distributions:  (D3)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 470(D3)

Difference, Power, and Equity Notes:  The course will examine the history of the environmental justice movement, unraveling the roles of governmental neglect and complicity in fostering the harm of vulnerable communities. We will review strategies of collective action in fighting climate and environmental injustice and the complicated role that scientists have played in this pursuit. We will then leverage scientific skills and perspectives to imagine ways that scientists can become responsible agents of change.

Attributes:  GEOS Group B Electives - Sediments + Life

Not offered current academic year

GEOS 493  (F)  Senior Thesis: Geosciences

GEOS 14  (W) Drawing Science Studio Lab

Drawing Science Studio Lab explores the expansive intersection of art and science. Students will learn how to draw from direct observation of fossils, bones, plants, and taxidermy. This course is flexibly designed for every experience level. At least 75% of our class time is spent observing and drawing. Sketchbooks act as research sites. Graphite, colored pencils, and watercolors are our primary mediums. Most drawing will be done in-class with some additional at-home drawing assignments. The remaining class time is spent on research-driven field trips to WCMA, The Clark, and investigative walking assignments. We will have one visiting guest artist to add in our understanding of observation and depiction of the natural world. This course will explore: - how can observation, drawing, and related art games make us better visual thinkers and learners? - how do we see our environments? - how to color and pattern shape our perspectives (and then how do we draw that)? - how and where do scientific processes overlap with creative processes? - how does observation assist in field and lab work? - where does data-driven research benefit from play and imagination?

Requirements/Evaluation: Performance(s); Creative project(s); Other: Willingness to fail, willingness to take risks, dedication to sketchbooks

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Preference will be given to students who are curious about STEAM related fields and research and/or students of any level who wish to develop their drawing habits.

Expected Class Size: NA

Grading: pass/fail only

Unit Notes: Lauren Levato Coyne is an interdisciplinary artist exploring art, science, and storytelling. In addition to an extensive exhibition history, The Audubon Society commissioned Levato Coyne to create new work for their 125th Anniversary issue (2024).

GEOS 17  Hurricanes / Typhoons and Global Warming

Since 1990, forty-seven tropical depressions of hurricane intensity have developed on average each year mainly in the northern hemisphere. Among them, a half-dozen become major storms in the North Atlantic Ocean, another 10 are generated in the eastern Pacific Ocean, and as many as 22 take hold over the western Pacific Ocean (where they are called typhoons). Whereas the numbers have remained relatively static, evidence suggests that storm intensity is on the rise. Most such storms dissipate in the open oceans, but elsewhere coastal impact affects the physical geography of rocky shores, beaches, and river deltas, as well as the infrastructure associated with human habitation and commerce. During the Pliocene warm period between 4.5 to 3.0 million years ago, the average global temperature was both higher than today and global sea level stood above today's datum. These conditions may have contributed to permanent El Niño conditions across the Pacific Ocean having a spill-over effect on the Atlantic Ocean. With few exceptions since 2015, each succeeding year through 2023 has recorded an increase in the average global temperature. Air temperature affects sea-surface temperature, which is the key factor triggering hurricanes / typhoons on a seasonal basis today. This course looks at the physical evidence for storm deposits of exceptional size from the Pliocene warm period and the last inter-glacial epoch roughly 125,000 years ago. In the northern hemisphere, such deposits are well studied along the shores of Mexico's Gulf of California as well as islands such as the Azores in the North Atlantic. The physical dynamics of recent hurricanes are reviewed for further insight on where and how coastal impact is most expected.

Requirements/Evaluation: Presentation(s); Other: participation in discussion of assigned readings

Prerequisites: None

Enrollment Limit: 10
Enrollment Preferences: Evidence of prior course work in the Geosciences and/or Environmental Studies departments will be used.

Expected Class Size: NA

Grading:

GEOS 22 (W) Geosciences Research

Students will spend part of Winter Study doing fieldwork collecting data. Back at Williams, they will analyze the data. Each student will have responsibility for a subset of the data, and the individual sub-projects will contribute to the overall research.

Class Format: to be arranged with instructor

Requirements/Evaluation: final project

Prerequisites: two Geosciences courses; permission of the instructor required before registering for the course

Enrollment Limit: 3

Expected Class Size: 3

Grading: pass/fail only

Not offered current academic year

GEOS 31 (W) Senior Thesis: Geosciences

To be taken by students registered for Geosciences 493-494.

Class Format: thesis

Grading: pass/fail only

Distributions: (D3)

Not offered current academic year

GEOS 99 (W) Independent Study: Geosciences

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
GERMAN (Div I)

Chair: Professor Gail M Newman

Professors: G. Newman, Associate Professor, C. Koné, Assistant Professor, P. Ogunniran

Teaching Associates: Sarah Kurz and Hila Razi.

STUDY OF GERMAN LANGUAGE AND GERMAN-LANGUAGE CULTURE

The department seeks to enable students to acquire all five linguistic skills: listening, speaking, reading, writing, and cultural understanding through a stepped sequence of courses:

- **GERM 101-W-102** (first-semester and second-semester German) stresses communicative competence and exposes students to all of the basic features of German grammar, helps them build everyday vocabulary and introduces them to some aspects of German-speaking culture. At the end of the year, students should be "basic users," having reached the level A2, as defined by the Common European Framework of Reference for Languages (CEFR).

- **GERM 120** is an intensive communicative German course that strives to cover two semesters of language instruction at the basic level in one. At the end of the semester students should also become "basic users" and near the A2 level.

- **GERM 103** (third-semester German) combines a review of the grammar covered in GERM 101 & 102 with extensive practice in reading, writing, speaking and conversation with native speakers. By the end of the semester, students should become “independent users” and reach level B1.

- **GERM 104** (fourth-semester German) aims to further develop facility in speaking, writing, and reading, while further exploring aspects of German-speaking literature and culture. At the end of the semester, students should be “independent users” and reach level B2.

- **Courses numbered GERM 201-205** (fifth-semester German) emphasize accuracy and idiomatic expression in speaking and writing while introducing students to an important topic in the cultures of the German-speaking world. At this stage, students are usually close to the C1 level (“proficient users”).

- **Courses numbered GERM 206-210** (sixth-semester German) combine advanced language study with more detailed examination of topics in German-speaking literatures and cultures. Students at this level are “proficient users” and at the C1 level.

- **300-level courses** treat various topics from the German-language intellectual, cultural, and social world in which reading, discussion, and writing are in German.

- **GERM 497 and 498** designate independent study courses. Students who are interested in a particular topic may propose an independent study on the condition that a sufficiently qualified faculty member is available to facilitate the course.

Students with previous experience with the language who wish to begin studying German at Williams should take the placement test before the start of the semester and have a conversation with a faculty member from the German department to determine which course is best fitted for their level and needs.

THE MAJOR IN GERMAN

The German major offers students an interdisciplinary approach to the intellectual and cultural history of the German-speaking world by combining courses in German language and literature with seminars in history, art history, comparative literature, philosophy, music, political science, theater, and other relevant fields.

For students who start German at Williams, the major requires a minimum of ten courses:

- **GERM 101**
- **GERM 102**
- **GERM 120** (can be taken instead of 101-102, and will count as one course toward the major)
- **GERM 103**
- **GERM 104**
- **GERM 201-205**
- **GERM 206-210**
- Two 300-level German courses
- Two electives from either German courses at the 300-level or appropriate offerings in other departments, which might include History,
Philosophy, Art History, Music, Comparative Literature, Political Science, Theater, etc.

For students who place into courses above GERM 102/120 (second-semester German/A2 level) the minimum requirement is nine courses. Students may receive major credit for as many as four courses at the 200 or 300 level taken during a study abroad program in a German-speaking country after consultation with a faculty member from the German department.

THE CERTIFICATE IN GERMAN

To enhance a student’s educational and professional profiles, the department offers the Certificate in German. It requires seven courses and is especially appropriate for students who begin study of the language at Williams:

- GERM 101
- GERM 102
- (GERM 120 may be taken instead of GERM 101-102, and will be counted as one course toward the certificate)
- GERM 103
- GERM 104
- One course numbered GERM 201-205
- Two electives, at least one on German cultural history (literature, art, drama, music) and at least one course (in German or English) on German intellectual, political, or social history. These may be taken in the German Department or from other relevant departments, e.g., History, Philosophy, Art History, Music, Political Science, Sociology, Theater, etc.

For students who place into courses above GERM 102/120 (second-semester German/A2 level), the minimum requirement is six courses.

STUDY ABROAD

The department strongly encourages students who wish to attain fluency in German—especially those who wish to pursue a major or certificate in German—to spend a semester or year studying in Germany, Austria, or Switzerland, either independently or in one of several approved international study programs. GERM 104 or the equivalent is generally the minimum requirement for junior-year abroad programs. Students who wish to enroll directly in a German-speaking university in Germany or Austria should have completed at least 201-205 or the equivalent. In any case, all students considering study-abroad should discuss their program with a member from the Global Education and Study Away office and their language preparation with a member of the department.

Study Abroad FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or certificate.

- Can your department or program typically pre-approve courses for major/concentration credit?
  
  Yes, the department can tentatively pre-approve courses for major or certificate credit, based on information from the study away program or the course catalog, if direct enrollment, but final credit is only granted after review by faculty of the courses and the grades once taken.

- What criteria will typically be used/required to determine whether a student may receive major/certificate credit for a course taken while on study away?
  
  Course title and description, plus conversations with the student if necessary.

- Does your department/program place restrictions on the number of major/certificate credits that a student might earn through study away?
  
  Yes. The maximum number of credits toward the major or certificate is four.

- Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
  
  Yes. Students may not count language courses in other languages (e.g., Italian) for major credit, nor natural science or math courses.

- Are there specific major requirements that cannot be fulfilled while on study away?
  
  No.

- Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
  
  No.

- Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then...
One of our majors who is pre-med thought he could take Chemistry of Biology in Germany and have it count toward the German major, but that is not the case. It is not sufficient for the language of instruction in a given course to be German; the content must also have to do with the culture, history, politics, economics, etc. of Germany, Austria, or Switzerland.

THE DEGREE WITH HONORS IN GERMAN

Students earn honors by completing a senior thesis (German 493-W31-494) of honors quality.

Students interested in honors should consult with the department chair no later than April 15 of their junior year. The usual qualifications for pursuing honors are: (1) a strong interest in a specific topic for which an appropriate faculty advisor will be available in the senior year and (2) a departmental GPA of 3.67 or better.

GERMAN PRIZE

Each year, the Department awards the Benedict Prize to one or two outstanding Senior majors or certificate holders at Commencement as recognition for their accomplishments in German Studies.

GERM 101 (F) Elementary German

German 101-102 is for students with no previous study of German. The course employs a communicative approach involving all five language skills: listening comprehension, speaking, reading, writing, and culture. We focus initially on practice in understanding the spoken language and then move rapidly to basic forms of dialogue and self-expression. It is strongly recommended that students continue with GERM 102 in the Spring semester immediately following.

Class Format: Various types of instruction and learning; meets five days a week

Requirements/Evaluation: Active class participation, written homework, written and oral assessments

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: First- and second-year students

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2024

SEM Section: 01  M-F 10:00 am - 10:50 am  Gail M. Newman

GERM 102 (S) Elementary German II

German 102 is the continuation of German 101, and will provide you with a further introduction to the language and cultures of German-speaking countries. You will have the opportunity to practice listening, reading, writing, and speaking in German both through in-class activities and homework assignments. During the semester, you will learn about various cultural perspectives, products, and practices of German-speaking countries. Some of the topics that will be addressed this semester include the following: housing; housework; geography and landscape; transportation; travel plans and experiences; food and drink; cooking and ordering food at restaurants; childhood and youth; fairy tales; health and personal hygiene; family, marriage, and partnership; community issues in a multicultural society; literature, music, and film. The use of easy readers in the target language will also help to enhance reading comprehension. Active and dedicated participation including homework is expected. This course is taught exclusively in German.

Requirements/Evaluation: Active class participation, homework, quizzes, tests, exams

Prerequisites: GERM 101 and GERM 88 (Winter Study sustaining course) or placement test

Enrollment Limit: 15

Enrollment Preferences: If course over-enrolls (beyond cap), preference will be given to students who have completed GERM 101

Expected Class Size: 10
GERM 103 (F) Intermediate German I

In this course students will further develop their German language skills by engaging with a variety of cultural topics and everyday experiences in the German-speaking world. Through extensive work on expanding vocabulary, reviewing major grammatical structures, and conversation and composition exercises, students will strengthen their language skills and develop cultural competency. The course focuses on real communication in meaningful contexts and aims to develop and consolidate students' speaking, listening, reading, and writing abilities at the intermediate level. In addition to a textbook, the course will deploy a variety of media, such as text, video, and audio to aid in the practice and improvement of spoken and written German skills through in-class activities and homework assignments. Easy readers in the target language will help to enhance reading comprehension, and mandatory weekly conversation sessions with the German-speaking teaching associates will greatly contribute to enhancing the learners' speaking and listening comprehension. The course is taught exclusively in German.

Requirements/Evaluation: Active class participation, grammar homework, tests, short writing assignments, final project
Prerequisites: GERM 102, GERM 120, or permission of instructor
Enrollment Limit: 15
Enrollment Preferences: Prospective German majors
Expected Class Size: 8
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

GERM 104 (S) Intermediate German II

German 104 is the continuation of German 103 and a prerequisite to all advanced courses in German. In this course students will further develop their German language skills by engaging with a variety of cultural topics and everyday experiences in the German-speaking world. Through extensive work on expanding vocabulary, reviewing major grammatical structures, conversation and composition exercises, students will strengthen their language skills and develop cultural competency. The course focuses on real communication in meaningful contexts and aims to develop and consolidate students' speaking, listening, reading, and writing abilities at the intermediate high level. In addition to a textbook, the course will deploy a variety of media, such as text, video, and audio to aid in the practice and improvement of spoken and written German skills through in-class activities and homework assignments. Easy readers in the target language will help to enhance reading comprehension, and mandatory weekly conversation sessions with the German-speaking teaching associates will greatly contribute to enhancing the learners' speaking and listening comprehension. The course is taught exclusively in German.

Requirements/Evaluation: Active class participation, quizzes, essays, homework.
Prerequisites: GERM 103 or permission of the instructor
Enrollment Limit: 19
Enrollment Preferences: If course over-enrolls (beyond cap), preference will be given to students in GERM.
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

GERM 104 (S) Intermediate German II

Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
GERM 120  (S)  Turbodeutsch: Intensive Elementary German
An accelerated version of Elementary German, covering nearly all the material of GERM 101-102 in one semester. The course employs a communicative approach involving all four language skills: listening comprehension, speaking, reading, and writing. Turbodeutsch requires significant initiative on the part of students in their own learning process. Best suited to very committed students who are highly motivated to learn German. The course will meet every day, including three 50-minute periods on MWF and 2 75-minute periods on TR, plus a required TA session at a time to be arranged.

Requirements/Evaluation:  active participation, tests, quizzes, final project
Prerequisites:  students with demonstrated need to take the language in only one semester; students also need to show a great deal of commitment to learning German
Enrollment Limit:  12
Enrollment Preferences:  students who need German for their academic goals
Expected Class Size:  10
Grading:  yes pass/fail option,  no fifth course option
Distributions:  (D1)

Spring 2025

GERM 201  (F)  "Oida!" Living Language in Vienna
Language is a living being, varied, like identity itself, across cultures and across time. This course has as its thematic focus Wienerisch, the very special variety of German that has developed in the multi-linguistic metropolis of Vienna; listening and reading work will center on Viennese German. But the thrust of the course is honing the students' own German. It will provide extensive study of German grammar and style, and intensive practice in speaking and writing idiomatically. *Readings and discussion in German.*

Requirements/Evaluation:  Intensive class participation, regular written and oral exercises, midterm and final projects
Prerequisites:  GERM 104 or contact instructor
Enrollment Limit:  15
Enrollment Preferences:  Prospective German majors and German certificate students
Expected Class Size:  8
Grading:  yes pass/fail option,  no fifth course option
Distributions:  (D1)
Attributes:  GBST Borders, Exiles + Diaspora Studies
Not offered current academic year

GERM 202  (S)  German Comics
The goal of this advanced course is to study language and culture through the exploration of German-language comics. Despite the boom in the production of comics since the reunification and the appearance of numerous talented artists in the German speaking world, German comics remain largely unknown and unrecognized abroad. This course seeks to introduce students to this rich, active genre and to deepen their understanding of it by allowing them to engage with its broad spectrum of subjects and styles. The course will address a variety of recent comics ranging from graphic novels by Nora Krug, Olivia Vieweg to literary comics by Flix, Isabel Kreitz, as well as historical comics by Simon Schwartz and Reinhardt Kleist. What are the recurrent themes in German comics? What kind of current political issues do these comics raise and what type of contemporary anxieties do they express? These are some of the questions the course seeks to answer. *This course is conducted entirely in German.*

Requirements/Evaluation:  short oral presentations, three 1-2-page papers, two 3- to 5-page papers, and one final project
Prerequisites:  GERM 104 and GERM 201
Enrollment Limit:  19
Enrollment Preferences:  German Majors and German Certificate
Expected Class Size:  12
GERM 205 (F) (In)justice and Morals in German Literature
In this course students will develop their German reading, speaking and writing as they examine the intricate relationship between morals, (in)justice, and human behavior through creative works in the German tradition. We explore some works from different periods and literary movements, analyzing various moral dilemmas, ethics, and inquiries on values presented by selected German authors. Through close reading, interpretation and analysis of various parables, short stories and dramas, class discussions will focus on key themes such as individual conscience, societal norms, the questions of right and wrong, good and evil, and the consequences of moral choices. This course places particular emphasis on gaining a deeper understanding of the language by helping students improve language skills in German through engagement with original texts, exercises in vocabulary and style, and discussion in and about German. Conducted in German.

Requirements/Evaluation: Active class participation, short oral presentations, papers, and one final project
Prerequisites: GERM 104, GERM 201 or equivalent, permission of instructor.
Enrollment Limit: 15
Enrollment Preferences: German majors and German certificate prospective students
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

GERM 206 (F) Seh'n Se, det is Berlin
In the history of Germany, Berlin has always been a very important cultural and political center: it was successively the capital of the Kingdom of Prussia, the German Empire, the Weimar Republic, the Third Reich, and the German Democratic Republic, before becoming the capital of a reunited Federal Republic of Germany in 1990. In order to understand the fascination held by this metropolis before and after WWII and its increasing popularity today, it is crucial to gain an insight into the cultural and historical aspects of the capital of Germany throughout the 20th century. In order to do so, we will read texts by Erich Kästner, Kurt Tucholsky, Thomas Brussig, and Vladimir Kaminer, look at paintings by Ernst Ludwig Kirschner, Otto Dix and photographs by August Sander, watch movies by Fritz Lang, Wolfgang Staudte, Hannes Stöhr, Detlev Buck, and Burhan Qurbani, listen to cabaret songs by Marlene Dietrich and Hildegard Knef, hip hop songs by Seed, Sido, and Bushido, and electronic music by Ellen Alien. We will also explore the multicultural facets of the German capital, such as Queer Berlin, Black Berlin, Turkish Berlin as well as the techno club scene. Active and dedicated class participation is expected. Conducted in German.

Class Format: seminar
Requirements/Evaluation: Midterm, final exam, several short papers
Prerequisites: GERM 201 or equivalent
Enrollment Limit: 12
Enrollment Preferences: German major or certificate
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

GERM 208 (S) Translation in Practice
When we're learning a new language, we're constantly told not to translate--"Don't write in English and then translate into German!" "Don't translate in your head, think in your own German!" The goal is to immerse yourself as deeply as possible in the target language so that you can engage with it idiomatically. Translation is a different kind of operation than language learning, but it presents its own challenges and joys in working with the...
language. In this course we will read literary and theoretical texts that engage with translation as a phenomenon, we will compare English translations of German and Austrian literature, and we will talk with some professional literary translators about their process. In addition, students will prepare their own translations of German into English and/or their native languages. Readings and discussion in German.

Requirements/Evaluation: In addition to consistent and active class participation, students will write two 3-5-page analytic papers and prepare an 8-10-page translation as a final project. Students will be expected to correct the language errors in their analytic papers, and the translation projects will be workshoped in tutorial format. Evaluation will be holistic, taking into account initiative and effort as well as the results of the work.

GERM 209 The Other Germans: Exploring Diversity in Contemporary German Literature & Culture

This seminar examines the nuanced landscape of German society, going beyond mainstream narratives to uncover the multiple identities and complex histories that contribute to its cultural mosaic. This course offers an immersive exploration of the experiences of diverse communities -- such as Afro-Germans, Turks, Vietnamese, LGBTQ among others -- within Germany, including immigrant groups, marginalized communities, and diasporic populations. Through a multidisciplinary approach encompassing historical analysis, cultural studies by immigrants, and personal narratives & literary texts by Theodor Michael, Marshall-Hügel, Ijoma Mangold, Olivia Wenzel, Hans -Jürgen Massaquoi, and films, students will gain a deep understanding of the complexities of identity and belonging in the German context. We will also examine the challenges, triumphs, and contributions of "Other Germans", shedding light on their often-overlooked roles in shaping the nation's collective identity. By critically engaging with topics such as immigration, integration, intersectionality, and representation, participants will develop a nuanced perspective on Germanness that transcends stereotypes and embraces the diverse voices that have enriched German society. Through thoughtful discourse and exploration, participants will cultivate empathy, appreciation, and respect for the multitude of experiences that "Other Germans" represent in Germany. Class discussions and exercises, students will improve their language skills and vocabulary as we discuss contemporary issues.

Requirements/Evaluation: Active participation, papers and presentations.

GERM 210 (S) The Other Germans: Exploring Diversity in Contemporary German Literature & Culture

This seminar examines the nuanced landscape of German society, going beyond mainstream narratives to uncover the multiple identities and complex histories that contribute to its cultural mosaic. This course offers an immersive exploration of the experiences of diverse communities -- such as Afro-Germans, Turks, Vietnamese, LGBTQ among others -- within Germany, including immigrant groups, marginalized communities, and diasporic populations. In the process of engaging with these crucial topics in contemporary Germany, students will develop their listening, reading, speaking, and writing skills in German through targeted discussion and practice. Through a multidisciplinary approach encompassing historical analysis, cultural studies by immigrants, and personal narratives & literary texts by Theodor Michael, Marshall-Hügel, Ijoma Mangold, Olivia Wenzel, Hans -Jürgen Massaquoi, and films, students will gain a deep understanding of the complexities of identity and belonging in the German context. We will also examine the challenges, triumphs, and contributions of "Other Germans." shedding light on their often-overlooked roles in shaping the nation's collective identity. By critically engaging with topics such as immigration, integration, intersectionality, and representation, participants will develop a nuanced perspective on Germanness that transcends stereotypes and embraces the diverse voices that have enriched German society. Through thoughtful discourse and exploration, participants will cultivate empathy, appreciation, and respect for the multitude of experiences that "Other Germans" represent in Germany.
GERM 234 (F) Europe and the Black Diaspora (DPE) (WS)

Cross-listings: AFR 236 / COMP 238

Primary Cross-listing

This course provides an overview of the relationships and interactions between the Black diaspora and the European continent in the nineteenth and twentieth centuries. Drawing from biographies, autobiographies, reports, literature, creative arts and academic articles, we will consider the different relationships that have evolved between Black people and Europe over the course of time. Focusing on Central Europe, we will discuss the relationships established between Europe and the Black diaspora, such as Africans, African-Americans, Afro-Latinx and Afro-Caribbeans. Some of the themes we will address include the influence of cultural contact on intellectuals, writers, artists, soldiers, politicians and asylum seekers and their works, factors that established and influenced their relationship with Europe, as well the ways in which these selected people did or did not exert influence on European cultures. We will conclude by looking at some of the current discussions that still revolve around the relationship between the Black diaspora and Europe. Reading and Discussion in English.

Requirements/Evaluation: Active class participation, written homework, short papers and final research paper.

Prerequisites: None.

Enrollment Limit: 19

Enrollment Preferences: If course overenrolls (beyond cap), preference given to first-years, sophomores, and juniors.

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
AFR 236(D2) GERM 234(D1) COMP 238(D1)

Writing Skills Notes: Students will write two 3-5-page essays each written in two drafts with instructor comments. They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: We will discuss how minorities and minoritized individuals and the identities they hold can be affected by the dominant cultures around them. While we will focus on Europe, we will approach discussions with a comparative view, so as to encourage the students to reflect on how difference, power and equity interact and impact minorities in the context of the United States or wherever they come from.

Not offered current academic year

GERM 241 (F) German Romantic Song

Cross-listings: MUS 241

Secondary Cross-listing

An emblem of Romanticism. A mainstay of recitals. A public performance of interior feeling. Why is it that the Lied, a short song for piano and solo voice, remains such an enduring musical genre? This course explores this question by focusing on the key repertoire and the history of German Romantic Lieder. We will begin by studying some of the most influential composers of German Lieder during the nineteenth century (including Franz Schubert, Clara and Robert Schumann, Johannes Brahms, Hugo Wolf, and Gustav Mahler), analyzing how these composers experimented with the interplay of music and text. We will also examine the social contexts in which Lieder were composed and performed, with particular attention to factors
like gender and class. Finally, we will explore varied approaches to Lieder in contemporary performance culture in order to consider what the genre means for performers and audiences today.

Class Format: lecture/discussion

Requirements/Evaluation: class participation, occasional GLOW posts, two short essays, final exam and final recital program proposal project

Prerequisites: ability to read music

Enrollment Limit: 20

Enrollment Preferences: Music majors, those planning to major, and any student with a strong interest in music, German language, history, or culture. If overenrolled, the instructor will ask students to answer an e-mail questionnaire to determine enrollment.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

GERM 301 (F) From Red Riding Hood to Autobahn: German Forests in Literature, Culture, and Economy

Over the centuries, German and other Western literary traditions projected widely diverse notions onto the forest. It served as a placeholder for romantic concepts of origination as well as threatening notions of wilderness. It is “the shadow of civilization” (R.P. Harrison), a liminal space, an imagined refuge for the marginalized -- and home to countless fairy-tale characters. Consistently, both positive and negative idealizations stand in stark contrast to the woods’ predominantly economic and embattled role in German society: Wood fueled the early industrial revolution and today environmentalists occupy trees to protect them from lignite mining and highway construction. In this course, we will trace these histories and notions as well as their tensions and contradictions in German literary texts from the 19th to the 21st century. We will pay special attention to the central symbolic role the forest has played in German culture and nation-building, and reflect on its multiple poetic, political, and economic functions. The earliest texts we will read include Grimms’ fairy tales and Droste-Hülshoff’s Judenbuche. We will read well-known authors of the 20th century, such as Brecht and Grass, and discuss more recent poetry and novels, such as excerpts from Strubel’s In den Wäldern des menschlichen Herzens. The literary texts will be complemented by a limited number of key essays in Ecocriticism and the Environmental Humanities. We will also take advantage of our location in the Berkshires to explore de- and reforestation in the region during a field trip. Discussion and primary readings in German.

Class Format: One field trip planned to learn about the history of de- and reforestation in the region from an ecologist based in the area

Requirements/Evaluation: Careful reading and preparation of texts, written assignments, short oral presentations

Prerequisites: GERM 202 or equivalent

Enrollment Limit: 15

Enrollment Preferences: If course over-enrolls (beyond the cap), preference will be given to students in GERM

Expected Class Size: 10 - 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

GERM 302 (F) Heimat: Identity, Belonging, and Home in German Literature

This course delves into the concept of "Heimat" in German literature, examining its multifaceted nature and its significance in shaping individual and collective identities. We will explore diverse representations of "Heimat" - encompassing notions of home, homeland, and belonging - across different media and historical periods. Through a curated selection of works and novels by Nora Krug, Stefanie Zweig, Fatma Aydemir, films by Caroline Link and Israel Kaunitzke, and stories by German settlers and migrants around the world, we will analyze how the concept of "Heimat" is portrayed and interrogated in German cultural production. We will examine themes such as tradition, nostalgia, displacement, and the impact of historical and societal changes on notions of identity and belonging. Through close analysis, discussions, and critical essays, we will gain insights into the cultural,
historical, and philosophical dimensions of “Heimat” in German society. We will also reflect on how representations of “Heimat” intersect with questions of identity, memory, and the search for meaning in contemporary contexts, including the relevance of the notion in the contemporary political discourse. By the end of the course, participants will have developed a nuanced understanding of “Heimat” and its significance in German cultural production, as well as honed their skills in critical analysis and interpretation. Intermediate-advanced knowledge of German, an openness to engaging with challenging ideas and cultural perspectives are required. Conducted in German.

Requirements/Evaluation: Active class participation, written homework, written and oral assessments.

Prerequisites: GERM 202 or equivalent, permission of the instructor.

Enrollment Limit: 15

Enrollment Preferences: Preference for German majors and German certificate

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

SEM Section: 01 MR 1:10 pm - 2:25 pm Peter Ogunniran

GERM 313 (S) The Mediation of Nationalism in Germany (1871-1918)
The German unification of 1871 was a fusion of different kingdoms, grand duchies, duchies, principalities and free cities that created a shared cultural identity. This course examines how nationalism was mediated to create, achieve, and sustain a German identity in the German Empire from 1871 until 1918 when it ended. This course surveys the role of the mass media, public art, and other forms of cultural expression in maintaining a sense of German community and resolving the tensions between different geographical, cultural and religious identities while also simultaneously mediating and juxtaposing a collective German identity against non-Germans. Our materials include literature, magazine publications, paintings, monuments and popular culture in the Empire. Some specific themes we will address include the aims of the agents and "architects" of nationalism and the roles of religion and geography in nationalism and of national heroes and legends, and the definition of national identity in opposition to a perceived Other (France and Africans). The course will proceed thematically, focusing on the relationship between nationalism and public figures, nationalism and the Other, as well as nationalism and visual culture. We also touch on the intersection between nationalism and children's literature and some opposition to nationalism in the German Empire. We will conclude by considering how the nationalism of the German Empire still informs politics today. Reading and Discussion in German.

Requirements/Evaluation: Active class participation, written homework, written and oral assessments.

Prerequisites: GERM 202 or permission of the instructor.

Enrollment Limit: 19

Enrollment Preferences: If course overenrolls (beyond cap), preference given to German Students.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

GERM 335 (S) Afro-Germans: History, Culture, and Literature
Even though Afro-Germans have been a part of Germany for centuries and have undergone efforts at establishing themselves as an organized cultural group, their culture and literature have been often dismissed, relegated at the margins of dominant white German culture. In the aftermath of the Black Lives Matter movement in Germany, the country's belated debate about German colonialism, and its recent reckoning with race and racism, Afro-Germans have lately gained an unprecedented visibility in the German public sphere. Through their work, Afro-German journalists, writers, activists, and artists are all contributing to questioning and redefining German identity, culture, and history. Focusing primarily on Afro-German history, culture, and literature of the twentieth and twenty-first centuries, this upper-level seminar starts by examining acts of racist violence in German history (the Herero and Namaqua genocide in Namibia in 1904, the "schwarze Schmach" campaign in 1920's, the killing of Black French soldiers by the Wehrmacht in 1940). We will address issues of race, bi-racialism, and racism in a post-war context in West as well as East Germany through the poems by May Ayim, the essays by Aubre Lorde and Alice Hasters, the memoirs by Hans-Jürgen Massaquoi, Theodor Michael, Lucia Engombe, Stefanie Lahya-Aukongo, and Ika-Hügel Marshall, the novels by Harald Gerunde, Noah Sow, Sharon Dodua, Olivia Wenzel, Ijoma Mangold, the
GERM 366  (S)  Reason and "Unreason" in the German Tradition  (WS)

"I am proud of my heart alone, it is the sole source of everything, all our strength, happiness and misery. All the knowledge I possess everyone else can acquire, but my heart is all my own." So spoke Johann Wolfgang Goethe's young Werther in his groundbreaking novel from 1774, The Sorrows of Young Werther, which exposed the fault lines of the Enlightenment, with its emphasis on rationality, on universal human values, and on optimism about the future. Throughout the nineteenth and twentieth centuries in Germany and Austria, challenges arose to what was touted as the triumph of objective, scientific thought, often leading to alienation and despair for the writers and thinkers who explored the deepest recesses of the mind. These challenges led to some of the most creative cultural production in Western history, but the concatenation of reason and "unreason" also contributed to one of its biggest catastrophes. This course will explore and complicate the relationship between reason and those forces that throw it into question. Specifically, we will focus first on the moments around 1800 and 1900 when the tectonic plates of reason and supposed unreason converge and collide most forcefully, reading authors like Kant, Goethe, Novalis, Kleist, Büchner, Hoffmann, and Freud, then turn to the mid-twentieth century, when both forces combine to create the disaster of the "Third Reich" and the difficulties of its aftermath (Hitler, Harlan, Bachmann, Haneke). Finally, we will look at the complex ways in which rationality triumphs and is challenged in our current time by engaging with the debates around science that roil German and Austrian society. Readings and discussion in German (with some theoretical readings in English).

Requirements/Evaluation: Active participation, several short papers and reading responses, longer final project. All writing will include rewrites with corrected grammar and the final paper will be written in stages, including a draft that is workshopped in tutorial format.

Prerequisites: GERM 200-level course or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: German majors, German students

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)  (WS)

Writing Skills Notes: Students will write and rewrite several short papers in German. A longer final paper will be written in stages that will include a draft that is workshopped in tutorial format.

Spring 2025

SEM Section: 01    MR 2:35 pm - 3:50 pm    Gail M. Newman

GERM 377  (F)  Austria and its Borders

For centuries, Austria was characterized not just by the sheer expanse of its territory, extending from the Adriatic Sea to the South to Ukraine in the North, from Switzerland in the west to nearly Turkey in the east. Its identity was also closely associated with the many porous internal borders among its various ethnic groups: German, Polish, Romanian, Slavic, Italian, etc.. The first World War put an end to this multiethnic, multilingual identity, leaving a primarily ethnic-German "Rest-Österreich" whose fatal passivity in the face of German expansionism led to the erasure of the nation altogether. After World War II, Austria expended far too much energy cordoning off its own past as a perpetrator, creating through willful ignorance a psychic and political boundary that only began to open with the election of a former Nazi to the symbolic office of president in the mid-eighties. Austria's entrance into the European Union in 1995 coincided with an influx of refugees from the Balkan Wars; it would seem that Austria was on its way back to expansive borders. But the 2000s have seen a two-track development: on the one hand rapidly increasing ethnic, linguistic, and cultural diversity and on the other a ferocious defense of ostensibly "Austrian" identity. This course will trace the Austrian relationship to its internal and external borders by examining literature, history, and popular culture surrounding key touchpoints: 1918, 1945, 1987, and 2015.
Class Format: This will be a "tritorial," with groups of three students meeting in tutorial format with the instructor.

Requirements/Evaluation: Three-four 5-page papers, three-four 1-2 page responses, one final project, discussion leading. Evaluation: Tutorial papers will receive extensive comments, but no grade; the instructor will meet with individual students at least twice during the semester to discuss how things are going for them. Responses will not be evaluated by the instructor, but instead will function well or less well in the context of the discussion. The final project will receive a grade, and the final grade will be determined by the overall trajectory of the student's learning.

Prerequisites: German 202 or permission of instructor

GERM 88  (W)  German Sustaining Program
Students registered for GERM 101-102 are required to attend and pass the German Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program; check your class schedule to confirm enrollment.
Requirements/Evaluation: requirements active participation, regular attendance, and earn a "Pass" grade
Grading: pass/fail option only
Materials/Lab Fee: cost to student approximately $5 for photocopied materials
Not offered current academic year

GERM 99  (W)  Independent Study: German
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.
Class Format: independent study
Grading: pass/fail only
Distributions: (D1)
Not offered current academic year
An informed engagement with the world is an indispensable part of the liberal education that is the goal of the Williams experience. The Global Studies Program enables students to achieve this goal through a cross-disciplinary and comparative curriculum. The program offers multiple tracks, on a region of the world or theme, around which students construct their global studies concentration.

Requirements
To complete the concentration, students must: take one introduction course from the Global Studies 101-110 series; take a comparative course; fulfill the requirements of a track; and complete a senior exercise in their track.

Global Studies 101-110 Series
All students wishing to pursue the concentration should take one introduction course from the Global Studies 101-110 series early in their careers. The topics and regions covered will vary and be selective, but all will be designed to place cultural, political, economic and technological issues in conversation with one another to illustrate the necessity of cross-disciplinary and comparative perspectives. On occasion, students may petition to substitute a course equivalent in scope to Global Studies 101 to meet this requirement.

TRACKS
After taking an introductory course from the Global Studies 101-110 series, students are asked to select a track that will structure their global studies curriculum. There are two types of track. The first focuses on a particular region of the world or a contact zone where multiple communities encounter one another. The second type is organized thematically and permits students to explore a cultural, political, economic or technological issue globally and comparatively. Each track is administered by faculty teaching in that track in consultation with the advisory committee. At present the program consists of the following tracks:

Food and Agriculture

Poverty and Insecurity

Human Rights
**Contract Track**

To fulfill the requirements of a track, students must complete three approved courses from at least two disciplines and address their track in their senior exercise. Faculty in each track may set an additional requirement of a level of language competency for its concentrators. Students may petition to use courses completed on approved study away programs to fulfill elective requirements. Students may not count a course toward more than one requirement in the track.

**Senior Exercise**

All concentrators must complete a senior exercise. The senior exercise will be a substantial piece of writing (20-25 pages) that draws together concentrators’ disciplinary skills and their expertise in their track. It might be work done in the context of a senior capstone course in a relevant department or in the context of a shared seminar sponsored by the Global Studies program. Concentrators present their final senior exercise in class or in a Global Studies colloquium, or in both.

Concentrators must also take a comparative course—that is, a course that might not cover material directly dealing with the track, but would enrich a student’s engagement through comparative inquiry.

**Honors**

A candidate for honors in Global Studies must maintain at least a B+ average in the concentration and be admitted to candidacy by the program faculty. An honors candidate must complete their project in a semester (and Winter Study). An honors candidate will prepare a forty-page thesis or its equivalent while enrolled in the senior thesis course, 491 or 492 (and Winter Study). This course will be in addition to the courses required to fulfill the concentration.

A student wishing to become a candidate for honors in Global Studies should secure a faculty sponsor and inform the program chair in writing before spring registration of her/his junior year.

**Study Away, Research, and Internships**

Although not a requirement, study away, research, and/or relevant internships are an essential component of Global Studies. Where relevant to the curriculum plan of concentrators, the program Chair, in coordination with the Study Away Advisor and the Career Center, will advise students on
opportunities in these areas.

FAQ

Students MUST contact department/program BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No, but students should not expect to get more than 3 study abroad courses counted toward the concentration.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Typically the Introduction to Global Studies and the senior exercise cannot be fulfilled abroad.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

Note: as course offerings change every year, students should feel free to check with the Program Chair to see if courses not listed below might count as electives.

GBST 101 (F) Religion, Politics, and Society: A Global Perspective (DPE)

Cross-listings: REL 126

Primary Cross-listing

In spite of predictions that religion would wither away in the face of modernization, even casual observation indicates that it remains a powerful force in contemporary political life. Our goal is to obtain an enhanced understanding and appreciation of the salience of religion in public life. The course will be divided into three parts. The first part focuses on different theoretical approaches to making sense of the relation between religion, politics, and society, discussing especially the concept of the 'secular' in Western thought and decolonial critique thereof. The second part will take a global perspective on the relation between religion and politics. We will discuss cases of Buddhism, Christianity (Catholicism and Protestantism), Confucianism, Hinduism, Islam (Suni and Shi’a), and Judaism. The third part focuses on religion in the USA. Here, we will discuss the role of religion in American political culture, the relation of religion to the state, the relevance of religious interests and their political mobilization, religious minorities in the United States, and many other aspects of religion in the US society. Although the study of religion and politics raises a host of deep philosophical questions, the principal aim of the course is to understand how religion affects politics (and vice versa), rather than to explore the normative dimensions of questions raised by the interaction of these two forces.

Requirements/Evaluation: Class participation and three papers, in these proportions: 10% attendance; 20% participation; 20% first paper (7 pages); 30% second paper (8-10 pages); and 20% third paper (7 pages). No final exam.

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: Global Studies concentrators and intended concentrators; Religion majors and intended majors

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Unit Notes: Core course for GBST

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 101(D2) REL 126(D2)

Difference, Power, and Equity Notes: An engagement with religious difference in the world, with a spotlight on how religion and politics—that is, power—interact globally and in the USA.

GBST 102 (F) The Modern Middle East (DPE)
Cross-listings: REL 239 / ARAB 207 / HIST 207 / JWST 217 / LEAD 207

Secondary Cross-listing

This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination.

Requirements/Evaluation: participation, online responses, quizzes, midterm, and final exam
Prerequisites: none
Enrollment Limit: 40
Enrollment Preferences: History & Arabic majors, and Jewish studies concentrators; completion of course admission survey if overenrolled
Expected Class Size: 30-40
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

GBST 104  (S)  Race and a Global War: Africa during World War II (DPE) (WS)

Cross-listings: HIST 104 / AFR 104

Secondary Cross-listing

This course highlights African experiences of World War II. Although most histories have excluded Africa's role in the war, the continent and its people were at the center of major developments during this global conflict. In fact, many Africans remember the Italian invasion of Ethiopia in 1935 as the start of the war. African servicemen fought alongside the Allied and Axis forces on major warfronts in Europe, Africa and Asia. African communities and individuals also established war charity campaigns to collect funds, which they sent to war ravaged societies in Europe. Indeed, African economies, despite their colonial statuses, kept European imperial nations afloat in their most hour of need. At the same time, African colonial subjects faced severe food shortages, the loss of working-age men to labor and military recruiters, and dramatically increased taxes. We will examine the impact of these and other wartime pressures on different African communities. How did African societies meet such challenges and how did they view the war? In this course we will examine the roles that women played during the war, and the various other ways that African communities met wartime demands. Other topics we will explore include the role of African women; colonial propaganda; political protest against the war; race and racial thought in the wartime era; war crimes; African American support for the liberation of Ethiopia; and the war's impact on decolonization across the continent. We will further study how Africans and outsiders have differently conceptualized the continent's role in the war by analyzing a variety of sources, including scholarly writings, archival materials, films, former soldiers' biographies, and propaganda posters.

Requirements/Evaluation: active participation in discussion, map quiz, 2 reading responses, and 3 essays (of about 5 pages)
Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor
Enrollment Limit: 19
Enrollment Preferences: first-year students and then sophomores who have not previously taken a 100-level seminar
Expected Class Size: 19
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
GBST 104(D2) HIST 104(D2) AFR 104(D2)
Writing Skills Notes: Students will write two 3-5-page essays each written in two drafts with instructor comments. They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course explores the colonial relationship during a major global crisis. Students will examine existing narratives of African contributions to the war and to come up with their own interpretations, and will be called to critically engage the question of why and how colonies made significant contributions to the Allied cause by producing needed materials and resources or by joining the fight. Africans made these contributions spite of various and complex inequities.

GBST 105  (F)  Islamophobia: A Global Perspective  (DPE)

Cross-listings:  REL 107

Primary Cross-listing

This course's goal is to show how the racialization of Islam and Muslims has been constitutive to the latter's imagination. It looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. The course goes back to the founding moments of an imagined white-Christian Europe and how the racialization of Muslim bodies was central to this project and how anti-Muslim racism continues to be relevant in our world today. The course will give a global perspective on Islamophobia and how it is structuring and used by political actors in various territories. The course will show how Muslims were constructed as subjects in history, politics, and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. The course is based on the literature of multidisciplinary studies by leading scholars in the field, drawing from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology. GBST 116  (F)  The Art of Playing: An Introduction to Theatre and Performance

Cross-listings: THEA 101 / COMP 151
Secondary Cross-listing

This is an introduction to the global art and practice of making theatre. Students will learn about the history, aesthetics, and approaches to the performer's labor associated with select performance forms from around the world. Emphasis will be on the analysis of embodied practices and the relationship between the stage and everyday life. Through readings, audiovisual materials, performance exercises, and discussions we will engage with theatre as a constantly evolving art form, sharpening our analytical skills through theoretical approaches from performance studies. Central to our exploration will be excavating the Eurocentric assumptions that conventionally shape the practice and study of theater in the United States. We will seek ways to decolonize our perspectives and ask critical questions about performance's potential to enact strategies of anti-racism and anti-imperialism. This course, open to all students, is a gateway to the major in Theatre, and is a prerequisite for THEA 201, THEA 204, THEA 301, and THEA 401.

Requirements/Evaluation: two 5-page critical essays, journal reflections, studio exercises, and active participation in all activities

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: prospective Theatre majors or Theatre majors or Comparative Literature majors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

GBST 117 (F) Bombay/Mumbai: Making of a Modern Metropolis (WS)

Cross-listings: ASIA 117 / HIST 117

Secondary Cross-listing

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of colonial and modern India through the history of its most important city.

Requirements/Evaluation: assessment will be based on class participation and weekly written responses to readings (2 pages), 2-3 short papers (4-5 pages), leading to an oral presentation and final paper (10-12 pages). All writing assignments are structured to build up the final paper.

Prerequisites: First years and sophomores only

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar.

Expected Class Size: 12-15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

Writing Skills Notes: Weekly reading response (2 pages), several short papers leading to a final research paper. Peer reviews and instructor
GBST 132 (S) Musics of the Spanish Colonial Empire, ca. 1500-1800 (DPE)

Cross-listings: MUS 133

Secondary Cross-listing

With territories around the globe from the Americas to the Philippines to portions of Western Europe, the Spanish colonial empire was, at its height, one of the largest and most expansive in history. This course explores the myriad ways in which Spanish colonial powers influenced, interacted with, and reacted to the musical cultures of the colonized and how indigenous and/or colonized peoples persisted in asserting their musical voices over the course of several centuries—from the time of the Spanish arrival in the Americas (as well as southern Italy and the East Indies) during the fifteenth and sixteenth centuries to the empire’s eventual decline in the nineteenth century. We will begin by defining the concepts of “colonialism” and “imperialism” in order to understand how such political and socio-economic power structures developed and attempted to exert control and influence over subjugated populations—and consequently over their music. From there, we will investigate some of the musical developments and repertories that resulted from these efforts through a series of modules on various territories colonized by Spain, including the Spanish territories of Naples/southern Italy, New Spain, and the Philippines. Coursework will include discussion-based and written responses to weekly readings and listening assignments and small group presentations on a Spanish colonized space not covered in one of the central course modules. The ability to read musical notation is not required.

Class Format: Lecture-discussion

Requirements/Evaluation: Attendance/participation; weekly discussion-leading and informal written forum responses to assigned materials; two close reading/listening papers; and a final collaborative presentation project to be conducted in small groups

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Preference given to first years and sophomores

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 132(D2) MUS 133(D1)

Difference, Power, and Equity Notes: The course explores how political and socio-economic power structures exerted control and influence over subjugated populations in the Spanish colonial empire—and consequently over their music, and examines the myriad ways in which Spanish colonial powers influenced, interacted with, and reacted to the musical cultures of the colonized and how indigenous and/or colonized peoples persisted in asserting their musical voices over the course of several centuries

GBST 151 (F) Global Questions, Global Frameworks (DPE)

In this foundational course in the Global Scholars Program, students will be introduced to an interdisciplinary approach to exploring critical global issues. The course is organized according to three key themes -- sustainability, democracy, and indigeneity -- which will structure our academic explorations in the fall semester and provide important context for on-site work in Santiago, Chile, during Winter Study. Students will engage these frameworks and concepts to consider global processes and examine the complexities of life on an increasingly overheated and fragmented planet. The first part of the course will explore critical topics in Global Studies and grapple with influential theories on climate change, sustainability, and human rights. The second part will be focused on a particular country and city -- Chile and its capital of Santiago -- and how overarching geopolitical tendencies impact the reality of life in that area as well as creative strategies emerging in local communities. One purpose of this module is to prepare students for their Winter Study trip to that region, where they will engage in research related to their academic interests. Only students admitted to the Global Scholars Program will be able to register for this course.
Class Format: Discussion-based class

Requirements/Evaluation: Participation in class discussions, reading course materials, engaging with our speakers, two 5-7 pp. papers and a final project.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Global Scholars Program Fellows

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Taking an interdisciplinary approach to exploring critical global issues, students will grapple with difference, power and equity in a global context through leading theories of climate change, sustainability, and human rights as well as how these issues impact particular communities around the world. One purpose of this course is to enable students to become better equipped to conduct research on pressing issues around the world and be more responsible global citizens.

GBST 162 (S) Languages of East Asia

Cross-listings: ANTH 162 / ASIA 162 / CHIN 162

Secondary Cross-listing

A survey of the Chinese, Japanese, and Korean languages in their linguistic and cultural context. Working with various types of multimedia including audio, video, animation, and texts, we'll take up the phonetics, phonology, morphology, syntax, and lexicon of these three major East Asian languages, including also their history and writing systems as well as how they function in the societies where they are spoken. Though the emphasis of the course is on linguistic description and analysis, there will also be an applied component, as part of which we'll learn several dozen common expressions in each language. Some of the questions to be discussed are: What are the similarities and differences among these three languages? How are and how aren't they related? How did the modern standard form of each develop and what is its relationship to any non-standard languages or dialects? How do these three languages reflect sociolinguistic phenomena such as gender, class, and politeness? How do the writing systems of these languages function and what is the role of Chinese characters in them? What has been the influence of Classical Chinese on Modern Chinese, Japanese, and Korean? How have these languages changed due to influence from English and other languages? How are they used in Asian American speech communities? And what are the prospects for their future development, including the influence of computers and digital communications? While this course is not intended as a comprehensive introduction to linguistics, it does introduce many basic terms and concepts from that discipline.

Class Format: combination of lecture, discussion, and language practice

Requirements/Evaluation: three quizzes, two 2- to 3-page papers, an oral presentation, and an 8- to 10-page term paper

Prerequisites: none (lectures, class discussions, and readings in English; no prior background in linguistics or any Asian language required)

Enrollment Limit: 20

Enrollment Preferences: open to all with preference to first-year students and sophomores as well as majors/concentrators in CHIN, JAPN, EALC, ANTH, ASIA and GBST

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: Linguistics

Not offered current academic year
GBST 203 (F) Colonial Rule and Its Aftermaths in Africa (DPE)

Cross-listings: AFR 227 / HIST 204

Secondary Cross-listing

This course focuses on the history of Africa during the colonial and post-colonial periods, especially focusing on the period between 1885 and 2000. The first part of the course will explore the imposition of colonial rule and its attendant impacts on African societies. During this section, we will especially examine how Africans responded to colonialism, including the various resistance movements that arose at different moments to contest colonial rule. We will also explore the various transformations wrought by colonialism. The second part of the course will explore the African struggle to decolonize their societies and to fashion viable political systems. In addition to historical texts, the course will make use of cultural materials such as novels and films.

Class Format: Mixed format of lecture and discussion seminar

Requirements/Evaluation: active participation in discussion, map quiz, response papers, midterm and final exams, and case study paper (7-10 pages)

Prerequisites: None

Enrollment Limit: 30

Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 227(D2) HIST 204(D2) GBST 203(D2)

Difference, Power, and Equity Notes: This course will introduce students to how Africans contended with the forces of colonialism and its aftermaths. It will examine how different African societies as well as social groups on the continent were affected by and responded to colonial rule. All of the readings, discussions, and assignments will ask students to contend with the issues of how to write African lives into the history of colonialism.

Attributes: HIST Group A Electives - Africa

GBST 204 (S) To See the Past: Russian and Soviet Cinema on History

Cross-listings: RUSS 204 / COMP 204

Secondary Cross-listing

This course surveys Soviet and Russian cultural history of the 20th- and 21st-centuries through the history of the cinematic medium. We will watch and analyze key films of this period--films by Eisenstein, Vertov, Tarkovsky, Muratova, Balabanov, Zviagintsev, and Fedorchenko among others--from a double perspective. On the one hand, we will study the cultural and historical contexts of the Soviet Union and Russia; on the other hand, we will learn the formal and stylistic aspects of the cinematic medium as it developed historically (from silent, to sound, to color, to digital etc.). From this double perspective, we will try to answer a larger question that underlies this course: What kind of historical thinking can we learn through cinema as a medium? In other words, we will take cinema neither simply as a direct reflection of state ideology nor as pure aesthetic form or entertainment for the masses. Rather, we will approach the films of this period as audio-visual texts that are rich in historical content and require our informed and attentive interpretation.

Requirements/Evaluation: For each class you'll watch 1or 2 film(s) and read typically 1 article under 20 pages. You will submit short viewing response before each class. Additionally, there will be short viewing or creative assignments to familiarize students with formal aspects of film. Evaluation will be based on participation, one presentation, short sequence analysis, and final paper or video essay

Prerequisites: none, open to all students

Enrollment Limit: 15

Enrollment Preferences: declared or prospective Russian or Comparative Literature majors, Russian Certificate seekers, Global Studies concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)
GBST 208  (F) The U.S. and Afghanistan: A Post-Mortem  (DPE)

Cross-listings: ASIA 208 / ANTH 208

Secondary Cross-listing

The United States attacked and defeated the Afghan Taliban regime over in the course of a few short weeks in 2001. Within a few years, the finality of that victory was brought into question as the Taliban regrouped and eventually reasserted itself as a formidable guerilla army that the U.S. military could not easily defeat. At the same time that it was facing a more difficult military challenge than anticipated, the United States got bogged down in the process of nation-building, as well as efforts at social reform. This course examines the history of American involvement in Afghanistan, beginning with the Cold War when the U.S. used Afghanistan as a test case for new models of political modernization and economic development. We will go on to discuss the U.S. support for Islamist political parties during the Soviet occupation of Afghanistan in the 1980s and the consequent rise of the Taliban, and the role of Afghanistan in the September 11th attacks and the "War on Terror" that followed. The course will conclude with a consideration of the impact and legacy of the two decades of nation-building and social reform carried out by the United States since 9/11.

Requirements/Evaluation: grading will be determined by class participation, two short (500 word) essays, and a 15-page research paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors, Global Studies concentrators, Political Science and Asian Studies majors will get preference

Expected Class Size: 15-20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

GBST 209  (S) The Art and Archeology of Maya Civilization

Cross-listings: ANTH 219 / ARTH 209

Secondary Cross-listing

The ancient Maya civilization was one of the most sophisticated and complex cultures of prehispanic Central America. Its complex calendrics, astronomy, mathematics, art and hieroglyphic writing system are celebrated worldwide. The course will examine the trajectory and nature of ancient Maya civilization from the combined perspectives of archaeology and art history. The origins and evolution of the Maya states during the Preclassic period (1000 B.C.-A.D. 250) will be explored through the rich archaeological remains and Preclassic art styles. The Classic Maya civilization (A.D. 250-1000) will then be presented through a detailed survey of the archaeology, art and hieroglyphic texts of this period. Finally, the collapse of Classic Maya civilization and its transformation and endurance during the Postclassic period and under early Spanish rule (A.D. 1000-1600) will be critically evaluated through a review of the archaeological, iconographic, and ethnohistorical evidence.

Class Format: lecture/discussion

Requirements/Evaluation: midterm and final exams, hieroglyphic project, 15pp research paper

Prerequisites: none, but an introductory ARTH or ANTH course recommended
Enrollment Limit: none
Enrollment Preferences: Anthropology/Sociology and Art History majors
Expected Class Size: 16
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:

GBST 214 (F) Asian/American Identities in Motion (DPE)
Cross-listings: AAS 216 / AMST 213 / DANC 216 / ASIA 216 / THEA 216
Secondary Cross-listing

The course aims to explore dance and movement-based performances as mediums through which identities in Asian and Asian American (including South Asian) communities are cultivated, expressed, and contested. Students will engage with how social and historical contexts influence the processes through which dance practices are invested with particular sets of meanings, and how artists use performance to reinforce or resist stereotypical representations. Core readings will be drawn from Dance, Performance, Asian, and Asian American Studies to engage with issues such as nation formation, racial and ethnic identity politics, appropriation, tradition and innovation among other topics. This is primarily a discussion-based seminar course, and might also include screenings, movement workshops, and discussion with guest artists and scholars. No previous dance experience is required.

Requirements/Evaluation: reading responses, in-class writing assignments, participation in discussions and presentations, two 5-6 page essays, and a final cumulative essay assignment.
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: first years and sophomores
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
AAS 216(D2) AMST 213(D2) DANC 216(D1) GBST 214(D2) ASIA 216(D1) THEA 216(D1)

Difference, Power, and Equity Notes: This course introduces students to the role of performance in nation formation in Asia and the history of Asian Americans in the US through analysis of dance practices. Student will explore how race was central to the formation of Asian and the American nations, and how social and legal discriminatory practices against minorities influence identity and popular cultural practices. The assigned material provide examples of how artists address these inequalities and differences in social power.

GBST 216 (F) Cities and Urbanism of the Ancient World (WS)
Cross-listings: ANTH 216
Secondary Cross-listing

This is a course on cities in the ancient world, which will examine four major ancient urban centers (Nineveh and Nimrud, Iraq; Teotihuacan, Mexico; and Angkor, Cambodia) and end with a sustained, in-depth exploration of urbanism in prehispanic Maya civilization. As more and more people move into cities across the world, human societies are becoming forever transformed. This transformation into an urban globalized world has ancient roots at
the beginning of the first civilizations in Euroasia and the Americas. We will delve into the nature of the urban transformation by first exploring sociological and anthropological definitions of urbanism, and recent studies of modern urbanism. We will look at Nineveh, Nimrud, Teotihuacan, and Angkor to consider how ancient urbanism was distinct from modern cities, while at the same time, ancient urbanites had to deal with similar issues as residents of modern cities. We will then examine in more depth the cities of prehispanic Maya civilization, answering such questions as: how different were Maya cities from other premodern ones? Is there one type of Maya city or many? How different was life in Maya cities from life in Maya villages? What were the power structures of Maya cities? How common were immigrants and slaves in these ancient cities?

Requirements/Evaluation: 5-page papers every other week, oral responses on alternate weeks; tutorial attendance is required.

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first years, sophomores, or majors in Anthropology or Sociology

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 216(D2) ANTH 216(D2)

Writing Skills Notes: Throughout the semester, writing skills (developing an argument, construction of paragraphs, use of case studies) will be emphasized. An opportunity to rewrite at least one tutorial paper will allow students to actively apply what they are learning.

GBST 218 Capital and Coercion (DPE)

Capital, tradable ownership shares in long-lived corporations, invented in the 17th century, has connected people of different races, religions, and geographies. There are huge profits from such economic interactions, but also risks: of being cheated, deceived, or coerced. This course uses insights from the economics of incentives (principal-agent models, contracts, mechanism design) to investigate the interplay between capital, coercion, and resistance. The role of prejudice will be central, as will the rise of middlemen as enforcers of coercion. Case studies span the 17th century to the 20th and include: the spice trade and conflict in the Indian Ocean, capital markets and fraud in Amsterdam and London, the Atlantic trade in enslaved people, the Dutch "cultivation system" in Java, the slow end of slavery in Brazil, and colonial control and independence in Kenya. Required readings for this class will include primary historical sources, and even excerpts from autobiographical novels!

Requirements/Evaluation: Students will be evaluated based on weekly reading responses, class participation, a midterm and a final.

Prerequisites: Econ 110

Enrollment Limit: 15

Enrollment Preferences: If overenrolled, students will be asked to submit a short statement of interest.

Expected Class Size: 15

Grading:

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course analyzes the evolution of economic inequity. It analyzes how global market opportunities have been shaped by race, religion, wealth, and power.

GBST 219 (S) Indigeneity Today: Comparative Indigenous Identities in the US and Russia (DPE) (WS)

Cross-listings:

Secondary Cross-listing

Indigenous movements for land, rights, and cultural preservation have spread to and originated in all corners of the world. However, the global nature
of these movements at times obscures ways of being Indigenous in differing contexts. This course analyzes Indigeneity in both the United States and Russia today. Through reading and analyzing ethnography, theory, and literature, it focuses on Indigenous peoples in a comparative context. Rather than prioritizing concern with Indigenous peoples emerging from the US, it attempts to demonstrate what Indigeneity has been in both the United States and Russia and what it is and means today. It asks the following questions: what is Indigeneity and who is Indigenous; how is Indigenous identity constructed and by whom; and what convergences and divergences exist in Indigeneity between the US and Russia or for that matter in other contexts? To help answer these questions, in this course we will grapple with Indigeneity as a social category and other social formations, especially ethnicity, nationality, and race. Topics include: Indigeneity and the State, Revitalization and Resurgence, Indigenous People and Nature Protection, and Hemispheric and Global Indigenities.

**Requirements/Evaluation:** 10 posts to the course Glow discussion page, 3 times leading class discussion on the assigned readings, 1 short presentation, 1 extended portfolio project with regular shorter and longer writing submissions, and 1 final paper and final presentation (as the final part of the portfolio).

**Prerequisites:** None

**Enrollment Limit:** 16

**Enrollment Preferences:** Majors and certificate-seekers in Russian, then majors in Anthropology and Sociology, and then Global Studies concentrators

**Expected Class Size:** 12-15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 219(D2)

**Writing Skills Notes:** This course has the following assignments: Weekly post to the Glow discussion page, 1 extended project with regular writing submissions, 1 final paper and final presentation. For the extended project, we will have instructor feedback for all project assignments. In instructor feedback, comprehension of the material and the content of the writing, improvement in writing style and clarity, and development of voice will be discussed. There will also be peer feedback/review.

**Difference, Power, and Equity Notes:** In the course, students will learn about Indigeneity as a context-specific social formation. It understands Indigeneity as a category of difference with past and present importance. We will read about, discuss, and write about Indigeneity as a social category, along with other social categories it arose alongside (such as race, ethnicity, and nationality), and how it has been mobilized by both those who identify as Indigenous and by those who designate others as Indigenous.

Not offered current academic year

**GBST 221 (S) South Asia: Colonialism to Independence, 1750-1947 CE**

**Cross-listings:** ASIA 221 / HIST 221

**Secondary Cross-listing**

What did colonialism look like in India, Britain's most valuable and populous possession for over two hundred years? How did the British establish their rule over the vast subcontinent? And how did the people who lived there experience and finally overthrow colonial rule? This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from c. 1750 to 1947. This period spans the decline of the Mughal Empire through British colonial rule, South Asians' struggle for independence, and the Partition of India. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and podcasts. One objective of this course is to introduce students to the different political and social processes that led to the creation of India and Pakistan; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

**Class Format:** This class is combination of lectures and discussions. Student participation will be an essential component of the class and the overall evaluation

**Requirements/Evaluation:** class participation, responses papers (2-3 pages), mid-term and final exam

**Prerequisites:** none; open to all

**Enrollment Limit:** 40

**Enrollment Preferences:** history majors if the the class is overenrolled.
Expected Class Size: 25

GBST 226  (F) The Working Globe: North and South Workers in Globalized Production  (DPE)
Cross-listings: SOC 226

Secondary Cross-listing
The course introduces students to the concept of globalization of production by focusing on how workers from distant cities and villages across the Global North and South are joined together in the same transnational labor processes. We will reflect on case studies that trace the real-world production of everyday goods and services like automobiles, garments, retail, and electronics. We will map global supply chains and investigate how they exploit and reproduce global inequalities. Focusing specifically on the labor process and on the condition of workers, students will acquire a grounded perspective on the global economy, as well as on the dynamics underlying precarity, deindustrialization, and uneven development. The key guiding concern for the course will be to understand the relationship between workers of the North and South: Does global production place these workers in a relation of fundamental conflict, or can a community of interest emerge between them?

Class Format: Assignments will require group work and presentations
Requirements/Evaluation: Class participation; 1-2 group presentations; 1 final paper
Prerequisites: None, open to all students
Enrollment Limit: 20

Enrollment Preferences: Preference given to ANTH/SOC majors and GBST concentrators
Expected Class Size: 20
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
GBST 226(D2) SOC 226(D2)

Difference, Power, and Equity Notes: Primarily the course investigates how historical inequalities between countries are reproduced by centering production relations and the site of work. Students will delve deeply into the inequality between workers of the global North and South, and they will also encounter situations where these differences intersect with racial and gendered dynamics.

Not offered current academic year

GBST 229  Performance Practices of India  (DPE)

This course explores ancient and contemporary performance practices in India. Our objects of study will include the text and performance of Sanskrit plays, contemporary and experimental theater productions, as well as forms of dance and ritual. We will discuss dramaturgical structure, staging, acting conventions, gender representation, performer training, the experience and role of the audience, as well as mythological and political themes. Thinking historically and ethnographically, we will seek to understand the aesthetics and social purposes of these practices, in addition to the relationship that performance has with everyday life, contested concepts of the nation, and caste. Throughout the semester we will interrogate the ways in which Western categories such as "classical," "folk," "religious," "traditional," and even the distinction between "dance/theater/music/visual arts" are not indigenous or accurate concepts for organizing thinking about performance in this part of the world.

Requirements/Evaluation: Evaluation will be based on participation in discussion, reading responses, an oral presentation, and one 10-page paper.
Prerequisites: none
Enrollment Limit: 12

Enrollment Preferences: preference for seniors and juniors
Expected Class Size: 12
Grading:

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: We will examine British colonial edicts that prohibited performance practices as a form of social control as well as in the name of Christian morality. From here we will explore how upper-caste Independence era artists and leaders sought to reinvent the arts as vessels of “Indian” identity, at the cost of further marginalizing hereditary performance communities. We will also interrogate how the Indian state has promoted narrow visions of “femininity” and how artists contest religious nationalism.

GBST 231 (S) Music in the Global Middle Ages, ca. 500-1500 (WS)

Cross-listings: MUS 235

Secondary Cross-listing

Spanning 1000 years, the period encompassing the Middle Ages (ca. 500-1500) was a time of experimentation, exploration, and growing interconnection around the world. From economic expansions to developing trade routes and from violent religious crusades to flourishing universities, cities, and courts, opportunities for cultural investment and exchange among regions in Western Europe, North Africa, and Central and East Asia were plentiful, if not always peaceful. In this seminar, we will consider how a global historical perspective shifts our understanding of music in the Middle Ages from one based on hegemonic European progress in isolation to one that reveals a multitude of influences, interactions, and interconnections among people of various cultures, races, and religions both within and outside of the European continent. In this tutorial, we will investigate a series of case studies in order to address how and where these global interconnections took place and what musical practices flourished as a result. We will give special consideration to the following topics: orality and literacy, race and difference, the politics of religion, economic power, and manuscript culture. In grappling with these topics, students will engage in weekly readings on musical and broader historical topics, listening and score analysis of key repertory in modern transcription, and study of original notation through manuscript facsimiles.

Requirements/Evaluation: Students will write and present a 5- to 6-page paper every other week and a 1-2 page response to their partner's paper in the alternate weeks. Evaluation will be based on five papers/presentations, and five responses.

Prerequisites: Ability to read music, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Any student who expresses a strong interest in the course

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Not offered current academic year

GBST 232 (S) Islam in Africa (DPE)

Secondary Cross-listing

Islam in Africa is often relegated to the peripheries in the study of Islam, a religion most associated with Arabs and the Middle East. On the flip side, Islam is also portrayed as foreign to African belief systems and institutions. The relationship between Islam and Africa, however, begins with the very advent of Islam when early Arab Muslim communities took refuge in the Abyssinian empire in East Africa. This course explores the history of Islam and Muslim societies on the African continent by focusing on the localized practices of Islam while also connecting it to Islam as a global phenomenon. The course will begin with a historical focus on the spread of Islam in Africa from East Africa and North Africa in the seventh century all the way to the spread of Islam through Sufi brotherhoods in the eighteenth and nineteenth centuries. The course will also take an anthropological approach, exploring the diverse practices of Islam in African Muslim communities and the social and cultural impact of Islam on African societies. Among the topics the
course will cover include African Muslim intellectual traditions, local healing practices, religious festivals, early modern African Muslim abolitionist movements, and the historical interactions between African and Asian Muslim communities in the Indian ocean world.

Requirements/Evaluation: Two essays during the semester and final project.

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: REL, HIST, ARAB, AFR, GBST majors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 238 (F) Black Voices in Anthropology

Cross-listings: ANTH 238 / AFR 238

Secondary Cross-listing

What names and faces come to your mind when you think about Anthropology? The course introduces students to the lives and work of pioneering Black anthropologists whose contributions are still unknown or overlooked. Through different styles, methods, and theoretical approaches, each of these intellectuals has developed antiracist perspectives on foundational topics in the Social Sciences and the Humanities, contributing to advancing the study of the African continent and the Black Diaspora. Throughout the classes, students will learn about each author’s journeys, which can spark significant changes in how we think about our roles as social scientists within and outside academic boundaries.

Class Format: Students will be required to develop and give a class presentation focused on contemporary Black anthropologists from Africa and the Diaspora.

Requirements/Evaluation: Class participation and attendance (asking questions and leading discussions); weekly e-reading response papers (300-500 words); formal class presentation (individually or in groups); and a final essay or research paper (5-10 pages).

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Should the course be overenrolled, preference will be given to majors and concentrators in Africana Studies, Sociology, and Anthropology.

Not offered current academic year

GBST 241 (F) History of Sexuality

Cross-listings: HIST 292 / REL 241 / WGSS 239

Secondary Cross-listing

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a
commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

**Requirements/Evaluation:** reading responses, two essays, and final research paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Religion, History, and Women's, Gender and Sexuality Studies majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2)

**GBST 242 (S) Americans Abroad (DPE)**

**Cross-listings:** AMST 242 / COMP 242 / ENGL 250

**Secondary Cross-listing**

This course will explore some of the many incarnations of American experiences abroad from the end of the 19th century to the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war, peace, and pandemic. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler’s expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? How did recent lockdowns and border closings impact and/or interrupt these complex experiences? Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors and artists we will study chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their (and our) concept of “home” into something that reflects individual identity, and not one imposed by any national culture–American or foreign.

**Requirements/Evaluation:** Each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student's own experiences.

**Prerequisites:** Any literature course at Williams or permission of instructor.

**Enrollment Limit:** 18

**Enrollment Preferences:** Comparative Literature, English or American Studies majors, and/or students who have studied away or plan on doing so, and/or students who are from international and/or bilingual (or multilingual) backgrounds.

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

GBST 242(D2) AMST 242(D2) COMP 242(D1) ENGL 250(D1)

**Difference, Power, and Equity Notes:** We will read and analyze primary materials and literature that reflect on Americans who chose, or were forced
to, reinvent themselves abroad to escape oppressive situations in the United States related to gender, class, race, or political views. The socio-historical context of each writer will be crucial to understanding their situations. Students will write critical papers, and their own narrative in which they reflect on a situation of personal dislocation, either while traveling, or at home.

GBST 243 (S) Anti-Muslim Racism: A Global Perspective (DPE)

Cross-listings: REL 247

Primary Cross-listing

The racialization of Islam and Muslims has been constitutive to how they have been imagined in Europe and elsewhere. This course looks at how difference works and has worked, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity. It goes back to the founding moments of an imagined white (at the beginning Christian) Europe and how the racialization of Muslim and Jewish bodies was central to this project, and how anti-Muslim racism continues to be relevant in our world today. The course not only show how Muslims were constructed as subjects in history, politics and society from the very beginning of the making of Europe and the Americas to the end of the Cold War to the post-9/11 era. Rather, it also looks at how Muslims live through Islamophobia. It looks at processes of racialization of Muslims within the Muslim community and between Muslim communities, while also considering which agencies Muslims take to determine their own future. The course draws from anthropology, gender studies, history, political science, religious studies, postcolonial studies, decolonial studies, and sociology.

Requirements/Evaluation: Active class participation, two response papers, and a comprehensive, open-book and open-note final exam.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Global Studies concentrators and Religion majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Unit Notes: Also qualifies for the GBST Urbanizing World track

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
REL 247(D2) GBST 243(D2)

Difference, Power, and Equity Notes: The course critically examines difference, power, and equity. Thematically, it looks at the racialization of Islam and the intersection of race, religion, class and gender in the construction of the ‘Muslim problem’ from a historical as well as a global contemporary perspective. It aims to promote a self-conscious and critical engagement with the practice and experience of difference, especially as it relates to the dynamics of power in structuring that experience.

GBST 249 (S) Penning the Path: Writing and Publishing Black Studies

Cross-listings: AFR 249 / AMST 250

Secondary Cross-listing

Since the mid-20th century, Black intellectuals from Africa and the Diaspora have founded seminal journals within and beyond academic boundaries. Despite being separated by global distances and different contexts, these initiatives have decisively contributed to the emergence and consolidation of Black and Pan-African studies. Presence Africaine, founded in Paris in 1947 by Senegalese intellectual Alioune Diop; Quilombo, first published in 1948 by the Afro-Brazilian intellectual Abdias do Nascimento; and The Black Scholar, founded in California in 1969 by Robert Chrisman, Nathan Hare, and Allan Ross are just a few groundbreaking examples. From this global perspective, students will explore these and other cornerstone journals which paved the way for the emergence of Black and Pan-African Studies in the US and abroad. Additionally, the course aims to encourage students to be part of a collective effort to relaunch Kaleido[scopes]: Diaspora Re-imagined, a student led-journal created in 2014 in the Africana Studies Department
Class Format: Students will be required to develop and give a class presentation focused on pioneering Black Studies journals.

Requirements/Evaluation: Class participation and attendance (asking questions and leading discussions); weekly e-reading response papers (300-500 words); formal class presentation (individually or in groups); final projects (such as essays, papers, interviews, and audiovisual creations) aimed to be published in the new edition of Kaleido[scopes]: Diaspora Re-imagined (Spring 2024).

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Students interested in expanding their knowledge and skills in writing and publishing, focusing on Black Studies/Africana journals. Should the course be overenrolled, preference will be given to Africana Studies students.

Migration remains an integral aspect of Black experiences. This comprehensive course, formerly titled "Black Migrations: Histories of African Diaspora in the US," centers the histories of Black migration to and within the United States. Migration includes the involuntary, forceful movement of populations, but it also comprises voluntary movement of populations that seek new economic opportunities. Therefore, this course covers three historical periods of migration: 17th-19th century (Transatlantic slave trade), early 20th century (Great Migration and the arrival of Caribbean migrants to major urban centers in the United States), and the late 20th and early 21st century (Migration continental Africans to the US). This course will ask the following questions as it relates to Black migration: What were the social, political, and economic factors that contributed to the migration of Black populations to and within the US especially in the 20th and 21st century? How do current-day Black migration patterns differ from earlier periods? In what ways can migration be utilized as a form of resistance to oppression both domestically and internationally?

South Asia is home to around 2 billion people (over 24% of the world), making it the most populous and densely populated region in the world. The region is also one of the poorest in the world and lags in human development. Ethnic, linguistic, and religious diversity is offset by common cultural traditions and practices that serve to unite the people of the Indian Subcontinent. The course introduces students to the comparative politics of South Asia, highlighting the complexities and potential of the region. Every week we explore a different component of South Asian politics. The course covers the creation of the states of modern South Asia, partition and independence, democratization, electoral politics and political parties, economic and social development, ethnic identity and conflict, and the contemporary regional challenges of democratic backsliding and climate change.

Requirements/Evaluation: three 5-7 page papers or one research paper; presentation; class participation

GBST 256  Electoral Politics in the Developing World

Electoral politics in the developing world often differs from democratic politics in Western Europe and the U.S. Electoral volatility, decrepit state institutions, weak parties, clientelism, and electoral violence in developing democracies complicate foundational theories on representation and accountability. The course surveys the electoral politics of low and middle-income democracies in the developing world, investigating its similarities and differences with the historical and contemporary politics of developed democracies. It examines work on electoral systems, formal and informal institutions, bureaucratic politics, political parties, party systems, clientelism, ethnic politics, and political violence. We will draw on case studies from Latin America, Africa, South Asia, Southeast Asia, and the Middle East to analyze the effectiveness of these theories. Assignments focus on crafting solutions to contemporary political challenges in the developing world.

Requirements/Evaluation: one to two papers, midterm, group policy brief, presentation

Prerequisites: no prerequisites

GBST 262 (F)  Paper Trails  (DPE)

Cross-listings: SOC 262 / STS 262

Secondary Cross-listing

Long before the invention of the passport, states or state-like entities sought to document and manage populations and discipline bodies. This course invites students to critically reflect on documentation practices and systemic violence, particularly against racial, ethnic, sexual, and political minorities. Students will explore identity-making through documentary practices such as the three-generation life history, a biographical form that Soviet-allied countries used to reward loyalty and punish disloyalty. Labels, such as a criminal record or pre-existing health conditions, also trail or precede individuals their whole lives. Students will grapple with what happens when the paper trail goes cold—when identification documents are invalidated, birth certificates withheld, household registries purged, and archives destroyed. Students will explore the rise of surveillance and biometric data alongside the actors, technologies, and industries that try to circumvent them in places such as the Xinjiang Uyghur Autonomous Region and along the US-Mexico border. In this project-based course, students will exhume paper trails and imagine alternative ways to create, alter, and subvert them.

Requirements/Evaluation: thoughtful and consistent class participation, facilitation of guest speakers, Special Collections visit, project memos, and
final project and presentations

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** Anthropology and sociology majors, Global Studies concentrators; Science and Technology Studies concentrators. If the course overenrolls, the instructor will send out a Google Form to make enrollment decisions.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**GBST 279 Islam on the Indian Ocean**

While colonial and Eurocentric geographies speak in terms of continental separation, historically the continents of Africa and Asia have been
connected to one another through a dual link: Islam and the Indian Ocean. Indian Ocean trade and travel have historically connected East Africa, the Arabian Peninsula, South Asia, and South East Asia, shaping the lives of people and communities who lived not only along the coasts but also inland. This course focuses on these transregional connections, looking at the Indian ocean as a connective space that binds people and regions together rather than separating them. The course will also examine the role of Islam as a religious, economic, social and political force that brought together Muslim communities throughout the regions along the Indian ocean. In exploring these connections, the course will cover a broad historical period, from the 7th century with the rise of Islam to European colonialism and the emergence of a global economy in the nineteenth century.

GBST 287 (F) Global Sustainable Development (DPE)

Cross-listings: ENVI 297

Secondary Cross-listing

In 2015, the United Nations launched the Sustainable Development Goals, an ambitious multi-pronged effort to eliminate poverty, improve health outcomes, advance clean energy, address the effects of climate change, and support more equitable forms of life on earth. This course explores the historical antecedents and contemporary manifestations of global sustainable development, a constellation of ideas and a set of policy imperatives. This course will ask: what is sustainability and how did it emerge as a key paradigm in the present? Relatedly, how have different organizations and actors worked to address entrenched global challenges? Students will engage a range of materials, including policy documents from the United Nations, World Bank, and international non-governmental organizations. Students will also explore critical scholarship on the possibilities and limitations of global development. Together we will grapple with ways to build more sustainable futures.

Requirements/Evaluation: Class discussions; 2 Policy Analysis Papers (4-6 pages each); Class presentations; Final Take-Home exam (8-10 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Envi majors and concentrators

GBST 294 (S) Victimhood Nationalism in Global History & Memory (DPE) (WS)

Cross-listings: HIST 395

Primary Cross-listing

As globalism of the 21st century has shifted its focus from imagination to memory, the global memory culture focusing on victims has dawned on us as an undeniable reality with the entangled memories of: Apartheid, American slavery, and white settler genocides of the indigenous peoples; German empire's colonial genocide of the Nama and Herero in Namibia and the Nazi Holocaust; the Armenian genocide and the Holocaust; Vietnam War and Algerian war; Rwandan genocide and ethnic cleansing in the Balkans; Japanese military "comfort women" and gendered violence during the Yugoslav Wars; forced sexual labor in the Nazi concentration camps and sexual slavery of the Islamic State; political genocide of Stalinism and the Latin American military dictatorships; civilian massacres of developmental dictatorships in the global Cold War era. Global memory formation intensified the victimhood competition among national memories. Victimhood nationalism epitomizes nationalism's metamorphosis under the globalization of memory in the 21st century. This course will trace the mnemo-history of victimhood nationalism, focusing on the entangled memories of Poland, Germany, Israel, Japan, and Korea in the global memory formation. Other case studies, including former Yugoslavia, post-9/11 America, will also be discussed.

Requirements/Evaluation: Class participation, pop quizzes and a final research paper (approximately 5000 words)

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: GBST concentrators and History majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

GBST 304 (S) Sacred Custodians: Environmental Conservation in Africa (DPE)

Cross-listings: HIST 304 / ENVI 304 / AFR 335

Secondary Cross-listing

In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of deforestation. Ken Saro-Wiwa was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental crisis that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction, game parks, desertification, wildlife and hunting, traditional practices, and climate change.

Requirements/Evaluation: Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and one exam.

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: If course is over-enrolled, preference to History Majors and students with a demonstrated interest in African studies.

Expected Class Size: 15-20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 304(D2) GBST 304(D2) ENVI 304(D2) AFR 335(D2)

Difference, Power, and Equity Notes: This course will intensively explore the question of how various global and local actors have defined environmental degradation and promoted approaches to conservation in Africa. It guides students through an examination of the different power dynamics that have shaped environmental conservation thought and practices on the continent. This course, therefore, provides a critical lens through
which to examine the inequalities rooted in race, gender, and other forms of difference

GBST 306 (F) Transcending Boundaries: The Creation and Evolution of Creole Cultures (DPE)

Cross-listings: COMP 310 / RLFR 320 / AFR 306

Secondary Cross-listing

Born out of a history of resistance, Creole cultures transcend racial boundaries. This course provides a comprehensive framework for understanding the creation of Creole nations in various parts of the world. Beginning with an examination of the dark history of slavery and French colonialism, we will reflect upon the cultural transformation that took place when people speaking mutually unintelligible languages were brought together. We will then delve into the study of how deterritorialized peoples created their languages and cultures, distinct from the ones imposed by colonizing forces. As we journey from the past to the present, we will also explore how international events such as a worldwide pandemic, social justice, racism, and police brutality are currently affecting these islands. Potential readings will include prominent authors from different Creole-speaking islands, including Frantz Fanon and Aimé Césaire from Martinique, Maryse Condé from Guadeloupe, Ananda Devi from Mauritius and Jacques Roumain from Haiti. Conducted in French with introductions to different creoles.

Requirements/Evaluation: Active class participation, three papers (of 3-4 pages each), presentation, final research paper (7-8 pages)

Prerequisites: Any RLFR 200-level course or above, or by permission of instructor.

Enrollment Limit: 18

Enrollment Preferences: All are welcome. If overenrolled, preference will be given to French majors and certificate students; Comparative Literature majors; Africana Studies students; Global Studies students; and those with compelling justification for admission

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 310(D1) RLFR 320(D1) GBST 306(D2) AFR 306(D2)

Difference, Power, and Equity Notes: This course qualifies for a Difference, Power, and Equity requirement because it examines the history of slavery as related to French colonialism in different parts of the world. It also considers International issues of social justice, racism and police brutality.

Not offered current academic year

GBST 312 (S) The Mughal Empire: Power, Art, and Religion in India

Cross-listings: REL 312 / ASIA 312 / HIST 312

Secondary Cross-listing

Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith—much larger than any European empire in the early modern world—the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor’s memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

GBST 320 (F) The Nile (DPE)

Cross-listings: ARAB 308 / AFR 350 / ENVI 335 / HIST 308

Secondary Cross-listing

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It was on the banks of this river that the great Egyptian empires were founded that led to the building of some of humanity’s most astounding structures and artworks. While the Nile seems eternal and almost beyond time and place, now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This alarming nexus of demography, climate change, and economic development has led to increasingly urgent questions of the Nile’s future. Is the Nile dying? How has the river, and people’s relationship with it, changed over the last century? This course will consider the history of the Nile and and its built and natural environment. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. By following an imaginary droplet flowing from tributaries until it makes its way into the Mediterranean Sea, we will learn about the diverse peoples and cultures along the way. We will evaluate the numerous attempts to manage and control the Nile, including the building of big dams, and the continuous efforts to utilize the river for economic development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the major urban centers with the Nile and whether the tensions among Nile riparian states will lead to “water wars” in East Africa and the Middle East.
GBST 322  (F)  Waste and Value

Cross-listings:  ENVI 322 / ANTH 322

Secondary Cross-listing

What is trash and what is treasure? In what ways does value depend upon and necessitate waste, and how is the dialectic between the two inflected by culture? When we 'throw away' things at Williams College, where exactly do they go, and who handles them 'down the line'? What are the local and global economies of waste in which we are all embedded and how are they structured by class, race, caste, gender and nation? In this seminar we critically examine the production of waste - both as material and as category - and its role in the production of value, meaning, hierarchy and the environment. Readings include ethnographic accounts of sanitation labor and social hierarchy; studies of the political and environmental consequences of systems of waste management in the colonial period and the present; and theoretical inquiries into the relation between filth and culture, including work by Mary Douglas, Dipesh Chakrabarty and Karl Marx. Geographically the foci are South Asia and North America. There is also a fieldwork component to the course. In fieldtrips we follow the waste streams flowing out of Williams - to an incinerator, a sewage treatment plant, recycling and composting facilities and other sites - and students explore in individual, participant-observation-based research projects the everyday social life of waste in our communities.

Requirements/Evaluation:  regular posting of critical response papers, field notes on waste streams, research-based final paper

Prerequisites:  none

Enrollment Limit:  12

Enrollment Preferences:  All students are welcome to the course.  If overenrolled, preference will be given to majors in Anthropology and Sociology and concentrators in Environmental Studies and Asian Studies.

Expected Class Size:  12

Grading:  yes pass/fail option,  no fifth course option

Attributes:  ENVI Humanities, Arts + Social Science Electives
Cycles of rise and collapse of civilizations are common in our human past. Among the most fascinating cases are those of empires, conquest-based states that encompass a number of different ethnicities, polities and peoples. However, their rise and often rapid collapse begs an important question: how stable have empires been in human prehistory? Are they intrinsically unstable political forms? The course will address these questions by examining the major empires of the Old and New World in pre-modern history: Persian; Assyrian; Mongol; Roman; Qin Chinese; Ottoman; Aztec; and Inca empires. Using readings by political scientists, historians, epigraphers, archaeologists and political anthropologists, we will consider the causes of the expansion and collapse of these empires. We will also explore their sociopolitical and economic structures as mechanisms for their maintenance in order to provide a cross-cultural comparison of the differential success and final decline of all these empires.

Class Format: seminar

Requirements/Evaluation: research paper, class presentation and active participation

GBST 335 (F) Nowheres (DPE)

Cross-listings: SOC 335

Secondary Cross-listing

We live in a world of nation-states. The world map, according to journalist Joshua Keating, is "itself as an institution, an exclusive club of countries" that rarely accepts new members. Throughout the course, we question how countries conquered the world and became the taken-for-granted political unit. We do so, paradoxically, by looking at contemporary nations that do not appear on the world map. These include nations without statehood, such as Somaliland; those that span countries, including indigenous nations across the US and Canada; and nations that have lost their countries, such as Palestine and South Vietnam. By interrogating "nowheres," we tease out what it means to be a country, and pinpoint when and why the definitions do not apply uniformly. Students will reflect on why the world map has been so remarkably static since the end of the Cold War. We will further probe the social, political, and human costs of the exceptions to this general rule. Students will raise questions and attempt answers to what our interconnected world means for "nowheres" looming on the horizon--nation-states that, as a result of climate change, will soon vanish.

Requirements/Evaluation: Thoughtful and consistent class participation, visits to Sawyer Library and WCMA, three short response papers, and a final assessment on a "nowhere" of students' choosing

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology majors, Global Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

SOC 335(D2) GBST 335(D2)

Difference, Power, and Equity Notes: This course asks students to grapple with the asymmetries of modern statehood--why some places meet the criteria for statehood but are denied it, while others fall short of formal definitions but are still considered states. Students will assess the stakes of statehood for places that cannot achieve it or do not aspire to. They will creatively marshal these lessons to become the class expert on a "nowhere" that provides us with a lens for interrogating the world map as it currently exists.

Not offered current academic year
American Studies emerged with the idea that transdisciplinarity is crucial for comprehending the concept of America. Building on this framework, this course foregrounds transepistemology as an equally important method for understanding the dynamics of America, both locally and globally, at the level of the world-system. In addition to tracing the consubstantial genealogy of racism and capitalism, we will examine their local manifestations, mainly in Asia, Europe, Africa, and America, as well as their current geopolitical, social and economic outcomes, especially the reproduction of systemic inequalities and domination. Through an interdisciplinary approach and engagement with a variety of resources from economics, anthropology, sociology, critical race theory, comparative ethnic studies and decolonial thinking, this course will address the following: i) review the different forms of economic organization of human societies throughout history (with special focus on the work of Karl Polanyi); ii) trace the epistemological origins of capitalism and investigate what makes capitalism and its crises unique; iii) trace the genealogy of the concepts of race, racism and discrimination; iv) interrogate the intersection of racism and capitalism in different traditions of thought and epistemologies in Asia, Europe, Africa, and the Americas. For example, we will read key texts from "French theory", (Deleuze, Foucault, etc.), US Black tradition, (W. E. B. Du Bois and Cedric Robison, etc.), Chinese social sciences (Li Shenming, Cheng Enfu, etc.) and African economy and anthropology (Mahdi Elmandjra, Cheikh Anta Diop, etc.) and Latin American decolonial philosophy (Quijano, Dussel, Mignolo, etc.) By doing this, we will situate the rupture that capitalism and racism introduced at the level of global history, which is the first step to conceptualizing racism and capitalism. After showing that the development of capitalism and racism are historically linked, we will proceed to examine the manifestations of their interaction at local and global levels. Locally, we will focus on the effects of racism on the labor market: discrimination in hiring, wage discrimination, segregation, duality and stratification of the labor market, etc. We will also analyze how sexism and racism play out in the labor market in racialized communities. We will also reflect on the links between racism and politics and their effects on economic policies. From a more global perspective, we will analyze the roots of the global economic crisis and the resulting geopolitical issues at the international level and the racist dynamics they generate. Overall, as we will move through readings, we will situate the United States in a cross-regional perspective that would enable us to develop critical insights concerning links and convergences between capitalism and racism.

Requirements/Evaluation: Requirements: An active participation is required of students in terms of engaging in the in-class debates and weekly response paper as a feedback on the lectures as well as a final paper. Evaluation: Participation 25%; Weekly Response (350-500 words) 30%; Final Research Paper (12-15 pages) 45%

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: American Studies majors and seniors

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 345 (F) Wonderland(s): Alice in Translation

Cross-listings: ENGL 365 / COMP 345

Secondary Cross-listing

“What do you mean by that?” said the Caterpillar, sternly. “Explain yourself!” “I can't explain myself, I'm afraid, Sir,” said Alice, "because I'm not myself, you see?” The confusion around personal identity, which Alice is seen to experience as she makes her way through Wonderland, can be examined productively as an allegory of translation. Beyond its representation of the developmental and socio-cultural transitions of a child, what happens to
Alice, a seminal text in children's literature, when it travels down the rabbit hole to a new linguistic wonderland? For starters, the seven-year-old girl becomes Marie in Danish, Anih in Maori, Al-chan in Japanese, and Paapachchi in Kannada. Then there are the highly idiosyncratic humor, word play, embedded English nursery rhymes, and iconic illustrations by Tenniel. How do they fare in new linguistic, cultural, and even genre contexts? Lewis Carroll told his publisher in 1866: "Friends here seem to think the book is untranslatable." And yet. Over 200 translations later, including Kazakh, Shona, Papiamento, Braille, and Emoji, Alice continues to delight and confound readers all over the world and to pose myriad challenges as well as opportunities for translators. This course will serve as an introduction to the theory and practice of translation using Carroll's Alice as an anchoring primary text. We will examine key disciplinary issues and concepts, such as equivalence, domestication, foreignization, and autonomy, and challenge the old canard that translation leads ineluctably, and exclusively, to loss.

Requirements/Evaluation: active, regular, and substantive class participation; discussion leading; weekly translation exercises; 2-3 short writing assignments; final project

Prerequisites: students must have at least three years of college-level second-language instruction already in place, or the equivalent (advanced proficiency), or permission of the instructor

Enrollment Limit: 16

Enrollment Preferences: COMP majors; language majors; language students

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

**GBST 348 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference (DPE) (WS)**

**Cross-listings:** RUSS 348 / SOC 348

**Secondary Cross-listing**

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their post-socialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as Russia's invasion of Ukraine, or the lingering tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Ukraine and Russia, but will also read comparative studies, as well as works on East Germany and Georgia. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the post-socialist condition.

Requirements/Evaluation: 5-page paper every other week, written comments on the partner's paper in alternate weeks

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Anthropology, Sociology, and Russian majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

**GBST 357 (S) Democratization in India and Pakistan**

**Cross-listings:** PSCI 356 / ASIA 356

**Secondary Cross-listing**

Democratization has had both successes and failures in postcolonial South Asia. The region is home to the world's largest democracy in India, often cited as an unlikely and puzzling success story. At the same time, periods of democratic rule in Pakistan and Bangladesh are broken up by military interference, Sri Lanka’s democracy is plagued by ethnic conflict, and Afghanistan has been unable to sustain democracy due to weak state institutions. What explains this diverse and uneven pattern of democracy in South Asia? The course delves into theories on political parties, ethnic politics, electoral institutions, civil-military relations, political violence, state-building, inter-state conflict, and civil wars to understand the variation in regime type in the region. It covers domestic and international factors that lead to democratization and democratic backsliding. We will focus on the role of political parties in democratization; the emergence of political dynasties; changes in the characteristics of the political elite; investigate claims of democratic deepening; and examine the effect of inter-state wars, land disputes, and insurgencies on democratic stability in the region.

**Requirements/Evaluation:** three 5 to 7-page papers or one research paper; presentation; class participation

**Prerequisites:** previous course in political science or permission of the instructor

**Enrollment Limit:** 16

**Enrollment Preferences:** preference given to political science majors

**Expected Class Size:** 14

**Grading:** yes pass/fail option, yes fifth course option

**Not offered current academic year**

---

**GBST 358 (F) Religion and Law (DPE)**

**Cross-listings:** REL 358

**Secondary Cross-listing**

This course explores the concept of "law" through an investigation of the complex relationship between law, ethics, and religion. In doing so, we will look at legal theoretical texts as well as legal anthropological studies to pose critical questions about the nature of law, the functioning logic of law, the relationship between law and lived experience, and the legal construction of categories and facts. In the course, we will consider two intersections of religion and law: the particularities of religious legal traditions and the relationship between religion and secular law. Topics will include the secular legal construction of religion, the relationship between law and ethics, the nature of legal hermeneutics, and the racial, gender, and sexual politics of legal interpretation.

**Requirements/Evaluation:** reading response, two essays, final research paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** Religion majors

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)
This course is cross-listed and the prefixes carry the following divisional credit:
GBST 358(D2) REL 358(D2)

Difference, Power, and Equity Notes: Law is seen as both a repressive and liberatory force. In taking a critical approach to the nature of law and legal interpretation, this course prepares students to think about the language of "rule of law," "order," and "justice" as a complex relationship between law and power.

Not offered current academic year

GBST 365  (F)  Race and Psychoanalysis: Slavery and the Psyche  (DPE)

Cross-listings:  ENGL 320 / AMST 365 / AFR 365

Secondary Cross-listing
This course explores slavery and the psyche through a constellation of Black diasporic literary, visual, and theoretical texts from the US, Caribbean, and Africa. Unwieldy and generative, the opacity of race within the field (and practice) of psychoanalysis shares a fraught intimacy with the co-constitutive terrains of violence and race that form the unconscious. Querying what escapes the hermeneutics of psychoanalysis and aesthetics in the fantasies race engenders, we will examine modernity's articulation of racialization through conceptualizations--both fantasmatic and real--of self, world, knowledge, and possibility. Course texts may include: Edwidge Danticat's The Farming of Bones, Adrienne Kennedy's Funnyhouse of a Negro, Bessie Head's A Question of Power, Arthur Jafa's APEX and Love is the Message and the Message is Death, Conceição Evaristo's Poncific Vicência, Lars von Triers Manderlay, Charles Burnett's Killer of Sheep, Derek Walcott's "Laventille"; and, selections from Sigmund Freud, Jacques Lacan, David Marriott, Kathleen Pogue White, Franz Fanon, Hortense Spillers, Nathan Gorelick, Jaqueline Rose, Jared Sexton, Melanie Klein, Jacques-Alain Miller, Melanie Suchet, and Jean Laplanche. Note: This course will reflect the Continental tradition in philosophy. Student should be familiar with the basic interventions of psychoanalysis.

Requirements/Evaluation:  Weekly discussion posts and questions, 2 Papers, 10-12 pages, Research presentation

Prerequisites:  One Writing Skills or writing intensive course; one intro course in one of following: American Studies, Africana Studies, Comparative Literature, English, Global Studies, Philosophy, Psychology, Women, Gender, and Sexuality Studies

Enrollment Limit:  15

Enrollment Preferences:  Juniors or Seniors with majors or concentrations in any of the areas: American Studies, Africana Studies, Comparative Literature, English, Global Studies, Philosophy, Psychology, and Women's, Gender, and Sexuality Studies

Expected Class Size:  15

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ENGL 320(D1) AMST 365(D2) GBST 365(D2) AFR 365(D2)

Difference, Power, and Equity Notes: This course examines racialization as it relates to the racial violence of slavery on the psyche. Racialization as a process will be connected to concepts of self, world, and knowledge. Black diasporic literary, visual, and theoretical texts from the US, Caribbean, and Africa will be at the forefront of the course.

Attributes:  AMST Critical and Cultural Theory Electives

Not offered current academic year

GBST 369  (F)  Indigenous Narratives: From the Fourth World to the Global South  (DPE) (WS)

Cross-listings:  COMP 369 / HIST 306 / ARAB 369

Secondary Cross-listing
In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales,
Amazigh poetics in the Maghreb, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? What is the connection between the recent "boom" of English translations of Indigenous texts and neoliberalism, multiculturalism and neo-colonialism? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

**Requirements/Evaluation:** active class participation, several short response assignments (3-4 pages), two film reviews (1 page), a performance project, and a final paper (7-10 pages)

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Comparative Literature majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

COMP 369(D1) HIST 306(D2) ARAB 369(D1) GBST 369(D2)

**Writing Skills Notes:** This course will enable students to write weekly while engaging with various forms of writing skills: articulating arguments in short response papers (3-4 pages each), developing visual criticism through writing two film reviews, (1 page each), journaling through writing a personal reflections on a performance project, and honing research language in producing a final paper of 7-10 pages. Instructor's feedback and peer review sessions will include review of drafts and argumentative structures.

**Difference, Power, and Equity Notes:** At the heart of this course is the history of global Indigenous struggle for liberation and decolonization. The various novels, short stories, poems, films and other texts that students will engage with narrate histories of colonial dispossession, racial oppression, economic subjugation and dehumanization of minoritized Indigenous communities in the Americas, North Africa and the Middle East.

**Attributes:** GBST Borders, Exiles + Diaspora Studies

---

**GBST 373 (F) A Global History of Mass Dictatorship (DPE)**

**Cross-listings:** HIST 377

**Primary Cross-listing**

What if the majority supports dictatorship? Is it dictatorship or democracy? How far is the contemporary American democracy from Alexis Tocqueville's observation of America as the 'tyranny through masses'? What's the dividing line between democracy and dictatorship? How could the communist regime use the metaphor of 'people's democracy' to justify the proletarian dictatorship? How distant is Mao Zedong's 'dictatorship by the masses' from the plebiscitary democracy? How different is the French Jacobin's 'Sovereign dictatorship' from the Fascist's 'new politics' based on popular sovereignty? How different is Jacobin's 'totalitarian democracy (Jacob Talmon)' from the Cold War paradigm of totalitarianism? 'Mass dictatorship' as a historical oxymoron is a hypothetical answer to those questions. This course is designed to encourage students to respond independently to those questions. Putting comparatively diverse dictatorships, including fascism, Nazism, Bolshevism, Maoism, developmental dictatorships, and (neo-)populisms in a global historical perspective, this seminar course would raise doubt about the conventional binary of democracy and dictatorship and problematize the Western democracy. This course is motivated by "how to democratize contemporary democracy." As a participatory observer of the American presidential election 2024, we will investigate a global history of mass dictatorship with a critical gaze.

**Requirements/Evaluation:** Class participation: 30%; Pop quizzes: 20%; There will be four quizzes. Each quiz, five points worth, contains questions about recent readings, lectures, discussions, and other class discussions. Final Essay: 50%; Instructions will be given in class several weeks in advance. The final essay needs to be written as an answer with two tiers of argument and supportive examples. The length is about 2,000 words.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** GBST concentrators and HIST majors

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option
**Difference, Power, and Equity Notes:** Taking a global, comparative approach, this course evaluates the experiences of people on different continents with dictatorships and how these authoritarian systems and regimes operate differently in each context.

**GBST 386 (F) Chinese Societies through the lens of COVID-19**

**Cross-listings:** CHIN 421 / ASIA 421

**Secondary Cross-listing**
The COVID-19 pandemic has profoundly changed the world. How did the Chinese-speaking regions in Asia, including Mainland China, Taiwan, and Singapore, respond to the pandemic during its earlier years? How did their responses reflect the political and economic systems as well as the cultural values of Asian societies? What were the effects of these responses on the regions and people's daily lives? In this course, students will gain a deeper understanding of Chinese-speaking societies through an analysis of the "public" and "private" literature pertaining to the lived experiences of the COVID-19 pandemic. Through readings and discussions of various materials such as government records, scientific publications, journalistic writings, personal diaries, and online narratives, students will explore a wide range of issues related to the politics, economy, public health, and sociocultural issues of Asian societies. Simultaneously, Chinese language learners will further enhance their language proficiency and intercultural competency by engaging in complex discourse in the target language. All readings and discussions are in Chinese.

**Requirements/Evaluation:** Evaluation will be based on CLASS performance, homework, two short papers (4-5 pages), and one longer paper (8-10 pages).

**Prerequisites:** CHIN 402 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Current or prospective majors in the Department of Asian Languages, Literatures, and Cultures; Asian Studies, Global Studies and Public Health concentrators

GBST 413 (F) The Big Ideas: Intended and Unintended Consequence of Human Ambition (DPE) (WS)

Cross-listings: HIST 413 / ARAB 413 / ENVI 413

Secondary Cross-listing

What have been the most consequential ideas of the last 100 years? This course will explore some of the more audacious and ambitious plans to alter natural and urban environments in the late 19th century to the early part of the 21st, specifically those that sought to improve the human condition through science, engineering, and technology. By building big bold things, politicians around the globe sought to bring prosperity to their nation and embark on a path of modernity and independence. Through an intellectual, political and environmental history of major construction projects such as the building of the Suez Canal and the Aswan Dam, extensive river valley developments in Iran, Turkey and Iraq, and utopian and futuristic city planning in western Asia, students will consider how, with the benefit of hindsight, to best evaluate the feasibility of such bold schemes. Who has benefitted and who has not, what have been some of the unanticipated consequences, what was sacrificed or neglected, and what do these projects tell us about the larger processes of global capitalism, decolonization, and climate change?
Requirements/Evaluation: A presentation, shorter writing assignments and a longer research paper (20-25 pages) in the end. Students will submit shorter drafts of final paper in order to receive constructive feedback prior to final submission.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Seniors, especially History, Arabic and Environmental Studies majors.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 413(D2) GBST 413(D2) ARAB 413(D2) ENVI 413(D2)

Writing Skills Notes: A 20-25 page research paper will be required at the end of the semester. Prior to getting to that point, students will submit an annotated bibliography, a two page proposal, a five and eventually a 10 page draft. Each draft will receive extensive comments and suggestions from peers and instructor. In this way, the student will think about the process of writing and the best way to set themselves up for success.

Difference, Power, and Equity Notes: This course examines how a number of different nations in Africa and Asia sought to improve the living conditions of the masses through major construction project. Though ostensibly these schemes were supposed to improve the livelihood of all, often they primarily benefitted the few - the urban elite - and not the general population. This course will therefore explore how certain class, gender and racial lines were solidified and maintained through economic development plans.

Attributes: HIST Group E Electives - Middle East

Not offered current academic year

GBST 414 (F) Displacement: Global Histories of Refugees and Forced Migration (DPE) (WS)

Cross-listings: ARAB 414 / HIST 402

Secondary Cross-listing

The Middle Eastern refugee has become a central figure in debates on migration, asylum, and the right to belong in Europe, Asia, and North America. Often stereotyped as threatening, alien, and rootless, these migrants are generally depicted as lacking histories and by extension not worthy of consideration or empathy. This course invites students to understand some of the most tragic humanitarian crises of our time and the massive involuntary displacements provoked by war, violence, and/or climate change. Taking a global perspective, this seminar examines the history of displacement, refugees, migration, diaspora in a focusing on the nineteenth century through the present. With special attention to the historical experience of various peoples of the Middle East, the course will start with theoretical approaches to the study of migration and then delve into case studies. A range of different moments of displacement will be analyzed such as the experiences of Armenians, Jews, Palestinians, Syrian, Iraqis, and Kurds. By examining the human geography and politics of forced displacement and migration, this course will address a number of important academic and political questions: what makes a history written by, about, and for displaced people powerful? How can writing from the perspectives of refugees challenge core debates about identity, the nation and borders? How does the focus on displacement help in understanding the nature of war and conflict?

Requirements/Evaluation: Final 25 page research paper, several drafts of paper, class presentations and in class writing exercises.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: History and Arabic Studies majors and Global Studies concentrators.

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 414(D2) GBST 414(D2) HIST 402(D2)

Writing Skills Notes: This research seminar will involve the writing of a final 25 page paper. Prior to that stage, each process of writing will involve moments of feedback and sharing. Students will submit a proposal early on in the semester and then write an outline. These will receive peer and instructor feedback. They will then submit a five page draft in October, a 10 page draft in November, before the final submission in December. In this way, they will have opportunities to rework and improve their writing.
Difference, Power, and Equity Notes: This course takes a comparative approach by exploring the predicament of some of the most vulnerable people in the world, i.e., displaced peoples and refugees. The course will consider their legal status and their experience of leaving their homes due to wars or natural disaster. The area of study is the Middle East and we will examine the historical experience of a number of different people in the region including Kurds, Palestinians, Sephardi Jews, and Syrians.

Attributes: HIST Group E Electives - Middle East

Fall 2024

GBST 480 (F) Media and Society in Africa (DPE) (WS)

Cross-listings: AFR 381 / HIST 480

Secondary Cross-listing

The Media have long played important roles in African societies. As early as the second half of the 19th century, African intellectuals were using print technology to address the people. As radio technology was in its infancy during the first half of the twentieth century, Africans were gathering around re-diffusion stations and later around single receivers to listen to news and entertainment programming. In this tutorial, we will examine these histories of media and media technologies on the continent. Ultimately, we will explore the roles that media played in serving particular community needs and how communities also adapted new media technologies to fit local conditions. Media content has historically been determined based on standards beyond viewers', readers' and listeners' control. We will examine the influences that editors and political leaders on the continent have exerted on content as well as what forces they responded to. We will also further explore the media's role in major events on the continent, from governmental changes to the ending of apartheid in South Africa and the role that media have played in areas of conflict.

Requirements/Evaluation: Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

Prerequisites: This course open to all students

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to history majors and students with prior experience with African history. If the course is over-enrolled, students may be asked to complete a questionnaire to determine enrollment

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 480(D2) AFR 381(D2) HIST 480(D2)

Writing Skills Notes: Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular feedback and critiques - both oral and written - from the professor, as well as oral critiques from tutorial partners.

Difference, Power, and Equity Notes: Modern media developed in Africa as means of control and cultivating dutiful colonial subjects. However, media then emerged as sites of contestation and even tools with which colonial subjects challenged colonial rule. They have continued to be revealing sites for issues of gender, race, class, and ethnicity. As such, this course immensely explores diversity, power and equity and how these all-important societal concerns are expressed through the media in Africa.

GBST 11 Byte-sized Revolutions: How TikTok became a political and social powerhouse

In the wake of the pandemic, TikTok transformed from a platform for dance trends and lip-synch battles into the world's most influential video platform, boasting over 1 billion users. This course delves into TikTok's evolution, examining its dominance in the social media market and political significance, notably in 2020 and the following years. We explore TikTok's algorithm, campaign creation for political and social causes, and essential skills like editorial design and video production. Engaging with guest lecturers, relevant literature and recent articles, we navigate ethical, legal, and professional considerations inherent in a social media platform. By the course's end, students will possess the skills to design and execute a fully-fledged campaign for a political and/or social cause on TikTok. Whether you're interested in digital campaigning or simply aim to comprehend TikTok's power, this course is tailored for you.

Requirements/Evaluation: Presentation(s)

Prerequisites: N/A

Enrollment Limit: 14

Enrollment Preferences: If overenrolled, a statement of interest in digital campaigning on TikTok would be appreciated.

Expected Class Size: NA

Grading:

Unit Notes: For 20+ years, I've generated digital value-leading a global travel player, establishing a leading educational brand on TikTok, managing Red Bull's most viewed channels, and crafting political parties' social media success stories.

Materials/Lab Fee: $40

GBST 98 (W) Indep. Study: Global Studies

Open to upperclass students. Students interested in doing an on-campus independent project during Winter Study must make prior arrangements with
a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

*Not offered current academic year*

**GBST 99 (W) Indep. Study: Global Studies**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

*Not offered current academic year*
The course offerings in Classics enable students to explore the ancient Greek, Roman, and Mediterranean worlds from various perspectives, including literature, history, art, archaeology, philosophy, and religion. Courses are of two types: language (Greek and Latin) and courses in which all the readings are in English translation (Classical Studies). The 100-level language courses are intensive introductions to Greek and Latin grammar and reading skills; the 200-level language courses combine grammar review with primary readings from Greek or Latin texts of key historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Classical Studies courses offer introductions to and more specialized study of the literature, visual and material culture, history, and other aspects of the Greek and Roman worlds.

MAJOR
Majors and prospective majors are encouraged to consult with the department’s faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course in ancient history is strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for advanced study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Route A emphasizes more coursework in Greek and Latin, while Route B emphasizes more Classical Studies courses.

**Route A:** (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language. (2) Three additional courses from the offerings in Greek, Latin, or Classical Studies or from approved courses in other departments and programs.

**Route B:** (1) One course each from any two of the following categories: literature (CLAS 101 or CLAS 102); visual and material culture (CLAS 209 or CLAS 210); history (CLAS 222 or CLAS 223). (2) Four courses in Greek or Latin with at least one at the 400-level, or the four-course sequence CLLA 101, 102, 201, and 302. (3) Three additional courses from the offerings in Classical Studies or from approved courses in other departments and programs.

**Classics Colloquium:** All Classics majors in residence are expected to participate fully in the life of the department through attendance at lectures and other departmental events.

**THE DEGREE WITH HONORS IN CLASSICS**
Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

**COURSE NUMBERING SYSTEM**
**Language Courses:** The numbering of courses through the 300-level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of Greek and Latin literature. Students may enter the rotation at 100-level, 200-level, or 300-level, depending on
previous experience.

Classical Studies Courses: The numbering of these courses does not reflect a strict sequence, and most of them do not assume prior experience in Classics or a cross-listed field. The following pairs of courses offer excellent introductions to key areas of study within Classics: CLAS 101 and 102 (literature), CLAS 209, 210 (visual and material culture), CLAS 222, 223 (history).

STUDY AWAY

We strongly encourage Classics majors to study away in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Mediterranean world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department’s faculty are always available to advise students, the chair has materials to share, and students can visit the department’s website for information and links to helpful sites. Majors who are considering studying away should especially consult with faculty members about the implications for language study.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g., syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No, but students should consult with the department about language sequences.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date.

CLGR 101 (F) Introduction to Greek

This course is the first half of a full-year sequence designed to introduce students to the exciting and rewarding process of reading ancient Greek texts in their original language. We will focus on Attic Greek, the dialect of the Greek language that was spoken in Athens during the Classical period (5th and 4th centuries BCE) and in which some of the most famous works of Greek literature (e.g., the tragedies of Aeschylus, Sophocles, and Euripides and the dialogues of Plato) were composed. But this course will provide a solid foundation in Greek grammar and syntax for students interested in studying other dialects (e.g., the distinctive Greek of the Homeric epics, or the koine of the New Testament) as well. For the fall semester, we will work on developing a firm grasp of Greek nouns, verbs, and adjectives, as well as learning some of the most common ways of constructing complex sentences. From the very beginning, students will have opportunities to apply their knowledge by translating brief excerpts from original Greek sources.

Requirements/Evaluation: frequent quizzes, tests, and a final exam
CLGR 102  (S)  Introduction to Greek
This course is the second half of a full-year sequence designed to introduce students to the exciting and rewarding process of reading ancient Greek texts in their original language. We will focus on Attic Greek, the dialect of the Greek language that was spoken in Athens during the Classical period (5th and 4th centuries BCE) and in which some of the most famous works of Greek literature (e.g., the tragedies of Aeschylus, Sophocles, and Euripides and the dialogues of Plato) were composed. But this course will provide a solid foundation in Greek grammar and syntax for students interested in studying other dialects (e.g., the distinctive Greek of the Homeric epics, or the koine of the New Testament) as well. In the spring semester, we will continue our study of the Greek language as we begin translating longer stretches of Greek poetry, historiography, oratory, and/or narrative fiction. By the end of the year, students are prepared to move on to intermediate-level Greek reading courses.

Requirements/Evaluation: frequent quizzes, tests, and a final exam
Prerequisites: CLGR 101 or permission of department
Enrollment Limit: 15
Enrollment Preferences: Classics majors or intended Classics majors, first years and sophomores
Expected Class Size: 8-10
Grading: no pass/fail option, yes fifth course option
Unit Notes: credit granted only if both semesters (CLGR 101 and 102) are taken
Distributions: (D1)

Spring 2025
LEC Section: 01   MWF 11:00 am - 12:15 pm   Felipe  Soza

CLGR 201  (F)  Intermediate Greek
This course will be based on readings from Plato’s Crito and Hesiod’s Theogony in their original Greek. These texts will give you a taste of both Classical prose and Archaic poetry and enable you to improve your ability to read, comprehend, and translate ancient Greek literature. Plato and Hesiod also offer important and influential perspectives on the origins, connections, effects, and value of justice and religion. Students who successfully complete this course will be well-prepared for advanced study of Greek language and literature.

Requirements/Evaluation: Evaluation will be based on classroom participation, quizzes and exams, and take-home assignments (including, e.g., essays and brief prose composition tasks).
Prerequisites: CLGR 101-102 or two years of Greek in secondary school
Enrollment Limit: 12
Enrollment Preferences: Classics majors and intended Classics majors
Expected Class Size: 5-10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)
CLGR 401 (S) Homer
The Homeric epics (Iliad and Odyssey) are foundational works of ancient Greek literature. They offer valuable insight into early Greek society, religion, and culture, and constitute some of our earliest representations of the most famous Greek gods and heroes. The narratives about the Trojan War and its aftermath attributed to Homer also shape much of later Greek literature, both poetry and prose. In this course, we will read extensive selections from Homeric poetry in its original Greek, along with additional readings (primary and/or secondary) in English.

Requirements/Evaluation: class participation, short written exercises and/or oral reports, midterm and final exams, and a final paper
Prerequisites: CLGR 201 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: majors in Classics, Comparative Literature, English and other literatures
Expected Class Size: 5-6
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

CLGR 403 (F) Poetry and Revolution in Archaic Greece
Taken together, the historian Herodotus and the Greek lyric poets (Alcaeus, Solon, Pindar, and others) offer a fascinating window into the tumultuous world of archaic Greece: a period of colonial expansion, political experimentation, and artistic innovation. In this course, we will read selections from both Herodotus’ Histories and archaic Greek lyric, in order to understand how these two genres can work together to illuminate Greek cultural discourse during this pivotal era. Students will improve their ability to read Greek poetry and prose in multiple dialects, and deepen their understanding of Greek history and literary style.

Class Format: recitation/discussion
Requirements/Evaluation: midterm and final exam, class participation, final paper
Prerequisites: CLGR 201 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: Classics majors and intending majors
Expected Class Size: 5-6
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

CLGR 404 (S) Tragedy
This course will focus on reading, in Greek, a complete tragedy by Sophocles or Euripides. It will thus improve your ability to read and analyze Greek poetry in a variety of styles and meters. While focusing on questions of particular importance for the play we are reading in Greek, we will also situate that play in a larger context by exploring, for instance: aspects of the social and political situations in and for which fifth-century tragedies were first produced; the several performance genres out of which tragedy was created; developments in the physical characteristics of the theater and in elements of staging and performance; problems of representation particularly relevant to theatrical production and performance.

Requirements/Evaluation: contributions to class, exams, and a final paper
Prerequisites: CLGR 201 or permission of instructor
Enrollment Limit: 15
**Enrollment Preferences:** Classics majors, students continuing the Greek sequence

**Expected Class Size:** 13

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

---

**CLGR 406 (F) Aristophanes and Plato**

This course explores Aristophanes' comedy *Clouds* and Plato's dramatic dialogue *Apology of Socrates* through close reading, commentary, translation, and analysis. Together, these texts provide a point of entry for grasping the political and social processes that culminated in the trial, conviction, and execution of Socrates in 399 BCE because “he corrupts the youth and does not recognize the gods the city recognizes (Apology 28b-c).” More broadly, these texts open up perspectives on how scientific inquiry, Socratic conversation, and rhetorical education were viewed in fifth-century Athens and prime us to reconsider core questions ranging from the proper methods, purpose, and stakes of scientific and rhetorical education to the proper role of tradition in familial and civic life and the costs of nonconformity.

**Requirements/Evaluation:** Evaluation will be based on class participation, several short written assignments, a midterm and final exam, and a longer final paper.

**Prerequisites:** CLGR 201 or instructor permission

**Enrollment Limit:** 12

**Enrollment Preferences:** intending or declared Classics majors

**Expected Class Size:** 5-6

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

---

**CLGR 412 (F) Herodotus**

This course will focus on the reading in Greek of Herodotus' *Histories*, his multivalent and deeply human account of how and why several hundred years of contact and conflict between the Greek city-states and non-Greek peoples to the east culminated in the Persian invasion of Greece. We will explore the ways in which his rich narrative style and intellectual landscape reflect the influence of Greek and near-eastern oral traditions, Ionian philosophical thought, Greek tragedy, and contemporary Athenian rhetoric and philosophy. We will also study his use of anthropological methods, ethnography, and geography in explaining human events. Among the many themes that permeate his work, we will pay special attention to the working of divine versus human justice, the mutability of human affairs, the nature of authority, the role of family, and the quest for wisdom.

**Requirements/Evaluation:** class participation, two short written assignments, a midterm exam, a final paper, and a final exam

**Prerequisites:** CLGR 201 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** Classics majors

**Expected Class Size:** 8

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)

Not offered current academic year

---

**CLGR 422 (S) Crete in the Ancient Greek Imagination**

The island of Crete appears across ancient Greek literature as a place of mythic origins, monstrosity, and technological marvels. It plays a paradoxical role as an origin point for quintessentially-Greek practices, such as the paean (hymn to Apollo), as well as a site of difference and even perversion. The god Zeus and the half-human, half-bull Minotaur were both, after all, born on Crete. In this course, we will explore the representation of Crete and Cretans in Greek poetry, including hexameter epic (Homer, the *Homerik Hymnai*), lyric (Iacchylides), and tragedy (Euripides’ *Hippolytus*). The range of reading selections will improve students’ understanding of ancient Greek grammar and syntax, and deepen their appreciation of different metrical patterns, dialects, and genres. They will also enable us to consider how the representation of Crete functioned as a way for poets to articulate various elements of Greek identity. In addition to advancing their understanding of Greek language and literature, students in this course will learn about the
history, geography, and culture of Crete in the Archaic and Classical periods as it relates to our literary sources, and complete research projects on significant Cretan sites in Greek art, literature, and culture. All students enrolled in this course will have the option of participating in a short-term travel course to Crete in May, conducted in collaboration with CLLA 422.

Requirements/Evaluation: class participation, translation exams, seminar paper and presentation

Prerequisites: CLGR 201

Enrollment Limit: 10

Enrollment Preferences: Classics majors and intending majors

Expected Class Size: 4

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Winter Study

CLGR 99 (W) Independent Study: Greek

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year

GENERAL STATEMENT OF GOALS

The History department seeks to cultivate a critical understanding and awareness of the past and the development of our students’ intellectual, analytical, and rhetorical abilities. In pursuit of the first objective, through its curricular offerings the department seeks both to expose students to the richness, diversity, and complexities of human history over long periods of time and in different geographic regions and to provide students with the opportunity to explore aspects of the past in depth. At the same time, the department endeavors to develop students’ ability to think historically and to foster in them an appreciation of the contested nature and the value of historical knowledge by confronting them with the variety of ways in which historians have approached and interpreted the past, engaging them in issues that provoke historical debate, and familiarizing them with the nature and uses of historical evidence. By engaging students in the critical study of the past, finally, the department seeks to develop their ability to formulate historically informed analyses and their analytical and rhetorical skills.

COURSE NUMBERS

The course numbering system used by the History Department reflects the different types and objectives of courses offered at each level. The
different course levels are distinguished less by degree of difficulty than by the purposes that the courses at each level are intended to serve and the background knowledge they presume.

**First-Year Seminars and Tutorials (102-199):** These writing-intensive courses give students an opportunity to explore an exciting historical topic in-depth, learn about the discipline of history, and improve their research and writing skills. Because these courses emphasize the acquisition of skills required for the advanced study of History, they are ideal for students contemplating a major in History.

Each 100-level seminar is normally limited to nineteen students and focuses both on training in research skills (such as using the library, navigating on-line resources, formulating a research question and developing a research agenda, and learning how to use different types of evidence) and on the acquisition of reading skills (such as how to interpret different kinds of historical writing and the arguments historians make). These seminars especially emphasize the importance of writing and include varied assignments that stress the mechanics of writing and revision and focus on issues of argumentation, documentation, and style. Enrollment preference in 100-level seminars is normally given to first-year students and then to sophomores.

Each 100-level tutorial stresses the importance of interpreting historical evidence and evaluating the arguments made by historians and likewise fulfills the writing-intensive requirement. Enrollment in these courses is limited to ten students, each of whom is expected to write five or six interpretive essays and present five or six oral critiques of another student’s work. First-year students and sophomores will normally be given equal enrollment preference in 100-level tutorials.

First-year seminars and tutorials can be counted toward the History major and used to meet the department’s group and concentration requirements.

**Introductory Survey Courses (202-299):** These courses are open to all students and are intended to provide a basic understanding of the history of peoples, countries, and geographic regions over relatively long time-spans. Most of all, they will provide students with the background necessary for more advanced study in history at the 300 and 400 level. They are offered in either small or large formats, depending on the individual course.

**Major Seminars (301):** Major seminars explore the nature and practice of history, are required for the degree in History, and are normally restricted to junior History majors. Although these seminars vary in topic and approach, each focuses on the discipline of history itself—on the debates over how to approach the past, on questions of the status of different kinds of evidence and how to use it, on the purpose of the study of history. Focusing on questions of methodology, epistemology, and historiography, these courses ask: What kind of knowledge do historians claim to produce? What does it mean to study the past? How do historians approach the project of studying the past? Each year several major seminars will be offered. Students who plan to study abroad during their junior year may take their major seminar in the spring semester of their sophomore year (space permitting), and those planning to be away for the whole of their junior year are encouraged to do so.

**Advanced Electives (302-396):** These advanced, topical courses are more specialized in focus than are the introductory survey courses (202-299) and are intended to follow such courses. Enrollment is often limited. Because these courses may presume some background knowledge, the instructor may recommend that students enroll in an appropriate introductory course before registering for an advanced elective.

**Advanced Seminars (402-479):** These are advanced courses normally limited in enrollment to fifteen students. Each seminar will investigate a topic in depth and will require students to engage in research that leads to a substantial piece of historical writing. All History majors are required to complete either an advanced seminar (402-479) or a tutorial (480-492). Instructors may recommend prior coursework in the area of the seminar. Preference is given to senior History majors, followed by junior History majors.

**Advanced Tutorials (480-492, 495):** These are advanced reading and writing courses that offer an in-depth analysis of a topic in tutorial format. Tutorials are limited in enrollment to ten students and preference is given to senior History majors. All History majors are required to complete either an advanced seminar (402-479) or a tutorial (480-492). Instructors may recommend prior coursework in the area of the tutorial. The writing of five or six essays and the oral presentation of five or six critiques of another student’s essays are central to tutorials.

**ADVISING**

Both majors and non-majors are encouraged to talk at any time with the department chair, the department administrative assistant, or any other member of the department about the History major.
All incoming majors will choose a faculty advisor in the spring of their sophomore year. All majors must meet with their advisor in the beginning of the fall semester, to develop their Concentration (see below), and at the time of the spring semester registration period in order to have their courses and plans for the History major approved. Students who are interested in the senior thesis program or graduate school should contact the faculty director of the Thesis Program. Prospective study abroad students should contact the department’s administrative assistant.

THE MAJOR

The major consists of at least nine semester courses as follows:

Required Courses in the Major

- One Major Seminar (History 301)

Elective Courses

Seven (or more) additional semester courses in History, at least one to be chosen from among three of the following groups:

- Group A: The History of Africa
- Group B: The History of Asia
- Group C: The History of Europe and Russia
- Group D: The History of Latin America and the Caribbean
- Group E: The History of the Middle East
- Group F: The History of the United States and Canada
- Group G: Global History

In addition, students must take at least one course dealing with the premodern period (designated Group P in the catalog); this may be one of the courses used to fulfill the group requirement (Groups A-G).

A single course can meet the requirement for no more than one of Groups A through G.

Concentration In The Major

Students are encouraged, in consultation with their advisors, to design a concentration within the History major. A concentration should consist of at least three courses that are linked by common themes, geography, or time period. Only one of those courses can be a 100-level seminar while at least one must be a 300- or 400-level course. Courses in the concentration may be used to fulfill the group requirements. Courses taken abroad may be included in the concentration with the approval of the department chair.

THE DEGREE WITH HONORS IN HISTORY

The History Department offers a thesis route to the degree with honors in History. This involves a ten-course major as well as an independent WSP. Students wishing to undertake independent research or considering graduate study are encouraged to participate in the thesis program and seminar.

Application to enter the thesis program is made by spring registration in the junior year and is based on a solid record of work of honors caliber, normally defined as maintaining at least a B+ average in courses taken for the major. Students who intend to write a thesis submit a proposal to the History Department at this time. Students who will be away during the spring semester of their junior year make arrangements to apply before leaving. Normally, it is the responsibility of the student to secure the agreement of a member of the department to act as their thesis advisor, normally a faculty member with whom the student has worked in the past. The student therefore consults with a member of the department about a thesis topic and secures the faculty member’s agreement to serve as their thesis advisor prior to submitting a proposal to the department. The thesis proposal must be signed by a member of the History Department. Normally, the thesis topic is related to course work that the student has completed. Students should be aware that, while the department tries to accommodate all students who qualify to write a thesis, particular topics may be deemed unfeasible. Final admission to the thesis program depends on the department’s assessment of the qualifications of the student and the feasibility of the project.

Once the student has been notified of admission to the thesis program, they register for History 493, Senior Thesis Seminar, in the fall semester, for History 031 during winter study, and for History 494, Senior Thesis Seminar, in the spring. In addition to researching and writing a thesis of approximately 75-100 pages, students attend special presentations under the History Department’s Class of 1960 Scholars Program.

During the fall, students work regularly on their research and consult frequently with their advisors. Throughout the semester, thesis writers also present progress reports for group discussion to the seminar (History 493). Performance in the seminar is taken into consideration in determining students’ continued participation in the thesis program and is taken into account in determining their final thesis grades calculated at the end of the
year. Students are required to submit one draft thesis chapter to their advisor and the director of the thesis seminar by the end of the fall semester. During the first week of winter study students present their draft chapter to the thesis seminar and members of the history department thesis committee. Students deemed to be making satisfactory progress on their research and writing at this point are allowed to continue with the thesis. They devote the entire winter study period to thesis work. They normally conclude their research during winter study and must complete a second draft chapter of their thesis for submission to their advisor and the director of the thesis seminar before the end of winter study. By the beginning of spring semester, the thesis committee formally consults with advisors and makes a recommendation to the department on which students are allowed to proceed with the thesis. Those students continuing with the thesis present a draft chapter of their thesis to the thesis seminar and members of the department’s thesis committee during the early weeks of the second semester.

Completed theses are due in mid-April, after which each student prepares and makes a short oral presentation of their thesis at the departmental Thesis Colloquium. Another student who has read the thesis then offers a critique of the thesis, after which the two faculty readers of the thesis offer their own comments and questions, followed by a general discussion of the thesis by students and other members of the department.

LANGUAGE

Study of a foreign language is basic to the understanding of other cultures. Particularly those students who might wish to do graduate work in History are encouraged to enroll in language courses at Williams.

STUDY ABROAD

The History Department considers immersion in and familiarity with a foreign culture not only to be valuable in themselves, but also to provide an important way of understanding the past. Students who major in History therefore are encouraged to study a foreign language and to consider studying abroad during their junior year. History courses taken as part of a study abroad program that is recognized by the college normally can be used to satisfy departmental distribution and general requirements, up to a maximum of three courses (this limit does not apply to tutorials taken as part of the Williams-Exeter Program). Courses taken abroad, even at Oxford, cannot be used to satisfy the major seminar and advanced seminar/tutorial requirements, with only one exception: the tutorial on "Historiography: Tacitus to Weber" that is offered through the Williams-Exeter Program can count for major seminar credit. Students who plan to study abroad during their junior year may take their major seminar in the spring semester of their sophomore year, and those planning to be away the whole of their junior year are strongly encouraged to do so.

Students interested in studying abroad during their junior year should discuss their plans with a member of the department as well as with the department’s administrative assistant. Approval of departmental credit for courses taken abroad normally must be obtained from the chair or from the administrative assistant prior to the commencement of the study abroad program.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g., syllabi and/or course descriptions), though students should be sure to contact the department. The student needs to provide as much information as possible to the department chair, and approval is provisional upon the student actually taking the course as detailed in the syllabus and/or course description.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. The maximum number of credits is three.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. The courses need to be historical in approach and content for credit. This means that courses not listed under History in the study abroad program might be considered for history major credit.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. HIST 301 (with the exception of one particular tutorial offered through the Williams-Oxford Program) and a 400-level seminar or tutorial.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No. Students who will be studying abroad for the entire year are encouraged to take HIST 301 before their junior year.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
HIST 100 (W) The Fourteenth Amendment and the Meanings of Equality

For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment's meaning in the century that followed. Central themes in this course include the contested interpretations of "birthright citizenship," "due process," "privileges and immunities," "equal protection," and "life, liberty or property"; the rise, fall, and rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality.

Requirements/Evaluation: There will be three short (4-5 page) research-based writing assignments; a revision of one of those papers; and a short final reflection essay. As an intensive winter study, this class will require approximately 12-15 hours of in-person class time a week, as well as time outside of class on reading and writing assignments.

Prerequisites: no prerequisites

Enrollment Limit: 19

Expected Class Size: 15-19

Grading: no pass/fail option, no fifth course option

Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in HIST 100 and HIST 40.

HIST 104 (S) Race and a Global War: Africa during World War II (DPE) (WS)

Cross-listings: GBST 104 / AFR 104

Primary Cross-listing

This course highlights African experiences of World War II. Although most histories have excluded Africa's role in the war, the continent and its people were at the center of major developments during in this global conflict. In fact, many Africans remember the Italian invasion of Ethiopia in 1935 as the start of the war. African servicemen fought alongside the Allied and Axis forces on major warfronts in Europe, Africa and Asia. African communities and individuals also established war charity campaigns to collect funds, which they sent to war ravaged societies in Europe. Indeed, African economies, despite their colonial statuses, kept European imperial nations afloat in their most hour of need. At the same time, African colonial subjects faced severe food shortages, the loss of working-age men to labor and military recruiters, and dramatically increased taxes. We will examine the impact of these and other wartime pressures on different African communities. How did African societies meet such challenges and how did they view the war? In this course we will examine the roles that women played during the war, and the various other ways that African communities met wartime demands. Other topics we will explore include the role of African women; colonial propaganda; political protest against the war; race and racial thought in the wartime era; war crimes; African American support for the liberation of Ethiopia; and the war's impact on decolonization across the continent. We will further study how Africans and outsiders have differently conceptualized the continent's role in the war by analyzing a variety of sources, including scholarly writings, archival materials, films, former soldiers' biographies, and propaganda posters.

Requirements/Evaluation: active participation in discussion, map quiz, 2 reading responses, and 3 essays (of about 5 pages)

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
GBST 104(D2) HIST 104(D2) AFR 104(D2)

Writing Skills Notes: Students will write two 3-5-page essays each written in two drafts with instructor comments. They will also write an 8-12-page research paper with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course explores the colonial relationship during a major global crisis. Students will examine existing narratives of African contributions to the war and to come up with their own interpretations, and will be called to critically engage the question of why and how colonies made significant contributions to the Allied cause by producing needed materials and resources or by joining the fight. Africans made these contributions in spite of various and complex inequities.

HIST 109  (S)  The Iranian Revolution  (DPE)  (WS)

Cross-listings: ARAB 109

Primary Cross-listing
The Iranian Revolution was a major turning point in world history that resulted in the establishment of the Islamic Republic of Iran. This tutorial will evaluate the causes and impact of the revolution and how this seminal event continues to have widespread repercussions around the globe. The first weeks will explore the history of pre-revolutionary Iran with special attention to religious and intellectual trends such as the ideas of Ayatollah Ruhollah Khomeini, Jalal al-e Ahmad, and Ali Shariati. We will then evaluate the revolution itself including the US hostage crisis, the downfall of the Shah Muhammad Reza Pahlavi Shah, and how Khomeini’s vision of society became paramount. Finally, we will explore the aftermath of the revolution including Iran’s geopolitics, the nature of the theocratic system in Iran as well as how the revolution impacted every day lives of Iranians in Iran and abroad particularly how they reflect on the revolution in memoirs, films, and literature.

Requirements/Evaluation: Weekly meetings. Weekly papers - either a 5 page primary paper or a 2-3 page response paper.
Prerequisites: No prerequisites.
Enrollment Limit: 10
Enrollment Preferences: First Years and Sophomores.
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
HIST 109(D2) ARAB 109(D2)

Writing Skills Notes: As a tutorial, students are expected to regularly write analytical and critical papers on the readings. They will receive regular and consistent feedback from the instructor and their partner and will be given the opportunity to re-write some of their assignments.

Difference, Power, and Equity Notes: The Iranian Revolution, like other major social movements, offered a compelling critique of the status quo and promised a more just society that would be more equitable for all Iranians. The tutorial will consider the relationship between the rhetoric of the Revolution and the lived reality, especially how this seminal event impacted the lives of ordinary Iranians. Was the Revolution simply a change in the composition of the political elite or did it yield new realities and more access for Iranians?

HIST 112  (S)  The Asia-Pacific War  (WS)

Cross-listings: ASIA 111

Primary Cross-listing
The “Asia-Pacific War,” as it is known in Japan, raged from the full-scale Japanese invasion of China in 1937 until Japan’s total defeat in 1945. This war, though certainly tied to the Allied war against Germany and Italy, was viewed by many participants at the time as truly a war apart due to the immense distances involved, the gleeful, racism-fueled brutality on both sides of the conflict, and the resultant abuses of POWs, use of atomic
weapons, and other atrocities. Students will explore the intersection of colonialism, racism and opportunism that fed the conflagration, and the remarkable rapprochement between American and Japanese former enemies immediately after the war. It will examine in depth the roles of China and the USSR in this conflict, which are often mentioned but functionally ignored in the West. It will cover the various warzones and home fronts, focusing as much as possible on conveying the experiences of participants through primary sources. It will likewise seek to bridge the analysis of the military and socio-political sides of this conflict, which are often treated as distinct, by drawing on key academic works in the field.

**Requirements/Evaluation:** Weekly meetings with professor and one peer partner; 5-page papers (6 total); 2-page critiques of partner's papers (6 total)

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** History majors and Asian Studies concentration students, then everyone else.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 112(D2) ASIA 111(D2)

**Writing Skills Notes:** Students will alternate weekly between writing 5-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular written feedback on their writing from the professor, as well as oral critiques from the professor and tutorial partners.

**HIST 116 (S) Understanding 9/11 and the War in Iraq**  
(DPE) (WS)

**Cross-listings:** ARAB 211

**Primary Cross-listing**

What were some of the causes of 9/11/2001 and what were some of the consequences? Why and how did the United States invade Iraq in 2003 and what impact did the subsequent occupation of that country have on the rest of the Middle East and the world in general? In this course on recent political and cultural international history, that will also consider this history in film and popular culture, the monumental ramifications of the "War on Terror" will be considered and how this framework has shaped the 21st century. In the first part of the course, US-Middle Eastern relations will be explored and the eventual emergence of al-Qaeda in the late 1990s. Then the terrorist attacks on American soil on 9/11 will be studied. In this segment, students will engage with oral histories and memoirs related to the fateful events of that day. In the following module the political and cultural responses will be considered. Particular attention will be on the prelude to the Iraq War, especially how that war was justified and rationalized. Here students will analyze political rhetoric, public discourse, and activism through a range of sources including in the media, the academy, and in popular culture. Then the attention will be turned to the invasion of Iraq in March 2003, and the eventual occupation of Iraq. The myriad Iraqi responses will be studied along with American military experience. Finally, the course will evaluate the significance of the first decade of the 21st century and how these events, and the memory of this decade, continue to reverberate today.

**Requirements/Evaluation:** Several short papers and a final oral history.

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** First-years and sophomores.

**Expected Class Size:** 19

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

HIST 116(D2) ARAB 211(D2)

**Writing Skills Notes:** In this writing-intensive first-year seminar, students will engage with primary sources such as oral histories, autobiographies and
political tracts and write short interpretive essays that will go through several editing stages. The final writing project will be an oral history of an individual who has a direct personal connection with either 9/11 and/or the wars in Iraq. The students will learn how to synthesize a range of experiences into a 10-12 page paper.

**Difference, Power, and Equity Notes:** This course will consider power and difference in a number of ways. First, it will evaluate how the US government used its political power to convince the public to support a military operation under questionable premises. Second, it will critically assess the "War on Terror" and who has benefited from it. Third, it will examine how the American military occupied Iraq and the ways in which Iraqis tried to resist the American designs on their country.

**HIST 117  (F)  Bombay/Mumbai: Making of a Modern Metropolis  (WS)**

**Cross-listings:** ASIA 117 / GBST 117

**Primary Cross-listing**

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of colonial and modern India through the history of its most important city.

**Requirements/Evaluation:** assessment will be based on class participation and weekly written responses to readings (2 pages), 2-3 short papers (4-5 pages), leading to an oral presentation and final paper (10-12 pages). All writing assignments are structured to build up the final paper.

**Prerequisites:** First years and sophomores only

**Enrollment Limit:** 19

**Enrollment Preferences:** first-years, and then sophomores who have not previously taken a 100-level seminar.

**Expected Class Size:** 12-15

**Grading:** no pass/fail option,  no fifth course option

**Distributions:** (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

**HIST 122  (S)  The Black Death  (WS)**

In what ways does a pandemic change society? Historians and scientists still debate the development and impact of the second plague pandemic, also known as the Black Death, which decimated the people of Asia, Africa, and Europe in the mid-fourteenth century. For many medieval people, the plague was experienced as a terrifying judgment of God upon the world. In this class, we will see how the plague exposed and exacerbated divisions within society, encouraging new political movements, economic changes, and new forms of expression in art and literature. We will read multiple first-hand accounts of the plague, with an eye to seeing how medieval people tried to understand the calamity through science and religion, and how modern scholars have interpreted the evidence of both written records and archaeology and related sciences. The Black Death is the first global pandemic that produced an extensive written record, and the sources offer us a detailed look at how multiple complex societies handled the crisis.

**Requirements/Evaluation:** Attendance and participation, three short (3- to 5-page) papers, a final 8-10-page research paper

**Prerequisites:** None
Enrollment Limit: 19

Expected Class Size: 10-15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write three short (3-5 page) papers and a longer (8-10 page) research paper. They will receive feedback on all of these. The research paper will be produced in several stages, with the instructor commenting on each step.

HIST 128 (F) Protest after Fascism: Youth, Revolution, and Protest in 1960s West Germany (DPE) (WS)

The 1960s was a decade of youth and protest. University students in Paris, Belgrade, and Dar es Salaam took to the streets to call for political, economic, and social transformation. This first-year seminar dives into this decade of heady revolutionary fervor, by focusing on the stakes of political protest in postwar West Germany. It evaluates how West Germans formulated their political protests while living in a post-totalitarian and post-genocidal society and considers the extent to which West Germans youths -- despite operating in the international milieu of the "Global Sixties" -- displayed a specifically national set of anxieties. Students can expect to gain an introduction to postwar German history, as well as experience working with primary sources.

Requirements/Evaluation: Active participation in discussion, weekly 500-word discussion posts, two 5-6-page reading responses, and a final 10-12-page research paper

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: First-year students and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: This is an intensive writing seminar for first- and second-year students. We focus on the structure of historical argument, the process of revision, and research skills. Students receive detailed feedback on their writing on each of the shorter writing assignments and on all steps of the crafting of the final paper.

Difference, Power, and Equity Notes: This course investigates how West German youths wrestled with questions of national belonging and racial difference in the years after the Holocaust. In addition to evaluating how racial difference operated within after the Federal Republic of Germany after the Nazis' racial genocide of European Jewry, this course explores West German activists' conceptions of two populations that were seen to be racially different: the peoples of the 'Third World' and West Germany's Turkish migrants.

HIST 134 (F) The Great War (WS)

In November 2018, world leaders gathered in France to commemorate the centennial of the end of the First World War. Yet the armistice that brought hostilities on the Western front to a close on the eleventh hour of the eleventh day of the eleventh month of 1918, did not have the same significance for Eastern Europe and the Middle East, where revolutions and civil wars continued to be fought well into 1923. Ultimately, the Great War toppled four empires (German, Habsburg, Russian, and Ottoman) and forcibly displaced and killed millions of civilians (including Armenians and Jews), creating new countries and colonies throughout Europe, the Middle East, and Africa. This tutorial will explore the global history of the First World War, a history that is indispensable for understanding the world of today. We will consider a broad range of topics and sources in our examination of the political, social, cultural, economic, and military histories of the Great War and its aftermath. For three-quarters of the semester, the tutorial follows a traditional format in which weekly tutorial meetings center on the writing of a paper and the partner's critique. The last segment of the course is structured around a research paper assignment, introducing students to archival research and longer-format writing.

Requirements/Evaluation: bi-weekly 5- to 7-page papers; bi-weekly written critiques; one revised paper; final 8- to 10-page research paper.

Prerequisites: permission of instructor
**Enrollment Limit:** 10

**Enrollment Preferences:** first- and second-year students

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Bi-weekly 5-7 page papers; one formal paper revision; 8-10 page research paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**HIST 135 (F) The Coffeehouse from Arabia to the Enlightenment (WS)**

Invented in sixteenth-century Arabia, the coffeehouse soon made its way to Egypt and Istanbul and then to Western Europe. This institution offered a social space where men (and women) could congregate to discuss politics and ideas. Everywhere, it was an object of suspicion, yet its onward march proved unstoppable, and it even became one of the central spaces of the European Enlightenment, the eighteenth-century movement that laid the foundations of modern Western secular thought. In this course, we will reconstruct the progress of the coffeehouse in order to understand what made it so special. Through its prism we will explore a crucial period in the history of Europe and the Middle East, and investigate how intercultural interactions and intellectual exchange shaped the modern world at a time of religious and political polarization.

**Requirements/Evaluation:**
- Attendance and participation;
- two 5-7-pp. papers (and a revision of each);
- final research project proposal and bibliography;
- a final, 10-12 pp. research paper;
- a final research presentation.

**Prerequisites:** First-year standing.

**HIST 143 (S) Soccer and History in Latin America: Making the Beautiful Game (WS)**

This course examines the rise of soccer (fútbol/futebol) in modern Latin America, from a fringe game to the most popular sport in the region. Focusing especially on Brazil, Argentina, Peru, and Mexico, we will analyze the central role that soccer played as these countries faced profound questions about racial, gender, regional, and national identities. Using autobiographies, videos, and scholarly works from several disciplines, we will consider topics including: the role of race and gender constructions in the initial adoption of soccer; the transformation of this foreign game into a key marker of national identity; the relationship between soccer and political and economic "modernization"; the production of strong, at times violent identities at club, national, and regional levels; and the changes that mass consumerism and globalization have effected on the game and its meanings for Latin Americans.

**Requirements/Evaluation:**
- Class participation, a series of 4-page papers, response papers, and a 10-15 page research paper

**Prerequisites:** First-year or sophomore standing; juniors or seniors with permission of instructor

**Enrollment Limit:** 19

**Enrollment Preferences:** First year students and then sophomores who have not previously taken a 100-level seminar. If oversubscribed an
Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write three 3-papers on set topics and an 8-10 page research paper. Revision of the first short paper is mandatory, in response to instructor's comments. Students will receive timely feedback on all pieces of writing and will participate in in-class workshops on the identifying sources, formulating an argument, and presenting a compelling case.

HIST 144 (S) Brazil's Myth of Racial Democracy (DPE) (WS)
The notion that race worked differently in Brazil took root in the early twentieth century and grew into a myth that the country was home to a unique "racial democracy." This course will examine the creation and surprisingly long life of this idea among not only Brazilians but also observers and visitors from the U.S., Europe, and Africa. We will look at how "racial democracy" became central to constructions of Brazilian national identity, how the country's governments tried to coopt Black cultural forms like samba and Carnaval into official culture, and how thinkers around the world used Brazil to define their understanding of race making in their own regions. The special focus, though, will be on how Afro Brazilians challenged the myth politically, intellectually, and artistically from the 1920s to the 1990s. Our texts will include the fiction, memoirs, manifestos, and scholarship of individuals like Abdias do Nascimento, Carolina Maria de Jesús, and Sueli Carneiro, as well as the activism of Black and feminist groups.

Requirements/Evaluation: Class participation, three 3-page papers, written responses, and a 10-12 page research paper.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: Preference to first- and second-year students

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

HIST 152 (F)(S) The Fourteenth Amendment and the Meanings of Equality (DPE) (WS)

Cross-listings: WGSS 152

Primary Cross-listing

For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment's meaning in the century that followed. Central themes in this course include the contested interpretations of "birthright citizenship," "due process," "privileges and immunities," "equal protection," and "life, liberty or property;" the rise, fall, and rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of racial and gender equality.

Requirements/Evaluation: a series of short (3-page) response papers; and a final 10-12 page research paper

**HIST 155  (S)  School Wars  (WS)**

Throughout the 20th century, parents, students, teachers, and policymakers have fought bitterly about the purpose of and practices in public schools. Public schools have been the site of a series of intense conflicts over the meanings of democracy and equality; the relationship between the individual, the family, and the state; and about completing claims to recognize the rights of teachers, children, and parents. Organized both chronologically and thematically, this course examines a series of "school wars" in the 20th century, focusing especially on battles over religion, race, and sex. Topics will include evolution/creationism, segregation and desegregation, bilingual education, sex education, free speech, and school prayer. This course asks how, why, and with what consequences schools have been an arena of cultural conflict in the United States? How do these debates help us understand the contested relationship between the rights of children and students, the rights of parents and families, the rights of communities and states, and the obligations of the federal government? How can historical analysis shed light on our present-day "school wars"? Many of these conflicts wind up in court, and we will be looking at some key Supreme Court decisions, but we will also draw upon memoirs, social histories, oral histories, popular culture, and other archival and documentary sources that focus on the experience of teachers and students. Tutorials meet in pairs. Every week, each student will either write an essay (1000-1250 words) that responds to and analyzes the readings OR a short essay (no more than 500 words) that responds to their partner's paper and raises further questions for discussion.

**Requirements/Evaluation:** four to five tutorial papers (approximately 5 pages) and four to five short response papers (approximately 2 pages)

**Prerequisites:** first-years or sophomores

**Enrollment Limit:** 10

**Enrollment Preferences:** first-year students, and then sophomores who have not previously taken a 100-level seminar

**Expected Class Size:** 10

**Grading:**  no pass/fail option,  no fifth course option

**Distributions:**  (D2)  (WS)

**Writing Skills Notes:** Students will write bi-weekly 5-page papers about the readings, and bi-weekly 2-page responses to their tutorial partner's paper. For the final paper, each student will revise and expand one of the papers they wrote in the semester. Students will receive regular written and oral feedback on their work from the professor and their tutorial partner. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Attributes:**  HIST Group F Electives - U.S. + Canada  TEAC Teaching Sequence Courses
Is there a style or tradition of writing political manifestos in the United States? Given the nation's origins in revolution, the answer would seem on the surface to be a definitive "yes." But some observers are skeptical; one writer has gone so far as to say the term "manifesto" connotes "a radicalism that American writers generally lack." This course will investigate that claim. How would we choose to define the very term, "manifesto?" Why have so many radical American writings been embraced as having the characteristics of a manifesto? We'll look at these questions through close readings and analyses of manifestos across three different historical junctures in the U.S. -- the Revolutionary era, the 1830s and 1840s, and the 1960s and early 1970s -- focusing in particular on struggles over racial equality and women's rights.

Requirements/Evaluation: participation; three graded essays (3-5 pages each), handed in as drafts, given comments, and with time for revision; 3-5 very short, ungraded assignments on course content and about library research; one manifesto (any length) and a final reflection paper (3-5 pages).

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first-year students and then sophomores

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will alternate between doing short graded and ungraded assignments in the first 8-10 weeks of the class: the 3 graded assignments (varying length, but no more than 7 pages maximum) each will involve a draft, and then a revision based on instructor comments; the ungraded assignments will be either informal, analytical responses to the reading; short, creative responses; or discussion questions. Students will also each write a manifesto and a short, final reflection paper.

Attributes: HIST Group F Electives - U.S. + Canada

annotated bibliography, and a peer-reviewed draft of the final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

**Difference, Power, and Equity Notes:** This course analyzes the long black freedom struggle in the North during the twentieth century. It examines black northerners’ efforts to achieve citizenship and equality as well as their challenges and involvements with northern racial liberalism. It offers students the opportunity to think critically about how black resistance campaigns emerged and evolved as discriminatory racial practices persisted in spite of legal and legislative remedies.

**HIST 159  (F)  Crossing the Color Line: A History of Passing  (DPE) (WS)**

**Cross-listings:** AFR 159

**Primary Cross-listing**

In June 2015, Rachel Dolezal emerged as a media spectacle and the subject of national scrutiny after her white parents stated publicly that Dolezal is a white woman passing as black. Their insistence that Dolezal is white came in the wake of her reports to local news media and police that she had been the victim of several hate crimes. To critics, Dolezal is a fraud who has committed cultural appropriation. Yet, for her supporters, Dolezal's racial identification as a black woman is authentic and indisputable, since race is not based on biology but rather is a social construction. For both groups as well as impartial observers, many wondered curiously why a white woman had chosen to pass as black, especially given that historically it has been African Americans who opted to become white. Inspired by the controversy surrounding Dolezal, this tutorial will explore the history of passing in the United States. Whereas our attention will primarily be focused on black-to-white passing, we will expand our understandings of passing by emphasizing the variety of ways that identities have been shaped through the crossing of boundaries--class, ethnic, gender, intellectual, political, religious, and sexual. To accomplish our goals, we will read and cross-examine fictional and nonfictional as well as primary and secondary historical accounts of boundary-crossers. We will also screen several films that engage the theme of passing.

**Requirements/Evaluation:** Weekly formal response papers and written critiques.

**Prerequisites:** None.

**Enrollment Limit:** 10

**Enrollment Preferences:** First and second-year students will be prioritized, followed by history majors. Should the course be overenrolled, students will be asked to complete an enrollment questionnaire.

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 159(D2) AFR 159(D2)

**Writing Skills Notes:** Students will be required to complete formal writing assignments each week, alternating between response papers (4 pages) and written critiques (2-pages) of their peers' work. Students will receive substantial feedback on their writing skills, with verbal and written suggestions for improvement. Students also will receive feedback from their tutorial partners.

**Difference, Power, and Equity Notes:** Narratives of racial passing provocatively raise questions about the construction, logics, reinforcement, and subversion of racial categories and identities. Tutorial students will have the opportunity to deconstruct the meanings of race and identity in addition to thinking culturally, historically, and ontologically about the implications and value of these constructs. In essence, we will theorize racial identity, reconsidering, if not challenging, its stable notions of identic intelligibility.

**HIST 160  (S)  After the Civil Rights Movement  (WS)**

**Cross-listings:** AFR 160

**Primary Cross-listing**
This course examines African American politics, life, and culture from the period following the end of the civil rights movement in the late 1960s to today's Black Lives Matter movement. In examining this time period, we will pay particular attention to a number of key questions: What organizations, activists, and campaigns dominated Black politics in the post-civil rights movement era? How did organizers build on the issues and tactics of the movement in the years that followed? In what ways were structures of racial inequality reconfigured in the post-movement era? How did the popular culture of the era reflect the changing social, economic, and political lives of African Americans? How were the gains of the civil rights movement preserved or threatened in the post-movement era? In considering these questions, we will explore the ways that struggles for racial equality continued to shape American life in the 1970s, 80s, 90s, and 00s. Using scholarly works, film, music, oral history, and other primary and secondary sources, we will look at topics including: debates over the legacy of the civil rights movement; the impact of mass incarceration and the War on Drugs on Black communities; HIV/AIDS activism; Black conservatism in the age of Ronald Reagan; anti-police brutality activism in the years before the Black Lives Matter Movement; urban disinvestment and the rise of hip hop culture; electoral politics, Black political power, and the Obama presidency.

Requirements/Evaluation: Active participation in class discussion, weekly 500-word discussion posts, two 4-5 page essays, and a final 10-12 page research paper

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: Preference to first- and second-year students

HIST 161 (F) W.E.B. Du Bois: A Century of Study and Struggle (WS)

This course will apply a historical lens to the life and thought of historian, activist, social theorist, and writer W.E.B. Du Bois. We will engage with Du Bois’ historical, sociological, and political writing, trace his intellectual transformation throughout the course of his nearly century-long life of study and struggle, and highlight his ongoing pertinence. Engaging with classic as well as lesser-known works by Du Bois, his contemporaries, and other scholars, a core aim of the course will be to comprehend the development of Du Bois’s ideas, placing them in historical context. In examining his work and its lasting influence we will touch on a range of topics including, the Civil War, Reconstruction, and the afterlife of slavery; race, the color line, and American citizenship; civil rights, Black advancement, and political leadership; Black urban life; war, colonialism, and global capitalism, among other topics.

Requirements/Evaluation: Assessment will be based on class participation and weekly written responses to readings (2 pages), 2-3 short papers (4-5 pages), leading to a final paper (10-12 pages). All writing assignments are structured to build up the final paper.

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: Preference to first- and second-year students

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

HIST 163  (F)  Communications in Early America  (DPE) (WS)

Cross-listings: AMST 164

Primary Cross-listing

How did the multiplicity of people who shaped “early” North America communicate with each other, across profound linguistic, cultural, social, political, and spiritual differences? What strategies did they use to forge meaning and connections in times of tremendous transformation, while maintaining vital continuities with what came before? This course examines histories of communication in North America and the technologies that communities have developed to record, remember, advocate, persuade, resist, and express expectations for the future. Using a continental and transoceanic lens of “Vast Early America,” we will take up Indigenous oral traditions, Traditional Ecological Knowledge, wampum belts, and winter counts as expressions of ethics, identity, relationality, and diplomacy among sovereign Native/Indigenous nations. We will reflect on artistic and natural science paintings, engravings, and visual culture that circulated widely; and diaries and journals as forms of personal as well as collective memory. We will work with political orations, newspapers, pamphlets, and other forms of print culture that galvanized public opinion in the Age of Atlantic Revolutions; memorials and monuments that communities have created to honor ancestors and significant events; material culture such as baskets and weavings that signified through their imagery and physical forms; and social critique and visions of justice in the verse and prose of Phillis Wheatley Peters and William Apess. These materials take us into the complexities of individuals’ and communities’ interactions and relations of power. They also illuminate spaces of potential or realized solidarity, alliance, and co-building of new worlds. Throughout we will work together to understand different methodologies, theories, practices, and ethics involved in approaching the past. We will at every turn be attuned to the ongoing significances of these experiences among communities in the twenty-first century.

Requirements/Evaluation: active participation in class discussions, several short essays based on readings and discussion topics, museum/archives exercise, final essay/project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: limited to first- and second-year students who have not yet taken a 100-level course in History or American Studies; juniors and seniors only with the permission of the instructor

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 164(D2) HIST 163(D2)

Writing Skills Notes: Short essays (3-5 pages) spaced throughout the semester with instructor feedback on writing skills as well as historical content; written reflection and analysis related to museum/archives visit with original materials; final essay (8-10 pages) due at end of semester that synthesizes findings from across the whole semester and allows students to closely examine primary/secondary sources; regular opportunities to conference with instructor about writing ideas and drafts.

Difference, Power, and Equity Notes: This course centers experiences of diverse people in early America including substantial focus on Native American/Indigenous and African American communities. It introduces foundational methods for historical and interdisciplinary study, including decolonizing methodologies from Native American and Indigenous Studies (NAIS) and African American histories; critical vantages on Euro-American settler colonialism; and scholarship on complex entanglements in multiracial and multiethnic communities

Attributes: HIST Group F Electives - U.S. + Canada  HIST Group P Electives - Premodern
competition between two incompatible ways of life--communism and capitalism; totalitarianism and democracy--an atmosphere marked by panic, secrecy, insecurity, paranoia, surveillance, and conformity pervaded American life. Given the vast cultural influence of movies, film during this era served as a vital ideological battleground. Moreover, cinema offers us a window into the cultural landscape of Cold War America, for film reflects, interprets, and shapes national identity in complex ways. The films examined in this course (for the most part, Hollywood productions from the mid-1940s to the mid-1960s) serve as unique historical documents and as cultural texts illuminating the ways filmmakers and audiences negotiated the challenges presented by the Cold War struggle. The films assigned for this course focus on a range of topics, including anticommunism, competing visions of Americanism, religion, the Hollywood Ten, J. Edgar Hoover and the FBI, the nuclear arms race, brainwashing, gender, race relations, and the eventual unravelling of the Cold War consensus. The historical analysis of film requires not only a close reading of the movies themselves, but also a clear understanding of the historical context in which they appeared. The readings paired with each film will help to clarify this context and offer interpretations of the films with which we will engage.

Requirements/Evaluation: Students will be required to complete formal writing assignments each week, alternating between 4-page reading response papers and 2-page critiques of their peers' work. These writing assignments will be evaluated alongside preparedness for and performance in tutorial discussions.

Prerequisites: None, open to all students.

Enrollment Limit: 10

Enrollment Preferences: First and second year students will be given priority. If the course is overenrolled, students will be asked to complete an enrollment questionnaire.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will be required to complete formal writing assignments each week, alternating between 4-page reading response papers and 2-page critiques of their peers' work. They will receive feedback on each of these papers--in writing and in person--from both the professor and their tutorial partners. Throughout the semester these writing assignments will total 25-30 pages.

HIST 168 (S) Black Film History (WS)

This course will examine the history of African American cinematic production since the silent era. By examining the work of Black filmmakers and cinematic representations of African Americans more broadly, we will explore a variety of key questions throughout the course of the semester, including: How did Black filmmakers address social and political questions in their work? How did filmmakers engage with and refute dominant cultural and Hollywood images of African Americans? What role did movie theaters play in the social lives of Black communities? How did film critics shape understandings of Black cinematic expression? What transformations occurred in the images of African Americans in film across the twentieth century? What role did filmmaking play in the Black Freedom Struggle? In addition to viewing a sampling of films, we will engage with a variety of scholarly and popular writing on the history of African American filmmaking, filmgoing, film criticism, and filmic performance.

Requirements/Evaluation: Active participation in class discussion, weekly 500-word discussion posts, two 4-5 page essays, and a final 10-12 page research paper

Prerequisites: None

Enrollment Limit: 19

Enrollment Preferences: Preference to first- and second-year students

Expected Class Size: 12-19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write two short (4-5 page) papers leading to a longer (10-12 page) research paper. Students will receive timely feedback on written work from peers and the instructor and will be required to submit revised drafts in response to feedback. Students will develop their final research paper in several stages, submitting a topic proposal, research question, outline, and annotated bibliography, with the instructor commenting on each step.

Spring 2025
HIST 202  (S) Islam in Africa  (DPE)

Secondary Cross-listing

Islam in Africa is often relegated to the peripheries in the study of Islam, a religion most associated with Arabs and the Middle East. On the flip side, Islam is also portrayed as foreign to African belief systems and institutions. The relationship between Islam and Africa, however, begins with the very advent of Islam when early Arab Muslim communities took refuge in the Abyssinian empire in East Africa. This course explores the history of Islam and Muslim societies on the African continent by focusing on the localized practices of Islam while also connecting it to Islam as a global phenomenon. The course will begin with a historical focus on the spread of Islam in Africa from East Africa and North Africa in the seventh century all the way to the spread of Islam through Sufi brotherhoods in the eighteenth and nineteenth centuries. The course will also take an anthropological approach, exploring the diverse practices of Islam in African Muslim communities and the social and cultural impact of Islam on African societies. Among the topics the course will cover include African Muslim intellectual traditions, local healing practices, religious festivals, early modern African Muslim abolitionist movements, and the historical interactions between African and Asian Muslim communities in the Indian ocean world.

Requirements/Evaluation:  Two essays during the semester and final project.
Prerequisites:  None
Enrollment Limit:  25
Enrollment Preferences:  REL, HIST, ARAB, AFR, GBST majors
Expected Class Size:  20
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
GBST 232(D2) AFR 232(D2) ARAB 232(D2) HIST 202(D2) REL 232(D2)

Difference, Power, and Equity Notes:  The course will urge students to consider how scholars construct centers and peripheries through a study of Islam in Africa that is often rendered to the peripheries in the study of Islam. The course will also explore the diversity of African Muslim communities, getting students to think about the diversity of human experiences and interpretations of shared sacred texts.

HIST 203  (S) Modern Japan

Cross-listings:  ASIA 203

Primary Cross-listing

This course is intended to familiarize you with the history of modern Japan, the world's third-largest economy and a dynamic influence on global culture. We will begin during the Edo Period (1600-1868), during which feudal (e.g., the status system) and more modern (e.g., a consumer society) features of Japanese life developed alongside each other. We will then examine the Meiji Restoration and explore how the Imperial Japanese state led Japan through modernization into total defeat by 1945. The course then looks at economic recovery and societal change during the postwar period, taking us up to the present day. Students will become familiar with several significant shifts in interpretation of key aspects of Japanese history. We will cover the rise and demise of the erroneous "national seclusion" narrative, the legislation of Japanese Emperor's divinity, and the debate over Japan's supposed ethnic and cultural distinctiveness. We will focus especially closely on the roles of class, gender, imperialism and foreign contacts in modern Japanese history. You are expected to critically analyze assigned primary and secondary sources and to communicate your ideas to your classmates effectively both orally and in writing. You are also expected to collaborate with your classmates to complete group activities. You are also expected to conduct limited original archival research.

Class Format:  This class features an immersive simulation, in which students will simulate the Meiji Restoration. The final project is a collaborative research project and presentation working with Japan-related sources from Williams's Special Collections.

Requirements/Evaluation:  Class participation, two 5-6 page essays, immersive simulation midterm, collaborative final research presentation
Prerequisites:  None
Enrollment Limit:  40
Enrollment Preferences: History majors, Asian Studies concentrators, then all others

Expected Class Size: 20-25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

HIST 204  (F)  Colonial Rule and Its Aftermaths in Africa  (DPE)
Cross-listings: AFR 227 / GBST 203

Primary Cross-listing

This course focuses on the history of Africa during the colonial and post-colonial periods, especially focusing on the period between 1885 and 2000. The first part of the course will explore the imposition of colonial rule and its attendant impacts on African societies. During this section, we will especially examine how Africans responded to colonialism, including the various resistance movements that arose at different moments to contest colonial rule. We will also explore the various transformations wrought by colonialism. The second part of the course will explore the African struggle to decolonize their societies and to fashion viable political systems. In addition to historical texts, the course will make use of cultural materials such as novels and films.

Class Format: Mixed format of lecture and discussion seminar

Requirements/Evaluation: active participation in discussion, map quiz, response papers, midterm and final exams, and case study paper (7-10 pages)

Prerequisites: None

Enrollment Limit: 30

Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Distributions: (D2)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 227(D2) HIST 204(D2) GBST 203(D2)

Difference, Power, and Equity Notes: This course will introduce students to how Africans contended with the forces of colonialism and its aftermaths. It will examine how different African societies as well as social groups on the continent were affected by and responded to colonial rule. All of the readings, discussions, and assignments will ask students to contend with the issues of how to write African lives into the history of colonialism.

**HIST 212 (F) De-Centering Imperial China, 960-1800**

**Cross-listings:** ASIA 202

**Primary Cross-listing**

The history of China from 960-1800 can be told as the story of a continuous, enduring culture and polity. This long period was nevertheless one in which the definition and contours of "China" were constantly contested. In this survey course, we will examine the political forms, institutions, and developments in culture, society, and economy that are characteristic of the Song (960-1279), Yuan (1279-1368), Ming (1368-1644), and early Qing (1644-1800) Dynasties alongside the Inner, Central, East, and Southeast Asian polities and cultures which interacted with, accommodated and repeatedly conquered centers of Chinese power over this time (Tanguts, Khitans, Mongols, and Jurchens/Manchus, among others). Gaining a historical perspective on power relationships within this diverse region will help us to understand the different ways in which Asia participated in changing world systems throughout this period. This course combines brief lectures with discussion of predominantly primary source readings.

**Requirements/Evaluation:** 3 short essays, midterm quiz, final exam or paper

China's presence continues to grow in our world today, but contemporary China also evinces complex contradictions: a market economy promoted by a nominally Communist government, extremes of urban wealth and rural poverty, increasing participation in the international community and intensifying nationalist rhetoric. This course examines China's historical engagement with the modern world to offer perspective on its current conditions. We will begin with the Qing (1644-1911) conquest of China and consolidation of a multi-ethnic empire, and investigate China's encounters with Western and Japanese imperialism, the rise of Chinese nationalism, Republican and Communist revolutions, and the often turbulent history of the People's Republic. Throughout, we will examine themes of social, economic, intellectual, and cultural change through predominantly primary source reading and analysis.
This course is intended to familiarize students with the premodern history of Japan, roughly defined as before the Meiji Restoration of 1868 and the modernizing reforms it unleashed. We will examine the archipelago's natural environment and the human impact thereon. We will explore the creation of "Japan" as a coherent political and cultural unit, key figures and works of Japanese culture and the shift in cultural production from elite patronage to the market. We will examine the Imperial institution and gendered aspects of Japanese private and public life, tracing the changing role Japanese women played in both spheres. We will also pay close attention to the rise of the samurai, both as warriors and political elites, and Japan's relationship with foreign lands and peoples. Students will become familiar with several significant shifts in interpretation of key aspects of Japanese history, such as the growing appreciation of the roles of non-elites in history, and the shift away from the "national seclusion" understanding of Japanese foreign relations.

Class Format: discussion

Requirements/Evaluation: Class participation; Semester-long immersive simulation, where groups of students produce bi-weekly, 2-page collective response papers (6 total); 5-6 page assigned reading-based and research papers (2 total); Final research presentation or self-scheduled final exam (1 total)

Prerequisites: None

Enrollment Limit: 40

Enrollment Preferences: History majors, Asian Studies concentration students, then everyone else

HIST 217 (F) Premodern Japan

Cross-listings: ASIA 217

Primary Cross-listing

What did colonialism look like in India, Britain's most valuable and populous possession for over two hundred years? How did the British establish their
rule over the vast subcontinent? And how did the people who lived there experience and finally overthrow colonial rule? This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from c. 1750 to 1947. This period spans the decline of the Mughal Empire through British colonial rule, South Asians' struggle for independence, and the Partition of India. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and podcasts. One objective of this course is to introduce students to the different political and social processes that led to the creation of India and Pakistan; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

Class Format: This class is combination of lectures and discussions. Student participation will be an essential component of the class and the overall evaluation.

Requirements/Evaluation: class participation, responses papers (2-3 pages), mid-term and final exam.

Prerequisites: none; open to all.

Enrollment Limit: 40

Enrollment Preferences: history majors if the the class is overenrolled.

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option.

HIST 222 (F) Greek History

Cross-listings: CLAS 222

Secondary Cross-listing

This course covers the history of ancient Greece from the Bronze Age Minoan and Mycenaean palace civilizations to the Roman conquest of the East Mediterranean (c. 1500-1 BC). We will study the development, expansion, and interactions of Greek society and its cultural expressions through a wide variety of textual sources and archaeological evidence across the Mediterranean basin and West Asia. How did the Greek world conceptualize and enact various modes of individual and collective status, construct political systems from one-man rule to popular democracy, and grapple with issues of memory and identity? How did the Greek world deal with victory and defeat, imperialism and subjugation, freedom and slavery, upheaval and decline? How should we approach the mythology about the origins of humanity, or the subsequent development of natural science and philosophy from Ionia to Athens and beyond? Why has this past continued to work as a mirror in subsequent periods, even up to our modern day? From the collapse of the Mycenaean palaces to the building of the Athenian acropolis, from autocratic warlords to the birth of democracy, from wandering merchants to Hellenistic kings, from Hesiod to Herodotus, Socrates, and Thucydides, this course will seek to reconstruct and understand the trajectory of ancient Greek society and culture from its early inception to its subjugation under Roman rule. All readings will be in translation.

Class Format: discussion

Requirements/Evaluation: contributions to class discussions, occasional short written assignments, quizzes, a midterm, a final exam.

Prerequisites: none; open to all.

Enrollment Limit: 35

Enrollment Preferences: First-year students and sophomores; majors and intended majors in Classics, History, and Art History.

HIST 223  (S)  Roman History  

Cross-listings:  LEAD 223 / CLAS 223  

Secondary Cross-listing  

The history of ancient Rome can be seen as an account of formative events, practices, and thought in the history of western culture; it also is the history of the most far-reaching experience of diverse cultures, beliefs, and practices known in the Western tradition until modern times. By studying Roman history from Rome's emergence in central Italy in the 7th century BCE through the reign of the emperor Constantine in the early fourth century CE, we will see the complex and fascinating results of an ambitious, self-confident nation's evolution, transformation, and expansion throughout the Mediterranean world. We will consider questions such as, How did a republic with an aversion to autocratic rule and devotion to *libertas* understand its existence as an imperial power as well as its own elite's dominant rule over Romans and non-Romans alike? How and why did the Roman republic and its deeply entrenched republican ideology give way to the effective rule by one man, Augustus, and the increasingly monarchical rule of the emperors who followed? Did Roman political life in the later republic cause the violence that left it in crisis, or did the persistence of violence in Roman life account for the nature of Roman politics? Who were the non-elites of Rome, Italy, and the Roman empire? Who were the important writers, politicians, poets, philosophers, and innovators whose works constitute a rich cultural heritage worthy of both appreciation and critique? Throughout the course there will be an emphasis on the problems of historical and cultural interpretation, on how the Roman experience is relevant to our own, and, importantly, on the pleasures of historical investigation. Readings for this course will include a variety of original sources, a range of scholarly essays on specific topics, and a textbook that will provide our chronological framework.  

Requirements/Evaluation:  Class preparation and participation, quizzes, a midterm, a final exam, and occasional short written assignments.

HIST 224  (S)  Introduction to Medieval Europe  

This course traces the development of European societies from the collapse of the Western Roman imperial order in the fifth century CE to the rise and consolidation of powerful monarchies by the fifteenth century: a foundational period in European history. Along the way, we will confront many of the paradoxes that make medieval history so compelling. How did political fragmentation coexist with the spread of an increasingly uniform, Latin Christian culture? How was that same Christian culture mobilized to support both hierarchy and popular resistance to hierarchy, both early capitalism and voluntary poverty? As we encounter the medieval world through the men and women who lived in it, we will read the writings of saints and heretics, poets and lawyers, merchants and mystics. Though Western Europe will be our focus, we will also examine how Western European Christians defined themselves, in part, through their relationships with their neighbors in the Islamic and Byzantine worlds, and with internal religious minorities, such as the Jews. By the end of the course, students will appreciate how the socio-economic and intellectual legacy of the Middle Ages profoundly shaped the subsequent history not only of Europe, but the world.  

Requirements/Evaluation:  Attendance and participation, 4-5 reading responses, short paper, and final exam.  

Prerequisites:  None  

Enrollment Limit:  40  

Enrollment Preferences:  Junior and Senior History majors  

Expected Class Size:  25-30  

Grading:  yes pass/fail option,  yes fifth course option
HIST 226 (S) Early Modern Europe

The three hundred years from the late Middle Ages to the French Revolution were Europe's formative centuries: they saw the Renaissance and the Reformation, the outbreak of the Wars of Religion, the colonization of the Americas and intensification of trade in Asia, the Scientific Revolution and the Enlightenment. Through these historical experiences, European culture developed an identity distinct from its Christian one, as well as peculiar political and economic forms that ended up shaping the modern world. This course will examine such topics as the revival of classical letters, the formation of the modern state, urban and courtly culture, and religion and unbelief. Although the "early modern" era is profoundly different from our own, it remains crucial to any interpretation of the world in which we live today. Readings will emphasize primary sources and include such authors as Petrarch, Machiavelli, Montaigne, Francis Bacon, Mary Montagu, and Voltaire.

Requirements/Evaluation: Attendance and active participation; map quiz; weekly written responses to the readings; midterm and final exam.

Prerequisites: No prerequisites.

Enrollment Limit: 40

Enrollment Preferences: History majors or prospective majors.

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

HIST 228 (S) Europe in the Twentieth Century

From the vantage point of 1989, democracy's victory over fascism and communism in Europe in the twentieth century appeared decisive, even inexorable. From the present vantage point, however, the contingencies attending Europeans' commitment to democracy in the twentieth century have reemerged strongly, pointing toward a still uncertain future and a different reading of the past. This course offers a survey of twentieth-century European history with a focus on the political ideas, movements, formations, thoughts and feelings that shaped Europeans' experiences from the bottom up and the top down. Organized topically and thematically, the course will consider European society in the fin-de-siècle period; imperialism, racism, and mass politics; the impact of the Great War on European thought, culture and society; the Russian Revolution and Stalinist Russia; economic and political stabilization in the 1920s; the Depression; the rise of Fascism and National Socialism; World War II and the Holocaust; the establishment of postwar social democratic welfare states; decolonization; the "economic miracle" of the 1950s; the uprisings of 1968; the development of the European Union; the 1989 revolutions in Eastern Europe; the break-up of Yugoslavia; and recent debates about the future of Europe. Through a combination of lecture and discussion, the course seeks to introduce students to the major ideologies and institutions that shaped the lives of Europeans in the twentieth century, and to reflect on the role of ordinary people who devised, adapted, embraced, and sometimes resisted the dominant ideas and practices of their time.

Class Format: the class will be taught primarily by discussion with short lectures operating to frame those discussions

Requirements/Evaluation: regular attendance and class participation, six or seven in-class quizzes, one 6-8 page interpretive essays, a midterm, and a scheduled final examination

Prerequisites: none; open to all

Enrollment Limit: 40

Enrollment Preferences: if overenrolled, preference given to History majors and students interested in becoming a major

HIST 230  (F)  Modern European Jewish History, 1789-1948

Cross-listings: JWST 230

Primary Cross-listing

What does it mean to be Jewish? The question of Jewish identity emerged anew at the end of the eighteenth century in Europe and has dominated Jewish history throughout the modern period. Although Jewish emancipation and citizenship followed different paths in different parts of Europe, in general Jews were confronted by unprecedented opportunities for integration into non-Jewish society and unprecedented challenges to Jewish communal life. Focusing primarily on France and Germany, and to a lesser extent on the Polish lands, this course will introduce students to the major social, cultural, religious, and political transformations that shaped the lives of European Jews from the outbreak of the French Revolution to the aftermath of World War II. We will explore such topics as emancipation, Jewish diversity, the reform of Judaism, competing political ideologies, Jewish-gentile relations, the rise of modern antisemitism, gender roles in Jewish society, interwar Jewish culture, Jewish responses to Nazism and the Holocaust, and the situation of Jews in the immediate post-WWII period. In addition to broad historical treatments, course materials will include exposure to different kinds of primary sources, from philosophical and political treatises, to memoirs, diaries, and fiction.

Class Format: discussion

Requirements/Evaluation: class participation, weekly comments on readings, two 6- to 8-page papers, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: Jewish studies concentrators, first-years, sophomores

HIST 232  (S)  Twentieth-Century Europe: Nationalism, War, and Empire

This course is a survey of twentieth-century Europe. While providing students with a historical basis for understanding the continent's social, political, and cultural changes, this course pays attention to two interrelated phenomena: first, the process by which Europe went from being a constellation of empires to one of nation-states; second, the heterogenous ways in which Europe's residents participated in the making -- and then the remaking -- of modern Europe. 2023 marks the thirtieth anniversary of the European Union. This course provides students with a historical framework for understanding how and why Europe's residents rallied around this project of European integration and did so after having lived under imperial and national formations.

Requirements/Evaluation: Class participation, a midterm and final, and one 5-7-page paper

Prerequisites: None; open to all

HIST 237  (S)  The Life of Ancient Cities: Building, Belonging, Trading and Dying in Greece and Rome

Cross-listings:  CLAS 237

Secondary Cross-listing

In this course we explore ancient urbanism, investigating Greco-Roman cities from the early archaic period through late antiquity. By analyzing a variety of primary sources – literature, visual art, inscriptions, papyri, building remains -- dating from 750 B.C. to 300 A.D. and ranging geographically from Spain to central Asia, we will think critically about problems such as communal belonging, spatial interaction, social exclusion, monuments, memories, and identities in urban contexts. Athens and Rome will beckon along the way, but numerous places around the Mediterranean basin and beyond will feature prominently, including Pompeii in southern Italy, Olynthus in Macedonia, Cyrene in North Africa, Ephesus and Priene in western Asia Minor, Alexandria and Berenike in Egypt, and Dura Europos and Al Khanoum in Central Asia. Every week, we will tackle a core question associated with life in the ancient city: the challenges of urban design, the tensions associated with civic membership, the consolidation of political institutions, the conflicts brought about by trade and migration, the role of religion, the effects of war, the universal reality of social exclusion, cultural expressions of life and death, and the impact of sudden natural catastrophes, among others.

Requirements/Evaluation:  Class participation in discussion, various written assignments leading toward the development and completion of a research paper on a topic of the student's choosing.

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Majors and intending majors in Classics and History

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

HIST 254  (F)  Sovereignty, Resistance, and Resilience: Native American Histories to 1865  (DPE)

Cross-listings: AMST 254 / LEAD 254

Primary Cross-listing

This course surveys Native American/Indigenous North American histories from beginnings through the mid-nineteenth century, tracing the complex ways that sovereign tribal nations and communities have shaped Turtle Island/North America. Equally important, it reckons with the ongoing effects of these pasts in the twenty-first century, and communities' own forms of interpretation, critique, action, and pursuits of justice. It also introduces foundational methodologies in Native American and Indigenous Studies (NAIS) and strategies for pursuing decolonizing scholarship and action. Emphasis is on primary and secondary works produced by Indigenous authors/creators. Starting with the diversity of Indigenous societies that have inhabited and cared for lands and waters since "time out of mind," it foregrounds the complexity of Native peoples, nations, and worldviews situated in particular homelands, as well as accounts of origins and migrations. It addresses how societies confronted devastating epidemics resulting from the "Columbian Exchange," and contended with Euro-colonial processes of colonization, extraction, and enslavement. Indigenous nations' multifaceted efforts to maintain sovereignty and homelands through pervasive violence, attempted genocide, and dispossession are addressed, as well as forms of relations and kinship with African-American and Afro-Indigenous people. It concludes with how different communities negotiated the tumultuous eras of the American Revolution, forced removal in the 1830s, and Civil War, and created pathways for endurance, self-determination, and security in its aftermath. The course centers on Indigenous actors--intellectuals, diplomats, legal strategists, knowledge keepers, spiritual leaders, artists, and many others--and consistently connects historical events with present-day matters of land, historical memory, education, caretaking, and activism. Additionally, it provides an opportunity to engage with original materials in the Williams College Archives/Special Collections and Art Museum. While the scope of the course is continental and transoceanic, it devotes significant attention to the Native Northeast and the Stockbridge-Munsee Mohican homelands in which Williams College is located.

Class Format: Lecture with small- and whole-group discussions

Requirements/Evaluation:  Attendance at lectures, active participation in class discussion, midterm exam, short essays based on readings and discussion topics, museum/archives exercise, final essay/project.
Difference, Power, and Equity Notes: This course intensively explores Native American/Indigenous North American histories, experiences, and forms of critical and creative expression, as well as responses to and engagements with Euro-American settler colonialism. It guides students into methodologies central to Native American and Indigenous Studies (NAIS), and gives opportunities for oral and written reflections on NAIS approaches to historical themes and sources, as well as decolonizing methodologies more broadly.

Attributes: HIST Group F Electives - U.S. + Canada HIST Group P Electives - Premodern

HIST 255  (F)  From Sand Creek to Standing Rock: Recent Native American Histories  (DPE)

This course surveys Native American/Indigenous histories from the era of the U.S. Civil War to the present as well as future, centering community voices, scholarship, and interpretations. Beginning with Sand Creek and the violences experienced by Native communities in 1864, it traces how diverse Native nations navigated the tumultuous times that followed, up to recent protective actions at Standing Rock and Mauna Kea in the 21st century. Topics include treaty-making and diplomacy; creation and contestation of reservation systems; connections with African-American families and communities; residential school experiences of Native youth and families; Indigenous visual and performative artistic traditions and transformations, both in North America and abroad; urban relocation policy and experiences; Red Power activism and Indigenous internationalism; treaty rights activism and federal recognition debates; environmental interventions and food sovereignty movements; and critiques of settler colonialism. The course stresses the resilience of sovereign Indigenous nations into the present, and introduces students to a wide range of methodological approaches from Native American and Indigenous Studies and history. It blends big-picture vantages on these topics with microhistorical accounts of particular individuals, communities, and events, and offers a continental view of historical changes coupled with attention to the specific area of the Native Northeast--Stockbridge-Munsee Mohican homelands--in which Williams College is situated.

Requirements/Evaluation: class discussion, reading responses, short analytic essays, archival/object analysis, final essay/project

Prerequisites: Hist/AmSt 254: Native American Histories to 1865 is good preparation for this course, but is not required.

Enrollment Limit: 15

Enrollment Preferences: History and American Studies majors; then first- and second-year students from any major

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course focuses on Native American/Indigenous experiences in North American and transnationally, and offers immersion in critical perspectives on settler colonialism and U.S. law and practice, and well as introduction to methodologies in Native American and Indigenous Studies.

HIST 258  (S)  The Petroleum Age: A Global History

We live in a world transformed by petroleum. All around us today--in global carbon emissions, transportation, the clothes we wear, everyday objects we touch, microplastics in our water--oil is there, even if we can't always see it. At the same time, the industry fuels massive flows of global capital, and provokes critical political shifts, conflicts, and resistance movements around the world. How did oil's ubiquity happen in just over 150 years? This course will chart a global, modern history by keeping this energy source always in our sight, paying particular attention to its role in the political economy, its ecological impacts, the cultural changes it has set in motion, and its place in people's material lives. Throughout the semester, we will also foreground some of the foundational skills needed to create an historical account, which will culminate in students' completing a 5-minute video or podcast on a relevant topic of their choice.
**HIST 263 (F) The United States and the World, 1898-2001**

This survey course examines the United States and the World from 1898-2001. Students will be introduced to key diplomatic developments from the Spanish-American War to the War on Terror with attention to ideological, political, cultural, military, and economic forces. Topics will include American imperialism and anti-imperialism, the emergence of U.S. cultural and economic hegemony in the interwar years, WWII and the origins of the Cold War, the Soviet-American rivalry in Europe and on the periphery, nuclear policy, the Vietnam War, late-Cold War diplomatic reconfigurations, the rise of political Islam, the collapse of the Soviet Union and its aftermath, and the events surrounding 9/11. By engaging with a range of primary and secondary source readings, students will examine how Americans historically have made sense of their nation's role in the world, and how historians explain important aspects of U.S. foreign policy.

**Class Format:** discussion

---

**HIST 264 (F) Environmental History**

**Cross-listings:** ENVI 229

**Secondary Cross-listing**

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

**Class Format:** with field trips

**Requirements/Evaluation:** several short essays; final research project

**Prerequisites:** none

**Enrollment Limit:** 18
Enrollment Preferences: juniors, seniors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

HIST 266 (F) The Roaring Twenties and the Rough Thirties

Cross-listings: AMST 267

Primary Cross-listing

This course will probe the domestic history of the U.S. from 1919 to 1939 and the cultural, economic, political, and social changes accompanying America's evolution into a modern society. Themes include: developments in work, leisure, and consumption; impact of depression on the organization of the public and private sectors; persistence of traditional values such as individualism and the success ethos in shaping responses to change; and the evolving diversity of America and the American experience.

Requirements/Evaluation: Students will be graded on class participation and will have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two short response papers and will complete an interpretative essay (5-7 pages) focused on art from the WPA Federal Art Project.

HIST 273 (F) Going Nuclear: American Culture in the Atomic Age

Cross-listings: STS 224 / SOC 224

Secondary Cross-listing

This course will examine the historical development and use of the nuclear bomb. Among other features of the early atomic age, the course will look at the Manhattan Project, the delivery of the bombs for combat, the destructive effects of the bomb's initial use in Hiroshima and Nagasaki, and the ongoing testing of nuclear weapons in the Marshall Islands after WWII. The class will investigate the role of the nuclear arms race in the Cold War, the consequences of nuclear production on specific communities, and the implications of the atomic age on our critical understanding of technological innovation more generally. We will also consider the saliency of competing narratives interpreting America's decision (and continuing policies) to build, use, and stockpile nuclear weapons. Employing both sociological and historical perspectives, we will explore the interactions between science, politics, and culture in the nuclear age.

Requirements/Evaluation: a midterm, a final exam, and a 10- to 12-page research paper

Prerequisites: none

Enrollment Limit: 20
Enrollment Preferences: Preference given to sociology and history majors.

HIST 276 (S) Stockbridge-Munsee Mohican Community Histories, Presents, and Futures (DPE)
The ancestral and continuing homelands of the Stockbridge-Munsee Mohican Community (SMC) are where Williams College is located, a fact that the institution formally recognized in Fall 2021 through a land acknowledgment. This was one step toward building more meaningful relations between the College and the sovereign tribal nation, which has been displaced through violent, painful processes directly shaped by the Williams family, while also maintaining enduring relations with these homelands. This course addresses needs to continue work of learning and repair by "educating beyond the land acknowledgment." It centers SMC experiences, knowledge, and goals, and provides space for students to work on projects directly meaningful for the community, including the Tribal Historic Preservation Office (THPO) that is based locally through an official partnership with the college. It will have strong collaborative and experiential components, plus ethical commitments to highlighting the tribal nation's active forms of stewardship, knowledge-keeping, and intellectual as well as political sovereignty. The exact shape of the syllabus and projects will be determined in close conversation and collaboration with the Stockbridge-Munsee Community. Depending on goals/interests, potential areas of focus might include SMC homelands; archaeological research and its importance for place-stewardship; political sovereignty, governance, and leadership; histories and impacts of European colonialism among SMC people; SMC traditions of diplomacy and peacemaking; strategic uses of archives and documents in protecting community wellbeing and resisting dispossession; the "Many Trails" of forced removal westward; establishment of the SMC in Menominee homelands; 20th and 21st-century experiences, knowledge-keeping, and continuing connections with eastern homelands; repatriation of ancestors and belongings; language revitalization, Land Back, education, and economic sovereignty; and other topics.

Class Format: The class will use Zoom/videoconferencing to connect with Stockbridge-Munsee Community members and engage in shared learning. Class trips to significant locations to learn in place may be coordinated. The class will meet each Wednesday evening 7-9:40 p.m. for seminar discussion. In addition, the Wednesday 1-2 pm time (required, called "lab" in the course catalog) will be for meetings with collaborators in libraries/archives/museums or other relevant sites and project work.

Requirements/Evaluation: The focus of this seminar is experiential, collaborative, and community-based learning and student service project work. Seminar meetings will include discussion of readings/multimedia (especially works produced by SMC members), and meetings and dialogues with community members (in person or virtually as schedules and COVID permits). Class members’ active, engaged participation in trips to area places of significance will be essential components as well. In small groups class members will work on projects of significance for the SMC, and may share out their work at the end of the term in multiple forms.

Prerequisites: Open to all students. If the course over-enrolls, students may be asked to share a brief statement of interest.

Enrollment Limit: 15

Enrollment Preferences: If the course over-enrolls, first- and second-year students will have preference.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

HIST 279 (F) African American History Since 1865
Cross-listings: AFR 279

Primary Cross-listing

This course provides an introduction to the history of African Americans from the post-emancipation era to the present day. Focusing on the collective and individual life experiences of African Americans, it will highlight the actors, organizations, and ideas that have been central to the African American experience. We will examine struggles for equality, justice, citizenship, and self-determination and the various ways African Americans have sought to achieve these ends. By the end of the semester students will have a basic understanding of core topics in African American history such as Reconstruction and Redemption; the rise of Jim Crow segregation; urban migrations and the "New Negro"; the Civil Rights Movement, in its Northern and Southern manifestations; the movement for Black Power and its antecedents; the rise of mass incarceration in the post-Civil Rights Era. The course will conclude with a discussion of the Presidency of Barack Obama and the Black Lives Matter Movement.

Requirements/Evaluation: Students will be graded on class participation, a midterm and a final exam, and two to three formal papers (3-5 pages each)

Prerequisites: None

Enrollment Limit: 40

Enrollment Preferences: History or Africana Studies majors

Expected Class Size: 18-20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 280 (S) Emancipation to BlackLivesMatter

Cross-listings: LEAD 280 / AFR 280

Primary Cross-listing

This introductory course surveys the cultural, political, and social history of African Americans from Reconstruction to the present. It offers a balance between a "top-down" and "bottom-up" approach and focuses primarily on African Americans' quest for citizenship, equality, justice, and opportunity. In addition to examining major historical developments and popular figures within the modern black past, we will explore the lesser-known histories of everyday people who helped shaped the black freedom struggle. In so doing, we will interrogate conventional narratives of progressive movements since emancipation. Some of the main topics include: the transition from slavery to freedom; the rise of Jim Crow and the politics of racial uplift; the Great Migration and the emergence of the New Negro; the Great Depression and the New Deal; World War II and the struggle for economic and racial inclusion; the postwar period and the intersecting movements of Civil Rights and Black Power; and the impacts of deindustrialization and mass incarceration on the black community. We will end with a discussion of the Obama years and Black Lives Matter.

Class Format: Class will be a mix of lecture/seminar

Requirements/Evaluation: Students will be graded on class participation and will have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two response papers (2-3 pages) and will complete a mapping project based on The Negro Motorist Green Handbook.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Students with demonstrated interest in material. If the course is overenrolled, students will be asked to complete a questionnaire.

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)
This course offers an overview of Asian American history from the late seventeenth century to the present. It will cover the earliest Asian migration and settlement in the U.S., the rise of anti-Asian movements, the experiences of Asian Americans during World War II and the Cold War, the emergence of the Asian American movement in the 1960s, the post-1965 Asian immigration, and the War on Terror. We will investigate broader themes including labor, citizenship, political resistance, gender and sexuality, community formation, empire, and transnationalism. We will also consider key contemporary issues, including race and ethnic relations, anti-Asian harassment and violence, and the legacy of U.S. colonialism in Asia-Pacific. Along the way, we will engage classic and recent scholarship in the field, and form our own interpretations of the past based on a wide range of sources—including films, novels, newspapers, government documents, political cartoons, and more. Throughout, the course advances the argument that citizenship and belonging in the U.S. cannot be fully understood without accounting for the experiences of Asian Americans.

Requirements/Evaluation: Attendance and participation in discussion, weekly reading responses (2 pages), midterm exam, and final in-class exam and take-home essay (7-10 pages)

Prerequisites: None

Enrollment Limit: 30

Enrollment Preferences: Preference given to History majors and Asian American Studies concentrators.

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course introduces students to the incredible diversity of Asian Americans. It guides students through an examination of the historical events, policies and dynamics that have marginalized Asian American communities based on race, ethnicity, class, gender, sexuality, citizenship, and other forms of difference. It also explores the diverse ways that Asian Americans have sought inclusion and belonging in the U.S.

The first Latinx communities were formed in 1848 when the United States conquered half of Mexico's territory. In 1898 the United States annexed Puerto Rico and has retained sovereignty to this day. These early conquests and continuing im/migrations created Mexican and Puerto Rican communities in the United States. U.S. imperialism continued to shape the im/migrations that created Cuban, Dominican, Salvadoran, Guatemalan and other Latinx communities in the United States. This course explores U.S. military, political, and economic interventions and their impact on im/migrations and the making of Latinx communities. We also explore the impact of U.S. employers' and the U.S. government's recruitment of low wage workers in shaping im/migrations, destinations, and the formation of Latinx working-class communities. Im/migration and refugee policies have long defined who is eligible to enter and how, as well as who is deemed eligible for citizenship and belonging. Within this context, Latinas and Latinos...
have developed survival and family reunification strategies for themselves, their families, and their communities.

Class Format: This course is a discussion format.

Requirements/Evaluation: Class participation, short 1-2 page writing assignments, two 4-5 page essays, and a final 5-7 page essay. All writing assignments are based on course materials.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: LATS concentrators, History majors, or those intending to become concentrators or majors, seniors

HIST 292 (F) History of Sexuality

Cross-listings: GBST 241 / REL 241 / WGSS 239

Secondary Cross-listing

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

Requirements/Evaluation: reading responses, two essays, and final research paper

Prerequisites: none

HIST 296 (S) Human Rights and National Security: Seeking Balance in the United States

Cross-listings: LEAD 296

Primary Cross-listing
This course will ask if ensuring collective security and preserving individual rights are inherently contradictory or if they may, in fact, be mutually reinforcing. Focusing on developments and issues within the United States since its founding, the class will explore how Americans have sought to reconcile concerns about national security and a broad array of rights in the past, and the implications of this history for contemporary debates. The course will challenge students to consider how debates over national security and rights have reflected broader partisan divides and served diverse political objectives. Moreover, students will explore how these debates reflected competing visions of national identity and purpose, and question how and why the costs of security measures disproportionately burdened people based on race and religious identification. The course will initially survey these issues through a historical lens, demonstrating how questions of security and rights have been present since the nation's founding. It will draw on key moments in U.S. history to explore issues of foreign subversion, dissent, surveillance, habeas corpus, presidential power in times of war, and border security and immigration. Familiarity with historic precedents will ensure that students are prepared to grapple with a closer examination of contemporary studies of refugees and immigration; cybersecurity and surveillance; domestic terrorism and hate crimes; and counter-terrorist detention and interrogation. Students will be assessed on participation, short writing assignments, and a group podcast project.

Requirements/Evaluation: Students will be assessed on participation, short writing assignments, and a group podcast project.

HIST 301 (S) Approaching the Past: Transnational, Colonial, and Postcolonial Histories

This course examines the practice of history from the nineteenth century to the present. We will examine the sources, methods, and theoretical assumptions that have shaped the historical craft in this period, as well as the deeper questions that all historians must confront, implicitly or explicitly: What is "history"? Who makes it and how? How do these questions figure into national, transnational, colonial and post-colonial histories? To address these issues, we will discuss the work of canonical and non-canonical historians from across the world, and from outside as well as inside the academy. The particular focus will be on the production of history from the rise of the nation-state through the spread of new imperialisms in the late nineteenth century and on to the emergence of the "Third World," decolonization, and the "new globalization" over the course of the twentieth century. In weekly meetings we will analyze texts and how their authors define historical subjects/actors and processes, as well as the meanings of history for different audiences and eras.

Requirements/Evaluation: class participation, 10 short (2-page) papers, final presentation

Prerequisites: restricted to History majors and sophomores planning to major in History

Enrollment Limit: 19

Enrollment Preferences: History majors

Expected Class Size: 15-19

Grading: no pass/fail option, no fifth course option

HIST 301 (F) Approaching the Past: The Historian's Task

What is the historian's task? In this seminar we will consider a variety of answers to this question by looking at how historians have practiced their craft from antiquity to the present. In the first half of the course, we will read historians from across the globe to see how the study of the past has differed across human societies from antiquity until the nineteenth century. What do their approaches have in common, and what distinguishes them? In the
second half of the course we will investigate the modern historical tradition from the early twentieth century to the present, including the Annales school, economic and environmental history, microhistory, and subaltern studies. Throughout, we will discuss what lessons we can draw for our own practice as historians. Authors to be read include Herodotus, al-Mas'udi, Ranke, Bloch, Guha, Gordon-Reed among others.

Requirements/Evaluation: Attendance and active participation, two short (5-7 pp.) papers, in-class presentations, final research proposal and bibliography, and a longer (10-12 pp.) final research paper.

Prerequisites: Restricted to History majors and sophomores planning to major in History.

Enrollment Limit: 19

Enrollment Preferences: The course is designed for junior and senior History majors; sophomores may enroll with instructor consent.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

HIST 301 (S) Approaching the Past: The Use and Abuse of History

Is history, like beauty, in the eye of the beholder? What is history and who gets to decide? How and where is history consumed and by whom? This course examines the use and abuse of history from the early twentieth century to the present especially how history has been impacted by the digital sphere (tv, films, social media), the rise of nationalism and the processes of globalization. First, students will grapple with what constitute notions of truth, objectivity and facts and how terminology has changed over the last 100 years. Next, we will evaluate various influential methodological trends that have impacted how history has been written and consider what was said and left unsaid, which perspectives were privileged and whose voices were marginalized. Finally, we will analyze the state of history today and how it appears in people's daily lives and especially how history is used and abused in public discourse on various media platforms. How is historical memory formed today?

Requirements/Evaluation: Class participation, oral presentations, several short (3-4 page) papers, and a final project.

Prerequisites: Restricted to History majors and sophomores planning to major in History

Enrollment Limit: 15

Enrollment Preferences: Senior then junior History majors

HIST 301 (F) Approaching the Past: Contemplating American Power

Historians have long debated how best to approach the study of U.S. "diplomatic history," which is now often subsumed under the more capacious descriptor "The United States and the World." In the 1960s, prevailing orthodox interpretations of American power--often patriotic and elitist--gave way to challenges from New Left revisionist historians who focused largely on economic motives for American imperialism. By the 1970s, however, the once dominant historical field of diplomatic history was beset by a sense of crisis; its practitioners consumed with anxiety over their marginalization in a discipline that embraced social and cultural theories that that seemed to render the narrow study of Western white men in power increasingly obsolete. For the past half-century, historians of American foreign relations have engaged in a sustained and ever-shifting debate, not only about the nature of American power, but over what can and should be included within the field's parameters. Today, annual meetings of the Society for American Foreign Relation--and its marquee journal, Diplomatic History--feature scholarship ranging from "traditional" approaches to those centered on gender, sexuality, race, cultural exchange, emotion, environmental studies, sports, music, and more. Yet, debates still rage about whether this broadening has enriched the study of American power, or diluted it to the point of meaninglessness while discouraging young scholars from pursuing critical research on high-level diplomacy. In this course, we will grapple with key historiographical schools and critical debates, and assess the current state-of-the-field of diplomatic history.

Requirements/Evaluation: Participation, short papers, presentations, and a longer final paper
**HIST 301 (S) Approaching the Past: Economic and Labor Histories in the Making of the U.S.**

This course examines the sources, methods, and theoretical assumptions that have shaped historical practice from the late nineteenth century to the present. We will grapple with foundational questions including: What is "history"? Who makes it, who writes it, and how? From whose perspective and to what end? Focusing on U.S. economic and labor histories, we will examine when and where these histories intersect, as well as where and why they might diverge. To what extent are historical narratives shaped by the time period in which they are written, revealing their embeddedness in the dominant discourses of the era? Or to what extent might historical approaches provide alternatives? We will also consider what the implications of U.S. economic and labor histories are in terms of relationships to the state via policymaking, politics, and activism. Anchoring our own historical analysis in the late nineteenth century and the 1930s, we will then focus on the era between World War II and the present. In our seminar meetings, we will analyze historical writings and debates, considering how their authors define historical themes, subjects/actors, and processes, as well as the meanings of history for different audiences and eras.

**Class Format:** This is a discussion based seminar.

**Requirements/Evaluation:** Class participation, short writing assignments of 1-2 pages, and mini-presentations; Mid-term essay, 3-5 pages; Paper proposal and annotated bibliography; Final paper and presentation

**Prerequisites:** Restricted to History majors and sophomores planning to major in History.

**Enrollment Limit:** 15

**Grading:** no pass/fail option, no fifth course option

**Unit Notes:** Course, 301, required for History Major

**Distributions:** (D2)

**Attributes:** HIST Group F Electives - U.S. + Canada

Not offered current academic year

**HIST 301 (S) Approaching the Past: Biographical Methods**

This seminar grapples with the methodological, conceptual, theoretical, and ethical challenges of writing biography, and of using biography as an approach for understanding the past. We will ask how historians attempt to understand the past through the lives of individuals; and how historians attempt to understand the lives of individuals through a wide range of interpretive methods. As we explore the goals, challenges, and possibilities of the genre of biography as practiced by historians, we will consider questions about archival abundance and archival scarcity; about the contested meanings of "facts" and the function of imagination; and about the different scales and categories of analysis used by historians writing biographies. We will consider a variety of answers to these questions by reading theoretical work about history and biography, as well as by reading examples that represent a wide range of theoretical and methodological approaches.

**Requirements/Evaluation:** Attendance and active participation, two short (5-7 pages) papers, in-class presentations, a final research proposal and bibliography, and a longer (10-12 pp.) final research paper.

**Prerequisites:** The course is designed for junior and senior History majors; sophomores may enroll with instructor consent.

**Enrollment Limit:** 19

**Enrollment Preferences:** Restricted to History majors and sophomores planning to major in History
HIST 302  (F)  Islamic Law: Past and Present

Cross-listings: ARAB 243 / ASIA 243 / REL 243 / WGSS 243

Secondary Cross-listing

From fear of the Shari'a to its implementation in so called "Islamic countries," Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari'a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

Requirements/Evaluation: weekly responses, midterm essay, final essay

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: majors

Expected Class Size: 17

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 304  (S)  Sacred Custodians: Environmental Conservation in Africa  (DPE)

Cross-listings: GBST 304 / ENVI 304 / AFR 335

Primary Cross-listing

In this seminar we will explore environmental conservation in Africa. In particular we will look at African ideas, ethics, and approaches to environmental conservation. Are there African ideas, ethics, and activities that are uniquely conservationist in nature? We will explore well-known African leaders to understand what spurred them to become conservationists, how they interpreted and communicated environmental crises. For example, Wangari Maathai is a world-renowned female scientist who established the Green Belt Movement in Kenya. This movement focuses on addressing the problem of deforestation. Ken Saro-Wiwa was an activist in Nigeria who fought for and alongside local communities against multinational oil corporations. We will examine these and other African conservation practices alongside popular images of environmental crisis that place blame for environmental degradation on Africans. Students will be invited to critically study histories of environmental management on the continent and the emergence, development, and impact of the idea of conservation. We will unpack the rich histories of conservation efforts in Africa, such as resource extraction, game parks, desertification, wildlife and hunting, traditional practices, and climate change.

Requirements/Evaluation: Requirements/Evaluation: active participation in discussion, map quiz, reading reflections, critical reflections on films, a case study (5-7 pages), and one exam.
Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: If course is over-enrolled, preference to History Majors and students with a demonstrated interest in African studies.

Expected Class Size: 15-20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 304(D2) GBST 304(D2) ENVI 304(D2) AFR 335(D2)

Difference, Power, and Equity Notes: This course will intensively explore the question of how various global and local actors have defined environmental degradation and promoted approaches to conservation in Africa. It guides students through an examination of the different power dynamics that have shaped environmental conservation thought and practices on the continent. This course, therefore, provides a critical lens through which to examine the inequalities rooted in race, gender, and other forms of difference

HIST 306 (F) Indigenous Narratives: From the Fourth World to the Global South (DPE) (WS)

Cross-listings: COMP 369 / ARAB 369 / GBST 369

Secondary Cross-listing

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Forma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Amazigh poetics in the Maghreb, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? What is the connection between the recent "boom" of English translations of Indigenous texts and neoliberalism, multiculturalism and neo-colonialism? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Requirements/Evaluation: active class participation, several short response assignments (3-4 pages), two film reviews (1 page), a performance project, and a final paper (7- to 10-pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 369(D1) HIST 306(D2) ARAB 369(D1) GBST 369(D2)

Writing Skills Notes: This course will enable students to write weekly while engaging with various forms of writing skills: articulating arguments in short response papers (3-4 pages each), developing visual criticism through writing two film reviews, (1 page each), journaling through writing a personal reflections on a performance project, and honing research language in producing a final paper of 7-10 pages. Instructor's feedback and peer review sessions will include review of drafts and argumentative structures.
**Difference, Power, and Equity Notes:** At the heart of this course is the history of global Indigenous struggle for liberation and decolonization. The various novels, short stories, poems, films and other texts that students will engage with narrate histories of colonial dispossession, racial oppression, economic subjugation and dehumanization of minoritized Indigenous communities in the Americas, North Africa and the Middle East.

Fall 2024

**HIST 307 (S) To Die For? Nationalism in the Middle East (DPE)**

**Cross-listings:** ARAB 307

In 1932, or twelve years into his rule and twelve years after the establishment of Iraq, King Faysal I lamented that there were "no Iraqi people but only unimaginable masses of human beings, devoid of any patriotic idea, imbued with religious traditions and absurdities, connected by no common tie." This course will consider how true the King's statement still holds by evaluating the various attempts at state and nation building in the modern Middle East. Some of the more prominent questions that this course will examine include: What is a nation? What are the essential characteristics of a nation? Who are a people? Why are people ready to die for the nation? And who is included and excluded in the nationalist narrative? After assessing some of the more influential theories of nationalism, we will explore the historical experience of nationalism and national identity in Egypt, Israel, Turkey, Palestine, Iran, and Iraq. What has been at the basis of nationhood? How did European concepts of nation translate into the Middle Eastern context? What was the role of religion in these modern societies? How do traditional notions of gender effect concepts of citizenship? We will also explore some of the unresolved issues facing the various nations of the Middle East, such as unfulfilled nationalist aspirations, disputes over land and borders, and challenges to sovereignty.

**Requirements/Evaluation:** There will be several options to fulfill the requirements of this course including a weekly journal, oral exam or a final research paper (12-15 pages).

**Prerequisites:** None.

**Enrollment Limit:** 20

**Enrollment Preferences:** History and Arabic Studies majors, Global Studies concentrators, seniors, and students with a demonstrated interest in the Middle East.

**Expected Class Size:** 15

**Grading:** yes pass/fail option, no fifth course option

Spring 2025

**HIST 308 (F) The Nile (DPE)**

**Cross-listings:** ARAB 308 / GBST 320 / AFR 350 / ENVI 335

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It was on the banks of this river that the great Egyptian empires were founded that led to the building of some of humanity's most astounding structures and artworks. While the Nile seems eternal and almost beyond time and place, now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This alarming nexus of demography, climate change, and economic development has
led to increasingly urgent questions of the Nile's future. Is the Nile dying? How has the river, and people's relationship with it, changed over the last century? This course will consider the history of the Nile and its built and natural environment. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. By following an imaginary droplet flowing from tributaries until it makes its way into the Mediterranean Sea, we will learn about the diverse peoples and cultures along the way. We will evaluate the numerous attempts to manage and control the Nile, including the building of big dams, and the continuous efforts to utilize the river for economic development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the major urban centers with the Nile and whether the tensions among Nile riparian states will lead to "water wars" in East Africa and the Middle East.

Requirements/Evaluation: short papers and final project/paper
Prerequisites: none, though background in Middle East history is preferable
Enrollment Limit: 19
Enrollment Preferences: History and Arabic Studies majors
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
ARAB 308(D2) GBST 320(D2) AFR 350(D2) ENVI 335(D2) HIST 308(D2)

Difference, Power, and Equity Notes: The course fulfills the DPE requirement because it evaluates the differing experiences of the Nile among different cultural groups. It will evaluate how the central government is constantly trying to change how people use their water and therefore over-determine how people interact with their natural environment.

HIST 309  (S)  Fire and Ice: The History of Modern Iceland

How have a few wretched souls been able to survive on a frozen tundra in the middle of the north Atlantic for over 1100 years? This course will explore the curious history of Iceland, a small and unimportant country, that despite, or because of its geographic isolation and lack of any valuable natural resources, has been able to develop a distinct national and cultural identity. What lessons can be drawn from the historical experiences of Icelanders? The course will start with the paradigmatic sagas (Egil’s and Njal’s Saga) that have played an out-sized role in the development of Icelandic culture. Then we will assess the nation’s independence, the impact of the world wars, the building of the modern welfare state, and how the country has fared through economic peaks and valleys. At the end of the semester, students will be able to understand the significance of the following phrases: "Fögur er hlíðin," "Deyr fé, deyr frendr," "Petta reddast," "dugleg/ur," and "Áfram Ísland." This comprehension is, of course, very practical since 320,000 people understand the Icelandic language.

HIST 311    Women Warriors, Colonial Soldiers, and Slave Armies: Soldiering and Warfare in African History  (DPE)

Soldiering is one of the oldest professions in African history. Throughout the continent's long history, ordinary soldiers have risen to become kings, queens, presidents, and held other positions of significance. Soldiers in African history have hailed from diverse backgrounds, ranging from the enslaved to those from the nobility. Notable soldiers in African history have been both men and women. Certainly, in Africa as in other world regions there is a tendency to associate the military profession with men. Yet, there have been famous female military warriors in African history, some of the most famous ones being Queen Nzinga in the seventeenth century; the all-female military units in the kingdom of Dahomey, known for their rigor and
being effective fighters; and, more recently, Alice Lakwena who commanded a rebellion that nearly brought down the Ugandan government in the late twentieth century. Some of the other themes which we will explore include how warfare was organized from the precolonial era to more recent times; the impact of changing technologies on warfare and the everyday life of armed soldiers; colonial conquest and the soldiers who fought for Europeans and those who resisted; recruitment criteria during the colonial period, and colonial military identities; service in the military as labor and rebellions and mutinies over pay and work conditions; the army and nationalism. Throughout the course we will challenge the enduring Western image and stereotype of Africa as a violent place by focusing on a) the changing conditions that have pushed individuals and communities to go to war, and b) by examining how Africans have initiated and resolved conflict. Students will analyze a variety of resources including soldiers' biographies, films, oral traditions, and archival sources that will help them to come up with their own arguments about the role of the soldiers and the military in Africa.

Requirements/Evaluation: active participation in discussion, map quiz, response papers, a short analytic paper (3-5 pages), presentation, and one research paper (8-12 pages).

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: if course is over-enrolled, preference to history majors and students with a demonstrated interest in African studies

Expected Class Size: 20

Grading:

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course examines the critical questions of how and why Africans have waged military campaigns, and how they have inspired others to join them. From the pre-colonial era to the present, all forms of military action in Africa were in many respects expressions of societal imbalances based on ethnicity, race, gender, generation, and class.

HIST 312 (S) The Mughal Empire: Power, Art, and Religion in India

Cross-listings: REL 312 / ASIA 312 / GBST 312

Primary Cross-listing

Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith--much larger than any European empire in the early modern world--the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor's memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

Requirements/Evaluation: participation, several short essays, one final paper

Prerequisites: none, open to first-year students with instructor permission

Enrollment Limit: 20

Enrollment Preferences: History majors and potential History majors

HIST 313 (F) The People's Republic: China since 1949

Cross-listings: ASIA 313

Primary Cross-listing

This course provides a close examination of the six decades of the history of the People's Republic of China, from the 1949 Revolution to the present day. Through readings and discussion, we will explore the multiple political, economic, social, and cultural factors that contributed to the idealism of the "golden age" of Communist Party leadership (1949-65), the political violence of the Cultural Revolution (1966-76), the profound transformation of the Reform Era (1978-present) as well as the motors of change in China today. Course materials will include films, novels, and ethnographies, as well as secondary analyses. Please note that this is a discussion seminar and not a survey course.

Requirements/Evaluation: active class participation, several short papers and a final research paper

Prerequisites: none (HIST 213 recommended)

HIST 315 (F) Minorities and the State in Modern East Asia (DPE)

Cross-listings: ASIA 315

Primary Cross-listing

This course examines the relationships between minority peoples and the institution of the state in East Asia, focusing mostly but not exclusively on the early modern and modern periods (17th-20th centuries). We will explore the histories of the Ainu people of Japan, the "Small Peoples" of Russian Siberia, the Tibetan, Uighur and riverine communities of Mainland China, as well as the Hill Peoples of Southeast Asia. It also examines non-indigenous minority groups, such as conquest elites, mixed-race communities, and others. We will analyze how the transition to modernity, evolving understandings of race, gender, class, nation, the impact of imperialism and globalization all influenced the history of East Asian minority peoples. What, if anything, do all of these groups have in common? What do their histories reveal about the history of East Asia and of the countries in which they live? How are the lives of minority groups in East Asia changing today? What can their experiences reveal to us about the larger world? The class is structured as a reading-intensive seminar. Students will engage in and lead discussions, compose reading reaction papers and a final analytical essay. Students will be expected to use scholarly works in order to construct cogent, relevant arguments, which they will communicate both orally and in writing. Students will evaluate primary sources in order to engage with the people they study as directly as possible. Students will lead discussions on complex topics and develop as leaders and team members in professional settings. This course will present students with an opportunity to hone critical thinking and information literacy skills to a high level. All of you will have to analyze and process complex and often contradictory information, certainly in your personal lives and very likely in your professional lives.

Class Format: This discussion-intensive class requires students to lead several discussion sections during the semester.

Requirements/Evaluation: Map assignment, discussion participation, leading discussion (four times), three-page response essays (five times), final six-page research essay or presentation

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: History majors, Asian Studies concentrators, then all others

Expected Class Size: 15-20

Grading: yes pass/fail option, yes fifth course option

Not offered current academic year
This course is cross-listed and the prefixes carry the following divisional credit:

HIST 315(D2) ASIA 315(D2)

Difference, Power, and Equity Notes: The study of East Asia's history is all too often conflated with the study of states, so that many less privileged histories are obscured. Chief among these are the histories of minority groups, who are often excluded from power. For this reason, this course puts the history of East Asia's many minority groups front and center in examining their multifaceted interactions with regional states, as well as the of ethnic, linguistic, religious, and regional identities.

HIST 316  (S)  A History of the Samurai

Cross-listings: ASIA 318

Primary Cross-listing

It is difficult to find a person unaware of the samurai. However, most people, both in Japan and abroad, engage with their idealized images rather than as an actual historical phenomenon. The aim of this course is to bring the samurai to life as a distinct status group that left an indelible mark on the history of Japan, and thereby to separate fact from fiction. We will also explore the creation of iconic images of the samurai, which continue to influence worldwide popular culture. We will use academic readings, primary sources, and other media to examine the samurai from their origins during the Heian period (8th to 12th centuries) to their official dissolution in the late 19th century. We will focus on their development as a special status group and explore how they managed to maintain their corporate identity for so long. We will trace the evolution of the samurai from rural enforcers to territorial magnates to bureaucrats. This evolution affected and was affected by the development of samurai warfare, ethics, aesthetics, religious practices, ideas relating to gender roles and other aspects of samurai life, which we will explore. We will see how these ideas and practices mediated their relations with household, society, and government. Finally, we will examine why samurai status was abolished at the start of the Meiji period, and how former samurai transformed into modern citizens. Students will engage in discussion, write essays, and complete immersive historical simulation assignments.

Class Format: This class features a semester-long immersive historical simulation where students work in teams to create samurai clans and navigate historical, as well as historically plausible, scenarios.

Requirements/Evaluation: Class participation, map creation assignment, four 2-page essays, semester-long immersive simulation (Samurai clan creation), final: choice of 6-page essay or in-class exam

Prerequisites: None

Enrollment Limit: 25

HIST 317  (S)  Everyday Modernity in Japan

Cross-listings: ASIA 310

Primary Cross-listing

This course asks one overarching question: What is everyday life like in modern Japan? There, one often hears the words "modern" contrasted with...
"traditional." When talking about Japan itself, the former is usually coded as "western," and the latter as "Japanese." Many Japanese politicians and cultural authorities, with the help of Orientalist westerners, are happy to highlight this distinction to promote notions of Japanese uniqueness. However, though modernization in Japan did usher in tremendous, often traumatic changes, not every aspect of "modern" Japanese life came from the west, and not all western imports were/are unwelcome. Moreover, many cultural imports, such as concrete buildings and the consumption of red meat, are now interwoven into the fabric of daily life in Japan. This course examines the complex history of modernity in Japan within living memory, highlighting on its presence in the daily lives of ordinary residents of Japan. What do people eat? Where do they live? How do they think about themselves and their neighbors? We will start with the Pacific War (1937-45), but focus especially closely on postwar and contemporary Japan. We will first get a sense of the chronology and major themes in Japanese history from this time period, then explore five units, "sites of modernity" that zoom in on different but interrelated aspects of ordinary Japanese life: 1) Total War, 2) The City, 3) Work, 4) Food, 5) Race and Ethnicity. Sources and data will be drawn from scholarly works, videos, movies, websites, maps, brochures and ephemera, as well as other sources. Students will analyze these sources, discuss them and complete various assignments.

**Requirements/Evaluation:** Discussion participation, in-class exam, two 6-page analytic essays, job application assignment, syllabus unit design assignment

**HIST 318  (F) Nationalism in East Asia**

**Cross-listings:** PSCI 354 / ASIA 354

**Secondary Cross-listing**

Nationalism is a major political issue in contemporary East Asia. From anti-Japanese demonstrations in China, to tensions on the Korea peninsula, to competitive elections in Taiwan, to controversies in Japan about how history is portrayed in high school textbooks, national identity is hotly debated and politically mobilized all across the region. This course begins with an examination of the general phenomena of nationalism and national identity and their historical development in East Asia. It then considers how nationalism is manifest in the contemporary politics and foreign relations of China, Japan, South Korea, North Korea and Taiwan.

**Cross-listings:** WGSS 319 / ASIA 319

**Primary Cross-listing**
Although sometimes claimed as part of a set of immutable "Asian values," the Chinese family has not remained fixed or stable over time. In this course, we will use the framework of "family" to gain insight into gender, generation, and sexuality in different historical periods. Beginning in the late imperial period (16th-18th Centuries), we will examine the religious, marital, sexual, and child-rearing practices associated with traditional ideals of family. We will also examine the wide variety of "heterodox" practices that existed alongside these ideals, debates over and critiques of gender, family, and sexuality in the twentieth century and in China today.

Requirements/Evaluation: active participation in discussions and group work, short skills-based writing assignments (2-4 pgs) and short essays (5-7 pgs) leading toward a final paper (10-15 pages).

Prerequisites: none; open to first year-students with instructors permission

Enrollment Limit: 25

Enrollment Preferences: History and WGSS majors; Asian Studies concentrators.

HIST 321  (S)  A Global History of Manga and Anime

Cross-listings: ASIA 321

Primary Cross-listing

Japanese comic books and cartoons are known throughout the world by their Japanese names: "manga" and "anime." This is no accident, but a reflection of their enormous global popularity. Why are they so popular? How can we use them as historical sources for Japanese history and society? What do they reveal about the place of Japan in today's global culture? How did these two phenomena emerge and develop, and how do they influence each other? This class will explore these and other related questions through readings, screenings, discussion, and original research. It will trace the evolution of manga and anime from traditional Japanese (kibyoshi, ukyo-e and kawaraban) and western (comic strips and Disney films) influences, and the explosion of their popularity after World War II. We will use manga and anime, especially "girls" (shojo) anime and manga as windows onto the intersection of Japanese and global society, economy and politics.

Requirements/Evaluation: class participation (assessed weekly), weekly prep/response assignments (12 total), 8-9 page research and class-reading based essays (2 total), original research presentation for final assignment (1 total).

Prerequisites: None

HIST 325  (F)  Faith and Profit in the Medieval Mediterranean

Cross-listings: REL 325

Primary Cross-listing
In many historical societies, there have been tensions between the demands of economic and religious life. What can I sell, what should I do with money, and how shall I interact with strangers? What is the relationship between religious ideals and the habits of everyday life? These questions can become especially acute when representatives of two or more competing belief systems interact with each other. The medieval Mediterranean provides numerous rich examples of societies and individuals facing these questions. In this class, we will look at how medieval Jews, Christians, and Muslims resolved these and other dilemmas in the market societies surrounding the Mediterranean basin, as they created their own forms of religious law and economic philosophy. In the process, we will gain a more profound understanding of the roots of modern debates about capitalism, property, and economic justice.

**Requirements/Evaluation:** Attendance and participation, two short papers, one final 12-15-page research paper

**HIST 326  (S)  The Crusades: 1050-1550**

The Crusades present a number of fascinating interpretive challenges for the historian. Were they a project of elites, or a genuine popular movement? Did they bring Latin Christians into closer dialogue with religious others, or did they foster greater intolerance and oppression? How did Muslims, Jews, and Eastern Christians respond to the Crusades? In this class, we will explore the Crusades as they were experienced by both the participants and their victims, in Europe, the Middle East, and North Africa. We will discuss the intellectual and political origins of the crusading movement, review the course of the expeditions to the Holy Land and elsewhere, and see how the idea of Crusade was used and abused by popes, kings and queens, poets, and intellectuals, for their own purposes for centuries. By the end of the class, students will have a sense of how the experience of crusading shaped not only internal European politics, but also relationships between Europe and the rest of the world.

**Requirements/Evaluation:** Attendance and participation in discussion, two short essays (5 pages), and one longer research paper (12-15 pages).

**Prerequisites:** None.

**HIST 327  (F)  The Byzantine Empire, 330-1453 CE**

To study the Byzantine empire is to expand and challenge our understanding of Europe's historical development from late Antiquity to the Early Modern period. The Byzantine state was much more than the surviving Roman empire, but rather fostered a new kind of civilization: Roman and Greek, Christian, yet deeply connected to pagan Antiquity, a multi-ethnic empire that also acted like a nation-state. Its capital was the largest city in Europe for nearly a millennium and it transmitted its unique form of Christianity to much of Eastern Europe and western Asia, yet it was often dismissed, in the minds of western European observers, as an embarrassing, decadent appendix to triumphalist Western history-- its archives plundered, its treasures looted, a historical orphan among the nationalist historiographies of the nineteenth and twentieth centuries, even its true name
This course is a history of the German Democratic Republic largely as experienced by its citizens. Using primarily cultural documents, novels, films, works of art, and documentaries, along with more traditional historical documents, the course will seek to reconstruct and analyze the experience of East Germans from 1945 until 1989 and beyond. Topics to be considered include the legacy of the Third Reich and the lost war, the founding of the socialist state, the impact of Marxist ideology on the lives of East Germans, the Ulbricht era, the impact of the building of the Wall in 1961, the Honecker era and the emergence of the Stasi state, the end of the GDR in 1989, and the experiences of East Germans in unified Germany.

**Requirements/Evaluation:** Two interpretative essays and a longer final paper.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** History majors, seniors, juniors, sophomores, in that order

**Expected Class Size:** 25

**Grading:**

**Distributions:** (D2)

**HIST 340 (F) Anticolonial Europe: A History of Transnational Solidarity (DPE)**

This seminar examines the history and paradoxes of European anticolonialism from the turn of the twentieth century to the 1970s. By following the anticolonial networks that developed in four European cities -- Paris, London, Berlin, and Moscow, it interrogates how political activists -- from both the Global South and North -- collaborated to establish a more racially egalitarian world order. It evaluates how events such as the First World War and the formation of the UN transformed their collective political projects. Finally, it investigates the multiple intellectual and political traditions which activists drew upon to contest Europe's racialized hegemony. Students can expect to gain an introduction to the 20th century's European-based anticolonial movements, as well as methods of transnational and global history.

**Requirements/Evaluation:** Class participation, one 5-7-page historiographical essay, and one 10-12-page research paper

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** History majors, seniors, and then juniors

**Expected Class Size:** 25

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)
**Difference, Power, and Equity Notes:** This course investigates the legacies of Europe's racialized hegemony. Students learn about how anticolonial activists in the twentieth century navigated questions of class, race, and national identity. Additionally, they learn how historians have used different historical methodologies to write the history of anticolonialism more inclusively.

**Attributes:** HIST Group C Electives - Europe and Russia

Not offered current academic year

**HIST 341 (S) The European Enlightenment**

What was the Enlightenment? More often invoked than understood, the European Enlightenment can seem like a riddle wrapped in a mystery inside an enigma. Although a product of pre-revolutionary Europe's old monarchical regime, it has become a symbol of modernity. Although secular, its exponents thought natural science compatible with the existence of God and with (certain forms of) religion. Even as the world became increasingly interconnected, Enlightenment thinkers posited that European culture was different--and superior to--any other. And, in the bitterest irony of all, Enlightenment writers produced powerful new theories of natural rights during the high-water mark of the Atlantic slave trade. Despite or because of these complexities, the Enlightenment remains a crucial chapter in the intellectual history of Europe, and an unavoidable legacy for anyone interested in secular traditions of Western thought. Combining methods from intellectual history, the history of knowledge, and the history of the book, this seminar will take the Enlightenment's measure. Our fundamental commitment will be to reading primary sources, and whenever possible to studying original printed editions in Williams College's Chapin Library. We will consider both the material form that authors and printers gave both massive tomes and slender pamphlets, and the new publics that spaces such as coffeehouses, print shops, and salons generated. A special focus will be Chapin's newly acquired copy of the *Encyclopédie* of Denis Diderot and Jean le Rond d'Alembert, the first modern encyclopedia and a triumph of intellectual collaboration as well as of printing. Throughout, we will ask: what were the Enlightenment's achievements and its limits? And what is its legacy in the twenty-first century? Sources to be read include Leibniz, Bayle, Madame du Châtelet, Rousseau, Voltaire, and Wollstonecraft.

**Requirements/Evaluation:** Attendance and participation; one short essay; one longer final essay; final presentation. In addition to reading in preparation for class, students will be expected to make frequent visits to Special Collections to view original materials.

**Prerequisites:** No prerequisites, but prior coursework in premodern history, literature, or philosophy is encouraged.

**Enrollment Limit:** 25

**Expected Class Size:** 12

**HIST 342 (S) At the Crossroads of Race and Nation: Borders and Frontiers in Latin America and the Caribbean** (DPE)

When we think about the politics of borders and migration, we usually imagine the contentious U.S.-Mexico border. Seldom do we care to think about the numerous borders across Latin America and the Caribbean that are currently at the heart of our present refugee and migrant crises. This course will examine the history of borders and frontiers in Latin America and the Caribbean and how they were pivotal to Latin American racial and state formations and nation-building processes. This course will consider how borders and frontiers, as both a geographical demarcation and an imaginative conceptualization of difference, created overlapping and competing visions of race, racism, identity, belonging, and social marginalization. Beginning with the tumultuous Latin American independence movements of the nineteenth century and ending with Latin America in the twenty-first century, we will analyze the different creation of borders and frontiers to make sense of today's migration and border control crises. This course will give particular attention to the themes of racial stratification, authoritarianism, nationalism, imperialism, and citizenship.

**Requirements/Evaluation:** Class participation, two short (3-4 page) papers, and a final (10-12 page) paper

**Prerequisites:** None

**Enrollment Limit:** 25

**Expected Class Size:** 15-20

**Grading:** yes pass/fail option, yes fifth course option
Distributions: (D2)  (DPE)

Difference, Power, and Equity Notes: This course centers on how categories of racial, cultural, linguistic, and phenotypical differences commanded modern projects of state formation and nation-building. Through readings, class discussions, and writing assignments, we reflect on how Latin American subjects living through the constructions of borders and frontiers negotiated categories of difference. Special attention will be paid to how anti-slavery, working-class rights and anti-racism approached the question of difference.

Attributes: HIST Group D Electives - Latin America + Caribbean
Not offered current academic year

HIST 343  (S)  Student Movements, Youth Politics, and the University in Modern Latin America and the Caribbean  (DPE)

Students and universities in Latin America and the Caribbean possess a unique and unusual ability to politically mobilize and shape their society's political culture. Unlike the university system in the United States, students in universities across Latin America have voting power in their university's bureaucracies, hold positions of power in the governing structures of the university, and garner vast political support and moral legitimacy from their nation's citizens. In fact, most Latin American icons of political revolution like Fidel Castro, Salvador Allende, and Subcomandante Marcos, emerged from the radicalizing spaces of the Latin American university. This course examines the political, cultural, and social history of the university's evolution in Latin American and Caribbean history from the nineteenth to the twentieth century. This course will consider how student politics, the university as a geographic space of political socialization, and their relationship to the larger swath of their nation's population were central to the political and social history of modern Latin America and the Caribbean.

Requirements/Evaluation: Class Participation will count as 25% of the grade; each of two 3-4 page papers will count for 25%; and the final 10-12 page paper will also count for 25%

Prerequisites: Open to all students

Enrollment Limit: 19

Enrollment Preferences: Juniors and Seniors are preferred

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)  (DPE)

Difference, Power, and Equity Notes: This course centers on how student politics and the university created dialogues about Latin American racial systems, authoritarian violence, and gender and class inequalities. Through readings, class discussions, and writing assignments, students reflect on how Latin American youth and student politics ignited novel discussions on categories of difference, even as they remained tied to their class prejudice.

HIST 347  (S)  Democracy and Dictatorship in Latin America  (DPE)

The scarcity of stable and democratic governments in Latin America has frustrated observers across the region and beyond for almost 200 years. This course will examine the historical creation of both democratic and anti-democratic regimes in different national cases, seeking to identify the conditions that have fostered the apparent persistence of dictatorial tendencies as well as diverse forms of pro-democratic and social justice activism. Our main cases will be Brazil, Argentina, Mexico, Peru, and the countries of Central America, but we will address the region as a whole. In this regard we will look at the social and economic forces as well as the political actors and ideologies that have contributed to distinct, if often parallel, outcomes. At the same time, we will also question the criteria we use to label regimes "democratic" or "dictatorial"--and the implications of our choice of criteria.

Requirements/Evaluation: class participation, response papers, two short papers, and a longer (10-page) final essay

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History majors

Expected Class Size: 22-25

Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course examines the production of unequal power relations along racial/ethnic, gender, national, and regional lines. Furthermore, it analyzes the creation of diverse--and biased--categories by which Latin Americans and their political movements and systems have been evaluated since the nineteenth century.

HIST 352  (F)(S)  American Maritime History  (DPE) (WS)

Cross-listings: CAOS 352

Secondary Cross-listing

This course explores themes in American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. This relationship led to interactions with the water as a highway for the transportation of not just people and goods, but powerful new forces and ideas. The water creates a unique space for the formation of new communities and identities, while also acting as an important, and often exploited, resource. We will sample from different fields of inquiry including labor, environmental, cultural, and political history to gain a deeper understanding of diverse people's complex interactions with the oceans and seas.

Class Format: Seminars, discussions, and field seminars

Requirements/Evaluation: Participation in class discussions, activities, and presentations, regular papers, and a final independent research project

Prerequisites: None

Enrollment Limit: 27

Enrollment Preferences: If course over-enrolls, preference will be given to sophomores and juniors

Expected Class Size: 22

Grading: no pass/fail option,  no fifth course option

Unit Notes: Offered only at Mystic Seaport

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352(D2) CAOS 352(D2)

Writing Skills Notes: Students must complete regular writing assignments including a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while creating tremendous hardships for others. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

HIST 361  (F)  The Atlantic World: Connections, Crossings, and Confluences  (DPE)

Cross-listings: AMST 360 / CAOS 361

Primary Cross-listing

This course considers the Atlantic World as both a real place and a concept: an ocean surrounded and shaped by diverse people and communities, and an imagined space of shared and competing affiliations. Moving from "time out of mind" to the early nineteenth century, it examines ecological,
cultural, political, economic, intellectual, and spiritual transits as well as exchanges among Indigenous/Native American, African and African American, Asian and Asian American, and Euro-colonial people. It introduces conceptual dimensions of this Atlantic paradigm and case studies that illuminate its human subtleties, with the goal of examining "early American" histories through transnational and transoceanic lenses. The course takes an interdisciplinary approach to these intertwined histories, and reckons with how the very construction of "history" has, at different turns, affected what is shared, known, valued, and commemorated—or overwritten, denied, or seemingly silenced. Attentive to the structures of power that inflect every part of Atlantic histories, it offers specific ethical frameworks for approaching these topics. Blending methods grounded in oral traditions and histories, place-based knowledge systems, documentary/written archives, songs, archaeology, material culture, and other forms of expression and representation, it invites class members to revisit the nature and meanings of these connected spaces. The course consistently connects historical experiences with the twenty-first century, and how communities today are grappling with the afterlives and ongoing effects of these Atlantic pasts through calls to action for reparations, repatriation and rematriation, Land Back, climate justice, and other forms of accountability. The course also provides an opportunity to engage with original materials pertaining to Atlantic World histories in the Williams College Archives/Special Collections and Art Museum.

Requirements/Evaluation: active participation in class discussion, several short essays based on readings and discussion topics, museum/archives assignment, final essay/project

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: If the course over-enrolls, preference is for sophomore, junior, and senior History and American Studies majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 360(D2) HIST 361(D2) CAOS 361(D2)

Difference, Power, and Equity Notes: This course examines the formation and articulation of racial, ethnic, cultural, and other forms of difference across the Atlantic World, and ways that people from Indigenous, African/American, and Asian/American communities have engaged with and challenged European colonization. It devotes substantial time to critical methodologies that re-center voices oftentimes treated as "silenced" or "absent" in colonial literatures, and helps students build fluencies in approaching and interpreting them.

HIST 364 (S) Asia and Asian Americans During the Cold War (DPE)

Cross-listings: AAS 364 / AMST 384

Primary Cross-listing

This course traces how American geopolitical interests and involvement in Asia during the Cold War affected Asian Americans. It examines the history of the Cold War as a period of U.S. imperial expansion as well as a time when various actors and organizations, especially those of Asian descent, harnessed the East-West rivalry to advance their own agendas. We will consider how diverse diplomatic strategies including militarization, educational exchange, and immigration reform shaped East, South, and Southeast Asian migrations to and settlement in the United States and the social and material lives of these diverse communities. Case studies include transnational adoptees from Korea, Hmong and Vietnamese refugees in the U.S. and across Guam and Israel-Palestine, Black, Latinx, and Asian American activists who traveled to Vietnam, educated Indian and Pakistani immigrants, and American-born individuals of Japanese ancestry in Japan. We will also explore how individuals of Asian descent leveraged Cold War geopolitics and forged cross-ethnic, cross-class alliances to advocate for social change both at home and abroad.

Requirements/Evaluation: Attendance and active participation in discussion, three response papers (3-4 pages), and final research paper (12-15 pages), as well as topic proposal, annotated bibliography, outline, and draft of the final paper

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: History majors and Asian American studies concentrators
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Difference, Power, and Equity Notes: This course will examine how various global and local actors competed for power in Asia and the U.S. during the Cold War. It will consider how new political and economic decisions by policymakers created and reinforced inequalities rooted in race, gender, class and other forms of difference. It will also examine how grassroots changemakers, whom we know little about, creatively and comprehensively navigated and changed the political and social landscapes in and outside of the U.S.

HIST 366  (F)  What They Saw in America
Cross-listings: SOC 244 / AMST 244
Secondary Cross-listing
This course traces the travels and writings of important observers of the United States, including Alexis de Tocqueville, Max Weber, G.K. Chesterton, Sayyid Qutb, and Wang Huning. The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider's view of America--one that sheds light on persisting qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors' respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race.
Requirements/Evaluation: A midterm examination, two short essays, and a final paper.
Prerequisites: none
Enrollment Limit: 15
Enrollment Preferences: Priority given to Sociology, History, Anthropology, and American Studies majors.
Expected Class Size: 15
Grading: no pass/fail option, no fifth course option
Distributions: (D2)

HIST 367  (S)  Black History is Labor History  (DPE) (WS)
Cross-listings: AFR 367
Primary Cross-listing
This seminar explores labor history in relation to black people, spanning the colonial period to the early twenty-first century. It racializes the history of work by tracing the long story of black labor in the U.S. from the plantation to the plant. Whereas the bulk of the course will analyze black labor and labor movements in the twentieth century, specifically focusing on the push for economic inclusion and mobility amid employment, societal and union-related racial discrimination, we will examine what involuntary black labor meant in the context of slavery and the construction of a capitalist economy. Likewise, we will devote attention to black workers with regard to such topics as antiunionism, deindustrialization, economic inequality, Fordism, informal economies, Jim and Jane Crow, labor radicalism and violence, New Deal and welfare, the rise of civil rights unionism, and slavery
and capitalism, among other themes.

**Requirements/Evaluation:** Students are expected to participate actively and will write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages) in consultation with the instructor and will be required to submit a topic proposal and outline, an annotated bibliography, and a peer-reviewed draft of the final paper.

**Prerequisites:** Recommended for students with sophomore standing or above and first-year students who both have taken a 200-level history course and have received instructor permission to enroll into the course.

**Enrollment Limit:** 25

**Enrollment Preferences:** HIST and AFR majors followed by students with sophomore, junior, or senior standing. If the course is overenrolled, students will be given a questionnaire and only first-year students who have completed a 200-level history course will be enrolled.

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 367(D2) AFR 367(D2)

**Writing Skills Notes:** Students will be required to write two comparative essays (5-7 and 6-8 pages) and two primary source analyses (1-2 pages), all of which will be letter-graded and returned with comments. In addition, students will write a final research paper (10-12 pages). Throughout the semester, these writing assignments will total roughly 22-30 pages. Students can expect to have line-edited feedback on their papers with substantial and timely, writing-related suggestions for improvement.

**Difference, Power, and Equity Notes:** This course racializes the study of labor history, focusing on black people and their experiences in the United States from the plantation to the plant. It challenges students to confront and to redefine what it means to labor, grasping how slavery, segregation, and systemic inequalities amid black people's pursuit of citizenship, equality, and freedom have shaped their economic, political, and social conditions and identities.

**HIST 369 (S) Policing, Punishment, and Protest in African American History**

**Cross-listings:** AFR 377

**Primary Cross-listing**

This seminar will examine the development of the criminal legal system in the United States from the early republic to the present. Topics of study will include legacies of racial slavery; convict leasing; dynamics of gendered state violence; police tactics and technologies; the Great Migration and its impact on policing in the urban North; prisoner rights movements; urban rebellions; law and order politics; the Wars on Crime and Drugs and the rise of mass incarceration. This course will pay particular attention to the distinct relationships between domestic regimes of policing and imprisonment and various Black political struggles. By placing these topics in conversation with the history of African American life and politics, this course seeks to highlight the ways in which the criminalization of Black people has circumscribed Black citizenship and inspired successive insurgent movements for reform of the American carceral system.

**Requirements/Evaluation:** Students will be graded on class participation, reading responses, an Op-Ed paper (1200-1500 words), a book review (5-7 pages). In addition, students will work in groups to develop a podcast related to course themes.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** History and Africana Studies majors

**Expected Class Size:** 15-20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 371  (S)  The City in African American History

Cross-listings:  AFR 383

Primary Cross-listing

This course will explore African American urban life in the twentieth century. In particular we will examine the complicated role that cities have played in African American history, serving simultaneously as sites of exclusion and exploitation, and as sites of community organizing and institution building. Through engaging with a variety of case studies, students will examine the ways that African American struggles for equality and self-determination have shaped, and been shaped by, the urban environment in the modern US. Topics of study will include the Great Migration; redlining, real estate, and residential segregation; crime, policing, and surveillance; suburbanization, urban divestment, and the "urban crisis"; municipal politics and policy making.

Requirements/Evaluation:  Active participation in class discussion, three 5-6 page essays, a digital history exercise, and a final 8-10 page independent research paper

Prerequisites:  None

Enrollment Limit:  25

Enrollment Preferences:  Preference to History majors and Africana Studies majors

HIST 372  (F)  The North American West: Histories and Meanings

This course will explore the various and contested histories of the geographical region in North America that Americans often call "the West." With porous boundaries; changing empires and national borders; an extraordinarily diverse mix of peoples; and most importantly, continuous Indigenous presence to the present day, this region poses foundational questions about the construction of American history. What if, from the vantage point of the 1780s, we look not at the founding of the United States in the East but at the elaboration of the Spanish mission system in California and other parts of the Southwest? What if, instead of understanding "the West" as a place that people migrated "to" from "the East," we think about "the West" as a place diversely inhabited for thousands of years that experienced very sudden and violent forms of military conquest and settler colonialism, as well as waves of migration from many different compass points around the globe? And where do Americans narratives of western "individualism" fit into the histories of massive federal interventions in "the West"? We will take up these and many other questions as we examine topics from the era before Europeans arrived in North America to the present day.

Requirements/Evaluation:  class participation; 3 brief writing assignments (2-4 pages); one 6-8 page research paper, based on a visual source; 24-hour take-home exam.

Prerequisites:  none

Enrollment Limit:  15

Enrollment Preferences:  History majors and students who have taken previous History courses.

Expected Class Size:  15

HIST 376 (F) Sex, Gender, and the Law in U.S. History (DPE)

Cross-listings: WGSS 376

Primary Cross-listing
This course explores that ways in which the law has defined and regulated gender and sexuality in the United States, and the ways that individuals have experienced and responded to those definitions and regulations. We will evaluate how the law has dictated different roles for men and women, how sexual acts have been designated as legal or illegal, and the ways that race, class, and nationality have complicated the definition and regulation of gender and sexuality. This course examines how assumptions about gender and sexuality have informed the creation and development of American law and the changing meanings of citizenship; considers how laws regulating sex and gender have yielded varied effects for men and women across race and class divides, challenging some differences while naturalizing others; and assesses the power and shortcomings of appeals to formal legal equality waged by diverse groups and individuals. Throughout the course, we will consider the various methodologies and approaches of the interdisciplinary field of legal history. Topics to be covered will include the Constitution, slavery, marriage, divorce, custody, inheritance, immigration, sexual violence, reproduction, abortion, privacy, suffrage, jury duty, work, and military service.

Requirements/Evaluation: four papers, including three short (3-5-pages) papers, and one final paper of 8-10 pages
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: History majors, Women's, Gender and Sexuality Studies majors
Expected Class Size: 20
Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

HIST 383 (F) Religion and American Capitalism
Cross-listings: REL 283
Secondary Cross-listing
Was Jesus a revolutionary socialist or a savvy salesman? Does capitalism bring prosperity to the virtuous or lead us to worship Mammon? Shall the meek inherit the earth or should the hand of the diligent rule? Is it holy to be poor or is prosperity our moral duty? These questions have long preoccupied religious believers, and their changing answers have transformed the history of American capitalism. This course invites students to study that history, from the early 19th century to the present. It will cover such topics as: utopian communes; the political economy of slavery; working-class religion and labor organizing; Christian and Jewish socialism; big business and the Prosperity Gospel; 'New Age' spirituality and the counterculture; liberation theology and racial capitalism; and conservative Christianity in the age of Wal-Mart and Chick-Fil-A.

Requirements/Evaluation: Participation in group discussion; five response papers (300-400 words); two essays (4-6 pp); final research paper (8-10 pp).
Prerequisites: None; open to all students.
Enrollment Limit: 15
Enrollment Preferences: Religion and History majors.

HIST 384 (F)(S) Comparative History of Science and Medicine in Asian/Pacific America, 1800-Present (DPE)
Cross-listings: AAS 384 / AMST 383
Primary Cross-listing
How have scientific knowledge and medicine been tools of exclusion, violence, and imperial control against Asian Americans, as well as indigenous peoples, Black, Latinx, and white migrants, and their descendants? How have these groups negotiated and resisted encounters with such knowledge from the 19th century to the present? This seminar explores these questions by examining a series of case studies—including American colonial
medicine and science in the Philippines and Hawai‘i, Cold War migration of Chinese scientists and South Asian doctors to the U.S., and the politics of HIV/AIDS, psychiatry, and culturally competent care in Black, Asian, and Cuban migrant communities. Together, we will survey the literature in history, English, Global Health, Sociology, and other fields and consider how the Asian/Pacific American experience in science and medicine has been integral to, as well as informed by, the experiences of other groups in the transpacific world. Students will leave this course with interdisciplinary tools for understanding present-day health inequities in underserved Asian/Pacific American communities and other marginalized groups.

**Requirements/Evaluation:** Attendance and active participation in discussion, three response papers (3-4 pages), and final research paper (12-15 pages), as well as topic proposal, annotated bibliography, outline, and draft of the final paper.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** Preference to History majors, Asian American Studies concentrators, and Public Health concentrators

**Expected Class Size:** 20-25

**Grading:** Yes pass/fail option, yes fifth course option

**HIST 385 (F) Latinx Activism: From the Local to the Transnational**  (DPE) (WS)

**Cross-listings:** LATS 385

**Primary Cross-listing**

Latinas/os/x's have long sought inclusion in the U.S. polity and society, while the meanings of inclusion and the means to achieve it have shifted historically. For Latinxs, activism is often shaped by the specific dynamics of each group's migration to the United States and by their arrival into a particular context. Home country politics and transnational connections can remain important. Yet local activism to meet immediate needs and to address critical issues becomes important as well. Working within existing structures, Latinx communities have at times questioned and challenged those existing structures, as activists have addressed a wide variety of often intersecting issues. This course roots itself in the historical progression of Puerto Rican and Mexican-American activism, before turning to the social and political movements of the late 1960s and 1970s, as shaped by Puerto Ricans, Chicanos/as, Cubans, and Dominicans. The 1980s witnessed increased immigration from several Central and South American countries, arriving in the context of reactions to those political and social movements, as well as increased U.S. intervention in their countries of origin—a context that again shaped both local and transnational activism. Students' final projects will be anchored within this historical framing and within the lens of local and transnational activism, while moving forward in time to consider more contemporary dimensions of Latinx activism.

**Class Format:** This is a discussion-based and writing intensive course, so reading and full participation is important. Students will be expected to read each other's work and to provide thoughtful and constructive feedback.

**Requirements/Evaluation:** Class participation and presentations; several 3-4 page essays; final paper of 12-15 pages, as well as proposal, bibliography, and drafts

**Prerequisites:** None

**Enrollment Limit:** 19

**Enrollment Preferences:** History majors and Latina/o Studies concentrators, seniors

**Expected Class Size:** 15
Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 385(D2) LATS 385(D2)

Writing Skills Notes: Several writing assignments of 3-4 pages provide the foundation for 12-15 page final papers. In consultation with the professor, students select a topic and submit a 3-4 page proposal with a bibliography. Students submit a draft for a workshop session with other students. A final presentation is another opportunity to hone arguments and use of evidence, as well as to receive feedback on revised drafts from the professor.

Difference, Power, and Equity Notes: This course examines how Latinx communities have sought inclusion in U.S. society and polity, in the face of marginalization based on race, ethnicity, class, gender, sexuality, and/or political perspective, as well as other intersecting markers of difference. Questions of difference, power, and equity are analyzed at the structural, community, and individual levels.

HIST 388  (S)  Decolonization and the Cold War  (DPE)
The second half of the twentieth century came to be defined by two distinct, yet overlapping and intertwined phenomena: the Cold War and decolonization. In the two decades that followed the end of WWII, forty new nation-states were born amidst the bipolar struggle for global supremacy between the Soviet Union and the United States. Those new nations were swept up in the Cold War competition in ways that profoundly influenced their paths to independence and their postcolonial orders, but they often had transformative effects on the Soviet-American rivalry as well. In this course, students will focus on two related questions: How did decolonization influence the Cold War and the international behavior and priorities of the two superpowers? And what impact did the Cold War exert on the developing states and societies of Asia, Africa, the Middle East, and Latin America?

Course materials will consist of scholarly texts, primary sources, and films.

Requirements/Evaluation: class participation, several short papers, and a 10- to 12-page final paper

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History majors; juniors and seniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course is fundamentally concerned with dynamics of unequal power and social change that occurred during the post-WWII process of decolonization that unfolded in tandem with the Cold War. Students examine these shifting power relations from the perspectives of a wide range of actors in the Global South, the United States, the Soviet Union, China, and Europe. They come away with a sense of how the processes under study contributed to the makeup of today’s world.

HIST 395  (S)  Victimhood Nationalism in Global History & Memory  (DPE)  (WS)

Cross-listings: GBST 294

Secondary Cross-listing

As globalism of the 21st century has shifted its focus from imagination to memory, the global memory culture focusing on victims has dawned on us as an undeniable reality with the entangled memories of: Apartheid, American slavery, and white settler genocides of the indigenous peoples; German empire’s colonial genocide of the Nama and Herero in Namibia and the Nazi Holocaust; the Armenian genocide and the Holocaust; Vietnam War and Algerian war; Rwandan genocide and ethnic cleansing in the Balkans; Japanese military “comfort women” and gendered violence during the Yugoslav Wars; forced sexual labor in the Nazi concentration camps and sexual slavery of the Islamic State; political genocide of Stalinism and the Latin American military dictatorships; civilian massacres of developmental dictatorships in the global Cold War era. Global memory formation intensified the victimhood competition among national memories. Victimhood nationalism epitomizes nationalism’s metamorphosis under the globalization of memory
in the 21st century. This course will trace the mnemonic history of victimhood nationalism, focusing on the entangled memories of Poland, Germany, Israel, Japan, and Korea in the global memory formation. Other case studies, including former Yugoslavia, post-9/11 America, will also be discussed.

Requirements/Evaluation: Class participation, pop quizzes and a final research paper (approximately 5000 words)

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: GBST concentrators and History majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

HIST 396 (F) The Pivotal Decade--The 1970s Origins of Contemporary America

Cross-listings: LEAD 396

Primary Cross-listing

Often overshadowed by the long 1960s and the conservative ascendency of the 1980s, the 1970s provides an important transitional moment for the United States. It was also a decade fraught with contradictions. On the one hand, Americans experienced widespread disillusionment with the power of the federal government to promote and protect the minority from the majority. Historians seeking to understand the collapse of the welfare state or the origins of white resistance to civil rights initiatives often point to the 1970s as the time when the federal government shifted the burden of the social welfare system onto the market, state and local governments, and onto poor people themselves. And yet, the 1970s also saw an explosion of progressive social activism, as the women's movement, the gay rights movement, and the environmental movement, among others, all came into their right--and the interplay among formal politics, grassroots organizing, and popular culture. It will ask students to consider how and why the 1970s catalyzed many of the domestic and international dynamics and debates that define American politics and society today. Students will be assessed on participation, short response papers, and an individual research project culminating in a poster presentation. In Fall 2022, this course will be offered at both Amherst and Williams College campuses. There will be an end of the semester symposium at Williams College that all enrolled students are required to attend as part of the final project.

Requirements/Evaluation: Students will be assessed on participation, short response papers, and an individual research project culminating in a poster presentation

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Priority to History and LEAD students

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 396(D2) LEAD 396(D2)
HIST 402  (F)  Displacement: Global Histories of Refugees and Forced Migration  (DPE) (WS)

Cross-listings: ARAB 414 / GBST 414

Primary Cross-listing

The Middle Eastern refugee has become a central figure in debates on migration, asylum, and the right to belong in Europe, Asia, and North America. Often stereotyped as threatening, alien, and rootless, these migrants are generally depicted as lacking histories and by extension not worthy of consideration or empathy. This course invites students to understand some of the most tragic humanitarian crises of our time and the massive involuntary displacements provoked by war, violence, and/or climate change. Taking a global perspective, this seminar examines the history of displacement, refugees, migration, diaspora in a focusing on the nineteenth century through the present. With special attention to the historical experience of various peoples of the Middle East, the course will start with theoretical approaches to the study of migration and then delve into case studies. A range of different moments of displacement will be analyzed such as the experiences of Armenians, Jews, Palestinians, Syrian, Iraqis, and Kurds. By examining the human geography and politics of forced displacement and migration, this course will address a number of important academic and political questions: what makes a history written by, about, and for displaced people powerful? How can writing from the perspectives of refugees challenge core debates about identity, the nation and borders? How does the focus on displacement help in understanding the nature of war and conflict?

Requirements/Evaluation:  Final 25 page research paper, several drafts of paper, class presentations and in class writing exercises.

Prerequisites:  None

Enrollment Limit:  15

Enrollment Preferences:  History and Arabic Studies majors and Global Studies concentrators.

Expected Class Size:  15

Grading:  no pass/fail option,  yes fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 414(D2) GBST 414(D2) HIST 402(D2)

Writing Skills Notes: This research seminar will involve the writing of a final 25 page paper. Prior to that stage, each process of writing will involve moments of feedback and sharing. Students will submit a proposal early on in the semester and then write an outline. These will receive peer and instructor feedback. They will then submit a five page draft in October, a 10 page draft in November, before the final submission in December. In this way, they will have opportunities to rework and improve their writing.

Difference, Power, and Equity Notes: This course takes a comparative approach by exploring the predicament of some of the most vulnerable people in the world, i.e., displaced peoples and refugees. The course will consider their legal status and their experience of leaving their homes due to wars or natural disaster. The area of study is the Middle East and we will examine the historical experience of a number of different people in the region including Kurds, Palestinians, Sephardi Jews, and Syrians.

HIST 413  (F)  The Big Ideas: Intended and Unintended Consequence of Human Ambition  (DPE) (WS)

Cross-listings:  GBST 413 / ARAB 413 / ENVI 413

Primary Cross-listing

What have been the most consequential ideas of the last 100 years? This course will explore some of the more audacious and ambitious plans to alter natural and urban environments in the late 19th century to the early part of the 21st, specifically those that sought to improve the human condition through science, engineering, and technology. By building big bold things, politicians around the globe sought to bring prosperity to their nation and embark on a path of modernity and independence. Through an intellectual, political and environmental history of major construction projects such as the building of the Suez Canal and the Aswan Dam, extensive river valley developments in Iran, Turkey and Iraq, and utopian and futuristic city planning in western Asia, students will consider how, with the benefit of hindsight, to best evaluate the feasibility of such bold schemes. Who has
benefitted and who has not, what have been some of the unanticipated consequences, what was sacrificed or neglected, and what do these projects tell us about the larger processes of global capitalism, decolonization, and climate change?

Requirements/Evaluation: A presentation, shorter writing assignments and a longer research paper (20-25 pages) in the end. Students will submit shorter drafts of final paper in order to receive constructive feedback prior to final submission.

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Seniors, especially History, Arabic and Environmental Studies majors.

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 413(D2) GBST 413(D2) ARAB 413(D2) ENVI 413(D2)

Writing Skills Notes: A 20-25 page research paper will be required at the end of the semester. Prior to getting to that point, students will submit an annotated bibliography, a two page proposal, a five and eventually a 10 page draft. Each draft will receive extensive comments and suggestions from peers and instructor. In this way, the student will think about the process of writing and the best way to set themselves up for success.

Difference, Power, and Equity Notes: This course examines how a number of different nations in Africa and Asia sought to improve the living conditions of the masses through major construction project. Though ostensibly these schemes were supposed to improve the livelihood of all, often they primarily benefitted the few - the urban elite - and not the general population. This course will therefore explore how certain class, gender and racial lines were solidified and maintained through economic development plans.

**HIST 417 (F) The Treaty System and Treaty Ports of China, 1840-1945**

**Cross-listings:** ASIA 417

**Primary Cross-listing**

China in the nineteenth and early twentieth centuries was not colonized by a single Western power; instead several Western powers (and later Japan) exercised domination over China through a system of "unequal treaties" that granted them special privileges within Chinese territory. The years (1842-1943) in which these treaties were in effect is often called "The Century of Humiliation" by contemporary Chinese nationalists: a period of weakness that the rising Chinese nation still strives to overcome. The system imposed by these nineteenth century treaties, however, was a complex amalgam of legal, commercial, and residence privileges for foreigners in China that played a significant role in shaping the modern nation. One the most recognizable features of this system was the treaty port--an urban center designated as open to foreign residence, trade, and shipping. Extending from an initial five open ports to nearly fifty by the turn of the century, these ports became commercial and industrial centers that connected China to the global economy and created novel spaces of culture, labor, society, and politics. In this research seminar, we will use of several recent online collections of English-language primary source material to investigate the role of the treaty system and the treaty ports in modern Chinese history. The seminar will begin with an exploration of the historiography of the treaty system and "foreign presence" and culminate in an original research paper on a related topic of each student's choice. Throughout, we will work on general and specific research methods.

**Class Format:** This is a research seminar. Our goal will be to produce a 20-30 page original research paper by the end of the semester. In addition to discussion of readings, considerable time in class will be spend on research methods.

**Requirements/Evaluation:** Active participation in class discussion and activities; several short papers (5-7 pages) leading to a final research paper (20-30 pages)

**Prerequisites:** no prerequisites

**Enrollment Limit:** 20

**Enrollment Preferences:** Senior History majors, History majors, Asian Studies concentrators

**Expected Class Size:** 10

**Grading:** yes pass/fail option, no fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 430  (S)  Postcolonial Reparations: Trauma, History, and Memory after European Imperialism  (DPE) (WS)

Cross-listings:  JWST 430

Primary Cross-listing
How have European states responded to calls to acknowledge and atone for the crimes of Empire? This course places recent calls for reparations in a historical context. Weaving together a wide-range of historical and contemporary case studies -- including the Conference on Jewish Material Claims Against Germany (1951), Germany's official recognition of the Herero Genocide (2021), and ongoing debates in France about the restitution of colonial-era looted art, this course investigates how the language and mechanisms of restorative justice have historically developed, evaluates which past efforts of restorative justice were successful and why, and examines what role historical memory and historians-as-activists should play in campaigns that seek reparations for colonial injustices. In doing so, it evaluates how activists have deployed scholarly vocabularies on memory, justice, and violence in a number of national and international contexts.

Requirements/Evaluation:  Class participation, weekly 500-word discussion posts and a 20-page research paper

Prerequisites:  None

Enrollment Limit:  15

Enrollment Preferences:  History majors, seniors, and then juniors

Expected Class Size:  10-15

Grading:  no pass/fail option,  no fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 430(D2)  JWST 430(D2)

Writing Skills Notes:  This is an intensive writing seminar for advanced history majors. We focus on how to write a journal-length piece of original historical research, while evaluating the strengths and weaknesses of other scholarly pieces. Students receive feedback on multiple drafts of their final research papers and participate in two workshop seminars in which they provide feedback on the papers of their peers.

Difference, Power, and Equity Notes:  This course asks how contemporary political and social justice movements can -- or ought to -- address political and economic inequities between the Global South and North, introduces students to how questions of race and national belonging have informed contemporary debates on restorative justice, and exposes the persistence of some global and historically-situated inequities.

Attributes:  HIST Group C Electives - Europe and Russia

Not offered current academic year

HIST 433  (F)  Colonialism and the Jews  (DPE) (WS)

Cross-listings:  JWST 433

Primary Cross-listing
Where are Jews in colonial history? Where is colonialism in Jewish history? In many ways, these questions haunt contemporary Jewish and often world politics. Indeed, in the twenty-first century, the relationship between Jews and colonialism has been present in debates about Zionism, the history of capitalism, Jewish-Muslim relations, the wider Middle East, the future of European identity, the aims and roots of American empire, and the intersections of race and religion in colonial domination. And yet, typically, the subject of Jews and colonialism is more polemicized or avoided than probed. This course will seek to address this lacunae by introducing students to new historical scholarship that has begun tracing these questions. Students will consider the ways in which imperial legal forms, economic structures, and cultural and intellectual underpinnings shaped Jewish lives from the British antipodes to French North Africa, and throughout the Russian and Ottoman Empires, as well as in metropolitan Europe. Among other issues, we will ask: How did Jews become defined and define themselves in the colonial venture? In their various roles in colonial empires, are Jews best understood as subjects or agents of empire or are there more fruitful ways to conceptualize their engagement? What was the impact of anti-colonial struggles on modern Jewish politics and historical development? The course will approach this topic thematically rather than as a comprehensive survey. By introducing students to some of the key debates in this emerging field, we will consider what it takes to construct a successful historical argument and how to engage critically with works in an emerging field. A semester-long writing project will expand students capacities to pose thoughtful historical questions; conduct research and gather compelling evidence; read deeply and critically; carefully assess
evidence; and write inquiry-based essays.

**Requirements/Evaluation:** Class participation; brief weekly writing on the readings; a final research paper written in stages, including two "research updates"; an analysis of a source; a research proposal; a rough draft of one paper section; a rough draft of the paper; and a final 25-page paper.

**Prerequisites:** None; open to all students (however, a background in European history and/or Jewish Studies will be helpful).

**Enrollment Limit:** 15

**Enrollment Preferences:** Junior and Senior History Majors and Jewish Studies Concentrators

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

JWST 433(D2) HIST 433(D2)

**Writing Skills Notes:** Before each course, students will submit a 2-3 paragraph critique and a list of 3 questions for discussion. The final assignment will be a research paper (approximately 25 pages) or historiographical essay. Assignments en route to the final deadline, include: 1) two early "research updates" to document process and progress; 2) analysis of a source; 3) research proposal; 4) rough draft of a section; 5) draft of paper; 6) final paper. Only some work will graded, but all will receive feedback.

**Difference, Power, and Equity Notes:** This course considers the complex ways that religion, ethnicity and national identities shaped the colonial and post-colonial world. Never controlling or collectively representing a European power, Jews were also rarely situated at the bottom of any colonial hierarchy, sometimes occupying more than one social or political role in a single colonial territory. This course provides insight into the many ways hierarchies of power could operate in colonial and post-colonial settings.

**Attributes:** HIST Group C Electives - Europe and Russia JWST Capstone Course

Not offered current academic year

**HIST 434 (S) Humanitarianism and Jewish History** (WS)

**Cross-listings:** JWST 434 / REL 335

**Primary Cross-listing**

In the twentieth century, Jewish history and humanitarian history became deeply intertwined. As the victims of persecution and expulsion, mass violence and genocide, Jews repeatedly figured as the recipients of aid and humanitarian intervention. At the same time, Jewish political figures, legal thinkers, intellectuals and scholars, social activists, and aid workers played central roles in the establishment of humanitarian organizations and in debates about the moral, political, and legal frameworks that have shaped approaches to humanitarianism across the decades since World War I. This research seminar is designed to open up big questions about the history of humanitarianism and to carve out space for students to conduct research on a particular place, time, and aspect of that larger history in conversation with other students working on related topics. In the first half of the semester, in discussions of common readings, we will examine various works of scholarship that connect to the history of humanitarianism from the nineteenth century to the present. Beginning in the first half of the semester and with greater intensity in the second half of the semester, you will conduct independent archival research on some aspect of the history of humanitarianism using the digitized archives of the American Jewish Joint Distribution Committee, culminating in a twenty-plus-page paper. In the final weeks of the semester, the seminar will continue to meet weekly as a research colloquium, to provide a forum for you to present your research and drafts in progress and to give feedback on fellow students' work. In this seminar, we are not merely studying history; you are actually doing history. Over the semester, you will learn how to pose historical questions; to engage critically with readings beyond summarizing them; to synthesize an enormous amount of source material; and to learn how to write more clearly. The goal is for each student to produce a polished research paper based on engagement with archival sources and relevant secondary literature that will serve as a capstone to your coursework at Williams or as a potential jumping-off point for future research projects, including a senior thesis in History or Jewish Studies.

**Requirements/Evaluation:** class participation, several short papers, oral presentations, and a 20-page research paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** History majors and Jewish Studies concentrators

HIST 452 Before and After Roe v. Wade: The History of Reproductive Politics in the United States

Debates about abortion, adoption, and birth control; and debates over who should be allowed to procreate and parent have generated major social, legal, and political conflicts in the United States. This course examines the history of those debates and conflicts, as well as their impact on the lives of individuals and on political culture. We will explore how legislative bodies, courts, medical experts, religious authorities, activists, and individuals have participated in those debates, and will pay particular attention to how class, race, religion, age, and sexuality have affected the experience of reproduction.

Class Format: This is a research seminar. Students will produce a 20-30 page original research paper by the end of the semester. In addition to discussion of readings, considerable time in class will be spend on research methods.

Requirements/Evaluation: Attendance and active participation in class discussion and activities; in-class presentations; several short assignments (1-2 pages) leading to a final research paper (20-30 pages)

Prerequisites: None

Enrollment Limit: 15

Enrollment Preferences: Senior History majors; History majors

HIST 454 (S) Land, Memory, Materiality: Histories and Futures of Indigenous North American Arts (DPE)

Cross-listings: ARTH 561

Secondary Cross-listing

This course engages Indigenous North American traditions of creative expression, remembrance, and representation in historical, contemporary, and future-facing ways. Drawing upon diverse Native American and First Nations theories and practices, it ranges widely across the continent to consider Indigenous arts and material culture within specific cultural, socioeconomic, and political contexts. Part of the course is grounded in the Native Northeast, including the Indigenous homelands of the Stockbridge-Munsee Mohican Community in which the Graduate Art Program and Williams College are situated. Other units will focus on continuities and transformations in artistic and maker-traditions within and across specific Indigenous nations and communities. The course is especially interested in connections between past and present, and the innovative ways Indigenous artists, makers, and knowledge-keepers have reckoned with what has come before, while also mapping meaningful future pathways. Topics will include repatriation and community-led restorative efforts to bring home ancestors and important heritage items “collected” over the centuries following 1492; concepts and practices of cultural, intellectual, visual, and political sovereignty; decolonizing museums; the complex dynamics of collaboration; Indigenous, African-American, and Afro-Indigenous artistic connections and solidarities; and Indigenous challenges to Eurocentric and settler colonial approaches to preservation, interpretation, and classification. Seminar members will develop familiarity with methods and ethics grounded in Native American and Indigenous Studies, and with new scholarship by leading and emerging critics and creators.

Class Format: The course will feature seminar discussions as well as local trips to museums, libraries, and archives with pertinent collections and exhibitions.

Requirements/Evaluation: Engaged participation in discussions; in-class presentations; short writing assignments in preparation for final project; final original research and interpretive project, with presentation to seminar.
**Prerequisites:** For undergraduates, at least two prior courses in or related to History, Art History, Native American and Indigenous Studies, and/or Museum Studies.

**Enrollment Limit:** 16

**Enrollment Preferences:** Priority for Graduate Art students. Four seats are reserved for undergraduates, with preference to junior and senior majors in Art History and History. Undergraduates should email a brief statement of interest to cd10@williams.edu.

**Expected Class Size:** 16

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

---

This course is cross-listed and the prefixes carry the following divisional credit:

**ARTH 561(D1) HIST 454(D2)**

---

**Difference, Power, and Equity Notes:** The course centers theories, experiences, and expressions from Native American/Indigenous communities, scholars, and artists/makers, while engaging foundational and new work in Native American and Indigenous Studies (NAIS). The course also provides students with critical tools for reckoning with settler colonialism and its historical as well as enduring impacts in Indigenous contexts; and with race, ethnicity, sovereignty, and tribal nationhood as key interpretive frames.

**Attributes:** HIST Group F Electives - U.S. + Canada

Not offered current academic year

---

**HIST 455 (F) Material Cultures in North American History** (DPE)

**Cross-listings:** AMST 455

**Primary Cross-listing**

Material culture studies consider the dynamic relationships that people develop with the physical world. Tangible items like clothing, furniture, tools, and the built environment are all shaped by communities’ identities, aspirations, resources, struggles, and forms of power. This course approaches North American histories through the lens of materiality, and examines how interdisciplinary methodologies can illuminate multiple or alternate understandings of the past—and its continuing impacts in the twenty-first century. While many historians emphasize written archives and documents as primary sources, scholars and practitioners of material culture studies center everyday as well as exceptional material items that communities have produced and interacted with over many generations. Equally important are the afterlives of these items. At different turns, and across time, social groups have cherished certain belongings; contested, rejected, or remade them; ascribed and activated meanings that may be very different from what the original makers conceived. These continuing transits compel reckoning with major issues of justice, rights, restitution, and sovereignty. The course traces key theories, ethics, and practices of caretaking, preservation, repatriation, curation, creative re-making, and digitization. Members will participate in a series of visits to area museums, collections, and meaningful places to deepen skills of critical analysis. The scope of the course is North American and at times transoceanic. It also includes substantial focus on our location in the Northeast and local formations of materiality and memory, as well as topics in Native American and Indigenous Studies, settler colonialism, and decolonizing approaches. Class members will build familiarity with appropriate techniques for approaching and handling different forms of material culture. They will also cultivate skills for developing and carrying out an original research project; and explore diverse modes of analysis and expression for representing the stories of materials and the communities who engage with them.

**Requirements/Evaluation:** Active participation in class discussion and visits, reading reflections, in-class presentation, research project prospectus, research project

**Prerequisites:** Two prior courses in American History, American Studies, Native American and Indigenous Studies, or a related area

**Enrollment Limit:** 15

**Enrollment Preferences:** If overenrolled, junior and senior History and American Studies majors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

---

This course is cross-listed and the prefixes carry the following divisional credit:

**HIST 455(2) AMST 455(2)**

---

**Difference, Power, and Equity Notes:** This course examines diverse communities’ historical experiences across North America in conjunction with resistances to Euro-American settler colonialism. It introduces students to foundational methodologies in material culture studies including decolonizing approaches, and explores key topics about caretaking, interpretation, and repatriation to descendant communities, such as the Native
American Graves Protection and Repatriation Act.

**HIST 462 (S) For the Soul of Mankind: The Cold War and American Foreign Relations** (WS)
The United States emerged from the Second World War with unprecedented power and influence; for the first time it was poised to take on a level of
global leadership that it had long shirked. Yet the U.S. faced an uncertain world, marked by the ascendance of the communist-led Soviet Union as a
rival superpower, the impending decolonization of European empires, the emergence of a nuclear arms race, and a host of changes to domestic
American life. What ensued was a 45-year Cold War--a battle for the soul of mankind--marked by American officials’ relentless determination to
combat the threat of communism at home and abroad. This course explores a range of scholarly approaches to that conflict, focusing on high-level
diplomacy, hot wars, propaganda, the cultural cold war, and more. In addition to reading and discussing works that exemplify key approaches to
studying America's Cold War, students will develop an original research topic and research and write a 20- to 25- page paper, based in primary
sources, on a Cold War-related topic of their choosing.

**Requirements/Evaluation:** evaluation will be based on class participation, several short papers, and a 20- to 25-page research paper

**Prerequisites:** None

**Enrollment Limit:** 15

**Enrollment Preferences:** Advanced history majors

**Expected Class Size:** 10-20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** Students will produce a 20-25 page final paper through a series of scaffolded assignments, each of which will receive feedback
from the professor as well as a group of peers. Assignments leading up to the final research paper include a 4-6 page historiography paper, a 2-3
page draft introduction, and a completed initial draft.

**Not offered current academic year**

**HIST 470 (S) Latinx Migrations: Stories and Histories** (WS)

**Cross-listings:** LATS 470 / WGSS 470

**Primary Cross-listing**

Latinx migration histories are often told with sweeping data and within broad historical contexts. While these are important, the voices of the people
leaving their home countries and coming to the United States can be lost or buried. During the 1970s, the emerging subfield of social history asserted
the need to craft histories that took into consideration the everyday lives of everyday people. Oral history emerged a key tool in capturing the personal
stories too often missed in historical archives. At the same time, Puerto Rican Studies, Chicano Studies, and later, Latinx Studies emerged to tell the
histories of groups too often omitted from or misrepresented in the scholarship. These fields relied on traditions of testimonios or storytelling. This
course focuses on Latinx oral histories, autobiographies, memoirs, testimonios, and other first-person narratives to explore how people are impacted
by and experience those broad historical contexts, as well as how the decisions they make and the actions they take shape those broad historical
contexts. As Latinx Studies is a field that has been at the forefront of exploring intersectionality, we also analyze how attention to first person narratives
and lived experiences reveal the complexities of race, ethnicity, gender, sexuality, and class, as well as other visible and invisible markers of
difference. Examining first person narratives in the context of specific Latinx groups in particular historical, geographical, and social contexts, we
interrogate the methodological and interpretive challenges of working with oral histories and other first-person primary sources. Course topics include
the gendered dimensions of migration, geopolitics and stories of exile, and the connections between lived experiences and political activism,
particularly the feminist activism of the late 1960s and 1970s-- all while students develop and share their own research topics.

**Requirements/Evaluation:** class participation and presentations, short writing assignments, proposals, annotated bibliography, drafts of research
paper, final presentation, and final paper of 15 to 20 pages

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** History majors, WGSS majors, and Latina/o Studies concentrators, seniors

HIST 478  (S)  Cold War Landscapes

Cross-listings:  AMST 478 / ENVI 478

Primary Cross-listing
The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in nations across the globe. We will begin this seminar by exploring several distinct “Cold War landscapes” in the United States and North America. We will then move on to examining others in Europe and the Soviet Union. Our approach to our topics will be interdisciplinary throughout the semester, with the additional goal of helping students frame their final projects. Students are encouraged to write their research papers on any geographical area of the world that interests them.

Requirements/Evaluation:  Class participation and semi-weekly critical writing on the reading; students will also be expected to keep up through the stages of the research paper process, which will involve submitting a short research plan, annotated bibliography, outline, and a rough draft, as well as the final 20- to 25-page paper.

HIST 480  (F)  Media and Society in Africa  (DPE)  (WS)

Cross-listings:  GBST 480 / AFR 381

Primary Cross-listing
The Media have long played important roles in African societies. As early as the second half of the 19th century, African intellectuals were using print technology to address the people. As radio technology was in its infancy during the first half of the twentieth century, Africans were gathering around re-diffusion stations and later around single receivers to listen to news and entertainment programing. In this tutorial, we will examine these histories of media and media technologies on the continent. Ultimately, we will explore the roles that media played in serving particular community needs and how
communities also adapted new media technologies to fit local conditions. Media content has historically been determined based on standards beyond viewers’, readers’ and listeners’ control. We will examine the influences that editors and political leaders on the continent have exerted on content as well as what forces they responded to. We will also further explore the media’s role in major events on the continent, from governmental changes to the ending of apartheid in South Africa and the role that media have played in areas of conflict.

Requirements/Evaluation: Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

Prerequisites: This course open to all students

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to history majors and students with prior experience with African history. If the course is over-enrolled, students may be asked to complete a questionnaire to determine enrollment

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 480 (D2) AFR 381 (D2) HIST 480 (D2)

Writing Skills Notes: Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers’ writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive regular feedback and critiques - both oral and written - from the professor, as well as oral critiques from tutorial partners.

Difference, Power, and Equity Notes: Modern media developed in Africa as means of control and cultivating dutiful colonial subjects. However, media then emerged as sites of contestation and even tools with which colonial subjects challenged colonial rule. They have continued to be revealing sites for issues of gender, race, class, and ethnicity. As such, this course immensely explores diversity, power and equity and how these all-important societal concerns are expressed through the media in Africa.

Not offered current academic year

HIST 481 (F) History of Taiwan (WS)

Cross-listings: ASIA 481

Primary Cross-listing

Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an “inalienable part” of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. We will also examine contemporary arguments for Taiwan as part of China. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

Requirements/Evaluation: weekly papers and critiques

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History and Asian Studies majors/concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 481 (D2) ASIA 481 (D2)

Writing Skills Notes: In this tutorial course, students will write bi-weekly 5- to 7-page papers with feedback from both the instructor and tutorial partner. Students will revise one of their tutorial papers as a final assignment. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Attributes: HIST Group B Electives - Asia
HIST 486 (S) Race and A Global War: Africa During World War II (DPE) (WS)

This course highlights African experiences of World War II. Although most histories have excluded Africa's role in the war, the continent and its people were at the center of major developments during in this global conflict. In fact, many Africans remember the Italian invasion of Ethiopia in 1935 as the start of the war. African servicemen fought alongside the Allied and Axis forces on major warfronts in Europe, Africa and Asia. African communities and individuals also established war charity campaigns to collect funds, which they sent to war ravaged societies in Europe. Indeed, African economies, despite their colonial statuses, kept European imperial nations afloat in their most hour of need. At the same time, African colonial subjects faced severe food shortages, the loss of working-age men to labor and military recruiters, and dramatically increased taxes. We will examine the impact of these and other wartime pressures on different African communities. How did African societies meet such challenges and how did they view the war? In this course we will examine the roles that women played during the war, and the various other ways that African communities met wartime demands. Other topics we will explore include the role of African women; colonial propaganda; political protest against the war; race and racial thought in the wartime era; war crimes; African American support for the liberation of Ethiopia; and the war's impact on decolonization across the continent. We will further study how Africans and outsiders have differently conceptualized the continent's role in the war by analyzing a variety of sources, including scholarly writings, archival materials, films, former soldiers' biographies, and propaganda posters.

Requirements/Evaluation: Students will be evaluated based on a series of 5-7-page tutorial response papers and 2-page critiques, as well as preparedness for and performance in weekly tutorial discussions.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: Preference will be given to history majors and students with prior experience with African history. If the course is over-enrolled, students may be asked to complete a questionnaire to determine enrollment

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Students will alternate weekly between writing 5-7-page tutorial papers and 2-page critiques of their peers' writing. Formal writing assignments throughout the semester will total at least 40 pages. Students will receive written feedback on their writing from the professor, as well as oral critiques from the professor and tutorial partners. The final writing assignment will afford students the chance to reflect on their previous papers and the semester's course content.

Difference, Power, and Equity Notes: This course explores the colonial relationship during a major global crisis. Students will examine existing narratives of African contributions to the war and to come up with their own interpretations, and will be called to critically engage the question of why and how colonies made significant contributions to the Allied cause by producing needed materials and resources or by joining the fight. Africans made these contributions spite of various and complex inequities.

HIST 487 (S) FIRE! A SOCIAL HISTORY (WS)

This tutorial offers a social history of fire in a national, international, and transnational framework. The aim of this course isn't to historicize fire, itself. Rather, "fire" is treated as a subtext to other historical developments and events in the twentieth and twenty-first centuries that have been factually and figuratively shaped by it. In this regard, we will grasp fire not only as combustion or conflagration but also through its nuanced meanings and their implications for how we think historically about issues related to capitalism, class, climate and environment, labor, gender, immigration, internationalism, policing, politics, race, radicalism, and sex. In essence, bodies might be on fire, burning with sexual desire; buildings might be on fire, engulfed in an intense conflagration; cities might be on fire, ignited by gunfire and urban unrests; workers might be fired or even fired up in a working-class movement, the latter incited by the push for labor democracy; or there might be fire weather, sparked by drier conditions and sweltering temperatures reflecting climate change. Thus, we will examine "fire" in a variety of historical contexts, from actual accounts of disastrous fire incidents due to environmental or industrial mishaps to stories of passion or protest inflaming individuals and groups to studies of rebellions and riots that produce fiery conditions. Lastly, we will analyze society's historical fascination with "fire" events, both real and imagined, and the way they have
prompted efforts to rebuild, reform, and reimagine. To accomplish our goals, we will engage primary and secondary sources in addition to screening films that focus on histories directly or indirectly related to fire.

Requirements/Evaluation: Weekly formal papers and written critiques. 10-12 page research paper.

Prerequisites: None.

Enrollment Limit: 10

Enrollment Preferences: Open to sophomores, juniors, and seniors. History majors will be prioritized. Should the course become overenrolled, I will have non-history majors complete a questionnaire.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will be required to complete formal writing assignments each week, alternating between response papers (4 pages) and written critiques (2-pages) of their peers' work. Students will receive substantial feedback on their writing skills, with verbal and written suggestions for improvement. Students also will receive feedback from their tutorial partners.

HIST 488 (F) Sites of Memory and American Wars (WS)

This tutorial will examine the ways that U.S. military ventures have been memorialized through a variety of physical sites, including landscapes, monuments and statues, museums, and other depictions. Given the enormous national conversation and reconsideration of many of these sites over the last decade, we will ask such questions as: How and why has the memorialization of U.S. wars changed since the country's founding? Who determines what is preserved and what stories are told? What is the relationship between individual experiences, collective memories, and national narratives? What do "sites of memory" tell us about society's views of wars and soldiers and about the United States? Throughout, we will pay attention to how these sites reflect historical understandings of the time and have also served as focal points of social and political protests.

Class Format: Students will meet with the professor either in assigned pairs or "trios" at a regularly scheduled time each week. Students in pairs will meet for one hour; students in trios will meet for 75 minutes.

Requirements/Evaluation: This course follows a typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

Prerequisites: None

Enrollment Limit: 10

Enrollment Preferences: History majors and students with course work related to the topic.

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: At the start of the semester, students will outline what their writing goals are for the semester, and they will receive feedback on their writing from the professor and from their tutorial partner. The final writing assignment will afford students the chance to reflect on their previous papers and the semester's course content.

TUT Section: T1 Cancelled

HIST 491 (S) The Suburbs (WS)

Cross-listings: ENVI 491 / AMST 490
The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans’ relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans’ understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America’s conservative political turn, leading to the election of Ronald Reagan?

Class Format: Students will meet with the professor either in assigned pairs or "trios" at a regularly scheduled time each week. Students in pairs will meet for one hour; students in trios will meet for 75 minutes.

Requirements/Evaluation: This class follows a typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique. During two of the weeks of the semester (around the middle of the semester and at the end), all students will write papers that explore a common question or theme.

HIST 492 (S) Making Race in Early Modern Europe (DPE)
In modern scholarship, racism has most often been portrayed as a child of the European Enlightenment, a set of ideas about embodied human difference and its heritability that arose after the abandonment of the Biblical account of human creation and the rise of a new natural science. This tutorial asks: what racial ideas and practices preceded the Enlightenment? Beginning in the late Middle Ages, Europeans participated in enormous economic and cultural transformations, including increased global mobility and the establishment of new, transoceanic empires. Intensified interactions with people in the Americas, Africa, and Asia shaped European understandings of human difference, as did the burgeoning Atlantic economy and its cruelties. In this tutorial, we will place the emergence of modern racism in a long-term perspective, reconstructing the deep history out of which Enlightenment racial theory emerged. Proceeding both chronologically and thematically, we will consider how the major global transformations of the sixteenth through eighteenth centuries shaped European racial understandings with enduring consequence. In the process, we will develop a conceptual vocabulary to describe in a historically sensitive manner how embodied human difference has been interpreted differently across space and time. Throughout, we will read a variety of historical primary sources in conjunction with recent scholarship. Ultimately, our historical study will afford a comparative perspective on contemporary views of races and racism.

Requirements/Evaluation: Attendance and active participation; weekly tutorial papers (5 "long" papers and 5 responses).

Prerequisites: 200- or 300-level History classes

Enrollment Limit: 10

Enrollment Preferences: Junior and seniors; History majors.
**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**Difference, Power, and Equity Notes:** The aim of the tutorial is threefold: (i) to introduce students to the comparative study of race across time and place, in order to help them contextualize and historicize the racial dispensation of the contemporary US; (ii) to treat the history of race not just as a history of ideas and theories, but of practices of race- and knowledge-making; (iii) to advance our understanding of the past through a dialectical process of empirical research and theoretical interpretation.

**HIST 493 (F) Senior Thesis: Research Seminar**

This seminar is intended solely for writers of senior theses during their first semester. Although each student's major work for the year will be the writing of a thesis in consultation with an individual advisor, students are also required to meet in the context of the thesis seminar in order to present and critique each other's proposals and drafts and to discuss common problems in the research and design of a long analytical essay. For students proceeding to HIST 494, performance in the fall semester will be factored into the thesis grade calculated at the end of the year. The quality of a student's performance in the seminar segment of History 493, as well as their performance in all aspects of the May colloquium at which theses are presented and critiqued, figure in the overall grade the student earns for History 493-494 and the departmental decision to award Honors or Highest Honors at Commencement.

**Requirements/Evaluation:** class participation and completed written work, and will determine if a student will continue in the thesis program

**Prerequisites:** limited to seniors accepted into the History Department's Thesis Program

**Enrollment Limit:** none

**Enrollment Preferences:** limited to seniors accepted into the History Department's Thesis Program

**Expected Class Size:** 10-15

**HIST 495 (F) The Medieval World System: Globalization before 1500 (WS)**
In recent years, scholars have turned increasing attention to global history in the pre-modern period. This tutorial takes as its focus the global Middle Ages: roughly speaking, the period between 500 and 1500 CE. This was a period that saw mass-produced consumer goods cross from China to India, East Africa, and the Middle East, inspiring admiration and imitation in multiple different markets. It saw games, music, and forms of literature become popular across continents, and saw religious communities forge networks spanning thousands of kilometers. To study the global Middle Ages is to place exchange and networks, both commercial and cultural, at the heart of our analysis. We will read and analyze many accounts by medieval travelers, merchants, and pilgrims who crossed Afro-Eurasia, alongside works by modern historians and archaeologists who have pieced together the patterns of movement and exchange that tied together the diverse societies of pre-modern Afro-Eurasia.

Requirements/Evaluation: Students will meet in pairs with the instructor once a week. Every other week each student will present a paper of approximately 5-7 pages on a topic determined by the instructor, due by 5pm the day before the tutorial meeting. The student not writing the paper will critique the paper written by their tutorial partner. Each student will write six papers and serve as a critic on the six papers of their tutorial partner.

Prerequisites: None
Enrollment Limit: 10
Enrollment Preferences: Junior and Senior History majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

HIST 21  Domestic Terrorism: From the Klan, through the Oklahoma City Bombing, to January 6
Domestic Terrorism: From the Klan, through the Oklahoma City Bombing, to January 6 On January 6, 2021, we witnessed numerous acts of domestic terrorism - the effort to advance political and ideological ends through violent means. Some of these acts were carried out by organized groups engaged in seditious conspiracies. Others were committed by fellow travelers and hangers-on acting without much of a plan or foresight. But as
unprecedented as was the assault on the US Capitol and the disruption of the peaceful transfer of power between presidential administrations, domestic terrorism has deep roots in the United States. One hundred and fifty years ago, during Reconstruction, the defenders of white supremacy organized themselves into the Ku Klux Klan and other groups to prevent those who had recently been enslaved from exercising political and economic power. The Department of Justice was established in response to this rampage of violent crime. The twentieth century saw many different episodes of domestic terrorism, with violence deployed to oppose everything from the war in Southeast Asia, the effort to register Black voters and integrate public accommodations, to the availability of abortions, as well as to a more generalized opposition to the federal government. In this class we will focus on some of these historical antecedents and then on the crimes of January 6 and their investigation and prosecution. The readings will include government and press reports as well as court documents relating to the cases on which we will focus, and The Report of the Select Committee to Investigate the January 6th Attack on the United States Capitol. We plan to visit Washington, D.C., to meet with one or more federal judges and advocates involved in the January 6 prosecutions. If schedules permit, we would also attend court proceedings. Students will be expected to write one 4-5 page paper (or another work of comparable effort) on a topic of their choosing.

Requirements/Evaluation: Paper(s) or report(s)
Prerequisites: No prerequisites
Enrollment Limit: 12
Enrollment Preferences: By seniority; randomly among those of equal seniority.

HIST 23  (W)  Maps: Past, Present & Future
This course will examine how antique maps provide a frame for understanding history, art and science, as well as lessons for modern-day map-making. We will start by studying antique maps and mapmakers from various cultures over the past five hundred years. Students will learn about the multitude of online resources available for studying maps, and, in their first project, will select and evaluate an antique map, focusing on its cartographic, historic, artistic and design-related aspects. We will then explore modern-day map-making, including the tools, companies and people currently making them. The class will have several guest speakers about both historic and modern-day maps. In the second project, students will select and evaluate a modern-day map about a topic of their choosing, such as politics (e.g. gerrymandering, racial covenants, redlining), climate change, site selection, sports or recreation.

Requirements/Evaluation: Other: Discussion and two projects
Prerequisites: None
Enrollment Limit: 25
Enrollment Preferences: Mix of students with an interest in history, art and science.
Expected Class Size: NA
Grading: pass/fail only
Unit Notes: Tom Paper is a Williams grad (1984), Stanford MBA, Managing Partner of Webster Pacific, a strategic analytics consultancy; he is also VP of the California Map Society and Founder of Pixeum, a website of beautiful and intricate images, including maps.

HIST 29    Gallery to Garment: Exploring Costume History in Museums & Beyond
Welcome to “Gallery to Garment”. This course offers a unique journey through the evolution of fashion, spanning from ancient times to the 21st century. Our exploration begins in the classroom, where we'll delve into the social, cultural, and economic influences that have shaped costume design throughout history. We'll focus on different eras, examining the materials, styles, and trends that defined it. To bring our studies to life, the course includes curated trips to various museums in Williamstown, New York, and Boston. Here, you'll witness firsthand the textures, colors, and craftsmanship of historical garments, ranging from the elaborate gowns of European courts to the intricate traditional wear of ancient civilizations.
These excursions will not only enhance your understanding of the eras studied in class but also provide a tangible connection to the past. By the end of the course, you'll have gained a comprehensive understanding of the development of fashion and its role in history. You'll leave with an appreciation of how costume history is a vivid tapestry woven from the threads of time, culture, and creativity. Note: Travel outside of Williamstown is required for this course.

Requirements/Evaluation: Presentation(s)
Prerequisites: N/A
Enrollment Limit: 10
Enrollment Preferences: Students will be selected based on their connection to course subject. i.e. The student is majoring in history, and/or they seek a career in the fashion industry, and/or the museums visits will help with thesis/project research, etc.
Expected Class Size: NA

HIST 30 (W) Workshop in Independent Research
This course is designed for junior majors and sophomores who are considering pursuing a senior thesis in History. It can either provide students greater experience in independent research or allow for an in-depth exploration of a specific topic under consideration for the thesis. The course will focus on key methods of historical research, such as defining a topic, familiarizing oneself with historiography, and finding and using primary sources. Students may pursue any topic, and assignments may be modified to fit students’ particular needs and interests. The majority of class time will consist of individual meetings with the professor as well as consultations with librarians and other experts in your field. Students are expected to devote considerable time outside of class to independent research. The final assignment will be a 10-page paper, which can either be a detailed prospectus for a senior thesis or a research paper.
Class Format: Independent research.
Requirements/Evaluation: 10-page paper; weekly short assignments.
Prerequisites: None.
Enrollment Limit: 10
Enrollment Preferences: Instructor will send students questions over email about their research plans; students with evidence of more formulated plans will receive preference.
Expected Class Size: 5
Grading: pass/fail only
Not offered current academic year

HIST 31 (W) Senior Thesis: History
To be taken by all senior honors students who are registered for HIST 493 (Fall) and HIST 494 (Spring), HIST 31 allows thesis writers to complete their research and prepare a draft chapter, due at the end of Winter Study.
Class Format: thesis
Requirements/Evaluation: thesis chapter
Prerequisites: HIST 493
Enrollment Limit: 20
Enrollment Preferences: only students writing a thesis in History can enroll for this course
Grading: pass/fail only
Not offered current academic year
HIST 99  (W)  Independent Study: History

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading:  pass/fail only

Not offered current academic year
This program is designed to facilitate and promote innovations in curricular offerings in relation both to interdisciplinary conceptual focus and experimental pedagogical form. It provides support for faculty efforts to develop a curriculum that creatively responds to intellectual needs and modes of teaching/learning that currently fall outside the conventional pattern. Faculty members interested in offering courses that fall outside the aegis of departmental or existing interdisciplinary programs submit such courses directly to the Committee on Educational Affairs by the Registrar’s deadline for course submission in early spring. Courses that fit within the curricula of departments and interdisciplinary programs, even if interdisciplinary or experimental in nature, are found listed within those departments and programs.

**INTR 150 (F) Data for Justice (DPE) (QFR)**

**Cross-listings:** STS 150 / AMST 150 / SOC 150 / WGSS 150

**Primary Cross-listing**

This course is a unique and inclusive introduction to data science where quantitative thinking, programming, and social justice intertwine. We will build our data science skills using R, a popular open-source data science tool. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration. But rather than divorcing these techniques from the social issues they can help illuminate, we ground them in a social justice context. Overall, we will apply data science skills to topics drawn from criminal justice, environmental justice, diversity and inclusion in arts and media, education equity, and much more, with the goal of growing our collective capacity to use data science as a tool for social good. During a time when humans are increasingly subjugated to data-driven algorithmic decisions, when there are social media accounts dedicated to highlighting misuses of data, and when artificial intelligence makes faking data a nearly trivial task, using data to ethically and carefully promote justice is more important than ever.

**Class Format:** This course is taught in a highly interactive format and will frequently use a flipped-classroom approach. Students should expect substantial time devoted to in-class collaboration.

**Requirements/Evaluation:** Students will complete regularly assigned activities, problem sets, and other assessments. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based approach.

**Prerequisites:** None. This course assumes no prior knowledge of data science or R programming. An interest in social justice and a willingness to engage intensively with data and computing are essential.

**Enrollment Limit:** 18

**Enrollment Preferences:** Students without prior college-level courses in statistics and programming.

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 150(D2) AMST 150(D2) SOC 150(D2) WGSS 150(D2) INTR 150(D2)

**Difference, Power, and Equity Notes:** This course uses data science as a lens for injustice in spheres such as criminal justice, environmental justice, diversity and inclusion in arts and media, education equity. We will consider race, gender, LGBTQ+, disability, and other axes of identity. Additionally, we will adopt a data-critical perspective, thinking about how social forces shape data and our understanding of it.

**Quantitative/Formal Reasoning Notes:** This course teaches quantitative tools in R, a widely-adopted data science platform. We will focus on essential stages of data analysis, including data acquisition, cleaning, wrangling, visualization, and exploration.

**Difference, Power, and Equity Notes:** This tutorial examines the Cold War between the US and the USSR and attempts to use intellectuals to shape and promote the objectives of powerful state entities. The power struggle between the two "superpowers" impacted cultural production and authors. Some of those authors influenced or enlisted into the Cold War sought equity and equality for their communities and eventually fought against the very political powers that employed them.

Not offered current academic year

**INTR 320** (S) **The Impact of Black Panther Party Intellectuals on Political Theory** (DPE) (WS)

**Cross-listings:** LEAD 319 / PSCI 376 / AMST 308

**Primary Cross-listing**

This seminar examines the historical and contemporary impact of the Black Panther Party--and key allies such as Angela Davis--on political theory. Texts include: narratives from 1966-2016; memoirs; political critiques; theoretical analyses; interviews; speeches; government documents. The seminar will examine: original source materials; academic/popular interpretations and representations of the BPP; hagiography; iconography; political rebellion, political theory. Readings: *Liberation, Imagination and the Black Panther Party*; *Soledad Brother: The Prison Writings of George Jackson*; *Mao's Little Red Book*; *The Communist Manifesto*; *Still Black, Still Strong*; *Imprisoned Intellectuals*; *Comrade Sisters: Women in the Black Panther Party*.

**Requirements/Evaluation:** Requirements: students attend each seminar class and come prepared to discuss the readings; participate in discussions; present a collective analysis with Q/A for the seminar; submit a mid-term paper and a final paper or a group project.

**Prerequisites:** None.

**Enrollment Limit:** 19

**Enrollment Preferences:** Juniors and Seniors with previous courses taken in Africana Studies, American Studies, Political Science, Philosophy.

**Expected Class Size:** 19

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

**Writing Skills Notes:** An analytical outline of collective presentation; a mid-term paper and a final paper.

**Difference, Power, and Equity Notes:** The course focuses on African Americans and political resistance to racism and capitalism, as well as support for impoverished, under-resourced communities grappling with police violence.

**Attributes:** AFR Core Electives AMST Critical and Cultural Theory Electives PHIL Contemporary Value Theory Courses PSCI Political Theory Courses
INTR 343  (S)  Representations of Racial-Sexual Violence from Enslavement to Emancipation

Cross-listings:  AMST 343 / WGSS 343 / AFR 343

Primary Cross-listing

This tutorial examines representations of and resistance to racial-sexual violence in American society, from colonial America to contemporary US culture. Interdisciplinary texts cover history, politics, literature, film, feminist studies, American studies, lgbtq and ethnic/black studies. Books include *Southern Horrors; Intimate Matters; Scenes of Subjection; Trauma and Recovery; The Delectable Negro; At the Dark End of the Street*; films include *Birth of a Nation; Bush Mama; To Kill a Mockingbird*. The primary focus is on racial and sexual vulnerability to violence and mobilization for freedom from the 18th-21st centuries.

Class Format: students provide primary and response papers and discuss their analyses and theories of social and interpersonal violence

Requirements/Evaluation: weekly primary and response papers

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference given to juniors and seniors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

INTR 350  (S)  Data for Justice Research Practicum

Cross-listings:  WGSS 363 / STS 363 / AMST 363

Primary Cross-listing

Civil rights activist, educator, and investigative journalist Ida B. Wells said that "the way to right wrongs is to shine the light of truth upon them." In this inclusive, collaborative, research-based course, students will bring statistical, computational, and/or mathematical approaches to bear on issues of social justice. Guided closely by the instructor, students will work in groups to carry out original research in an area such as criminal justice, education equity, environmental justice, health care equity, economic justice, or inclusion in arts/media. Prior research experience is not required; one goal of this course is to build skills for advanced research.

Class Format: This course is an intensive research practicum. Formation of research groups and selection of research topics will be facilitated by the instructor. The primary modality of work is peer collaboration.

Requirements/Evaluation: To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor adopts a mastery-based, ungraded assessment framework.

Prerequisites: INTR 150 (Data for Justice), or prior equivalent exposure to computing, statistics, and social justice topics as approved by the instructor.

Enrollment Limit: 10

Enrollment Preferences: Students who have a declared major in Division I or II, who meet the prerequisites of the course, and who fill out the instructor's preregistration survey (contact the instructor for link).

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 363(D2) STS 363(D2) INTR 350(D2) AMST 363(D2)

Difference, Power, and Equity Notes: Students will research issues of social justice in areas such as criminal justice, arts/media, environmental
justice, education, and health care, and along identity axes such as gender, race/ethnicity, disability status, and sexual orientation.

**Quantitative/Formal Reasoning Notes:** Students will use multiple mathematical, statistical, and computational frameworks to acquire, model, and analyze real-world data.

**Winter Study -----------------------------------------------**

**INTR 99 (W) Indep Study: Interdisciplinary**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

*Not offered current academic year*
The study of Italian in the target language encourages students to gain a deep appreciation of the language, culture and literature through active participation and meaningful experience with the culture on its own terms. Italian courses at Williams are therefore conducted exclusively in Italian in order to enhance and reinforce the emotive and cognitive involvement of the students as they are introduced to the Italian world-view in a lively and natural manner. Students desirous of more contact with Italian are encouraged to attend the weekly Italian Table in the designated college dining hall. More information can be found at cfllc.williams.edu/italian.

**RLIT 101 (F) Elementary Italian**

This course is designed for beginners. Its goal is to allow students to develop basic oral/listening and reading/writing proficiency in Italian. During the semester, students will be trained in grammar, pronunciation, listening-oral skills, reading, and writing in Italian by studying various communication settings and real-life situations. *The class is conducted entirely in Italian.*

**Class Format:** five hours a week with the professor  
**Requirements/Evaluation:** participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams  
**Prerequisites:** none; not open to those who have had one year or more of high school Italian  
**Enrollment Limit:** 20  
**Enrollment Preferences:** instructor will prioritize on the basis of study abroad plans and year at Williams  
**Expected Class Size:** 20  
**Grading:** no pass/fail option, yes fifth course option  
**Unit Notes:** students registered for RLIT 101-102 are required to attend and pass the sustaining program during Winter Study; credit granted only if both semesters (RLIT 101 and 102) are taken  
**Distributions:** (D1)

**Fall 2024**

SEM Section: 01  M-F 9:00 am - 9:50 am  Mario Sassi

**RLIT 102 (S) Elementary Italian**

This course is designed for beginners who already have some basic knowledge of Italian. Its goal is for students to review and expand their oral/listening and reading/writing proficiency in Italian. During the semester, students will continue to learn Italian grammar, vocabulary, and pronunciation while improving listening-oral skills, reading, and writing in Italian. *The class is conducted entirely in Italian.*

**Requirements/Evaluation:** participation, homework, compositions, quizzes, an oral exam, oral presentation, midterm and final exams  
**Prerequisites:** RLIT 101 and the Winter Study sustaining program; not open to those who have had one year or more of high school Italian  
**Enrollment Limit:** 20  
**Enrollment Preferences:** instructor will prioritize on the basis of study abroad plans and year at Williams  
**Expected Class Size:** 20  
**Grading:** no pass/fail option, no fifth course option  
**Unit Notes:** students registered for RLIT 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLIT 101 and 102) are taken  
**Distributions:** (D1)

**Spring 2025**
RLIT 103  (F)  History of Italy in Movies
The course aims primarily to enhance the student's speaking, reading, and writing abilities while introducing the history of Italy and its rich cinematic culture. Students will review and expand the previous semesters' grammar structures to achieve a higher level of fluency and sophistication in language production. The class is intended as a continuation of Italian 101 and 102, but welcomes study-abroad returnees and students who have an intermediate level of Italian. The class is conducted entirely in Italian.
Requirements/Evaluation:  oral presentations, midterm exams, tests, compositions, participation, final project
Prerequisites:  RLIT 101/102 or by permission of the instructor
Enrollment Limit:  15
Enrollment Preferences:  Students from 101/102 classes, as well as study-abroad returnees
Expected Class Size:  15
Grading:  yes pass/fail option, yes fifth course option
Distributions:  (D1)

Fall 2024
SEM Section: 01    MWF 10:00 am - 10:50 am     Mario Sassi

RLIT 105  (F)  Pathway to Proficiency
The course aims primarily to enhance the student's speaking, reading, and writing ability while introducing the formal study of Italian culture and society by analyzing short literary texts, articles, films, shows, and podcasts. In addition, students will review and expand the previous semesters' grammar structures to achieve a higher level of fluency and sophistication in language production. Italian 105 is intended for study-abroad returnees and other advanced speakers; students who have been particularly successful in Italian 101-102 are also encouraged to enroll. The class is conducted entirely in Italian.
Requirements/Evaluation:  oral presentations, midterm and final exams, tests, compositions, participation
Prerequisites:  RLIT 101/102 or by permission of the instructor
Enrollment Limit:  15
Enrollment Preferences:  Students from 101/102 classes, as well as study-abroad returnees.
Expected Class Size:  15
Grading:  yes pass/fail option, yes fifth course option
Distributions:  (D1)

Chair: Professor Man He

Cecilia Chang, Frederick Latimer Wells Professor of Chinese; Masashi Harada, Assistant Professor of Japanese; Man He, Associate Professor of Chinese; Shinko Kagaya, Professor of Japanese; Cornelius C. Kubler, Stanfield Professor of Asian Studies; Christopher M. B. Nugent, John W. Chandler Professor of Chinese; Kasumi Yamamoto, Frank M. Gagliardi Professor of Japanese; Li Yu, Herbert H. Lehman Professor of Chinese

Visitors: Yumemi Hanaki, Visiting Lecturer in Japanese; Xiaoming Hou, Visiting Assistant Professor of Chinese; Ju-Yin Wang, Visiting Lecturer in Chinese; Language Fellows: Xuechan Dai, Yen-Yu Lin; Teaching Associate: Mei Ki (Lina) Law

Department Mission Statement and Curricular Goal

The mission of the department is to produce “global citizens” with multilingual abilities, intercultural communicative competence, and multicultural leadership skills, who will be able to make contributions in different sectors of society in a globalized and diverse world. Graduates of our department will not only achieve proficiency in at least one Asian language but also become competent in intercultural communication. They will develop interpretive and analytical skills using both primary texts and secondary sources and become familiar with the textual and cultural traditions in Asia.

The department offers three distinct major tracks: Chinese, Japanese, and East Asian Languages & Cultures. Each major requires a minimum of ten courses. Up to four study-away credits can be counted toward a major.

Learning Objectives for the Chinese Major

Students who complete the requirements for a major in Chinese will be able to:

- Attain the Advanced level in speaking, listening and reading, and Intermediate High level in writing based on the ACTFL proficiency guidelines.
- Read and analyze basic texts written in Classical Chinese.
- Gain intercultural communicative skills to competently navigate a wide range of social and cultural contexts in Chinese-speaking environments.
- Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.
- Engage critically with important aspects of the historical and cultural developments and trends in China’s diverse and complex past and present.
- Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.

THE MAJOR

In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Mandarin Chinese language courses (CHIN 101, 102, 201, 202, 301, 302, 401, 402) and at least one course in Classical Chinese (CHIN 312). To gain a deeper understanding of Chinese cultural traditions, students should take at least one Chinese core elective in Chinese literary, linguistic, or cultural studies (taught either in English or in Chinese) with prefixes and primary cross-listings in CHIN.

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the Japanese Major

Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL Intermediate High to Advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
- Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.

THE MAJOR
In order to develop proficiency and intercultural communicative skills in the language, students are required to complete at least eight Japanese language courses (JAPN 101, 102, 201, 202, 301, 302, 401, 402), at least one Japanese core elective in Japanese literary, linguistic, or cultural studies (taught either in English or in Japanese) with prefixes and primary cross-listings in JAPN, and one approved elective related to Japanese language and culture (including additional JAPN core electives, additional Asian language courses, or Japanese studies courses offered in art, comparative literature, history, music, political science, religion, etc.).

Students placed out of lower-level language courses can take additional approved electives to replace the language course requirement. Electives include core language courses, core electives, and ASIA courses in the program of Asian Studies.

Learning Objectives for the East Asian Languages and Cultures Major

Students who complete the requirements for a major in East Asian Languages and Cultures will be able to:

- Attain a minimum of Intermediate High level in speaking, listening and reading of either Chinese or Japanese, and Intermediate Low level in writing in the language based on the ACTFL proficiency guidelines.
- Acquire research, problem-solving, and critical thinking skills by engaging in linguistic or literary analysis in the field of Chinese studies or Japanese studies.
- Obtain basic intercultural communicative skills to navigate some social and cultural contexts in Chinese- or Japanese-speaking environments.
- Continue their engagement with an Asian language and culture as lifelong learners and users of the target language.
- Students who choose the dual-language option will attain the Advanced level in speaking, listening, and reading in either Chinese or Japanese, and the intermediate level in a second Asian language based on the ACTFL proficiency guidelines.

THE DEGREE WITH HONORS

The department offers students the option of pursuing a degree with Honors in Chinese, Japanese, or East Asian Languages and Cultures through writing an honors thesis. Honors theses allow students a unique opportunity to undertake an examination of topics and texts with a greater depth than regular courses allow. The great majority of students who undertake the challenge of writing an honors thesis find it to be one of their most rewarding academic experiences at Williams.

Students interested in pursuing a degree with Honors should begin thinking about their thesis topic and materials as early as possible. This is particularly true for students who need to gather materials or conduct research abroad, as this will typically take place during their junior year or the summer between their junior and senior years. It is the responsibility of the student to approach faculty members to inquire about their willingness to serve as a thesis advisor. Ideally, students should have previously taken a course with that faculty member in an area related to the subject matter of the thesis. Faculty members will usually only advise a single thesis per year, and never more than two, with students who first approach the faculty member about serving as advisor being given priority. It is recommended that students approach the faculty members with whom they are interested in working for their thesis by the end of the fall semester of their junior year.
Students must submit a proposal to the department chair and their intended advisor before they pre-register for senior year courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. If the department approves the thesis proposal, the student should enroll in CHIN 493-W31-494, or JAPN 493-W31-494, depending on their major track. Please note that admission to the honors thesis program will normally be limited to students with a consistent record of honors-level work, as indicated by at least a B+ average in their courses for the major.

Students will typically meet with their advisor once a week at a set time other than office hours. The advisor will present the student with a set of deadlines for different stages in the thesis, ranging from a bibliography to the final draft. While these deadlines will vary for different advisors and theses, two deadlines will apply to all theses, whether analytic or translation. 1) Students must submit a finished first chapter or substantial section of polished translation by the last day of the first semester reading period. If the student misses this deadline, he or she will not be allowed to continue the thesis. 2) The finished thesis is due to the advisor by 4:00 pm on the Monday two weeks after the last day of Spring Recess. The student should submit three copies of the thesis at this time. There will be no extensions.

The department will assign two readers, separate from the advisor, to each thesis. The readers will give a written assessment of the thesis that will be an important factor in the final determination of the student's grades for the thesis and what honors designation, if any, will be given. These written comments will be shared with the student. Within two weeks after submission, the department will schedule an oral defense. This will be a one to one-and-a-half hour session in which the student will give a public presentation of his or her thesis to members of the department and invited guests followed by a question and answer period. A final, corrected copy of the thesis must be submitted to the Technical Services Department of Sawyer Library by 4:00 P.M. on the last day of the final examination period.

In order to qualify for Honors, the department must agree that the student has earned two semester grades of B+ or higher, based on his or her thesis and oral defense. Students whose thesis and defense are deemed by the department to be of exceptional merit will be awarded Highest Honors. A letter from the department chair will inform students of these decisions.

**STUDY ABROAD**

Students intending to major in the department are strongly encouraged to study in Asia at some point during their time at Williams—for a summer or for a semester or full year. Study-abroad in an immersive environment in the target culture is an indispensable step toward advanced proficiency in a second language. Prospective majors or language students who are planning to study abroad must attend the fall semester study-abroad information sessions organized by the department or discuss their plans with department faculty as far in advance as possible. The department administers the Linen Fellowships for Summer Study in Asia which fund selected students' summer intensive language study or research projects. Up to four study-abroad courses may be transferred and counted toward graduation and toward the majors offered in the department. Students MUST contact the department faculty BEFORE assuming study-away credit will be granted toward the major in the department. Upon return, students should ask their study-away program to send their transcript to the Registrar's office so that the appropriate number of credits can be transferred and granted by the department chair.

**DEPARTMENT EMAIL LISTS**

To be informed about the events, activities and funding opportunities in the department, please use your Williams login to sign up for one or more of the following GLOW special interest email lists.

**JAPN 101 (F) Elementary Japanese**

An introduction to modern spoken and written Japanese, the course aims to instill proficiency in Japanese by developing four necessary skills of speaking, listening, reading, and writing to successfully interact with native speakers. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Audio, video and computer-assisted learning materials will be used extensively. Classes consist of a combination of "act" classes, conducted exclusively in Japanese, where students use the language in various types
JAPN 101 and 102 constitute an integral, indivisible year-long course. Students who register for a year-long course are required to complete both semesters of that course within the same academic year. Students who fail to take and pass the second half of a year-long course will incur a course deficiency.

Class Format: fact classes, three hours per week; act classes three hours per week

Requirements/Evaluation: daily classroom performance, homework, quizzes, chapter tests, interview tests, and a final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: If the course is overenrolled, priority will be given to first-year students, sophomores, and DALLC majors.

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Unit Notes: students registered for JAPN 101-102 are required to attend and pass the sustaining program during the Winter Study period; credit granted only if both semesters (JAPN 101 and 102) are taken

JAPN 131 (F) Introduction to Japanese Formal Linguistics
Cross-listings: ASIA 131

Primary Cross-listing

This course provides a comprehensive introduction to the theoretical study of the Japanese language. We will delve into various aspects of linguistic theory, exploring speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meaning (semantics). Throughout, we will primarily juxtapose Japanese with English to deepen our understanding. By the end, we will not only grasp the fundamentals but also gain practical skills to delve into applied linguistics with confidence. This includes areas such as language acquisition, pragmatics, psycholinguistics, neurolinguistics, sociolinguistics, historical linguistics, language change, and cross-linguistic variation. While there is no prerequisite, having some proficiency in Japanese would enhance your experience.

Class Format: combination of lecture and discussion

Requirements/Evaluation: quizzes, problem sets, a paper, a presentation, a mid-term exam, and a final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: current or prospective majors in the Department of Asian Languages, Literatures, and Cultures

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

JAPN 131(D1) ASIA 131(D1)

Attributes: Linguistics

Fall 2024

**JAPN 223 (S) Japanese Food Culture in a Global Context** (DPE)

**Cross-listings:** COMP 223

**Primary Cross-listing**

The bourgeoning popularity of Japanese food on a global scale has resulted in a surge of new research, literature, and films. Conversely, the effects of globalization have transformed the dining experience within Japan to be ever more multiethnic. This interdisciplinary course explores the complex relationship between food and culture in Japan, and the emergence of Japanese cuisine as a global phenomenon, referring to a variety of materials and practices. Topics to be addressed include modernization, nation-building, militarization, globalization, the environment, and popular culture.

**Requirements/Evaluation:** active class participation, three response papers, two small written report (including class presentations), and one research paper and presentation

**Prerequisites:** none

**Enrollment Limit:** 20

**Enrollment Preferences:** current or prospective majors in the Department of Asian Languages, Literatures, and Cultures

**Expected Class Size:** 12

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D1)  (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

JAPN 223(D1) COMP 223(D1)

**Difference, Power, and Equity Notes:** This course explores the complex relationship between food and culture in and out of Japan, in relation to a variety of topics such as modernization, nation-building, militarization, globalization, environmentally sustainable development, and popular culture. Students will have the opportunity to critically analyze how various social/cultural, historical, and political contexts shaped and revealed (in)difference, (dis)power, and (in)equity in food production and consumption.

Not offered current academic year

**JAPN 301 (F) Upper-Intermediate Japanese**

This course is a continuation of Japanese 201 and 202. Students will further develop the four skills of speaking, listening, reading, and writing, while consolidating the foundations built in Elementary and Intermediate Japanese. The same general methodology will be used. In this course, students begin to emphasize vocabulary building through the study of situationally oriented materials stressing communicative competence. The reading of expository prose in both semi-authentic and authentic materials of intermediate difficulty will also receive some extensive attention.

**Class Format:** three 75-minute classes

**Requirements/Evaluation:** daily performance, homework, quizzes, a midterm, and a final exam

**Prerequisites:** JAPN 202 or permission of instructor

**Enrollment Limit:** 12

**Enrollment Preferences:** If the course is overenrolled, priority will be given to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures, Asian Studies concentrators.

**Expected Class Size:** 8
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

SEM Section: 01    MWF 8:30 am - 9:45 am

JAPN 302  (S)  Upper-Intermediate Japanese
This course is a continuation of Japanese 301. Students will further develop the four skills of speaking, listening, reading, and writing, while consolidating the foundations built in Elementary and Intermediate Japanese. In this course, students work on the reading skills for comprehending primary source materials and expository prose of intermediate difficulty; the communication skills for conducting practical conversations and presentations; and the listening skills for interpreting various types of information.
Class Format: three 75-minute classes
Requirements/Evaluation: daily performance, homework, quizzes, a midterm, and a final exam
Prerequisites: JAPN 301 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: If the course is overenrolled, priority will be given to current or prospective majors in the Department of Asian Languages, Literatures, and Cultures, Asian Studies concentrators.
Expected Class Size: 8
Grading: no pass/fail option, no fifth course option
Distributions: (D1)

Winter Study

---
The popularity of sake, a traditional Japanese alcohol made from rice, has been rapidly growing worldwide, accompanied by recent advancements in its quality. For instance, an increasing number of restaurants in major cities -- not only Japanese establishments but also those serving other cuisines such as Chinese, French, and Italian -- now offer sake. This trend is partly due to sake's versatility in complementing a wide array of foods, including Western food like cheese, with the same efficacy as wine. However, sake's versatility in flavor also underscores a challenge associated with sake: many people are unfamiliar with the various flavor profiles of different types of sake or which dishes pair well with it. This course addresses these inquiries by providing insights from a sake sommelier (i.e., the course instructor) while covering topics such as the fundamentals of alcohol, sake production methods, the history of sake, flavor profiles of sake, and techniques for enjoying sake (e.g., storage methods, serving temperatures, appropriate vessels for different types of sake, and food pairings). Additionally, students will have the opportunity to make amazake, a non-alcoholic beverage derived from sake production byproducts, as well as Japanese dishes incorporating sake (with the alcohol evaporated during cooking).

Class Format: There are cooking sessions.

Requirements/Evaluation: Research on the course contents and its presentation as well as regular attendance, active participation, assignments

Prerequisites: None

Enrollment Limit: 20

Enrollment Preferences: Students who have taken JAPN courses and/or students who major in Asian Studies and the Department of Asian Languages, Literatures, and Cultures, if the course is overenrolled

Expected Class Size: 20

Grading: Not offered current academic year

JAPN 31 (W) Senior Thesis: Japanese

To be taken by all students who are candidates for honors in Japanese.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year

JAPN 88 (W) Japanese Sustaining Program

Students registered for JAPN 101-102 are required to attend and pass the Japanese Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program, check your class schedule to confirm enrollment.

Requirements/Evaluation: regular attendance and active participation

Prerequisites: Japanese 101

Grading: pass/fail option only

Materials/Lab Fee: one Xerox packet

Not offered current academic year

JAPN 99 (W) Independent Study: Japanese

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
THE PROGRAM IN JEWISH STUDIES

Jewish Studies is an interdisciplinary field that encompasses the texts, history, languages, philosophy, and culture of Jews and Judaism as they have changed over three millennia and throughout the world. The program offers courses in multiple disciplines including but not limited to Religion, Classics, History, Philosophy, Anthropology, Sociology, and Comparative Literature. Across these disciplines, the program examines topics such as religious belief and practice, textual interpretation, the development of Zionism, life in the Diaspora, the historicization and memorialization of the Holocaust, and historical, political and philosophical questions surrounding Jewish identity. Investigating the foundations and development of these various Jewish topics, as well as their interaction with and influence on other traditions, provides an opportunity to explore the continuities and diversity of Jewish life and thought. Students will gain exposure to a common body of knowledge and scholarly approaches through which to engage in their own rich and varied intellectual explorations of Jewish and related topics.

CONCENTRATION IN JEWISH STUDIES

The concentration in Jewish Studies requires five courses with at least two different prefixes: one gateway course, two core courses, one elective, and one capstone course. Senior concentrators should consult with the chair about arrangements for a capstone course, if one is not listed below.

Gateway Courses (can also count as core courses):

REL 201 / COMP 201 / JWST 201(F) LEC The Hebrew Bible
    Taught by: Edan Dekel
    Catalog details
REL 203 / JWST 101 SEM Judaism: Before The Law
    Taught by: Jeffrey Israel
    Catalog details
REL 222 / JWST 222 SEM The Jewish Art of Interpretation
    Taught by: Jeffrey Israel
    Catalog details

Core Courses

    Catalog details
Elective Courses

Students may meet the elective requirement with a course partially related to Jewish Studies or another core course. In an elective course partially related to Jewish Studies, a student will normally focus at least one of the major writing assignments on a topic relevant to Jewish Studies or approximately one-third of the course will be devoted to Jewish subjects. The list of relevant electives changes regularly, so the course catalog should be checked for details. Listed below are examples of courses partially related to Jewish Studies. Students may meet the elective requirement with a course not listed here, subject to the approval of the Chair of Jewish Studies.

HIST 207 / GBST 102 / ARAB 207 / LEAD 207 / JWST 217 / REL 239 LEC The Modern Middle East

THE DEGREE WITH HONORS IN JEWISH STUDIES

The degree with honors offers students the opportunity to undertake advanced research under the supervision of one or more of the faculty members in Jewish Studies. Students normally must have at least a 3.5 GPA in the concentration and secure a faculty sponsor to be eligible. In addition to completing the five courses required for the concentration, candidates must enroll in either JWST 493 and a Winter Study course or a Winter Study course and JWST 494 in their senior year, and prepare a substantial written thesis. Honors in Jewish Studies may be granted to concentrators after an approved candidate completes an honors thesis and is awarded an honors grade by her/his advisor and one other faculty reader. Students interested in becoming candidates for honors should consult with the program in the spring of the junior year.

Croghan Professorship

Each year, in addition to the regular course offerings listed above, Williams sponsors the Croghan Bicentennial Visiting Professor in Religion who offers one course in Judaism and/or Christianity

OVERSEAS STUDIES

Studying in Israel is highly recommended for students interested in Jewish Studies. Many students have spent a semester or year at Hebrew University, Tel Aviv University, or the University of Haifa. With the approval of the Jewish Studies program chair, students may count a study-abroad program towards up to two core requirements.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
FUNDING
The Bronfman Fund for Judaic Studies was established in 1980 by Edgar M. Bronfman '50, Samuel Bronfman II '75, and Matthew Bronfman '80. The Bronfman Fund provides opportunities for the Williams community to learn about Jewish history and culture, both within the College’s formal curriculum and through the planning of major events on Jewish themes.

The Morris Wiener and Stephen R. Wiener '56 Fund for Jewish Studies was established in 1997 through the estate of Stephen R. Wiener '56. The Wiener gifts have provided an endowment to support a faculty position in modern Jewish thought, and are used to underwrite an annual lecture, forum or event relevant to contemporary Jewish life.

JWST 101  (F)  Judaism: Before The Law

Cross-listings:  REL 203

Secondary Cross-listing
This course introduces the academic study of Judaism through a humanistic exploration of "the Law" as a concept in Jewish thought and practice. Coverage will include the Law of Moses in the Hebrew Bible, the rabbinic distinction between "Oral Law" and "Written Law," medieval philosophical justifications for the Law, modern interpretations of the Law as Moral Law, Hasidic challenges to the centrality of the Law, and twentieth-century Jewish fiction that is haunted by a felt absence of the Law. Topics may also include the nature of rabbinic authority, methods of Jewish legal interpretation and innovation, and Jewish law as it pertains specifically to women, gentiles, idolaters, food consumption, and the Land of Israel. Course materials will include classical sources such as the Talmud and Midrash, modern philosophical texts, Franz Kafka's *The Trial* with his parable "Before The Law," ethnographic accounts of contemporary Jewish observance, and much else. *All readings will be in translation.*

Requirements/Evaluation:  class participation, three short papers, and a final longer paper

Prerequisites:  none

Enrollment Limit:  30

Enrollment Preferences:  Jewish Studies concentrators, Religion majors and students who are considering these options

Expected Class Size:  15

Grading:  yes pass/fail option,  no fifth course option

Distributions:  (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes:  JLST Interdepartmental Electives  JWST Gateway Courses

Not offered current academic year
JWST 201  (F)  The Hebrew Bible

Cross-listings: COMP 201 / REL 201

Secondary Cross-listing

The Hebrew Bible is perhaps the single most influential work in the history of Western philosophy, literature, and art. But the overwhelming presence of the text in nearly every aspect of modern culture often obscures the sheer brilliance of its narrative technique as well as the complex interplay between law, history, prophecy, and poetry. This course offers a comprehensive introduction to the literary, historical, and theological aspects of the Hebrew Bible with an eye towards developing a sophisticated understanding of the text in its ancient context. Through the close reading of substantial portions of the Hebrew Scripture in translation and the application of various modern critical approaches to culture and literature, students will explore fundamental questions about the social, ritual, and philosophical history of ancient Israel, as well as the fundamental power of storytelling that has resonated across two millennia.

Requirements/Evaluation:  Class participation, short written assignments, midterm and final exams.
Prerequisites: none
Enrollment Limit: 40

Enrollment Preferences: If the course is overenrolled, preference will be given to Jewish Studies concentrators and Religion and Comparative Literature majors.

Expected Class Size: 40
Grading: yes pass/fail option, yes fifth course option

JWST 206  (S)  The Book of Job and Joban Literature

Cross-listings:  COMP 206 / REL 206

Secondary Cross-listing

The Book of Job has often been described as the most philosophical book of the Hebrew Bible. The story of one man's struggle to understand the cause of his suffering and his relationship to God represents the finest flowering of the Near Eastern wisdom literature tradition. Through its exploration of fundamental issues concerning human suffering, fate and divinity, and the nature of philosophical self-examination, Job has served as a touchstone for the entire history of existential literature. At the same time, the sheer poetic force of the story has inspired some of the greatest artistic and literary meditations in the Western tradition. This course will engage in a close reading of the Book of Job in its full cultural, religious, and historical context with special attention to its literary, philosophical, and psychological dimensions. We will then proceed to investigate key modern works in several genres that involve Joban motifs, themes, and text both explicitly and implicitly. These texts will include Franz Kafka's The Trial, Archibald MacLeish's J.B., Robert Frost's "Masque of Reason," Carl Jung's Answer to Job, and William Blake's Illustrations to the Book of Job. All readings are in translation.

Requirements/Evaluation: Evaluation will be based on class participation, short written assignments, and midterm and final exams.
Prerequisites: none
Enrollment Limit: 18

Enrollment Preferences: If the course is overenrolled, preference will be given to students who have already taken a course in biblical literature.

Expected Class Size: 18
Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Cross-listings: REL 239 / ARAB 207 / HIST 207 / GBST 102 / LEAD 207

Secondary Cross-listing

This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination.

Requirements/Evaluation: participation, online responses, quizzes, midterm, and final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History & Arabic majors, and Jewish studies concentrators; completion of course admission survey if overenrolled

Expected Class Size: 30-40

JWST 222 (F) The Jewish Art of Interpretation

Cross-listings: REL 222

Secondary Cross-listing

Turn it and turn it, for everything is in it. This famous rabbinic dictum offers an enigmatic yet comprehensive account of the principles that have defined the Jewish practice of interpretation for over two millennia. The imperative to keep a text, word, image, or concept in constant motion, in order to generate as many meanings and cross-meanings as possible, challenges us to transform the act of interpretation itself into a virtuosic craft or art that can engage the human imagination as diversely and powerfully as the creation of the works being interpreted. At the same time, emphasis on the dynamism between text and interpreter should dispel the notion that only expansive works have expansive meanings. If interpretation itself is an art, then even the shortest text can contain "everything" within it when it participates in that art. This course will engage students in a radical experiment in the art of interpretation. Through a deep encounter with a selection of miniature texts, ranging from ancient rabbinic proverbs and medieval fables to the modern parables and fragments of Franz Kafka, as well as folklore and jokelore from every period in Jewish history up to the present, we will develop an interpretive practice that combines analytic, critical, and creative principles in both written and oral contexts. The goal throughout is to explore interactively how the making of meaning is an integral part of the human experience.

Requirements/Evaluation: class participation, regular short written and oral assignments, and a final project

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: If the class is overenrolled, preference will be given to Jewish Studies concentrators and Religion majors.

Expected Class Size: 18
JWST 230  (F)  Modern European Jewish History, 1789-1948

Cross-listings:  HIST 230

Secondary Cross-listing

What does it mean to be Jewish? The question of Jewish identity emerged anew at the end of the eighteenth century in Europe and has dominated Jewish history throughout the modern period. Although Jewish emancipation and citizenship followed different paths in different parts of Europe, in general Jews were confronted by unprecedented opportunities for integration into non-Jewish society and unprecedented challenges to Jewish communal life. Focusing primarily on France and Germany, and to a lesser extent on the Polish lands, this course will introduce students to the major social, cultural, religious, and political transformations that shaped the lives of European Jews from the outbreak of the French Revolution to the aftermath of World War II. We will explore such topics as emancipation, Jewish diversity, the reform of Judaism, competing political ideologies, Jewish-gentile relations, the rise of modern antisemitism, gender roles in Jewish society, interwar Jewish culture, Jewish responses to Nazism and the Holocaust, and the situation of Jews in the immediate post-WWII period. In addition to broad historical treatments, course materials will include exposure to different kinds of primary sources, from philosophical and political treatises, to memoirs, diaries, and fiction.

Class Format:  discussion

Requirements/Evaluation:  class participation, weekly comments on readings, two 6- to 8-page papers, and a final exam

JWST 268  (S) Where are all the Jews? (DPE) (WS)

Cross-listings: COMP 363 / REL 268 / ARAB 363

Secondary Cross-listing

Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance Israélite Universelle's schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews' departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, ethnographies, historiographical works, and anthropological texts alongside documentaries films, the students will understand how literature and film have become a locus in which amnesia about Arab/Berber Jews is actively contested by recreating a bygone world. Resisting both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

Requirements/Evaluation: 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: students interested in critical and comparative literary, religious or historical studies.

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
COMP 363(D1) REL 268(D2) JWST 268(D2) ARAB 363(D1)

Writing Skills Notes: Students are required to present an outline of their papers before submitting a draft paper. The professor will give feedback on each written work to improve students' writing skills. Students are required to incorporate the feedback to improve their drafts before they become final. Students will receive detailed and consistent feedback about their writing. Students will receive from the instructor timely comments on their writing
Difference, Power, and Equity Notes: Students in this course will understand the historical process that lead to the disappearance of Arab/Berber Jews. Students also will work out alternative ways to grasp Jewish-Muslim relations beyond nostalgia and conflict. Finally, students enrolled in the course will grapple with and try to disentangle the complexity of Jewish-Muslim citizenship in both pre-colonial and postcolonial contexts.

JWST 299 (S) Shakespeare’s Torah

Cross-listings: REL 299

Secondary Cross-listing

For readers and speakers of the English language over the past five centuries, no literary body of work has been more central than the writings of William Shakespeare. His plays and poems have shaped the linguistic, philosophical, and artistic representation of human experience in ways that permeate every aspect of our lives. Shakespeare’s capacious work and its central preoccupation with the essential questions of humanity have also inspired an extensive tradition of commentary, interpretation, and performance. In this regard, his work occupies a position similar to the one held by the collection of writings known in the Jewish tradition as Torah. This term refers both to the set of books contained in the Hebrew Bible and to the rabbinic tradition that emerged from reading those books, which in turn has provided the core principles for over two millennia of Jewish interpretive practice. This course invites students to read Shakespeare as Torah by applying the essential features of that practice to his extraordinary work. Through a deep and sustained encounter with four plays in four different genres (Hamlet, Henry IV, Twelfth Night, and The Tempest), we will combine analytic, critical, and creative principles to make meaning in and out of these texts. The goal throughout is to explore how the Jewish art of interpretation can illuminate our experience of Shakespeare’s humanity.

Requirements/Evaluation: class participation, regular short written and oral assignments, and a final project

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: If the class is overenrolled, preference will be given to Jewish Studies concentrations, Religion majors, and students who have taken REL/JWST 222.

JWST 334 (S) Imagining Joseph

Cross-listings: REL 334 / ANTH 334 / COMP 334

Secondary Cross-listing

Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur’an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar’s wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur’an, as well as the more expansive pleasures of linking post-scriptural expressions together.

Requirements/Evaluation: occasional response papers; substantial final project and paper; class participation

Prerequisites: none
Enrollment Limit: 12
Enrollment Preferences: based on responses to a questionnaire
Expected Class Size: 12
Grading: no pass/fail option, yes fifth course option
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:

JWST 430 (S) Postcolonial Reparations: Trauma, History, and Memory after European Imperialism (DPE) (WS)
Cross-listings: HIST 430
Secondary Cross-listing
How have European states responded to calls to acknowledge and atone for the crimes of Empire? This course places recent calls for reparations in a historical context. Weaving together a wide-range of historical and contemporary case studies -- including the Conference on Jewish Material Claims Against Germany (1951), Germany’s official recognition of the Herero Genocide (2021), and ongoing debates in France about the restitution of colonial-era looted art, this course investigates how the language and mechanisms of restorative justice have historically developed, evaluates which past efforts of restorative justice were successful and why, and examines what role historical memory and historians-as-activists should play in campaigns that seek reparations for colonial injustices. In doing so, it evaluates how activists have deployed scholarly vocabularies on memory, justice, and violence in a number of national and international contexts.
Requirements/Evaluation: Class participation, weekly 500-word discussion posts and a 20-page research paper
Prerequisites: None
Enrollment Limit: 15
Enrollment Preferences: History majors, seniors, and then juniors
Expected Class Size: 10-15
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE) (WS)
This course is cross-listed and the prefixes carry the following divisional credit:
HIST 430(D2) JWST 430(D2)
Writing Skills Notes: This is an intensive writing seminar for advanced history majors. We focus on how to write a journal-length piece of original historical research, while evaluating the strengths and weaknesses of other scholarly pieces. Students receive feedback on multiple drafts of their final research papers and participate in two workshop seminars in which they provide feedback on the papers of their peers.
Difference, Power, and Equity Notes: This course asks how contemporary political and social justice movements can -- or ought to -- address political and economic inequities between the Global South and North, introduces students to how questions of race and national belonging have informed contemporary debates on restorative justice, and exposes the persistence of some global and historically-situated inequities.

JWST 433 (F) Colonialism and the Jews (DPE) (WS)
Cross-listings: HIST 433
Secondary Cross-listing
Where are Jews in colonial history? Where is colonialism in Jewish history? In many ways, these questions haunt contemporary Jewish and often world politics. Indeed, in the twenty-first century, the relationship between Jews and colonialism has been present in debates about Zionism, the history of capitalism, Jewish-Muslim relations, the wider Middle East, the future of European identity, the aims and roots of American empire, and the
intersections of race and religion in colonial domination. And yet, typically, the subject of Jews and colonialism is more polemicized or avoided than probed. This course will seek to address this lacunae by introducing students to new historical scholarship that has begun tracing these questions. Students will consider the ways in which imperial legal forms, economic structures, and cultural and intellectual underpinnings shaped Jewish lives from the British antipodes to France North Africa, and throughout the Russian and Ottoman Empires, as well as in metropolitan Europe. Among other issues, we will ask: How did Jews become defined and define themselves in colonial empires? In their various roles in colonial empires, are Jews best understood as subjects or agents of empire or are there more fruitful ways to conceptualize their engagement? What was the impact of anti-colonial struggles on modern Jewish politics and historical development? The course will approach this topic thematically rather than as a comprehensive survey. By introducing students to some of the key debates in this emerging field, we will consider what it takes to construct a successful historical argument and how to engage critically with works in an emerging field. A semester-long writing project will expand students' capacities to pose thoughtful historical questions; conduct research and gather compelling evidence; read deeply and critically; carefully assess evidence; and write inquiry-based essays.

**Requirements/Evaluation:** Class participation; brief weekly writing on the readings; a final research paper written in stages, including two "research updates"; an analysis of a source; a research proposal; a rough draft of one paper section; a rough draft of the paper; and a final 25-page paper.

**Prerequisites:** None; open to all students (however, a background in European history and/or Jewish Studies will be helpful).

**Enrollment Limit:** 15

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

JWST 433(D2) HIST 433(D2)

**Writing Skills Notes:** Before each course, students will submit a 2-3 paragraph critique and a list of 3 questions for discussion. The final assignment will be a research paper (approximately 25 pages) or historiographical essay. Assignments en route to the final deadline, include: 1) two early "research updates" to document process and progress; 2) analysis of a source; 3) research proposal; 4) rough draft of one section; 5) draft of paper; 6) final paper. Only some work will graded, but all will receive feedback.

**Difference, Power, and Equity Notes:** This course considers the complex ways that religion, ethnicity and national identities shaped the colonial and post-colonial world. Never controlling or collectively representing a European power, Jews were also rarely situated at the bottom of any colonial hierarchy, sometimes occupying more than one social or political role in a single colonial territory. This course provides insight into the many ways hierarchies of power could operate in colonial and post-colonial settings.

Not offered current academic year

**JWST 434 (S) Humanitarianism and Jewish History** (WS)

**Cross-listings:** REL 335 / HIST 434

**Secondary Cross-listing**

In the twentieth century, Jewish history and humanitarian history became deeply intertwined. As the victims of persecution and expulsion, mass violence and genocide, Jews repeatedly figured as the recipients of aid and humanitarian intervention. At the same time, Jewish political figures, legal thinkers, intellectuals and scholars, social activists, and aid workers played central roles in the establishment of humanitarian organizations and in debates about the moral, political, and legal frameworks that have shaped approaches to humanitarianism across the decades since World War I. This research seminar is designed to open up big questions about the history of humanitarianism and to carve out space for students to conduct research on a particular place, time, and aspect of that larger history in conversation with other students working on related topics. In the first half of the semester, in discussions of common readings, we will examine various works of scholarship that connect to the history of humanitarianism from the nineteenth century to the present. Beginning in the first half of the semester and with greater intensity in the second half of the semester, you will conduct independent archival research on some aspect of the history of humanitarianism using the digitized archives of the American Jewish Joint Distribution Committee, culminating in a twenty-plus-page paper. In the final weeks of the semester, the seminar will continue to meet weekly as a research colloquium, to provide a forum for you to present your research and drafts in progress and to give feedback on fellow students' work. In this seminar, we are not merely studying history; you are actually doing history. Over the semester, you will learn how to pose historical questions; to engage critically with readings beyond summarizing them; to synthesize an enormous amount of source material; and to learn how to write more clearly. The goal is for each student to produce a polished research paper based on engagement with archival sources and relevant secondary
literature that will serve as a capstone to your coursework at Williams or as a potential jumping-off point for future research projects, including a senior thesis in History or Jewish Studies.

**Requirements/Evaluation:** class participation, several short papers, oral presentations, and a 20-page research paper

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** History majors and Jewish Studies concentrators

**Expected Class Size:** 10

**Grading:** no pass/fail option, yes fifth course option

**Distributions:** (D2) (WS)

**This course is cross-listed and the prefixes carry the following divisional credit:**

JWST 434(D2) REL 335(D2) HIST 434(D2)

**Writing Skills Notes:** Students will write two drafts of their research paper before submitting the final paper for a grade. They will receive timely comments on drafts from professor and peers, to be incorporated into their final paper.

SEM Section: 01 W 7:00 pm - 9:40 pm Alexandra Garbarini

**JWST 492 (S) Modern Jewish Political Theory**

**Cross-listings:** REL 330 / PSCI 375

**Secondary Cross-listing**

By the late 19th century, Jews across Europe were faced with an urgent political problem. Amidst bourgeoning national self-consciousness throughout the continent, despite the liberatory promises of the Enlightenment, Jews remained a vulnerable, segregated, and stigmatized minority population. Jews had to decide where to pin their hopes. Should they ally themselves with the liberals or the communists? Should they embrace nationalism or cosmopolitanism? Should they, perhaps, abandon Europe altogether and re-constitute themselves elsewhere? If so, should they focus their efforts on relocation to the historical land of Israel? Or could they go anywhere? Wherever they might go, should they aspire to build a modern Jewish nation-state, a semi-autonomous Jewish community, or some other arrangement? Should this coincide with the cultivation of a distinctively Jewish modern language? If so, should it be Hebrew or Yiddish? In this course we will assess various answers to these questions proffered by Jewish political thinkers in the modern period. We will pay particular attention to the construction of "Jews" and "Judaism" in these arguments. And we will ask persistently: what constitutes a "Jewish justification" for a political claim in modern Jewish political theory? Coverage will include: Jewish liberalism, political Zionism, Yiddishist autonomism, messianic quietism, and other views. We will read mostly primary sources, including texts by: Hermann Cohen, Theodore Herzl, Chaim Zhitlowsky, Franz Rosenzweig, Leo Strauss, Hannah Arendt, and many others.

**Requirements/Evaluation:** six short (1-2 pages) response papers; two 6- to 8-page papers, each analyzing a different view in depth; a final 18- to 20-page paper that incorporates the two previously submitted 6-8 page papers, but also compares the two views and adjudicates between them

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** Religion majors, Jewish Studies concentrators, and Political Science students on the "Theory" track

**Expected Class Size:** 18

**Grading:** no pass/fail option, no fifth course option

JWST 99 (W) Independent Study: Jewish Studies
Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study
Grading: pass/fail only
Not offered current academic year
Justice and Law Studies is an interdepartmental program designed to give students a background in and framework for understanding the ways that philosophers, government officials, and others think about justice, and the related ways in which societies marshal power and implement law. This liberal arts program provides tools for thinking critically and arguing about what justice might entail, how it works in practice, and how rules, aspirations, laws, and norms evolve over time and in different parts of the world.

THE CONCENTRATION

The concentration in Justice and Law Studies consists of six courses: an interdisciplinary introductory course, four electives taken from at least two departments, and a senior seminar. Electives are listed below. Other courses, not listed below, may be approved by the Chair. Students may declare a program concentration at any point during their academic career.

Senior Seminar

In 2018-19, the senior seminar will be *The Unwritten Constitution* taught by Professor Hirsch.

STUDY ABROAD
Students who study abroad should consult with the program chair to ensure that they can complete the requirements. Courses abroad may qualify as JLST electives if appropriate.

JLST 272 (S) Free Will and Responsibility (WS)
Cross-listings: PHIL 272
Secondary Cross-listing

Our practice of holding people responsible seems justified as long as their choices are free. But when does a choice qualify as free? We're all deeply influenced by factors ranging from the general laws of nature to specific features of our genetic endowment and social environment (including religion, political ideology, and advertising). These affect not only our particular choices but also, more fundamentally, who we are and what we value. The key question, then, is whether, and how, agency is possible amidst all of these influences. We'll attempt to answer this question by examining recent philosophical work on the nature of free will and responsibility.

Requirements/Evaluation: Six tutorial papers (5-6 pages in length) and five critiques (2-3 pages in length)
Prerequisites: one PHIL course (or permission of instructor; please email with any questions)
Enrollment Limit: 10
Enrollment Preferences: current and prospective Philosophy majors
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
PHIL 272(D2) JLST 272(D2)

Writing Skills Notes: Students will write a tutorial paper (5-6 pages in length) every other week, and a peer critique (2-3 pages in length) in alternating weeks, evenly spaced throughout the semester. The instructor will provide timely comments on writing skills, with suggestions for improvement.

JLST 433 (S) Senior Seminar: Dignity
Cross-listings: PSCI 433
Secondary Cross-listing
Discredited over the centuries by skeptics of many ideological persuasions, dignity has nevertheless remained central to the vocabulary of political protest movements from the left and the right. In the post-WWII period, dignity has also served as the grounding principle for international human rights conventions and national constitutions. But what is the meaning of dignity? Does dignity belong specifically to the human species, or is it equally the property of all living beings? If everybody, or perhaps everything, has its own dignity, what could the concept possibly add to our understanding of social relations, political processes, and legal judgments? Course readings will be as wide-ranging as the concept is broad. Some of our touchstones will be: Kant's moral philosophy, writings from the nineteenth-century abolitionist movement, Marxist theories of the dignity of labor, international human rights conventions, and court cases from Germany, Namibia, South Africa and the United States.

Requirements/Evaluation: Regular class participation, short (1 pg) response papers, and drafts leading up to a 15-page final essay.
Prerequisites: Junior or senior standing required; in addition, JLST concentration or prior coursework in political theory/cultural theory/philosophy.
Enrollment Limit: 12
Enrollment Preferences: Senior political science majors with concentration in political theory; JLST concentrators.
Expected Class Size: 12
Grading: no pass/fail option, no fifth course option
Unit Notes: Justice & Law Studies Senior Seminar
Distributions: (D2)
This course is cross-listed and the prefixes carry the following divisional credit:

CLASSICS (Div I)

LATIN

Chair: Professor Amanda Wilcox

- Nicole G. Brown, Associate Professor of Classics
- Edan Dekel, Garfield Professor of Ancient Languages, Chair of Jewish Studies Program; affiliated with: Classics, Religion
- Marissa A. Henry, Visiting Assistant Professor of Classics
- Sarah E. Olsen, Associate Professor of Classics
- Felipe Soza, Assistant Professor of Classics
- Amanda R. Wilcox, Chair and Professor of Classics

The course offerings in Classics enable students to explore the ancient Greek, Roman, and Mediterranean worlds from various perspectives, including literature, history, art, archaeology, philosophy, and religion. Courses are of two types: language (Greek and Latin) and courses in which all the readings are in English translation (Classical Studies). The 100-level language courses are intensive introductions to Greek and Latin grammar and reading skills; the 200-level language courses combine grammar review with primary readings from Greek or Latin texts of key historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Classical Studies courses offer introductions to and more specialized study of the literature, visual and material culture, history, and other aspects of the Greek and Roman worlds.

MAJOR

Majors and prospective majors are encouraged to consult with the department’s faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course in ancient history is strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for advanced study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Route A emphasizes more coursework in Greek and Latin, while Route B emphasizes more Classical Studies courses.

**Route A:**
1. Six courses in Greek and/or Latin, with at least two 400-level courses in one language.
2. Three additional courses from the offerings in Greek, Latin, or Classical Studies or from approved courses in other departments and programs.

**Route B:**
1. One course each from any two of the following categories: literature (CLAS 101 or CLAS 102); visual and material culture (CLAS 209 or CLAS 210); history (CLAS 222 or CLAS 223).
2. Four courses in Greek or Latin with at least one at the 400-level, or the four-course sequence CLLA 101, 102, 201, and 302.
3. Three additional courses from the offerings in Classical Studies or from approved courses in other departments and programs.

**Classics Colloquium:** All Classics majors in residence are expected to participate fully in the life of the department through attendance at lectures and other departmental events.

**THE DEGREE WITH HONORS IN CLASSICS**

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

**COURSE NUMBERING SYSTEM**

**Language Courses:** The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of Greek and Latin literature. Students may enter the rotation at 100-level, 200-level, or 300-level, depending on previous experience.
Classical Studies Courses: The numbering of these courses does not reflect a strict sequence, and most of them do not assume prior experience in Classics or a cross-listed field. The following pairs of courses offer excellent introductions to key areas of study within Classics: CLAS 101 and 102 (literature), CLAS 209, 210 (visual and material culture), CLAS 222, 223 (history).

STUDY AWAY
We strongly encourage Classics majors to study away in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Mediterranean world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department’s faculty are always available to advise students, the chair has materials to share, and students can visit the department’s website for information and links to helpful sites. Majors who are considering studying away should especially consult with faculty members about the implications for language study.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in some cases, if appropriate course information is available in advance (e.g., syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
No, but students should consult with the department about language sequences.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

CLLA 101 (F) Introduction to Latin
This is a full-year course on the fundamentals of the Latin language. We focus throughout on learning grammar and vocabulary, and we regularly incorporate selections from literature, inscriptions, and other sources. Over time, we gradually increase the emphasis on reading selections from Latin poetry (e.g., Ovid's *Metamorphoses*) and prose (e.g., Piny's *Letters*).

Requirements/Evaluation: frequent quizzes, classroom exercises, two midterms, a final project
Prerequisites: none; this course is designed for the student with no previous preparation in Latin or with only a little Latin who wishes a refresher; students with some previous experience in Latin may want to enroll in CLLA 102 only (consult the department)
Enrollment Limit: 15
Enrollment Preferences: Classics majors or intended Classics majors, first years and sophomores
Expected Class Size: 8-10
Grading:  yes pass/fail option,     yes fifth course option
Unit Notes: credit granted only if both semesters (CLLA 101 and 102) are taken
Distributions: (D1)

Fall 2024
LEC Section: 01    MWF 11:00 am - 12:15 pm     Marissa A. Henry

CLLA 102  (S) Introduction to Latin
This is a full-year course on the fundamentals of the Latin language. We focus throughout on learning grammar and vocabulary, and we regularly incorporate selections from literature, inscriptions, and other sources. Over time, we gradually increase the emphasis on reading selections from Latin poetry (e.g., Ovid’s *Metamorphoses*) and prose (e.g., Piny’s *Letters*).
Class Format: recitation/discussion
Requirements/Evaluation: attendance and participation, frequent quizzes, tests, classroom exercises, and a final exam
Prerequisites: CLLA 101 or permission of department
Enrollment Limit:  18
Enrollment Preferences:  Students who have completed CLLA 101
Expected Class Size:  10-12
Grading:  yes pass/fail option,     yes fifth course option
Unit Notes: credit granted only if both semesters (CLLA 101 and 102) are taken
Distributions: (D1)

Spring 2025
LEC Section: 01    MWF 11:00 am - 12:15 pm     Nicole G. Brown

CLLA 201  (F) Intermediate Latin: The Late Republic
This course aims to strengthen skills gained in previous study. In order to develop greater fluency and familiarity with classical Latin, we will read, translate, and analyze Cicero’s *Pro Caelio* and selected short poems of Catullus. Both authors are brilliant stylists, though each writes in a very different mode. Taken together, these texts offer an excellent introduction to the expressive capacity of Latin in prose and verse. They also open up intriguing overlapping perspectives on the social, sexual, and political mores of late Republican Rome. We will consider the cultural context and implications of these texts as time permits.
Requirements/Evaluation: Engaged participation in class, occasional quizzes and short written assignments, a midterm and final exam
Prerequisites:  CLLA 101-102 or 3-4 years of Latin in secondary school; consult the department
Enrollment Limit:  12
Enrollment Preferences:  Classics majors and prospective majors
Expected Class Size:  10
Grading:  yes pass/fail option,     yes fifth course option
Distributions: (D1)

Fall 2024
SEM Section: 01    MWF 10:00 am - 10:50 am     Marissa A. Henry

CLLA 302  (S) Vergil’s Aeneid
This course is a comprehensive introduction to Vergil’s *Aeneid*. Students will develop their ability to read and translate the Latin text of the poem, while at the same time exploring the major interpretive issues surrounding the definitive Roman epic. Through a combination of close reading and large-scale analysis, we will investigate the poem’s literary, social, and political dimensions with special attention to Vergil’s consummate poetic craftsmanship.
CLLA 405  (S)  Livy and Tacitus: Myth, History and Morality in Ancient Rome

We will begin the semester in mythical Rome by reading selections from Book 1 of Livy's history in which Roman values, practices and institutions are given their origin stories, and the mythical figures of Rome's past are established as moral exempla for Rome's present. We will examine how Livy deploys the storyteller's art to excite his readers' pathos, indignation and sympathy; we will examine as well how he constructs Rome's past through the filter of his own Augustan present. Writing more than a century after Livy, Tacitus offers a different and jaded view of Augustus and his legacy, one conditioned by his own experiences living through the terrors of the reign of Domitian. His compressed and fastidious prose is the vehicle for complex and gripping accounts of imperial scandals and tragedies as well as of individual acts of heroism and nobility. We will read primarily selections from Tacitus' Annals as well as selections from either his Germania or Agricola.

Class Format: discussion
Requirements/Evaluation: Evaluation will be based on class preparation and participation, an 8- to 10-page paper, a midterm, and a final exam
Prerequisites: CLLA 302 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: Classics majors
Expected Class Size: 6-8
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

CLLA 406  (F)  Horace's Odes

This course will explore the poetic delights of Horace's extraordinary experiment in crafting Latin personal verse using Greek lyric forms. We will immerse ourselves in the poems' intricate construction and examine how they engage such themes as love and friendship, landscape and memory, youth and old age, politics, and morality. At the same time, we will consider the variety of voices and perspectives within the poems and their complex relationship both to Greek and Latin poetic traditions and to Horace's own contemporary world. The goal throughout is to investigate the literary, social, political, and philosophical dimensions of the odes, as well as their consummate poetic artistry.

Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam
Prerequisites: CLLA 302 or permission of instructor
Enrollment Limit: 15
Enrollment Preferences: Classics majors
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

Not offered current academic year

CLLA 409  (F)  Seneca and the Self

Requirements/Evaluation: Class participation, a midterm exam, a final paper, and a final exam.
Prerequisites: CLLA 201 or permission of instructor
Enrollment Limit: 12
Enrollment Preferences: If the course is overenrolled, preference will be given to Classics majors and prospective majors.
Expected Class Size: 10
Grading: yes pass/fail option, yes fifth course option
Distributions: (D1)

Not offered current academic year

CLLA 405  (S)  Livy and Tacitus: Myth, History and Morality in Ancient Rome

Spring 2025
SEM Section: 01  TF 2:35 pm - 3:50 pm  Edan Dekel
This course considers ethical and literary dimensions of self-fashioning, self-examination, and the conception of selfhood in the Stoic philosophy of the younger Seneca through close reading of extensive selections from his philosophical works and tragedies. The focus of this course lies squarely in the first century CE and on the analysis of Seneca’s own texts. We begin, however, with an introduction to the ethics of Roman Stoicism through the personae theory of Panaetius as transmitted by Cicero’s De Officiis. Moreover, we will read and discuss reflections on selfhood from some of Seneca’s most famous philosophical and literary heirs, including Montaigne, Emerson, and Foucault, both to enrich our understanding of his work and to gain an appreciation of his considerable influence on later writing about the self.

Requirements/Evaluation: class participation, several short written and oral assignments, midterm and final exams, and a final paper

Prerequisites: CLLA 302 or permission of instructor

Enrollment Limit: 12

Expected Class Size: 5-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLLA 411 (S) Advanced Latin: Apuleius

In this class, we will study Apuleius’ hilarious and disturbing Latin novel, Metamorphoses or The Golden Ass. This work explores the themes of curiosity, witchcraft, transformation, animality, and religious conversion through the figure of Lucius, a man who accidentally turns himself into a donkey and remains trapped in this body through various trials and adventures. We will translate the famous inset narrative of “Cupid and Psyche,” as well as reading the entire work in English. Our time in class will be spent translating together and discussing readings, which will also include selections from contemporary scholarship and a modern novel inspired by this narrative, C.S. Lewis’ Till We Have Faces. As the final component, students will complete a creative project consisting of their own creative work in any medium inspired by the novel and a commentary that engages closely with the Latin text.

Requirements/Evaluation: class participation; periodic translation quizzes; two short writing assignments; final creative project

Prerequisites: CLLA 302 or instructor permission

Enrollment Limit: 15

Enrollment Preferences: Classics majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2025

SEM Section: 01 TF 2:35 pm - 3:50 pm  Marissa A. Henry

CLLA 414 (F) Vergil’s Eclogues and Georgics

This course will explore the two major works of Vergil that precede the Aeneid: the Eclogues, a series of ten pastoral poems that range widely across personal, political, and mythological themes; and the Georgics, a longer didactic poem in four books that uses an agricultural framework to examine issues of life, death, power, suffering, and love. The goal throughout is to investigate the literary, political, and social dimensions of the poems with special attention to their relationship to earlier models, as well as their exquisite poetic craftsmanship

Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam

Prerequisites: CLLA 302 or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Classics majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)
CLLA 422 (S) Crete in the Ancient Roman Imagination

Appeals to origins “long ago” and “far away” occur as a basis for positive cultural claims in ancient literature, but also function to banish or contain taboo desires and practices by placing them safely beyond the limits of civilized time and place. For the Romans, the island of Crete fulfilled both these roles. In this course, we will explore the representation of Crete and Cretans in several authors and genres, with special attention to Catullus 64 and Ovid’s *Metamorphoses*. We will consider how representations of Crete helped our authors navigate perennial tensions at Rome between philhellenism and xenophobia and attend to the complex play of poetic intertextuality among Roman texts as well as their intimate engagement with Greek predecessors. Moreover, to complement our literary investigation, students will gain familiarity with the history of Roman rule on the island from its establishment as a province in 67 BCE through late antiquity, and will consider vestiges of the Roman imperial presence that endured much longer. Students will research Roman activity on Crete with an emphasis on material culture as well as written sources. All students enrolled in this course will have the option of participating in a short-term travel course to Crete in May, conducted in collaboration with CLGR 422.

Requirements/Evaluation: class participation, translation quizzes and exams, occasional short writing assignments, seminar paper and presentation

Prerequisites: CLLA 302

Enrollment Limit: 10

Enrollment Preferences: Classics majors and intending majors

Expected Class Size: 6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

Winter Study

CLLA 99 (W) Independent Study: Latin

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Not offered current academic year
Latina and Latino Studies is an interdisciplinary, comparative, and relational field of study that examines the histories, representations, and experiences of Latinas, Latinos, and Latinxs in the United States. Latinas, Latinos, and Latinxs include peoples who come from or whose ancestors come from Latin America and the Spanish-speaking Caribbean. The program seeks to cover the widest range of experiences, encompassing Mexican-Americans, Puerto Ricans, Cubans, and Dominicans, as well as migrations from a wide variety of Central and South American countries. Courses, most of which use a comparative and relational approach, seek to provide students with the tools to continue their work in areas of their particular interest. Focusing on a diverse group with a long history in the United States, which is also one of the fastest-growing populations in the contemporary era, provides an opportunity to study complex dynamics globally and within the context of the United States. The program examines topics such as the political and economic causes of migration, the impact of globalization, economic incorporation, racialization, the formation and reformulations of identities and communities, religious and spiritual practices, the uses of urban spaces, inter-ethnic relations, artistic expression, aesthetics, and visual and popular culture.

THE CONCENTRATION

The concentration in Latina/o Studies requires five courses. Students are required to take the introductory course (LATS 105), one 400-level Latina/o Studies seminar, and three electives. Two electives must be core electives, and one elective can be a related course in Comparative Race and Ethnic Studies or in Countries of Origin and Transnationalism. The three electives must include two different areas of study, and at least one elective must be at the 300 or 400 level. Additional courses may be approved by the Chair. Students, especially those considering graduate work or professional careers in the field, are encouraged to enroll in Spanish language courses at Williams.

Required course:

One of the following 400-level seminars:

HIST 470 / LATS 470 / WGSS 470 SEM Latinx Migrations: Stories and Histories
Taught by: Carmen Whalen
[Catalog details](#)

LATS 410 SEM Arquivistas: An Archival Storytelling Course
Taught by: Nelly Rosario

One additional related course from either of the following subcategories OR from the core electives above:

Countries of Origin and Transnationalism

**ARTH 210(S) LEC Intro to Latin American and Latinx Art: Contradictions & Continuities: Postcolonial to the Present**
Taught by: **Mari Rodríguez Binnie**

**ENGL 104 SEM Borders, Migration, and the Literatures of Displacement**
Taught by: **TBA**

**ENGL 273 SEM Introduction to Latinx Literature: From 'I Am Joaquín' to Borderless-Future Dreams**
Taught by: **TBA**

**HIST 143 SEM Soccer and History in Latin America: Making the Beautiful Game**
Taught by: **Roger Kittleson**

**HIST 347 SEM Democracy and Dictatorship in Latin America**
Taught by: **Roger Kittleson**

**PSCI 349 TUT Cuba and the United States**
Taught by: **James Mahon**

**RLSP 231 SEM Indigenous Writers of Colonial Mexico and Peru**
Taught by: **Carlos Macías Prieto**

**RLSP 342 SEM Reading Sor Juana: "única poetisa americana, musa décima,"**
Taught by: **Carlos Macías Prieto**

Comparative Race and Ethnic Studies

Students can check with the program chair to see if other courses not listed here might count as electives.

**AFR 200(F, S) LEC Introduction to Africana Studies**
Taught by: **Armond Towns**

**LATS 254 / AS 253 / AMST 253 SEM Embodied Knowledges: Latinx, Asian American, and Black American Writing on Invisible Disability**
Taught by: **Maria Elena Cepeda**

**WGSS 347 / SOC 340 / LATS 341 / THEA 341 / AMST 358 SEM Performing Masculinity in Global Popular Culture**
Taught by: **TBA**

**HONORS**

The Honors Program in Latina/o/x Studies provides a wonderful opportunity for students to explore an area of interest to them in depth. Students work closely with their advisor and two readers to produce a substantial piece of scholarship or another form of presentation (e.g., video, art, theater) in the interdisciplinary field of Latina/o/x Studies. The thesis program provides students with the maximum flexibility to pursue their interests, including a component of original research, interpretations, and/or creative dimensions, while assuring the rigorous standards of excellence required to receive Honors at the successful completion of their project. The final project, completed over one semester and winter study, may be a research thesis of forty to sixty pages, or another form of presentation, or a combination of writing and another medium.
Honors in Latina/o Studies may be granted to concentrators after an approved candidate completes an honors project, delivers a public presentation of the work, and is awarded an honors grade by the Latinx Studies faculty. In consultation with the advisor and the chair, faculty readers may be from outside the Latina/o Studies Program.

Eligibility:
- Declared Latina/o/x Studies concentrator
- Sufficient Latina/o/x Studies courses, and a grade point average, generally, of 3.3 or higher in LATS courses
- Approval of project proposal by the Latinx Studies faculty in the spring of Junior year
- The honors course and winter study are in addition to the five courses required for the concentration

Application:
- Juniors must submit a thesis proposal to the current chairperson, Professor Carmen Whalen, on Wednesday, April 24, 2024 by 4:00 pm EDT.
- Students should meet with their potential advisor(s) to discuss a draft of their proposal no later than a week prior to the proposal due date.
- The proposal should include the project's aims and methodology, demonstrating what you already know, what you hope to learn, and why it is important. We encourage projects that build on the Latinx Studies seminars or other courses. Your proposal should also include evidence of competence in any relevant media, and indicate which faculty member(s) you have discussed your proposal with and whether you are planning to do your thesis in the fall or spring semester.
- The proposal should be no longer than 5 pages plus a bibliography.

Process and Timeline:
- After your proposal is approved and your advisor assigned, the student should meet with their advisor to discuss your research plan for the summer. You will begin your project over the summer.
- During the first two weeks of the fall semester, all thesis students will submit to the Chair of the Latinx Studies program and to their advisor a 5-8 page summer research report plus an annotated bibliography that reflects the scope of their thesis project.
- For a thesis during the fall semester, a draft of approximately half of the written thesis or equivalent is due to your advisor and readers no later than the beginning of Thanksgiving break.
- For a thesis during the spring semester, a draft of approximately half of the written thesis or equivalent is due to your advisor and readers no later than the second week of the spring semester.
- Additional deadlines are set by your advisor, and your readers may request to see additional work from you.
- The final thesis is due to your advisor and readers at least one full week prior to your oral presentation, the date for which is set early in the semester.
- Acceptance into the Honors program does not mean that a student will receive Honors; this is not automatic. On-going communication with the advisor and readers and meeting all set deadlines is critical. Whether or not to award honors, as well as semester and winter study grades, are determined by the Latina/o/x Studies Program faculty, and includes the advisor and the two readers. A project that does not meet the requirements for Honors is converted into an Independent Study and graded accordingly.
- Students are responsible for meeting the College deadlines and procedures for the submission of your thesis—these are on the Library web page.

FAQ
- Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.
- Can your department or program typically pre-approve courses for major/concentration credit?
  Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.
- What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
  Course title and description. Although syllabus and description, including readings and assignments, would be preferable.
- Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
Yes. 1 of 5 for the concentration and can only count as an elective.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Requirements that cannot be fulfilled: Intro Course, Senior Seminar, 2 Core Electives.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

LATS 105  (F)  Latina/o Identities: Constructions, Contestations, and Expressions

What, or who, is a Hispanic or Latina/o/x? How have these shifting terms tried to encompass the identities and experiences of such large and diverse groups of peoples? In this course, we focus on the complex nature of “identity,” as we delve into the interdisciplinary field that has emerged to give voice to groups that were too often excluded from or misrepresented in academic disciplines and discourses. Viewing identities as historically and socially constructed, we assess how racial, ethnic, class, and gendered identities take shape within specific contexts in the Hispanic Caribbean and Latin America, as well as in the United States. We examine the impact of (im)migration and the rearticulation of identities in the United States, as we consider that each group has a unique history, settlement pattern, community formation, and transnational activities. Identity is also a contested terrain. As immigrants and migrants arrive, the United States’ policymakers, the media, and others seek to define the “newcomers” along with long-term Latina/o citizens. At the same time, Latinas/os rearticulate, live, assert, and express their own sense of identity. We examine these diverse expressions as they relate to questions of class, race, ethnicity, gender, sexual orientation, and national origins.

Class Format: This is a discussion based course.

Requirements/Evaluation: participation and several short papers (1-5 pages) throughout the semester

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Latina/o Studies concentrators or those intending to become concentrators.

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Unit Notes: This is a required course for concentration in Latina/o Studies

Distributions: (D2)

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora  LATS Core Electives

LATS 115  (F)  Latina Feminist Spiritualities (DPE) (WS)

Cross-listings: WGSS 115 / REL 115

Primary Cross-listing

Self-proclaimed feminist activists, who hail from a variety of ethnic Latina/o/x/e (Latine) backgrounds, have often appealed to "ancestral" and "spiritual traditions" as integral to their activism and commitments. Some Latine feminists turned to "spiritual" traditions including brujería/witchcraft; curanderismo and indigenous healing traditions; Santería/Lukumi and other AfroDiasporic traditions; astrology; home altars; various "mystical" traditions such as Kabbalah and Sufism, as well as Christian mystics like Teresa of Avila or Sor Juana Inés de la Cruz. Others have turned to the appropriation of "Eastern" traditions such as yoga, Tibetan Buddhism, and Zen Buddhism. This course engages students in an intensive introduction to some of the varieties of Latine feminist thought and contexts, including how activists, writers, and artists think about women, gender, sexuality, race,
class, colonialism, the earth, healing, and a better world. How do these feminists of different Latine backgrounds and contexts imagine a better world? How and why do they appeal to spiritual traditions as a source of wisdom, healing, and lived practice for a better world? In this course, we seek to understand both particular Latine feminist spiritual practices on their own terms, as well as why such writers and activists appeal to "the spiritual" in Latine contexts. We will also consider how they frame notions of "the spiritual" in relationship to notions of "the religious" and "the secular."

**Requirements/Evaluation:** Grading is based on 5-6 page papers written on alternating weeks and brief 1-2 page response papers shared on alternating weeks as well as participation and two paper revisions.

**Prerequisites:** None

**Enrollment Limit:** 10

**Enrollment Preferences:** Latina/o Studies concentrators, religion majors, first-year students interested in Latina/o Studies and/or religion

**Expected Class Size:** 10

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 115(D2) LATS 115(D2) REL 115(D2)

**Writing Skills Notes:** Grading is based on alternating weeks writing a lead paper and other weeks writing a brief response paper. This course will require students to write regularly and revise two of their lead papers for grades.

**Difference, Power, and Equity Notes:** This course examines how Latine feminists have responded to a variety of differential power inequities, especially in terms of gender, sexuality, race, ethnicity, language, and class. It also considers the ways they have imagined better and more equitable worlds, and with what consequences they have done so.

**Attributes:** LATS Core Electives

Not offered current academic year

---

**LATS 205 (F) Latinx Visual Arts**

**Cross-listings:** AMST 209 / ARTH 201

**Primary Cross-listing**

This course introduces students to Latinx visual arts and the histories of the communities from where this artistic production emerges. Latinx art and artists have gained significant attention and inclusion in the art world. For example, the opening of the Cheech Marin Center for Chicano Art and Culture reignited interest in Chicana/o art and revamped pressure on peer institutions to diversify their collections, exhibitions, and programming. While this renewed interest is positive, this context runs the risk of framing Latinx art as a new and emergent category, thus dismissing a longer history of visual arts within Latinx communities across the U.S. This course offers an historically grounded introduction to Latinx visual art by placing the artistic production for the groups included under the label "Latinx" in their social, political and historical contexts. The course provides students with the visual arts vocabulary and theoretical skills to analyze visual art forms including sculptures, murals, posters, performances, and altares, while exploring their relevance to Latinx communities and American art. In debunking the notion of Latinx art as a new phenomenon, students will understand the conditions, struggles, and modes of resistance that inspire Latinx visual arts production in the U.S. since the 19th century and into our contemporary moment. Students will deepen their visual art literacy, enrich their understanding of the histories encapsulated by the term "Latinx," and develop their appreciation for the visual arts.

**Requirements/Evaluation:** Discussion participation, weekly reading responses, two 3-6-page essays, and a final 8-10 page paper.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** Latina/o Studies concentrators and Art majors

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

---

**LATS 219** (F) **Religion in Latinx Literature, Art & Film**

**Cross-listings:** REL 215

**Primary Cross-listing**

LATS 219--Religion in Latinx Literature, Art & Film This course will examine how a selective range of US Latinx writers, artists, and filmmakers—particularly in fiction, memoir, visual arts and films by and about Latinidad—depict, describe, and discuss religious themes, broadly considered. Latinx-authored novels and memoirs, artwork by Latina/o/x visual artists, and films depicting Latinx life through the lens of Latinx film-makers will be read, viewed, and studied to facilitate discussion about what it means to be Latina/o/x and religious. How do fictional, autobiographical and artistic depictions of Latinx people, communities, and their religiosity/spiritualities promote or deter understanding of Latinidad in the U.S.A.?

**Requirements/Evaluation:** In this course, students will read and write short essays about novels and/or memoirs (4-5 pages), critically analyze film and artwork in short papers (3-4 pages), and write a research paper (8-10 pages) that analyzes the nexus of Latinx religion and art, whether fiction, film, memoir, or the visual arts. Attendance, participation, Glow discussion forums, and written assignments will all constitute assessment tools for this course.

**Prerequisites:** No prerequisites.

**Enrollment Limit:** 20

**Enrollment Preferences:** Students with at least one prior LATS or Religion course will be given preference if an enrollment overload. Also sophomores, juniors, and seniors will be given preference over first year students.

**Expected Class Size:** 15-20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

LATS 219(D2) REL 215(D2)

LATS 224  (S)  U.S. Latinx Religions  
Cross-listings:  AMST 224 / REL 224  

Primary Cross-listing  
In this course, we will engage aspects of Latina/o/x/e religious beliefs, experiences, practices, and expressions in the United States of America. Given the diversity of Latinx communities and religious lives in the U.S.A., we consider select contexts that help us understand the challenges of studying and defining the "religious" and its hybridity in Latinx contexts. We will survey certain selected religious traditions and practices in Latinidad -- such as popular devotions to La Virgen de Guadalupe, healing traditions and curanderismo, home altar traditions, Latinx Pentecostalism, crypto-Judaism, Latinx Muslims, and African-rooted spiritualities such as Santería. In addition, we will study Latinx approaches to traditional US religious expressions of Roman Catholicism and Protestantism. By focusing on particular moments of religious expression as elucidated in specific historiographies, ethnographies, art, literature, film, we will seek to garner a greater understanding of how Latinx communities express and practice their religious traditions and spiritualities.  
Class Format:  discussion  
Requirements/Evaluation:  class participation, discussion forum posts, a 3-4 short essay on the nature of Latinx spirituality; a 5-page essay on a religious tradition previously unfamiliar to the student, and an 8-10-page final research paper doing comparative religious study.  
Prerequisites:  none  
Enrollment Limit:  25  
Enrollment Preferences:  LATS concentrators and AMST and REL majors  
Expected Class Size:  15-20  
Grading:  yes pass/fail option,  yes fifth course option  
Distributions:  (D2)

**LATS 230 (S) Cities, Suburbs, and Rural Places  (DPE)**

**Cross-listings:** ENVI 257 / AMST 247

**Primary Cross-listing**

Long associated with cities in the scholarly and popular imagination, transnational migrants have increasingly settled in U.S. suburbs and rural localities and have made these places home. Through the lens of new destinations for im/migrants, this course introduces spatial methods, perspectives, and concepts to understand cities, suburbs, and rural places. We ask how geographically specific forces and actors shape migrants’ living conditions, as well as consider the spatially uneven outcomes of complex processes like globalization. We analyze how different actors discursively and materially demarcate who belongs and who does not, and how these boundaries shape migrants’ everyday practices. This interdisciplinary course highlights the legal, economic, political, environmental, social, and cultural dimensions of how transnational migrants become part of and create homes in new destinations. Through a range of textual materials (academic, literary, popular, visual), we explore the construction of landscapes, how people shape space at local and regional scales, and where people do life's work and come together to build cultural space. Rooted in critical race geographies, case studies are comparative across different racial and ethnic groups in the U.S. West, South, Midwest, and Northeast. This course will be mostly discussion-based, grading based on participation, short writing exercises, four assignments, and a final project.

**Class Format:** This is also a discussion course. While I will spend some time at the beginning of the class lecturing, most of the time will be spent in class discussions.

**Requirements/Evaluation:** Grading based on participation, short writing exercises, four assignments, and a final project. All writing materials and exams are based on coursework.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** LATS concentrators or those intending to become LATS concentrators

**Expected Class Size:** 25

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2)  (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENVI 257(D2) AMST 247(D2) LATS 230(D2)

**Difference, Power, and Equity Notes:** Students examine how race, gender, sexuality, class, and documentation status also impact how immigrants 'transition' to new migration destinations. We consider how the exercise of unequal power affects migration, settlement, and place-making. Students analyze representations and demographic data to determine how people are portrayed and what their material conditions are.

**LATS 232 (S) We the People in the Stacks: Democracy and Literatures of Archives  (DPE)**

**Cross-listings:** ENGL 232

**Primary Cross-listing**

"Archives have never been neutral they are the creation of human beings, who have politics in their nature. Centering the goals of liberation is at the heart of the issue" (Jarrett Drake, former digital archivist at Mudd Manuscript Library, Princeton University). In this generative writing and critical-practice course, students examine the concept of archives through the lens of democratic ideals. A primary focus is on how Latinidades and works of Global South literatures engage archives--their creation and deletions, their contents and omissions, their revelations and concealments.
Drawing from the values explored in class, students have opportunities to contribute to existing archival collections and/or to curate their own.

**Requirements/Evaluation:** attendance and class participation, short writing exercises, midterm project, final creative project

**Prerequisites:** none

**Enrollment Limit:** 15

**Enrollment Preferences:** LATS concentrators

**Expected Class Size:** 12-15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (DPE)

**This course is cross-listed and the prefixes carry the following divisional credit:**

ENGL 232(D1) LATS 232(D2)

**Difference, Power, and Equity Notes:** This course examines the relationship between archives and power—creation and deletion, contents and omissions, revelations and concealments—taking into account the diverse affective roles and responsibilities of the archivist, records creator, records subject, and to community engagement.

**LATS 240 (S) Latinx Language Politics: Hybrid Voices**

**Cross-listings:** AMST 240 / COMP 210

**Primary Cross-listing**

In this interdisciplinary course we focus on questions of language and identity in the contemporary cultural production and lived experience of various Latinx communities. We consider the following questions and more: In what ways does Spanish shift as it crosses over to the US from Latin America and the Caribbean? How does Latinx identity challenge traditional notions of the relationship between language, culture, and nation? How does careful attention to language elucidate the dynamics of gender and sexuality in the Latinx community? How are cultural values and material conditions expressed through Latinx linguistic practices? In what ways might Latinx literary and linguistic practices serve as tools for social change? Departing from an overview of common linguistic ideologies, we will examine code-switching or Spanglish, bilingual education, linguistic public policy, the English Only movement, and Latinx linguistic attitudes and creative responses to linguistic colonialism. In addition to a consideration of language and identity grounded in sociolinguistics, anthropolitical linguistics, Latinx studies, and cultural studies, we will survey a variety of literary genres including memoir, novel, and poetry. Both directly and/or indirectly, these texts address Latinx language politics, as well as the broader themes of power, difference, and hybridity.

**Requirements/Evaluation:** participation, two essays, final written reflection

**Prerequisites:** none

**Enrollment Limit:** 12

**Enrollment Preferences:** Latina/o Studies concentrators, then American Studies majors and Comparative Literature majors by seniority

**LATS 253 (S) Religion and Politics in Puerto Rico, Cuba and the Diaspora**

**Cross-listings:** REL 292

**Primary Cross-listing**
This course analyzes the role of religion in Caribbean history and politics, with a focus on Puerto Rico and Cuba. These Caribbean Islands have lived out contested colonized histories and experiences, as well as diasporic realities in several key US communities, such as New York City and Miami. Since 1898, the US government and military have played a significant role in both Islands, forcibly shaping their economies and politics. Religion, particularly the Protestant missionary enterprise after the US invasions in 1898, has also shaped histories and politics on the islands and throughout their diasporas. We will analyze the role and impact of Protestant religion in these historically indigenous, African descendant, and Roman Catholic religious spaces, as well as how these religious engagements and theologies impacted migration and the creation of diasporic communities in the US. Both the role of religion in the imperialist endeavor and in the solidarity movements that responded will occupy our time in this course, with special attention to key figures in both sides of such efforts. With some enhanced understanding of the intertwining of religion and politics in Puerto Rico, Cuba and their diasporic communities, participants in this class will also consider implications for other Caribbean nations, such as the Dominican Republic, as well as, selectively, Latin American countries that have experienced US interventions and the creation of diasporic communities.

Class Format: This course will follow a lecture-discussion format, in which students are expected to come to class prepared to address the assigned readings, to have completed short assignments in preparation for discussions, to make presentations to the class, and/or to lead discussions.

Requirements/Evaluation: Evaluation in this course will be based on class participation, online discussion forum posts based on readings, two short 5-6 page essays on an aspect of Puerto Rican or Cuban political/religious reality discussed in class, and a final 8-10 page research essay on a theme in the course agreed upon by student and professor.

Prerequisites: None

LATS 254  (F) Embodied Knowledges: Latinx, Asian American, and Black American Writing on Invisible Disability  (DPE)

Cross-listings: AMST 253 / AAS 253

Primary Cross-listing

This interdisciplinary course assumes an expansive approach towards disability, defining it not exclusively as a legible identity that one can lay claim to, but rather as an identity grounded in one's relationship to power (Kim and Schalk, 2020). This course centers on the critical role of lived experience as a key site of everyday theorization for the multiply marginalized, and specifically on the ways in which invisibly disabled Latinx, Asian American, and Black American individuals write the self. As scholars in disability studies argue, self-representations of disabled individuals carry the potential for us as a society to move beyond the binary narratives of "tragedy or inspiration" so often associated with disability. Rather, the self-produced narratives of US disabled writers of color offer a much more nuanced portrayal of everyday life with disability/ies for the multiply marginalized. Much like invisible disability itself, these self-representations ultimately refute traditional depictions of disability, and underscore the ways in which the bodymind serves as a rich, albeit often overlooked, site of knowledge. Embodied Knowledges draws on the insights of disability studies, crip studies, anthropology, literary studies, medicine, psychology, education, cultural studies, ethnic studies, American studies, gender and sexuality studies, sociology, and trauma studies. We will examine the works of Latinx, Asian American, and Black American writers and scholars others in relationship to one another, and as points of departure for examining issues such as the relationship between immigration and disability; intergenerational trauma; the impacts of paradigms such as the Model Minority Myth and notions of cultural deficit; passing; the politics of disability disclosure, the paradoxes of invisible disability; invisible disability in academic spaces; the role of culture and categories of difference such as race, gender, class and immigration status in societal approaches to and understandings of invisible disability; and future visions in the realm of disability justice and care work.

Requirements/Evaluation: Two 5-6 page essays; One group question assignment; Final reflection document

Prerequisites: None.

Enrollment Limit: 12
Enrollment Preferences: Preference given to majors or concentrators in LATS, AMST, and AAST, in order of seniority.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
AMST 253(D2) LATS 254(D2) AAS 253(D2)

Difference, Power, and Equity Notes: This course takes up issues of difference and power in every one of its readings and materials. In particular, we examine the intersection of race, ethnicity, dis/ability, gender, sexuality and nation in our discussions of how disability helps to define our understanding of US identity and citizenship, particularly for US communities of color.

LATS 278 (S) Latinxs and Their Scriptures: Christian, Muslim, & Jewish

This course studies the nature of authorized religious writings--"Scriptures"--among Latinx communities in the US in three major religious traditions--Christianity, Islam, and Judaism. Beginning with an understanding of the nature and function of "scriptures" in religion as a whole, this course will turn to a brief history and current status of Latinidad in the US, including its religious traditions, and how scriptures have functioned in those traditions, especially among Latina/o/x adherents. Then we will do close readings of major texts in Latinx Christianity, Islam, and Judaism, both the scriptures of those communities and interpretative readings of them by adherents and scholars alike. Our goal will be a more thorough understanding of Latinx religious reading practices, interpretations, and implications on the life and overall well-being of Latinx communities in the US.

Requirements/Evaluation: Class participation; Glow Discussion Forum posts based on readings; two short essays and one longer research paper.

Prerequisites: No prerequisites

Enrollment Limit: 20

Enrollment Preferences: Students should have at least one previous LATS course or one previous Religion course.

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

LATS 285 (F) The Bible & US Borders: Latinx Encounters

Cross-listings: REL 286

Secondary Cross-listing

This course seeks to understand migration in the current historical, social and political moment, especially on the US-Mexico border. We will explore migration and borders through the lenses of history, politics, and religion, with particular focus on the Christian Bible and its influence, both positively and negatively, in the understanding of recent migration experiences on the USA-Mexico border. For example, we analyze instances of and reflections on migration in the Bible, in light of various interpretations and applications emerging today in debates over migration, including by politicians and "Christian nationalists." The perspectives of Latinx communities in the USA with regard to border politics and policies will be front and center in this course. The Bible, monographs and essays on Bible, borders, migration, and religion, especially from Latinx authors and thinkers, will constitute the readings for the course, along with recent data, policies, and reports on the border and "border security." Who is coming to the US-Mexico border and why, and what does religion and biblical interpretation have to do with how the US government and US people think and act on the border?

Requirements/Evaluation: Participation in class discussions; two to three short essays (3-5 pages each) analyzing selected readings; a longer final research paper (8-10 pages) on an aspect of Bible and Migration of interest to the student defined in consultation with the professor.

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Religion majors and Latinx Studies concentrators, and those interested in these areas of study

LATS 286 (F) Conquests and (Im)migrations: Latina/o History, 1848 to the Present  (DPE)

Cross-listings: HiST 286

Primary Cross-listing

The first Latinx communities were formed in 1848 when the United States conquered half of Mexico’s territory. In 1898 the United States annexed Puerto Rico and has retained sovereignty to this day. These early conquests and continuing im/migrations created Mexican and Puerto Rican communities in the United States. U.S. imperialism continued to shape the im/migrations that created Cuban, Dominican, Salvadoran, Guatemalan and other Latinx communities in the United States. This course explores U.S. military, political, and economic interventions and their impact on im/migrations and the making of Latinx communities. We also explore the impact of U.S. employers’ and the U.S. government’s recruitment of low wage workers in shaping im/migrations, destinations, and the formation of Latinx working-class communities. Im/migration and refugee policies have long defined who is eligible to enter and how, as well as who is deemed eligible for citizenship and belonging. Within this context, Latinas and Latinos have developed survival and family reunification strategies for themselves, their families, and their communities.

Class Format: This course is a discussion format.

Requirements/Evaluation: Class participation, short 1-2 page writing assignments, two 4-5 page essays, and a final 5-7 page essay. All writing assignments are based on course materials.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: LATS concentrators, History majors, or those intending to become concentrators or majors, seniors

LATS 313  (F) Gender, Race, and the Power of Personal Aesthetics

Cross-listings: WGSS 313 / AFR 326 / AMST 313 / AAS 313

Primary Cross-listing

This media/cultural studies course focuses on the politics of personal style amongst women of color in the US and around the globe in the digital era. We undertake a comparative, transnational exploration of the ways in which categories of difference such as gender, disability, sexuality, class, and ethno-racial identity inform normative beauty standards and ideas about the body. The class pays particular attention to the ways in which neoliberal capitalism shapes contemporary understandings of gendered bodies and the self. We examine an array of materials from across the disciplines including commercial websites, music videos, photography, histories, film, television, personal narratives, ethnographies, and sociological case studies. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we engage the following questions, among others: What are some of the everyday functions of personal style among women of color in the US and globally? How do Latina/x,
Black, Arab American, and Asian American personal aesthetics reflect the specific circumstances of their creation, and the unique histories of these racialized communities? What role do transnational media and popular culture play in the development and circulation of gendered, raced, and sexualized aesthetic forms? How might the belief in personal style as an activist strategy complicate traditional understandings of feminist political activity? And what do the combined insights of ethnic studies, feminist studies, cultural studies, media studies, queer studies and disability studies contribute to our comprehension of gendered Asian American, Arab American, Black, and Latina/x bodies?

Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-6 pages, final written reflection.

Prerequisites: LATS 105, AMST 201, AFR 200, WGSS 101 or permission of instructor; first year students are not permitted to take this course.

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, Africana Studies majors, and Women's, Gender and Sexuality Studies majors by seniority. If the class is overenrolled students may be asked to submit a brief writing sample.

LATS 314  (F)  Social Geographies: Bridging Theory and Praxis in New England

How do we define a community? How do people create community spaces? What tools do we use to explain and understand what a community is? Building on the praxis of Black sociologist Patricia Hill Collins's notion of the "Insider/Outsider," this course focuses on the social life of community spaces. It analyzes the construction of community by individuals, groups, and societies, and how these various actors participate in the production of space. In doing so, comparisons will be made with case studies across space and time, and we will apply these theories and research methods to understand our lives in New England. This seminar asks students to take on the role of a researcher, one that must navigate the line between being part of a group and maintaining a methodological distance. Students in this course will become familiar with how people come together to create and contest community, community-based approaches to understand social problems, and structural conditions that produce social inequities. We will consider issues of difference, identification, and access via race, ethnicity, gender, sexuality, and disability and examine relational ways to understand poverty, family dynamics, and fear. Readings and course materials will be highly interdisciplinary drawing from disciplines such as ethnic studies, sociology, and geography; course readings will be supplemented by films and an experiential learning component. As part of this component students will meet outside class hours to work with a local community-based organization over the semester and write a 10-page final paper that connects course readings with their fieldwork experience.

Requirements/Evaluation: Students are evaluated on regular assignments, active class participation, completion of service learning hours, and a final paper.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: LATS concentrators

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

---

LATS 315  (S)  Research Design in Geography: Social Science Perspectives  (WS)
How do you design a research project? Which methods of data collection and analysis are appropriate for research questions in Latinx Studies? This course provides an introduction to the process of designing and carrying out a research project, including related to Latinidades, or a plurality of Latinx identities. It introduces students to how social science knowledge is produced to understand the research process, how research emerges, and how we affect research. Course objectives for students are: 1) to design social science research effectively; 2) to critically evaluate the research design of others; 3) to strengthen their academic research and writing skills; and 4) to develop an appreciation for how knowledge is acquired, organized, and communicated. Students will iteratively develop an original research proposal involving several pieces of synthesis. Through applying different research methods to case studies in Latinx Studies, students will understand that the complexity of the issues affecting Latinx communities requires thoughtful research. Students will receive practical training in research protocols, organization methods, project management, and analytical approaches.

Class Format: This class will have short lectures with most of the time dedicated to group discussions. Students should expect to carry out research methods outside of class.

Requirements/Evaluation: Class participation. Assignments where students carry out research methods. Five writing assignments of various page lengths (1-10 pgs) compose students’ research proposal project. Each component of the project will be revised by students after professor feedback. These revisions will culminate into a final paper (~20 pages). There will be a final exam.

Prerequisites: N/A

Enrollment Limit: 19

Enrollment Preferences: LATS concentrators or those intending to become LATS concentrators; juniors interested in a senior honors thesis.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will have five writing assignments that build upon each other, from the statement of research topic, initial research questions, annotated bib, draft lit review, and proposed methodology. Students receive critical feedback on grammar, style, and argument and submit revised versions of their assignments. Students submit a completed research project proposal as their final paper.

Attributes: LATS Core Electives

LATS 318 (S) Myths and the Making of Latine California (WS)

Cross-listings: AMST 318 / REL 318

Primary Cross-listing

California is home not only to the largest ethnic Mexican population in the USA but also to the largest Central American population, while also being home to long-standing Latine communities hailing from Chile to Cuba. Since the era of Spanish colonization, especially starting in 1769, California has been woven into fantastic imaginations among many peoples in the Americas. Whether imagined as Paradise or Hell, as environmental disaster or agricultural wonderland, as a land of all nations or a land of multiracial enmity, many myths have been inscribed onto and pursued within the space we call California. In a state whose name comes from an early modern Spanish novel, how did certain narratives of California come to be, who has imagined California in certain ways, and why? What impact have these myths had on different Latine populations in the history of California, and how have different Latines shaped, contested, and remade these myths as well as the California landscape that they share with other peoples? In this course, we consider "myth" as a category of socially powerful narratives and not just a simple term that refers to an "untrue story." We examine myths by focusing on a few specific moments of interaction between the Latine peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest are select creation stories (found in Jewish, Christian, and Indigenous traditions), imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as part of Greater México, California as "sprawling, multicultural dystopia," and California as "west of the west," including its imagination as a technological and spiritual "frontier."

Requirements/Evaluation: this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Latina/o Studies concentrators, Religion majors, American Studies majors, Environmental Studies majors and concentrators, Comparative Literature majors

Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
LATS 318(D2) AMST 318(D2) REL 318(D2)

Writing Skills Notes: The students are expected to engage in regular writing of response papers, a mandatory revision of their first essay after receiving instructor feedback, a second essay, and a scaffolded final project with instructor and peer feedback at different stages. Attention to writing and the ways that writing interacts with myths, peoples, and place-making is part of the practice and the theoretical orientation of the course.

LATS 322 (S) Fiction Writing Workshop (DPE) (WS)

Cross-listings: ENGL 388

Primary Cross-listing

This workshop is focused on the art and practice of writing fiction and geared toward students interested in working on creative honors theses. Readings include published fiction by primarily Latine and other writers who center Global South experiences, with attention paid to how each author employs narrative elements--characterization, plotting, structure, dialogue mechanics, setting, tone, theme--as well as the values and visions expressed. Students will present short fiction or novel excerpts for peer critique and the editorial advice of the instructor. Regular in-class exercises and take-home assignments will help students expand their narrative skills.

Requirements/Evaluation: Attendance and class participation, regular writing exercises, 4- to 5-page midterm paper (close-reading a text), 10- to 15-page final creative paper (close-reading a text and creative-writing response)

Prerequisites: LATS 222- Ficciones

LATS 330 (S) DNA + Latinx: Decoding the "Cosmic Race" (DPE)

Scientists working to assemble maps of the human genome have found a goldmine in the DNA of Latinx, Latin American, and other populations that derive ancestry from multiple continents. This interdisciplinary course explores Latinidades through a genealogical lens: What culture-specific issues emerge around history, identity, ethics, forensics, immigration, commerce, surveillance, art, science, and medicine? Through discussion, materials, and activities that engage personal, historical, and scientific perspectives, this course offers students the opportunity to explore the many codes embedded in the double-helix. Readings include scholarship out of Stanford University's Bustamante Lab, The Cosmic Race by José Vasconcelos, The Cosmic Serpent by Jeremy Narby, Bird of Paradise: How I Became Latina by Raquel Cepeda, and The Social Life of DNA: Race, Reparations, and Reconciliation After the Genome by Alondra Nelson.

Requirements/Evaluation: attendance and class participation, writing exercises, 4- to 5-page midterm paper (close-reading a text), 10- to 15-page
Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Latina/o Studies concentrators

LATS 332  (F)  Latinx Biography & Memoir

This course reads widely and deeply in the art and practice of biography and memoir by Latinx authors and historical figures. We shall learn and revisit important historical moments and cultural experiences through the lens of well-known and lesser known figures in Latinx history, art, culture, and religiosity. Our readings will include memoirs by such key figures as Piri Thomas, Esmeralda Santiago, Julia Alvarez, Reyna Grande, Octavio Solis and recent critical biographies about Sor Juana Ines de La Cruz, Jose Martí, and Roberto Clemente. The goal in these and/or other selected readings will be to understand Latinx culture, the search for identity and self-actualization, and spiritual/religious dimensions of individual growth and development in US Latinx communities, especially in the 20th and 21st centuries.

Requirements/Evaluation: Attendance, participation, online discussion forums, two short essays and a longer research paper, plus oral presentations are expected in this intense reading course.

Prerequisites: A previous course in LATS is preferred.

Enrollment Limit: 20

Enrollment Preferences: Latina/o/x Studies concentrators; if still overenrolled, seniors, then juniors, then sophomores

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

LATS 335  (S)  Contemporary Immigration Landscapes

Cross-listings: AMST 312 / WGSS 321

Primary Cross-listing

What is the relationship between racial formations, transnational migrations, and power in the United States? How do geometries of power shape our relationship to place? How do people navigate and resist the exercise of unequal power relations? This course examines geographies of transnational migration, bringing together insights from critical race theory, queer theory, and postcolonial theories to enrich our understanding of human geography. Theories on belonging, identity, and power will serve as a bridge between the state's role in structuring the lives of transnational migrants and the politics of conceiving futures as alternatives to current political geographic imaginations in the U.S. immigration landscape. Through an interdisciplinary exploration of 'migration,' we will examine the depth and range of migrants' experiences (such as through Javier Zamora's Solito: A Memoir) and how these communities' lives are structured through various axes of difference, such as race, gender, sexuality, class, and documentation status. We will give attention to the variegated landscape of immigration enforcement and its relationship to issues of labor, political economy, and incarceration, among others. Through materials that embrace both social science and humanities approaches, this course will help students develop a critical understanding of how space matters when considering transnational processes of migration as well as migrant communities' political practices.
throughout the US. This course asks students to compare and contrast the intellectual genealogies covered and apply these theories of identity and power to case studies that focus on political interventions for social justice (such as UndocuQueers in the immigrant justice movement).

**Requirements/Evaluation:** Your learning is evaluated through class participation (discussion, responses, & in-class worksheets), three assignments, and a final project.

**Prerequisites:** None

**Enrollment Limit:** 25

**Enrollment Preferences:** LATS concentrators or those intending to concentrate

**Expected Class Size:** 20

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

**LATS 341 (F) Performing Masculinity in Global Popular Culture** (DPE)

**Cross-listings:** AMST 358 / WGSS 347 / THEA 341 / SOC 340

**Secondary Cross-listing**

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia, hip hop masculinities, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture.

**Requirements/Evaluation:** masculinity reflections, mid-term essay exam (or quizzes), visual rhetorical analyses of pop culture images

**Prerequisites:** none; WGSS 202 would be helpful

**Enrollment Limit:** 15

**Enrollment Preferences:** a short statement of interest will be solicited; a subsection of applicants may be interviewed

**Expected Class Size:** 15

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 358(D2) WGSS 347(D2) THEA 341(D1) SOC 340(D2) LATS 341(D2)

**Difference, Power, and Equity Notes:** This course examines the construction of masculinity as it relates to intersecting identities such as race, sexuality, class, and global political economic considerations. Key to understanding masculinity are questions about the diversity of experiences of masculinity, cultural variations of gender norms, privilege, agency, patriarchy, heteronormativity, and interlocking systems of oppression.

Not offered current academic year

**LATS 344 (S) Marking Presence: Reading (Dis)ability in/to Latinx Media** (DPE)

**Cross-listings:** WGSS 361 / AMST 361
This course explores the intersection of (dis)ability and Latinx identity in the contemporary US context. Employing Angharad Valdivia's (2020) notion of "marking presence" to describe the intentional ways in which Latinx subjects gain and hold on to mainstream media space, the class places the fields of Disability Studies, Latinx Studies, Gender Studies and Media Studies into conversation. We address the following questions and others: What does media reveal to us about the place of (dis)ability and Latinidad in contemporary US life, particularly as these categories intersect with questions of gender, sexuality, national identity and citizenship? How might we read Latinidad and (dis)ability into media texts in which they are not otherwise centered? What are the advantages of deploying mainstream media presence as a claim to power for disabled Latinx individuals, particularly those who are multiply marginalized? What are the limitations of such an approach? We will focus on these questions, as well as deploy various media examples (podcasts, social media, film, television and music) alongside scholarly texts to explore topics impacting the Latinx communities such as the relationship between immigration and (dis)ability, intergenerational trauma and migration, the gendered archetype of the Latina "Loca," (dis)ability in academia, the politics of self-care amongst Latinxs in the neoliberal context, and the very legal, cultural, and social category of "(dis)abled" itself within dominant society as well as in Latinx communities.

Requirements/Evaluation: Two short (5-6 page) essays; One media analysis exercise; One online group project; One final reflection letter.

Prerequisites: None.

Enrollment Limit: 12

Enrollment Preferences: Preference given to LATS concentrators, AMST majors and WGSS majors by seniority.

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 361 (D2) LATS 344 (D2) AMST 361 (D2)

Difference, Power, and Equity Notes: At its core, this course is about understanding difference and relationships of power through an intersectional lens and via the prism of everyday media. In each class we will be discussing issues directly revolving around questions of race, ethnicity, (dis)ability, gender, sexuality, and nation. Students will be expected to incorporate an analysis of these issues in their written and oral work for the course.

Attributes: LATS Core Electives

Not offered current academic year

LATS 345 (S) Central American Visual Cultures (DPE)

Cross-listings: AMST 342

Primary Cross-listing

This course explores who U.S.-Central Americans are through their visual cultural production, as well as how US-Central Americans have been portrayed by others. Recently, Central Americans have gained visibility in the U.S. public sphere as mainstream media coverage of the "crisis at the border" has sensationalized the arrival of migrant caravans. The images and visuals resulting from mainstream coverage has led to monolithic representations of Central Americans framing them as "illegal aliens," violent gang members, or agentless victims. By engaging with visual culture ranging from social media, films, and zines, we challenge these monolithic perceptions and representations of Central Americans by pursuing the following set of questions: How have others visualized Central Americans and what has been the effect on lived experiences of U.S. Central Americans? How do U.S.-Central American communities visualize their identity formation in the U.S.? What is the role of visual culture in their resistance to racism, classism, sexism, and other structures of marginalization in the U.S.? As part of this course, we explore the range of social, political, economic, and historical forces that have pushed migration from each of the countries in the isthmus and the formation of their respective diasporas in the U.S.

Requirements/Evaluation: Discussion participation, weekly reading responses, two 3-6-page essays, and a final 8-10 page paper.

Prerequisites: None

Enrollment Limit: 25

Enrollment Preferences: Latina/o Studies concentrators and AMST majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
LATS 345(D2) AMST 342(D2)

Difference, Power, and Equity Notes: The course critically reflects on how others have visualized Central Americans and how Central American communities use visual culture to assert their differences and contest the power dynamics that shape their lived experiences.

LATS 360 (S) Latinx Sculpture Art: From Altares to Sonic Monuments

Cross-listings: ARTH 361

Primary Cross-listing

What constitutes Latinx sculpture? While the study of Latinx art has revolved around two dimensional art forms, this course tackles the question of three-dimensional art and examines the development of Latinx sculpture, its socio-political impact, and its aesthetic complexity. This interdisciplinary and hybrid course consists of studying Latinx sculpture art and how Latinx artists have engaged and rearticulated popular cultural traditions like altares, lowriders, and santeria in their sculptural works by engaging varying disciplines. This course also includes a studio component. We will dissect the ways Latinx communities conceive of their identity, politics, and manifest resistance and belonging in the U.S. differently through the art form of sculpture, as we study artists like Amalia Mesa-Bains, Gilbert “Magu” Luján, Beatriz Cortez, Pepón Osorio, and Guadalupe Maravilla. Sculpture offers a new lens to expand our study of Latinx identity, politics, and aesthetics, via historical and contemporary theoretical frameworks in the disciplines of Latinx Studies, Chicana/o and Central American Studies, art history, museum studies, and urban studies. As a hybrid course with a studio component, students will also complete a term-long sculpture project, which will be accompanied by a research-based artist statement. In their research based artist statements, students will situate and contextualize their sculpture projects in relation to topics and aesthetic frameworks covered in the class.

Requirements/Evaluation: Class participation and on-going work on their final art project. Students will write two 5 page essays related to course material and one final 3 page research-based artist statement that will contextualize a final sculpture art project in relation to course content.

Prerequisites: None

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, especially those who have taken LATS 105 and/or Latinx Visual Arts, as well as Art majors, especially those who have taken some Latinx Studies courses.
LATS 385 (F) Latinx Activism: From the Local to the Transnational  (DPE) (WS)
Cross-listings:  HIST 385

Secondary Cross-listing
Latinas/os/x's have long sought inclusion in the U.S. polity and society, while the meanings of inclusion and the means to achieve it have shifted historically. For Latinxs, activism is often shaped by the specific dynamics of each group's migration to the United States and by their arrival into a particular context. Home country politics and transnational connections can remain important. Yet local activism to meet immediate needs and to address critical issues becomes important as well. Working within existing structures, Latinx communities have at times questioned and challenged those existing structures, as activists have addressed a wide variety of often intersecting issues. This course roots itself in the historical progression of Puerto Rican and Mexican-American activism, before turning to the social and political movements of the late 1960s and 1970s, as shaped by Puerto Ricans, Chicanos/as, Cubans, and Dominicans. The 1980s witnessed increased immigration from several Central and South American countries, arriving in the context of reactions to those political and social movements, as well as increased U.S. intervention in their countries of origin—a context that again shaped both local and transnational activism. Students' final projects will be anchored within this historical framing and within the lens of local and transnational activism, while moving forward in time to consider more contemporary dimensions of Latinx activism.

Class Format:  This is a discussion-based and writing intensive course, so reading and full participation is important. Students will be expected to read each other's work and to provide thoughtful and constructive feedback.

Requirements/Evaluation:  Class participation and presentations; several 3-4 page essays; final paper of 12-15 pages, as well as proposal, bibliography, and drafts

Prerequisites:  none

Enrollment Limit:  19

Enrollment Preferences:  History majors and Latina/o Studies concentrators, seniors

Expected Class Size:  15

Grading:  yes pass/fail option,  yes fifth course option

Distributions:  (D2)  (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
HIST 385(D2) LATS 385(D2)

Writing Skills Notes:  Several writing assignments of 3-4 pages provide the foundation for 12-15 page final papers. In consultation with the professor, students select a topic and submit a 3-4 page proposal with a bibliography. Students submit a draft for a workshop session with other students. A final presentation is another opportunity to hone arguments and use of evidence, as well as to receive feedback on revised drafts from the professor.

Difference, Power, and Equity Notes:  This course examines how Latinx communities have sought inclusion in U.S. society and polity, in the face of marginalization based on race, ethnicity, class, gender, sexuality, and/or political perspective, as well as other intersecting markers of difference. Questions of difference, power, and equity are analyzed at the structural, community, and individual levels.

LATS 397 (F) Independent Study: Latina/o Studies

Latina/o Studies independent study.
LATS 410  (F)  Arquivistas: An Archival Storytelling Course  
(DPE) (WS)
Archival storytelling: the "creative practice of resurfacing hidden, untapped, and untold historical treasures and reimagining that content in various 
storytelling presentations that speak to modern-day audiences" (Arbo Radiko). In this generative writing and critical-practice course, students 
explore/inhabit the role of writers and storytellers as preservers of history and culture. With a focus on documenting and/or reimagining Latinidades, 
the course invites students to address: the unique narrative forms archives may take beyond collections of artifacts; how archives can inform the 
creation--and definition--of literary work; the relationship between archives and power; information the archivist/storyteller may choose to include or 
omit, reveal or conceal; how the archivist/storyteller might practice what scholars Michelle Caswell and Marika Cifor call "radical empathy," one that 
takes into account the diverse affective roles and responsibilities of the: archivist, records creator, records subject, records user, and community 
member. The course is designed to help students address the above through assignments that build towards final projects. Through the creative 
process, students learn to: research, compile, and analyze materials from various open-access repositories; identify and write emergent stories from 
collected material; and present these stories to the public using narrative elements and tools in the digital humanities. Projects may include virtual 
exhibits, data stories, annotated maps, historical fiction, ekphrastic poetry, finding aids, and interactive timelines. Projects may also examine the Latinx 
experience on campus, building on archival efforts initiated by students for the LATS Program 15th Anniversary Exhibit at Williams College Library.
Requirements/Evaluation:  Assignments and in-class exercises; attendance; participation; peer review
Prerequisites:  n/a
Enrollment Limit:  19
Enrollment Preferences:  LATS concentrators; students who haven't taken creative-writing courses but are interested in the topic; students interested 
in the digital humanities; students who have met their other curricular requirements
Expected Class Size:  19
Grading:  no pass/fail option,  no fifth course option
Distributions:  (D2)  (DPE) (WS)
Writing Skills Notes: Two five-page papers (each receiving critical feedback from professor on grammar, style, and argument); a midterm project 
proposal with critical feedback from professor and peers; one taxonomy glossary based on course readings and proposed project; one annotated 
bibliography; artist statement and notes on craft; one final paper submitted with corresponding creative project.
Difference, Power, and Equity Notes: This course examines various forms of difference, power, and equity related to creating and engaging 
archives. In exploring and creating archives themselves, students pay close attention to any omissions and concealments in the documentation of 
historical memory, particularly in relation to diverse Latinx experiences.

LATS 421  (F)  Latinx Geographies  
(WS)
This research seminar examines the history, framework, and scholarship of the growing field of Latinx Geographies within the context of 
interdisciplinary Latinx Studies. This course explores the perspectives, experiences, spatial politics, and place-making practices of Latinxs to consider 
their relationship to the built environment. We will examine recent theories regarding space, place, and race; explore them through various Latinx 
positionalities, such as gender, sexuality, class, and citizenship status; and apply them to literary and media representations of Latinx spaces and 
places, such as the US-Mexico borderlands, barrios, and rural fields. We will consider how undocumented queer and trans migrants have become 
prominent political actors in social movements, how migration, race, and the environment interact in pollution and activism, how undocumented women 
negotiate motherhood, how non-profit organizations market Latinidad for infrastructural development, and more. In this interdisciplinary and 
comparative course, students will be exposed to the genealogy of Latinx Geography, which finds its genesis embedded in Black Geography, Queer 
(Women) of Color Critique, Latinx Studies, and Ethnic Studies. Students will learn a geographical vernacular to think and articulate spatially in the 
social sciences and humanities, as they develop their own research projects. Collectively, we will interrogate case studies of Latinxs in the built
environment to make visible how race and space are fundamental tenets of a Latinx geographical analysis. Students will select a research topic and develop their own research project independently and through coursework. Evaluation will be based on class participation, leading discussion, presentations, research proposal, annotated bibliography, short writing assignments, writing workshop participation, and a final 20-page research paper.

**Requirements/Evaluation:** Class participation, leading class discussion, proposal, annotated bibliography, short writing assignments, writing workshop participation, presentation, drafts of final paper, and final 15-20 page research paper.

**Prerequisites:** N/A

**Enrollment Limit:** 19

**Enrollment Preferences:** LATS concentrators; seniors

**Expected Class Size:** 15

**Grading:** no pass/fail option, no fifth course option

**Distributions:** (D2) (WS)

**Writing Skills Notes:** This research seminar supports students as they define an appropriate topic, identify and use primary and secondary sources, and complete a 15-20 page final research paper. Several short writing assignments focus on interpretations of primary sources and on key arguments in secondary sources. The final paper is written in stages, including a proposal, an annotated bibliography, a draft for workshopping with other students and faculty feedback, and a final presentation along with a revised draft.

**LATS 470 (S) Latinx Migrations: Stories and Histories  (WS)**

**Cross-listings:** HIST 470 / WGSS 470

**Secondary Cross-listing**

- Latinx migration histories are often told with sweeping data and within broad historical contexts. While these are important, the voices of the people leaving their home countries and coming to the United States can be lost or buried. During the 1970s, the emerging subfield of social history asserted the need to craft histories that took into consideration the everyday lives of everyday people. Oral history emerged as a key tool in capturing the personal stories too often missed in historical archives. At the same time, Puerto Rican Studies, Chicano Studies, and later, Latinx Studies emerged to tell the histories of groups too often omitted from or misrepresented in the scholarship. These fields relied on traditions of testimonios or storytelling. This course focuses on Latinx oral histories, autobiographies, memoirs, testimonios, and other first-person narratives to explore how people are impacted by and experience those broad historical contexts, as well as how the decisions they make and the actions they take shape those broad historical contexts. As Latinx Studies is a field that has been at the forefront of exploring intersectionality, we also analyze how attention to first person narratives and lived experiences reveal the complexities of race, ethnicity, gender, sexuality, and class, as well as other visible and invisible markers of difference. Examining first person narratives in the context of specific Latinx groups in particular historical, geographical, and social contexts, we interrogate the methodological and interpretive challenges of working with oral histories and other first-person primary sources. Course topics include the gendered dimensions of migration, geopolitics and stories of exile, and the connections between lived experiences and political activism, particularly the feminist activism of the late 1960s and 1970s-- all while students develop and share their own research topics.

**Requirements/Evaluation:** class participation and presentations, short writing assignments, proposals, annotated bibliography, drafts of research paper, final presentation, and final paper of 15 to 20 pages

**Prerequisites:** none

**Enrollment Limit:** 19

**Enrollment Preferences:** History majors, WGSS majors, and Latina/o Studies concentrators, seniors

**Expected Class Size:** 15

**Grading:** no pass/fail option, yes fifth course option

Not offered current academic year

LATS 475 (S) Dreaming Latina/x Feminist Disability Studies (DPE) (WS)

Cross-listings: WGSS 475 / AMST 413

Primary Cross-listing

In this course we will defy the traditional notion that disabled and queer people of color have no right to future dreams, as we collectively imagine how the emergent field of Latina/x feminist disability studies might take shape. What are the sites of focus, methods, and political commitments of Latina/x feminist disability studies? Where is the power in meaningfully uniting an analysis of disability to one of sexuality and gendered Latinidad? How does a Latina/x-centric approach productively inform our understanding of disability? What is the political potential of Latina/x feminist disability studies -- not exclusively as a set of theories, but also as a mindset and an everyday call to action? If we were to collectively compose a manifesto for Latina/x feminist disability studies, what might it contain? How might we actively cultivate a community of care in the classroom as well as other spaces at Williams? Just what might Latina/x feminist disability justice dreams look like? How might Latina/x feminist disability justice dreams feel? Feminist, queer, and disabled crii-of-color scholars have recently called for a more meaningful engagement with race in feminist disability studies. Simultaneously, we have also witnessed a small but steady growth in the amount of Latinx studies scholarship that thoughtfully integrates questions of disability. This interdisciplinary course responds to these important shifts in its focus on a series of topics bridging Latinx studies, gender studies, queer studies, crii studies, and critical disability studies. These include but are not limited to the body, the environment, temporality, labor, citizenship, dependency, and visibility/invisibility. Through these topics, we will explore the ways in which the different approaches to these specific issues across Latinx, critical disability, crii, queer and gender studies are in fruitful conversation with one another -- and sometimes even at odds -- as we actively interrogate the intersections of gender, race, ethnicity, sexuality, and disability within the everyday.

Requirements/Evaluation: Major assignments for this course include a semester-long independent research paper (15-20 pages) broken up into steps, participation in crafting the class manifesto, a semester-long collaborative artistic exercise, and a final reflection document (3-4 pages).

Prerequisites: None.

Enrollment Limit: 12

Enrollment Preferences: Priority given to LATS concentrators by seniority, followed by WGSS and AMST majors by seniority.

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: Lab fee: $200 for art supplies per student

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 475(D2) LATS 475(D2) AMST 413(D2)

Writing Skills Notes: We focus on building writing and interdisciplinary research skills, with a particular emphasis on the processes of research, revision, and collaborative writing. The primary research paper (an independent project of 15-20 pages) is divided into stages, and students are required to revise and resubmit their work at various junctures in the research process. The written class manifesto requires students to compose a document together, revising their work as a group over the course of the semester.

Difference, Power, and Equity Notes: This course privileges an intersectional analysis regarding questions of race, ethnicity, gender, sexuality, and disability. It obligates students to consider how these categories of different actively work in tandem with one another in everyday US Latina/x and transnational (US-Latin America and the Caribbean) contexts. This seminar also underscores how these categories of difference are actually products of a given historical and political moment.

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

*Not offered current academic year*
Leadership Studies focuses on the universal phenomenon of leadership in human groups. Leadership Studies asks what leadership means within a wide variety of social contexts—whether in a family, a team, a theatre company, a philanthropy, a university, a multinational corporation, or a nation-state waging war. It seeks to understand the dynamics of the relationships between leaders and followers. It studies authority, power, and influence. It seeks to grasp the bases of legitimacy that leaders claim, and followers grant, in all of these relationships.

Through a wide range of courses in the social sciences and the humanities, the curriculum addresses a number of questions. How do we define leadership? What are the bases of leaders' legitimacy in different historical contexts? How should we understand the variation between leaders emerging through tradition, charisma, and legal sanction? How do different types of leaders exercise and maintain their authority? What are the distinctive habits of mind of leaders in different cultural settings? What are the moral dilemmas that leaders across all settings face? What are the typical challenges to established leadership? How does one analyze the experiences of leaders in widely disparate contexts to generate systematic comparative understandings of why history judges some leaders great and others failures? How and why do these evaluations about the efficacy of leaders shift over time?

To meet the requirements of the concentration, students must complete one of the two sequences outlined below (6 courses total). Additional and/or substitute electives are offered each year; students should consult the course offerings in the catalog for the full list of elective offerings in a given year and contact the chair if they wish to suggest additional courses that might count toward the concentration.

**LEADERSHIP STUDIES—TRADITIONAL TRACK**

The introductory course:

LEAD/PSCI 155 Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies

One required course on ethical issues related to leadership, typically:

PHIL 119(F, S) SEM Why Obey the Law?
Taught by: Jana Sawicki
Catalog details

PSCI 130(F, S) SEM Introduction to Political Theory
Taught by: Laura Ephraim, Mark Reinhardt
Catalog details

Two core courses dealing with specific facets or domains of leadership, such as:

ARTH 501 / LEAD 301 / ARTH 401(S) SEM Museums: History and Practice
Taught by: Michael Conforti
Catalog details

ASTR 240 / LEAD 240 / STS 240 SEM Great Astronomers and Their Original Publications
Taught by: Kevin Flaherty
Catalog details

HIST 207 / GBST 102 / ARAB 207 / LEAD 207 / JWST 217 / REL 239 LEC The Modern Middle East
Taught by: Magnús Bernhardsson
Catalog details

LEAD 205 / PSCI 212 LEC From Tocqueville to Trump: Leadership and the Making of American Democracy
Taught by: Mason Williams
Catalog details

LEAD 320 / PSCI 320(F) SEM Heroes and Villains: Iconic Leadership and the Politics of Memory
Taught by: Mason Williams
LEAD 425 / PSCI 357(S) SEM Senior Seminar: Leadership and the Anxieties of Democracy
Taught by: Mason Williams

PSCI 215 / LEAD 215(S) SEM Race and Inequality in the American City
Taught by: Mason Williams

PSCI 216 / LEAD 216 LEC American Constitutionalism I: Structures of Power
Taught by: Justin Crowe

PSCI 217 / LEAD 217(S) LEC American Constitutionalism II: Rights and Liberties
Taught by: Justin Crowe

PSCI 218 / LEAD 218 SEM The American Presidency
Taught by: Nicole Mellow

PSCI 290 / LEAD 290(F) TUT How Change Happens in American Politics
Taught by: Nicole Mellow

PSCI 310 / LEAD 332 SEM New York City Politics: The Urban Crisis to the Pandemic
Taught by: Mason Williams

PSCI 345 / ASIA 345 SEM The Meaning of Life and Politics in Ancient Chinese Thought
Taught by: George Crane

One Leadership Studies Winter Study course (listed separately in the catalog)
Capstone course:
LEAD 425 Leadership and the Anxieties of Democracy

LEADERSHIP STUDIES—KAPLAN PROGRAM IN U.S. FOREIGN POLICY TRACK

An introductory course:
HIST 262 The United States and the World, 1776 to 1914
HIST 263 The United States and the World, 1914 to the Present
PSCI/LEAD 120 America and the World
LEAD/PSCI 155 Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies

One required course on issues related to American domestic leadership, such as:
LEAD 155 / PSCI 155(F) SEM Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies
Taught by: Mason Williams

LEAD 205 / PSCI 212 LEC From Tocqueville to Trump: Leadership and the Making of American Democracy
Taught by: Mason Williams

LEAD 320 / PSCI 320(F) SEM Heroes and Villains: Iconic Leadership and the Politics of Memory
Taught by: Mason Williams

PSCI 218 / LEAD 218 SEM The American Presidency
Taught by: Nicole Mellow

PSCI 310 / LEAD 332 SEM New York City Politics: The Urban Crisis to the Pandemic
Taught by: Mason Williams

Three required courses dealing with specific facets of American foreign policy leadership, such as:
HIST 388(S) SEM Decolonization and the Cold War
Taught by: Jessica Chapman

PSCI 225 / LEAD 225 LEC International Security
One capstone course:
- LEAD/PSCI 327 Leadership and Strategy
- LEAD 330/PSCI 420 The Nuclear Revolution
- LEAD/PSCI 365 U.S. Grand Strategy
- PSCI 361 The CIA and American Foreign Policy
- LEAD 425 Leadership and the Anxieties of Democracy

(There is no official Winter Study component to the American Foreign Policy Leadership track; students who wish to count a Winter Study course toward that track should contact the chair.)

For either track, students should check with the program chair to see if other courses not listed here might count as electives.

HONORS IN LEADERSHIP STUDIES
Although there currently is no Honors route in the Leadership Studies program, it often is possible for students pursuing the concentration to undertake an Honors project within their major disciplines on topics that enables them to develop and explore their interests in Leadership Studies. Faculty in the program are happy to discuss this possibility with concentrators and to help them develop suitable Honors thesis topics. In some cases, depending on the topic and the department involved, a faculty member in the program might also be able to serve as an official or unofficial co-supervisor for an Honors project in another discipline.

FAQ
Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?
Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the program chair.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?
Course title and description.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?
Not formally, but, typically, one course per semester abroad is counted toward the concentration.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?
No.

Are there specific major requirements that cannot be fulfilled while on study away?
Yes: the introductory course and the senior capstone.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)
Yes: the introductory course has historically been taught only in one semester (usually the fall).

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:
None to date.

LEAD 155  (F)  Visionaries, Pragmatists, and Demagogues: An Introduction to Leadership Studies
Cross-listings:  PSCI 155
Primary Cross-listing
This course introduces students to the major issues in the study of leadership, a central concept in the study of politics. The first part of the course will
examine key theoretical problems that have occupied political thinkers from Plato and Confucius to Machiavelli and the American framers: What makes a leader successful? What kinds of regimes best serve to encourage good leaders and to constrain bad ones? What is the relationship between leadership and morality—can the ends justify the means? What functions does leadership fill, and what challenges do leaders face, in modern democratic states? The second half of the course will look at leaders in action, charting the efforts of politicians, intellectuals, and grassroots activists to shape the worlds in which they live. Case studies will include antislavery politics and the American Civil War; the global crises of the 1930s and 1940s; and the social movements of the 1960s and 1970s. In addition to active class participation, students will be expected to write a 5-page proposal for a research paper on a leader of their choice, a 10-page research paper, an in-class midterm exam, and a cumulative, in-class final exam.

Requirements/Evaluation: active class participation, 5-page research proposal, 10-page research paper, in-class midterm exam, and a cumulative in-class final exam

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: first-year students and sophomores

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Unit Notes: subfield open in Political Science major

Distributions: (D2)

LEAD 205  (S)  From Tocqueville to Trump: Leadership and the Making of American Democracy  (DPE)

Cross-listings: PSCI 212

Primary Cross-listing

America's founders didn't mean to create a democracy as we would now understand the term. But since the Revolution, leaders have been fighting to make real for all Americans the promise of government of, by, and for the people. In this course, we will look at how leaders have marshaled ideas, social movements, and technological changes to expand the scope of American democracy—and the reasons they have sometimes failed. We will examine how founders such as Benjamin Franklin and James Madison envisioned the relation between the people and the government; how workers, African Americans, and women fought to participate in American politics; and how globalization, polarization, and inequality are straining American democracy and political leadership in the 21st century. We will examine leadership to better understand American democracy—and vice versa. We will ask: What explains why some leaders have succeeded where others have failed? Have some periods of American democratic politics been more amenable to particular kinds of leadership than others? What makes American political leadership distinctive in international comparison? Who, exactly, has been permitted to participate in American politics, and on what terms? How has the relation between the governors and the governed changed over time, and what factors and events have shaped those relations? How has America's democratic experiment compared with (and interacted with) democracy elsewhere in the world? Is America really a democracy at all?

Requirements/Evaluation: 5-page document analysis, 10-page review essay, midterm and final in-class exams

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Leadership Studies concentrators and Political Science majors

Expected Class Size: 25

LEAD 215  (S)  Race and Inequality in the American City  (DPE)

Cross-listings: PSCI 215

Secondary Cross-listing

In the past half-century, American cities have gotten both much richer and much poorer. The making of "luxury cities" has gone hand-in-hand with persistent, concentrated poverty, extreme racial segregation, mass incarceration, and failing public services-social problems borne primarily by people of color. This course will examine the political underpinnings of inequality in American cities, with particular attention to the racialization of inequality. Among the topics we will cover are: the structures of urban political power; housing and employment discrimination; the War on Crime and the War on Drugs (and their consequence, mass incarceration); education; and gentrification. We will ask: How have city leaders and social movements engaged with urban problems? How have they tried to make cities more decent, just, and sustainable? Under what circumstances has positive leadership produced beneficial outcomes, and in what circumstances has it produced perverse outcomes? We will engage primarily with political science, but also with scholarship in other disciplines, including sociology, history, geography, and legal studies, all of which share an interest in the questions we will be exploring. Students will leave this course with a deeper understanding of contemporary urban problems, a knowledge of the political structures within which those problems are embedded, and a better sense of the challenges and opportunities leaders face in contemporary urban America.

Requirements/Evaluation: class participation; several short essays and a longer paper with presentation

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Political Science majors and Leadership Studies concentrators

Expected Class Size: 25
Grading: no pass/fail option, no fifth course option
Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:
LEAD 215(D2) PSCI 215(D2)

Difference, Power, and Equity Notes: Deploying historical and social-scientific analysis, this course seeks to help students understand the historical roots and political underpinnings of unequal access to social goods in American cities, with particular attention to the racialization of inequality, compound deprivation, and unearned advantage.

LEAD 216 (S) American Constitutionalism I: Structures of Power
Cross-listings: PSCI 216

Secondary Cross-listing

How has the American Constitution been debated and understood over time? What is the relationship between constitutional and political change? This course examines the historical development of American constitutional law and politics from the Founding to the present. Our focus is on structures of power -- the limits on congressional lawmaking, growth of presidential authority, establishment of judicial review, conflicts among the three branches of the federal government, and boundaries between the federal and state and local governments. The specific disputes under these rubrics range from secession to impeachment, gun control to child labor, waging war to spurring commerce; the historical periods to be covered include the Marshall and Taney Court years, the Civil War and Reconstruction, the Progressive Era, the New Deal, the Warren Court, and the contemporary conservative ascendency. Readings are drawn from Supreme Court opinions, presidential addresses, congressional debates and statutes, political party platforms, key tracts of American political thought, and secondary scholarship on constitutional development. Throughout the semester, our goal will be less to remember elaborate doctrinal rules and multi-part constitutional "tests" than to understand the changing nature of, and changing relationship between, constitutional power and constitutional meaning in American history.

Class Format: discussion
Requirements/Evaluation: three essays (3-4 pages, 5-6 pages, 7-8 pages), a two-part final exam, and class participation
Prerequisites: none
Enrollment Limit: 25
Enrollment Preferences: Political Science majors
Expected Class Size: 18
Grading: no pass/fail option, yes fifth course option

How has the American Constitution been debated and understood over time? What is the relationship between constitutional and political change? This course examines the historical development of American constitutional law and politics from the Founding to the present. Our focus is on rights and liberties -- freedom of speech and religion, property, criminal process, autonomy and privacy, and equality. The specific disputes under these rubrics range from abortion to affirmative action, hate speech to capital punishment, school prayer to same-sex marriage; the historical periods to be covered include the early republic, the ante-bellum era, the Civil War and Reconstruction, World Wars I and II, the Warren Court, and contemporary America. Readings are drawn from Supreme Court opinions, presidential addresses, congressional debates and statutes, political party platforms, key
tracts of American political thought, and secondary scholarship on constitutional development. Throughout the semester, our goal will be less to remember elaborate doctrinal rules and multi-part constitutional "tests" than to understand the changing nature of, and changing relationship between, constitutional rights and constitutional meaning in American history.

LEAD 218 (S) The American Presidency

Cross-listings: PSCI 218

Secondary Cross-listing

Impeachments. Investigations. Polarization. Did Donald Trump's tenure fundamentally alter the institution of the presidency? Or are its most significant features enduring? To study the presidency is to study human nature and individual personality, but also constitution and institution, rules and norms, bureaucracy and administration, strategy and contingency. This course examines the problems and paradoxes that attend the exercise of the most powerful political office in the world's oldest democracy: Can an executive office be constructed with sufficient energy to govern and also be democratically accountable? What are the limits on presidential power and what are the expectations of presidential performance? How much do we attribute the shaping of politics and policy outcomes to the agency of the individual in the office and to what extent are they the result of underlying structural, cultural, and institutional factors? How is the office and purpose of the presidency affected by an economic order predicated on private capital? By the character of the occupant? By the inter-branch interactions; party, social movement, and interest group relations; and media interactions. Attention will focus largely on the modern, twentieth and twenty-first century, presidency, though older historical examples will also be used to help us gain perspective on how the presidency has changed over time and what the implications are for democratic governance.

Class Format: The course will feature both seminar discussion and several small group research projects.

Requirements/Evaluation: three 5 to 7-page papers, small group projects, oral presentations, and class participation involving weekly writing

Prerequisites: none

Difference, Power, and Equity Notes: This tutorial examines the Cold War between the US and the USSR and attempts to use intellectuals to shape and promote the objectives of powerful state entities. The power struggle between the two "superpowers" impacted cultural production and authors. Some of those authors influenced or enlisted into the Cold War sought equity and equality for their communities and eventually fought against the very political powers that employed them.

Not offered current academic year

LEAD 223 (S) Roman History

Cross-listings: HIST 223 / CLAS 223

Secondary Cross-listing

The history of ancient Rome can be seen as an account of formative events, practices, and thought in the history of western culture; it also is the history of the most far-reaching experience of diverse cultures, beliefs, and practices known in the Western tradition until modern times. By studying Roman history from Rome's emergence in central Italy in the 7th century BCE through the reign of the emperor Constantine in the early fourth century CE, we will see the complex and fascinating results of an ambitious, self-confident nation's evolution, transformation, and expansion throughout the Mediterranean world. We will consider questions such as, How did a republic with an aversion to autocratic rule and devotion to *libertas* understand its existence as an imperial power as well as its own elite's dominant rule over Romans and non-Romans alike? How and why did the Roman republic and its deeply entrenched republican ideology give way to the effective rule by one man, Augustus, and the increasingly monarchical rule of the emperors who followed? Did Roman political life in the later republic cause the violence that left it in crisis, or did the persistence of violence in Roman life account for the nature of Roman politics? Who were the non-elites of Rome, Italy, and the Roman empire that often get left in the shadows in our ancient sources? Who were the important writers, politicians, poets, philosophers, and innovators whose works constitute a rich cultural heritage worthy of both appreciation and critique? Throughout the course there will be an emphasis on the problems of historical and cultural interpretation, on how the Roman experience is relevant to our own, and, importantly, on the pleasures of historical investigation. Readings for this course will include a variety of original sources, a range of scholarly essays on specific topics, and a textbook that will provide our chronological framework.

Requirements/Evaluation: Class preparation and participation, quizzes, a midterm, a final exam, and occasional short written assignments.

Prerequisites: None; open to all

Enrollment Limit: 35

Enrollment Preferences: First-year students and sophomores; majors and intended majors in Classics, History, and Art History.

HIST 223(D2) LEAD 223(D2) CLAS 223(D1)
LEAD 225 (S) International Security

Cross-listings: PSCI 225

Secondary Cross-listing

This is a course about war and peace. It deals with some of the most foundational questions that concern scholars of security studies: What accounts for great power conflict and cooperation? Is intense security competition between major states inevitable, or can they get along, provided their main interests are protected? Does the structure of the international system necessarily cause conflict? Do particularly aggressive states? Can wars occur "by accident"? When and why do states choose to use military force? What role does statecraft play in matters of war and peace? How do nuclear weapons affect great power politics? The course will consider these questions from an interdisciplinary perspective that combines political science concepts with an historical approach to the evidence. The bulk of the course deals with the major events in the history of great power politics, such as the causes and conduct of World War I and World War II; the origins and course of the Cold War; the nuclear revolution; and the post-Cold War period. The course concludes with an examination of a number of major contemporary policy debates in security studies.

Requirements/Evaluation: class participation, two 6- to 8-page papers, final

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Political Science majors

LEAD 226 (S) Nuclear Weapons and World Politics

Cross-listings: PSCI 226

Secondary Cross-listing

This is a course about international politics in the nuclear age. The class will address a combination of conceptual, empirical, and policy questions, such as: Have nuclear weapons had a "revolutionary" effect on world politics, such that, fundamentally, international relations no longer works in more or less the same way that it did before the advent of nuclear weapons in 1945? Do nuclear weapons have an essentially stabilizing or destabilizing effect? How, if at all, do nuclear weapons affect how political disputes run their course? How significant of a threat are concerns like nuclear proliferation, nuclear terrorism, and nuclear accidents? How does a state's nuclear posture affect basic political outcomes? Is it possible to return to a world without nuclear weapons? The course will focus on these questions using an interdisciplinary perspective that leverages political science concepts, historical case studies, and contemporary policy debates to generate core insights. It will not only survey the history of the nuclear age--and of individual countries' nuclear development--but also grapple with important contemporary policy dilemmas in the nuclear realm.

Requirements/Evaluation: class participation; two 6-8 page papers; short in-class presentations; final exam

Prerequisites: PSCI 202 or a significant amount of other PSCI coursework

Enrollment Limit: 25

Enrollment Preferences: Preference to students majoring in political science, particularly in the international relations subfield, and/or doing a concentration in leadership studies

Expected Class Size: 20-25

Grading: no pass/fail option, yes fifth course option

LEAD 227  (F) International Relations of the Middle East

Cross-listings: PSCI 227

Secondary Cross-listing

This is a course about the Middle East in international politics. The structure of the course combines political science concepts with a detailed survey of the region's diplomatic history. The basic format of the course will be to combine brief lectures--either posted on the class website beforehand or given at the start of each class--with an in-depth discussion of each class session's topic. The goal of these discussions is to generate debates over the conceptual, historical, and policy significance of the subjects that we cover. Specifically, the first section of the course will cover the emergence of the Persian Gulf as an area of strategic importance in international politics; U.S. policy toward Saudi Arabia and Iran after World War II; the origins of the Arab-Israeli dispute; the June 1967 and October 1973 Middle East conflicts; Egyptian-Israeli peace; the Iranian Revolution and the Iran-Iraq War; the 1991 Persian Gulf War and its consequences; and the rise of Al Qaeda, Hezbollah, and Hamas. The second part of the course focuses on the Iraq War and its consequences; the rise of ISIS; the Arab Spring; Turkey's changing foreign relations; and the war in Syria. The last section of the course covers contemporary policy challenges confronting the Middle East.

Requirements/Evaluation: class participation, two 6- to 8-page papers, final

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Political Science majors with an International Relations concentration, History majors

Expected Class Size: 20-25

LEC Section: 01    TR 11:20 am - 12:35 pm    Galen E Jackson

LEAD 239  (S) Music in the Global Cold War  (WS)

Cross-listings: MUS 239

Secondary Cross-listing

Throughout the Cold War (1947-1991), music was deployed as a weapon, as a source of nationalist and ideological inspiration, as a form of political protest and resistance, and as propaganda. Music both echoed and helped shape political views and, therefore, prompted various forms of regulation and censorship (McCarthyism in the U.S.; the Union of Soviet Composers). To counter Soviet claims of American cultural inferiority and racism, the U.S. sponsored numerous musical diplomacy efforts showcasing both jazz (Armstrong; Ellington; Brubeck) and classical musicians and composers (Bernstein; American orchestras). Cold War politics and the threat of nuclear war influenced musical styles (Copland; Soviet Socialist Realism; the popular American folk music revival; serialism; rock behind the Iron Curtain), specific musical events (Tokyo East West Music Encounter; concerts celebrating the fall of the Berlin Wall), and individual careers (Shostakovich; Robeson; Van Cliburn). To investigate music's political roles and capacity for expressing communist and democratic capitalist ideologies, we will adopt a case study approach. The Cold War was a global political and, frequently, militaristic struggle. Though our focus will be on music in the U.S.S.R. and U.S.A., we will also consider musical developments impacted by the Cold War throughout Western and Eastern Europe, in Latin America, and in East Asia.
LEAD 240 (F) Great Astronomers and Their Original Publications

Cross-listings: ASTR 240 / STS 240

Secondary Cross-listing

In this course we will study some of the greatest figures in astronomy and consider their leadership in advancing progress in the field. We will consider their lives and works, especially as represented by original copies of their books and other publications. These great astronomers include: 16th century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; Dialogo, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619, Rudolphine Tables 1627); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (Principia Mathematica: laws of universal gravitation and of motion, 1687); 18th century, Edmond Halley (Miscellanea curiosa, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (Atlas Coelestis, 1729); and William Herschel and Caroline Herschel (1781, 1798). Also, from more recent times in which original works are often articles rather than books: 20th century, Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble’s law, 1929); George Ellery Hale (Mt. Wilson Observatory 100” telescope, 1917; Palomar Observatory 200” telescope, 1948), Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); and 21st century: Wendy Freedman (Universe’s expansion rate, 2000s). First editions will be available in Williams’ Chapin Library of rare books, where we will meet in an adjacent classroom. We will also consider how such original materials are collected and preserved, and look at examples from the wider world of rarities, such as a leaf from the Gutenberg Bible (c. 1453) and a Shakespeare First Folio (1623, with a discussion of astronomical references in Shakespeare’s plays). The course will be taught in collaboration between an astronomer and a rare-books librarian, with remote lectures by experts from around the world.

Class Format: Meeting on campus in the Chapin Library classroom (Sawyer 452)

Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper; student choice of additional readings from a provided reading list

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: if overenrolled, preference by written paragraph of explanation of why student wants to take the course

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

LEAD 254  (F)  Sovereignty, Resistance, and Resilience: Native American Histories to 1865  (DPE)

Cross-listings:  AMST 254 / HIST 254

Secondary Cross-listing

This course surveys Native American/Indigenous North American histories from beginnings through the mid-nineteenth century, tracing the complex ways that sovereign tribal nations and communities have shaped Turtle Island/North America. Equally important, it reckons with the ongoing effects of these pasts in the twenty-first century, and communities' own forms of interpretation, critique, action, and pursuits of justice. It also introduces foundational methodologies in Native American and Indigenous Studies (NAIS) and strategies for pursuing decolonizing scholarship and action. Emphasis is on primary and secondary works produced by Indigenous authors/creators. Starting with the diversity of Indigenous societies that have inhabited and cared for lands and waters since "time out of mind," it foregrounds the complexity of Native peoples, nations, and worldviews situated in particular homelands, as well as accounts of origins and migrations. It addresses how societies confronted devastating epidemics resulting from the "Columbian Exchange," and contended with Euro-colonial processes of colonization, extraction, and enslavement. Indigenous nations' multifaceted efforts to maintain sovereignty and homelands through pervasive violence, attempted genocide, and dispossession are addressed, as well as forms of relations and kinship with African-American and Afro-Indigenous people. It concludes with how different communities negotiated the tumultuous eras of the American Revolution, forced removal in the 1830s, and Civil War, and created pathways for endurance, self-determination, and security in its aftermath. The course centers on Indigenous actors—intellectuals, diplomats, legal strategists, knowledge keepers, spiritual leaders, artists, and many others—and consistently connects historical events with present-day matters of land, historical memory, education, caretaking, and activism. Additionally, it provides an opportunity to engage with original materials in the Williams College Archives/Special Collections and Art Museum. While the scope of the course is continental and transoceanic, it devotes significant attention to the Native Northeast and the Stockbridge-Munsee Mohican homelands in which Williams College is located.

Class Format: Lecture with small- and whole-group discussions

Requirements/Evaluation: Attendance at lectures, active participation in class discussion, midterm exam, short essays based on readings and discussion topics, museum/archives exercise, final essay/project.

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History and American Studies majors, followed by first- and second-year students

Expected Class Size: 30-40

Grading:  no pass/fail option,  yes fifth course option

Distributions:  (D2)  (DPE)

LEAD 280  (S)  Emancipation to BlackLivesMatter

Cross-listings:  AFR 280 / HIST 280

Secondary Cross-listing

This introductory course surveys the cultural, political, and social history of African Americans from Reconstruction to the present. It offers a balance between a "top-down" and "bottom-up" approach and focuses primarily on African Americans' quest for citizenship, equality, justice, and opportunity. In addition to examining major historical developments and popular figures within the modern black past, we will explore the lesser-known histories of everyday people who helped shaped the black freedom struggle. In so doing, we will interrogate conventional narratives of progressive movements since emancipation. Some of the main topics include: the transition from slavery to freedom; the rise of Jim Crow and the politics of racial uplift; the Great Migration and the emergence of the New Negro; the Great Depression and the New Deal; World War II and the struggle for economic and racial
inclusion; the postwar period and the intersecting movements of Civil Rights and Black Power; and the impacts of deindustrialization and mass incarceration on the black community. We will end with a discussion of the Obama years and Black Lives Matter.

Class Format: Class will be a mix of lecture/seminar

Requirements/Evaluation: Students will be graded on class participation and will have two take-home essay examinations (a midterm and a final, each 6-8 pages). In addition, students will write two response papers (2-3 pages) and will complete a mapping project based on The Negro Motorist Green Handbook.

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Students with demonstrated interest in material. If the course is overenrolled, students will be asked to complete a questionnaire.

LEAD 290 (F) How Change Happens in American Politics (WS)

Cross-listings: PSCI 290

Secondary Cross-listing

An unprecedented assault on the U.S. Capitol, the rise of white nationalism, a pandemic, economic volatility, racial reckoning, the overturning of Roe v. Wade, and rapidly evolving environmental crises -- American politics in the last four years has been tumultuous. What might we expect to come next? From the Founding to the present, the American political order has undergone cataclysmic and thoroughgoing transformations, yet it has also proven to be remarkably stable and enduring. How can this be? Where do we find continuities and where upheavals? Who or what has been responsible for the continuities, and who or what for the changes? What sorts of transformations have been possible, and why -- what marriage of individual action and contextual factors have created political change in the past and in the present? Finally, what are the costs of change (and of continuity) -- and who pays them? In this tutorial, we assess American political change, or lack of, to gain a sense of the role that political leaders have played in driving change. We examine when and how individuals and leadership have mattered vis-à-vis broader historical and contextual factors, including war, economic developments, demographic change, and constitutional and institutional practices. We consider general models of change, as well as specific case studies, including civil rights and social justice for racial and ethnic groups, gender equality and family relations, and reactionary or traditionalist politics. Finally, we will look at arguments that America has been "exceptional" -- or, unlike other countries -- as well as critiques of these arguments to help us gain an understanding of future prospects for political transformation.

Requirements/Evaluation: participation in weekly meetings as well as 4 lead essays (5-6 pages) and 4 critiques (2 pages)

Prerequisites: one prior course in political science

Enrollment Limit: 10

Enrollment Preferences: Declared and prospective Political Science majors and Leadership Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:
LEAD 290(D2) PSCI 290(D2)

Writing Skills Notes: Extensive written feedback will be provided on tutorial essays and critiques. Additionally, the tutorial sessions will include attention to the quality of the written argument in the paper that is the focus of each session. At the end of the semester, students will be required to revise one of the tutorial papers incorporating the feedback, oral and written, provided by their tutorial partner and the instructor.

Attributes: LEAD Facets or Domains of Leadership POEC Depth PSCI American Politics Courses
LEAD 296 (S) Human Rights and National Security: Seeking Balance in the United States

Cross-listings: HIST 296

Secondary Cross-listing

This course will ask if ensuring collective security and preserving individual rights are inherently contradictory or if they may, in fact, be mutually reinforcing. Focusing on developments and issues within the United States since its founding, the class will explore how Americans have sought to reconcile concerns about national security and a broad array of rights in the past, and the implications of this history for contemporary debates. The course will challenge students to consider how debates over national security and rights have reflected broader partisan divides and served diverse political objectives. Moreover, students will explore how these debates reflected competing visions of national identity and purpose, and question how and why the costs of security measures disproportionately burdened people based on race and religious identification. The course will initially survey these issues through a historical lens, demonstrating how questions of security and rights have been present since the nation's founding. It will draw on key moments in U.S. history to explore issues of foreign subversion, dissent, surveillance, habeas corpus, presidential power in times of war, and border security and immigration. Familiarity with historic precedents will ensure that students are prepared to grapple with a closer examination of contemporary studies of refugees and immigration; cybersecurity and surveillance; domestic terrorism and hate crimes; and counter-terrorist detention and interrogation. Students will be assessed on participation, short writing assignments, and a group podcast project.

Requirements/Evaluation: Students will be assessed on participation, short writing assignments, and a group podcast project.

LEAD 301 (S) Museums: History and Practice

Cross-listings: ARTH 401 / ARTH 501

Secondary Cross-listing

Art museums express the cultural, aesthetic and social ideals of their period of formation and many of those ideals remain embedded in the values and practices of institutions today. Comparing institutions past and present internationally, seminar participants will envision the art museum's future while addressing programmatic and organizational challenges at this moment of participatory civic engagement and social, political unrest. With growing skepticism of institutional collecting practices and authoritative narratives, art museums, especially those in the US, face internal and external pressure to "decolonize" as they attempt to alter their canon through both acquisitions, deaccessioning and repatriation initiatives. There is pressure, as well, to embrace a more active role in climate and social justice movements. It is a time also marked by calls for compensation transparency, participatory decision making, staff and trustee diversity, and greater scrutiny of funders. The seminar will consider this environment against past and current norms of governance, management and curatorial policies and practices. We will examine the traditional role of architecture and installation in interpretation and experience, prevailing and proposed guidelines in the accessioning and deaccessioning of works of art and both internal and external attitudes towards the repatriation and restitution of cultural property. Studying museums ranging in size and type, seminar participants will hear how museum leaders are dealing with challenges to current practice in weekly zoom sessions. Participants will consider how future museums might strive to balance the institution's traditional roles with new civic and social responsibilities, mindful of financial stability in a market-driven, metric-conscious, not-for-profit environment, while addressing, in proposed program and practice, the demands on museums emanating from a more ethically insistent internal and external world.

Requirements/Evaluation: oral presentations and discussion in class and one seminar paper (with class presentation) at the end of the semester

Prerequisites: undergraduates should email michael.conforti@williams.edu to schedule a discussion before registering for the course
Enrollment Limit: 14
Enrollment Preferences: graduate students in the history of art, then senior undergraduate art history majors, then other undergraduates
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option

LEAD 311 (F) Congress
Cross-listings: PSCI 311
Secondary Cross-listing

Even before the pandemic, scholars, pundits, and the public thought Congress was in a state of crisis. Riven by polarized partisanship and gridlock, the most powerful assembly in the world seemed incapable of representing citizens and addressing problems. This seminar focuses on how Congress organizes itself to act as a collective body. In an organization comprised of equals, how and why do some senators and representatives acquire more power and authority than others? How does Congress act as an institution and not just a platform for 535 individuals? Why does Congress not act, especially when the U.S. confronts so many pressing problems, and how do legislators justify inaction? In what ways does this institution promote or hinder the legitimacy, responsiveness, and responsibility expected of a democratic governing institution?

Requirements/Evaluation: class participation, two short papers, and a final research paper

LEAD 315 (S) Parties in American Politics
Cross-listings: PSCI 315
Secondary Cross-listing

Is the American party system what's wrong with American politics? It has been said that parties are essential to democracy, and in the U.S., political parties have played a central role in extending democracy, protecting rights, and organizing power. But their worth is a continuing subject of debate. Although parties have been celebrated for linking citizens to their government and providing the unity needed to govern in a political system of separated powers, they have also been disparaged for inflaming divisions among people and grid-locking the government. Other critics take aim at the two-party system with the claim that the major parties fail to offer meaningful choices to citizens. This course will investigate this debate over parties by examining their nature and role in American political life, both past and present. Throughout the course, we will explore such questions as: What constitutes a party? For whom do they function? How and why have they changed over time? Why a two-party system, and what role do third parties play? Is partisanship good or bad for democracy? For governance? What is the relationship between parties and presidents? How does partisanship become tribalism or polarization, and can this be prevented? We will explore answers to these questions through seminar discussion, analytic essays,
and independent research culminating in the writing of a longer (15 to 20 page) research paper.  

**Requirements/Evaluation:** In addition to active seminar participation, students will be responsible for writing two shorter (5-7 page) papers and a longer research paper (15-20 pages).  

**Prerequisites:** prior political science course at the 200 or 300 level  

**Enrollment Limit:** 14

**LEAD 320 (F) Heroes and Villains: Iconic Leadership and the Politics of Memory**  

**Cross-listings:** PSCI 320  

**Primary Cross-listing**

Americans have been arguing intensely in recent years about how we should remember the leaders from our nation's past. Does Thomas Jefferson's
should belong on a university campus? Should college dorms be named for John C. Calhoun and Woodrow Wilson? Should Harriet Tubman's portrait replace Andrew Jackson's on the $20 bill? In this course we will look at how people in the United States and elsewhere have used their leaders' images to hash out larger political issues of national identity, purpose, and membership. Why has historical commemoration gotten so contentious—or has it always been contentious? What's really at stake when we depict our leaders? How (if at all) should we reconcile contemporary morality with historical context in assessing the leaders from our past? To address these questions, we will study portrayals of some of the most famous leaders in American history—including Alexander Hamilton, Abraham Lincoln, and Martin Luther King, Jr. Our sources will include political speeches, literature, film, and journalism as well as monuments and museum exhibits; though our examples will be drawn mostly from the United States, our conceptual framework will be transnational. As a final assignment, students will write an 18-20 page research paper on a topic of their choice related to the core themes of the course.

Requirements/Evaluation: Seminar participation, research proposal, peer workshop, research paper, in-class research presentation

Prerequisites: previous course in Leadership Studies, or Political Science, or permission of instructor

LEAD 330  (F) Senior Seminar: The Nuclear Revolution

Cross-listings: PSCI 420

Secondary Cross-listing

This is a course about international politics in the nuclear age. In broad terms, it focuses on a very basic question: Does international politics still work essentially the same way as it did in the prenuclear era, or has it undergone a "revolution," in the most fundamental sense of the word? The structure of the course combines political science concepts and historical case studies, with the goal of generating in-depth classroom debates over key conceptual, historical, and policy questions. The basic format of the course will be to combine very brief lectures with detailed class discussions of each session's topic. The course will begin--by focusing on the Manhattan Project--with a brief technical overview of nuclear physics, nuclear technologies, and the design and effects of nuclear weapons. The course will then examine the following subjects: the dropping of the atomic bombs on Japan; theories of the nuclear revolution; the early Cold War period; the development and implications of thermonuclear weapons; the Berlin and Cuban missile crises; nuclear accidents; nuclear terrorism and illicit nuclear networks; the future of nuclear energy; regional nuclear programs; preventive strikes on nuclear facilities; nuclear proliferation; and contemporary policy debates.

Requirements/Evaluation: class participation, three 8- to 10-page papers

Prerequisites: PSCI 202

LEAD 332 (F) New York City Politics: The Urban Crisis to the Pandemic (WS)

Cross-listings: PSCI 310

Secondary Cross-listing

This course examines New York City's political history from the 1970s to the present—a period during which the city underwent staggering economic and social changes. In the mid-1970s, New York was a poster child of urban crisis, plagued by arson and housing abandonment, crime, the loss of residents and jobs, and failing public services. By the early 21st century, the city had largely met these challenges and was once again one of the most diverse and economically vital places on earth—but also one marked by profound inequality. This course will examine how New Yorkers have contested core issues of capitalism and democracy—how those contests have played out as the city itself has changed and how they have shaped contemporary New York. Broad themes will include the city's role as a showcase for neoliberalism, neoconservatism, technocratic centrism, and progressiveism; the politics of race, immigration, and belonging; the relation of city, state, and national governments; and the sources of contemporary forms of inequality. Specific topics will include policing, school reform, and gentrification. As the primary assignment in the course, students will design, research, and write a 20-page paper on a topic of their choice.

Requirements/Evaluation: active class participation, 2-page preliminary proposal, 10-page research proposal, 2-page peer feedback, 18- to 20-page research paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Political Science majors and Leadership Studies concentrators

LEAD 396 (F) The Pivotal Decade--The 1970s Origins of Contemporary America

Cross-listings: HIST 396

Secondary Cross-listing

Often overshadowed by the long 1960s and the conservative ascendancy of the 1980s, the 1970s provides an important transitional moment for the United States. It was also a decade fraught with contradictions. On the one hand, Americans experienced widespread disillusionment with the power of the federal government to promote and protect the minority from the majority. Historians seeking to understand the collapse of the welfare state or the origins of white resistance to civil rights' initiatives often point to the 1970s as the time when the federal government shifted the burden of the social welfare system onto the market, state and local governments, and onto poor people themselves. And yet, the 1970s also saw an explosion of progressive social activism, as the women's movement, the gay rights movement, and the environmental movement, among others, all came into their own. Likewise, this was a time when U.S. realignment internationally and military overextension intersected with new hegemonies of human rights regimes, multinational corporations, and "globalization." This course will emphasize a wide array of social movements and activism—both left and right—and the interplay among formal politics, grassroots organizing, and popular culture. It will ask students to consider how and why the 1970s catalyzed many of the domestic and international dynamics and debates that define American politics and society today. Students will be assessed on participation, short response papers, and an individual research project culminating in a poster presentation. In Fall 2022, this course will be offered at both Amherst and Williams College campuses. There will be an end of the semester symposium at Williams College that all enrolled students are required to attend as part of the final project.

LEAD 425 (S) Senior Seminar: Leadership and the Anxieties of Democracy (WS)

Cross-listings: PSCI 357

Primary Cross-listing

This course, the senior capstone for Leadership Studies, examines the challenges and opportunities facing political leaders in contemporary liberal democracies. We will begin by seeking to place our current moment in the longer arc of history, examining the distinctive institutional and structural constraints facing contemporary political leaders and examining in detail previous eras in which the American political system has come under great pressure. Then, we will look at some important factors that shape how followers approach would-be leaders: inequality and economic precarity; identity and group consciousness; notions of membership, community, and hierarchy; and fraying institutions. While the course will focus primarily on the United States, our conceptual framework will be global. Our primary questions will be these: Why does transformative leadership seem so difficult today? How does political leadership in the 21st century differ from leadership in earlier eras? What conditions are necessary to sustain effective leadership in the contemporary world? As a final assignment, students will craft an 18-20-page research paper on a topic of their choice related to the themes of the course.

Requirements/Evaluation: Seminar participation, research proposal, peer workshop, research paper, in-class research presentation

Prerequisites: LEAD 155 or permission of the instructor

Enrollment Limit: 14

Enrollment Preferences: Open to Leadership Studies concentrators or with the permission of the instructor; preference given to Political Science majors
LEAD 12  (W) Principles and Practice of Effective Leadership

This course will examine issues related to effective leadership in a variety of contexts, primarily through the experience of guest lecturers. We will begin by identifying key principles of leadership with reference to several great leaders in history, moving on to consider contemporary topics such as personal responsibility, self-awareness development and service orientation. We will investigate the essential role that good communications skills play in exercising leadership. The majority of class sessions will feature distinguished guest speakers, several of whom are Williams alumni, who have held leadership roles in government, business, non-profit organizations, and healthcare. Probing our guests’ approaches to organizational leadership is the primary goal of this Winter Study. After each lecture, we will spend time in the next class sharing impressions, surprises and lessons learned. At the end of the course students will be required to present for 10-15 minutes. They will be expected to integrate lessons learned from others into their own nascent story of leadership in their own lives. In that sense this course will operate on three levels -- the intellectual, the personal and the practical. Fundamental to this exploration will be a simple, action-oriented question: now that you know more, how can you do more?

LEAD 15  (W) Leadership and The Good Life: Your First Decade After Williams

There is nothing quite like life in the Purple Valley, but many adventures await after Williams. Pondering what The Good Life might look like for you after graduation? Intrigued by exploring different paths and leadership styles across law, nonprofit, government, and business? Interested in developing and honing leadership, collaboration, prioritization, and strategic decision making skills that can benefit both your personal and professional life? Wondering how themes like curiosity, happiness, and creativity connect to designing a life as well as to leadership? We will have engaging conversations addressing these topics and many more. We will also be joined by guest speakers who have led interesting lives and become leaders in their fields since graduating from college. You will write five one-page papers over the course of winter study exploring ideas and topics discussed in class and in our readings. You will also write a short final paper. Outside of class, we will read a range of articles and insightful pieces as well as watch film clips and listen to podcasts that will inform our class discussions and help build valuable leadership skills for navigating life after Williams.
**LEAD 16 (W) Effective Oral Persuasion**

Clear and persuasive public speaking, whether before a small group or a much larger audience, is essential to implement effective leadership and career development. This course is designed to enhance a student's ability to develop a position on an issue and to advance and defend that position orally. During each class, students will make presentations ranging from 2-15 minutes and receive immediate feedback from the Instructors as well as class members. The class uses various exercises such Tell us Something, Teach us Something, Sell us Something, or Convince us of Something to learn and practice making oral presentations. The Course includes a segment of resume review and practice interviews for professional programs, internships, or full-time jobs. Outside professionals will be invited to conduct some of the practice interviews. The capstone event has each student select an issue of their choice and to advance and defend that position orally. Students are required to provide resource materials that they used to formulate their position prior to their final presentation. The course will normally meet for three sessions per week (M, T and Th) from 1:00 until 3:45 pm. Instructors: David Olson ‘71 and Stephen Brown ‘71 are experienced trial lawyers handling many types of civil cases in state and federal courts before judges and juries. Robert Schwed ‘71 is a corporate lawyer who specialized in private equity placements, venture capital transactions, and business between investor groups drawn from domestic and international clients. The Instructors have offered this Course jointly for 3 consecutive years. While no paper is required, Students will prepare and make one or more oral presentations during each session of the course ranging from 2-15 minutes each. The students will also listen to and critique each other’s presentations throughout the course. Frequent and thoughtful class participation is expected from each student.

**Requirements/Evaluation:** Presentation(s); Other: students are expected to speak every class anywhere from 2-15 minutes depending on the exercise

**Prerequisites:** none

**Enrollment Limit:** 10

**Enrollment Preferences:** All welcomed but if over subscribed preference for Seniors

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** David Olson, '71 is an experienced Trial Attorney who practiced in Cincinnati for 40+ years in state and federal courts and before administrative agencies. He has co-taught Winter Study courses since 2010.

**Attributes:** EXPE Experiential Education Courses  SLFX Winter Study Self-Expression  WELL Winter Study Wellness

Not offered current academic year

---

**LEAD 17 (W) Mindful Leadership: what do we need now?**

Do you have what should be a fulfilling life and yet you're not satisfied? If so, this is an opportunity to ask: "why do I do what I do," "what do I really want," and "what must I believe to live and lead differently?" This is the course that I wish I had taken while I was at Williams. In it, you will be invited to deepen into a more embodied way of knowing yourself, leading teams, and working in the professional world. You will harness your breath to further cultivate a grounded, impactful presence. You will transmute challenging emotions and stories into skillful communication and boundaries. You will practice integrity. You will give and receive compassion. You will become more aware of individual and team flow triggers. You will venture off-campus to explore the Clark and MASS MoCA-noticing how your intuition merges with others to guide collective movement and inquiry. Together, we will co-create a powerful, safe container in which to surrender, play, and create. You will develop deep, trust-based relationships. You will tune your nervous system. You will also be challenged-so as to become more skillful in navigating intensity. You will facilitate an experience for the class, then for a group or team. Then, you will co-lead a session for the Williams community. We will continue to ask: "what does our group need now" and adapt
accordingly. If you're into expanding your capacity to show up for life-and leading others-this is an opportunity to practice.

Requirements/Evaluation: Other: Regular engagement and reflection in class and with pod group; co-facilitate 30-min experience (aligned with the themes of this course) for the class, facilitate 10-min offering for a team/group; contribute to the design and facilitation of a mindful leadership event for the Williams community.

Prerequisites: None

Enrollment Limit: 18

Enrollment Preferences: Email Jamie a bit about yourself and your interest in leading others (hunt.jamie@gmail.com)

Expected Class Size: NA

Grading: pass/fail only

Unit Notes: Jamie '03 coaches changemakers to do what brings them alive. He is senior faculty at NOLS, an integral master coach, and he has worked with clients such as: Google, The Gates Foundation, Greenpeace, and MIT Solve. Still curious: jamiehunt.org

Attributes: EXPE Experiential Education Courses  SLFX Winter Study Self-Expression  STUX Winter Study Student Exploration  WELL Winter Study Wellness

Not offered current academic year

LEAD 18  (W)  Wilderness Emergency Care

This Winter Study course is for students who would like to participate in a 9 day, 72 hour comprehensive hands on in-depth look at the standards and skills of dealing with wilderness based medical emergencies. Topics that will be covered include, Response and Assessment, Musculoskeletal Injuries, Soft Tissue Injuries, Environmental Injuries, and Survival Skills. Additional topics, such as CPR, are also included. Students will be required to successfully complete the written and practical exams, and not miss any of the 9 classes to receive credit and WFR/CPR certification. The course runs 9 consecutive days straight from 9AM--5PM. The instructor will be provided by SOLO (Stonehearth Open Learning Opportunities).

Requirements/Evaluation: written and practical exam

Prerequisites: none

Enrollment Limit: 22

Enrollment Preferences: submit a statement of purpose to the course sponsor, WOC Director, explaining why they want to take the course and hope to gain from the experience

Expected Class Size: 22

Grading: pass/fail only

Materials/Lab Fee: $475

Attributes: EXPE Experiential Education Courses

Not offered current academic year

LEAD 22  (W)  Ski Patrol - Outdoor Emergency Response

The course will teach and develop the technical proficiency and leadership skills required to effectively and efficiently administer emergency medical care in outdoor environments. Successful completion of written and practical exams, along with demonstrating ski/snowboard proficiency, can lead to certification as a member of the National Ski Patrol. The course is based upon implementing National Ski Patrol's Outdoor Emergency Care and Outdoor Emergency Transport curricula in a hands-on, "on-hill" environment. Students will spend approximately 12 hours per week learning and practicing Ski Patrol medical care and rescue techniques. Specifically, students will develop skills to recognize and provide emergency care for situations they learned about in prior first responder training (Outdoor Emergency Care, Wilderness First Responder, or Emergency Medical Technician): - Wounds and Burns - Environmental Emergencies (e.g., frostbite, hypothermia, heat exhaustion) - Musculoskeletal Trauma (e.g., breaks, strains, sprains, etc.) - Shock, Respiratory Emergencies, Poisoning, Substance abuse emergencies - Medical emergencies (e.g., heart attack, stroke, seizures, insulin shock, etc.) In the outdoor environment, students will practice the use of various types of splints, spinal motion restriction, bandaging, rescue/transport equipment, methods of extrication, use of oxygen, organization/prioritization of rescue tasks, and how to deal with unusual emergencies such as mass casualty incidents. Emphasis will be placed on the Leadership Skills required to handle complex and stressful emergency situations. Class meetings: ~8 hours/week at Jiminy Peak and ~4 hours/week on campus. Exact timing (morning vs. afternoon; 4 vs. 6 hours per meeting; etc.) will be determined based on student and instructor availability. Class attendance is mandatory. ~8 hours/week for homework/practice outside of class will be required. The course includes certification in CPR.

Requirements/Evaluation: Other: written and practical exams; on-hill skill proficiency & active participation
**Prerequisites:** Outdoor Emergency Care OR current certification as Wilderness First Responder or Emergency Medical Technician is REQUIRED. No exceptions.

**Enrollment Limit:** 16

**Enrollment Preferences:** Students will be chosen on the basis of having strong ski/snowboard ability and having the required medical training (OEC, WFR, EMT). Preference given to students who completed the Outdoor Emergency Care PE class in the preceding fall term.

**Expected Class Size:** NA

**Grading:** pass/fail only

**Unit Notes:** Tom Feist '85 started ski patrolling at Williams in 1981. He is a National Ski Patrol Instructor in Outdoor Emergency Care and Outdoor Emergency Transport. He instructed Chemistry at Williams and has taught the ski patrol class for 6 years.

**Attributes:** EXPE Experiential Education Courses  STUX Winter Study Student Exploration  WELL Winter Study Wellness

**LEAD 99  (W) Independent Study: Leadership Studies**

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

**Class Format:** independent study

**Grading:** pass/fail only

Not offered current academic year
How is language structured? What are the social forces associated with the development of language? How does the mind process and produce language? What are the best methods for teaching and learning a new language? Linguistics is a vibrant and multifaceted field that bridges the academic and the everyday. From Sociolinguistics to Linguistic Anthropology to Applied Linguistics, each of the various disciplines associated with the general area of Linguistics provides an illuminating perspective on the ways in which language works.

At Williams, students can gain insight into the intricacies of linguistic functions in courses located in several different academic units.
Materials Science is an interdisciplinary field which combines microscopic physics and chemistry in order to understand and control the properties of materials such as plastics, semiconductors, metals, liquid crystals, and biomaterials. Williams students with an interest in the properties of materials or in pursuing careers in materials science or a variety of engineering disciplines would benefit from following the courses in this program.
MAJOR IN MATHEMATICS

The major in Mathematics is designed to meet two goals: to introduce some of the central ideas in a variety of areas of mathematics and statistics, and to develop problem-solving ability by teaching students to combine creative thinking with rigorous reasoning. Mathematics is a gateway to many career paths including statistics, teaching, consulting, business, engineering, finance, actuarial studies and applied mathematics. Students are strongly encouraged to consult with the department faculty on choosing courses appropriate to an individualized program of study.

REQUIREMENTS (9 courses plus colloquium)

The major in Mathematics consists of nine courses taken at Williams plus the colloquium requirement. Mathematics is highly cumulative, and students should plan a route to completing the major that ensures the proper sequencing and prerequisites for all needed courses. Note that not all upper level courses are offered every year.
Calculus (2 courses)
Mathematics 140 Calculus II
Mathematics 150 or 151 Multivariable Calculus

Applied/Discrete Mathematics/Statistics (1 course)
or Mathematics 210 Mathematical Methods for Scientists (Same as Physics 210)
or Mathematics 200 Discrete Mathematics
or Statistics 201 Statistics and Data Analysis
Mathematics 309 Differential Equations
or a more advanced applied/discrete/statistics course with prior department approval

Core Courses (3 courses)
Mathematics 250 Linear Algebra
Mathematics 350 Real Analysis or Mathematics 351 Applied Real Analysis
Mathematics 355 Abstract Algebra

Completion (3 courses plus colloquium)
Two mathematics or statistics electives from courses numbered 300 and above
One Senior Seminar: Any mathematics or statistics course numbered between 400 and 479, taken at Williams College in the junior or senior year.
Participation in the Department Colloquium, in which all senior majors present a talk on a mathematical or statistical topic of their choice. Each major must attend at least 20 colloquia (reduced to 15 during the Academic Year 2020-2021), and up to 5 attendances may be counted in their junior year. Students engaged in study away may petition the department in advance to count up to 5 suitable colloquia attendances from their study away program.

Pass/Fail policies during the Academic Year 2020-2021
Information about the Department of Mathematics and Statistics Pass/Fail policies during the Academic Year 2020-2021 can be found [here](#).

ADVANCED PLACEMENT
Students who come to Williams with advanced placement will be moved up in the Mathematics major, and should consult with faculty to be placed in the best class reflecting their experience and background. A student who places out of a course substitutes another course of equal or higher level and numbered 200 or above in Mathematics or Statistics to complete the nine course major. Students should select courses best suited to their preparation and goals, and consult with the department faculty concerning appropriate courses and placement. The department reserves the right to refuse registration in any course for which the student is overqualified.

For Example, a student starting in MATH 130 might take MATH 130 and 140 the first year, MATH 150 and MATH 200 the second year, MATH 250 and MATH 350 the third year, MATH 355 and a senior seminar the fourth year, plus the two required electives some time. Students are encouraged to consult freely with any math faculty about course selection and anything else.

CALCULUS PLACEMENT
Recommended placement for students who have taken an Advanced Placement Examination in Calculus (AB or BC) is:

- BC 1, 2 or AB 2, 3 Math 140
- AB 4 or 5 Math 150
- BC 3, 4 or 5 Math 151

Consult with department faculty for any Calculus or Statistics placement questions. Students who have had calculus in high school, whether or not they took the Advanced Placement Examination, are barred from 130 unless they obtain permission from the instructor.

NOTES
Substitutions, Study Abroad, and Transfer Credit: In some cases, and with prior permission of the Mathematics and Statistics Department, appropriate courses from other institutions or a course from another Williams department may be substituted for electives. Programs like the “Budapest Semester in Mathematics” are recommended for majors who wish to focus on mathematics away. The department, though, normally
accommodates students who select other study away programs. The department offers its core courses in both the fall and the spring to allow students to spend more easily a semester away. The senior seminar requirement is expected to be fulfilled at Williams College.

Double Counting: No course may count towards two different majors.

Planning Courses: Core courses Mathematics 350/351 and 355, are normally offered every year. Most other 300-level topics are offered in alternate years. Topology, Complex Analysis, and second courses in real analysis and abstract algebra are normally offered at least every other year.

Each 400-level topic is normally offered every two to four years. Students should check with the department before planning far into the future.

Course Admission: Courses are normally open to all students meeting the prerequisites, subject to any course caps. Students with questions about the level at which courses are conducted are invited to consult department faculty.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. They have to be approved MATH/STAT courses.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Colloquium requirement, Senior Seminar requirement.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. The highly cumulative structure of the major.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn’t:

None to date.

THE DEGREE WITH HONORS IN MATHEMATICS

The degree with honors in Mathematics is awarded to the student who has demonstrated outstanding intellectual achievement in a program of study which extends beyond the requirements of the major. The principal considerations for recommending a student for the degree with honors will be: Mastery of core material and skills, breadth and, particularly, depth of knowledge beyond the core material, ability to pursue independent study of mathematics or statistics, originality in methods of investigation, and, where appropriate, creativity in research.

An honors program normally consists of two semesters (MATH/STAT 493 and 494) and a winter study (WSP 031) of independent research, culminating in a thesis and a presentation. Under certain circumstances, the honors work can consist of coordinated study involving a one semester (MATH/STAT 493 or 494) and a winter study (WSP 030) of independent research, culminating in a “minithesis” and a presentation. Note that during the Academic Year 2020-2021 the winter study requirement for thesis and “minithesis” is waved. At least one semester should be in addition to the major requirements, and thesis courses do not count as 400-level senior seminars.

An honors program in actuarial studies requires significant achievement on four appropriate examinations of the Society of Actuaries.

Highest honors will be reserved for the rare student who has displayed exceptional ability, achievement or originality. Such a student usually will have written a thesis, or pursued actuarial honors and written a mini-thesis. An outstanding student who writes a mini-thesis, or pursues actuarial honors and writes a paper, might also be considered. In all cases, the award of honors and highest honors is the decision of the Department.

APPLIED MATHEMATICS TRACK

Students interested in applied mathematics, engineering, or other sciences should consider:

Mathematics 140 Calculus II

Mathematics 150 or 151 Multivariable Calculus
Statistics 201 Statistics and Data Analysis
Mathematics 250 Linear Algebra
Mathematics 351 Applied Real Analysis
Mathematics 355 Abstract Algebra
Some programming or numerical analysis (e.g. MATH 361, 318T, or anything if you've had CSCI 134)
MATH 309 or Post-core Differential Equations/Numerical Methods
Senior seminar (e.g. Math Ecology MATH 410T or Mathematical Modeling MATH 433)

Other recommended courses: complex analysis, discrete mathematics (e.g. combinatorics or graph theory), operations research, optimization, probability, statistics, appropriate courses in Biology, Chemistry, Computer Science, Economics, Neuroscience, Physics, etc.

Williams has exchange and joint programs with good engineering schools. Interested students should consult the section on engineering near the beginning of the Bulletin and the Williams pre-engineering advisor for further information.

GRADUATE SCHOOL TRACK

Students interested in continuing their study of mathematics in graduate school should consider:

Mathematics 140 Calculus II
Mathematics 150 or 151 Multivariable Calculus
Mathematics 250 Linear Algebra
Mathematics 350 Real Analysis
Mathematics 355 Abstract Algebra
Complex Analysis
Topology
Some second semester analysis
Some second semester algebra
Some post-core geometry
Thesis

[With prior permission, in unusual circumstances, senior seminar can be waived in favor of harder post-core electives.]

Students headed for graduate school generally take more than this relatively small number of courses required for a liberal arts major. Reading knowledge of a foreign language (French, German, or Russian) can be helpful.

Students interested in studying statistics in graduate school should take STAT 201, 346, 360, a 400 level statistics course and MATH 350/351 and 341 in addition to their other math requirements.

OTHER CAREER PATHS

Other Graduate and Professional Schools: An increasing number of graduate and professional schools require mathematics and statistics as a prerequisite to admission or to attaining their degree. Students interested in graduate or professional training in business, medicine, economics, or psychology are advised to find out the requirements in those fields early in their college careers.

Statistics and Actuarial Science: Students interested in statistics or actuarial science should consider Mathematics 341, Statistics courses, and Economics 255. Additionally, students should consider taking some number of the actuarial exams given by the Society of Actuaries, which can constitute part of an honors program in actuarial studies (see section on honors above).

Teaching: Students interested in teaching mathematics at the elementary or secondary school level should consider courses on teaching, number theory, geometry, statistics, and practice as a tutor or teaching assistant. Winter study courses that provide a teaching practicum are also highly recommended. Consult the Program in Teaching (Professor Susan Engel) and the Office of Career Counseling.

Business and Finance: Students interested in careers in business or finance should consider Mathematics 333 and Statistics courses. Since these courses address different needs, students should consult with the instructors to determine which seem to be most appropriate for individuals.

There are three types of 300-level courses. There are the core courses: Real Analysis, MATH 350/351, and Abstract Algebra Math 355. There are
the “precore” courses, which do not have the core courses as prerequisites and have numbers 300-349. Finally, there are those courses that have an Abstract Algebra or Real Analysis prerequisite, which are numbered 360-399.

MATH 102  (F)  Foundations in Quantitative Skills
This course will strengthen a student's foundation in quantitative reasoning in preparation for the science curriculum and QFR requirements. The material will be at the college algebra/precalculus level, and covered in a tutorial format with students working in small groups with the professor. Access to this course is limited to placement by a quantitative skills counselor.

Requirements/Evaluation: homework, presentations during the tutorial meetings, and projects
Prerequisites: access to the course is limited to placement by a quantitative skills counselor
Enrollment Limit: 10
Enrollment Preferences: students who need most help with the quantitative reasoning
Expected Class Size: 10
Grading: no pass/fail option, no fifth course option
Distributions: (D3)

Fall 2024
TUT Section: T1    TBA     Julie C. Blackwood

MATH 113  (S)  The Beauty of Numbers  (QFR)
This course will be an introduction to number theory and mathematical thinking and logic, with emphasis throughout on mathematics as a way of thinking and approaching the world. Have you ever wondered what keeps your credit card information safe every time you buy something online? Number theory! Number Theory is one of the oldest branches of mathematics. In this course, we will discover the beauty and usefulness of numbers, from ancient Greece to modern cryptography. We will look for patterns, make conjectures, and learn how to prove these conjectures. Starting with nothing more than basic high school algebra, we will develop the logic and critical thinking skills required to realize and prove mathematical results. Topics to be covered include the meaning and content of proof, prime numbers, divisibility, rationality, modular arithmetic, Fermat's Last Theorem, the Golden ratio, Fibonacci numbers, coding theory, and unique factorization. This course is meant to give you an appreciation for numbers and mathematics and to enhance your logical reasoning skills. Although most people will not use calculus or geometry in their jobs or everyday lives, mathematics enhances our abilities to think logically and reason effectively. This skill is useful in all aspects of life. Number theory, in particular, is a great area of mathematics that allows one to jump in right away without a lot of pre-requisite knowledge. We will look at examples, look for patterns, make conjectures, and we will spend a lot of time learning how to rigorously prove those conjectures.

Requirements/Evaluation: projects, homework assignments, and exams
Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test) or permission of instructor. Anyone who has previously taken a 200-level math course or higher must obtain instructor permission to take the course.
Enrollment Limit: 25
Enrollment Preferences: If over-enrolled, course selection will be based on answers to a questionnaire.
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)  (QFR)
Quantitative/Formal Reasoning Notes: proof writing and logic

Spring 2025
LEC Section: 01    TR 11:20 am - 12:35 pm     Allison Pacelli

MATH 130  (F)(S)  Calculus I  (QFR)
Calculus permits the computation of velocities and other instantaneous rates of change by a limiting process called differentiation. The same process
also solves "max-min" problems: how to maximize profit or minimize pollution. A second limiting process, called integration, permits the computation of areas and accumulations of income or medicines. The Fundamental Theorem of Calculus provides a useful and surprising link between the two processes. Subtopics include trigonometry, exponential growth, and logarithms.

**Requirements/Evaluation:** Weekly homework and quizzes, 2 exams during the semester, and one final

**Prerequisites:** MATH 102 (or demonstrated proficiency on a diagnostic test); this is an introductory course for students who have not seen calculus before

**Enrollment Limit:** 50

**Enrollment Preferences:** first-year students

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** students who have previously taken a calculus course may not enroll in MATH 130 without the permission of instructor

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This a calculus course.

**MATH 140 (F)(S) Calculus II (QFR)**

Calculus answers two basic questions: how fast is something changing (the derivative) and how much is there (the integral). This course is about integration, and the miracle that unites the derivative and the integral (the Fundamental Theorem of Calculus.) Understanding calculus requires in part the understanding of methods of integration. This course will also solve equations involving derivatives ("differential equations") for population growth or pollution levels. Exponential and logarithmic functions and trigonometric and inverse functions will also play an important role. This course is the right starting point for students who have seen derivatives, but not necessarily integrals, before.

**Requirements/Evaluation:** homework, quizzes, and/or exams

**Prerequisites:** MATH 130 or equivalent; students who have received the equivalent of advanced placement of AB 4, BC 3 or higher may not enroll in MATH 140 without the permission of instructor

**Enrollment Limit:** 50

**Enrollment Preferences:** based on who needs calculus the soonest

**Expected Class Size:** 30

**Grading:** yes pass/fail option, yes fifth course option

**Unit Notes:** students who have higher advanced placement must enroll in MATH 150 or above

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This is a math class

**MATH 150 (F)(S) Multivariable Calculus (QFR)**

Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives, multiple integrals. There is also a unit on infinite series, sometimes with applications to differential
equations.

Requirements/Evaluation: Problem sets and exams
Prerequisites: MATH 140 or equivalent, such as satisfactory performance on an Advanced Placement Examination
Enrollment Limit: 50
Enrollment Preferences: Preference will be given to prospective math and stats majors, or students who need this as a course to serve as a prerequisite for other courses.
Expected Class Size: 40
Grading: yes pass/fail option, yes fifth course option
Unit Notes: Students with the equivalent of advanced placement of AB 4 or above should enroll in MATH 150, students with a BC 3 or higher should enroll in Math 151 when it is being offered, and Math 150 otherwise.
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: mathematics

MATH 151 (F) Multivariable Calculus (QFR)
Applications of calculus in mathematics, science, economics, psychology, the social sciences, involve several variables. This course extends calculus to several variables: vectors, partial derivatives and multiple integrals. The goal of the course is Stokes Theorem, a deep and profound generalization of the Fundamental Theorem of Calculus. The difference between this course and MATH 150 is that MATH 150 covers infinite series instead of the theorems of vector calculus. Students with the equivalent of BC 3 or higher should enroll in MATH 151, as well as students who have taken the equivalent of an integral calculus and who have already been exposed to infinite series. For further clarification as to whether MATH 150 or MATH 151 is appropriate, please consult a member of the math/stat department.

Requirements/Evaluation: problem sets and exams
Prerequisites: AP BC 3 or higher or integral calculus with infinite series
Enrollment Limit: 50
Enrollment Preferences: First-years, sophomores, and juniors
Expected Class Size: 40
Grading: yes pass/fail option, yes fifth course option
Unit Notes: MATH 151 satisfies any MATH 150 prerequisite; credit will not be given for both MATH 150 and MATH 151
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This course builds quantitative skills

MATH 197 (F) Independent Study: Mathematics
Directed 100-level independent study in Mathematics.
Requirements/Evaluation: decided by the department
MATH 198  (S) Independent Study: Mathematics
Directed 100-level independent study in Mathematics.

Requirements/Evaluation: decided by the department
Prerequisites: permission of the department
Enrollment Limit: 20
Enrollment Preferences: decided by the department
Expected Class Size: 1
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)

Not offered current academic year

MATH 200  (F)(S) Discrete Mathematics  (QFR)
In contrast to calculus, which is the study of continuous processes, this course examines the structure and properties of finite sets. Topics to be covered include mathematical logic, elementary number theory, mathematical induction, set theory, functions, relations, elementary combinatorics and probability, and graphs. Emphasis will be given on the methods and styles of mathematical proofs, in order to prepare the students for more advanced math courses.

Class Format: This will not be a typical lecture course; instead it will be a blend of lecture and discovery-based learning, with weekly small group meetings with TA's.

Requirements/Evaluation: Spring: Evaluation will be based on homework, exams, and participation in weekly small group meetings.
Prerequisites: Calculus at the level of an AP course or Williams College Math 130 or 140. Students who have taken a 300-level or 400-level math course should obtain permission of the instructor before enrolling.
Enrollment Limit: 40
Enrollment Preferences: Preference given to first and second year students intending to major in mathematics or computer science.
Expected Class Size: 40
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3)  (QFR)
Quantitative/Formal Reasoning Notes: This course involves developing the formal mathematical language of logic and set theory. It also involves using quantitative tools to solve problems relating to combinatorics, probability, number theory, and other fields of discrete mathematics.

MATH 210  (S) Mathematical Methods for Scientists  (QFR)
Cross-listings: PHYS 210

Secondary Cross-listing

This course covers a variety of mathematical methods used in the sciences, focusing particularly on the solution of ordinary and partial differential equations. In addition to calling attention to certain special equations that arise frequently in the study of waves and diffusion, we develop general techniques such as looking for series solutions and, in the case of nonlinear equations, using phase portraits and linearizing around fixed points. We study some simple numerical techniques for solving differential equations. An optional session in Mathematica will be offered for students who are not already familiar with this computational tool.

Class Format: three hours per week

Requirements/Evaluation: several exams and weekly problem sets, all of which have a substantial quantitative component

Prerequisites: MATH 150 or 151 and familiarity with Newtonian mechanics at the level of PHYS 131

Enrollment Limit: 50

Enrollment Preferences: sophomores and juniors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

PHYS 210(D3) MATH 210(D3)

Quantitative/Formal Reasoning Notes: This course will have weekly problem sets using advanced calculus methods

Spring 2025
LEC Section: 01    TR 9:55 am - 11:10 am    Frederick W. Strauch

MATH 250 (F)(S) Linear Algebra (QFR)

Many social, political, economic, biological, and physical phenomena can be described, at least approximately, by linear relations. In the study of systems of linear equations one may ask: When does a solution exist? When is it unique? How does one find it? How can one interpret it geometrically? This course develops the theoretical structure underlying answers to these and other questions and includes the study of matrices, vector spaces, linear independence and bases, linear transformations, determinants and inner products. Course work is balanced between theoretical and computational, with attention to improving mathematical style and sophistication.

Requirements/Evaluation: homework and exams

Prerequisites: MATH 150/151 or MATH 200

Enrollment Limit: 60

Enrollment Preferences: Students who have officially declared a major that requires Math 250.

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: In this course, students will engage in both quantitative and formal reasoning.

MATH 307  (S)  Computational Linear Algebra  (QFR)
Linear algebra is of central importance in the quantitative sciences, including application areas such as image and signal processing, data mining, computational finance, structural biology, and much more. When the problems must be solved computationally, approximation, round-off errors, convergence, and efficiency matter, and traditional linear algebra techniques may fail to succeed. We will adopt linear algebra techniques on a large scale, implement them computationally, and apply them to core problems in scientific computing. Topics may include: systems of linear and nonlinear equations; approximation and statistical function estimation; optimization; interpolation; data scraping; singular value decomposition; and more. This course could also be considered a course in numerical analysis or computational science.

Class Format: This course is taught in a flipped classroom format. Students read and watch lecture videos prior to each class session. The instructor uses class time for discussion and collaborative learning activities. This course will be a good fit for students with a strong interest in applied mathematics and a willingness to devote significant effort to learning/doing computer programming.

Requirements/Evaluation: Students will complete regularly assigned activities and problem sets. To move towards a non-hierarchical, transparent, and egalitarian grading system, the instructor combines mastery-based approaches with an ungrading scheme.

Prerequisites: MATH 250; CSCI 134 or equivalent prior experience with computer programming (in any language). These prerequisites will be strictly enforced.

Enrollment Limit: 24
Enrollment Preferences: Preference given to students who need to make use of linear algebra in their major fields of study. First-day attendance is required.
Expected Class Size: 24
Grading: no pass/fail option, no fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course involves developing the formal mathematical language of linear algebra. It also involves using quantitative tools to solve problems relating to a wide range of applications in the physical and social sciences.

Not offered current academic year
MATH 309  (F)(S)  Differential Equations  (QFR)
Ordinary differential equations (ODEs) frequently arise as models of phenomena in the natural and social sciences. This course presents core ideas of ODEs from an applied standpoint. Topics covered early in the course may include numerical solutions, separation of variables, integrating factors, and constant coefficient linear equations. Later, we will focus on nonlinear ODEs, for which it is usually impossible to find analytical solutions. Tools from dynamical systems will be introduced to allow us to obtain information about the behavior of the ODEs without explicitly knowing the solution.

Requirements/Evaluation: quizzes/exams, problem sets, participation
Prerequisites:  MATH 150/151 and MATH 250
Enrollment Limit:  40
Enrollment Preferences:  discretion of the instructor
Expected Class Size:  30
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D3)  (QFR)
Quantitative/Formal Reasoning Notes:  300-level mathematics course

MATH 311  (F)  Advanced topics in applied mathematics  (QFR)
Applied mathematics is an expansive field that uses mathematical methods to explore problems that arise in biology, physics, engineering, and many other disciplines. In this course, we will explore a diversity of methods that may include stochastic processes, optimization, signal processing, and numerical analysis. We will also explore how these methods can be utilized to understand questions in other disciplines.

Requirements/Evaluation:  This course will have some combination of problem sets, presentations, exams, and a final project
Prerequisites:  Differential equations (Math 309) or permission of the instructor
Enrollment Limit:  10
Enrollment Preferences:  If over-enrolled, the instructor will request a statement of interest
Expected Class Size:  10
Grading:  yes pass/fail option,  no fifth course option
Distributions:  (D3)  (QFR)
Quantitative/Formal Reasoning Notes:  Mathematics course

Not offered current academic year

MATH 313  (S)  Introduction to Number Theory  (WS)  (QFR)
The study of numbers dates back thousands of years, and is fundamental in mathematics. In this course, we will investigate both classical and modern questions about numbers. In particular, we will explore the integers, and examine issues involving primes, divisibility, and congruences. We will also look at the ideas of number and prime in more general settings, and consider fascinating questions that are simple to understand, but can be quite difficult to answer. This course will include a significant focus on mathematical proof writing and problem solving skills. This includes writing clear and rigorous mathematical proofs, clearly explaining mathematical ideas verbally and in writing, determining how to approach certain types of problems, looking for patterns and making conjectures, and asking good questions about the implications of certain ideas and theorems.

Requirements/Evaluation:  Problem sets, project, and exams
Prerequisites:  MATH 250 or permission of instructor
Enrollment Limit:  19
Enrollment Preferences:  If course is over-enrolled, enrollment preference will be based on answers to a questionnaire. Some preference will be given to students who have not yet had Math 355.
Expected Class Size:  19
MATH 314  (F)  Cryptography  (QFR)

We will discuss some classical ciphers, current assymetric cryptosystems (DES, AES, Rijndael), public key cryptosystems (RSA, Diffie-Hellman key exchange, ElGamal), and Error Correcting Codes. We will devote a substantial part of the semester covering the necessary mathematical background from number theory and asymptotic analysis. Time permitting, we may also discuss some special topics, such as primality testing (including the polynomial-time AKS algorithm), quantum computers, hash functions, digital signatures, zero-knowledge proofs, information theory, and elliptic curve cryptography.

Requirements/Evaluation:  exams, problem sets, quizzes
Prerequisites:  MATH 250 or permission of instructor.
Enrollment Limit:  30
Enrollment Preferences:  Juniors and seniors.
Expected Class Size:  20
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D3)  (QFR)

Quantitative/Formal Reasoning Notes:  The course will contain mathematical proofs.
Not offered current academic year

MATH 317  (F)  Introduction to Operations Research  (QFR)

In the first N math classes of your career, you can be misled as to what the world is truly like. How? You're given exact problems and told to find exact solutions. The real world is sadly far more complicated. Frequently we cannot exactly solve problems; moreover, the problems we try to solve are themselves merely approximations to the world! We are forced to develop techniques to approximate not just solutions, but even the statement of the problem. Additionally, we often need the solutions quickly. Operations Research, which was born as a discipline during the tumultuous events of World War II, deals with efficiently finding optimal solutions. In this course we build analytic and programming techniques to efficiently tackle many problems. We will review many algorithms from earlier in your mathematical or CS career, with special attention now given to analyzing their run-time and seeing how they can be improved. The culmination of the course is a development of linear programming and an exploration of what it can do and what are its limitations. For those wishing to take this as a Stats course, the final project must have a substantial stats component approved by the instructor.

Prerequisites:  Linear Algebra (MATH 250) and one other 200-level or higher CSCI, MATH or STATS course, or permission of the instructor.
Requirements/Evaluation:  homework, exams, projects
Prerequisites:  MATH 150, MATH 250 and one other 200-level or higher CSCI, MATH or STATS course, or permission from the instructor.
Enrollment Limit:  40
Enrollment Preferences:  Computer Science, Mathematics and Statistics majors
Expected Class Size:  25
Grading:  yes pass/fail option,  yes fifth course option
Unit Notes:  http://web.williams.edu/Mathematics/sjmiller/public_html/317/
Distributions:  (D3)  (QFR)
Quantitative/Formal Reasoning Notes:  300 level mathematics course.

MATH 319 (S) Integrative Bioinformatics, Genomics, and Proteomics Lab (QFR)

Cross-listings: BIOL 319 / CHEM 319 / CSCI 319 / PHYS 319

Secondary Cross-listing

What can computational biology teach us about cancer? In this lab-intensive experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, and phylogenetics to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high throughput approaches to investigate genes involved in the inflammatory and MAPK signal transduction pathways in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry may also be used to study networks of interacting proteins in colon tumor cells.

Class Format: The lab for this course will meet for two afternoons per week. Some lab sessions will be shorter than 3 hours.

Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and a CSCI course, or CSCI/PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Limit: 12

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
BIOL 319(D3) CHEM 319(D3) CSCI 319(D3) PHYS 319(D3) MATH 319(D3)

Quantitative/Formal Reasoning Notes: Through lab work, homework sets and a major project, students will learn or further develop their skills in programming in Python, and about the basis of Bayesian approaches to phylogenetic tree estimation.

Not offered current academic year

MATH 321 (S) Knot Theory (QFR)

Take a piece of string, tie a knot in it, and glue the ends together. The result is a knotted circle, known as a knot. For the last 100 years, mathematicians have studied knots, asking such questions as, "Given a nasty tangled knot, how do you tell if it can be untangled without cutting it open?" Some of the most interesting advances in knot theory have occurred in the last ten years. This course is an introduction to the theory of knots. Among other topics, we will cover methods of knot tabulation, surfaces applied to knots, polynomials associated to knots, and relationships between knot theory and chemistry and physics. In addition to learning the theory, we will look at open problems in the field.

Requirements/Evaluation: problem sets, midterms, a paper and a final exam

Prerequisites: MATH 250 or permission of instructor

Enrollment Limit: 30

Enrollment Preferences: seniors, junior, sophomores, first year

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This is a quantitative course.

Not offered current academic year
MATH 326 (F) Differential Geometry  (QFR)
Differential Geometry is the study of curvature. In turn, curvature is the heart of geometry. The goal of this course is to start the study of curvature, concentrating on the curvature of curves and of surfaces, leading to the deep Gauss-Bonnet Theorem, which links curvature with topology.

Class Format: lecture

Requirements/Evaluation: Evaluation will be based primarily on problem sets, midterms and a final exam

Prerequisites: MATH 250

Enrollment Limit: 30

Enrollment Preferences: Preference to mathematics majors.

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: It is a mathematics upper level course.

Fall 2024
LEC Section: 01    MWF 11:00 am - 11:50 am     Ivo  Terek

MATH 328 (S) Combinatorics  (QFR)
Combinatorics is a branch of mathematics that focuses on enumerating, examining, and investigating the existence of discrete mathematical structures with certain properties. This course provides an introduction to the fundamental structures and techniques in combinatorics including enumerative methods, generating functions, partition theory, the principle of inclusion and exclusion, and partially ordered sets.

Class Format: interactive activities and discussion

Requirements/Evaluation: quizzes/exams, homework, activities

Prerequisites: “MATH 250, and MATH 200 or permission of instructor”

Enrollment Limit: 30

Enrollment Preferences: discretion of the instructor

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This is an upper level course in mathematics

Not offered current academic year

MATH 329 (S) Discrete Geometry  (QFR)
Discrete geometry is one of the oldest and most consistently vibrant areas of mathematics, stretching from the Platonic Solids of the ancient Greeks to the modern day applications of convex optimization and linear programming. In this tutorial we will learn about polygons and their higher-dimensional cousins, polyhedra and polytopes, and the various ways to describe, compute, and classify such objects. We will learn how these objects and ideas can be applied to other areas, from computation and optimization to studying areas of math like algebraic geometry. Throughout this course we will be engaging with mathematical work and literature from as old as 500 BCE and as recent as "posted to the internet yesterday."

Requirements/Evaluation: Evaluation will be based primarily on participation, problem sets, oral presentations, a written midterm exam, an oral final exam, and a final project

Prerequisites: MATH 200 or Math 250, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: First-years and sophomores

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: All of the content in this course is quantitative or formal reasoning.

MATH 331  (F)  The little Questions (QFR)
Using math competitions such as the Putnam Exam as a springboard, in this class we follow the dictum of the Ross Program and "think deeply of simple things". The two main goals of this course are to prepare students for competitive math competitions, and to get a sense of the mathematical landscape encompassing elementary number theory, combinatorics, graph theory, and group theory (among others). While elementary frequently is not synonymous with easy, we will see many beautiful proofs and "a-ha" moments in the course of our investigations. Students will be encouraged to explore these topics at levels compatible with their backgrounds.

Requirements/Evaluation: homework, classwork, and exams
Prerequisites: MATH 250 or permission of instructor
Enrollment Limit: 30
Enrollment Preferences: members or alternates of the Putnam team, Mathematics, Physics or Computer Science majors
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Unit Notes: http://web.williams.edu/Mathematics/sjmiller/public_html/331Fa24/
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This is an upper level math course where students learn advanced material and solve challenging problems.

Fall 2024
LEC Section: 01    MWF 10:00 am - 10:50 am     Steven J. Miller

MATH 332  (F)  Topics in Applied Linear Algebra (QFR)
This course focuses on applications of Linear Algebra. We will start with a review of the material covered in Math 250, then move on to more advanced topics and applications. We will cover Singular Value Decomposition (SVD), QR factorization, Cholesky factorization, Least Squares problems, the Taylor approximation, the Regression model, Clustering techniques, as well as Linear Dynamical Systems and some of their applications.

Requirements/Evaluation: Homework assignments and exams.
Prerequisites: Math 250
Enrollment Limit: 30
Enrollment Preferences: Mathematics Majors, Seniors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)
Quantitative/Formal Reasoning Notes: This is an advanced mathematics course, building upon the core course Math 250 - Linear Algebra.

MATH 334  (S)  Graph Theory (QFR)
A graph is a collection of vertices, joined together by edges. In this course, we will study the sorts of structures that can be encoded in graphs, along with the properties of those graphs. We'll learn about such classes of graphs as multi-partite, planar, and perfect graphs, and will see applications to such optimization problems as minimum colorings of graphs, maximum matchings in graphs, and network flows.

Requirements/Evaluation: problem sets, exams, and a short final project
Prerequisites: MATH 200 or MATH 250
Enrollment Limit: 30
Enrollment Preferences: Math majors
Expected Class Size: 25
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

Quantitative/Formal Reasoning Notes: This course involves the writing of mathematical proofs.

Spring 2025
LEC Section: 01 MWF 9:00 am - 9:50 am Ralph E. Morrison

MATH 338 (F) Intermediate Logic (QFR)

Cross-listings: PHIL 338

Secondary Cross-listing

In this course, we will begin with an in-depth study of the theory of first-order logic. We will first get clear on the formal semantics of first-order logic and various ways of thinking about formal proof: natural deduction systems, semantic tableaux, axiomatic systems and sequent calculi. Our main goal will be to prove things about this logical system rather than to use this system to think about ordinary language arguments. In this way the goal of the course is significantly different from that of Logic and Language (PHIL 203). Students who have take PHIL 203 will have a good background for this class, but students who are generally comfortable with formal systems need not have taken PHIL 203. We will prove soundness and completeness, compactness, the Lowenheim-Skolem theorems, undecidability and other important results about first-order logic. As we go through these results, we will think about the philosophical implications of first-order logic. From there, we will look at extensions of and/or alternatives to first-order logic. Possible additional topics would include: modal logic, the theory of counterfactuals, alternative representations of conditionals, the use of logic in the foundations of arithmetic and Godel's Incompleteness theorems. Student interest will be taken into consideration in deciding what additional topics to cover.

Requirements/Evaluation: problem sets and exams
Prerequisites: some class in which student has studied formal reasoning
Enrollment Limit: 20
Enrollment Preferences: Philosophy majors; juniors and seniors
Expected Class Size: 15
Grading: yes pass/fail option, yes fifth course option
Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:
PHIL 338(D2) MATH 338(D3)

Quantitative/Formal Reasoning Notes: This is a class in Formal Logic. PHIL 203 satisfies the QFR requirement. If anything, this class will be significantly more formal.

Fall 2024
SEM Section: 01 TF 2:35 pm - 3:50 pm Keith E. McPartland

MATH 340 Applications of Mathematics to the Real World (QFR)

Often for real world applications one does not need to find the optimal solution, which can be extremely difficult, but instead just find something close, or at least better than what is currently being done. We will develop material and techniques from mathematics, statistics and allied fields with an eye to applications. In addition to standard homework assignments and exams there will be a group project where students will work with a local business, write a report and present the results. Pre-requisites are multivariable calculus and linear algebra, or permission of the instructor. Knowledge of some statistics or programming is beneficial but not required.

Class Format: In addition to standard lectures and assignments, we will be partnering with local businesses to apply mathematics to solve real world problems.

Requirements/Evaluation: Lectures and class participation, homework, exams and encouragement to do a project. We already have several local businesses with projects for students. Working on a project will entail meeting with officials from the company, clearly defining what the problem is, and writing a solution. This will include a presentation, a write-up, and potentially implementable code. Based on previous similar courses, these papers
typically run from 10 to 40 pages.

**Prerequisites:** Mathematics 150 or 151, and Linear Algebra, or permission of the instructor.

**Enrollment Limit:** 40

**Enrollment Preferences:** Students who have taken at least one statistics or computer science class

**Expected Class Size:** 25

**Grading:**

**Distributions:** (D3) (QFR)

**Quantitative/Formal Reasoning Notes:** This is a 300 level mathematics class

Not offered current academic year

**MATH 341 (F)(S) Probability (QFR)**

**Cross-listings:** STAT 341

**Primary Cross-listing**

The historical roots of probability lie in the study of games of chance. Modern probability, however, is a mathematical discipline that has wide applications in a myriad of other mathematical and physical sciences. Drawing on classical gaming examples for motivation, this course will present axiomatic and mathematical aspects of probability. Included will be discussions of random variables (both discrete and continuous), distribution and expectation, independence, laws of large numbers, and the well-known Central Limit Theorem. Many interesting and important applications will also be presented, including some from classical Poisson processes, random walks and Markov Chains.

**Requirements/Evaluation:** homework, classwork, and exams

**Prerequisites:** MATH 150 and MATH 250 or permission of the instructor

**Enrollment Limit:** 50

**Enrollment Preferences:** Priority will be given to Mathematics majors and to Statistics Majors.

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

STAT 341(D3) MATH 341(D3)

**Quantitative/Formal Reasoning Notes:** This is a 300-level Math/Stat course.

Fall 2024

LEC Section: 01 MWF 12:00 pm - 12:50 pm Mihai Stoiciu

Spring 2025

LEC Section: 01 TR 9:55 am - 11:10 am Steven J. Miller

**MATH 342 (F) Logic (QFR)**

This course will introduce the main ideas and basic results of mathematical logic, and explain their applications to other areas of mathematics and computer science. We will begin with a study of first-order logic, covering structures and definability, theories, models and categoricity, as well as formal proofs. We will prove Gödel's completeness and compactness theorems and the Lowenheim-Skolem theorems. The course will briefly dive into computability theory, enough to prove Gödel's Incompleteness theorems and basic undecidability results.

**Requirements/Evaluation:** Evaluation based on homework, exams, and class participation.

**Prerequisites:** Math 250 - Linear Algebra

**Enrollment Limit:** 20

**Enrollment Preferences:** Junior and Senior Math Majors

**Expected Class Size:** 20

**Grading:** yes pass/fail option, yes fifth course option
MATH 344  (S)  The Mathematics of Sports  (QFR)
The purpose of this class is to use sports as a springboard to study applications of mathematics, especially in gathering data to build and test models
and develop predictive statistics. Examples will be drawn from baseball, basketball, cross country, football, hockey, soccer, track, as well as class
choices. Pre-requisites are linear algebra (Math 250) and either a 200 level statistics class or a 100 level programming class, or permission of the
instructor.

Requirements/Evaluation:  Homework, exams, projects
Prerequisites:  Math 250: Linear Algebra
Enrollment Limit:  40
Enrollment Preferences:  None. If the course is over-enrolled preference will be given to math and stats majors, and then if needed by performance
on a small assignment.
Expected Class Size:  30
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D3)  (QFR)

MATH 345  (S)  Introduction to Numerical Analysis  (QFR)
Numerical analysis is the study of algorithms that use numerical approximation to solve problems which arise in scientific applications. This course
provides an introduction to the theory, development, and analysis of algorithms for obtaining numerical solutions. We will also use mathematical
software to facilitate numerical experimentation. Topics discussed in the course include: Error Analysis and Convergence Rates of Algorithms; Root
Finding for Nonlinear Equations; Approximating Functions; Numerical Differentiation and Integration; Numerical Solutions of Ordinary Differential
Equations; Iterative Methods for Solving Linear Systems.

Requirements/Evaluation:  Evaluation will be based on homework, projects, and exams.
Prerequisites:  Math 250 and Math 150/151
Enrollment Limit:  30
Enrollment Preferences:  Mathematics and Statistics majors.
Expected Class Size:  15
Grading:  yes pass/fail option,  yes fifth course option
Distributions:  (D3)  (QFR)

MATH 349  (F)  Operations of Order  (WS)  (QFR)
One of the greatest challenges in mathematics is justifying interchanging orders of operations. Most of the time you cannot switch orders. Frequently
this is obvious: the square root of a sum is typically not the sum of the square roots; however, there are many important situations where orders can be
reversed. The purpose of this class is to highlight some of the difficulties and dangers in such attempts. This will be a writing intensive course, where
we work on content for a book that collects counter-examples and theorems in one convenient place while also showcasing the utility of switching
orders. We will discuss at great lengths how to do engaging, technical writing, keeping in mind the content and the audience. Students will receive
feedback from the professor and probably other professional mathematicians and editors.
**Requirements/Evaluation:** Mix of homework, exams, and writing, including at least one chapter (consisting of theory, examples, images, homework problem creation and solutions).

**Prerequisites:** Math 250 or permission of the instructor.

**Enrollment Limit:** 19

**Enrollment Preferences:** If over-enrolled, students will be chosen uniformly at random.

**Expected Class Size:** 10

**Grading:** yes pass/fail option, yes fifth course option

**Distributions:** (D3) (WS) (QFR)
